A cumulative list of the parts affected this month can be found in the Reader Aids section at the end of this issue.
This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are key to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF LABOR

2 CFR Part 2998

29 CFR Parts 95 and 98

RIN 1291-AA38

Department of Labor Implementation of OMB Guidance on Nonprocurement Debarment and Suspension

AGENCY: Office of the Assistant Secretary for Administration and Management, Department of Labor (OASAM), Department of Labor

ACTION: Final rule; confirmation of effective date.

SUMMARY: On April 29, 2016, the Department of Labor, Office of the Assistant Secretary for Administration and Management (OASAM) published in the Federal Register a direct final rule to implement OMB Guidance on Nonprocurement Debarment and Suspension. The comment period for the direct final rule ended on May 31, 2016, with no comments received. For this reason, OASAM is confirming that the direct final rule became effective on May 31, 2016.

DATES: Effective date for the direct final rule that published on April 29, 2016 (81 FR 25585) was May 31, 2016.

FOR FURTHER INFORMATION CONTACT: T. Michael Kerr, Assistant Secretary for Labor for Administration and Management, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, authorized the preparation of this final rule.

Authority and Signature

T. Michael Kerr, Assistant Secretary for Labor for Administration and Management, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, authorized the preparation of this final rule.

Dated: September 16, 2016.

T. Michael Kerr,
Assistant Secretary for Administration and Management.

BILLY CODE 4510-7B-P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 906

[Doc. No. AMS–SC–16–0021; SC16–906–1 F1R]

Oranges and Grapefruit Grown in Lower Rio Grande Valley in Texas; Relaxation of Container and Pack Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Adoption of interim rule as final rule.

SUMMARY: The Department of Agriculture (USDA) is adopting, as a final rule, without change, an interim rule implementing a recommendation from the Texas Valley Citrus Committee (Committee) that relaxed the container and pack requirements prescribed under the marketing order for oranges and grapefruit grown in the Lower Rio Grande Valley in Texas (order). The Committee locally administers the order and is comprised of producers and handlers of Texas citrus operating within the area of production. The interim rule added the word “approximate” to the size specifications of three regulated containers to make the language consistent with other containers specified under the order. This change provides uniformity in the descriptions of containers and helps prevent potential compliance violations stemming from slight variations in container dimensions.

FOR FURTHER INFORMATION CONTACT: Doris Jamieson, Marketing Specialist, or Christian D. Nissen, Regional Director, Southeast Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (863) 324–3375, Fax: (863) 291–8614, or Email: Doris.jamieson@ams.usda.gov or Christian.Nissen@ams.usda.gov.

Small businesses may obtain information on complying with this and other marketing order and agreement regulations by viewing a guide at the following Web site: http://www.ams.usda.gov/rules-regulations/moa/small-businesses; or by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Richard.Lower@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 906, as amended (7 CFR part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas, hereinafter referred to as the “order.” The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.”

The Department of Agriculture (USDA) is issuing this rule in
conformance with Executive Orders 12866, 13563, and 13175.

The handling of oranges and grapefruit grown in the Lower Rio Valley in Texas is regulated by 7 CFR part 906. Prior to this change, the descriptions of three of the authorized containers specified exact dimensions whereas the remainder of the containers provide approximate dimensions. The Committee noted that with the containers with specific dimensions, container manufacturers could inadvertently generate containers that have a small variance in size from the specific requirements of the order, causing a handler to be out of compliance with order requirements. Therefore, this rule continues in effect the rule that added the word “approximate” in the description of the container sizes of the three containers with specific dimensions to make the language consistent with the descriptions of the other containers.

In an interim rule published in the Federal Register on June 15, 2016, and effective on June 16, 2016 (81 FR 38881, Doc. No. AMS–SC–16–0021, SC16–906–1 IR), § 906.340 paragraphs (a)(1)(i) through (iii) were amended by adding the word “approximate” to the size specifications of three regulated containers to make the language consistent with other containers specified under the order. This rule adds the word “approximate” to the size specifications of three regulated containers to make the language consistent with other containers specified under the order. This change provides uniformity in the descriptions of containers and helps prevent potential compliance violations stemming from slight variations in container dimensions. Authority for the change is provided in § 906.40.

This action is not expected to impose any additional costs on the industry. However, it is anticipated that this action will have a beneficial impact. Adding the word “approximate” to the dimension requirements for the containers with specific dimensions could prevent possible order violations or potential extra costs associated with replacing incorrect cartons should container manufacturers inadvertently generate containers that do not meet order requirements. The benefits of this rule are expected to be equally available to all fresh orange and grapefruit growers and handlers, regardless of their size.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35); and the E-Gov Act (44 U.S.C. 101). After consideration of all relevant material presented, it is found that finalizing the interim rule, without change, as published in the Federal Register (81 FR 38881, June 15, 2016) will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 906

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements.

PART 906—[AMENDED]

Accordingly, the interim rule that amended 7 CFR part 906 and that was published at 81 FR 38881 on June 15, 2016, is adopted as a final rule, without change.

Date: September 23, 2016.

Elanor Starmar,
Administrator, Agricultural Marketing Service.

[FR Doc. 2016–23502 Filed 9–29–16; 8:45 am]
On page 61131, first column, remove instruction from the final rule published on October 2, 2013 (78 FR 61113). The rule, which described how supply procurements should be classified, mistakenly attempted to amend a regulation by removing words that did not exist in the particular paragraph. This document corrects that rule document by removing the instruction.

FOR FURTHER INFORMATION CONTACT: Michael McLaughlin, Office of Policy, Planning & Liaison, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416; 202–205–5353; michael.mclaughlin@sba.gov.

SUPPLEMENTARY INFORMATION: On June 28, 2013, SBA published a rule in the Federal Register at 78 FR 38811 that amended § 121.404(b) by removing “and the date of certification by SBA” and adding in its place “and, where applicable, the date the SBA program office requests a formal size determination in connection with a concern that otherwise appears eligible for program certification.” The final rule published on October 2, 2013 (78 FR 61113) intended to amend 13 CFR 125.6(a) by removing “date of certification by SBA” and adding in its place “the Director of the Division of Program Certification and Eligibility or the Associate Administrator for Business Development requests a formal size determination in connection with a concern that otherwise appears eligible for program certification.” However, the amendment could not be implemented because at that point the words to be removed did not exist in § 121.404(b). Therefore, SBA is removing that instruction from the final rule published on October 2, 2013.

In the FR Rule Doc. No. 2016–22064 in the issue of October 2, 2013, beginning on page 61113, make the following correction:

- On page 61131, first column, remove amendatory instruction number 4c.
ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the installation of an inflatable four-point restraint safety belt with an integrated airbag device at the pilot and copilot seats on the DAHER–SOCATA, Model TBM 700 airplane. These airplanes, as modified by the installation of these inflatable safety belts, will have novel and unusual design features associated with the upper-torso restraint portions of the four-point safety belts, which contain an integrated airbag device. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: The effective date of these special conditions is September 30, 2016. We must receive your comments by October 31, 2016.

ADDRESSES: Send comments identified by docket number FAA–2016–9172 using any of the following methods:

- Federal eRegulations Portal: Go to http://www.regulations.gov and follow the online instructions for sending your comments electronically.
- Hand Delivery of Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- Fax: Fax comments to Docket Operations at 202–493–2251.
- Privacy: The FAA will post all comments it receives, without change, to http://regs.gov, including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the Federal Register published on April 11, 2000 (65 FR 19477–19478), as well as at http://DocketsInfo.dot.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Stegeman, Federal Aviation Administration, Aircraft Certification and Inspection, Small Airplane Directorate, ACE–111, 901 Locust, Room 301, Kansas City, MO; telephone (816)–329–4140; facsimile (816)–329–4090.

SUPPLEMENTARY INFORMATION: The FAA has determined, in accordance with 5 U.S.C. 553(b)(3)(B) and 553(d)(3), that notice and opportunity for prior public comment hereon are unnecessary because the substance of this special condition has been subject to the public comment process in several prior instances with no substantive comments received. The FAA, therefore, finds that good cause exists for making these special conditions effective upon issuance.

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions based on the comments we receive.

Background

On January 5, 2016, DAHER–SOCATA (SOCATA) applied for FAA validation for the optional installation of a four-point safety belt restraint system for the pilot and copilot seats and incorporating integrated inflatable airbags for both on the Model TBM 700 airplane. The Model TBM 700 airplane is a single-engine powering a four-bladed turbopropeller. It has a maximum takeoff weight of 6578 pounds (2984 kg). In addition to a pilot and copilot, it can seat up to five passengers.

The inflatable restraint systems are four-point safety belt restraint systems consisting of a lap belt and shoulder harness with an inflatable airbag attached to the shoulder harness straps. The inflatable portion of the restraint system will rely on sensors electronically activating the inflator for deployment.

If an emergency landing occurs, the airbags will inflate and provide a protective cushion between the head of the occupant (pilot and copilot) and the structure of the airplane. This will reduce the potential for head and torso injury. The inflatable restraint behaves in a manner similar to an automotive airbag; however, the airbag is integrated into the shoulder harness straps. Airbags and inflatable restraints are standard in the automotive industry; the use of an inflatable restraint system is novel for general aviation.

The FAA has determined that this project will be accomplished on the basis of providing the same level of safety as the current certification requirements of airplane occupant restraint systems. The FAA has the following two primary safety concerns with the installation of airbags or inflatable restraints that—

1. They perform properly under foreseeable operating conditions; and
2. They do not perform in a manner or at such times as to impede the pilot’s
ability to maintain control of the airplane or constitute a hazard to the airplane or occupants.

The latter point has the potential to be the more rigorous of the requirements. An unexpected deployment while conducting the takeoff or landing phases of flight may result in an unsafe condition. The unexpected deployment may either startle the pilot or generate a force sufficient to cause a sudden movement of the control yoke. Both actions may result in a loss of control of the airplane. The consequences are magnified due to the low operating altitudes during these phases of flight. The FAA has considered this when establishing these special conditions.

The inflatable restraint system relies on sensors to electronically activate the inflator for deployment. These sensors could be susceptible to inadvertent activation, causing deployment in a potentially unsafe manner. The consequences of an inadvertent deployment must be considered in establishing the reliability of the system. SOCATA must show that the effects of an inadvertent deployment in flight are not a hazard to the airplane and that an inadvertent deployment is extremely improbable. In addition, general aviation aircraft are susceptible to a large amount of cumulative wear and tear on a restraint system. The potential for inadvertent deployment may increase as a result of this cumulative damage. Therefore, the impact of wear and tear resulting with an inadvertent deployment must be considered. The effect of this cumulative damage means duration of life expectations must be established for the appropriate system components in the restraint system design.

There are additional factors to be considered to minimize the chances of inadvertent deployment. General aviation airplanes are exposed to a unique operating environment, since the same airplane may be used by both experienced and student pilots. The effect of this environment on inadvertent deployment must be understood. Therefore, qualification testing of the firing hardware and software must consider the following—

1. The airplane vibration levels appropriate for a general aviation airplane; and
2. The inertial loads that result from typical flight or ground maneuvers, including gusts and hard landings.

Any tendency for the firing mechanism to activate as a result of these loads or acceleration levels is unacceptable. Other influences on inadvertent deployment include High-Intensity Radiated Fields (HIRF) and lightning. Since the sensors that trigger deployment are electronic, they must be protected from the effects of these threats. To comply with HIRF and lightning requirements, the inflatable restraint system is considered a critical system, since its inadvertent deployment could have a hazardous effect on the airplane.

Given the level of safety of the occupant restraints currently installed, the inflatable restraint system must show that it will offer an equivalent level of protection for an emergency landing. If an inadvertent deployment occurs, the restraint must still be at least as strong as a Technical Standard Order approved belt and shoulder harnesses. There is no requirement for the inflatable portion of the restraint to offer protection during multiple impacts, where more than one impact would require protection.

Where installed, the inflatable restraint system must deploy and provide protection to the occupant under an emergency landing condition. The Model TBM 700 airplane seats are certified to the structural requirements of § 23.562; therefore, the test emergency landing pulses identified in § 23.562 must be used to satisfy this requirement.

A wide range of occupants may use the inflatable restraint; therefore, the protection offered by this restraint should be effective for occupants that range from the fifth percentile female to the ninety-fifth percentile male. Energy absorption must be performed in a consistent manner for this occupant range.

In support of this operational capability, there must be a means to verify the integrity of this system before each flight. SOCATA may establish inspection intervals where they have demonstrated the system to be reliable between these intervals.

An inflatable restraint may be armed even though no occupant is using the seat. While there will be means to verify the integrity of the system before flight, it is also prudent to require unoccupied seats with active restraints not pose a hazard to any occupant. This will protect any individual performing maintenance inside the cockpit while the aircraft is on the ground. The restraint must also provide suitable visual warnings that would alert rescue personnel to the presence of an inflatable restraint system.

The design must also prevent the inflatable seatbelt from being incorrectly buckled or lost after proper deployment of the airbag. SOCATA may show that such deployment is not hazardous to the occupant and will still provide the required protection.

The cabins of the SOCATA, Model TBM 700 airplane identified in these special conditions are confined areas, and the FAA is concerned that noxious gasses may accumulate if the airbag deploys. When deployment occurs, either by design or inadvertently, there must not be a release of hazardous quantities of gas or particulate matter into the cockpit.

An inflatable restraint should not increase the risk already associated with fire. The inflatable restraint should be protected from the effects of fire to avoid creating an additional hazard such as, a rupture of the inflator, for example.

Finally, the airbag is likely to have a large volume displacement, and possibly impede the egress of an occupant. Since the bag deflates to absorb energy, it is likely that the inflatable restraint would be deflated at this time an occupant would attempt egress. However, it is appropriate to specify a time interval after which the inflatable restraint may not impede rapid egress. Ten seconds has been chosen as reasonable time. This time limit offers a level of protection throughout an impact event.

Type Certification Basis

Under the provisions of 14 CFR 21.17, SOCATA must show that the Model TBM 700 airplane continues to meet the applicable provisions of the applicable regulations in effect on the date of application for the type certificate. The regulations incorporated by reference in the type certificate are commonly referred to as the original type certification basis.

The certification basis also includes all exemptions, if any; equivalent level of safety findings, if any; and special conditions not relevant to the special conditions adopted by this rulemaking action.

If the Administrator determines that the applicable airworthiness regulations (i.e., 14 CFR part 23) do not contain adequate or appropriate safety standards for the inflatable restraint, as installed on the SOCATA, Model TBM 700 airplane because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

In addition to the applicable airworthiness regulations and special conditions, the Model TBM 700 airplane must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36, and the
FAA must issue a finding of regulatory adequacy under section 611 of Public Law 92–574, the Noise Control Act of 1972.

The FAA issues special conditions, as defined in § 11.19, under § 11.38 and they become part of the type certification basis under § 21.17(a)(2).

Special conditions are initially applicable to the models for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model.

**Novel or Unusual Design Features**

The SOCATA, Model TBM 700 airplane will incorporate the following novel or unusual design feature: Installation of inflatable four-point restraint safety belt with an integrated airbag device for the pilot and copilot seats.

**Discussion**

The purpose of the airbag is to reduce the potential for injury in the event of an accident. In a severe impact, an airbag will deploy from the shoulder harness in a manner similar to an automotive airbag. The airbag will deploy between the head of the occupant and airplane interior structure, which will provide some protection to the head of the occupant. The restraint will rely on sensors to electronically activate the inflator for deployment.

The Code of Federal Regulations states performance criteria for seats and restraints in an objective manner. However, none of these criteria are adequate to address the specific issues raised concerning inflatable restraints. Therefore, the FAA has determined that in addition to the requirements of part 21 and part 23, special conditions are needed to address the installation of this inflatable restraint.

Accordingly, these special conditions are adopted for the SOCATA, Model TBM 700 airplanes equipped with four-point inflatable restraints. Other conditions may be developed, as needed, based on further FAA review and discussions with the manufacturer and civil aviation authorities.

**Applicability**

As discussed above, these special conditions are applicable to the SOCATA, Model TBM 700 airplane. Should SOCATA apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, the special conditions would apply to that model as well.

**Conclusion**

This action affects only certain novel or unusual design features on one model of airplanes. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of these features on the airplane.

Under standard practice, the effective date of final special conditions would be 30 days after the date of publication in the Federal Register; however, as the certification date for the SOCATA, Model TBM 700 airplane is imminent, the FAA finds that good cause exists to make these special conditions effective upon issuance.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances, identified above, and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, notice and opportunity for prior public comment hereon are unnecessary and the FAA finds good cause, in accordance with 5 U.S.C. 553(b)(3)(B) and 553(d)(3), making these special conditions effective upon issuance. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

**Citation**

The authority citation for these special conditions is as follows:

**The Special Conditions**

The FAA has determined that this project will be accomplished on the basis of not lowering the current level of safety of the SOCATA, Model TBM 700 airplane occupant restraint systems. Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the SOCATA, Model TBM 700 airplane.

1. Installation of inflatable four-point restraint safety belt with an integrated airbag device:
   a. It must be shown that the inflatable restraint will deploy and provide protection under emergency landing conditions. Compliance will be demonstrated using the dynamic test condition specified in § 23.562(b)(2). It is not necessary to account for floor warpage, as required by § 23.562(b)(3), or vertical dynamic loads, as required by § 23.562(b)(1). The means of protection must take into consideration a range of stature from a 5th percentile female to a 95th percentile male. The inflatable restraint must provide a consistent approach to energy absorption throughout that range.
   b. The inflatable restraint must provide adequate protection for the occupant. In addition, unoccupied seats that have an active restraint must not constitute a hazard to any occupant.
   c. The design must prevent the inflatable restraint from being incorrectly buckled and incorrectly installed, such that the airbag would not properly deploy. It must be shown that such deployment is not hazardous to the occupant and will provide the required protection.
   d. It must be shown that the inflatable restraint system is not susceptible to inadvertent deployment as a result of wear and tear or the inertial loads resulting from in-flight or ground maneuvers (including gusts and hard landings) that are likely to be experienced in service.
   e. It must be extremely improbable for an inadvertent deployment of the restraint system to occur, or an inadvertent deployment must not impede the pilot’s ability to maintain control of the airplane or cause an unsafe condition or hazard to the airplane. In addition, a deployed inflatable restraint must be at least as strong as a Technical Standard Order, TSO–C114, certificated belt and shoulder harness.
   f. It must be shown that deployment of the inflatable restraint system is not hazardous to the occupant or will not result in injuries that could impede rapid egress. This assessment should include occupants whose restraint is loosely fastened.
   g. It must be shown that an inadvertent deployment that could cause injury to a standing or sitting person is improbable. In addition, the restraint must also provide suitable visual warnings that would alert rescue personnel to the presence of an inflatable restraint system.
   h. It must be shown that the inflatable restraint will not impede rapid egress of
the occupants 10 seconds after its deployment.

i. To comply with HIRF and lightning requirements, the inflatable restraint system is considered a critical system since its deployment could have a hazardous affect on the airplane.

j. It must be shown that the inflatable restraints will not release hazardous quantities of gas or particulate matter into the cabin.

k. The inflatable restraint system installation must be protected from the effects of fire such that no hazard to occupants will result.

l. There must be a means to verify the integrity of the inflatable restraint activation system before each flight or it must be demonstrated to reliably operate between inspection intervals.

m. A life limit must be established for appropriate system components.

n. Qualification testing of the internal firing mechanism must be performed at vibration levels appropriate for a general aviation airplane.

Issued in Kansas City, Missouri, on September 22, 2016.

Pat Mullen,
Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 25
[Docket No. FAA–2016–9225; Special Conditions No. 25–639–SC]

Special Conditions: Embraer S.A., Model ERJ 190–300 Series Airplanes; Electronic Flight Control System: Control Surface Position Awareness, Multiple Modes of Operation

AGENCY: Federal Aviation Administration (FAA), DOT.
ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Embraer S.A. Model ERJ 190–300 series airplanes. These airplanes will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport category airplanes. This design feature is a fly-by-wire electronic flight control system (EFCS) and no direct coupling from the flight deck controller to the control surface. As a result, the pilot is not aware of the actual control surface position. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Embraer S.A. on September 30, 2016. We must receive your comments by November 14, 2016.

ADDRESSES: Send comments identified by docket number FAA–2016–9225 using any of the following methods:

- Federal eRegulations Portal: Go to http://www.regulations.gov and follow the online instructions for sending your comments electronically.
- Hand Delivery or Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- Fax: Fax comments to Docket Operations at 202–493–2251.
- Privacy: The FAA will post all comments it receives, without change, to http://www.regulations.gov/, including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT’s complete Privacy Act Statement can be found in the Federal Register published on April 11, 2000 (65 FR 19477–19478), as well as at http://DocketsInfo.dot.gov.
- Docket: Background documents or comments received may be read at http://www.regulations.gov/ at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The substance of these special conditions has been subject to the public comment process in several prior instances with no substantive comments received. The FAA therefore finds that good cause exists for making these special conditions effective upon publication in the Federal Register.

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

We will consider all comments we receive by the closing date for comments. We may change these special conditions based on the comments we receive.

Background

On September 13, 2013, Embraer S.A. applied for an amendment to Type Certificate (TC) No. A57NM to include the new Model ERJ 190–300 series airplanes. The ERJ 190–300, which is a derivative of the ERJ 190–100 STD currently approved under TC No. A57NM, is a 97–114 passenger transport category airplane with two Pratt & Whitney Model PW1900G engines, a new wing design with a high aspect ratio and raked wingtip, and digital fly-by-wire EFCS with closed loop control for all surfaces and with full envelope protection.

The EFCS technology has outpaced the current airworthiness standards; therefore, the FAA required special conditions to ensure appropriate mode recognition by the flightcrew for events that significantly change the operating mode of the EFCS.

Type Certification Basis

Under the provisions of Title 14, Code of Federal Regulations (14 CFR) 21.101, Embraer S.A. must show that the ERJ 190–300 meets the applicable provisions of the regulations listed in Type Certificate No. A57NM or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA. Embraer S.A. must show that the ERJ 190–300 meets the applicable provisions of 14 CFR part 25, as amended by Amendments 25–1 through 25–137. If the Administrator finds that the applicable airworthiness regulations (i.e., 14 CFR part 25) do not contain adequate or appropriate safety standards for the ERJ 190–300 because of a novel
or unusual design feature, special conditions are prescribed under the provisions of §21.16. Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design features, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under §21.101. In addition to the applicable airworthiness regulations and special conditions, the ERJ 190–300 must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with §11.38, and they become part of the type certification basis under §21.101.

Novel or Unusual Design Features

The ERJ 190–300 will incorporate the following novel or unusual design features: A fly-by-wire EFCS and no direct coupling from the flight deck controller to the control surface.

Discussion

As a result of the EFCS and lack of direct coupling from the flight deck controller to the control surface, the pilot is not aware of the actual control surface position. Some unusual flight conditions, arising from atmospheric conditions and/or airplane or engine failures, may result in full or nearly full surface deflection. Unless the flightcrew is made aware of excessive deflection or impending control surface limiting, piloted or auto-flight system control of the airplane might be inadvertently continued in such a manner to cause loss of control or other unsafe stability or performance characteristics. The airworthiness standards do not contain adequate or appropriate safety standards for the conditions that result from the EFCS and lack of direct coupling from the flight deck controller to the control surface. To establish a level of safety equivalent to that established in the existing airworthiness standards.

To establish a level of safety equivalent to that established in the regulations, these special conditions are established. These special conditions require that the flightcrew receive a suitable flight control position annunciation when a flight condition exists in which nearly full surface authority (not crew-commanded) is being used. Suitability of such a display must take into account that some pilot-demanded maneuvers (e.g., rapid roll) are necessarily associated with intended full performance, which may saturate the surface. Therefore, simple alerting systems function in both intended and unexpected control-limiting situations. As a result, they must be properly balanced between providing necessary crew awareness and being a potential nuisance to the flightcrew. A monitoring system that compares airplane motion and surface deflection with pilot inputs could help reduce nuisance alerting.

These special conditions also address flight control system mode annunciation. Suitable mode annunciation must be provided to the flightcrew for events that significantly change the operating mode of the system but do not merit the classic “failure warning.” These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the ERJ 190–300 series airplanes. Should Embraer S.A. apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model of airplanes. It is not a rule of general applicability.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, because a delay would significantly affect the certification of the airplane, the FAA has determined that prior public notice and comment are unnecessary and impracticable, and good cause exists for adopting these special conditions upon publication in the Federal Register. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 25
Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the Embraer S.A. Model ERJ 190–300 series airplanes.

1. In addition to the requirements of 14 CFR 25.143, 25.671, and 25.672, the following requirements apply:

a. The system design must ensure that the flightcrew is made suitably aware whenever the primary control means is near the limit of control authority. Note: The term “suitably aware” indicates that annunciations provided to the flightcrew are appropriately balanced between nuisance and that necessary for crew awareness.

b. If the design of the flight control system has multiple modes of operation, a means must be provided to indicate to the flightcrew any mode that significantly changes or degrades the normal handling or operational characteristics of the airplane.

Issued in Renton, Washington, on September 23, 2016.
Michael Kaszycki,
Assistant Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; General Electric Company Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all General Electric Company (GE) GE90–76B, GE90–77B, GE90–85B, GE90–90B, and GE90–94B turbofan engines with high-pressure compressor (HPC) stage 8–10 spool, part numbers (P/Ns) 1694M80G04, 1844M90G01, or...
1844M00G02, installed. This AD was prompted by reports of cracks found on the seal teeth of the HPC stage 8–10 spool. This AD requires eddy current inspections (ECIs) or fluorescent penetrant inspections (FPIs) of the HPC stage 8–10 spool seal teeth and removing from service those parts that fail inspection. We are issuing this AD to prevent failure of the HPC stage 8–10 spool, uncontained rotor release, damage to the engine, and damage to the airplane.

DATES: This AD is effective November 4, 2016.

ADDRESSES: For service information identified in this final rule, contact General Electric Company, GE-Aviation, Room 265, 1 Neumann Way, Cincinnati, OH 45215, phone: 513–552–3272; email: aviation.fleetsupport@ge.com. You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125. It is also available on the Internet at http://www.regulations.gov by searching for and locating Docket No. FAA–2016–5307.

Examining the AD Docket
You may examine the AD docket on the Internet at http://www.regulations.gov for and locating Docket No. FAA–2016–5307; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: John Frost, Aerospace Engineer, Engine Certification Office, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7756; fax: 781–238–7199; email: john.frost@faa.gov.

SUPPLEMENTARY INFORMATION: Discussion
We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all GE GE90–76B, GE90–77B, GE90–85B, GE90–90B, and GE90–94B turbofan engines with HPC stage 8–10 spool, P/Ns 1694M80G04, 1844M00G01, or 1844M90G02, installed. The NPRM published in the Federal Register on April 11, 2016 (81 FR 21286). The NPRM was prompted by reports of cracks found on the seal teeth of the HPC stage 8–10 spool during shop visits. The cracks initiated due to higher than intended temperatures at the seal teeth and damage to seal teeth coating from heavy rubs into the honeycomb. GE is developing a modification to address the unsafe condition.

The NPRM proposed to require ECIs or FPIs of the HPC stage 8–10 spool seal teeth and removing from service those parts that fail inspection. We are issuing this AD to prevent failure of the HPC stage 8–10 spool, uncontained rotor release, damage to the engine, and damage to the airplane.

Comments
We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA’s response to each comment.

Support of the NPRM as Written
Boeing and United Airlines support the NPRM as written.

Request To Clarify Performance of ECI and FPI
Nao Seto requested that the FAA clarify with which service information the ECI and FPI will be performed. We agree. We added a statement to compliance paragraph (e) in this AD indicating the GE service documents in which guidance can be found for performing the ECI and the FPI.

Request To Clarify Supplementary Information
General Electric Aviation requested that the Discussion paragraph be changed to read as follows: “Based on recent testing, change the root cause of crack initiation from that of degraded surface properties caused by an alloy depletion zone (ADZ) to cracks initiated due to higher than intended temperatures at the seal teeth and damage to seal teeth coating from heavy rubs into the honeycomb.” Recent testing and analysis have shown that the temperatures in the seal teeth are higher than design intent. This elevated temperature increases the stress in the region of the seal teeth, aligning with the cracking observed. GE also completed testing to determine the impact of alloy depletion zone on material capability. Testing showed material capability was not impacted.

We agree. We oversaw the recent testing and analysis which supports the requested change. We changed the Discussion paragraph of this AD accordingly.

Request To Add Ultrasonic Inspection (USI) to the Compliance
GE requested that USI be added to the Compliance section as an alternate inspection method. Additionally, GE requested that we revise the Related Information paragraph (b)(2) of this AD by updating the service information to revision 1 based on the qualifying USI procedure.

We disagree. USI procedures are not an acceptable alternative to the existing ECI and FPI procedures specified in this AD. A USI is not a viable procedure for compliance at this time, therefore, we are not updating the service information in paragraph (b)(2) to Revision 1. We may consider an AMOC after sufficient substantiated data is presented to the FAA. We did not change this AD.

Conclusion
We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD as proposed.

Related Service Information
We reviewed GE Service Bulletins SB 72–1141 R00, dated December 2, 2015; and SB 72–1142 R00, dated November 30, 2015. The service information describes procedures for inspecting the HPC stage 8–10 spool seal teeth.

Costs of Compliance
We estimate that this AD affects 54 engines installed on airplanes of U.S. registry. We also estimate that it will take about 1 hour per engine to comply with this AD. The average labor rate is $85 per hour. We estimate 14 parts will fail inspection at a pro-rated cost of $400,000 per part. Based on these figures, we estimate the total cost of this AD to U.S. operators to be $5,604,590.

Authority for This Rulemaking
Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition...
that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a “significant regulatory action” under Executive Order 12866.

(2) Is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979).

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

§ 39.13 [Amended]

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

(a) Effective Date

This AD is effective November 4, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to General Electric Company (GE) GE90–76B, GE90–77B, GE90–85B, GE90–90B, and GE90–94B turbofan engines with a high-pressure compressor (HPC) stage 8–10 spool, part numbers 1694M90G04, 1844M90G01, or 1844M90G02, installed.

(d) Unsafe Condition

This AD was prompted by reports of cracks found on the seal teeth of the HPC stage 8–10 spool. We are issuing this AD to prevent failure of the HPC stage 8–10 spool, uncontained rotor release, damage to the engine, and damage to the airplane.

(e) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) Perform an eddy current inspection (ECI) or fluorescent penetrant inspection (FPI) of the seal teeth of the HPC stage 8–10 spool as follows:

(i) For HPC stage 8–10 spools with fewer than 11,000 cycles since new (CSN) on the effective day of this AD, inspect at the next shop visit after reaching 6,000 CSN, not to exceed 12,500 CSN.

(ii) For HPC stage 8–10 spools with 11,000 CSN or more on the effective day of this AD, inspect within the next 1,500 cycles in service.

(2) Remove from service any HPC stage 8–10 spool that fails the ECI or FPI required by paragraph (e)(1) of this AD and replace with a part eligible for installation.

(3) Guidance on performing the ECI and the FPI can be found in GE Service Bulletins (SBs) SB 72–1141 R00, dated December 2, 2015 and SB 72–1142 R00, dated November 30, 2015.

(f) Definition

For the purpose of this AD, an engine shop visit is the induction of an engine into the shop for maintenance during which the compressor discharge pressure seal face is exposed.

(g) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: ANE-AD-AMOC@faa.gov.

(h) Related Information

(1) For more information about this AD, contact John Frost, Aerospace Engineer, Engine Certification Office, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7756; fax: 781–238–7199; email: john.frost@faa.gov.

(2) GE SB 72–1141, R00, dated December 2, 2015 and GE SB 72–1142, R00, dated November 30, 2015, which are not incorporated by reference in this AD, can be obtained from GE, using the contact information in paragraph (h)(3) of this AD.

(3) For service information identified in this AD, contact General Electric Company, GE-aviation, Room 295, 1 Neumann Way, Cincinnati, OH 45215; phone: 513–552–3272; email: aviation.fleetsupport@ge.com.

(4) You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

(i) Material Incorporated by Reference

None.

Issued in Burlington, Massachusetts, on September 26, 2016.

Colleen M. D’Alessandro,
Manager, Engine & Propeller Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

RIN 2120–AA64

Airworthiness Directives; Honeywell International Inc. Turboprop and Turboshaft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Honeywell International Inc. (Honeywell) TPE331 model turboprop engines and TSE331–3U model turboshaft engines. This AD was prompted by the discovery of cracks in a 2nd stage compressor impeller during a routine shop visit. This AD requires removal of the 2nd stage compressor impeller. We are issuing this AD to prevent failure of the compressor impeller, uncontained part release, damage to the engine, and damage to the airplane.

DATES: This AD is effective November 4, 2016.

Examining the AD Docket

You may examine the AD docket on the Internet at http://www.regulations.gov by searching for and locating Docket No. FAA–2015–4866; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:
Joseph Costa, Aerospace Engineer, Los Angeles, California.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:
PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

(a) Effective Date

This AD is effective November 4, 2016.

(b) Affected ADs

None.

(c) Applicability

(d) Unsafe Condition

This AD was prompted by the discovery of cracks in a 2nd stage compressor impeller during a routine shop visit. We are issuing this AD to prevent failure of the compressor impeller, uncontained part release, damage to the engine, and damage to the airplane.

(e) Compliance

Comply with this AD within the compliance times specified, unless otherwise done.

(1) Remove from service the 2nd stage compressor impeller at next removal of the 2nd stage compressor impeller from the engine or before exceeding 11,500 cycles in service after the effective date of this AD, whichever occurs first.

(2) Reserved.

(f) Installation Prohibition

After the effective date of this AD, do not install a 2nd stage compressor impeller, part number (P/N) 893482–1 through –5, inclusive, or P/N 3107056–1 or P/N 3107056–2, into any engine.

(g) Alternative Methods of Compliance (AMOCs)

The Manager, Los Angeles Aircraft Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request.

(h) Related Information

(2) Honeywell SB TPE331–72–2208, dated July 29, 2014, which is not incorporated by reference in this AD, can be obtained from Honeywell, using the contact information in paragraph (h)(3) of this AD.

(3) For Honeywell service information identified in this AD, contact Honeywell International Inc., 111 S 34th Street, Phoenix, AZ 85034–2802; phone: 800–601–3099; Internet: https://myaerospace.honeywell.com/wps/portal/?ut/.

RIN 2120–AA64

Airworthiness Directives; Bell Helicopter Textron Canada Limited (Bell) Helicopters

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for Bell Model 427 and Model 429 helicopters. This AD requires replacing certain check valves. This AD also prohibits installing the affected check valves on any helicopter. This AD is prompted by a report of several cracked or leaking check valves which could result in loss of lubrication to the engine or transmission, failure of the engine or transmission, and subsequent loss of control of the helicopter.

DATES: This AD becomes effective October 17, 2016.

We must receive comments on this AD by November 29, 2016.

ADDRESSES: You may send comments by any of the following methods:

• Federal eRulemaking Docket: Go to http://www.regulations.gov. Follow the online instructions for sending your comments electronically.

• Fax: 202–493–2251.

• Mail: Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.

• Hand Delivery: Deliver to the “Mail” address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at http://www.regulations.gov by searching for and locating Docket No. FAA–2016–9144; or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the Transport Canada AD, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (telephone 800–647–5527) is in the ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

For service information identified in this final rule, contact Bell Helicopter Textron Canada Limited, 12,800 Rue de l’Avenir, Mirabel, Quebec J7J1R4; telephone (450) 437–2862 or (800) 363–8023; fax (450) 433–0272; or at http://www.bellcustomer.com/files/. You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

FOR FURTHER INFORMATION CONTACT: Rao Edupuganti, Aviation Safety Engineer, Regulations and Policy Group, Rotorcraft Directorate, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email rao.edupuganti@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not provide you with notice and an opportunity to provide your comments prior to it becoming effective.
However, we invite you to participate in this rulemaking by submitting written comments, data, or views. We also invite comments relating to the economic, environmental, energy, or federalism impacts that resulted from adopting this AD. The most helpful comments reference a specific portion of the AD, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit them only one time. We will file in the docket all comments that we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning this rulemaking during the comment period. We will consider all the comments we receive and may conduct additional rulemaking based on those comments.

Discussion

On December 7, 2015, Transport Canada issued AD No. CF–2015–29 to correct an unsafe condition for certain serial-numbered Bell Model 427 and Model 429 helicopters. Transport Canada advises that part numbered 209–062–001 check valves manufactured by Circor Aerospace as replacement parts have been found cracked or leaking on several helicopters. According to Transport Canada, these check valves are used in the lubrication systems of the Model 429 engines and main rotor transmission and the Model 427 engines. Finally, Transport Canada advises that loss of lubrication may cause catastrophic failure of the transmission or the engine, which could result in loss of control of the helicopter.

Transport Canada AD No. CF–2015–29 requires a one-time inspection of the transmission and engine check valves for cracks and leaks. If there is a crack or leaking fluid, the Transport Canada AD requires replacing the check valve before further flight. Otherwise, the Transport Canada AD requires replacing each check valve within 60 days for the main rotor transmission and one year for the engine with a check valve marked “TQL” as shown in the manufacturer’s service bulletins. The Transport Canada AD also prohibits installing a part number (P/N) 209–062–520–001 check valve on any helicopter if the check valve was manufactured by Circor Aerospace, marked “Circle Seal,” and manufactured between October 2011 and March 2015.

FAA’s Determination

These helicopters have been approved by the aviation authority of Canada and are approved for operation in the United States. Pursuant to our bilateral agreement with Canada, Transport Canada, its technical representative, has notified us of the unsafe condition described in its AD. We are issuing this AD because we evaluated all information provided by Transport Canada and determined the unsafe condition exists and is likely to exist or develop on other helicopters of these same type designs.

Related Service Information

AD Requirements

This AD requires, within 25 hours time-in-service (TIS), replacing the transmission and engine oil check valves.

This AD also prohibits installing a check valve P/N 209–062–520–001 that was manufactured by Circor Aerospace, marked “Circle Seal,” and marked with a manufacturing date code of “10/11” (October 2011) through “03/15” (March 2015) on any helicopter.

Differences Between This AD and the Transport Canada AD

The Transport Canada AD requires inspecting the valves for cracks and leaks to determine when they must be replaced. This AD requires replacing all check valves within 25 hours TIS.

Costs of Compliance

We estimate that this AD affects 105 (20 Model 427 and 76 Model 429) helicopters of U.S. Registry. We estimate that operators may incur the following costs in order to comply with this AD. At an average labor rate of $85, replacing each check valve (transmission or engine) will require about 1 work-hour, and required parts will cost $85. For the Model 427, we estimate a total cost of $170 per helicopter and $4,930 for the U.S. fleet. For the Model 429, we estimate a total cost of $340 per helicopter and $25,840 for the U.S. fleet. According to Bell’s service information some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage by Bell. Accordingly, we have included all costs in our cost estimate.

FAA’s Justification and Determination of the Effective Date

Providing an opportunity for public comments prior to adopting these AD requirements would delay implementing the safety actions needed to correct this known unsafe condition. Therefore, we find that the risk to the flying public justifies waiving notice and comment prior to the adoption of this rule because the actions required by this AD must be accomplished within 25 hours TIS, a very short interval for helicopters used in offshore transportation.

Since an unsafe condition exists that requires the immediate adoption of this AD, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in less than 30 days.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify that this AD:
1. Is not a “significant regulatory action” under Executive Order 12866; and
2. Is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVE

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–2017 Bell Helicopter Textron Canada Limited (Bell); Amendment 39–18667; Docket No. FAA–2016–9144; Directorate Identifier 2016–SW–014–AD.

(a) Applicability

This AD applies to Bell Model 427 and 429 helicopters, certified in any category, with an engine and transmission oil check valve part number (P/N) 209–062–520–001 manufactured by Circor Aerospace, marked “Circle Seal” and with a manufacturing date code of “10/11” (October 2011) through “03/15” (March 2015), installed.

(b) Unsafe Condition

This AD defines the unsafe condition as a cracked or leaking check valve. This condition, if not detected and corrected, could result in loss of lubrication to the engine or transmission, failure of the transmission or engine, and loss of control of the helicopter.

(c) Effective Date

This AD becomes effective October 17, 2016.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) Within 25 hours time-in-service:

(i) Replace each transmission oil check valve.

(ii) For Model 429 helicopters, replace each engine oil check valve.

(2) After the effective date of this AD, do not install any check valve P/N 209–062–520–001 manufactured by Circor Aerospace, marked “Circle Seal” and with a manufacturing date code of “10/11” (October 2011) through “03/15” (March 2015), on any helicopter.

(f) Alternative Methods of Compliance (AMOCS)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Rao Edupuganti, Aviation Safety Engineer, Regulations and Policy Group, Rotorcraft Directorate, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

(1) Bell Alert Service Bulletin (ASB) 427–15–37 for Model 427 helicopters and Bell ASB 429–15–23 for Model 429 helicopters, both dated September 4, 2015, which are not incorporated by reference, contain additional information about the subject of this final rule. For service information identified in this final rule, contact Bell Helicopter Textron Canada Limited, 12.800 Rue de l’Avenir, Mirabel, Quebec J7J1R4; telephone (450) 437–2862 or (800) 363–8023; fax (450) 433–0272; or at http://www.bellcustomer.com/files/.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

Modification of Class E Airspace; Napa, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the Class E airspace extending upward from 700 feet above the surface at Napa County Airport, Napa, CA, by removing an irregular shaped area located approximately 20 miles southwest of Napa County Airport. This airspace area is discontinuous from the airspace surrounding Napa County Airport and is not essential to instrument flight rules (IFR) operations at the airport. This action also updates the airport’s geographic coordinates, and is necessary for the safety and management of instrument flight rules (IFR) operations at the airport, with the minimum amount of airspace restriction.

DATES: Effective 0901 UTC, January 5, 2017. The Director of the Federal Register approves this incorporation by reference action under Title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.11A and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11A. Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Federal Aviation Administration (FAA), Docket Operations, 1200 New Jersey Avenue SE, West Bldg, Ground Floor, Rm. W12–140, Washington, DC 20590; Telephone: 1–800–647–5527, or 202–366–9826. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202–741–6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

SUPPLEMENTARY INFORMATION:
Authority for This Rulemaking
The FAA’s authority to issue rules
regarding aviation safety is found in
Title 49 of the United States Code.
Subtitle I, Section 106 describes the
authority of the FAA Administrator.
Subtitle VII, Aviation Programs,
describes in more detail the scope of the
agency’s authority. This rulemaking is
promulgated under the authority
described in Subtitle VII, Part A,
Subpart I, Section 40103. Under that
section, the FAA is charged with
prescribing regulations to assign the use
of airspace necessary to ensure the
safety of aircraft and the efficient use of
airspace. This regulation is within the
scope of that authority as it modifies
controlled airspace at Napa County
Airport, Napa, CA.

History
On July 19, 2016, the FAA published in the Federal Register a notice of proposed rulemaking (NPRM) to modify Class E airspace extending upward from 700 feet above the surface at Napa County Airport, Napa, CA (81 FR 46850) Docket FAA–2016–5574. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 97
[Docket No. 31094; Amdt. No. 3711]

Standard Instrument Approach
Procedures, and Takeoff Minimums
and Obstacle Departure Procedures;
Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective September 30, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 30, 2016.
addresses: Availability of matters incorporated by reference in the amendment as follows:

For Examination

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;
3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or;

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

For Further Information Contact:

Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

Supplementary Information:

This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removing SIAPs, Takeoff Minimums and/or ODPs. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A. The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the addresses section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmission. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on August 26, 2016.

John S. Duncan, Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

Part 97—Standard Instrument Approach Procedures

1. The authority citation for part 97 continues to read as follows:

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 97

[Docket No. 31095; Amdt. No. 3712]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective September 30, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and OD is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 30, 2016.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination
1. U.S. Department of Transportation, Docket Ops–M30, 1200 New Jersey
This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the ADDRESSES section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Aircraft traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on August 26, 2016.

John S. Duncan, Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97, (14 CFR part 97), is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/NAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 97

[Docket No. 31097; Amdt. No. 3714]

For Examination

1. U.S. Department of Transportation, Docket Ops–M30, 1200 New Jersey Avenue SE., West Bldg., Ground Floor, Washington, DC 20590–0001;
2. The FAA Air Traffic Organization Service Area in which the affected airport is located;
3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or;

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located. FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420) Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary.

This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the ADDRESSES section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs. The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to
SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on September 9, 2016.

John S. Duncan,
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal regulations, Part 97, (14 CFR part 97), is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

**PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES**

- 1. The authority citation for part 97 continues to read as follows:
  Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

  § 97.23, §7.25, §7.27, §7.29, §7.31, §7.33, §7.35 [Amended]

- 2. Part 97 is amended to read as follows:
  By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

**Effective Upon Publication**

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 97

[Docket No. 31096; Amdt. No. 3713]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective September 30, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 30, 2016.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

2. The FAA Air Traffic Organization Service Area in which the affected airport is located:
3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or

Availability
All SIAPs and Takeoff Minimums and ODPs are available online free of charge.

Visit the National Flight Data Center at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:
Thomas J. Nichols, Flight Procedure Standards Branch (AFS-420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removing SIAPs, Takeoff Minimums and/or ODPs. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference
The material incorporated by reference is publicly available as listed in the ADDRESSES section.
The material incorporated by reference describes SIAPs, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule
This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the
conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on September 9, 2016.

John S. Duncan,
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

2. Part 97 is amended to read as follows:

Fisheries of the Exclusive Economic Zone Off Alaska; Observer Coverage Requirements for Bering Sea and Aleutian Islands Management Area Trawl Catcher Vessels

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to modify observer coverage requirements for catcher vessels participating in the trawl limited access fisheries in the Bering Sea and Aleutian Islands management area (BSAI). This final rule allows the owner of a trawl catcher vessel to request, on an annual basis, that NMFS place the vessel in the full observer coverage category for all directed fishing for groundfish using trawl gear in the BSAI in the following calendar year. These regulations are necessary to relieve vessel owners who request full observer coverage of the reporting requirements and observer fee liability associated with the partial observer coverage category. Additionally, this final rule makes minor technical corrections to observer program regulations. This final rule is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP), and other applicable laws.

DATES: Effective October 31, 2016.

ADDRESSES: Electronic copies of the Regulatory Impact Review (RIR), the Initial Regulatory Flexibility Analysis (IRFA), and the Categorical Exclusion prepared for this action are available from www.regulations.gov (search NOAA–NMFS–2016–0020) or from the NMFS Alaska Region Web site at alaskafisheries.noaa.gov.

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this rule may be submitted by mail to NMFS Alaska Region, P.O. Box 21668, Juneau, AK.
Background
NMFS published a proposed rule to modify observer coverage requirements for catcher vessels participating in the trawl limited access fisheries in the BSAI on July 7, 2016 (81 FR 44251). The comment period on the proposed rule ended on August 8, 2016. Following is a brief description of the North Pacific Groundfish and Halibut Observer Program (Observer Program) and elements of the Observer Program impacted by this final rule. The preamble of the proposed rule (81 FR 44251, July 7, 2016) provides a more detailed description of the Observer Program and this action.

The Observer Program
Regulations implementing the Observer Program require observer coverage on fishing vessels and at processing plants to allow NMFS-certified observers (observers) to obtain information necessary for the conservation and management of the BSAI and Gulf of Alaska groundfish and halibut fisheries. The Observer Program was implemented in 1990 (55 FR 4839, February 12, 1990). In 2013, NMFS restructured the funding and deployment systems of the Observer Program (77 FR 70062, November 21, 2012). Under the restructured Observer Program, all vessels and processors in the groundfish and halibut fisheries off Alaska are placed into one of two categories: (1) The full observer coverage category, where vessels and processors obtain observer coverage by contracting directly with observer providers; and (2) the partial observer coverage category, where NMFS has the flexibility to deploy observers when and where they are needed, as described in the annual deployment plan that is developed by NMFS in consultation with the North Pacific Fishery Management Council (Council). NMFS funds observer deployment in the partial observer coverage category by assessing a 1.25 percent fee on the ex-vessel value of retained groundfish and halibut from vessels that are not in the full observer coverage category.

Regulations implementing the restructured Observer Program in 2013 placed all trawl catcher vessels in the full observer coverage category when participating in a catch share program with transferable prohibited species catch (PSC) limits. For trawl catcher vessels in the BSAI, the catch share programs with transferable PSC limits are the American Fisheries Act (AFA) pollock fisheries in the Bering Sea and the western Alaska Community Development Quota (CDQ) groundfish fisheries. All other trawl catcher vessels subject to observer coverage requirements in the BSAI are in the partial observer coverage category when participating in the BSAI trawl limited access fisheries.

Throughout this final rule, the trawl fisheries in the BSAI that are not part of a catch share program with transferable PSC limits are referred to collectively as “the BSAI trawl limited access fisheries.” Vessels participating in the BSAI trawl limited access fisheries primarily target Pacific cod or yellowfin sole. The BSAI trawl limited access fisheries are managed with halibut and crab PSC limits that apply to the directed fishery as a whole or to operational category and gear type. Section 3.5 in the RIR provides additional information about the BSAI trawl limited access fisheries, the Observer Program, and observer coverage categories.

Need for This Final Rule
Since 2013, for reasons detailed in the proposed rule for this action (81 FR 44251, July 7, 2016), NMFS has implemented an interim policy that allows an owner of a BSAI trawl catcher vessel to request, on an annual basis, placement in the full observer coverage category by submitting a letter of request to NMFS. Under the interim policy, the owner of a trawl catcher vessel complies with full observer coverage requirements but is not placed in the full observer coverage category by regulation. Therefore, the owner must continue to comply with the partial observer coverage category reporting requirements and associated observer fee liability. This results in the vessel owner paying costs for partial and full observer coverage and additional reporting requirements for those vessel owners that have requested full observer coverage under the interim policy. This final rule replaces the interim policy and establishes in regulation a process for the owner of a trawl catcher vessel to request placement in the full observer coverage category.

The major provisions of this final rule are summarized below. Additional detail about the rationale for the major provisions is found in the proposed rule for this action (81 FR 44251, July 7, 2016) and Sections 3.6 and 3.7 of the RIR.

1. Annual Request for Full Observer Coverage
This final rule allows the owner of a trawl catcher vessel to annually request full observer coverage in lieu of partial observer coverage for directed fishing for groundfish using trawl gear in the BSAI in the following year. This final rule establishes a regulatory process to allow the owner of a trawl catcher vessel to submit a request for full observer coverage to NMFS. NMFS will then place the vessel in the full observer coverage category for all directed fishing for groundfish using trawl gear in the BSAI in the following year.

This final rule does not restrict which trawl catcher vessel owners may request full observer coverage, allowing the owner of any trawl catcher vessel to request full observer coverage for all directed fishing for groundfish using trawl gear in the BSAI. This final rule does not alter existing observer coverage requirements for trawl catcher vessels delivering unsorted codends to a mothership in the BSAI.

2. Annual Deadline
This final rule establishes an annual deadline of October 15 for a trawl catcher vessel owner to request placement in the full observer coverage category for the following year.

This Final Rule
This final rule revises regulations at 50 CFR part 679 to establish a process to allow the owner of a trawl catcher vessel to request, on an annual basis, that NMFS place the vessel in the full observer coverage category for all directed fishing for groundfish using trawl gear in the BSAI in the following calendar year. This final rule adds a paragraph at § 679.51(a)(2)(i)(C)(4) describing a new vessel type under the list of catcher vessels in the full observer coverage category to allow this annual request for placement in the full observer coverage category for one year. This final rule adds a new paragraph at § 679.51(a)(4) to describe the requirements for this annual process.

The owner of a trawl catcher vessel that requests full observer coverage in lieu of partial observer coverage for all directed fishing for groundfish in the BSAI trawl limited access fisheries in the following year will submit the request to NMFS using the Observer Declare and Deploy System (ODDS), which is described at § 679.51(a)(1)(ii). Once a request is received, NMFS will consider the request and will notify the
vessel owner whether the request is approved or denied. This notification will occur through ODDS. Once NMFS has notified the vessel owner that a request to be placed in the full observer coverage category for the following year is approved, the owner and operator of the trawl catcher vessel are subject to full observer coverage requirements as described at §679.51(a)(2) for all directed fishing for groundfish using trawl gear in the BSAI in the following year. Once approved by NMFS for placement in the full observer coverage category, a trawl catcher vessel cannot be placed in the partial observer coverage category until the next year. Until NMFS provides notification of approval, a catcher vessel remains in the partial observer coverage category as described at §679.51(a)(1)(i).

The owner of a trawl catcher vessel placed in the full observer coverage category contracts directly with a permitted full coverage observer provider to procure observer services as described at §679.51(d). The owner of a trawl catcher vessel in the full observer coverage category is not required to log fishing trips in ODDS under §679.51(a)(1), and landings made by a vessel in the full observer coverage category are not subject to the 1.25 percent partial observer coverage fee under §679.55.

This final rule establishes an annual deadline of October 15 for a trawl catcher vessel owner to request that a trawl catcher vessel operating in the BSAI be placed in the full observer coverage category for the following year as described at §679.51(a)(4)(iii). NMFS will approve all requests that contain the information required by ODDS submitted on or before October 15. If NMFS denies a request to place a catcher vessel in the full observer coverage category, the catcher vessel will remain in the partial observer coverage category as described at §679.51(a)(1)(i).

This final rule specifies at §679.51(a)(4)(v) that if NMFS denies a request for placement in the full observer coverage category, NMFS will issue an Initial Administrative Determination, which will explain in writing the reasons for the denial. Under §679.51(a)(4)(vi), the vessel owner can appeal a denial to the National Appeals Office according to the procedures in 15 CFR part 906.

This final rule makes minor technical corrections to Observer Program regulations, and corrects inaccurate cross references in §679.84 and §679.93 to observational requirements in §679.51. This final rule also standardizes references to the observer sampling station and the Observer Sampling Manual throughout part 679, and updates check-in/check-out report submission methods by removing a discontinued email address in §679.5.

Comments and Responses

During the comment period for the proposed rule, NMFS received two letters of comment from two individuals, each letter containing two substantive comments. NMFS’ responses to these comments are presented below.

**Comment 1:** Both commenters expressed support for this action, noting that the vessels they represent will be positively impacted by this action and that the proposed rule is consistent with changes requested by industry in 2012, as well as the recommendations made by the Council in February 2016.

**Response:** NMFS acknowledges this comment.

**Comment 2:** Both commenters support all provisions of the final rule as proposed, and request the action be implemented as soon as possible.

**Response:** NMFS acknowledges this comment. To ensure this action is effective and allow at least 15 days for vessel owners to submit a full observer coverage request for the 2017 calendar year, an implementation year deadline has been added to this final rule as described in the following section.

Changes From the Proposed Rule

This final rule includes changes to the regulatory text published in the proposed rule. These changes are necessary to define an initial implementation deadline for the 2017 calendar year and to make a minor editorial correction to existing regulatory text that was inadvertently altered in the proposed rule.

**Initial Implementation Deadline for 2017**

The proposed rule for this action (81 FR 44251, July 7, 2016) proposed an annual deadline of October 15 for a trawl catcher vessel owner to request that a trawl catcher vessel operating in the BSAI be placed in the full observer coverage category for the following year. Because the effective date of this final rule is after October 15, 2016, the deadline for the 2017 calendar year is 15 days after the effective date of this final rule. This deadline for 2017 is necessary to provide an adequate amount of time after publication of the final rule in the Federal Register for the owner of a trawl catcher vessel to submit a full observer coverage request to NMFS.

Other Changes

NMFS corrects §679.51(a)(2)(i)(C)(2) by changing “while” to “when” to be consistent with the terminology used in existing regulations. NMFS removed the cross reference correction in §679.21 from this final rule because the cross reference was corrected in the final rule to implement salmon bycatch management measures under Amendment 110 to the BSAI FMP (81 FR 37534, June 10, 2016).

**OMB Revisions to Paperwork Reduction Act References in 15 CFR 902.1(b)**

Section 3507(c)(B)(i) of the Paperwork Reduction Act requires that agencies inventory and display a current control number assigned by the Director, Office of Management and Budget (OMB), for each agency information collection. Section 902.1(b) identifies the location of NOAA regulations for which OMB approval numbers have been issued. Because this final rule revises and adds data elements within a collection-of-information for recordkeeping and reporting requirements, 15 CFR 902.1(b) is revised to reference correctly the sections resulting from this final rule.

**Classification**

Pursuant to section 304(b)(1)(A) and 305(d) of the Magnuson-Stevens Act, the Administrator, Alaska Region, NMFS, determined that this final rule is necessary for the conservation and management of the BSAI trawl limited access fisheries and is consistent with the BSAI FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

**Small Entity Compliance Guide**

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a final regulatory flexibility analysis, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as “small entity compliance guides.” The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. The preamble to the proposed rule (81 FR 44251, July 7, 2016) and the preamble to this final rule serve as the small entity compliance guide for this action. Copies of the proposed rule, this final rule, and additional information about how to comply with other requirements of the Observer Program are available on the

Final Regulatory Flexibility Analysis

Section 604 of the Regulatory Flexibility Act (RFA) requires an agency to prepare a final regulatory flexibility analysis (FRFA) after being required by that section or any other law to publish a general notice of proposed rulemaking and when an agency promulgates a final rule under section 553 of Title 5 of the U.S. Code. The following paragraphs constitute the FRFA for this action. Section 604 describes the required contents of a FRFA: (1) A statement of the need for, and objectives of, the rule; (2) a statement of the significant issues raised by the public comments in response to the initial regulatory flexibility analysis, a statement of the assessment of the agency of such issues, and a statement of any changes made in the proposed rule as a result of such comments; (3) the response of the agency to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA) in response to the proposed rule, and a detailed statement of any change made to the proposed rule in the final rule as a result of the comments; (4) a description of and an estimate of the number of small entities to which the rule will apply or an explanation of why no such estimate is available; (5) a description of the projected reporting, recordkeeping and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; and (6) a description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes, including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

Need for and Objectives of This Rule

A description of the need for, and objectives of, this rule is contained in the preamble to the proposed rule and this final rule and is not repeated here. This FRFA incorporates the Initial Regulatory Flexibility Analysis (IRFA) (see ADDRESSES) and the summary of the IRFA in the proposed rule (81 FR 44251, July 7, 2016).

Summary of Significant Issues Raised During Public Comment

NMFS published a proposed rule to modify observer coverage requirements for catcher vessels participating in the BSAI trawl limited access fisheries on July 7, 2016 (81 FR 44251). An IRFA was prepared and summarized in the Classification section of the preamble to the proposed rule. The comment period on the proposed rule ended on August 8, 2016. NMFS received two letters of comment, each in support of the action as proposed. These comments letters did not address the IRFA. The commenters did request the rulemaking process be completed as soon as possible. The Chief Counsel for Advocacy of the SBA did not file any comments on the proposed rule.

Number and Description of Small Entities Directly Regulated by this Rule

This final rule directly regulates the owners of trawl catcher vessels that participate in the BSAI trawl limited access fisheries. The SBA has established size standards for all major industry sectors in the United States. For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide.

This final rule provides the owners of BSAI trawl catcher vessels that currently are placed in the partial observer coverage category the opportunity for placement in the full observer coverage category. In 2014, 100 catcher vessels used trawl gear in the BSAI. NMFS estimates that 13 of these trawl catcher vessels are directly regulated small entities. The owners of three of these catcher vessels requested to be placed in the full observer coverage category for all their BSAI trawl limited access fisheries during at least one year from 2013 through 2015.

Reporting, Recordkeeping and Other Compliance Requirements

This final rule includes one new reporting requirement and eliminates one reporting requirement for a vessel owner who requests placement of their vessels in the observer coverage category for a year. Any trawl catcher vessel owner who requests placement of their trawl catcher vessel in the full observer coverage category will be required to submit a request to NMFS. This request is a new reporting requirement and only applies to those catcher vessel owners who request placement of their vessel in the full observer coverage category. The reporting requirement to log fishing trips in ODDS does not apply to vessels in the full observer coverage category; therefore, this final rule removes the reporting requirement for these directly regulated small entities to log fishing trips in ODDS.

Description of Significant Alternatives to This Rule That Minimize Economic Impacts on Small Entities

The RFA requires identification of any significant alternatives to this rule that accomplish the stated objectives, consistent with applicable statutes, and that would minimize any significant economic impact of this rule on small entities. This final rule is expected to create a net benefit for the directly regulated small entities because it offers trawl catcher vessel owners an opportunity to change their observer coverage category. The benefits of this final rule to trawl catcher vessel owners are expected to outweigh the costs of paying for an observer to be on board the vessel during all groundfish fishing in the BSAI trawl limited access fisheries, and the cost of the annual request to NMFS. If the benefits to a catcher vessel owner do not outweigh the costs, a catcher vessel owner can choose not to request their vessel be placed in the full observer coverage category, and therefore, would not be impacted by this final rule.

The Council considered the status quo (Alternative 1) and two action alternatives (Alternative 2 and Alternative 3). Alternative 3 included one option and three suboptions. The preferred alternative (Alternative 3 with Suboption 3) described in this final rule provides the owners of BSAI trawl catcher vessels an option of requesting, on an annual basis, placement in the full observer coverage category rather than remaining in the partial observer coverage category. No new requirements are imposed under the preferred alternative unless the catcher vessel owner requests placement in the full observer coverage category. Of the action alternatives analyzed, the preferred alternative provides the most flexibility for the owner of a trawl catcher vessel to request full observer coverage in lieu of partial observer coverage.

Alternative 1 (status quo) would have continued to offer catcher vessel owners
the option of carrying full observer coverage under the interim policy, but would not remove the requirement in regulations for continued payment of the partial observer coverage fee in addition to the cost of full observer coverage. Alternative 2 is more restrictive than the preferred alternative because it would have permanently placed AFA trawl catcher vessels in the full observer coverage category rather than offering the vessel owners an option to request full observer coverage on an annual basis. Alternative 3 Option 1 would have allowed only the owners of AFA trawl catcher vessels to request placement in the full observer coverage category, rather than providing the opportunity to the owners of all BSAI trawl catcher vessels. Alternative 3 Suboption 2 would have established an earlier deadline to submit the request for full observer coverage than under the preferred alternative. Directly regulated small entities opposed the earlier deadline because they wanted more time to make business decisions about observer coverage in the following year. Alternative 3 Suboption 2 would have established a one-time request to be placed in the full observer coverage category rather than an annual request as under the preferred alternative. In summary, the preferred alternative of Alternative 3 with Suboption 3 (this final rule) offers the widest range of directly regulated small entities, as compared to all other alternatives.

Collection-of-Information Requirements

This final rule contains a collection-of-information requirement subject to the Paperwork Reduction Act (PRA) and which has been approved by the OMB under Control No. 0648–0731. The public reporting burden for Request for Full Observer Coverage Category is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments on these burden estimates or any other aspects of the collection of information, including suggestions for reducing the burden, to NMFS (see ADDRESSES), by email to OIRA_Submission@omb.eop.gov, or fax to (202) 395–5806.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number. All currently approved NOAA collections of information may be viewed at http://www.cio.noaa.gov/services_programs/prasubs.html.

List of Subjects

15 CFR Part 902

Reporting and recordkeeping requirements.

50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 15 CFR part 902 and 50 CFR part 679 as follows:

Title 15—Commerce and Foreign Trade

PART 902—NOAA INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL NUMBERS

1. The authority citation for part 902 continues to read as follows:

Authority: 44 U.S.C. 3501 et seq.

2. In §902.1, in the table in paragraph (b), under the entry “50 CFR” revise entry for “679.51” to read as follows:

§902.1 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

<table>
<thead>
<tr>
<th>CFR part or section where the information collection requirement is located</th>
<th>Current OMB control No. (all numbers begin with 0648–)</th>
</tr>
</thead>
<tbody>
<tr>
<td>50 CFR:</td>
<td>* * * * *</td>
</tr>
</tbody>
</table>

Title 50—Wildlife and Fisheries

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

3. The authority citation for 50 CFR part 679 continues to read as follows:

4. In §679.51:

a. Revise paragraphs (a)(2)(i)(C)(2) and (3); and

b. Add paragraphs (a)(2)(i)(C)(4) and (a)(4).

The revisions and additions read as follows:

§679.51 Observer requirements for vessels and plants.

(a) * * * * *

(b) * * * * *

(1) Using trawl gear or hook-and-line gear when groundfish CDQ fishing for groundfish CDQ fishing under §679.2, except for catcher vessels less than or equal to 46 ft LOA using hook-and-line gear when groundfish CDQ fishing under §679.32(c)(3)(ii);

(2) Participating in the Rockfish Program; or

(3) Using trawl gear in the BSAI if the vessel has been placed in the full observer coverage category under paragraph (a)(4) of this section.

(4) BSAI trawl catcher vessel placement in the full observer coverage category for one year—(i) Applicability. The owner of a catcher vessel in the partial observer coverage category under paragraph (a)(1)(i) of this section may request to be placed in the full observer coverage category for all directed fishing for groundfish using trawl gear in the BSAI for a calendar year.

(ii) How to request full observer coverage for one year. A trawl catcher vessel owner must complete a full observer coverage request and submit it to NMFS using ODDS. ODDS is described in paragraph (a)(1)(ii) of this section.

(iii) Deadline. For 2017, a full observer coverage request must be submitted by November 15, 2016. For 2018 and every year after 2018, a full observer coverage request must be submitted by October 15 of the year prior to the calendar year in which the catcher vessel would be placed in the full observer coverage category.

(iv) Notification. NMFS will notify the vessel owner through ODDS of approval or denial to place a trawl catcher vessel in the full observer coverage category. Unless otherwise specified in paragraph (a)(2) of this section, a trawl catcher vessel remains in the partial observer coverage category under paragraph (a)(1)(i) of this section until a request to place a trawl catcher vessel in the full observer coverage category has been approved by NMFS. Once placement in the full observer coverage category is approved by NMFS, a trawl catcher vessel cannot be placed in the partial
observer coverage category until the following year.

(v) Initial Administrative Determination (IAD). If NMFS denies a request to place a trawl catcher vessel in the full observer coverage category, NMFS will provide an IAD, which will explain the basis for the denial.

(vi) Appeal. If the owner of a trawl catcher vessel wishes to appeal NMFS’ denial of a request to place a trawl catcher vessel in the full observer coverage category, the owner may appeal the determination under the appeals procedure set out at 15 CFR part 906.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 232

[Release Nos. 33–10217; 34–78883; 39–2512; IC–32269]

Adoption of Updated EDGAR Filer Manual

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (the Commission) is adopting revisions to the Electronic Data Gathering, Analysis, and Retrieval System (EDGAR) Filer Manual and related rules to reflect updates to the EDGAR system. The updates are being made primarily to support the new submission form types N–MFP2 and N–MFP2/A for money market mutual funds; allow unregistered money market fund to file a report on submission form types N–CR and N–CR/A; update the date format for ABS–EE Asset Data schemas from MM/YYYY to MM–DD–YYYY for CBMS Asset Class: Item 2(c)(12), and Debt Securities Asset Class: Debt Securities, Item 5(f)(3); update the codes and descriptions referencing CMSA to reference CREFC for CBMS Asset Class Item 2(d)(28)(xii) and CBMS Asset Class Item 2(d)(28)(xiii); allow a Large Trader whose most recent Form 13H submission was a Form 13H–I (Inactive) to submit a Form 13H–T (Termination) regardless of elapsed time; and make documentation updates to Chapter 5 and Chapter 6 of the “EDGAR Filer Manual, Volume II: EDGAR Filing” relating to eXtensible Business Reporting Language (XBRL) format. The EDGAR system was upgraded to support the new submission form types N–MFP2 and N–MFP2/A for money market mutual funds on August 29, 2016. The EDGAR system is scheduled to be upgraded to support the other functionalities on September 19, 2016.

DATES: Effective September 30, 2016. The incorporation by reference of the EDGAR Filer Manual is approved by the Director of the Federal Register as of September 30, 2016.

FOR FURTHER INFORMATION CONTACT: In the Division of Investment Management, for questions concerning Form N–MFP2 and Form N–CR, contact Heather Fernandez at (202) 551–6708; in the Division of Corporate Finance, for questions concerning Form ABS–EE, contact Vik Sheth at (202) 551–3818; in the Division of Trading and Markets, for questions concerning Form 13H, contact Kathy Bateman at (202) 551–4345; and in the Division of Economic and Risk Analysis, for questions concerning eXtensible Business Reporting Language (XBRL) disseminations, contact Walter Hamscher at (202) 551–5397.

SUPPLEMENTARY INFORMATION: We are adopting an updated EDGAR Filer Manual, Volume II. The Filer Manual describes the technical formatting requirements for the preparation and submission of electronic filings through the EDGAR system. It also describes the requirements for filing using EDGARLink Online and the Online Forms/XML Web site.

The Filer Manual contains all the technical specifications for filers to submit filings using the EDGAR system. Filers must comply with the applicable provisions of the Filer Manual in order to assure the timely acceptance and processing of filings made in electronic format. Filers may consult the Filer Manual in conjunction with our rules governing mandated electronic filing when preparing documents for electronic submission.

The EDGAR system will be upgraded to Release 16.3 on September 19, 2016 and will introduce the following changes:

3 See Release No. 33–10095 in which we implemented EDGAR Release 16.2. For additional history of Filer Manual rules, please see the cites therein.
An unregistered money market fund will now be able to file a report on submission form types N–CR and N–CR/A. When submitting N–CR and N–CR/A filings, filers that are unregistered money market funds can optionally provide values for the following fields:

- Filer Investment Company Type
- Series ID
- Class (Contract) ID

ABS–EE Asset Data schemas will be updated to change the date format from MM/YYYY to MM–DD–YYYY for the following Asset Class Items:

- CMBS Asset Class: Item 2(c)(12), First Loan Payment Due Date
- Debt Securities Asset Class: Item 5(f)(3), Demand Resolution Date

In addition, the codes and descriptions referencing CMSA will be updated to reference CREFC for the following Asset Class Items:

- CMBS Asset Class: Item 2(d)(28)(xii), Net Operating Income Net Cash Flow
- CMBS Asset Class: Item 2(d)(28)(xiii), Net Operating Income Net Cash Flow

Securitization Code

CMBS Asset Class: Item 2(d)(28)(xii), Net Operating Income Net Cash Flow

Code

The ABS–EE Asset Data schemas will also be updated to allow whole integer numbers in decimal fields. For more information, see the updated “EDGAR ABS XML Technical Specification” document located on the SEC’s Public Web site (https://www.sec.gov/info/edgar/tech-specs).

A Large Trader whose most recent Form 13H submission was a Form 13H–I (Inactive) will now be able to subsequently submit a Form 13H–T (Termination), regardless of the elapsed time.

Documentation only corrections relating to eXtensible Business Reporting Language (XBRL) formatting were made to Chapter 5, “Constructing Attached Documents and Document Types” and Chapter 6 “Interactive Data” of the EDGAR Filer Manual: Volume II.

On August 29, 2016, EDGAR Release 16.2.4 was updated to include two new submission form types—N–MFP2 and N–MFP2/A—to incorporate the amendments to Form N–MFP adopted by the Commission on September 16, 2015.

These two new submission form types will be accepted from the EDGAR Filing Web site via filer-constructed XML submissions, as described in the “EDGAR Form N–MFP2 XML Technical Specification” document available on the SEC’s Public Web site (https://www.sec.gov/info/edgar/tech-specs).

EDGAR will only accept TEST submissions for submission form types N–MFP2 and N–MFP2/A until October 13, 2016. Beginning on October 14, 2016, submission form Types N–MFP2 and N–MFP2/A will be accepted as LIVE or TEST submissions. After that date, filers will be prevented from submitting existing submission form type N–MFP1 beginning October 14, 2016. Filers will also be prevented from submitting existing submission form type N–MFP1/A beginning October 14, 2017.

Along with the adoption of the Filer Manual, we are amending Rule 301 of Regulation S–T to provide for the incorporation by reference into the Code of Federal Regulations of today’s revisions. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

The updated EDGAR Filer Manual will be available for Web site viewing and printing; the address for the Filer Manual is https://www.sec.gov/info/edgar/edmanuals.htm. You may also obtain paper copies of the EDGAR Filer Manual from the following address: Public Reference Room, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m.

Since the Filer Manual and the corresponding rule changes relate solely to agency procedures or practice, publication for notice and comment is not required under the Administrative Procedure Act (APA). It follows that the requirements of the Regulatory Flexibility Act do not apply.

The effective date for the updated Filer Manual and the rule amendments is September 30, 2016. In accordance with the APA, we find that there is good cause to establish an effective date less than 30 days after publication of these rules. The EDGAR system upgrade to Release 16.3 is scheduled to become available on September 19, 2016. The Commission believes that establishing an effective date less than 30 days after publication of these rules is necessary to coordinate the effectiveness of the updated Filer Manual with these system upgrades.

Statutory Basis

We are adopting the amendments to Regulation S–T under Sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1934, Sections 3, 12, 13, 14, 15, 23, and 35A of the Securities Exchange Act of 1934. (Sections of the Trust Indenture Act of 1939, and Sections 8, 30, 31, and 38 of the Investment Company Act of 1940.

List of Subjects in 17 CFR Part 232

Incorporation by reference, Reporting and recordkeeping requirements, Securities.

Text of the Amendment

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

1. The authority citation for part 232 continues to read in part as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 77s(t), 77s(u), 77s(v), 77s(w), 78c, 78c–3, 77ss(a), 76cb, 76l, 78m, 78n, 78o(d), 78q(a), 78d, 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, and 7701 et seq.; and 18 U.S.C. 1350.

2. Section 232.301 is revised to read as follows:

Filers must prepare electronic filings in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets out the technical formatting requirements for electronic submissions. The requirements for becoming an EDGAR Filer and updating company data are set forth in the updated EDGAR Filer Manual, Volume I: “General Information,” Version 24 (December 2015). The requirements for filing on EDGAR are set forth in the updated EDGAR Filer Manual, Volume II: “EDGAR Filing,” Version 38 (September 2016). Additional provisions applicable to Form N–SAR filers are set forth in the EDGAR Filer Manual, Volume III: “N–SAR Supplement,” Version 5 (September 2015). All of these provisions have been incorporated by reference into the Code of Federal Regulations, which action was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You must comply with these requirements in order for documents to be timely received and accepted. The EDGAR Filer Manual is available for Web site viewing and printing; the address for the Filer Manual is https://www.sec.gov/info/edgar/edmanuals.htm. You can obtain

SUMMARY: The Federal Energy Regulatory Commission (Commission) approves Reliability Standard TPL–007–1 for Transmission System Planned Performance for Geomagnetic Disturbance Events. The North American Electric Reliability Corporation (NERC), the Commission-certified Electric Reliability Organization, submitted Reliability Standard TPL–007–1 for Commission approval in response to a Commission directive in Order No. 779. Reliability Standard TPL–007–1 establishes requirements for certain registered entities to assess the vulnerability of their transmission systems to geomagnetic disturbance events (GMDs), which occur when the sun ejects charged particles that interact with and cause changes in the earth’s magnetic fields. Applicable entities that do not meet certain performance requirements, based on the results of their vulnerability assessments, must develop a plan to achieve the performance requirements. In addition, the Commission directs NERC to develop modifications to Reliability Standard TPL–007–1 to modify the benchmark GMD event definition set forth in Attachment 1 of Reliability Standard TPL–007–1, as it pertains to the required GMD Vulnerability Assessments and transformer thermal impact assessments, so that the definition is not based solely on spatially-averaged data; to require the collection of necessary geomagnetically induced current monitoring and magnetometer data and to make such data publicly available; and to include a one-year deadline for the development of corrective action plans and two- and four-year deadlines to complete mitigation actions involving non-hardware and hardware mitigation, respectively. The Commission also directs NERC to submit a work plan and, subsequently, one or more informational filings that address specific GMD-related research areas.

DATES: This rule will become effective November 29, 2016.

SUPPLEMENTARY INFORMATION: Order No. 830

Final Rule

1. Pursuant to section 215 of the Federal Power Act (FPA), the Commission approves Reliability Standard TPL–007–1 (Transmission System Planned Performance for Geomagnetic Disturbance Events). The North American Electric Reliability Corporation (NERC), the Commission-certified Electric Reliability Organization, submitted Reliability Standard TPL–007–1 for Commission approval in response to a Commission directive in Order No. 779. Reliability Standard TPL–007–1 establishes requirements for certain registered entities to assess the vulnerability of their transmission systems to geomagnetic disturbance events (GMDs), which occur when the sun ejects charged particles that interact with and cause changes in the earth’s magnetic fields. Applicable entities that do not meet certain performance requirements, based on the results of their vulnerability assessments, must develop a plan to achieve the performance requirements. In addition, the Commission directs NERC to develop modifications to Reliability Standard TPL–007–1 to modify the benchmark GMD event definition set forth in Attachment 1 of Reliability Standard TPL–007–1, as it pertains to the required GMD Vulnerability Assessments and transformer thermal impact assessments, so that the definition is not based solely on spatially-averaged data; to require the collection of necessary geomagnetically induced current monitoring and magnetometer data and to make such data publicly available; and to include a one-year deadline for the development of corrective action plans and two- and four-year deadlines to complete mitigation actions involving non-hardware and hardware mitigation, respectively. The Commission also directs NERC to submit a work plan and, subsequently, one or more informational filings that address specific GMD-related research areas. With and cause changes in the earth’s magnetic fields. Reliability Standard TPL–007–1 requires applicable entities that do not meet certain performance requirements, based on the results of their vulnerability assessments, to develop a plan to achieve the requirements. Reliability Standard TPL–007–1 addresses the directives in Order No. 779 by requiring applicable Bulk-Power System owners and operators to conduct initial and on-going vulnerability assessments regarding the potential impact of a benchmark GMD event on the Bulk-Power System as a whole and on Bulk-Power System components. In addition, Reliability Standard TPL–007–1 requires applicable entities to develop and implement corrective action plans to mitigate identified vulnerabilities.

Potential mitigation strategies identified in the proposed Reliability Standard include, but are not limited to, the installation, modification or removal of transmission and generation facilities and associated equipment. Accordingly, Reliability Standard TPL–007–1 constitutes an important step in addressing the risks posed by GMD events to the Bulk-Power System.

2. In addition, pursuant to section 215(d)(5) of the FPA, the Commission directs NERC to develop modifications to Reliability Standard TPL–007–1: (1) To revise the benchmark GMD event definition set forth in Attachment 1 of Reliability Standard TPL–007–1, as it pertains to the required GMD Vulnerability Assessments and transformer thermal impact assessments, so that the definition is not based solely on spatially-averaged data; (2) to require the collection of necessary geomagnetically induced current (GIC) monitoring and magnetometer data and to make such data publicly available; and (3) to include a one-year deadline for the completion of corrective action plans and two- and four-year deadlines to complete mitigation actions involving non-hardware and hardware mitigation, respectively. The Commission also directs NERC to submit these revisions within 18 months of the effective date of this Final Rule. The Commission also directs NERC to submit a work plan (GMD research work plan) within six months of the effective date of this Final Rule and, subsequently, one or more

3 See Reliability Standard TPL–007–1, Requirement R4; see also Order No. 779, 143 FERC ¶ 61,147 at PP 67, 71.

4 See Reliability Standard TPL–007–1, Requirement R7; see also Order No. 779, 143 FERC ¶ 61,147 at P 79.

informational filings that address specific GMD-related research areas.

1. Background

A. Section 215 and Mandatory Reliability Standards

3. Section 215 of the FPA requires the Commission to certify an ERO to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval. Once approved, the Reliability Standards may be enforced in the United States by the ERO, subject to Commission oversight, or by the Commission independently.7

B. GMD Primer

4. GMD events occur when the sun ejects charged particles that interact with and cause changes in the earth’s magnetic fields.8 Once a solar particle is ejected, it can take between 17 to 96 hours (depending on its energy level) to reach earth.9 A geoelectric field is the electric potential (measured in volts per kilometer (V/km)) on the earth’s surface and is directly related to the rate of change of the magnetic fields.10 A geoelectric field has an amplitude and direction and acts as a voltage source that can cause GICs to flow on long conductors, such as transmission lines.11 The magnitude of the geoelectric field amplitude is impacted by local factors such as geomagnetic latitude and local earth conductivity.12 Geomagnetic latitude is the proximity to earth’s magnetic north and south poles, as opposed to earth’s geographic poles. Local earth conductivity is the ability of the earth’s crust to conduct electricity at a certain location to depths of hundreds of kilometers down to the earth’s mantle. Local earth conductivity impacts the magnitude (i.e., severity) of the geoelectric fields that are formed during a GMD event by, all else being equal, a lower earth conductivity resulting in higher geoelectric fields.13

C. Order No. 779

5. In Order No. 779, the Commission directed NERC, pursuant to section 215(d)(5) of the FPA, to develop and submit for approval proposed Reliability Standards that address the impact of geomagnetic disturbances on the reliable operation of the Bulk-Power System. The Commission based its directive on the potentially severe, wide-spread impact on the reliable operation of the Bulk-Power System that can be caused by GMD events and the absence of existing Reliability Standards to address GMD events.14

6. Order No. 779 directed NERC to implement the directive in two stages. In the first stage, the Commission directed NERC to submit, within six months of the effective date of Order No. 779, one or more Reliability Standards (First Stage GMD Reliability Standards) that require owners and operators of the Bulk-Power System to develop and implement operational and procedural measures to mitigate the effects of GMDs consistent with the reliable operation of the Bulk-Power System.15

7. In the second stage, the Commission directed NERC to submit, within 18 months of the effective date of Order No. 779, one or more Reliability Standards (Second Stage GMD Reliability Standards) that require owners and operators of the Bulk-Power System to conduct initial and on-going assessments of the potential impact of benchmark GMD events on Bulk-Power System equipment and the Bulk-Power System as a whole. The Commission directed that the Second Stage GMD Reliability Standards must identify benchmark GMD events that specify what severity of GMD events a responsible entity must assess for potential impacts on the Bulk-Power System.16 Order No. 779 explained that if the assessments identified potential impacts from benchmark GMD events, the Reliability Standards should require owners and operators to develop and implement a plan to protect against instability, uncontrolled separation, or cascading failures of the Bulk-Power System, caused by damage to critical or vulnerable Bulk-Power System equipment, or otherwise, as a result of a benchmark GMD event. The Commission directed that the development of this plan could not be limited to considering operational procedures or enhanced training alone but should, subject to the potential impacts of the benchmark GMD events identified in the assessments, contain strategies for protecting against the potential impact of GMDs based on factors such as the age, condition, technical specifications, system configuration or location of specific equipment.17 Order No. 779 observed that these strategies could, for example, include automatically blocking GICs from entering the Bulk-Power System, instituting specification requirements for new equipment, inventory management, isolating certain equipment that is not cost effective to retrofit or a combination thereof.

D. Order No. 797

8. In Order No. 797, the Commission approved Reliability Standard EOP–010–1 (Geomagnetic Disturbance Operations).18 NERC submitted Reliability Standard EOP–010–1 for Commission approval in compliance with the Commission’s directive in Order No. 779 corresponding to the First Stage GMD Reliability Standards. In Order No. 797–A, the Commission denied the Foundation for Resilient Societies’ (Resilient Societies) request for rehearing of Order No. 797. The Commission stated that the rehearing request “addressed a later stage of efforts on geomagnetic disturbances (i.e., NERC’s future filing of Second Stage GMD Reliability Standards) and [that Resilient Societies] may seek to present those arguments at an appropriate time in response to that filing.”19 In particular, the Commission stated that GIC monitoring requirements should be addressed in the Second Stage GMD Reliability Standards.20

E. NERC Petition and Reliability Standard TPL–007–1

9. On January 21, 2015, NERC petitioned the Commission to approve Reliability Standard TPL–007–1 and its associated violation risk factors and violation severity levels, implementation plan, and effective dates.21 NERC also submitted a proposed definition for the term “Geomagnetic Disturbance Vulnerability Assessment or GMD Vulnerability

19 Order No. 797–A, 149 FERC ¶ 61,027 at P 2.
20 Id. P 27 (stating that the Commission continues “to encourage NERC to address the collection, dissemination, and use of geomagnetic input current data, by NERC, industry or others, in the Second Stage GMD Reliability Standards because such efforts could be useful in the development of GMD mitigation methods or to validate GMD models”).
Assessment” for inclusion in the NERC Glossary of Terms (NERC Glossary). NERC maintains that Reliability Standard TPL–007–1 is just, reasonable, not unduly discriminatory or preferential and in the public interest. NERC further contends that Reliability Standard TPL–007–1 satisfies the directive in Order No. 779 corresponding to the Second Stage GMD Reliability Standards.

10. NERC states that Reliability Standard TPL–007–1 applies to planning coordinators, transmission planners, transmission owners and generation owners who own or whose planning coordinator area or transmission planning area includes a power transformer with a high side, wye-grounded winding connected at 200 kV or higher. NERC explains that the applicability criteria for qualifying transformers in Reliability Standard TPL–007–1 are the same as that for the First Stage GMD Reliability Standard in Reliability Standard EOP–010–1, which the Commission approved in Order No. 797.

11. Reliability Standard TPL–007–1 contains seven requirements. Requirement R1 requires planning coordinators and transmission planners to determine the individual and joint responsibilities in the planning coordinator’s planning area for maintaining models and performing studies needed to complete the GMD Vulnerability Assessment required in Requirement R4.

12. Requirement R2 requires planning coordinators and transmission planners to maintain system models and GIC system models needed to complete the GMD Vulnerability Assessment required in Requirement R4.

13. Requirement R3 requires planning coordinators and transmission planners to have criteria for acceptable system steady state voltage limits for their systems during the benchmark GMD event described in Attachment 1 (Calculating Geoelectric Fields for the Benchmark GMD Event).

14. Requirement R4 requires planning coordinators and transmission planners to conduct a GMD Vulnerability Assessment every 60 months using the benchmark GMD event described in Attachment 1 to Reliability Standard TPL–007–1. The benchmark GMD event is based on a 1-in-100 year frequency of occurrence and is composed of four elements: (1) A reference peak geoelectric field amplitude of 8 V/km derived from statistical analysis of historical magnetometer data; (2) a scaling factor to account for local geomagnetic latitude; (3) a scaling factor to account for local earth conductivity; and (4) a reference geomagnetic field time series or wave shape to facilitate time-domain analysis of GMD impact on equipment. The product of the first three elements is referred to as the regional geoelectric field peak amplitude.

15. Requirement R5 requires planning coordinators and transmission planners to provide GIC flow information, to be used in the transformer thermal impact assessment required in Requirement R6, to each transmission owner and generator owner that owns an applicable transformer within the applicable planning area.

16. Requirement R6 requires transmission owners and generator owners to conduct thermal impact assessments on solely and jointly owned applicable transformers where the maximum effective GIC value provided in Requirement R5 is 75 amperes per phase (A/phase) or greater.

17. Requirement R7 requires planning coordinators and transmission planners to develop corrective action plans if the GMD Vulnerability Assessment concludes that the system does not meet the performance requirements in Table 1 (Steady State Planning Events).

F. Notice of Proposed Rulemaking

18. On May 14, 2015, the Commission issued a notice of proposed rulemaking (NOPR) proposing to approve Reliability Standard TPL–007–1. In addition, the Commission proposed to direct NERC to develop three modifications to Reliability Standard TPL–007–1. First, the Commission proposed to direct NERC to develop the GMD event definition in Reliability Standard TPL–007–1 so that the definition is not based solely on spatially-averaged data. Second, the Commission proposed to direct NERC to develop the GMD event definition in Reliability Standard TPL–007–1 to require the installation of GIC monitors and magnetometers where necessary. Third, the Commission proposed to direct NERC to develop the GMD event definition in Reliability Standard TPL–007–1 to require corrective action plans (Requirement R7) to be developed within one year and, with respect to the mitigation actions called for in the corrective action plans, non-hardware mitigation actions to be completed within two years of finishing development of the corrective action plan and hardware mitigation to be completed within four years. The NOPR also proposed to direct NERC to submit a work plan and, subsequently, one or more informational filings that address specific GMD-related research areas and sought comment on certain issues relating to the transformer thermal impact assessments (Requirement R6) and the meaning of language in Table 1 of Reliability Standard TPL–007–1.

19. On August 20, 2015 and October 2, 2015, the Commission issued notices setting supplemental comment periods regarding specific documents. On March 1, 2016, Commission staff led a technical conference on Reliability Standard TPL–007–1 and issues raised in the NOPR.

20. On April 28, 2016, NERC submitted a filing notifying the Commission that “NERC identified new information that may necessitate a minor revision to a figure in one of the supporting technical white papers. This revision would not require a change to any of the Requirements of the proposed Reliability Standard.” On June 28, 2016, NERC submitted the revised technical white papers referenced in the April 28, 2016 filing. On June 29, 2016, the Commission issued a notice setting a supplemental comment period regarding the revised technical white papers submitted by NERC on June 28, 2016.

21. In response to the NOPR and subsequent notices, 28 entities filed initial and supplemental comments. We address below the issues raised in the NOPR and comments. The Appendix to this Final Rule lists the entities that filed comments in response to the NOPR and in response to the supplemental comment period notices.

II. Discussion

22. Pursuant to section 215(d) of the FPA, the Commission approves Reliability Standard TPL–007–1 as just, reasonable, not unduly discriminatory or preferential and in the public interest. While we recognize that scientific and operational research regarding GMD is ongoing, we believe...
that the potential threat to the bulk electric system warrants Commission action at this time, including efforts to conduct critical GMD research and update Reliability Standard TPL–007–1 as appropriate.

23. First, we find that Reliability Standard TPL–007–1 addresses the directives in Order No. 779 corresponding to the development of the Second Stage GMD Reliability Standards. Reliability Standard TPL–007–1 does this by requiring applicable Bulk-Power System owners and operators to conduct, on a recurring five-year cycle, initial and on-going vulnerability assessments regarding the potential impact of a benchmark GMD event on the Bulk-Power System as a whole and on Bulk-Power System components. In addition, Reliability Standard TPL–007–1 requires applicable entities to develop and implement corrective action plans to mitigate vulnerabilities identified through those recurring vulnerability assessments. Potential mitigation strategies identified in the proposed Reliability Standard include, but are not limited to, the installation, modification or removal of transmission and generation facilities and associated equipment. Accordingly, Reliability Standard TPL–007–1 constitutes an important step in addressing the risks posed by GMD events to the Bulk-Power System.

24. The Commission also approves the inclusion of the term “Geomagnetic Disturbance Vulnerability Assessment or GMD Vulnerability Assessment” in the NERC Glossary; Reliability Standard TPL–007–1’s associated violation risk factors and violation severity levels; and NERC’s proposed implementation plan and effective dates. The Commission also affirms, as raised for comment in the NOPR, that cost recovery for prudent costs associated with or incurred to comply with Reliability Standard TPL–007–1 and future revisions to the Reliability Standard will be available to registered entities.

25. While we conclude that Reliability Standard TPL–007–1 satisfies the directives in Order No. 779, based on the record developed in this proceeding, the Commission determines that Reliability Standard TPL–007–1 should be modified to reflect the new information and analyses discussed below, as proposed in the NOPR. Accordingly, pursuant to section 215(d)(5) of the FPA, the Commission directs NERC to develop and submit modifications to Reliability Standard TPL–007–1 concerning: (1) The calculation of the reference peak geoelectric field amplitude component of the benchmark GMD event definition; (2) the collection and public availability of necessary GIC monitoring and magnetometer data; and (3) deadlines for completing corrective action plans and the mitigation measures called for in corrective action plans. The Commission directs NERC to develop and submit these revisions for Commission approval within 18 months of the effective date of this Final Rule.

26. Furthermore, to improve the understanding of GMD events generally, the Commission directs NERC to submit within six months from the effective date of this Final Rule a GMD research work plan. Specifically, we direct NERC to: (1) Further analyze the area over which spatial averaging should be calculated for stability studies, including performing sensitivity analyses on squares less than 500 km per side (e.g., 100 km, 200 km); (2) further analyze earth conductivity models by, for example, using metered GIC and magnetometer readings to calculate earth conductivity and using 3-D readings; (3) determine whether new analyses and observations support modifying the use of single station readings around the earth to adjust the spatially averaged benchmark for latitude; (4) research, as discussed below, aspects of the required thermal impact assessments; and (5) in NERC’s discretion, conduct any GMD-related research areas generally that may impact the development of new or modified GMD Reliability Standards. We expect that work completed through the GMD research work plan, as well as other analyses facilitated by the increased collection and availability of GIC monitoring and magnetometer data directed herein, will lead to further modifications to Reliability Standard TPL–007–1 as our collective understanding of the threats posed by GMD events improves.

27. Below we discuss the following issues raised in the NOPR and NOPR comments: (1) The benchmark GMD event definition described in Reliability Standard TPL–007–1 (Calculating Geoelectric Fields for the Benchmark GMD Event); (2) transformer thermal impact assessments in Requirement R6; (3) GMD research work plan; (4) collection and public availability of GIC monitoring and magnetometer data; (5) completion of corrective action plans in Requirement R7; (6) meaning of “minimized” in Table 1 (Steady State Planning Events) of Reliability Standard TPL–007–1; (7) NERC’s proposed implementation plan and effective dates; and (8) other issues.

A. Benchmark GMD Event Definition

NERC Petition

28. NERC states that the purpose of the benchmark GMD event is to “provide a defined event for assessing system performance during a low probability, high magnitude GMD event.” NERC explains that the benchmark GMD event represents “the most severe GMD event expected in a 100-year period as determined by a statistical analysis of recorded geomagnetic data.” The benchmark GMD event definition is used in the GMD Vulnerability Assessments and thermal impact assessment requirements of Reliability Standard TPL–007–1.

29. As noted above, NERC states that the benchmark GMD event definition has four elements: (1) A reference peak geoelectric field amplitude of 8 V/km derived from statistical analysis of historical magnetometer data; (2) a scaling factor to account for local geomagnetic latitude; (3) a scaling factor to account for local earth conductivity; and (4) a reference geomagnetic field time series or wave shape to facilitate time-domain analysis of GMD impact on equipment.

30. The standard drafting team determined that a 1-in-100 year GMD event would cause an 8 V/km reference peak geoelectric field amplitude at 60 degree geomagnetic latitude using Québec’s earth conductivity. The standard drafting team stated that: the reference geoelectric field amplitude was determined through statistical analysis using field measurements from geomagnetic observatories in northern Europe and the reference (Québec) earth model. The Québec earth model is generally resistive and the geological structure is relatively well understood. The statistical analysis resulted in a conservative peak geoelectric field amplitude of approximately 8 V/km...
The frequency of occurrence of this benchmark GMD event is estimated to be approximately 1 in 100 years. 38

31. The standard drafting team explained that it used field measurements taken from the IMAGE magnetometer chain, which covers Northern Europe, for the period 1993–2013 to calculate the reference peak geolectric field amplitude used in the benchmark GMD event definition. 39 As described in NERC’s petition, the standard drafting team “spatially averaged” four different station groups of IMAGE data, each spanning a square area of approximately 500 km (roughly 310 miles) in width. 40 The standard drafting team justified the use of spatial averaging by stating that Reliability Standard TPL–007–1 is designed to “address wide-area effects caused by a severe GMD event, such as increased var absorption and voltage depressions. Without characterizing GMD on regional scales, statistical estimates could be weighted by local effects and suggest unduly pessimistic conditions when considering cascading failure and voltage collapse.” 41

32. NERC states that the benchmark GMD event includes scaling factors to enable applicable entities to tailor the reference peak geolectric field to their specific location for conducting GMD Vulnerability Assessments. NERC explains that the scaling factors in the benchmark GMD event definition are applied to the reference peak geolectric field amplitude to adjust the 8 V/km value for different geomagnetic latitudes and earth conductivities. 32

33. The standard drafting team also identified a reference geomagnetic field time series for an Ottawa geolectric observatory during a 1989 GMD event that affected Quebec. 43 The standard drafting team used this time series to estimate a geolectric field, represented as a time series (i.e., 10-second values over a period of days), that is expected to occur at 60 degree geomagnetic latitude during a 1-in-100 year GMD event. NERC explains that this time series is used to facilitate time-domain analysis of GMD impacts on equipment. 44

34. In the sub-sections below, we discuss two issues concerning the benchmark GMD event definition addressed in the NOPR: (1) Reference peak geolectric field amplitude; and (2) geomagnetic latitude scaling factor.

1. Reference Peak Geolectric Field Amplitude

NOPR

35. The NOPR proposed to approve the benchmark GMD event definition. The NOPR stated that the “benchmark GMD event definition proposed by NERC complies with the directive in Order No. 779. . . [c]onsistent with the guidance provided in Order No. 779, the benchmark GMD event definition proposed by NERC addresses the potential widespread impact of a severe GMD event, while taking into consideration the variables of geomagnetic latitude and local earth conductivity.” 45

36. In addition, the NOPR proposed to direct NERC to develop modifications to Reliability Standard TPL–007–1. Specifically, the NOPR proposed to direct NERC to modify the reference peak geolectric field amplitude component of the benchmark GMD event definition so that it is not calculated based solely on spatially-averaged data. The NOPR explained that this could be achieved, for example, by requiring applicable entities to conduct GMD Vulnerability Assessments (and, as discussed below, thermal impact assessments) using two different benchmark GMD events: The first benchmark GMD event using the spatially-averaged reference peak geolectric field value (8 V/km) and the second using the non-spatially averaged peak geolectric field value cited in the GMD Interim Report (20 V/km). The NOPR stated that the revised Reliability Standard could then require applicable entities to take corrective actions, using engineering judgment, based on the results of both assessments. The NOPR explained that applicable entities would not always be required to mitigate to the level of risk identified by the non-spatially averaged analysis; instead, the selection of mitigation would reflect the range of risks bounded by the two analyses, and be based on engineering judgment within this range, considering all relevant information. The NOPR stated that, alternatively, NERC could propose an equally efficient and effective modification that does not rely exclusively on the spatially-averaged reference peak geolectric field value.

Comments

37. NERC does not support revising the benchmark GMD event definition. NERC maintains that the spatially-averaged reference peak geolectric field amplitude value in Reliability Standard TPL–007–1 is “technically-justified, scientifically sound, and has been published in a peer-reviewed research journal covering geomagnetism and other topics.” 46 NERC contends that the standard drafting team determined that using the non-spatially averaged 20 V/ km figure in the GMD Interim Report would “consistently overestimate the geolectric field of a 1-in-100 year GMD event.” 47 NERC states that, in contrast, spatial averaging “properly associates the relevant spatial scales for the analyzed and applied geolectric fields and would not distort the complexity of the potential impacts of a GMD event.” 48 NERC claims that the 500 km-wide square areas used to determine the areas of spatial averaging are “based on consideration of transmission systems and geomagnetic observation patterns . . . [and are] an appropriate scale for a system-wide impact in a transmission system.” 49 To support this position, NERC cites a June 2015 peer-reviewed publication authored in part by some members of the standard drafting team. 50

38. Industry commenters, largely represented by the Trade Associations’ comments, do not support revising the benchmark GMD event definition. The Trade Associations’ reasons largely mirror NERC’s. While recognizing that the spatially-averaged reference peak geolectric field amplitude is lower than

43 NERC Petition, Ex. D (White Paper on GMD Benchmark Event Description) at 5–6.

44 NOPR, 151 FERC ¶ 61,134 at P 32.
the non- spatially averaged figure, the Trade Associations contend that the non- spatially averaged value is inappropriate because: (1) The peak geoelectric field only affects relatively small areas and quickly declines with distance from the peak; (2) Reliability Standard TPL–007–1 is intended to address the wide- scale effects of a GMD event; and (3) the benchmark GMD event definition is designed to provide a realistic estimate of wide- area effects caused by a severe GMD event. The Trade Associations contend that a non- spatially averaged reference peak geoelectric field amplitude "would be weighted by local effects and suggest unrealistic conditions for system analysis . . . [which] could lead to unnecessary costs for customers, while yielding very little tangible benefit to reliability." 52 Like NERC, the Trade Associations cite to the 2015 Puikkinen Paper to support the use of 500 km- wide squares in performing the spatial averaging analysis. The Trade Associations note, however, that the selection of 500 km is "only the beginning . . . [of the] exploration of spatial geoelectric field structures pertaining to extreme GIC." 53

39. The Trade Associations, while not supportive of the NOPR proposal, recommend that if the Commission remains concerned about relying on NERC’s proposed spatially-averaged reference peak geoelectric field amplitude, the Commission should: allow NERC to further determine the appropriate localized studies to be performed by moving the “local hot spot” around a planning area. This approach may better ensure that the peak values only impact a local area instead of unrealistically projecting uniform peak values over a broad area. This approach also should better align with the Commission’s concerns because this type of study would more accurately reflect the real- world impact of a GMD event on the [Bulk- Power System]. The Trade Associations understand that existing planning tools may not yet have such capabilities, but the tools can be modified to allow such study.54

40. Industry commenters raise other concerns with the NOPR proposal. CEA states that it would be inappropriate to rely on the non- spatially averaged 20 V/km reference peak geoelectric field figure because that figure is found in a single publication. CEA also contends that it is impractical to use “engineering judgment” to weigh the GMD Vulnerability Assessments using the spatially-averaged and non- spatially averaged reference peak geoelectric field amplitudes, as described in the NOPR.55 ITC states that NERC’s proposal is reasonable and that the reference peak geoelectric field amplitude value can be revised periodically based on new information. Joint ISOs/RTOs state that the Commission should afford due weight to NERC’s technical expertise.

41. A September 2015 paper prepared by the Los Alamos National Laboratory states that it analyzed the IMAGE data using a different methodology to calculate reference peak geoelectric field amplitude values based on each of eight different magnetometer installations in Northern Europe. However, unlike the standard drafting team, the Los Alamos Paper did not spatially average the IMAGE data. The authors calculated peak geoelectric field amplitudes ranging from 8.4 V/km to 16.6 V/km, with a mean of the eight values equal to 13.2 V/km.56 The authors used a statistical formula and probability distribution to determine their 1-in-100 year GMD event parameters, as opposed to the 20 V/km non- spatially averaged event from the 2012 paper cited in the GMD Interim Report that visually extrapolated the data.

42. Roodman contends that “NERC’s 100-year benchmark GMD event is appropriately conservative in magnitude (except perhaps in the southern- most US) if unrealistic in some other respects.” 57 Roodman states that “overall NERC’s analytical frame does not strongly clash with the data.” 58 However, Roodman contends that actual data support local hot-spots in a larger region of lower magnitude geoelectric fields that are not typically uniform in magnitude or direction.59 Roodman addresses comments by Kappenman against the benchmark GMD event by stating that the Oak Ridge Report’s Meta–R–319 study, authored by Kappenman, modeled a 1-in-100 year GMD event based largely on misunderstandings of historic GMDs, both in magnitude and geographic footprint.60 Roodman recommends that the Commission “require a much larger array of events for simulation” in light of the “deep uncertainty and complexity of the GMD.” 61

43. Commenters opposed to the benchmark GMD event definition proposed by NERC maintain that the standard drafting team significantly underestimated the reference peak geoelectric field amplitude value for a 1- in-100 year GMD event by relying on data from the IMAGE system and by applying spatial averaging to that data set.62 For example, Resilient Societies states that the standard drafting team should have analyzed “real-world data from within the United States and Canada, including magnetometer readings from the [USGS] and Natural Resources Canada observatories . . . [h]ad NERC and the Standard Drafting Team collected and analyzed available real-world data, they would have likely found that the severity of GMD in 1-in-100 Year reference storm had been set far below a technically justified level and without a ‘strong technical basis.’ ” 63 Likewise, Kappenman contends that there are multiple examples where the benchmark GMD event and the standard drafting team’s model for calculating geoelectric fields under-predict actual, historical GIC readings.64 Commenters opposed to NERC’s proposal variously argue that the reference peak geoelectric field amplitude should be set at a level commensurate with the 1921 Railroad Storm or 1859 Carrington Event or at the 20 V/km level cited in the GMD Interim Report.65

Commission Determination

44. The Commission approves the reference peak geoelectric field amplitude figure proposed by NERC. In addition, the Commission, as proposed in the NOPR, directs NERC to develop revisions to the benchmark GMD event definition so that the reference peak geoelectric field amplitude component

52 Trade Associations Comments at 15.

54 Id. at 16.
55 See also Hydro One Comments at 1–2; Resilient Societies Comments at 24–25.
57 Roodman Comments at 4. Roodman criticizes the proposed benchmark GMD event definition because it assumes that the induced electrical field resulting from a GMD event is spatially uniform. Roodman also contends that a GMD event that is less than a 1-in-100 year storm could potentially damage transformers. Id. at 12–14.
58 Roodman Comments at 9.
59 Id. at 12–13.
60 Id. at 5–6 (citing Oak Ridge National Laboratory, Geomagnetic Storms and Their Impacts on the U.S. Power Grid: Meta–R–319 at pages 1–1 to 1–3 (January 2010), http://www.ornl.gov/sci/reee/
spatial averaging can be used to reflect actual GMD events.

47. The NOPR proposed to direct NERC to revise Reliability Standard TPL–007–1 so that the reference peak geoelectric field value is not based solely on spatially-averaged data. NERC and industry comments largely focused on the NOPR’s discussion of one possible example to address the directive (i.e., by running GMD Vulnerability Assessments using spatially-averaged and non-spatially averaged reference peak geoelectric field amplitudes). However, while the method discussed in the NOPR is one possible option, the NOPR did not propose to direct NERC to develop revisions based on that option or any specific option. The Trade Associations’ comments, discussed above, demonstrate that there is another way to address the NOPR directive (i.e., by performing planning models that also assess planning areas for localized “hot spots”). This approach may have merit if, for example, the geographic size of the hot spot is supported by actual data and the hot spot is centered over one or more locations that include an entity’s facilities that become critical during a GMD event. Without pre-judging how NERC proposes to address the Commission’s directive, NERC’s response to this directive should satisfy the NOPR’s concern that reliance on spatially-averaged data alone does not address localized peaks that could potentially affect the reliable operation of the Bulk-Power System.

48. We believe our directive should also largely address the comments submitted by entities opposed to NERC’s proposed reference peak geoelectric field amplitude. Those commenters endorsed using a higher reference peak geoelectric field amplitude value, such as the 20 V/km cited in the GMD Interim Report. At the outset, we observed that NERC’s comments critical of the standard drafting team’s use of the IMAGE data only speculate that had the standard drafting team used other sources, the calculated reference peak geoelectric field amplitude value would have been higher. Moreover, among the commenters critical of NERC’s proposal, there is disagreement over the magnitude of historical storms which some of these commenters would use as a model. While NERC has discretion on how to propose to address our directive, NERC could revise Reliability Standard TPL–007–1 to apply a higher reference peak geoelectric field amplitude value to assess the impact of localized hot spots on the Bulk-Power System, as suggested by the Trade Associations. The effects of such hot spots could include increases in GIC levels, volt-ampere reactive power consumption, harmonics on the Bulk-Power System (and associated misoperations) and transformer heating. Moreover, the directive to revise Reliability Standard TPL–007–1 and, as discussed below, the directives to research geomagnetic latitude scaling factors and earth conductivity models as part of the GMD research work plan and to revise Reliability Standard TPL–007–1 to require the collection of necessary GIC monitoring and magnetometer data to validate GMD models should largely address or at least help to focus-in on factors that may be causing any inaccuracies in the standard drafting team’s model.

49. Consistent with Order No. 779, the Commission does not specify a particular reference peak geoelectric field amplitude value that should be applied to hot spots given present uncertainties. While 20 V/km would seem to be a possible value, the Los Alamos Paper suggests that the 20 V/km figure may be too high. The Los Alamos Paper analyzed the non-spatially averaged IMAGE data to calculate a reference peak geoelectric field amplitude range (i.e., 8.4 V/km to 16.6 V/km) that is between NERC’s proposal spatially-averaged value of 8 V/km and the non-spatially averaged 20 V/km figure cited in the GMD Interim Report.

50. Although the NOPR did not propose to direct NERC to submit revisions to Reliability Standard TPL–007–1 by a certain date with respect to the benchmark GMD event definition, the Commission determines that it is appropriate to impose an 18-month deadline from the effective date of this Final Rule. As discussed below, the Commission approves the five-year implementation period for Reliability Standard TPL–007–1 proposed by NERC. Having NERC submit revisions to the benchmark GMD event definition within 18 months of the effective date of this Final Rule, with the Commission acting promptly on the revised Reliability Standard, should afford
enough time to apply the revised benchmark GMD event definition in the first GMD Vulnerability Assessment under the timeline set forth in Reliability Standard TPL–007–1’s implementation plan. If circumstances, such as the complexity of the revised benchmark GMD event, require it, NERC may propose and justify a revised implementation plan.

2. Geomagnetic Latitude Scaling Factor

51. The NOPR proposed to approve the geomagnetic latitude scaling factor in NERC’s proposed benchmark GMD event definition. However, the NOPR sought comment on whether, in light of studies indicating that GMD events could have pronounced effects on lower geomagnetic latitudes, a modification is warranted to reduce the impact of the scaling factors.

Comments

52. NERC contends that the geomagnetic latitude scaling factor in Reliability Standard TPL–007–1 “accurately models the reduction of induced geoelectric fields that occurs over the mid-latitude region during a 100-year GMD event scenario . . . [and] describes the observed drop in geoelectric field that has been exhibited in analysis of major recorded geomagnetic storms.” 73 NERC maintains that modifying the scaling factor is not technically justified based on the publications cited in the NOPR. NERC states that the first paper cited in the NOPR is based on models that are not mature and reflect a 1-in-150 year storm. NERC contends that the second paper does not clearly show that the purported transformer damage in South Africa was the result of abnormally high GICs during the October 2003 Halloween Storm. NERC further states that the standard drafting team analyzed the October 2003 Halloween Storm when developing the proposed geomagnetic latitude scaling factor.

53. The Trade Associations support the geomagnetic latitude scaling factor proposed by NERC. Like NERC, the Trade Associations contend that the papers cited in the NOPR do not support modifications because the models in the first paper “remain highly theoretical and not sufficiently validated” and because the second paper likely involved other causal factors leading to the transformer failure. 74 Joint ISOs/RTOs also support the geomagnetic latitude scaling factor proposed by NERC. ITC states that NERC’s proposal is a “reasonable approach given the current state of the science pertaining to GMD . . . [but] that as the science pertaining to GMD matures and more data becomes available, the scaling factors should be revisited and revised.” 75 ITC suggests revisiting the geomagnetic latitude scaling factor every five years to incorporate any new developments in GMD science.

54. Several commenters question or disagree with the geomagnetic latitude scaling factors in Reliability Standard TPL–007–1 based on simulations and reports of transformer failures in areas expected to be at low risk due to their geomagnetic latitude. 76 EIS contends that the proposed geomagnetic latitude scaling factor’s assumption of a storm centered at 60 degrees geomagnetic latitude is inconsistent with a study relied upon by NERC. 77 The Los Alamos Paper’s analysis suggests that NERC’s proposed geomagnetic latitude scaling factors, while they fit well with weaker historical GMD events from which they were derived, may not accurately represent the effects of a 1-in-100 year GMD event at lower geomagnetic latitudes. The Los Alamos Paper states that a model of the electrojet is needed “to effectively extrapolate the small to moderate disturbance data currently in the historical record to disturbances as large as the TPL–007–1 Benchmark Event.” 78 The Los Alamos Paper uses a larger number of geomagnetic disturbances (122 instead of 12) and a wider range of observatories by using the world-wide SuperMAG magnetometer array data, which includes the INTERMAGNET data used to support NERC’s geomagnetic latitude scaling factors. The Los Alamos Paper shows that for more severe storms (Dst < -300, for which there are nine storms in the data set) the NERC scaling factors tend to be low, off by a factor of up to two or three at some latitudes. The Los Alamos Paper also recommends “an additional degree of conservatism in the mid-geomagnetic latitudes” until such a time as a model is developed. 79 The Los Alamos Paper authors recommend a factor of 2 as a conservative correction.

Commission Determination

55. The Commission approves the geomagnetic latitude scaling factor in the benchmark GMD event definition. In addition, the Commission directs NERC to conduct further research on geomagnetic latitude scaling factors as part of the GMD research work plan discussed below.

56. Based on the record, the Commission finds sufficient evidence to conclude that lower geomagnetic latitudes are, to some degree, less susceptible to the effects of GMD events. The issue identified in the NOPR and by some commenters focused on the specific scaling factors in Reliability Standard TPL–007–1 in light of some analyses and anecdotal evidence suggesting that lower geomagnetic latitudes may be impacted by GMDs to a larger degree than reflected in Reliability Standard TPL–007–1.

57. The geomagnetic latitude scaling factor in Reliability Standard TPL–007–1 is supported by some of the available research. 80 In addition, with the

The Los Alamos Paper authors recommend a factor of 2 as a conservative correction.

Commission Determination

55. The Commission approves the geomagnetic latitude scaling factor in the benchmark GMD event definition. In addition, the Commission directs NERC to conduct further research on geomagnetic latitude scaling factors as part of the GMD research work plan discussed below.

56. Based on the record, the Commission finds sufficient evidence to conclude that lower geomagnetic latitudes are, to some degree, less susceptible to the effects of GMD events. The issue identified in the NOPR and by some commenters focused on the specific scaling factors in Reliability Standard TPL–007–1 in light of some analyses and anecdotal evidence suggesting that lower geomagnetic latitudes may be impacted by GMDs to a larger degree than reflected in Reliability Standard TPL–007–1.

57. The geomagnetic latitude scaling factor in Reliability Standard TPL–007–1 is supported by some of the available research. In addition, with the
exception of the Los Alamos Paper, commenters did not provide new information on the proposed scaling factor nor did commenters suggest alternative scaling factors. However, the Commission finds that there are enough questions regarding the effects of GMDs at lower geomagnetic latitudes to warrant directing NERC to study this issue further as part of the GMD research work plan. The Los Alamos Paper and the sources cited in the NOPR are suggestive that a 1-in-100 year GMD event could have a greater impact on lower geomagnetic latitudes than NERC’s proposed scaling factor assumes. But, as the Los Alamos Paper recognizes, the current absence of historical data on large GMD events precludes a definitive conclusion based on an empirical analysis of historical observations. Moreover, in prepared comments for the March 1, 2016 Technical Conference, Dr. Backhaus, one of the authors of the Los Alamos Paper, recommended that “the current NERC analysis should be adopted and further analysis performed with additional observational data and severe disturbance modeling efforts with the intent of refining the geomagnetic latitude scaling law in future revisions.” The Commission directs NERC to reexamine the geomagnetic latitude scaling factors in Reliability Standard TPL–007–1 as part of the GMD research work plan, including using existing models and developing new models to extrapolate from historical data on small to moderate GMD events the impacts of a large, 1-in-100 year GMD event on lower geomagnetic latitudes.

B. Thermal Impact Assessments

NERC Petition

58. Reliability Standard TPL–007–1, Requirement R6 requires owners of transformers that are subject to the Reliability Standard to conduct thermal analyses to determine if the transformers would be able to withstand the thermal effects associated with a benchmark GMD event. NERC states that transformers are exempt from the thermal impact assessment requirement if the maximum effective GIC in the transformer is less than 75 A/phase during the benchmark GMD event as determined by an analysis of the system. NERC explains that “based on available power transformer measurement data, transformers with an effective GIC of less than 75 A/phase during the benchmark GMD Event are unlikely to exceed known temperature limits established by technical organizations.”

59. As provided in Requirements R5 and R6, “the maximum GIC value for the worst case geoelectric field orientation for the benchmark GMD event described in Attachment 1” determines whether a transformer satisfies the 75 A/phase threshold. If the 75 A/phase threshold is satisfied, Requirement R6 states, in relevant part, that a thermal impact assessment should be conducted on the qualifying transformer based on the effective GIC flow information provided in Requirement R5.

60. In its June 28, 2016 filing, NERC states that it identified an error in Figure 1 (Upper Bound of Peak Metallic Hot Spot Temperatures Calculated Using the Benchmark GMD Event) of the White Paper on Screening Criterion for Transformer Thermal Impact Assessment that resulted in incorrect plotting of simulated peak transformer hot-spot heating from the benchmark GMD event. NERC revised Figure 1 in the White Paper on Screening Criterion for Transformer Thermal Impact Assessment and made corresponding revisions to related text, figures and tables throughout the technical white papers supporting the proposed standard. NERC maintains that even with the revision to Figure 1, “the standard drafting team determined that the 75 A per phase threshold for transformer thermal impact assessment remains a valid criterion . . . [and] it is not necessary to revise any Requirements of the proposed Reliability Standard.”

NERC opposes modifying the thermal impact assessments in Requirement R6 so that the assessments do not rely only on spatially-averaged data. NERC claims that the benchmark GMD event definition will “result in GIC calculations that are appropriately scaled for system-wide assessments.” NERC also contends that the “analysis performed by the standard drafting team of the impact of localized enhanced geoelectric fields on the GIC levels in transformers indicates that relatively few transformers in the system are affected.” In response to the question in the NOPR of why qualifying transformers are not assessed for thermal impacts using the maximum GIC producing orientation, NERC states that “the orientation of the geomagnetic field varies widely and continuously during a GMD event . . . [and] would be aligned with the maximum GIC-producing orientation for only a few minutes.” NERC concludes that “[i]n the context of transformer hot spot heating with time constants in the order of tens of minutes, alignment with any particular orientation for a few minutes at a particular point in time is not a driving concern.” NERC further states that the wave shape used in Reliability Standard TPL–007–1 provides “generally conservative results when performing thermal analysis of power transformers.”

63. The Trade Associations and CEA do not support the proposed NOPR directive because, they state, it focuses too heavily on individual transformers. The Trade Associations maintain that Reliability Standard TPL–007–1 “was never intended to address specific localized areas that might experience peak conditions and affect what we understand to be a very small number of assets that are unlikely to initiate a cascading outage.”

83 NERC Comments at 17.
84 Id.
85 Id. at 19.
86 Id.
87 Id.
88 Id.
89 Trade Associations Comments at 21.
Kappenman contends that the 75 A/phase threshold does not consider transformers with tertiary windings or autotransformers which may be impacted at lower GIC levels than 75 A/phase.\(^\text{95}\)

### Commission Determination

65. Consistent with our determination above regarding the reference peak geoelectric field amplitude value, the Commission directs NERC to revise Requirement R6 to require registered utilities to apply spatially averaged and non-spatially averaged peak geoelectric field values, or some equally efficient and effective alternative, when conducting thermal impact assessments.

66. In the NOPR, the Commission requested comment from NERC regarding why Requirement R6 does not use the maximum GIC-producing orientation to conduct the thermal assessment for qualifying transformers. After considering NERC’s response, we continue to have concerns with not using the maximum GIC-producing orientation for the thermal assessment of transformers. However, at this time we do not direct NERC to modify Reliability Standard TPL–007–1.

Instead, as part of the GMD research work plan discussed below, NERC is directed to study this issue to determine how the geoelectric field time series can be applied to a particular transformer so that the orientation of the time series, over time, will maximize GIC flow in the transformer, and to include the results in a filing with the Commission.

67. We are not persuaded by the comments opposed to Requirement R6’s application of a 75 A/phase qualifying threshold. The standard drafting team’s White Paper on Thermal Screening Criterion, as revised by NERC in the June 28, 2016 Filing, provides an adequate technical basis to approve NERC’s proposal. As noted in the revised White Paper on Thermal Screening Criterion, the calculated metallic hot spot temperature corresponding to an effective GIC of 75 A/phase is 172 degrees Celsius; that figure is higher than the original figure of 150 degrees Celsius calculated by the standard drafting team but is still below the 200 degree Celsius limit specified in IEEE Std C57.91–2011.\(^\text{96}\) The

64. Certain non-industry commenters contend that the 75 A/phase qualifying threshold for thermal impact assessments is not technically justified. Emprimus contends that “many transformers have GIC ratings less than 75 amps per phase,” but Emprimus claims that an Idaho National Lab study showed that “GIC introduced at 10 amps per phase on high voltage transformers exceed harmonic levels allowed under IEEE 519.”\(^\text{90}\) Emprimus also maintains that a 2013 IEEE paper “suggest[s] that there can be generator rotor damage at GIC levels which exceed 50 amps per phase.”\(^\text{91}\) Gaunt contends, based on his analysis of historical events, that “degradation is initiated in transformers by currents that are significantly below the 75 amps per phase.”\(^\text{92}\) Gaunt states that “[u]ntil better records are kept of transformer [dissolved gas in oil analysis] and transformer failure, the proposed level of 75 [A/phase] of GIC needed to initiate assessment of transformer response must be considered excessively high.”\(^\text{93}\) Gaunt recommends a qualifying threshold of 15 amps per phase. Resilient Societies states that the 75 A/phase threshold is based on a mathematical model for one type of transformer and that several tests referenced in the standard drafting team’s White Paper on Transformer Thermal Impact Assessment were carried out under no load or minimal load conditions. In addition, Resilient Societies contends that applying the 75 A/phase threshold and NERC’s proposed benchmark GMD event (i.e., using the spatially-averaged reference peak geoelectric field amplitude) results in only “two out of approximately 560 extra high voltage transformers” requiring thermal impact assessments in the PJM region; only one 345 kV transformer requiring thermal impact assessment in Maine; and zero transformers requiring thermal impact assessments in ATC’s network.\(^\text{94}\)

---

\(^{90}\) Emprimus Comments at 4.

\(^{91}\) Id.

\(^{92}\) Gaunt Comments at 13.

\(^{93}\) Id. at 14.

\(^{94}\) Resilient Societies Comments at 5–14. Resilient Societies states that modeling performed by Central Maine Power Co. and Emprimus for the Maine Public Utilities Commission indicates that eight 345 kV transformers (53 percent according to Resilient Societies) would require thermal impact assessments in Maine if the reference peak geoelectric field amplitude were set at 20 V/km. Id. at 10. Resilient Societies also contends that this result is consistent with the Oak Ridge Meta-R–319 Study’s finding that eight transformers would be “at risk” in Maine under a “30 Amp At-Risk Threshold scenario.”\(^\text{91}\) Id. Central Maine Power Co. calculated that the scaled NERC benchmark GMD event for the northernmost point in Maine would be 4.53 V/km. Resilient Societies’ calculations regarding ATC estimate that the scaled benchmark GMD event for Wisconsin would be 2 V/km. Id. at 14.

\(^{95}\) The Commission received two comments following NERC’s June 28, 2016 Filing. However, the supplemental comments did not specifically address the revisions submitted in NERC’s June 28, 2016 filing.

\(^{96}\) NERC June 28, 2016 Filing, Revised White Paper on Screening Criterion for Transformer Thermal Impact Assessment at 3.
C. GMD Research Work Plan

69. The NOPR proposed to address the need for more data and certainty regarding GMD events and their potential effect on the Bulk-Power System by directing NERC to submit informational filings that address GMD-related research areas. The NOPR proposed to direct NERC to submit in the first filing a research work plan indicating how NERC plans to: (1) Further analyze the area over which spatial averaging should be calculated for stability studies, including performing sensitivity analyses on squares less than 500 km per side (e.g., 100 km, 200 km); (2) further analyze earth conductivity models by, for example, using metered GIC and magnetometer readings to calculate earth conductivity and using 3-D readings; (3) determine whether new analyses and observations support modifying the use of single station readings around the earth to adjust the spatially averaged benchmark for latitude; and (4) assess how to make GMD data (e.g., GIC monitoring and magnetometer data) available to researchers for study.

70. With respect to GIC monitoring and magnetometer readings, the NOPR sought comment on the barriers, if any, to public dissemination of such readings, including if their dissemination poses a security risk and if any such data should be treated as Critical Energy Infrastructure Information or otherwise restricted to authorized users. The NOPR proposed that NERC submit the GMD research work plan within six months of the effective date of a final rule in this proceeding. The NOPR also proposed that the GMD research work plan submitted by NERC should include a schedule for submitting one or more informational filings that apprise the Commission of the results of the four additional study areas, as well as any other relevant developments in GMD research, and should assess whether Reliability Standard TPL–007–1 remains valid in light of new information or whether revisions are appropriate.

Comments

71. NERC states that continued GMD research is necessary and that the potential impacts of GMDs on reliability are evolving. NERC, however, prefers that the NERC GMD Task Force continue its research without the GMD research work plan proposed in the NOPR. NERC contends that allowing the NERC GMD Task Force to continue its work would “accomplish NERC’s and the Commission’s shared goals in advancing GMD understanding and knowledge, while providing the flexibility necessary for NERC to work effectively with its international research partners to address risks to the reliability of the North American Bulk-Power System.” 102 NERC also claims that, in addition to being unnecessary given the work of the NERC GMD Task Force, the NOPR proposal “poses practical challenges . . . [because it would] bind[] NERC to a specific and inflexible research plan and report schedule to be determined six months (or even a year) following the effective date of a final rule in this proceeding.” 103

72. The Trade Associations and CEA do not support the GMD research work plan. Instead, they contend that NERC should be allowed to pursue GMD research independently.

73. Several commenters, while not addressing the NOPR proposal specifically, state that additional research is necessary to validate or improve elements of the benchmark GMD event definition. 104

74. The Trade Associations state that monitoring data should be available for academic research purposes. Resilient Societies contends that monitoring data should be publicly disseminated on a regular basis and that there is no security risk in releasing such data because they relate to naturally occurring phenomena. Empirius states that it supports making GIC and magnetometer monitoring data available to the public. Bardin supports making GIC and GMD-related information to the public or at least to “legitimate researchers.”

75. Hydro One and CEA do not support mandatory data sharing without the use of non-disclosure agreements.

Commission Determination

76. The Commission recognizes, as do commenters both supporting and opposing proposed Reliability Standard TPL–007–1, that our collective understanding of the threats posed by GMD is evolving as additional research and analysis are conducted. These ongoing efforts are critical to the nation’s long-term efforts to protect the grid against a major GMD event. While we approve NERC’s proposed Reliability Standard TPL–007–1 and direct certain modifications, as described above, the Commission also concludes that facilitating additional research and analysis is necessary to adequately address these threats. As discussed in the next two sections of this final rule, the Commission directs a three-prong approach to further those efforts by directing NERC to: (1) Develop, submit, and implement a GMD research work plan; (2) develop revisions to Reliability Standard TPL–007–1 to require responsible entities to collect GIC monitoring and magnetometer data; and (3) collect GIC monitoring and magnetometer data from registered entities for the period beginning May 2013, including both data existing as of the date of this order and new data going forward, and to make that information available.

77. First, the Commission adopts the NOPR proposal and directs NERC to submit a GMD research work plan and, subsequently, informational filings that address the GMD-related research areas identified in the NOPR, additional research tasks identified in this Final Rule (i.e., the research tasks identified in the thermal impact assessment discussion above) and, in NERC’s discretion, any GMD-related research areas generally that may impact the development of new or modified GMD Reliability Standards. 105 The GMD research work plan should be submitted within six months of the effective date of this final rule. The research required by this directive should be informed by ongoing GMD-related research efforts of entities such as USGS, National Atmospheric and Oceanic Administration (NOAA), National Aeronautics and Space Administration, Department of Energy, academia and other publicly available contributors, including work performed for the National Space Weather Action Plan. 106

78. As part of the second research area identified in the NOPR (i.e., further analyze earth conductivity models by, for example, using metered GIC and magnetometer data), the GMD research work plan need not address the fourth research area identified in the NOPR (i.e., assess how to make GIC monitoring and magnetometer data available to researchers for study) given the Commission’s directive and discussion below regarding the collection and dissemination of necessary GIC monitoring and magnetometer data.

102 NERC Comments at 13.

103 Id. at 16.

104 See, e.g., USGS Comments at 1 (addressing earth conductivity models); Bardin Comments at 2 (addressing earth conductivity models); Roodman Comments at 3 (addressing reference peak geoelectric field amplitude); Gaunt Comments at 7 (addressing spatial averaging).

105 The GMD research work plan need not address the fourth research area identified in the NOPR (i.e., assess how to make GIC monitoring and magnetometer data available to researchers for study) given the Commission’s directive and discussion below regarding the collection and dissemination of necessary GIC monitoring and magnetometer data.

magnetometer readings to calculate earth conductivity and using 3-D readings), the GMD research work plan should specifically investigate “coastal effects” on ground conductivity models.  

79. In addition, the large variances described by USGS in actual 3-D ground conductivity data raise the question of whether one time series geomagnetic field is sufficient for vulnerability assessments. The characteristics, including frequencies, of the time series interact with the ground conductivity to produce the geoelectric field that drives the GIC. Therefore, the research should address whether additional realistic time series should be selected to perform assessments in order to capture the time series that produces the most vulnerability for an area.

80. The comments largely agree that additional GMD research should be pursued, particularly with respect to the elements of the benchmark GMD event definition (i.e., the reference peak geoelectric field amplitude value, geomagnetic latitude scaling factor, and earth conductivity scaling factor). There is ample evidence in the record to support the need for additional GMD-related research.  

107 For example, USGS submitted comments indicating that USGS’s one-dimensional electrical conductivity models used by the standard drafting team have a “significant limitation” in that they assume that a “[one dimensional] conductivity-with-depth profile can adequately represent a large geographic region,” which USGS describes as a “gross simplification.”  

108 USGS observes that while the “proposed standard attempted to incorporate the best scientific research available . . . it must be noted that the supporting science is quickly evolving.”  

109 USGS recommends that “the proposed standard should establish a process for updates and improvements that acknowledges and addresses the quickly evolving nature of relevant science and associated data.”

81. Opposition to the proposal centers on the contention that the proposed directive is unnecessary and potentially counterproductive given the continuing work of the NERC GMD Task Force. We do not find these comments persuasive. Our directive requires NERC to submit a work plan for the study of GMD-related issues that are already being examined or that NERC agrees should be studied.  

111 Nothing in our directive precludes NERC from continuing to use the NERC GMD Task Force as a vehicle for conducting the directed research or other research. Indeed, we encourage NERC to continue to use the GMD Task Force as a forum for engagement with interested stakeholders. In addition, we do not set specific deadlines for completion of the research; we only require NERC to submit the GMD research work plan within six months of the effective date of a final rule. The GMD research work plan, in turn, should include target dates for the completion of research topics and the reporting of findings to the Commission. The Commission intends to notice and invite comment on the GMD research work plan. An extension of time to submit the GMD research work plan may be available if six months proves to be insufficient. In addition, given the uncertainties commonly associated with complex research projects, the Commission will be flexible regarding changes to the tasks and target dates established in the GMD research work plan.

D. Monitoring Data

NERC Petition

82. Reliability Standard TPL–007–1, Requirement R2 requires responsible entities to “maintain System models and GIC System models of the responsible entity’s planning area for performing the study or studies needed to complete GMD Vulnerability Assessment(s).” NERC states that Reliability Standard TPL–007–1 contains “requirements to develop the models, studies, and assessments necessary to build a picture of overall GMD vulnerability and identify where mitigation measures may be necessary.”  

112 NERC explains that mitigating strategies “may include installation of hardware (e.g., GIC blocking or monitoring devices), equipment upgrades, training, or enhanced Operating Procedures.”

NPR

83. The NOPR proposed to direct NERC to revise Reliability Standard TPL–007–1 to require the installation of monitoring equipment (i.e., GIC monitors and magnetometers) to the extent there are any gaps in existing GIC monitoring and magnetometer networks. Alternatively, the NOPR sought comment on whether NERC should be responsible for installation of any additional, necessary magnetometers while affected entities would be responsible for installation of additional, necessary GIC monitors. The NOPR also proposed that, as part of NERC’s work plan, NERC identify the number and location of current GIC monitors and magnetometers in the United States to assess whether there are any gaps. The NOPR sought comment on whether the Commission should adopt a policy specifically allowing recovery of costs associated with or incurred to comply with Reliability Standard TPL–007–1, including for the purchase and installation of monitoring devices.

Comments

84. NERC does not support the NOPR proposal regarding the installation of GIC monitoring devices and magnetometers. NERC contends that the proposed requirement is not necessary because Reliability Standard TPL–007–1 “supports effective GMD monitoring programs, and additional efforts are planned or underway to ensure adequate data for reliability purposes.”  

113 NERC also maintains that the proposed directive “poses implementation challenges [because] GMD monitoring capabilities and technical information have not yet reached a level of maturity to support application in a Reliability Standard, and not all applicable entities have developed the comprehensive

See, e.g., NERC Comments at 8 (“NERC agrees that [spatial averaging] research would provide additional modeling insights and supports further collaborative efforts between space weather researchers and electric utilities through the NERC GMD Task Force”), at 10 (“NERC agrees that additional [geomagnetic latitude scaling] research is necessary, and supports the significant research that is occurring throughout the space weather community to develop and validate models and simulation techniques”), at 13 (“Working with EPRI, researchers at USGS, and industry, NERC will work to improve the earth conductivity models that are a vital component to understanding the risks of GMD events in each geographic region”), and at 23 (“efforts are already underway to expand GMD monitoring capabilities . . . [and] [t]hrough these efforts, NERC and industry should effectively address the concerns noted by the Commission in the NOPR, including ensuring a more complete set of data for operational and planning needs and supporting analytical validation and situational awareness”).
understanding of system vulnerabilities that would be needed to deploy GMD monitoring devices for the greatest reliability benefit."115 NERC also notes that a requirement mandating the installation of monitoring devices for situational awareness purposes would be outside the scope of a planning Reliability Standard.

85. The Trade Associations, CEA, ITC, Hydro One and Tri-State, while agreeing that more data are useful to analytical validation and situational awareness, do not support the NOPR proposal. CEA does not support the proposal because Reliability Standard TPL–007–1 is a planning standard; a one-size-fits-all monitoring approach will not work; the responsibility for monitoring, which in Canada is done by the Canadian government, should not fall to industry or NERC; and the proposal is too costly. Likewise, ITC contends that it would not be prudent or cost effective for entities to have to install monitoring equipment. Hydro One does not support a Reliability Standard that prescribes the number and location of monitoring devices that must be installed. The Trade Associations and ITC, instead, support directing NERC to develop a plan to address this issue. The Trade Associations state that such a plan should involve a partnership between government and industry. Tri-State maintains that NERC, working with USGS and NOAA, should be responsible for determining the need for and installation of any needed magnetometers. If the Commission requires applicable entities to install monitoring devices, the Trade Associations, Tri-State and Exelon agree that there should be cost recovery.

86. BPA supports the NOPR proposal for increased monitoring because BPA believes it will improve situational awareness. As a model, BPA states that the “Canadian government in collaboration with Canadian transmission owners” have developed a “technique that shows real promise of increasing visibility of GIC flows and localized impacts for a regional transmission grid.”116 AEP encourages the Commission to expand the “number and scope of the permanent geomagnetic observatories and install permanent geoelectric observatories in the United States.” 117

87. Resilient Societies supports requiring the installation of GIC monitoring devices and magnetometers, noting that GIC monitors are commercially available and cost as little as $10,000 to $15,000 each. Emprinus supports developing criteria that inform the need for and location of monitoring devices.

Commission Determination

88. We conclude that additional collection and disclosure of GIC monitoring and magnetometer data is necessary to improve our collective understanding of the threats posed by GMD events. The Commission therefore adopts the NOPR proposal in relevant part and directs NERC to develop revisions to Reliability Standard TPL–007–1 to require responsible entities to collect GIC monitoring and magnetometer data as necessary to enable model validation and situational awareness, including from any devices that must be added to meet this need. The NERC standard drafting team should address the criteria for collecting GIC monitoring and magnetometer data discussed below and provide registered entities with sufficient guidance in terms of defining the data that must be collected, and NERC should propose in the GMD research work plan how it will determine and report on the degree to which industry is following that guidance.

89. In addition, the Commission directs NERC, pursuant to Section 1600 of the NERC Rules of Procedure, to collect GIC monitoring and magnetometer data from registered entities for the period beginning May 2013, including both data existing as of the date of this order and new data going forward, and to make that information available.118 We also provide guidance that, as a general matter, the Commission does not believe that GIC monitoring and magnetometer data should be treated as Confidential Information pursuant to the NERC Rules of Procedure.

Collection of GIC and Magnetometer Data

90. In developing a requirement regarding the collection of magnetometer data, NERC should consider the following criteria discussed at the March 1, 2016 Technical Conference: (1) The data is sampled at a cadence of at least 10-seconds or faster; (2) the data comes from magnetometers that are physically close to GIC monitors; (3) the data comes from magnetometers that are not near sources of magnetic interference (e.g., roads and local distribution networks); and (4) data is collected from magnetometers spread across wide latitudes and longitudes and from diverse physiographic regions.119

91. Each responsible entity that is a transmission owner should be required to collect necessary GIC monitoring data. However, a transmission owner should be able to apply for an exemption from the GIC monitoring data collection requirement if it demonstrates that no or little value would be added to planning and operations. In developing a requirement regarding the collection of GIC monitoring data, NERC should consider the following criteria discussed at the March 1, 2016 Technical Conference: (1) The GIC data is from areas found to have high GIC based on system studies; (2) the GIC data comes from sensitive installations and key parts of the transmission grid; and (3) the data comes from GIC monitors that are not situated near transportation systems using direct current (e.g., subways or light rail).120 GIC monitoring and magnetometer locations should also be revisited after GIC system models are run with improved ground conductivity models. NERC may also propose to incorporate the GIC monitoring and magnetometer data collection requirements in a different Reliability Standard (e.g., real-time reliability monitoring and analysis capabilities as part of the TOP Reliability Standards).

92. Our determination differs from the NOPR proposal in that the NOPR proposed to require the installation of GIC monitors and magnetometers. The comments raised legitimate concerns about incorporating such a requirement in Reliability Standard TPL–007–1 because of the complexities of siting and operating monitoring devices to achieve the maximum benefits for model validation and situational awareness. In particular, responsible entities may not have the technical capacity to properly install and operate magnetometers, given complicating issues such as man-made interference, calibration, and data interpretation. Accordingly, the Commission determines that requiring responsible entities to collect necessary GIC monitoring and magnetometer data, rather than install GIC monitors and magnetometers, affords greater flexibility while obtaining significant benefits. For example, responsible entities could collaborate with universities and government entities that operate magnetometers to collect necessary magnetometer data, or

115 Id.
116 BPA Comments at 4.
117 AEP March 29, 2016 Supplemental Comments at 1.
118 The Commission's directives to collect and make available GIC monitoring and magnetometer data do not apply to non-U.S. responsible entities or Alaska and Hawaii.
119 Slide Presentation of Luis Marti (Third Panel), March 1, 2016 Technical Conference at 3, 9.
120 Id. at 8.
responsible entities could choose to install GIC monitors or magnetometers to comply with the data collection requirement. While the Commission’s primary concern is the quality of the data collected, we do not establish a requirement for either approach or promote a particular device for collecting the required data. We also find that cost recovery for prudent costs associated with or incurred to comply with Reliability Standard TPL–007–1 and future revisions to the Reliability Standard, including for the purchase and installation of monitoring devices, will be available to registered entities.

Data Availability

93. We also direct NERC, pursuant to Sections 1500 and 1600 of the NERC Rules of Procedure, to collect and make GIC monitoring and magnetometer data available.

122 We determine that the dissemination of GIC monitoring and magnetometer data will facilitate a greater understanding of GMD events that, over time, will improve Reliability Standard TPL–007–1. The record in this proceeding supports the conclusion that access to GIC monitoring and magnetometer data will help facilitate GMD research, for example, by helping to validate GMD models. To facilitate the prompt dissemination of GIC monitoring and magnetometer data, we address whether GIC monitoring or magnetometer data should qualify as Confidential Information under the NERC Rules of Procedure.

94. Based on the record in this proceeding, we believe that GIC and magnetometer data typically should not be designated as Confidential Information under the NERC Rules of Procedure. We are not persuaded that the dissemination of GIC monitoring or magnetometer data poses a security risk or that the data otherwise qualify as Confidential Information. CEA and Hydro One have objected, without elaboration, to making data available without the use of non-disclosure agreements. At the March 1, 2016 Technical Conference, panelists were questioned on the topic yet could not identify a security-based or other credible reason for not making such information available to requesters. In comments submitted after the March 1, 2016 Technical Conference, the Trade Associations explained that “GIC measurements, while not as sensitive as transmission planning studies, should also be protected . . . [because a] potentially malicious actor could conceivably combine GIC information with information from other sources to deduce the configuration and operating conditions of the grid or some portion of it.” The Trade Associations’ comments, however, do not substantiate the assertion that the release of GIC monitoring (or magnetometer data) alone poses any risk to the Bulk-Power System. The Trade Associations’ comment is also vague by not identifying what “information from other sources” could be combined with GIC monitoring “to deduce the configuration and operating conditions of the grid or some portion of it.”

95. In conclusion, given both the lack of substantiated concerns regarding the disclosure of GIC and magnetometer data, and the compelling demonstration that access will support ongoing research and analysis of GMD threats, the Commission expects NERC to make GIC and magnetometer data available. Notwithstanding our findings here, to the extent any entity seeks confidential treatment of the data it provides to NERC, the burden rests on that entity to justify the confidential treatment. Exceptions are possible if the providing entity obtains from NERC, at the time it submits data to NERC, a determination that GIC or magnetometer data qualify as Confidential Information.

123 CEA Comments at 15; Hydro One Comments at 2.

126 Trade Associations March 7, 2016 Supplemental Comments at 5.

127 We believe that GIC and magnetometer data qualify as Confidential Information when receiving such information. See

E. Corrective Action Plan Deadlines

NERC Petition

96. Reliability Standard TPL–007–1, Requirement R7 provides that:

Each responsible entity, as determined in Requirement R1, that concludes, through the GMD Vulnerability Assessment conducted in Requirement R4, that their System does not meet the performance requirements of Table 1 shall develop a Corrective Action Plan addressing how the performance requirements will be met . . .

NERC explains that the NERC Glossary defines corrective action plan to mean, “A list of actions and an associated timetable for implementation to remedy a specific problem.” Requirement R7.3 states that the corrective action plan shall be provided within “90 calendar days of completion to the responsible entity’s Reliability Coordinator, adjacent Planning Coordinator(s), adjacent Transmission Planner(s), functional entities referenced in the Corrective Action Plan, and any functional entity that submits a written request and has a reliability-related need.”

NOR

97. The NOPR proposed to direct NERC to modify Reliability Standard TPL–007–1 to require corrective action plans to be developed within one year of the completion of the GMD Vulnerability Assessment. The NOPR also proposed to direct NERC to modify Reliability Standard TPL–007–1 to require a deadline for non-equipment mitigation measures that is two years following development of the corrective action plan and a deadline for mitigation measures involving equipment installation that is four years following development of the corrective action plan. Recognizing that there is little experience with installing equipment for GMD mitigation, the NOPR stated that the Commission is open to proposals that may differ from its proposal, particularly from any entities with experience in this area. The NOPR also sought comment on appropriate alternative deadlines and whether there should be a mechanism that would allow NERC to consider, on
a case-by-case basis, requests for extensions of required deadlines.

Comments

98. NERC states that it does not oppose a one-year deadline for completing the development of corrective action plans. However, NERC contends that imposing deadlines on the completion of mitigation actions would be problematic because of the uncertainties regarding the amount of time needed to install necessary equipment. NERC maintains that deadlines that are too short may cause entities to take mitigation steps that, while quicker, would not be as effective as mitigations that take more time to complete. NERC supports allowing extensions if the Commission adopts the NOPR proposal.

99. AEP states that, even if possible, a one-year deadline for developing corrective action plans is too aggressive and would encourage narrow thinking (i.e., registered entities would address GMD mitigation rather than pursue system improvements generally that would also address GMD mitigation). AEP, instead, proposes a two-year deadline. AEP does not support a Commission-imposed deadline for completing mitigation actions, although it supports requiring a time-table in the corrective action plan. AEP notes that the Commission did not impose a specific deadline for completion of corrective actions in Reliability Standard TPL–001–4 (Transmission System Planning Performance). CEA does not support a deadline for the development of corrective action plans because it is already part of the GMD Vulnerability Assessment process. Like AEP, CEA does not support specific deadlines for the completion of mitigation actions and instead supports including time-tables in the corrective action plan. CEA also contends that an extension process would be impracticable.

100. Trade Associations, BPA and Tri-State support the imposition of corrective action plan deadlines as long as entities can request extensions. Gaunt supports the corrective action plan deadlines proposed in the NOPR. Emprinus supports the imposition of deadlines but contends that non-equipment mitigation actions should be completed in 6 months and that there should be a rolling four-year period for equipment mitigation (i.e., after each year, 25 percent of the total mitigation actions should be completed).

Commission Determination

101. The Commission directs NERC to modify Reliability Standard TPL–007–1 to include a deadline of one year from the completion of the GMD Vulnerability Assessments to complete the development of corrective action plans. NERC’s statement that it “expects” corrective action plans to be completed at the same time as GMD Vulnerability Assessments conceals the point made in the NOPR that Reliability Standard TPL–007–1 currently lacks a clear deadline for the development of corrective action plans.

102. The Commission also directs NERC to modify Reliability Standard TPL–007–1 to include a two-year deadline after the development of the corrective action plan to complete the implementation of non-hardware mitigation and four-year deadline to complete hardware mitigation. The comments provide contrasting views on the practicality of imposing mitigation deadlines, with NERC and some industry commenters arguing that such deadlines are not warranted while the Trade Associations and other industry commenters support their imposition. Most of these comments, however, support an extension process if the Commission determines that deadlines are necessary. The Commission agrees that NERC should consider extensions of time on a case-by-case basis. The Commission directs NERC to submit these revisions within 18 months of the effective date of this Final Rule.

103. Following adoption of the mitigation deadlines required in this final rule, Reliability Standard TPL–007–1 will establish a recurring five-year schedule for the identification and mitigation of potential GMD risks on the grid, as follows: (1) The development of corrective action plans must be completed within one year of a GMD Vulnerability Assessment; (2) non-hardware mitigation must be completed within two years following development of corrective action plans; and (3) hardware mitigation must be completed within four years following development of corrective action plans.

104. As discussed elsewhere in this final rule, the Commission recognizes and expects that our collective understanding of the science regarding GMD threats will improve over time as additional research and analysis is conducted. We believe that the recurring five-year cycle will provide, on a going-forward basis, the opportunity to update Reliability Standard TPL–007–1 to reflect new or improved scientific understanding of GMD events.

F. Minimization of Load Loss and Curtailment

NERC Petition

105. Reliability Standard TPL–007–1, Requirement R4 states that each responsible entity “shall complete a GMD Vulnerability Assessment of the Near-Term Transmission Planning Horizon once every 60 calendar months.” Requirement R.2 further states that the “study or studies shall be conducted based on the benchmark GMD event described in Attachment 1 to determine whether the System meets the performance requirements in Table 1.”

106. NERC maintains that Table 1 sets forth requirements for system steady state performance. NERC explains that Requirement R4 and Table 1 “address assessments of the effects of GICs on other Bulk-Power System equipment, system operations, and system stability, including the loss of devices due to GIC impacts.” Table 1 provides, in relevant part, that load loss and/or curtailment are permissible elements of the steady state:

Load loss as a result of manual or automatic Load shedding (e.g. UVLS) and/or curtailment of Firm Transmission Service may be used to meet BES performance requirements during studied GMD conditions. The likelihood and magnitude of load loss or curtailment of Firm Transmission Service should be minimized.

NOPR

107. The NOPR sought comment on the provision in Table 1 that “Load loss or curtailment of Firm Transmission Service should be minimized.” The NOPR stated that because the term “minimized” does not represent an objective value, the provision is potentially subject to interpretation and assertions that the term is vague and may not be enforceable. The NOPR also explained that the modifier “should” might indicate that minimization of load loss or curtailment is only an expectation or a guideline rather than a requirement. The NOPR sought comment on how the provision in Table 1 regarding load loss and curtailment will be enforced, including: (1) Whether, by using the term “should,” Table 1 requires minimization of load loss or curtailment; or both and (2) what constitutes “minimization” and how it will be assessed.
Comments

108. NERC states the language in Table 1 is modeled on Reliability Standard TPL–001–4, which provides in part that “an objective of the planning process should be to minimize the likelihood and magnitude of interruption of Firm transmission Service following Contingency events.” NERC explains that Reliability Standard TPL–007–1 “does not include additional load loss performance criteria used in normal contingency planning because such criteria may not be applicable to GMD Vulnerability Assessment of the impact from a 1-in-100 year GMD event.”132 However, NERC points out that the enforcement of Requirement R4 “would include an evaluation of whether the system meets the Steady State performance requirements of Table 1 which are aimed at protecting against instability, controlled separation, and Cascading.”133 NERC further states that “minimized” in the context of Reliability Standard TPL–007–1 means that “planned Load loss or curtailments are not to exceed amounts necessary to prevent voltage collapse.” 134

109. The Trade Associations agree with the NOPR that the lack of objective criteria could create compliance and enforcement challenges and could limit an operator’s actions in real-time. The Trade Associations state that the Commission “should consider whether such language in mandatory requirements invites the unintended consequences of raising reliability risks, especially during real-time emergency conditions . . . [but] [i]n the interim, the Trade Associations envision that NERC will consider further discussions with stakeholders on the issue prior to TPL–007 implementation.” 135

Commission Determination

110. The Commission accepts the explanation in NERC’s comments of what is meant by the term “minimized” in Table 1.

111. Each requirement of Reliability Standard TPL–007–1 includes one violation risk factor and has an associated set of at least one violation severity level. NERC states that the ranges of penalties for violations will be based on the sanctions table and supporting penalty determination process described in the Commission approved NERC Sanction Guidelines. The NOPR proposed to approve the violation risk factors and violation severity levels submitted by NERC, for the requirements in Reliability Standard TPL–007–1, consistent with the Commission’s established guidelines.136 The Commission did not receive any comments regarding this aspect of the NOPR. Accordingly, the Commission approves the violation risk factors and violation severity levels for the requirements in Reliability Standard TPL–007–1.

H. Implementation Plan and Effective Dates

NERC Petition

112. NERC proposes a phased, five-year implementation period.137 NERC maintains that the proposed implementation period is necessary: (1) To allow time for entities to develop the required models; (2) for proper sequencing of assessments because thermal impact assessments are dependent on GIC flow calculations that are determined by the responsible planning entity; and (3) to give time for development of viable corrective action plans, which may require applicable entities to “develop, perform, and/or validate new or modified studies, assessments, procedures . . . [and because] [s]ome mitigation measures may have significant budget, siting, or construction planning requirements.” 138

113. The proposed implementation plan states that Requirement R1 shall become effective on the first day of the first calendar quarter that is six months after Commission approval. For Requirement R2, NERC proposes that the requirement shall become effective on the first day of the first calendar quarter that is 18 months after Commission approval. NERC proposes that Requirement R5 shall become effective on the first day of the first calendar quarter that is 24 months after Commission approval. NERC proposes that Requirement R6 shall become effective on the first day of the first calendar quarter that is 48 months after Commission approval. And for Requirement R3, Requirement R4, and Requirement R7, NERC proposes that the requirements shall become effective on the first day of the first calendar quarter that is 60 months after Commission approval.

114. The NOPR proposed to approve the implementation plan and effective dates submitted by NERC. However, given the serial nature of the requirements in Reliability Standard TPL–007–1, the Commission expressed concern about the duration of the timeline associated with any mitigation stemming from a corrective action plan and sought comment from NERC and other interested entities as to whether the length of the implementation plan, particularly with respect to Requirements R4, R5, R6, and R7, could be reasonably shortened.

Comments

115. NERC does not support shortening the implementation period. NERC maintains that the proposed implementation period is “appropriate and commensurate with the requirements of the proposed standard” and is based on “industry . . . projections on the time required for obtaining validated tools, models and data necessary for conducting GMD Vulnerability Assessments through the standard development process.” 139

116. The Trade Associations, BPA, CEA, Joint ISOs/RTOs and Tri-State support the proposed implementation plan for largely the same reasons as NERC.

117. Gaunt proposes a shorter implementation period wherein the initial GMD Vulnerability Assessment would be performed 48 months following the effective date of a final rule in this proceeding, as opposed to the proposed implementation plan’s 60 months. Subsequent GMD Vulnerability Assessments would be performed every 48 months thereafter. Briggs states that a “3 or 4 year timeline would likely provide industry with enough time to implement corrective measures and should be considered.” 140

Commission Determination

118. The Commission approves the implementation plan submitted by NERC. When registered entities begin complying with Reliability Standard TPL–007–1, it will likely be the first time that many registered entities will have planned for a GMD event, beyond developing the GMD operational procedures required by Reliability Standard EOP–010–1. Registered
entities will gain the capacity to conduct GMD Vulnerability Assessments over the course of the five-year implementation plan by complying with, at phased intervals, the foundational requirements in Reliability Standard TPL–007–1 (i.e., establishing responsibilities for planning and developing models and performance criteria). In addition, as discussed above, NERC’s implementation plan affords sufficient time for NERC to submit and for the Commission to consider the directed revisions to Reliability Standard TPL–007–1 before the completion of the first GMD Vulnerability Assessment. As such, the five-year implementation plan will allow for the incorporation of the revised Reliability Standard in the first round of GMD Vulnerability Assessments.

I. Other Issues

119. Several commenters indicated that the Commission should address the threats posed by EMPs or otherwise raised the issue of EMPs.141 For example, Briggs states that the Commission should “initiate a process to improve the resilience of the U.S. electric grid to the threat of high altitude electromagnetic pulse (HEMP) attacks, which can be more severe than solar superstorms.” 142 However, as the Commission stated in Order No. 779 in directing the development of GMD Reliability Standards and in Order No. 797 in approving the First Stage GMD Reliability Standards, EMPs are not within the scope of the GMD rulemaking proceedings. 143

120. Holdeman contends that the Commission “should modify the current preemption of States preventing them from having more stringent reliability standards for Commission regulated entities than Commission standards.”144 As the Commission indicated in response to similar comments in Order No. 797, section 215(i)(3) of the FPA provides in relevant part that section 215 does not “preempt any authority of any State to take action to ensure the safety, adequacy, and reliability of electric service within that State, as long as such action is not inconsistent with any reliability standard.” 145 Moreover, Reliability Standard TPL–007–1 does not preclude users, owners, and operators of the Bulk-Power System from taking additional steps that are designed to mitigate the effects of GMD events, provided those additional steps are not inconsistent with the Commission-approved Reliability Standards.

121. Certain commenters opposed to Reliability Standard TPL–007–1 contend that its approval could absolve industry of any legal liability should a GMD event cause a disruption to the Bulk-Power System. For example, Resilient Societies “ask[s] the Commission to clarify its expectation that the FERC jurisdictional entities will be held to account, and be subject to liability in the event of gross negligence or willful misconduct in planning for and mitigating solar geomagnetic storms.”146 Resilient Societies also contends that the Commission does not have the legal authority “to grant immunity from liability by setting reliability standards.”147

122. The Commission has never stated in the GMD Reliability Standard rulemaking proceedings with Commission-approved Reliability Standards absolves registered entities from legal liability generally, to the extent legal liability exists, should a disruption occur on the Bulk-Power System due to a GMD event. Resilient Societies’ comment appears to misconstrue language in Order No. 779 in which the Commission stated, when directing the development of the Second Stage GMD Reliability Standards, that the “Second Stage GMD Reliability Standard should not impose ‘strict liability’ on responsible entities for failure to meet the performance of the Bulk-Power System in the face of a GMD event unforeseen severity.”148 The Commission’s statement merely recognized that the Second Stage GMD Reliability Standard should require registered entities to plan against a defined benchmark GMD event, for the purpose of complying with the proposed Reliability Standard, rather than any GMD event generally (i.e., a GMD event that exceeded the severity of the benchmark GMD event). The Commission did not suggest, nor could it suggest, that compliance with a Reliability Standard would absolve registered entities from general legal liability, if any, arising from a disruption to the Bulk-Power System. The only liability the Commission was referring to in Order No. 779 was the potential for penalties or remediation under section 215 of the FPA for failure to comply with a Commission-approved Reliability Standard.

123. Kappenman, Resilient Societies and Bardin filed comments that addressed the NERC “Level 2” Appeal Panel decision.149 As a threshold issue, we agree with the Appeal Panel that the issues raised by the appellants in that proceeding are not procedural; instead they address the substantive provisions of Reliability Standard TPL–007–1. Section 8 (Process for Appealing an Action or Inaction) of the NERC Standards Process Manual states:

Any entity that has directly and materially affected interests and will be adversely affected by any procedural action or inaction related to the development, approval, revision, reaffirmation, retirement or withdrawal of a Reliability Standard, definition, Variance, associated implementation plan, or Interpretation shall have the right to appeal. This appeals process applies only to the NERC Reliability Standards processes as defined in this manual, not to the technical content of the Reliability Standards action.

The appellants, who have the burden of proof under the NERC Rules of Procedure, have not shown that NERC or the standard drafting team failed to comply with any procedural requirements set forth in the NERC Rules of Procedure.150 Instead, it would appear that the appeal constitutes a collateral attack on the substantive provisions of Reliability Standard TPL–007–1. As the appellants’ substantive concerns with Reliability Standard TPL–007–1 have been addressed in this Final Rule, issues surrounding the NERC “Level 2” Appeal Panel decision are, in any case, moot.

III. Information Collection Statement

124. The collection of information contained in this final rule is subject to review by the Office of Management and Budget (OMB) regulations under section 3507(d) of the Paperwork Reduction Act of 1995 (PRA). 151 OMB’s regulations require approval of certain informational collection requirements imposed by agency rules.152

143 Order No. 797, 147 FERC ¶ 61,209 at P 42 (citing Order No. 779, 143 FERC ¶ 61,147 at P 14 n.20).

144 Holdeman Comments at 2.

145 Order No. 797, 147 FERC ¶ 61,209 at P 44 [citing 16 U.S.C. 824d(d)(3)].

146 Resilient Societies Comments at 62; see also CSP Comments at 1 (“It would be far better for FERC to remand Standard TPL–007–1 in its entirety than to approve a reliability standard that would grant liability protection to utilities while blocking the electric grid protection for the public that a 21st century society requires.”).

147 Resilient Societies Comments at 62.

148 Order No. 779, 143 FERC ¶ 61,147 at P 84.
125. Upon approval of a collection(s) of information, OMB will assign an OMB control number and an expiration date. Respondents subject to the filing requirements of a rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

126. The Commission solicited comments on the need for this information, whether the information will have practical utility, the accuracy of the burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained, and any suggested methods for minimizing respondents’ burden, including the use of automated information techniques. The Commission asked that any revised burden or cost estimates submitted by commenters be supported by sufficient detail to understand how the estimates are generated. The Commission received comments on specific requirements in Reliability Standard TPL–007–1, which we address in this Final Rule. However, the Commission did not receive any comments on our reporting burden estimates or on the need for and the purpose of the information collection requirements.^{153}

Public Reporting Burden: The Commission approves Reliability Standard TPL–007–1 and the associated implementation plan, violation severity levels, and violation risk factors, as discussed above. Reliability Standard TPL–007–1 will impose new requirements for transmission planners, planning coordinators, transmission owners, and generator owners. Reliability Standard TPL–007–1, Requirement R1 requires planning coordinators, in conjunction with the applicable transmission planner, to identify the responsibilities of the planning coordinator and transmission planner in the planning coordinator’s planning area for maintaining models and performing the study or studies needed to complete GMD Vulnerability Assessments. Requirements R2, R3, R4, R5, and R7 refer to the “responsible entity, as determined by Requirement R1,” when identifying which applicable planning coordinators or transmission planners are responsible for maintaining models and performing the necessary study or studies. Requirement R2 requires that the responsible entities maintain models for performing the studies needed to complete GMD Vulnerability Assessments, as required in Requirement R4. Requirement R3 requires responsible entities to have criteria for acceptable system steady state voltage performance during a benchmark GMD event. Requirement R4 requires responsible entities to complete a GMD Vulnerability Assessment of the near-term transmission planning horizon once every 60 calendar months. Requirement R5 requires responsible entities to provide GIC flow information to transmission owners and generator owners that own an applicable bulk electric system power transformer in the planning area. This information is necessary for applicable transmission owners and generator owners to conduct the thermal impact assessments required by proposed Requirement R6. Requirement R6 requires applicable transmission owners and generator owners to conduct thermal impact assessments where the maximum effective GIC value provided in proposed Requirement R5, Part 5.1 is 75 A/phase or greater. Requirement R7 requires responsible entities to develop a corrective action plan when its GMD Vulnerability Assessment indicates that its system does not meet the performance requirements of Table 1—Steady State Planning Events. The corrective action plan must address how the performance requirements will be met, must list the specific deficiencies and associated actions that are necessary to achieve performance, and must set forth a timetable for completion. The Commission estimates the annual reporting burden and cost as follows:

FERC–725N, as Modified by the Final Rule in Docket No. RM15–11–000

[TPL–007–1 Reliability Standard for Transmission System Planned Performance for Geomagnetic Disturbance Events]^{154}

^{153} While noting the uncertainties surrounding the potential costs associated with implementation of Reliability Standard TPL–007–1 and the potential costs that could arise from a revised Reliability Standard, the Trade Associations stated that they “have no specific comments regarding the OMB cost estimate in the NOPR.” Trade Associations Comments at 9.
Title: FERC–725N, Mandatory Reliability Standards: TPL Reliability Standards.

154 Eng.=engineer; RK =recordkeeping (record clerk); PC=planning coordinator; TP=transmission planner; TO=transmission owner; and GO=generator owner.

The estimates for cost per response are derived using the following formula: Burden Hours per Response * $/hour = Cost per Response. The $66.35/hour figure for an engineer and the $37.45/hour figure for a record clerk are based on data on the average salary plus benefits from the Bureau of Labor Statistics obtainable at http://www.bls.gov/oes/current/naics3_221000.htm and http://www.bls.gov/news.release/ecec.nr0.htm.

155 Of the 57,640 total burden hours, 42,137 hours are one-time burden hours, and 15,503 hours are on-going annual burden hours.

Action: Approved Additional Requirements.

OMB Control No: 1902–0264.

Respondents: Business or other for-profit and not-for-profit institutions.

Frequency of Responses: One time and on-going.

Necessity of the Information: The Commission has reviewed the requirements of Reliability Standard TPL–007–1 and has made a determination that the requirements of this Reliability Standard are necessary to implement section 215 of the FPA. Specifically, these requirements address the threat posed by GMD events to the Bulk-Power System and conform to the Commission’s directives regarding development of the Second Stage GMD Reliability Standards, as set forth in Order No. 779.

Internal review: The Commission has assured itself, by means of its internal review, that there is specific, objective support for the burden estimates associated with the information requirements.

127 Interested persons may obtain information on the reporting requirements by contacting the Federal Energy Regulatory Commission, Office of the Executive Director, 888 First Street NE., Washington, DC 20426 [Attention: Ellen Brown, e-mail:
VerDate Sep<11>2014 18:28 Sep 29, 2016 Jkt 238001 PO 00000 Frm 00049 Fmt 4700 Sfmt 4700 E:\FR\FM\30SER1.SGM 30SER1 asabaliauskas on DSK3SPTVN1PROD with RULES

52 FR 47897 (Dec. 17, 1987), FERC Stats. & Regs. Environmental Policy Act of 1969, 157 The Commission has significant adverse effect on the human environment for any action that may have a significant adverse effect or an Environmental Impact Statement would be required.

IV. Environmental Analysis
129. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.157 The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment. Included in the exclusion are rules that are clarifying, corrective, or procedural or that do not substantially change the effect of the regulations being amended.158 The actions here fall within this categorical exclusion in the Commission’s regulations.

V. Regulatory Flexibility Act
130. The Regulatory Flexibility Act of 1980 (RFA) 159 generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities. The Small Business Administration’s (SBA) Office of Size Standards develops the numerical definition of a small business.160 The SBA revised its size standard for electric utilities (effective January 22, 2014) to a standard based on the number of employees, including affiliates (from a standard based on megawatt hours).161 Under SBA’s new size standards, planning coordinators, transmission planners, transmission owners, and generator owners are likely included in one of the following categories (with the associated size thresholds noted for each); 162

- Hydroelectric power generation, at 500 employees
- Fossil fuel electric power generation, at 750 employees
- Nuclear electric power generation, at 750 employees
- Other electric power generation (e.g., solar, wind, geothermal, biomass, and other), at 250 employees
- Electric bulk power transmission and control,163 at 500 employees

131. Based on these categories, the Commission will use a conservative threshold of 750 employees for all entities.164 Applying this threshold, the Commission estimates that there are 440 small entities that function as planning coordinators, transmission planners, transmission owners, and/or generator owners. However, the Commission estimates that only a subset of such small entities will be subject to the approved Reliability Standard given the additional applicability criterion in the approved Reliability Standard (i.e., to be subject to the requirements of the approved Reliability Standard, the applicable entity must own or must have a planning area that contains a large power transformer with a high side, wye-grounded winding with terminal voltage greater than 200 kV). 162. Reliability Standard TPL–007–1 enhances reliability by establishing requirements that require applicable entities to perform GMD Vulnerability Assessments and to mitigate identified vulnerabilities. The Commission estimates that each of the small entities to whom the approved Reliability Standard applies will incur one-time compliance costs of $5,193.34 and annual ongoing costs of $5,233.50.

133. The Commission does not consider the estimated cost per small entity to impose a significant economic impact on a substantial number of small entities. Accordingly, the Commission certifies that the approved Reliability Standard will not have a significant economic impact on a substantial number of small entities.

VI. Document Availability
134. In addition to publishing the full text of this document in the Federal Register, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (http://www.ferc.gov) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE., Room 2A, Washington, DC 20426.

135. From FERC’s Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

136. User assistance is available for eLibrary and the FERC’s website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. E-mail the Public Reference Room at public.referenceroom@ferc.gov.

VII. Effective Date and Congressional Notification
137. These regulations are effective November 29, 2016. The Commission has determined, with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of OMB, that this rule is not a “major rule” as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996.

By the Commission.
Issued: September 22, 2016.
Nathaniel J. Davis, Sr., Deputy Secretary.

159 13 CFR 121.101.
162 13 CFR 121.201, Sector 22, Utilities.
163 This category covers transmission planners and planning coordinators.
164 By using the highest number threshold for all types of entities, our estimate conservatively treats more entities as “small entities.”
DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

DEPARTMENT OF THE TREASURY

19 CFR Part 12

RIN 1515–AE12

Notice of Arrival for Importations of Pesticides and Pesticidal Devices

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security; Department of the Treasury.

ACTION: Interim regulations; solicitation of comments.

SUMMARY: This document amends the U.S. Customs and Border Protection (CBP) regulations pertaining to the importation of pesticides and pesticidal devices into the United States subject to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Specifically, CBP is amending the regulations to permit the option of filing an electronic alternative to the U.S. Environmental Protection Agency’s (EPA) “Notice of Arrival of Pesticides and Devices” (NOA) paper form, with entry documentation, via any CBP-authorized electronic data interchange system. This change will support modernization
Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the interim rule. See ADDRESSES for information on how to submit comments. U.S. Customs and Border Protection (CBP) also invites comments that relate to the economic, environmental, or federalism effects that might result from this interim rule. Comments that will provide the most assistance to CBP will reference a specific portion of the interim rule, explain the reason for any recommended change, and include data, information, or authority that support such recommended change.

Background

I. The Federal Insecticide, Fungicide and Rodenticide Act

The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 et seq.), provides for federal regulation of pesticide distribution, sale, and use in the United States. Section 3 of the FIFRA, 7 U.S.C. 136a, requires that, with limited exceptions, all pesticides distributed or sold in the United States must be registered (licensed) by the U.S. Environmental Protection Agency (EPA). Section 17(c)(1) of the FIFRA, 7 U.S.C. 136o(c)(1), provides for EPA review of pesticides and devices being imported into the United States and authorizes U.S. Customs and Border Protection (CBP), at the request of EPA, to delay or refuse admission of imports that appear, from examination, to be adulterated, or misbranded, or otherwise violate the provisions of the FIFRA or are injurious to human health or the environment. Section 17(e) of the FIFRA, 7 U.S.C. 136o(e), provides that, in consultation with EPA, CBP will prescribe regulations for the enforcement of section 17(c).

Under the FIFRA, EPA has authority to regulate the distribution or sale of registered and unregistered pesticides and pesticidal devices into the United States. In order to facilitate compliance with the FIFRA, the filing of EPA Form 3540–1 (“Notice of Arrival of Pesticides and Devices,” hereinafter referred to in this document as “NOA”) is required to notify EPA of the arrival of imported pesticides and devices and serves to assist EPA and CBP in fulfilling their statutory obligation under the FIFRA to regulate the importation, distribution, or sale of pesticides and devices in the United States. The NOA can be found in fillable .pdf format on EPA’s “Compliance” Web site at https://www.epa.gov/compliance/epa-form-3540-1-notice-arrival-pesticides-and-devices.

II. Current Pesticide and Device Importation Procedures

The statutory provisions set forth in section 17(c) of the FIFRA, 7 U.S.C. 136o(c), are implemented in the CBP regulations at §§ 12.110 through 12.117 of title 19 of the Code of Federal Regulations (19 CFR 12.110–12.117) and prescribe the administration of the requirements of the FIFRA. Upon review of the NOA, EPA will inform CBP of the action to be taken with respect to the shipment. The possible actions include release, detention, or refusal of entry of the shipment. The determination is indicated on the completed NOA form, which is signed by an EPA official and returned to the importer or its agent. The importer or the importer’s agent must submit the completed NOA form to CBP along with the documentation required for the entry of merchandise. CBP will follow EPA’s disposition instructions in the NOA and notify EPA when discrepancies exist between the NOA and the entry documents.

III. Explanation of Interim Amendments to CBP Regulations

CBP, in consultation with EPA, is amending the CBP regulations to permit the option of filing an electronic alternative to the NOA with the entry documentation, via any CBP-authorized electronic data interchange system. The NOA may still be filed in a paper format with the EPA prior to arrival of the shipment, and the completed NOA must be filed with CBP at the time of entry. These changes liberalize filing procedures and implement modernization initiatives including the International Trade Data System (ITDS), as established by section 405 of the Security and Accountability for Every (SAFE) Port Act of 2006, Public Law 109–347, 120 Stat. 1884, by utilizing a single-window system for the collection

initiatives, including implementation of the International Trade Data System (ITDS). This document also makes non-substantive conforming and editorial changes to the CBP regulations.

DATES: This interim final rule is effective September 30, 2016. Comments must be submitted on or before October 31, 2016.

ADDRESSES: You may submit comments, identified by docket number USCBP–2016–0061, by one of the following methods:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket title for this rulemaking, and must reference docket number USCBP–2016–0061. All comments received will be posted without change to http://www.regulations.gov, including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the “Public Participation” heading of the SUPPLEMENTARY INFORMATION section of the document.

Docket: For access to the docket to read background documents or comments received, go to http://www.regulations.gov. Submitted comments may also be inspected during business days between the hours of 9:00 a.m. and 4:30 p.m. at the Trade and Commercial Regulations Branch, Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, 90 K Street NE., 10th Floor, Washington, DC. Arrangements to inspect submitted comments should be made in advance by calling Mr. Joseph Clark at (202) 325–0118.

FOR FURTHER INFORMATION CONTACT: For questions related to the filing of EPA forms with CBP, contact William R. Scopa, Branch Chief, Partner Government Branch, Inter-Agency Collaboration Division, Office of Trade, U.S. Customs and Border Protection, at william.r.scopa.cbp.dhs.gov. For EPA-related questions, contact Ryne Yarger, Environmental Protection Specialist, Field and External Affairs Division, Office of Pesticide Programs, U.S. Environmental Protection Agency, at yarger.ryne@epa.gov, telephone (703) 605–1193.

SUPPLEMENTARY INFORMATION:
and distribution of standard electronic import and export data required by participating Federal agencies. These amendments will allow electronic collection, processing, sharing, and review of requisite trade data and documents during the cargo import process.

A discussion of the amendments to 19 CFR 12.110–12.117, other than non-substantive editorial changes, is set forth below.

Section 12.111

Existing §12.111 (19 CFR 12.111) provides that all imported pesticides are required to be registered under the provisions of section 3 of the FIFRA, and pursuant to 40 CFR 162.10, before being permitted entry into the United States. Devices, although not required to be registered, must not bear any statement, design, or graphic representation that is false or misleading in any particular.

CBP is amending this section to update an EPA regulatory citation and to conform to EPA regulations that allow certain pesticides to be imported without registration.

Section 12.112

Existing §12.112(a) (19 CFR 12.112(a)) provides that prior to arrival of pesticides or devices into the United States, the importer must submit a NOA to the Administrator of the EPA. EPA will complete the NOA, indicating the disposition to be made of the shipment of pesticides or devices upon its arrival in the United States, and return it to the importer or its agent. Existing §12.112(b) exempts importers of chemicals imported for use other than as pesticides from the requirement to submit a NOA.

This rule liberalizes the procedures set forth in 19 CFR 12.112(a) by permitting the option of filing an electronic alternative to the NOA, with the entry documentation, via any CBP-authorized electronic data interchange system. The NOA may still be filed in a paper format; however, it must be submitted to the EPA prior to arrival of the shipment.

Section 12.113

Existing §12.113 (19 CFR 12.113) prescribes the presentation of the NOA to CBP, and the ramifications of failure to do so. Specifically, paragraph (a) requires that upon arrival of a shipment of pesticides or devices into the United States, the importer or its agent must present the completed NOA to the CBP port director and the port director will require that upon arrival of a shipment of pesticides or devices, and any related information, to EPA. CBP is amending this provision by removing the reference to “in writing” to reflect that CBP may notify the consignee electronically.

Inapplicability of Notice and Delayed Effective Date

The Administrative Procedure Act (APA) requirements in 5 U.S.C. 553 govern agency rulemaking procedures. Section 553(b) of the APA generally requires notice and public comment before issuance of a final rule. In addition, section 553(d) of the APA requires that a final rule have a 30-day delayed effective date. The APA, however, provides exceptions from the prior notice and public comment requirement and the delayed effective date requirements, when an agency for good cause finds that such procedures are impracticable, unnecessary, or contrary to the public interest.

Treasury and CBP find that prior notice and comment procedures are unnecessary and that good cause exists to issue these regulations effective upon publication. Prior procedures are unnecessary because the rule does not substantively alter the underlying rights or interests of importers or filers, but only expands the options available to filers in presenting required information to the agency.

Executive Orders 13563 and 12866

Executive Orders (E.O.) 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This interim rule is not a “significant regulatory action,” under section 3(f) of E.O. 12866. Accordingly, OMB has not reviewed this regulation.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996, requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of a proposed rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions) when the agency is required to publish a general notice of proposed rulemaking for a rule. Since a general notice of proposed rulemaking is not necessary for this rule, CBP is not required to prepare a regulatory flexibility analysis for this rule.

Paperwork Reduction Act (PRA)

The information collection activities associated with the existing requirements related to the submission of a paper NOA under 19 CFR 12.110–12.117, are currently approved by OMB under OMB control number 2070–0020 (EPA ICR No. 0152.10). This rule adds an electronic filing option to the existing paper filing option, in which the information collection activities for the electronic filing of a NOA have been
approved under OMB control number 2070–0020 (EPA ICR No. 0152.11). There is no change in burden hours as a result of this rule.

Signing Authority

This document is being issued in accordance with § 0.1(a)(1) of the CBP regulations (19 CFR 0.1(a)(1)) pertaining to the authority of the Secretary of the Treasury (or his or her delegate) to approve regulations related to certain CBP revenue functions.

List of Subjects in 19 CFR Part 12

Customs duties and inspection, Entry of merchandise, Imports, Pesticides and devices, Reporting and recordkeeping requirements.

Amendments to Part 12 of the CBP Regulations

For the reasons set forth in the preamble, 19 CFR part 12 is amended as set forth below.

PART 12—SPECIAL CLASSES OF MERCHANDISE

§ 12.111 [Amended]

1. The general authority citation for part 12, and the specific authority citations for sections 12.110 through 12.117, continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 3(f), Harmonized Tariff Schedule of the United States (HTSUS)), 1624.

* * * * *

§ 12.110 [Amended]

2. Section 12.110 is amended:

a. In the first sentence, by removing the word “shall”; and

b. In the second sentence, by removing the words “shall mean” and adding in their place the word “means”.

§ 12.111 [Amended]

3. In § 12.111, the first sentence is amended by removing the word “All” and adding in its place the word “Certain”, and by removing the number “162.10” and adding in its place the language “part 152”.

4. Section 12.112 is amended by revising paragraph (a) to read as follows:

§ 12.112 Notice of Arrival of pesticides and devices filed with the Administrator.

(a) General. An importer or the importer’s agent desiring to import pesticides or devices into the United States must submit to the Administrator, prior to the arrival of the shipment in the United States, a Notice of Arrival of Pesticides and Devices (Notice of Arrival) on U.S. Environmental Protection Agency (EPA) Form 3540–1. The Administrator will complete the Notice of Arrival and provide notification to the importer or the importer’s agent indicating the disposition to be made of a pesticide or device upon its entry into the United States. In the alternative, the importer or the importer’s agent may file an electronic alternative to the Notice of Arrival, with the filing of the entry documentation, via any CBP-authorized electronic data interchange system.

* * * * *

§ 12.113 Arrival and entry of shipment of pesticides and devices.

(a) Notice of Arrival form filed with CBP. Upon entry of a shipment of pesticides or devices into the United States, and concurrent with the filing of the entry documentation, CBP must be in receipt of a completed Notice of Arrival of Pesticides and Devices (Notice of Arrival) on U.S. Environmental Protection Agency (EPA) Form 3540–1 or its electronic alternative submitted via any CBP-authorized electronic data interchange system. A completed Notice of Arrival must have been signed by the Administrator and indicate any action to be taken by CBP with respect to the shipment. CBP will compare entry information for the shipment of pesticides or devices with the information in the Notice of Arrival and notify the Administrator of any discrepancies.

(b) EPA Notice of Arrival declaration form not presented. When a shipment of pesticides or devices arrives and entry is attempted in the United States without a completed Notice of Arrival having been filed with CBP pursuant to paragraph (a) of this section, the shipment will be detained by CBP at the importer’s risk and expense until the completion of Notice of Arrival is presented to CBP or until other disposition is ordered by the Administrator. Such detention is not to exceed a period of 30-calendar days, or such additional extended 30-calendar day detention period as CBP may for good cause authorize. An importer or its agent may request an extension of the initial 30-calendar day detention period by filing a request with the director of the CBP port of entry.

(c) Disposition of pesticides or devices remaining under detention. A shipment of pesticides or devices that remains detained or undisposed of due to the failure to timely submit to CBP a completed Notice of Arrival will be treated as a prohibited importation. CBP will cause the destruction of any such shipment not exported by the consignee within 90-calendar days after the expiration of the detention period specified or authorized by paragraph (b) of this section.

§ 12.114 Release or refusal of delivery.

If the EPA directs the port director to release the shipment of pesticides or devices, the shipment will be released to the consignee. If the EPA directs the port director to refuse delivery of the shipment, the shipment will be refused delivery and treated as a prohibited importation. The port director will cause the destruction of any shipment refused delivery and not exported by the consignee within 90-calendar days after notice of such refusal of delivery.

§ 12.115 Release under bond of shipment detained for examination.

If the EPA so directs, a shipment of pesticides or devices will be detained at the importer’s risk and expense by the port director pending an examination by the Administrator to determine whether the shipment complies with the requirements of the Act. However, a shipment detained for examination may be released to the consignee prior to a determination by the Administrator provided a bond is furnished on CBP Form 301, or its electronic equivalent, containing the bond conditions set forth in § 113.62 of this chapter, for the return of the merchandise to CBP custody, and upon entry of the merchandise and the satisfaction of all other applicable laws. The bond will be in an amount deemed appropriate by CBP. When a shipment of pesticides or devices is released to the consignee under bond, the pesticides or devices must not be used or otherwise disposed of until the determination on compliance with the requirements of the Act is made by the Administrator.

§ 12.116 [Amended]

8. Section 12.116 is amended: in the first and last sentences, by removing the word “shall” each place that it appears and adding in each place the word “will”; and, in the last sentence, by removing the phrase “, in writing.”.

§ 12.117 [Amended]

9. Section 12.117 is amended by removing the word “shall” each place
that it appears and adding in each place the word “will”.

R. Gil Kerlikowske,
Commissioner, U.S. Customs and Border Protection.

Approved: September 26, 2016.

Timothy E. Skud,
Deputy Assistant Secretary of the Treasury.

BILLING CODE 9111–14–P

INTERNATIONAL TRADE COMMISSION

19 CFR Part 220

Rules Relating to the Submission and Consideration of Petitions for Duty Suspensions and Reductions

ACTION: Interim rule with request for comments.

SUMMARY: The United States International Trade Commission (Commission) is adopting interim rules that will amend the Commission’s Rules of Practice and Procedure and establish a new part governing the submission and consideration of petitions for duty suspensions and reductions under the American Manufacturing Competitiveness Act of 2016.

ADDRESSES: You may submit comments, identified by docket number MISC–046, rulemaking regarding petitions for duty suspensions and reductions, by any of the following methods:

—Hand Delivery/Courier: U.S. International Trade Commission, 500 E Street SW., Room 112A, Washington, DC 20436. From the hours of 8:45 a.m. to 5:15 p.m.

Instructions: All submissions received must include the agency name and docket number (MISC–046, Rulemaking Regarding Petitions for Duty Suspensions/Reductions), along with a cover letter stating the nature of the commenter’s interest in the proposed rulemaking. All comments received will be posted without change to https://edis.usitc.gov including any personal information provided. For paper copies, a signed original and 8 copies of each set of comments should be submitted to Lisa R. Barton, Secretary, U.S. International Trade Commission, 500 E Street SW., Room 112A, Washington, DC 20436.

For access to the docket to read background documents or comments received, go to https://edis.usitc.gov and/or the U.S. International Trade Commission, 500 E Street SW., Room 112A, Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary, telephone (202) 205–2000 or William Gearhart, Esquire, Office of the General Counsel, United States International Trade Commission, telephone (202) 205–3091. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal at 202–205–1810. General information concerning the Commission may also be obtained by accessing its Web site at https://www.usitc.gov.

SUPPLEMENTARY INFORMATION: The preamble below is designed to assist readers in understanding these amendments to the Commission’s Rules of Practice and Procedure (the Rules). This preamble provides background information, a regulatory analysis of the amendments, a section-by-section explanation of the amendments, and a description of the amendments to the Rules. The Commission encourages members of the public to comment on whether the language of the amendments is sufficiently clear for users to understand, and to submit any other comments they wish to make on the amendments.

These amendments are being promulgated in accordance with the Administrative Procedure Act (5 U.S.C. 553) (APA), and will be codified in 19 CFR part 220.

Background

Section 335 of the Tariff Act of 1930 (19 U.S.C. 1335) authorizes the Commission to adopt such reasonable procedures, rules and regulations as it deems necessary to carry out its functions and duties. In addition, section 3(b)(5) of the American Manufacturing Competitiveness Act of 2016, Public Law 114–159, 130 Stat. 396 (19 U.S.C. 1332 note) (the Act) directs the Commission to prescribe and publish in the Federal Register and on a publicly available internet Web site of the Commission procedures to be complied with by members of the public submitting petitions for duty suspensions and reductions under section 3(b)(1)(A) of that Act.

The Commission is promulgating rules governing the submission and consideration of petitions for duty suspensions and reductions under the Act. Section 3 of the Act establishes a process for the submission and consideration of petitions for duty suspensions and reductions. More specifically, it directs the Commission to publish a notice by October 15, 2016, that requests members of the public to submit petitions to the Commission for duty suspensions and reductions, provided that they can demonstrate that they are likely beneficiaries of such duty suspensions or reductions. The Act also provides that the petitioners must submit disclosure forms with respect to such duty suspensions and reductions. The petitions and disclosure forms must be submitted during the 60-day period beginning on the date of publication of the Commission’s notice. Section 3 of the Act also lists the types of information that must be included in a petition.

Section 3 of the Act requires that the Commission publish on its Web site all of the petitions that contain the required information and the related disclosure forms no later than 30 days after the close of the 60-day filing period. It also provides that members of the public will have 45 days from the date of the notice’s publication to submit comments to the Commission regarding the petitions and disclosure forms. The Commission must make those comments available to the public on the Commission’s Web site.

These amendments establish new Commission rules governing the submission of petitions and the issuance of the Commission’s reports to the Congress under the Act. The new rules identify the types of entities that may file a petition, describe the information that must be included in a petition, provide procedures for public comment, and describe the schedule for filing petitions and public comments. The new rules also describe the content of the preliminary and final reports that the Commission must submit to the Congress, and the time for submitting those reports, and otherwise establish procedures relating to the Commission’s review and processing of the petitions under the Act.

Procedure for Adopting the Interim Amendments

The Commission ordinarily promulgates amendments to the Code of Federal Regulations in accordance with
the notice-and-comment rulemaking procedure in section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553). That procedure entails publication of notice of proposed rulemaking in the Federal Register that solicits public comment on the proposed amendments, consideration by the Commission of public comments on the content of the amendments, and publication of the final amendments at least 30 days prior to their effective date. In this instance, however, the Commission is amending its rules in 19 CFR part 220 on an interim basis, effective upon publication of this notice in the Federal Register. The Commission’s authority to adopt interim amendments without following all steps listed in section 553 of the APA is derived from section 335 of the Tariff Act of 1930 (19 U.S.C. 1335), section 3(b)(5) of the American Manufacturing Competitiveness Act of 2016 (19 U.S.C. 1332 note), and section 553 of the APA. Section 553(b) of the APA allows an agency to dispense with publication of a notice of proposed rulemaking when the following circumstances exist: (1) The rules in question are interpretive rules, general statements of policy, or rules of agency organization, procedure, or practice; or (2) the agency for good cause finds that notice and public comment on the rules are impracticable, unnecessary, or contrary to the public interest, and the agency incorporates that finding and the reasons therefor into the rules adopted by the agency. Section 553(d)(3) of the APA allows an agency to dispense with the publication of notice of final rules at least thirty days prior to their effective date if the agency finds that good cause exists for not meeting the advance publication requirement and the agency publishes that finding along with the rules. Additionally, section 3(b)(5) of the American Manufacturing Competitiveness Act of 2016 requires that the Commission prescribe and publish procedures for submitting petitions for duty suspensions and reductions under that Act, and section 335 of the Tariff Act authorizes the Commission to adopt such reasonable procedures, rules, and regulations as it deems necessary to carry out its functions and duties. In this instance, the Commission has determined that the requisite circumstances exist for dispensing with the notice, comment, and advance publication procedure that ordinarily precedes the adoption of Commission rules for purposes of invoking the section 553(b)(3)(A) exemption from publishing a notice of proposed rulemaking that solicits public comment, the Commission finds that the interim amendments to part 220 are “agency rules of procedure and practice.” Moreover, the Commission finds under 553(b)(3)(B) that good cause exists to waive prior notice and opportunity for public comment. In particular, the American Manufacturing Competitiveness Act of 2016 took effect on May 20, 2016, and it requires that the Commission have a process in place to accept petitions not later than October 15, 2016, which makes the establishment of rules a matter of urgency. Hence, it would be impracticable for the Commission to comply with the usual notice of proposed rulemaking and public comment procedure, and therefore the Commission has determined that interim rules are needed under these circumstances. For the purpose of invoking the section 553(d)(3) exemption from publishing advance notice of the interim amendments to part 220 at least thirty days prior to their effective date, the Commission finds the fact that the Act was signed by the President on May 20, 2016, but requires that the Commission have a complete process in place no later than October 15, 2016, makes such advance publication impracticable and constitutes good cause for not complying with that requirement. The Commission recognizes that interim rule amendments should not respond to anything more than the exigencies created by the new legislation. Each interim amendment to part 220 concerns a new rule covering a matter addressed in the new legislation but not covered by a preexisting rule. After taking into account all comments received and the experience acquired under the interim rules, the Commission will replace them with final rules promulgated in accordance with the notice, comment, and advance publication procedure prescribed in section 553 of the APA. Regulatory Analysis of Proposed Amendments to the Commission’s Rules The Commission has determined that these interim rules do not meet the criteria described in section 3(f) of Executive Order 12866 (58 FR 51735, October 4, 1993) and thus do not constitute a “significant regulatory action” for purposes of the Executive Order. The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) is inapplicable to this rulemaking because it is not one for which a notice of proposed rulemaking is required under 5 U.S.C. 553(b) or any other statute. These interim rules do not contain federalism implications warranting the preparation of a federalism summary impact statement pursuant to Executive Order 13132 (64 FR 43255, August 4, 1999). No actions are necessary under title II of the Unfunded Mandates Reform Act of 1995, Public Law 104–4 (2 U.S.C. 1531–1538) because the interim rules will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year (adjusted annually for inflation), and will not significantly or uniquely affect small governments. These interim rules are not “major rules” as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801et seq.). Moreover, they are exempt from the reporting requirements of that Act because they contain rules of agency organization, procedure, or practice that do not substantially affect the rights or obligations of non-agency parties. The Commission has submitted an information collection request for its secure web portal for the Miscellaneous Tariff Bills Petition System to the Office of Management and Budget for Paperwork Reduction Act clearance. See 81 FR 58531 (Aug. 25, 2016). The Commission intends to process the information it collects consistent with these interim rules. Section-by-Section Explanation of the Proposed Amendments PART 220—PROCESS FOR CONSIDERATION OF PETITIONS FOR DUTY SUSPENSIONS AND REDUCTIONS Section 220.1 of part 220 states this part of the rules applies to proceedings of the Commission under the American Manufacturing Competitiveness Act of 2016. Section 220.2 defines key terms and acronyms used in part 220. The definitions are drawn largely from definitions in the Act itself. The definitions of the terms “like” and “directly competitive” are taken from definitions in the legislative history of the Trade Act of 1974 and have been traditionally applied in connection with several U.S. trade laws that use those terms. The definition of “imminent production” states that the term normally means production that is planned to begin within 3 years of the date the petition is filed, which is intended to conform to the Commission’s practice with respect to
miscellaneous tariff bills prior to the Act. The applicability of this definition of “imminent production” is limited to the Act.

Section 220.3 identifies the types of entities that may file a petition and specifies the format that must be followed in submitting a petition. Consistent with the statute, it states that a petition under this part may be filed by members of the public who can demonstrate that they are likely beneficiaries of duty suspensions or reductions. It also states that a member of the public for these purposes would generally be a firm, importer of record, a manufacturer that uses the imported article, or a U.S. Federal, state, or local government entity. Section 220.3 states that any petition must be filed via the Commission’s secure web portal designated for this purpose, and it makes clear that the Commission will not accept petitions submitted in paper or in any other form.

Section 220.4 states that petitions for duty suspensions or reductions must be filed not later than 60 days after the Commission publishes a notice of opportunity to file in the Federal Register, and states that the Commission will publish such notice no later than October 15, 2016, for the first round of petitions. Section 220.4 states that a second round of petitions may be filed in October 2019, after publication of a similar notice.

Section 220.5 lists the types of information that must be set forth in a petition, including the name of the petitioner and contact information, a statement regarding whether the petitioner is seeking a duty suspension or a duty reduction, a description of the article concerned, a description of the industry, a certification that the petitioner is a likely beneficiary, certain U.S. Customs and Border Protection (CBP) documentation, the names of known importers, the names of likely beneficiaries, and a description of any domestic production of the article. It also requires that the petitioner certify that it has not filed identical or overlapping petitions with the Commission.

Section 220.6 further describes the information that should be included in the description of the article for which a duty suspension or reduction is being sought. It also identifies types of article descriptions that the Commission will not likely recommend for inclusion in a miscellaneous tariff bill, such as those that contain “actual use” or “chief use” criteria or trade-marked and other protected names, and those that might alter tariff treatment or classification of a product.

Section 220.7 states that a petition will not be considered to be “properly filed” unless it contains all the information required by §§ 220.3 through 220.5 of the rules. It also states that, when a petitioner files petitions that are identical or overlapping in article coverage and does not withdraw the earlier petition(s), the Commission will consider the earliest filed pending petition to be the petition of record.

Section 220.8 states that, in the case of petitions for identical or overlapping articles received from multiple petitioners, the Commission may consolidate those petitions and publish a single recommendation.

Section 220.9 states that a petitioner may withdraw a petition at any time prior to the time the Commission transmits its final report to the House Committee on Ways and Means and the Senate Committee on Finance (Committees). It also states that a petitioner who withdraws a petition may file a new petition, but only during the 60-day window allowed for filing petitions. The rule further states that a petitioner may not amend a petition, but instead must withdraw the petition and file a new one within the 60-day filing period.

Section 220.10 states that the Commission will publish on its Web site, no later than 30 days after expiration of the 60-day period for filing petitions, the petitions for duty suspensions and reductions that are timely filed and that contain the required information. The rule also states that at that time the Commission will publish a notice in the Federal Register inviting members of the public to submit comments on the petitions received. It states that those comments must be filed through the Commission’s secure web portal no later than 45 days after publication of the notice.

Section 220.11 states that the Commission will submit its preliminary report to the Committees no later than 150 days after it publishes the petitions submitted. The rule describes the types of information that will be included in the preliminary report, including the Commission’s determination of whether or not domestic production of the article exists, any technical changes to the article description that are needed to make the description administrable, an estimate of the amount of revenue loss, and a determination of whether or not the duty suspension is available to any person who imports the article. The rule states that the Commission will also include in the preliminary report a list of the petitions that meet certain statutory criteria.

Section 220.12 states that the Commission will submit its final report to the Committees no later than 60 days after it submits its preliminary report. It states that the final report will include the information required to be included in the preliminary report as updated after taking into consideration certain information from the Committees, and that the report also will include determinations regarding whether the duty suspension or reduction can likely be administered by CBP, whether the estimated loss in revenue from the duty suspension or reduction does not exceed $500,000, and whether the duty suspension or reduction is available to any person importing the articles.

Section 220.13 states that the Commission will not release information that the Commission considers to be confidential business information within the meaning of 19 CFR 201.6(a) unless the party submitting the information had notice at the time of submission that such information would be released, or such party subsequently consents to release. The rule notifies parties of two possible instances in which confidential business information might be released: (1) The Commission may base its revenue loss estimates on the estimated values of imports submitted by petitioners in their petitions, and (2) the Commission may disclose some or all of the confidential business information provided in petitions and public comments to the U.S. Department of Commerce, the U.S. Department of Agriculture, and CBP for use in preparing the report that Commerce provides to the Commission and the Committees.

Section 220.14 states that Commission rules that apply to the initiation and conduct of investigations, with the exception of certain rules that apply to methods employed in obtaining information, the computation of time, and to attorneys and agents, will not apply to Commission proceeding under part 220.

List of Subjects in 19 CFR Part 220

Administrative practice and procedure, Miscellaneous tariff bills.
220.1 Applicability of part.

220.2 Definitions applicable to this part. (19 U.S.C. 1332 note).

220.3 Who may file a petition, format for filing.

220.4 Time for filing.

220.5 Contents of petition.

220.6 Article description.

220.7 Properly filed petition.

220.8 Consolidation of petitions.

220.9 Withdrawal of petitions, amendments to petitions.

220.10 Commission review of petitions and disclosure forms.

220.11 Commission preliminary report.

220.12 Commission final report.

220.13 Confidential business information.

220.14 Application of other Commission rules.

§ 220.1 Applicability of part.

§ 220.2 Definitions applicable to this part.

For the purposes of this part, the following terms have the meanings hereby assigned to them:

(a) "Act" means the American Manufacturing Competitiveness Act of 2016.

(b) "HTS" means Harmonized Tariff Schedule of the United States.

(c) "Committees means the House Committee on Ways and Means and Senate Committee on Finance.

(d) "Commission disclosure form" means the information submitted to the Commission by a petitioner as part of a petition for a duty suspension or reduction that contains the following:

(1) The contact information for any known importers of the article to which the proposed duty suspension or reduction would apply.

(2) A certification by the petitioner that the proposed duty suspension or reduction is available to any person importing the article to which the proposed duty suspension or reduction would apply.

(3) A certification that the petitioner is a likely beneficiary of the proposed duty suspension or reduction.

(4) "Duty suspension or reduction" refers to an amendment to the HTS for a period not to exceed 3 years that—

(1) Extends an existing temporary duty suspension or reduction on an article under chapter 99 of the HTS; or

(2) Provides for a new temporary duty suspension or reduction on an article under that chapter.

(5) "Likely beneficiary" means an individual or entity likely to utilize, or benefit directly from the utilization of, an article that is the subject of a petition for a duty suspension or reduction.

(g) "Domestic producer" means a person that demonstrates production, or imminent production, in the United States of an article that is identical to, or like or directly competitive with, an article to which a petition for a duty suspension or reduction would apply.

(h) "Domestic production" means the production of an article that is identical to, or like or directly competitive with, an article to which a petition for a duty suspension or reduction would apply, for which a domestic producer has demonstrated production, or imminent production, in the United States.

(i) "Identical" article means a domestic article that has the same inherent or intrinsic characteristics and is classified in the same HTS rate line as the article that is the subject of a petition for duty suspension or reduction;

(ii) "Like" article means a domestic article that is substantially identical in inherent or intrinsic characteristics (i.e., materials from which made, appearance, quality, texture, etc.) as the article that is the subject of a petition for duty suspension or reduction; and

(iii) "Directly competitive" article means a domestic article which, although not substantially identical in its inherent or intrinsic characteristics, is substantially equivalent for commercial purposes, that is, adapted to the same uses and essentially interchangeable therefor as the article that is the subject of a petition for duty suspension or reduction.

(j) "Imminent production" normally means production planned to begin within 3 years of the date on which the petition is filed.

(k) "Likely beneficiary" means a person who demonstrates production, or imminent production, in the United States that uses the article.

§ 220.3 Who may file a petition, format for filing.

(a) Who may file. A petition under this part may be filed by members of the public who can demonstrate that they are likely beneficiaries of duty suspensions or reductions. A member of the public for these purposes would generally be a firm, importer of record, a manufacturer that uses the imported article, or a government entity at the U.S. Federal, state, or local level.

(b) Format for filing. Each such petition shall be submitted via the secure Commission web portal designated by the Commission and in the format designated by the Commission. The Commission will not accept petitions submitted in paper or in any other form or format. Petitions, including any attachments thereto, shall otherwise comply with the Commission’s Handbook on MTB Filing Procedures as posted on the Commission’s Web site.

§ 220.4 Time for filing.

Petitions for duty suspensions and reductions and Commission disclosure forms must be filed no later than 60 days after the Commission publishes in the Federal Register and on its Web site a notice requesting members of the public to submit this information. The Commission will publish notice requesting such petitions and disclosure forms not later than October 15, 2016, and October 15, 2019.

§ 220.5 Contents of petition.

The petition shall include the following information:

(a) The name, telephone number, and postal and email address of the petitioner, and if appropriate, its representative in the matter;

(b) A statement as to whether the petitioner is requesting an extension of an existing duty suspension or reduction or a new duty suspension or reduction; and if a duty reduction, the amount of the reduction;

(c) A certification that the petitioner is a likely beneficiary of the proposed duty suspension or reduction;

(d) An article description that meets the requirements of § 220.6 for the proposed duty suspension or reduction and identifies the permanent classification of the article in chapters 1–97 of the HTS and the Chemical Abstracts Service registry number (if applicable);

(e) To the extent available—

(1) A classification ruling of U.S. Customs and Border Protection (CBP) with respect to the article; and

(2) A copy of CBP documentation indicating where the article is classified in the HTS.

(f) A brief and general description of the article and its uses, and the names of the principal countries from which it is imported.

(g) A brief description of the industry in the United States that uses the article.

(h) For each HTS number included in the article description, an estimate of the total value (in United States dollars) of imports of the article for the calendar year preceding the year in which the petition is filed, for the calendar year in which the petition is filed, and for each of the 5 calendar years after the calendar year in which the petition is filed, including an estimate of the total value of such imports for each HTS article by the person who submits the petition and by any other importers, if available.

(i) The name of each person that imports the article, if available.

(j) A description of any domestic producer of the article, if available.

(k) A Commission disclosure form as defined in § 220.2(d).
§ 220.6 Article description.

(a) In general. The article description in the petition shall be provided in a format appropriate to be included in the amendment to chapter 99 of the HTS and shall include language that:

(1) Describes a specific class or kind of imported merchandise and provides any other information needed to distinguish the covered products from other goods;

(2) Is suitable for incorporation in the HTS in the column entitled “Article Description” for each tariff heading in HTS chapter 99 that affords a temporary duty suspension or reduction;

(3) Describes covered products in their condition as imported, based primarily upon the goods’ discernible physical characteristics at the time of importation;

(4) Is sufficiently clear as to be administrable by CBP; and

(5) Is otherwise required by this part or accomplishes the purposes of the Act.

(b) Article descriptions that are not recommended. The Commission will generally consider proposed article descriptions containing the following kinds of information or criteria as preventing the relevant petition from being recommended for inclusion in a miscellaneous tariff bill, unless input received from the U.S. Department of Commerce (Commerce) or CBP provides a basis for the Commission’s analysis under the Act:

(1) “Actual use” or “chief use” criteria;

(2) Trade-marked or similarly protected terms or names, brand names, proprietary names, part numbers, or other company-specific names;

(3) Language—

(i) Describing goods that are illegal to import, where the petitioner is not a government entity;

(ii) Describing goods that are covered by tariff-rate quota provisions; or

(iii) Seeking to alter the tariff treatment provided in subchapter III or IV of chapter 99 of the HTS; or

(4) An HTS subheading number(s) that would alter or attempt to alter the classification of the product in chapters 1 through 97 of the HTS.

§ 220.7 Properly filed petition.

(a) In general. A petition will not be considered to be properly filed unless the petition and the Commission disclosure form are filed in accordance with and contain the information required by §§ 220.3 through 220.5

(b) Identical and overlapping petitions. (1) A petition will not be considered to be properly filed if the petitioner has previously filed, and has not withdrawn, a petition for duty suspension or reduction during the current filing cycle:

(i) For an article that is identical to that in the current petition; or

(ii) For an article whose article description includes the article covered by the current petition; or

(iii) For an article that is included in the scope of the current petition.

(2) Should the Commission find that a petitioner has filed one or more identical or overlapping petitions and that such earlier filed petitions have not been withdrawn, the Commission will generally consider the earliest filed pending petition to be the petition of the petitioner.

§ 220.8 Consolidation of petitions.

Should the Commission receive petitions for duty suspensions or reductions from multiple petitioners for identical or overlapping articles classified in the same HTS subheading or subheadings, the Commission may consolidate the petitions and publish a single recommendation so that a single proposed HTS chapter 99 provision for the articles is presented in the Commission’s preliminary and final reports.

§ 220.9 Withdrawal of petitions, amendments to petitions.

(a) Withdrawal of petitions. A petitioner may withdraw a petition for duty suspension or reduction filed under this part at any time prior to the date on which the Commission submits its final report. It shall do so by notifying the Commission through the Commission’s designated secure web portal of its withdrawal and the notification shall include the name of the petitioner, the Commission identification number for the petition, and the HTS number for the article concerned.

(b) Submission of new petition. A petitioner who withdraws a petition for duty suspension or reduction that was timely filed under § 220.4 may submit a new petition, but only during the 60-day period described in § 220.4.

(c) Amendments to petitions. A petitioner may not amend or otherwise change a petition once it is submitted. If a petitioner wishes to amend or otherwise change a petition, such as to correct an error, the petitioner must withdraw the petition and file a new petition containing the changes in accordance with paragraphs (a) and (b) of this section.

§ 220.10 Commission review of petitions and disclosure forms.

(a) Commission publication and public availability. Not later than 30 days after expiration of the 60-day period for filing petitions for duty suspensions and reductions, the Commission will publish on its Web site the petitions for duty suspensions and reductions submitted under § 220.3 that were timely filed and contain the information required under § 220.5.

(b) Public comment. Not later than 30 days after expiration of the 60-day period for filing petitions, the Commission will also publish in the Federal Register and on its Web site a notice requesting members of the public to submit comments on the petitions for duty suspensions and reductions. To be considered, such comments must be filed through the Commission’s secure web portal during the 45-day period following publication of the Commission’s notice requesting comments from members of the public.

(1) The HTS heading or subheading in which each article that is the subject of
a petition is classified, as identified by documentation supplied to the Commission and any supporting information obtained by the Commission.

(2) A determination of whether or not domestic production of the article that is the subject of the petition exists, taking into account the report of the Secretary of Commerce under section 3(c)(1) of the Act, and, if such production exists, whether or not a domestic producer of the article objects to the duty suspension or reduction.

(3) Any technical changes to the description of the article that is the subject of the petition for the duty suspension or reduction that are necessary for purposes of administration when the article is presented for importation, taking into account the report of the Secretary of Commerce under section 3(c)(2) of the Act.

(4) An estimate of the amount of loss in revenue to the United States that would no longer be collected if the duty suspension or reduction takes effect.

(5) A determination of whether or not the duty suspension or reduction is available to any person that imports the article that is the subject of the duty suspension or reduction.

(6) The likely beneficiaries of each duty suspension or reduction, including whether the petitioner is a likely beneficiary.

(b) The preliminary report will also include the following information:

(1) A list of petitions for duty suspensions and reductions that meet the requirements of the Act without modifications.

(2) A list of petitions for duty suspensions and reductions for which the Commission recommends technical corrections (i.e., corrections to the article description that do not otherwise substantially alter the scope or HTS classification of the articles covered by the petition) in order to meet the requirements of the Act, with the correction specified.

(3) A list of petitions for duty suspensions and reductions for which the Commission recommends modifications to the amount of the duty suspension or reduction that is the subject of the petition to comply with the requirements of the Act, with the modification specified.

(4) A list of petitions for duty suspensions and reductions for which the Commission recommends modifications to the scope of the articles that are the subject of the petitions in order to address objections by domestic producers to such petitions, with the modifications specified.

(5) A list of the following:

(i) Petitions for duty suspensions and reductions that the Commission has determined do not contain the information required under section 3(b)(2) of the Act.

(ii) Petitions for duty suspensions and reductions with respect to which the Commission has determined the petitioner is not a likely beneficiary.

(iii) A list of petitions for duty suspensions and reductions that the Commission does not recommend for inclusion in a miscellaneous tariff bill, other than petitions specified in section 3(b)(3)(C)(ii)(V) of the Act.

(c) The Commission will forward to the Committees any additional information submitted to the Commission by the Secretary of Commerce after the Commission transmits its preliminary report.

§220.12 Commission final report.

(a) The Commission will submit its final report on each petition for a duty suspension or reduction specified in the preliminary report to the Committees not later than 60 days after the Commission submits its preliminary report. The final report will contain the following information—

(1) The information required to be included in a preliminary report under section 3(b)(3)(C)(ii)(V) of the Act and updated as appropriate after considering any information submitted by the Committees under section 3(b)(3)(D) of the Act.

(2) A determination of the Commission whether—

(i) The duty suspension or reduction can likely be administered by U.S. Customs and Border Protection;

(ii) The estimated loss in revenue to the United States from the duty suspension or reduction does not exceed $500,000 in a calendar year during which the duty suspension or reduction would be in effect; and

(iii) The duty suspension or reduction is available to any person importing the articles that is the subject of the duty suspension or reduction.

(b) [Reserved]

§220.13 Confidential business information.

(a) In general. The Commission will not release information which the Commission considers to be confidential business information within the meaning of §201.6(a) of this chapter unless the party submitting the confidential business information had notice, at the time of submission, that such information would be released by the Commission, or such party subsequently consents to the release of the information.

(b) Exceptions. (1) In calculating the estimated revenue loss required under the Act, the Commission may base its estimates in whole or in part on the estimated values of imports submitted by petitioners in their petitions.

(2) The Commission may disclose some or all of the confidential business information provided to the Commission in petitions and public comments to the U.S. Department of Commerce for use in preparing its report to the Commission and the Committees, and to the U.S. Department of Agriculture and CBP for use in providing information for Commerce’s report.
DATES: This rule is effective September 30, 2016.

FOR FURTHER INFORMATION CONTACT: George K. Haibel, Center for Veterinary Medicine (HFV–6), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240–402–5689, george.haibel@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Approval Actions

FDA is amending the animal drug regulations to reflect approval actions for NADAs and ANADAs during July and August 2016, as listed in table 1. In addition, FDA is informing the public of the availability of documentation of environmental review required under the National Environmental Policy Act (NEPA) and, for actions requiring review of safety or effectiveness data, summaries of the basis of approval (FOI Summaries) under the Freedom of Information Act (FOIA). These public documents may be seen in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday. Persons with access to the Internet may obtain these documents at the CVM FOIA Electronic Reading Room: http://www.fda.gov/AboutFDA/CentersOffices/OfficeofCompliance/CVM/CVMFOIAElectronicReadingRoom/default.htm. Marketing exclusivity and patent information may be accessed in FDA’s publication, Approved Animal Drug Products Online (Green Book) at: http://www.fda.gov/AnimalVeterinary/Products/ApprovedAnimalDrugProducts/default.htm.

II. Change of Sponsor’s Address

Nexcyon Pharmaceuticals, Inc., 644 West Washington Ave., Madison, WI 53719 has informed FDA that it has changed its address to P.O. Box 259158, Madison, WI 53725. Accordingly, the regulations at 21 CFR 510.600(c) will be amended to reflect this sponsor’s change of address.

III. Technical Amendments

FDA has noticed that drug labeler codes (DLCs) in several sections of part 558 (21 CFR part 558) do not accurately reflect the sponsorship of a new animal drug application. At this time, we are amending part 558 to remove these DLCs. Also, FDA is amending the regulations to revise a human food safety warning for tulathromycin injectable solution in 21 CFR 522.2630 and to correct a cross-reference for combination medicated feeds in § 558.128 (21 CFR 558.128). These actions are being taken to improve the accuracy of the regulations.

The restrictions for veterinary feed directive (VFD) drugs in part 558 are being revised to reflect a current format. In addition, we are revising § 558.59 to reflect a current format. These actions are being taken to improve the clarity of the regulations.

This rule does not meet the definition of “rule” in 5 U.S.C. 804(3)(A) because it is a rule of “particular applicability.” Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Parts 520, 522, 524, and 529

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.
Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510, 520, 522, 524, 529, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for part 510 continues to read as follows:

§510.600 [Amended]

2. Revise §510.600 as follows:

a. In the table in paragraph (c)(1):
   i. In the entries for “Cronus Pharma LLC”, “HQ Specialty Pharma Corp.”, “OXIS International, Inc.”, “Pharmgate LLC”, “Putney, Inc.”, “SmartVet USA, Inc.”, and “Wildlife Laboratories, Inc.”, remove “Suite” and in its place add “bldg.”;
   ii. In the entry for “Merial, Inc.”, remove “Bldg.” and in its place add “bldg.”;
   iii. In the entry for “Nexcyon Pharmaceuticals, Inc.”, remove “644 West Washington Ave., Madison, WI 53719” and in its place add “P.O. Box 259158, Madison, WI 53725”;

b. In the table in paragraph (c)(2):
   i. In the entries for “024991”, “026367”, “042791”, “053923”, “069043”, “069254”, and “086001”, remove “Suite” and in its place add “bldg.”;
   ii. In the entry for “050064”, remove “Bldg.” and in its place add “bldg.”;
   iii. In the entry for “050929”, remove “644 West Washington Ave., Madison, WI 53719” and in its place add “P.O. Box 259158, Madison, WI 53725”.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

3. The authority citation for part 520 continues to read as follows:

§520.928 Firocoxib tablets.

(c) Conditions of use—(1) Dogs—(i) Amount. 5 mg/kg (2.27 mg/lb) body weight. Administer once daily for osteoarthritis. Administer approximately 2 hours before soft tissue or orthopedic surgery.
   (ii) Indications for use. For the control of pain and inflammation associated with osteoarthritis; and for the control of postoperative pain and inflammation associated with soft-tissue and orthopedic surgery.
   (iii) Limitations. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(2) Horses—(i) Amount. Administer one 57-mg tablet to horses weighing 800 to 1,300 lb once daily for up to 14 days.
   (ii) Indications for use. For the control of pain and inflammation associated with osteoarthritis.
   (iii) Limitations. Do not use in horses intended for human consumption. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§520.2345c [Amended]

5. In §520.2345c, remove paragraph (d)(1)(ii).

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

6. The authority citation for part 522 continues to read as follows:

§522.224 Bupivacaine.

(a) Specifications. Each milliliter (mL) of liposomal suspension contains 13.3 milligrams (mg) bupivacaine.

(b) Sponsor. See No. 086026 in §510.600(c) of this chapter.

§522.2630 Tulathromycin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2640 Tylosin.

(a) Specifications. Each milliliter (mL) of solution contains 50 or 200 milligrams (mg) of tylosin activity (as tylosin base).

(b) Sponsors. See sponsors in §510.600(c) of this chapter as follows:
   (1) No. 0000986 for use of 50- or 200-mg/mL solutions as in paragraph (e) of this section.

§522.1870 Praziqantel.

(a) Specifications. Each milliliter (mL) of solution contains 56.8 milligrams of praziqantel.

§522.1870 [Amended]

7. Add §522.1870 to read as follows:

§522.1870 Praziqantel.

(i) Amount. Administer by subcutaneous or intramuscular injection for cats and kittens under 5 lb, 0.2 mL; 5 to 10 lb, 0.4 mL; 11 lb and over, 0.6 mL maximum.

(ii) Indications for use. For the control of taeniid and cestode infections in cats and kittens.

(iii) Limitations. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2630 Tulathromycin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2640 Tylosin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2640 Tylosin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2640 Tylosin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§522.2640 Tylosin.

(A) Cattle intended for human consumption must not be slaughtered within 18 days from the last treatment. This drug is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. Federal law restricts this drug to use by or on the order of a licensed veterinarian.
PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS

11. The authority citation for part 524 continues to read as follows:

12. Add § 524.998 to read as follows:

§ 524.998 Fluralaner.
   (a) Specifications. Each milliliter of solution contains 280 milligrams (mg) fluralaner.
   (b) Sponsor. See No. 000061 in § 510.600(c) of this chapter.
   (c) Conditions of use—(1) Dogs—(i) Amount. Administer topically as a single dose every 12 weeks according to
   the label dosage schedule to provide a minimum dose of 11.4 mg/lb (25 mg/kg) body weight. May be administered every
   8 weeks in case of potential exposure to Amblyomma americanum ticks.
   (ii) Indications for use. Kills adult fleas; for the treatment and prevention of flea infestations (Ctenocephalides felis) and the treatment and control of tick infestations (Ixodes scapularis (black-legged tick), Dermacentor variabilis (American dog tick), and Rhipicephalus sanguineus (brown dog tick)) for 12 weeks in dogs and puppies 6 months of age and older, and weighing 4.4 lb or greater; for the treatment and control of A. americanum (lone star tick) infestations for 8 weeks in dogs and puppies 6 months of age and older, and weighing 4.4 lb or greater.
   (iii) Limitations. Federal law restricts this drug to use by or on the order of a licensed veterinarian.
   (2) [Reserved]

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS

13. The authority citation for part 529 continues to read as follows:

§ 529.400 [Amended]
   14. In § 529.400, in paragraph (a), remove footnote 1.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

15. The authority citation for part 558 continues to read as follows:

§ 558.59 Apramycin.
   (a) Specifications. Each pound of Type A article contains 75 grams apramycin (as apramycin sulfate).
   (b) Sponsor. See No. 058198 in § 510.600(c) of this chapter.
   (c) [Reserved]
   (d) Related tolerances. See § 556.52 of this chapter.
   (e) Conditions of use in swine—(1) Amount. Feed at 150 grams apramycin per ton of Type C medicated feed as the sole ration for 14 consecutive days.
   (2) Indications for use. For control of porcine colibacillosis (weanling pig scours) caused by susceptible strains of Escherichia coli.
   (3) Limitations. Withdraw 28 days before slaughter.

§ 558.68 [Amended]
   18. In § 558.68, redesignate paragraphs (c) and (d) as paragraphs (d) and (c); and in paragraphs (e)(1)(i) and
   (e)(2)(i), remove “000986” and in its place add “058198”.

§ 558.128 [Amended]
   19. In § 558.128, in paragraph (e)(7)(xi), remove “$558.600” and in its place add “$558.612”.

§ 558.195 [Amended]
   20. In § 558.195, in paragraph (e)(1)(vi), remove “000099” and in its place add “054771”; and in paragraphs (e)(2)(iii) and (v), remove “000986” wherever it appears and in its place add “058198”.

§ 558.261 [Amended]
   21. In § 558.261, redesignate paragraphs (c) and (d) as paragraphs (d) and (c).

§ 558.295 [Amended]
   22. In § 558.295, remove and reserve paragraph (b).
   23. In § 558.325, revise paragraph (d)(3) to read as follows:

§ 558.325 Lincomycin.
   * * * * * *(d) * * *
   (3) Labeling of Type A medicated articles and single-ingredient Type B and Type C medicated feeds containing lincomycin intended for use in swine shall bear the following caution statement: “The effects of lincomycin on swine reproductive performance, pregnancy, and lactation have not been determined. Not for use in swine intended for breeding when lincomycin is fed at 20 grams per ton of complete feed.”
   * * * * * *

§ 558.342 [Amended]
   24. In § 558.342, in paragraphs (e)(1)(iv),(ix), (x), and (xi), remove
“000986” wherever it appears and in its place add “058198”.

§ 558.366 [Amended]
25. In § 558.366, in paragraph (d), in the entry for “113.5 (0.0125 pct)”, remove “000986” and in its place add “058198”.

§ 558.618 [Amended]
26. In § 558.618, redesignate paragraphs (c) and (d) as paragraphs (d) and (c).
27. In § 558.633, revise paragraph (d)(1) to read as follows:

§ 558.633 Tyvalocin.

* * * * *
(d) * * *
(1) Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian. See § 558.6 for additional requirements.

* * * * *

Dated: September 21, 2016.
Tracey Forfa,
Deputy Director, Center for Veterinary Medicine.

[FR Doc. 2016–23230 Filed 9–29–16; 8:45 am]
BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 573

[Docket No. FDA–2014–F–0988]

Food Additives Permitted in Feed and Drinking Water of Animals; Feed Grade Sodium Formate

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA, we, the Agency) is amending the regulations for food additives permitted in feed and drinking water of animals to provide for the safe use of feed grade sodium formate as a feed acidifying agent in complete swine feeds. This action is in response to a food additive petition filed by BASF Corp.

DATES: This rule is effective September 30, 2016. Submit either electronic or written objections and requests for a hearing by October 31, 2016. See section V of this document for further information on the filing of objections.

ADDRESSES: You may submit objections and requests for a hearing as follows:

Electronic Submissions
Submit electronic objections in the following way:
• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments. Objections submitted electronically, including attachments, to http://www.regulations.gov will be posted to the docket unchanged. Because your objection will be made public, you are solely responsible for ensuring that your objection does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your objection, that information will be posted on http://www.regulations.gov.
• If you want to submit an objection with confidential information that you do not wish to be made available to the public, submit the objection as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions
Submit written/paper submissions as follows:
• Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
• For written/paper objections submitted to the Division of Dockets Management, FDA will post your objection, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2014–F–0988 for “Food Additives Permitted in Feed and Drinking Water of Animals: Feed Grade Sodium Formate.” Received objections will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at http://www.regulations.gov or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.
• Confidential Submissions—To submit an objection with confidential information that you do not wish to be made publicly available, submit your objections only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on http://www.regulations.gov. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your objections and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public docks, see 80 FR 56469, September 18, 2015, or access the information at: http://www.fda.gov/regulatoryinformation/dockets/default.htm.

Docket: For access to the docket to read background documents or the electronic and written/paper objections received, go to http://www.regulations.gov and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:
Chelsea Trull, Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240–402–6729, chelsea.trull@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In a document published in the Federal Register of July 25, 2014 (79 FR 43325), FDA announced that we had filed a food additive petition (animal use) (FAP 2286) submitted by BASF Corp., 100 Park Ave., Florham Park, NJ 07932. The petition proposed that the regulations for food additives permitted in feed and drinking water of animals be amended to provide for the safe use of feed grade sodium formate as a feed acidifying agent in complete swine feeds. The notice of petition provided for a 30-day comment period on the petitioner’s request for categorical exclusion from preparing an environmental assessment or environmental impact statement.
In addition, the petition proposed that the animal food additive regulations for formic acid and ammonium formate be amended to limit formic acid and formate salts from all added sources to 1.2 percent of complete feeds. This element of the petition was not described in the July 2014 notice of petition.

Elsewhere in this issue of the Federal Register, FDA is providing notice of BASF Corp.’s proposal that FDA amend the food additive regulations for formic acid and ammonium formate to limit formic acid and formate salts from all added sources to 1.2 percent of complete feed when multiple sources of formic acid and its salts are used in combination.

II. Conclusion

FDA concludes that the data establish the safety and utility of feed grade sodium formate for use as a feed acidifying agent in complete swine feeds and that the food additive regulations should be amended as set forth in this document.

III. Public Disclosure

In accordance with § 571.1(h) (21 CFR 571.1(h)), the petition and documents we considered and relied upon in reaching our decision to approve the petition will be made available for public disclosure (see FOR FURTHER INFORMATION CONTACT). As provided in § 571.1(h), we will delete from the documents any materials that are not available for public disclosure.

IV. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.32(r) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment, nor an environmental impact statement is required.

V. Objections and Hearing Requests

Any person who will be adversely affected by this regulation may file with the Division of Dockets Management (see ADDRESSES) either electronic or written objections. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provision of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection.

Any objections received in response to the regulation may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at http://www.regulations.gov.

List of Subjects in 21 CFR Part 573

Animal feeds, Food additives.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegate to the Center for Veterinary Medicine, 21 CFR part 573 is amended as follows:

PART 573—FOOD ADDITIVES PERMITTED IN FEED AND DRINKING WATER OF ANIMALS

1. The authority citation for part 573 continues to read as follows:

2. Add § 573.696 to read as follows:

§ 573.696 Feed grade sodium formate.

The food additive, feed grade sodium formate, may be safely used in the manufacture of complete swine feeds in accordance with the following prescribed conditions:

(a) The additive is manufactured by the reaction of 99 percent formic acid and 50 percent sodium hydroxide in water to produce a solution made up of at least 20.5 percent sodium salt of formic acid and not more than 61 percent formic acid.

(b) The additive is used or intended for use as a feed acidifying agent, to lower the pH, in complete swine feeds at levels not to exceed 1.2 percent of the complete feed.

(c) To assure safe use of the additive, formic acid and formate salts from all added sources cannot exceed 1.2 percent of complete feed when multiple sources of formic acid and its salts are used in combination.

(d) To assure safe use of the additive, in addition to the other information required by the Federal Food, Drug, and Cosmetic Act, the label and labeling shall contain:

(1) The name of the additive.

(2) Adequate directions for use, including a statement that feed grade sodium formate must be uniformly applied and thoroughly mixed into complete feeds and that the complete feeds so treated shall be labeled as containing feed grade sodium formate.

(3) Cautions for use including this statement: Caution: Follow label directions. Formic acid and formate salts from all added sources cannot exceed 1.2 percent of complete feed when multiple sources of formic acid and its salts are used in combination.

(e) To assure safe use of the additive, in addition to the other information required by the act and paragraph (d) of this section, the label and labeling shall contain:

(1) Appropriate warnings and safety precautions concerning feed grade sodium formate.

(2) Statements identifying feed grade sodium formate as a corrosive and possible severe irritant.

(3) Information about emergency aid in case of accidental exposure as follows:

(i) Statements reflecting requirements of applicable sections of the Superfund Amendments and Reauthorization Act (SARA), and the Occupational Safety and Health Administration (OSHA) human safety guidance regulations.

(ii) Contact address and telephone number for reporting adverse reactions or to request a copy of the Material Safety Data Sheet (MSDS).

Dated: September 26, 2016.

Tracey H. Forfa,
Deputy Director, Center for Veterinary Medicine.

Food and Drug Administration

21 CFR Part 882

[Docket No. FDA 2016–N–2677]

Medical Devices; Neurological Devices; Classification of the Evoked Photon Image Capture Device

AGENCY: Food and Drug Administration, HHS.

ACTION: Final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the Evoked Photon Image Capture Device into class I (general controls). The Agency is classifying the device into class I (general controls) in order to provide a reasonable assurance of safety and effectiveness of the device.

DATES: This order is effective September 30, 2016. The classification was applicable on July 15, 2016.
under section 513(f)(2) of the FD&C Act. FDA shall classify the device by written order within 120 days. This classification will be the initial classification of the device. On January 12, 2015, EPIC Research & Diagnostics, Inc. submitted a request for classification of the EPIC ClearView™ System under section 513(f)(2) of the FD&C Act.

In accordance with section 513(f)(2) of the FD&C Act, FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1). FDA classifies devices into class I if general controls by themselves are sufficient to provide reasonable assurance of safety and effectiveness of the device for its intended use. After review of the information submitted in the de novo request, FDA determined that the device can be classified into class I. FDA believes general controls will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on July 15, 2016, FDA issued an order to the requestor classifying the device into class I. FDA is codifying the classification of the device by adding 21 CFR 882.1561.

The device is assigned the generic name evoked photon image capture device, and it is identified as a prescription, electrically-powered device intended for use as a non-invasive measurement tool that applies electricity to detect electrophysiological signals emanating from the skin, which are reported numerically and as images without clinical interpretation. The device is not intended for diagnostic purposes.

FDA has identified the following risks to health associated specifically with this type of device: Adverse tissue reaction, electromagnetic incompatibility, and electromagnetic malfunction (e.g., shock).

Evoked photon image capture devices are not safe for use except under the supervision of a practitioner licensed by law to direct the use of the device. As such, the device is a prescription device that must satisfy prescription labeling requirements (see 21 CFR 801.109 Prescription devices).

II. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

III. Paperwork Reduction Act of 1995

This final order refers to previously approved collections of information found in other FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120, and the collections of information in 21 CFR part 801, regarding labeling have been approved under OMB control number 0910–0485.

List of Subjects in 21 CFR Part 882

Medical devices, Neurological devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 882 is amended as follows:

PART 882—NEUROLOGICAL DEVICES

1. The authority citation for part 882 continues to read as follows:

2. Add § 882.1561 to subpart B to read as follows:

§ 882.1561 Evoked photon image capture device.

(a) Identification. An evoked photon image capture device is a prescription, electrically powered device intended for use as a noninvasive measurement tool that applies electricity to detect electrophysiological signals emanating from the skin, which are reported numerically and as images without clinical interpretation. The device is not intended for diagnostic purposes.

(b) Classification. Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter, subject to the limitations in § 882.9.

Dated: September 26, 2016.

Leslie Kux,
Associate Commissioner for Policy.

[FR Doc. 2016–23633 Filed 9–29–16; 8:45 am]

BILLING CODE 4164–01–P
Departments of State

22 CFR Part 51

[Public Notice: 9680]

RIN 1400–AE01

Passports: Service Passports

AGENCY: Department of State.

ACTION: Interim final rule.

SUMMARY: This rule amends a regulation that establishes the different types of passports issued by the Department of State. A definition for special issuance passports is added. Amendments establish a new service passport, which may be approved for certain non-personal services contractors who travel abroad in support of and pursuant to a contract with the U.S. government, and make corresponding changes regarding official and diplomatic passports. The service passport will demonstrate a contractual relationship between the bearer’s employer and the U.S. government as the reason for travel, thereby continuing to demonstrate the individual’s support function on behalf of the U.S. government, but nevertheless signaling a more attenuated relationship with the U.S. government than that enjoyed by direct hire employees. The U.S. government incurs significant additional cost annually in delays and fees because foreign governments do not recognize contractors as doing work for the U.S. government. By more clearly demonstrating the attenuated relationship, the Department will eliminate such waste. The regulation is amended to establish the validity of the new service passport and clarify the grounds for invalidity of a special issuance passport.

DATES: This rule is effective on September 30, 2016. The Department of State will accept comments on this interim final rule until November 29, 2016.

ADDRESSES: You may make comments by any of the following methods, and you must include the RIN in the subject line of your message.

- Mail (paper, disk, or CD-ROM submissions): ATTN: RIN 1400–AE01, U.S. Department of State, Office of Passport Services, Bureau of Consular Affairs (CA/PPT), Attn: CA/PPT/L, 44132 Mercure Circle, P.O. Box 1227, Sterling, Virginia 20166–1227.
- Email: PassportRules@state.gov. 
- Persons with access to the Internet may view this rule and submit comments by going to www.regulations.gov, and searching for docket number DOS–2016–0065.

FOR FURTHER INFORMATION CONTACT: Michael Yohannan, Attorney Advisor, PassportRules@state.gov, (202) 485–6507.

SUPPLEMENTARY INFORMATION: U.S. government activities overseas are often supported by non-personal services contracts, defined in 48 CFR 37.101 as contracts “under which the personnel rendering services are not subject, either by the contract’s terms or by the manner of its administration, to the supervision and control usually prevailing in relationships between the U.S. government and its employees.” U.S. citizens employed under these contracts, sometimes referred to as non-personal services contractors, carry out critical security, maintenance and other functions on behalf of the U.S. government, often under difficult or dangerous circumstances. As a general rule these individuals conduct the travel associated with their contractual duties in support of the U.S. government with a regular passport. However, the Department is aware that there are limited circumstances in which non-personal services contractors traveling on regular passports experience difficulties when the purpose of their travel involves work conducted in support of the U.S. government. These difficulties annually cause significant cost to the U.S. government resulting from program delays and fees assessed to the Department. Contractors working on building projects who must travel intermittently out of country to renew visas are particularly affected by such difficulties because the U.S. government must bear the round-trip air travel costs, the hotel costs, and the per diem costs in addition to wage costs during often lengthy waits for a new visa. Foreign governments also charge large visa fees which then increase the costs of programs and building projects. In these instances, it is advantageous to the U.S. government to provide a passport that conveys that the traveler is abroad to conduct work in support of the U.S. government while simultaneously indicating that the traveler has a more attenuated relationship with the U.S. government that does not justify a diplomatic or official passport.

The Department of State is creating a new type of passport, the “service passport,” to fulfill this function. The Department is further clarifying the limited circumstances under which a non-personal or personal services contractor may receive an official or diplomatic passport when in receipt of such a contract from a federal agency. The Department estimates that this rulemaking will affect approximately 1,000 non-personal services contractors per year.

Under 22 U.S.C. 211a et seq., the Secretary of State has the authority to make rules for the granting and issuance of passports. To add clarity to the types of passports issued by the Department, § 51.1 of 22 CFR is being modified to add a definition of “special issuance passport.” The Department is modifying § 51.3 to authorize issuance of service passports and to clarify the eligibility criteria for official and diplomatic passports. The Department is further modifying § 51.4 to clarify the validity of special issuance passports, including the new service passport, and clarify the grounds for invalidity of a special issuance passport.

Regulatory Findings

The Department is publishing this rule as a final rule, effective on the date of publication, pursuant to the “good cause” exemption of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(3)(B). The Department finds that delaying the effect of this rule until after notice and comment would be impractical, unnecessary, and contrary to public interest. The Department finds that providing these individuals with travel documents that indicate that their travel is in support of the U.S. government while also signaling a more attenuated relationship with the U.S. government than that enjoyed by direct hire employees provides a compelling justification for an immediate effective date of this rule.

In addition, this rulemaking is exempt from notice and comment pursuant to 5 U.S.C. 553(a)(1), because it involves a foreign affairs function of the United States. As noted above, contractors working on building projects often must travel intermittently out of country to renew visas, and foreign governments charge large visa fees whenever that occurs. The U.S. government must provide a passport that conveys that the traveler is abroad to conduct work in support of the U.S. government while simultaneously indicating that the traveler has a more attenuated relationship with the U.S. government that does not justify a diplomatic or official passport.

Because this rule is exempt from 5 U.S.C. 553, it is effective on the date of publication. See 5 U.S.C. 553(d).

However, the Department solicits—and welcomes—comments on this rulemaking, and will address relevant comments in a final rule.

Regulatory Flexibility Act

The Department, in accordance with the Regulatory Flexibility Act, 5 U.S.C.
605(b), has reviewed this rule and, by approving it, certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities as defined in 5 U.S.C. 601(6).

Unfunded Mandates Act of 1995
This rule will not result in the expenditure by state, local, tribal, or territorial governments, in the aggregate, or by the private sector, of $100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1501 et seq.

Small Business Regulatory Enforcement Fairness Act of 1996
This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996, since it will not result in an annual effect on the economy of $100 million or more. See 5 U.S.C. 804(2).

Executive Order 12866 and 13563
The Department has reviewed the regulation to ensure its consistency with the regulatory philosophy and principles set forth in the Executive Orders and finds that the benefits of this rule outweigh any costs. This rule is not economically significant under Executive Order 12866, section 3(f)(1), because it will not have an annual effect on the economy of $100 million or more. The Department expects the rule’s impact on the public to be minimal; therefore, the Department finds that the benefits of this rulemaking outweigh any costs. This rule has been designated as “non-significant” by the Office of Information and Regulatory Affairs.

Executive Order 13132
This rule will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, the Department has determined that this rule does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement.

Executive Order 13175—Effect on Tribes
The Department of State has determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal law. Accordingly, Executive Order 13175 does not apply to this rulemaking.

Paperwork Reduction Act
This rule does not impose or alter any reporting or record-keeping requirements under the Paperwork Reduction Act. The individuals who will be applying for the new service passports are those who would have applied for regular or official passports; therefore, the total burden on existing information collections is expected to remain constant. The OMB Control Numbers are 1405–0004 and 1405–0020.

List of Subjects in 22 CFR Part 51
Administrative practice and procedure, Drug traffic control, Passports and visas, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, 22 CFR part 51 is amended as follows:

PART 51—PASSPORTS

§ 51.1 Definitions.

■ 1. The authority citation for Part 51 continues to read as follows:

■ 2. Amend § 51.1 by removing the alphabetical paragraph designations and adding the definitions for non-personal services contractor, personal services contractor, and special issuance passport in alphabetical order to read as follows:

§ 51.1 Definitions.

■ ■ ■ ■ ■ ■

Non-personal services contractor, for purposes of this part, is an individual working under a non-personal services contract as defined in 48 CFR 37.101.

Personal services contractor, for purposes of this part, means a contractor who is working under a personal services contract as defined in 48 CFR 37.104.

Special issuance passport means a regular passport for which no passport fee is collected pursuant to § 51.52, and a service, official or diplomatic passport as defined in § 51.3.

■ ■ ■ ■ ■ ■

3. Revise § 51.3 to read as follows:

§ 51.3 Types of passports.

(a) Regular passport. A regular passport is issued to a national of the United States.

(b) Service passport. When authorized by the Department, a service passport may be issued to a non-personal services contractor traveling abroad to carry out duties in support of and pursuant to a contract with the U.S. government, when exceptional circumstances make a service passport necessary to enable the individual to carry out his or her contractual duties.

(c) Official passport. When authorized by the Department, an official passport may be issued to:

(1) An officer or employee of the U.S. government traveling abroad to carry out official duties, and family members of such persons;

(2) A U.S. government personal services contractor traveling abroad to carry out official duties on behalf of the U.S. government;

(3) A non-personal services contractor traveling abroad to carry out duties in support of and pursuant to a contract with the U.S. government when the contractor is unable to carry out such duties using a regular or service passport; or

(4) An official or employee of a state, local, tribal, or territorial government traveling abroad to carry out official duties in support of the U.S. government.

(d) Diplomatic passport. A diplomatic passport is issued to a Foreign Service Officer or to a person having diplomatic status or comparable status because he or she is traveling abroad to carry out diplomatic duties on behalf of the U.S. government. When authorized by the Department, spouses and family members of such persons may be issued diplomatic passports. When authorized by the Department, a diplomatic passport may be issued to a U.S. government contractor if the contractor meets the eligibility requirements for a diplomatic passport and the diplomatic passport is necessary to complete his or her contractual duties in support of the U.S. government.

(e) Passport card. A passport card is issued to a national of the United States on the same basis as a regular passport. It is valid only for departure from and entry to the United States through land and sea ports of entry between the United States and Mexico, Canada, the Caribbean and Bermuda. It is not a
§ 51.4 Validity of passports.

(a) Signature of bearer. A passport book is valid only when signed by the bearer in the space designated for signature, or, if the bearer is unable to sign, signed by a person with legal authority to sign on his or her behalf. A passport card is valid without the signature of the bearer.

(b) Period of validity of a regular passport and a passport card. (1) A regular passport or passport card issued to an applicant 16 years of age or older is valid for ten years from date of issue unless the Department limits the validity period to a shorter period.

(2) A regular passport or passport card issued to an applicant under 16 years of age is valid for five years from date of issue unless the Department limits the validity period to a shorter period.

(c) Period of validity of a service passport. The period of validity of a service passport, unless limited by the Department to a shorter period, is five years from the date of issue pursuant to which the service passport is issued, whichever is shorter. A service passport which has not expired must be returned to the Department upon the termination of the bearer’s official status or at such other time as the Department may determine.

(d) Period of validity of an official passport. The period of validity of an official passport, unless limited by the Department to a shorter period, is five years from the date of issue, or so long as the bearer maintains his or her official status, whichever is shorter. An official passport which has not expired must be returned to the Department upon the termination of the bearer’s official status or at such other time as the Department may determine.

(e) Period of validity of a diplomatic passport. The period of validity of a diplomatic passport, unless limited by the Department to a shorter period, is five years from the date of issue, or so long as the bearer maintains his or her diplomatic status, whichever is shorter. A diplomatic passport which has not expired must be returned to the Department upon the termination of the bearer’s diplomatic status or at such other time as the Department may determine.

(f) Limitation of validity. The validity period of any passport may be limited by the Department to less than the normal validity period. The bearer of a limited passport may apply for a new passport, using the proper application and submitting the limited passport, applicable fees, photographs, and additional documentation, if required, to support the issuance of a new passport.

(g) Invalidity. A United States passport is invalid as soon as:

(1) The Department has sent or personally delivered a written notice to the bearer stating that the passport has been revoked; or

(2) The passport has been reported as lost or stolen to the Department, a U.S. passport agency or a diplomatic or consular post abroad and the Department has recorded the reported loss or theft; or

(3) The passport is cancelled by the Department (physically, electronically, or otherwise) upon issuance of a new passport of the same type to the bearer; or

(4) The Department has sent a written notice to the bearer that the passport has been invalidated because the Department has not received the applicable fees; or

(5) The passport has been materially changed in physical appearance or composition, or contains a damaged, defective or otherwise nonfunctioning chip, or includes unauthorized changes, obliterations, entries or photographs, or has observable wear or tear that renders it unfit for use as a travel document, and the Department either takes possession of the passport or sends a written notice to the bearer; or

(6) The bearer of a special issuance passport no longer maintains the status pursuant to which the passport was issued; or

(7) The Department has sent a written notice to the bearer, directly or through the bearer’s employing agency, stating that a special issuance passport has been cancelled by the Department.

David T. Donahue,
Acting Assistant Secretary, Bureau of Consular Affairs, Department of State.

VII. Public Participation

I. Introduction

On December 4, 2015, the President signed into law the Fixing America’s Surface Transportation Act (FAST Act), Public Law 114–94, the first authorization enacted in over ten years that provides long-term funding certainty for surface transportation. The FAST Act amended 23 U.S.C. 154 (Section 154) and 23 U.S.C. 164 (Section 164), which address the serious national problems of impaired driving by encouraging States to meet minimum standards for their open container laws and repeat intoxicated driver laws. The FAST Act built on prior amendments to those sections in the Moving Ahead for Progress in the 21st Century Act (MAP–21), Public Law 112–180, signed into law on July 6, 2012.

The National Highway Traffic Safety Administration (NHTSA) and the Federal Highway Administration (FHWA) (collectively, “the agencies”) are issuing this interim final rule (IFR), with immediate effectiveness, to ensure that States receive instructions that are important to upcoming compliance determinations to be made on October 1, 2016, as the changes in the FAST Act are effective on that date. This IFR amends the Federal implementing regulations for Section 154 (23 CFR part 1270) and Section 164 (23 CFR part 1275) to reflect the changed requirements from the recent Federal legislation. At the same time, the agencies are taking this opportunity to update the regulations to improve clarity, codify longstanding interpretation of the statutes and current regulations, and streamline procedures for States.

This preamble will first address the history of and modifications to the minimum compliance requirements of Section 154 and Section 164, respectively. It will then address the elements common to both programs, including the penalties for noncompliance, the limitations on use of funds associated with noncompliance, and the responsibilities of compliant and non-compliant States.

II. Section 154: Open Container Laws

A. Background

The Transportation Equity Act for the 21st Century (TEA–21), Public Law 105–178, was signed into law on June 9, 1998. On July 22, 1998, the TEA–21 Restoration Act, Public Law 105–206 (a technical corrections bill), was enacted to restore provisions that were agreed to by the conferees to TEA–21, but were not included in the conference report. Section 1405 of the TEA–21 Restoration Act amended chapter 1 of title 23, United States Code (U.S.C.), by adding Section 154, which established a transfer program under which a percentage of a State’s Federal-aid highway construction funds would be transferred to the State’s apportionment under 23 U.S.C. 402 (Section 402) if the State failed to enact and enforce a conforming “open container” law. These funds could be used for alcohol-impaired driving countermeasures or the enforcement of driving while intoxicated laws, or States could elect to use all or a portion of the funds for hazard elimination activities under 23 U.S.C. 152.

Under Section 154, to avoid the transfer of funds, a State must enact and enforce an open container law “that prohibits the possession of any open alcoholic beverage container, or the consumption of any alcoholic beverage, in the passenger area of any motor vehicle (including possession or consumption by the driver of the vehicle) located on a public highway, or the right-of-way of a public highway, in the State.” 23 U.S.C. 154(b)(1). All 50 States, the District of Columbia, and Puerto Rico are considered to be States for the purposes of this program.

On October 6, 1998, the agencies published an interim final rule implementing the Section 154 program, 63 FR 53580 (Oct. 6, 1998), followed by a final rule published on August 24, 2000. 65 FR 51532 (Aug. 24, 2000). Since that time, the minimum requirements that a State’s open container law must meet to comply with Section 154 have not changed. However, subsequent legislation amended the penalty provisions that apply to noncompliant States. Under current law, noncompliance results in the reservation of funds rather than an immediate transfer to Section 402; funds are reserved from different Federal-aid highway programs and in a different amount (based on a percentage defined in law); the transfer to Section 402 is dependent upon a State’s election to use funds for alcohol impaired driving countermeasures; and funds may be used for highway safety improvement program activities eligible under 23 U.S.C. 148 rather than hazard elimination activities. The Federal implementing regulations were never updated to reflect these statutory changes governing procedures.

This IFR updates the Federal implementing regulations to reflect these procedural changes. In addition, it makes changes to improve clarity, codify longstanding interpretations of the Federal statute and regulations, streamline procedures for States, and eliminate regulatory provisions that were not effectuated in practice for reasons discussed below. These changes are intended to ensure a uniform understanding among the States of the minimum requirements their open...
under the Federal statute. Due to the preponderance of these laws in States, the agencies determined that this clarification is necessary. Recorked or resealed alcoholic beverages containers must be stored outside of the passenger area, such as in the trunk of a motor vehicle.

2. Compliance Criteria (23 CFR 1270.4(a)–(c))

Congress has made no changes to the substantive compliance criteria of Section 154 since the inception of the program. Therefore, the agencies are not making any substantive changes to these sections of the regulations. The six compliance criteria are discussed extensively in the interim final rule (63 FR 53580 [Oct. 6, 1998]) and final rule (65 FR 51532 [Aug. 24, 2000]) that first implemented the program. Those discussions provide background and explanations regarding the Federal minimum requirements.

3. Exceptions (23 CFR 1270.4(d))

The Federal implementing regulations require a State’s open container law to apply to “the passenger area of any motor vehicle,” with passenger area meaning “the area designed to seat the driver and passengers while the motor vehicle is in operation and any area that is readily accessible to the driver or a passenger while in their seating positions, including the glove compartment.” 23 CFR 1270.3(g), 1270.4(b)(2). However, certain exceptions to this rule are permitted provided they comply with the requirements in 23 CFR 1270.4(d)(1).

The Federal regulations have long permitted possession of an open alcoholic beverage container in a locked glove compartment. NHTSA has accepted as compliant a State provision permitting storage of an open container in a locked center console because a locked center console is functionally equivalent to a locked glove compartment. This IFR logically extends that exception to allow possession of an open alcoholic beverage container in any locked container (including a locked fixed console or a locked glove compartment). The agencies emphasize that this exception does not permit the possession in the passenger area of an open alcoholic beverage container in tamper-evident packaging. (See the earlier discussion about “cork and carry” and “resealed wine container” provisions.) While tamper-evident packaging may assist law enforcement officers in identifying whether consumption of the alcoholic beverage has occurred, it does not restrict access to the alcoholic beverage, which is the purpose of open container laws.

This IFR also moves the location of the phrase “in a motor vehicle that is not equipped with a trunk” to remove any ambiguity that this is a prerequisite for allowing placement of an open alcoholic beverage container behind the last upright seat or in an area not normally occupied by the driver or a passenger. No substantive change is intended—the agencies have always interpreted and applied this provision in this manner.

The Federal implementing regulations require a State’s open container law to apply to all occupants of a motor vehicle. However, the Federal statute and implementing regulations permit exceptions allowing a passenger, but never a driver, to possess an open alcoholic beverage container or consume an alcoholic beverage in the passenger area of “a motor vehicle designed, maintained, or used primarily for the transportation of persons for compensation, or in the living quarters of a house coach or house trailer.” 23 CFR 1270.4(d)(2). The agencies are making technical corrections to this provision that do not change its application.

III. Section 164: Repeat Intoxicated Driver Laws

A. Background

Section 1406 of the TEA–21 Restoration Act amended chapter 1 of title 23, U.S.C., by adding Section 164, which established a transfer program under which a percentage of a State’s Federal-aid highway construction funds would be transferred to the State’s apportionment under Section 402 if the State failed to enact and enforce a conforming “repeat intoxicated driver” law. As with Section 154, transfer funds could be used for alcohol-impaired driving countermeasures or the enforcement of driving while intoxicated laws, or States could elect to use all or a portion of the funds for hazard elimination activities under 23 U.S.C. 152.

Under Section 164, to avoid the transfer of funds, a State must enact and enforce a repeat intoxicated driver law that establishes, at minimum, certain specified penalties for second and subsequent convictions of driving while intoxicated or driving under the influence. As originally enacted, Section 164 required that States impose the following minimum penalties: A one-year driver’s license suspension; the impounding or immobilization of, or the installation of an ignition interlock system on, the repeat intoxicated

1 Throughout this preamble, citations to the Section 154 and Section 164 implementing regulations refer to the version as amended by the IFR.
driver’s motor vehicles; an assessment of the repeat intoxicated driver’s degree of alcohol abuse, and treatment as appropriate; and the sentencing of the repeat intoxicated driver to a minimum number of days of imprisonment or community service. All 50 States, the District of Columbia, and Puerto Rico are considered to be States for the purposes of this program.

On October 19, 1998, the agencies published an interim final rule that implemented the Section 164 program, 63 FR 55796 (Oct. 19, 1998), followed by a final rule published on October 4, 2000, 65 FR 59112 (Oct. 4, 2000). The SAFETEA–LU Technical Corrections Act of 2008, Public Law 110–244 (enacted June 6, 2008), amended some of the minimum penalties States must impose on repeat offenders, and both MAP–21 and the FAST Act further amended these minimum penalties. These Acts also updated, in the same ways as Section 154, the penalty provisions that apply to States that are not compliant with the program. Despite these significant statutory changes over the past eight years, the Federal implementing regulations have not been updated since 2000.

This IFR updates the minimum compliance criteria based on these legislative changes, as well as to improve clarity, codify longstanding interpretations, streamline procedures for States, and eliminate regulatory provisions that were not effectuated in practice for reasons discussed below. As with Section 154, these changes are intended to ensure a uniform understanding among the States of the minimum requirements their repeat intoxicated driver laws must meet. Revisions to the procedures for demonstrating compliance, the penalties for noncompliance, and the responsibilities of compliant and noncompliant States are discussed later in the preamble as those apply also to the Section 164 program.

B. Minimum Repeat Intoxicated Driver Law Requirements

Unlike the Section 154 program, Congress has made substantive amendments to the requirements that a State’s repeat intoxicated driver law must meet to comply with Section 164. Many of the revisions described in this section codify those substantive statutory changes, as the regulations have not been updated since 2000. In other cases, the agencies are simply improving the clarity of the regulations to reflect longstanding application of the Federal statute since 2000.

1. Definitions (23 CFR 1275.3)

The agencies are adding definitions for “FHWA” and “NHTSA” and eliminating the definition for “enact and enforce,” consistent with the approach for 23 CFR 1270.3. The agencies are eliminating the definitions for “driver’s motor vehicle” and “impoundment or immobilization,” as the compliance criterion to which these applied was repealed by the FAST Act. The agencies are eliminating the definition for “license suspension,” as the compliance criterion to which it applied has been reworded, rendering the definition superfluous. The agencies are adding a definition for “24–7 sobriety program” due to FAST Act revisions to the general compliance criteria. Because the definition of the term in the FAST Act cross-references 23 U.S.C. 405(d)(7)(A), the agencies have similarly tied the definition here to the meaning given to it in NHTSA’s Section 405 implementing regulations (see 23 CFR 1300.23(b)). 23 CFR 1270.3(a). This necessitates adding a reference to a “combination of laws or programs” to the definition of “repeat intoxicated driver law” to accommodate these 24–7 sobriety programs. Finally, the agencies are adding a definition for “mandatory sentence.” As used in combination with “imprisonment,” the definition is intended to ensure that repeat offenders are in fact detained for the minimum periods specified.

Although the IFR makes no change to the definition of “repeat intoxicated driver,” the agencies emphasize that a State may not expunge an offender’s prior conviction in order to exclude it from the five-year lookback period. Any mechanism (including expungement) that causes a State to exclude from consideration prior convictions of driving while intoxicated or driving under the influence, when such convictions occurred within the prior five years, generally does not comply with Section 164.

2. Compliance Criteria (23 CFR 1275.4(a))

The substantive compliance criteria of Section 164 have been significantly amended since their inception. This IFR updates the compliance criteria to reflect the current law, as most recently amended by the FAST Act. In addition, the agencies are providing clarifications as appropriate.

a. License Sanction (23 CFR 1275.4(a)(1))

Section 164, as created by the TEA–21 Restoration Act, required all repeat offenders to receive a minimum one-year hard license suspension or revocation. Under the Federal implementing regulations, during the one-year term, the offender could not be eligible for any driving privileges, such as a restricted or hardship license. Because the Federal implementing regulations have not been updated since 2000, this language remained in the Code of Federal Regulations. The SAFETEA–LU Technical Corrections Act of 2008 and MAP–21 made further changes that were effectuated by the agencies, but that were never written into the regulations.

The FAST Act completely rewrote the license sanction criterion in 23 U.S.C. 164(a)(5)(A) to loosen the requirements and provide for additional compliance options for States. This IFR codifies the revised criterion. Under today’s IFR, all repeat offenders must receive one or a combination of three license sanctions for a period of not less than one year (365 days). States may therefore “mix-and-match” these sanctions, provided that, in combination, they last for the full one year period.

The first license sanction is a suspension of all driving privileges. During that period, the repeat offender is not permitted to operate any motor vehicle under any circumstances. The second license sanction is a restriction on driving privileges that limits the individual to operating only motor vehicles with an ignition interlock device installed. Section 164 and the implementing regulations permit certain limited exceptions to this license sanction, discussed later in this preamble. The third license sanction is that the repeat offender may only operate a motor vehicle provided the individual is participating in, and complying with, a 24–7 sobriety program. For a State’s law or 24–7 sobriety program to comply with this requirement, it must make clear that any participant who is kicked out of the program must be subject to either a hard license suspension or an ignition interlock restriction, as provided under the other two license sanctions, for the remainder of the one year sanction period.

b. Vehicle Sanction (Repeated)

The TEA–21 Restoration Act required all repeat offenders to “be subject to the impoundment or immobilization of each of the individual’s motor vehicles or the installation of an ignition interlock system on each of the motor vehicles.” The Federal implementing regulations further required impoundment or immobilization to occur during the one-year license suspension, while installation of an ignition interlock...
device was required to occur at the conclusion of the one-year license suspension. The FAST Act repealed this vehicle sanction. With the vast majority of States moving to ignition interlocks as a license sanction, the vehicle sanction requirement was largely redundant. This IFR removes these requirements from 23 CFR 1275.4.

c. Assessment and Treatment (23 CFR 1275.4(a)(2))

Under Section 164, the State law must require that all repeat intoxicated drivers undergo an assessment of their degree of alcohol abuse, and it must authorize the imposition of treatment as appropriate. An assessment is required of all repeat offenders because it allows for a determination not only of whether an offender should undergo treatment, but also of what type and level of treatment is appropriate for that offender. While treatment is not required for all repeat offenders, the State must authorize the imposition of treatment as appropriate. Congress has not changed this criterion since its inception, and the agencies are making no changes in this IFR.

d. Minimum Sentence (23 CFR 1275.4(a)(3))

Since the beginning of the program, Section 164 has required that each State have a law that imposes a mandatory minimum sentence on all repeat intoxicated drivers. For a second offense, the law must provide for a mandatory sentence of not less than 5 days of imprisonment or 30 days of community service. For a third or subsequent offense, the law must provide for a mandatory sentence of not less than 10 days of imprisonment or 60 days of community service. The terms “mandatory sentence” and “imprisonment” are defined in 23 CFR 1275.3. The FAST Act retains these minimum sentence provisions, but allows States the option to certify as to their “general practice” for incarceration in lieu of having a compliant mandatory minimum sentence. The new certification option is addressed in the next section regarding exceptions.

In this IFR, the agencies are clarifying the number of hours for the various sentences identified above that are considered equivalent to each “day.” Many States provide for sentencing in terms of hours rather than days. The agencies recognize that imprisonment and community service function differently. While imprisonment is generally a continuous period of detention that lasts through waking and sleeping hours, community service is a form of labor that occurs while the detainee is awake. A “day” for purposes of each of these penalties is therefore not equivalent. NHTSA’s longstanding interpretation has been that one “day” of imprisonment equals 24 hours, and one “day” of community service equals 8 hours (a work day). The agencies have added corresponding hour equivalents to the minimum sentence criterion.

3. Exceptions (23 CFR 1275.4(b), 1275.5)

a. Special Exceptions (23 CFR 1275.4(b))

One of the three sanctions under the license sanction criterion described above is restriction of the repeat offender’s driving privileges to the operation of only motor vehicles with an ignition interlock device installed. However, the FAST Act allows two exceptions to this restriction, which the agencies are adopting in this IFR verbatim. (Prior to enactment of the FAST Act, neither was allowed under the Section 164 program.) No other exceptions to a State’s ignition interlock law are permitted.

First, the FAST Act allows a repeat offender subject to an ignition interlock restriction to operate an employer’s motor vehicle in the course and scope of employment without an ignition interlock device installed. Second, a State may except from its ignition interlock law a repeat offender that is certified by a medical doctor as being unable to provide a deep lung breath sample for analysis by an ignition interlock device.

b. “General Practice” Certifications (23 CFR 1275.5)

The FAST Act amends the minimum sentence criterion to provide an alternative compliance option. In lieu of enacting and enforcing a law that complies with the minimum sentence criterion, a State may certify to its “general practice” of incarceration. According to the FAST Act, the State must certify for a second offender that its “general practice is such an individual will receive 10 days of incarceration.” 23 U.S.C. 164(a)(5)(C)(i)–(ii). This IFR establishes the process for a State to submit a “general practice” certification as an alternative means of satisfying the minimum sentence criterion.

The IFR sets forth separate certifications for second offender incarceration and for third and subsequent offender incarceration. This will allow maximum flexibility to States, because it allows a State whose laws are partly in compliance to satisfy the minimum sentence criterion through a combination of statute and certification.

To meet the statutory standard of “general practice,” the agencies have elected to require a State to certify that 75 percent of repeat offenders are subject to mandatory incarceration. The agencies believe this percentage is a reasonable interpretation of what would constitute “general practice” in a State. Consistent with the FAST Act requirements, the certification for a second offender does not contain a minimum incarceration period, while that for third and subsequent offenders specifies 10 days.

The agencies elected not to base “general practice” on a State’s average incarceration period for repeat offenders. That approach would allow a State to meet the standard for second offenders if a single offender is sentenced to any period of incarceration. For third and subsequent offenders, lengthy prison sentences could skew the average even if the vast majority of offenders received sentences well below 10 days. The agencies do not believe such an approach falls within the reasonable meaning of “general practice.”

Each certification is required to be based on data from the full calendar year immediately preceding the date of certification. In other words, if the State is certifying for fiscal year 2018 (which begins on October 1, 2017), the State’s “general practice” certification must be based on data from the entire period of January 1, 2016 through December 31, 2016. The certification must be signed by the Governor’s Representative for Highway Safety and must be based on personal knowledge and other appropriate inquiry.

Because the State’s “general practice” may change over time, the agencies are requiring States electing this compliance option to provide a new certification annually. Although certifications are due by October 1 each year, States are encouraged to submit their certification by August 15 to avoid
any delay in the release of funds on October 1 of that calendar year.

IV. Non-Compliance Penalties and Procedures

This section describes the penalties affecting States that do not comply with one or both of the Section 154 and Section 164 programs. In general, these changes merely update the regulations to reflect amendments made by Federal statutes, such as MAP–21. The agencies are also streamlining some of the procedures that apply to States.

A. Reservation of Funds for Non-Compliance (23 CFR 1270.6 and 1275.6)

States that fail to enact or enforce compliant open container or repeat intoxicated driver laws by October 1 of each fiscal year will have an amount equal to 2.5 percent of Federal-aid funds apportioned under 23 U.S.C. 104(b)(1) and 23 U.S.C. 104(b)(2) for the National Highway Performance Program (NHPP) and the Surface Transportation Block Grant Program (STBG) reserved by FHWA. The penalties are separate and distinct; a 2.5 percent penalty applies separately for each program where non-compliance occurs. The IFR eliminates as obsolete the penalty provisions that applied to fiscal years 2001 and 2002. In addition, it updates the procedures to reflect the change to a reservation program (rather than immediate transfer to a State’s Section 402 apportionment), the change in the penalty amount to 2.5 percent of Federal-aid funds (rather than 3 percent), and the change in the funds from which the penalty is reserved to those apportioned under 23 U.S.C. 104(b)(1) and (b)(2) (rather than 23 U.S.C. 104(b)(1), (b)(3), and (b)(4)), which all resulted from MAP–21.

The initial reservation of Federal-aid funds by FHWA for noncompliant States will be on a proportional basis from each of the apportionments under Sections 104(b)(1) and (b)(2). Each fiscal year, the State’s Department of Transportation must inform FHWA, through the appropriate Division Administrator, within 30 days if it wishes to change the derivation of the total penalty amounts from the NHPP and STBG apportionments from the default proportional amounts. Prior to this IFR, States were required to submit this request by October 30. The change in the IFR ensures that States always receive 30 days to process this request in the event issuance of the notice of apportionments is delayed.

B. Use of Reserved Funds (23 CFR 1270.7 and 1275.7)

The agencies have reorganized 23 CFR 1270.7 and 1275.7 to improve clarity and better align them with the order of procedures for States. Not later than 60 days after the penalty funds are reserved, the Governor’s Representative for Highway Safety and the Chief Executive Officer of the State’s Department of Transportation must jointly identify, in writing, to the appropriate NHTSA Regional Administrator and FHWA Division Administrator how the penalty funds will be distributed for use among alcohol-impaired driving programs and Highway Safety Improvement Programs (HSIP) eligible activities under 23 U.S.C. 148. The primary change in the IFR is to reflect the change in available uses from hazard elimination to HSIP eligible activities, which resulted from Federal legislation.

The penalty funds will continue to be reserved until the State provides this distribution request. As soon as practicable after its receipt by the agencies, the funds will either be transferred to the State’s Section 402 apportionment for alcohol-impaired driving programs or released to the State Department of Transportation for HSIP eligible activities, pursuant to the changes in MAP–21. The Federal statutes do not authorize additional transfers between the Section 402 and HSIP programs. As a result, the IFR adds that once penalty funds have been transferred or released for the fiscal year, States are not able to revise their request.

The allowable uses for funds (specifically, for alcohol-impaired driving programs and HSIP eligible activities) are described in the implementing regulations and updated only to reflect the switch from hazard elimination to HSIP, pursuant to Federal legislation. Under both programs, the Federal share of the cost of any project carried out with penalty funds remains 100 percent.

Section 154 and 164 penalty funds are transferred or released from the State’s apportionment of contract authority under 23 U.S.C. 104(b)(1) and 23 U.S.C. 104(b)(2). The contract authority is transferred or released with accompanying obligation authority, which is the maximum amount the State can obligate to eligible projects. If the State elects to transfer funds to its Section 402 apportionment for alcohol-impaired driving programs, the obligation limitation is provided based on a ratio specified in 23 CFR 1270.7 and 1275.7, which comes directly from 23 U.S.C. 154(c)(6) and 23 U.S.C. 164(b)(6). The IFR makes technical corrections and improvements in these provisions of the Federal implementing regulations, but they do not result in any change in how the ratio is calculated.

C. Procedures Affecting States in Noncompliance (23 CFR 1270.8 and 1275.8)

Under the original Federal implementing regulations, the agencies intended for States to be notified of their compliance status in the advance notice of apportionment, normally issued ninety days prior to final apportionment. Noncompliant States were then granted 30 days to submit documentation showing why they were in compliance. The agencies would then issue a final determination as part of the final notification of apportionments, which normally occurs on October 1 of each year. While the agencies have strived to notify States of pending changes in their compliance status in the advance notice of apportionment whenever possible, the Federal statute requires formal compliance determinations to be based on the State’s law enacted and enforced on October 1 of each fiscal year. As a result, State compliance status may change up to that date, making this system unworkable in many cases. The IFR revises 23 CFR 1270.8 and 1275.8 to better reflect the actual practice the agencies have undertaken to give States full opportunity to present additional documentation (with some minor changes to streamline the process for States).

Each State determined to be noncompliant with 23 U.S.C. 154 or 23 U.S.C. 164 receives notice of its compliance status and the funds being reserved from apportionment as part of the final certification of apportionments required under 23 U.S.C. 104(e), which normally occurs on October 1 of each fiscal year. All States will be afforded 30 days from the date the final notice of apportionments is issued to submit additional documentation showing why they are in compliance. For the Section 164 program, this documentation may include a “general practice” certification. Previously, only newly noncompliant States were afforded 30 days to submit additional documentation demonstrating compliance.

While the agencies consider any additional documentation provided by the State, the reservation will remain in place on the State’s affected funds. However, the State must still provide the requests regarding the derivation and distribution of funds referenced in Sections A and B (within 30 and 60 days, respectively) while the documentation is reviewed to expedite the distribution of funds. If the agencies
affirm the noncompliance determination, the State will be notified of the decision and the affected funds will be processed in accordance with the requests provided by the State. If the agencies reverse the noncompliance determination, the funds will be released from reservation and restored to the State’s NHPP and STBG accounts. These procedures are intended to preserve the maximum possible flexibility for States, while ensuring that the agencies meet their statutory obligations.

D. States’ Responsibilities Regarding Compliance (23 CFR 1270.9 and 1275.9)

Under the original Federal implementing regulations, if a State enacted a newly compliant law, the State was required to submit to the NHTSA Regional Office a copy of the law along with a certification meeting the requirements of the applicable Federal regulation (23 CFR 1270.5 or 1275.5, prior to amendment by this IFR). States were required to promptly submit an amendment or supplement to their certifications if their law changed or they ceased to enforce their law.

The agencies are eliminating this certification requirement in this IFR, thereby reducing the paperwork burden on the States. In practice, few States submitted certifications, and the agencies found them to be of limited value in enforcement. Instead, this IFR adds a new section for each of the programs (23 CFR 1270.9 and 1275.9) related to States’ responsibilities regarding compliance. First, these sections make clear that it is the State’s sole responsibility to ensure compliance with the Section 154 and 164 programs. While NHTSA conducts an annual review of State laws to assess whether legislation has affected their compliance status, this does not occur until late in the fiscal year, often after State legislative sessions have ended. NHTSA cannot and does not actively monitor all pending legislation in all States. Instead, each State Highway Safety Office and State Department of Transportation should actively monitor their legislatures for potential amendments to their open container and repeat intoxicated driver laws.

Second, the agencies have added a provision indicating that States must promptly notify the appropriate NHTSA Regional Administrator in writing of any change or change in enforcement to the State’s open container or repeat intoxicated driver law, identifying the specific change(s). This replaces the requirement of a supplement or amendment to the State’s certification. To the extent appropriate, NHTSA will conduct a preliminary review of the State’s amended law and identify to the State any potential compliance issues resulting from the change. Absent early notification from the State, NHTSA may not identify a potential compliance issue until later in the fiscal year, often after the State’s legislative session has ended.

V. Notice and Comment, Effective Date, and Request for Comments

The Administrative Procedure Act authorizes agencies to dispense with certain procedures for rules when they find “good cause” to do so. The agencies must ensure that States receive instructions that are important to upcoming compliance determinations to be made on October 1, 2016, as the changes in the FAST Act are effective on that date. In light of the short time frame for implementing the FAST Act, the agencies find good cause to dispense with the notice and comment requirements and the 30-day delayed effective date requirement.

Under Section 553(b)(B), the requirements of notice and comment do not apply when the agency, for good cause, finds that those procedures are “impracticable, unnecessary, or contrary to public interest.” Because of the short time frame for implementing the FAST Act, the agencies find it impracticable to implement the new compliance criteria with notice and comment for FY 2017. However, the agencies invite public comment on all aspects of this IFR. The agencies will consider and address comments in a final rule, which the agencies commit to publishing during the first quarter of calendar year 2017 and which will be effective beginning with FY 2018.

Under Section 553(d), the agencies may make a rule effective immediately, avoiding the 30-day delayed effective date requirement for good cause. We have determined that it is in the public interest for this IFR to have an immediate effective date. The agencies are expediting this rulemaking to provide instructions that are important to upcoming compliance determinations to be made on October 1, 2016, such as those related to the new “general practice” certifications. States also need clarification for the processes related to noncompliance.

For these reasons, the agencies are issuing this rulemaking as an interim final rule that will be effective immediately. As an interim final rule, this regulation is fully in effect and binding upon its effective date. No further action by the agencies is necessary to make this rule effective. However, in order to benefit from comments that interested parties and the public may have, the agencies are requesting that comments be submitted to the docket for this notice.

Comments received in response to this notice will be considered by the agencies. The agencies will then issue a final rule, including any appropriate amendments based on those comments. The notice for that final rule will respond to substantive comments received.

VI. Regulatory Analyses and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review), E.O. 13563, and DOT Regulatory Policies and Procedures

The agencies have considered the impact of this rulemaking action under Executive Order 12866, Executive Order 13563, and the Department of Transportation’s regulatory policies and procedures. This rulemaking document was not reviewed under Executive Order 12866 or Executive Order 13563. This rule will only affect the compliance status of a very small handful of States and will therefore affect far less than $100 million annually. Whether a State chooses to enact a compliant law or make a certification is dependent on many variables, and cannot be linked with specificity to the issuance of this rule. States choose whether to enact and enforce compliant laws, thereby complying with the programs. If a State chooses not to enact and enforce a conforming law, its funds are conditioned, but not withheld. Accordingly, the total amount of funds provided to each State does not change. The costs to States associated with this rule are minimal (e.g., passing and enforcing alcohol impaired driving laws) and are expected to be offset by resulting highway safety benefits. Therefore, this rulemaking has been determined to be not “significant” under the Department of Transportation’s regulatory policies and procedures and the policies of the Office of Management and Budget.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 (5 U.S.C. 601 et seq.) requires agencies to evaluate the potential effects of their proposed and final rules on small businesses, small organizations, and small governmental jurisdictions. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities.
The Small Business Regulatory Enforcement Fairness Act (SBREFA) amended the RFA to require Federal agencies to provide a statement of the factual basis for certifying that an action would not have a significant economic impact on a substantial number of small entities.

This IFR is a rulemaking that will update the Section 154 and Section 164 regulations based on recent Federal legislation. The requirements of these programs only affect State governments, which are not considered to be small entities as that term is defined by the RFA. Therefore, we certify that this action will not have a significant impact on a substantial number of small entities and find that the preparation of a Regulatory Flexibility Analysis is unnecessary.

C. Executive Order 13132 (Federalism)

Executive Order 13132 on “Federalism” requires the agencies to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” 64 FR 43255 (August 10, 1999). “Policies that have federalism implications” are defined in the Executive Order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” Under Executive Order 13132, an agency may not issue a regulation with Federalism implications that imposes substantial direct compliance costs and that is not required by statute unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments or the agency consults with State and local governments in the process of developing the proposed regulation. An agency also may not issue a regulation with Federalism implications that preempts a State law unless the Federal government provides the funds necessary to pay the direct compliance costs and that is not required by statute unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments or the agency consults with State and local governments in the process of developing the proposed regulation. An agency also may not issue a regulation with Federalism implications that preempts a State law without consulting with State and local officials.

The agencies have analyzed this rulemaking action in accordance with the principles and criteria set forth in Executive Order 13132, and have determined that this IFR would not have sufficient Federalism implications as defined in the order to warrant formal consultation with State and local officials or the preparation of a federalism summary impact statement. However, the agencies continue to engage with State representatives regarding general implementation of the FAST Act, including these programs, and expects to continue these informal dialogues.

D. Executive Order 12988 (Civil Justice Reform)

Pursuant to Executive Order 12988 (61 FR 4729 (February 7, 1996)), “Civil Justice Reform,” the agencies have considered whether this rule would have any retroactive effect. We conclude that it would not have any retroactive or preemptive effect, and judicial review of it may be obtained pursuant to 5 U.S.C. 702. That section does not require that a petition for reconsideration be filed prior to seeking judicial review. This action meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, et seq.), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. This rulemaking would not establish any new information collection requirements.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in expenditures by State, local or tribal governments, in the aggregate, or by the private sector, of more than $100 million annually (adjusted annually for inflation with base year of 1995). This IFR would not meet the definition of a Federal mandate because the resulting annual State expenditures to comply with the programs would not exceed the minimum threshold.

G. National Environmental Policy Act

NHTSA has considered the impacts of this rulemaking action for the purposes of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4347). The agency has determined that this IFR would not have a significant impact on the quality of the human environment. FHWA has analyzed this action for the purposes of NEPA and has determined that it would not have any effect on the quality of the environment and meets the criteria for the categorical exclusion at 23 CFR 771.117(c)(20).

H. Executive Order 13211

Executive Order 13211 (66 FR 28355, May 18, 2001) applies to any rulemaking that: (1) Is determined to be economically significant as defined under Executive Order 12866, and is likely to have a significantly adverse effect on the supply of, distribution of, or use of energy; or (2) that is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. This rulemaking is not likely to have a significantly adverse effect on the supply of, distribution of, or use of energy. This rulemaking has not been designated as a significant energy action. Accordingly, this rulemaking is not subject to Executive Order 13211.

I. Executive Order 13175 (Consultation and Coordination With Indian Tribes)

The agencies have analyzed this IFR under Executive Order 13175, and have determined that today’s action would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal law. Therefore, a tribal summary impact statement is not required.

J. Plain Language

Executive Order 12866 and the President’s memorandum of June 1, 1998, require each agency to write all rules in plain language. Application of the principles of plain language includes consideration of the following questions:

- Have we organized the material to suit the public’s needs?
- Are the requirements in the rule clearly stated?
- Does the rule contain technical language or jargon that isn’t clear?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the rule easier to understand?
- Would more (but shorter) sections be better?
- Could we improve clarity by adding tables, lists, or diagrams?
- What else could we do to make the rule easier to understand?

If you have any responses to these questions, please include them in your comments on this IFR.

K. Regulatory Identifier Number (RIN)

The Department of Transportation assigns a regulation identifier number (RIN) to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified...
Agenda in or about April and October of each year. You may use the RIN contained in the heading at the beginning of this document to find this action in the Unified Agenda.

L. Privacy Act

Please note that anyone is able to search the electronic form of all comments received into any of our docket by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the Federal Register published on April 11, 2000 (65 FR 19477) or you may visit http://dms.dot.gov.

VII. Public Participation

How do I prepare and submit comments?

Your comments must be written and in English. To ensure that your comments are correctly filed in the Docket, please include the docket number of this document in your comments.

Your comments must not be more than 15 pages long. We established this limit to encourage you to write your primary comments in a concise fashion. However, you may attach necessary additional documents to your comments. There is no limit on the length of the attachments.

Comments may also be submitted to the docket electronically by logging onto the Docket Management System Web site at http://www.regulations.gov. Follow the online instructions for submitting comments.

Please note that pursuant to the Data Quality Act, in order for substantive data to be relied upon and used by the agencies, it must meet the information quality standards set forth in the OMB and DOT Data Quality Act guidelines. Accordingly, we encourage you to consult the guidelines in preparing your comments. OMB’s guidelines may be accessed at http://www.whitehouse.gov/omb/fedreg/reproducible.html.

How can I be sure that my comments were received?

If you wish Docket Management to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelope containing your comments. Upon receiving your comments, Docket Management will return the postcard by mail.

How do I submit confidential business information?

If you wish to submit any information under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Chief Counsel, NHTSA, at the address given above under FOR FURTHER INFORMATION CONTACT. In addition, you should submit a copy, from which you have deleted the claimed confidential business information, to the docket at the address given above under ADDRESSES. When you send a comment containing information claimed to be confidential business information, you should include a cover letter setting forth the information specified in our confidential business information regulation. (49 CFR part 512.)

Will the agencies consider late comments?

We will consider all comments received before the close of business on the comment closing date indicated above under DATES. To the extent possible, we will also consider comments that the docket receives after that date. If the docket receives a comment too late for us to consider in developing a final rule (assuming that one is issued), we will consider that comment as an informal suggestion for future rulemaking action.

How can I read the comments submitted by other people?

You may read the comments received by the docket at the address given above under ADDRESSES. The hours of the docket are indicated above in the same location. You may also see the comments on the Internet. To read the comments on the Internet, go to http://www.regulations.gov. Follow the online instructions for accessing the docket.

Please note that even after the comment closing date, we will continue to file relevant information in the docket as it becomes available. Further, some people may submit late comments. Accordingly, we recommend that you periodically check the Docket for new material. You can arrange with the docket to be notified when others file comments in the docket. See http://www.regulations.gov for more information.

§ 1270.1 Scope.

This part prescribes the requirements necessary to implement Section 154 of Title 23 of the United States Code which encourages States to enact and enforce open container laws.

§ 1270.2 Purpose.

The purpose of this part is to specify the steps that States must take to avoid the reservation and transfer of Federal-aid highway funds for noncompliance with 23 U.S.C. 154.

§ 1270.3 Definitions.

As used in this part:
(a) Alcoholic beverage means:
(1) Beer, ale, porter, stout, and other similar fermented beverages (including sake or similar products) of any name or description containing one-half of 1 percent or more of alcohol by volume, brewed or produced from malt, wholly or in part, or from any substitute therefor;
(2) Wine of not less than one-half of 1 per centum of alcohol by volume; or
(3) Distilled spirits which is that substance known as ethyl alcohol, ethanoll or spirits of wine in any form (including all dilutions and mixtures thereof from whatever source or by whatever process produced).
(b) FHWA means the Federal Highway Administration.
(c) Motor vehicle means a vehicle driven or drawn by mechanical power and manufactured primarily for use on public highways, but does not include a vehicle operated solely on a rail or rail system.
(d) NHTSA means the National Highway Traffic Safety Administration.
(e) Open alcoholic beverage container means any bottle, can, or other receptacle that:
(1) Contains any amount of alcoholic beverage; and
(2) Is open or has a broken seal or the contents of which are partially removed (regardless of whether it has been closed or resealed).

(f) Open container law means a State law or combination of laws that meets the minimum requirements specified in §1270.4.

(g) Passenger area means the area designed to seat the driver and passengers while the motor vehicle is in operation and any area that is readily accessible to the driver or a passenger while in their seating positions, including the glove compartment.

(h) Public highway or right-of-way of a public highway means the width between and immediately adjacent to the boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel; inclusion of the roadway and shoulders is sufficient.

(i) State means any of the 50 States, the District of Columbia, or the Commonwealth of Puerto Rico.

§1270.4 Compliance criteria.

(a) To avoid the reservation of funds specified in §1270.6, a State must enact and enforce an open container law that prohibits the possession of any open alcoholic beverage container, and the consumption of any alcoholic beverage, in the passenger area of any motor vehicle (including possession or consumption by the driver of the vehicle) located on a public highway, or the right-of-way of a public highway, in the State.

(b) The law must apply to:
(1) The possession of any open alcoholic beverage container and the consumption of any alcoholic beverage; (2) The passenger area of any motor vehicle; (3) All alcoholic beverages; (4) All occupants of a motor vehicle; and (5) All motor vehicles located on a public highway or the right-of-way of a public highway.

(c) The law must provide for primary enforcement.

(d) Exceptions. (1) If a State has in effect a law that makes unlawful the possession of any open alcoholic beverage container and the consumption of any alcoholic beverage in the passenger area of any motor vehicle, but permits the possession of an open alcoholic beverage container in a locked container (such as a locked glove compartment), or, in a motor vehicle that is not equipped with a trunk, either behind the last upright seat or in an area not normally occupied by the driver or a passenger, the State will be deemed to have in effect a law that applies to the passenger area of any vehicle, as provided in paragraph (b)(2) of this section.

(2) If a State has in effect a law that makes unlawful the possession of any open alcoholic beverage container and the consumption of any alcoholic beverage by the driver (but not by a passenger) in the passenger area of a motor vehicle designed, maintained, or used primarily for the transportation of persons for compensation, or in the living quarters of a house coach or house trailer, the State shall be deemed to have in effect a law that applies to all occupants of a motor vehicle with respect to such motor vehicles, as provided in paragraph (b)(4) of this section.

§1270.5 [Reserved].

§1270.6 Reservation of funds.

(a) On October 1 of each fiscal year, if a State has not enacted or is not enforcing a law that complies with §1270.4, FHWA will reserve an amount equal to 2.5 percent of the funds apportioned to the State for that fiscal year under each of 23 U.S.C. 104(b)(1) and (b)(2).

(b) The reservation of funds will be made based on proportionate amounts from each of the apportionments under 23 U.S.C. 104(b)(1) and (b)(2). The State’s Department of Transportation will have 30 days from the date the funds are reserved under this section to notify FHWA, through the appropriate Division Administrator, if it would like to change the distribution of the amounts reserved between 23 U.S.C. 104(b)(1) and (b)(2).

§1270.7 Use of reserved funds.

(a) Not later than 60 days after the funds are reserved under §1270.6, the Governor’s Representative for Highway Safety and the Chief Executive Officer of the State’s Department of Transportation for each State must jointly identify, in writing to the appropriate NHTSA Regional Administrator and FHWA Division Administrator, how the funds will be programmed between alcohol-impaired driving programs under paragraph (c) of this section and highway safety improvement program activities under paragraph (d) of this section. Funds will remain reserved until this notification is provided by the State.

(b) As soon as practicable after NHTSA and FHWA receive the notification described in paragraph (a) of this section, the Secretary will:
(1) Transfer the reserved funds identified by the State for alcohol-impaired driving programs under paragraph (c) of this section to the apportionment of the State under 23 U.S.C. 402; and
(2) Release the reserved funds identified by the State for highway safety improvement program activities under paragraph (d) of this section to the State Department of Transportation.

(c) Any funds transferred under paragraph (b)(1) of this section shall be—
(1) Used for approved projects for alcohol-impaired driving countermeasures; or
(2) Directed to State and local law enforcement agencies for enforcement of laws prohibiting driving while intoxicated or driving under the influence and other related laws (including regulations), including the purchase of equipment, the training of officers, and the use of additional personnel for specific alcohol-impaired driving countermeasures, dedicated to enforcement of the laws (including regulations).

(d) Any funds released under paragraph (b)(2) of this section shall be used for highway safety improvement program activities eligible under 23 U.S.C. 148.

(e) Once the funds have been transferred or released under paragraph (b) of this section, the State may not revise the notification described in paragraph (a) of this section identifying how the funds will be programmed between alcohol-impaired driving programs and highway safety improvement program activities.

(f) The Federal share of the cost of any project carried out with the funds transferred or released under paragraph (b) of this section is 100 percent.

(g)(1) If any funds are transferred under paragraph (b)(1) of this section to the apportionment of a State under Section 402 for a fiscal year, the amount of obligation authority determined under paragraph (g)(2) of this section shall be transferred for carrying out projects described in paragraph (c) of this section.

(2) The obligation authority referred to in paragraph (g)(1) of this section shall be transferred from the obligation authority distributed for the fiscal year to the State for Federal-aid highways and highway safety construction programs, and the amount shall be determined by multiplying:
(i) The amount of funds transferred under paragraph (b)(1) of this section to
§ 1270.7 Determining noncompliance.

(a) Each fiscal year, each State determined to be in noncompliance with 23 U.S.C. 154 and this part will be advised of the funds reserved from apportionment under § 1270.6 in the notice of apportionments required under 23 U.S.C. 104(e), which normally occurs on October 1.

(b) Each State whose funds are reserved under § 1270.6 will be afforded 30 days from the date of issuance of the notice of apportionments described in paragraph (a) of this section to submit documentation showing why it is in compliance. Documentation must be submitted to the appropriate NHTSA Regional Administrator. If such documentation is provided, a reservation will remain in place on the State’s affected funds while the agencies consider the information. If the agencies affirm the noncompliance determination, the State will be notified of the decision and the affected funds will be processed in accordance with the requests regarding the derivation and distribution of funds provided by the State as required by §§ 1270.6(b) and 1270.7(a).

§ 1270.9 States’ responsibilities regarding compliance.

(a) States are responsible for ensuring compliance with 23 U.S.C. 154 and this part.

(b) A State that has been determined to be in compliance with the requirements of 23 U.S.C. 154 and this part must promptly notify the appropriate NHTSA Regional Administrator in writing of any change or change in enforcement of the State’s open container law, identifying the specific change(s).

2. Revise part 1275 to read as follows:

PART 1275—REPEAT INTOXICATED DRIVER LAWS

Soc. 1275.1 Scope.
1275.2 Purpose.
1275.3 Definitions.
1275.4 Compliance criteria.
1275.5 “General practice” certification option.
1275.6 Reservation of funds.
1275.7 Use of reserved funds.
1275.8 Procedures affecting States in noncompliance.
1275.9 States’ responsibilities regarding compliance.

§ 1275.1 Scope.

This part prescribes the requirements necessary to implement Section 164 of Title 23, United States Code, which encourages States to enact and enforce repeat intoxicated driver laws.

§ 1275.2 Purpose.

The purpose of this part is to specify the steps that States must take to avoid the reservation and transfer of Federal-aid highway funds for noncompliance with 23 U.S.C. 164.

§ 1275.3 Definitions.

As used in this part: (a) 24–7 sobriety program has the meaning given the term in § 1300.23(b) of this title. (b) Alcohol concentration means grams of alcohol per 100 milliliters of blood or grams of alcohol per 210 liters of breath. (c) Driving while intoxicated means driving or being in actual physical control of a motor vehicle while having an alcohol concentration above the permitted limit as established by each State, or an equivalent non-BAC intoxicated driving offense. (d) Driving under the influence has the same meaning as “driving while intoxicated.” (e) FHWA means the Federal Highway Administration. (f) Ignition interlock system means a State-certified system designed to prevent drivers from starting their car when their breath alcohol concentration is at or above a preset level. (g) Imprisonment means confinement in a jail, minimum security facility, community corrections facility, house arrest with electronic monitoring, inpatient rehabilitation or treatment center, or other facility, provided the individual under confinement is in fact being detained. (h) Mandatory sentence means a sentence that cannot be waived, suspended, or otherwise reduced by the State.

(i) Motor vehicle means a vehicle driven or drawn by mechanical power and manufactured primarily for use on public highways, but does not include a vehicle operated solely on a rail line or a commercial vehicle. (j) NHTSA means the National Highway Traffic Safety Administration. (k) Repeat intoxicated driver means a person who has been convicted of driving while intoxicated or driving under the influence of alcohol more than once in any five-year period. (l) Repeat intoxicated driver law means a State law or combination of laws or programs that impose the minimum penalties specified in § 1275.4 for all repeat intoxicated drivers.

(m) State means any of the 50 States, the District of Columbia or the Commonwealth of Puerto Rico.

§ 1275.4 Compliance criteria.

(a) To avoid the reservation of funds specified in § 1275.6, a State must enact and enforce a repeat intoxicated driver law that establishes, as a minimum penalty, that all repeat intoxicated drivers: (1) Receive, for a period of not less than one year, one or more of the following penalties: (i) A suspension of all driving privileges; (ii) A restriction on driving privileges that limits the individual to operating only motor vehicles with an ignition interlock device installed, unless a special exception described in paragraph (b) of this section applies; or (iii) A restriction on driving privileges that limits the individual to operating motor vehicles only if participating in, and complying with, a 24–7 sobriety program; (2) Receive an assessment of their degree of alcohol abuse, and treatment as appropriate; and (3) Except as provided in § 1275.5, receive a mandatory sentence of— (i) Not less than five days (120 hours) of imprisonment or 30 days (240 hours) of community service for a second offense; and (ii) Not less than ten days (240 hours) of imprisonment or 60 days (480 hours) of community service for a third or subsequent offense.

(b) Special exceptions. As used in paragraph (a)(1)(ii) of this section, special exception means an exception under a State alcohol-ignition interlock law for the following circumstances only: (1) The individual is required to operate an employer’s motor vehicle in the course and scope of employment and the business entity that owns the

Mandatory sentence means a sentence that cannot be waived, suspended, or otherwise reduced by the State.
vehicle is not owned or controlled by the individual; or

(2) The individual is certified by a medical doctor as being unable to provide a deep lung breath sample for analysis by an ignition interlock device.

§ 1275.5 “General practice” certification option.

(a) Notwithstanding § 1275.4(a)(3), a State that otherwise meets the requirements of § 1275.4 may comply with § 1275.4(b)(1) and (b)(2) based on the State’s “general practice” for incarceration. A State electing this option shall—

(1) If the State law does not comply with the requirements of § 1275.4(a)(3)(i), submit the following certification signed by the Governor’s Representative for Highway Safety:

I, [Name], Governor’s Representative for Highway Safety, certify that, in [State name], at least 75 percent of repeat intoxicated drivers receive a mandatory sentence of imprisonment for a second offense, as those terms are defined in 23 CFR 1275.3. This certification is based on data from the period of twelve consecutive months of the calendar year immediately preceding the date of this certification. I sign this certification based on personal knowledge and other appropriate inquiry. [Signature of Governor’s Representative for Highway Safety] [Date of signature]

(2) If the State law does not comply with the requirements of § 1275.4(a)(3)(ii), submit the following certification signed by the Governor’s Representative for Highway Safety:

I, [Name], Governor’s Representative for Highway Safety, certify that, in [State name], at least 75 percent of repeat intoxicated drivers receive a mandatory sentence of not less than ten days (240 hours) of imprisonment for a third or subsequent offense, as those terms are defined in 23 CFR 1275.3. This certification is based on data from the period of twelve consecutive months of the calendar year immediately preceding the date of this certification. I sign this certification based on personal knowledge and other appropriate inquiry. [Signature of Governor’s Representative for Highway Safety] [Date of signature]

(b) A State electing the option under this section must submit a new certification to the appropriate NHTSA Regional Administrator by not later than October 1 of each fiscal year to avoid the reservation of funds specified in § 1275.6. The State is encouraged to submit the certification by August 15 to avoid any delay in release of funds on October 1 of that calendar year while NHTSA evaluates its certification.

§ 1275.6 Reservation of funds.

(a) On October 1 of each fiscal year, if a State has not enacted or is not enforcing a law that complies with § 1275.4, FHWA will reserve an amount equal to 2.5 percent of the funds apportioned to the State for that fiscal year under each of 23 U.S.C. 104(b)(1) and (b)(2).

(b) The reservation of funds will be made based on proportionate amounts from each of the apportionments under 23 U.S.C. 104(b)(1) and (b)(2). The State’s Department of Transportation will have 30 days from the date the funds are reserved under this section to notify FHWA, through the appropriate Division Administrator, if it would like to change the distribution of the amounts reserved between 23 U.S.C. 104(b)(1) and (b)(2).

§ 1275.7 Use of reserved funds.

(a) Not later than 60 days after the funds are reserved under § 1275.6, the Governor’s Representative for Highway Safety and the Chief Executive Officer of the State’s Department of Transportation for each State must jointly identify. In writing to the appropriate NHTSA Regional Administrator and FHWA Division Administrator, how the funds will be programmed between alcohol-impaired driving programs under paragraph (c) of this section and highway safety improvement program activities under paragraph (d) of this section. Funds will remain reserved until this notification is provided by the State.

(b) As soon as practicable after NHTSA and FHWA receive the notification described in paragraph (a) of this section, the Secretary will:

(1) Transfer the reserved funds identified by the State for alcohol-impaired driving programs under paragraph (c) of this section to the apportionment of the State under 23 U.S.C. 402; and

(2) Release the reserved funds identified by the State for highway safety improvement program activities under paragraph (d) of this section. Funds will remain reserved until this notification is provided by the State.

(g) If any funds are transferred under paragraph (b)(1) of this section to the apportionment of a State under Section 402 for a fiscal year, the amount of obligation authority determined under paragraph (g)(2) of this section shall be transferred for carrying out projects described in paragraph (c) of this section.

(2) The obligation authority referred to in paragraph (g)(1) of this section shall be transferred from the obligation authority distributed for the fiscal year to the State for Federal-aid highways and highway safety construction programs, and the amount shall be determined by multiplying:

(i) The amount of funds transferred under paragraph (b)(1) of this section to the apportionment of the State under Section 402 for the fiscal year by (ii) The ratio that:

(A) The amount of obligation authority distributed for the fiscal year to the State for Federal-aid highways and highway safety construction programs; bears to

(B) The total of the sums apportioned to the State for Federal-aid highways and highway safety construction programs (excluding sums not subject to any obligation limitation) for the fiscal year.

(b) Notwithstanding any other provision of law, no limitation on the total obligations for highway safety programs under Section 402 shall apply to funds transferred under paragraph (b)(1) of this section.

§ 1275.8 Procedures affecting States in noncompliance.

(a) Each fiscal year, each State determined to be in noncompliance with 23 U.S.C. 164 and this part will be advised of the funds reserved from apportionment under § 1275.6 in the notice of apportionments required...
under 23 U.S.C. 104(e), which normally occurs on October 1.

(b) Each State whose funds are reserved under § 1275.6 will be afforded 30 days from the date of issuance of the notice of apportionments described in paragraph (a) of this section to submit documentation showing why it is in compliance (which may include a “general practice” certification under §1275.5). Documentation must be submitted to the appropriate NHTSA Regional Administrator. If such documentation is provided, a reservation will remain in place on the State’s affected funds while the agencies consider the information. If the agencies affirm the noncompliance determination, the State will be notified of the decision and the affected funds will be processed in accordance with the requests regarding the derivation and distribution of funds provided by the State as required by §§1275.6(b) and 1275.7(a).

§ 1275.9 State responsibilities regarding compliance.

(a) States are responsible for ensuring compliance with 23 U.S.C. 164 and this part.

(b) A State that has been determined to be in compliance with the requirements of 23 U.S.C. 164 and this part must promptly notify the appropriate NHTSA Regional Administrator in writing of any change or change in enforcement of the State’s repeat intoxicated driver law, identifying the specific change(s).

Dated: September 27, 2016, under authority delegated in 49 CFR 1.95.
Mark R. Rosekind,
Administrator, National Highway Traffic Safety Administration.

Dated: September 27, 2016, under authority delegated in 49 CFR 1.95.
Gregory G. Nadeau,
Administrator, Federal Highway Administration.

The regulations in 33 CFR 117.801 Table 1, Sector Ohio Valley, No. 67 are effective from 7 p.m. until 9 p.m., on October 2, 2016. Entry into, transiting, or anchoring in the safety zone is prohibited to all vessels not registered with the sponsor as participants or official patrol vessels, unless specifically authorized by the Captain of the Port (COTP) Pittsburgh or a designated representative.

Dated: The regulations in 33 CFR 165.801 Table 1, Sector Ohio Valley, No. 67 is effective from 7 p.m. until 9 p.m., on October 2, 2016.

For further information contact: If you have questions about this notice of enforcement, call or email MST1 Jennifer Haggins, Marine Safety Unit Pittsburgh, U.S. Coast Guard; telephone 412–221–0807, email Jennifer.L.Haggins@uscg.mil.

Supplementary information: The Coast Guard will enforce the safety zone for the annual Pittsburgh Pirates Fireworks on the Allegheny River, from mile 0.0 to 0.25, Ohio River mile 0.0–0.1, Monongahela River 0.0–0.1, to protect vessels transiting the area and event spectators from the hazards associated with the Pittsburgh Steelers barge-based fireworks display. During the enforcement period, entry into, transiting, or anchoring in the safety zone is prohibited to all vessels not registered with the sponsor as participants or official patrol vessels, unless specifically authorized by the Captain of the Port (COTP) Pittsburgh or a designated representative.

Dated: The regulations in 33 CFR 165.801 Table 1, Sector Ohio Valley, No. 67 is effective from 7 p.m. until 9 p.m., on October 2, 2016.

Supplementary information: The Coast Guard will enforce the safety zone for the annual Pittsburgh Pirates Fireworks listed in 33 CFR 165.801 Table 1, Sector Ohio Valley, No. 67 from 7 p.m. to 9 p.m. on October 2, 2016. Entry into the safety zone is prohibited unless authorized by the COTP or a designated representative. Persons or vessels

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–0891]

Drawbridge Operation Regulation; Newtown Creek, Brooklyn and Queens, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Pulaski Bridge across the Newtown Creek, mile 0.6, between Brooklyn and Queens, New York. This deviation is necessary to allow the bridge owner to perform span locks adjustment at the bridge.

DATES: This deviation is effective from 12:01 a.m. on October 3, 2016 to 5 a.m. on October 14, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–0891] is available at http://www.regulations.gov. Type the docket number in the “SEARCH” box and click “SEARCH”. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Judy Leung-Yee, Project Officer, First Coast Guard District, telephone (212) 514–4330, email judy.k.leung-ye@uscg.mil.

SUPPLEMENTARY INFORMATION: The Pulaski Bridge, mile 0.6, across the Newtown Creek, has a vertical clearance in the closed position of 39 feet at mean high water and 43 feet at mean low water. The existing bridge operating regulations are found at 33 CFR 117.801(g)(1). The waterway is transited by commercial barge traffic of various sizes. The bridge owner, New York City DOT, requested a temporary deviation from the normal operating schedule to perform span locks adjustment at the bridge. Under this temporary deviation, the Pulaski Bridge shall remain in the closed position from October 3, 2016 to October 14, 2016 between 12:01 a.m. and 5 a.m.

Vessels able to pass under the bridge in the closed position may do so at anytime. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass.

The Coast Guard will inform the users of the waterways through our Local Notice and Broadcast to Mariners of the change in operating schedule for the bridge so that vessel operations can arrange their transits to minimize any impact caused by the temporary deviation. The Coast Guard notified known companies of the commercial oil and barge vessels in the area and they have no objections to the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: September 27, 2016.

C.J. Bisignano,
Supervisory Bridge Management Specialist, First Coast Guard District.

“infrastructure SIP submission.” MDEQ certified that the Mississippi SIP contains provisions that ensure the 2010 1-hour SO2 NAAQS is implemented, enforced, and maintained in Mississippi. EPA has determined that Mississippi’s infrastructure SIP submission, provided to EPA on June 20, 2013, satisfies certain required infrastructure elements for the 2010 1-hour SO2 NAAQS.

DATES: This rule will be effective October 31, 2016.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2015–0155. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the FOR FURTHER INFORMATION CONTACT section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Michele Notarianni, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Ms. Notarianni can be reached via electronic mail at notarianni.michele@epa.gov or via telephone at (404) 562–9031.

SUPPLEMENTARY INFORMATION:

I. Background and Overview

On June 2, 2010 (75 FR 35520, June 22, 2010), EPA promulgated a revised primary SO2 NAAQS to an hourly standard of 75 parts per billion (ppb) based on a 3-year average of the annual 99th percentile of 1-hour daily maximum concentrations. Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the applicable requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as EPA may prescribe. Section 110(a)(2) requires states to address basic SIP elements such as requirements for monitoring, basic program requirements and legal authority that are designed to assure attainment and maintenance of the NAAQS. States were required to submit such SIPs for the 2010 1-hour SO2 NAAQS to EPA no later than June 2, 2013.1

EPA is acting upon the SIP submission from Mississippi that addresses the infrastructure requirements of CAA sections 110(a)(1) and 110(a)(2) for the 2010 1-hour SO2 NAAQS. In a proposed rulemaking published on February 11, 2016, EPA proposed to approve portions of Mississippi’s June 20, 2013, 2010 1-hour SO2 NAAQS infrastructure SIP submission. See 81 FR 7259. The details of Mississippi’s submission and the rationale for EPA’s actions are explained in the proposed rulemaking. Comments on the proposed rulemaking were due on or before March 14, 2016. EPA received adverse comments on the proposed action.

II. Response to Comments

EPA received one set of comments on the February 11, 2016, proposed rulemaking to approve portions of Mississippi’s 2010 1-hour SO2 NAAQS infrastructure SIP submission intended to meet the CAA requirements for the 2010 1-hour SO2 NAAQS. A summary of the comments and EPA’s responses are provided below.2 A full set of these comments is provided in the docket for this final rulemaking action.

A. Comments on Infrastructure SIP Requirements for Enforceable Emission Limits

1. The Plain Language of the CAA

Comment 1: The Commenter contends that the plain language of section 110(a)(2)(A) of the CAA requires the inclusion of enforceable emission limits in an infrastructure SIP to prevent NAAQS exceedances in areas not designated nonattainment. In support, the Commenter quotes the language in section 110(a)(1) that requires states to adopt a plan for implementation, maintenance, and enforcement of the NAAQS and the language in section 110(a)(2)(A) that requires SIPs to include enforceable emissions limitations as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of the CAA.

The Commenter then states that applicable requirements of the CAA include requirements for the attainment and maintenance of the NAAQS, and that CAA section 110(a)(2)(A) requires infrastructure SIPs to include enforceable emission limits to prevent exceedances of the NAAQS. The Commenter claims that Mississippi’s SIP submission does not meet this asserted requirement. Thus, the Commenter asserts that EPA must disapprove Mississippi’s SO2 infrastructure SIP submission because it fails to include enforceable emission limitations necessary to ensure attainment and maintenance of the NAAQS as required by CAA section 110(a)(2)(A). The Commenter then contends that the Mississippi 2010 1-hour SO2 infrastructure SIP submission fails to comport with CAA requirements for SIPs to establish enforceable emission limits that are adequate to prohibit NAAQS exceedances in areas not designated nonattainment.

Response 1: EPA disagrees that section 110 must be interpreted in the manner suggested by the Commenter in the context of infrastructure SIP submissions. Section 110 is only one provision that is part of the complicated structure governing implementation of the NAAQS program under the CAA, as amended in 1990, and it must be interpreted in the context of not only that structure, but also of the historical evolution of that structure. In light of the revisions to section 110 since 1970 and the later-promulgated and more specific SIP planning requirements of the CAA, EPA interprets the requirement in section 110(a)(1) that the plan provide for “implementation, maintenance and enforcement” in conjunction with the requirements in section 110(a)(2)(A) to mean that the infrastructure SIP must contain enforceable emission limits that will aid in attaining and/or maintaining the NAAQS and the state demonstrate that it has the necessary tools to implement and enforce a NAAQS, such as adequate state personnel and an enforcement program.

With regard to the requirement for emission limitations in section 110(a)(2)(A), EPA has interpreted this to mean, for purposes of infrastructure SIP submissions, that the state may rely on
measures already in place to address the pollutant at issue or any new control measures that the state may elect to impose as part of such SIP submission. As EPA stated in “Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and 110(a)(2),” dated September 13, 2013, [Infrastructure SIP Guidance], “[t]he conceptual purpose of an infrastructure SIP submission is to ensure that the air agency’s SIP contains the necessary structural requirements for the new or revised NAAQS, whether by establishing that the SIP already contains the necessary provisions, by making a substantive SIP revision to update the SIP, or both. Overall, the infrastructure SIP submission process provides an opportunity . . . to review the basic structural requirements of the air agency’s air quality management program in light of each new or revised NAAQS.” Infrastructure SIP Guidance at pp. 1–2. Mississippi appropriately demonstrated that its SIP has SO₂ emissions limitations and the “structural requirements” to implement the 2010 1-hour SO₂ NAAQS in its infrastructure SIP submission.

The Commenter makes general allegations that Mississippi does not have sufficient protective measures to prevent SO₂ NAAQS exceedances. EPA addressed the adequacy of Mississippi’s infrastructure SIP for 110(a)(2)(A) purposes in the proposed rule and explained why the SIP includes enforceable emission limitations and other control measures that aid in maintaining the 2010 1-hour SO₂ NAAQS throughout the State. These include State regulations which collectively establish enforceable emissions limitations and other control measures, means or techniques for activities that contribute to SO₂ concentrations in the ambient air, and provide authority for MDEQ to establish such limits and measures as well as schedules for compliance through SIP- approved permits to meet the applicable requirements of the CAA. See 81 FR 7259. As discussed in this rulemaking, EPA concludes adequately address section 110(a)(2)(A) to aid in attaining and/or maintaining the 2010 1-hour SO₂ NAAQS and finds Mississippi demonstrated that it has the necessary tools to implement and enforce the 2010 1-hour SO₂ NAAQS.

2. The Legislative History of the CAA

Comment 2: The Commenter cites two excerpts from the legislative history of the 1970 CAA and claims that the “legislative history of infrastructure SIPs provides that states must include enforceable emission limits in their infrastructure SIPs sufficient to ensure the implementation, maintenance, and attainment of each NAAQS in all areas of the State.”

Response 2: As provided in the previous response, the CAA, as enacted in 1970, including its legislative history, cannot be interpreted in isolation from the later amendments that refined that structure and deleted relevant language from section 110 concerning attainment. In any event, the two excerpts of legislative history the Commenter cites merely provide that states should include enforceable emission limits in their SIPs and they do not mention or otherwise address whether states are required to impose additional emission limitations or control measures as part of the infrastructure SIP submission, as opposed to requirements for other types of SIP submissions such as attainment plans required under section 110(a)(2)(B). As provided in Response 1, the proposed rule explains why the SIP includes sufficient enforceable emissions limitations for purposes of the infrastructure SIP submission.

3. Case Law

Comment 3: The Commenter also discusses several court decisions concerning the CAA, which the Commenter claims support its contention that courts have been clear that section 110(a)(2)(A) requires enforceable emissions limits in infrastructure SIP submissions to prevent violations of the NAAQS. The Commenter first cites to language in Train v. NRDC, 421 U.S. 60, 78 (1975), addressing the requirement for “emission limitations” and stating that emission limitations “are the specific rules to which operators of pollution sources are subject, and which if enforced should result in ambient air which meets the national standards.” The Commenter also cites to Pennsylvania Dept. of Envtl. Resources v. EPA, 932 F.2d 269, 272 (3d Cir. 1991) for the proposition that the CAA directs EPA to withhold approval of a SIP where it does not ensure maintenance of the NAAQS, and to Mission Industrial, Inc. v. EPA, 547 F.2d 123, 129 (1st Cir. 1976), which quoted section 110(a)(2)(B) of the CAA of 1970. The Commenter contends that the 1990 Amendments do not alter how courts have interpreted the requirements of section 110, quoting Alaska Dept. of Envtl. Conservation v. EPA, 540 U.S. 461, 470 (2004) which in turn quoted section 110(a)(2)(A) of the CAA and also stated that “SIPs must include certain measures Congress specifically specified in the NAAQS. The Commenter also quotes several additional opinions in this vein.

Mont. Sulphur & Chem. Co. v. EPA, 666 F.3d 1174, 1180 (9th Cir. 2012) (“[t]he Clean Air Act directs states to develop implementation plans—SIPs—that ‘assure’ attainment and maintenance of [NAAQS] through enforceable emissions limitations”); Mich. Dept. of Envtl. Quality v. Browner, 230 F.3d 181 (6th Cir. 2000) (“EPA’s deference to a state is conditioned on the state’s submission of a plan ‘which satisfies the standards of § 110(a)(2)’ and which includes emission limitations that result in compliance with the NAAQS”; and Hall v. EPA 273 F.3d 1146 (9th Cir. 2001) for the proposition that EPA may not approve a SIP revision that does not demonstrate how the rules would not interfere with attainment and maintenance of the NAAQS.

Response 3: None of the cases the Commenter cites support the Commenter’s contention that it is clear that section 110(a)(2)(A) requires infrastructure SIP submissions to include detailed plans providing for attainment and maintenance of the NAAQS in all areas of the state, nor do they shed light on how EPA may reasonably interpret section 110(a)(2)(A). With the exception of Train, none of the cases the Commenter cites specifically concerned the interpretation of CAA section 110(a)(2)(A) (or section 110(a)(2)(B) of the pre-1990 Act). Rather, the other courts referenced section 110(a)(2)(A) (or section 110(a)(2)(B) of the pre-1990 CAA) in the background section of decisions involving challenges to EPA actions on revisions to SIPs that were required and approved under other provisions of the CAA or in the context of an enforcement action.

In Train, 421 U.S. 60, the Court was addressing a state revision to an attainment plan submission made pursuant to section 110 of the CAA, the primary statutory provision at that time addressing such submissions. The issue in that case was whether changes to requirements that would occur before attainment was required were variances that should be addressed pursuant to the provision governing SIP revisions or were “postponements” that must be addressed under section 110(f) of the CAA of 1970, which contained prescriptive criteria. The Court concluded that EPA reasonably interpreted section 110(f) not to restrict a state’s choice of the mix of control measures needed to attain the NAAQS, so long as the state met other applicable requirements of the CAA, and that revisions to SIPs that would not impact attainment of the NAAQS after the attainment date were not subject to the limits of section 110(f). Thus the issue
was not whether the specific SIP at issue needs to provide for attainment or whether emissions limits are needed as part of the SIP; rather the issue was whether EPA properly rejected a revision to an approved SIP where the inventories relied on by the state for the updated submission had gaps. The Court quoted section 110(a)(2)(B) of the pre-1990 CAA in support of EPA's disapproval, but did not provide any interpretation of that provision. This decision did not address the question at issue in this action, i.e., what a state must include in an infrastructure SIP submission for purposes of section 110(a)(2)(A). Yet, even if the Court had interpreted that provision, EPA notes that it was modified by Congress in 1990; thus, this decision has little bearing on the issue here.

At issue in *Mision Industrial*, 547 F.2d 123, was the definition of “emissions limitation” not whether section 110 requires the state to demonstrate how all areas of the state will attain and maintain the NAAQS as part of their infrastructure SIPs. The language from the opinion the Commenter quotes does not interpret but rather merely describes section 110(a)(2)(A). The Commenter does not cite to this case to assert that the measures relied on by the state in the infrastructure SIP are not “emissions limitations” and the decision in this case has no bearing here. In *Mont. Sulphur & Chem. Co.*, 666 F.3d 1174, the Court was reviewing a Federal implementation plan (FIP) that EPA promulgated after a long history of the State failing to submit an adequate SIP in response to EPA’s finding under section 110(b)(5) that the previously approved SIP was substantially inadequate to attain or maintain the NAAQS, which triggered the State’s duty to submit a new SIP to show how it would remedy that deficiency and attain the NAAQS. The Court cited generally to sections 107 and 110(a)(2)(A) of the CAA for the proposition that SIPs should assure attainment and maintenance of NAAQS through emission limitations, but this language was not part of the Court’s holding in the case, which focused instead on whether EPA’s finding of SIP inadequacy and adoption of a remedial FIP were lawful. The Commenter suggests that *Alaska Dept. of Envtl. Conservation*, 540 U.S. 461, stands for the proposition that the 1990 CAA Amendments do not alter how courts interpret section 110. This claim is inaccurate. Rather, the Court quoted section 110(a)(2)(A), which, as noted previously, differs from the pre-1990 version of that provision and the court makes no mention of the changed language. Furthermore, the Commenter also quotes the Court’s statement that “SIPs must include certain measures Congress specified,” but that statement specifically referenced the requirement in section 110(a)(2)(C), which requires an enforcement program and a program for the regulation of the modification and construction of new sources. Notably, at issue in that case was the State’s “new source” permitting program, not what is required for purposes of an infrastructure SIP submission for purposes of section 110(a)(2)(A).

EPA does not believe any of these court decisions addressed required measures for infrastructure SIPs and believes nothing in the opinions addressed whether infrastructure SIP submissions must contain emission limitations or measures to ensure attainment and maintenance of the NAAQS.

4. EPA Regulations, Such as 40 CFR 51.112

*Response 4:* The Commenter cites to 40 CFR 51.112(a), providing that “Each plan must demonstrate that the measures, rules, and regulations contained in it are adequate to provide for the timely attainment and maintenance of the national standard that it implements.” The Commenter relies on a statement in the preamble to the 1986 action restructuring and consolidating provisions in part 51, in which EPA stated that “[i]t is beyond the scope of th[is] rulemaking to address the provisions of Part D of the Act . . .” 51 FR 40656. Thus, the Commenter contends that “the provisions of 40 CFR 51.112 are not limited to nonattainment SIPs; the regulation instead applies to Infrastructure SIPs, which are required to attain and maintain the NAAQS in all areas of a state, including those not designated nonattainment.”

*Response 5:* The Commenter’s reliance on 40 CFR 51.112 to support its argument that infrastructure SIPs must contain emission limitations which ensure attainment and maintenance of the NAAQS is incorrect. It is clear on its face that 40 CFR 51.112 directly applies to state SIP submissions for control strategy SIPs, i.e., plans that are specifically required to attain and/or maintain the NAAQS. These regulatory requirements apply when states are developing “control strategy” SIPs under other provisions of the CAA, such as attainment plans required for the various NAAQS in Part D and maintenance plans required in section 175A. The Commenter’s suggestion that 40 CFR 51.112 must apply to all SIP submissions required by section 110 based on the preamble to EPA’s action “restructuring and consolidating” provisions in part 51, is also incorrect. EPA’s action in 1986 was not to establish new substantive planning requirements, but rather was meant merely to consolidate and restructure provisions that had previously been promulgated.

Although EPA was explicit that it was not establishing requirements interpreting the provisions of new “Part D” of the CAA, it is clear that the regulations being restructured and consolidated were intended to address control strategy plans. In the preamble, EPA clearly stated that 40 CFR 51.112 was replacing 40 CFR 51.13 (“Control strategy: SO₂ and PM (portion)”), 51.14 (“Control strategy: CO, HC, O₃ and NO₂ (portion)”), 51.80 (“Demonstration of attainment: Pb (portion)”), and 51.82 (“Air quality data (portion)”). Id. at 40660. Thus, the present-day 40 CFR 51.112 contains consolidated provisions that are focused on control strategy SIPs, and the infrastructure SIP is not such a plan.

5. EPA Interpretations in Other Rulemakings

*Comment 5:* The Commenter also references a 2006 partial approval and partial disapproval of revisions to Missouri’s existing plan addressing the SO₂ NAAQS and claims it was an action in which EPA relied on section 110(a)(2)(A) and 40 CFR 51.112 to reject an infrastructure SIP. Specifically, the Commenter asserts that in that action, EPA cited section 110(a)(2)(A) as a basis for disapproving a revision to the State plan on the basis that the State failed to demonstrate the SIP was sufficient to ensure attainment and maintenance of the SO₂ NAAQS after revision of an emission limit and cited to 40 CFR 51.112 as requiring that a plan demonstrates the rules in a SIP are adequate to attain the SO₂ NAAQS.

*Response 5:* EPA’s partial approval and partial disapproval of revisions to restrictions on emissions of sulfur...
notes that this EPA guidance provides that ‘‘any emissions limits based on averaging periods longer than 1 hour should be designed to have comparable stringency to a 1-hour average limit at the critical emission value.’’

The Commenter also cites to a February 3, 2011, EPA Region 7 letter to the Kansas Department of Health and Environment regarding the need for 1-hour SO_2 emission limits in a prevention of significant deterioration (PSD) permit, an EPA Environmental Appeals Board decision rejecting use of a 3-hour averaging time for a SO_2 limit in a PSD permit, and EPA’s disapproval of a Missouri SIP which relied on annual averaging for SO_2 emission rates and claims EPA has stated that 1-hour averaging times are necessary for the 2010 1-hour SO_2 NAAQS. The Commenter states, ‘‘Therefore, in order to ensure that Mississippi’s Infrastructure SIP actually implements the SO_2 NAAQS in every area of the state, the I–SIP must contain enforceable emission limits with one-hour averaging times, monitored continuously, for large sources of SO_2.‘’ The Commenter asserts that EPA must disapprove Mississippi’s infrastructure SIP because it fails to require emission limits with adequate averaging times.

Response 6: As explained in detail in previous responses, the purpose of the infrastructure SIP is to ensure that a state has the structural capability to implement and enforce the NAAQS and thus, additional SO_2 emission limitations to ensure attainment and maintenance of the NAAQS are not required for such infrastructure SIPs. EPA disagrees that it must disapprove the proposed Mississippi infrastructure SIP submission merely because the SIP does not contain enforceable SO_2 emission limitations with 1-hour averaging periods that apply at all times, as this issue is not appropriate for resolution in this action. Therefore, because EPA finds Mississippi’s SO_2 infrastructure SIP approvable without the additional SO_2 emission limitations showing attainment of the NAAQS, EPA finds the issue of appropriate averaging periods for such future limitations not relevant at this time.

Further, the Commenter’s citation to a prior EPA discussion on emission limitations required in PSD permits (from EPA’s Environmental Appeals Board decision and EPA’s letter to Kansas’ permitting authority) pursuant to part C of the CAA is neither relevant nor applicable to infrastructure SIP submissions under CAA section 110. In addition, and as previously discussed, the EPA disapproval of the 2006 Missouri SIP was a disapproval relating to an attainment plan SIP submission required pursuant to part D attainment planning and is likewise not relevant to the analysis of infrastructure SIP requirements.

Comment 7: Citing to section 110(a)(1) and (a)(2)(A) of the CAA, the Commenter contends that EPA may not approve Mississippi’s infrastructure SIP because it does not include enforceable 1-hour emission limits for sources that the Commenter claims are currently contributing to NAAQS exceedances. The Commenter asserts that emission limits are especially important for meeting the 1-hour limit of the NAAQS because SO_2 impacts are strongly source oriented. The Commenter states that “[d]espite the large contribution from coal-fired EGUs [electricity generating units] to the State’s SO_2 pollution, Mississippi’s I–SIP lacks enforceable emissions limitations applicable to its coal-fired EGUs sufficient to ensure the implementation, attainment, and maintenance of the 2010 SO_2 NAAQS.”

The Commenter refers to air dispersion modeling it conducted for one power plant in Mississippi, the R.D. Morrow Power Plant. Further, the Commenter cites two court cases to support its statement that “. . . an agency may not ignore information put in front of it” and that thus, the Commenter contends that EPA must consider its expert air dispersion modeling which demonstrates the inadequacy of Mississippi’s rules and regulations for

4 EPA’s final action does not address CAA section 110(a)(2)(D)(i)(I) because Mississippi has not made a submission for these elements.

6 For a discussion on emission averaging times for emissions limitations for SO_2 attainment SIPs, see the April 23, 2014, Guidance for 1-Hour SO_2 Nonattainment Area SIP Submissions. As noted by the Commenter, EPA explained that it is possible, in specific cases, for states to develop control strategies that account for variability in 1-hour emissions rates through emission limits with averaging times that are longer than 1-hour, using averaging times as long as 30-days, but still provide for attainment of the 2010 SO_2 NAAQS as long as the limits are of at least comparable stringency to a 1-hour limit at the critical emission value. EPA has not taken final action to approve any specific submission of such a limit that a state has relied upon to demonstrate NAAQS attainment, and Mississippi has not submitted such a limit for that purpose here, so it is premature at this time to evaluate whether any emission limit in Mississippi’s SIP is in accordance with the April 23, 2014, guidance. If and when Mississippi submits an emission limitation that relies upon such a longer averaging time to demonstrate NAAQS attainment, EPA will evaluate it then.

7 There are currently no areas designated nonattainment pursuant to CAA section 107 for the 2010 1-hour SO_2 NAAQS in Mississippi. EPA believes the appropriate time for examining the necessity of 1-hour SO_2 emission limits on specific sources is within the attainment planning process.
SO₂ emissions.” The Commenter summarizes its modeling results for the R.D. Morrow Power Plant claiming that the data predict exceedances of the standard. Thus, the Commenter contends that Mississippi’s infrastructure submission is “substantially inadequate to attain and maintain the NAAQS which it implements, as evidenced by expert air dispersion modeling demonstrating that the emission limits under the laws and regulations cited to in the SO₂ 1–SIP Certification allow for exceedences of the NAAQS.” Thus, the Commenter asserts that EPA must disapprove Mississippi’s SIP submission, and must establish a FIP “which incorporates necessary and appropriate source-specific enforceable emission limitations (preferably informed by modeling) on Plant Morrow, as well as any other major sources of SO₂ pollution in the State which are not presently located in nonattainment areas and have modeled exceedences of the NAAQS.” Further, the Commenter states that “For Plant Morrow enforceable emission limitations must be at least as stringent as the modeling-based limits [provided by the Commenter] in order to protect the one-hour SO₂ NAAQS and implement, maintain, and enforce the standard in Mississippi.”

The Commenter also asserts that Mississippi’s infrastructure SIP must contain enforceable emission limits to avoid additional nonattainment designations “where modeling (or monitoring) shows that SO₂ levels exceed the one-hour NAAQS.” The Commenter cites to EPA’s Next Steps for Area Designations and Implementation of the Sulfur Dioxide National Ambient Air Quality Standard* (February 6, 2013), and EPA’s Final SO₂ NAAQS Rule at 75 FR 35553. The Commenter further contends that EPA’s proposal to designate Lamar County, Mississippi, as attainment/unclassifiable is based on modeling for Plant Morrow provided by the State of Mississippi with two “significant problems”: (1) The modeling scenario using allowable emissions was not included in accordance with the EPA-approved modeling protocol and (2) the background SO₂ concentrations (14 parts per billion, or 36.65 micrograms per cubic meter) from the Jackson Monitoring Station in Hinds County monitor were “erroneously relied on”, given that “EPA has determined the design values for the Hinds County monitors invalid.” For these two issues related to the modeling, the Commenter cites to the modeling from the State performed by Trinity Consultants, 1-Hour SO₂ NAAQS DESIGNATION MODELING REPORT, pp. 23 and 32, available at https://www.epa.gov/sites/production/files/2016-03/documents/ms-rec-att1-r2.pdf, and EPA’s August 3, 2015, SO₂ Design Values file.

Response 7: As stated previously, EPA believes that the proper inquiry is whether Mississippi has met the basic, structural SIP requirements appropriate at the point in time EPA is acting upon the infrastructure submissions. Emissions limitations and other control measures, whether on coal-fired EGUs or other SO₂ sources, that may be needed to attain and maintain the NAAQS in areas designated nonattainment for that NAAQS are due on a different schedule from the section 110 infrastructure SIP submission. A state, like Mississippi, may reference pre-existing SIP emission limits or other rules contained in part D plans for previous NAAQS in an infrastructure SIP submission for purposes of section 110(a)(2)(A). For example, Mississippi submitted a list of existing emission reduction measures in the SIP that control emissions of SO₂ as discussed above in response to a prior comment and discussed in the proposed rulemaking on Mississippi’s SO₂ infrastructure SIP. These provisions have the ability to reduce SO₂ overall. Although the Mississippi SIP relies on measures and programs used to implement previous SO₂ NAAQS, these provisions are not limited to reducing SO₂ levels to meet one specific NAAQS and will continue to provide benefits for the 2010 1-hour SO₂ NAAQS.

Regarding the air dispersion modeling conducted by the Commenter pursuant to AERMOD and its comments on the modeling submitted by Mississippi pursuant to the section 107 designation process for the R.D. Morrow Power Plant, EPA is not in this action making a determination regarding the air quality status in the area where this facility is located, and is not evaluating whether emissions applicable to this facility are adequate to attain and maintain the NAAQS. Consequently, the EPA does not find the modeling information relevant for review of an infrastructure SIP for purposes of section 110(a)(2)(A). When additional areas in Mississippi are designated under the 2010 1-hour SO₂ NAAQS, and if any additional areas in Mississippi are designated nonattainment in the future, any potential future modeling submitted by the State with designations or attainment demonstrations would need to account for any new emission limitations Mississippi develops to support such designation or demonstration, which at this point is unknown. While EPA has extensively discussed the use of modeling for attainment demonstration purposes and for designations, EPA has recommended that such modeling was not needed for the SO₂ infrastructure SIPs for the 2010 1-hour SO₂ NAAQS for purposes of section 110(a)(2)(A), which are not actions in which EPA makes determinations regarding current air quality status. See April 12, 2012, letters to states and 2012 Draft White Paper.10

In conclusion, EPA disagrees with the Commenter’s statements that EPA must disapprove Mississippi’s infrastructure SIP submission because it does not establish specific enforceable SO₂ emission limits, either on coal-fired EGUs or other large SO₂ sources, in order to demonstrate attainment and maintenance with the 2010 1-hour SO₂ NAAQS at this time.

Comment 8: The Commenter alleges that the SO₂ infrastructure SIP submittal does not address sources significantly contributing to nonattainment or interfering with maintenance of the 2010 1-hour SO₂ NAAQS in other states as required by section 110(a)(2)(D)(i)(I) of the CAA, and asserts EPA must therefore disapprove the infrastructure SIP and impose a FIP. The Commenter states that “EPA must implement a FIP containing source-specific emission limitations and other measures to ensure that pollution from Mississippi is not preventing other states from attaining or maintaining the NAAQS.” The Commenter notes that compliance of whether the Mississippi submitted a SIP revision to address CAA section 110(a)(2)(D)(i)(I), the State “has long since passed the June 2013 deadline to submit such provisions; rather than await some potential future submission, Mississippi’s failure to satisfy its Good Neighbor obligations must be rectified now.” The Commenter explains that the Supreme Court disapproved the view that states cannot address section 110(a)(2)(D)(I) until EPA resolves issues related to CSAPR and that compliance with this provision is a “mandatory duty”, citing to Homer City, 696 F.3d 7, 37 (D.C. Cir. 2012), rev’d, No. 12–1182, slip op. at 27–28 (U.S. Apr. 29, 2014). The Commenter also highlights from

---

*See for example, EPA’s discussion of modeling for characterizing air quality in the Agency’s August 21, 2015, final rule at 80 FR 51052 and for nonattainment planning in the April 23, 2014, Guidance for 1-hour SO₂ Nonattainment Area SIP Submissions.

10 Implementation of the 2010 Primary 1-hour SO₂ NAAQS, Draft White Paper for Discussion, May 2012 (2012 Draft White Paper) and a sample April 12, 2012, letter from EPA to states are available in the docket for this action.
Order on Petition No. VI–2014–04 at 10 (citing EPA v. EME Homer City Generation, 134 S.Ct. 1584, 1601 (2014)) that, “[T]he Supreme Court has affirmed that the EPA is not required to provide any implementation guidance before states’ interstate transport obligation can be addressed.”

Response 8: This action does not address whether sources in Mississippi are significantly contributing to nonattainment or interfering with maintenance of the 2010 1-hour SO\textsubscript{2} NAAQS in another state as required by section 110(a)(2)(D)(i)(I) of the CAA (the good neighbor provision). Thus, EPA disagrees with the Commenter’s statement that EPA must disapprove the submitted 2010 1-hour SO\textsubscript{2} infrastructure SIP due to Mississippi’s failure to address section 110(a)(2)(D)(i)(I). In EPA’s rulemaking proposing to approve Mississippi’s infrastructure SIP for the 2010 1-hour SO\textsubscript{2} NAAQS, EPA clearly stated that it was not taking any action with respect to the good neighbor provision in section 110(a)(2)(D)(i)(I). Mississippi did not make a submission to address the requirements of section 110(a)(2)(D)(i)(I) for the 2010 1-hour SO\textsubscript{2} NAAQS, and thus there is no such submission upon which EPA proposed to take action on under section 110(k) of the CAA. Similarly, EPA disagrees with the Commenter’s assertion that EPA cannot approve other elements of an infrastructure SIP submission without the good neighbor provision. There is no basis for the contention that EPA has triggered a submission to submit a FIP to address the good neighbor obligation under section 110(c), as EPA has neither found that Mississippi failed to timely submit a required 110(a)(2)(D)(i)(I) SIP submission for the 2010 1-hour SO\textsubscript{2} NAAQS or found that such a submission was incomplete, nor has EPA disapproved a SIP submission addressing 110(a)(2)(D)(i)(I) with respect to the 2010 1-hour SO\textsubscript{2} NAAQS.

EPA acknowledges the Commenter’s concern for the interstate transport of air pollutants and agrees in general with the Commenter that sections 110(a)(1) and (a)(2) of the CAA generally require states to submit, within three years of promulgation of a new or revised NAAQS, a plan which addresses cross-state air pollution under section 110(a)(2)(D)(i)(I). However, EPA disagrees with the Commenter’s argument that EPA cannot approve an infrastructure SIP submission without the good neighbor provision. Section 110(k)(3) of the CAA authorizes EPA to approve in full, approve it in part and disapprove it in part, depending on the extent to which such plan meets the requirements of the CAA. This authority to approve state SIP revisions in separable parts was included in the 1990 Amendments to the CAA to overrule a decision in the Court of Appeals for the Ninth Circuit holding that EPA could not approve individual measures in a plan submission without either approving or disapproving the plan as a whole. See S. Rep. No. 101–228, at 22, 1990 U.S.C.C.A.N. 3385, 3408 (discussing the express overruling of Abramowitz v. EPA, 832 F.2d 1071 (9th Cir. 1987)).

EPA interprets its authority under section 110(k)(3) of the CAA, as affording EPA the discretion to approve, or conditionally approve, individual elements of Mississippi’s infrastructure SIP submissions for the 2010 1-hour SO\textsubscript{2} NAAQS, separate and apart from any action with respect to the requirements of section 110(a)(2)(D)(i)(I) of the CAA with respect to that NAAQS. EPA views discrete infrastructure SIP requirements, such as the requirements of 110(a)(2)(D)(i)(I), as severable from the other infrastructure elements and interprets section 110(k)(3) as allowing it to act on individual severable measures in a plan submission. In short, EPA believes that even if Mississippi had made a SIP submission for section 110(a)(2)(D)(i)(I) of the CAA for the 2010 1-hour SO\textsubscript{2} NAAQS, which to date it has not, EPA would still have discretion under section 110(k) of the CAA to act upon the various individual elements of the State’s infrastructure SIP submission in a separate or together, as appropriate.

The Commenter raises no compelling legal or environmental rationale for an alternate interpretation. Nothing in the Supreme Court’s April 2014 decision in EME Homer City alters EPA’s interpretation that EPA may act on individual severable measures, including the requirements of section 110(a)(2)(D)(i)(I), in a SIP submission. See EPA v. EME Homer City Generation, L.P., 134 S. Ct. 1584 (affirming a state’s obligation to submit a SIP revision addressing section 110(a)(2)(D)(i)(I) independent of EPA’s action finding significant contribution or interference with maintenance). In sum, the concerns raised by the Commenter do not establish that it is inappropriate or unreasonable for EPA to approve the portions of Mississippi’s infrastructure SIP submission for the 2010 1-hour SO\textsubscript{2} NAAQS.

EPA has no obligation at this time to issue a FIP pursuant to 110(d)(1) to address Mississippi’s obligations under section 110(a)(2)(D)(i)(I) until EPA first either finds Mississippi failed to make a required submission addressing the element or the State has made such a submission but it is incomplete, or EPA disapproves a SIP submission addressing that element. Until either occurs, EPA does not have the obligation to issue a FIP pursuant to section 110(c) with respect to the good neighbor provision. Thus, EPA disagrees with the Commenter’s contention that it must issue a FIP for Mississippi to address 110(a)(2)(D)(i)(I) for the 2010 1-hour SO\textsubscript{2} NAAQS at this time.

III. Final Action

With the exception of the interstate transport requirements of section 110(a)(2)(D)(i)(I) and (II) (prongs 1, 2, and 4) and the state board majority requirements respecting significant portion of income of section 110(a)(2)(E)(ii), EPA is taking final action to approve Mississippi’s infrastructure submission submitted on June 20, 2013, for the 2010 1-hour SO\textsubscript{2} NAAQS for the above described infrastructure SIP requirements. EPA is taking final action to approve Mississippi’s infrastructure SIP submission for the 2010 1-hour SO\textsubscript{2} NAAQS for the above described infrastructure SIP requirements because the submission is consistent with section 110 of the CAA.

With regard to the state board majority requirements respecting significant portion of income, EPA is finalizing a disapproval of Mississippi’s June 20, 2013, infrastructure submission. Under section 179(a) of the CAA, final disapproval of a submittal that addresses a requirement of a CAA Part D Plan or is required in response to a finding of substantial inadequacy as described in CAA section 110(k)(5) (SIP call) starts a sanctions clock. The portion of section 110(a)(2)(E)(ii) provisions (the provisions being proposed for disapproval in this notice) were not submitted to meet requirements for Part D or a SIP call, and therefore, no sanctions will be triggered. However, this final action will trigger the requirement under section 110(c) that EPA promulgate a Federal Implementation Plan (FIP) no later than two years from the date of the disapproval unless the State corrects the deficiency, and EPA approves the plan or plan revision before EPA promulgates such FIP.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations.
§ 52.1272 Approval status.

3. Section 52.1272 is amended by adding paragraph (e) to read as follows:

§ 52.1272 Approval status.

(e) Disapproval. Submittal from the State of Mississippi, through the Mississippi Department of Environmental Quality (MDEQ) on June 20, 2013, to address the Clean Air Act section 110(a)(2)(E)(ii) for the 2010 1-hour sulfur dioxide (SO₂) National Ambient Air Quality Standards (NAAQS) concerning state board majority requirements respecting significant portion of income of section 128(a)(1). EPA is disapproving MDEQ’s submittal with respect to section 110(a)(2)(E)(ii) because a majority of board members may still derive a significant portion of income from persons subject to permits or enforcement orders issued by the Mississippi Boards, and therefore, its current SIP does not meet the section 128(a)(1) majority requirements.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Air Plan Approval; Florida; Infrastructure Requirements for the 2010 Sulfur Dioxide National Ambient Air Quality Standard

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve the State Implementation Plan (SIP) submissions, submitted by the State of Florida, through the Florida Department of Environmental Protection (FDEP), on June 3, 2013, and supplemented on January 8, 2014, for inclusion into the Florida SIP. This final action pertains to the infrastructure requirements of the Clean Air Act (CAA or Act) for the 2010 1-hour sulfur dioxide \( \text{SO}_2 \) national ambient air quality standard (NAAQS). The CAA requires that each state adopt and submit a SIP for the implementation, maintenance and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an “infrastructure SIP submission.” FDEP certified that the Florida SIP contains provisions that ensure the 2010 1-hour \( \text{SO}_2 \) NAAQS is implemented, enforced, and maintained in Florida. EPA has determined that the Florida’s infrastructure SIP submissions, provided to EPA on June 3, 2013, and supplemented on January 8, 2014, satisfy the required infrastructure elements for the 2010 1-hour \( \text{SO}_2 \) NAAQS.

DATES: This rule is effective October 31, 2016.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2014–0423. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the FOR FURTHER INFORMATION CONTACT section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Michele Notarianni, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Ms. Notarianni can be reached via electronic mail at notarianni.michele@epa.gov or telephone at (404) 562–9031.

SUPPLEMENTARY INFORMATION:

I. Background and Overview

On June 2, 2010 (75 FR 35520, June 22, 2010), EPA promulgated a revised primary \( \text{SO}_2 \) NAAQS to an hourly standard of 75 parts per billion (ppb) based on a 3-year average of the annual 99th percentile of 1-hour daily maximum concentrations. Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the applicable requirements of section 110(a)(2)(A) that requires SIPs to include enforceable emission limits (or any revision thereof), and section 110(a)(2) of the CAA requires the inclusion of enforceable emission limits in an infrastructure SIP to prevent NAAQS exceedances in areas not designated nonattainment. In support, the Commenter quotes the language in section 110(a)(1) that requires states to adopt a plan for implementation, maintenance, and enforcement of the NAAQS and the language in section 110(a)(2)(A) that requires SIPs to include enforceable emissions limitations as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of the CAA. In the proposed action, EPA incorrectly cited a date of June 22, 2013, for the due date of infrastructure SIPs for the 2010 1-hour \( \text{SO}_2 \) NAAQS. 80 FR 51158 (August 24, 2015).

submissions “within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),” and these SIP submissions are to provide for the “implementation, maintenance, and enforcement” of such NAAQS.

In a proposed rulemaking published on August 24, 2015, EPA proposed to approve Florida’s June 3, 2013, and January 8, 2014, 2010 1-hour \( \text{SO}_2 \) NAAQS infrastructure SIP submissions.\(^2\) See 80 FR 51157. The details of Florida’s submissions and the rationale for EPA’s actions are explained in the proposed rulemaking. Comments on the proposed rulemaking were due on or before September 23, 2015. EPA received adverse comments on the proposed action.

II. Response to Comments

EPA received one set of comments on the August 24, 2015, proposed rulemaking to approve Florida’s 2010 1-hour \( \text{SO}_2 \) NAAQS infrastructure SIP submissions intended to meet the CAA requirements for the 2010 1-hour \( \text{SO}_2 \) NAAQS. A summary of the comments and EPA’s responses are provided below.\(^3\) A full set of these comments is provided in the docket for today’s final rulemaking action.

A. Comments on Infrastructure SIP Requirements for Enforceable Emission Limits

1. The Plain Language of the CAA

Comment 1: The Commenter contends that the plain language of section 110(a)(2)(A) of the CAA requires the inclusion of enforceable emission limits in an infrastructure SIP to prevent NAAQS exceedances in areas not designated nonattainment. In support, the Commenter quotes the language in section 110(a)(1) that requires states to adopt a plan for implementation, maintenance, and enforcement of the NAAQS and the language in section 110(a)(2)(A) that requires SIPs to include enforceable emissions limitations as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of the CAA.

\(^2\) Florida’s 2010 1-hour \( \text{SO}_2 \) NAAQS infrastructure SIP submission dated June 3, 2013, and supplemented on January 8, 2014, are also collectively referred to as “Florida’s \( \text{SO}_2 \) infrastructure SIP” in this action.

2 Florida’s 2010 1-hour \( \text{SO}_2 \) NAAQS infrastructure SIP submission dated June 3, 2013, and supplemented on January 8, 2014, are also collectively referred to as “Florida’s \( \text{SO}_2 \) infrastructure SIP” in this action.
The Commenter then states that applicable requirements of the CAA include requirements for the attainment and maintenance of the NAAQS, and that CAA section 110(a)(2)(A) requires infrastructure SIPs to include enforceable emission limits to prevent exceedances of the NAAQS. The Commenter claims that Florida’s SIP submission does not meet this asserted requirement. Thus, the Commenter asserts that EPA must disapprove Florida’s proposed SO\textsubscript{2} infrastructure SIP submission because it fails to include enforceable emission limitations necessary to ensure attainment and maintenance of the NAAQS as required by CAA section 110(a)(2)(A). The Commenter then states that the Florida 2010 1-hour SO\textsubscript{2} infrastructure SIP submission fails to conform with CAA requirements for SIPs to establish enforceable emission limits that are adequate to prohibit NAAQS exceedances in areas not designated nonattainment.

Response 1: EPA disagrees that section 110 must be interpreted in the manner suggested by the Commenter in the context of infrastructure SIP submissions. Section 110 is only one provision that is part of the complicated structure governing implementation of the NAAQS program under the CAA, as amended in 1990, and it must be interpreted in the context of not only that structure, but also of the historical evolution of that structure. In light of the revisions to section 110 since 1970 and the later-promulgated and more specific SIP planning requirements of the CAA, EPA interprets the requirement in section 110(a)(1) that the plan provide for “implementation, maintenance and enforcement” in conjunction with the requirements in section 110(a)(2)(A) to mean that the infrastructure SIP must contain enforceable emission limits that will aid in attaining and/or maintaining the NAAQS and that the state demonstrate that it has the necessary tools to implement and enforce a NAAQS, such as adequate state personnel and an enforcement program.

With regard to the requirement for emission limitations in section 110(a)(2)(A), EPA has interpreted this to mean, for purposes of infrastructure SIP submissions, that the state may rely on measures already in place to address the pollutant at issue or any new control measures that the state may elect to impose as part of such SIP submission. As EPA stated in “Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and 110(a)(2),” dated September 13, 2013, (Infrastructure SIP Guidance), “[t]he conceptual purpose of an infrastructure SIP submission is to assure that the air agency’s SIP contains the necessary structural requirements for the new or revised NAAQS, whether by establishing that the SIP already contains the necessary provisions, by making a substantive SIP revision to update the SIP, or both. Overall, the infrastructure SIP submission process provides an opportunity . . . to review the basic structural requirements of the air agency’s air quality management program in light of each new or revised NAAQS.” Infrastructure SIP Guidance at pp. 1–2. Florida appropriately demonstrated that its SIP has SO\textsubscript{2} emissions limitations and the “structural requirements” to implement the 2010 1-hour SO\textsubscript{2} NAAQS in its infrastructure SIP submission.

The Commenter makes general allegations that Florida does not have sufficient protective measures to prevent SO\textsubscript{2} NAAQS exceedances. EPA addressed the adequacy of Florida’s infrastructure SIP for 110(a)(2)(A) purposes in the proposed rule and explained why the SIP includes enforceable emission limitations and other control measures that aid in maintaining the 2010 1-hour SO\textsubscript{2} NAAQS throughout the State. These include State regulations which collectively establish enforceable emissions limitations and other control measures, means or techniques for activities that contribute to SO\textsubscript{2} concentrations in the ambient air, and provide authority for FDEP to establish such limits and measures as well as schedules for compliance through SIP-approved permits to meet the applicable requirements of the CAA. See 80 FR 51161. EPA finds these provisions adequately address section 110(a)(2)(A) to aid in attaining and/or maintaining the 2010 1-hour SO\textsubscript{2} NAAQS and finds Florida demonstrated that it has the necessary tools to implement and enforce the 2010 1-hour SO\textsubscript{2} NAAQS.

2. The Legislative History of the CAA

Comment 2: The Commenter cites two excerpts from the legislative history of the 1970 CAA and claims that the “legislative history of infrastructure SIPs provides that states must include enforceable emission limits in their infrastructure SIPs sufficient to ensure the implementation, maintenance, and attainment of each NAAQS in all areas of the State.”

Response 2: As provided in the previous response, the CAA, as enacted in 1970, including its legislative history, comprehensively interpreted legislation from the later amendments that refined that structure and deleted relevant language from section 110 concerning attainment. In any event, the two excerpts of legislative history the Commenter cites merely provide that states should include enforceable emission limits in their SIPs and they do not mention or otherwise address whether states are required to impose additional emission limitations or control measures as part of the infrastructure SIP submission, as opposed to requirements for other types of SIP submissions such as attainment plans required under section 110(a)(2)(B). As provided in Response 1, the proposed rule explains why the SIP includes sufficient enforceable emissions limitations for purposes of the infrastructure SIP submission.

3. Case Law

Comment 3: The Commenter also discusses several court decisions concerning the CAA, which the Commenter claims support its contention that courts have been clear that section 110(a)(2)(A) requires enforceable emission limits in infrastructure SIP submissions to prevent violations of the NAAQS. The Commenter first cites to language in Train v. NRDC, 421 U.S. 60, 78 (1975), addressing the requirement for “emission limitations” and stating that emission limitations “are the specific rules to which operators of pollution sources are subject, and which if enforced should result in ambient air which meets the national standards.” The Commenter also cites to Pennsylvania Dept. of Envtl. Resources v. EPA, 932 F.2d 269, 272 (3d Cir. 1991) for the proposition that the CAA directs EPA to withhold approval of a SIP where it does not ensure maintenance of the NAAQS, and to Mission Industrial, Inc. v. EPA, 547 F.2d 123, 129 (1st Cir. 1976), which quoted section 110(a)(2)(B) of the CAA of 1970. The Commenter contends that the 1990 Amendments do not alter how courts have interpreted the requirements of section 110, quoting Alaska Dept. of Envtl. Conservation v. EPA, 540 U.S. 461, 470 (2004) which in turn quoted section 110(a)(2)(A) of the CAA and also stated that “SIPs must include certain measures Congress specified” to ensure attainment of the NAAQS. The Commenter also quotes several additional opinions in this vein. Mont. Sulphur & Chem. Co. v. EPA, 666 F.3d 1174, 1180 (9th Cir. 2012) (“[t]he Clean Air Act directs states to develop implementation plans—SIPs—that ‘assure’ attainment and maintenance of [NAAQS] through enforceable emission limitations”); Mich. Dept. of Envtl. Quality v. Browner, 581 (6th Cir. 2000) (“EPA’s deference to a state is conditioned on the state’s submission
of a plan ‘which satisfies the standards of § 110(a)(2)’ and which includes emission limitations that result in compliance with the NAAQS”; and Hall v. EPA 273 F.3d 1146 (9th Cir. 2001) for the proposition that EPA may not approve a SIP revision that does not demonstrate how the rules would not interfere with attainment and maintenance of the NAAQS.

Response 3: None of the cases the Commenter cites support the Commenter’s contention that it is clear that section 110(a)(2)(A) requires infrastructure SIP submissions to include detailed plans providing for attainment and maintenance of the NAAQS in all areas of the state, nor do they shed light on how EPA may reasonably interpret section 110(a)(2)(A). With the exception of Train, none of the cases the Commenter cites specifically concerned the interpretation of CAA section 110(a)(2)(A) (or section 110(a)(2)(B) of the pre-1990 Act). Rather, the other courts referenced section 110(a)(2)(A) (or section 110(a)(2)(B) of the pre-1990 CAA) in the background section of decisions in the context of a challenge to an EPA action on revisions to a SIP that was required and approved as meeting other provisions of the CAA or in the context of an enforcement action.

In Train, 421 U.S. 60, the Court was addressing a state revision to an attainment plan submission made pursuant to section 110 of the CAA, the primary statutory provision at that time addressing such submissions. The issue in that case concerned whether changes to requirements that would occur before attainment was required were variances that should be addressed pursuant to the provision governing SIP revisions or were “postponements” that must be addressed under section 110(f) of the CAA of 1970, which contained prescriptive criteria. The Court concluded that EPA reasonably interpreted section 110(f) not to restrict a state’s choice of the mix of control measures needed to attain the NAAQS, so long as the state met other applicable requirements of the CAA, and that revisions to SIPs that would not impact attainment of the NAAQS by the attainment date were not subject to the limits of section 110(f). Thus the issue was not whether the specific SIP at issue needs to provide for attainment or whether emissions limits are needed as part of the SIP; rather the issue was whether statutory provision governed when the state wanted to revise the emission limitations in its SIP if such revision would not impact attainment or maintenance of the NAAQS.

The decision in Pennsylvania Dept. of Envtl. Resources was also decided based on a pre-1990 provision of the CAA. At issue was whether EPA properly rejected a revision to an approved SIP where the inventories relied on by the state for the updated submission had gaps. The Court quoted section 110(a)(2)(B) of the pre-1990 CAA in support of EPA’s disapproval, but did not provide any interpretation of that provision. This decision did not address the question at issue in this action, i.e., what a state must include in an infrastructure SIP submission for purposes of section 110(a)(2)(A). Yet, even if the Court had interpreted that provision, EPA notes that it was modified by Congress in 1990; thus, this decision has little bearing on the issue here.

At issue in Mission Industrial, 547 F.2d 123, was the definition of “emissions limitation” not whether section 110 requires the state to demonstrate how all areas of the state will attain and maintain the NAAQS as part of their infrastructure SIPs. The language from the opinion the Commenter quotes does not interpret but rather merely describes section 110(a)(2)(A). The Commenter does not cite to this case to assert that the measures relied on by the state in the infrastructure SIP are not “emissions limitations” and the decision in this case has no bearing here. In Mont. Sulphur & Chem. Co., 666 F.3d 1174, the Court was reviewing a Federal implementation plan (FIP) that EPA promulgated after a long history of the State failing to submit an adequate SIP in response to EPA’s finding under section 110(k)(5) that the previously approved SIP was substantially inadequate to attain or maintain the NAAQS, which triggered the State’s duty to submit a new SIP to show how it would remedy that deficiency and attain the NAAQS. The Court cited generally to sections 110 and 110(a)(2)(A) of the CAA for the proposition that SIPs should assure attainment and maintenance of NAAQS through emission limitations, but this language was not part of the Court’s holding in the case, which focused instead on whether EPA’s finding of SIP inadequacy and adoption of a remedial FIP were lawful. The Commenter suggests that Alaska Dept. of Envtl. Conservation, 540 U.S. 461, stands for the proposition that the 1990 CAA Amendments do not alter how courts interpret section 110. This claim is inaccurate. Rather, the Court quoted section 110(a)(2)(A), which, as noted previously, differs from the pre-1990 version of that provision and the court makes no mention of the changed language. Furthermore, the Commenter also quotes the Court’s statement that “SIPs must include certain measures Congress specified,” but that statement specifically referenced the requirement in section 110(a)(2)(C), which requires an enforcement program and a program for the regulation of the modification and construction of new sources. Notably, at issue in that case was the State’s “new source” permitting program, not what is required for purposes of an infrastructure SIP submission for purposes of section 110(a)(2)(A).

Two of the cases the Commenter cites, Mich. Dept. of Envtl. Quality, 230 F.3d 185, and Hall, 273 F.3d 1146, interpret CAA section 110(l), the provision governing “revisions” to plans. Neither case, however, addressed the question at issue here, i.e. what states are required to address for purposes of an infrastructure SIP submission for purposes of section 110(a)(2)(A). In those cases, the courts cited to section 110(a)(2)(A) solely for the purpose of providing a brief background of the CAA.

EPA does not believe any of these court decisions addressed required measures for infrastructure SIPs and believes nothing in the opinions addressed whether infrastructure SIP submissions must contain emission limitations or measures to ensure attainment and maintenance of the NAAQS.

4. EPA Regulations, Such as 40 CFR 51.112(a)

Comment 4: The Commenter cites to 40 CFR 51.112(a), providing that “Each plan must demonstrate that the measures, rules, and regulations contained in it are adequate to provide for the timely attainment and maintenance of the national standard that it implements.” The Commenter relies on a statement in the preamble to the 1986 action restructuring and consolidating provisions in part 51, in which EPA stated that “[i]t is beyond the scope of this rulemaking to address the provisions of Part D of the Act . . .” 51 FR 40656. Thus, the Commenter contends that “the provisions of 40 CFR 51.112 are not limited to nonattainment SIPs; the regulation instead applies to Infrastructure SIPs, which are required to attain and maintain the NAAQS in all areas of a state, including those not designated nonattainment.”

Response 4: The Commenter’s reliance on 40 CFR 51.112 to support its argument that infrastructure SIPs must contain emission limits which ensure
attainment and maintenance of the NAAQS is incorrect. It is clear on its face that 40 CFR 51.112 directly applies to state SIP submissions for control strategy SIPs, i.e., plans that are specifically required to attain and/or maintain the NAAQS. These regulatory requirements apply when states are developing “control strategy” SIPs under other provisions of the CAA, such as attainment plans required for the various NAAQS in Part D and maintenance plans required in section 175A. The Commenter’s suggestion that 40 CFR 51.112 must apply to all SIP submissions required by section 110 based on the preamble to EPA’s action “restructuring and consolidating” provisions in part 51, is also incorrect. EPA’s action in 1986 was not to establish new substantive planning requirements, but rather was meant merely to consolidate and restructure provisions that had previously been promulgated.

Although EPA was explicit that it was not establishing requirements interpreting the provisions of new “Part D” of the CAA, it is clear that the regulations being restructured and consolidated were intended to address control strategy plans. In the preamble, EPA clearly stated that 40 CFR 51.112 was replacing 40 CFR 51.13 (“Control strategy: SO\textsubscript{2} and PM (portion)”), 51.14 (“Control strategy: CO, HC, O\textsubscript{3} and NO\textsubscript{2} (portion)”), 51.80 (“Demonstration of attainment: Pb (portion)”), and 51.82 (“Air quality data (portion)”); Id. at 40660. Thus, the present-day 40 CFR 51.112 contains consolidated provisions that are focused on control strategy SIPs, and the infrastructure SIP is not such a plan.

5. EPA Interpretations in Other Rulemakings

Comment 5: The Commenter also references a 2006 partial approval and partial disapproval of revisions to Missouri’s existing plan addressing the SO\textsubscript{2} NAAQS and claims it was an action in which EPA relied on section 110(a)(2)(A) and 40 CFR 51.112 to reject an infrastructure SIP. Specifically, the Commenter asserts that in that action, EPA cited section 110(a)(2)(A) as a basis for disapproving a revision to the State plan on the basis that the State failed to demonstrate the SIP was sufficient to ensure attainment and maintenance of the SO\textsubscript{2} NAAQS after revision of an emission limit and cited to 40 CFR 51.112 as requiring that a plan demonstrates the rules in a SIP are adequate to attain the SO\textsubscript{2} NAAQS.

**Response 5:** EPA’s partial approval and partial disapproval of revisions to restrictions on emissions of sulfur compounds for the Missouri SIP in 71 FR 12623 specifically addressed Missouri’s attainment SIP submission—not Missouri’s infrastructure SIP submission. It is clear from the final Missouri rule that EPA was not reviewing an initial infrastructure SIP submission, but rather reviewing proposed SIP revisions that would make an already approved SIP designed to demonstrate attainment of the NAAQS less stringent. Therefore, EPA does not agree that the 2006 Missouri action referenced by the Commenter establishes how EPA reviews infrastructure SIP submissions for purpose of section 110(a)(2)(A).

As discussed in the proposed rule, EPA finds that the Florida 2010 1-hour SO\textsubscript{2} infrastructure SIP meets the appropriate and relevant structural requirements of section 110(a)(2) of the CAA that will aid in attaining and/or maintaining the 2010 1-hour SO\textsubscript{2} NAAQS and that the State demonstrated that it has the necessary tools to implement and enforce the 2010 1-hour SO\textsubscript{2} NAAQS.

**B. Comments on Florida SIP SO\textsubscript{2} Emission Limits**

Comment 6: The Commenter asserts that EPA may not approve the Florida proposed SO\textsubscript{2} infrastructure SIP because it fails to include enforceable emission limitations with a 1-hour averaging time that applies at all times. The Commenter cites to CAA section 302(k) which requires that emission limits must limit the quantity, rate or concentration of emissions and must apply on a continuous basis. The Commenter states that “[e]nforceable emission limitations contained in the I–SIP must, therefore, be accompanied by proper averaging times; otherwise an appropriate numerical emission limit could allow for peaks that exceed the NAAQS and yet still be permitted since they would be averaged with lower emissions at other times.” The Commenter also cites to recommended averaging times in EPA guidance providing that SIP emissions limits, “should not exceed the averaging time of the applicable NAAQS that the limit is intended to help attain.” EPA Memorandum of Apr. 23, 2014, to Regional Air Division Directors, Regions 1–10, Guidance for 1-Hour SO\textsubscript{2} NAAQS Nonattainment Area SIP Submissions, at 22, available at https://www.epa.gov/sites/production/files/2016-06/documents/20140423 guidance_nonattainment_sip.pdf. The Commenter also notes that this EPA guidance provides that “‘any emissions limits based on averaging periods longer than 1 hour should be designed to have comparable stringency to a 1-hour average limit at the critical emission value.’”

The Commenter also cites to a February 3, 2011, EPA Region 7 letter to the Kansas Department of Health and Environment regarding the need for 1-hour SO\textsubscript{2} emission limits in a prevention of significant deterioration (PSD) permit, an EPA Environmental Hearing Board decision rejecting use of a 3-hour averaging time for a SO\textsubscript{2} limit in a PSD permit, and EPA’s disapproval of a Missouri SIP which relied on annual averaging for SO\textsubscript{2} emission rates and claims EPA has stated that 1-hour averaging times are necessary for the 2010 1-hour SO\textsubscript{2} NAAQS.

The Commenter states, “Therefore, in order to ensure that Florida’s Infrastructure SIP actually implements the SO\textsubscript{2} NAAQS in every area of the state, the I–SIP must contain enforceable emission limits with one-hour averaging times, monitored continuously, for large sources of SO\textsubscript{2}.” The Commenter asserts that EPA must disapprove Florida’s infrastructure SIP because it fails to require emission limits with adequate averaging times.

Response 6: As explained in detail in previous responses, the purpose of the infrastructure SIP is to ensure that a state has the structural capability to implement and enforce the NAAQS and thus, additional SO\textsubscript{2} emission limitations to ensure attainment and maintenance of the NAAQS are not required for such infrastructure SIPs.

---

4 EPA noted that it had already issued guidance addressing the new “Part D” attainment planning obligations. Also, as to maintenance regulations, EPA expressly stated that it was not making any revisions other than to re-number those provisions. See 51 FR 40657.

5 EPA’s final action does not address CAA section 110(a)(2)(D)(i)(I) because Florida has not made a submission for these elements.
EPA disagrees that it must disapprove the proposed Florida infrastructure SIP submission merely because the SIP does not contain enforceable SO₂ emission limitations with 1-hour averaging periods that apply at all times, as this issue is not appropriate for resolution in this action in advance of EPA action on the State’s submissions of other required SIP submissions including an attainment plan for two areas which are designated nonattainment pursuant to section 107 of the CAA.⁹ Therefore, because EPA finds Florida’s SO₂ infrastructure SIP approvable without the additional SO₂ emission limitations showing attainment of the NAAQS, EPA finds the issue of appropriate averaging periods for such future limitations not relevant at this time.

Further, Commenter’s citation to a prior EPA discussion on emission limitations required in PSD permits (from EPA’s Environmental Appeals Board decision and EPA’s letter to Kansas’ permitting authority) pursuant to part C of the CAA is neither relevant nor applicable to infrastructure SIP submissions under CAA section 110. In addition, and as previously discussed, the EPA disapproval of the 2006 Missouri SIP was a disapproval relating to an attainment plan SIP submission required pursuant to part D attainment planning and is likewise not relevant to the analysis of infrastructure SIP requirements.

Comment 7: Citing to section 110(a)(1) and (a)(2)(A) of the CAA, the Commenter contends that EPA may not approve Florida’s infrastructure SIP because it does not include enforceable 1-hour emission limits for sources that the Commenter claims are currently contributing to NAAQS exceedances. The Commenter asserts that emission limits are especially important for meeting the 1-hour SO₂ NAAQS because SO₂ impacts are strongly source oriented. The Commenter states that “[d]espite the large contribution from coal-fired EGUs [electricity generating units] to the State’s SO₂ pollution, Florida’s I–SIP lacks enforceable emissions limitations applicable to its coal-fired EGUs sufficient to ensure the implementation, attainment, and maintenance of the 2010 SO₂ NAAQS.” The Commenter refers to air dispersion modeling it conducted for two power plants in Florida, the C.D. McIntosh, Jr. Power Plant and the Crist Electric Generating Plant, which are located outside of the State’s two nonattainment areas, and claims that “. . . the emission limitations relied on for implementation of the NAAQS in the I–SIP are insufficient to prevent exceedances of the NAAQS.” Further, the Commenter cites two court cases to support its statement that “. . . an agency may not ignore information put in front of it” and that thus, the Commenter contends that EPA must consider its expert air dispersion modeling submitted over the years which demonstrate the inadequacy of Florida’s rules and regulations for SO₂ emissions. The Commenter summarizes its modeling results for the C.D. McIntosh, Jr. Power Plant and the Crist Electric Generating Plant, stating that the data predict exceedances of the standard “over wide areas of the state.” Thus, the Commenter contends that Florida’s infrastructure submissions are “substantially inadequate to attain and maintain the NAAQS which it implements as evidenced by expert air dispersion modeling demonstrating that the emission limits under the laws and regulations cited to in the SO₂ I–SIP Certification allow for exceedances of the NAAQS.” Thus, the Commenter asserts that EPA must disapprove Florida’s SIP submissions, and must establish a FIP “which incorporates necessary and appropriate source-specific enforceable emission limitations (preferably informed by modeling) on C.D. McIntosh, Jr. Power Plant and Crist Electric Generating Plant, as well as any other major sources of SO₂ pollution in the State which are not presently located in nonattainment areas and have modeled exceedances of the NAAQS.” Further, the Commenter states that “For C.D. McIntosh and Crist, enforceable emission limitations must be at least as stringent as the modeling-based limits [provided by the Commenter] in order to protect the one-hour SO₂ NAAQS and implement, maintain, and enforce the standard in Florida.”

Response 7: As stated previously, EPA believes that the proper inquiry is whether Florida has met the basic, structural SIP requirements appropriate at the point in time EPA is acting upon the infrastructure submissions. Emissions limitations and other control measures, whether on coal-fired EGUs or other SO₂ sources, that may be needed to attain and maintain the NAAQS in areas designated nonattainment for that NAAQS are due on a different schedule from the section 110 infrastructure SIP submission. A state, like Florida, may reference pre-existing SIP emission limits or other rules contained in part D plans for previous NAAQS in an infrastructure SIP submission for purposes of section 110(a)(2)(A). For example, Florida submitted a list of existing emission reduction measures in the SIP that control emissions of SO₂ as discussed above in response to a prior comment and discussed in the proposed rulemaking on Florida’s SO₂ infrastructure SIP. These provisions have the ability to reduce SO₂ overall. Although the Florida SIP relies on measures and programs used to implement previous SO₂ NAAQS, these provisions are not limited to reducing SO₂ levels to meet one specific NAAQS and will continue to provide benefits for the 2010 1-hour SO₂ NAAQS.

Regarding the air dispersion modeling conducted by the Commenter pursuant to AERMOD for the C.D. McIntosh, Jr. Power Plant and the Crist Electric Generating Plant, EPA is not in this action making a determination regarding the air quality status in the area where these EGUs are located, and is not evaluating whether emissions applicable to these EGUs are adequate to attain and maintain the NAAQS. Consequently, the EPA does not find the modeling information relevant for review of an infrastructure SIP for purposes of section 110(a)(2)(A). When additional areas in Florida are designated under the 2010 1-hour SO₂ NAAQS, and if any additional areas in Florida are designated nonattainment in the future, any potential future modeling submitted by the State with designations or attainment demonstrations would need to account for any new emissions limitations Florida develops to support such designation or demonstration, which at this point is unknown. While EPA has extensively discussed the use of modeling for attainment demonstration purposes and for designations,⁸ EPA has recommended that such modeling was not needed for the SO₂ infrastructure SIPs for the 2010 1-hour SO₂ NAAQS for purposes of section 110(a)(2)(A), which are not actions in which EPA makes determinations regarding current air quality status. See April 12, 2012, Guidance for 1-Hour SO₂ Nonattainment Area SIP Submissions.

⁹See for example, EPA’s discussion of modeling for characterizing air quality in the Agency’s August 21, 2015, final rule at 80 FR 51052 and for nonattainment planning in the April 23, 2014, Guidance for 1-Hour SO₂ Nonattainment Area SIP Submissions.

SIP is in accordance with the April 23, 2014, guidance. If and when Florida submits an emission limitation that relies upon such a longer averaging time to demonstrate NAAQS attainment, EPA will evaluate it then.

⁸There are two designated nonattainment areas pursuant to CAA section 107 for the 2010 1-hour SO₂ NAAQS in Florida and the State has submitted attainment plans for the 2010 1-hour SO₂ NAAQS for sections 172, 191 and 192. EPA believes the appropriate time for examining the necessity of 1-hour SO₂ emission limits on specific sources is within the attainment planning process.
In conclusion, EPA disagrees with the Commenter’s statements that EPA must disapprove Florida’s infrastructure SIP submissions because it does not establish specific enforceable SO₂ emission limits, either on coal-fired EGUs or other large SO₂ sources, in order to demonstrate attainment and maintenance with the 2010 1-hour SO₂ NAAQS at this time.

Comment 8: The Commenter alleges that the SO₂ infrastructure SIP submittal does not address sources significantly contributing to nonattainment or interfering with maintenance of the 2010 1-hour SO₂ NAAQS in other states as required by section 110(a)(2)(D)(i)(I) of the CAA, and asserts EPA must therefore disapprove the infrastructure SIP and impose a FIP. The Commenter states that “Florida’s reliance on a 2012 EPA memorandum in which EPA stated that it did ‘not intend to make findings that states failed to submit SIP’s to comply with section 110(a)(2)(D)(i)(I)’ is improper”, and that such guidance contradicts the CAA. The Commenter notes that the Supreme Court disapproved the view that states cannot address section 110(a)(2)(D)(i) until EPA resolves issues related to CSAPR and that compliance with this provision is a “mandatory duty”, citing to *Homer City*, 696 F.3d 7, 37 (D.C. Cir. 2012), rev’d, No. 12–1182, slip op. at 27–28 (U.S. Apr. 29, 2014). The Commenter also highlights from Order on Petition No. VI–2014–04 at 10 (citing *EME Homer City Generation*, 134 S. Ct. 1584, 1601 (2014) that, “[t]he Supreme Court has affirmed that the EPA is not required to provide any implementation guidance before states’ interstate transport obligation can be addressed.”

Response 8: This action does not address whether sources in Florida are significantly contributing to nonattainment or interfering with maintenance of the 2010 1-hour SO₂ NAAQS in other states as required by section 110(a)(2)(D)(i)(I) of the CAA (the good neighbor provision). Thus, EPA disagrees with the Commenter’s statement that EPA must disapprove the submitted 2010 1-hour SO₂ infrastructure SIP due to Florida’s failure to address section 110(a)(2)(D)(i)(I). In EPA’s proposed rulemaking to approve Florida’s infrastructure SIP for the 2010 1-hour SO₂ NAAQS, EPA clearly stated that it was not taking any action with respect to the good neighbor provision in section 110(a)(2)(D)(i)(I). Florida did not make a submission to address the requirements of section 110(a)(2)(D)(i)(I) for the 2010 1-hour SO₂ NAAQS, and thus there is no such submission upon which EPA proposed to take action on section 110(k) of the CAA. Similarly, EPA disagrees with the Commenter’s assertion that EPA cannot approve other elements of an infrastructure SIP submission without the good neighbor provision. There is no basis for the contention that EPA has triggered its obligation to issue a FIP to address the good neighbor obligation under section 110(c), as EPA has neither found that Florida failed to timely submit a required 110(a)(2)(D)(i)(I) SIP submission for the 2010 1-hour SO₂ NAAQS or found that such a submission was incomplete, nor has EPA disapproved a SIP submission addressing 110(a)(2)(D)(i)(I) with respect to the 2010 1-hour SO₂ NAAQS.

EPA acknowledges the Commenter’s concern for the interstate transport of air pollutants and agrees in general with the Commenter that sections 110(a)(1) and (a)(2) of the CAA generally require states to submit, within three years of promulgation of a new or revised NAAQS, a plan which addresses cross-state air pollution under section 110(a)(2)(D)(i)(I). However, EPA disagrees with the Commenter’s argument that EPA cannot approve an infrastructure SIP submission without the good neighbor provision. Section 110(k)(3) of the CAA authorizes EPA to either approve it in whole, disapprove it in full, or approve it in part and disapprove it in part, depending on the extent to which such plan meets the requirements of the CAA. This authority to approve state SIP revisions in separable parts was included in the 1990 Amendments to the CAA to overrule a decision in the Court of Appeals for the Ninth Circuit holding that EPA could not approve individual measures in a plan submission without either approving or disapproving the plan as a whole. See S. Rep. No. 101–228, at 22, 1990 U.S.C.C.A.N. 3385, 3408 (discussing the express overruling of *Abramowitz v. EPA*, 832 F.2d 1071 (9th Cir. 1987)).

EPA interprets its authority under section 110(k)(3) of the CAA, as affording EPA the discretion to approve, or conditionally approve, individual elements of Florida’s infrastructure SIP submissions for the 2010 1-hour SO₂ NAAQS, separate and apart from any action with respect to the requirements of section 110(a)(2)(D)(i)(I) of the CAA with respect to that NAAQS. EPA views discrete infrastructure SIP requirements, such as the requirements of 110(a)(2)(D)(i)(I), as severable from the other infrastructure elements and interprets section 110(k)(3) as allowing it to act on individual severable measures in a plan submission. In short, EPA believes that even if Florida had made a SIP submission for section 110(a)(2)(D)(i)(I) of the CAA for the 2010 1-hour SO₂ NAAQS, which to date it has not, EPA would still have discretion under section 110(k) of the CAA to act upon the various individual elements of the State’s infrastructure SIP submission, separately or together, as appropriate.

The Commenter raises no compelling legal or environmental rationale for an alternate interpretation. Nothing in the Supreme Court’s April 2014 decision in *EME Homer City* alters EPA’s interpretation that EPA may act on individual severable measures, including the requirements of section 110(a)(2)(D)(i)(I), in a SIP submission. See *EPA v. EME Homer City Generation*, L.P., 134 S. Ct. 1584 (affirming a state’s obligation to submit a SIP revision addressing section 110(a)(2)(D)(i)(I) independent of EPA’s action finding significant contribution or interference with maintenance). In sum, the concerns raised by the Commenter do not establish that it is inappropriate or unreasonable for EPA to approve the portions of Florida’s infrastructure SIP submission for the 2010 1-hour SO₂ NAAQS.

EPA has no obligation at this time to issue a FIP pursuant to 110(c)(1) to address Florida’s obligations under section 110(a)(2)(D)(i)(I) until EPA first either finds Florida failed to make a required submission addressing the element or the State has made such a submission but it is incomplete, or EPA disapproves a SIP submission addressing that element. Until either occurs, EPA does not have the obligation to issue a FIP pursuant to section 110(c) with respect to the good neighbor provision. Therefore, EPA disagrees with the Commenter’s contention that it must issue a FIP for Florida to address 110(a)(2)(D)(i)(I) for the 2010 1-hour SO₂ NAAQS at this time.

III. Final Action

EPA is taking final action to approve Florida’s infrastructure submissions submitted on June 3, 2013, and supplemented on January 8, 2014, for the 2010 1-hour SO₂ NAAQS for the above described infrastructure SIP elements. EPA is taking final action to approve Florida’s infrastructure SIP submissions for the 2010 1-hour SO₂ emissions.
IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a).

Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States prior to publication of the rule in the Federal Register. The rule report contains this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 29, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Air Plan Approval; Indiana; Temporary Alternate Opacity Limits for American Electric Power, Rockport

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to the Indiana State Implementation Plan (SIP), authorizing temporary alternate opacity limits (TAOLs) at the American Electric Power, Rockport (AEP Rockport) facility during periods of boiler startup and shutdown. This action is consistent with the Clean Air Act (CAA), the Indiana SIP, and EPA policy regarding emissions during periods of startup and shutdown. Indiana has provided an air quality demonstration that this revision will continue to protect the applicable National Ambient Air Quality Standards (NAAQS) for fine particulate matter (PM$_{2.5}$) in Spencer County, Indiana.

DATES: This final rule is effective on October 31, 2016.

ADDRESSES: EPA has established a docket for this action under Docket ID EPA–R05–OAR–2015–0074. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Matt Rau, Environmental Engineer, at (312) 886–6524 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Matt Rau, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6524, rau.matthew@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background for this action?
II. What is EPA’s response to comment?
III. What action is EPA taking?
IV. Incorporation by Reference
V. Statutory and Executive Order Reviews

I. What is the background for this action?

EPA is approving into the Indiana SIP TAOLs for AEP Rockport Units #1 and Unit #2, which apply only during narrowly-drawn periods of boiler startup and shutdown. These two identical 1,300-megawatt coal-fired boilers are each equipped with an electrostatic precipitator (ESP) to control PM$_{2.5}$ emissions. More specifically, §226 Indiana Administrative Code (IAC) 5–1–8 authorizes AEP Rockport to exceed the applicable SIP opacity limit only under the following circumstances: (1) During startup, for a period not to exceed two hours (twenty-six minute-averaging periods), or until the flue gas temperature reaches 250 degrees Fahrenheit at the ESP inlet, whichever occurs first; and (2) during shutdown, once the flue gas temperatures has dropped below 250 degrees Fahrenheit at the ESP inlet, for a period not to exceed one and one-half hours (fifteen six-minute-averaging periods).

EPA proposed to approve these alternate limits as revisions to Indiana SIP on December 28, 2015 (80 FR 80719). In this action, EPA is responding to comments submitted in response to its proposal and approving the AEP Rockport TAOLs. This is because they meet the criteria contained in Indiana SIP rule §365 IAC 5–1–3(d) as an appropriate method in determining alternative limits for facilities during startup and shutdown periods. These limits are also consistent with the CAA and applicable EPA policy. As discussed in EPA’s proposal, AEP Rockport has met all of these criteria.

EPA has also previously approved TAOLs for 22 other Indiana power plants, all of which are controlled with ESPs (67 FR 46589, July 16, 2002). These TAOLs contained similar limits, and EPA’s basis for approval was analogous. The approach taken by Indiana in establishing all of these TAOLs is also consistent with section 110 of the CAA and the criteria contained in EPA’s September 20, 1999 guidance, “State Implementation Plans: Policy Regarding Excess Emissions During Malfunctions, Startup, and Shutdown.”

As discussed in the proposal, EPA has evaluated Continuous Opacity Monitoring System (COMS) data from the AEP Rockport facility and conducted air dispersion modeling in the surrounding area. The COMS data showed that, between 2009 and 2013, AEP’s emissions were in compliance with the SIP opacity rule 99.81 percent of the time. Conversely, AEP’s emissions exceeded the opacity standards just 0.19 percent of the time, which includes the startup and shutdown periods covered by the TAOL.

After EPA received public comments in response to the proposal, the Indiana Department of Environmental Management (IDEM) performed an additional air quality analysis in response to specific comments. AEP provided a revised emission profile for PM describing hourly emissions during a 24-hour period, including a startup event, in which the ESP would be entirely shut down during hours 9 and 10. IDEM made the conservative assumption that all of the boilers’ PM$_{10}$ emissions were 100 percent PM$_{2.5}$. The new analysis also considered two scenarios, in which one boiler is starting up while the other boiler is either not operating, or operating at its full, steady rate. Both boilers at Rockport exhaust through a common stack. The two scenarios represent the stack exhaust and dispersion rates for a boiler startup/shutdown event. IDEM modeled one scenario which assumed that the ESP is completely offline for the two hours of highest oil and coal combustion.

IDEM’s modeling followed EPA’s guidance in 40 CFR part 51, appendix W, using the current version of the AERMOD modeling system, over a full receptor grid, with five years of recent surface meteorological data from Evansville, Indiana (2010–2014). IDEM also included background from the nearby Dale monitor, in response to Sierra Club comments. The modeling with the background results yielded a 24-hour PM$_{2.5}$ value of 26.06 micrograms per cubic meter (µg/m$^3$), which is well below the 2012 24-hour PM$_{2.5}$ NAAQS of 35 µg/m$^3$.

II. What is EPA’s response to comment?

EPA received comment letters from AEP and the Sierra Club, both on January 27, 2016.

The AEP comment letter supports the approval of 326 IAC 5–1–8 into the Indiana SIP. Sierra Club’s comments are provided and addressed below.

Comment: The commenter stated that the fact that AEP Rockport often does
not meet applicable opacity limitations is not sufficient to demonstrate that it cannot meet these limits. The commenter asserts that there are numerous options that might be effective in reducing emissions during startup and shutdown periods, including revamping plant maintenance practices, installing baghouses after the ESPs to collect uncontrolled PM, and using a startup fuel other than fuel oil.

Response: The TAOLs at AEP Rockport are needed during startup and shutdown because of temperature limitations of the ESP, which has lowered efficiency at times when temperatures are below 250 degrees. (See 67 FR 46589, July 16, 2002). In addition, AEP Rockport has provided data showing that during periods of low temperature when the control technology cannot efficiently control particulates, there may be violations of the SIP opacity limits. During normal operations, however, emission limits are met. The COMs data submitted by AEP Rockport demonstrate that it has operated in a manner consistent with good air pollution control and maintenance practices. The data show that, between 2009 and 2013, the facility was in compliance 99.81 percent of the time, and exceeded the opacity standards just 0.19 percent of the time. This includes the startup and shutdown periods covered by the TAOL.

The commenter suggests that other control devices should be added to the facility, or that there should be a fuel switch. EPA disagrees for several reasons. First, considering additional controls or changes in fuel is not a criterion in the Indiana SIP for evaluating the approvability of a TAOL. In addition, even if AEP Rockport were to add or modify its control such as by adding a fabric filter (baghouse), similar technical issues could also occur during the low-temperature, low-flow scenario of startups and shutdowns.

Comment: The commenter stated that the fact that AEP Rockport often meets applicable opacity limitations during startup and shutdown proves that it can meet these limits. To support this claim, the commenter cites opacity records from the facility on two specific dates in August 1999 in which the opacity did not exceed 40 percent during one startup event and one shutdown event. While conceding that these records also show violating emissions during startups and shutdowns on other occasions, the commenter further notes that the same records show that the facility was also able to comply with the opacity limits during startups and shutdowns as recently as last year.

Response: Because AEP Rockport often meets its limits speaks to the fact that it currently operates the controls in a fashion that is consistent with the TAOL approval criterion of maintaining and operating controls in a way to minimize emissions. AEP Rockport’s control system also operates effectively during normal operations, enabling it to meet its opacity limitations. As explained in EPA’s proposal, the need for a TAOL occurs only during startup and shutdown periods—when ESP effectiveness is hampered by temperature (See 67 FR 46589, July 16, 2002).

AEP Rockport’s COM data from 2001 to 2004, and 2007 to 2013, indicate opacity exceedances during startup and shutdown periods, which shows this has been a long-running technical issue. EPA has also reviewed the opacity exceedance report summary for 2007 to 2013. It shows that AEP Rockport averaged 2 startups per year and 4.7 shutdowns per year that exceeded the opacity limitations.

There are aspects of ESP operation that cannot be predicted or controlled during unit startups. Therefore, it is impractical to set an opacity limitation during startup and shutdown periods, particularly given the noted history of limited exceedances and the potential for more irregular opacity episodes. Given that EPA expects SIP compliance 100 percent of the time, the fact that a source may “often” meet applicable emission limits is not sufficient.

Comment: The commenter stated that the air quality demonstration made in 2001 or 2004 is obsolete due to changing conditions that impact opacity compliance at the AEP Rockport. The commenter further asserted that the documents AEP submitted in support of its TAOL petition are outdated and fail to satisfy the requirements in 326 IAC 5–1–3(d)[2][B].

Response: The requirements of 326 IAC 5–1–3(d)[2][B] were fulfilled for the AEP Rockport facility with the information provided by Indiana in 2015. This is current information, as Indiana evaluated the AEP Rockport TAOLs in 2014. The current data for AEP Rockport show it operates in manner that minimizes opacity emissions during both normal operation and during startup and shutdown periods.

AEP’s updated COMs data, which reflects maintenance changes, upgrades, retrofits, or alterations at the facility, still records exceedances during some startup and shutdown events during 2009 through 2013 (data which accounts for recent changes in conditions shows that there is an ongoing technical issue with the ESP temperature limitations during start-up and shutdowns that necessitates the TAOLs.

Comment: The commenter stated that the 2004 modeling does not address the current NAAQS. The Indiana SIP requires the owner or operator to demonstrate the TAOL will not impact the maintenance of the NAAQS. The commenter asserted that AEP Rockport’s 2004 demonstration is clearly inadequate in that it does not address subsequently-adopted PM NAAQS, because the demonstration did not address the 2012 24-hour and annual PM2.5 NAAQS.

Response: The submission by Indiana contained both 2004 and updated 2013 modeling. The modeling provided to EPA for SIP approval included an analysis of both PM10 and PM2.5. The analysis used a conservative assumption that 100 percent of PM10 equals the PM2.5 concentrations emitted. EPA concurred with this analysis, which further showed that the TAOL would not interfere with the NAAQS for fine particulate matter.

In addition, in response to the comment, Indiana performed and provided EPA with an updated AERMOD modeling analysis. The modeling shows that the PM2.5 NAAQS should remain protected in Spencer County, Indiana with the TAOLs in place. More specifically, the results yielded a 24-hour PM2.5 value of 26.06 μg/m3, which is well below the 24-hour PM2.5 NAAQS of 35 μg/m3. Indiana did not address the annual PM2.5 NAAQS, as the TAOL is only intended to address short-term situations. The 24-hour PM2.5 NAAQS protects public health in this scenario. EPA also considered the 2012 NAAQS, and evaluated modeled concentrations from the TAOLs, using an hourly value of 1.59 μg/m3 from the modeled scenario that would best represent a contribution to an annual average. EPA determined that the modeled annual average combined with background concentrations (for current monitored data of 10.1 μg/m3 for 2013–2015 period, and 9.3 for the current annual period) would be less than the 2012 PM2.5 NAAQS of 12.0 μg/m3.

Comment: The commenter stated that the 2004 modeling assumes PM emission will be controlled in ways the TAOL does not require. More specifically, AEP Rockport assumed that its ESPs would be partially energized and reducing particulate matter emissions, albeit at only 60 percent efficiency. Rockport’s operating permit exempts it from running ESPs during startup and shutdown. The emissions rate both Indiana and AEP Rockport...
used is based on the assumption that AEP Rockport will take steps to minimize opacity that are not required by law.

Response: EPA believes that the modeling done in support of the TAOL is an appropriate representation of the impact of the TAOL on the NAAQS. The parameters used in the modeling are consistent with EPA SSM guidance and rules (see, e.g., 80 FR 33840), and reflect the operations at the facility, because Indiana has found through review of the reported data that AEP Rockport’s ESP typically provides 75 percent control efficiency or more during startup.

It should also be noted that AEP Rockport is subject to other rules that limit its emissions, such as the Mercury and Air Toxics (MATS) rule (40 CFR part 63, subpart UUUU). Controlling PM emissions under the MATS rule will further limit the opacity from the AEP Rockport units. Indiana’s analysis without ESP control still shows the air quality will be protected. Therefore, EPA believes that the assumption of 60 percent efficiency in the modeling is conservative, and shows that the NAAQS would be protected at a level well below the standard.

Comment: The commenter stated that the 2013 modeling is unrealistic and retains flaws from the 2004 modeling. Some of the key modeling assumptions that Indiana used are unrealistic. These assumptions cut in both directions: Some overestimate air quality impact and some underestimate air quality impact. Indiana assumed that there was no background PM2.5 concentration. Indiana’s justifications for using a zero background PM concentration do not withstand scrutiny. Assuming zero background concentration for PM2.5 produces an air quality modeling result that cannot be relied upon to show NAAQS compliance. The 2013 annual mean for PM2.5 at the Dale, Spencer County, Indiana monitor was 10.20 μg/m³. Indiana’s modeling yielded an eighth high 24-hour PM2.5 value of 22 μg/m³. Even though the methodology for calculating these values is very different, adding them yields a total of 32.2 μg/m³.

Response: The commenter notes in its own analysis that the modeling, with background concentration, still yield results that are below the standard of 35 μg/m³.

The revised modeling analysis by Indiana addressed the concerns raised by the commenter. Background data was taken from the Dale monitor in Spencer County, Indiana. AEP Rockport is also in Spencer County, Indiana, about 20 miles from the Dale monitor. The latest three years of monitoring data from 2013–2015 were used. The background value of 23 μg/m³ does include the expected impact from AEP Rockport’s startup and shutdown periods, as no adjustment to the data was made. Thus, both Indiana and EPA considered a conservative background concentration in their evaluations of the AEP Rockport TAOLs.

Indiana’s 2013 modeling is conservative in several additional ways. The dispersion modeling used averaged stack temperatures and flow rates in the startup process (which were not from the same hour the emissions value came from). Using the good engineering practice stack height of 220.7 m, instead of the actual 272.5 m stack height, also leads to a conservative estimate of dispersion and, therefore, conservatively high concentration results. The analysis used a cold-unit startup, which is expected to produce more opacity than a warm-unit startup. (A warm-unit startup is when the boiler is still warm, a scenario that could come from frequent startups and shutdowns.) Indiana used coarse particulate matter (PM10) emission rates in its modeling analysis, making the conservative assumption that those emissions were 100 percent PM2.5. Indiana compared the model result to the 24-hour PM2.5 standard and determined that the NAAQS were protected.

A scenario considering two hours of uncontrolled emissions during startup gave a maximum concentration of 3.06 μg/m³. Adding in the background concentration yields a total value of 26.06 μg/m³. A second scenario was considered with one unit starting up while the other unit is in normal operation. This scenario yields a total concentration of 24.59 μg/m³. The higher stack temperature and greater flow rate increase the dispersion characteristics leading to the lower concentration. Thus, the first scenario provides a worst-case analysis with a background concentration and no ESP operation during startup, and it still demonstrates attainment of the 24-hour PM2.5 standard.

Comment: The commenter stated that Indiana has not demonstrated that this TAOL is needed and justifiable, as required by 326 IAC 5–1–3(d)(2). The commenter noted that the Indiana SIP requires the owner to demonstrate that a particular TAOL is needed and justifiable during periods of startup and shutdown. The TAOL should be narrowly tailored and all steps must be taken to minimize emissions during startup and shutdown.

Response: The criteria for demonstrating that a TAOL is needed and justifiable are provided in SIP rule
records show opacity reaching levels near 100 percent for two hours during a startup. AEP assumed the ESPs would run at 60 percent efficiency before the flue gas temperature reaches 250 °F. Furthermore, AEP Rockport claimed that 60 percent control efficiency was a low estimate. If true, that means AEP Rockport could partially control its opacity during the startup and shutdown periods. The TAOLs simply grants AEP Rockport an unneeded, unjustified free pass during the specified time period.

Response: EPA agrees that the data indicates opacity does not approach 100 percent opacity. The opacity readings vary in time and opacity level, which makes setting numerical opacity limitations impractical. While there is not a percent opacity limit, the TAOL does provide meaningful constraints of time and temperature that the facility must follow that limits the emissions during startup and shutdowns. The TAOL for unit startup is only allowed until the exhaust temperature reaches 250 °F at the ESP inlet, up to a maximum of 20 six-minute averaging periods (2 hours). The TAOL for unit shutdown begins when the exhaust temperature declines below 250 °F at the ESP inlet and goes for up to 15 six-minute averaging periods (1.5 hours).

III. What action is EPA taking?

EPA is approving the addition of the AEP Rockport TAOL to 326 IAC 5–1–8 to the Indiana SIP. The rule provides AEP Rockport Units #1 and Unit #2 with TAOLs under certain circumstances during unit startup and shutdown periods. All available data support that the AEP Rockport TAOLs are set at an appropriate level. The AEP Rockport TAOLs meet the requirements of 326 IAC 5–1–3(d)(2). The AEP Rockport TAOLs also meet the other requirements of 326 IAC 5–1–3(d), as approved into the Indiana SIP.

This action is consistent with the CAA, the Indiana SIP, and EPA policy regarding emissions during periods of startup and shutdown. Indiana has provided an air quality analysis demonstrating that the PM2.5 NAAQS in Spencer County should continue to be protected with the revision.

IV. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Indiana Regulations described in the amendments to 40 CFR part 52 set forth below. Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA’s approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.

EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or at the EPA Region 5 Office (please contact the person identified in the FOR FURTHER INFORMATION CONTACT section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (65 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 29, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection. Air pollution control. Incorporation by reference. Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.
Dated: September 19, 2016.
Robert A. Kaplan,
Acting Regional Administrator, Region 5.

ENVIRONMENTAL PROTECTION AGENCY
40 CFR Part 97

Availability of Data on Allocations of Cross-State Air Pollution Rule Allowances to Existing Electricity Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; notice of data availability (NODA).

SUMMARY: Under the Cross-State Air Pollution Rule (CSAPR) trading program regulations, the EPA allocates emission allowances to existing electricity generating units (EGUs) as provided in a notice of data availability (NODA). In the CSAPR Update promulgated earlier this year, the EPA finalized default allocations of CSAPR NO\textsubscript{X} Ozone Season 2 allowances for the control periods in 2017 and subsequent years to existing EGUs in 22 eastern states for which the EPA finalized Federal Implementation Plans (FIPs)—Alabama, Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Mississippi, Missouri, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. Through this NODA, the EPA is providing notice of the availability of data on these allowance allocations to existing units, as well as the data upon which the allocations are based.

DATES: September 30, 2016.

FOR FURTHER INFORMATION CONTACT: Questions concerning this notice should be addressed to Michael Cohen, at (202) 343–9497 or cohen.michael@epa.gov; or Robert Miller, at (202) 343–9077 or miller.robert@epa.gov. The mailing address for each of these individuals is U.S. Environmental Protection Agency, Clean Air Markets Division, MC 6204M, 1200 Pennsylvania Avenue NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The CSAPR allowance trading programs require affected EGUs to hold emission allowances sufficient to cover their emissions of nitrogen oxides (NO\textsubscript{X}) and/or sulfur dioxide in each control period. In the CSAPR Update for the 2008 ozone National Ambient Air Quality Standards (NAAQS), the EPA established new emissions budgets for ozone season NO\textsubscript{X} emissions in 2017 and subsequent years for 22 eastern states and promulgated FIP provisions requiring affected EGUs in those states to participate in the CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program. Beginning with the 2018 control period, each covered state generally has the option to determine how the CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances in its state emissions budget should be allocated among the state’s EGUs through a State Implementation Plan (SIP) revision. However, for the 2017 control period, and by default for subsequent control periods in situations where a state has not provided the EPA with the state’s own allocations pursuant to an approved SIP revision, the allocations are made by the EPA.

In the case of units that commenced commercial operations before January 1, 2015, termed “existing” units for purposes of this trading program, the EPA determined default allocations for all control periods in the CSAPR Update rulemaking, according to a methodology finalized in the rulemaking but not included in the regulatory text. Through this NODA, the EPA is providing notice of the availability of unit-level default allocations of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for EGUs that commenced commercial operation before January 1, 2015, as required by the CSAPR regulations. The data are contained in an Excel spreadsheet titled “Unit-Level Allocations and Underlying Data for the

* * * * *

2 See 40 CFR 52.38 and 52.39.
4 See 40 CFR 97.611(a)(1). The approach of allocating emission allowances to existing EGUs as provided in a NODA was established in the original CSAPR and was unchanged in the CSAPR Update. See, e.g., 40 CFR 97.511(a)(1).
CSAPR Update for the 2008 Ozone NAAQS™ that is included in the docket for the CSAPR Update final rule and has been posted on the EPA’s Web site at https://www.epa.gov/airmarkets/final-cross-state-air-pollution-rule-update. The spreadsheet contains the default allocations of allowances for each control period starting with 2017. For EGUs in all covered states except Arkansas, the unit-level allocations in the spreadsheet are the same for each year. For EGUs in Arkansas, the unit-level allocations for many EGUs are higher for the 2017 control period because Arkansas’ 2017 ozone season NOx emissions budget is higher than its emissions budget for the control period in 2018 and subsequent years. The spreadsheet also contains the data used to compute the allocations and describes how the computations are performed. The EPA is not requesting comment on the allocations, underlying data, or allocation methodology.

The EPA notes that an allocation or lack of allocation of emission allowances to a given EGU does not constitute a determination that CSAPR does or does not apply to the EGU. The EPA also notes that allocations are subject to potential correction under the rule.

In accordance with the allowance recordation deadlines set forth in the regulations, the EPA will record allocations of CSAPR NOx Ozone Season Group 2 allowances to existing units for the 2017 control period by January 3, 2017 (the first business day on or after January 1, 2017). The EPA will also record allocations for the 2018 control period by that same date except in instances where a state has provided the EPA with timely notice of the state’s intent to submit a SIP revision with timely notice of the state’s control period by that same date except also record allocations for the 2018 control period.

For units commencing commercial operation on or after January 1, 2015, termed “new” units for purposes of the CSAPR NOx Ozone Season Group 2 Trading Program, the EPA’s default allocations for each control period are annually determined during and after the control period based on current and prior year emission data, using a methodology set out in the regulatory text.

Reid P. Harvey,
Director, Clean Air Markets Division.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 435

RIN 2040–AF68

Effluent Limitations Guidelines and Standards for the Oil and Gas Extraction Point Source Category—Implementation Date Extension

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final direct rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to extend the implementation deadline for certain facilities subject to the final rule establishing pretreatment standards under the Clean Water Act (CWA) for discharges of pollutants into publicly owned treatment works (POTWs) from onshore unconventional oil and gas (UOG) extraction facilities (81 FR 41845; June 28, 2016). EPA is making this revision in response to new information suggesting that there are likely facilities subject to the final rule not presently meeting the zero discharge requirements in the final rule.

DATES: This direct final rule is effective on November 29, 2016 without further notice, unless EPA receives adverse comment by October 31, 2016. If EPA receives adverse comment, we will publish a timely withdrawal in the Federal Register informing the public that the direct final rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. [EPA–HQ–OW–2016–0598], at http://www.regulations.gov. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (i.e. on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit https://www.epa.gov/dockets/commenting-epa-dockets.

FOR FURTHER INFORMATION CONTACT: For more information, see EPA’s Web site: https://www.epa.gov/eg/unconventional-oil-and-gas-extraction-effluent-guidelines. For technical information, contact Karen Milam, Engineering and Analysis Division (4303T), Office of Water, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone: 202–566–1915; email: milam.karen@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

Entities potentially regulated by this final action include:

<table>
<thead>

</tbody>
</table>

II. Why is EPA issuing a direct final rule?

EPA is publishing this direct final rule without a prior proposed rule because we view this as a noncontroversial action and anticipate no adverse comment. This direct final rule merely extends the implementation deadline for existing onshore UOG extraction facilities that were discharging to POTWs on or between the date of the Federal Register Notice

*See 40 CFR 97.811(a)(1).
*See 40 CFR 97.821(a).
*See 40 CFR 97.812.
*See 40 CFR 97.812.
of the proposed rule (April 7, 2015) and the date of the Federal Register Notice of the final rule (June 28, 2016) to the default three year period provided in the General Pretreatment Regulations. This direct final rule does not otherwise amend the final pretreatment standards rule in any way. In the “Proposed Rules” section of today’s Federal Register, however, we are publishing a separate document that will serve as the proposed rule to extend the implementation date if we receive adverse comments on this direct final rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this direct final rule, see the ADDRESSES section of this document.

If EPA receives adverse comment, we will publish a timely withdrawal in the Federal Register informing the public that this direct final rule will not take effect. We would address all public comments in any subsequent final rule based on the proposed rule.

III. Supplementary Information

A. Background

EPA promulgated revisions to Effluent Guidelines and Standards for the Oil and Gas Extraction Point Source Category which established pretreatment standards for onshore unconventional oil and gas extraction facilities (81 FR 41845, June 28, 2016). In this final rule, EPA established pretreatment standards prohibiting the discharge of pollutants in UOG extraction wastewater to POTWs, and established an effective date of August 29, 2016. In the preamble to the final rule, EPA indicated that because UOG facilities were currently meeting this zero discharge requirement, the implementation deadline for these pretreatment standards would be the same as the effective date of the final rule. After promulgation of the final rule, EPA received two letters indicating that EPA was likely to discharge UOG extraction wastewater to POTWs; this is new information to EPA.

B. Description of EPA’s Action

Based on this post-promulgation information submitted to EPA suggesting that there are likely facilities subject to the final pretreatment standards rule that are currently discharging UOG wastewater to POTWs, EPA is extending the implementation deadline for existing sources that were lawfully discharging wastewater to POTWs on or between April 7, 2015 and June 28, 2016 to three years from the effective date of the rule—August 29, 2019. This direct final rule does not change the compliance date for all other facilities subject to the final onshore UOG extraction pretreatment standards rule. The final pretreatment standards did not specify a compliance date in the regulatory text; rather, EPA included a compliance date equal to the effective date of the rule in the preamble to the rule, based on the Agency’s record indicating that no facilities were discharging UOG wastewater to POTWs. Because of post-promulgation information indicating that some facilities are likely discharging UOG wastewater to POTWs, EPA is extending the compliance date for these facilities. EPA notes that specifying a compliance date of three years from the effective date of the final pretreatment standards rule is consistent with EPA’s General Pretreatment Regulations, which require existing sources to meet categorical pretreatment standards within three years of the effective date of such standards, unless a shorter compliance time is specified therein. 40 CFR 403.6(b). For purposes of this direct final rule, compliance date and implementation date are used interchangeably.

EPA will not consider any comment submitted on the direct final rule published today on any topic other than the appropriateness of an extension of the compliance date; any other comments will be considered to be outside the scope of this rulemaking.

IV. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993) and Executive Order 13563 (76 FR 3821, January 21, 2011), this action is not a “significant regulatory action” and is therefore not subject to OMB review. With respect to the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), this action will not have a significant economic impact on a substantial number of small entities—as this direct final relieves regulatory burden by extending the compliance date for any business (including small businesses) that were discharging UOG wastewater to POTWs at the time of issuance of the pretreatment standard. For the Sections 202 and 205 of the Unfunded Mandates Reform Act of 1999 (UMRA) (Pub. L. 102–382, October 4, 1993), this action does not significantly or uniquely affect small governments. The action imposes no incremental enforceable duty on any state, local or tribal governments or the private sector. This action does not create new binding legal requirements that substantially and directly affect Tribes under Executive Order 13175 (65 FR 67249, November 9, 2000). This action does not have significant Federalism implications under Executive Order 13132 (64 FR 43255, August 10, 1999). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 et seq., nor does it require any special considerations under Executive Order 12898, entitled Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (59 FR 7629, February 16, 1994). This action does not involve technical standards; thus, the requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

Congressional Review Act

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 435

Environmental protection, Pretreatment, Waste treatment and disposal, Water pollution control, Unconventional oil and gas extraction.

Gina McCarthy,
Administrator.

Therefore, 40 CFR part 435 is amended as follows:

PART 435—OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

■ 1. The authority citation for part 435 continues to read as follows:

Subpart C—Onshore Subcategory

■ 2. Add paragraph (a)(3) to §435.33 to read as follows:

§435.33 Pretreatment standards for existing sources (PSES).

(a) * * *
ENDANGERED AND THREATENED WILDLIFE AND PLANTS; THREATENED SPECIES STATUS FOR THE EASTERN MASSASAUGA RATTLESNAKE

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

50 CFR Part 17

RIN 1018–BA98

Endangered and Threatened Wildlife and Plants; Threatened Species Status for the Eastern Massasauga Rattlesnake

AGENCY: Fish and Wildlife Service.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), determine threatened species status under the Endangered Species Act of 1973 (Act), as amended, for the eastern massasauga rattlesnake (Sistrurus catenatus), a rattlesnake species found in 10 States and 1 Canadian Province. The rule adds this species to the Federal List of Endangered and Threatened Wildlife. We have also determined that the designation of critical habitat for the eastern massasauga rattlesnake is not prudent due to an increased risk of collection and persecution.

DATES: This rule is effective October 31, 2016.

ADDRESSES: This final rule is available on the Internet at http://www.regulations.gov and http://www.fws.gov/midwest/endangered/reptiles/eama/index.html. Comments and materials we received, as well as supporting documentation we used in preparing this rule, are available for public inspection at http://www.regulations.gov or by appointment, during normal business hours at: U.S. Fish and Wildlife Service, Chicago Ecological Services Field Office, 230 South Dearborn, Suite 2938, Chicago, IL 60604; telephone 312–216–4720.

South Dearborn, Suite 2938, Chicago, IL 60604; telephone 312–216–4720. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, a species may warrant protection through listing if it is endangered or threatened throughout all or a significant portion of its range. Listing a species as an endangered species or threatened species can only be completed by issuing a rule. Additionally, under the Act, critical habitat shall be designated, to the maximum extent prudent and determinable, for any species determined to be an endangered species or threatened species under the Act. We have determined that designating critical habitat is not prudent for the eastern massasauga rattlesnake due to an increased risk of collection and persecution.

This rule makes final the listing of the eastern massasauga rattlesnake (Sistrurus catenatus) as a threatened species.

The basis for our action. Under the Act, we can determine that a species is an endangered or threatened species based on any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. Although there are several factors that are affecting the eastern massasauga rattlesnake’s status, the loss of habitat was historically, and continues to be, the primary threat, either through development or through changes in habitat structure due to vegetative succession.

Peer review and public comment. A Species Status Assessment (SSA) team prepared an SSA report (Szymanski et al. 2016) for the eastern massasauga rattlesnake. The SSA team was composed of Service biologists, in consultation with other species experts. The SSA represents a compilation of the best available scientific and commercial data concerning the biological status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the eastern massasauga rattlesnake. We sought comments on the SSA from independent specialists to ensure that our determination is based on scientifically sound data, assumptions, and analyses. We invited these peer reviewers to comment on our listing proposal. We also considered all comments and information we received during the comment period.

Previous Federal Actions

On September 30, 2015, the Service published a proposed rule (80 FR 58688) to list the eastern massasauga rattlesnake as a threatened species under the Act (16 U.S.C. 1531 et seq.). We accepted public comments on the proposed rule for 60 days, ending November 30, 2015. Please refer to the proposed rule (80 FR 58688; September 30, 2015) for a detailed description of previous Federal actions concerning this species.

Background

Please refer to the proposed listing rule (80 FR 58688; September 30, 2015) for a summary of species information.

Summary of Biological Status and Threats

The Act directs us to determine whether any species is an endangered species or a threatened species because of any factors affecting its continued existence. We completed a comprehensive assessment of the biological status of the eastern massasauga rattlesnake, and prepared the SSA report, which provides a thorough description of the species’ overall viability. We generally defined viability as the ability of the species to maintain self-sustaining populations over the long term. We used the conservation biology principles of resiliency, representation, and redundancy in our analysis. Briefly, resiliency is the ability of the species to withstand environmental stochasticity (unpredictable fluctuations in environmental conditions (for example, wet or dry, warm or cold years)); redundancy is the ability of the species to withstand catastrophic events (for example, droughts, hurricanes); and representation is the ability of the species to adapt over time to long-term...
changes in the environment (for example, climate changes). In general, the more redundant, representative, and resilient a species is, the more likely it is to sustain populations over time, even under changing environmental conditions. Using these principles, we considered the eastern massasauga rattlesnake’s needs at the individual, population, and species scales. We also identified the beneficial factors and stressors influencing the species’ viability. We considered the degree to which the species’ ecological needs are met both currently and as can be reliably forecasted into the future, and we assessed the consequences of any unmet needs as they relate to species viability. In this section, we summarize the conclusions of the SSA, which can be accessed in the SSA report at http://www.fws.gov/midwest/Endangered/ and at http://www.regulations.gov under Docket No. FWS–R3–ES–2015–0145.

For survival and reproduction at the individual level, the eastern massasauga rattlesnake requires appropriate habitat, which varies depending on the season and its life stage (see Background section of the proposed listing rule at 80 FR 58688, September 30, 2015). During the winter (generally October through March), they occupy hibernacula, such as crayfish burrows. Hydrology at eastern massasauga rattlesnake sites is important in maintaining conditions with high enough water levels to support the survival of hibernating eastern massasauga rattlesnakes. During their active season (after they emerge from hibernacula), they require sparse canopy cover and sunny areas (interspersed with shaded areas) for thermoregulation (basking and retreat sites), abundant prey (foraging sites), and the ability to escape predators (retreat sites). Habitat structure, including early successional stage and low canopy cover, appears to be more important for eastern massasauga rattlesnake habitat than plant community composition or soil type. Maintaining such habitat structure may require periodic management of most habitat types occupied by the eastern massasauga rattlesnake.

At the population level, the eastern massasauga rattlesnake requires sufficient population size, population growth, survivorship (the number of individuals that survive over time), recruitment (adding individuals to the population through birth or immigration), and population structure (the number and age classes of both sexes) to be sustainable over the long term. Populations also require a sufficient quantity of high-quality microhabitats with intact hydrological and ecological processes that maintain suitable habitat, and connectivity among these microhabitats. In the SSA report, a self-sustaining population of eastern massasauga rattlesnakes is defined as one that is demographically, genetically, and physiologically robust (a population with 50 or more adult females and a stable or increasing growth rate), with a high level of persistence (a probability of persistence greater than 0.9) given its habitat conditions and the risk or beneficial factors operating on it. We relied on a population-specific model developed by Faust et al. (2011, entire) (hereafter referred to as the Faust model) to assess the health of populations across the eastern massasauga rattlesnake’s range. Faust and colleagues developed a generic, baseline model for a hypothetical, healthy (growing) eastern massasauga rattlesnake population. Using this baseline model and site-specific information, including population size estimate, stressors operating at the site, and potential future management changes that might address those stressors, the Faust model forecasted the future condition of 57 eastern massasauga rattlesnake populations over three different time spans (10, 25, and 50 years) (for more details on the Faust model, see pp. 4–6 in the SSA report). We extrapolated the Faust model results and supplemental information gathered since 2011 to forecast the future conditions of the other (non-modeled; n = 290) eastern massasauga rattlesnake populations.

At the species level, the eastern massasauga rattlesnake requires multiple (redundant), self-sustaining (resilient) populations distributed across areas of genetic and ecological diversity (representative) to be sustainable over the long term. Using the literature on distribution of genetic diversity across the range of this species, we identified three geographic “analysis units” corresponding to “clumped” genetic variation patterns across the eastern massasauga rattlesnake populations (see Figure 1, below). A reasonable conclusion from the composite of genetic studies that exist (Gibbs et al. 1997, entire; Andre 2003, entire; Chiucchi and Gibbs 2010, entire; Ray et al. 2013, entire) is that there are broad-scale genetic differences across the range of the eastern massasauga rattlesnake, and within these broad units, there is genetic diversity among populations comprising the broad units. Thus, we interpret these genetic variation patterns to represent areas of unique adaptive diversity. We subsequently used these analysis units (western, central, and eastern) to structure our analysis of viability with regards to representation.

Species’ Current Condition

The documented historical range of the eastern massasauga rattlesnake included sections of western New York, western Pennsylvania, southeastern Ontario, the upper and lower peninsulas of Michigan, the northern two-thirds of Ohio and Indiana, the northern three-quarters of Illinois, the southern half of Wisconsin, extreme southeastern Minnesota, east-central Missouri, and the eastern third of Iowa. The limits of the current range of the species resemble the boundaries of its historical range; however, the geographic distribution of extant localities has been restricted by the loss of populations from much of the area within the boundaries of that range. As a result of the stressors acting on eastern massasauga rattlesnake populations, the resiliency of the eastern massasauga rattlesnake across its range and within each of the three analysis units has declined from its historically known condition. Rangewide, there are 558 known historical eastern massasauga rattlesnake populations, of which 263 are known to still be extant, 211 are likely extirpated or known extirpated, and 84 are of unknown status. For the purposes of our assessment, we considered all populations with extant or unknown statuses to be currently extant (referred to as presumed extant, n = 347). Of those 347 populations presumed extant, 40 percent (n = 139) are likely quasi-extirpated (have 25 or fewer adult females, which was considered by the Faust model to be too small to be viable (see the SSA report, pp. 46–47, for details)). The rangewide number of presumed extant populations has declined from the number that was known historically by 38 percent (and 24 percent of the presumed extant populations have unknown statuses). Of those populations presumed extant, 139 (40 percent) are presumed to be quasi-extirpated while 105 (30 percent) are presumed to be demographically, genetically, and physiologically robust (see Table 1, below). Of these presumed demographically, genetically, and physiologically robust populations, 19 (0.5 percent of the presumed extant populations) are presumed to have conditions (stressors affecting the species at those populations are nonexistent or of low impact) suitable for maintaining populations over time and, thus, are self-sustaining. The greatest declines in recent years occurred in the western analysis unit, where only 20 populations are presumed extant.
and, of these, only 1 population is presumed to be self-sustaining. Loss of resiliency has also occurred, although to a lesser degree, in the central and eastern analysis units, where only 23 and 6 populations, respectively, are presumed to be self-sustaining.

The degree of representation, as measured by spatial extent of occurrence (a measurement of the spatial spread of the areas currently occupied by a species), across the range of the eastern massasauga rattlesnake has declined, as illustrated by the higher proportion of populations lost in the southern and western part of the range and by the loss of area occupied within the analysis units (see Figure 1, below; see also pp. 52–55 in the SSA report). Overall, there has been more than a 41 percent reduction of extent of occurrence (as measured by a reduction in area) rangewide (see Table 2, below). This loss has not been uniform, with the western analysis unit encompassing most of this decline (70 percent reduction in extent of occurrence in the western analysis unit). However, losses of 33 percent and 26 percent of the extent of occurrence in the central analysis unit and eastern analysis unit, respectively, are notable as well. The results are not a true measure of area occupied by the species, but rather a coarse evaluation to make relative comparison among years. The reasons for this are twofold: (1) The calculations are done at the county, rather than the population, level; and (2) if at least one population was projected to be extant, the entire county was included in the analysis, even if other populations in the county were projected to be extirpated. Assuming that the loss of extent of occurrence equates to loss of adaptive diversity, the degree of representation of the eastern massasauga rattlesnake has declined since historical conditions.

The redundancy of the eastern massasauga rattlesnake has also declined since historical conditions. We evaluated the effects of potential catastrophic drought events on the eastern massasauga rattlesnake. Extreme fluctuations in the water table may negatively affect body condition for the following active season, cause early emergence, or cause direct mortality (Harvey and Weatherhead 2006, p. 71; Smith 2009, pp. vii, 33, 38–39). Changes in water levels under certain circumstances can cause mortality to individuals, particularly during hibernation (Johnson et al. 2000, p. 26; Kingsbury 2002, p. 38), when the snakes are underwater. The water in the hibernacula protects the eastern massasauga rattlesnake from dehydration and freezing, and, therefore, dropping water levels in the winter leaves the snakes vulnerable to both (Kingsbury 2002, p. 38; Moore and Gillingham 2006, p. 750; Smith 2009, p. 5). Because individual eastern massasauga rattlesnakes often return to the same hibernacula year after year, dropping water levels in hibernacula could potentially decimate an entire population if the majority of individuals in that population hibernate in the same area.

We assessed the vulnerability of unit-wide extirpation due to varying drought intensities, as summarized below (for a detailed description of the analysis, see the SSA report, pp. 55–60, 81–82). The Drought Monitor (a weekly map of drought conditions that is produced jointly by the National Oceanic and Atmospheric Administration, the U.S. Department of Agriculture, and the National Drought Mitigation Center (NDMC) at the University of Nebraska-Lincoln) classifies general drought areas by intensity, with D1 being the least intense drought and D4 being the most intense drought. For the eastern massasauga rattlesnake, the risk of unit-wide extirpation due to a catastrophic drought varies by analysis unit and by the level of drought considered. Experts believe drought intensities of magnitude D2 or higher are likely to make the species more vulnerable to overwinter mortality and cause catastrophic impacts to eastern massasauga rattlesnake populations. In the central and eastern analysis units, the annual frequency rate for a D3 or D4 drought is zero, so there is little to no risk of unit-wide extirpation regardless of how broadly dispersed the species is within the unit. In the eastern analysis unit, the annual frequency rate for a D2 drought is zero. Portions of the central analysis unit are at risk of a D2-level catastrophic drought; populations in the southern portion of the central analysis unit and scattered portions in the north are at risk from such a drought. In the western analysis unit, the risk of unit-wide extirpation based on the frequency of a D3 drought is low, but the risk of
losing clusters of populations within the western analysis unit is notable; 5 of the 8 population clusters are vulnerable to a catastrophic drought. The probability of unit-wide extirpation in the western analysis unit is notably higher with D2 frequency rates; 7 of the 8 clusters of populations are at risk of D2-level catastrophic drought. Thus, the probability of losing most populations within the western analysis unit due to a catastrophic drought is high (0.82 probability of unit-wide extirpation).

Assessment of Threats and Conservation Measures

The most prominent stressors affecting the eastern massasauga rattlesnake include habitat loss and fragmentation, especially through development and vegetative succession; road mortality; hydrologic alteration (hydrologic drawdown) resulting in drought or artificial flooding; persecution; collection; and mortality of individuals as a result of habitat management that includes post-emergent (after hibernation) prescribed fire and mowing for habitat management. Habitat loss includes direct habitat destruction of native land types (for example, grassland, swamp, fen, bog, wet prairie, sedge meadow, marshland, peatland, floodplain forest, coniferous forest) due to conversion to agricultural land, development, and infrastructure associated with development (roads, bridges). Because eastern massasauga rattlesnake habitat varies seasonally and also varies over its range, the destruction of parts of a population’s habitat (for example, hibernacula or gestational sites) may cause a negative effect to individual snakes, thus reducing the numbers of individuals in a population and, in turn, reducing the viability of that population. Habitat is also lost due to invasion of nonnative plant species, dam construction, fire suppression, manipulation of ground water levels, and other incompatible habitat modifications (Jellen 2005, p. 33). These habitat losses continue even in publicly held areas protected from development.

Vegetative succession is a major contributor to habitat loss of the eastern massasauga rattlesnake (Johnson and Breisch 1993, pp. 50–53; Reinert and Buskar 1992, pp. 56–58). The open vegetative structure, typical of eastern massasauga rattlesnake habitat, provides the desirable thermoregulatory areas, increases prey densities by enhancing the growth of sedges and grasses, and provides retreat sites. Degradation of eastern massasauga rattlesnake habitat typically happens through woody vegetation encroachment or the introduction of nonnative plant species. These events alter the structure of the habitat and make it unsuitable for the eastern massasauga rattlesnake by reducing and eventually eliminating thermoregulatory and retreat areas. Fire suppression has promoted vegetative succession and led to the widespread loss of open canopy habitats through succession (Kingsbury 2002, p. 37). Alteration in habitat structure and quality can also affect eastern massasauga rattlesnakes by reducing the forage for the species’ prey base (Kingsbury 2002, p. 37).

Roads, bridges, and other structures constructed in eastern massasauga rattlesnake habitat fragment the snakes’ habitat and impact the species both through direct mortality as snakes are killed trying to cross these structures (Shepard et al. 2008b, p. 6), as well as indirectly through the loss of access to habitat components necessary for the survival of the snakes.

Because of the fear and negative perception of snakes, many people have a low interest in snakes or their conservation and consequently large numbers of snakes are deliberately killed (Whitaker and Shine 2000, p. 121; Alves et al. 2014, p. 2). Human-snake encounters frequently result in the death of the snake (Whitaker and Shine 2000, pp. 125–126). Given the species’ site fidelity and ease of capture once located, the eastern massasauga rattlesnake is particularly susceptible to collection. Poaching and unauthorized collection of the eastern massasauga rattlesnake for the pet trade is a factor contributing to declines in this species (for example, Jellen 2005, p. 11; Baily et al. 2011, p. 171).

Assessing the occurrence of the above-mentioned stressors, we found that 94 percent of the presumed extant eastern massasauga rattlesnake populations have at least one stressor (with some degree of impact on the species) currently affecting the site. Habitat loss or modification is the most commonly occurring stressor (see Figure 2, below). Some form of habitat loss or modification is occurring at 55 percent of the sites; 3 percent of these sites are at risk of total habitat loss (all habitat at the site being destroyed or becoming unusable by the species). Fragmentation is the second most common factor (49 percent of sites), and unmanaged vegetative succession is the third most common factor (31 percent of sites). Among the other stressors, road mortality occurs at 20 percent, collection or persecution at 17 percent, water fluctuation at 7 percent, and pre-or post-emergent fire at less than 1 percent of the sites.
We also considered the magnitude of impact of the various stressors (see Figure 3, below). The Faust model indicates that the stressors most likely to push a population to quasi-extirpation within 25 years (high magnitude stressors) are late-stage vegetative succession, high habitat fragmentation, moderate habitat fragmentation, total habitat loss, and moderate habitat loss or modification. Our analysis shows that 84 percent of eastern massasauga rattlesnake populations are impacted by at least one high magnitude stressor, and 63 percent are affected by multiple high magnitude stressors. These stressors are chronic and are expected to continue with a similar magnitude of impact into the future, unless ameliorated by increased implementation of conservation actions. Furthermore, these multiple factors are not acting independently, but are acting together, which can result in cumulative effects that lower the overall viability of the species. For a description of the methods used in this threats assessment, refer to pages 39–43 of the SSA report.
In addition to the above stressors, other factors may be affecting individuals. Disease (whether new or currently existing at low levels but increasing in prevalence) is another emerging and potentially catastrophic stressor to eastern massasauga rattlesnake populations. In the eastern and Midwestern United States, the eastern massasauga rattlesnake is specifically vulnerable to disease due to *Ophidiomyces* fungal infections (snake fungal disease (SFD)). The emergence of SFD has been recently documented in the eastern massasauga rattlesnake (Allender *et al.* 2011, pp. 2383–2384) and many other reptiles (Cheatwood *et al.* 2003, pp. 333–334; Clark *et al.* 2011, p. 890; Paré *et al.* 2003, pp. 12–13; Rajeev *et al.* 2009, pp. 1265–1267; Sigler *et al.* 2013, pp. 3343–3344; Sleeman 2013, p. 1), and is concerning because of its broad geographic and taxonomic distributions. However, we did not have sufficient information on the emergence and future spread of SFD or other diseases to reliably model this stressor for forecasting future conditions for the rattlesnake. Our quantitative modeling analysis also does not consider two other prominent stressors, road mortality and persecution and collection, due to a lack of specific information on the magnitude of impacts from these factors. Additionally, this species is vulnerable to the effects of climate change through increasing intensity of winter droughts and increasing risk of summer floods, particularly in the southwestern part of its range (Pomara *et al.*, undated; Pomara *et al.* 2014, pp. 95–97). Thus, while we acknowledge and considered that disease, road mortality, persecution and collection, and climate changes are factors that affect the species, and which may increase or exacerbate existing threats in the future, our viability assessment does not include a quantitative analysis of these stressors.

The eastern massasauga rattlesnake is State-listed as endangered in Iowa, Illinois, Indiana, New York, Ohio, Pennsylvania, and Wisconsin, and is listed as endangered in Ontario. In Michigan, the species is listed as "special concern," and a Director of Natural Resources Order (No. DFI–166.98) prohibits take except by permit. Of the 263 sites with extant eastern massasauga populations rangewide, 62 percent (164) occur on land (public and private) that is considered protected from development; development at the other 38 percent of sites may result in loss or fragmentation of habitat. Signed candidate conservation agreements with assurances (CCAs) with the Service exist for one population in Ohio, one population in Wisconsin, and populations on State-owned lands in Michigan. These CCAs include actions to mediate the stressors acting upon the populations and provide management prescriptions to perpetuate eastern massasauga rattlesnakes on these sites. The Wisconsin Department of Natural Resources (DNR) developed a CCAA for one population in Wisconsin. Through the agreement, existing savanna habitat on State land, especially important to gravid (pregnant) females, will be managed to maintain and expand open canopy habitat, restore additional savanna habitat, and enhance connectivity between habitat areas. In Ohio, a CCAA for a State Nature Preserve population addresses threats from habitat loss from the prevalence of late-stage successional vegetation, the threat of fire both pre- and post-emergence of eastern massasauga rattlesnakes, and limited connectivity through habitat fragmentation. The State of Michigan developed a CCAA that will provide for management of eastern massasauga rattlesnakes on State-owned lands. This area includes 33 known eastern massasauga occurrences, which represents approximately 34 percent of the known extant occurrences within the State and.
10 percent rangewide. In addition, other eastern massasauga rattlesnake sites on county- or municipally owned land, as well as on privately owned land, could be included in the CCAA through Certificates of Inclusion issued by the Michigan Department of Natural Resources (MI DNR) prior to the effective date of listing (see DATES, above). The CCAA includes management strategies with conservation measures designed to benefit the eastern massasauga rattlesnake; these management strategies will be implemented on approximately 136,311 acres (55,263 hectares) of State-owned land. Many of these management actions are ongoing, but we do not have site-specific data on these management actions to include them in our analysis in the SSA. Nonetheless, we determine that the management actions proposed will address some of the threats (for example, habitat loss, vegetative succession) impacting populations on State lands in Michigan.

We did not assess the CCAs under our Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE policy) (68 FR 15100; March 28, 2003) because the plans cover only a small part of the range of the species, and the conservation measures in the plans will not change the overall biological status of the species.

We have information that at an additional 22 sites (that are not covered by a CCAA), habitat restoration or management, or both, is occurring; however, we do not have enough information for these sites to know if habitat management has mediated the current stressors acting upon the populations. The Faust model, however, did include these kinds of activities in the projections of trends, and, thus, our future condition analyses are based on the assumption that ongoing restoration would continue into the future. Lastly, an additional 18 populations have conservation plans in place. Although these plans are intended to manage for the eastern massasauga rattlesnake, sufficient information is not available to assess whether these restoration or management activities are currently ameliorating the stressors acting upon the population. Thus, we were unable to include the potential beneficial impacts into our quantitative analyses.

Species’ Projected Future Condition

To assess the future resiliency, representation, and redundancy of the eastern massasauga rattlesnake, we used the Faust model results to predict the number of self-sustaining populations likely to persist over the next 10, 25, and 50 years, and extrapolated those proportions to the remaining presumed extant populations to forecast the number of self-sustaining populations likely to persist at the future time scales. We then predicted the change in representation and redundancy. The most pertinent results are summarized below. For the full results for all time periods, refer to pages 61–76 of the SSA report.

The projected future resiliency (the number of self-sustaining populations) varies across the eastern massasauga rattlesnake’s range. In the western analysis unit, 83 percent of the modeled populations are projected to have a declining trajectory. Furthermore, 94 percent of the populations have a low probability of persistence (the probability of remaining above the quasi-extirpated threshold of 25 adult females is less than 90 percent) by year 25, and, thus, the number of forecasted populations likely to be extant declines over time. By year 50, 18 of the 20 presumed extant populations are projected to be extirpated (no individuals remain) or quasi-extirpated, with only 1 population projected to be self-sustaining. The resiliency of the western analysis unit is forecasted to decline over time. The situation is similar in the central and eastern analysis units, but to a lesser degree. In the central analysis unit, 70 percent of the modeled populations are projected to have a declining trajectory and 78 percent a low probability of persistence, and thus, by year 50, 180 of the 256 presumed extant populations are projected to be extirpated or quasi-extirpated, and 47 populations to be self-sustaining. In the eastern analysis unit, 83 percent of the modeled populations are projected to have a declining trajectory and 92 percent of the populations are projected to have a low probability of persistence, and, thus, by year 50, 65 of the 71 presumed extant populations are projected to be extirpated or quasi-extirpated, and 6 to be self-sustaining. Rangewide, 54 (16 percent) of the populations that are currently presumed to be extant are projected to be self-sustaining by year 50.

We calculated the future extent of occurrence (representation) for the 57 modeled populations (Faust model) and for the populations forecasted to persist at years 10, 25, and 50 by using the counties occupied by populations to evaluate the proportions of the range falling within each analysis unit and the change in spatial distribution within each analysis unit. Our results indicate that eastern massasauga rattlesnake populations are likely to persist in all three analysis units; however, the distribution of the range is predicted to contract northeasterly, and the geographic area occupied will decline within each analysis unit over time. The results project an 80 percent reduction of the area occupied by the eastern massasauga rattlesnake rangewide by year 50, with the western analysis unit comprising most of the decline (91 percent reduction within the unit).

These projected declines in extent of occurrence across the species’ range and within the analysis units suggest that loss of adaptive diversity is likely to occur.

We assessed the ability of eastern massasauga rattlesnake populations to withstand catastrophic events (redundancy) by predicting the number of self-sustaining populations in each analysis unit and the spatial dispersion of those populations relative to future drought risk.

The projected future redundancy (the number and spatial dispersion of self-sustaining populations) across the eastern massasauga rattlesnake’s range varies. In the western analysis unit, the risk of analysis-unit-wide extirpations from either a D2 or D3 catastrophic drought is high, given the low number of populations forecasted to be extant. Coupling this with a likely concurrent decline in population clusters (reduced spatial dispersion), the risk of analysis-unit-wide extirpation is likely even higher. Thus, the level of redundancy in the western analysis unit is projected to decline into the future.

Conversely, in the eastern analysis unit, there is little to no risk of a D2- or D3-level drought, and consequently the probability of unit-wide extirpation due to a catastrophic drought is very low. Thus, redundancy, from a catastrophic drought perspective, is not expected to decline over time in the eastern analysis unit.

Similarly, in the central analysis unit, there is little to no risk of a D3 catastrophic drought. The southern and northern portions of the central analysis unit, however, are at risk of a D2-level catastrophic drought. Losses of populations in these areas may lead to portions of the central analysis unit being extirpated and will also increase the probability of analysis-unit-wide extirpation. However, the risk of analysis-unit-wide extirpation will likely remain low given the presumed persistence of multiple populations scattered throughout low drought risk areas. Thus, from a drought perspective, the level of redundancy is not likely to be noticeably reduced in the central analysis unit (see Figure 4.3 (p. 60) in
the SSA report for a detailed map). A caveat to this conclusion, however, is that the forecasted decline in extent of occurrence suggests our data are too coarse to tease out whether the forecasted decline in populations will lead to substantial losses in spatial distribution, and, thus, the risk of analysis-unit-wide extirpation might be higher than predicted. Therefore, the future trend in the level of redundancy in the central analysis unit is less clear than for either the western analysis unit or the eastern analysis unit.

Given the loss of populations to date, portions of the eastern massasauga rattlesnake’s range are in imminent risk of extirpation in the near term. Specifically, our analysis suggests there is a high risk of extirpation of the western analysis unit and of southern portions of the central and eastern analysis units within 10 to 25 years. Although self-sustaining populations are expected to persist, loss of other populations within the central and eastern analysis units are expected to continue as well, and, thus, those populations are at risk of extirpation in the future. These losses have led to reductions in resiliency and redundancy across the range and may lead to irreplaceable loss of adaptive diversity across the range of the eastern massasauga rattlesnake, thereby leaving the eastern massasauga rattlesnake less able to adapt to a changing environment into the future. Thus, the viability of the eastern massasauga rattlesnake has declined and is projected to continue to decline over the next 50 years.

The reader is directed to the SSA report for a more detailed discussion of our evaluation of the biological status of the eastern massasauga rattlesnake and the influences that may affect its continued existence. Our conclusions are based upon the best available scientific and commercial data.

Summary of Changes From the Proposed Rule

In preparing this final rule, we reviewed and fully considered comments from the public and peer reviewers on the proposed rule. This final rule incorporates minor changes to our proposed listing based on the comments we received, as discussed below in Summary of Comments and Recommendations, and newly available scientific data. The SSA report was updated based on additional data provided, primarily by State fish and wildlife agencies. These data allowed us to refine site-specific information and improve our understanding of status for several populations. Thus, the final numerical results in the second version of the SSA report are slightly different from those in the first version that was used for the proposed rule. None of the new information we received changed our determination in this final rule that the eastern massasauga rattlesnake is a threatened species.

Summary of Comments and Recommendations

In the proposed rule published on September 30, 2015 (80 FR 58668), we requested that all interested parties submit written comments on the proposal by November 30, 2015. We also contacted appropriate Federal and State agencies, scientific experts and organizations, and other interested parties and invited them to comment on the proposal. Newspaper notices inviting general public comment were published in USA Today. We did not receive any requests for a public hearing. All substantive information provided during the comment period has either been incorporated directly into this final determination or is addressed below.

Peer Reviewer Comments

In accordance with our peer review policy published on July 1, 1994 (59 FR 34270), we solicited review of the SSA report from 32 knowledgeable individuals with scientific expertise that included familiarity with eastern massasauga rattlesnake and its habitat, biological needs, and threats. We received responses from 21 of the peer reviewers.

We reviewed all comments we received from the peer reviewers for substantive issues and new information regarding the eastern massasauga rattlesnake. Peer reviewer comments are addressed in an appendix to the SSA report, and in the SSA itself, as appropriate.

Federal Agency Comments

(1) Comment: The U.S. Forest Service (Huron-Manistee National Forest) stated that there is a need to differentiate between upland and lowland habitat in regard to seasonal restrictions on prescribed burning within management units of the Huron-Manistee National Forest where eastern massasauga rattlesnakes occur. The Forest Service cited a conservation plan (Kingsbury 2002) that stated that upon emerging from hibernation, most eastern massasauga rattlesnakes are lethargic and constrained by cool temperatures, and so remain in the vicinity of their wetland burrows through mid-May. They also recommended that the Service provide a framework for allowing prescribed fire in upland habitats until May 15 in ways that do not violate section 9 of the Act.

Our Response: We agree that the best available information suggests that, upon emerging from hibernation, most eastern massasauga rattlesnakes do remain lethargic, and stay in the vicinity of their burrows (usually located in wetlands) for up to several weeks, and during that time they are especially vulnerable to risks from predation, prescribed fire, or other sources of mortality. Prior to emergence from hibernation, when eastern massasauga rattlesnakes still have some protection in the confines of the burrows in which they hibernate, they are relatively protected from sources of mortality that would take place on the surface. Thus, risk of mortality caused by prescribed fire is greatest when snakes are above ground (Durban 2006, pp. 329–330; Cross et al. 2015, pp. 346–347). Many populations of eastern massasauga rattlesnakes are small, and in such populations, loss of only a few individuals can have significant impacts (Seigel and Sheil 1999, p. 260), and prescribed fire was one of the most prominent stressors we identified in the SSA for the eastern massasauga rattlesnake.

Unfortunately, within the range of this species, unpredictable late winter or spring weather patterns, and resulting ground conditions (such as humidity, snow cover, prevailing winds), provide a number of constraints to land managers who need to implement prescribed fires to maintain habitats. Thus, we are also aware that a challenge to managing occupied eastern massasauga habitat with prescribed fire is determining the best time to apply fire without risking mortality. At most of the known sites within the range of the eastern massasauga rattlesnake that were included in our analysis, populations are small and vulnerable to additive mortality (any mortality beyond that which would be expected from predation or other natural factors), as could occur from poorly timed prescribed fire. While land managers often request “cutoff” dates before which burns can be assumed to be safe, natural variation in weather cycles can affect the dates when snakes emerge from hibernation, with fluctuations of 1 to 3 weeks not being uncommon. In addition to the conservation plan (Kingsbury 2002, entire) provided by the Forest Service, and that was also reviewed in our SSA, we discussed emergence biology of eastern massasauga rattlesnakes at the latitude of the Huron-Manistee National Forest with Dr. Bruce Kingsbury (2016, pers. comm.). Kingsbury shared additional
observations of emerging eastern massasauga rattlesnakes in northern Michigan since his 2002 conservation plan; he added that his observations since 2002 now indicate that many eastern massasauga rattlesnakes that emerge from hibernation in central and northern Michigan in April begin to disperse into adjacent habitats as early as May 1. Because of this, Kingsbury cautioned against reliance on a firm calendar date as a rule by which to plan prescribed fires if unintentional mortality is to be avoided. Instead, he urged land managers to use predictive models to help forecast when eastern massasauga rattlesnakes are most likely to emerge from hibernacula in a given region and year. We thus cannot provide the framework requested by the Forest Service to conclude that use of prescribed fire before May 15 will never result in “take” of the eastern massasauga rattlesnake.

Because the issue of using prescribed fire as a tool for maintaining suitable habitat for eastern massasauga rattlesnakes is so important, but also understandably controversial (due to the potential for additive mortality), the Service funded a study (from 2010 through 2015) of rangewide phenology (relation between climate and periodic biological phenomena) of the species to better understand the factors influencing ingress and egress from hibernation. Preliminary results of that study indicate that emergence of eastern massasauga rattlesnakes from hibernation at sites throughout the range is predictable based on rising subsurface soil temperatures (King 2016, pers. comm.). In addition, regional weather stations maintained by the National Oceanic and Atmospheric Administration (NOAA) monitor soil temperatures at the strata crucial for predicting emergence. Near real-time data generated at these weather stations also are accessible to the public, and when stations are located near extant populations of the eastern massasauga rattlesnake, these could be used by land managers to determine whether emergence from hibernation is near, and thus whether burns should be avoided for the remainder of the active season. As further analyses are completed and the results of the study are made available, we will work cooperatively with interested land managers to incorporate the results into useful burn plans. Federal land management agencies, such as the Forest Service, that use prescribed fire to manage habitats occupied by the eastern massasauga rattlesnake should consult with the Service as provided by section 7(a)(2) of the Act. In addition, private and State land managers can work with the Service to develop plans and determine if permits are appropriate to conduct recovery efforts.

Comments From States

(2) Comment: A State fish and wildlife management agency (Pennsylvania Boat and Fish Commission (PBFC)), a State advisory group (Pennsylvania Biological Survey), and a private individual stated that the eastern massasauga rattlesnake has experienced a large range reduction in Pennsylvania, and current surveys confirm that extant populations remain at only three sites in the State. They further commented that the remaining populations are isolated from one another and subject to continued threats of habitat alteration, persecution, and illegal collecting.

Our Response: We thank the commenters for the detailed information. These data corroborate our analysis. We considered the continued decline of the eastern massasauga rattlesnake in Pennsylvania, as well as other States in the range of the eastern massasauga rattlesnake, in the SSA, and agree that the best available information indicates that this species is declining in Pennsylvania. Based on the status information throughout the species' range and continuing threats to the species, we determined that the eastern massasauga rattlesnake is likely to become in danger of extinction throughout its range within the foreseeable future, and thus are listing it as a threatened species.

(3) Comment: A State fish and wildlife management agency (PBFC), a State advisory group (Pennsylvania Biological Survey), and several private individuals commented that listing would benefit the eastern massasauga rattlesnake by encouraging recovery planning, surveys, outreach and education to the public, and other rangewide conservation efforts.

Our Response: After listing the species, the Service will continue to work closely with State conservation agencies, nongovernmental organizations (NGOs), and other willing partners throughout the range of the species to determine practical and comprehensive actions and outreach to conserve and recover the eastern massasauga rattlesnake.

(4) Comment: Two State fish and wildlife management agencies (PBFC and Wisconsin Department of Natural Resources (WI DNR)) commented that the Service data and comments provided by herpetologists from the commenter’s staff on the SSA, and that the SSA represents the best available information on the eastern massasauga rattlesnake in their State.

Our Response: We thank the staffs of PBFC and WI DNR, as well as other State and county conservation agencies and NGOs, for assisting us in compiling the best available information on the current distribution and status of the eastern massasauga rattlesnake throughout its range and for providing review of the SSA report.

(5) Comment: A State fish and wildlife management agency (PBFC) and the Western Pennsylvania Conservancy (an NGO) commented that an Eastern Massasauga Species Action Plan for Pennsylvania was compiled in 2011, to prioritize and guide research and conservation actions at the State’s extant and presumed extant sites, and noted recent conservation and management actions under that plan. A copy of the plan was provided.

Our Response: We thank the commenters for providing a copy of the plan, and we incorporated actions outlined in the plan into our revised SSA report. When the species is listed (see DATES, above), conservation and recovery planning will involve multiple stakeholders. In addition, relatively new tools (such as spatially explicit habitat models or collaborative processes such as Landscape Conservation Design) are available to plan recovery actions at landscape scales, and to involve multiple stakeholders in the planning process. After listing takes effect (see DATES, above), the Service will continue to work closely with State conservation agencies, NGOs, and other willing partners to determine practical and comprehensive conservation actions for the eastern massasauga rattlesnake.

(6) Comment: A State fish and wildlife management agency (PBFC) stated that the loss of resiliency and redundancy across the species’ range within Pennsylvania leaves the eastern massasauga rattlesnake vulnerable and with little adaptability to future changes in its environment. In addition, this commenter stated that, given the small part of the eastern massasauga rattlesnake’s range that is represented in Pennsylvania, the conservation actions undertaken within the State at those vulnerable, isolated sites are projected to have little impact on the overall persistence of the species without a more comprehensive, regional approach.

Our Response: We agree that loss of redundancy and loss of resiliency across the range of the eastern massasauga rattlesnake are of concern. As stated in the SSA report for the eastern...
massasauga rattlesnake, we used the genetic haplotypes identified by Ray et al. (2013) as geographic analysis units. We found variation in resiliency and redundancy within and between the three analysis units (western analysis unit, central analysis unit, and eastern analysis unit). While resiliency was lowest in the western analysis unit, there was notably low resiliency in the central analysis unit and eastern analysis unit, especially along the southern edges, which includes populations in Pennsylvania (in the eastern analysis unit). Following listing (see DATES, above), we will continue to work with our partners in State agencies as well as with local agencies, NGOs, and other interested parties to implement conservation measures for this species. We agree that, whenever possible, conservation measures undertaken as part of comprehensive regional plans have more value than actions taken on a site-by-site basis. In addition to recovery planning and other traditional tools, Landscape Conservation Design (LCD) may be an option to help catalyze such regional planning approaches for the eastern massasauga rattlesnake.

Our Response: A State fish and wildlife management agency (PBFC) stated that, because of the species’ increasing isolation, habitat loss, and population decline, potential changes to the landscape and site conditions would have a high risk of adversely affecting Pennsylvania’s eastern massasauga rattlesnake population.

Our Response: We agree that most of these factors present risks to the eastern massasauga rattlesnake, and these factors were considered in the SSA for the species. One exception was isolation, which was not evaluated as a direct stressor. While genetic isolation may operate as a stressor, our review of the literature for the SSA provides evidence that some high degree of genetic isolation in this species may be natural and pre-date European settlement; thus, isolation in and of itself is not necessarily a stressor to the species.

Our Response: Several commenters, including a State fish and wildlife management agency (WI DNR), provided statements supporting our determination that designating critical habitat for the eastern massasauga rattlesnake is not prudent due to the increased risks to the species if site locations are made publicly available.

Our Response: In the Critical Habitat section of this final rule, we have determined that the designation of critical habitat would increase the threat to eastern massasauga rattlesnakes from persecution, unauthorized collection, and trade; thus, designating critical habitat for the species is not prudent. Designation of critical habitat requires the publication of detailed maps and a specific narrative description of critical habitat in the Federal Register, and these in turn often become available through other media. We have determined that the publication of maps and descriptions outlining the locations of this species would further facilitate unauthorized collection and trade, as collectors would know the exact locations where eastern massasauga rattlesnakes occur. Due to the threat of unauthorized collection and trade, a number of biologists working for State and local conservation agencies that manage populations of eastern massasauga rattlesnakes also expressed to the Service serious concerns with publishing maps and boundary descriptions of occupied habitat areas that could be associated with critical habitat designation (Redmer 2015, pers. comm.).

Our Response: A State fish and wildlife management agency (WI DNR) commented that they will continue to encourage management of known eastern massasauga rattlesnake sites to address succession and other habitat concerns, and will continue to submit data and work collaboratively with the Service on eastern massasauga rattlesnake conservation.

Our Response: We thank WI DNR for their shared interest in conservation actions for the eastern massasauga rattlesnake, and their interest in continuing our partnership for conserving this species following listing.

Our Response: WI DNR provided updated data on the status of the eastern massasauga rattlesnakes and their conservation actions at two specific sites.

Our Response: We thank WI DNR for their willingness to coordinate, for providing relevant data while we were preparing the SSA, and for providing additional information in their comments. We have incorporated that additional information into our revised SSA report.

Our Response: The MI DNR recommended that, to address public safety concerns, the Service develop a rule under section 4(d) of the Act (a “4(d) rule”) that would allow people to move the snakes from “high risk environments (for example, backyards, state campgrounds, schools) to areas with low risk.” They further commented that such a 4(d) rule would reduce persecution of the snakes.

Our Response: We understand that the MI DNR receives several calls each year reporting an eastern massasauga rattlesnake in or near a human dwelling and requesting assistance to remove it. A 4(d) rule, however, is not necessary to provide for the relocation of snakes from areas where people may be at risk of bodily harm. Such an action, if done on a good faith belief to protect a person from bodily harm, is already provided for under the Act without a 4(d) rule; see 16 U.S.C. 1540(a)(3) and 1540(b)(3). This provision of the Act applies to all listed species.

We also note that non-harmful actions to encourage eastern massasauga rattlesnakes to leave, stay off, or keep out of areas with frequent human use,
including a residence, yard, structure, sidewalk, road, trail, foot path, or campground, would not result in take and thus will not be prohibited. For example, homeowners may use a broom or pole to move an eastern massasauga rattlesnake away from their property. When circumstances create an imminent threat to human safety, all forms of take of listed species (including harass, harm, pursue, shoot, wound, kill, trap, capture, or collect) are allowed to safeguard human safety. The Act’s implementing regulations (50 CFR part 17) include a take exemption pursuant to the defense of human life (see 50 CFR 17.31, which incorporates provisions set forth at 50 CFR 17.21(c)(2): “any person may take endangered or threatened wildlife in defense of his own life or the lives of others.”) The regulations at 50 CFR 17.21(c)(4) require that any person taking, including killing, listed wildlife in defense of human life under this exception must notify our headquarters Office of Law Enforcement, at the address provided at 50 CFR 2.1(b), in writing, within 5 days. In addition, section 11 of the Act enumerates the penalties and enforcement of the Act. In regard to civil penalties, section 11(a)(3) of the Act states: “Notwithstanding any other provision of this Act, no civil penalty shall be imposed if it can be shown by a preponderance of the evidence that the defendant committed an act based on a good faith belief that he was acting to protect himself or herself, a member of his or her family, or any other individual from bodily harm, from any endangered or threatened species” (16 U.S.C. 1540(a)(3)). Section 11(b)(3) of the Act contains similar language in regard to criminal violations (see 16 U.S.C. 1540(b)(3)).

Eastern massasauga rattlesnakes generally hibernate in wetlands, rather than in places occupied by people. However, in areas near wetlands or uplands with natural habitat, eastern massasauga rattlesnakes occasionally find their way into areas of high human use (for example, human-made structures, backyards, or campgrounds). If an eastern massasauga rattlesnake is encountered, it is best to not disturb it and to walk away from it. However, in areas of high human use, other responses may be necessary to protect people from bodily harm. Eastern massasauga rattlesnakes observed in areas of human use may subsequently conceal themselves as a natural defense mechanism and may later be unexpectedly encountered at close range, presenting the possibility of bodily harm. Short-distance translocation (moving from one location to another) of venomous snakes is a common method used to reduce or mitigate snake-human conflicts. In one recent study, eastern massasauga rattlesnakes relocated 200 meters (656 feet) from the capture point did not exhibit abnormal movement or basking behavior and did not return to the capture site (Harvey et al. 2014). Because the eastern massasauga rattlesnake is a venomous species, we advise due caution and encourage anyone wishing to move a snake to contact an appropriate State or local agency for professional expertise in handling rattlesnakes. In addition, the State or local landowner may have other legal requirements that apply to handling wildlife. Therefore, when on public lands, we encourage contacting the land manager to address the situation whenever feasible. However, anyone may take necessary action at any time to protect one’s self or another person from bodily harm.

Comment: MI DNR provided a Michigan Natural Features Inventory (MNFI) report with the most current eastern massasauga rattlesnake data for the State. Our Response: We thank MI DNR and MNFI for compiling and providing this additional information. MNFI is the organization responsible for maintaining the Michigan Natural Heritage Database, which includes known historical records for species of concern, including the eastern massasauga rattlesnake, in Michigan. The database includes records for populations of extirpated, likely extirpated, unknown, and extant status. During preparation of the SSA report, the Service worked closely with MNFI to ensure that the most current, available information from the Michigan Natural Heritage Database on the status of the eastern massasauga rattlesnake in Michigan was included in our analyses. This included new records that the MNFI provided to us as late as September 2015, after we had developed the proposed listing rule. The report compiled by MNFI was added to our records and used to further document our decision.

(15) Comment: MI DNR noted, as was mentioned in the SSA report, that they are in the final stages of completing a CCAA for the eastern massasauga rattlesnake on MI DNR lands. They requested that the Service consider how Michigan’s CCAA will address threats to the eastern massasauga on MI DNR lands in the final listing determination. Our Response: CCAA and listing are separate. Before the Service makes a formal agreement between the Service and one or more parties to address the conservation needs of proposed or candidate species, or species likely to become candidates, before they become listed as endangered or threatened. Landowners voluntarily commit to conservation actions that will help stabilize or restore the species with the goal that if all other necessary landowners did the same, listing would become unnecessary. These agreements encourage conservation actions for species that are candidates for listing or are likely to become candidates. Although a single property owner’s activities may not eliminate the need to list, conservation, if conducted by enough property owners throughout the species’ range, can eliminate the need to list. The agreements provide landowners with assurances that their conservation efforts will not result in future regulatory obligations in excess of those they agree to at the time they enter into the agreement.

After publication of the proposed rule to list the eastern massasauga rattlesnake as a threatened species, the State of Michigan submitted to the Service a CCAA that would provide for management of eastern massasauga rattlesnakes on State-owned lands. The term of the CCAA and permit is 25 years. The CCAA includes management strategies with conservation measures designed to benefit eastern massasauga rattlesnakes; these management strategies will be implemented on approximately 136,311 acres (55,263 hectares) of State-owned land. Management strategies beneficial to eastern massasauga rattlesnakes are currently being implemented on many sites on State-owned lands in Michigan, and are ongoing. The CCAA describes a program of continuing existing management strategies beneficial to eastern massasauga rattlesnakes and reflects the current conditions analyzed in the SSA. Existing conservation on State-owned lands in Michigan was accounted for in the SSA; the CCAA does not provide detailed site-specific information to alter that analysis. Thus, the CCAA does not alter the SSA results or projected population trends. While the actions in the CCAA are expected to address some of the stressors on many sites on State-owned lands in Michigan, the CCAA only covers a small part of the species’ range; therefore, the conservation measures did not affect the overall biological status of the species.

(16) Comment: MI DNR questioned the Service’s use of three analysis units to assess the species’ current conditions in the SSA, and how use of those three units will affect recovery planning and, ultimately, delisting. MI DNR expressed their opinion that recovery planning be
based on the species’ range and not the three analysis units.

Our Response: We identified and delineated the analysis units to assess the historical, current, and future representation of the species. Representation is an indicator of the ability of the species to respond to physical (for example, habitat, climate) and biological (for example, new diseases, predators, competitors) changes in its environment. The intent of the analysis units is to capture the breadth of adaptive diversity (genotypic makeup) and phenotypic (physical traits) diversity of the species. We evaluated available genetic and ecological information to identify areas of unique or differing genotypic and phenotypic diversity. We did not find any compelling ecological differences, but did find strong evidence of genetic variation across the range. Data indicate that the eastern massasauga rattlesnake shows high levels of genetic variation (populations can be genetically distinguished from each other) at regional and local scales. The synthesis of this genetic data supports delineating, on the basis of genetic differentiation, the three broad regions identified by Ray et al. (2013, entire). Although several studies showed detectable genetic differences among populations within these three broad areas, we did not have sufficient information to delineate smaller-scale units. Thus, we assessed the distribution among and within these three geographic units to evaluate changes in eastern massasauga rattlesnake representation from historical condition to the present and future. These analysis units were identified for purposes of evaluating representation in the SSA, and are not, at this point, intended to represent recovery units as might be identified during recovery planning. Any future recovery planning effort will use the best available information to promote the conservation and survival of the species.

(17) Comment: The New York Department of Environmental Conservation (NYDEC) commented that the species is listed as State endangered in New York, and that due to the limited range and vulnerability of populations, the State does not anticipate delisting the species at any point in the future.

Our Response: We considered the current status of the eastern massasauga rattlesnake in New York, as well as other States in the range of the eastern massasauga rattlesnake, in the SSA. We agreed that available information indicates that only two populations of this species occur in New York State, and thus its conservation status is of concern there.

(18) Comment: NYDEC stated that the two populations in the State occur on lands under conservation protection: One is owned by a private conservation organization, and the other is a State Wildlife Management Area. NYDEC further commented that it has been successful at managing for eastern massasauga rattlesnakes at the State-owned site, and believes that under continued management, the species will continue to thrive at that site. Thus, NYDEC encourages the Service to endorse active habitat management practices that promote habitat for the species.

Our Response: The efforts of States and other partners to benefit the eastern massasauga rattlesnake are important, and we agree that habitat management activities to maintain appropriate vegetative structure for the eastern massasauga rattlesnake are crucial to its continued survival. However, certain management practices (for example, prescribed fire) are also known to be important stressors to the species, especially where population sizes are small or when timing of the management action increases risk (for example, just after snakes emerge from hibernation). We will continue to work closely with our partners in State and local agencies, NGOs, and any other parties interested in conserving this species to investigate best management practices and the tradeoffs between management and potential mortality to the rattlesnakes.

(19) Comment: NYDEC requested that the Service include a 4(d) rule to exempt some habitat management practices, such as woody vegetation removal, when conducted at a time and scale that makes adverse impacts to the eastern massasauga rattlesnake unlikely.

Our Response: We agree that active habitat management for the eastern massasauga rattlesnake will be crucial to long-term maintenance and recovery of existing populations. However, we believe issuance of a 4(d) rule would not be required to allow such management activities for two reasons. First, management actions may take place on a case-by-case basis, and we would like to learn more about how to lessen the risk of eastern massasauga rattlesnake mortality while still allowing appropriate habitat management to occur. Second, vegetation management actions that take place at certain times of the year when the snakes are not active (for example, during winter when snakes are hibernating underground) would not affect the species and, thus, do not require a 4(d) rule. The Act allows flexibility for us to consider a range of recovery actions following listing, and we will work with local and State partners to determine and implement actions that have the most benefit to the species.

Public Comments

(20) Comment: An NGO (the Western Pennsylvania Conservancy (WPC)) commented that they continue to work closely with PBFC on eastern massasauga rattlesnake conservation efforts, including implementation of the Eastern Massasauga Species Action Plan. In 2009–2010, habitat management plans were developed for eight private landowners in areas where eastern massasauga rattlesnakes are known to occur. WPC has implemented some of the management plans with the help of PBFC, the Pennsylvania Wildlife Commission, and the Pennsylvania Department of Conservation and Natural Resources, including habitat restoration activities funded by small foundation grants over the past 5 years.

Our Response: Following listing (see DATES, above), we will continue to work with our partners in State agencies as well as with local agencies, NGOs, and other interested parties to implement conservation measures for this species. Existing efforts to conserve the species or local planning documents, like those mentioned by the commenter, will be valuable in developing regional or rangewide recovery efforts.

(21) Comment: One commenter stated that it is difficult to achieve on-the-ground conservation and restoration for the eastern massasauga rattlesnake and that land protection efforts are slow and opportunities are limited.

Our Response: Limited resources are often a challenge in conservation. Following listing (see DATES, above), we will continue to explore opportunities to partner with State and local conservation agencies, NGOs, and other interested parties to leverage resources and find cooperative solutions to such challenges for the eastern massasauga rattlesnake.

(22) Comment: One commenter stated that not all factors that may contribute to the decline of the species were fully explored in the SSA. In particular, the commenter noted that, while the proposed rule acknowledged climate change as a factor exacerbating the threats to this species, it did not provide a quantitative analysis of the impacts nor fully account for such uncertainty.

Our Response: A recently published climate change vulnerability analysis for the eastern massasauga rattlesnake (Pomara et al. 2015, entire) suggests that populations in the southwestern parts of
the species’ range are extremely vulnerable to climate change through increasing intensity of winter drought and increasing risks of summer floods. Populations in the eastern and central parts of the species’ range are vulnerable to climate variables, but to a lesser extent than the southwestern populations, and the northeastern populations are least vulnerable to climate change. We acknowledged in the SSA report that we believe our results underestimate the risks associated with climate change, especially in Indiana and Michigan. As we move forward with recovery for the eastern massasauga rattlesnake, we will more fully investigate the effects of climate change and work towards buffering vulnerable populations.

(23) Comment: Several commenters supported listing the eastern massasauga rattlesnake. The comments included statements such as:
- Resource development (natural gas extraction, pit mining for limestone, coal, and gravel) is a significant threat to the species;
- Significant ongoing decline and multiple continuing threats throughout the species’ range support listing;
- Only small, isolated populations of the eastern massasauga rattlesnake remain, and the species should be protected before further losses occur; and
- It is important to preserve biodiversity, so this species should be protected.

Our Response: We thank these commenters for their statements. When Congress passed the Act in 1973, it recognized that our rich natural heritage is of “aesthetic, ecological, educational, recreational, and scientific value to our Nation and its people.” It further expressed concern that many of our nation’s native plants and animals were in danger of becoming extinct. The purpose of the Act is to protect and recover imperiled species and the ecosystems upon which they depend, and thus plays a role in preserving biodiversity.

(24) Comment: One commenter stated that, as an alternative to designating critical habitat, species protection could be improved by strengthening environmental review for the eastern massasauga rattlesnake by providing more information and adding more stringent requirements on those conducting permitted activities. This commenter recommended close coordination between Federal and State agencies to achieve the appropriate level of environmental review and management to conserve the species.

Our Response: Following listing of the eastern massasauga rattlesnake (see DATES, above), regulatory provisions of the Act will take effect. For example, the actions of Federal agencies that may affect the species will be subject to consultation with the Service as required under section 7(a)(2) of the Act. In doing so, the Service works with the action agencies to avoid or minimize adverse effects to the species to ensure that the continued existence of the species is not jeopardized. Also following listing, we will work closely with our partners in Federal, State, and local units of government, as well as NGOs and others with an interest in the species, to identify and implement proactive measures to conserve and recover the species.

(25) Comment: Several commenters stated that critical habitat should be designated for the eastern massasauga rattlesnake. One of these commenters added that habitat is “critical to the species’ survival” and habitat loss and degradation is the most significant threat to the species, and provided information arguing that although human persecution is a threat, and human disturbance of the snakes did change the snakes’ behavior, no long-term effects were observed. They further commented that increased risk of illegal collection or persecution could be addressed through education efforts.

Our Response: We agree that outreach efforts will be important in addressing many topics related to conserving the eastern massasauga rattlesnake. However, we determined that designation of critical habitat would increase persecution, unauthorized collection, and trade threats to the eastern massasauga rattlesnake. The eastern massasauga rattlesnake is highly valued in the pet trade, and that value is likely to increase as the species becomes rarer. In addition, as a venomous species, it also is the target of persecution. Furthermore, States and other land managers have taken measures to control and restrict information on the locations of the eastern massasauga rattlesnake and to no longer make location and survey information readily available to the public. We have, therefore, determined in accordance with 50 CFR 424.12(a)(1) that it is not prudent to designate critical habitat for the eastern massasauga rattlesnake (see Critical Habitat, below, for a full discussion).

(26) Comment: One commenter stated that a rattlesnake does not contribute meaningfully to its ecosystem; thus, the Service should focus on more important and less loathsome species.

Our Response: While the eastern massasauga rattlesnake is a venomous species, and we are aware that this is a reason some people may fear it, the species is considered to be among the more shy and docile species of North American rattlesnakes. Eastern massasauga rattlesnakes are known to eat voles, mice, other small mammals, small birds, amphibians, and even other species of snakes. Predatory birds (such as hawks) and mammals (such as raccoons) are also known to prey on eastern massasauga rattlesnakes. Thus, they do have a function within ecosystems where they occur. Finally, there are no provisions in the Act that allow us to distinguish between species that are popular and those that are disliked. We used the best available scientific and commercial data to determine that the eastern massasauga rattlesnake warrants listing as a threatened species.

(27) Comment: One commenter stated that public education will be an important component of conservation for the eastern massasauga rattlesnake.

Our Response: We thank the commenter and agree with this statement. We are aware that, under rare circumstances, bites from a venomous snake, such as the eastern massasauga rattlesnake, could present some risk to human health and safety. We are also aware that this is a reason why some people fear the eastern massasauga rattlesnake. Since the species became a candidate for listing in 1999, the Service has worked closely with our partners to provide outreach through producing or funding print and digital outreach materials, providing staff as speakers, and also responding to questions from the media pertaining to this species. Following listing (see DATES, above), this need will not change, and it is our intent to continue to work with partners to ensure that current information on the role played by this species is available to the public.

(28) Comment: The Illinois Farm Bureau expressed concern that “certain pesticide use” was included in the proposed rule as an activity that may “result in a violation of section 9 of the Act.” They stated that the SSA report does not provide supporting evidence that pesticides are a stressor. They requested that “certain pesticide use” be removed from the list of activities that may result in a violation of section 9.

Our Response: Based on this comment, we took a closer look at the risk to the species associated with pesticide use and have removed “certain pesticide use” from the list of activities that may result in a violation of section 9 of the Act under the
Available Conservation Measures

section of this final rule. We included pesticide use in the original list of potential threats due to the potential for impacts to populations of burrowing crayfishes upon which the eastern massasauga rattlesnake relies (by hibernating in the burrows of these crayfish); however, this link is not strongly substantiated. If additional supporting information is found that pesticides may pose a threat to the burrowing crayfishes and the eastern massasauga rattlesnake, we may again recognize this in the future. We note that any determination of whether an activity results in prohibited “take” of an eastern massasauga rattlesnake is case-specific and independent of our discussion in the proposed or final listing rules.

(29) Comment: The Illinois Farm Bureau requested that, as an important stakeholder, they should be involved in a “robust stakeholder engagement process” to develop best management practices (BMPs) and avoidance measures that protect the eastern massasauga rattlesnake.

Our Response: Extant populations of the eastern massasauga rattlesnake are now extremely rare in Illinois (perhaps fewer than six populations remaining), and occur primarily on public conservation lands. This, in turn, makes encounters with this species in Illinois very rare. However, several core areas occupied by the remaining Illinois populations are adjacent to private lands that are in agricultural use. Because of this, we believe it is important to remaining engaged with the Illinois Farm Bureau and potentially affected private landowners as stakeholders. We will also work closely to follow the lead of the Illinois Department of Natural Resources, which has a successful track record of working with private land owners (including farmers) in areas where eastern massasauga rattlesnakes occur to increase awareness of the conservation challenges faced by this species.

(30) Comment: Energy commented that the eastern massasauga rattlesnake is of interest to its 10 operating companies, as populations occur in their service area. They further commented that they use integrated vegetation management (IVM) to maintain grassland habitats within and along transmission corridors, thus providing ideal habitat for species like the eastern massasauga rattlesnake. They claimed that listing the eastern massasauga rattlesnake could have significant impacts on their operations in Pennsylvania and Ohio, from affecting new transmission line construction to routine transmission corridor maintenance, which could affect their ability to provide essential services to millions of people. They requested that, because maintenance and expansion of transmission corridors is beneficial to the conservation of the eastern massasauga rattlesnake (by managing succession), the Service consider a 4(d) rule specific to transmission corridors.

Our Response: While a number of populations of the eastern massasauga rattlesnake are considered to be extant in Pennsylvania and Ohio, many of those populations occur in scattered locations. While the limits of the species’ range depicted on the map (see Figure 1, above) give the appearance that this species is widespread, many actions that would be expected to affect the species where it does occur may, in reality, take place in areas where it does not. In cases where proximity to a known location is uncertain, the commenter, or similar entities, can contact the Service’s Ecological Services field offices for clarification and to address specific issues related to their needs. Also, in cases where an action is regulated or permitted by another Federal agency (for example the Federal Energy Regulatory Commission (FERC)), consultation with the Service under section 7(a)(2) of the Act would also provide opportunities to determine best management practices in the event that the action may affect the species. There are other provisions of the Act that allow for the consideration of such management actions on a case-by-case basis; thus issuance of a species-specific 4(d) rule is not appropriate.

(31) Comment: A county government agency (Forest Preserve District of Will County, Illinois) stated that their land holdings include a now-extirpated population of eastern massasauga rattlesnake and provided supporting information. They also stated that they hoped listing would allow additional conservation efforts and possible reintroduction into previously occupied lands.

Our Response: We considered the best available data, including historical occurrences and the knowledge of local species experts, in conducting our SSA, and we also considered the population in Will County, Illinois, to be extirpated. We thank the commenter for providing additional information specific to surveys that led to this location being considered extirpated. We have incorporated that additional information into our revised SSA report. We will consider a range of recovery actions following listing and will work with local and State partners to determine and implement actions that would have the most benefit to the species.

(32) Comment: An individual reports having seen two eastern massasauga rattlesnakes in New Brunswick, Canada, but the commenter did not provide any documentation or supporting evidence. Our Response: We considered the best available data, including historical occurrences and the knowledge of local species experts, in this listing determination. Because the eastern massasauga rattlesnake also occurs in Canada, we coordinated with colleagues from the responsible Federal (Parks Canada) and Provincial (Ontario Ministry of Resources and Forestry) governments in Canada in compiling records used in our SSA. We are aware of no documented records of the eastern massasauga rattlesnake in New Brunswick.

Our Response: We thank the commenter for their suggestion and look forward to working collaboratively with landowners and managers from the public, private, and industry sectors following listing. Also, while the eastern massasauga rattlesnake has a broad geographic range, in many cases extant populations occur in widely scattered locations. Thus, instances where populations actually do occur close to certain project areas may actually be fairly limited. In cases where proximity to a known location is uncertain, the commenter, or similar entities, can contact the Service’s Ecological Services field offices for clarification and to proactively address specific issues related to their needs. Also, in cases where an action is authorized, funded, or carried out by another Federal agency (for example, FERC), consultation with the Service under section 7(a)(2) of the Act would also provide opportunities to determine best management practices in the event that the action may affect the species.

(33) Comment: One industry group urged the Service to endorse the integrated vegetation management (IVM) BMPs they implement, and expressed their strong belief that through close coordination between the Service and pipelines and utility companies utilizing IVM BMPs, they can help be part of the solution towards restoring populations of eastern massasauga rattlesnake.

Our Response: We thank the commenter for their suggestion and look forward to working collaboratively with landowners and managers from the public, private, and industry sectors following listing. Also, while the eastern massasauga rattlesnake has a broad geographic range, in many cases extant populations occur in widely scattered locations. Thus, instances where populations actually do occur close to certain project areas may actually be fairly limited. In cases where proximity to a known location is uncertain, the commenter, or similar entities, can contact the Service’s Ecological Services field offices for clarification and to proactively address specific issues related to their needs. Also, in cases where an action is authorized, funded, or carried out by another Federal agency (for example, FERC), consultation with the Service under section 7(a)(2) of the Act would also provide opportunities to determine best management practices in the event that the action may affect the species.

(34) Comment: One commenter stated that fire management is an important component of maintaining habitat for...
the eastern massasauga rattlesnake. They further commented that prairie species, like the eastern massasauga rattlesnake, are adapted to fire; thus, if fire is used appropriately, individuals can easily move to safety and very few will be killed.

Our Response: As stated in our response to Comment 1, above, we agree that the eastern massasauga rattlesnake is a species that occurs primarily within habitats that are dependent on periodic fires to maintain appropriate vegetative structure. Suppression of wildfires following European settlement has allowed degradation of many such plant communities through succession by woody vegetation, and land managers often use prescribed fire as a management technique to maintain these communities so that woody canopies are not established. However, because many of the remaining populations of the eastern massasauga rattlesnake are already small, and vulnerable to loss of individuals (Faust et al. 2011, pp. 59–60; Seigel and Shiel 1999, pp. 19–20), mortality resulting from prescribed fire was one of the most prominent stressors identified by Faust et al. (2011, pp. 12–16) and in the SSA. Please refer to our response to Comment 1, above, for more details regarding the use of prescribed fire.

(35) Comment: One commenter recommended that the Service not issue any rules that would impinge upon the private property rights of individual citizens on non-public lands. They further stated that there is no need to set aside special property to benefit this species, and that private landowners should only be required to participate on a voluntary basis.

Our Response: The Service works proactively with private landowners who want to voluntarily take measures to help conserve listed species on their property. We do not take private lands to benefit listed species. In cases where we acquire lands (for example, through fee-simple purchase, or through providing funding to our partners in State and local government, or to NGOs) to benefit listed species, it is the Service’s policy that purchases be made from willing sellers, and that fair market price be paid. In cases where private landowners propose legal activities or uses of their lands that may lead to incidental take of listed species, the Act provides for mechanisms (such as habitat conservation plans) that allow interested parties to find collaborative ways to minimize and mitigate impacts to the species, still allowing them to proceed with their proposed activities. Similarly, if proposed land uses require actions (for example issuance of Federal permits) by other Federal agencies, section 7(a)(2) of the Act allows the action agency to consult with the Service to ensure that the action will not jeopardize listed species. (36) Comment: One commenter specified that it is imperative to keep people safe on public lands. Thus, they recommended that the State natural resource agencies have the clear ability to remove snakes from areas where there is a high likelihood the snakes will come into contact with people. Another commenter stated that the eastern massasauga rattlesnake poses a risk to livestock and pets in the summer months when the snakes are sunning themselves on roads, field edges, lawns, and rock piles. A third commenter added that listing the eastern massasauga rattlesnake will not protect it, as people who feel threatened by the snakes will continue to kill them and will not report it.

Our Response: The Act includes provisions to allow flexibility to remove individual snakes from situations where they present a risk to human health or safety. These provisions include the potential for both lethal and nonlethal take, and the situations in which these options are permissible are discussed above under our response to Comment 13. We also note that non-harmful actions to encourage eastern massasauga rattlesnakes to leave, stay off, or keep out of areas with frequent human use, including a residence, yard, structure, sidewalk, road, trail, foot path, or campground, would not result in take and thus are not prohibited. For example, maintenance of mowed lawn in areas of regular human use to discourage eastern massasauga rattlesnakes from entering these areas is acceptable.

(37) Comment: One commenter stated that Sistrurus catenatus populations east of the Mississippi are divided into two genetic units: a “western” unit consisting of individuals from populations in Illinois and Wisconsin and an “eastern” unit consisting of all other populations. The commenter stated that these populations are weakly phylogenetically distinct from each other and historical modeling suggests that eastern populations are derived from western populations through a post-glacial colonization process. The “western” unit is roughly comparable to the “western” unit proposed by Ray et al. (2013, entire), while the “eastern” unit is consistent with the “central and eastern” units proposed by Ray et al. (2013, entire). The same commenter provided data based on genetic analysis of tissue samples from eastern massasauga rattlesnakes from northeast Iowa, indicating that snakes in the sampled population are genetically distinct from other eastern massasauga rattlesnake populations. Those data indicate that snakes in this population are of hybrid origin consisting of a mixture of approximately 80 percent genetic markers specific to the eastern massasauga rattlesnake and 20 percent genetic markers specific to the western massasauga rattlesnake (Sistrurus tergeminus). The commenter further stated that modeling indicates that they originated through a historical hybridization event between these species within the last 10,000 years, likely as a result of shifting species distributions due to post-glacial environmental effects. The commenter stated that the conservation status of these northeast Iowa populations should be assessed.

Our Response: We appreciate the information provided on the emerging science on genetics and taxonomy of eastern massasauga rattlesnakes. We hope to continue the close working relationship with the commenter as the science advances. The data on genetic haplotypes described by Ray et al. (2013, entire) have been peer-reviewed and published. Furthermore, these haplotypes are current recognized by the American Zoological Association in managing their captive populations. Thus, we used the genetic haplotypes of Ray et al. (2013, entire) to delineate our analysis units into a western analysis unit, a central analysis unit, and an eastern analysis unit. We understand that the commenter is also researching this topic and has stated intent to publish it in a peer-reviewed journal. The Act requires us to use the best available data in decision making, and we hope to continue the close working relationship with the commenter as the genetic science on the species advances.

With regard to the detection of possible past hybridization in the Iowa population, we thank this commenter for providing new information. Since this comment was submitted, we have discussed this topic further with the commenter. Because the population in question is comprised primarily of genetic markers of the eastern massasauga rattlesnake, we still consider the northeast Iowa individuals to be eastern massasauga rattlesnakes. (38) Comment: The Nature Conservancy’s Indiana Office provided an overview of the status of eastern massasauga rattlesnake populations at sites they own in Indiana and that historically supported the species.

Our Response: We thank the commenter for providing additional...
information on the historical occurrence of the eastern massasauga rattlesnake on their land holdings, and we have added it to information gathered from the Natural Heritage Database as provided by the Indiana Department of Natural Resources so that it may augment our data on the species.

(39) Comment: One commenter stated that there is no evidence that the eastern massasauga rattlesnake existed in Missouri, and that populations in eastern Missouri should be considered as western massasauga rattlesnakes, a different species. The commenter stated that populations of the eastern massasauga rattlesnakes occurring east of the Mississippi River warrant protection.

Our Response: In evaluating the taxonomy and distribution of the eastern massasauga rattlesnake, we considered the best available scientific information (see pages 6–9 of the SSA report). While recent genetic studies showed that extant populations in central and northwestern Missouri belong to the western massasauga rattlesnake (Sistrurus tergeminus), no useful tissues from snakes in extreme eastern Missouri (St. Louis and Warren Counties) were available to the researchers for inclusion in the genetic studies because those populations are likely extirpated. This was confirmed during coordination between the Service and the responsible State fish and wildlife management agency (Missouri Department of Conservation). However, published studies on phenotypic variation (especially color pattern) of massasauga rattlesnakes from throughout Missouri—including the historical, but now likely extirpated populations in extreme eastern Missouri—indicate that the latter populations could be phenotypically included within the eastern massasauga rattlesnake. Recently extirpated, historical populations of the eastern massasauga rattlesnake were known from the adjacent part of Illinois, less than 19 miles (30 kilometers) from the historical eastern Missouri populations. In addition, genetic studies of massasauga rattlesnakes in Iowa indicate that the eastern massasauga genotype is present there (though these are also of likely past hybridization), well west of the Mississippi River. In the absence of better information on the taxonomic identity of the likely extirpated massasauga populations in extreme eastern Missouri, we have included those populations within the historical range of the eastern massasauga rattlesnake.

(40) Comment: One commenter stated that the eastern massasauga rattlesnake is more prevalent than MI DNR or the Service estimate and that the species is common in northern Michigan.

Our Response: It is widely recognized that Michigan still harbors a greater number of extant populations of the eastern massasauga rattlesnake than any of the other nine States and the one Canadian Province where the species occurred historically. We coordinated with our partner State fish and wildlife agencies, consulted the most current information from Natural Heritage Databases, and solicited information from species experts for each State and for Ontario to compile the most current data on the species. In addition to these scientific sources, we sought out public comment and data through the proposed listing rule’s public comment period. In Michigan specifically, MNFI houses the Natural Heritage Database; they, among others, provided input on the Michigan populations. Based on these data, historically and currently, Michigan harbors a greater number of extant populations than any of the other nine States and Ontario. There are 259 known populations of eastern massasauga rattlesnake in Michigan; this is 46 percent of all known populations rangewide. Of these, 158 (61 percent) are believed to persist today and another 47 have unknown status; the Michigan populations represent 59 percent of all known extant populations rangewide. Thus, compared to other localities, the eastern massasauga rattlesnake was historically and continues to be more prevalent in Michigan than in any other State. We acknowledge that there may still be some undocumented populations remaining, especially in Michigan. We recommend that individuals with specific knowledge of populations contact MNFI to ensure the locations of eastern massasauga rattlesnake are known.

(41) Comment: Several commenters stated that the species should be listed as endangered rather than threatened, but did not provide further rationale or new evidence in support of this recommendation.

Our Response: For reasons discussed in the Determination section of this final rule, the Service has determined that the eastern massasauga rattlesnake meets the Act’s definition of a threatened species, rather than an endangered species.

Determination

Section 4 of the Act (16 U.S.C. 1533), and its implementing regulations at 50 CFR part 424, set forth the procedures for adding species to the Federal Lists of Endangered and Threatened Wildlife and Plants. Under section 4(a)(1) of the Act, we may list a species based on: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. Listing actions may be warranted based on any of the above threat factors, singly or in combination.

We have carefully assessed the best scientific and commercial data available regarding the past, present, and predicted future condition of the eastern massasauga rattlesnake and how threats are affecting the species now and into the future. The species faces an array of threats that have and will likely continue (often increasingly) to contribute to declines at all levels (individual, population, and species).

The loss of habitat was historically, and continues to be, the threat with greatest impact to the species (Factor A), either through development or through changes in habitat structure due to vegetative succession. Disease, new or increasingly prevalent, is another emerging and potentially catastrophic threat to eastern massasauga rattlesnake populations (Factor C) that is likely to affect the species in the foreseeable future. As population sizes decrease, localized impacts, such as collection and persecution of individuals, also increases the risk of extinction (Factor B). These stressors are chronic and are expected to continue with a similar magnitude of impact into the future. Additionally, this species is vulnerable to the effects of climate change through increasing intensity of winter droughts and increasing risk of summer floods (Factor E), particularly in the southwestern part of its range (Pomera et al. undated, unpaginated; Pomera et al. 2014, pp. 95–97).

Some conservation actions (for example, management of invasive species and woody plant encroachment, timing prescribed fires to avoid the active season) are currently in place, and provide protection and enhancement to some eastern massasauga rattlesnake populations (see pp. 43–45 in the SSA report for a full discussion). However, our analysis projects that eastern massasauga rattlesnake populations will continue to decline even if current conservation measures are continued into the future. As a result of these factors, the number and health of eastern massasauga rattlesnake populations are anticipated to decline across the species’ range,
particularly in the southwestern portions of the range, where large losses relative to historical conditions have already occurred.

Further, the reductions in eastern massasauga rattlesnake population numbers, distribution, and health forecast in the SSA report likely represent an overly optimistic scenario for the species, and future outcomes may be worse than predicted. Because of the type of information available to us, the quantitative analysis assumes that threat magnitude and pervasiveness remain constant into the future, but it is more likely that the magnitude of threats will increase into the future throughout the range of the species (for example, the frequency of drought and flooding events are likely to increase) or that novel threats (for example, new pathogens) may arise. In addition, some currently identified threats are not included in the quantitative analysis (for example, disease, road mortality, persecution/collection, and impacts from climate change), because we lack specific, quantitative information on how these factors may affect the species in the future. These factors and their potential effects on the eastern massasauga rattlesnake were discussed and considered qualitatively as part of the determination.

The species’ viability is also affected by losses of populations from historical portions of its range, which may have represented unique genetic and ecological diversity. The species is extinct from Minnesota and Missouri, and populations have been lost in the western part of the species’ range. Rangewide, the extent of occurrence is predicted to decline by 80 percent by year 50. Actual losses in extent of occurrence will likely be greater than estimated because of the methodology used in our analysis, as discussed above.

The Act defines an endangered species as any species that is “in danger of extinction throughout all or a significant portion of its range” and a threatened species as any species that is “likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.” A key statutory difference between an endangered species and a threatened species is the timing of when a species may be in danger of extinction, either now (endangered species) or in the foreseeable future (threatened species). Based on the biology of the eastern massasauga rattlesnake and the degree of uncertainty of future predicted magnitudes, the “foreseeable future” for the species is best defined as 50 years. Forecasting to 50 years, the current threats are still reliably foreseeable at the end of that time span based on models, available information on threats impacting the species, and other analyses; however, we cannot reasonably predict future conditions for the species beyond 50 years. Our uncertainty in forecasting the status of the species beyond 50 years is also increased by our methodology of extrapolating from a subset of modeled populations to all extant or potentially extant populations.

We find that the eastern massasauga rattlesnake is likely to become endangered throughout its entire range within the foreseeable future based on the severity and pervasiveness of threats currently impacting the species, the projected loss of populations rangewide (loss of resiliency and redundancy), and the projected loss of its distribution within large portions of its range. This loss in distribution could represent a loss of genetic and ecological adaptive diversity, as well as a loss of populations from parts of the range that may provide future refugia in a changing climate. Furthermore, many of the currently extant populations are experiencing high magnitude threats. Although these high magnitude threats are not currently pervasive rangewide, they are likely to become pervasive in the foreseeable future as they expand and impact additional populations throughout the species’ range. Therefore, on the basis of the best available scientific and commercial data, we determine that the eastern massasauga rattlesnake is likely to become an endangered species within the foreseeable future throughout all of its range, and, thus, we are listing it as a threatened species in accordance with sections 3(20) and 4(a)(1) of the Act.

We find that an endangered species status is not appropriate for the eastern massasauga rattlesnake. In assessing whether the species is in danger of extinction, we used the plain language understanding of this phrase as meaning “presently in danger of extinction.” We considered whether extinction is a plausible condition as the result of the established, present condition of the eastern massasauga rattlesnake. Based on the species’ present condition, we find that the species is not currently in danger of extinction. The timeframe for conditions that render the species to be in danger of extinction is beyond the present. While the magnitude of threats affecting populations is high, threats are not acting at all sites at a sufficient magnitude within the species presently being in danger of extinction. Additionally, some robust populations still exist, and we anticipate they will remain self-sustaining.

The SSA results likely represent an overly optimistic scenario for this species (see pp. 87–88 of the SSA report for a list of assumptions and their expected effect). For example, the analysis treated populations of unknown status as if they were all extant, likely resulting in an overestimate of species’ viability. Thus, we considered whether treating the populations with an “unknown” status as currently extant in the analysis had an effect on the status determination. We examined whether the number of self-sustaining populations would change significantly over time if we instead assumed that all populations with an “unknown” status were extirpated. The results are a more severe projected decline in the eastern massasauga rattlesnake’s status than our analysis projects when we assign the unknown status populations to the “extant” category, but not to the extent that we would determine the species to be currently in danger of extinction.

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or is likely to become so throughout all or a significant portion of its range. Because we have determined that the eastern massasauga rattlesnake is likely to become in danger of extinction within the foreseeable future throughout all of its range, no portion of its range can be “significant” for purposes of the definitions of “endangered species” and “threatened species.” See the Final Policy on Interpretation of the Phrase “Significant Portion of Its Range” in the Endangered Species Act’s Definitions of “Endangered Species” and “Threatened Species” (79 FR 37578; July 1, 2014).

Critical Habitat

Background

Critical habitat is defined in section 3 of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features:

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.
Our regulations at 50 CFR 424.02 define the geographical area occupied by the species as: An area that may generally be delineated around species’ occurrences, as determined by the Secretary (i.e., range). Such areas may include those areas used throughout all or part of the species’ life cycle, even if not used on a regular basis (for example, migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3 of the Act, means to use, and the use of, all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that Federal agencies ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Critical habitat designation does not allow the government or public to access private lands, nor does it require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Where a landowner requests Federal agency funding or authorization for an action that may affect a listed species or critical habitat, the Federal agency would be required to consult with the Service under section 7(a)(2) of the Act, but even if consultation leads to a finding that the action would likely cause destruction or adverse modification of critical habitat, the resulting obligation of the Federal action agency and the landowner is not to restore or recover the species, but rather to implement reasonable and prudent alternatives to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act’s definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific and commercial data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat). In identifying those physical or biological features, we focus on the specific features that support the life-history needs of the species, including but not limited to, water characteristics, soil type, geological features, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic, or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity.

Under the second prong of the Act’s definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed if we determine that such areas are essential for the conservation of the species. We will determine whether unoccupied areas are essential for the conservation of the species by considering the life-history, status, and conservation needs of the species. This will be further informed by any generalized conservation strategy, criteria, or outline that may have been developed for the species to provide a substantive foundation for identifying which features and specific areas are essential to the conservation of the species and, as a result, the development of the critical habitat designation. For example, an area currently occupied by the species but that was not occupied at the time of listing may be essential to the conservation of the species and may be included in the critical habitat designation.

Section 4 of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the Federal Register on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 67211 Federal Register...
habitat conservation plans (HCPs), or other species conservation planning efforts if new information available at the time of these planning efforts calls for a different outcome.

**Prudence Determination**

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12), require that, to the maximum extent prudent and determinable, we designate critical habitat at the time the species is determined to be an endangered or threatened species. Our regulations (50 CFR 424.12(a)(1)) state that the designation of critical habitat is not prudent when one or both of the following situations exist:

1. The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or
2. Such designation of critical habitat would not be beneficial to the species.

In determining whether a designation would not be beneficial, the factors the Service may consider include but are not limited to: Whether the present or threatened destruction, modification, or curtailment of a species’ habitat or range is not a threat to the species, or whether any areas meet the definition of “critical habitat.” In our proposed listing rule, we determined that both of the above circumstances applied to the eastern massasauga rattlesnake. However, under our updated critical habitat regulations at 50 CFR 424.12 (81 FR 7414; February 11, 2016), we cannot conclude that critical habitat designation would not be beneficial to the species because we have found that there are threats to the species’ habitat (the present or threatened destruction, modification, or curtailment of its habitat or range (Factor A) is a threat to the species). However, we still find that designation of critical habitat is not prudent under the first circumstance because we have determined that the eastern massasauga rattlesnake is threatened by taking or other human activity and that identification of critical habitat can be expected to increase the degree of threat to the species.

Overutilization in the form of poaching and unauthorized collection (Factor B) of the eastern massasauga rattlesnake for the pet trade is a factor contributing to declines, and remains a threat with significant impact to this species, which has high black market value. For example, an investigation into reptile trafficking reports documented eastern massasauga rattlesnakes (representing nearly one entire wild source population) collected in Canada and smuggled into the United States, most destined for the pet trade (Thomas 2010, unpaginated). Snakes in general are known to be feared and persecuted by people, and venomous species even more so (Ohman and Mineka 2003, p. 7; Whitaker and Shine 2000, p. 121). As a venomous snake, the eastern massasauga rattlesnake is no exception, with examples of roundups or bounties for them persisting through the mid-1900s (Bushey 1985, p. 10; Vogt 1981; Wheeling, IL, Historical Society Web site accessed 2015), and more recent examples of persecution in Pennsylvania (Jellen 2005, p. 11) and Michigan (Baily et al. 2011, p. 171). The process of designating critical habitat would increase human threats to the eastern massasauga rattlesnake by increasing the vulnerability of this species to unauthorized collection and trade, or to persecution, through public disclosure of its locations. Designation of critical habitat requires the publication of maps and a specific narrative description of critical habitat in the Federal Register. The degree of detail in those maps and boundary descriptions is far greater than the general location descriptions provided in this final rule to list the species as a threatened species. Furthermore, a critical habitat designation normally results in the news media publishing articles in local newspapers and special interest Web sites, usually with maps of the critical habitat. We have determined that the publication of maps and descriptions outlining the locations of this species would further facilitate unauthorized collection and trade, as collectors would know the exact locations where eastern massasauga rattlesnakes occur. While eastern massasauga rattlesnakes are cryptic in coloration, they can still be collected in high numbers during certain parts of their active seasons (for example, spring egress from hibernation or summer gestation). Also, individuals of this species are often slow-moving and have small home ranges. Therefore, publishing specific location information would provide a high level of assurance that any person going to a specific location would be able to successfully locate and collect specimens, given the species’ site fidelity and ease of capture once located. Due to the threat of unauthorized collection and trade, a number of biologists working for State and local conservation agencies that manage populations of eastern massasauga rattlesnakes have expressed to the FWS/SSR concerns with publishing maps and boundary descriptions of occupied habitat areas that could be associated with critical habitat designation (Redmer 2015, pers. comm.). Designating critical habitat could negate the efforts of State and local conservation agencies to restrict access to location information that could significantly affect future efforts to control the threat of unauthorized collection and trade and persecution of eastern massasauga rattlesnakes.

**Summary of Prudence Determination**

We have determined that designating critical habitat for the eastern massasauga rattlesnake is not prudent. Designation of critical habitat would increase the threats to the eastern massasauga rattlesnake from persecution and unauthorized collection and trade. A limited number of U.S. species listed under the Act have commercial value in trade. The eastern massasauga rattlesnake is one of them. Due to the market demand and willingness of individuals to collect eastern massasauga rattlesnakes without authorization, and the willingness of others to kill them out of fear or wanton dislike, we have determined that any action that publicly discloses the location of eastern massasauga rattlesnakes (such as critical habitat) puts the species in further peril. Many populations of the eastern massasauga rattlesnake are small, and the life history of the species makes it vulnerable to additive loss of individuals (for example, loss of reproductive adults in numbers that would exceed those caused by predation and other non-catastrophic natural factors), requiring a focused and comprehensive approach to reducing threats. One of the basic measures to protect eastern massasauga rattlesnakes from unauthorized collection and trade is restricting access to information pertaining to the location of the species’ populations. Publishing maps and narrative descriptions of eastern massasauga rattlesnake critical habitat would significantly affect our ability to reduce the threat of persecution, as well as unauthorized collection and trade. We have, therefore, determined in accordance with 50 CFR 424.12(a)(1) that it is not prudent to designate critical habitat for the eastern massasauga rattlesnake.

**Available Conservation Measures**

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against practices. The recognition of a species, through listing, results in public awareness, and
achieve recovery of these species. Following publication of this final rule, funding for recovery actions will be available from a variety of sources, including Federal budgets, State programs, and cost share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the States of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, New York, Ohio, Pennsylvania, and Wisconsin will be eligible for Federal funds to implement management actions that promote the protection or recovery of the eastern massasauga rattlesnake. Information on our grant programs that are available to aid species recovery can be found at: http://www.fws.gov/grants.

Please let us know if you are interested in participating in recovery efforts for the eastern massasauga rattlesnake. Additionally, we invite you to submit any new information on this species whenever available. Send any information you may have for recovery planning purposes (see FOR FURTHER INFORMATION CONTACT).

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is listed as an endangered or threatened species and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of any endangered or threatened species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. Federal agency actions within the species’ habitat that may require conference or consultation or both as described in the preceding paragraph include management and any other landscape-altering activities on Federal lands administered by the Service (Upper Mississippi National Wildlife and Fish Refuge, Wisconsin), U.S. Forest Service (Huron-Manistique National Forest, Michigan), National Park Service (Indiana Dunes National Lakeshore, Indiana), or military lands administered by branches of the Department of Defense (Fort Grayling, Michigan); flood control projects (Lake Carlisle and proposed and ongoing activities within the range of the listed species. Based on the best
Based on the best available information, the following actions are unlikely to result in a violation of section 9 of the Act if these activities are carried out in accordance with existing regulations and permit requirements; this list is not comprehensive:

1. Pre-emergent fire: Prescribed burns to control vegetation occurring prior to eastern massasauga rattlesnake emergence from hibernacula (typically in late March to early April), and
2. Pre-emergent mowing or other mechanical vegetation removal: Mowing or cutting of vegetation prior to eastern massasauga rattlesnake emergence from hibernacula.

Questions regarding whether specific activities would constitute a violation of section 9 of the Act should be directed to the Chicago Ecological Services Field Office (see FOR FURTHER INFORMATION CONTACT).

Required Determinations

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 et seq.), need not be prepared in connection with listing a species as an endangered or threatened species under the Endangered Species Act. We published a notice outlining our reasons for this determination in the Federal Register on October 25, 1983 (48 FR 49244).

References Cited

A complete list of references cited in this rulemaking is available on the Internet at http://www.regulations.gov and upon request from the Chicago Ecological Services Field Office (see FOR FURTHER INFORMATION CONTACT).

50 CFR Part 622

[Docket No. 100812345–2142–03]

RIN 0648–XE896

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; 2016 Commercial Accountability Measures and Closure for South Atlantic Greater Amberjack

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements accountability measures (AMs) for commercial greater amberjack in the exclusive economic zone (EEZ) of the South Atlantic. NMFS projects commercial landings of greater amberjack will reach the commercial annual catch limit (ACL) by October 4, 2016. NMFS closes the commercial sector for greater amberjack in the South Atlantic EEZ on October 4, 2016, and it will remain closed until the start of the next fishing year on March 1, 2017. This closure is necessary to protect the greater amberjack resource. NMFS is also closing the commercial greater amberjack fishery in the South Atlantic EEZ from October 4 through 2400 hours, A.l.t., December 31, 2016. Accordingly, NMFS is prohibiting retention of greater amberjack in the South Atlantic EEZ from October 4 through 2400 hours, A.l.t., December 31, 2016, and it will remain closed until the start of the next fishing year on March 1, 2017. This closure is necessary to protect the greater amberjack resource.

DATES: This rule is effective at 12:01 a.m., local time, October 4, 2016, and it will remain closed until the start of the next fishing year on March 1, 2017.

FOR FURTHER INFORMATION CONTACT: Mary Vara, NMFS Southeast Regional Office, telephone: 727–824–5305, email: mary.vara@noaa.gov.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic includes greater amberjack and is managed under the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP). The FMP was prepared by the South Atlantic Fishery Management Council and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act ( Magnuson-Stevens Act) by regulations at 50 CFR part 622. The commercial ACL for greater amberjack is equivalent to the commercial quota. The commercial quota for greater amberjack in the South Atlantic is 769,388 lb (348,989 kg), gutted weight, as specified in 50 CFR 622.190(a)(3).

Under 50 CFR 622.193(k)(1), NMFS is required to close the commercial sector for greater amberjack when the commercial ACL (commercial quota) is reached, or is projected to be reached, by filing a notification to that effect with the Office of the Federal Register. NMFS projects that commercial landings of South Atlantic greater amberjack will reach the commercial ACL by October 4, 2016. Accordingly, the commercial sector for South Atlantic greater amberjack is closed effective at 12:01 a.m., local time, October 4, 2016, until 12:01 a.m., local time, March 1, 2017. The operator of a vessel with a valid Federal commercial vessel permit for South Atlantic snapper-grouper with greater amberjack on board must have landed and bartered, traded, or sold such greater amberjack prior to 12:01 a.m., local time, October 4, 2016.

During the commercial closure, harvest and possession of greater amberjack in or from the South Atlantic EEZ is limited to the bag and possession limits, as specified in § 622.187(b)(1) and (c)(1). Also, during the commercial closure, the sale or purchase of greater amberjack taken from the South Atlantic EEZ is prohibited. The prohibition on sale or purchase does not apply to the sale or purchase of greater amberjack that were harvested, landed ashore, and sold prior to 12:01 a.m., local time, October 4, 2016, and were held in cold storage by a dealer or processor, as specified in § 622.190(c)(1)(i).

For a person on board a vessel issued a valid Federal commercial or charter vessel/headboat permit for the South Atlantic snapper-grouper fishery, the bag and possession limits and the sale and purchase provisions of the commercial closure for greater amberjack apply regardless of whether the fish are harvested in state or Federal waters, as specified in 50 CFR 622.190(c)(1)(ii).

Classification

The Regional Administrator, Southeast Region, NMFS, has determined this temporary rule is necessary for the conservation and management of greater amberjack and the South Atlantic snapper-grouper fishery and is consistent with the Magnuson-Stevens Act and other applicable laws. This action is taken under 50 CFR 622.193(k)(1) and is exempt from review under Executive Order 12866.

These measures are exempt from the procedures of the Regulatory Flexibility Act, because the temporary rule is issued without opportunity for prior notice and comment. This action responds to the best scientific information available. The Assistant Administrator for NOAA Fisheries (AA) finds that the need to immediately implement this action to protect greater amberjack since the capacity of the fishing fleet allows for rapid harvest of the commercial ACL (commercial quota). Prior notice and opportunity for public comment would require time and would potentially result in a harvest well in excess of the established commercial ACL (commercial quota).

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 et seq.

Dated: September 26, 2016.

Emily H. Menashes, Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 150818742–6210–02]

RIN 0648–XE922

Fisheries of the Exclusive Economic Zone Off Alaska; Big Skate in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of big skate in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary because the 2016 total allowable catch of big skate in the Central Regulatory Area of the GOA will be reached.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), September 29, 2016, through 2400 hours, A.l.t., December 31, 2016.
FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679. The 2016 total allowable catch (TAC) of big skate in the Central Regulatory Area of the GOA is 1,850 metric tons (mt) as established by the final 2016 and 2017 harvest specifications for groundfish of the GOA (81 FR 14740, March 18, 2016).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2016 TAC of big skate in the Central Regulatory Area of the GOA will be reached. Therefore, NMFS is requiring that big skate in the Central Regulatory Area of the GOA be treated as prohibited species in accordance with § 679.21(b).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting the retention of big skate in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of September 27, 2016.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and § 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 et seq.

Dated: September 28, 2016.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

SUPPLEMENTARY INFORMATION: On April 29, 2016 (81 FR 25620), OASAM published a proposed rule in the Federal Register to implement OMB Guidance on Nonprocurement Debarment and Suspension. The proposed rule is withdrawn as of September 30, 2016.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 982

Hazelnuts Grown in Oregon and Washington; Hearing on Proposed Amendment of Marketing Order No. 982

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of hearing on proposed rulemaking.

SUMMARY: Notice is hereby given of a public hearing to receive evidence on proposed amendments to Marketing Order No. 982 (order), which regulates the handling of hazelnuts grown in Oregon and Washington. Two amendments are proposed by the Hazelnut Marketing Board (Board), which is responsible for local administration of the order. The proposed amendments would add both the authority to regulate quality and the authority to establish different regulations for different markets. In addition, the Agricultural Marketing Service (AMS) proposes to make any such changes as may be necessary to the order to conform to any amendment that may result from the hearing. The proposals are intended to aid in pathogen reduction and meet the needs of different market destinations.

DATES: The hearing date is October 18, 2016, 8:30 a.m. to 5:00 p.m.

ADDRESSES: The hearing will be held at the Holiday Inn, 25425 SW. 95th Ave., Wilsonville, Oregon 97070.

FOR FURTHER INFORMATION CONTACT: Melissa Schmaedick, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, Post Office Box 952, Moab, UT 84532; Telephone: (202) 557–4783, Fax: (435) 259–1502, or Michelle Sharrow, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Melissa.Schmaedick@ams.usda.gov or Michelle.Sharrow@ams.usda.gov.

Small businesses may request information on this proceeding by contacting Richard E. Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Richard.Lower@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This administrative action is instituted pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.” This action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12866, 13563 and 13175. Notice of this rulemaking action was provided to tribal governments through USDA’s Office of Tribal Relations.
The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) seeks to ensure that within the statutory authority of a program, the regulatory and informational requirements are tailored to the size and nature of small businesses. Interested persons are invited to present evidence at the hearing on the possible regulatory and informational impacts of the proposals on small businesses. The amendments proposed herein have been reviewed under Executive Order 12988, Civil Justice Reform. They are not intended to have retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the USDA’s ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

The hearing is called pursuant to the provisions of the Act and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR part 900).

The proposed amendments were recommended by the Board and submitted to USDA on May 16, 2016. After reviewing the proposals and other information submitted by the Board, USDA made a determination to schedule this matter for hearing.

The proposed amendments to the order recommended by the Board are summarized as follows:

1. Amend the order to add authority to regulate quality. This would include: Adding a new § 982.45(c); adding a new § 982.46(d); and revising §§ 982.12 and 982.40. Corresponding changes would also revise the subheading “Grade and Size Regulation” prior to § 982.45 and the section heading for § 982.45 “Establishment of grade and size regulations.” to include quality.

2. Amend the order by adding § 982.45(d) to add authority to establish different outgoing quality regulations for different markets.

The Board, with USDA in administering the order, the proposals submitted by the Board have not received the approval of USDA. The proposed changes would add authority to regulate quality to aid in pathogen reduction and establish different outgoing quality regulations for different market destinations. The proposed amendments are intended to aid in the marketing of hazelnuts and improve the operation and administration of the order.

In addition to the proposed amendments to the order submitted by the Board, AMS proposes to make any such changes as may be necessary to the order to conform to any amendment that may result from the hearing, or to correct minor inconsistencies and typographical errors.

The public hearing is held for the purpose of: (i) Receiving evidence about the economic and marketing conditions which relate to the proposed amendments; (ii) determining whether there is a need for the proposed amendments to the order; and (iii) determining whether the proposed amendments or appropriate modifications thereof will tend to effectuate the declared policy of the Act.

Testimony is invited at the hearing on all the proposals and recommendations contained in this notice, as well as any appropriate modifications or alternatives.

All persons wishing to submit written material as evidence at the hearing should be prepared to submit four copies of such material at the hearing. Four copies of prepared testimony for presentation at the hearing should also be made available. To the extent practicable, eight additional copies of evidentiary exhibits and testimony prepared as an exhibit should be made available to USDA representatives on the day of appearance at the hearing. Any requests for preparation of USDA data for this rulemaking hearing should be made at least 10 days prior to the beginning of the hearing.

From the time the notice of hearing is issued and until the issuance of a final decision in this proceeding, USDA employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. The prohibition applies to employees in the following organizational units: Office of the Secretary of Agriculture; Office of the Administrator, AMS; Office of the General Counsel; and the Specialty Crops Program, AMS.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

List of Subjects in 7 CFR Part 982
Hazelnuts, Marketing agreements, Nuts, Reporting and recordkeeping requirements.

PART 982—HAZELNUTS GROWN IN OREGON AND WASHINGTON

1. The authority citation for 7 CFR part 982 continues to read as follows:

2. Testimony is invited on the following proposals or appropriate alternatives or modifications to such proposals.

Proposals submitted by the Hazelnut Marketing Board:

Proposal Number 1

3. Revise § 982.12 to read as follows:

§ 982.12 Merchantable hazelnuts.

Merchandizable hazelnuts means inshell hazelnuts that meet the grade, size, and quality regulations in effect pursuant to § 982.45 and are likely to be available for handling as inshell hazelnuts.

4. Amend § 982.40 by revising paragraph (d) to read as follows:

§ 982.40 Marketing policy and volume regulation.

(d) Grade, size, and quality regulations. Prior to September 20, the Board may consider grade, size, and quality regulations in effect and may recommend modifications thereof to the Secretary.

5. In § 982.45:

a. Revise the heading prior to this section;

b. Revise the section heading; and

c. Add paragraph (c).

The revisions and addition read as follows:

Grade, Size, and Quality Regulation

§ 982.45 Establishment of grade, size, and quality regulations.

(c) Quality regulations. For any marketing year, the Board may establish, with the approval of the Secretary, such minimum quality and inspection requirements, to facilitate the reduction of pathogens, applicable to hazelnuts, as will contribute to orderly marketing or be in the public interest. In such marketing year, no handler shall handle hazelnuts unless they meet applicable minimum quality and inspection requirements as evidenced by certification acceptable to the Board.

6. Revise § 982.46 by adding paragraph (d):
§ 982.46 Inspection and certification.

(d) Whenever quality regulations are in effect pursuant to § 982.45, each handler shall certify that all product to be handled or credited in satisfaction of a restricted obligation meets the quality regulations as prescribed.

Proposal Number 2

7. Amend § 982.45 by adding paragraph (d) to read as follows:

§ 982.45 Establishment of grade, size, and quality regulations.

(d) Different regulations for different markets. The Board may, with the approval of the Secretary, recommend different outgoing quality requirements for different markets. The Board, with the approval of the Secretary, may establish rules and regulations necessary and incidental to the administration of this provision.

Proposal submitted by USDA:

Proposal Number 3

Make other such changes as may be necessary to the order to conform with any amendment thereto that may result from the hearing, or to correct minor inconsistencies and typographical errors.

Dated: September 27, 2016.

Elanor Sturman,
Administrator, Agricultural Marketing Service.

DEPARTMENT OF ENERGY

10 CFR Part 430

RIN 1904–AD15

Energy Conservation Program: Energy Conservation Standards for Residential Conventional Cooking Products; Supplemental Notice of Proposed Rulemaking

ACTION: Extension of public comment period.

SUMMARY: On September 2, 2016, the U.S. Department of Energy (DOE) published a supplemental notice of proposed rulemaking (SNOPR) pertaining to proposed energy conservation standards for conventional cooking products. The notice provided an opportunity for submitting written comments, data, and information by October 3, 2016. This document announces an extension of the public comment period for submitting comments and data on the SNOPR or any other aspect of the rulemaking for conventional cooking products. The comment period is extended to November 2, 2016.

DATES: DOE will accept comments, data, and information regarding this rulemaking received no later than November 2, 2016.

ADDRESSES: Instructions: Any comments submitted must identify the SNOPR for Energy Conservation Standards for residential conventional cooking products, and provide docket number EERE–2014–BT–STD–0005 and/or regulatory information number (RIN) 1904–AD15. Comments may be submitted using any of the following methods: Interested persons may submit comments, identified by docket number EERE–2014–BT–STD–0005 and/or regulatory information number (RIN) 1904–AD15, by any of the following methods:

2. Email: ConventionalCookingProducts2014STD0005@ee.doe.gov Include the docket number and/or RIN in the subject line of the message. Submit electronic comments in WordPerfect, Microsoft Word, PDF, or ASCII file format, and avoid the use of special characters or any form of encryption.

3. Postal Mail: Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW., Washington, DC 20585–0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.

Docket: The docket, which includes Federal Register notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at www.regulations.gov. All documents in the docket are listed in the www.regulations.gov index. However, some documents listed in the index may not be publicly available, such as those containing information that is exempt from public disclosure.

The docket Web page can be found at: https://www.regulations.gov/docket?D=EERE-2014-BT-STD-0005. The docket Web page contains simple instructions on how to access all documents, including public comments, in the docket.

SUPPLEMENTARY INFORMATION: On September 2, 2016, DOE published in the Federal Register a supplemental notice of proposed rulemaking (the September 2016 SNOPR) pertaining to proposed energy conservation standards for conventional cooking products. In that notice, DOE proposed new or amended energy conservation standards for conventional cooking products and solicited comment and data from the public on the proposed standards, associated analyses, and results. DOE identified several key issues associated with the proposed standards on which DOE was particularly interested in receiving comment. 81 FR 60784. The SNOPR provided for the written submission of comments by October 3, 2016. The Association of Home Appliance Manufacturers (AHAM) has requested an extension of the comment period to allow additional time for manufacturers to conduct testing to evaluate the proposed energy conservation standards, based on the test procedures proposed in SNOPR that published in the Federal Register on August 22, 2016 (the August 2016 TP SNOPR) 81 FR 57374. AHAM stated that manufacturers do not currently conduct energy tests on conventional cooking products, and thus more time is needed to conduct testing on their product lines to evaluate the proposed test procedures and provide substantive comments on the proposed standards. (AHAM, No. 53, at pp. 2–5) An extension of the comment period would allow additional time for AHAM and its members and other interested parties to test existing models to the proposed SNOPR test procedure to gather any additional data and information to address the proposed
standards for cooking products, and submit comments to DOE.

In view of the request for a comment period extension for the September 2016 SNOPR, DOE has determined that a 30-day extension of the public comment period for the September 2016 SNOPR is appropriate. The comment period is extended until November 2, 2016. DOE further notes that any submissions of comments or other information submitted between the original comment end date and the extension of the comment period will be deemed timely filed.

DOE also notes that, in response to the August 2016 TP SNOPR, it received a number of comments pertaining to the test procedure that impact the proposed standard levels from the September 2016 SNOPR. Based on these comments and the extension of the comment period, DOE has identified additional information and data it is seeking that would be beneficial for the analysis in support of the standards rulemaking.

Sub-Zero Group, Inc. commented that the proposed test procedure and standards do not take into account design features associated with commercial-style gas cooking tops that impact efficiency, including:

- High input rate burners with large diameters and high controllability of the flame, for quicker heat-up times as well as the ability to simmer foods such as chocolates and sauces;
- Heavy cast iron grates for better heat distribution and strength to support large loads;
- Greater distance from the burner to the grate for heat distribution and reduction of carbon monoxide; and
- Larger open area for primary and secondary air for combustion and exhaust of combustion byproducts.

DOE welcomes data showing how these design factors affect the measured annual energy consumption relative to the proposed standard levels. As noted in the September 2016 SNOPR, DOE selected the proposed standard level for gas cooking tops to maintain the full functionality of cooking tops marketed as commercial-style and noted that commercial-style gas cooking tops are available on the market that meet the proposed efficiency level. 81 FR 60784, 60817, 60865. As a result, DOE is also seeking test data showing how the design differences for commercial-style cooking tops impact cooking performance relative to residential-style products.

AHAM and GE Appliances, a Haier Company (GE) also objected to the proposed test method for determining the standoff power consumption of combined cooking products (i.e., household cooking appliances that combines a conventional cooking top and/or conventional oven with other appliance functionality, which may or may not include another cooking product). GE urged DOE to consider adopting for conventional cooking tops the same prescriptive design requirement for the power supply that was proposed for conventional ovens.

DOE welcomes comments on the merits of the approach of adopting a prescriptive standard for the power supply for conventional cooking tops, including data on combined cooking products.

AHAM and GE also expressed concern regarding the proposed requirement to test each unique size setting of multi-ring surface units. AHAM and GE stated that multi-ring elements provide consumers the ability to adjust the element size to the size of the cookware, which in turn saves energy. AHAM and GE noted that because the inner elements of multi-ring surface units operate at lower efficiency, the proposed test procedure could result in the elimination of multi-ring elements. DOE welcomes data comparing available surface element diameters and cooking top energy use for cooking tops with multi-ring surface units and those that do not have this feature.

Issued in Washington, DC, on September 23, 2016.

Kathleen B. Hogan,
Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

FEDERAL RESERVE SYSTEM

12 CFR Parts 217 and 225
[DOcket No. R–1547]

RIN 7100 AE–58

Regulations Q and Y; Risk-Based Capital and Other Regulatory Requirements for Activities of Financial Holding Companies Related to Physical Commodities and Risk-Based Capital Requirements for Merchant Banking Investments

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of proposed rulemaking.

SUMMARY: The Board is seeking comment on a proposal to adopt additional limitations on physical commodity trading activities conducted by financial holding companies under complementary authority granted pursuant to section 4(k) of the Bank Holding Company Act and clarify certain existing limitations on those activities; amend the Board’s risk-based capital requirements to better reflect the risks associated with a financial holding company’s physical commodity activities; rescind the findings underlying the Board orders authorizing certain financial holding companies to engage in energy management services and energy tolling; remove copper from the list of metals that bank holding companies are permitted to own and store as an activity closely related to banking; and increase transparency regarding physical commodity activities of financial holding companies through more comprehensive regulatory reporting.

DATES: Comments must be received on or before December 22, 2016.

ADDRESSES: You may submit comments, identified by Docket No. R–1547 and RIN 7100 AE–58 by any of the following methods:

- Email: regs.comments@ federalreserve.gov. Include the docket number and RIN number in the subject line of the message.
- Fax: (202) 452–3819 or (202) 452–3102.
- Mail: Robert deV. Frierson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and

---

1 These comments are available in the conventional cooking products test procedure docket at https://www.regulations.gov/docket?D=EEERE-2012-BT-TP-0013.
Constitution Avenue NW., Washington, DC 20551. All public comments will be made available on the Board’s Web site at http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.aspx as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW. (between 18th and 19th Streets NW.), Washington, DC 20006 between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

I. Introduction

A. Background

Bank holding companies (BHCs) and their subsidiaries engage in certain types of physical commodity activities under a variety of authorities. Pursuant to the Bank Holding Company Act (BHC Act), BHCs may engage in activities that are “so closely related to banking as to be a proper incident thereto.” This authority allows BHCs to buy, sell, or hold precious metals, such as gold, silver, platinum, and palladium; participate as a principal in cash-settled derivative contracts based on commodities; and trade in commodity derivatives that allow for physical settlement under certain circumstances.

In the Gramm-Leach-Bliley Act (GLB Act) enacted in 1999, Congress expanded the activities in which a BHC may engage. The GLB Act permits BHCs that are well capitalized and well managed to elect to become financial holding companies (FHCs) and engage in a broader range of activities than permitted for BHCs that are not FHCs. Three provisions of the GLB Act permit FHCs to conduct a broader range of physical commodity activities and investments than are otherwise permitted for BHCs. First, the GLB Act permits FHCs to engage in any activity that the Board (in its sole discretion) determines is complementary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally. Pursuant to this authority, the Board has authorized certain FHCs to engage in physical commodity trading as well as energy management services and energy tolling. The GLB Act also added a grandfather provision that permits certain FHCs to continue to engage in a broad range of physical commodity activities. Finally, the GLB Act authorizes FHCs to make merchant banking investments in any type of nonfinancial company, including a company engaged in activities involving physical commodities.

B. Risks Associated With Physical Commodity Activities

There are a number of potential legal, reputational and financial risks associated with the conduct of physical commodity trading activities. Over the past decade, monetary damages associated with an environmental catastrophe involving physical commodities have ranged from hundreds of millions to tens of billions of dollars. These damages can exceed the market value of the physical commodity involved in the catastrophic event, and can exceed the committed capital and insurance policies of the organization. Certain federal environmental laws, including the Oil Pollution Act of 1990 (OPA), the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), and the Clean Water Act (CWA), generally impose liability on owners and operators of facilities and vessels for the release of physical commodities, such as oil, distillate fuel oil, jet fuel, liquefied petroleum gas, gasoline, fertilizers, natural gas, and propylene. Consequently, a company that directly owns an oil tanker or petroleum refinery that releases crude oil in a navigable waterway or adjoining shoreline in the United States may be liable for removal costs and damages for that release under the OPA.

See 33 U.S.C. 2701–02.
See 42 U.S.C. 9607.
See 33 U.S.C. 1321. In general, liability under the OPA, CWA, and CERCLA is subject to limited defenses, including releases caused by an act of God. See, e.g., 33 U.S.C. 2702; 42 U.S.C. 9607.
See 33 U.S.C. 2702. The OPA generally limits liability for spills from facilities to $350,000,000 and liability from spills from vessels to the greater of $1,900 per gross ton or $22,000,000. Id. at 2704.

Continued
In addition to Federal environmental law, state environmental laws separately impose liability for the harmful or unauthorized release of an environmentally sensitive commodity.11 Like Federal environmental law, many states impose strict liability for damages from the unauthorized release of specified harmful substances on the owners and operators of the facility or vessel from which the discharge occurred. Many states also impose liability based on the causal connection between a party’s actions and the prohibited conduct even if the alleged company did not directly participate in the wrongdoing. This concept of “piercing the corporate veil” is an exception to the general rule in corporate law that a parent company is not liable for the acts of its subsidiaries, and may be applied when the affiliated entity exercises a high degree of control over the liable company.15 Courts typically require multiple indicia of control before assigning liability to the parent or affiliated company.16 Common indicia include managing day-to-day operations, undercapitalizing subsidiaries, and commingling of assets, employees, legal advice, accounting, or office space.17 Courts have also used the concept of veil piercing to assign liability under Federal environmental law.18 Further, even if a parent company is not assigned liability through a veil piercing action, the parent company may provide support to affiliated entities involved in an environmental catastrophe to limit reputational damage or as a condition to a settlement agreement. For example, BP p.l.c., the ultimate parent company of BP Exploration & Production, Inc. and BP Corporation North America, Inc., guaranteed the payment of more than $20 billion as part of a consent decree resolving claims against its subsidiaries resulting from the Deepwater Horizon oil spill.19

However, the OPA liability cap will not apply if the party engaged in certain types of misconduct (e.g., willful misconduct, gross negligence, violation of Federal safety regulation, failure to report incident). Id.

13 The OPA, CERCLA, and CWA explicitly state that the statutes do not preempt state laws imposing additional liability or requirements with respect to the discharge of hazardous substances. 33 U.S.C. 1312(o), 2718(a); 42 U.S.C. 9614(a).

14 State common law tort doctrines may also provide additional bases for liability for environmental harm, such as negligence, trespass, and nuisance.

15 State laws also allow for the assignment of the liability of one company to its parent and/or another affiliated company even if the affiliated company did not directly participate in the wrongdoing. This concept of “piercing the corporate veil” is an exception to the general rule in corporate law that a parent company is not liable for the acts of its subsidiaries, and may be applied when the affiliated entity exercises a high degree of control over the liable company. Courts typically require multiple indicia of control before assigning liability to the parent or affiliated company. Common indicia include managing day-to-day operations, undercapitalizing subsidiaries, and commingling of assets, employees, legal advice, accounting, or office space. Courts have also used the concept of veil piercing to assign liability under Federal environmental law. Further, even if a parent company is not assigned liability through a veil piercing action, the parent company may provide support to affiliated entities involved in an environmental catastrophe to limit reputational damage or as a condition to a settlement agreement. For example, BP p.l.c., the ultimate parent company of BP Exploration & Production, Inc. and BP Corporation North America, Inc., guaranteed the payment of more than $20 billion as part of a consent decree resolving claims against its subsidiaries resulting from the Deepwater Horizon oil spill.

13 See, e.g., See William Passalacqua Builders, Inc., v. Resenbach Developers South, Inc., 933 F.2d 131, 137–141 (2d Cir. 1991) (finding an oil broker liable under New York Navigation Law section 181 because the broker was contractually obligated to provide the oil and specify the means of its delivery even though the broker did not own the oil and had used third parties to move and store the oil). See also N.J. Dep’t of Envtl. Prot. v. Dimant, 212 N.J. 153, 177, 51 A.3d 816 (2012) (summarizing prior state cases to require some connection between the discharge complained of and the alleged discharger); Authors of New Brunswick v. Soledad Investors, 826 A.2d 673, 683 [N.J. 2003] (suggesting that such causal liability under New Jersey law should be read to impose liability on persons responsible for the discharge of the substance).

14 See, e.g., Alaska Stat. section 46.03.822; Cal. Gov’t Code §§ 8670.3, 8670.56.5; Fla. Stat. section 376.12 (imposing liability for cleanup costs on the owner of the covered substance but only if the owner and operator of the facility or vessel do not pay such costs and such parties were not in compliance with the financial security requirement at the time of the release); Md. Envir. Code Ann. § 4–401; Ore. Rev. Stat. § 468B.310; Wash. Rev. Code Ann. section 90.56.370.

15 Restatement (Second) of Torts sections 158, 165, 390, 822, 825, 826.

16 C. Limitations on Physical Commodity Activities

To help address these risks, the Board placed a number of limitations, discussed below, on the physical commodity activities it has authorized under the GLB Act.

Section 4(k)(1)(B) Complementary Authority. The GLB Act added section 4(k)(1)(B) to the BHC Act to permit an FHC to engage in activities that the Board determines to be complementary to a financial activity (complementary authority). The provision’s purpose was to allow the Board to permit FHCs to engage in an activity that appears to be commercial rather than financial in nature, but that is meaningfully connected to a financial activity such that it complements the financial activity. When determining that an activity is complementary to a financial activity for an FHC, the Board must find that the activity does not pose a substantial risk to the safety and soundness of depository institution subsidiaries of the FHC or the financial system generally. In addition, the Board is required to consider whether performance of the activity can reasonably be expected to produce benefits to the public—such as greater convenience, increased competition, or gains in efficiency—that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices.

Under this authority, the Board has approved the requests of a limited number of FHCs to engage in three complementary activities related to physical commodities: (1) Physical commodity trading involving the purchase and sale of commodities in the spot market, and taking and making delivery of physical commodities to settle commodity derivatives (physical commodity trading); (2) providing transactions and advisory services to power plant owners (energy

management services); and (3) paying a power plant owner fixed periodic payments that compensate the owner for its fixed costs in exchange for the right to all or part of the plant’s power output (energy tolling). Together, these three activities are referred to as complementary commodity activities.

The Board placed certain restrictions on each complementary commodity activity to protect against the risks the activity could pose to the safety and soundness of the FHC, any of its insured depository institution (IDI) subsidiaries, and the U.S. financial system. For example, the Board limited the size of these activities by imposing limits on the amount of assets or revenue that an FHC could have committed to complementary commodity activities. Specifically, the aggregate market value of commodities held under physical commodity trading and energy tolling may represent no more than 5 percent of the tier 1 capital of the FHC. The Board also imposed a cap on energy management services of no more than 5 percent of an FHC’s consolidated operating revenues. To help protect against dealing in illiquid commodities, the Board also limited the physical commodity trading authority to only physical commodities approved by the Commodity Futures Trading Commission (CFTC) for trading on a U.S. futures exchange (unless specifically excluded by the Board) or commodities the Board otherwise approves.

The Board also prohibited FHCs from owning, operating, or investing in facilities that extract, transport, store, or alter commodities under complementary authority. FHCs also are required to ensure that the third-party contractors hired to store, transport, and otherwise handle the physical commodities of the FHC are reputable.

**Section 4(o) Grandfather Authority.** In the GLB Act, Congress amended the BHC Act to allow certain companies to continue to engage in a broad range of activities involving physical commodities if these companies subsequently became FHCs. Under section 4(o) of the BHC Act, a company that was not a BHC prior to and becomes an FHC after November 12, 1999, may continue to engage in activities related to the trading, sale, or investment in commodities that were not permissible for BHCs as of September 30, 1997, if the company was engaged in the United States in any of such activities as of September 30, 1997 (section 4(o) grandfather authority). Section 4(o) grandfathered firms are permitted by statute to engage in a broader range of activities than firms that are limited to conducting physical commodity activities under complementary authority. This broader range of activities includes storing, transporting, extracting, and altering commodities. Section 4(o) imposes only two conditions on the conduct of activities: (i) The activities are limited to no more than 5 percent of the total consolidated assets of the FHC, and (ii) the FHC is prohibited from cross-marketing the services of its subsidiary depository institution(s) and subsidiary(ies) engaged in activities under the section 4(o) grandfather authority. The 5 percent of assets limit permits section 4(o) grandfathered FHCs to hold significantly larger amounts of a wider range of commodity-related assets than those FHCs that conduct commodities activities under complementary authority, which does not permit storage, transport, extraction or similar activities and imposes a stricter limit of 5 percent of tier 1 capital on the more limited class of commodity holdings that are permitted under complementary authority.

**Merchant Banking Authority.** The GLB Act also amended the BHC Act to allow FHCs to engage in merchant banking activities. Under section 4(k)(4)(H) of the BHC Act, FHCs may invest in nonfinancial companies as part of a bona fide securities underwriting or merchant or investment banking activity (merchant banking authority). These investments may be made in any type of ownership interest and in any type of nonfinancial company (portfolio company). The GLB Act imposes conditions on the merchant banking investment activities of FHCs. First, the investment must be part of “a bona fide underwriting or merchant or investment banking activity” and may not be held by an IDI or subsidiary of an IDI. Second, an FHC making merchant banking investments must own or control a securities affiliate or a registered investment adviser that advises an affiliated insurance company. Third, merchant banking investments must be held only “for a period of time to enable the sale or disposition thereof on a reasonable basis consistent with the financial viability of the activities.” Finally, an FHC may not routinely manage or operate the portfolio company “except as may be necessary or required to obtain a reasonable return on investment upon resale or disposition.”

The Board’s rules contain limitations that implement these statutory requirements. For example, Regulation Y prohibits FHCs in most cases from holding merchant banking investments for more than 10 years (or for more than 15 years for investments held in a qualifying private equity fund). Further, Regulation Y limits the duration of routine management to the period necessary to address the cause of the FHC’s involvement, to obtain suitable alternative management arrangements, to dispose of the investment, or to otherwise obtain a reasonable return upon the resale or disposition of the investment. Additionally, an FHC must establish risk-management policies and procedures for its merchant banking activities, and policies and procedures that maintain corporate separateness between the FHC and its portfolio companies. Maintaining corporate separateness protects the FHC and its subsidiary IDIs from potential legal liability associated with the operations and financial obligations of the FHC’s portfolio companies and private equity funds. The Board’s regulatory capital rule (Regulation Q) addresses merchant banking investments through risk-weighting in the equity framework.
D. Summary of the Advance Notice of Proposed Rulemaking (ANPR) and Comments on the ANPR

Over the last 15 years, a number of FHCs have engaged in physical commodity activities pursuant to these authorities and the Federal Reserve has gained supervisory experience with the implementation of these restrictions. In addition, the Federal Reserve has monitored the connection between authorized physical commodity activities and financial activities, including derivative trading and hedging activities. The Board notes that after an initial growth of physical commodity activities of FHCs, the level of physical commodity activities at FHCs has generally declined.

In January 2014, as part of an ongoing review of the commodities activities of FHCs, the Board sought public comment on a variety of issues related to the unique and significant risks of physical commodity activities through an ANPR.38 In the ANPR, the Board invited comment on whether additional prudential restrictions or limitations on commodities-related activities were appropriate to further mitigate the risks of those activities.

In light of the potential risks associated with physical commodity activities, the ANPR queried whether the current capital and insurance requirements adequately account for the degree and types of liabilities that would result from physical commodities in the event of an environmental catastrophe. The ANPR also sought comment on whether FHCs’ vendor-approval processes and current industry safety policies and procedures are adequate in light of recent environmental disasters.39

Apart from direct and indirect financial liability, the ANPR observed that the public confidence in a holding company that was engaged in a physical commodity activity could suddenly and severely be undermined by an environmental disaster, as could the confidence in the company’s subsidiary IDI or funding markets. Financial companies, and in particular holding companies of IDIs, are particularly vulnerable to reputational damage in their banking operations. As a result, a catastrophic event involving an FHC could undermine confidence in the FHC’s subsidiary bank or may limit its access to funding markets until the extent of the FHC’s liability is assessed.

The Board received more than 180 unique comments and more than 16,900 form letters in response to the ANPR from end users of commodities (e.g., non-financial entities that use commodities in their operations or businesses), trade associations, public interest groups, academics, members of Congress, and other individuals. In general, comments from individuals, members of Congress and public interest groups opposed FHC involvement in physical commodity activities or supported additional restrictions on FHC involvement in physical commodities. In contrast, comments from end users, FHCs, and banking trade organizations were generally supportive of FHC involvement in physical commodity activities or opposed additional restrictions on these activities.

Comments from insurance companies urged the Board to consider the differences between insurance companies and FHCs in terms of their business models, risks, and regulations.

**Risks of FHC participation in physical commodity activities.** Comments that opposed FHC participation in physical commodity markets or that favored additional limitations on these activities argued that these activities pose risks to FHCs individually and to the financial system generally. These commenters generally described risks associated with physical commodity activities, including environmental risks, catastrophic risks, geopolitical risks (e.g., commodities activities conducted in regions experiencing political turmoil), compliance risks (e.g., bribery, environmental risks), and supply chain issues. Some of these commenters recommended that the Board prohibit trading in or ownership of commodities associated with catastrophic risk, strengthen prudential safeguards, or require additional capital in connection with such activities.

Many of these commenters expressed concern regarding the ability of FHCs to monitor these risks and questioned the ability of FHCs to insure or hedge against these risks. Some commenters argued that FHCs face a challenge in monitoring commodities risks because of the diverse nature of commodities activities and the number of federal agencies involved in commodities regulation. Some commenters contended that regulators face these same challenges in monitoring commodities risks. Those opposed to FHC participation in physical commodity markets expressed concern that excessive speculation in commodities markets, which they attributed in part to FHC involvement in these markets, causes market distortions.

Comments that opposed FHCs engaging in physical commodity activities or that favored additional limitations on such activities expressed concern that FHCs have conflicts of interest in dealing with customers and enjoy an unfair competitive advantage. These commenters cited news articles alleging market manipulation by certain FHCs in the aluminum and copper markets. Some commenters also argued that the ability of FHCs to make proprietary trades and purchases of physical commodities may conflict with the interests of their customers. These commenters argued that FHCs may provide less favorable terms on products and services to customers when those customers compete with FHCs in the physical commodity markets. Finally, some commenters stated that the ability of FHCs to trade in physical commodity markets and own physical commodities provides an opportunity for FHCs to use information gleaned from their trading activities to manipulate financial markets.

Comments in favor of FHC participation in the physical commodity markets or opposed to additional restrictions on these activities argued that FHC participation in these markets provides valuable and hard-to-replace services to end users of commodities. Some commented that FHCs were desirable counterparties in these markets because FHCs are well capitalized, well regulated, and familiar with their customers’ businesses. Commenters commonly argued that the ability of FHCs to offer bespoke hedging arrangements to customers would not be possible without their participation in physical commodity activities. Commenters also cautioned that costs for end users would increase if FHCs exited physical commodity markets, including costs to municipalities and retail purchasers of commodities.

Some commenters contended that FHC involvement in physical commodity activities enhances liquidity and efficiency in physical commodity markets. Multiple commenters cited a correlation between recent reductions in wholesale power sales in California with the exit of certain FHCs from those markets. Commenters supportive of FHC participation in physical commodity activities stated that there was not sufficient evidence to substantiate the risks described in the ANPR. They responded by distinguishing events cited in the ANPR, like the Deepwater Horizon oil spill, from the exposures commonly faced by commodity traders both in terms of the extent of potential damages from an incident and the potential to be held financially.

---

38 See 79 FR 3329 (Jan. 21, 2014).
39 See 79 FR 3329, 3332 (Jan. 21, 2014).
responsible for such incidents. More specifically, these commenters expressed confidence that adequate insurance generally was available or that the FHC corporate structure offered adequate protection against legal liability. Many FHCs and banking trade organizations argued that FHCs could manage risks arising from physical commodity activities through a robust risk-management framework that is tailored to specific categories of risk. Finally, commenters in favor of FHC participation in these activities regarded the reputational risks associated with physical commodities as being either not substantial or not unique to commodities.

Complementarity of Complementary Commodity Activities. Multiple commenters argued that physical commodity activities conducted in connection with derivatives activities are complementary to financial activities for the reasons cited in the Board’s orders. For example, commenters argued that physical commodity activities conducted pursuant to the complementary authority better enable FHCs to fulfill their obligations under commodity derivatives contracts and to net physical and financial contracts by allowing physical settlement.

Other commenters believed that physical commodity activities are not complementary to financial activities. These commenters argued that the scope of complementary commodity activities exceeds Congress’s intent for complementary authority, which they assert envisioned low-risk activities such as publishing travel magazines. Some commenters argued that FHCs should only be permitted to engage in banking activities.

Merchant Banking Authority. Some commenters supported imposing additional restrictions on merchant banking activities, including expanding the range of actions that would constitute routine management and shortening investment holding periods. Commenters supportive of additional restrictions on merchant banking activities argued that these activities pose many of the same risks to safety and soundness and financial stability that are posed by complementary commodity activities and section 4(o) grandfather authority, such as environmental risks, reputational risks, geopolitical risks, compliance risks, and supply chain issues.

In contrast, other commenters urged the Board not to place additional restrictions on merchant banking investments for several reasons. First, they argued that merchant banking authority reflects a considered Congressional determination that accounted for both the benefits and the risks of these activities and determined the appropriate balance of restrictions on merchant banking activities. Commenters contended that additional restrictions on merchant banking investments would undermine the benefits of merchant banking activities and hamper economic growth by, for example, reducing access to seed capital for some small-to-medium-sized businesses. Some commenters maintained that current regulatory and risk-management safeguards are adequate to prevent or limit risks of merchant banking activities to financial institutions. In support of this position, some pointed to the lack of significant liability resulting from past merchant banking activities. Some commenters argued that imposing further restrictions on merchant banking could increase risks to FHCs by preventing FHCs from taking over routine management functions when necessary to avoid significant loss, and by preventing FHCs from diversifying their investment portfolios through merchant banking investments. Other commenters argued that if FHCs are given an insufficient investment horizon there is a greater likelihood that they will be forced to exit their investments at a loss in order to comply with holding period requirements.

II. Description of Proposed Rule

Based on its review of comments and additional analysis, the Board invites public comment on a proposal to (i) adopt additional limitations on physical commodity activities conducted pursuant to the complementary authority in section 4(k)(1)(B) and clarify certain existing limitations on those activities to reduce potential risks these activities may pose to the safety and soundness of FHCs and their depository institutions; (ii) amend the Board’s risk-based capital requirements to increase the requirements associated with physical commodity activities and merchant banking investments in companies engaged in physical commodity activities to better reflect the potential risks of legal liability associated with a catastrophic event involving these physical commodity activities; (iii) rescind the findings underlying the Board orders authorizing certain FHCs to engage in energy management services and energy tolling under complementary authority and provide firms currently authorized to conduct these activities a transition period to unwind or divest these activities; (iv) remove copper from the list of metals that BHCs are permitted to own and store as an activity closely related to banking under section 4(c)(8) of the BHC Act and Regulation Y; and (v) increase transparency regarding the physical commodity activities of FHCs through more comprehensive regulatory reporting. The Board invites public comment on all aspects of this proposal, including in particular the issues identified below.

A. Scope of Permissible Physical Commodity Activities Permitted

As a condition of approving notices filed by FHCs to engage in physical commodity trading, the Board limited the market value of the commodities an FHC could hold under complementary authority to an aggregate of 5 percent of the FHC’s consolidated tier 1 capital. The Board imposed this limit to reduce the safety and soundness risks of holding physical commodities, which include unique risks such as legal and environmental risks described above as well as operational risks associated with the storage and transportation of physical products (e.g., delay of delivery, loss of product).

In addition to complementary authority, FHCs and their subsidiaries may hold physical commodities under other authorities. For example, the Office of the Comptroller of the Currency (OCC) has permitted certain national banks to hold physical commodities to hedge customer driven, bank-permissible derivative transactions and BHCs may take possession of physical commodities provided as collateral in satisfaction of debts previously contracted in good faith. As some commenters argued, holding physical commodities presents unique safety and soundness risks to a banking organization regardless of the authority under which the commodity is held or the entity within the organization that holds the commodities.

43 Letter from Senator Carl Levin dated April 16, 2014; Senate Permanent Subcommittee on Investigations, Wall Street Bank Involvement with Physical Commodities, 10, 390–396 (Nov. 20, 2014) (PSI Report); see also OCC Banking Circular 277 at 24 (noting the potential additional risks associated with physical hedging activities). In a comment letter on the ANPR dated December 17, 2014, Senator Carl Levin, then-Chairman of the Subcommittee, requested that the PSI Report be added to the administrative record for the ANPR.
To address the potential that the Board’s 5 percent limit may be of limited value in addressing the level and risks of physical commodity activities of FHCs because FHCs also rely on other authorities to conduct these activities, the Board is proposing to account for physical commodities held by the consolidated banking organization under a broader range of authorities within the 5 percent limit on physical commodity trading that an FHC may conduct under complementary authority. The proposed tighter limit would better account for the risks that activities involving physical commodities pose to the consolidated organization.44

Specifically, the proposal would prohibit an FHC from purchasing, selling, or delivering physical commodities pursuant to its authority to engage in physical commodity trading under section 4(c)(8) or 4(k)(1)(B) if the market value of physical commodities owned by the FHC and its subsidiaries under any authority, other than authority to engage in merchant banking activities, similar investment authority for insurance companies, or authority to acquire assets or voting securities held in satisfaction of debts previously contracted, exceeds 5 percent of the consolidated tier 1 capital of the FHC.45

The proposal would provide FHCs with two years from the effective date of this rule to conform to the revised 5 percent cap.

Under the proposal, the cap on an FHC’s physical commodity trading activities would be calculated based on physical commodities the FHC holds on a consolidated basis. While it would not restrict the ability of a subsidiary to engage in a physical commodity activity pursuant to any authority other than complementary authority, it would limit the authority of the FHC to expand its physical commodity trading activities based on complementary authority if the FHC already engages in a substantial amount of physical commodity activities under other authorities. The proposal would exclude from the calculation of the cap physical commodity activities of portfolio companies held under merchant banking authority or related to satisfaction of debts previously contracted because activities under these authorities are temporary and, because of other restrictions, may be difficult for an FHC to monitor and control. Finally, because insurance company investments are regulated under state insurance law, companies held under section 4(k)(4)(I) are not a part of the Board’s current proposal.46

2. Clarification of Prohibitions on Certain Operations

As explained above, owners and operators of facilities and vessels that extract, process, store or transport certain physical commodities may be liable for damages and cleanup costs associated with a release of the physical commodity. Because this liability can be substantial, the Board prohibited FHCs from owning, operating, or investing in facilities for the extraction, transportation, storage, or distribution of commodities as part of complementary authority.47

The proposal would codify in Regulation Y this limitation and strengthen restrictions designed to ensure that FHCs are not found to “operate” an entity engaged in physical commodity activities for purposes of Federal and state environmental laws. These restrictions prohibit (1) participation in the day-to-day management or operations of the facility, (2) participation in management and operational decisions that occur in the ordinary course of the business of the facility, and (3) managing, directing, conducting or providing advice regarding operations having to do with the leakage or disposal of a physical commodity or hazardous waste or involvement in decisions related to the facility’s compliance with environmental statutes or regulations, including any law or regulation referenced in the proposed definition of covered physical commodity (discussed below). The proposed list of actions is not meant to be exhaustive; an FHC is expected to take other steps as appropriate to limit the types of actions that potentially could impose environmental liability on the FHC or otherwise suggest that the FHC is unduly involved in the activities of third parties.

Question 1. Does the scope of the proposed list of prohibited actions appropriately protect against an FHC being found to “operate” a facility or vessel under Federal and state environmental law? Please explain your answer. Would it be more or less appropriate for the regulation instead to prohibit any FHC involvement that could subject the FHC to any such liability as operator under environmental law without describing what types of actions could lead to the liability, and why?

B. Risk-Based Capital Requirements for Covered Physical Commodities

1. Overview

The Board is proposing to amend its risk-based capital rule to better reflect the risk of legal liability that an FHC may incur as a result of its physical commodity activities. The resulting increase in capital requirements would be reflected in both the standardized approach and the advanced approaches risk-based capital ratios, and would be in addition to any existing capital requirements relating to market risk or operational risk applicable to the assets associated with physical commodity activities of an FHC or relating to existing counterparty credit risk applicable to financial transactions associated with such activities.

As described in more detail below, covered physical commodities are those with the highest likelihood of exposing an FHC to legal liability under Federal or state environmental laws. The proposal would not change the risk-based capital treatment of other physical commodities. It would moderately increase the risk weight for covered physical commodities that are held as part of a commodity trading activity that would be permissible under section 4(k) of the BHC Act, and would significantly increase the risk weight for covered physical commodities that an FHC owns as part of an activity authorized solely under section 4(o) of the BHC Act. The Board is proposing a higher risk weight

44 An increase in the commodity derivatives business of a national bank that is a subsidiary of an FHC may increase the amount of physical commodities the national bank is able to hold as part of its commodity hedging activities as well as the capital requirements of the bank and FHC. See OCC Bulletin 2015–35 (Aug. 4, 2015) (limiting physical hedging activities to 5 percent of the notional value of the bank’s derivatives that are in that same particular commodity and allow for physical settlement within 30 days). By including the amount of physical commodities held at the national bank within the proposed 5 percent limit, the proposed limit also would ensure that the amount of physical commodities the FHC is able to hold under complementary authority does not increase along with any increase in the amount of physical commodities held at the national bank.

45 Consistent with the existing notice requirements of FHCs engaging in physical commodity trading, the proposal also would require an FHC to, if, on a consolidated basis, the market value of physical commodities owned by the FHC exceeds 4 percent of the consolidated tier 1 capital of the FHC. See, e.g., 2003 Citi Order.

47 For example, an FHC may face liability under certain states’ environmental laws based on its ownership of the hazardous substance or on hiring third parties to deliver the substance. See supra notes 12–17 and corresponding text.

48 See, e.g., 2003 Citi Order. The Board’s orders also prohibit the FHC from processing, refining, or otherwise altering commodities, and clarify that in conducting its physical commodity trading, the FHC will be expected to use appropriate storage and transportation facilities owned and operated by third parties.
for activities permitted to be conducted solely under section 4(o) because these activities contain the highest legal liability and reputational risks (e.g., storing, refining, extracting, transporting or altering). The proposed risk weight for a merchant banking investment in a company engaged in covered physical commodity activities would depend on the nature of those activities.

The proposed capital requirements would apply only to activities in physical commodities that are substances covered under Federal or relevant state environmental law (covered physical commodities). These physical commodities carry the greatest potential liability under relevant environmental laws. The proposed definition specifically identifies the Federal environmental laws—CERCLA, OPA, CAA, and CWA—likely to impose such liability. However, the proposed definition does not name individual state environmental laws.

Rather, an FHC would be required to identify on a state-by-state basis the physical commodities it owns that are not covered substances under the enumerated Federal laws. It would then be required to determine whether the physical commodities it owns in a particular state are subject to liability under that state’s environmental laws.

This approach is intended to limit an FHC’s compliance burden to only those commodities and jurisdictions relevant to the activities actually conducted by the FHC, while helping to ensure the FHC understands the range of its riskiest physical commodity activities and the breadth of state environmental laws to which the FHC may be subject.

FHCs may be subject to legal liability in an amount much greater than the value of the physical commodities they own. An environmental catastrophe linked to an FHC’s physical commodity activities could suddenly and severely undermine public confidence in the FHC and any of its subsidiary IDIs, limiting its access to funding markets until the market assesses the extent of the FHC’s liability. Both environmental risks and reputational risks are higher for activities permissible only under section 4(o) grandfather authority than for activities permissible as part of physical commodity trading under complementary authority. As noted above, section 4(o) grandfather authority permits direct ownership or operation of facilities that manage, refine, store, extract, transport, or alter covered physical commodities. These activities increase the potential that an FHC will be held liable for damages from an environmental catastrophe involving covered physical commodities. To help address these risks, as well as the inherent uncertainty in valuing the potential damages associated with a catastrophe, the proposal assigns a 1,250 percent risk weight—the highest risk weight currently specified by the Board under the standardized approach—to the market value of all covered physical commodities permitted to be owned only under section 4(o) grandfather authority.

The proposal also assigns a 1,250 percent risk weight to the original cost basis (i.e., cost basis gross of accumulated depreciation and asset impairment) of section 4(o) infrastructure assets, which are any non-commodity on-balance-sheet assets owned pursuant to section 4(o) grandfather authority (e.g., pipelines, refineries). The proposal bases the capital requirement on the original cost basis of a 4(o) infrastructure asset rather than its carrying value because the risk of legal liability does not decline over the life of the infrastructure asset. The proposed capital requirement for 4(o) infrastructure assets is intended to address the risk of legal liability resulting from the unauthorized discharge of a covered substance in connection with the infrastructure asset.

The proposed 1,250 percent risk weight is not intended to require capital against the full amount of legal liability and reputational harm that might result from a catastrophic event, which can vary significantly depending on the nature and extent of the environmental disaster and could be extremely large. Rather, the risk weight is intended to reflect the higher risks of physical commodity activities permissible only under section 4(o) grandfather authority without also making the activities prohibitively costly by attempting to capture the risks of the largest environmental catastrophes.

The proposal would assign a risk weight of 300 percent to covered commodities held pursuant to section 4(k) permissible physical commodity trading. The proposed 300 percent risk weight is designed to help ensure that FHCs engaged in commodity trading have a level of capitalization for such activities that is roughly comparable to that of nonbank commodities trading firms. Because the risks of an activity generally are independent of the authority under which an FHC conducts the activity, the proposal would also assign a 300 percent risk weight to physical commodity activities conducted under section 4(o) grandfather authority that would be permissible physical commodity trading under complementary authority.

As part of the conditions for an amount of a covered physical commodity owned by an FHC engaged in physical commodity activities under section 4(o) grandfather authority to be assigned a 300 percent risk weight, the market value of the amount, when aggregated with the market value of almost all of the physical commodities owned by the FHC that the proposal would not already subject to a 1,250 percent risk weight, must not exceed 5 percent of the consolidated tier 1 capital of the FHC. The proposal refers to this aggregate amount as the “section 4(k) cap parity amount” and will be added to the capital required for an FHC’s activities covered under section 4(o) grandfather authority.

A physical commodity would be a covered commodity under the proposed definition if the commodity is a covered substance under the identified Federal environmental laws regardless of whether the commodity is held in the United States. Applying the Federal environmental law framework to all physical commodities held outside the United States acknowledges the risk that FHCs may be held liable under similar laws for damages or cleanup costs associated with an environmental catastrophe that occurs outside of the United States without requiring FHCs to identify the physical commodities and activities for which any foreign authority may impose liability.

---

48 A physical commodity would be a covered commodity under the proposed definition if the commodity is a covered substance under the identified Federal environmental laws regardless of whether the commodity is held in the United States. Applying the Federal environmental law framework to all physical commodities held outside the United States acknowledges the risk that FHCs may be held liable under similar laws for damages or cleanup costs associated with an environmental catastrophe that occurs outside of the United States without requiring FHCs to identify the physical commodities and activities for which any foreign authority may impose liability.

50 12 CFR 217.52(b)(5).

51 The proposal references activities engaged in by the FHC under section 4(o) grandfather authority, including activities of the FHC’s subsidiaries. An FHC owning a covered physical commodity under section 4(o) grandfather authority may treat the commodity as a section 4(k) permissible commodity and apply a 300 percent risk weight if it meets certain requirements described below.

54 See, e.g., 12 CFR 217.38, 414(c)(1), and 424(a)(1).

55 The Board’s regulatory capital rule applies a 1,250 percent risk weight to certain exposures that pose a high degree of risk to the banking organization and regarding which the banking organization may have difficulty determining the extent of the losses. For example, it applies a 1,250 percent risk weight to securitization exposures that raise supervisory concerns with the subjectivity involved in valuation of the exposure and in instances where the institution is not able to demonstrate a comprehensive understanding of the potential losses that could result from a default or partial default of the collateral. Similarly, the proposal’s modifications to the 5 percent cap on physical commodity trading, the section 4(k) cap parity amount would exclude amounts of physical commodities owned pursuant to merchant banking authority, similar insurance company investment authority, and authority to acquire assets and voting securities in satisfaction of debts previously contracted. The proposal would assign a 1,250 percent risk weight to this excess amount of section 4(k) permissible...
commodities for the reasons the Board is proposing to tighten the 5 percent of tier 1 capital limit on physical commodity trading conducted under complementary authority. Physical commodities that are not covered physical commodities or that are held under authorities other than section 4(o) grandfather authority would not receive additional capital requirements.53

Question 2. To the extent the Board’s proposed approach to the section 4(k) cap parity amount creates incentives for an FHC to conduct physical commodity activities under authorities that would result in lower capital requirements, should the Board require that an FHC include physical commodity activities conducted under authorities that receive less than a 300 percent risk weight first for purposes of determining the excess amount over the 4(k) cap parity amount? FHCs may also own companies under merchant banking authority that are engaged in physical commodity activities, an investment that involves physical commodity trading, storage, transportation, and refining. The proposal refers to investments in portfolio companies engaged in activities involving covered physical commodities as covered commodity merchant banking investments. Because these companies may be subject to similar types and amounts of liability as FHCs engaging in these activities directly, the proposal generally would apply the same risk weights to covered commodity merchant banking investments as the proposal would apply to covered physical commodities used in physical commodity activities under complementary authority and section 4(o) grandfather authority, respectively. Moreover, the proposal would not permit covered commodity merchant banking investments to receive the 100 percent risk weight assigned to non-significant equity exposures.54

Accordingly, the proposal would apply a 1,250 percent risk weight to an FHC’s covered commodity merchant banking investment unless all of the physical commodity activities of the portfolio company are physical commodity trading activities permissible under complementary authority (commodity trading portfolio company).55 If all of the physical commodity activities of the portfolio company are permissible under complementary authority and the securities of the portfolio company are publicly traded, a 300 percent risk weight would be applied to the FHC’s covered commodity merchant banking investment in the commodity trading portfolio company. Consistent with the standardized approach to equity investments not subject to a 100 percent risk weight, the proposal would assign a 400 percent risk weight to equity investments in commodity trading portfolio companies that are not publicly traded. If an FHC engages in any other physical commodity activity, including those that would be permissible only under the authority provided in section 4(o), the FHC must apply the 1,250 percent risk weight to that merchant banking investment. These risk weights are designed to address the risks associated with merchant banking investments generally, the potential reputational risks associated with the investment, and the possibility that the corporate veil may be pierced and the FHC held liable for environmental damage caused by the portfolio company. (A somewhat higher risk weight would be assigned to privately traded portfolio companies in recognition of the risk that an FHC may not be able to gain access to markets for a privately held portfolio company after an environmental catastrophe involving the portfolio company).

However, nonfinancial companies use covered physical commodities to operate businesses otherwise unrelated to physical commodities. For example, grocery stores purchase gasoline to transport produce and a business or a warehouse may purchase oil for heating. To ensure the proposal would not apply to all merchant banking investments that own physical commodities but that are not engaged in a physical commodities business, the proposal would attempt to define and exempt activities of commodity end users from physical commodity activities. Under the proposal, a portfolio company would not be subject to these additional capital requirements as a covered commodity merchant banking investment solely because the portfolio company owns or operates a facility or vessel that purchases, stores, or transports a covered physical commodity only as necessary to power or support the facility or vessel. For example, an investment in a company that engages only in one physical commodity activity—oil storage—and does so solely for the purpose of heating its facility and operating machines within the facility would not be a covered commodity merchant banking investment.

The Board is seeking comment on whether the proposed exclusion and its scope are appropriate and, if so, whether the proposed definition of the exclusion is workable.

Question 3. Should investments in certain portfolio companies, such as end users of covered physical commodities, be exempted from additional capital requirements as a covered commodity merchant banking investment? If an exemption is appropriate, what should be the scope of the exemption? The Board is also considering the appropriate risk-based capital treatment for all merchant banking investments. For example, the Board is considering whether to continue to include merchant banking investments as “non-significant equity exposures” under the Board’s standardized approach to risk-based capital rules.

Question 4. How are the risks associated with merchant banking investments in companies involved in physical commodity activities different from or similar to other merchant banking investments? Do the Board’s current capital requirements adequately capture the risks of merchant banking investments not covered under the proposal? If not, whose capital requirements should be applied to merchant banking investments?

---

53 In addition, in order for an amount of a covered physical commodity owned under section 4(o) grandfather authority to be considered an amount of section 4(k) permissible commodities, the commodity must be one for which a derivative contract has been authorized for trading on a U.S. futures exchange by the CFTC (unless specifically excluded by the Board) or another commodity that has been specifically authorized by the Board under complementary authority (approved physical commodity). The FHC also must have purchased the amount of the commodity in the spot market or own the amount for the purpose of taking or making physical delivery of the commodity to settle a forward, option, swap, or similar contract. Finally, the FHC must have stored, extracted, produced, transported, or altered that amount while the FHC owned the commodity but instead must have hired reputable third parties to do so.

54 Under the Board’s current standardized approach, merchant banking investments and certain other types of equity exposures must be assigned a 100 percent risk weight to the extent that the aggregate carrying value of the equity exposures does not exceed 10 percent of the Board-regulated institution’s total capital. 12 CFR 217.52(b)(3).

55 Similar to the proposed restrictions on the 300 percent risk weight for covered physical commodities held under section 4(o) authority, a company would be considered a physical commodity trading company if its activities involving covered physical commodities consisted only of purchasing covered physical commodities (that are approved physical commodities) in the spot market and/or taking or making physical delivery of such commodities to settle forwards, options, swaps, or similar contracts. However, a portfolio company would be considered a physical commodity trading company regardless of the amount of covered physical commodities it held; as discussed above, obtaining daily information on the amounts of a portfolio company’s transactions in the spot market and/or placing limits on the commodities activities of the company may be inconsistent with the more limited, generally-permissible involvement of an FHC in its portfolio companies.
generally? For example, is it appropriate to continue to include merchant banking investments as “non-significant equity exposures” under the Board’s risk-based capital rules?

2. Calculation of Exposure Amount for Covered Physical Commodities

Under the proposal, the proposed risk weights would be multiplied by (1) the market value of all section 4(o) permissible commodities; (2) the original cost basis of section 4(o) infrastructure assets; (3) the market value of section 4(k) permissible commodities; and (4) the carrying value of an FHC’s equity investment in companies that engage in covered physical commodity activities to determine an FHC’s risk-based capital requirements for covered physical commodity activities.

An FHC would be required to calculate the market value of its covered physical commodities based on the quantity of each covered physical commodity multiplied by the market price of the covered physical commodity. The proposed measure of exposure is designed to reflect an FHC’s ongoing level of involvement in covered physical commodity activities, and to be relatively stable in the face of market price movements and individual holding amounts, as explained below. The quantity of a covered physical commodity would be measured as a daily average of the amount of each covered physical commodity held by an FHC over the previous calendar quarter. A measurement based on an average should reduce the potential for variations in capital requirements that could result from using a point-in-time measurement. Furthermore, use of a daily, as opposed to a weekly or monthly, average should mitigate fluctuations in the quantities of covered physical commodities held by an FHC that could misrepresent the FHC’s holdings over a longer period.

The calculation of the market price of a covered physical commodity would be determined as a rolling average of the month-end, end-of-day spot prices for the covered physical commodity over the previous 60-month period. If the market price of a covered physical commodity (e.g., oil) varies based on type, grade, and/or classification, the FHC would calculate the average market price for each classification as a distinct covered physical commodity. The Board notes that FHCs should have mechanisms in place to monitor the prices of the commodities held under complementary authority and grandfather authority.

3. Impact Analysis of Proposed Capital Requirements

The proposal would not amend the scope of application of the Board’s capital rules. Therefore, only FHCs conducting complementary, section 4(o) grandfather, or merchant banking activities would be subject to the proposal. Foreign banking organizations conducting such activities in the United States would be subject to the proposal only to the extent the Board’s capital rules apply to the organizations.

The Board conducted an analysis of the impact of the proposed capital requirements on FHCs and physical commodities markets. In doing so, the Board considered the extent of FHC activity in the physical commodity markets, the share of exposure and revenue that physical commodity activities represent at FHCs, and the impact of the proposed capital requirements on an FHC’s physical commodity activities relative to the existing risk-based capital requirements applicable to FHCs.

The Board estimates that, across all FHCs that engage in physical commodity activities, the proposed capital requirements could increase risk-weighted assets as much as $34.0 billion. Assuming an average risk-based capital ratio of 12 percent, the proposal could increase the amount of capital required to be held to meet regulatory requirements by FHCs that engage in physical commodity activities under any authority by approximately $4.1 billion in the aggregate. These figures are based on (i) FHC-provided categorizations of their physical commodity holdings; (ii) FHC-provided estimates of their physical commodity holdings that are related to activities permitted solely under section 4(o) grandfather authority; and (iii) Board estimates of the amount of physical commodity holdings of an FHC that would be considered a covered physical commodity under this proposal. This estimate assumes that all physical commodities of FHCs would be covered physical commodities and therefore subject to the proposed additional risk weights.

The estimated increase in risk-weighted assets resulting from the proposal would be insignificant (0.7 percent) relative to the total risk-weighted assets among FHCs that engage in physical commodity activities. The estimated increase relative to market-risk-weighted assets of these FHCs (that is, risk-weighted assets attributed to trading business) is 7.1 percent. This increase in risk weighting would not cause any FHC to breach the minimum capital requirements, and FHCs could likely absorb the increase in required capital at the firm level if they determine that physical commodity activities are important to the firm’s overall strategy. However, if FHCs consider their physical commodity trading on a standalone basis, the proposed increases in capital requirements could make this activity significantly less attractive based on its return on capital, and could result in decreased activity. Such a reduction in activity is not expected to have a material impact on the broader physical commodity markets.

Information on physical commodity markets, in particular those covered by this proposal, is relatively scarce. Nonetheless, it appears that the bulk of activity and inventory is conducted and held by non-Board-regulated entities (such as energy firms and end users of physical commodities) rather than FHCs. Information available to the Board supports this view, with market participants asserting that, in general, FHCs’ market shares in physical commodity markets are quite low and typically represent less than 1 percent of the market.

FHCs play a larger, but still limited, role in commodity derivatives trading, and a significant portion of FHCs’ physical commodity activity is related to their commodity derivative trading activity. Based on the CFTC Bank Participation Report, the total share of U.S. banks in derivative contracts involving physical commodities typically ranges from 2 percent to 15

59 The impact on capital would be less to the extent that physical commodities of FHCs would not be covered physical commodities under the proposal.
percent. Derivatives activity related to non-bank subsidiaries of FHCs is estimated to be similar or slightly larger. Thus, any reduction in activity related to financial contracts that may arise from the proposal should not materially impact the overall market for financial commodity contracts.

With respect to FHCs’ merchant banking investment activities, the estimated impact of the proposed increased capital requirements appears insignificant. The aggregate value of merchant banking investments among FHCs is approximately $29 billion. More granular information regarding the proportion of merchant banking investment activity attributable to portfolio companies that engage in physical commodity activities is not available. Nevertheless, given the small market share of FHCs in the physical commodity markets, the Board expects that the value of FHC equity investments in portfolio companies that engage in physical commodity activities would be significantly less than the estimated $29 billion. Accordingly, the proposed increase in capital requirements for an FHC’s merchant banking investment activity would not be expected to have a material impact.

Question 5. Does the proposed definition of “covered physical commodity” sufficiently cover the commodities that pose the greatest legal, reputational, and financial risks to an FHC? If not, please describe those high-risk commodities that would fall outside the scope of the definition.

Question 6. What, if any, other criteria should the Board consider when determining whether a physical commodity poses a risk that the FHC would be liable for a catastrophe involving its physical commodity activities?

Question 7. How appropriate are the proposed risk weights for covered physical commodities owned as part of an FHC’s physical commodity trading activities or held by FHCs conducting activities solely permitted by section 4(o) grandfather authority and for merchant banking portfolio companies engaged in such activities? If not appropriately calibrated, what are the shortcomings of the capital requirement in capturing catastrophic risk and what other factors should the Board consider to calibrate the capital requirements?

Question 8. What are the operational or practical challenges that implementing the proposed formulations for calculating the capital requirement would impose?

Question 9. What, if any, alternative methodologies for calculating the quantity of the covered physical commodity should the Board consider?

Question 10. Would the proposed capital requirements provide foreign banking organizations engaging in physical commodity activities, to the extent these organizations are not already subject to the Board’s capital rules, with a competitive advantage over FHCs organized in the United States that engage in physical commodity activities? If so, what are the nature and amount of the competitive advantages?

Question 11. What additional considerations or data should the Board consider to calculate the estimated impact of the proposal?

D. The Scope of Permitted Complementary Commodity Activities

1. Background

In addition to considering whether conduct of the activities by an FHC poses a substantial risk to the safety and soundness of depository institution subsidiaries of the FHC or the financial system generally, in approving each complementary commodity activity, the Board considered whether each activity is “meaningfully connected” to a financial activity such that it complements the financial activity. Currently, twelve FHCs possess authority to engage in physical commodity trading, and five of those FHCs also have authority to engage in energy management services and energy tolling. For the reasons described below, the Board is proposing to rescind the authorization for FHCs to engage in energy tolling and energy management services.

a. Physical Commodity Trading

In 2003, the Board determined that physical commodity trading—the purchasing and selling of physical commodities in the spot market and the taking and making delivery of physical commodities to settle derivatives that BHCs were authorized to trade (commodity derivatives)—was so meaningfully connected to a financial activity that it complemented the financial activity. The Board cited a number of reasons for its determination. The Board observed that physical commodity trading activities “flow from the existing financial activities of FHCs”—specifically, commodity derivatives activities, which are permissible financial activities. Permissible financial commodity derivatives trading activities involved derivatives that the FHC could terminate, assign, or cash-settle without taking delivery of the underlying physical commodity. Complementary physical commodity trading allows an FHC to physically settle the derivatives contract.

The Board found physical commodity trading to be a complementary activity to financial commodities derivatives trading for a number of reasons. Physical commodity trading activities would flow from existing commodity derivatives activities. Physical commodity trading would enhance the ability of FHCs to efficiently provide a full range of commodity-related services to their customers; enable FHCs to transact more efficiently with customers in a wider variety of commodity markets and transaction formats; and enable FHCs to acquire more experience in the physical commodity markets and, in turn, improve their understanding of, and profitability in, the commodity derivatives markets. The Board also noted that diversified financial companies that were not at that time BHCs conducted physical commodity trading in connection with their commodity derivatives business. For these reasons, the Board believed that physical commodity trading was complementary to commodity derivatives activities.

The Board has not changed its view on the complementarity of these trading activities. However, as discussed above, the Board believes added limits are appropriate to reduce potential risks to depository institution subsidiaries of FHCs or the financial system generally.

b. Energy Management Services and Energy Tolling

Following a number of changes to the energy industry, the Board determined that certain activities involving power plants—energy management services and energy tolling—were complementary to a financial
activity. The Board permitted six FHCs to engage in one or both of these activities between December 2007 and June 2010. In January 2014, the ANPR noted that three FHCs that engage in physical commodity activities had announced plans to decrease or discontinue their involvement in the activities. These developments, although potentially caused by a variety of factors, led the Board to reconsider whether complementary commodity activities continued to be so meaningfully connected to a financial activity so as to complement the financial activity. Subsequent to the ANPR, many of these plans were realized and discontinuance of physical commodity activities became more pronounced for FHCs engaging in energy tolling and energy management activities. Of the five FHCs that currently have the authority to engage in both energy management services or energy tolling, at least four have discontinued these activities in the U.S.

Energy management services. Under an energy management agreement, an FHC acts as an energy manager that provides transactional, advisory and administrative services to a power plant owner. An energy manager may also provide financial intermediary services. An energy manager performs administrative tasks related to the sale of power and the delivery of fuel to run the plant, and may enter into fuel and power contracts for the owner that satisfy the owner’s criteria, including by purchasing fuel from a third party in order to resell it to the power plant owner and by purchasing the energy output of the power plant for release in the market. An FHC, as energy manager, also may enter into hedging transactions with the owner to manage fuel costs and energy prices. The energy manager generally is compensated based on a percentage of the difference between the delivered fuel prices and the realized power revenues (the “spark spread”) with a guaranteed minimum compensation amount.

In seeking approval to conduct energy management services, FHCs argued that these services may help a power plant owner develop and refine the power plant’s risk-management policies and optimize the plant owner’s decisions about when to operate, which are heavily influenced by fuel costs, power prices, and the financing available. FHCs also argued that these activities would improve the FHCs’ understanding of energy markets and their ability to serve as an effective competitor in the derivatives markets. Energy Tolling. The FHCs that currently engage in energy management services also engage in energy tolling. A primary difference between energy tolling and energy management is that the former permits the “toller” to act as principal for its own account rather than as agent or otherwise for the benefit, of the power plant owner. Under both energy management and tolling, an FHC generally is responsible for monitoring day-to-day market conditions to determine when to operate the plant and when to provide the necessary fuel. Unlike the typical energy management agreements, pursuant to a tolling agreement, an FHC may direct—rather than advise—the owner to operate the plant so that the toller—rather than the owner—may capture the spark spread. The compensation

66 The approvals to engage in these activities occurred after Federal Energy Regulatory Commission, Order No. 888, 11 FERC ¶ 61,036 (1981), available at https://www.ferc.gov/privacy/confidentiality/lockers/docs/888.pdf; FHCs engaged in energy management services or energy tolling prior to the 1990 Energy Policy Act, which issued a variety of factors, led the Board to reconsider whether complementary commodity activities continued to be so meaningfully connected to a financial activity so as to complement the financial activity. Subsequent to the ANPR, many of these plans were realized and discontinuance of physical commodity activities became more pronounced for FHCs engaging in energy tolling and energy management activities. Of the five FHCs that currently have the authority to engage in both energy management services or energy tolling, at least four have discontinued these activities in the U.S.

Energy management services. Under an energy management agreement, an FHC acts as an energy manager that provides transactional, advisory and administrative services to a power plant owner. An energy manager may also provide financial intermediary services. An energy manager performs administrative tasks related to the sale of power and the delivery of fuel to run the plant, and may enter into fuel and power contracts for the owner that satisfy the owner’s criteria, including by purchasing fuel from a third party in order to resell it to the power plant owner and by purchasing the energy output of the power plant for release in the market. An FHC, as energy manager, also may enter into hedging transactions with the owner to manage fuel costs and energy prices. The energy manager generally is compensated based on a percentage of the difference between the delivered fuel prices and the realized power revenues (the “spark spread”) with a guaranteed minimum compensation amount.

In seeking approval to conduct energy management services, FHCs argued that these services may help a power plant owner develop and refine the power plant’s risk-management policies and optimize the plant owner’s decisions about when to operate, which are heavily influenced by fuel costs, power prices, and the financing available. FHCs also argued that these activities would improve the FHCs’ understanding of energy markets and their ability to serve as an effective competitor in the derivatives markets. Energy Tolling. The FHCs that currently engage in energy management services also engage in energy tolling. A primary difference between energy tolling and energy management is that the former permits the “toller” to act as principal for its own account rather than as agent or otherwise for the benefit, of the power plant owner. Under both energy management and tolling, an FHC generally is responsible for monitoring day-to-day market conditions to determine when to operate the plant and when to provide the necessary fuel. Unlike the typical energy management agreements, pursuant to a tolling agreement, an FHC may direct—rather than advise—the owner to operate the plant so that the toller—rather than the owner—may capture the spark spread. The compensation

67 These services are typically outlined in an energy management plan and risk-management policy that governs how the power plant should be operated. E.g., 2007 Fortis Order.

68 The Board compared a tolling agreement to a call option with the strike price being the cost of producing that amount of power. See 2008 RBS Order. A tolling agreement also has been compared to an operating lease agreement because it allows the toller the exclusive right to use the plant during structure of a tolling agreement reflects the FHC’s role as principal: The toller pays the owner a fixed periodic payment in exchange for the right to all or part of the plant’s power output and provides the owner with a marginal payment based on the amount of energy produced to compensate for the costs of running the plant.

2. Reconsideration of the Approval of Energy Management and Tolling as Complementary Activities

The Board is reconsidering whether energy management services and energy tolling activities are complementary to a financial activity. Over time, these two activities have not appeared to be as directly or meaningfully connected to a financial activity as is physical commodity trading.

Physical commodity trading provides FHCs with an alternative method of settling BHCP- permissible commodity derivatives activities or other financial activities. Moreover, the expected benefits of permitting these activities do not appear to have been realized over time. For example, it was originally expected that allowing FHCs to conduct energy management services and energy tolling activities would allow FHCs to gain additional information to help manage commodity-related risks. It is not clear that energy management services or energy tolling significantly improve an FHC’s understanding of commodity derivatives markets since—in order to engage in energy management services or energy tolling—an FHC must already have a thorough understanding of commodity derivatives markets. Moreover, FHCs that have divested their physical commodity business lines continue to engage in commodity
derivatives trading and termination of their energy management and energy tolling activities is not expected to negatively impact their ability to provide commodity derivative services.

The authorizations for energy management services and energy tolling also noted that unregulated financial competitors of FHCs engaged in these activities. However, it is unclear over time what, if any, advantages those financial firms gain from conducting energy management or energy tolling activities over FHCs in the conduct of derivatives and other FHC-permissible physical commodity activities.

Energy tolling was permitted in part to allow an FHC to hedge its own, or to assist its client to hedge, positions in energy. However, there are other effective ways for an FHC to hedge its positions, and an FHC may assist clients to hedge their positions without the FHC engaging in energy tolling.

The proposal would not appear to eliminate the benefits to commenters, including energy companies, commonly noted in letters responding to the ANPR.27 The proposal would affect the actual activity of only one firm and the theoretical authority of five FHCs to engage in complementary commodity activities and would directly limit only certain types of agreements (i.e., energy tolling and energy management services agreements) between FHCs and power plant owners. In addition, the proposal would not affect the authority of FHCs to provide derivatives and related financial products and services to power plants or engage in physical commodities trading. Permissible activities may include providing inventory and project finance arrangements involving physical commodities,28 financially- and physically-settled derivatives to hedge fuel costs and energy prices,29 buying and selling certain physical commodities in the spot market,30 and derivatives advisory services.31

3. Conformance Period

The proposal would provide FHCs with a two-year transition period to conform their energy management services and energy tolling agreements following the effective date of the final rule if adopted. This conformance period is intended to reduce the burdens associated with applying the proposal to existing agreements. As noted, the Board invites comments on all aspects of the proposal, including specific questions regarding the appropriate conformance period.

Question 12. Are there reasons that support determining energy management services or energy tolling are complementary to a financial activity that are not discussed above? If so, what are those reasons?

Question 13. Are there any potential effects on the safety and soundness of FHCs engaged in energy management services and energy tolling of rescinding such authorities? How would the potential effects differ if only one or the other activity was rescinded?

Question 14. What are the average lengths of an energy management services agreement and an energy tolling agreement? Under what circumstances may such agreements be terminated early and what are the contractual consequences of doing so? Are there challenges other than termination of such agreements associated with conformance to the proposed rescission of energy management services and energy tolling orders? To what extent may a conformance period alleviate those challenges? What is an appropriate conformance period for this aspect of the proposal and why?

E. Reclassification of Copper as an Industrial Metal

In 1997, the Board amended Regulation Y to provide that BHCs could own and store copper, and engage in related incidental activities, as an activity so closely related to banking as to be proper incident thereto.32 The Board has previously permitted BHCs to buy, sell, and store gold, silver, platinum and palladium bullion, coins, bars and rounds for their own accounts and the accounts of others. The list of precious metals was expanded to include copper, a metal used in minting coins, after trading in copper became permissible for national banks.33

Over time, copper has become most commonly used as a base or industrial metal, and not as a store of value in the same way as gold, silver, platinum and palladium.34 While gold, silver, platinum and palladium have industrial uses as well, these precious metals have traditionally been traded internationally primarily for their exchange value rather than for industrial uses.35 Copper, while it has been used in coins, has been traded as a base metal and has always been classified and traded as a “base” or “industrial” metal.36 The

27 Physical commodity trading also may be used to hedge positions in energy of FHCs and their clients.

28 Commenters focused on the benefits of FHC involvement in physical commodity trading activities, rather than the benefits of energy management services or energy tolling. For example, NRG Energy, Inc., a leading competitive power company and major electricity provider, noted a number of activities that would not appear to be affected by the proposed elimination of energy management services or energy tolling, including providing first-lien hedging arrangements, project financing, marketing, making, “customized hedging and risk management solutions like working capital/energy intermediate facilities and volumetric production payment structures,” and long-term physical commodity transactions. Letter from NRG Energy, Inc. dated April 15, 2014. See also Letter from American Gas Association et al., dated March 31, 2014 (discussing the importance of the ability of FHCs to physically-settle derivatives transactions); Letter from Electric Power Supply Association dated April 16, 2014 (discussing the importance of FHC’s ability to hedge physical power producers’ prices and revenues as well as engage in market making and credit intermediation activities); Letter from Sempra U.S. Gas & Power, LLC (discussing market making and the provision of market liquidity, efficient price formation, risk-management solutions, project finance, credit extension, and greater competition).

29 See, e.g., 12 CFR 225.28(b)(1); Chemical New York Corp., 59 Fed. Reg. Bull. 698 (1994) (approving as a permissible lending activity for BHCs an arrangement under which a BHC would finance an utility’s coal purchases by purchasing from a third party, and taking title to a quantity of coal on a monthly basis at the direction of the utility customer); Letter to Mr. Lustgarten dated May 15, 2006 (finding certain commodity purchase and forward sale transactions entered into to finance commodity inventories of an FHC’s customers to be a permissible lending activity of the FHC); Letter to Mr. Davy dated May 15, 2006 (finding certain volumetric production payments to be a permissible lending activity).

30 See 12 CFR 225.28(b)(8) and the Board’s approvals to engage in physical commodity trading.

31 See, e.g., 2003 Citi Order.

32 12 CFR 225.28(b)(6).
most significant uses of copper are for industrial purposes, rather than as a store of value. Further, the OCC has recently proposed a similar reclassification of copper under the National Bank Act.

For these reasons, the Board proposes to treat the purchase and sale of copper in the same manner as the purchase and sale of other non-precious metals; specifically, as an activity requiring FHC status and complementary authority and subject to the restrictions and limitations (including the 5 percent of tier 1 capital cap) imposed on FHCs engaged in complementary commodity activities. Under the proposal, copper would be removed from the list of metals BHCs are permitted to own and store, but would be removed from the list of metals on which a BHC may enter derivatives contracts that require taking delivery of the underlying metal as principal. Removing copper from this list will ensure that the metals specifically listed as financial assets for purposes of derivatives trading activities remain consistent with the metals permitted to be bought, sold and stored by BHCs.

The proposal would take effect one year after the rule is finalized to provide BHCs time to conform to this change.

Question 15. What is the cumulative impact on BHCs of the proposed limitation on physical copper trading authority combined with the proposed additional restrictions on complementary physical commodities trading? What is the cumulative impact of these proposals on copper markets?

Question 16. Is a one-year transition period during which BHCs currently engaged in buying, selling, and storing copper would be permitted to wind down their activities with respect to copper under this authority sufficient or appropriate? If not, what is the appropriate transition period and why?

F. New Financial Reporting Data on Physical Commodity Activities

1. General

The Board is proposing to modify the Consolidated Financial Statements for Holding Companies (FR Y–9C) to (i) create a new Schedule HC–W, Physical Commodities and Related Activities; and (ii) add data items to Schedule HC–R, Part II, Risk-Weighted Assets.

Schedule HC–W would require BHCs to report more specific information on the covered physical commodities holdings and activities of FHCs, and the modifications to HC–R, Part II would report the risk-weighted asset amounts associated with an FHC’s engagement in activities that involve (1) covered physical commodities, (2) section 4(o) infrastructure assets, or (3) investments in covered commodity merchant banking investments. The proposed reporting requirements would become effective on the same date as the proposed risk-weighted asset requirements.

2. Schedule HC–W

Part A. Currently, BHCs report the gross (total) fair value of all physical commodities on Schedule HC–D to the FR Y–9C. On Part A of the proposed new Schedule HC–W, FHCs would be required to report the total fair value of categories of physical commodities held in inventory as follows:

1. Petroleum and petroleum products;
2. Natural gas;
3. Natural gas liquids;
4. Fertilizer;
5. Propylene;
6. Coal and coal products;
7. Uranium; uranium products;
8. Other covered physical commodities; and
9. All other physical commodities.

The sum of the total fair values of commodities reported on Part A as proposed would continue to be reported as the gross fair value of physical commodities held in inventory in item 9 of Schedule HC–D.

The categories of physical commodities listed in items (1)–(8) above are proposed to be defined in a manner consistent with the proposed definition of “covered physical commodities.” Categories (1)–(7) generally include those covered substances under Federal environmental law. The item “other covered physical commodities” would include all other covered physical commodities held in inventory that would not be included in items (1)–(7) described above and therefore would reflect those covered substances under relevant state environmental law.

Part B. On Part B of the proposed new Schedule HC–W, FHCs would be required to indicate affirmatively or negatively whether they are engaged in particular aspects of physical commodity-related activities.

Specifically, FHCs would indicate whether they own any covered physical commodities, any section 4(o) infrastructure assets, or investments in covered commodity merchant banking investments. FHCs also would indicate whether they are engaged in the exploration, extraction, production, or refining of physical commodities. FHCs also would indicate whether they own any covered physical commodities held in inventory, or other covered physical commodities held in inventory that would not be included in items (1)–(7) described above and therefore would reflect those covered substances under relevant state environmental law.

3. Schedule HC–R Modifications

The Board is also proposing to modify Schedule HC–R, Part II to include new
items related to the proposed capital requirement described in this proposal for a firm’s physical commodity activities conducted under any of the commodity authorities and that involve covered physical commodities. New line items would be added to Column A of Schedule HC–R, Part II to report (1) the market value of an FHC’s covered physical commodity activities involving covered physical commodities (calculated as described in this proposal) conducted under section 4(k)(1)(B) of the Bank Holding Company Act or section 4(o) of the Bank Holding Company Act (as applicable); (2) the original cost basis of section 4(o) infrastructure assets owned pursuant to section 4(o) of the Bank Holding Company Act; and (3) the carrying value of an FHC’s investments in covered commodity merchant banking investments made under section 4(k)(4)(H) of the BHC Act. Specifically, the following modifications are being proposed:

- New line items would be added to Column L to allocate a 300 percent risk weight to (A) the market value of an FHC’s physical commodity activities involving section 4(k) permissible commodities and (B) the carrying value of investments in covered commodity merchant banking investments that are publicly traded commodity trading portfolio companies to the 300 percent risk weight category;
- New line items would be added to Column M to allocate a 400 percent risk weight to the carrying value of investments in covered commodity merchant banking investments that are commodity trading portfolio companies and are not publicly traded to the 400 percent risk weight category; and
- New line items would be added to Column Q to allocate a 1,250 percent risk weight to the (A) the market value of physical commodity activities involving section 4(o) permissible commodities (including section 4(k) permissible commodities in excess of the section 4(k) cap parity amount); (B) the original cost basis of section 4(o) infrastructure assets owned pursuant to section 4(o) of the BHC Act; and (C) the carrying value of investments in covered commodity merchant banking investments that are not commodity trading portfolio companies.

4. Public Disclosure

The Board proposes to make the information reported as described above available to the public. The Board has long supported meaningful public disclosure of banking organizations with the objective of improving market discipline and encouraging sound risk-management practices. The Board believes that the information that would be collected in Part A of proposed Schedule HR–W would provide the public with important information on the degree to which FHCs are involved in trading covered physical commodities, improving market discipline, and enhancing understanding of the role FHCs play in these markets through their nonfinancial activities. Public disclosure of the new reporting items would also facilitate supervisory monitoring of commodity activities that present particular risks to safety and soundness, as discussed in this proposal. The Board proposes to make the disclosures in Part B of the new proposed Schedule HC–W public for similar reasons. Additionally, the Board believes that public disclosure of the information in Part B will provide market participants, end users, and supervisors with important information that is not captured in inventory reporting about the nature and extent of FHC presence in the physical commodities markets over time. This information would provide additional insight into the potential risks FHCs may bear as part of their commodities activities as well as a more complete picture of their role in the commodity markets.

The proposed reporting requirements in Schedule HC–W, Part B and proposed modifications to Schedule HC–R, Part II are consistent with other public capital reporting requirements. The Board notes that public disclosure of these proposed items would also be consistent with the international standards regarding public disclosure of regulatory capital under Pillar 3 of the Basel Accord. Such disclosure is designed to complement the minimum capital requirements and the supervisory review process by encouraging market discipline through enhanced and meaningful public disclosure.

For the reasons discussed above, the Board is proposing that the proposed new reporting requirements be released to the public. However, a reporting FHC may request confidential treatment for the proposed reporting items if the company believes that, based on its particular individual circumstances, disclosure of specific commercial or financial information in the report would likely result in substantial harm to its competitive position or that disclosure of the submitted information would result in unwarranted invasion of personal privacy.

Question 17. To what extent do the proposed regulatory reporting requirements improve transparency of physical commodity activities of FHCs and provide supporting data for assessing the capital requirement?

Question 18. How well do the proposed reporting requirements physical commodity activities (both Part A and Part B) capture FHCs’ physical commodity activities? What other categorizations should the Board consider for these proposed reporting requirements?

Question 19. What other information, if any, should the Board consider collecting from FHCs for public reporting purposes in order to enhance market discipline and public understanding of FHCs’ physical commodities or merchant banking activities?

III. Regulatory Analysis

A. Regulatory Flexibility Act Analysis

The Board is providing an initial regulatory flexibility analysis with respect to this proposed rule. The Regulatory Flexibility Act, 5 U.S.C. 601 et seq. (RFA), generally requires an agency to assess the impact a rule is expected to have on small entities. The RFA requires an agency either to provide an initial regulatory flexibility analysis with a proposed rule for which a general notice of proposed rulemaking is required or to certify that the proposed rule will not have a significant impact on a substantial number of small entities. Based on its analysis and for the reasons stated below, the Board believes that this proposed rule will not have a significant economic impact on a substantial number of small entities. A final regulatory flexibility analysis will be conducted after comments received during the public comment period have been considered.

Under regulations issued by the Small Business Administration, a small entity includes a depository institution, bank holding company, or savings and loan holding company with total assets of $550 million or less. As of June 30, 2016, there were approximately 3,203 small bank holding companies and approximately 162 small savings and loan holding companies. As described above, the Board is proposing to apply risk-based capital and other regulatory requirements for certain physical commodities and merchant banking investment activities conducted by banking organizations. This proposed rule is expected only to apply to banking organizations that (i) conduct physical commodity activities under complementary authority with the Board’s approval; (ii) conduct physical commodity activities under section 4(o) grandfather authority; or (iii) engage in
merchant banking investment activities related to physical commodities. Small entities generally will not fall into any of these categories. To date, the Board has granted approvals to 12 FHCs to conduct physical commodity activities under complementary authority. Meanwhile, there are two banking organizations that are presently conducting physical commodity activities under section 4(o) grandfather authority. In both cases, the banking organizations all hold total consolidated assets greater than $50 billion. Further, of the approximately $29 billion in total merchant banking investment activity engaged in by banking organizations, approximately 99 percent of this activity is conducted by banking organizations with total consolidated assets greater than $50 billion.

The Board is aware of no other Federal rules that duplicate, overlap, or conflict with this proposal. The Board believes that this proposal will not have a significant economic impact on small banking organizations supervised by the Board and therefore believes that there are no significant alternatives to this proposal that would reduce the economic impact on small banking organizations supervised by the Board.

B. Paperwork Reduction Act

Request for Comment on Proposed Information Collection

In accordance with section 3512 of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA), the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Board reviewed the proposed rule under the authority delegated to the Board by OMB.

The proposed rule contains requirements subject to the PRA. The reporting requirements are found in section 111. To implement the reporting requirement set forth in F, the Board proposes to revise the Consolidated Financial Statements for Holding Companies, Parent Company Only Financial Statements for Large Holding Companies, Parent Company Only Financial Statements for Small Holding Companies, Financial Statement for Employee Stock Ownership Plan Holding Companies, and the Supplemental to the Consolidated Financial Statements for Holding Companies.

OMB Control Number: 7100–0128.

Agency Form Number: FR Y–9C, FR Y–9LP, FR Y–9SP, FR Y–9ES, and FR Y–9CS.

Frequency of Response: Quarterly, semiannually, and annually.

Affected Public: Businesses or other for-profit.

Respondents: Bank holding companies (BHCs), savings and loan holding companies (SLHCs), securities holding companies (SHCs), and U.S. Intermediate Holding Companies (IHCs) (collectively, holding companies (HCS)).

Abstract: The FR Y–9 family of reporting forms continues to be the primary source of financial data on holding companies that examiners rely on in the intervals between on-site inspections. Financial data from these reporting forms are used to detect emerging financial problems, to review performance and conduct preinspection analysis, to monitor and evaluate capital adequacy, to evaluate holding company mergers and acquisitions, and to analyze a holding company’s overall financial condition to ensure the safety and soundness of its operations. The FR Y–9C serves as standardized financial statements for the consolidated holding company. The FR Y–9LP, and FR Y–9SP serve as standardized financial statements for parent holding companies; the FR Y–9ES is a financial statement for holding companies that are Employee Stock Ownership Plans (ESOPs). The Federal Reserve also has the authority to use the FR Y–9CS (a free-form supplement) to collect additional information deemed to be (1) critical and (2) needed in an expedited manner.

Current Actions: To implement the reporting requirement set forth in section F, the Board proposes to revise the FR Y–9C to (1) create a new Schedule HC–W, Physical Commodities and Related Activities, which would collect more specific information on the covered physical commodities holdings and activities of FHCs and (2) add data items to Schedule HC–R, Part II, Risk-Weighted Assets, which would report the risk-weighted asset amounts associated with an FHC’s engagement in covered physical commodity activities.

It is expected that 14 out of the 667 current FR Y–9C respondents would file the new reporting requirements set forth in section F. The Board estimates that proposed revisions to the FR Y–9C would not materially increase the estimated average hours per response or total estimated annual burden. The Board is not proposing to revise the FR Y–9LP, FR Y–9SP, FR Y–9ES, and FR Y–9CS. The draft reporting forms and instructions are available on the Board’s public Web site at http://www.federalreserve.gov/apps/reportforms/review.aspx.

Estimated Burden per Response: FR Y–9C (non advanced approaches holding companies): 50.17 hours; FR Y–9C (advanced approaches holding companies HCs): 51.42 hours; FR Y–9LP: 5.25 hours; FR Y–9SP: 5.40 hours; FR Y–9ES: 0.50 hours; FR Y–9CS: 0.50 hours.

Total Estimated Annual Burden: FR Y–9C (non advanced approaches holding companies): 31,245 hours; FR Y–9C (advanced approaches holding companies): 2,674 hours; FR Y–9LP:
16,632 hours; FR Y–9SP: 44,518 hours; FR Y–9ES: 44 hours; FR Y–9CS: 472 hours.

C. Solicitation of Comments on Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the agencies to use plain language in all proposed and final rules published after January 1, 2000. The agencies invite comment on how to make this interim final rule easier to understand. For example:

• Have the agencies organized the material to suit your needs? If not, how could the rule be more clearly stated?
• Are the requirements in the rule clearly stated? If not, how could the rule be more clearly stated?
• Does the rule contain technical language or jargon that is not clear? If so, what language requires clarification?
• Would a different format (grouping and order of sections, use of headings, paragraphing) make the rule easier to understand? If so, what changes would make the rule easier to understand?
• Would more, but shorter, sections be better? If so, which sections should be changed?
• What else could the agencies do to make the rule easier to understand?

List of Subjects
12 CFR Part 217

Administrative practice and procedure; Banks, banking; Capital; Federal Reserve System; Holding companies; Reporting and recordkeeping requirements; Securities.

12 CFR Part 225

Administrative practice and procedure; Banks, Banking, Federal Reserve System, Holding companies, Reporting and recordkeeping requirements; Securities.

Authority and Issuance

For the reasons set forth in the preamble, the Board proposes to amend 12 CFR parts 217 and 225 to as follows:

PART 217—CAPITAL ADEQUACY OF BANK HOLDING COMPANIES, SAVINGS AND LOAN HOLDING COMPANIES, AND STATE MEMBER BANKS (REGULATION Q)

1. The authority citation for part 217 continues to read as follows:

2. Section 217.2 is amended by:

(a) Revising the definition of “Advanced approaches total risk-weighted assets”.

(b) Adding the definition of “Approved physical commodity” and “Covered physical commodity”.

(c) Revising the definition of “Standardized total risk-weighted assets”.

The revisions and additions are set forth below:

§ 217.2 Definitions

* * * * *

Advanced approaches total risk-weighted assets means:

1. The sum of:
   (i) Credit-risk weighted assets;
   (ii) Credit valuation adjustment (CVA) risk-weighted assets;
   (iii) Risk-weighted assets for operational risk;
   (iv) For a market risk Board-regulated institution only, advanced market risk-weighted assets; and
   (v) Risk-weighted assets for covered physical commodity activities as calculated under §§ 217.39 through 217.40; minus

2. Excess eligible credit reserves not included in the Board-regulated institution’s tier 2 capital.

* * * * *

Approved physical commodity means a physical commodity for which a derivative contract has been authorized for trading on a U.S. futures exchange by the Commodity Futures Trading Commission (unless specifically excluded by the Board) or other commodities that have been specifically authorized by the Board under section 4(k)(1)(B) of the Bank Holding Company Act 12 (12 U.S.C. 1843(k)(1)(B)).

* * * * *

Covered physical commodity means any physical commodity that is, or a component of which is, specifically named:

(1) As a “hazardous substance” under section 104 of the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601);

(2) As “oil” under section 1001 of the Oil Pollution Act of 1990 (33 U.S.C. 2701) or section 311 of the Clean Water Act (33 U.S.C. 1321);

(3) As a “hazardous air pollutant” under section 112 of the Clean Air Act (42 U.S.C. 7412);

(4) In regulations interpreting the foregoing terms under the corresponding statute; or

(5) In a state statute, or regulation promulgated thereunder, that makes a party other than a governmental entity or fund responsible for removal or remediation efforts related to the unauthorized release of the substance or for costs incurred as a result of the unauthorized release; provided that, with respect to paragraph (5) of this definition, the Board-regulated institution owned the commodity in the state that promulgated the law imposing such liability during the last reporting period.

* * * * *

Standardized total risk-weighted assets means:

1. The sum of:
   (i) Total risk-weighted assets for general credit risk as calculated under § 217.31;
   (ii) Total risk-weighted assets for cleared transactions and default fund contributions as calculated under § 217.35;
   (iii) Total risk-weighted assets for unsettled transactions as calculated under § 217.38;
   (iv) Total risk-weighted assets for covered physical commodity activities as calculated under §§ 217.39 through 217.40;
   (v) Total risk-weighted assets for securitization exposures as calculated under § 217.42;
   (vi) Total risk-weighted assets for equity exposures as calculated under §§ 217.52 and 217.53; and
   (vii) For a market risk Board-regulated institution only, standardized market risk-weighted assets; minus

2. Any amount of the Board-regulated institution’s allowance for loan and lease losses that is not included in tier 2 capital and any amount of allocated transfer risk reserves.

* * * * *

3. Section 217.30 is amended by revising paragraph (b) as follows:

§ 217.30 Applicability.

* * * * *

(b) Notwithstanding paragraph (a) of this section, a market risk Board-regulated institution must exclude from its calculation of risk-weighted assets under this subpart the risk-weighted asset amounts of all covered positions, as defined in subpart F of this part except foreign exchange positions that are not trading positions, OTC derivative positions, cleared transactions, unsettled transactions, and covered physical commodities.

4. Section 217.31 is revised to read as follows:

§ 217.31 Mechanics for calculating risk-weighted assets for general credit risk.

(a) General risk-weighting requirements. A Board-regulated institution must apply risk weights to its exposures as follows:

(1) A Board-regulated institution must determine the exposure amount of each
on-balance sheet exposure, each OTC derivative contract, and each off-balance sheet commitment, trade and transaction-related contingency, guarantee, repo-style transaction, financial standby letter of credit, forward agreement, or other similar transaction that is not:

(i) An unsettled transaction subject to § 217.38;
(ii) A cleared transaction subject to § 217.35;
(iii) A default fund contribution subject to § 217.35.

(iv) A covered physical commodity, a section 4(o) infrastructure asset, or a covered commodity merchant banking investment subject to §§ 217.39 through 217.40;

(v) A securitization exposure subject to §§ 217.41 through 217.45; or

(vi) An equity exposure (other than an equity OTC derivative contract) subject to §§ 217.51 through 217.53.

(2) The Board-regulated institution must multiply each exposure amount by the risk weight appropriate to the exposure based on the exposure type or counterparty, eligible guarantor, or financial collateral to determine the risk-weighted asset amount for each exposure.

(b) Total risk-weighted assets for general credit risk equals the sum of the risk-weighted asset amounts calculated under this section.

5. Section 217.39 is added to read as follows:

§ 217.39 Covered Physical Commodity Activities.

(a) General. A Board-regulated institution’s total risk-weighted assets for covered physical commodity activities equals the sum of the risk-weighted asset amounts for each of its covered physical commodities, each of its equity exposures to covered commodities merchant banking investments, and each of its 4(o) infrastructure assets, each as determined under this section and § 217.40.

(b) Risk-weighted asset amount for covered physical commodities. The risk-weighted asset amount for a covered physical commodity equals:

(1) The exposure amount for a section 4(k) permissible commodity multiplied by 300 percent, subject to the limitation in paragraph (c)(3) of this section, plus

(2) The exposure amount for a section 4(o) permissible commodity multiplied by 1,250 percent.

(c) Exposure amounts for covered physical commodities.

(1) The exposure amount for a section 4(k) permissible commodity equals the section 4(k) permissible commodity quantity, as determined under paragraph (d) of this section, multiplied by the simple average of the covered physical commodity’s month-end, end-of-day spot prices over the previous 60 months.

(2) The exposure amount for a section 4(o) permissible commodity equals the section 4(o) permissible commodity quantity, as determined under paragraph (d) of this section, multiplied by the simple average of the covered physical commodity’s month-end, end-of-day spot prices over the previous 60 months.

(3) If the section 4(k) cap parity amount of the Board-regulated institution exceeds 5 percent of the tier 1 capital of the Board-regulated institution, then such excess (up to the sum of the exposure amounts for each section 4(k) permissible commodity owned by the Board-regulated institution pursuant to section 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(o))) must be risk weighted at 1,250 percent.

(i) For purposes of paragraph (c)(3) of this section, section 4(k) cap parity amount equals:

(A) The sum of the exposure amounts for each section 4(k) permissible commodity that is owned by the Board-regulated institution pursuant to section 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(o)); plus

(B) The sum of the market value of each physical commodity (calculated as the average of the amounts of the physical commodity owned by the Board-regulated institution recorded as of the close of business on each day of the previous calendar quarter multiplied by the simple average of the physical commodity’s month-end, end-of-day spot prices over the previous 60 months) that is owned by the Board-regulated institution pursuant to:

(1) Any authority other than sections 4(c)(2), 4(k)(4)(H), 4(k)(4)(I), and 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(c)(2), (k)(4)(H), (k)(4)(I), and (o)); or

(2) Section 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(o)), but only with respect to a physical commodity that is not a covered physical commodity.

(ii) If the covered physical commodity is an approved physical commodity, the section 4(k) permissible commodity quantity of the covered physical commodity equals the average of the amounts of the covered physical commodity owned by the Board-regulated institution recorded as of the close of business on each day of the previous calendar quarter minus any section 4(k) permissible commodity quantity.

(iii) If the covered physical commodity is not an approved physical commodity, the section 4(k) permissible commodity quantity of the covered physical commodity equals zero.

(3) For a covered physical commodity that the Board-regulated institution owns pursuant to section 4(k)(1)(B) of the Bank Holding Company Act (12 U.S.C. 1843(k)(1)(B)), the Board-regulated institution must determine the section 4(k) permissible commodity quantity and the section 4(o) permissible commodity quantity of each covered physical commodity the Board-regulated institution owns pursuant to section 4(k)(1)(B) or section 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(k)(1)(B) or (o)).

(2) For a covered physical commodity that the Board-regulated institution owns pursuant to section 4(o) of the Bank Holding Company Act (12 U.S.C. 1843(o)), the Board-regulated institution must determine:

(i) The section 4(o) permissible commodity quantity of a covered physical commodity that is owned by the Board-regulated institution recorded as of the close of business on each day of the previous calendar quarter minus any section 4(k) permissible commodity quantity.

(ii) If the covered physical commodity is an approved physical commodity, the section 4(k) permissible commodity quantity of the covered physical commodity equals the average of the amounts of the covered physical commodity owned by the Board-regulated institution as of the close of business on each day of the previous calendar quarter, if the daily quantity of the covered physical commodity:

(A) Was purchased by the Board-regulated institution in the spot market or is owned for the purpose of the Board-regulated institution taking or making physical delivery of the commodity to settle a forward contract, option, future, option on future, swap, or a similar contract in which a Board-regulated institution is authorized to engage under section 225.28(b)(8)(ii) of the Board’s Regulation Y (12 CFR 225.28(b)(8)(ii)); and

(B) Was stored, extracted, produced, transported, or altered (including by processing or refining) only by reputable, third-party facilities during that day; and

(iii) If the covered physical commodity is not an approved physical commodity, the section 4(k) permissible commodity quantity of the covered physical commodity equals zero.

(3) For a covered physical commodity that the Board-regulated institution owns pursuant to section 4(k)(1)(B) of the Bank Holding Company Act (12 U.S.C. 1843(k)(1)(B)), the Board-regulated institution must determine:

(i) The section 4(o) permissible commodity quantity equals zero; and

(ii) The section 4(k) permissible commodity quantity equals the average of the amounts of the covered physical commodity owned by the Board-regulated institution recorded as of the
close of business on each day of the previous calendar quarter.

(e) Covered commodity merchant banking investments risk weights. (1) The risk-weighted asset amount for a covered commodity merchant banking investment, as the term is defined in §217.40, is the exposure amount for the investment multiplied by the appropriate risk weight, each as calculated according to this section.

(2) A Board-regulated institution must assign a 1,250 percent risk weight to an exposure amount for a covered commodity merchant banking investment except as provided in paragraphs (e)(3) and (e)(4) of this section.

(3) A Board-regulated institution must assign a 300 percent risk weight to an exposure amount for a covered commodity merchant banking investment that is a publicly traded commodity trading portfolio company, as the term is defined in §217.40.

(4) A Board-regulated institution must assign a 400 percent risk weight to an exposure amount for a covered commodity merchant investment that is a commodity trading portfolio company, as the term is defined in §217.40, that is not publicly traded.

(f) 4(o) infrastructure assets risk weights. (1) The risk-weighted asset amount for a 4(o) infrastructure asset equals the original cost basis (cost basis gross of accumulated depreciation and asset impairment) of the 4(o) infrastructure asset multiplied by 1,250 percent.

(2) For purposes of this section, a 4(o) infrastructure asset is an on-balance sheet exposure owned pursuant to section 4(o) of the Bank Holding Company Act that is not a physical commodity.

§217.40 Covered Commodity Merchant Banking Investments.

(a) Definition of covered commodity merchant banking investment and commodity trading portfolio company. For purposes of this part,

(1) A covered commodity merchant banking investment is a company that

(i) The shares, assets, or ownership interests of which are owned or controlled by the Board-regulated institution pursuant to section 4(k)(4)(H) of the Bank Holding Company Act (12 U.S.C. 1843(k)(4)(H)); and

(ii) Is engaged in covered physical commodity activities.

(2) A commodity trading portfolio company is a covered commodity merchant banking investment that engages in covered physical commodity activities that are only the purchasing and selling of one or more covered physical commodities (each of which is an approved physical commodity) in the spot market and the taking and making physical delivery of one or more covered physical commodities (each of which is an approved physical commodity) to settle forward contracts, options, futures, options on futures, swaps, or similar contracts.

(b) Covered physical commodity activities. For purposes of this section, covered physical commodity activities include, but are not limited to,

(1) Storing, producing, transporting, or altering (including by processing or refining) a covered physical commodity;

(2) Buying or selling a covered physical commodity in the spot market;

(3) Taking or making physical delivery of a covered physical commodity to settle a contract; and

(4) Owning or operating a facility or vessel that holds or uses a covered physical commodity.

(c) End-user exception. Notwithstanding paragraph (b) of this section, covered physical commodity activities do not include

(1) Owning or operating an end-user facility or vessel; or

(2) Buying, owning or storing a covered physical commodity solely for purposes of powering or supporting an end-user facility or vessel that is owned or operated by the portfolio company.

(d) Definition of end-user facility or vessel. For purposes of paragraph (c)(2) of this section, end-user facility or vessel means a facility or vessel that does not store, produce, transport, or alter a covered physical commodity except as necessary to power or support the facility or vessel. An end-user facility or vessel does not include a power plant.

§217.51 [Amended]

7. Section 217.51(a)(1) is revised to read as follows:

(a) General. (1) To calculate its risk-weighted asset amounts for equity exposures that are not equity exposures to an investment fund or a covered commodity merchant banking investment, as defined in §217.40, a Board-regulated institution may apply either the Simple Risk-Weight Approach (SRWA) provided in §217.152 or, if it qualifies to do so, the Internal Models Approach (IMA) in §217.153. A Board-regulated institution must use the look-through approaches provided in §217.154 to calculate its risk-weighted asset amounts for equity exposures to investment funds and use the approach provided in §§217.39 and 217.40 for equity exposures to covered commodity merchant banking investments.

§217.100 [Amended]

8. Section 217.100(b)(3) is revised to read as follows:

* * * * *

(b) * * *

(3) A market risk Board-regulated institution must exclude from its calculation of risk-weighted assets under this subpart the risk-weighted asset amounts of all covered positions, as defined in subpart F of this part (except foreign exchange positions that are not trading positions, over-the-counter derivative positions, cleared transactions, unsettled transactions, and covered physical commodities).

* * * * *

9. Section 217.131 is amended by revising the section heading and revising paragraph (e)(3)(vii) to read as follows:

§217.131 Introduction and exposure measurement.

* * * * *

(e) * * *

(3) * * *

(vii). The risk-weighted asset amount for any other on-balance-sheet asset that does not meet the definition of a wholesale, retail, securitization, IMM, equity exposure, covered commodity merchant banking investment, cleared transaction, or default fund contribution and is not subject to deduction under §217.22(a), (c), or (d) equals the carrying value of the asset.

* * * * *

10. Section 217.151(a)(1) is revised to read as follows:

§217.151 Introduction and exposure measurement.

(a) General. (1) To calculate its risk-weighted asset amounts for equity exposures that are not equity exposures to an investment fund or a covered commodity merchant banking investment, as defined in §217.40, a Board-regulated institution may apply either the Simple Risk-Weight Approach (SRWA) provided in §217.152 or, if it qualifies to do so, the Internal Models Approach (IMA) in §217.153. A Board-regulated institution must use the look-through approaches provided in §217.154 to calculate its risk-weighted asset amounts for equity funds and use the approach provided in §§217.39 and 217.40 for equity exposures to covered commodity merchant banking investments.
PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

11. The authority citation to part 225 continues to read as follows:

§ 225.28 [Amended]

12. § 225.28 is amended by removing the term “cooper” from paragraphs (b)(6)(ii)(B) and (b)(6)(iii).

13. Section 225.95 is added to read as follows:

§ 225.95 What are some of the requirements to engage in complementary activities?

(a) Paragraphs (b)–(e) of this section apply to financial holding companies that the Board has approved to purchase and sell physical commodities in the spot market and to take and make delivery of physical commodities to settle contracts identified in section 225.28(b)(8)(B) of this part (12 CFR 225.28(b)(8)(B)) as an activity that is complementary to a financial activity under section 4(k)(1)(B) of the BHC Act (12 U.S.C. 1843(k)(1)(B)).

(b) A financial holding company may not purchase or sell physical commodities in the spot market or take or make delivery of physical commodities pursuant to sections 4(c)(8) or 4(k)(1)(B) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8), (k)(1)(B)) if the market value of physical commodities owned by the financial holding company and its subsidiaries (other than through ownership or control of assets or subsidiaries pursuant to sections 4(c)(2), 4(k)(4)(H), or 4(k)(4)(I)) of the Bank Holding Company Act (12 U.S.C. 1843(c)(2), (k)(4)(H), (k)(4)(I)) exceeds 5 percent of the consolidated tier 1 capital of the financial holding company, as determined under the Board’s Regulation Q (12 CFR part 217).

(c) A financial holding company must notify the Board if the aggregate market value of physical commodities owned by the financial holding company and its subsidiaries (other than through ownership or control of assets or subsidiaries pursuant to sections 4(c)(2), 4(k)(4)(H) or 4(k)(4)(I)) of the Bank Holding Company Act (12 U.S.C. 1843(c)(2), (k)(4)(H), (k)(4)(I)) exceeds 4 percent of the consolidated tier 1 capital of the financial holding company, as determined under the Board’s Regulation Q (12 CFR part 217).

(d) A financial holding company may not own operate, or invest in facilities or vessels for the extraction, transportation, storage, or distribution of physical commodities pursuant to section 4(k)(1)(B) of the Bank Holding Company Act (12 U.S.C. 1843(k)(1)(B)).

(e) For purposes of paragraph (d) of this section, the term operate includes (1) Participation in the day-to-day management or operations of the facility; (2) Participation in management and operational decisions that occur in the ordinary course of the business of the facility; and (3) Managing, directing, conducting, or providing advice regarding operations having to do with the leakage or disposal of a physical commodity or hazardous waste or decisions about the facility’s compliance with environmental statutes or regulations, including any law or regulation referenced in the definition of covered physical commodity in section 217.2 of the Board’s Regulation Q (12 CFR 217.2).

Robert de V. Frierson,
Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

12 CFR Parts 225 and 252

[Regulations Y and YY; Docket No. R–1548; RIN 7100 AE–59]

Amendments to the Capital Plan and Stress Test Rules

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of proposed rulemaking with request for comment.

SUMMARY: The Board is inviting comment on a notice of proposed rulemaking to revise the capital plan and stress test rules for bank holding companies with $50 billion or more in total consolidated assets and U.S. intermediate holding companies of foreign banks. Under the proposal, large and noncomplex firms, defined below, would no longer be subject to the provisions of the Board’s capital plan rule whereby the Board may object to a capital plan on the basis of qualitative deficiencies in the firm’s capital planning process. In connection with this modification, large and noncomplex firms would no longer be subject to the qualitative assessment in Comprehensive Capital Analysis and Review (CCAR), but would remain subject to a quantitative assessment in CCAR. The qualitative assessment of the capital plans of large and noncomplex firms instead would be conducted outside of CCAR through the supervisory review process. For purposes of the proposal, a bank holding company or U.S. intermediate holding company with total consolidated assets of $50 billion or greater but less than $250 billion, on-balance sheet foreign exposure of less than $10 billion, and nonbank assets of less than $75 billion would be considered a large and noncomplex firm. The proposal would also modify reporting requirements for large and noncomplex firms to reduce burdens by raising materiality thresholds, reducing the scope of the data collection on these firms’ stress test results, and reducing supporting documentation requirements. For all bank holding companies subject to the capital plan rule, the proposal would simplify the initial applicability provisions for the capital plan and stress test rules, reduce the amount of additional capital distributions that a banking company may make during a capital plan cycle without seeking the Board’s prior approval, and extend the range of potential as-of dates for the trading and counterparty scenario component used in the stress test rules. The proposal would also amend the Parent Company Only Financial Statements for Large Holding Companies (FR Y–0LP) to include new line item 17 of PC–B Memoranda (Total nonbank assets of a holding company that is subject to the Federal Reserve Board’s capital plan rule) for purposes of identifying the large and noncomplex firms. All other bank holding companies subject to the capital plan rule that are not large and noncomplex firms would remain subject to objection to their capital plan based on qualitative deficiencies under the rule.

The proposal would not apply to bank holding companies with total consolidated assets of less than $50 billion or to any state member bank or savings and loan holding company.

DATES: Comments must be received by November 25, 2016.

ADDRESSES: You may submit comments, identified by Docket No. R–1548 and RIN 7100 AE–59 by any of the following methods:

I. Background

A. Description of Capital Plan and Stress Test Requirements

Capital planning and stress testing are two key components of the Board’s supervisory framework for large financial companies. Under Section 165 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the Board of Governors of the Federal Reserve System (Board) is directed to establish enhanced prudential standards for bank holding companies with total consolidated assets of $50 billion or more. As part of this requirement, the Board must conduct annual supervisory stress tests with respect to these bank holding companies and issue regulations requiring these bank holding companies to conduct semi-annual company-run stress tests. The Board adopted final rules to implement these requirements on October 12, 2012. The Dodd-Frank Act also requires the enhanced prudential standards established by the Board to increase in stringency based on several factors, including the size and risk characteristics of the bank holding companies subject to the requirements. In prescribing more stringent prudential standards, including stress test requirements, the Board may differentiate among bank holding companies on an individual basis or by category, taking into consideration their capital structure, riskiness, complexity, financial activities (including the financial activities of their subsidiaries), size, and any other risk-related factors that the Board deems appropriate.

B. Implementation of Capital Plan and Stress Test Requirements

Consistent with the Dodd-Frank Act mandate, the Board conducts an annual assessment of the capital planning and post-stress capital adequacy of bank holding companies with total consolidated assets of $50 billion or more. All U.S. intermediate holding company subsidiaries of foreign banking organizations will be subject to the Board’s capital plan rule beginning in 2017. The Board’s capital planning and stress testing framework for these firms consists of two related programs: CCAR, which is conducted pursuant to the Board’s capital plan rule, and the Dodd-Frank Act stress tests, which is conducted pursuant to the Board’s stress test rules.

In CCAR, the Board assesses the internal capital planning processes of bank holding companies and the companies’ ability to maintain sufficient capital to continue their operations under expected and stressful conditions. Pursuant to the capital plan rule, each bank holding company must submit an annual capital plan to the Board that describes its capital planning processes and capital adequacy assessment. The capital plan must include (i) an assessment of the expected uses and sources of capital over the planning horizon; (ii) a detailed description of the bank holding company’s processes for assessing capital adequacy; (iii) the bank holding company’s capital policy; and (iv) a discussion of any expected changes to the bank holding company’s business plan that could materially affect its capital adequacy. A bank holding company may be required to include other information and analysis relevant to its capital planning processes and internal capital adequacy assessment. The Federal Reserve reviews each capital plan submission and may object to a bank holding company’s capital plan based on criteria identified in the rule. If the Federal Reserve objects to a bank holding company’s capital plan, the bank holding company may not make any...
capital distributions unless the Federal Reserve indicates in writing that it does not object to such distributions.\textsuperscript{11}

Pursuant to the Board’s stress test rules, the Board conducts supervisory stress tests of bank holding companies with total consolidated assets of $50 billion or more, and these bank holding companies are required to conduct annual and mid-cycle company-run stress tests. In conducting the supervisory stress tests, the Board projects balance sheets, risk-weighted assets, net income, and resulting post-stress capital levels and regulatory capital ratios over a planning horizon under baseline, adverse, and severely adverse scenarios, incorporating capital action assumptions prescribed in the Board’s stress test rules.\textsuperscript{12} Similarly, for the annual company-run stress tests, a bank holding company uses the same planning horizon, capital action assumptions, and baseline, adverse, and severely adverse scenarios used in the supervisory stress test.\textsuperscript{13}

C. Review of Capital Plan and Stress Test Requirements

The 2015 capital planning cycle marked the fifth anniversary of CCAR. In 2015, the Board initiated a series of meetings, including with a bank officials, debt and equity-side market analysts, public interest groups, and academics, to solicit their views on their overall evaluation of, and recommendations for, the CCAR program. The Board received a wide range of comments on the program.

While meeting participants generally expressed the view that CCAR has been successful in strengthening the capital positions and improving the risk-management capabilities of the bank holding companies subject to CCAR, some participants provided suggestions for improving or strengthening various aspects of the program.\textsuperscript{14} Notably, representatives from bank holding companies with less than $250 billion in total consolidated assets recommended that the Board modify CCAR to reduce burdens for these bank holding companies by establishing a separate capital planning program that would reduce the associated regulatory requirements and extend reporting timelines.\textsuperscript{15}

In December 2015, the Board released capital planning guidance in Supervision and Regulation (SR) Letters 15–18 and 15–19 to consolidate its existing expectations and clarify that the Board’s expectations for capital planning differ depending on the size and complexity of the firm.\textsuperscript{16} The guidance provided that firms with $250 billion or more in total consolidated assets, firms with $10 billion or more in foreign exposures, and firms otherwise subject to the Large Institution Supervision Coordination Committee (LISCC) supervisory framework (typically the largest, most internationally active bank holding companies) would be subject to heightened expectations in all aspects of capital planning, as compared to other large, but less complex firms. The guidance reflects an important objective of the Federal Reserve, which is to tailor supervisory expectations for firms with a lower systemic risk profile, while simultaneously protecting financial stability and improving the resiliency of and the availability of credit from the largest and most complex firms.\textsuperscript{17}

While SR Letter 15–19 outlined tailored capital planning expectations for large and noncomplex firms, the high public profile of the CCAR qualitative review could create a risk that large and noncomplex firms will over-invest in stress testing and capital planning processes that are unnecessary to adequately capture the risks of these firms. In this proposal, the Board is proposing to further tailor its stress testing and capital planning requirements, as discussed below.

II. Proposed Revisions to the Capital Plan and Stress Test Rules

A. Overview

This proposal would revise the standards that the Board uses to review capital plans for bank holding companies that have total consolidated assets of at least $50 billion but less than $250 billion, on-balance sheet foreign exposure of less than $10 billion, and nonbank assets of less than $75 billion (each, a large and noncomplex firm). Specifically, these large and noncomplex firms under the proposal would no longer be subject to the provisions of the Board’s capital plan rule whereby the Board may object to a firm’s capital plan based on unresolved supervisory issues or concerns with the assumptions, analysis, and methodologies in the firm’s capital plan (qualitative objection criteria, as described further in section II.D of this preamble below). In connection with this change, large and noncomplex firms would remain subject to a quantitative assessment in CCAR and would no longer be subject to the qualitative assessment in CCAR. The proposal would also amend the Parent Company Only Financial Statements for Large Holding Companies (FR Y–9LP) to include a new line item for purposes of identifying the large and noncomplex firms. All other bank holding companies subject to the capital plan rule (a LISCC firm, if the bank holding company is subject to the LISCC supervisory framework, \textsuperscript{18} or large and complex firm, if the bank holding company otherwise has total consolidated assets of $250 billion or more, on-balance sheet foreign exposure of $10 billion or more, or nonbank assets of $75 billion or more) would remain subject to objection to their capital plan based on qualitative deficiencies under the rule.

The proposal would also modify associated regulatory reporting requirements for large and noncomplex firms to collect less detailed information on these firms’ stress test results and raise the materiality threshold for reporting on specific portfolios. Under the proposal, large and noncomplex firms would no longer be subject to the qualitative assessment in CCAR beginning with the 2017 CCAR cycle, and a large and noncomplex firm would be able to implement their modified reporting requirements either immediately or after a six-month delay. In addition, the proposal would simplify the timing of the initial applicability of the capital plan and stress test rules for all bank holding companies that cross the $50 billion asset threshold to become subject to these rules. These revisions are

\textsuperscript{11} Based on the current population of bank holding companies, all LISCC firms have total consolidated assets of $250 billion or more, nonbank assets of $10 billion or more, on-balance sheet foreign exposure of $10 billion or more, or nonbank assets of $75 billion or more.
intended to reduce compliance burdens associated with the capital plan and stress test rules.

The proposal would also revise the de minimis exception threshold for capital distributions under the capital plan rule. As noted, as part of CCAR, the Federal Reserve evaluates the planned capital distributions, such as dividends or repurchases of common stock, that were included in a capital plan. Under the capital plan rule, a bank holding company may make the capital distributions that were included in the capital plan, provided that the Federal Reserve does not object to the plan.\(^{18}\)

Generally, a bank holding company must obtain the Federal Reserve’s prior approval before making additional capital distributions above the dollar amount described in its capital plan.\(^{19}\) However, a bank holding company that is well capitalized, as defined in 12 CFR 225.2(r), may make additional capital distributions above such dollar amount without seeking the Board’s prior approval if certain other requirements are met. These include the requirement that the total distribution amount not exceed 1.00 percent of the bank holding company’s tier 1 capital for the year-period following the Federal Reserve’s action on the bank holding company’s capital plan (the de minimis exception).\(^{20}\)

The proposal would amend the de minimis exception in two ways for all bank holding companies subject to the capital plan rule. First, the proposal would establish a one-quarter “blackout period” while the Federal Reserve is conducting CCAR (the second quarter of a calendar year), during which bank holding companies would not be able to submit a notice to use the de minimis exception. Second, the proposal would lower the de minimis limitation from 1.00 percent to 0.25 percent of a bank holding company’s tier 1 capital, beginning April 1, 2017.

The proposal includes an additional blackout period for additional capital distribution requests that require prior approval from the Federal Reserve. This additional blackout period would also apply during the calendar quarter in which the Federal Reserve conducts the CCAR exercise. The proposed blackout periods for both the de minimis exception and prior approval requests are expected to be effective during the second quarter of 2017, in which the Federal Reserve will be conducting CCAR 2017.

The last proposed change to the capital plan rule relates to the trading and counterparty component of the stress test. Under the Board’s stress test rules, the Board may require a bank holding company with significant trading activity to include a trading and counterparty component (global market shock) in its adverse and severely adverse scenarios for its company-run stress tests.\(^{21}\) Currently, the Board must select a date between January 1 and March 1 of the calendar year of the current stress test cycle for the “as-of” date for the data used as part of the global market shock components of the bank holding company’s adverse and severely adverse scenarios.\(^{22}\) For the reasons described in section III.B of this preamble, the proposal would extend the range of dates from which the Board may select the as-of date for the global market shock to October 1 of the calendar year preceding the year of the stress test cycle to March 1 of the calendar year of the stress test cycle.

As described in section III.C of this preamble, the proposal would also remove transition provisions in the capital plan and stress test rules that are no longer operative.

B. Identifying Large and Noncomplex Firms

Under the proposal, a bank holding company would be considered large and noncomplex if, as of December 31 of the calendar year prior to the capital plan cycle, it has average total consolidated assets of $50 billion or greater but less than $250 billion,\(^{23}\) total on-balance sheet foreign exposure of less than $10 billion,\(^{24}\) and average total nonbank assets of less than $75 billion.

The proposed thresholds of $250 billion in average total consolidated assets and $10 billion in foreign exposure identify the largest and most internationally active bank holding companies, whose failure or distress could pose significant risks to U.S. financial stability. The proposed thresholds of $250 billion in total consolidated assets and $10 billion in foreign exposure identify the largest and most internationally active bank holding companies, the failure or distress of which could pose significant risks to U.S. financial stability. These thresholds would be consistent with thresholds used in the Board’s capital and liquidity requirements to identify companies that may present elevated risk because of their size and the amount of their cross-border exposure.\(^{25}\)

In addition to thresholds based on a bank holding company’s average total consolidated assets and total on-balance sheet foreign exposure, the Board is proposing an additional threshold to identify a bank holding company as large and noncomplex based on the amount of its total nonbank assets. The proposed nonbank asset threshold of $75 billion would separate out bank holding companies that are significantly engaged in activities outside the business of banking, which have the potential to generate additional systemic risk and therefore warrant heightened capital planning standards. The proposed threshold would also facilitate heightened supervisory oversight with respect to the capital planning practices for a bank holding company that engages in activities through legal entities that are not subject to direct regulation and supervision applicable to a regulated banking entity, which may involve a broader range of risks and more complex structure requiring more sophisticated risk management.

As discussed in more detail below, under the proposal, a LISCC or large and complex firm would remain subject to the qualitative objection criteria, the CCAR qualitative review process, and the current more detailed reporting requirements. The qualitative objection criteria, CCAR qualitative review process, and more detailed reporting requirements would continue to provide for greater supervisory oversight to ensure that these LISCC firms and large and complex firms are effectively identifying and managing risks that may arise in connection with their greater size, international activity, or nonbanking operations. For bank holding companies with significant nonbanking activities in particular, the...
CCAR qualitative assessment supplements the existing regulatory capital framework by incorporating a comprehensive review of a bank holding company’s processes to identify, aggregate, and measure risks from all of its activities, including nonbanking activities. The added scrutiny of the qualitative CCAR review helps to ensure that such LISCC firms and large and complex firms are effectively identifying and managing their combined risks on a consolidated basis.

In developing the proposal, the Federal Reserve considered a range of nonbank asset thresholds between $50 billion and $125 billion. The proposed $75 billion threshold was chosen based on historical failures and bankruptcies of large financial firms and the risk profile of the current population of bank holding companies.

At the low end of the range, a $50 billion nonbank asset threshold would be analogous to the total asset threshold used in section 165 of the Dodd-Frank Act for enhanced prudential standards to a bank holding company.26 However, based on the current population of bank holding companies, a $50 billion nonbank asset threshold appeared to be too low, as many bank holding companies at this level conduct primarily traditional bank-like activities (such as mortgage lending) through nonbank subsidiaries. At the high end of the range, the Board considered a nonbank asset threshold of $125 billion, which would scope in bank holding companies with at least a majority of their assets in nonbank assets, indicating a potentially greater complexity of structure or activities and therefore greater risk.27 Based on the current population of firms, a nonbank asset threshold of $125 billion would include the most complex U.S. bank holding companies with the largest derivatives trading and capital markets activities, but may exclude some bank holding companies with risk profiles that are significantly concentrated in riskier activities, particularly U.S. intermediate holding companies of foreign banking organizations that engage in significant capital markets activities. In particular, a threshold of $125 billion in nonbank assets would exclude companies that engage in equities trading, prime brokerage, and investment banking activities, and therefore have risk profiles that are more similar to those of the most complex U.S. financial firms than to the risk profiles of the smaller, less complex bank holding companies.

The potential complexity and interconnectedness of a bank holding company with significant nonbank assets heightens the need for such a bank holding company to be subject to an intensive annual review of its capital planning processes and risk management based on its idiosyncratic risk profile, through the CCAR qualitative assessment and qualitative objection criteria (as defined below). The proposed nonbank asset threshold of $75 billion would be slightly below the midpoint of the $50-to-$125 billion range of potential nonbank asset thresholds considered. Based on the current population of bank holding companies, this proposed threshold would include large firms with complex capital markets activities, but would not include firms with less complex structures or activities. This result would be consistent with the proposal’s objective of focusing supervisory resources and more detailed reporting requirements on firms with elevated risk profiles.

The Board invites comment on whether the proposed thresholds identify firms for which the proposed relief would be most appropriate in light of the goals and purposes of the CCAR exercises.

Question 1: What other standards, such as revenue related to nonbanking activities, should the Board consider to identify large and noncomplex firms?

C. Measurement and Reporting of Average Total Nonbank Assets

1. Measurement for CCAR 2017

In order to determine whether a bank holding company meets the $75 billion average total nonbank asset threshold for CCAR 2017, average total nonbank assets under the proposal would equal (i) total combined nonbank assets of nonbank subsidiaries, as reported on line 15a of Schedule PC–B of the Parent Company Only Financial Statements for Large Holding Companies (FR Y–9LP) as of December 31, 2016; plus (ii) the total amount of equity investments in unconsolidated nonbank subsidiaries, whether held directly or indirectly or held through lower-tier holding companies, and its direct investments in unconsolidated nonbank subsidiaries, associated nonbank companies, and those nonbank corporate joint ventures over which the bank holding company exercises significant influence (collectively, “nonbank companies”).28

27 A firm with total consolidated assets of $250 billion or more would have been included by the total consolidated asset threshold, so $125 billion or more in nonbank assets would constitute at least 50 percent of the assets of a bank holding company with total consolidated assets less than $250 billion.
28 For purposes of the FR Y–9LP, (i) a subsidiary is a company in which the reporting bank holding company directly or indirectly owns more than 50 percent of the outstanding voting stock; (ii) an associated company is a corporation in which the reporting bank holding company, directly or indirectly, owns 20 to 50 percent of the outstanding voting stock and over which the reporting bank holding company exercises significant influence; and (iii) a corporate joint venture is a corporation owned and operated by a group of companies, no one of which has a majority interest, as a separate and specific business or project for the mutual benefit of that group of companies.
Nonbank companies, for purposes of this measure, would exclude (i) all national banks, state member banks, state nonmember insured banks (including insured industrial banks), federal savings associations, federal savings banks, and thrift institutions (collectively, “depository institutions”) and (ii) except for an Edge or Agreement Corporation designated as “Nonbanking” in the box on the front page of the Consolidated Report of Condition and Income for Edge and Agreement Corporations (FR 2886b), any subsidiary of a depository institution (“depository institution subsidiary”).

For purposes of this measure, a reporting bank holding company should eliminate all intercompany assets and operating revenue among the nonbank companies, but should include assets and operating revenue with the reporting bank holding company; any depository institution; any depository institution subsidiary. For a reporting bank holding company that is a subsidiary of a foreign banking organization, the reporting bank holding company should include assets and operating revenue with any branch or agency of the foreign banking organization or any non-U.S. subsidiary, non-U.S. associated company, or non-U.S. corporate joint venture of the foreign banking organization that is not held through the reporting bank holding company, should be included. For example, a reporting bank holding company should eliminate the loans made by one nonbank company to a second nonbank company, but should not eliminate loans made by one nonbank company to the reporting bank holding company; depository institution; depository institution subsidiary; or for a reporting bank holding company that is a subsidiary of a foreign banking organization, any branch or agency of the foreign banking organization or any non-U.S. subsidiary, non-U.S. associated company, or non-U.S. corporate joint venture of the foreign banking organization that is not held through the reporting bank holding company.

The proposed line item would require a firm to report nonbank assets based on an average over the quarter, as calculated on either a daily, weekly, or monthly basis. Using an average would further the integrity of the nonbank assets measure by ensuring that it is not unduly influenced by end-of-quarter fluctuations in nonbank assets; however, requiring a daily or weekly average may impose undue burden on firms to perform this calculation. The Board is therefore seeking comment as to whether a daily, weekly, or monthly average would be most appropriate for this calculation. This new line item is expected to be effective for the reporting period as of March 31, 2017.

Question 3: What are the costs and benefits of using a daily, weekly, or monthly average for purposes of calculating nonbank assets?

Question 4: What other measures for identifying large and noncomplex firms should the Board consider? For instance, should the Board consider evaluating the percent of revenues from nonbank activities to total revenue, in addition to the asset measure?

D. Elimination of CCAR Qualitative Assessment and Objection for Large and Noncomplex Firms

Capital planning is a core aspect of financial and risk management for all bank holding companies that helps ensure the financial strength and resilience of a firm. Strong forward-looking capital planning processes ensure that a bank holding company with total consolidated assets of $50 billion or more has sufficient capital to absorb losses and continue to lend to creditworthy businesses and consumers, including during times of stress. The Board expects all bank holding companies with total consolidated assets of $50 billion or more to maintain sound capital planning processes on an ongoing basis.

The Board has different expectations for sound capital planning and capital adequacy depending on the size, scope of operations, activity, and systemic risk profile of a firm. Consistent with those different expectations, under the proposal, large and noncomplex firms would no longer be subject to the provisions of the Board’s capital plan rule whereby the Board may object to a capital plan on the basis of deficiencies in the firm’s capital planning process or unresolved supervisory issues, that is, large and noncomplex firms would no longer be subject to the CCAR qualitative assessment.

In the current CCAR process, the Federal Reserve conducts a qualitative assessment of the strength of each bank holding company’s internal capital planning process and a quantitative assessment of each bank holding company’s capital adequacy in the calendar quarter in which the bank holding company submits a capital plan. In the qualitative assessment, the Federal Reserve evaluates the extent to which the analysis underlying each bank holding company’s capital plan comprehensively captures and addresses potential risks stemming from company-wide activities. In addition, the Federal Reserve evaluates the reasonableness of a bank holding company’s capital plan, the assumptions and analysis underlying the plan, and the robustness of the bank holding company’s capital planning process. Under the capital plan rule, the Board may object to a bank holding company’s capital plan if the Board determines that (1) the bank holding company has material unresolved supervisory issues, including but not limited to issues associated with its capital adequacy process; (2) the assumptions and analysis underlying the bank holding company’s capital plan, or the bank holding company’s methodologies for reviewing its capital adequacy process, are not reasonable or appropriate; 29 or (3) the bank holding company’s capital planning process or proposed capital distributions otherwise constitute an unsafe or unsound practice, or would violate any law, regulation, Board order, directive, or condition imposed by, or written agreement with, the Board or the appropriate Federal Reserve Bank (together, qualitative objection criteria).30 The Board may also object to a bank holding company’s capital plan if the bank holding company has not demonstrated an ability to maintain capital above each minimum regulatory capital ratio on a pro forma basis under expected and stressful conditions throughout the planning horizon (that is, based on a quantitative assessment).31 In the past CCAR exercises, the Board has publicly announced its decision to object to a bank holding company’s capital plan, along with the basis for the decision.32

In the feedback meetings that the Board held on CCAR, participants from large and noncomplex firms expressed the view that the CCAR qualitative assessment was unduly burdensome because, in their view, it required the development of large amounts of documentation and sophisticated stress test models to the same degree as the largest firms in order to avoid a public objection to their capital plan. Consistent with this feedback, further tailoring of regulatory requirements for large and noncomplex firms would avoid creating a risk, based on the high

29 As discussed in section II.E of this preamble below, the proposal would revise this criterion to permit objection where the Board determines that the assumptions and analysis underlying the bank holding company’s capital plan, or the bank holding company’s methodologies and practices that support its capital planning process, are not reasonable or appropriate.
30 See 12 CFR 225.8(f)(2)(ii)(A), (B), and (D).
public profile of the CCAR qualitative review, that large and noncomplex firms will over-invest in stress testing and capital planning processes that are unnecessary to adequately capture the risks of these firms.

In general, large and noncomplex firms present less systemic risk than LISCC firms and large and complex firms. Furthermore, large and noncomplex firms are generally engaged in traditional banking activities and have a more limited geographical scope than LISCC firms and large and complex firms; accordingly, there is less variation in key risks across these firms relative to key risks of LISCC firms and large and complex firms. The strength of each large and noncomplex firm’s capital planning process may be assessed through normal supervisory reviews supplemented with targeted, horizontal reviews of aspects of capital planning. Consequently, the Federal Reserve proposes to conduct its supervisory assessment of a large and noncomplex firm’s risk-management and capital planning practices through the regular supervisory process and targeted, horizontal assessments of particular aspects of capital planning, rather than the intensive CCAR qualitative horizontal assessment. Further, the Board would not object to the capital plans of large and noncomplex firms due to qualitative deficiencies in their capital planning process, but rather would incorporate an assessment of these practices into regular, ongoing supervision.

As compared to CCAR, the proposed review process for large and noncomplex firms is expected to be more limited in scope, include targeted horizontal evaluations of specific areas of the capital planning process, and focus on the standards set forth in the capital plan rule and SR Letter 15–19. Before the start of the supervisory review process, the Federal Reserve would send a supervisory communication to each large and noncomplex firm describing the scope of the year’s review. The review would likely occur in the quarter following the CCAR qualitative assessment for LISCC firms and large and complex firms.

Under the proposal, the Board would continue to perform the annual quantitative assessment of capital plans of the large and noncomplex firms and publicly announce a decision to object or not object to a firm’s capital plan on this basis. The quantitative assessment ensures that firms maintain sufficient capital to continue operations throughout times of economic and financial market stress. While an individual large and noncomplex firm is likely to have a lower systemic risk profile than a LISCC firm or large and complex firm, its activities or distress still could pose some degree of risk to financial stability. Moreover, large and noncomplex firms collectively represent over $2 trillion in total assets and nearly $1.3 trillion in loans and leases as of June 30, 2016. A common weakness or insufficient capitalization across a group of large and noncomplex firms could still represent a significant threat to the U.S. economy and to specific regions where the firms’ operations or activities are concentrated. Accordingly, the proposal would maintain the current quantitative analysis framework for these firms and the possible basis for objection to a firm’s capital plan based on the results of the quantitative assessment, in order to appropriately ensure the capital adequacy of all bank holding companies subject to the capital plan rule.

As under the current capital plan rule, nothing in the proposal would limit the authority of the Federal Reserve to issue a capital directive, such as a directive to reduce capital distributions, or take any other supervisory enforcement action, including an action to address unsafe or unsound practices or conditions or violations of law, such as an unsafe and unsound capital planning process.33

E. Continued Application of CCAR for LISCC Firms and Large and Complex Firms

For LISCC firms and large and complex firms, the proposal would maintain the current comprehensive assessment of capital planning processes in the CCAR qualitative assessment. The comprehensive assessment of capital planning processes in the CCAR qualitative assessment produces significant safety and soundness benefits for LISCC firms and large and complex firms and financial stability benefits for the financial system as a whole. As the Board noted when it adopted the capital plan rule in 2011, the analytical techniques and other requirements set forth in the capital plan rule enable a firm to identify, measure, and monitor its risks and promote the stability of the U.S. financial system.34

Expectations for LISCC firms and large and complex firms are elevated relative to large and noncomplex firms because material distress or failure of a LISCC firm or large and complex firm is more likely to pose a threat to U.S. financial stability as compared to a large and noncomplex firm, heightening the need to ensure the resiliency of these firms. Furthermore, LISCC firms and large and complex firms engage in more diverse activities and have a larger overall size and geographical scope than large and noncomplex firms. This larger size and greater diversity leads to greater variation in the material risks at these firms, which may not be fully captured by a standardized supervisory stress scenario.

The intensive, comprehensive assessment provided by the CCAR qualitative process enables the Federal Reserve to assess whether a LISCC firm or large and complex firm has sufficient capital and strong capital planning processes in light of the scope and diversity of its activities, including risks that are idiosyncratic to each firm. The systemic footprint of these firms and the damage that their failure could pose to the financial system makes it critical that a comprehensive assessment occur on an annual basis, to ensure that the capital planning processes of LISCC firms and large and complex firms are sufficiently dynamic to reflect changes in economic or financial conditions, as well as changes to the risk profile of the firm.

The public nature of the CCAR process and disclosure of the results of the Federal Reserve’s qualitative assessment helps to ensure that LISCC firms and large and complex firms maintain focus on ensuring that their practices are consistent with the Federal Reserve’s capital planning expectations articulated in SR Letter 15–18.35 Additionally, the public profile of the CCAR qualitative assessment improves incentives for firms to ensure the strength of their capital planning processes. The additional scrutiny and market discipline provided by the CCAR process is all the more important in light of the systemic risk presented by LISCC firms and large and complex firms.

The proposal includes a modification to the capital plan rule’s qualitative objection criteria for LISCC firms and large and complex firms to better align with the Federal Reserve’s focus during the CCAR supervisory assessment. Specifically, the proposal provides that the Board may object to a capital plan of a LISCC firm or large and complex firm if, among other factors, the methodologies and practices that support the bank holding company’s capital planning process are not reasonable or appropriate (emphasis added). The current rule instead provides a basis for objection if the bank holding company’s methodologies for

33 See 12 CFR 225.8(b)(4).
34 76 FR 74631, 74632 (December 1, 2011).
35 See SR Letter 15–18.
reviewing its capital adequacy process, are not reasonable or appropriate (emphasis added). This modification is intended to clarify the current scope of the CCAR qualitative review and the areas of the focus in the review of the capital plan of a LISCC firm or a large and complex firm.

F. Implementation of Modified Reporting Requirements

The Capital Assessments and Stress Testing Report (FR Y–14 series of reports; OMB No. 7100–0341) collects data used to support supervisory stress testing models and continuous monitoring efforts for bank holding companies with total consolidated assets of $50 billion or more. The FR Y–14 consists of three reports: The semi-annual FR Y–14A, the quarterly FR Y–14Q, and monthly FR Y–14M. Each report contains multiple schedules, several of which are reported only by bank holding companies that meet specified materiality thresholds.

In discussions on CCAR, several large and noncomplex firms recommended that the Board revise the FR Y–14 series of reports to reduce reporting burdens for these firms. For instance, these large and noncomplex firms suggested that the Board raise the materiality threshold for the FR Y–14 reports and reduce the detail required in the supporting documentation requirements. Additionally, these firms indicated that in some cases where a portfolio met the criteria to be considered immaterial, the firm voluntarily reported data on the portfolio due to the Federal Reserve’s practice of applying a 75th percentile loss rate to immaterial portfolios in the supervisory stress test. The proposal would reduce burdens associated with reporting the FR Y–14 schedules for large and noncomplex firms in three ways: By raising the materiality threshold, reducing the supporting documentation requirements, removing several sub-schedules from the FR Y–14A Summary Schedule, and using the median loss rate for immaterial portfolios.

The proposal would increase the materiality thresholds for filing schedules on the FR Y–14Q report and the FR Y–14M report for large and noncomplex firms. The FR Y–14 instructions currently define material portfolio as those with asset balances greater than $5 billion or asset balances greater than five percent of tier 1 capital on average for the four quarters preceding the reporting quarter. The proposal would revise the FR Y–14’s definition of a “material portfolio” for large and noncomplex firms to mean a portfolio with asset balances greater than either (1) $5 billion or (2) 10 percent of tier 1 capital, both measured as an average for the four quarters preceding the reporting quarter. As a result of this change, respondents would be able to exclude certain portfolios from reporting and in some cases may not be required to report certain schedules at all. In modeling losses on these portfolios for large and noncomplex firms, the Federal Reserve intends to apply the median, rather than 75th percentile, loss rate from supervisory projections based on the firms that reported data, so as not to discourage firms from using the increased threshold for materiality.

The proposal also would reduce the supporting documentation a large and noncomplex firm would be required to submit with its capital plan. Appendix A of the FR Y–14A report outlines qualitative information that a bank holding company should submit in support of its projections, including descriptions of the methodologies used to develop the internal projections of capital across scenarios and other analyses that support the bank holding company’s comprehensive capital plans. The proposal would revise the instructions to Appendix A of the FR Y–14A to remove the requirement that a large and noncomplex firm include in its capital plan submission certain documentation regarding its models, including any model inventory mapping document, methodology documentation, model technical documents, and model validation documentation. Large and noncomplex firms would still be required to be able to produce these materials upon request by the Federal Reserve, and all or a subset of these firms may be required to provide this documentation depending on the focus of the supervisory review of large and noncomplex firm capital plans.

Removing the requirement that a large and noncomplex firm submit this information in connection with its capital plan would reduce the resources needed to prepare the plan for submission and alleviate concerns of an adverse supervisory finding that a capital plan is incomplete based on the failure to provide documentation. Under the proposal, large and noncomplex firms would no longer be required to complete several elements of the FR Y–14A Schedule A (Summary), including the Securities OTTI methodology sub-schedule, Securities Market Value source sub-schedule, Securities OTTI by security sub-schedule, the Retail repurchase sub-schedule, the Trading sub-schedule, Counterparty sub-schedule, and Advanced RWA sub-schedule. The revised instructions for the FR Y–14A Summary schedule reporting form are available on the Board’s public Web site. Removing these elements should reduce burdens associated with collecting and validating this data, responding to follow-up inquiries, and implementing and maintaining technical systems. Under the proposal, a large and noncomplex firm may adopt these changes for the FR Y–14A report as of December 31, 2016, or as of June 30, 2017.

G. Simplify Initial Application of Capital Plan and Stress Test Rules and Regulatory Reporting Requirements

The proposal would simplify the applicability provisions for the capital plan and stress test rules that apply to bank holding companies with $50 billion or more in total consolidated assets (subparts E and F of the Board’s Regulation YY, hereafter subparts E and F) and provide additional time before the application of these requirements for bank holding companies that cross the $50 billion asset threshold close to the April 5 capital plan submission and stress test date. Under the current rules, a bank holding company that crosses the $50 billion asset threshold on or before December 31 of a calendar year must submit a capital plan by April 5 of the following year. Under the proposal, the cutoff date for the capital plan rule would be moved to September 30, so that a firm that crosses the $50 billion asset threshold in the fourth quarter of a calendar year would not have to submit a capital plan until April 5 of the second year after it crosses the threshold.

The proposal would also align the cutoff date for initial application of the stress test rules in subparts E and F with the proposed September 30 cutoff date for the initial application of the capital plan rule. A bank holding company

36 Respondents have the option to complete the data schedules for immaterial portfolios.

37 The four quarter average percent of tier 1 capital is calculated as the sum of the firm’s preceding four quarters of balances subject to the particular materiality threshold divided by the sum of the firm’s preceding four quarters of tier 1 capital.
would become subject to these stress test rules in subparts E and F in the year following the first year in which the bank holding company submitted a capital plan. Under the current stress test rules, a bank holding company that crosses the $50 billion asset threshold before March 31 of a given year becomes subject to the stress test rules under subparts E and F beginning in the following year, and accordingly, may have only nine months before its first stress test under these subparts. Under the proposal, a firm would have at least a year before it would be subject to its initial stress tests under subparts E and F. This revision would simplify the application of the capital plan and stress test rules and allow for a more orderly onboarding process for new FR Y–14 filers, which will improve the quality of data used in the supervisory stress tests.39

The proposal would also provide an extended onboarding period for regulatory reporting requirements to a bank holding company after it first crosses the $50 billion asset threshold. Currently, a bank holding company that crosses the $50 billion asset threshold must prepare FR Y–14M reports as of the end of the month in which it crosses the threshold, and must submit its first FR Y–14M within 90 days after the end of the month (at which time, data for the three intervening months is due). The proposal would require a bank holding company to begin preparing its initial FR Y–14M as of the end of the third month after the bank holding company first meets the $50 billion asset threshold (rather than as of the month in which the bank holding company crosses the threshold) and must submit its first FR Y–14M within 90 days after the end of that month (at which time, data for the three intervening months would be due). For example, a bank holding company that crosses the $50 billion asset threshold as of September 30, 2016, would be required to prepare its initial FR Y–14M report as of December 2016, and file its FR Y–14M reports for December 2016, January 2017, and February 2017 in March 2017. A bank holding company would continue to prepare its FR Y–14Q report as of the end of the first quarter after it initially crosses the threshold. The additional onboarding time should facilitate communications between the Federal Reserve and a bank holding company and better prepare the bank holding company to comply with FR Y–14 reporting requirements. Generally, a bank holding company does not begin the onboarding process, including dialogue with the data aggregators who collect the FR Y–14M data, until after the Federal Reserve confirms that the bank holding company has exceeded the asset threshold. Accordingly, providing for an extended onboarding period should help bank holding companies become better prepared to comply with the FR Y–14 reporting requirements when they take effect, which will improve data quality for initial reporting periods and reduce burdens and costs for reporting bank holding companies.

III. Other Amendments to the Capital Plan and Stress Test Rules

A. Lowering the de minimis Exception Threshold for All Bank Holding Companies

As noted, a bank holding company subject to the capital plan rule must request prior approval for a capital distribution that has not explicitly been approved by the Board. However, in the event that a bank holding company received a notice of non-objection to its capital plan, the bank holding company may make a capital distribution that exceeds the amount described in the capital plan if: (1) The bank holding company remains well capitalized after the distribution,40 (2) the bank holding company’s performance and capital levels following the distribution are consistent with its projections under the expected conditions in the bank holding company’s capital plan, (3) the bank holding company provides 15 days’ notice prior to execution and the Board does not object within that time period; and (4) the aggregate dollar amount of all capital distributions during the capital planning cycle (the period beginning on July 1 of a calendar year and ending on June 30 of the following year) would not exceed the total amount described in the bank holding company’s capital plan by more than 1.00 percent of the bank holding company’s tier 1 capital as reported in the bank holding company’s first quarter FR Y–9C.41

The purpose of this de minimis exception is to provide flexibility for well-capitalized bank holding companies to distribute small, additional amounts of capital without the need for a complete re-assessment of the bank holding company’s capital plan. Prior to the 2015 capital planning cycle, requests to make distributions under the de minimis exception were generally small and typically related to unanticipated events that improved a bank holding company’s capital levels (such as tax rebates or litigation settlements). Over time, the Board has observed a pattern of certain bank holding companies using the de minimis exception to increase their common stock repurchases by the maximum amount allowed under the exception. This pattern risks treating the de minimis exception as an automatic add-on to approved common stock distributions under a bank holding company’s capital plan rather than for its intended use for unanticipated events. Based on planned net common stock distributions (i.e., planned common stock dividends and repurchases less planned common stock issuances) for the CCAR 2016 approval period, the current level of the de minimis threshold would imply that bank holding companies could increase their net common stock capital distributions by 32 percent on average (median of 13 percent).42

The proposal would reduce the de minimis exception from 1.00 percent to 0.25 percent of a bank holding company’s tier 1 capital in order to ensure that a de minimis distribution would represent a smaller percentage of the bank holding company’s approved capital distributions and tier 1 capital. Based on data from CCAR 2016, a 0.25 percent de minimis threshold would enable bank holding companies to increase their planned net common stock distributions by 8 percent on average (median of 3 percent). The expected aggregate capital impact of this proposed change to the de minimis exception threshold can be evaluated on both a prospective and historical basis. On a prospective basis, a comparison can be made between the total de minimis capital distributions that could be made across all bank holding companies subject to CCAR (assuming all applicable conditions were met) under the proposal and under the current rule, by taking the difference between 1.00 percent and 0.25 percent of tier 1 capital across all firms. Based on data as of the first quarter of 2016, this difference equals $9.8 billion, equivalent to 0.10 percent of the total

39 Providing this extension would also have the effect of allowing firms that cross the $50 billion in the fourth quarter of a given year as much as a year and a half before they are required to submit their first capital plan, and two and a half years before they are subject to the stress tests under subparts E and F. This extended period would allow for the significant investments firms must make to meet these requirements and account for the fact that these firms would continue to be subject to prudential supervision during the transition period.

40 As defined by 12 CFR 225.2(r).

41 See 12 CFR 225.8(g)(2).

42 Net common stock distributions is calculated as planned common stock dividends and repurchases less planned common stock issuances. This analysis excludes firms that had no or negative net planned common stock distributions in their 2016 capital plans.
risk-weighted assets of bank holding companies subject to CCAR in 2016.43 On a historical basis, if a 0.25 percent de minimis limitation had applied during the CCAR 2015 cycle rather than a 1.00 percent limitation, $2.3 billion of distributions actually made during the CCAR 2015 period would not have been permitted without prior approval, equivalent to 0.02 percent of total risk-weighted assets of bank holding companies subject to CCAR in 2015. A smaller de minimis limitation would not prohibit these additional distributions. Instead, it would require the bank holding company to include the distributions in its next annual capital plan.

In addition, with the proposed revision to the de minimis rule, bank holding companies would still be able to seek approval to make capital distributions not included in their capital plans, consistent with section 225.8(g) of the capital plan rule. Any bank holding company making such a request must provide adequate information regarding any changes to its risk profile, financial condition, and corporate structure since the previous CCAR exercise. In many cases, the Federal Reserve expects to request additional information from bank holding companies that request approval for additional capital distributions, which will likely include revised stress test results using updated data and scenarios. One exception is where a bank holding company replaces the foregone capital with capital of equal or higher quality prior to or concurrently with the incremental distribution.

One important factor in the Board’s decision on a capital distribution request is the size and complexity of the bank holding company making the request. All else equal, a capital distribution request from a LISCC or large and complex firm would likely require stronger justification than a request from a large and noncomplex firm. For instance, a request from a LISCC or large and complex firm directly related to an unforeseeable event at the time of the last capital plan submission that has a positive expected impact on current or future capital ratios would likely require more supporting evidence (for instance, updated stress test results), than a similar request from a large and noncomplex firm. This difference reflects the Federal Reserve’s elevated expectations for capital planning at LISCC and large and complex firms, where any revision to a firm’s capital plan to increase capital distributions following the CCAR qualitative assessment requires strong evidence and support.

B. Blackout Period for the de minimis Exception and Requests for Approval To Make Additional Distributions Not Included in a Bank Holding Company’s Capital Plan

In addition to proposing a change in the allowable size of the de minimis exception, the proposal would establish a one-quarter “blackout period” while the Board is conducting CCAR (the second quarter of a calendar year) during which bank holding companies would not be able to submit a notice to use the de minimis exception or submit a request for prior approval for additional capital distributions that do not qualify for the de minimis exception. In the absence of this modification, the Federal Reserve’s analysis in CCAR may not in all cases represent a comprehensive evaluation of the bank holding company’s capital adequacy and the appropriateness of the bank holding company’s planned capital actions in CCAR. Under the proposal, a bank holding company seeking to make capital distributions in the second quarter in excess of the amount described in the capital plan for which a non-objection was issued pursuant to the de minimis exception or prior approval process, when the CCAR exercise is underway, would be required to submit a notice to use the de minimis exception by March 15 or submit a request for prior approval for incremental capital distributions that do not qualify for the de minimis exception by March 1 and reflect the additional distributions in its capital plan. The proposed blackout periods are expected to be effective for CCAR 2017.

C. Revisions to the Time Period From Which the Market Shock “as-of” Date May Be Selected

Under the Board’s stress test rules, the Board may require a bank holding company with significant trading activity to include a trading and counterparty component (“global market shock”) in its adverse and severely adverse scenarios for its company-run stress tests. Currently, the Board must select a date between January 1 and March 1 of the calendar year of the stress test cycle. However, in order to provide bank holding companies with as much time as possible to conduct their company-run stress tests and prepare their capital plans, the Board has typically specified the as-of date for the global market shock as early as possible in January. As such, the Board has a narrow window to select the as-of date for the market shock, effectively sometime very early in January. The narrow window creates the possibility for bank holding companies to artificially reduce the risk of their portfolios around the time of the market shock date. In addition, limiting the as-of date for the market shock to the first weeks of the calendar year does not account for seasonality in trading activity—for example, trading activity typically slows towards the end of the calendar year and gradually picks up in the new calendar year.

The proposal would allow the Board to select any date between October 1 of the prior year and March 1 of the year of the stress test cycle for the as-of date of the global market shock. Bank holding companies subject to the trading and counterparty component would be notified within two weeks of the selected as-of date for the global market shock, to enable the bank holding company to preserve trading and counterparty exposure data from the as-of date. This change would help ensure that the stress tests capture representative trading exposure for bank holding companies with significant trading activity, for example, by avoiding effects caused by unusual trading conditions around year-end. Moreover, the change would provide additional time for both bank holding companies and supervisors to implement the global market shock scenario in a well-controlled manner.

Under the proposal, this change would take effect for the 2018 stress test cycle.

In 2014, the Federal Reserve adjusted the capital planning and stress test cycles from an October 1 as-of date to a January 1 as-of date. The capital plan and stress test rules currently include several provisions reflecting the previous October 1 as-of date, as well as obsolete transition provisions for foreign banking organizations that previously relied on SR Letter 01–01.44 And for the application of the supplementary leverage ratio. The proposal would remove these provisions, as they are no longer operative.

IV. Administrative Law Matters

A. Paperwork Reduction Act

In accordance with section 3512 of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA), the Board
may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control numbers are 7100–0128, 7100–0341, and 7100–0342 for this information collection. The Board reviewed the proposed rule under the authority delegated to the Board by OMB.

The proposed rule contains requirements subject to the PRA. The reporting requirements are found in sections 12 CFR 225.8. Comments are invited on:

a. Whether the collections of information are necessary for the proper performance of the Federal Reserve’s functions, including whether the information has practical utility;

b. The accuracy or the estimate of the burden of the information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

All comment will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to: Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551. A copy of the comments may also be submitted to the OMB desk officer by mail to U.S. Office of Management and Budget, 725 17th Street NW., #10235, Washington, DC 20503 or by facsimile to 202–395–5806, Attention, Agency Desk Officer.

Proposed Revisions, With Extension for Three Years, of the Following Information Collections:

(1) Title of Information Collection: Parent Company Only Financial Statements for Large Holding Companies.

Agency Form Number: FR Y–9C; FR Y–9LP; FR Y–9SP; FR Y–9ES; FR Y–9CS.

OMB Control Number: 7100–0128.

Frequency of Response: Quarterly, semi-annually, and annually.

Affected Public: Businesses or other for-profit.

Respondents: Bank holding companies (BHCs), savings and loan holding companies (SLHCs), securities holding companies (SHCs), and U.S. intermediate holding companies (IHCs), (collectively, “holding companies”).

Abstract: The FR Y–9LP serves as standardized financial statements for large parent holding companies. The FR Y–9 family of reporting forms continues to be the primary source of financial data on holding companies that examiners rely on in the intervals between on-site inspections. Financial data from these reporting forms are used to detect emerging financial problems, to review performance and conduct pre-inspection analysis, to monitor and evaluate capital adequacy, to evaluate holding company mergers and acquisitions, and to analyze a holding company’s overall financial condition to ensure the safety and soundness of its operations.

Current Actions: The proposed rule would amend the FR Y–9LP to include new line item 17 of FC–B Memoranda (Total nonbank assets of a holding company subject to the Federal Reserve Board’s capital plan rule) for purposes of identifying large and noncomplex firms subject to the capital plan rule. Under the proposal, a top-tier holding company that is subject to the Board’s capital plan rule would be required to report on the FR Y–9LP the average dollar amount for the calendar quarter (as calculated on either a daily, weekly, or monthly basis during the calendar quarter) of its total nonbank assets of consolidated nonbank subsidiaries, whether held directly or indirectly or held through lower-tier holding companies, and its direct investments in unconsolidated nonbank subsidiaries, associated nonbank companies, and those nonbank corporate joint ventures over which the bank holding company exercises significant influence (collectively, “nonbank companies”).

As noted in section II.C.2 of this preamble, the Board seeks comment as to whether a daily, weekly, or monthly average would be most appropriate for this calculation. This proposed amendment would be effective as of March 31, 2017.

For purposes of the FR Y–9LP, (i) a subsidiary is a company in which the reporting bank holding company directly or indirectly owns more than 50 percent of the outstanding voting stock; (ii) an associated company is a corporation in which the reporting bank holding company, directly or indirectly, owns 20 to 50 percent of the outstanding voting stock and over which the reporting bank holding company exercises significant influence; and (iii) a corporate joint venture is a corporation owned and operated by a group of companies, no one of which has a majority interest, as a separate and specific business or project for the mutual benefit of that group of companies.

Nonbank companies, for purposes of this measure, would exclude (i) all national banks, state member banks, state nonmember insured banks (including insured industrial banks), federal savings associations, federal savings banks, thrift institutions (collectively for purposes of this proposed item 17, “depository institutions”) and (ii) except for an Edge or Agreement Corporation designated as “Nonbanking” in the box on the front page of the Consolidated Report of Condition and Income for Edge and Agreement Corporations (FR 2886b), any subsidiary of a depository institution (for purposes of this proposed item 17, “depository institution subsidiary”).

All intercompany assets and operating revenue among the nonbank companies should be eliminated, but assets and operating revenue with the reporting holding company; any depository institution; any depository institution subsidiary; and for a reporting holding company that is a subsidiary of a foreign banking organization, any branch or agency of the foreign banking organization or any non-U.S. subsidiary, non-U.S. associated company, or non-U.S. corporate joint venture of the foreign banking organization that is not held through the reporting holding company, should be included. For example, eliminate the loans made by one nonbank company to a second nonbank company, but do not eliminate loans made by one nonbank company to the parent holding company; depository institution; depository institution subsidiary; or for a reporting holding company that is a subsidiary of a foreign banking organization, any branch or agency of the foreign banking organization or any non-U.S. subsidiary, non-U.S. associated company, or non-U.S. corporate joint venture of the foreign banking organization that is not held through the reporting holding company.

While the FR Y–9LP collects another measure of nonbank assets (line item 15 of FC–B Memoranda (Total combined nonbank assets of nonbank subsidiaries)), the proposed nonbank assets measure differs in several important ways. Specifically, proposed line item 17 excludes assets of an insured industrial bank, federal savings association, federal savings bank, or thrift institution and includes assets of an Edge or Agreement Corporation designated as “Nonbanking” in the box on the front page of the Consolidated Report of Condition and Income for Edge and Agreement Corporations (FR 2886b). It also includes the value of an investment in an unconsolidated
nonbank company that is held directly by the holding company. While these elements may be sourced from other reporting forms, the new line item is necessary to reflect the elimination of intercompany transactions among these nonbank companies, as described above.

**Number of Respondents:** Proposed revision would apply to top-tier holding companies subject to the Board’s capital plan rule (BHCs and IHCs with total consolidated assets of $50 billion or more), for a total of 38 of the existing 792 FR Y–9LP respondents. FR Y–9C (non-Advanced Approaches holding companies or other respondents): 654; FR Y–9C (Advanced Approaches holding companies or other respondents): 13; FR Y–9SP: 4,122; FR Y–9ES: 88; FR Y–9CS: 236.

**Estimated Average Hours per Response:** FR Y–9C (non-Advanced Approaches holding companies or other respondents): 50.17 hours; FR Y–9C (Advanced Approaches holding companies or other respondents): 52.42 hours; FR Y–9LP: 5.25 hours; FR Y–9SP: 5.4 hours; FR Y–9ES: 0.5 hours; FR Y–9CS: 0.5 hours.

**Current Estimated Annual Burden Hours:** FR Y–9C (non-Advanced Approaches holding companies or other respondents): 131,245 hours; FR Y–9C (Advanced Approaches holding companies or other respondents): 2,674 hours; FR Y–9LP: 16,632 hours; FR Y–9SP: 44,518; FR Y–9ES: 44; FR Y–9CS: 472.

**Proposed Revisions only change in Estimated Annual Burden Hours:** FR Y–9LP: 76 hours (0.5 hours per quarter for the 38 impacted FR Y–9LP respondents). Proposed Total Estimated Annual Burden Hours: FR Y–9C (non-Advanced Approaches holding companies or other respondents): 131,245 hours; FR Y–9C (Advanced Approaches holding companies or other respondents): 2,674 hours; FR Y–9LP: 16,651 hours; FR Y–9SP: 44,518; FR Y–9ES: 44; FR Y–9CS: 472.

(2) **Title of Information Collection:** Capital Assessments and Stress Testing information collection.

**Agency Form Number:** FR Y–14A/Q/M.

**OMB Control Number:** 7100–0341.

**Frequency of Response:** Annually, semi-annually, quarterly, and monthly.

**Affected Public:** Businesses or other for-profit.

**Respondents:** The respondent panel consists of any top-tier bank holding company (BHC) or intermediate holding company (IHC) that has $50 billion or more in total consolidated assets, as determined based on: (i) The average of the firm’s total consolidated assets in the four most recent quarters as reported quarterly on the firm’s Consolidated Financial Statements for Bank Holding Companies (FR Y–9C) (OMB No. 7100–0128); or (ii) the average of the firm’s total consolidated assets in the most recent consecutive quarters as reported quarterly on the firm’s FR Y–9Cs, if the firm has not filed an FR Y–9C for each of the most recent four quarters.

Reporting is required as of the first day of the quarter immediately following the quarter in which it meets this asset threshold, unless otherwise directed by the Board.

**Abstract:** The data collected through the FR Y–14A/Q/M schedules provide the Board with the additional information and perspective needed to help ensure that large BHCs and IHCs have strong risk measurement and management processes supporting their internal assessments of capital adequacy and that their capital resources are sufficient given their business focus, activities, and resulting risk exposures. The annual CCAR exercise is complemented by other Board supervisory efforts aimed at enhancing the continued viability of large firms, including continuous monitoring of firms’ planning and management of liquidity and funding resources and regular assessments of credit, market and operational risks, and associated risk management practices. Information gathered in this data collection is also used in the supervision and regulation of these financial institutions. In order to fully evaluate the data submissions, the Board may conduct follow-up discussions with or request responses to follow up questions from respondents, as needed.

The Capital Assessments and Stress Testing information collection consists of the FR Y–14A, Q, and M reports. The semi-annual FR Y–14A collects quantitative projections of balance sheet, income, losses, and capital across a range of macroeconomic scenarios and qualitative information on methodologies used to develop internal projections of capital across scenarios. The quarterly FR Y–14Q collects granular data on various asset classes, including loans, securities, and trading assets, and pre-provision net revenue (PPNR) for the reporting period. The monthly FR Y–14M comprises three retail portfolio- and loan-level collections, and one detailed address matching collection to supplement two of the portfolio and loan-level collections.

Current Actions: The Capital Assessments and Stress Testing Report (FR Y–14 series of reports; OMB No. 7100–0341) collects data used to support supervisory stress testing models and continuous monitoring efforts for bank holding companies with total consolidated assets of $50 billion or more. The FR Y–14 consists of three reports, the semi-annual FR Y–14A, the quarterly FR Y–14Q, and monthly FR Y–14M. Each report contains multiple schedules, several of which are reported only by bank holding companies that meet specified materiality thresholds. In discussions on CCAR, several large and noncomplex firms recommended that the Board revise the FR Y–14 series of reports to reduce the reporting burden on these firms. For instance, these large and noncomplex firms suggested that the Board raise the materiality threshold for the FR Y–14 reports and reduce the detail required in the supporting documentation requirements. The proposal would reduce burdens associated with reporting the FR Y–14 schedules for large and noncomplex firms by raising the materiality threshold, reducing supporting documentation requirements, removing several sub-schedules from the FR Y–14A Summary Schedule, and using the median loss rate for immaterial portfolios.

The proposal would increase the materiality thresholds for filing schedules on the FR Y–14Q report and the FR Y–14M report for large and noncomplex firms. The FR Y–14 instructions currently define material portfolios as those with asset balances greater than $5 billion or asset balances greater than five percent of tier 1 capital, both measured as an average for the four quarters preceding the reporting quarter.47 The proposal would revise the FR Y–14’s definition of a “material portfolio” for large and noncomplex firms to mean a portfolio with asset balances greater than either (1) $5 billion or (2) 10 percent of tier 1 capital on average for the four quarters preceding the reporting quarter.48 As a result of this change, respondents would be able to exclude certain portfolios from reporting and in some cases may

---

47 Respondents have the option to complete the data schedules for immaterial portfolios.

48 The four quarter average percent of tier 1 capital is calculated as the sum of the firm’s preceding four quarters of balances subject to the particular materiality threshold divided by the sum of the firm’s proceeding four quarters of tier 1 capital.
not be required to report certain schedules at all.

In addition, the proposal would reduce the supporting documentation a large and noncomplex firm would be required to submit with its capital plan. Appendix A of the FR Y–14A report outlines qualitative information that a bank holding company should submit in support of its projections, including descriptions of the methodologies used to develop the internal projections of capital across scenarios and other analyses that support the bank holding company’s comprehensive capital plans. The proposal would revise the instructions to Appendix A of the FR Y–14A to remove the requirement that a large and noncomplex firm include in its capital plan submission certain documentation regarding its models, including any model inventory mapping document, methodology documentation, model technical documents, and model validation documentation. Large and noncomplex firms would still be required to be able to produce these materials upon request by the Federal Reserve, and all or a subset of these firms may be required to provide this documentation depending on the focus of the supervisory review of large and noncomplex firm capital plans.

Removing the requirement that a large and noncomplex firm submit this information in connection with its capital plan should reduce the resources needed to prepare the plan for submission and alleviate concerns of an adverse supervisory finding that a capital plan is incomplete based on the failure to provide documentation.

Under the proposal, large and noncomplex firms would no longer be required to submit several elements of the FR Y–14A Schedule A (Summary), including the Securities OTTI methodology sub-schedule, Securities Market Value source sub-schedule, Securities OTTI by security sub-schedule, the Retail repurchase sub-schedule, the Trading sub-schedule, Counterparty sub-schedule, and Advanced RWA sub-schedule. The revised instructions for the FR Y–14A Summary schedule reporting form are available on the Board’s public Web site. Removing these elements should reduce burdens associated with collecting and validating this data, responding to follow-up inquiries, and implementing and maintaining technical systems. Under the proposal, a large and noncomplex firm may adopt these changes for the FR Y–14A report as of December 31, 2016, or as of June 30, 2017. The Federal Reserve continues to review the details required to be reported in the FR Y–14 series of reports, and may propose additional changes in the future to further reduce burdens associated with these reporting requirements.

These changes are expected to decrease burden for the information collection by 56,454 hours. This includes a decrease in the average hours per response for the FR Y–14A due to the elimination of the requirement for large and noncomplex firms to file four Summary sub-schedules and a reduction in the supporting documentation requirements, resulting in a decrease of 6,346 hours. The modification to the materiality threshold for the FR Y–14Q and FR Y–14M reports would be anticipated to reduce the number of firms filing certain schedules on the FR Y–14Q and FR Y–14M reports. Specifically, this would result in a decrease of 1,088 hours on the FR Y–14Q report and 49,020 hours for the FR Y–14M report.

Number of Respondents: 38.

Estimated Average Hours per Response: FR Y–14A: Summary, 987 hours; Macro scenario, 31 hours; Operational Risk, 12 hours; Regulatory capital transitions, 23 hours; Regulatory capital instruments, 20 hours; Retail repurchase, 20 hours; and Business plan changes, 10 hours. FR Y–14Q: Securities risk, 13 hours; Retail risk, 16 hours; PPNR, 711 hours; Wholesale, 152 hours; Trading, 1,926 hours; Regulatory capital transitions, 23 hours; Regulatory capital instruments, 52 hours; Operational risk, 50 hours; MSR Valuation, 24 hours; Supplemental, 4 hours; Retail FVO/HFS, 16 hours; CCR, 508 hours; and Balances, 16 hours. FR Y–14M: 1st lien mortgage, 515 hours; Home equity, 515 hours; and Credit card, 510 hours. FR Y–14 On-Going Attestation: Implementation, 4,800 hours; and on-going revisions, 2,560 hours.

Current Estimated Annual Burden Hours: FR Y–14A: Summary, 75,012 hours; Macro scenario, 2,356 hours; Operational Risk, 456 hours; Regulatory capital transitions, 874 hours; Regulatory capital instruments, 760 hours; Retail repurchase, 1,520 hours; and Business plan changes, 380 hours. FR Y–14Q: Securities risk, 2,432 hours; Retail risk, 1,976 hours; Pre-provision net revenue (PPNR), 108,072 hours; Wholesale, 22,952 hours; Trading, 46,224 hours; Regulatory capital transitions, 3,496 hours; and Credit card, 7,904 hours; Operational risk, 7,600 hours; Mortgage Servicing Rights (MSR) Valuation, 1,632 hours; Supplemental, 608 hours; and Retail Fair Value Option/Held for Sale (Retail FVO/HFS), 1,728 hours; Counterparty, 12,192 hours; and Balances, 2,432 hours. FR Y–14M: 1st lien mortgage, 228,660 hours; Home equity, 197,760 hours; and Credit card, 153,000 hours. FR Y–14 On-going automation revisions, 18,720 hours; and implementation, 0 hours. FR Y–14 Attestation: Implementation, 0 hours; and on-going revisions, 23,040 hours.

Proposed Total Estimated Annual Burden Hours: FR Y–14A: Summary, 68,780 hours; Macro scenario, 2,356 hours; Operational Risk, 456 hours; Regulatory capital transitions, 760 hours; Regulatory capital instruments, 760 hours; Retail repurchase, 1,520 hours; Retail risk, 1,824 hours; Pre-provision net revenue (PPNR), 108,072 hours; Wholesale, 22,952 hours; Trading, 46,224 hours; Regulatory capital transitions, 3,496 hours; Regulatory capital instruments, 7,904 hours; Operational risk, 7,600 hours; Mortgage Servicing Rights (MSR) Valuation, 1,288 hours; Supplemental, 608 hours; and Retail Fair Value Option/Held for Sale (Retail FVO/HFS), 1,440 hours; Counterparty, 12,192 hours; and Balances, 2,432 hours. FR Y–14M: 1st lien mortgage, 228,660 hours; Home equity, 191,580 hours; and Credit card, 110,160 hours. FR Y–14 On-going automation revisions, 18,720 hours; and implementation, 0 hours. FR Y–14 Attestation: Implementation, 0 hours; and on-going revisions, 23,040 hours.

Respondents: BHCs and IHCs. Abstract: Regulation Y (12 CFR part 225) requires large bank holding companies (BHCs) to submit capital plans to the Federal Reserve on an annual basis and to require such BHCs to request prior approval from the Federal Reserve under certain circumstances before making a capital distribution. Current Actions: The proposed rule contains requirements subject to the
PRA. The collection of information revised by this final rule is found in section 225.8 of Regulation Y (12 CFR part 225). Under section 225.8(f)(2) of the proposal, large and noncomplex firms would no longer be subject to the provisions of the Board’s capital plan rule whereby the Board can object to a capital plan on the basis of qualitative deficiencies in the firm’s capital planning process. In feedback meetings that the Board held on CCAR, participants from large and noncomplex firms expressed the view that the provision of the rule permitting the Board to object to a capital plan on the basis of qualitative deficiencies, in their view, required a large and noncomplex firm to develop a large amount of documentation and stress test models to the same degree as the largest firms in order to avoid risk of a public objection to its capital plan. Accordingly, this revision to section 225.8(f)(2) is expected to reduce the recordkeeping requirements for large and noncomplex firms by approximately 25 percent, or 3,000 hours for large and noncomplex firms.

The proposed rule defines a large and noncomplex bank holding company as a bank holding company with average total consolidated assets of $50 billion or more but less than $250 billion, consolidated total on-balance sheet foreign exposure of less than $10 billion, and average total nonbank assets of less than $75 billion. While the total consolidated assets and on-balance sheet foreign exposure measures are calculated for purposes of other regulatory requirements, the proposed average total nonbank assets threshold is not otherwise calculated for purposes of a regulatory requirement.

For the first calculation date (December 31, 2016), firms will be required to calculate nonbank assets by aggregating items reported on other reporting forms. Specifically, nonbank assets would be calculated as (A) total combined nonbank assets of nonbank subsidiaries, as reported on line 15a of Schedule PC-B of the Parent Company Only Financial Statements for Large Holding Companies (FR Y–9LP) as of December 31, 2016; plus (B) the total amount of equity investments in nonbank subsidiaries and associated companies as reported on line 2a of Schedule PC–A of the FR Y–9LP as of December 31, 2016; plus (C) assets of each Edge and Agreement Corporation, as reported on the Consolidated Report of Condition and Income for Edge and Agreement Corporations (FR 2886b) as of December 31, 2016, to the extent such corporation is designated as “Nonbanking” in the box on the front page of the FR 2886b; minus (D) assets of a federal savings association, federal savings bank, or thrift subsidiary, as reported on the Report of Condition and Income (Call Report) as of December 31, 2016. Performing this calculation is expected to require 1 hour per firm.

As noted above, for calculation dates following the initial calculation date, the Federal Reserve is adding a new line item to the FR Y–9LP (Parent Company Only Financial Statements for Large Holding Companies) to collect average total nonbank assets; however, for the December 31, 2016 calculation date, a firm will be required to calculate the line item based on existing line items. The burden associated with this line item will be reflected in that collection.

Number of Respondents: 38.

Estimated Average Hours per Response:

- Annual capital planning recordkeeping (225.8(e)(1)(i)), 11,920 hours; annual capital planning reporting (225.8(e)(1)(ii)), 80 hours; annual capital planning recordkeeping (225.8(e)(1)(ii)), 100 hours; data collections reporting (225.8(e)(3)(i)–(vi)), 1,005 hours; data collections reporting (225.8(e)(4)), 100 hours; review of capital plans by the Federal Reserve reporting (225.8(f)(3)(i)), 16 hours; prior approval request requirements reporting (225.8(g)(1), (3), & (4)), 100 hours; prior approval request requirements exceptions (225.8(g)(3)(i)(iii)(A)), 16 hours; prior approval request requirements reports (225.8(g)(6)), 16 hours.

- Current Estimated Annual Burden Hours: Annual capital planning recordkeeping (225.8(e)(1)(i)), 452,960 hours; annual capital planning reporting (225.8(e)(1)(ii)), 2,240 hours; annual capital planning recordkeeping (225.8(e)(1)(ii)), 2,800 hours; data collections reporting (225.8(e)(3)(i)–(vi)), 38,190 hours; data collections reporting (225.8(e)(4)), 1,000 hours; review of capital plans by the Federal Reserve reporting (225.8(f)(3)(i)), 32 hours; prior approval request requirements reporting (225.8(g)(1), (3), & (4)), 2,600 hours; prior approval request requirements exceptions (225.8(g)(3)(i)(iii)(A)), 32 hours; prior approval request requirements reports (225.8(g)(6)), 32 hours.

Proposed Revisions Only Change in Estimated Average Hours per Response:

- For large and noncomplex firms: Annual capital planning recordkeeping (225.8(e)(1)(i)), 9,820 hours.

Proposed Revisions Only Change in Estimated Annual Burden Hours:

- Annual capital planning reporting (225.8(e)(1)(ii)), 50,000 hours.

Proposed Total Estimated Annual Burden Hours: Annual capital planning recordkeeping (225.8(e)(1)(i)) (LISCC and large and complex firms), 238,400 hours; Annual capital planning recordkeeping (225.8(e)(1)(i)) (large and noncomplex firms), 160,560 hours; annual capital planning reporting (225.8(e)(1)(i)), 2,240 hours; annual capital planning recordkeeping (225.8(e)(1)(iii)), 2,800 hours; data collections reporting (225.8(e)(3)(i)–(vi)), 38,190 hours; data collections reporting (225.8(e)(4)), 1,000 hours; review of capital plans by the Federal Reserve reporting (225.8(f)(3)(i)), 32 hours; prior approval request requirements reporting (225.8(g)(1), (3), & (4)), 2,600 hours; prior approval request requirements exceptions (225.8(g)(3)(i)(iii)(A)), 32 hours; prior approval request requirements reports (225.8(g)(6)), 32 hours.

B. Regulatory Flexibility Act

The Board is providing an initial regulatory flexibility analysis with respect to this proposed rule. The Regulatory Flexibility Act, 5 U.S.C. 601 et seq., generally requires that an agency prepare and make available an initial regulatory flexibility analysis in connection with a notice of proposed rulemaking.

Under regulations issued by the Small Business Administration (“SBA”), a small entity includes a depository institution, bank holding company, or savings and loan holding company with total assets of $550 million or less (a small banking organization). As of June 30, 2016, there were approximately 594 small state member banks, 3,203 small bank holding companies and 162 small savings and loan holding companies. The proposed rule would apply only to bank holding companies with total consolidated asset of $50 billion or more. Companies that would be subject to the proposed rule therefore substantially exceed the $550 million total asset threshold at which a company is considered a small company under SBA regulations. Therefore, there are no significant alternatives to the proposed rule that would have less economic impact on small banking organizations. As discussed above, the projected reporting, recordkeeping, and other compliance requirements of the rule are expected to be small. The Board does not believe that the rule duplicates, overlaps, or conflicts with any other Federal rules. In light of the foregoing, the Board does not believe that the final rule would have a significant economic

50 See 13 CFR 121.201. Effective July 14, 2014, the Small Business Administration revised the size standards for banking organizations to $550 million in assets from $500 million in assets. 79 FR 33647 (June 12, 2014).
impact on a substantial number of small entities.

The Board welcomes comment on all aspects of its analysis. A final regulatory flexibility analysis will be conducted after consideration of comments received during the public comment period.

C. Solicitation of Comments of Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act (Pub. L. 106–102, 113 Stat. 1338, 1471, 12 U.S.C. 4809) requires the federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000. The Board has sought to present the proposed rule in a simple and straightforward manner, and invites comment on the use of plain language.

For example:

- Have we organized the material to suit your needs? If not, how could the rule be more clearly stated?
- Are the requirements in the rule clearly stated? If not, how could the rule be more clearly stated?
- Do the regulations contain technical language or jargon that is not clear? If so, which language requires clarification?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the regulation easier to understand? If so, what changes would make the regulation easier to understand?
- Would more, but shorter, sections be better? If so, which sections should be changed?
- What else could we do to make the regulation easier to understand?

Administrative practice and procedure, Banks, Banking, Capital planning, Federal Reserve System, Holding companies, Reporting and recordkeeping requirements, Securities, Stress testing.

Authority and Issuance

For the reasons stated in the SUPPLEMENTARY INFORMATION, the Board of Governors of the Federal Reserve System proposes to amend 12 CFR chapter II as follows:

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

1. The authority citation for part 225 continues to read as follows:

Subpart A—General Provisions

2. Section 225.8 is revised to read as follows:

§225.8 Capital planning.

(a) Purpose. This section establishes capital planning and prior notice and approval requirements for capital distributions by certain bank holding companies.

(b) Scope and reservation of authority—(1) Applicability. Except as provided in paragraph (c) of this section, this section applies to:

(i) Any top-tier bank holding company domiciled in the United States with average total consolidated assets of $50 billion or more ($50 billion asset threshold);

(ii) Any other bank holding company domiciled in the United States that is made subject to this section, in whole or in part, by order of the Board;

(iii) Any U.S. intermediate holding company subject to this section pursuant to 12 CFR 252.153; and

(iv) Any nonbank financial company supervised by the Board that is made subject to this section pursuant to a rule or order of the Board.

(2) Average total consolidated assets. For purposes of this section, average total consolidated assets means the average of the total consolidated assets as reported by a bank holding company on its Consolidated Financial Statements for Bank Holding Companies (FR Y–9C) for the most recent four consecutive quarters. If the bank holding company has not filed the FR Y–9C for each of the four most recent consecutive quarters, average total consolidated assets means the average of the company’s total consolidated assets, as reported on the company’s FR Y–9C, for the most recent quarter or consecutive quarters, as applicable.

Average total consolidated assets are measured on the as-of date of the most recent FR Y–9C used in the calculation of the average.

(3) Ongoing applicability. A bank holding company (including any successor bank holding company) that is subject to any requirement in this section shall remain subject to such requirements unless and until its total consolidated assets fall below $50 billion for each of four consecutive quarters, as reported on the FR Y–9C and effective on the as-of date of the fourth consecutive FR Y–9C.

(4) Reservation of authority. Nothing in this section shall limit the authority of the Federal Reserve to issue a capital directive or take any other supervisory or enforcement action, including an action to address unsafe or unsound practices or conditions or violations of law.

(5) Rule of construction. Unless the context otherwise requires, any reference to bank holding company in this section shall include a U.S. intermediate holding company and shall include a nonbank financial company supervised by the Board to the extent this section is made applicable pursuant to a rule or order of the Board.

(c) Transitional arrangements. (1) Transition periods for certain bank holding companies. (i) A bank holding company that meets the $50 billion asset threshold (as measured under paragraph (b) of this section) on or before September 30 of a calendar year must comply with the requirements of this section beginning on January 1 of the next calendar year, unless that time is extended by the Board in writing.

(ii) A bank holding company that meets the $50 billion asset threshold after September 30 of a calendar year must comply with the requirements of this section beginning on January 1 of the second calendar year after the bank holding company meets the $50 billion asset threshold, unless that time is extended by the Board in writing.

(iii) The Board or the appropriate Reserve Bank with the concurrence of the Board, may require a bank holding company described in paragraph (c)(1)(i) or (ii) of this section to comply with any or all of the requirements in paragraphs (e)(1), (e)(3), (f), or (g) of this section if the Board or appropriate Reserve Bank with the concurrence of the Board, determines that the requirement is appropriate on a different date based on the company’s risk profile, scope of operation, or financial condition and provides prior notice to the company of the determination.

(2) Transition periods for subsidiaries of certain foreign banking organizations. (i) U.S. intermediate holding companies. (A) A U.S. intermediate holding company required to be established or designated pursuant to 12 CFR 252.153 on or before September 30 of a calendar year must comply with the requirements of this section beginning on January 1 of the next calendar year, unless that time is extended by the Board in writing.
(B) A U.S. intermediate holding company required to be established or designated pursuant to 12 CFR 252.153 after September 30 of a calendar year must comply with the requirements of this section beginning on January 1 of the second calendar year after the U.S. intermediate holding company is required to be established, unless that time is extended by the Board in writing.

(C) The Board or the appropriate Reserve Bank with the concurrence of the Board, may require a U.S. intermediate holding company described in paragraph (c)(2)(i)(A) or (B) of this section to comply with any or all of the requirements in paragraphs (e)(1), (e)(3), (f), or (g) of this section if the Board or appropriate Reserve Bank with concurrence of the Board, determines that the requirement is appropriate on a different date based on the company’s risk profile, scope of operation, or financial condition and provides prior notice to the company of the determination.

(ii) Bank holding company subsidiaries of U.S. intermediate holding companies required to be established by July 1, 2016. (A) Notwithstanding any other requirement in this section, a bank holding company that is a subsidiary of a U.S. intermediate holding company (or, with the mutual consent of the company and Board, another bank holding company domiciled in the United States) shall remain subject to paragraph (e) of this section until December 31, 2017, and shall remain subject to the requirements of paragraphs (f) and (g) of this section until the Board issues an objection or non-objection to the capital plan of the relevant U.S. intermediate holding company.

(B) After the time periods set forth in paragraph (c)(2)(i)(A) of this section, this section will cease to apply to a bank holding company that is a subsidiary of a U.S. intermediate holding company, unless otherwise determined by the Board in writing.

(d) Definitions. For purposes of this section, the following definitions apply:

(1) Advanced approaches means the risk-weighted assets calculation methodologies at 12 CFR part 217, subpart E, as applicable, and any successor regulation.

(2) Average total nonbank assets means:

(i) For purposes of the capital plan cycle beginning January 1, 2017:

(A) Total combined nonbank assets of nonbank subsidiaries, as reported on line 15a of Schedule PC–B of the Parent Company Only Financial Statements for Large Holding Companies (FR Y–9LP) as of December 31, 2016; plus

(B) The total amount of equity investments in nonbank subsidiaries and associated companies as reported on line 2a of Schedule PC–A of the FR Y–9LP as of December 31, 2016 (except that any investments reflected in (A) may be eliminated); plus

(C) Assets of each Edge and Agreement Corporation, as reported on the Consolidated Report of Condition and Income for Edge and Agreement Corporations (FR 2886b) as of December 31, 2016, to the extent such corporation is designated as “Nonbanking” in the box on the front page of the FR 2886b; minus

(D) Assets of each federal savings association, federal savings bank, or thrift subsidiary, as reported on the Report of Condition and Income (Call Report) as of December 31, 2016.

(ii) For purposes of any capital plan cycles beginning on or after January 1, 2018, the average of the total nonbank assets of a holding company subject to the Federal Reserve Board’s capital plan rule, calculated in accordance with the instructions to the FR Y–9LP, for the four most recent consecutive quarters or, if the bank holding company has not filed the FR Y–9LP for each of the four most recent consecutive quarters, for the most recent quarter or consecutive quarters, as applicable.

(3) BHC stress scenario means a scenario designed by a bank holding company that stresses the specific vulnerabilities of the bank holding company’s risk profile and operations, including those related to the company’s capital adequacy and financial condition.

(4) Capital action means any issuance or redemption of a debt or equity capital instrument, any capital distribution, and any similar action that the Federal Reserve determines could impact a bank holding company’s consolidated capital.

(5) Capital distribution means a redemption or repurchase of any debt or equity capital instrument, a payment of common or preferred stock dividends, a payment that may be temporarily or permanently suspended by the issuer on any instrument that is eligible for inclusion in the numerator of any minimum regulatory capital ratio, and any similar transaction that the Federal Reserve determines to be in substance a distribution of capital.

(6) Capital plan means a written presentation of a bank holding company’s capital planning strategies and capital adequacy process that includes the mandatory elements set forth in paragraph (e)(2) of this section.

(7) Capital plan cycle means the period beginning on January 1 of a calendar year and ending on December 31 of that year.

(8) Capital policy means a bank holding company’s written assessment of the principles and guidelines used for capital planning, capital issuance, capital usage and distributions, including internal capital goals; the qualitative or quantitative guidelines for capital distributions; the strategies for addressing potential capital shortfalls; and the internal governance procedures around capital policy principles and guidelines.

(9) Large and noncomplex bank holding company means any bank holding company subject to this section that has, as of December 31 of the calendar year prior to the capital plan cycle:

(i) Average total consolidated assets of less than $250 billion;

(ii) Consolidated total on-balance sheet foreign exposure at the most recent year-end equal to less than $10 billion (where total on-balance sheet foreign exposure equals total foreign countries cross-border claims on an ultimate-risk basis, plus total foreign countries claims on local residents on an ultimate-risk basis, plus total foreign countries fair value of foreign exchange and derivative products, calculated in accordance with the Federal Financial Institutions Examination Council (FFIEC) 009 Country Exposure Report); and

(iii) Average total nonbank assets of less than $75 billion.

(10) Minimum regulatory capital ratio means any minimum regulatory capital ratio that the Federal Reserve may require of a bank holding company, by regulation or order, including the bank holding company’s tier 1 and supplementary leverage ratios as calculated under 12 CFR part 217, including the deductions required under 12 CFR 248.12, as applicable, and the bank holding company’s common equity tier 1, tier 1, and total risk-based capital ratios as calculated under 12 CFR part 217, including the deductions required under 12 CFR 248.12 and the transition provisions at 12 CFR 217.1(f)(4) and 217.300; except that the bank holding company shall not use the advanced approaches to calculate its regulatory capital ratios.

(11) Nonbank financial company supervised by the Board means a company that the Financial Stability Oversight Council has determined under section 113 of the Dodd-Frank Act (15 U.S.C. 5391) shall be supervised by the Board and for which such determination is still in effect.
(12) Planning horizon means the period of at least nine consecutive quarters, beginning with the quarter preceding the quarter in which the bank holding company submits its capital plan, over which the relevant projections extend.

(13) Tier 1 capital has the same meaning as under 12 CFR part 217.

(14) U.S. intermediate holding company means the top-tier U.S. company that is required to be established pursuant to 12 CFR 252.153.

(e) General requirements. (1) Annual capital planning. (i) A bank holding company must develop and maintain a capital plan.

(ii) A bank holding company must submit its complete capital plan to the Board and the appropriate Reserve Bank by April 5 of each calendar year, or such later date as directed by the Board or by the appropriate Reserve Bank with concurrence of the Board.

(iii) The bank holding company’s board of directors or a designated committee thereof must at least annually and prior to submission of the capital plan under paragraph (e)(1)(ii) of this section:

(A) Review the robustness of the bank holding company’s process for assessing capital adequacy,

(B) Ensure that any deficiencies in the bank holding company’s process for assessing capital adequacy are appropriately remedied; and

(C) Approve the bank holding company’s capital plan.

(2) Mandatory elements of capital plan. A capital plan must contain at least the following elements:

(i) An assessment of the expected uses and sources of capital over the planning horizon that reflects the bank holding company’s size, complexity, risk profile, and scope of operations, assuming both expected and stressful conditions, including:
   (A) Estimates of projected revenues, losses, reserves, and pro forma capital levels, including any minimum regulatory capital ratios (for example, leverage, tier 1 risk-based, and total risk-based capital ratios) and any additional capital measures deemed relevant by the bank holding company, over the planning horizon under expected conditions and under a range of scenarios, including any scenarios provided by the Federal Reserve and at least one BHC stress scenario;
   (B) A discussion of the results of any stress test required by law or regulation, and an explanation of how the capital plan takes these results into account; and
   (C) A description of all planned capital actions over the planning horizon.

(ii) A detailed description of the bank holding company’s process for assessing capital adequacy, including:

(A) A discussion of how the bank holding company will, under expected and stressful conditions, maintain capital commensurate with its risks, maintain capital above the minimum regulatory capital ratios, and serve as a source of strength to its subsidiary depository institutions;

(B) A discussion of how the bank holding company will, under expected and stressful conditions, maintain sufficient capital to continue its operations by maintaining ready access to funding, meeting its obligations to creditors and other counterparties, and continuing to serve as a credit intermediary;

(iii) The bank holding company’s capital policy; and

(iv) A discussion of any expected changes to the bank holding company’s business plan that are likely to have a material impact on the bank holding company’s capital adequacy or liquidity.

(3) Data collection. Upon the request of the Board or appropriate Reserve Bank, the bank holding company shall provide the Federal Reserve with information regarding:

(i) The bank holding company’s financial condition, including its capital;

(ii) The bank holding company’s structure;

(iii) Amount and risk characteristics of the bank holding company’s on- and off-balance sheet exposures, including exposures within the bank holding company’s trading account, other trading-related exposures (such as counterparty-credit risk exposures) or other items sensitive to changes in market factors, including, as appropriate, information about the sensitivity of positions to changes in market rates and prices;

(iv) The bank holding company’s relevant policies and procedures, including risk management policies and procedures;

(v) The bank holding company’s liquidity profile and management;

(vi) The loss, revenue, and expense estimation models used by the bank holding company for stress scenario analysis, including supporting documentation regarding each model’s development and validation; and

(vii) Any other relevant qualitative or quantitative information requested by the Board or by the appropriate Reserve Bank to facilitate review of the bank holding company’s capital plan under this section.

(4) Re-submission of a capital plan. (i) A bank holding company must update and re-submit its capital plan to the appropriate Reserve Bank within 30 calendar days of the occurrence of one of the following events:

(A) The bank holding company determines there has been or will be a material change in the bank holding company’s risk profile, financial condition, or corporate structure since the bank holding company last submitted the capital plan to the Board and the appropriate Reserve Bank under this section; or

(B) The Board or the appropriate Reserve Bank with concurrence of the Board, directs the bank holding company in writing to revise and resubmit its capital plan for any of the following reasons:

(1) The capital plan is incomplete or the capital plan, or the bank holding company’s internal capital adequacy process, contains material weaknesses;

(2) There has been, or will likely be, a material change in the bank holding company’s risk profile (including a material change in its business strategy or any risk exposure), financial condition, or corporate structure;

(3) The BHC stress scenario(s) are not appropriate for the bank holding company’s business model and portfolios, or changes in financial markets or the macro-economic outlook that could have a material impact on a bank holding company’s risk profile and financial condition, or require the use of updated scenarios; or

(4) The capital plan or the condition of the bank holding company raise any of the issues described in paragraph (f)(2)(ii) of this section.

(ii) A bank holding company may resubmit its capital plan to the Federal Reserve if the Board or the appropriate Reserve Bank objects to the capital plan.

(iii) The Board or the appropriate Reserve Bank with concurrence of the Board, may extend the 30-day period in paragraph (e)(4) of this section for up to an additional 60 calendar days, or such longer period as the Board or the appropriate Reserve Bank, with concurrence of the Board, determines, in its discretion, appropriate.

(iv) Any updated capital plan must satisfy all the requirements of this section; however, a bank holding company may continue to rely on information submitted as part of a previously submitted capital plan to the extent that the information remains accurate and appropriate.

(5) Confidential treatment of information submitted. The
confidentiality of information submitted to the Board under this section and related materials shall be determined in accordance with applicable exemptions under the Freedom of Information Act (5 U.S.C. 552(b)) and the Board’s Rules Regarding Availability of Information (12 CFR part 261).

(f) Review of capital plans by the Federal Reserve: publication of summary results. (1) Considerations and inputs. (i) The Board or the appropriate Reserve Bank with concurrence of the Board, will consider the following factors in reviewing a bank holding company’s capital plan:
(A) The comprehensiveness of the capital plan, including the extent to which the analysis underlying the capital plan captures and addresses potential risks stemming from activities across the firm and the company’s capital policy;
(B) The reasonableness of the bank holding company’s capital plan, the assumptions and analysis underlying the capital plan, and the robustness of its capital adequacy process; and
(C) The bank holding company’s ability to maintain capital above each minimum regulatory capital ratio on a pro forma basis under expected and stressful conditions throughout the planning horizon, including but not limited to any scenarios required under paragraphs (e)(2)(i)(A) and (e)(2)(ii) of this section.
(ii) The Board or the appropriate Reserve Bank with concurrence of the Board, will also consider the following information in reviewing a bank holding company’s capital plan:
(A) Relevant supervisory information about the bank holding company and its subsidiaries;
(B) The bank holding company’s regulatory and financial reports, as well as supporting data that would allow for an analysis of the bank holding company’s loss, revenue, and reserve projections;
(C) As applicable, the Federal Reserve’s own pro forma estimates of the firm’s potential losses, revenues, reserves, and resulting capital adequacy under expected and stressful conditions, including but not limited to any scenarios required under paragraphs (e)(2)(ii)(A) and (e)(2)(ii) of this section, as well as the results of any stress tests conducted by the bank holding company or the Federal Reserve; and
(D) Other information requested or required by the Board or the appropriate Reserve Bank, as well as any other information relevant, or related, to the bank holding company’s capital adequacy.

(2) Federal Reserve action on a capital plan. (i) Timing of action. The Board or the appropriate Reserve Bank with concurrence of the Board, will object, in whole or in part, to the capital plan or provide the bank holding company with a notice of non-object to the capital plan:
(A) By June 30 of the calendar year in which a capital plan was submitted pursuant to paragraph (e)(1)(ii) of this section; and
(B) For a capital plan resubmitted pursuant to paragraph (e)(4) of this section, within 75 calendar days after the date on which a capital plan is resubmitted, unless the Board provides notice to the company that it is extending the time period.
(ii) Objection. (A) Large and noncomplex bank holding companies. The Board, or the appropriate Reserve Bank with concurrence of the Board, may object to a capital plan submitted by a large and noncomplex bank holding company if it determines that:
(1) The bank holding company has not demonstrated an ability to maintain capital above each minimum regulatory capital ratio on a pro forma basis under expected and stressful conditions throughout the planning horizon.
(B) Bank holding companies that are not large and noncomplex bank holding companies. The Board or the appropriate Reserve Bank with concurrence of the Board, may object to a capital plan submitted by a bank holding company that is not a large and noncomplex bank holding company if it determines that:
(1) The bank holding company has not demonstrated an ability to maintain capital above each minimum regulatory capital ratio on a pro forma basis under expected and stressful conditions throughout the planning horizon.
(2) The assumptions and analysis underlying the bank holding company’s capital plan, or the bank holding company’s methodologies and practices that support its capital planning process, are not reasonable or appropriate; or
(4) The bank holding company’s capital planning process or proposed capital distributions otherwise constitute an unsafe or unsound practice, or would violate any law, regulation, Board order, directive, or condition imposed by, or written agreement with, the Board or the appropriate Reserve Bank.

(iii) Notification of decision. The Board or the appropriate Reserve Bank will notify the bank holding company in writing of the reasons for a decision to object to a capital plan.
(iv) General distribution limitation. If the Board or the appropriate Reserve Bank objects to a capital plan and until such time as the Board or the appropriate Reserve Bank with concurrence of the Board, issues a non-object to the bank holding company’s capital plan, the bank holding company may not make any capital distribution, other than capital distributions arising from the issuance of a regulatory capital instrument eligible for inclusion in the numerator of a minimum regulatory capital ratio or capital distributions with respect to which the Board or the appropriate Reserve Bank has indicated in writing its non-object.

(v) Publication of summary results. The Board may disclose publicly its decision to object or not object to a bank holding company’s capital plan under this section, along with a summary of the Board’s analyses of that company. Any disclosure under this paragraph will occur by June 30 of the calendar year in which a capital plan was submitted pursuant to paragraph (e)(3)(ii) of this section, unless the Board determines that a later disclosure date is appropriate.

(3) Request for reconsideration or hearing. (i) General. Within 15 calendar days of receipt of a notice of objection to a capital plan by the Board or the appropriate Reserve Bank:
(A) A bank holding company may submit a written request to the Board requesting reconsideration of the objection, including an explanation of why reconsideration should be granted.
Within 15 calendar days of receipt of the bank holding company’s request, the Board will notify the company of its decision to affirm or withdraw the objection to the bank holding company’s capital plan or a specific capital distribution; or
(B) As an alternative to paragraph (ii)(3)(i)(A) of this section, a bank holding company may request an informal hearing on the objection.

(ii) Request for an informal hearing. (A) A request for an informal hearing shall be in writing and shall be submitted within 15 calendar days of a notice of an objection. The Board may,
in its sole discretion, order an informal hearing if the Board finds that a hearing is appropriate or necessary to resolve disputes regarding material issues of fact.

(B) An informal hearing shall be held within 30 calendar days of a request, if granted, provided that the Board may extend this period upon notice to the requesting party.

(C) Written notice of the final decision of the Board shall be given to the bank holding company within 60 calendar days of the conclusion of any informal hearing ordered by the Board, provided that the Board may extend this period upon notice to the requesting party.

(D) While the Board’s final decision is pending and until such time as the Board or the appropriate Reserve Bank with concurrence of the Board issues a non-objection to the bank holding company’s capital plan, the bank holding company may not make any capital distribution, other than those capital distributions with respect to which the Board or the appropriate Reserve Bank has indicated in writing its non-objection.

(4) Application of this section to other bank holding companies. The Board may apply this section, in whole or in part, to any other bank holding company by order based on the institution’s size, level of complexity, risk profile, scope of operations, or financial condition.

(g) Approval requirements for certain capital actions. (1) Circumstances requiring approval. Notwithstanding a notice of non-objection under paragraph (f)(2)(i) of this section, a bank holding company may not make any capital distribution (excluding any capital distribution arising from the issuance of a regulatory capital instrument eligible for inclusion in the numerator of a minimum regulatory capital ratio) under the following circumstances, unless it receives prior approval from the Board or appropriate Reserve Bank pursuant to paragraph (g)(5) of this section:

(i) After giving effect to the capital distribution, the bank holding company would not meet a minimum regulatory capital ratio;

(ii) The Board or the appropriate Reserve Bank with concurrence of the Board, notifies the company in writing that the Federal Reserve has determined that the company’s earnings would not meet a minimum regulatory capital ratio;

(iii) The Board or the appropriate Reserve Bank with concurrence of the Board, does not object to the transaction proposed in the notice. In determining whether to object to the proposed transaction, the Board or the appropriate Reserve Bank shall apply the criteria described in paragraph (g)(5)(ii) of this section.

(ii) The exception in this paragraph (g)(2) shall not apply if the Board or the appropriate Reserve Bank notifies the bank holding company in writing that it is ineligible for this exception.

(3) Net distribution limitation. (i) General. Notwithstanding a notice of non-objection under paragraph (f)(2)(i) of this section, a bank holding company must reduce its capital distributions in accordance with paragraph (g)(3)(ii) of this section if the bank holding company raises a smaller dollar amount of capital of a given category of regulatory capital instruments than it had included in its capital plan, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter.

(ii) Reduction of distributions. (A) Common equity tier 1 capital. If the bank holding company raises a smaller dollar amount of common equity tier 1 capital (as defined in 12 CFR 217.2), the bank holding company must reduce its capital distributions relating to common equity tier 1 capital such that the dollar amount of the bank holding company’s capital distributions, net of the dollar amount of its capital raises, (“net distributions”) relating to common equity tier 1 capital is no greater than the dollar amount of net distributions relating to common equity tier 1 capital included in its capital plan, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter.

(B) Additional tier 1 capital. If the bank holding company raises a smaller dollar amount of additional tier 1 capital (as defined in 12 CFR 217.2), the bank holding company must reduce its capital distributions relating to additional tier 1 capital (other than scheduled payments on additional tier 1 capital instruments) such that the dollar amount of the bank holding company’s net distributions relating to additional tier 1 capital is no greater than the dollar amount of net distributions relating to additional tier 1 capital included in its capital plan, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter.
Tier 2 capital. If the bank holding company raises a smaller dollar amount of tier 2 capital (as defined in 12 CFR 217.2), the bank holding company must reduce its capital distributions relating to tier 2 capital (other than scheduled payments on tier 2 capital instruments) such that the dollar amount of the bank holding company’s net distributions relating to tier 2 capital is no greater than the dollar amount of net distributions relating to tier 2 capital included in its capital plan, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter.

Exceptions. Paragraphs (g)(3)(i) and (g)(3)(ii) of this section shall not apply:

(A) To the extent that the Board or appropriate Reserve Bank indicates in writing its non-objection pursuant to paragraph (g)(5) of this section, following a request for non-objection from the bank holding company that includes all of the information required to be submitted under paragraph (g)(4) of this section;

(B) To capital distributions arising from the issuance of a regulatory capital instrument eligible for inclusion in the numerator of a minimum regulatory capital ratio that the bank holding company had not included in its capital plan;

(C) To the extent that the bank holding company raised a smaller dollar amount of capital in the category of regulatory capital instruments described in paragraph (g)(3)(i) of this section due to employee-directed capital issuances related to an employee stock ownership plan;

(D) To the extent that the bank holding company raised a smaller dollar amount of capital in the category of regulatory capital instruments described in paragraph (g)(3)(i) of this section due to a planned merger or acquisition that is no longer expected to be consummated or for which the consideration paid is lower than the projected price in the capital plan;

(E) Until March 31, 2017, to the extent that the dollar amount by which the bank holding company’s net distributions exceed the dollar amount of net distributions included in its capital plan in the category of regulatory capital instruments described in paragraph (g)(3)(i) of this section, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter, is less than 0.25 percent of the bank holding company’s tier 1 capital, as reported to the Federal Reserve on the bank holding company’s most recent first-quarter FR Y–9C; between July 1 of a calendar year and March 15 of the following calendar year, the bank holding company provides the appropriate Reserve Bank with notice 15 calendar days prior to any capital distribution in that category of regulatory capital instruments that includes the elements described in paragraph (g)(4) of this section; and the Board or the appropriate Reserve Bank with concurrence of the Board, does not object to the transaction proposed in the notice. In determining whether to object to the proposed transaction, the Board or the appropriate Reserve Bank shall apply the criteria described in paragraph (g)(5)(ii) of this section; or

(F) Beginning April 1, 2017, to the extent that the dollar amount by which the bank holding company’s net distributions exceed the dollar amount of net distributions included in its capital plan in the category of regulatory capital instruments described in paragraph (g)(3)(i) of this section, as measured on an aggregate basis beginning in the third quarter of the planning horizon through the end of the current quarter, is less than 0.25 percent of the bank holding company’s most recent first-quarter FR Y–9C; beginning July 1 of a calendar year and March 15 of the following calendar year, the bank holding company provides the appropriate Reserve Bank with notice 15 calendar days prior to any capital distribution in that category of regulatory capital instruments that includes the elements described in paragraph (g)(4) of this section; and the Board or the appropriate Reserve Bank with concurrence of the Board, does not object to the transaction proposed in the notice. In determining whether to object to the proposed transaction, the Board or the appropriate Reserve Bank shall apply the criteria described in paragraph (g)(5)(ii) of this section; or

The exceptions in paragraph (g)(3)(iii) shall not apply if the Board or the appropriate Reserve Bank notifies the bank holding company in writing that it is ineligible for this exception.

Contents of request. (i) A request for a capital distribution under this section shall be filed between July 1 of a calendar year and March 1 of the following calendar year with the appropriate Reserve Bank and the Board and shall contain the following information:

(A) The bank holding company’s current capital plan or an attestation that there have been no changes to the capital plan since it was last submitted to the Federal Reserve;

(B) The purpose of the transaction;

(C) A description of the capital distribution, including for redemptions or repurchases of securities, the gross consideration to be paid and the terms and sources of funding for the transaction, and for dividends, the amount of the dividend(s); and

(D) Any additional information requested by the Board or the appropriate Reserve Bank (which may include, among other things, an assessment of the bank holding company’s capital adequacy under a revised stress scenario provided by the Federal Reserve, a revised capital plan, and supporting data).

Disapproval and hearing. (i) The Board or the appropriate Reserve Bank will notify the bank holding company in writing of the reasons for a decision to disapprove any proposed capital distribution. Within 15 calendar days after receipt of a disapproval by the Board, the bank holding company may submit a written request for a hearing. (A) The Board may, in its sole discretion, order an informal hearing if the Board finds that a hearing is appropriate or necessary to resolve disputes regarding material issues of fact. (B) An informal hearing shall be held within 30 calendar days of a request, if granted, provided that the Board may extend this period upon notice to the requesting party.

(C) Written notice of the final decision of the Board shall be given to the bank holding company within 60 calendar days of the conclusion of any informal hearing ordered by the Board, provided
that the Board may extend this period upon notice to the requesting party.

(D) While the Board’s final decision is pending and until such time as the Board or the appropriate Reserve Bank with concurrence of the Board, approves the capital distribution at issue, the bank holding company may not make such capital distribution.

PART 252—ENHANCED PRUDENTIAL STANDARDS (REGULATION YY)

3. The authority citation for part 252 continues to read as follows:

Authority: 12 U.S.C. 321–338a, 1467a(g), 1818, 1831p–1, 1844(b), 1844(c), 5361, 5365, 5366.

4. Section 252.42 is amended by revising paragraph (p) to read as follows:

§ 252.42 Definitions.

(p) Stress test cycle means the period beginning on January 1 of a calendar year and ending on December 31 of that year.

5. Section 252.43 is amended by:

a. Revising paragraph (b); and

b. Removing paragraph (c).

The revision reads as follows:

§ 252.43 Applicability.

(b) Transitional arrangements. (1) A bank holding company that becomes a covered company on or before September 30 of a calendar year must comply with the requirements of this subpart beginning on January 1 of the second calendar year after the bank holding company becomes a covered company, unless that time is extended by the Board in writing.

(2) A bank holding company that becomes a covered company after September 30 of a calendar year must comply with the requirements of this subpart beginning on January 1 of the third calendar year after the bank holding company becomes a covered company, unless that time is extended by the Board in writing.

6. Section 252.44 is amended by revising paragraph (b) to read as follows:

§ 252.44 Annual analysis conducted by the Board.

(b) Economic and financial scenarios related to the Board’s analysis. The Board will conduct its analysis under this section using a minimum of three different scenarios, including a baseline scenario, adverse scenario, and severely adverse scenario. The Board will notify covered companies of the scenarios that the Board will apply to conduct the analysis for each stress test cycle by no later than February 15 of each year, except with respect to trading or any other components of the scenarios and any additional scenarios that the Board will apply to conduct the analysis, which will be communicated by no later than March 1 of that year.

7. Section 252.46 is amended by revising paragraph (b)(1) to read as follows:

§ 252.46 Review of the Board’s analysis; publication of summary results.

(b) Publication of results by the Board.

(1) The Board will publicly disclose a summary of the results of the Board’s analyses of a covered company by June 30 of the calendar year in which the stress test was conducted pursuant to 12 CFR 252.44.

8. Section 252.52 is amended by revising paragraphs (k) and (r) to read as follows:

§ 252.52 Definitions.

(k) Planning horizon means the period of at least nine consecutive quarters, beginning on the first day of a stress test cycle over which the relevant projections extend.

(r) Stress test cycle means the period beginning on January 1 of a calendar year and ending on December 31 of that year.

9. Section 252.53 is amended by revising paragraph (b) to read as follows:

§ 252.53 Applicability.

(b) Transitional arrangements. (1) A bank holding company that becomes a covered company on or before September 30 of a calendar year must comply with the requirements of this subpart beginning on January 1 of the second calendar year after the bank holding company becomes a covered company, unless that time is extended by the Board in writing.

(2) A bank holding company that becomes a covered company after September 30 of a calendar year must comply with the requirements of this subpart beginning on January 1 of the second calendar year after the bank holding company becomes a covered company, unless that time is extended by the Board in writing.

10. Section 252.54 is amended by revising paragraphs (a), (b)(1), (b)(2)(i), (b)(4)(i), and (b)(4)(ii) to read as follows:

§ 252.54 Annual stress test.

(a) In general. A covered company must conduct an annual stress test. The stress test must be conducted by April 5 of each calendar year based on data as of December 31 of the preceding calendar year, unless the time or the as-of date is extended by the Board in writing.

(b) Scenarios provided by the Board.

(1) In general. In conducting a stress test under this section, a covered company must, at a minimum, use the scenarios provided by the Board. Except as provided in paragraphs (b)(2) and (3) of this section, the Board will provide a description of the scenarios to each covered company no later than February 15 of the calendar year in which the stress test is performed pursuant to this section.

(2) Additional components. (i) The Board may require a covered company with significant trading activity, as determined by the Board and specified in the Capital Assessments and Stress Testing report (FR Y–14), to include a trading and counterparty component in its adverse and severely adverse scenarios in the stress test required by this section:

(A) For the stress test cycle beginning on January 1, 2017, the data used in this component must be as of a date selected by the Board between January 1, 2017 and March 1, 2017, and the Board will communicate the as-of date and a description of the component to the company no later than March 1, 2017; and

(B) For the stress test cycle beginning on January 1, 2018, and for each stress test cycle beginning thereafter, the data used in this component must be as of a date selected by the Board between October 1 of the previous calendar year and March 1 of the calendar year in which the stress test is performed pursuant to this section, and the Board will communicate the as-of date and a description of the component to the company no later than March 1 of the calendar year in which the stress test is performed pursuant to this section.

(4) Notice and response—(i) Notification of additional component. If the Board requires a covered company to include one or more additional components in its adverse and severely adverse scenarios under paragraph (b)(2) of this section or to use one or more additional scenarios under paragraph (b)(3) of this section, the Board will notify the company in writing. The Board will provide with the notice a scenario no later than December 31 of the preceding calendar year. The notification will
include a general description of the additional component(s) or additional scenario(s) and the basis for requiring the company to include the additional component(s) or additional scenario(s).

(iii) Description of component. The Board will respond in writing within 14 calendar days of receipt of the company’s request. The Board will provide the covered company with a description of any additional component(s) or additional scenario(s) by March 1 of the calendar year in which the stress test is performed pursuant to this section.

■ 11. Section 252.55 is amended by revising paragraphs (a), (b)(4)(i), and (b)(4)(ii) to read as follows:

§ 252.55 Mid-cycle stress test.
(a) Mid-cycle stress test requirement. In addition to the stress test required under § 252.54, a covered company must conduct a mid-cycle stress test. The stress test must be conducted by September 30 of each calendar year based on data as of June 30 of that calendar year, unless the time or the as of date is extended by the Board in writing.
(b) * * * * *
(4) Notice and response—(i) Notification of additional component. If the Board requires a covered company to include one or more additional components in its adverse and severely adverse scenarios under paragraph (b)(2) of this section or one or more additional scenarios under paragraph (b)(3) of this section, the Board will notify the company in writing. The Board will provide such notification no later than June 30. The notification will include a general description of the additional component(s) or additional scenario(s) and the basis for requiring the company to include the additional component(s) or additional scenario(s).

(ii) Description of component. The Board will provide the covered company with a description of any additional component(s) or additional scenario(s) by September 1 of the calendar year prior to the year in which the stress test is performed pursuant to this section.

■ 12. Section 252.57 is amended by revising paragraph (a) to read as follows:

§ 252.57 Reports of stress test results.
(a) Reports to the Board of stress test results. (1) A covered company must report the results of the stress test required under § 252.54 to the Board in the manner and form prescribed by the Board. Such results must be submitted by April 5 of the calendar year in which the stress test is performed pursuant to 12 CFR 252.54, unless that time is extended by the Board in writing.
(2) A covered company must report the results of the stress test required under § 252.55 to the Board in the manner and form prescribed by the Board. Such results must be submitted by October 5 of the calendar year in which the stress test is performed pursuant to 12 CFR 252.55, unless that time is extended by the Board in writing.

■ 13. Section 252.58 is amended by revising paragraph (a)(1)(ii) to read as follows:

§ 252.58 Disclosure of stress test results.
(a) * * * *
(1) * * * *
(ii) A covered company must publicly disclose a summary of the results of the stress test required under § 252.55. This disclosure must occur in the period beginning on October 5 and ending on November 4 of the calendar year in which the stress test is performed pursuant to 12 CFR 252.55, unless that time is extended by the Board in writing.

* * * * *
By order of the Board of Governors of the Federal Reserve System, September 26, 2016.
Robert dev. Frierzon,
Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Food and Drug Administration

21 CFR Part 573
[Docket No. FDA–2014–F–0988]

BASF Corp.; Filing of Food Additive Petition (Animal Use)

AGENCY: Food and Drug Administration, HHHS.

ACTION: Notice of petition.

SUMMARY: The Food and Drug Administration (FDA) is announcing that BASF Corp., as a part of their petition (FAP 2286) proposing that the food additive regulations be amended to provide for the safe use of feed grade sodium formate as a feed acidifying agent in complete swine feeds, also proposed that FDA amend the animal food additive regulations for formic acid and ammonium formate to limit formic acid and formate salts from all added sources.

DATES: Submit either electronic or written comments on FDA’s environmental assessment by October 31, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:
• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to http://www.regulations.gov will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comment, that information will be posted on http://www.regulations.gov.
• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:
• Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2014–F–0988 for “Food Additives Permitted in Feed and Drinking Water of Animals; Feed Grade Sodium Formate.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at http://www.regulations.gov or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.
ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FR Doc. 2016–23645 Filed 9–29–16; 8:45 am]

Air Plan Approval; Wisconsin; NO\textsubscript{2} as a Precursor to Ozone, PM\textsubscript{2.5} Increment Rules and PSD Infrastructure SIP Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing approval of a revision to Wisconsin’s state implementation plan (SIP), revising portions of the State’s Prevention of Significant Deterioration (PSD) and ambient air quality programs to address deficiencies identified in EPA’s previous narrow infrastructure SIP disapprovals and Finding of Failure to Submit. This SIP revision request is consistent with the Federal PSD rules and addresses the required elements of the fine particulate matter (PM\textsubscript{2.5}) PSD Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC) Rule. EPA is also considering a revision to Wisconsin’s state implementation plan (SIP) for nitrogen dioxide (NO\textsubscript{2}) and sulfur dioxide (SO\textsubscript{2}) and 2012 PM\textsubscript{2.5} National Ambient Air Quality Standards (NAAQS). The infrastructure requirements are designed to ensure that the structural components of each state’s air quality management program are adequate to meet the state’s responsibilities under the CAA.

DATES: Comments must be received on or before October 31, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2016–0134 at http://www.regulations.gov, or via email to damico.genevieve@epa.gov. For comments submitted at Regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment.
The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (i.e. on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the FOR FURTHER INFORMATION CONTACT section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit http://www2.epa.gov/dockets/commenting-epa-dockets.

FOR FURTHER INFORMATION CONTACT: Andrea Morgan, Environmental Engineer, Air Permitting Section, Air Programs Branch (AR–18), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–6058, morgan.andrea@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background of these SIP submissions?
II. What is EPA’s review of these SIP submissions?
III. What action is EPA taking?
IV. Incorporation by Reference
V. Statutory and Executive Order Reviews

I. What is the background of these SIP submissions?

On August 8, 2016, the Wisconsin Department of Natural Resources (WDNR) submitted a SIP revision request to EPA to revise portions of its PSD and ambient air quality programs to address deficiencies identified in EPA’s previous narrow infrastructure SIP disapprovals and Finding of Failure to Submit (FFS). Final approval of this SIP revision request will be consistent with the Federal PSD requirements and will address the required elements of the PM2.5 PSD Increments, SILs and SMC Rule. Wisconsin submitted revisions to its rules NR 404 and 405 of the Wisconsin Administrative Code. The submittal requests that EPA approve the following revisions to Wisconsin’s SIP:

- Amend NR 404.05 (2) (intro); (2) create NR 404.05(2)(a); (3) amend NR 404.05(2)(am); (4) create NR 404.05(3)(am); (5) amend NR 404.05(3)(am); (6) create NR 404.05(4)(a); (7) amend NR 405.02(3),NR 405.02(3)(b), and NR 405.02(3)(c); (8) create NR 405.02(3)(b); (9) amend NR 405.02(3)(c); (10) create NR 405.02(3)(c); (11) amend NR 405.02(3)(a); (12) amend NR 405.07(8)(a)(3m); (13) create NR 405.07(8)(a)(3m); (14) amend NR 405.07(8)(a)(5). (Note).
- WDNR also requested that this SIP revision supplement the PSD portions of its previously submitted infrastructure submittals, including 1997 PM2.5, 1997 ozone, 2006 PM2.5, 2008 lead, 2008 ozone, 2010 NO2, SO2, and 2012 PM2.5.

A. PSD Rule Revisions

1. PM2.5 Increments

To implement the PM2.5 NAAQS, EPA issued two separate final rules that establish the New Source Review (NSR) permitting requirements for PM2.5: The NSR PM2.5 Implementation Rule promulgated on May 16, 2008 (73 FR 28321), and the PM2.5 PSD Increments, SILs and SMC Rule promulgated on October 20, 2010 (75 FR 64864). EPA’s 2008 NSR PM2.5 Implementation Rule required states to submit applicable SIP revisions to EPA no later than May 16, 2011, to address this rule’s PSD and nonattainment NSR SIP requirements. This rule requires that the state submit revisions to its SIP, including the identification of precursors for PM2.5, the significant emissions rates for PM2.5 and the requirement to include emissions which may condense to form particulate matter at ambient temperatures, known as condensables, in permitting decisions. EPA published a final approval of a revision to Wisconsin’s SIP on October 16, 2014, (79 FR 62008), which included all of the required elements of the 2008 NSR Implementation Rule.

The PM2.5 PSD Increments, SILs and SMC Rule required states to submit SIP revisions to EPA by July 20, 2012, adopting provisions equivalent to or at least as stringent as the PM2.5 PSD increments and associated implementing regulations. On August 11, 2014, EPA published a finding that Wisconsin had failed to submit the required elements of the PM2.5 PSD Increments, SILs and SMC Rule (79 FR 46703).

The PM2.5 PSD Increments, SILs and SMC Rule also allows states to discretionarily adopt and submit for EPA approval: (1) SILs, which are used as a screening tool to evaluate the impact a proposed new major source or major modification may have on the NAAQS or PSD increment; and (2) a SMC (also a screening tool), which is used to determine the subsequent level of data gathering required for a PSD permit application for emissions of PM2.5. However, on January 22, 2013, the United States Court of Appeals for the District of Columbia Court granted a request from EPA to vacate and remand to EPA the portions of the PM2.5 PSD Increments, SILs and SMC Rule PM2.5 addressing the SILs for PM2.5 so that EPA could voluntarily correct an error in these provisions. The Court also vacated parts of the PM2.5 PSD Increments, SILs and SMC Rule establishing a PM2.5 SMC, finding that EPA was precluded from using the PM2.5 SMCs to exempt permit applicants from the statutory requirement to compile preconstruction monitoring data. Sierra Club v. EPA, 705 F.3d 458, 463–69. On December 9, 2013, EPA issued a good cause final rule formally removing the affected SILs and replacing the SMC with a numeric value of 0 micrograms per cubic meter (µg/m³) and a note that no exemption is available with regard to PM2.5. See 78 FR 73698. As a result, SIP submittals could no longer include the vacated PM2.5 SILs at 40 CFR 51.166(k)(2) and 52.21(k)(2) and the PM2.5 SMC must be revised to 0 µg/m³, consistent with 40 CFR 51.166(i)(5)(i)(c) and 52.21(i)(5)(i)(c).

2. Ozone

On November 29, 2005, EPA published (70 FR 71612) in the Federal Register the “Final Rule to Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2”. Part of this rule established, among other requirements, oxides of nitrogen (NOx) as a precursor to ozone. The final rule became effective on January 30, 2006. On October 8, 2015, EPA finalized approval of revisions to Wisconsin’s SIP that included the identification of NOx as a precursor to ozone in the definition of regulated NSR pollutant. See 79 FR 60064.

B. Infrastructure SIP Submittals

The requirement for states to make a SIP submission of this type arises out of CAA section 110(a)(1). Pursuant to section 110(a)(1), states must make SIP submissions “within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),” and these SIP submissions are to provide for the “implementation, maintenance, and enforcement” of such NAAQS. The statute directly imposes on states the duty to make these SIP submissions, and the requirement to make the submissions is not conditioned upon EPA’s taking any action other than promulgating a new or revised NAAQS. Section 110(a)(2) includes a list of specific elements that “[e]ach such plan” submission must address.

This specific rulingmaking is only taking action on the PSD elements of the Wisconsin infrastructure submittals.
Separate action has been or will be taken on the non-PSD infrastructure elements in separate rulemakings. The infrastructure elements for PSD are found in CAA 110(a)(2)(C), 110(a)(2)(D), and 110(a)(2)(J) and will be discussed in detail below. For further discussion on the background of infrastructure submittals, see 77 FR 45992.

II. What is EPA’s review of these SIP submissions?

A. PSD Rule Revisions

EPA has evaluated WDNR’s proposed revision to the Wisconsin SIP in accordance with the Federal requirements governing state permitting programs. The revisions described in section I above are intended to update the Wisconsin SIP to comply with the current rules and address deficiencies identified by EPA in its previous SIP disapprovals. As discussed below, EPA is proposing to approve these revisions because they meet Federal requirements.

1. PM\textsubscript{2.5}

The PM\textsubscript{2.5} PSD increments, SILs and SMC Rule finalized several new requirements for states to revise their SIPs to incorporate increments for PM\textsubscript{2.5}. Specifically, the rule requires a state’s submitted PSD SIP revision to adopt and submit for EPA approval the PM\textsubscript{2.5} increments issued pursuant to section 166(a) of the CAA to prevent significant deterioration of air quality in areas meeting the NAAQS. States were also required to adopt and submit for EPA approval revisions to the definitions for “major source baseline date,” “minor source baseline date,” and “baseline area” as part of the implementing regulations for the PM\textsubscript{2.5} increments. The PM\textsubscript{2.5} increments are codified in 40 CFR 51.166(b)(14)(i) and 51.166(b)(14)(ii). The State revised the definition of “Baseline area” at NR 405.02(22)(b)(1) to explicitly identify pollutant air quality impacts that would define a baseline area where a minor source baseline date is already established. This revision is consistent with 40 CFR 51.166(b)(14)(ii). The State also revised provisions pertaining to the PM\textsubscript{2.5} SMC to be consistent with Federal requirements after the January 22, 2013, Court decision. WDNR’s revision to NR 405.07(b)(a)3m. revises the PM\textsubscript{2.5} SMC to 0 μg/m\textsuperscript{3} and NR 405.07(b)(a)3m.(Note) adds a note that no exemption is available with regard to PM\textsubscript{2.5}. These revisions are consistent with the language in 40 CFR 51.166(i)(5)(ii)(c) regarding the SMC for PM\textsubscript{2.5}.

2. Ozone

The “Final Rule to Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2” required states to make revisions to their PSD programs to establish NO\textsubscript{X} as a precursor to ozone. Specifically, NO\textsubscript{X} was required to be identified as a precursor to ozone in the definition of major stationary source, the definition of major modification, the definition of significant, the definition of regulated NSR pollutant, and the SMC for ozone.

Wisconsin’s revisions to the definition of “major modification” in NR 405.02(21)(a) states that any net emission increase at major stationary source that is significant for NO\textsubscript{X} or volatile organic compounds (VOCs) shall be considered significant for ozone. This is consistent with the Federal requirements of 40 CFR 51.166(b)(2)(ii). Wisconsin’s revisions to the definition of “Major Stationary Source” at NR 405.02(22)(b) add that a major stationary source that is major for NO\textsubscript{X} shall be considered major for ozone. This is consistent with the Federal definition at 40 CFR 51.166(b)(1). Wisconsin’s revisions to NR 405.07(b)(a)5.(note) revise the SMC for ozone to provide that sources with a net increase of 100 tons per year of NO\textsubscript{X} need to perform an ambient impact analysis for ozone. This matches the note at 40 CFR 51.166(i)(6)(ii)(f). The revisions to the definition of “Significant” at NR 405.02(27)(a)6. adds a significant emission rate for ozone of 40 tons per year of nitrogen oxides. This is consistent with the Federal requirements of 40 CFR 51.166(b)(23)(i).

Because Wisconsin’s requested revisions are consistent with the applicable requirements found in Federal regulations, EPA is proposing to approve the requested revisions.

B. Infrastructure SIP Submittals

PSD infrastructure elements are addressed in different sections of the CAA: Sections 110(a)(2)(C), 110(a)(2)(D)(II), and 110(a)(2)(J).

1. Section 110(a)(2)(C)—Program for Enforcement of Control Measures; PSD

States are required to include a program providing for enforcement of all SIP measures and the regulation of construction of new or modified stationary sources to meet NSR requirements under PSD and nonattainment new source review (NNSR) programs. Part C of the CAA (sections 160–169B) addresses PSD, while part D of the CAA (sections 171–193) addresses NNSR requirements.

The evaluation of each state’s submittal addressing the infrastructure SIP requirements of section 110(a)(2)(C) covers: (i) Enforcement of SIP measures; (ii) PSD provisions that explicitly identify NO\textsubscript{X} as a precursor to ozone in the PSD program; (iii) identification of precursors to PM\textsubscript{2.5} and the identification of PM\textsubscript{2.5} and PM\textsubscript{10} condensables in the PSD program; (iv) PM\textsubscript{2.5} increments in the PSD program; (v) determination of the baseline area; and (vi) minor source baseline date.
and, (v) Greenhouse Gas (GHG) permitting and the “Tailoring Rule.”

(i) Enforcement of SIP Measures

The enforcement of SIP measures provision was approved in previous rulemakings.

(ii) PSD Provisions That Explicitly Identify NOx as a Precursor to Ozone in the PSD Program

EPA’s “Final Rule to Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2: Final Rule to Implement Certain Aspects of the 1990 Amendments Relating to New Source Review and Prevention of Significant Deterioration as They Apply in Carbon Monoxide, Particulate Matter, and Ozone NAAQS; Final Rule for Reformulated Gasoline” (Phase 2 Rule) was published on November 29, 2005 (see 70 FR 71612). Among other requirements, the Phase 2 Rule obligated states to revise their PSD programs to explicitly identify NOx as a precursor to ozone (70 FR 71612 at 71679, 71699–71700). This requirement was codified in 40 CFR 51.166.

The Phase 2 Rule required that states submit SIP revisions incorporating the requirements of the rule, including those identifying NOx as a precursor to ozone, by June 15, 2007 (see 70 FR 71612 at 71683, November 29, 2005).

EPA is proposing to approve revisions to Wisconsin’s PSD SIP reflecting these requirements in today’s rulemaking, and therefore is proposing to find that Wisconsin has met this set of infrastructure SIP requirements of section 110(a)(2)(C) with respect to the 1997 PM2.5, 1997 ozone, 2006 PM2.5, 2008 lead, 2008 ozone, 2010 NOx, 2010 SO2, and 2012 PM2.5 NAAQS.

(iii) Identification of Precursors to PM2.5 and the Identification of PM2.5 and PM10 Condensables in the PSD Program

On May 16, 2008 (see 73 FR 28321), EPA issued the Final Rule on the “Implementation of the New Source Review Program for Particulate Matter Less than 2.5 Micrometers” (2008 NSR Rule). The 2008 NSR Rule finalized several new requirements for SIPs to address sources that emit direct PM2.5 and other pollutants that contribute to secondary PM2.5 formation. One of these requirements is for NSR permits to address pollutants responsible for the secondary formation of PM2.5, otherwise known as precursors. In the 2008 rule, EPA identified precursors to PM2.5 for the PSD program to be SO2 and NOx (unless the state demonstrates to the Administrator’s satisfaction or EPA demonstrates that NOx emissions in an area are not a significant contributor to that area’s ambient PM2.5 concentrations). The 2008 NSR Rule also specifies that VOCs are not considered to be precursors to PM2.5 in the PSD program unless the state demonstrates to the Administrator’s satisfaction or EPA demonstrates that emissions of VOCs in an area are significant contributors to that area’s ambient PM2.5 concentrations.

The explicit references to SO2, NOx, and VOCs as they pertain to secondary PM2.5 formation are codified at 40 CFR 51.166(b)(49)(i)(b) and 40 CFR 52.21(b)(50)(i)(b). As part of identifying pollutants that are precursors to PM2.5, the 2008 NSR Rule also required states to revise the definition of “significant” as it relates to source emissions increase or the potential of a source to emit pollutants. Specifically, 40 CFR 51.166(b)(23)(i) and 40 CFR 52.21(b)(23)(i) define “significant” for PM2.5 to mean the following emissions rates: 10 Tons per year (tpy) of direct PM2.5; 40 tpy of SO2; and 40 tpy of NOx (unless the state demonstrates to the Administrator’s satisfaction or EPA demonstrates that NOx emissions in an area are not a significant contributor to that area’s ambient PM2.5 concentrations). The deadline for states to submit SIP revisions incorporating these changes was May 16, 2011 (see 73 FR 28321 at 28341).3

The 2008 NSR Rule did not require states to immediately account for gases that could condense to form particulate matter, known as condensables, in PM2.5 and PM10 emission limits in NSR permits. Instead, EPA determined that states had to account for PM2.5 and PM10 condensables for applicability determinations and in establishing emissions limitations for PM2.5 and PM10 in PSD permits beginning on or after January 1, 2011. This requirement is codified in 40 CFR 51.166(b)(49)(i)(a) and 40 CFR 52.21(b)(50)(i)(a).

Revisions to states’ PSD programs incorporating the inclusion of condensables were required be submitted to EPA by May 16, 2011 (see 73 FR 28321 at 28341).

EPA approved revisions to Wisconsin’s PSD SIP reflecting these requirements on October 16, 2014 (see 79 FR 62008), and therefore proposes that Wisconsin has met this set of infrastructure SIP requirements of section 110(a)(2)(C) with respect to the 1997 PM2.5, 1997 ozone, 2006 PM2.5, 2008 lead, 2008 ozone, 2010 NOx, 2010 SO2, and 2012 PM2.5 NAAQS.

(iv) PM2.5 Increments in the PSD Program

On October 20, 2010, EPA issued the final rule on the “Prevention of Significant Deterioration for Particulate Matter Less Than 2.5 Micrometers—Increments, Significant Impact Levels and Significant Monitoring Concentration” (2010 NSR Rule). This rule established several components for making PSD permitting determinations for PM2.5, including a system of “increments,” which is the mechanism used to estimate significant deterioration of ambient air quality for a pollutant. These increments are codified in 40 CFR 51.166(c) and 40 CFR 52.21(c), and are included in the table below.

Table 1—PM2.5 Increments Established by the 2010 NSR Rule in Micrograms per Cubic Meter

3 EPA notes that on January 4, 2013, the U.S. Court of Appeals for the D.C. Circuit, in Natural Resources Defense Council v. EPA, 706 F.3d 428 (D.C. Cir.), held that EPA should have issued the 2008 NSR Rule in accordance with the CAA’s requirements for PM10 nonattainment areas (Title I, Part D, subpart 4), and not the general requirements for nonattainment areas under subpart 1. As the subpart 4 provisions apply only to nonattainment areas, EPA does not consider the portions of the 2008 rule that address requirements for PM10 attainment and unclassifiable areas to be affected by the court’s opinion. Moreover, EPA does not anticipate the need to revise any PSD requirements promulgated by the 2008 NSR Rule in order to comply with the court’s decision. Accordingly, EPA’s approval of Wisconsin’s infrastructure SIP as to elements (C), (D)(ii)(I), or (I) with respect to the PSD requirements promulgated by the 2008 implementation rule does not conflict with the court’s opinion.

The court’s decision with respect to the nonattainment NSR requirements promulgated by the 2008 implementation rule also does not affect EPA’s action on the present infrastructure action. EPA interprets the CAA to exclude nonattainment area requirements, including requirements associated with a nonattainment NSR program, from infrastructure SIP submissions due three years after adoption or revision of a NAAQS. Instead, these elements are typically referred to as nonattainment SIP or attainment plan elements, which would be due by the dates statutorily prescribed under subparts 2 through 5 under part D, extending as far as 10 years following designations for some elements.
The 2010 NSR Rule also established a new “major source baseline date” for PM2.5 as October 20, 2010, and a new trigger date for PM2.5 as October 20, 2011. These revisions are codified in 40 CFR 51.166(b)(14)(i)(c) and (b)(14)(ii)(c), and 40 CFR 52.21(b)(14)(i)(c) and (ii)(c). Lastly, the 2010 NSR Rule revised the definition of “baseline area” to include a level of significance of 0.3 micrograms per cubic meter, annual average, for PM2.5. This change is codified in 40 CFR 51.166(b)(15)(i) and 40 CFR 52.21(b)(15)(i).

EPA is proposing to approve revisions to Wisconsin’s PSD SIP reflecting these requirements in today’s rulemaking, and therefore is proposing to find that Wisconsin has met this set of infrastructure SIP requirements for purposes of infrastructure SIPs, including the “Tailoring Rule.”

With respect to CAA Sections 110(a)(2)(C) and (J), EPA interprets the CAA to require each state to make an infrastructure SIP submission for a new or revised NAAQS that demonstrates that the air agency has a complete PSD permitting program meeting the current requirements for all regulated NSR pollutants. The requirements of section 110(a)(2)(D)(i)(II) may also be satisfied by demonstrating the air agency has a complete PSD permitting program correctly addressing all regulated NSR pollutants. Wisconsin has shown that it currently has a PSD program in place that covers all regulated NSR pollutants, including GHGs.

On June 23, 2014, the United States Supreme Court issued a decision addressing the application of PSD permitting requirements to GHG emissions, Utility Air Regulatory Group v. Environmental Protection Agency, 134 S.Ct. 2427. The Supreme Court said that the EPA may not treat GHGs as an air pollutant for purposes of determining whether a source is a major source required to obtain a PSD permit. The Court also said that the EPA could continue to require that PSD permits, otherwise required based on emissions of pollutants other than GHGs, contain limitations on GHG emissions based on the application of Best Available Control Technology (BACT).

In order to act consistently with its understanding of the Court’s decision, the EPA no longer applies EPA regulations that would require that SIPs include the permitting requirements that the Supreme Court found impermissible. Specifically, EPA is not applying the requirement that a state’s SIP-approved PSD program require that sources obtain PSD permits when GHGs are the only pollutant (i) that the source emits or has the potential to emit above the major source thresholds, or (ii) for which there is a significant emissions increase and a significant net emissions increase from a modification (e.g. 40 CFR 51.166(b)(48)(v)).

EPA anticipates a need to revise Federal PSD rules and for many states to revise their existing SIP-approved PSD programs in light of the Supreme Court opinion. The timing and content of subsequent EPA actions with respect to the EPA regulations and state PSD program approvals are expected to be informed by additional legal process before the United States Court of Appeals for the District of Columbia. At this juncture, EPA is not expecting states to have revised their PSD programs for purposes of infrastructure SIP submissions and is only evaluating such submissions to ensure that the state’s program correctly addresses GHGs consistent with the Supreme Court’s decision.

At present, EPA is proposing that Wisconsin’s SIP is sufficient to satisfy sections 110(a)(2)(C), (D)(i)(II), and (J) with respect to GHGs, because the PSD permitting program previously approved by EPA into the SIP continues to require that PSD permits (otherwise required based on emissions of pollutants other than GHGs) contain limitations on GHG emissions based on the application of BACT. Although the approved Wisconsin PSD permitting program may currently contain provisions that are no longer necessary in light of the Supreme Court decision, this does not render the infrastructure SIP submission inadequate to satisfy Section 110(a)(2)(C), (D)(i)(II), and (J). The SIP contains the necessary PSD requirements and the application of those requirements is not impeded by the presence of other previously-approved provisions regarding the permitting of sources of GHGs that EPA does not consider necessary at this time in light of the Supreme Court decision.

For the purposes infrastructure SIPs, EPA reiterates that NSR Reform regulations are not within the scope of these actions. Therefore, we are not taking action on existing NSR Reform regulations for Wisconsin. EPA approved Wisconsin’s minor NSR program on January 18, 1995 (see 60 FR 3543); and since that date, WDNR and EPA have relied on the existing minor NSR permitting program to address new and modified sources not captured by the major NSR permitting programs.

3. Section 110(a)(2)[I]—Consultation With Government Officials; Public Notifications; PSD; Visibility Protection

States must meet applicable requirements of section 110(a)(2)(C) related to PSD. WDNR’s PSD program in the context of infrastructure SIPs has already been discussed in the paragraphs addressing section 110(a)(2)(C) and 110(a)(2)(D)(ii)(II), and EPA notes that the proposed actions for those sections are consistent with the proposed actions for this portion of section 110(a)(2)[I]. Therefore, EPA proposes that Wisconsin has met all of the infrastructure SIP requirements for PSD associated with section 110(a)(2)[I] for the 1997 PM2.5, 1997 ozone, 2006 PM2.5, 2008 lead, 2008 ozone, 2010 NO2, 2010 SO2, and 2012 PM2.5 NAAQS.

III. What action is EPA taking?

EPA is proposing to approve revisions to Wisconsin’s SIP that implement the PM2.5 increment requirements and also incorporates NOX as an ozone precursor. These revisions were made to meet EPA’s requirements for Wisconsin’s PSD and NSR program and are consistent with Federal regulations. Specifically, EPA is proposing to approve the following:

(i) NR 404.05(2)intro and (am)
(ii) NR 404.05(3)intro and (am)
(iii) NR 404.05(4)intro and (am)
(iv) NR 405.02(3) and (21)(a)
(v) NR 405.02(21)(m)(a) and (c)
(vi) NR 405.02(22)(b)
(vii) NR 405.02(22)(m)(a)1. and 3., and
(b)1.
(viii) NR 405.02(27)(a)6.
(ix) NR 405.07(8)a)3m and 3m(Note)
(x) NR 405.07(8)a)5(Note)

The revisions pertaining to PM2.5 increment will fully address the requirements of the PM2.5 PSD Increments, SILs, and SMC Rule and the deficiencies identified in EPA’s August 11, 2014, Finding of Failure to Submit. The revisions pertaining to NOX as a precursor to ozone will, in conjunction with EPA’s October 6, 2015, approval, address all of the PSD requirements of the “Final Rule to Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2.”

EPA is also proposing to approve the PSD related infrastructure requirements found in CAA sections 110(a)(2)(C), (D)(ii)(II), and (I) for Wisconsin’s 1997 PM2.5, 1997 ozone, 2006 PM2.5, 2008 lead, 2008 ozone, 2010 NO2, 2010 SO2, and 2012 PM2.5 NAAQS submittals.

IV. Incorporation by Reference

In this rule, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference the WDNR rules regarding revisions to the PSD and NSR programs discussed in section I of this preamble. EPA has made, and will continue to make, these documents generally available through www.regulations.gov, and/or at the National Archives and Records Administration (NARA), and/or at the EPA Region 5 Office (please contact the person identified in the FOR FURTHER INFORMATION CONTACT section of this preamble for more information). For information on the availability of this material at NARA, go to: www.archives.gov/federal-register/cfr/ibr-locations.html.

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations.

42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

• Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
• Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: September 21, 2016.

Robert A. Kaplan,
Acting Regional Administrator, Region 5.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 435

[RIN 2040–AF68]

Effluent Limitations Guidelines and Standards for the Oil and Gas Extraction Point Source Category—Implementation Date Extension

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to extend the implementation deadline for certain
II. Why is EPA issuing this proposed rule?

This document proposes to establish a compliance date for pretreatment standards for existing onshore unconventional oil and gas extraction facilities within the Oil and Gas Extraction Point Source Category that differs from the date specified in the preamble to that final rule (81 FR 41845, June 28, 2016). We have published a direct final rule to extend the compliance date to August 29th, 2019 for existing sources that were lawfully discharging UOG wastewater to POTWs on or between the date of the Federal Register Notice of the proposed rule (April 7, 2015) and the date of the Federal Register Notice of the final rule (June 28, 2016) in the “Rules and Regulations” section of this Federal Register because we view this as a noncontroversial action and anticipate no adverse comment. For purposes of this proposed rule, compliance date and implementation date are used interchangeably. We have explained our reasons for this action in the preamble to the direct final rule.

If no adverse comments are received, the direct final rule will go into effect. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We would address all public comments in any subsequent final rule based on this proposed rule. EPA will not consider any comment submitted on the proposed rule edited or removed from Regulations.gov. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (i.e. on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit https://www.epa.gov/dockets/commenting-epa-dockets.

DEPARTMENT OF THE INTERIOR
Bureau of Safety and Environmental Enforcement

43 CFR Part 2
[Docket ID: BSEE–2016–0001; 167E1700D2 EEA0A0000 ET1EX0000.SZH000]
RIN 1014–AA29
Privacy Act Regulations; Exemption for the Investigations Case Management System

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Department of the Interior is amending its regulations to exempt certain records in the Investigations Case Management System from one or more provisions of the Privacy Act because of civil and administrative law enforcement requirements.

DATES: Submit written comments on or before November 29, 2016.
ADRESSES: You may submit comments on this proposed rulemaking by any of the following methods. Please use the Regulation Identifier Number (RIN) 1014–AA29 as an identifier in your comments. BSEE may post all submitted comments, in their entirety, at: www.regulations.gov.

1. Federal eRulemaking Portal: www.regulations.gov. In the search box, enter “BSEE–2016–0001,” then click search. Follow the instructions to submit public comments and view supporting and related materials available for this rulemaking.

2. Mail or hand-carry comments to the Department of the Interior (DOI); Bureau of Safety and Environmental Enforcement; ATTN: Regulations and Standards Branch; 45600 Woodland Road, Mail Code VA&E–ORP; Sterling, VA 20166. Please reference “Privacy Act Exemptions for the Investigations Case Management System, 1014–AA29,” in your comments and include your name and return address.

FOR FURTHER INFORMATION CONTACT: Rowena Dufford, Bureau of Safety and Environmental Enforcement Privacy Act Officer, 45600 Woodland Road, Mail Stop VA&E–MSD, Sterling, VA 20166. Email at Rowena.Dufford@bsee.gov.

SUPPLEMENTARY INFORMATION:

Background

The Privacy Act of 1974, as amended, 5 U.S.C. 552a, governs the means by which the U.S. Government collects, maintains, uses and disseminates personally identifiable information. The Privacy Act applies to records about individuals that are maintained in a “system of records.” A system of records is a group of any records under the control of an agency from which information about an individual is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. See 5 U.S.C. 552a(a)(4) and (5).

An individual may request access to records containing information about him or herself, 5 U.S.C. 552a(b), (c) and (d). However, the Privacy Act authorizes Federal agencies to exempt systems of records from access by individuals under certain circumstances, such as where the access or disclosure of such information would impede national security or law enforcement efforts. Exemptions from Privacy Act provisions must be established by regulation, 5 U.S.C. 552a(k).

The Department of the Interior (DOI) Bureau of Safety and Environmental Enforcement (BSEE) created the “Investigations Case Management System (CMS), BSEE–01,” system of records to enable BSEE to conduct and document civil administrative investigations related to incidents, operations of the Outer Continental Shelf (OCS), and employee misconduct investigations. The CMS will store, track, and analyze reportable injuries, the loss or damage of property, possible violations of Federal laws and regulations, and investigation information related to operations on the OCS to identify safety concerns or environmental risks. The CMS will contain investigatory materials related to possible criminal activity and referrals to internal and external law enforcement organizations as appropriate for investigation.

Incident and non-incident data related to activity occurring on the OCS collected in support of investigations, regulatory enforcement, homeland security, and security (physical, personnel, stability, environmental, and industrial) activities may include data documenting investigation activities, enforcement recommendations, recommendation results, property damage, injuries, fatalities, and analytical or statistical reports. The CMS will also provide information for BSEE management to make informed decisions on recommendations for enforcement, civil penalties, and other administrative actions.

In this notice of proposed rulemaking, DOI is proposing to exempt portions of the CMS system of records from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2) because of civil and administrative law enforcement requirements. Under 5 U.S.C. 552a(k)(2), the head of a Federal agency may promulgate rules to exempt a system of records from certain provisions of 5 U.S.C. 552a if the system of records is “investigatory material compiled for law enforcement purposes, other than material within the scope of subsection (j)(2).”

Because this system of records contains investigative matters compiled for law enforcement purposes under the provisions of 5 U.S.C. 552a(k)(2), the Department of the Interior plans to exempt portions of the CMS system of records from one or more of the following provisions: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H) and (I), and (f). Where a release would not interfere with or adversely affect investigations or enforcement activities, including but not limited to revealing sensitive information or compromising confidential sources, the exemption may be waived on a case-by-case basis. Exemptions from these particular subsections are justified for the following reasons:

1. 5 U.S.C. 552a(c)(3). This section requires an agency to make the accounting of each disclosure of records required by the Privacy Act available to the individual named in the record upon request. Release of accounting of disclosures would alert the subjects of an investigation to the existence of the investigation and the fact that they are subjects of the investigation. The release of such information to the subjects of an investigation would provide them with significant information concerning the nature of the investigation, and could seriously impede or compromise the investigation; and lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

2. 5 U.S.C. 552a(d); (e)(4)(G) and (e)(4)(H); and (f). These sections require an agency to provide notice and disclosure to individuals that a system contains records pertaining to the individual, as well as providing rights of access and amendment. Granting access to records in the CMS system of records could inform the subject of an investigation of the existence of that investigation, the nature and scope of the information and evidence obtained, the identity of confidential sources, witnesses, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony; and disclose investigative techniques and procedures.

3. 5 U.S.C. 552a(e)(1). This section requires the agency to maintain information about an individual only to the extent that such information is relevant or necessary. The application of this provision could impair investigations and civil or administrative law enforcement, because it is not always possible to determine the relevance or necessity of specific information in the early stages of an investigation. Relevance and necessity are often questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established. Furthermore, during the course of the investigation, an investigator may obtain information concerning the violation of laws outside the scope of the investigator’s jurisdiction. BSEE investigators will refer information obtained outside of their civil or administrative jurisdictions to the appropriate agency.

4. 5 U.S.C. 552a(e)(4)(l). This section requires an agency to provide public notice of the categories of sources of records in the system. The application
of this section could disclose investigative techniques and procedures and cause sources to refrain from giving such information because of fear of reprisal. This could compromise BSEE’s ability to conduct investigations and to identify and detect violators.

Procedural Requirements

1. Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs in the Office of Management and Budget will review all significant rules. The Office of Information and Regulatory Affairs has determined that this rule is not significant. Executive Order 13563 reconfirms the principles of E.O. 12866 while calling for improvements in the nation’s regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. DOI developed this rule in a manner consistent with these requirements.

2. Regulatory Flexibility Act

DOI certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.). This rule does not impose a requirement for small businesses to report or keep records on any of the requirements contained in this rule. The exemptions to the Privacy Act apply to individuals, and individuals are not covered entities under the Regulatory Flexibility Act.

3. Small Business Regulatory Enforcement Fairness Act (SBREFA)

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:
(a) Does not have an annual effect on the economy of $100 million or more.
(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.
(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises.

4. Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments in the aggregate, or on the private sector, of more than $100 million per year. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. This rule makes only minor changes to 43 CFR part 2. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 et seq.) is not required.

5. Takings (E.O. 12630)

In accordance with Executive Order 12630, the rule does not have significant takings implications. The rule is not a governmental action capable of interference with constitutionally protected property rights. This rule makes only minor changes to 43 CFR part 2. A takings implication assessment is not required.

6. Federalism (E.O. 13132)

In accordance with Executive Order 13132, this rule does not have any federalism implications to warrant the preparation of a Federalism Assessment. The rule is not associated with, nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. A Federalism Assessment is not required.

7. Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of Executive Order 12988. Specifically, this rule:
(a) Does not unduly burden the judicial system.
(b) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and
(c) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

8. Consultation With Indian Tribes (E.O. 13175)

In accordance with Executive Order 13175, the Department of the Interior has evaluated this rule and determined that it would have no substantial effects on federally recognized Indian Tribes.

9. Paperwork Reduction Act

This rule does not require an information collection from 10 or more parties and a submission under the Paperwork Reduction Act is not required.

10. National Environmental Policy Act (NEPA) of 1969

This rule does not constitute a major Federal Action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rule is covered by a categorical exclusion. This rule meets the criteria set forth in 43 CFR 46.210(j), 516 Departmental Manual 15.4C(1), and the BSEE Interim NEPA Policy Document 2013–09, for a categorical exclusion. The rule’s administrative effects are to exempt CMS from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2) because of civil and administrative law enforcement requirements and therefore would not have any environmental impacts. BSEE also analyzed this proposed rule to determine if it involves any of the extraordinary circumstances set forth in 43 CFR 46.215 that would require an environmental assessment or an environmental impact statement for actions otherwise eligible for a categorical exclusion. BSEE concluded that this rule does not meet any of the criteria for extraordinary circumstances.

11. Data Quality Act

In developing this rule, there was no need to conduct or use a study, experiment, or survey requiring peer review under the Data Quality Act (Pub. L. 106–554).

12. Effects on Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in Executive Order 13211, and it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. A Statement of Energy Effects is not required.

13. Clarity of This Regulation

We are required by Executive Order 12866 and 12988, the Plain Writing Act of 2010 (H.R. 946), and the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means each rule we publish must:
—Be logically organized;
—Use the active voice to address readers directly;
—Use a clear language rather than jargon;
—Be divided into short sections and sentences; and
AGENCY: Fish and Wildlife Service, Interior.

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

50 CFR Part 17
[Docket No. FWS–R5–ES–2016–0030; 4500030113]

RIN 1018–BB50

Endangered and Threatened Wildlife and Plants; Endangered Species Status for the Kenk’s Amphipod

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the Kenk’s amphipod (Stygobromus kenki), a ground water species from the District of Columbia, Maryland, and Virginia, as an endangered species under the Endangered Species Act (Act). If we finalize this rule as proposed, it would extend the Act’s protections to the Kenk’s amphipod.

DATES: We will accept comments received or postmarked on or before November 29, 2016. Comments submitted electronically using the Federal eRulemaking Portal (see ADDRESSES below) must be received by 11:59 p.m. Eastern Time on the closing date. We must receive requests for public hearings, in writing, at the address shown in FOR FURTHER INFORMATION CONTACT by November 14, 2016.

ADDRESSES: You may submit comments by one of the following methods:

(1) Electronically: Go to the Federal eRulemaking Portal: http://www.regulations.gov. In the Search box, enter FWS–R5–ES–2016–0030, which is the docket number for this rulemaking. Then, in the Search panel on the left side of the screen, under the Document Type heading, click on the Proposed Rules link to locate this document. You may submit a comment by clicking on “Comment Now!”

We request that you send comments only by the methods described above. We will post all comments on http://www.regulations.gov. This generally means that we will post any personal information you provide us (see Public Comments below for more information).

FOR FURTHER INFORMATION CONTACT: Genevieve LaRouche, Field Supervisor, U.S. Fish and Wildlife Service, Chesapeake Bay Field Office, 177 Admiral Cochrane Drive, Annapolis, MD 21401, by telephone 410–573–4577 or by facsimile 410–269–0832. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible.

Therefore, we request comments or information from the public, other concerned governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule. We particularly seek comments concerning:

(1) The Kenk’s amphipod’s biology, range, and population trends, including:

(a) Biological or ecological requirements of the species, including habitat requirements for feeding, breeding, and sheltering;
(b) Genetics and taxonomy;
(c) Historical and current range including distribution patterns;
(d) Historical and current population levels, and current and projected trends; and
(e) Past and ongoing conservation measures for the species, its habitat, or both.

(2) Factors that may affect the continued existence of the species, which may include habitat modification or destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors.

(3) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to the species and existing regulations that may be addressing those threats.

(4) Additional information concerning the historical and current status, range, distribution, and population size of this species, including the locations of any additional populations of the species.

(5) Additional information on the hydrology (e.g., connectedness, size of recharge areas) of the known Kenk’s amphipod sites.

(6) Reliable methodology for estimating the total population size at an individual seep site (e.g., calculating the number of animals in the subsurface from the number of animals at the surface).

(7) Additional information on the interspecific interactions of amphipods at the known Kenk’s amphipod sites (e.g., predator/prey dynamics or competition for food or space resources).

(8) The specific tolerance of the Kenk’s amphipod or the Potomac groundwater amphipod (Stygobromus tenuis potomacus) to temperature, sewage effluent, chlorinated water, or other contaminants.

Please include supporting documentation with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for or opposition to the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is a threatened or endangered species must be made “solely on the basis of the best scientific and commercial data available.”

You may submit your comments and materials concerning this proposed rule by one of the methods listed in ADDRESSES. We request that you send comments only by the methods described in ADDRESSES.

If you submit information via http://www.regulations.gov, your entire submission—including any personal identifying information—will be posted on the Web site. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopies submissions on http://www.regulations.gov.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on http://www.regulations.gov, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Chesapeake Bay Field Office (see FOR FURTHER INFORMATION CONTACT).

Public Hearing

Section 4(b)(5) of the Act provides for one or more public hearings on this proposal, if requested. Requests must be received within 45 days after the date of publication of this proposed rule in the Federal Register. Such requests must be sent to the address shown in FOR FURTHER INFORMATION CONTACT. We will schedule public hearings on this proposal, if any are requested, and announce the dates, times, and places of those hearings, as well as how to obtain reasonable accommodations, in the Federal Register and local newspapers at least 15 days before the hearing.

Peer Review

In accordance with our joint policy on peer review published in the Federal Register on July 1, 1994 (59 FR 34270), we will seek the expert opinions of at least three appropriate and independent specialists regarding this proposed rule. The purpose of peer review is to ensure that our listing determination is based on scientifically sound data, assumptions, and analysis. The peer reviewers have expertise in Kenk’s Stygobromus amphipod biology, habitat, or stressors (factors negatively affecting the species) to the Kenk’s amphipod species or its habitat. We invite comment from the peer reviewers during this public comment period.

Previous Federal Action

In 2001, the Service received a petition to list the Kenk’s amphipod and two other invertebrates. Higher priority workload that consumed the listing budget prevented the Service from making a 90-day finding until fiscal year (FY) 2006 when we found that the petition did not present substantial information (72 FR 51766, September 11, 2007) indicating that listing may be warranted. In 2010, the Service, under its own candidate assessment process, initiated a status review for the Kenk’s amphipod, completed an analysis on the best available data, and determined that listing the species was warranted. However, we were precluded from moving forward with rulemaking for the species due to other higher priority listing actions. The Kenk’s amphipod was added to the FY 2010 candidate list (75 FR 69222, November 10, 2010). The species’ status was reviewed at least annually and continued to be found warranted but precluded for listing in all subsequent annual Candidate Notices of Review (76 FR 66370, October 26, 2011; 77 FR 69994, November 21, 2012; 78 FR 70104, November 22, 2013; 79 FR 72450, December 5, 2014; 80 FR 80584, December 24, 2015). For additional information see: http://ecos.fws.gov/tess_public/profile/speciesProfile?spcode=K04P (last accessed June 22, 2016). In 2011, the Service entered into a settlement agreement with the Center for Biological Diversity and WildEarth Guardians that specified a listing determination must be made for all species from the FY 2010 candidate list (Center for Biological Diversity v. Salazar 10–cv–0230 (D.D.C.); WildEarth Guardians v. Salazar Nos. 10–cv–0048; 10–cv–0421; 10–cv–1043; 10–cv–1045; 10–cv–1048; 10–cv–1049; 10–cv–50; 10–cv–51; 10–cv–1068; 10–cv–2299; 10–cv–2595; 10–cv–3366 (D.D.C.)). Per the settlement agreement, a not warranted finding or proposed listing rule for the Kenk’s amphipod must be delivered to the Federal Register no later than September 30, 2016.

Background

Taxonomy and Species Description

The Kenk’s amphipod (Stygobromus kenki) was first collected in 1967 by Roman Kenk from a spring in Rock Creek Park (Park), southeast of North National Capitol Parks’ headquarters in the District of Columbia, and it was formally described by J.R. Holsinger (1978, pp. 39–42). We have carefully reviewed the best available taxonomic data and conclude that the Kenk’s amphipod is a valid species.

The Kenk’s amphipod is a moderately small ground water crustacean, with the largest male and female specimens greater than 2.00 mm in length.
amphipod is a member of the Spinosus Group of Stygobromus, which includes two other closely related but separate species, Blue Ridge stygobromid (S. spinosus) and Luray Caverns amphipod (S. pseudospinosus), that are found only in Virginia, primarily in Shenandoah National Park. The Kenk’s amphipod is distinguished from those two species, as well as other co-occurring amphipods, such as the Potomac groundwater amphipod and Hay’s spring amphipod (S. hayi), on the basis of various morphological features (Holsinger 1978, p. 39). For additional morphological description details, please see the Kenk’s amphipod’s FY 2015 candidate assessment form here: http://ecos.fws.gov/docs/candidate/assessments/2015/r5/K04P_P101.pdf (last accessed on June 22, 2016).

Accurate identification of the Kenk’s amphipod can occur only when a specimen is removed from the seepage spring site (hereafter referred interchangeably as seepage spring, seep, spring, or site depending upon the reference), and preserved in alcohol or other fixing agent for identification by a species expert who removes legs and other appendages from the specimen for microscopic examination. This identification method is the best scientific method available. Because the laboratory identification results in mortality, the Service has been judicious in limiting the frequency and number of specimens removed from known sites.

Reproduction and Longevity

We have no reproductive or longevity information specific to the Kenk’s amphipod, but assume those attributes are similar to other Stygobromus species. Like other amphipods, females of the genus Stygobromus deposit their eggs in a brood pouch on their underside (Foltz and Jepson 2009, p. 2). Young of the Potomac groundwater amphipod hatch from the egg and actively swim from the brood pouch, with days or even weeks passing between the hatching of the first and last young of a brood (Williams 2013, p. 10). The immature stages resemble the adults, and individuals undergo successive molts (usually between eight and nine) until maturity. Most surface amphipod species from the family Talitridae complete their life cycle (egg to adult) in 1 year or less, but subterranean species like the Kenk’s amphipod have a longer life span and may live for 4 to 6 years (Foltz and Jepson 2009, p. 2).

Habitat

Amphipods of the genus Stygobromus occur in ground water and ground water-related habitats (e.g., caves, seeps, small springs, wells, interstices, and rarely deep ground water lakes). Members of this genus occur only in freshwater and belong to the family Crangonyctidae, the largest family of freshwater amphipods in North America, and have modified morphology for survival in the subterranean ground water that is their primary habitat. These species are generally eyeless and unpigmented (without color), and frequently have attenuated (reduced in length and width) bodies (Holsinger 1978, pp. 1–2). The Kenk’s amphipod is found in wooded areas where ground water emerges to form seepage springs (Holsinger 1978, p. 39). More specifically, this habitat is called the hypotelminorheic. Hypotelminorheic is described as habitats: (1) With a perched aquifer fed by subsurface water that creates a persistent wet spot; (2) underlain by a clay or other impermeable layer typically 5 to 50 centimeters (cm) (2 to 20 in) below the surface; and (3) rich in organic matter compared with other aquatic subterranean habitats. The water supplying the springs infiltrates to the ground water from precipitation and runoff into the catchment (e.g., recharge or drainage) areas (see Factor A—Water Quality/Quantity Degradation Due to Chronic Pollution of Urban/Suburban Runoff section below for more details). The water exits these habitats at seepage springs. Seepage springs typically have a diffuse discharge of water where the flow cannot be immediately observed but the land surface is wet compared to the surrounding area (Culver et al. 2012, p. 2). The shading, hydrologic conditions, and organic matter found in these woodlands are considered important factors in maintaining suitable habitat for this species. The Kenk’s amphipods have been found in the dead leaves or fine sediment submerged in the waters of its seepage spring outflows (Holsinger 1978, p. 130). The best available data indicate that the species will move between the surface and subterranean portions of the spring habitat, but it is unknown when or how often that movement occurs (Kavanaugh 2009, p. 3). Seepage springs typically have a drainage area of less than 10,000 square meters (2.5 acres); 1 hectare (ha) and their water quality parameters differ from those parameters of surface waters by having higher conductivity and dissolved oxygen, and lower pH and temperature (Culver et al. 2012, pp. 5–6). For example, an unpublished study (Culver and Chestnut 2006, pp. 1–3) found that sites supporting the genus Stygobromus had lower temperatures during spring and summer, higher dissolved oxygen, lower pH, and lower nitrate levels than other seepage springs (70 putative seepage springs) along the George Washington Memorial Parkway in Virginia. The Service has contracted with the Maryland Geological Survey to delineate the recharge areas and conduct electrical resistivity surveying to determine elevations of bedrock or clay that may be perching the water table, and to detect elevation of the water table of several seepage springs supporting the Kenk’s amphipod; however, the results of this study will not be available until 2017.

All Stygobromus species found in the hypotelminorheic habitats appear to have similar requirements—shallow ground water and springs with good water quality and persistent flow for most of the year in wooded habitats. Forest canopy cover appears to be necessary both for the shading and the food source its leaf litter provides. This food source consists of organic detritus and the microorganisms using the leaf litter as substrate.

Springs currently known to support the Kenk’s amphipod are found in forested areas with steep slopes, adjacent to streams, and overlying the Wissahickon geologic formation in the Piedmont of Maryland and the District of Columbia and the Calvert formation just above the Nanjemoy formation in the upper Coastal Plain of Virginia. While the applicable areas containing the known appropriate geology in the Piedmont of Maryland and the District of Columbia have been extensively surveyed for Kenk’s amphipod, the same is not true for areas in the Coastal Plain of Maryland and Virginia because information that these geological formations support occupied Kenk’s amphipod habitat is new to the Service and species experts (see the Distribution and Relative Abundance—Current Range and Distribution Since 2016 section below for more information). The Service conducted a preliminary geographic information system (GIS) analysis to determine that the total amount of forested areas containing the appropriate geology in the Coastal Plain areas of Maryland and Virginia is approximately 20,500 ac (8,296 ha), with approximately 3,063 ac (1,240 ha) on public lands. However, the potential amount of suitable habitat for the Kenk’s amphipod is less than 20,500 ac (8,296 ha). The Service will narrow the scope of potential habitat areas in Maryland and Virginia to areas underlain by the Nanjemoy formation as described in the service plan.

Potential threats to the Kenk’s amphipod include chemical contamination, temperature, and pH changes in the surface waters that perches the spring. The shading, hydrologic conditions, and organic matter found in these woodlands are considered important factors in maintaining suitable habitat for this species.

Temperature

Temperature is a significant factor for amphipods of the genus Stygobromus in the Chesapeake Bay area. The water exits these habitats at seepage springs. Seepage springs typically have a diffuse discharge of water where the flow cannot be immediately observed but the land surface is wet compared to the surrounding area (Culver et al. 2012, p. 2). The shading, hydrologic conditions, and organic matter found in these woodlands are considered important factors in maintaining suitable habitat for this species. The Kenk’s amphipods have been found in the dead leaves or fine sediment submerged in the waters of its seepage spring outflows (Holsinger 1978, p. 130). The best available data indicate that the species will move between the surface and subterranean portions of the spring habitat, but it is unknown when or how often that movement occurs (Kavanaugh 2009, p. 3). Seepage springs typically have a drainage area of less than 10,000 square meters (2.5 acres); 1 hectare (ha) and their water quality parameters differ from those parameters of surface waters by having higher conductivity and dissolved oxygen, and lower pH and temperature (Culver et al. 2012, pp. 5–6). For example, an unpublished study (Culver and Chestnut 2006, pp. 1–3) found that sites supporting the genus Stygobromus had lower temperatures during spring and summer, higher dissolved oxygen, lower pH, and lower nitrate levels than other seepage springs (70 putative seepage springs) along the George Washington Memorial Parkway in Virginia. The Service has contracted with the Maryland Geological Survey to delineate the recharge areas and conduct electrical resistivity surveying to determine elevations of bedrock or clay that may be perching the water table, and to detect elevation of the water table of several seepage springs supporting the Kenk’s amphipod; however, the results of this study will not be available until 2017.

All Stygobromus species found in the hypotelminorheic habitats appear to have similar requirements—shallow ground water and springs with good water quality and persistent flow for most of the year in wooded habitats. Forest canopy cover appears to be necessary both for the shading and the food source its leaf litter provides. This food source consists of organic detritus and the microorganisms using the leaf litter as substrate.

Springs currently known to support the Kenk’s amphipod are found in forested areas with steep slopes, adjacent to streams, and overlying the Wissahickon geologic formation in the Piedmont of Maryland and the District of Columbia and the Calvert formation just above the Nanjemoy formation in the upper Coastal Plain of Virginia. While the applicable areas containing the known appropriate geology in the Piedmont of Maryland and the District of Columbia have been extensively surveyed for Kenk’s amphipod, the same is not true for areas in the Coastal Plain of Maryland and Virginia because information that these geological formations support occupied Kenk’s amphipod habitat is new to the Service and species experts (see the Distribution and Relative Abundance—Current Range and Distribution Since 2016 section below for more information). The Service conducted a preliminary geographic information system (GIS) analysis to determine that the total amount of forested areas containing the appropriate geology in the Coastal Plain areas of Maryland and Virginia is approximately 20,500 ac (8,296 ha), with approximately 3,063 ac (1,240 ha) on public lands. However, the potential amount of suitable habitat for the Kenk’s amphipod is less than 20,500 ac (8,296 ha). The Service will narrow the scope of potential habitat areas to

Potential threats to the Kenk’s amphipod include chemical contamination, temperature, and pH changes in the surface waters that perches the spring.
survey by evaluating slope, adjacent waterways, and other habitat quality parameters.

**Distribution and Relative Abundance**

**Known Range and Distribution Prior to 2016**

Prior to 2016, all known occurrences of the Kenk’s amphipod were from the Potomac River watershed in or near the District of Columbia. At the time of its description, this amphipod was known from two seepage springs (East Spring and Holsinger Spring) in Rock Creek Park in the District of Columbia and was initially thought to be identified from one shallow well in Fairfax County in northern Virginia (Holsinger 1978, p. 39; Terwilliger 1991, p. 184). However, the single immature male specimen from this well was later reexamined by a taxonomic expert and determined not to be a Kenk’s amphipod (Holsinger 2009, p. 266). Because of the difficulty in finding the small seepage area of Holsinger Spring, the location was surveyed only once (in 2003) between the Kenk’s amphipod’s original discovery at the site in 1967 and surveys conducted in 2015.

The Kenk’s amphipod was discovered in two additional springs (Sherrill Drive Spring and Kennedy Street Spring (this spring also supports the federally endangered Hay’s Spring amphipod) in Rock Creek Park in 1995 and 2001 and in two springs (Coquelin Run Spring and Burnt Mill Spring #6) in Montgomery County, Maryland, in 2003 to 2004, bringing the total number of springs known to support the Kenk’s amphipod to six. All of these sites are considered to be in the Washington metropolitan area because they are all within the Washington Beltway (i.e., the I-495 highway).

Until 2016, the species was known only from six seepage spring sites in the District of Columbia and Montgomery County, MD (Culver and Sereg 2004, pp. 35–36; Feller 2005, p. 5) (see figure 1 below), despite extensive surveys for the species in the same area (Feller 1997, entire; Culver and Sereg 2004, entire; Feller 2005, entire). Ground water amphipod surveys on National Park Service (NPS) properties in Arlington and Fairfax Counties, VA, failed to detect the Kenk’s amphipod (Hutchins and Culver 2008, entire). In addition, surveys in 2014 in the vicinity of the proposed Purple Line light rail project in Montgomery County, MD, also failed to detect the species (Culver 2015, entire).

Within the species’ historical range, the District of Columbia and Maryland, it is plausible that urbanization of the Rock Creek and Northwest Branch watersheds (outside of the protected parklands) has reduced the range and distribution of the Kenk’s amphipod because many large and small springs throughout these drainages have been lost as a result of urbanization (Williams 1977, entire; Feller 2005, p. 11). In particular, the southern Rock Creek watershed is where most of the natural tributaries and springs in the District of Columbia south of the National Zoo have been lost due to leveling and filling of the stream valleys, or conversion to covered sewers (Williams 1977, pp. 6, 11). However, there is no available method to estimate to what extent the Kenk’s amphipod may have been present in these areas. The best available data indicate that there were no ground water amphipod surveys at any of the springs prior to those habitat areas being filled or otherwise converted to unsuitable habitat.

**Current Range and Distribution Since 2016**

Within the Washington metropolitan area, five of the known sites are within the Rock Creek drainage: Four are within Rock Creek Park in the District of Columbia (Holsinger Spring, Kennedy Street Spring, East Spring, and Sherrill Drive Spring), and the fifth (Coquelin Run Spring) is in Montgomery County, MD, not far from the District of Columbia border. A sixth known site (Burnt Mill Spring #6) is within the Northwest Branch Park in the Northwest Branch drainage in Montgomery County, MD, approximately 3 miles (mi) (4.8 kilometers (km)) from the District of Columbia border. Thus, the current range of this species in the Washington metropolitan area is limited to Federal land (four sites) and private property (one site) adjacent to approximately 4 linear mi (6.4 km) of Rock Creek, and a single site to the east, on county parkland adjacent to the Northwest Branch. Both Rock Creek Park and the Northwest Branch Park are long, linear parks within heavily urbanized areas.

In addition to the distribution described above for the Washington metropolitan area, a new area occupied by the Kenk’s amphipod was identified in 2016—the U.S. Army’s Fort A.P. Hill installation in Caroline County, VA, approximately 60 mi (97 km) south of all previously known sites (see figure 1 below). The species was collected during surveys conducted for another amphipod species in 2014, but not identified as the Kenk’s amphipod until May 2016, when the Service was notified of the information. Out of a total of 21 surveyed sites on the installation, 4 were found to contain the Kenk’s amphipod. Seven Kenk’s amphipod individuals were identified from these four springs, which are along Mount and Mill Creeks, both tributaries of the Rappahannock River (J. Applegate, pers. comm., 05/02/2016; C. Hobson, pers. comm., 05/12/2016) (see figure 1). The spring sites in the two creek systems are approximately 7.5 mi (12 km) apart. The area immediately surrounding Fort A.P. Hill is less developed than the Washington metropolitan area.
There are no reliable total population numbers for Kenk's amphipod sites due to sampling difficulties (e.g., flow conditions) and the lack of information on the portion of the population that may remain in the springs' ground water supply (Feller 2005, p. 10). However, because surveying in the Washington metropolitan area has been conducted using systematic and consistent methods, the current distribution of the 10 known Kenk's amphipod seep sites is known. Due to scale, some sites are obscured by the symbols of others.

**Figure 1.** Current distribution of the 10 known Kenk’s amphipod seep sites. Due to scale, some sites are obscured by the symbols of others.
methodology over many years, often by
the same individuals, the numbers of
Kenk’s amphipod individuals observed
and the number of conducted surveys
required to find the species are
considered to be the best available data
and do provide a reliable indication of
the species’ relative abundance.

The species is typically found in
small numbers and then only when
ground water levels are high and springs
are flowing freely, conditions that cause
the Kenk’s amphipod to be transported
to the surface. These conditions
typically occur during the spring
season, except during especially dry
years. Given the small size of the
shallow ground water aquifers
supporting the sites occupied by this
species, and the known characteristics
of subterranean invertebrates, it is
probable that each of the Kenk’s
amphipod populations has always been
small (Hutchins and Culver 2008, pp. 3–
6).

Although specimens were not
collected and identified to the species
level, Stygobromus sp., including some
in the right size range for Kenk’s
amphipod, were observed during site
reconnaissance visits between 2004 and
2015 in several of the known Kenk’s
amphipod Washington metropolitan
area spring habitats (B. Yeaman, pers.
comm., 05/04/2012). In addition, visual
inspections during this same time
period indicated that most of the sites
continued to appear to be suitable
habitat, leading us to conclude that the
Kenk’s amphipod was extant at least at
Burnt Mill Spring #6, Kennedy Street
Spring, and East Spring (D. Feller, pers.
comm., 04/01/2015). However, actual
identifications of specimens collected
during surveys conducted in 2015 and
2016 (D. Feller, pers. comm., 03/16/
2016) suggest that the species may not
be extant at those sites (see below).

Prior to 2015, all Kenk’s amphipod
specimens were discovered on the first
or second survey conducted at all
known sites. In 2015 and 2016, Kenk’s
amphipod was confirmed at only one of
the Washington metropolitan area
spring sites, Coquelin Run Spring,
despite all of the sites being sampled
multiple times during these 2 years (see
table 1 below) (D. Feller, pers. comm.,
03/16/2016; D. Feller, pers. comm., 04/
22/2016). It is unclear whether the
species may be extirpated at Burnt Mill
Spring #6, Kennedy Street Spring, and
East Spring, but the best available data
show a decrease in observed individuals
at these sites.

Although there have been no Kenk’s
amphipods (Stygobromus kenki)
observed at five of the six District of
Columbia/Maryland sites during the
2015–2016 survey efforts, increasing
numbers of Potomac groundwater
amphipod have been observed at several
of the sites (Burnt Mill Spring #6, East
Spring, Kennedy Street Spring, and
Holsinger Spring) (D. Feller, pers.
comm., 04/22/2016). At Sherrill Drive
Spring, no Stygobromus species have
been detected for 12 years, and the
water quality at this site has been
documented to be poor (see Factor A—
Water Quality/Quantity Degradation
Due to Chronic Pollution of Urban/
Suburban Runoff section below for more
details), leading us to conclude that the
species is likely extirpated at this site.
This conclusion is consistent with the
earlier characterization of the
population at this site by Culver and
Sereg (2004, p. 73) over a decade ago as
“barely hanging on.”
At Fort A.P. Hill, all collections of the Kenk’s amphipod were taken during surveys conducted in the spring of 2014; therefore, no trend data exist for the four occupied spring sites. Twenty-one sites were surveyed with 5 to 7 visits per site. The numbers of the Kenk’s amphipod collected that year were low at all sites, ranging from 1 to 4 individuals (see table 1 above). Other species of Stygobromus, including S. tenuis (no common name), Tidewater stygonectid amphipod (S. indentatus), and Rappahannock Spring amphipod (S. foliatus), were also found at several of these Virginia sites.

Summary of Distribution and Relative Abundance: The above information represents the best available data on the Kenk’s amphipod’s known distribution and relative abundance. However, the habitat areas at Fort A.P. Hill occur in different river drainages and geological formations from those in the Washington metropolitan area, which suggests that additional surveys may identify additional locations and further expand the species’ current known range. The Service plans to fund additional amphipod surveys to be conducted during suitable sampling conditions in late 2016 and early 2017 in accessible areas of Maryland and northeastern Virginia that have geology similar to that of the Fort A.P. Hill sites and other suitable habitat characteristics (e.g., forested slopes dissected by streams). The U.S. Army also plans to conduct additional amphipod surveys at Fort A.P. Hill in spring 2017. Additional surveys for the known Maryland and the District of Columbia sites are also planned.

Summary of Biological Status and Threats

The Act directs us to determine whether any species is an endangered species or a threatened species because of any factors affecting its continued existence. In this section, we review the biological condition of the species and its resources, and the influences on such to assess the species’ overall viability and the risks to that viability.

Table 1. Survey results for Kenk’s amphipod—The first pair of numbers (e.g., “1 of 2”) indicates the number of site visits where the species was detected compared to the total number of site visits that year. The numbers in parenthesis “( )” are the total number of Kenk’s amphipod collected. The N/A indicates no surveys were conducted at the site in that year.

</table>
Factor A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Water Quality/Quantity Degradation Due to Chronic Pollution of Urban/Suburban Runoff

Habitat modification, in the form of degraded water quality and quantity, is one of the primary drivers of Kenk’s amphipod viability. While the species’ specific tolerances to parameters affecting water quality and quantity is not yet known, we do know that the Kenk’s amphipod is at increased risk to parameters that negatively affect water quality and quantity because these freshwater amphipods spend their entire life cycle in water and are, therefore, continually exposed to changes in the aquatic habitat. Water quality degradation of ground water at spring sites located in the Washington metropolitan area has been previously cited as a top concern in several studies and reports (Feller 1997, pp. 12–13; Culver and Sereg 2004, p. 13; Feller 2005, p. 9; Hutchins and Culver 2008, p. 6; Kavanaugh 2009, p. 60; Culver et al. 2012, p. 37; Culver and Pipan 2014, p. 219).

The amount of forested buffer surrounding the seep influences the species’ vulnerability and exposure to negative effects, and the smaller the buffer, the greater the risk of exposure. Buffer distance is important because the buffer helps filter sediment and other contaminants from the surface water entering the catchment areas and, therefore, the ground water that supports the Kenk’s amphipod. The Washington metropolitan area amphipod sites have narrow riparian buffers (94 feet (ft) to 1,000 ft (29 m to 305 m) separating them from the surrounding urban landscape. This urban land is characterized by impervious surface cover, which includes paved roads, sidewalks, parking lots, and buildings (Sexton et al. 2013, p. 42). The general percentage of impervious surface inside the Capitol Beltway (I–495) (i.e., where all the District of Columbia and Maryland Kenk’s amphipod sites are located) increased from 22 percent in 1984 to 26 percent in 2010. The annual rate of increase in impervious cover within the Washington Beltway has also doubled since the 1980s, from 2 to 4 square (sq.) miles (6 to 12 sq. km) (Sexton et al. 2013, pp. 42–53; Song et al. 2016, pp. 1–13; http://www.earthobservatory.nasa.gov/IO/TD/view.php?id=87731, last accessed 07/07/2016).

Urban impervious surfaces can result in increased surface water flow after storm events due to decreased opportunity for immediate or proximal infiltration. The surface flow waters have higher temperatures, higher sediment loads, and higher levels of heavy metals (zinc, cadmium), nitrogen, phosphorus, and fecal coliform bacteria (Walsh et al. 2005, pp. 706–723). In addition to affecting water quality, urban impervious surfaces can affect water quantity; decreased infiltration can result in depletion of ground water reserves and ultimately cause springs to dry up over time (Frazer 2005, p. 3).

It is well documented that impervious cover from urbanization affects biological communities in streams. For example, a review of more than 30 studies by the Center for Watershed Protection (2003, pp. 101–102) found that sensitive aquatic insect species were absent or less abundant in streams that drain from urban areas, and aquatic insect diversity decreased when imperviousness reached 10 to 15 percent. The Maryland Department of Natural Resources (MDDNR) found that, in Maryland when the general percentage of watershed imperviousness exceeds 15 percent, stream health is never rated as “good,” based on a combined fish and benthic macroinvertebrate Index of Biotic Integrity. The Potomac Washington metropolitan basin, which incorporates the area surrounding Kenk’s amphipod sites, has the smallest percentage of stream miles rated as “good” (less than 1 percent) (Boward et al. 1999, p. 45).

Hyporheic habitat, which is a transition area between surface and shallow ground water, is found within the interstitial spaces within the sediments of a stream bed but also can be found in spring runs (Culver and Sereg 2004, pp. 70–71) that support the Kenk’s amphipod. Hancock (2002, pp. 766–775) evaluated human activities that affect the hyporheic zone. Pesticide pollution, heavy metal and chemical pollution from industrial and urban sources, increased salinity, and acidity were all cited as stressors that may make this habitat unsuitable for invertebrates. In addition to documenting lethal effects on individuals from these stressors, researchers have documented changes in macroinvertebrate diversity and abundance that include an increase in species that are tolerant to elevated levels of the stressors and a decrease in species sensitive to elevated levels of those stressors (Hancock 2002, pp. 768–770).

The hypotelmminorheic zone, which is described as the main habitat required by the Kenk’s amphipod, may be more vulnerable to the effects of urban runoff than streams or the hyporheic zone with respect to pollutants, erosion, and sedimentation because of the small size and shallow nature of the habitat. In addition, the aforementioned narrow buffer zones around the hypotelmminorheic sites increase the habitat’s and species’ exposure to urban runoff.

Storm water runoff in urban areas is commonly transported through Municipal Separate Storm Sewer Systems (MS4s), from which it is often discharged untreated into local waterbodies. Storm water is regulated to prevent harmful discharges of pollutants into MS4s. The Clean Water Act’s (CWA’s) National Pollutant Discharge Elimination System program requires permits for discharges into MS4s and development of storm water management programs. Despite these regulatory requirements, poor water quality has been documented in the past at several springs in Rock Creek Park (Culver and Sereg 2004, p. 69). In the Washington metropolitan area, water quality degradation due to urban runoff is believed to have affected the Kenk’s amphipod’s Sherrill Drive Spring population (Culver and Sereg 2004, p. 69). Sherrill Drive Spring is close (approximately 115 ft (35 m)) to the edge of Rock Creek Park where there is an abrupt change from forested habitat to an urban landscape along 16th Street Northwest, which parallels the park boundary. There is a significant amount of impervious cover that routes runoff into the catchment area surrounding the Sherrill Drive Spring.

While there have been no laboratory studies conducted to evaluate the effects and tolerance of the Kenk’s amphipod or the more common Potomac groundwater amphipod to chemical, nutrient, pesticide, or heavy metal pollution, we do know from published studies that amphipods may be one of the most vulnerable groups of organisms to chemical pollution due to their high sensitivity to toxicants and contaminant accumulation (Borgmann et al. 1989, p. 756; Brumee-Turc 1989, p. 40). Culver and Sereg (2004, pp. 30–31) collected water samples from the East Spring, Kennedy Spring, and Sherrill Drive Spring sites on four occasions (October 2000, April 2001, July 2001, and March 2003) to measure temperature, pH, conductivity, dissolved oxygen, and nitrates. Sediment samples surrounding the springs were also collected in September 2001 at East Spring and Sherrill Drive Spring to analyze metal and organic contaminants. From these samples, Sherrill Drive Spring showed evidence of water quality degradation via the presence of heavy metals and higher nitrate and conductivity levels as
compared to the other sampled spring sites; East Spring also had evidence of heavy metals (see below) (Culver and Sereg 2004, pp. 30–31).

Heavy metals were found in sediment samples taken from Sherrill Drive Spring and East Spring in Rock Creek Park. Values were similar for the two sites, although East Spring had the highest values for all heavy metals, with the exception of zinc (Culver and Sereg 2004, p. 65). Because the spring sediments instead of water samples were collected for heavy metal analysis, it is difficult to know whether the value of the heavy metals measured in the sediments exceed aquatic life standards in water or any published values for freshwater amphipod species. Sources of trace metals in an urban environment may include vehicles, streets, parking lots, snowparks, and rooftops (Center for Watershed Protection 2003, p. 73).

Nitrate levels as high as 30.8 milligrams per liter (mg/L) were also found at Sherrill Drive Spring. There are no aquatic life standards for nitrates issued by the Maryland Department of the Environment, the District of Columbia Department of the Environment, or the U.S. Environmental Protection Agency (EPA). Therefore, we reviewed the best available and relevant guidance values from Minnesota, Canada, and New Zealand (Minnesota Pollution Control Agency 2010, p. 9; Canadian Council of Ministers of the Environment 2012, p. 1; Hickey and Martin 2009, p. 20). Based on the comparison with available guidance, the nitrate concentrations collected at Sherrill Drive Spring (up to 30.8 mg/L) exceeded the chronic aquatic life exposure criterion for nitrate (e.g., 2.4 mg/L to 4.9 mg/L) based on Minnesota, New Zealand, and Canada guidance values on three of the four sampling events. It is not known how typical these concentrations are and if chronic exposure is occurring. The source of the nitrate is unknown; nitrate could come from runoff containing fertilizers or animal waste or from sanitary sewer leaks. There is a sanitary sewer line that runs adjacent to the spring, and this sewer line has leaked in the past (Feller 1997, p. 37; B. Yeaman, pers. comm., 06/02/2014).

Chloride levels as high as 207 mg/L were detected at Sherrill Drive Spring. Chronic concentrations of chloride as low as 250 mg/L have been recognized as harmful to freshwater life (Canadian Council of Ministers of the Environment 2011, p. 1; https://www.epa.gov/wqc/national-recommended-water-quality-criteria-aquatic-life-criteria-table, last accessed 07/19/2016). Although we do not know the exact source of the elevated chloride levels at Sherrill Drive Spring, one potential source could be road salt. The Washington metropolitan area receives, on average depending on where it was measured and the time series, approximately 15 inches of snow annually (https://www.sercc.com/climateinfo/historical/avgsnowfall.html, last accessed August 10, 2016; https://www.currentresults.com/Weather/US/washington-dc-snowfall-totals-snow-accumulation-averages.php, last accessed 8/10/2106). The District of Columbia Department of Public Works uses road salt and other salt products to pre- and post-treat road surfaces before and after ice and snowfall events (http://dpw.dc.gov/service/dc-snow-removal, last accessed 8/10/2016). Studies have shown that the widespread use of salt to deice roadways has led to regionally elevated chloride levels equivalent to 25 percent of the chloride concentration in seawater during winter. The chloride levels can remain high throughout the summer even in less urbanized watersheds due to long-term (e.g., decades) accumulation of chloride in ground water (Kaulsh et al. 2005, pp. 13518–13519).

At Coquelin Run Spring, ground water pollution from yard chemicals and road runoff (e.g., road salts, oil) could be a concern for the species' long-term viability. U.S. Geological Survey (USGS) research on water quality degradation in other urban areas indicates that chemicals enter waterways and ground water primarily through runoff from rain events and these chemicals have commonly been detected in streams and shallow ground water (USGS 1999a, pp. 1–3; USGS 1999b, p. 1; USGS 2001, p. 2; http://pubs.usgs.gov/fs/1998/fs00798/index.html, last accessed 07/19/2016). Although no water samples have been taken at the Coquelin Run Spring site, it is separated from backyards in this neighborhood by a narrow, wooded riparian strip (less than 100 ft) (30 m) that slopes steeply down to the site. Therefore, the Coquelin Run Spring may be at increased risk of exposure to chemical pollution from surrounding urban development.

The other four Washington metropolitan area sites (Burnt Mill Spring #6, Holsinger Spring, East Spring, and Kennedy Spring) have wider buffers than Sherrill Drive Spring and Coquelin Run Spring, with buffer distances ranging from approximately 272 ft (83 m) to 1,000 ft (305 m). East Spring and Kennedy Spring had much lower conductivity and chloride levels than Sherrill Drive Spring (Culver and Sereg 2004, pp. 55–56). Surveys conducted in 2015 and 2016 did not confirm the Kenk’s amphipod at any of these sites but consistently found the more common Potomac groundwater amphipod at all the sites in higher numbers (e.g., greater than 40 observed at Burnt Mill Spring #6 during 1 sampling event). As discussed previously, urban runoff can decrease biotic richness and favor more pollution-tolerant species in urban streams (Center for Watershed Protection 2003, pp. 101–102). If the Potomac groundwater amphipod has a higher tolerance than Kenk’s amphipod to poor water quality parameters, the change in species’ composition discussed above in the Relative Abundance section and below in Factor E—Changes in Species Composition could indicate that urban runoff is negatively affecting the Kenk’s populations at these spring sites. Water quality samples will be collected at these sites in 2016 and 2017 to better assess whether water quality parameters exceed general EPA guidance values for aquatic life.

The NPS manages the surrounding habitat at the four seepage spring sites supporting the Kenk’s amphipod in Rock Creek Park. Conservation of park resources is mandated by the National Park Service Organic Act of 1916, which requires the NPS “to conserve the scenery and the natural and historic objects and the wildlife therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.” It is also mandated by section 7 of the Rock Creek Park enabling legislation of 1890, which states that “such regulations shall provide for the preservation from injury and spoliation of all timber, animals, or curiosities within said park, and their retention in their natural condition, as nearly as possible.” These laws are implemented through the NPS’s formal management policy that requires that management of candidate species should, to the greatest extent possible, parallel the management of federally listed species (D. Pavek, pers. comm., 05/12/2011). While the NPS retains its regulatory authority to manage water quality concerns for the species within Rock Creek Park, the agency has little influence over the protection of or effects to any seep recharge areas occurring outside park boundaries, and over maintenance or repair of city-owned infrastructure such as storm water and sewer systems located near the spring sites.

The NPS worked with the District of Columbia Department of Transportation (DCDST) to incorporate the construction of a storm sewer under
Sherrill Drive into the design of the 16th Street road reconstruction and storm drainage project (B. Yeaman, pers. comm., 05/19/2015), resulting in the elimination of a major outfall at the Sherrill Drive Spring site. However, as discussed above, this effort has not completely eliminated the documented erosion and poor water quality concerns at the site.

The NPS is communicating with DCDOT on the need to move the sanitary sewer line adjacent to the Sherrill Drive Spring out of Rock Creek Park and into the neighborhood on the other side of 16th Street. If the line cannot be moved, the alternative is to reline the existing pipe to prevent further leakage (B. Yeaman, pers. comm., 07/11/2016). In addition, the Service, NPS, and the District of Columbia Department of the Environment have worked cooperatively to obtain funding for best management practices (reducing erosion and increasing infiltration) on two tributaries flowing into the drainage of Kennedy Street Spring, which supports both the Kenk’s amphipod and the federally endangered Hay’s Spring amphipod. Project funding was approved in January of 2015, and implementation, which includes construction of bioretention basins and infiltration berms, is to be completed by November 2017.

In Virginia, poor water quality may not be affecting the species at the Fort A.P. Hill because the sites are substantially buffered by currently undeveloped property. **Summary of Water Quality**—In total, poor water quality is believed to be a significant or contributing stressor at all six of the Washington metropolitan area sites (i.e., 60 percent of the total known sites). Water quality in this area is expected to worsen due to significant runoff events from anticipated increases in both winter and spring precipitation and the frequency of high intensity storms. See Factor A—Excessive Storm Water Flows and Factor E—Effects of Climate Change sections below for more details.

**Excessive Storm Water Flows**

Runoff from impervious surfaces after heavy rain events can result in flooding (Frazer 2005, p. 4; http://www.nbcwashington.com/traffic/transit/Metro-Station-Flooding-Nearby-Parking-Lot-Expansion-Could-Be-Part-of-Cause-384015451.html; last accessed 06/24/16). Flash flooding can also result in erosion and sedimentation (Center for Center for Center for Center for Watershed Protection 2003, pp. 30–33), which, if it occurs in the catchment area, can subsequently degrade a spring site’s value as habitat for the Kenk’s amphipod.

In the Washington metropolitan area, excessive storm water flows are causing significant habitat degradation at two sites—Sherrill Drive Spring and Coquelin Run Spring. A washout at Sherrill Drive Spring from 16th Street was observed in 2016 making it difficult to find a seep to survey (D. Feller, pers. comm., 06/15/2016). Coquelin Run Spring is severely degraded by runoff from the surrounding Chevy Chase Lake Subdivision, where severe erosion was first observed at this site in 2006 (D. Feller, pers. comm., 07/01/2016). When the site was first re-surveyed in 2016, a plastic underground pipe several inches in diameter was observed less than 1 ft (0.3 m) from the original seep (D. Feller, pers. comm., 02/27/2016; D. Feller, pers. comm., 05/25/2016), which may have been an attempt to address water flow and erosion at the site. Erosion was still evident during the 2016 surveys and it was difficult for MDDNR to find a flowing seep (D. Feller, pers. comm., 02/27/2016). A small flow was observed in May 2016, but was located several feet above the original seep documented in 2006. Plastic sheet material was also observed under this uphill seep (D. Feller, pers. comm., 05/25/2016), which may have been an attempt to address water flow and erosion at the site. It is unknown what affect the pipe or plastic may have on the long-term hydrology of the site.

Erosion from storm water flows has also been observed at the other four springs in Rock Creek Park, but not to the extent that it has been observed at Sherrill Drive and Coquelin Run springs. It is unknown how much chronic or acute erosion and sedimentation causes a site to become unsuitable for the Kenk’s amphipod; however, Culver and Sereq (2004, p. 69) found that sediment transported by storm runoff results in the degradation of ground water animals’ habitat by clogging the interstices of gravels in the spring seep, thereby preventing the species from using those interstitial spaces for shelter. It is uncertain to what extent Kenk’s amphipod uses those interstitial spaces, but if they do, then it is plausible that this type of sedimentation would cause the habitat to become unsuitable for the species.

At the Virginia sites, we have no information indicating excessive storm water flows may affect the species. **Summary of Excessive Storm Water Flows**— Excessive storm water flows are a concern at 60 percent (6 of 10) of the species’ sites.

**Sewer Line Breaks and Spills**

The same riparian areas that contain the habitats of the Kenk’s amphipod are among the principal areas where sewer lines are located in the Washington metropolitan area (Feller 2005, p. 2). Most of these sewer lines are old (most installed between 1900 and 1930 in the District of Columbia, and between 1941 and 1971 in Montgomery County, MD) and subject to periodic breakage and leakage (Shaver 2011, entire; Kiely 2013, entire). While there have been no laboratory or field studies evaluating the effect of sewage leaks or spills on the Kenk’s amphipod or the Potomac groundwater amphipod, adverse effects of sewage contamination on amphipods and other invertebrates have been documented by several researchers. For instance, Simon and Buikema (1977, entire) studied a karst ground water system and found that amphipods were absent from ground water pools polluted by septic system effluent. The authors reported that the highest densities of Virginia cave isopods were found in pools that were slightly and moderately polluted from septic systems, whereas an amphipod, *Stygobromus makini* (southwestern Virginia cave amphipod), was absent from all polluted pools. de-la-Ossa-Carretero et al. (2012, p. 137) stated that, as an Order, amphipods were generally sensitive to sewage pollution, but that there are substantial differences in sensitivity between amphipod species (de-la-Ossa-Carretero et al. 2012, p. 129).

Releases of large volumes of sewage (up to 2 million gallons (gal)) from sanitary sewer leaks have occurred in the District of Columbia and Montgomery County, MD. Distances of seep sites to nearby upslope sewer lines are shown in table 2 below. Based on these distances, Coquelin Run Spring, Burnt Mill Spring #6, and Sherrill Drive Spring are most vulnerable to sewage spills (see table 2 below). As mentioned above, a sanitary sewer line located nearby Sherrill Drive Spring has been described as structurally unsound and is subject to leakage (Feller 1997, p. 37; B. Yeaman, pers. comm., 06/02/2014; B. Yeaman, pers. comm., 02/24/15).

Over the 10-year period from 2005 through 2015, the Washington Suburban Sanitary Commission (WSSC) has documented approximately 38 leaks of more than 1,000 gal in the Rock Creek drainage and 15 leaks of more than 1,000 gal in the Northwest Branch in Montgomery County. During the same period, Water Flows from Anticipated Increases in Runoff from Impervious Surfaces and Factor E—Effects of Climate Change sections below for more details.  

**Summary of Excessive Storm Water Flows**— Excessive storm water flows are a concern at 60 percent (6 of 10) of the species’ sites.
Northwest Branch in Montgomery County (WSSC 2015). The District of Columbia does not have such detailed records, but the District of Columbia Water Chief Executive Officer has stated that half the District’s 1,800 mi (2,896 km) of sewer lines are at least 84 years old and has estimated that faulty pipes result in two dozen sewer spills every year (Olivio 2015). The frequency of spills is likely to increase in the future as the sewer lines continue to age.

</table>

At the Virginia sites, we have no information indicating sewer pipelines may affect the species.

**Summary of Sewer Line Spills**—In total, sewer line breaks and spills are a concern at 30 percent (3 of 10) of the species’ sites.

**Water Pipe Breaks**

Bursting of large-diameter water pipes can cause significant erosion of surrounding areas as a result of the large volume of fast-moving water that exits the pipe at the break point. Bursting water pipes and the resulting erosion has been documented within the Washington metropolitan area, including at areas near but not directly at a specific Kenk’s amphipod seep site. For example, a 60-in (152.4-cm) water main broke at the Connecticut Avenue crossing of Coquelin Run in 2013, releasing 60 million gal of water and scouring out a 500-ft (152.4-m) length of the creek (Dudley et al. 2013, entire). The Coquelin Run Spring site is on a small tributary that flows into Coquelin Run, about a quarter mile downstream of the aforementioned severely damaged section of the creek bed and, due to its elevation above Coquelin Run, was not affected by the flood and subsequent erosion caused by this burst pipe.

The exposure risk of bursting water pipes at locations that could affect Kenk’s amphipod sites is increasing given the age of the water pipe infrastructure (see table 2 above). As an example, there is one very-large-diameter (30-in (76-cm)) water pipe within 130 ft (39.6 m) of Sherrill Drive Spring that was installed more than 60 years ago. The significant erosion resulting from a large break, should the break occur near Kenk’s amphipod habitat, could eliminate the seep and all associated amphipods.
The best available data indicate that there are smaller pipes near three of the sites (Sherrill Drive Spring, Burnt Mill #6 Spring, Coquelin Run Spring) (WSSC GIS Web site, http://gisweb.wsscwater.com/WEBI/Account/ Login?ReturnUrl=%2fweri, last accessed 12/21/2015) (see table 2 above). Although less likely to eliminate habitat of springs, breakage of smaller pipes (less than 1 ft (0.3 m) in diameter) is even more frequent (Water Research Foundation 2016, p. 2) and still may result in erosion or sedimentation at the spring site. Coquelin Run Spring is within 250 ft of a 6- to 8-in (15- to 20-cm) water pipe installed in 1954 (WSSC GIS Web site). Given the overall age of the infrastructure and the District of Columbia and Maryland utilities’ inability to keep up with the needed replacements (Shaver 2011, entire; Kiely 2013, entire), additional breaks are predicted to occur.

At the Virginia sites, we have no information indicating water pipeline breaks may affect the species.

Summary of Water Pipe Breaks—In total, large water pipeline breaks are a concern at 10 percent (1 of 10) of the species’ sites, while smaller water pipeline breaks are a concern for 30 percent (3 of 10) of the sites.

Other Habitat Considerations

Compared to the stressors to the Kenk’s amphipod habitat in the Washington metropolitan area, the stressors to the species’ habitat at Fort A.P. Hill are likely minimal. Little or no development is expected to occur near the spring sites (J. Applegate, pers. comm., 05/5/2016). However, military training exercises may be conducted in areas surrounding the springs, which may result in disturbance of the spring recharge areas. Live-fire exercises may result in uncontrolled burns that reduce canopy cover that shades the seep sites, moderates water temperature, and provides leaf litter for food. Timber harvests and other forest management activities such as timber stand improvement, prescribed burns, and possible pesticide application for forest-destroying pests such as gypsy moths may occur in the general vicinity of the springs (Fort A.P. Hill 2016, pp. 751–754). Fort A.P. Hill has included a 100-ft (30.5-m) buffer around the springs in the installation’s Integrated Natural Resources Management Plan (INRMP) (2016, pp. 9–22), but it is unknown whether this buffer distance is sufficient to protect the sites and recharge areas from all of the activities (e.g., forest management, live-fire exercises) outlined in the INRMP. However, staff at Fort A.P. Hill have indicated a willingness to work with the Service to delineate recharge areas based on topography, and, if needed, institute more protective buffers (J. Applegate, pers. comm., 06/15/2016).

Summary of Factor A—Habitat modification, in the form of degraded water quality and quantity, is one of the primary drivers affecting Kenk’s amphipod viability, despite the discussed ongoing conservation measures. Reductions in water quality are occurring primarily as a result of urbanization, which increases the amount of impervious cover in the watersheds surrounding Kenk’s amphipod sites. Impervious cover increases storm water flow velocities and increases erosion and sedimentation. Impervious cover can also increase the transport of contaminants and nutrients common in urban environments, such as heavy metals (zinc, cadmium), nitrogen, phosphorus, and fecal coliform bacteria. The Washington metropolitan area sites have narrow riparian buffers separating them from the surrounding development, increasing the sites’ exposure to poor water quality runoff. Poor water quality has been documented at Sherrill Drive Spring but is likely affecting all six sites in the Washington metropolitan area, whereas the Virginia sites are not thought to be affected by poor water quality because of the larger forested buffers on Fort A.P. Hill.

Excessive storm water runoff from heavy rain events can result in flooding, which can cause erosion and sedimentation. Habitat degradation due to excessive storm water flows is having significant effects at two sites—Sherrill Drive Spring and Coquelin Run Spring—but has also been observed at the other four springs in Rock Creek Park, and may increase in the future. At the Virginia sites, we have no information indicating excessive storm water flows may affect the species.

Sewer and water line breaks and leaks are a concern at the Washington metropolitan area sites because most of them are located in the same riparian areas that contain the habitats of the Kenk’s amphipod. While leaks and breaks of these pipelines have not yet been known to directly affect the species or its habitat, the pipeline systems are subjected to chronic leaks and breaks, the frequency of which is likely to increase given the age of the infrastructure, and thus the exposure risk of the species to this stressor will continue to increase. Coquelin Run Spring, Burnt Mill Spring #6, and Sherrill Drive Spring are most vulnerable to sewage spills and water pipe breaks due to the pipe’s proximity to each site and the age of the pipes. At the Virginia sites, we have no information indicating sewer or water pipeline breaks may affect the species.

Potential stressors to Kenk’s amphipod habitat are lesser in scope and severity at Fort A.P. Hill, as opposed to the Washington metropolitan area habitat, and are associated with disturbance to the surface habitat.

Factor B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Overutilization is not known to be a factor affecting the Kenk’s amphipod. The Kenk’s amphipod is a Maryland State endangered species under its Nongame and Endangered Species Conservation Act (Section 10–2A–01–09 of the Maryland Code). This designation makes “taking, possession, transportation, exportation, processing, sale, offer for sale, or shipment within the State” of a State-listed species unlawful. Kenk’s amphipod is considered a species of greatest conservation need in the District of Columbia’s State Wildlife Action Plan (http://doee.dc.gov/sites/default/files/dc/sites/doee/service_content/attachments/03%202015%20WildlifeActionPlan%20%20Ch2%20SGCN.pdf; last accessed 8/10/2016), but this status does not confer any regulatory protection; the species is not State-listed in Virginia.

Distribution surveys for the species are coordinated with the Service and, where required, collection is permitted through the Service, NPS, and the MDDNR. Whether specifically permitted or not, all amphipod surveys are conducted using consistent methodology and collection protocols. The target species of *Stygobromus* is collected based on size, and the number of individuals collected at each spring has been limited to 10 or fewer individuals in the target species’ size range. However, the Service has allowed larger numbers to be collected during 2016 surveys in the Washington metropolitan area since none of the specimens of appropriate size collected in the 2015 surveys have been identified to be Kenk’s amphipod. These protocols are followed to minimize effects to the species. Because the occurrence of subterranean invertebrates at spring emergence sites likely represents only a portion of the actual underground population, the Service has considered the collecting procedures (Feller 1997, p. 2) to be nondetrimental to the populations.

Factor C. Disease or Predation

We have no information that indicates that either disease or predation is affecting the Kenk’s amphipod.

Factor D. The Inadequacy of Existing Regulatory Mechanisms

The following existing regulatory mechanisms were specifically considered and discussed as they relate to the stressors, under the applicable Factors, affecting the Kenk’s amphipod: The CWA’s National Pollutant Discharge Elimination System, Rock Creek Park enabling legislation of 1890, and National Park Service Organic Act of 1916 (Factor A) and Nongame and Endangered Species Conservation Act (Factor B). In Factor A we conclude that habitat modification, in the form of degraded water quality and quantity, is one of the primary drivers affecting Kenk’s amphipod viability. In Factor B we conclude that overutilization is not known to be affecting the species. There are no existing regulatory mechanisms to address the stressors affecting the species under Factor E (see below).

Factor E. Other Natural or Manmade Factors Affecting Its Continued Existence

Small Population Dynamics

The observed small size of each of the 10 Kenk’s amphipod populations makes each one vulnerable to natural environmental stochasticity and human-caused habitat disturbance, including relatively minor impacts in their spring recharge areas. Each population is also vulnerable to demographic stochasticity, including loss of genetic variability and adaptive capacity. Unless the populations are larger than we know or are hydrologically connected such that individuals can move between sites, we conclude that these small populations are vulnerable to the effects of small population dynamics.

Species that are restricted in range and population size are more likely to suffer loss of genetic diversity due to genetic drift, potentially increasing their susceptibility to inbreeding depression, and reducing the fitness of individuals (Soule 1980, pp. 157–158; Hunter 2002, pp. 162–163; Allendorf and Luikart 2007, pp. 117–146). Small population sizes and inhibited gene flow between populations may increase the likelihood of local extirpation (Gilpin and Soulé 1986, pp. 32–34). With the exception for the Mount Creek #2 and Mount Creek #5 populations at Fort A.P. Hill, which are separated by only approximately 360 ft (110 m), all the other populations of the Kenk’s amphipod are isolated from other existing populations and known historical habitats by long distances, inhospitable upland habitat, and terrain that creates barriers to amphipod movement. The level of isolation and the restricted range seen in this species, based on our current knowledge of known habitat, make natural repopulation of historical habitats (e.g., the District of Columbia sites and Burnt Mill Spring #6 where the species’ presence has not been recently confirmed) and other potentially suitable habitat virtually impossible without human intervention.

Effects of Climate Change

Climate change may result in changes in the amount and timing of precipitation, the frequency and intensity of storms, and air temperatures. All of these changes could affect the Kenk’s amphipod and its habitat. The amount and timing of precipitation influence spring flow, which is an important feature of the habitat of this groundwater species. Also, the frequency and intensity of storms affect the frequency, duration, and intensity of runoff events, and runoff transport of sediment and contaminants (see Factor A above) into catchment areas of Kenk’s amphipod sites, especially in the Washington metropolitan area, where there is a substantial amount of impervious cover in close proximity to the habitat. Below we discuss the best available climate predictions for the areas supporting the Kenk’s amphipod.

The 2014 National Climate Assessment (Melillo et al. 2014, entire) predicts increasing ambient temperatures, increasing winter and spring precipitation, increasing frequency of heavy downpours, and increasing summer and fall drought risk as higher temperatures lead to greater evaporation and earlier winter and spring snowmelt (Horton et al. 2014, p. 374 In Melillo et al. 2014). These droughts may result in the drying up of springs and mortality of the Kenk’s amphipod, while the increase in heavy downpours will likely result in increased runoff and resulting erosion of surface features at spring sites, based on previously documented events. The 2014 National Climate Assessment further indicates that overall warming in the Northeast, including Maryland and the District of Columbia, but not Virginia, will be from 3 to 10 degrees Fahrenheit (°F) (1.7 to 5.6 degrees Celsius (°C)) by the 2080s (Horton et al. 2014, p. 374 In Melillo et al. 2014).

Data specific to the District of Columbia from NOAA’s National Climate Data Center (http://www.ncdc.noaa.gov/cag/time-series/us/49/USW00093738/tavg/1/5/1895-2016/base_prd=true;basebase=1901&lasttrendyear=2016&year=2000/trend=true&trend_base=10&firsttrend_year=1895&lasttrend_year=2016, last accessed 07/20/2016) shows that the average annual air temperature in the District of Columbia area has already increased by approximately 3 °F (1.7 °C) from 1960, the decade corresponding to the first Kenk’s amphipod surveys, to 2015. This higher rate of change in the District of Columbia area may be due to the urban heat island effect (Oke 1995, p. 187), which is an increase in ambient temperature due to heating of impervious surfaces. This activity also results in an increase in temperature of rainwater that falls on heat-absorbing roads and parking lots. A sudden thunderstorm striking a parking lot that has been sitting in hot sunshine can easily result in a 10 °F (5.6 °C) increase in the rainfall temperature. Menke et al. (2010, pp. 147–148) showed that these temporary increases in temperature of storm water can still result in a shift in the biotic community composition and even accelerate changes in species distributions. Based on the work of Menberg et al. (2014, entire), we expect these changes in air temperature to be reflected in the temperature of the shallow ground water within a few years, but at a lower magnitude. While we do not have specific temperature tolerance information for the Kenk’s amphipod, there are studies of other amphipod species that indicate sensitivity to elevated temperatures, exhibited by reduced or eliminated egg survival at water temperatures above 75 °F (24 °C) to 79 °F (26 °C) (Pockl and Humpesch 1990, pp. 445–449).

In summary, it is highly probable that by the 2080s some increase in ground water temperatures will occur at sites occupied by the Kenk’s amphipod, but the magnitude and significance of these changes is difficult to predict.

Change in Species Composition

At most of the Washington metropolitan area sites supporting the Kenk’s amphipod, numbers of the Potomac groundwater amphipod, which is the most widely distributed and abundant Stygobromus species in the lower Potomac drainage (Kavanaugh 2009, p. 6), have increased as numbers of observed Kenk’s amphipod have declined (D. Feller, pers. comm., 03/16/2016; D. Fellm., 04/22/2016). The exact cause of this change is not known, but it may be an indication that some stressor has led to a competitive advantage for the Potomac groundwater amphipod (Culver et al. 2012, p. 29). Other than at Coquelin Run Spring, there are no obvious physical changes at these sites indicating a cause for the decline. However, as described above in Factor A, impaired water quality could favor a more common species over a rare species. Culver and Soreq (2004, pp. 72–73) indicated that there is a possibility that the Kenk’s amphipod is a poor competitor with other Stygobromus species, which may be a factor promoting the Kenk’s amphipod’s natural rarity, and that in cave locations Stygobromus species strongly compete with each other. While the Kenk’s amphipod may have always been naturally rare, we conclude that the species may be getting rarer due to the stressors discussed above.

Summary of Factor E—Small population size at all of the sites makes each one of them vulnerable to natural environmental stochasticity and human-caused habitat disturbance, including relatively minor impacts in their spring recharge areas. The small size and isolation of sites also make each population vulnerable to demographic stochasticity, including loss of genetic variability and adaptive capacity.

The best available climate data indicate that the areas supporting the Kenk’s amphipod will see increasing ambient temperatures, increasing winter and spring precipitation, increasing frequency of heavy downpours, and increasing summer and fall drought risk as higher temperatures lead to greater evaporation and earlier winter and spring snowmelt. Droughts could result in drying up of spring sites, while the increase in heavy downpours could result in erosion and sedimentation of sites. Ambient air temperature has increased by 3 °F (1.7 °C) since 1960, and is expected to increase by 10 °F (5.6 °C) by the 2080s. It is highly probable that by the 2080s some increase in ground water temperatures will occur at sites occupied by the Kenk’s amphipod, but the magnitude and significance of these changes is difficult to predict.

Cumulative Effects

Many of the factors discussed above are cumulatively and synergistically affecting the Kenk’s amphipod. For example, Kenk’s amphipod habitat can be degraded by storm water runoff, which is likely to increase with more frequent and intense storms and precipitation levels in the future. Species with larger populations are naturally more resilient to the stressors affecting individuals or local occurrences, while smaller populations or individuals are more susceptible to demographic or stochastic events. Below we discuss the Kenk’s amphipod’s viability as expressed through the conservation biology principles of representation, redundancy, and resiliency, which illustrate how the cumulative and synergistic effects are affecting the species as a whole.

Redundancy—The species has some redundancy given its known distribution is 10 sites across 3 municipal jurisdictions and multiple streams. For example, the isolation of the two Montgomery County, MD, populations from other Washington metropolitan area populations and their occurrence along different tributary streams make it unlikely that a single catastrophic adverse event (e.g., a spill) will eliminate more than one occurrence at a time. In addition, the Virginia sites occur in two stream areas, Mill Creek and Mount Creek, making it unlikely that a single military training event or other catastrophic event will eliminate more than one occurrence at a time.

Representation—Based on the information about historical changes to the landscape across the Washington metropolitan area, we conclude it is likely that the species’ historical distribution was larger than the current distribution; therefore, the species may have previously experienced a significant loss in representation. Also, because we do not have information on the genetics of these populations, we cannot determine
whether the species possesses a single genetic identity or has genetic variability across populations. Therefore, we conclude that the species’ representation has likely been reduced, and may currently be limited.

**Resiliency—**Given the range of the species, the small number of seeps and individuals at those seeps, and each seep’s vulnerability to stressors, the Kenk’s amphipod’s overall resiliency is low. Based on the best available data, we conclude that the stressors to the species are not decreasing and, in most cases, are expected to increase in the future. Furthermore, the small size of each of the 10 habitat areas makes each population vulnerable to natural environmental stochasticity and human-caused habitat disturbance, including relatively minor effects in the spring recharge area. As a result of habitat fragmentation/isolation there is a lack of connectivity and genetic exchange between populations and, we assume, a lack of ability to recolonize extirpated sites, leading to an overall reduced resiliency for the species.

**Determination**

Section 4 of the Act (16 U.S.C. 1533), and its implementing regulations in title 50 of the Code of Federal Regulations at 50 CFR part 424, set forth the procedures for adding species to the Federal Lists of Endangered and Threatened Wildlife and Plants. Under section 4(a)(1) of the Act, we may list a species based on (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence. Listing actions may be warranted based on any of the above threat factors, singly or in combination. We have carefully assessed the best scientific and commercial information available regarding the past, present, and future stressors to the Kenk’s amphipod and find that several of those stressors rise to the level of threats to the species as a whole. Habitat loss and degradation (Factor A) from poor water quality parameters associated with urban runoff in Maryland and the District of Columbia has decreased water quality and increased erosion and sedimentation at several shallow ground water habitat sites. These parameters are likely to be exacerbated in the future by the increasing risk of exposure to breaks and leaks from the aging sewer and water pipe infrastructure (Factor A), as well as more frequent and intense rainfall events, due to the effects of climate change (Factor E). In addition, all 10 sites are characterized by small numbers of the Kenk’s amphipod that appear to be declining and affected by the inherent vulnerabilities associated with small population dynamics (Factor E). Overutilization (Factor B), disease (Factor C), and predation (Factor C) are not considered threats to the Kenk’s amphipod. The existing regulatory mechanisms (Factor D) for the stressors and threats affecting the species have been evaluated under Factors A, B, and E. While the Kenk’s amphipod has some redundancy and representation, the resiliency of each individual site is compromised, making the species’ overall resiliency low.

The Act defines an endangered species as any species that “in danger of extinction throughout all or a significant portion of its range” and a threatened species as any species “that is likely to become endangered throughout all or a significant portion of its range within the foreseeable future.” We find that the Kenk’s amphipod is presently in danger of extinction throughout its entire range based on the severity and immediacy of threats currently affecting the species. The best available data indicate that, while the species may have always been represented by small numbers of individuals found at the surface of each seep site, the species’ abundance appears to be declining. In addition, each of the 10 known seep sites are vulnerable to varying levels of stressors and threats: 1) Sherrill Drive Spring), based on repeated negative survey results combined with documented poor water quality, may be extirpated, and another seep (Coquelin Run Spring) has visible erosion and sedimentation. The Kenk’s amphipod has some redundancy and representation, but those two conservation parameters are compromised due to each site’s low resiliency, all of which makes the species’ overall resiliency low. The primary drivers affecting the species’ viability (water quality degradation and small population dynamics) are difficult to manage because either they are caused by factors outside the control of the landowner’s jurisdiction (e.g., poor water quality or risk of sewer/water line spills at NPS-controlled sites) or there are no apparent management actions to minimize or control them (e.g., small population dynamics), and some of those threats and additional stressors are likely to increase in the future. Therefore, based on the basis of the best available scientific and commercial information, we propose listing the Kenk’s amphipod as endangered in accordance with sections 3(6) and 4(a)(1) of the Act. We find that a threatened species status is not appropriate for the Kenk’s amphipod based on the high magnitude and imminence of the threats across the species’ range. If additional Kenk’s amphipod sites are found and those sites are individually resilient and add to the species’ overall representation, redundancy, and resiliency, then a threatened species status may be appropriate at that time.

Under the Act and our implementing regulations, a species may warrant listing if it is endangered or threatened throughout all or a significant portion of its range. Because we have determined that the Kenk’s amphipod is an endangered species throughout all of its range, no portion of its range can be “significant” for purposes of the definitions of “endangered species” and “threatened species.” See the Final Policy on Interpretation of the Phrase “Significant Portion of Its Range” in the Endangered Species Act’s Definitions of “Endangered Species” and “Threatened Species” (79 FR 37578; July 1, 2014).

**Available Conservation Measures**

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition, through listing, results in public awareness and conservation by Federal, State, Tribal, and local agencies, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species. The protection required by Federal agencies and the prohibitions against certain activities are discussed, in part, below. The primary purpose of the Act is the conservation of endangered and threatened species and the ecosystems upon which they depend. The ultimate goal of such conservation efforts is the recovery of these listed species, so that they no longer need the protective measures of the Act. Subsection 4(f) of the Act calls for the Service to develop and implement recovery plans for the conservation of endangered and threatened species. The recovery planning process involves the identification of actions that are necessary to halt or reverse the species’ decline by addressing the threats to its survival and recovery. The goal of this process is to restore listed species to a point where they are secure, self-
sustaining, and functioning components of their ecosystems.

Recovery planning includes the development of a recovery outline shortly after a species is listed and preparation of a draft and final recovery plan. The recovery outline guides the immediate implementation of urgent recovery actions and describes the process to be used to develop a recovery plan. Revisions of the plan may be done to address continuing or new threats to the species, as new substantive information becomes available. The recovery plan also identifies recovery criteria for review of when a species may be ready for downlisting or delisting, and methods for monitoring recovery progress. Recovery plans also establish a framework for agencies to coordinate their recovery efforts and provide estimates of the cost of implementing recovery tasks. Recovery teams (composed of species experts, Federal and State agencies, nongovernmental organizations, and stakeholders) are often established to develop recovery plans. When completed, the recovery outline, draft recovery plan, and the final recovery plan will be available on our Web site (http://www.fws.gov/endangered), or from our Chesapeake Bay Field Office (see FOR FURTHER INFORMATION CONTACT).

Implementation of recovery actions generally requires the participation of a broad range of partners, including other Federal agencies, States, Tribes, nongovernmental organizations, businesses, and private landowners. Examples of recovery actions include habitat restoration (e.g., restoration of native vegetation), research, captive propagation and reintroduction, and outreach and education. The recovery of many listed species cannot be accomplished solely on Federal lands because their range may occur primarily or solely on non-Federal lands. To achieve recovery of these species requires cooperation and conservation efforts on private, State, and Tribal lands. If this species is listed, funding for recovery actions will be available from a variety of sources, including Federal budgets, State programs, and cost share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the State of Maryland, Commonwealth of Virginia, and the District of Columbia would be eligible for Federal funds to implement management actions that promote the recovery of the Kenk’s amphipod. Information on our grant programs that are available to aid species recovery can be found at: http://www.fws.gov/grants.

Although the Kenk’s amphipod is only proposed for listing under the Act at this time, please let us know if you are interested in participating in recovery efforts for this species. Additionally, we invite you to submit any new information on this species whenever it becomes available and any information you may have for recovery planning purposes (see FOR FURTHER INFORMATION CONTACT).

Section 7(a)(1) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as an endangered or threatened species and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. Federal agency actions within the species’ habitat that may require conference or consultation or both as described in the preceding paragraph include management and any other landscape-altering activities on Federal lands administered by the National Park Service (Rock Creek Park) and U.S. Army (Fort A.P. Hill); issuance of section 404 CWA permits by the Army Corps of Engineers; and construction and maintenance of roads or highways by the Federal Highway Administration.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to endangered wildlife. The prohibitions of section 9(a)(1) of the Act, codified at 50 CFR 17.21 make it illegal for any person subject to the jurisdiction of the United States to take (which includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these) endangered wildlife within the United States or on the high seas if it is unlawful to import; export; deliver, receive, carry, transport, or ship in interstate or foreign commerce in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to employees of the Service, the National Marine Fisheries Service, other Federal land management agencies, and State conservation agencies.

We may issue permits to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22. With regard to endangered wildlife, a permit may be issued for the following purposes: For scientific purposes, to enhance the propagation or survival of the species, and for incidental take in connection with otherwise lawful activities. There are also certain statutory exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

It is our policy, as published in the Federal Register on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of a proposed listing on proposed and ongoing activities within the range of the species proposed for listing. At this time, we are unable to identify specific activities that would not be considered to result in a violation of section 9 of the Act because the Kenk’s amphipod occurs in seep habitats that are influenced by the surrounding environment and it is likely that site-specific conservation measures may be needed for activities that may directly or indirectly affect the species.

Based on the best available information, the following activities may potentially result in a violation of section 9 of the Act; this list is not comprehensive:

1. Unauthorized handling or collecting of the species;
2. Destruction/alteration of the species’ habitat by discharge of fill material, use of motorized vehicles such as all-terrain vehicles or creation of trails that would increase foot traffic through the spring area, draining, or diversion or alteration of surface or ground water flow into or out of the seepage springs or catchment basins;
3. Forest management practices that alter the seepage spring sites or remove canopy cover from above the seepage spring sites;
(4) Discharge of chemicals, storm water, or runoff into the seepage springs or catchment basins.

Questions regarding whether specific activities would constitute a violation of section 9 of the Act should be directed to the Chesapeake Bay Field Office (see FOR FURTHER INFORMATION CONTACT).

Critical Habitat for the Kenk’s amphipod (Stygobromus Kenki)

Background

Critical habitat is defined in section 3 of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features:

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Conservation, as defined under section 3 of the Act, means to use and the use of all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that Federal agencies ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Such designation does not allow the government or public to access private lands. Such designation does not require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Where a landowner requests Federal agency funding or authorization for an action that may affect a listed species or critical habitat, the consultation requirements of section 7(a)(2) of the Act would apply, but even in the event of a destruction or adverse modification finding, the obligation of the Federal action agency and the landowner is not to restore or recover the species, but to implement reasonable and prudent alternatives to avoid destruction or adverse modification of critical habitat.

Section 4 of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the Federal Register on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 3658)), and our associated Information Quality Guidelines, provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. They require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

Prudency Determination

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12), require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. Our regulations (50 CFR 424.12(a)(1)) state that the designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species. There is currently no imminent threat of take attributed to collection or vandalism under Factor B for the Kenk’s amphipod. Identification and mapping of critical habitat is not likely to increase any such threat. In the absence of finding that the designation of critical habitat would increase threats to a species, if there are any benefits to a critical habitat designation, then a prudent finding is warranted. The potential benefits of designation include: (1) Triggering consultation under section 7 of the Act, in new areas for actions in which there may be a Federal nexus where it would not otherwise occur because, for example, it is or has become unoccupied or the occupancy is in question; (2) focusing conservation activities on the most essential features and areas; (3) providing educational benefits to State or county governments or private entities; and (4) preventing people from causing inadvertent harm to the species. Therefore, because we have determined that the designation of critical habitat will not likely increase the degree of threat to this species and may provide some measure of benefit, we find that designation of critical habitat is prudent for the Kenk’s amphipod.

Critical Habitat Determinability

Having determined that designation is prudent, under section 4(a)(3) of the Act we must find whether critical habitat for the species is determinable. Our regulations at 50 CFR 424.12(a)(2) state that critical habitat is not determinable when one or both of the following situations exist: (i) Information sufficient to perform required analyses of the impacts of the designation is lacking, or (ii) The biological needs of the species are not sufficiently well known to permit identification of an area as critical habitat.

As discussed above, we have reviewed the available information pertaining to the biological needs of the Kenk’s amphipod and habitat characteristics where the species is located. Because we are awaiting the results of hydrology studies that support the species’ physical and biological features, and additional surveys in new habitat areas (e.g., accessible areas within steep, sloped, forested habitat overlaying the Calvert formation in Maryland and Virginia), we conclude that the designation of critical habitat is not determinable for the Kenk’s amphipod at this time. We will make a determination on critical habitat no later than 1 year following any final listing determination.

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;
(4) Be divided into short sections and sentences; and
(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in ADDRESSES. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 et seq.), need not be prepared in connection with listing a species as an endangered or threatened species under the Endangered Species Act. We published a notice outlining our reasons for this determination in the Federal Register on October 25, 1983 (48 FR 49244).

Stephen Guertin,
Acting Director, U.S. Fish and Wildlife Service.

SUMMARY: NMFS announces that the Pacific Fishery Management Council (Council) has submitted Amendment 27 to the Pacific Coast Groundfish Fishery Management Plan (PCGFMP) for Secretarial review. Amendment 27 would add deacon rockfish to the FMP, reclassifies big skate as an actively managed stock, add a new inseason management process for commercial and recreational in California, and several clarifications.

DATES: Comments on Amendment 27 must be received on or before November 29, 2016.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2016–0094, by any of the following methods:
• Federal e-Rulemaking Portal: Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0094, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.
• Mail: Submit written comments to William Stelle, Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115–0070.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will post for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

Information relevant to Amendment 27, which includes a draft environmental assessment (EA), a regulatory impact review (RIR), and an initial regulatory flexibility analysis (IRFA) are available for public review during business hours at the NMFS West Coast Regional Office at 7600 Sand Point Way NE., Seattle, WA 98115.
Electronic Access

Background

The Magnuson-Stevens Act requires that each regional fishery management council submit any FMP or plan amendment it prepares to NMFS for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP or amendment, immediately publish a notice that the FMP or amendment is available for public review and comment. NMFS will consider the public comments received during the comment period described above in determining whether to approve Amendment 27 to the PCGFMP.

Amendment 27 consists of 5 components: (1) Reclassify big skate from an Ecosystem Component Species to “in the fishery”, (2) add deacon rockfish to the list of species in the FMP, (3) establish a new inseason management process in California for black, canary, and yelloweye rockfish, (4) make updates to clarify several stock assessment descriptions, and (5) update several sections because canary rockfish and petrale sole are rebuilt.

1. Reclassify Big Skate as “in the fishery”

Amendment 24 to PCGFMP classified several species, including big skate, as Ecosystem Component (EC) Species. However, when big skate was classified as an EC species it was not known that a majority of the skate species that were landed and described as “unspecified skate” in the Shorebased IFQ Program landings was actually big skate. In order for a stock to be classified as an EC species (according to National Standard Guideline 1), (a) it may not be determined to be subject to overfishing, approaching overfished, or overfished; (b) it must not be likely to become subject to overfishing or overfished, according to the best available information, in the absence of conservation and management measures; and (c) it may not generally be retained for sale or personal use. As big skate are being targeted and therefore generally retained for sale, it can no longer be considered an EC species. Therefore, Amendment 27 reclassifies big skate as in the fishery and this rule proposes species specific harvest specifications.

2. New California Inseason Process

The objective of any inseason management system is to be responsive to the needs of fishing participants while keeping catch with the established harvest specifications. The scope and magnitude of options available to address management issues is highly dependent on the amount of time between when an issue is identified and when corrective action(s) can be implemented. The summer months tend to be the busiest times for both the commercial and recreational fisheries in California and mortality tends to accumulate more quickly during these times. The Council meets in June and September of each year. If an action is not warranted based on information available at the June meeting, there is a lag of up to four months before additional inseason actions can be implemented. Because fisheries are ongoing during this time, overages identified at the September meeting tend to be of a higher magnitude requiring more severe corrective actions (e.g., closing a fishery). Therefore, a new inseason process for only black rockfish, canary rockfish, and yelloweye rockfish, and only in California was developed. This system would allow NMFS to take inseason action outside of a Council meeting when a Federal harvest specification for one of these species was projected to be attained or had been attained prior to the start of a Council meeting. Allowing NMFS to take inseason action outside of a Council meeting can reduce the severity of management actions and reduce negative economic impacts to the fleets and to the coastal communities which depend on the revenues generated from these fisheries. Similar inseason management processes were not explored for Washington or Oregon because they have rapid inseason management processes sufficient for their inseason management needs.

3. Updates to the PCGFMP

Minor edits are included in Amendment 27 which clarify several stock assessment procedures and categories resulting from Amendment 23 that were inadvertently omitted. Amendment 23 modified the PCGFMP consistent with the revised National Standard Guidelines in 2011.

4. Updates Based on New Science for Deacon Rockfish, Canary Rockfish, and Petrale Sole

Deacon rockfish (Sebastes diaconus) was recently described and adopted as a new Sebastes species by the American Fisheries Society based on evidence of the presence of two genetically distinct cryptic species in central California. Deacon rockfish is therefore acknowledged as an FMP species that is “in the fishery” based on the FMP provision. “The category “rockfish” includes all genera and species of the family Scorpaenidae, even if not listed, that occur in the Washington, Oregon, and California area. The Scorpaenidae genera are Sebastes, Scorpaena, Sebastolobus, and Scorpaenodes.

Finally, canary rockfish and petrale sole were declared rebuilt on August 4, 2013; therefore all references to them as overfished stocks must be updated.

Public Comments

NMFS welcomes comments on the proposed FMP amendment through the end of the comment period. A proposed rule to implement Amendment 27 has been submitted for Secretarial review and approval. NMFS expects to publish and request public review and comment on proposed regulations to implement Amendment 27, along with the groundfish specifications and management measures for 2017 and 2018, in the near future. Public comments on the proposed rule must be received by the end of the comment period on the amendment to be considered in the approval/disapproval decision on the amendment. All comments received by the end of the comment period for the amendment, whether specifically directed to the amendment or the proposed rule, will be considered in the approval/ disapproval decision.

Authority: 16 U.S.C. 1801 et seq.

Dated: September 27, 2016.

Forest Service

Payette National Forest, Idaho; Huckleberry Landscape Restoration Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The Payette National Forest will prepare an Environmental Impact Statement (EIS) for the Huckleberry Landscape Restoration Project. The Huckleberry Landscape Restoration Project is located approximately 15 miles west of New Meadows, Idaho. Proposed treatments include timber harvest, thinning, prescribed fire, road treatments and road decommissioning, and recreation improvements. The Huckleberry project area is approximately 67,000 acres within the Council Ranger District on the Payette National Forest. The project is located in the Indian, Lick, and Bear Creek subwatersheds within the Brownlee Reservoir Subbasin.

DATES: Comments concerning the scope of the analysis must be received by November 14, 2016. The draft environmental impact statement is expected late April 2017 and the final environmental impact statement is expected January 2018.

ADDRESSES: Send written comments to: Keith Lannom, Forest Supervisor, 500 N. Mission Street, Building 2, McCall, Idaho 83638. Comments may also be sent via email to comments-intermtn-payette@fs.fed.us, or via facsimile to 208–347–0300, kpierson@fs.fed.us.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

Purpose and Need for Action

The purpose of the Huckleberry Landscape Restoration Project is to: A. Move vegetation toward the desired conditions defined in the Forest Plan and the most recent science addressing restoration and management of wildlife habitat, with an emphasis on: (1) Improving habitat for specific wildlife species of concern such as the Endangered Species Act (ESA)-listed northern Idaho ground squirrel (NIDGS) and species dependent on dry coniferous forests (e.g. white-headed woodpecker), while maintaining habitat for other Forest sensitive and ESA-listed species; (2) Maintaining and promoting large tree forest structure, early seral species composition (e.g. example aspen, western larch, ponderosa pine, and Douglas-fir) and forest resiliency; (3) Reducing the risk of uncharacteristic and undesirable wildland fire, with an emphasis on restoring and maintaining desirable plant community attributes including fuel levels, fire regimes, and other ecological processes. (4) Moving forest stands toward desired conditions as described in the Forest Plan by returning fire to the ecosystem; promoting the development of large tree forest structures mixed with a mosaic of size classes; and improving growth, species composition, and resiliency to insects, disease, and fire.

B. Support the development of fire-adapted rural communities by: (1) Creating conditions that provide firefighters a higher probability of successfully suppressing fire in the wildland urban interface by reducing potential fire behavior near values at risk (e.g., homes, communication towers, and power lines) and primary ingress/egress routes, essential to firefighter access and the public. (2) Creating conditions where rural communities are less reliant on suppression forces. (3) Move all subwatersheds within the project area toward the desired conditions for soil, water, riparian, and aquatic resources (SWRA) as described in the Forest Plan and the Watershed Condition Framework (WCF) (USDA 2011) by: (1) Reducing overall road density, road-related accelerated sediment, and other road related impacts across the project area; restoring riparian vegetation and floodplain function. (2) Restoring fish habitat connectivity across the project area, especially in streams occupied by ESA Listed bull trout, (Salvelinus confluentus) and in or adjacent to bull trout Critical Habitat.

E. Contribute to the economic vitality of the communities adjacent to the Payette National Forest.

The need for the project is based on the difference between the existing and desired conditions. These differences include: (1) Less large tree size class than desired and higher canopy cover; (2) Fewer early seral species (i.e. ponderosa pine and western larch); (3) Fewer fire resilient species than desired; (4) Increase in ground, surface, and canopy fuels; (5) Less than desired watershed function and integrity.

The desired conditions for this project are based upon the Payette National Forest Plan (USDA Forest Service 2003), and the Watershed Condition Framework (USDA Forest Service 2011).

Proposed Action

The Proposed Action includes: Vegetative Treatments: The Forest Service proposes approximately 42,600 acres of vegetative treatments in the project area. This acreage includes the treatments designed to benefit Northern Idaho Ground Squirrels (NIDGS) and treatments within Riparian Conservation Areas (RCAs). Of the acres proposed for vegetative treatment, 1,400 acres are within RCAs. Approximately 9,000 acres are in areas designed to mitigate fire risk to values at risk. Commercial Vegetative Treatments: The Forest Service proposes to treat up to...
23,800 acres with commercial harvests (a combination of Free Thin, Free Thin–Patch Cut-Selection Harvest, Aspen Restoration, and Mature Plantation Harvest). Combined commercial and non-commercial vegetation treatments include up to 11,800 acres of meadow restoration, 1,500 acres Restoration of Low Density Timber Stands and 600 acres of Whitebark pine restoration. These acreages includes treatments designed for and within RCAs. Approximately, 1,400 acres are commercial treatments (as described below) within RCAs. Non-Commercial Treatments—approximately 42,500 acres. Non-commercial thinning would be completed in areas of commercial harvest as well as outside of commercial harvest. This would consist of trees generally less than ten inches DBH and include plantations. Non-commercial thinning would be completed to improve wildlife habitat, increase growth rates and tree vigor, improve stand resiliency to natural disturbance, reduce density-related competition, reduce potential fire behavior and fire effects given a wildland fire.

Prescribed Fire Treatments: The entire project area, (approximately 67,000 acres, excluding the Bear Creek RNA), would be treated with prescribed fire over the next 20 years (see Prescribed Fire and Community Wildfire Mitigation Map). Commercial activities would generally be completed prior to the application of fire, except where the application of fire prior to thinning does not affect commercial activities. Re-introducing 500 to 10,000 acres of fire annually would move forested and non-forested vegetation towards conditions that more closely represent historic distribution, structure, and function as well as limit potential fire behavior. A mosaic-like application of fire would reintroduce fire to approximately 75 percent of primary target acres, and 50 percent of secondary target acres. These percentages recognize the variability in the spread of fire across a landscape due to various environmental influences. All acres targeted for the application of fire would not be subjected to non-commercial thinning in order to minimize mortality from prescribed fire and aid in moving towards restored conditions.

Watershed Improvement and Restoration Treatments: (1) System road treatments proposed throughout the project area include maintenance and/or improvement of Forest system roads where needed. Approximately 57.7 miles of system roads would be decommissioned. All roads closed to the public would receive implementation of effective closure to motorized use. All unauthorized routes not needed for future management would also be evaluated for some level of restoration treatments. (2) Unauthorized Route Treatments—Restoration treatments are proposed for unauthorized routes, although the exact mileage of unauthorized route treatments have not been determined at this time. It is anticipated that between 60 and 80 miles would be treated. (3) Aquatic Organism Passage/Fish Habitat Connectivity—Improvements to Fish Passage are needed to address the purpose and need of the project. Thirteen road-crossings have been identified in the project area to improve fish passage and improve hydrologic connectivity. In the Indian Creek subwatershed, of which the upper portion is identified as a restoration priority under and ACS, 6 crossings would be improved (crossings would be replaced with appropriate structures or removed with the associated road restoration treatments. These proposed improvements would address all of the known man-made barriers on fish bearing streams in the subwatershed. In the Bear Creek subwatershed, of which the upper portion is identified as an ACS priority), one crossing is identified for improvement. This would address the only known man-made barrier on a fish-bearing stream in the portion of the Bear Creek subwatershed included in the project area. Past restoration activities have addressed many of the fish passage barriers in the Bear Creek subwatershed. In the Lick Creek subwatershed, 6 crossings are identified for improvement on tributaries of Lick Creek. These crossings would be replaced with appropriate structures or removed with other road restoration treatments. Crossings should be replaced as road work and project activities occur in these areas to improve fish habitat connectivity, and improve hydrologic connectivity. (4) Trail Bridges for Fish Habitat Improvement—In the Bear Creek subwatershed, 2 trail bridges are proposed on FS Trail 228 where the trail crosses Mickey Creek and Wesley Creek. Both of these streams are Bull Trout Critical Habitat. Bridges over these streams would reduce impacts of trail use (from 2-wheeled motorized, non-motorized and stock) to bull trout and their critical habitat. A trail bridge currently is in place near the FS 228 Trailhead where the trail crosses Bear Creek, which is also critical habitat.

Recreation Improvements: The recreation proposal focuses on improving non-motorized and dispersed recreation opportunities and facilities, trail maintenance and relocation to improve watershed conditions and the recreational user’s experience. The Huckleberry Landscape Restoration Project would: (1) Developed and Dispersed Recreation: (a) Improve the potable water well, increase the radius of the turnaround loop to accommodate larger trailers and RVs, and replace the entire fence with split rail/buck and rail at the Huckleberry Campground; (b) Coordinate dispersed camping along roads open to motorized travel 300 feet off the road, with wildlife areas in which there is a conflict with the NIDGS: (c) On Forest Road 143 (Lick Creek Road) where it enters the Forest, add a travel management sign that state the road is open to dispersed camping using a motorized vehicle in designated sites only; (d) Harden dispersed camping sites identified with resource issues: (e) Place rock barriers in sites identified with a need to restrict further growth; (f) Decommission existing restroom facility and install a new single vault restroom at the Bear trailhead, along with three fire rings and two metal stock hitch rails. (2) Trails: (a) Bring the 33 miles of trails consisting of two-wheel motorized and non-motorized trail up to defined trail class standard for each trail. This includes signing at all trail junctions, new signing at trailheads lacking proper signs, and trail reestablishment and potential relocation where the trail is undeﬁnable; (b) Improve the Hoo Hoo Gulch 50144 road accessing the #231 trail to accommodate the hauling of a stock trailer. This includes brushing both sides of the road, and performing major road maintenance on the road surface. At the trailhead (location of the closed gate) construct a turn-around large enough to accommodate a truck pulling a horse trailer. Add one metal stock hitch rail and an information trailhead kiosk sign to the trailhead. Relocate portions of the #231 trail above the current roadbed; (c) Relocate and re-establish portions of the non-motorized #229 trail that accesses the Lick Creek Lookout. Establish a trailhead to accommodate two vehicles and one horse trailer at the place the 50129 road turns to seasonal use. Install an informational trailhead kiosk and trail sign. (Note: The seasonally open road beyond this gate could be closed year-round as it only goes an additional ½ mile and is not needed for recreational access. It only serves to bring unauthorized motorized use into the closed road system above); (d) Establish a small pullout for parking for the non-motorized #226 trail; Install a trailhead sign.
E. Wildlife Habitat Improvements:
Changes in forested conditions, fire regimes, and the presence of roads have altered wildlife habitats. Some modifications to habitat have led to the federal listing of terrestrial wildlife species such as northern Idaho ground squirrel (NIDGS). A primary need Forest-wide and in the project area is to maintain and promote dry, lower elevation, large tree, and old forest habitats for the associated wildlife species including reducing road densities and fragmentation that negatively affect elk and other Forest species of concern. The processes, function, patch size and diversity of forested habitats must all be considered in order to properly address wildlife habitat needs. Examples of habitat improvement include: (1) Enhance habitat components that will support sustainable elk populations consistent with the Forest Plan. This includes the best available science to move the project landscape towards the recommended road density and elk security habitat guidelines (e.g. effective seasonal gate closures). One potential method of moving towards effective road densities and enhancing elk security habitat is to target road closures in areas where there is route redundancy. (2) Maintain or restore a representative, resilient and redundant network of habitats for species of greatest conservation concern (e.g. northern Idaho ground squirrel, white-headed woodpecker, northern goshawk, etc.).

F. Community Wildfire Mitigation Treatments: Both, fuel loading and fuel continuity would be altered to reduce surface fire potential as well as crown fire potential among the community wildfire mitigation treatment areas (see Prescribed Fire Treatments and Community Wildfire Mitigation Map). This would provide suppression forces a higher probability of successfully attacking a wildland fire within intermix or rural condition while creating a safer working environment. A combination of non-commercial thinning, commercial thinning, limbing to reduce ladder fuels, piling dead and downed material, pile burning, and/or prescribed burning would facilitate the desired condition. More specifically, activities would result in the following: (1) Increased canopy base heights to reduce potential for spotting, torching, and crown fire; (2) Reduced canopy densities to reduce the potential for crown fire spread; (3) Reduced species that are not fire-resilient to promote fire-resilient stands; (4) Reduced ground and surface fuels. Recurrent application of the necessary treatments (primarily prescribed fire) every 5–15 years would maintain the desired condition, which is lower fuel loadings and reduced horizontal fuel continuity.

Responsible Official
The Forest Supervisor of the Payette National Forest is the Responsible Official.

Nature of Decision To Be Made
Based on the purpose and need for the proposed action, the Responsible Official will determine whether to proceed with the action, as proposed, as modified by another alternative or not at all. If an action alternative is selected, the Responsible Official will determine what design features, mitigation measures and monitoring requirements are included in the decision.

Addresses
Additional project information is available on the project page of the Payette National Forest website at: http://www.fs.usda.gov/project/?project=50218.

Scoping Process
This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency’s preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer’s concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this project. Comments submitted anonymously however will also be accepted and considered.

Dated: September 26, 2016.

Keith B. Lannom,
Payette National Forest Supervisor.

[FR Doc. 2016–23650 Filed 9–29–16; 8:45 am]

BILLING CODE 3411–15–P

COMMISSION ON CIVIL RIGHTS
Advisory Committees Expiration

AGENCY: United States Commission on Civil Rights.

ACTION: Solicitation of applications.

SUMMARY: Because the terms of the members of the Florida Advisory Committee are expiring on January 28, 2017, the United States Commission on Civil Rights hereby invites any individual who is eligible to be appointed to apply. The memberships are exclusively for the Florida Advisory Committee, and applicants must be residents of Florida to be considered. Letters of interest must be received by the Southern Regional Office of the U.S. Commission on Civil Rights no later than November 15, 2016. Letters of interest must be sent to the address listed below.

Because the terms of the members of the Texas Advisory Committee are expiring on January 28, 2017, the United States Commission on Civil Rights hereby invites any individual who is eligible to be appointed to apply. The memberships are exclusively for the Texas Advisory Committee, and applicants must be residents of the Texas to be considered. Letters of interest must be received by the Western Regional Office of the U.S. Commission on Civil Rights no later than November 15, 2016. Letters of interest must be sent to the address listed below.

Because the terms of the members of the Michigan Advisory Committee are expiring on January 28, 2017, the United States Commission on Civil Rights hereby invites any individual who is eligible to be appointed to apply. The memberships are exclusively for the Michigan Advisory Committee, and applicants must be residents of the Michigan to be considered. Letters of interest must be received by the Midwestern Regional Office of the U.S. Commission on Civil Rights no later than November 15, 2016. Letters of interest must be sent to the address listed below.

DATES:
Letters of interest for membership on the Florida Advisory Committee should be received no later than November 15, 2016.

Letters of interest for membership on the Texas Advisory Committee should be received no later than November 15, 2016.

Letters of interest for membership on the Michigan Advisory Committee should be received no later than November 15, 2016.

ADDRESSES:
Send letters of interest for the Florida Advisory Committee to: U.S. Commission on Civil Rights, Southern Regional Office, 61 Forsyth Street SW., Suite 1840T, Atlanta, GA 30303. Letters can also be sent via email to jhinton@uscrr.gov.

Send letters of interest for the Texas Advisory Committee to: U.S. Commission on Civil Rights, Western
Regional Office, 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012. Letter can also be sent via email to atrevino@usccr.gov.

Send letters of interest for the Michigan Advisory Committee to: U.S. Commission on Civil Rights, Midwestern Regional Office, 55 W. Monroe St., Suite 410, Chicago, IL 60603. Letters can also be sent via email to mwojnarowski@usccr.gov.

FOR FURTHER INFORMATION CONTACT:
David Mussatt, Chief, Regional Programs Unit, 55 W. Monroe St., Suite 410, Chicago, IL (312) 353–8311. Questions can also be directed via email to dmmussatt@usccr.gov.

SUPPLEMENTARY INFORMATION:
The Florida, Texas, and Michigan Advisory Committees are statutorily mandated federal advisory committees of the U.S. Commission on Civil Rights pursuant to 42 U.S.C. 1975a. Under the charter for the advisory committees, the purpose is to provide advice and recommendations to the U.S. Commission on Civil Rights (Commission) on a broad range of civil rights matters in its respective state that pertain to alleged depravations of voting rights or discrimination or denials of equal protection of the laws because of race, color, religion, sex, age, disability, or national origin, or the administration of justice. Advisory committees also provide assistance to the Commission in its statutory obligation to serve as a national clearinghouse for civil rights information.

Each advisory committee consists of not more than 19 members, each of whom will serve a four-year term. Members serve as unpaid Special Government Employees who are reimbursed for travel and expenses. To be eligible, an advisory committee, applicants must be residents of the respective state or district, and have demonstrated expertise or interest in civil rights issues.

The Commission is an independent, bipartisan agency established by Congress in 1957 to focus on matters of race, color, religion, sex, disability, or national origin. Its mandate is to:

- Investigate complaints from citizens that their voting rights are being deprived,
- Study and collect information about discrimination or denials of equal protection under the law,
- Appraise federal civil rights laws and policies,
- Serve as a national clearinghouse on discrimination laws,
- Submit reports and findings and recommendations to the President and the Congress, and
- Issue public service announcements to discourage discrimination.

The Commission invites any individual who is eligible to be appointed a member of the Florida, Texas, or Michigan Advisory Committee covered by this notice to send a letter of interest and a resume to the respective address above.

Dated: September 26, 2016.

David Mussatt,
Supervisory Chief, Regional Programs Unit.

BILLING CODE P]

DEPARTMENT OF COMMERCE

Bureau of the Census

National Advisory Committee;
Meetings

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Bureau of the Census (Census Bureau) is giving notice of a meeting of the National Advisory Committee on Racial, Ethnic and Other Populations (NAC). The NAC will address policy, research, and technical issues relating to a full range of Census Bureau programs and activities, including communications, decennial, demographic, economic, field operations, geographic, information technology, and statistics. The NAC will meet in a plenary session on November 3–4, 2016. Last minute changes to the schedule are possible, which could prevent us from giving advance public notice of schedule adjustments. Please visit the Census Advisory Committees Web site for the most current meeting agenda at http://www.census.gov/about/cac.html. The meeting will be available via webcast at: http://www.census.gov/newsroom/census-live.html or at http://www.ustream.tv/embed/6504322?wmode=direct.

DATES: November 3–4, 2016. On November 3, the meeting will begin at approximately 8:30 a.m. and end at approximately 5:00 p.m. On November 4, the meeting will begin at approximately 8:30 a.m. and end at approximately 4:00 p.m.

ADDRESSES: The meeting will be held at the U.S. Census Bureau Auditorium, 4600 Silver Hill Road, Suitland, Maryland 20746.

FOR FURTHER INFORMATION CONTACT: Tara Dunlop Jackson, Branch Chief for Advisory Committees, Customer Liaison and Marketing Services Office, at tara.t.dunlop@census.gov, Department of Commerce, U.S. Census Bureau, Room 8H177, 4600 Silver Hill Road, Washington, DC 20233, telephone 301–763–5222. For TTY callers, please use the Federal Relay Service 1–800–877–8339.

SUPPLEMENTARY INFORMATION: The NAC was established in March 2012 and operates in accordance with the Federal Advisory Committee Act (Title 5, United States Code, Appendix 2, Section 10). The NAC members are appointed by the Director, U.S. Census Bureau and consider topics such as hard to reach populations, race and ethnicity, language, aging populations, American Indian and Alaska Native tribal considerations, new immigrant populations, populations affected by natural disasters, highly mobile and migrant populations, complex households, rural populations, and population segments with limited access to technology. The Committee also advises on data privacy and confidentiality, among other issues.

All meetings are open to the public. A brief period will be set aside at the meeting for public comment on November 4. However, individuals with extensive questions or statements must submit them in writing to: census.national.advisorycommittee@census.gov (subject line “November 2016 NAC Meeting Public Comment”), or by letter submission to Kimberly L. Leonard, Committee Liaison Officer, Department of Commerce, U.S. Census Bureau, Room 8H179, 4600 Silver Hill Road, Washington, DC 20233.

If you plan to attend the meeting, please register by Monday, October 31, 2016. You may access the online registration from the following link: http://www.regonline.com/nov2016nac_meeting. Seating is available to the public on a first-come, first-served basis.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should also be directed to the Committee Liaison Officer as soon as known, and preferably two weeks prior to the meeting.

Due to increased security and for access to the meeting, please call 301–763–9906 upon arrival at the Census Bureau on the day of the meeting. A photo ID must be presented in order to receive your visitor’s badge. Visitors are not allowed beyond the first floor.

Topics of discussion include the following items:

- 2020 Census Program Updates
- Evidence Based Policy Making Commission Overview
- Language Working Group Progress Report
Foreign-Trade Zones Board
[Order No. 2013]
Reorganization and Expansion of Foreign-Trade Zone 214 Under Alternative Site Framework; Lenoir County, North Carolina

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR Sec. 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the North Carolina Department of Transportation, grantee of Foreign-Trade Zone 214, submitted an application to the Board (FTZ Docket B–20–2016, docketed April 13, 2016) for authority to reorganize and expand under the ASF with a service area of the Counties of Pender, New Hanover, Brunswick, Duplin, Columbus, Bladen, Robeson, Beaufort, Pitt, Hyde, Onslow, Jones, Craven, Pamlico, Lenoir, Carteret, Wilson, Edgecombe, Nash, Wayne, Greene and Cumberland, within and adjacent to the Wilmington, Morehead City and Raleigh-Durham Customs and Border Protection ports of entry. FTZ 214’s existing Sites 1, 5, 6 (as modified) and 7 would be categorized as magnet sites and Sites 2, 3 and 4 would be categorized as usage-driven sites, and the grantee proposes three additional magnet sites (Sites 8, 9 and 10);

Whereas, notice inviting public comment was given in the Federal Register (81 FR 23456–23457, April 21, 2016) and the application has been processed pursuant to the FTZ Act and the Board’s regulations; and,

Whereas, the Board adopts the findings and recommendation of the examiner’s report, and finds that the requirements of the FTZ Act and the Board’s regulations are satisfied provided that inclusion of Robeson County in the service area is limited to the portion of the county east of Interstate 95 (I–95);

Now, therefore, the Board hereby orders:

The application to reorganize and expand FTZ 214 under the ASF is approved, with the service area described above (i.e., inclusion of Robeson County in the service area is limited to the portion of the county east of I–95), subject to the FTZ Act and the Board’s regulations, including Section 400.13, to the Board’s standard 2,000-acre activation limit for the zone, to ASF sunset provisions for magnet sites that would terminate authority for Sites 1, 7, 8, 9 and 10 if not activated within five years from the month of approval and for Sites 5 and 6 if not activated within the initial ten years from the month of approval, and to an ASF sunset provision for usage-driven sites that would terminate authority for Sites 2, 3 and 4 if no foreign-status merchandise is admitted for a bona fide customs purpose within three years from the month of approval.

Dated: September 15, 2016.
Paul Piquado,
Assistant Secretary of Commerce for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

DEPARTMENT OF COMMERCE
International Trade Administration
[Docket No. 160713610–6783–02]
RIN 0625–XC020
Cost Recovery Fee Schedule for the EU–U.S. Privacy Shield Framework

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Final notice of implementation of a cost recovery program fee.

SUMMARY: The Department of Commerce published the Cost Recovery Fee Schedule for the EU–U.S. Privacy Shield Framework on July 22, 2016 (81 FR 47752). We gave interested parties an opportunity to comment on the fee schedule. No comments were received and so the fee schedule is considered final until further review one year after implementation of the program. Consistent with the guidelines in OMB Circular A–25,1 the U.S. Department of Commerce’s International Trade Administration (ITA) has implemented a cost recovery program fee to support the operation of the EU–U.S. Privacy Shield Framework (Privacy Shield), which requires that U.S. organizations pay an annual fee to ITA in order to participate in the Privacy Shield. The cost recovery program supports the administration and supervision of the Privacy Shield program and supports the provision of Privacy Shield-related services, including education and outreach. The Privacy Shield fee schedule was effective on August 1, 2016, when ITA began accepting self-certifications under the Privacy Shield Framework.

DATES: This fee schedule was effective August 1, 2016.

FOR FURTHER INFORMATION CONTACT:
Requests for additional information regarding the EU–U.S. Privacy Shield Framework should be directed to Grace Harter, Department of Commerce, International Trade Administration, Room 20001, 1401 Constitution Avenue NW, Washington, DC, tel. 202–482–4936 or 202–482–1512 or via email at privacyshield@trade.gov. Additional information on ITA fees is available at trade.gov/fees.

SUPPLEMENTARY INFORMATION:
Background

Consistent with the guidelines in OMB Circular A–25, federal agencies are responsible for implementing cost recovery program fees.

The role of ITA is to strengthen the competitiveness of U.S. industry, promote trade and investment, and ensure fair trade through the rigorous enforcement of our trade laws and agreements. ITA works to promote privacy policy frameworks to facilitate the flow of data across borders to support international trade.

The United States and the European Union (EU) share the goal of enhancing privacy protection but take different approaches to protecting personal data. Given those differences, the Department of Commerce (DOC) developed the Privacy Shield in consultation with the European Commission, as well as with industry and other stakeholders, to provide organizations in the United States with a reliable mechanism for personal data transfers to the United States from the European Union while ensuring the protection of the data as required by EU law.

In July 2016, the European Commission approved the EU–U.S. Privacy Shield Framework. The published Privacy Shield Principles are available at: [insert link]. The DOC has issued the Privacy Shield Principles under its statutory authority to foster, promote, and develop international commerce (15 U.S.C. 1512). ITA will
administer and supervise the Privacy Shield, including by maintaining and making publicly available an authoritative list of U.S. organizations that have self-certified to the DOC. U.S. organizations submit information to ITA to self-certify their compliance with Privacy Shield. ITA will accept self-certification submissions beginning on August 1, 2016. At a future date, ITA will publish for public notice and comment information collections as described in the Privacy Shield Framework consistent with the Paperwork Reduction Act.

U.S. organizations considering self-certifying to the Privacy Shield should review the Privacy Shield Framework. In summary, in order to enter the Privacy Shield, an organization must (a) be subject to the investigatory and enforcement powers of the Federal Trade Commission (FTC) or the Department of Transportation; (b) publicly declare its commitment to comply with the Principles through self-certification to the DOC; (c) publicly disclose its privacy policies in line with the Principles; and (d) fully implement them.

Self-certification to the DOC is voluntary; however, an organization’s failure to comply with the Principles after its self-certification is enforceable under Section 5 of the Federal Trade Commission Act prohibiting unfair and deceptive acts in or affecting commerce (15 U.S.C. 45(a)) or other laws or regulations prohibiting such acts.

ITA has implemented a cost recovery program to support the operation of the Privacy Shield, which requires U.S. organizations to pay an annual fee to ITA in order to participate in the program. The cost recovery program supports the administration and supervision of the Privacy Shield program and supports the provision of Privacy Shield-related services, including education and outreach. The fee a given organization is charged is based on the organization’s annual revenue:

**Fee Schedule**

**EU–U.S. PRIVACY SHIELD FRAMEWORK COST RECOVERY PROGRAM**

<table>
<thead>
<tr>
<th>Organization’s annual revenue</th>
<th>Annual fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0 to $5 million .................</td>
<td>$250</td>
</tr>
<tr>
<td>Over $5 million to $25 million</td>
<td>650</td>
</tr>
<tr>
<td>Over $25 million to $500 million</td>
<td>1,000</td>
</tr>
<tr>
<td>Over $500 million to $5 billion</td>
<td>2,500</td>
</tr>
<tr>
<td>Over $5 billion ..................</td>
<td>3,250</td>
</tr>
</tbody>
</table>

Organizations will have additional direct costs associated with participating in the Privacy Shield. For example, Privacy Shield organizations must provide a readily available independent recourse mechanism to hear individual complaints at no cost to the individual. Furthermore, organizations are required to pay contributions in connection with the arbitral model, as described in Annex I to the Principles.

**Method for Determining Fees**

ITA collects, retains, and expends user fees pursuant to delegated authority under the Mutual Educational and Cultural Exchange Act as authorized in its annual appropriations acts.

The EU-U.S. Privacy Shield Framework was developed to provide organizations in the United States with a reliable mechanism for personal data transfers that underpin the trade and investment relationship between the United States and the EU. Fees are set taking into account the operational costs borne by ITA to administer and supervise the Privacy Shield program. The Privacy Shield program requires a significant commitment of resources and staff. The Privacy Shield Framework includes commitments from ITA to:

- Maintain a Privacy Shield Web site;
- verify self-certification requirements submitted by organizations to participate in the program;
- expand efforts to follow up with organizations that have been removed from the Privacy Shield List;
- search for and address false claims of participation;
- conduct periodic compliance reviews and assessments of the program;
- provide information regarding the program to targeted audiences;
- increase cooperation with EU data protection authorities;
- facilitate resolution of complaints about non-compliance; and
- hold annual meetings with the European Commission and other authorities to review the program, and provide an update of laws relevant to Privacy Shield.

In setting the Privacy Shield fee schedule, ITA determined that the services provided offer special benefits to an identifiable recipient beyond those that accrue to the general public. ITA calculated the actual cost of providing its services in order to provide a basis for setting each fee. Actual cost incorporates direct and indirect costs, including operations and maintenance, overhead, and charges for the use of capital facilities. ITA also took into account additional factors, including adequacy of cost recovery, affordability, and costs associated with alternative options available to U.S. organizations for the receipt of personal data from the EU.

ITA established a 5-tiered fee schedule that promotes the participation of small organizations in Privacy Shield. A multiple-tiered fee schedule allows ITA to offer the organizations with lower revenue a lower fee. In setting the 5 tiers, ITA considered, in conjunction with the factors mentioned above: (1) The Small Business Administration’s guidance on identifying SMEs in various industries most likely to participate in the Privacy Shield, such as computer services, software and information services; (2) the likelihood that small companies would be expected to receive less personal data and thereby use fewer government resources; and (3) the likelihood that companies with higher revenue would have more customers whose data they process, which would use more government resources dedicated to administering and overseeing Privacy Shield. For example, if a company holds more data it could reasonably produce more questions and complaints from consumers and the European Union’s Data Protection Authorities (DPAs). ITA has committed to facilitating the resolution of individual complaints and to communicating with the FTC and the DPAs regarding consumer complaints. Lastly, the fee increases between the tiers are based in part on projected program costs and estimated participation levels among companies within each tier.

**Conclusion**

Based on the information provided above, ITA believes that its Privacy Shield cost recovery fee schedule is consistent with the objective of OMB Circular A–25 to “promote efficient allocation of the nation’s resources by establishing charges for special benefits provided to the recipient that are at least as great as the cost to the U.S. Government of providing the special benefits . . . .” OMB Circular A–25(5)(b). ITA did not receive any public comments on the interim final rule it published on July 22, 2016 (PUT IN FR CITE) and is not revising the fee schedule at this time. ITA will reassess the fee schedule after the first year of implementation and, in accordance with OMB Circular A–25, at least every two years thereafter.

RIN 0648–XE891

Fishing Capacity Reduction Program for the Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of sub-loan repayment.

SUMMARY: NMFS issues this notice to inform interested parties that the California Pink Shrimp sub-loan in the Pacific Coast Groundfish Capacity Reduction (Buyback) Program has been repaid. Therefore, Buyback fee collections on California Pink Shrimp sub-loan will cease for all landings after August 31, 2016.

DATES: Comments must be submitted on or before 5 p.m. EST October 17, 2016.

ADDRESSES: Send comments about this notice to Paul Marx, Chief, Financial Services Division, NMFS, Attn: California Pink Shrimp Buyback, 1315 East-West Highway, Silver Spring, MD 20910 (see for further information contact).

FOR FURTHER INFORMATION CONTACT:

Michael A. Sturtevant at (301) 427–8799 or michael.a.sturtevant@noaa.gov.

SUPPLEMENTARY INFORMATION: On November 16, 2004, NMFS published a proposed rule in the Federal Register (69 FR 67100) proposing to implement an industry fee system for repaying the California Pink Shrimp Buyback sub-loan. The final rule was published July 13, 2005 (70 FR 40225) and fee collection began on September 8, 2005. Interested persons should review these for further program details.

The California Pink Shrimp Buyback sub-loan in the amount of $674,202.18 will be repaid in full upon receipt of Buyback fees on landings through August 31, 2016. Any discrepancies in fees owed and fees paid must be resolved immediately. After the sub-loan is closed, no further adjustments to fees paid and fees received can be made.

Dated: September 26, 2016.

Brian T. Pawlak,
CFO/Director, Office of Management and Budget, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: Notice is hereby given of a meeting of the U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee (Committee) in Seattle, WA and La Push, WA.

DATES: The meeting will be held on Tuesday, October 11, 2016, from 9:00 a.m. to 12:00 p.m. in Seattle, WA. The meeting will continue in La Push, WA on Wednesday, October 12, 2016, from 9:00 a.m.–5:00 p.m., and Thursday October 13, 2016 from 9:00 a.m.–2:30 p.m. These times and the agenda topics described below are subject to change. Refer to the Web page listed below for the most up-to-date meeting agenda.

ADDRESSES: On Tuesday, October 11 the meeting will be held in the Hardisty Conference Room, 6th floor, Henderson Hall, University of Washington Applied Physics Laboratory, 1013 NE 40th Street, Seattle, WA 98105. On Wednesday and Thursday, October 12–13 the meeting will be held at the Quileute Tribal Administration Building, 90 Main Street, La Push, WA 98350.

FOR FURTHER INFORMATION CONTACT:

Jessica Snowden, Designated Federal Official, U.S. IOOS Advisory Committee, U.S. IOOS Program, 1315 East-West Highway, Second Floor, Silver Spring, MD 20910; Phone 240–533–9466; Fax 301–713–3281; Email jessica.snowden@noaa.gov or visit the U.S. IOOS Advisory Committee Web site at http://www.ioos.noaa.gov/advisory committee.

SUPPLEMENTARY INFORMATION: The Committee was established by the NOAA Administrator as directed by Section 12304 of the Integrated Coastal and Ocean Observation System Act, part of the Omnibus Public Land Management Act of 2009 (Pub. L. 111–11). The Committee advises the NOAA Administrator and the Interagency Ocean Observation Committee (IOOC) on matters related to the responsibilities and authorities set forth in section 12302 of the Integrated Coastal and Ocean Observation System Act of 2009 and other appropriate matters as the Under Secretary refers to the Committee for review and advice. The Committee will provide advice on:

(a) Administration, operation, management, and maintenance of the System;
(b) expansion and periodic modernization and upgrade of technology components of the System;
(c) identification of end-user communities, their needs for information provided by the System, and the System’s effectiveness in dissemination information to end-user communities and to the general public; and
(d) any other purpose identified by the Under Secretary of Commerce for Oceans and Atmospheric or the Interagency Ocean Observation Committee.

The meeting will be open to public participation with a 15-minute public comment period on October 11, 2016, from 11:45 a.m. to 12:00 p.m., on October 12, 2016, from 4:30 p.m. to 4:45 p.m., and on October 13, 2016 from 2:00 p.m. to 2:15 p.m. (check agenda on Web site to confirm time.) The Committee expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by the Designated Federal Official by October 7, 2016 to provide sufficient time for Committee review.
Written comments received after October 7, 2016, will be distributed to the Committee, but may not be reviewed prior to the meeting date. Seats will be available on a first-come, first-served basis.

Matters to be Considered: The meeting will focus on ongoing committee priorities, as well as learning about ocean observing priorities from tribal, local, and state stakeholders in the Pacific Northwest. The latest version will be posted at http://www.ioos.noaa.gov/advisorycommittee.

Special Accommodations: These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Jessica Snowden, Designated Federal Official at 240–533–9466 by October 1, 2016.

Zdenka Willis,
Director, U.S. IOOS Program, National Ocean Service.

BILLING CODE P

DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration
RIN 0648–XE921
Gulf of Mexico Fishery Management Council; Public Meeting
AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.
ACTION: Notice of a public meeting.
SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold a four-day meeting to consider actions affecting the Gulf of Mexico fisheries in the exclusive economic zone (EEZ).
DATES: The meeting will take place on Monday, October 17 through Thursday, October 20, 2016.
ADDRESSES: The meeting will be held at the IP Casino hotel, located at 850 Bayview Avenue, Biloxi, MS 39530; telephone (228) 436–3000.
Council address: Gulf of Mexico Fishery Management Council, 2203 N. Lois Avenue, Suite 1100, Tampa, FL 33607; telephone: (813) 348–1630.
FOR FURTHER INFORMATION CONTACT: Douglas Gregory, Executive Director, Gulf of Mexico Fishery Management Council; telephone: (813) 348–1630.
SUPPLEMENTARY INFORMATION:
Agenda
Monday, October 17, 2016; 8:30 a.m.–5:30 p.m.

The Full Council will be convened to a review and adopt the proposed 2016–17 Council Committee Roster. The Data Collection Management Committee will receive a presentation on National Fish and Wildlife Foundation’s (NFWF) For-Hire Pilot Program; and For-hire reporting Requirements; Cost analysis and Reporting Requirements of Commercial Electronic Reporting Program. After lunch, the Shrimp Management Committee will receive an update on NMFS Turtle Excluder Devise (TED) Rule; Risk Assessment for Threshold Permit Numbers Relative to Sea Turtle Incidental Take Constraints; and review of Revised Options paper for Shrimp Amendment 17B. The Administrative/Budget Committee will review the State, Federal and Council Annual Leave Policies. The Mackerel Management Committee will review a Public Hearing Draft for CMP Amendment 29: Allocation Sharing and Accountability for Gulf King Mackerel; review Final Action—CMP Framework Amendment 5: Modifications to Pelagic Commercial Permit Restrictions in the Gulf of Mexico and Atlantic; and Final Action on CMP Amendment 30: Atlantic Cobia Recreational Fishing Year. The Full Council in a CLOSED SESSION (approximately 4:45 p.m.–5:45 p.m.) will review and select appointments for the Ad Hoc Private Recreational Advisory Panel (AP).

Tuesday, October 18, 2016; 8 a.m.–5:30 p.m.

Wednesday, October 19, 2016; 8 a.m.–5:30 p.m.

The Reef Fish Management Committee will review draft Amendment 36A—Modifications to Commercial Individual Fishing Quota (IFQ) programs; and receive a summary on the Standing and Special Reef Fish Scientific and Statistical Committee (SSC) and Reef Fish Advisory Panel meetings. The Joint Coral/Habitat Committee will review the Final Draft of 5-year EFH Review and scoping document for Coral Habitat Areas of Particular Concern (HAPCs). The Law Enforcement Committee will review and approve the Law Enforcement Operations and Strategic Plans; and receive a summary from the Law Enforcement Technical Committee meeting.

The Full Council will convene after lunch (approximately 1 p.m.) with Call to Order, Announcements, and Introductions; and review of Exempt Fishing Permit (EFPs) Applications, if any. The Council will receive presentations on Draft Highly Migratory Species (HMS) Amendments 5b and 10; Climate Vulnerability Analysis for Gulf Managed Stocks; Mississippi Law Enforcement Efforts; and NMFS CESERO Landing Summaries. The Council will receive public testimony from 2:45 p.m. until 5:30 p.m. on Agenda Testimony items: Final Action on Framework Action 5: To Remove the Prohibition on Retaining the Recreational King Mackerel Bag Limit with Commercial King Mackerel Permit; Final Action on Referendum Requirements for Reef Fish Amendment 42—Reef Fish Management for Headboat Survey Vessels; on proposed fishing regulations on the Flower Garden Banks National Marine Sanctuary; and Final Action on CMP Amendment 30: Atlantic Cobia in the Water Year; and, hold an open public testimony period regarding any other fishery issues or concern. Anyone wishing to speak during public comment should sign in at the registration station located at the entrance to the meeting room.

Thursday, October 20, 2016; 8 a.m.–3:30 p.m.

The Full Council will receive committee reports from Data Collection, Mackerel, Shrimp and the Administrative/Budget Management Committees. The Full Council will receive the Closed Session Report on Ad Hoc Private Recreational Angler AP Membership and Discuss the Charge of the AP. The Council will continue to receive committee reports from Law Enforcement, Reef Fish and Joint Coral/ Habitat Management Committees; and, vote on Exempted Fishing Permit (EFP) applications, if any. The Council will receive updates from supporting agencies: South Atlantic Fishery Management Council; Gulf States
Marine Fisheries Commission; U.S. Coast Guard; U.S. Fish and Wildlife Service; and, the Department of State. Lastly, the Council will discuss any Other Business items.

—Meeting Adjourns—

The timing and order in which agenda items are addressed may change as required to effectively address the issue. The latest version will be posted on the Council’s file server, which can be accessed by going to the Council’s Web site at http://www.gulfcouncil.org and clicking on FTP Server under Quick Links. For meeting materials, select the “Briefing Books/Briefing Book 2016–10” folder on Gulf Council file server. The username and password are both “gulfguest”. The meetings will be webcast over the internet. A link to the webcast will be available on the Council’s Web site, http://www.gulfcouncil.org

Although other non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subjects of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided that the public has been notified of the Council’s intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kathy Pereira (see ADDRESSES) at least 5 days prior to the meeting date.

Dated: September 27, 2016.

Tracey L. Thompson,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to a Tidal Marsh Restoration Project

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization; request for comments.

SUMMARY: NMFS has received a request from the California Department of Fish and Wildlife—Central Region (CADFW) for authorization to take marine mammals incidental to construction activities as part of a tidal marsh restoration project within the Minhoto-Hester Marsh in Elkhorn Slough (Monterey, CA). Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to issue an incidental harassment authorization (IHA) to the CADFW to incidentally take marine mammals, by Level B harassment only, during the specified activity.

DATES: Comments and information must be received no later than October 31, 2016.

ADDRESSES: Comments on the applications should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Physical comments should be sent to 1315 East-West Highway, Silver Spring, MD 20910 and electronic comments should be sent to ITP.Egger@noaa.gov.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments received electronically, including all attachments, must not exceed a 25-megabyte file size. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. All comments received are a part of the public record and will generally be posted online at www.nmfs.noaa.gov/pr/permits/incidental/construction.htm without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Stephanie Egger, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Availability

An electronic copy of the CADFW’s application and supporting documents, as well as a list of the references cited in this document, may be obtained online at www.nmfs.noaa.gov/pr/permits/incidental/construction.htm. In case of problems accessing these documents, please call the contact listed above.

National Environmental Policy Act

In August 2010, NMFS’ Office of Habitat Conservation prepared a Targeted Supplemental Environmental Assessment (TSEA) for a similar tidal restoration project in Parson’s Slough, a tidal marsh adjacent to the project area (both in Elkhorn Slough). The TSEA assessed the potential adverse environmental effects of this project specific to marine mammals. Additional potential impacts to other elements of the human environment from this type of project were incorporated by reference in the TSEA. NMFS has reviewed the TSEA and believes it appropriate to write a Supplemental EA (based on the TSEA) in order to assess the impacts to the human environment of issuance of an IHA to CADFW and subsequently sign our own Finding of No Significant Impact. In addition, information in the CADFW’s application, CADFW’s Initial Study and Mitigated Negative Declaration (prepared June 2015 pursuant to the CA Environmental Quality Act of 1970 (CEQA)), the Elkhorn Slough National Estuarine Research Reserve (ESNERR) Biological Assessment (prepared September 2015), and this notice collectively provide the environmental information related to the proposed issuance of this IHA for public review and comment. All documents are available at the aforementioned Web site. We will review all comments submitted in response to this notice as we complete the National Environmental Policy Act (NEPA) process prior to a final decision on the incidental take authorization request.

Background

Sections 101(a)(5)(D) of the MMPA (16 U.S.C. 1361 et seq.) direct the Secretary of Commerce to allow, upon request by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review. Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the methods of taking and requirements pertaining to the mitigation, monitoring and reporting of
such takings are set forth. NMFS has defined “negligible impact” in 50 CFR 216.103 as “... an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the U.S. can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Section 101(a)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny the authorization. Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as “any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].”

Summary of Requests

On June 2, 2016, we received an application from the CADFW for authorization to take marine mammals incidental to construction activities associated with a 47-acre tidal marsh restoration project within the Minhoto-Hester Marsh in Elkhorn Slough (Monterey, CA) (Phase 1). The overall Elkhorn Slough Tidal Marsh Restoration Project would restore a total of 147 acres; however, future phases are not part of this application as they are currently unfunded and present some additional technical challenges. Another IHA request will be made prior to implementation of any proposed future phases. The CADFW submitted revised versions of the application on July 13, 2016, August 2, 2016, August 29, 2016, and a final application on September 6, 2016 which we deemed adequate and complete.

The proposed activity would begin between October 2016 and February 2017 and last approximately 11 months with built in buffers for adverse weather and other conditions when work is not possible. Pacific harbor seal (Phoca vitulina richardii) and southern sea otters (Enhydra lutris nereis) are expected to be present during the proposed work. Southern sea otters are managed by the U.S. Fish and Wildlife Service and will not be considered further in this proposed IHA notice. Construction activities are expected to produce noise and visual disturbance that have the potential to result in behavioral harassment of harbor seals. NMFS is proposing to authorize take, by Level B Harassment, of harbor seals as a result of the specified activity.

Description of the Specified Activities

Overview

The CADFW proposes to restore approximately 47 acres of tidal marsh within the Minhoto-Hester Marsh in Elkhorn Slough (Monterey, CA) and additional tidal marsh, upland ecotone, native grasslands restoration within a buffer area (Phase 1). This work would require approximately 170,000 cubic yards (cy) of fill to raise the marsh to an elevation that would allow emergent wetland vegetation to naturally reestablish and persist. The work would also require maintaining or re-excavating existing tidal channels and excavating within the upland buffer area to restore habitat. The slough system has historically faced substantial tidal wetland loss related to prior diking and marsh draining, and is presently facing unprecedented rates of marsh degradation.

The CADFW intends to restore tidal marsh to reduce tidal erosion, improve water quality, provide sea-level rise resilience, increase carbon sequestration, and improve ecosystem function that have been altered by past land use practices.

Dates and Duration

Under the proposed action, 132 days of construction activities and four days of vibratory pile driving (total 136 days of project activities) related to the tidal marsh restoration would occur over an 11-month period. The 11-month period is a conservative estimate and includes ecotone and grassland restoration work as well. Most of the work on the marsh plain would be completed within six to eight months. The construction period assumes that the construction contractors would work between the hours of 5:00 a.m. to 6:00 p.m., Monday through Friday, only during daylight hours. However, some construction activity may also be required during these times on Saturdays. The proposed IHA would be valid for one year from the date of issuance, with project start expected between October 2016 and February 2017.

Specific Geographic Region

The proposed project is located in the Elkhorn Slough estuary, situated 90 miles south of San Francisco and 20 miles north of Monterey, is one of the largest estuaries in CA and contains the State’s largest salt marshes south of San Francisco Bay (see Figure 1–1 of the application). The Elkhorn Slough is a network of intertidal marshes, mudflats, and subtidal channels located at the center of the Monterey Bay shoreline. The restoration will occur specifically in the Minhoto-Hester Marsh (project area) within the Slough, and is a low-lying area consisting of marsh, intertidal mudflats, tidal channels and remnant levees. The project area is on land owned and managed by CADFW as part of the ESNERR (see Figure 1–1 of the application). One Marine Protected Area (MPA), a State Marine Reserve is located within the project area. Two additional MPAs are located within one mile of the project area. The Minhoto-Hester Marsh has multiple cross-levees and both natural and dredged channels with a major dredged channel (100+ feet (ft) wide in some locations) that runs north to south through the remnant marsh.

Over the past 150 years, human activities have altered the tidal, freshwater, and sediment processes which are essential to support and sustain Elkhorn Slough’s estuarine habitats. Fifty percent of the tidal salt marsh in the Slough has been lost during this time period. This habitat loss is primarily a result of two historic land use changes, (1) construction of a harbor at the mouth of the Slough and the related diversion of the Salinas River, which lead to increased tidal flooding (and subsequent drowning of vegetation) and (2) past diking and draining of the marsh for use as pasture land. The act of draining wetlands led to sediment compaction and land subsidence, from one to six feet. Decades later, the dikes began to fail, reintroducing tidal waters to the reclaimed wetlands. Rather than converting back to salt marsh, the areas converted to poor quality, high elevation intertidal mudflat, as the lowered landscape was inundated too frequently to support tidal marsh, and insufficient sediment supply was available in the tidal waters to rebuild elevation. The loss of riverine sediment inputs, continued subsidence of marsh areas, sea level rise, increased salinity, and increased nutrient inputs may also contribute to marsh loss (Watson et al., 2011). Bank and channel erosion in the Elkhorn Slough area leads to deepening and widening tidal creeks, causing salt marshes to collapse into the...
channel, and eroding sediments that provide important habitat and support estuarine food webs.

**Detailed Description of Activities**

The CADFW plans to raise the subsided former marsh plain (currently mostly too low to sustain vegetation) to mid-high marsh plain elevations over an area of approximately 47 acres (see Figure 1-3 of the application). Approximately 167,000 cy of sediment is required for implementation of the proposed project. The CADFW will use 50,000 cy of imported sediment, along with approximately 117,000 cy of sediment excavated from existing upland areas of the project site, to achieve the requisite 167,000 cy necessary for project implementation. Sediment would be placed to a fill elevation slightly higher than the target marsh plain elevation to allow for settlement and consolidation of the underlying soils. The average fill depth would be 2.1 ft, including 25 percent overfill.

Table 1, below, presents the acreages and extents of proposed fill within each marsh sub-area, as well as the volume of fill required for each marsh sub-area to be restored. The stockpiled Pajaro Bench soils and onsite borrow would be used as fill sources. The project would rely primarily on natural vegetation recruitment in the restored marsh areas.

**Table 1—Volume of Fill Required in Each Sub-Area**

**Note:** Volumes in presented in this table are mid-range estimates; actual volumes may be higher or lower.

**Water Control and Tidal Channels of the Restoration Area**—Work areas on the remnant marsh plain would for the most part be isolated from the tides and dewatered to allow construction in non-tidal conditions. Water control structures such as temporary berms would be utilized to isolate the fill placement area during the construction period. Existing berms would be used, where possible. There are a number of potential configurations to isolate the fill placement area which will depend on the workflow of the contractor chosen. For this application, CADFW has identified the water control option with the greatest potential impact to marine mammals would be a sheet pile wall at the mouth of the project area (see Figure 1-3 of the application). If a sheet pile is required to be installed at the tidal entrance to the project area, four days of vibratory pile driving would occur. It is also possible that the mouth of the project area may be closed with an earthen dam or an inflatable dam; therefore, the sheet pile would not be necessary. The isolated work areas would be drained using a combination of gravity and pumps. Water levels within the blocked areas would be managed to keep them mostly free of water (with some ponded areas remaining) and to allow fill placement at all stages of the tides. To reduce the potential for fish to become entrained in isolated ponded areas, blocking of tidal channels would occur at low tide. When sediment placement is completed, the berms would be lowered to the target marsh elevation, reintroducing tidal inundation.

Remnant historic channels onsite would generally be left in place or filled and re-excavated in the same place. As needed for marsh access, smaller channels would be filled. Avoidance of channel fill, temporary and permanent, is preferred. As much of the existing tidal channel network would be maintained as is feasible, and the post-project channel alignments would be similar to those under existing conditions. The density of channels (length of channel per acre of marsh) after restoration would be comparable to the density in natural reference marshes. Low levees (less than 0.5 ft above the marsh plain) composed of fill material would be constructed along the larger channels to simulate natural channel levees. The project would recreate natural levee features along the sides of the main channel into the Minhoto-Hester Marsh. Fill would be placed as close to the edge of the channel as possible to simulate the form and function of a natural channel bank. Borrow ditches that date from the times of historical wetland reclamation in these areas would be blocked or filled completely if fill is available after raising the marsh plain. Blocking borrow ditches would route more flow through the natural channels and slightly increase hydraulic resistance, which may achieve benefits from reducing tidal prism and associated scour in the Elkhorn Slough system.

To limit trip distances onto the marsh, the project would employ one or more of the following placement approaches. Temporary channel crossings may be constructed, or tidal channels may be temporarily filled and then re-dug with an excavator or backhoe. If re-excavation of the smaller channels proves infeasible, these channels may be permanently filled, the resulting channel extent consisting of the larger channels only. The resulting channel extent would be sufficient to provide drainage and tidal exchange to support natural marsh functions. The number and locations of channel crossings would depend on the tradeoff between haul distances and the ease of installing and removing the crossings. Where tidal channels were maintained in place,
turbidity control measures (i.e., Best Management Practices (BMPs), such as hay bales or weed free straw wattles) could be staked down in or adjacent to the channels to be preserved. Bulldozers would push fill up to the hay bales and wattles, but not into the channels. Channel crossings and BMPs would be removed at project completion.

Buffer Area—The buffer area would be graded to increase marsh area and create a gently sloping ecotone band along the edge of the restored marsh. Specifically, excavation would widen the existing marsh (by up to 150 ft) and create a band of gentle slope (e.g., 1:30) on the hillside, fostering creation of a wider ecotone habitat. The remaining buffer area would be restored to native grassland habitat. The north end of the buffer area (adjacent to M4 and M6) would be restored in a later phase so this area could be used to stockpile material for future placement on subareas M4, M5, and M6 (see Figure 1–3 of the application).

Construction Sequencing and Equipment—Construction sequencing would begin with water management and/or turbidity control measures constructed around the work areas prior to placing material on the marsh. After fill placement on the marsh, any temporary features, such as water management berms, sheet pile and culverts, would be removed. Construction equipment would include haul trucks, heavy earthmoving equipment, such as dozers, backhoes, loaders, and excavators to transport dry material out onto the marsh. All heavy equipment used to transport dry material out onto the marsh would be of low ground pressure to prevent sinking in the mud. Mats would be temporarily placed on the marsh, as needed, to spread the weight of the equipment. A conveyor system could also be used to transport dry material from the stockpile out to the marsh, in lieu of dozers pushing the material the full distance. In the latter case, a loader would continuously load the conveyor system with material near the stockpile, and a dozer at the marsh drop off location would spread the material. A conveyor system may increase construction time as it would need to be assembled and taken apart to move it to new areas. A conveyor system is also likely cost prohibitive. At the end of construction in each cell/stage, any elevated haul roads and/or berms constructed to aid in material placement would be excavated to design grades, with the resulting earth used to fill adjacent restoration areas.

Description of Marine Mammals in the Area of the Specified Activity

The marine mammal species under NMFS jurisdiction occurring in the proposed project area is the Pacific harbor seal. In the harbor seal account provided here, we offer a brief introduction to the species and relevant stock as well as available information regarding population trends and threats, and describe any information regarding local occurrence (Table 2). Please also refer to NMFS’ Web site (http://www.fisheries.noaa.gov/pr/species/mammals/seals/harbor-seal.html) for the generalized harbor seal account and see NMFS’ Stock Assessment Reports (SAR), available at www.nmfs.noaa.gov/pr/sars, for more detailed accounts of the harbor seal stocks’ status and abundance. The harbor seal is assessed in the Pacific SAR (Carretta et al., 2016).

**Harbor Seal Overview and Regional Status**

Harbor seals inhabit coastal and estuarine waters and shoreline areas of the northern hemisphere from temperate to polar regions. The eastern North Pacific subspecies is found from Baja California north to the Aleutian Islands and into the Bering Sea. Multiple lines of evidence support the existence of geographic structure among harbor seal populations from California to Alaska (O’Corry-Crowe et al., 2003; Tente, 1986; Calambokidis et al., 1985; Kelly, 1981; Brown, 1988; Lamont, 1996; Burg, 1996). Harbor seals are generally non-migratory, and analysis of genetic information suggests that genetic differences increase with geographic distance (Westlake and O’Corry-Crowe, 2002). However, because stock boundaries are difficult to meaningfully draw from a biological perspective, three separate harbor seal stocks are recognized for management purposes along the west coast of the continental United States: (1) Inland waters of Washington; (2) outer coast of Oregon and Washington; and (3) California (Carretta et al., 2016). This IHA addresses seals from the California stock only.

</tbody>
</table>

1 Endangered Species Act (ESA) status: Endangered (E), Threatened (T); MMPA status: Depleted (D). A dash (-) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR (see footnote 3) or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA or listed under the MMPA as depleted and as a strategic stock.

2 CV is coefficient of variation; N<sub>min</sub> is the minimum estimate of stock abundance. In some cases, CV is not applicable. For certain stocks of pinnipeds, abundance estimates are based upon observations of animals (often pups) ashore multiplied by some correction factor derived from knowledge of the species (or similar species) life history to arrive at a best abundance estimate; therefore, there is no associated CV. In these cases, the minimum abundance may represent actual counts of all animals ashore. The most recent abundance survey that is reflected in the abundance estimate is presented; there may be more recent surveys that have not yet been incorporated into the estimate.

3 Potential biological removal, defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population size (OSP).

4 An estimate of the maximum number of animals that may be incidentally killed or injured (e.g., commercial fisheries, subsistence hunting, ship strike).

Local Abundance and Habitat Use

Harbor seals use Elkhorn Slough for hauling out, resting, socializing, foraging, molting and reproduction, but mainly use it as a staging area for foraging in the Monterey Bay, as there is a limited amount of foraging in the Slough (McCarthy, 2010). Harbor seals inhabit Elkhorn Slough year-round and occur individually or in groups, but their abundance may change seasonally.
nightly feeding in Monterey Bay (J. Harvey, personal communication in McCarthy, 2010). In a diet study conducted between 1995 and 1997, 35 species including topsmelt, white croaker, spotted cusk-eel, night smelt, bocaccio, Pacific herring, a brachyuran crustacean, and four genera of mollusks were consumed by harbor seals (Harvey et al., 1995 in McCarthy, 2010).

Seal Haul Outs Potentially Impacted by Project Activities

In the eastern part of Elkhorn Slough, harbor seals primarily use two sub-areas to haul out, the Minhoto-Hester Marsh Complex (project area and the area just outside the project) and the area in and around Parson’s Slough (see Figures 4–4 and 4–3 of the application, respectively). Monitoring was completed in 2013 to document the abundance and distribution of harbor seals utilizing the Minhoto-Hester Marsh Complex to determine potential impacts from the proposed project (Beck, 2014). Eight harbor seal haul out sites were identified in the Minhoto-Hester Marsh Complex, which also included haul-outs in portions of the Yampah Marsh adjacent to Minhoto-Hester Marsh (see Figure 4–5 of the application). Four of these haul out sites are within the footprint of the construction area and will be inaccessible during construction, but available again after construction. To better assess which areas of Minhoto-Hester Marsh were used by seals, haul out sites were categorized as either inside or outside the footprint of the construction area. The four haul out sites within the footprint of the construction area are remote herms on the interior of the marsh, identified as Small Island, M2 North, M3 North and M3 East (see Figure 4–5 of the application). Four haul out sites, just beyond the footprint of the construction area, are on the edge of the marsh nearest the main channel of Elkhorn Slough, and identified as M5 Northeast, M5 Southeast, Yampah Northwest and Yampah Southwest (see Figure 4–5 of the application). In 2013, the maximum number of seals counted from those eight haul out sites totaled 94 seals (Beck, 2014). In the Parson’s Slough Complex, adjacent to the project area, approximately 100 seals use the exposed mudflats during low tide to haul out on six haul out sites. The closest haul out in the Parson’s Slough Complex is located 1,300 feet northeast of the project area.

Potential Effects of the Specified Activity on Marine Mammals

This section includes a summary and discussion of the ways that components of the specified activity (e.g., construction inclusive of short term pile driving) may impact marine mammals. This discussion also includes reactions that we consider to rise to the level of a take and those that we do not consider to rise to the level of a take (for example, with acoustics, we may include a discussion of studies that showed animals not reacting at all to sound or exhibiting barely measurable avoidance). This section is intended as a background of potential effects and does not consider either the specific manner in which this activity will be carried out or the mitigation that will be implemented, and how either of those will shape the anticipated impacts from this specific activity.

The Estimated Take by the Incidental Harassment section later in this document will include a quantitative analysis of the number of individuals that are expected to be taken by this activity. The Negligible Impact Analysis section will include the analysis of how this specific activity will impact marine mammals and will consider the content of this section, the Estimated Take by Incidental Harassment section, the Proposed Mitigation section, and the Anticipated Potential Effects on Marine Mammal Habitat section to draw conclusions regarding the likely impacts of this activity on the reproductive success or survivorship of individuals and from that on the affected marine mammal populations or stocks.

Description of Sound Sources

Harbor seals that use the four haul out sites, just beyond the footprint of the construction, area (M5 Northeast, M5 Southeast, Yampah Northwest and Yampah Southwest) (described in the previous section, Description of Marine Mammals in the Area of the Specified Activity) and in other nearby areas may potentially experience behavioral disruption rising to the level of harassment from construction activities, which may include visual disturbance due to the presence and activity of heavy equipment and construction workers, airborne noise from the equipment, and from underwater noise during the brief period of sheet pile installation. Disturbed seals are likely to experience any or all of these stimuli, and take may occur due to any of these in isolation or in combination with the others. A significant body of past monitoring evidence indicates that activities, such
Marine mammals that occur in the vicinity of the Minhoto-Hester Marsh and other habitats near Seal Bend, and seals in this area are likely more exposed to vessel traffic as the haul out is along the edge of the main channel and more habituated to that type of disturbance. Seals monitored during the Parson’s Slough project (ESNERR, 2011) are not likely exposed as frequently to vessel traffic as their haul outs are within areas that are more sheltered and where watercraft is not allowed. During that project, seals showed disturbance to vessel movement at further distances (150 m or greater) and were more frequently disturbed from moving vessels than from pile driving activities. These seals may be habituated to some anthropogenic sounds (e.g., Union Pacific Railroad trains (UPRR)), but not to disturbance from moving vessels and therefore exhibited behavioral reactions at a greater distance away. There may also be seasonal variability in disturbance reactions, such as during the pupping season, as well as variation within different populations (Gunvalson, 2011).

Airborne background sound (anthropogenic) of Elkhorn Slough is likely dominated by recreational vessel activities, UPRR trains, and other human activity in the area. Recreational vessels are restricted to the main channel of Elkhorn Slough (just outside the project area). Trains along the UPRR likely generate fairly high noise levels in the vicinity of Minhoto-Hester Marsh within the eastern portion of the project area. Approximately 15 to 20 trains pass along the UPRR each day, which is located 400 ft from the furthest eastern portion of the project area (Vinnedge Environmental Consulting, 2010). Noise levels from the UPRR trains were monitored during the construction of the Parson’s Slough project, adjacent to the Minhoto-Hester Marsh, and estimated at 108 dBC Lmax (dBC can be defined as decibel [dB] with C-weighting which is a standard weighting of the audible frequencies commonly used for the measurement of peak sound pressure Level (SPL) and Lmax is defined as the maximum sound level during a single noise event). Noise is also generated from the Pick-n-Pull, a vehicle dismantling and recycling yard, and located approximately 300 ft from the project area. Agricultural equipment is operated occasionally within the existing uplands, including haul trucks that regularly travel across adjacent agricultural lands and may produce other back ground noise.

Noise levels from the previous Parson’s Slough project were monitored in 2010 and 2011. Background noise during that project was approximately 57 dBC Lmax measured at 20 and 40 m northeast of the pile installation site and approximately 1.5 m above the ground (ESNERR, 2011). Although no specific measurements have been made at the proposed project area, it is reasonable to believe that levels may generally be similar to the previous project at Parson’s Slough as there is a similar type and degree of activity within the same type of environment (tidal salt marsh). Known sound levels and frequency ranges associated with anthropogenic sources similar to those associated to this project are summarized in Table 3. Details of the source types are described in the following table.

### Table 3—Representative Airborne Sound Levels of Anthropogenic Sources—dB re: 20μPa

Airborne noise associated with this project includes noise from construction activities (including vibratory pile driving) during the restoration of the tidal marsh. Airborne noise produced from earth moving equipment (i.e., backhoes, front end loaders) for construction may produce sound levels at 80–90 dB at 15.24 m (FHWA, 2015) (Table 3). The construction activity may generate noise above ambient levels or create a visual disturbance for a period of 11 months. Although the exact distance of disturbance from noise is unknown, it is anticipated that the disturbance area would be smaller than the sheet pile installation impact area since construction equipment does not generate as much noise as pile driving. Trains along the UPRR likely generate fairly high noise levels in the eastern portion of the project area, so earth moving equipment operated in this area may not elevate ambient noise levels when trains are present. For this project, vibratory pile driving will only occur over four days of the 136 total days of construction and conducted at low tide, to the extent practicable, when minimal water is present to minimize underwater sound impacts.

**Acoustic Effects**

Marine mammals that occur in the project area could be exposed to airborne or underwater sounds associated with construction activities that have the potential to cause harassment, depending on their distance.
from construction activities. Although there is some potential that seals in the water could be exposed to underwater sound during the proposed four days of vibratory sheet pile driving, the underwater footprint of acoustic effect would likely be very small due to acoustic shadowing within the sinusous marsh area at the project site and the low source level, and seals would likely be disturbed by other stimuli associated with the project activities. Therefore, we do not separately consider underwater sound and do not discuss it further in this document.

Anthropogenic airborne sound could cause haulout pinnipeds to exhibit changes in their normal behavior, such as reduction in vocalizations, or cause them to temporarily abandon their habitat and move further from the source. Studies by Blackwell et al. (2004) and Moulton et al. (2005) indicate a tolerance or lack of response to unweighted airborne sounds as high as 112 dB peak and 96 dB root mean square.

### Visual Disturbance

Visual stimuli due to the presence of construction activities during the project have the potential to result in take of harbor seals at nearby haul out sites through behavioral disturbance. Harbor seals can exhibit a behavioral response to visual stimuli (e.g., including alert behavior, movement, vocalizing, or flushing). NMFS does not consider the lesser reactions (e.g., alert behavior) to constitute harassment. Upon the occurrence of low-severity disturbance (i.e., the approach of a vessel or person as opposed to an explosion or sonic boom), pinnipeds typically exhibit a continuum of responses, beginning with alert movements (e.g., raising the head), which may then escalate to movement away from the stimulus and possible flushing into the water. Flushed pinnipeds typically re-occupy the haul out within minutes to hours of the stimulus.

Due to the likely constant combination of visual and acoustic stimuli resulting from the presence and use of heavy equipment and work crews, we assume that harbor seals present in the areas adjacent to the footprint of the construction area may be disturbed and do not consider acoustic effects separately from the effects of potential disturbance due to visual stimuli.

### Anticipated Potentials Effects on Marine Mammal Habitat

The primary potential impact to marine mammal habitat associated with the construction activity is the exclusion from the accustomed haul out areas. However, other potential impacts to the surrounding habitat from physical disturbance are also possible.

#### Physical Impacts to Haul Out Habitat

Eight harbor seal haul out sites were identified in the Minhoto-Hester Marsh Complex, which also included haul outs in portions of Yampah Marsh adjacent to Minhoto-Hester Marsh (see Figure 4-5 of the application). Four of the eight haul out sites are within the footprint of the construction area and identified as Small Island, M2 North, M3 North and M3 East. Only the edge of the M2 North haul out site will be converted back to tidal marsh as it borders a borrow ditch that was previously excavated to create a berm (straight north south ditch) and is not a natural or historical marsh feature. The haul out sites of Small Island, M3 North and M3 East will remain intact. These four haul out sites will be temporarily unavailable to harbor seals, but once construction is complete, those sites will be available again (see Figure 4-4 of the application). During the restoration, the inability of seals to use suitable habitat within the footprint of the construction area would temporarily remove less than two percent of the potential haul out areas in the Slough (see Figure 4-4 of the application). Although the proposed action would permanently alter habitat within the footprint of the construction area, harbor seals haul out in many locations throughout the estuary, and the proposed activities are not expected to have any habitat-related effects that could cause significant or long-term consequences for individual harbor seals or their population. The restoration of the marsh habitat will have no adverse effect on marine mammal habitat, but possibly a long-term beneficial effect on harbor seals by improving ecological function of the slough, inclusive of higher species diversity, increased species abundance, larger fish, and improved habitat.

#### Pile Driving Effects on Potential Foraging Habitat

The area likely impacted by the project is relatively small compared to the available habitat in estuary waters in the Elkhorn Slough and the region. Avoidance by potential prey (i.e., fish) of the immediate area due to the temporary loss of this foraging habitat is also possible. The duration of fish avoidance of this area after pile driving stops is unknown, but a rapid return to normal recruitment, distribution and behavior is anticipated. Any impact would be short term and site-specific, and habitat conditions would return to their pre-disturbance state shortly after the cessation of in-water construction activities. Any behavioral avoidance by fish of the disturbed area would still leave significantly large areas of fish and marine mammal foraging habitat in the nearby vicinity.

In addition, primary foraging habitat for harbor seals may be mostly outside of the project area as they primarily use the Minhoto-Hester Marsh Complex for hauling out. Research by Oxman (1995) and Harvey et al. (1995) compared catch rates from trawls conducted in the Elkhorn Slough to species detected in seal scat and found that seals primarily feed between Seal Bend and the oceanic nearshore shelf in Monterey Bay.

In summary, given the short daily duration of sound associated with individual pile driving events (four days) and the relatively small areas being affected, pile driving activities associated with the proposed action are not likely to have a permanent, adverse effect on the foraging habitat. Harbor seals may forage mostly in the nearshore oceanic shelf; therefore, NMFS does not expect the proposed action to have habitat-related effects on harbor seal foraging success that could cause significant long-term consequences for individual harbor seals or their population.

#### Proposed Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses.

The primary purposes of these mitigation measures are to minimize disturbance from construction activities and to monitor marine mammal behavioral response to any potential sound and visual disturbances.

Here we provide a description of the mitigation measures we propose to require as part of the proposed Authorization.
Timing Restrictions

Construction work shall occur only during daylight hours when visual monitoring of marine mammals can be implemented. No in-water work will be conducted at night.

Construction Activities

After sheet piles are installed, harbor seals would no longer be able to access the project area and would temporarily be displaced from using those four haul outs. It would be unlikely for seals to enter the construction area as they would need to traverse a minimum 7ft high berm into an area without water. However, if a seal did enter the project area, CADFW shall notify NMFS immediately and further action would be determined. In addition, to reduce the risk of potentially startling marine mammals with a sudden intensive sound, the contractor shall begin construction activities gradually each day by moving around the project area and starting tractor one at a time.

Pupping Season

While CADFW does not anticipate any pupping within the project area, should a pup less than one week old (neonate) come within 20 m of where heavy machinery is working, construction activities in that area would be delayed until the pup has left the area. In the event that a pup less than one week old remains within those 20 m, NMFS would be consulted to determine the appropriate course of action.

Vibratory Pile Driving

An exclusion zone of 15 m shall be established during the four days of pile driving to prevent the unlikely potential for physical injury of harbor seals due to close approach to construction equipment. Pile extraction or driving shall not commence (or re-commence following a shutdown) until marine mammals are not sighted within the exclusion zone for a 15-minute period. If a marine mammal enters the exclusion zone during sheet pile work, work shall stop until the animal leaves the exclusion zone or is not observed for a minimum of 15 minutes.

Based on our evaluation of the proposed measures, as well as any other potential measures that may be relevant to the specified activity, we have preliminarily determined that the proposed mitigation measures provide the means of effecting the least practicable impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Proposed Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth “requirements pertaining to the monitoring and reporting of such taking”. The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for incidental take authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the proposed action area.

Any monitoring requirement we prescribe should improve our understanding of one or more of the following:

- Occurrence of marine mammal species in the action area (e.g., presence, abundance, distribution, density).
- Nature, scope, or context of likely marine mammal exposure to potential stressors.impacts (individual or cumulative, acute or chronic), through better understanding of: (1) Action or environment (e.g., source characterization, propagation, ambient noise); (2) Affected species (e.g., life history, dive patterns); (3) Co-occurrence of marine mammal species with the action; or (4) Biological or behavioral context of exposure (e.g., age, calving or feeding areas).
- Individual responses to acute stressors, or impacts of chronic exposures (behavioral or physiological).
- How anticipated responses to stressors impact either: (1) Long-term fitness and survival of an individual; or (2) Population, species, or stock.
- Effects on marine mammal habitat and resultant impacts to marine mammals.
- Mitigation and monitoring effectiveness.

Proposed Monitoring—Visual Marine Mammal Observations

Qualified Protected Species Observer (PSO) (a NMFS approved biologist) shall be used to detect, document, and minimize impacts to marine mammals. Monitoring would be conducted before, during, and after construction activities. In addition, PSOs shall record all incidents of marine mammal occurrence, regardless of distance from activity, and document any behavioral reactions in concert with distance from construction activities.

Important qualifications for PSOs for visual monitoring include:

- Visual acuity in both eyes (correction is permissible) sufficient for discernment of harbor seals on land or in the water with ability to estimate target size and distance; use of binoculars may be necessary to correctly identify the target;
  - Advanced education in biological science or related field (undergraduate degree or higher required);
  - Experience and ability to conduct field observations and collect data according to assigned protocols (this may include academic experience);
  - Experience or training in the field identification of marine mammals, including the identification of behaviors;
  - Sufficient training, orientation, or experience with the construction operation to provide for personal safety during observations;
  - Writing skills sufficient to prepare a report of observations including but not limited to the number and species of marine mammals observed; dates and times when construction activities were conducted; dates and times when construction activities were suspended, if necessary; and marine mammal behavior; and
  - Ability to communicate orally, by radio or in person, with project personnel to provide real-time information on marine mammals observed in the area as necessary.

PSOs shall be placed at the best vantage point(s) (e.g., Yampah Island, see Figure 2 of the monitoring plan in the application) practicable to monitor for marine mammals. PSOs shall also conduct mandatory biological resources awareness training for construction personnel. The awareness training shall be provided to brief construction personnel on marine mammals (inclusive of identification as needed, e.g., neonates) and the need to avoid and minimize impacts to marine mammals. If new construction personnel are added to the project, the contractor shall ensure that the personnel receive the mandatory training before starting work. The PSO would have authority to stop construction if marine mammals appear distressed (evasive maneuvers, rapid breathing, inability to flush) or in danger of injury.

The CADFW has developed a monitoring plan based on discussions between the CADFW and NMFS. The CADFW will collect sighting data and behavioral responses to construction activities for marine mammal species observed in the region of activity during the period of activity. All PSOs will be trained in marine mammal identification and behaviors and are required to have no other construction-
related tasks while conducting monitoring.

The monitoring plan involves PSOs surveying and conducting visual counts beginning prior to construction activities (beginning at least 30 minutes prior to construction activities), hourly monitoring during construction activities, and post-activity monitoring (continuing for at least 30 minutes after construction activities have ended). PSOs will conduct monitoring from a vantage point in the marsh (e.g., Yampa Island) such that all seal haul outs (see Figure 2 of the monitoring plan in the application) are in full view. During construction activities, monitoring shall assess behavior and potential behavioral responses to noise and visual disturbance due to the proposed activities. To document disturbance and possible incidental take during construction activities, the monitoring protocols will be implemented at all times when work is occurring (1) in-water, (2) north of a line starting at 36°48′38.91 N., 121°45′08.03 W., and ending 36°48′38.91 N., 121°45′27.11 W., (see Figure 1 of the monitoring plan in the application), and (3) within 30.5 m (100 ft) of tidal waters. When work is occurring in other areas, monitoring will occur for the first three days of construction and anytime there is a significant change in activities or location of construction activities within the project area. If disturbance is noted at any time, then monitoring will continue until there are three successive days of no disturbance. If there is a gap in construction activities of more than one week, the monitoring protocols will again be implemented for the first three days that construction resumes.

Counts will be performed for harbor seals hauled out and observed in the water. Total counts, sex, and age (adult, juvenile, pup) will be recorded. Behavioral monitoring will be conducted for the duration of the construction activities to document any behavioral responses to visual (or other) disturbance, according to the disturbance scale shown in Table 4 below. When responses are observed, the degree of response (i.e., alert and flush, movement of more than one m, or change in direction of movement) and the assumed cause (whether related to construction activities or not) will be noted. Only responses at Level 2 and 3 are considered to be take under the MMPA.

**Table 4—Seal Response to Disturbance**

<table>
<thead>
<tr>
<th>Level</th>
<th>Type of response</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Alert</td>
<td>Seal head orientation or brief movement in response to disturbance, which may include turning head towards the disturbance, cranling head and neck while holding the body rigid in a u-shaped position, changing from a lying to a sitting position, or brief movement of less than twice the animal’s body length. Alerts would be recorded, but not counted as a ‘take’.</td>
</tr>
<tr>
<td>2</td>
<td>Movement</td>
<td>Movements away from the source of disturbance, ranging from short withdrawals at least twice the animal’s body length to longer retreats, or if already moving a change of direction of greater than 90 degrees. These movements would be recorded and counted as a ‘take’.</td>
</tr>
<tr>
<td>3</td>
<td>Flush</td>
<td>All retreats (flushes) to the water. Flushing into the water would be recorded and counted as a ‘take’.</td>
</tr>
</tbody>
</table>

Additional parameters will be recorded including: Atmospheric conditions, cloud cover, visibility conditions, air and water temperature, tide height, and any other disturbance (visual or noise) that may be noted. We require that PSOs use approved data forms. Among other pieces of information, CADFW will record detailed information about any implementation of shutdowns, including the distance of animals to construction activities and description of specific actions that ensued and resulting behavior of the animal, if any. In addition, CADFW will attempt to distinguish between the number of individual animals taken and the number of incidents of take. Additional requirements of PSOs include:

1. The PSO shall be selected prior to construction activities;

2. The PSO shall attend the project site prior to, during, and after construction activities cease each day that the construction activities occur;

3. The PSO shall search for marine mammals on the haul out site, other suitable haul out habitat, and within the waters of this area from the observation site. PSOs will use binoculars and the naked eye to search continuously for marine mammals;

4. The PSO shall be present during construction activities to observe for the presence of marine mammals in the vicinity of the specified activity. All such activity would occur during daylight hours. If inclement weather limits visibility within the area of effect, the PSO would perform visual scans to the extent conditions allow. For pile driving activities, if the 15 m area around the pile driving is obscured by fog or poor lighting conditions, pile driving will not be initiated until that area is visible;

5. If marine mammals are sighted by the PSO, the PSO shall record the number of marine mammals and the duration of their presence while the construction activity is occurring. The PSO would also note whether the marine mammals appeared to respond to the noise/visual disturbance and, if so, the nature of that response. The PSO shall record the following information: Date and time of initial sighting, tidal stage, weather conditions, species, behavior (activity (e.g., foraging, mating, etc.), group cohesiveness, direction and speed of travel, etc.), number, tagged animals, whether the animal(s) are in the water or hauled out, group composition, distance between construction activities and marine mammal(s), number of animals impacted, location, construction activities occurring at time of sighting (earth moving equipment, construction personnel walking/talking, pile driving etc.), and monitoring and mitigation measures implemented or not implemented. The observations would be reported to NMFS; and

6. A final report would be submitted summarizing all effects from construction activities and marine mammal monitoring during the time of the authorization.

A written log of dates and times of monitoring activity will be kept. The log shall report the following information:

- Time of PSO arrival on site;
- Time of the commencement of construction activities;
- Distances to all marine mammals relative to the disturbance;
- Observations, notes on marine mammal behavior during construction activities, as described above, and on the number and distribution observed in the project vicinity;
- For observations of all other marine mammals (if observed) the time and
duration of each animal’s presence in the project vicinity; the number of animals observed; the behavior of each animal, including any response to construction activities; 

- Time of the cessation of construction activities; and
- Time of PSO departure from site.

Individuals implementing the monitoring protocol will assess its effectiveness using an adaptive approach. PSOs will use their best professional judgment throughout implementation and seek improvements to these methods when deemed appropriate. Any modifications to protocol will be coordinated between NMFS and the CADFW.

**Proposed Reporting**

A draft report will be submitted to NMFS within 90 days of the completion of marine mammal monitoring, or sixty days prior to the issuance of any subsequent IHA for this project (if required), whichever comes first. The report will include marine mammal observations pre-activity, during-activity, and post-activity of construction, and will also provide descriptions of any behavioral responses by marine mammals due to disturbance from construction activities and a complete description of total take estimate based on the number of marine mammals observed during the course of construction. A final report must be submitted within thirty days following resolution of comments on the draft report.

**Estimated Take by Incidental Harassment**

Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines “harassment” as: “... Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].”

All anticipated takes would be by Level B harassment resulting from construction activities involving temporary changes in behavior. It is unlikely that injurious or lethal takes would occur even in the absence of the planned mitigation and monitoring measures. Further, the proposed mitigation and monitoring measures are expected to minimize the possibility of take by Level A harassment, such that it is considered discountable.

Given the many uncertainties in predicting the quantity and types of impacts of sound or visual disturbance on marine mammals, it is common practice to estimate how many animals are likely to be present within a particular distance of a given activity, or exposed to a particular level of sound or visual disturbance. In practice, depending on the amount of information available to characterize daily and seasonal movement and distribution of affected marine mammals, it can be difficult to distinguish between the number of individuals harassed and the instances of harassment and, when duration of the activity is considered, it can result in a take estimate that overestimates the number of individuals harassed. In particular, for stationary activities, it is more likely that some smaller number of individuals may accrue a number of incidences of harassment per individual than for each incidence to accrue to a new individual, especially if those individuals display some degree of residency or site fidelity and the impetus to use the site (e.g., because of foraging opportunities) is stronger than the deterrence presented by the harassing activity.

In order to estimate the potential incidents of take that may occur incidental to the specified activity, we must first estimate the area subject to the disturbance that may be produced by the construction activities and then consider in combination information about harbor seals present and the number of days animals would be disturbed during the project. We then provide information to estimate potential incidents of take from disturbance as related to construction activities.

**Introduction to Acoustic Criteria**

We use generic sound exposure thresholds to determine when an activity that produces sound might result in impacts to a marine mammal such that a take by harassment might occur. To date, no studies have been conducted that explicitly examine impacts to marine mammals from pile driving sounds or from which empirical sound thresholds have been established. The generic thresholds described below (Table 5) are used to estimate when harassment may occur (i.e., when an animal is exposed to levels equal to or exceeding the relevant criterion) in specific contexts. However, useful contextual information that may inform our assessment of effects is typically lacking and we consider these thresholds as step functions.

**Sound Produced From Construction Activities**

Any underwater noise produced during pile driving in Minhoto-Hester Marsh would attenuate according to the shoreline topography. In a narrow and relatively shallow slough, bends and topographic changes in the bottom would act to reflect sound and attenuate sound levels. Seals within the project area, from the sound source (vibratory pile driving) to the north bank of the main channel of Elkhorn Slough (approximately 525–600 m; see Figure 6–4 in the application), may be impacted by noise and were used as the area to define Level B take estimates. Seals may be exposed to underwater noise that could cause behavioral harassment (i.e., above NMFS’ 120-dB [rms re 1 μPa] behavioral harassment criterion) only within a small area (see Figure 6–4 of the application). This small section of channel defines the extent of the potential Level B harassment zone for underwater noise.

Restoration activities would produce airborne noise that could potentially harass harbor seals that are hauled out near the activities. For example, airborne noise produced from earth moving equipment (i.e., backhoes, front end loaders) for construction may produce sound levels at 80–90 dB at 15.24 m (FHWA, 2015) (Table 3). However, disturbance resulting from use
of heavy equipment or other aspects of the proposed work could occur due to visual stimuli or airborne noise, and the likely range within which seals may be disturbed would be larger than the range to the 90-dB airborne noise disturbance criterion. Therefore, we do not evaluate takes specifically due to exposure to airborne noise and do not discuss airborne noise further in this document.

Description of Take Calculation

The following sections are descriptions of how take was determined for impacts to harbor seals from noise and visual disturbance related to construction activities.

Incidental take is calculated for each species by estimating the likelihood of a marine mammal being present within the project area during construction activities. Expected marine mammal presence is determined by past observations and general abundance during the construction window. For this project, the take requests were estimated using local marine mammal data sets, and information from state and federal agencies.

The calculation for marine mammal exposures is estimated by:

\[ \text{Exposure estimate} = N \times \text{number of animals in the area} \times 132 \text{ days of construction activities or 4 days of pile driving activity} \]

All estimates proposed by the applicant and accepted by NMFS, are considered conservative. Construction activities will occur in sections, and some sections (e.g., M1) are further away from seal haul outs (approximately 420 m and greater).

Noise from construction activities in more southern sections of the footprint of the construction area may cause fewer disturbances to seals. Not all seals that previously used the haul outs within the footprint of the construction area will use the haul outs just outside the project. The channel is small and the available habitat would likely not be available to support all 100 seals of the Minhoto-Hester Marsh Complex. Some seals may seek alternative haul out habitat in other parts of Elkhorn Slough. Pile driving will only occur for a short duration (four days) and would not be continuous during the day (daylight hours only). Using this approach, a summary of estimated takes of harbor seals incidental to the project activities are provided in Table 6. Estimates include Level B harassment as a result of exposure to noise and visual disturbance during construction activities.

The best scientific information available was considered for use in the harbor seal take assessment calculations. It is difficult to estimate the number of harbor seals that could be affected by construction activities because the animals are mainly either in the project area or venture near the project area to haul out during the day when the tide is low. Once the tidal channel is blocked and four haul out sites (Small Island, M2 North, M3 North and M3 East) are inaccessible, some seals will be able to use the alternative four haul outs (M5 Northeast, M5 Southeast, Yampah Northwest and Yampah Southwest). Seals that use these alternative four haul outs may be potentially impacted from noise and visual disturbance from construction activities of the tidal marsh restoration, but seals that normally use areas in the interior tidal channel may use haul outs that are outside the expected area of influence of the construction activity.

Various types of construction equipment (in addition to pile drivers) would be utilized for project activities such as dozers, loaders, and backhoes that may generate sound that can cause both noise and visual disturbance to harbor seals. Although the exact distance of all noise disturbances from construction activities is unknown, it is anticipated that the disturbance area for airborne noise would be small as earth moving equipment (i.e., backhoes, front end loaders) produce sound levels at 80–90 dB at 15.24 m and vibratory driving of sheet piles at 90 dBA at 30 m (Table 3) (dBA can be defined as dB with A-weighting designed to match the average frequency response of human hearing and enables comparison of the intensity of noise with different frequency characteristics). The closest haul outs that will be available to seals are 43–131 m outside the footprint of the construction area. If seals are in the water near the project or on available haul outs there is a chance that seals could be exposed to noise and/or visual disturbance from the construction activities. Construction activities may impact seals using haul outs M5 Northeast, M5 Southeast, Yampah Northwest and Yampah Southwest.

We assume that an average of 50 harbor seals will potentially occupy the alternate haul outs based on the size of the haul out habitat that is available. Four haul outs (out of eight) will be temporarily inaccessible during the construction; therefore, half of the seals (approximately 50 out of the 100 seals) of the Minhoto-Hester Marsh Complex will likely use the alternate four haul outs and experience disturbance from construction activities. It is presumed that the other half of the seals (50 seals) of the Minhoto-Hester Marsh Complex will utilize other suitable haul out habitat within Elkhorn Slough and are not considered available to be “taken” during construction activities (Monique Fountain, ESNERR, pers. comm. 2016). We multiply this estimate of the number of harbor seals potentially available to be taken by the total number of days (132 days) the applicant expects construction activities to occur. Therefore, CADFW requests, and NMFS proposes, authorization of 132 instances of takes per seal for 50 harbor seals (total of 6,600 instances) by Level B harassment incidental to construction activities (airborne noise and visual disturbance) over the course of the proposed action if all of the estimated harbor seals present are taken by incidental harassment each day (Table 6).

While the pile driving activities are planned to take place during slack tide to the extent possible (when harbor seals are less likely to be present), and only for a short duration, there may still be animals exposed to disturbance from pile driving even if the number of individual harbor seals expected to be encountered is very low. There are approximately 100 harbor seals that utilize Minhoto-Hester Marsh Complex that may be disturbed during pile driving activities. Additionally, there is some potential that an additional 100 harbor seals that occur in the adjacent Parson’s Slough Complex and Yampah Marsh and 50 harbor seals that may be present in the main channel of Elkhorn Slough could also be disturbed. CADFW requests, and NMFS proposes, authorization of four instances of take per seal for 250 harbor seals (total of 1,000 instances) by Level B harassment incidental to pile driving activities over the course of the proposed action if all of the estimated harbor seals present are taken by incidental harassment each day. This is an estimate based on the average number of harbor seals that potentially occupy the project area (and surrounding areas) (250 seals) multiplied by the total number of days (four days) the applicant expects pile driving activities to occur (Table 6).

This is a very conservative estimate, as not all the seals are likely in or near the project area at the same time, some of which are due to environmental variables such as tide level and the time of day. In the Minhoto-Hester Marsh Complex, a maximum daily average of 40 seals were present in the project area (on Small Island, M2 North, M3 North, and M3 East haul out sites) and 41 seals outside the project area (on M5 Northeast, M5 Southeast, Yampah Northwest and Yampah Southwest haul...
out sites) during the 2013 surveys, which is slightly less than the proposed 100 seals that may be taken. In addition, noise attenuates quickly due to shallow water, tidal influence and sinewy channels of Elkhorn Slough. NMFS considers this to be an conservative estimate by the applicant for the following reasons: (1) It would be unlikely that all 250 individual seals would be in the vicinity of the project area daily as there are other areas of the Slough that they likely use to haul out (see Figure 4–4 of the application); (2) as mentioned above, the haul out sites within the footprint of the construction area would be inaccessible to harbor seals and NMFS would not expect harbor seals to be affected by pile driving activities during the days/times when pile driving and high tide events co-occur; (3) harbor seals begin to leave the project area at night when they are likely foraging in Monterey Bay and will not be exposed to sound generated during pile driving that may take place during early evening hours; and, (4) based on previous survey effort conducted for the adjacent Parson’s Slough project, some harbor seals moved out of the disturbance area when construction activities were initiated and moved west (downstream) towards Seal Bend or other areas of suitable habitat along the main channel of Elkhorn Slough (see Figure 4–4 of the application).

No takes by Level A harassment, serious injury, or mortality are expected from the disturbance associated with the construction activities. It is unlikely a stampede (a potentially dangerous occurrence in which large numbers of animals succumb to mass panic and rush away from a stimulus) would occur or abandonment of pups. There is no pupping expected within the footprint of the construction area and most pups are along the main channel of Elkhorn Slough. Pacific harbor seals have been hauling out in the project area and within the greater Elkhorn Slough throughout the year for many years (including during pupping season and while females are pregnant) while being exposed to anthropogenic sound sources such as recreational vessel traffic, UPRR, and other stimuli from human presence. The number of harbor seals disturbed would likely also fluctuate depending on time day and tidal stage. Fewer harbor seals will be present in the early morning and approaching evening hours as seals leave the haul out site to feed and they are also not present when the tide is high and the haul out is inundated.

The following assumptions are made when estimating potential incidences of take:

- All marine mammal individuals potentially available are assumed to be present within the relevant area, and thus incidentally taken;
- An individual can only be taken once during a 24-h period;
- There will be 136 total days of activity for project (four days of pile driving and 132 construction activities); and
- Exposures to sound levels at or above the relevant thresholds equate to take, as defined by the MMPA.

### Analyses and Preliminary Determinations

#### Negligible Impact Analysis

NMFS has defined “negligible impact” in 50 CFR 216.103 as “… an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (i.e., population-level effects). An estimate of the number of Level B harassment takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be “taken” through behavioral harassment, we consider other factors, such as the likely nature of any responses (e.g., intensity, duration), the context of any responses (e.g., critical reproductive time or location, migration), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and effects on habitat.

Construction activities associated with this project have the potential to disturb or displace marine mammals. No serious injury or mortality would be expected at all, and with mitigation we expect to avoid any potential for Level A harassment as a result of the Minhoto-Hester Marsh construction activities, and none are proposed for authorization by NMFS. The specified activities may result in take, in the form of Level B harassment (behavioral disturbance) only, from visual disturbance and/or noise from construction activities. The project area is within a portion of the local habitat for harbor seals of the greater Elkhorn Slough and seals are present year-round. Behavioral disturbances that could result from anthropogenic sound or visual disturbances associated with these activities are expected to affect only a small amount of the total population.
(i.e., likely maximum of 250 individual seals), although those effects could be recurring over the life of the project if the same individuals remain in the project vicinity. Harbor seals may avoid the area or halt any behaviors (e.g., resting) when exposed to anthropogenic noise or visual disturbance. Due to the abundance of suitable haul out habitat available in the greater Elkhorn Slough, the short-term displacement of resting harbor seals is not expected to affect the overall fitness of any individual animal.

Effects on individuals that are taken by Level B harassment, on the basis of reports in the literature as well as monitoring from other similar activities, will likely be limited to reactions such as displacement from the area or disturbance during resting. The construction activities analyzed here are similar to, or less impactful than for Parson’s Slough (and other projects) which have taken place with no reported injuries or mortality to marine mammals, and no known long-term adverse consequences from behavioral harassment. Repeated exposures of individuals to levels of noise or visual disturbance that may cause Level B harassment are unlikely to result in hearing impairment or to significantly disrupt foraging behavior. Many animals perform vital functions, such as feeding, resting, traveling, and socializing, on a diel cycle (i.e., 24 hour cycle). Behavioral reactions (such as disruption of critical life functions, displacement, or avoidance of important habitat) are more likely to be significant if they last more than one diel cycle or recur on subsequent days (Southall et al., 2007). However, Pacific harbor seals have been hauling out at Elkhorn Slough during the year for many years (including during pupping season and while females are pregnant) while being exposed to anthropogenic sound and visual sources such as vessel traffic, UPRR trains, and human voices from kayaking. Harbor seals have repeatedly hauled out to rest (inside and outside the project area) or pup (outside of the project area) despite these potential stimuli. The proposed activities are not expected to result in the alteration of reproductive or feeding behaviors. No births have been documented in the project area and it is not likely that neonates will be in the project area as females prefer to keep their pups along the main channel of Elkhorn Slough, which is outside the area expected to be impacted by project activities. Seals are primarily foraging outside of Elkhorn Slough and at night in Monterey Bay, outside the project area, and during times when construction activities are not occurring.

Pacific harbor seals, as the potentially affected marine mammal species under NMFS jurisdiction in the action area, are not listed as threatened or endangered under the ESA and NMFS SARs for this stock have shown that the population is increasing and is considered stable (Carretta et al., 2016). Even repeated Level B harassment of some small subset of the overall stock is unlikely to result in any significant realized decrease in viability for the affected individuals, and thus would not result in any adverse impact to the stock as a whole. The restoration of the marsh habitat will have no adverse effect on marine mammal habitat, but possibly a long-term beneficial effect on harbor seals by improving ecological function of the slough, inclusive of higher species diversity, increased species abundance, larger fish, and improved habitat.

In summary, this negligible impact analysis is founded on the following factors: (1) The possibility of injury, serious injury, or mortality may reasonably be considered discountable; (2) the anticipated incidents of Level B harassment consist of, at worst, temporary modifications in behavior; (3) primary foraging and reproductive habitat are outside of the project area and the construction activities are not expected to result in the alteration of habitat important to these behaviors or substantially impact the behaviors themselves (4) there is alternative haul out habitat just outside the footprint of the construction area, along the main channel of Elkhorn Slough, and in Parson’s Slough that would be available for seals while some of the haul outs are inaccessible; (5) restoration of the marsh habitat will have no adverse effect on marine mammal habitat, but possibly a long-term beneficial effect (6) and the presumed efficacy of the proposed mitigation measures in reducing the effects of the specified activity to the level of least practicable impact. In addition, these stocks are not listed under the ESA or considered depleted under the MMPA. In combination, we believe that these factors, as well as the available body of evidence from other similar activities, demonstrate that the potential effects of the specified activities will have only short-term effects on individuals. The specified activities are not expected to impact rates of recruitment or survival and will therefore not result in population-level impacts.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, we preliminarily find that the total marine mammal take from the construction activities will have a negligible impact on the affected marine mammal species or stocks.

Small Numbers Analyses

The number of incidents of take proposed for authorization for harbor seals would be considered small relative to the relevant stock and populations (see Table 6) even if each estimated taking occurred to a new individual. This is an extremely unlikely scenario as, for pinnipeds in estuarine/inland waters, there is likely to be some overlap in individuals present day-to-day. As noted above, we assume that a maximum of 250 individual seals would be impacted during the course of this specified activity. We preliminarily find that small numbers of marine mammals will be taken relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species For Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by these actions. Therefore, we have determined that the total taking of harbor seals would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act (ESA)

No ESA-listed species under NMFS’ jurisdiction are expected to be affected by these activities. Therefore, NMFS has determined that a section 7 consultation under the ESA is not required.

National Environmental Policy Act

Pursuant to NEPA, NMFS is currently conducting an analysis to determine whether or not this proposed IHA may have a significant effect on the quality of the human environment. This analysis will be completed prior to the issuance or denial of the final IHA.

Proposed Authorization

As a result of these preliminary determinations, we propose to issue an IHA to the CDFW for conducting the described tidal restoration activities in the Minhoto-Hester Marsh of Elkhorn Slough, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. The proposed IHA language is provided next.

1. This IHA is valid for one year from the date of issuance, with the project
start date expected between October 2016 and February 2017.  
2. This IHA is valid only for construction activities (inclusive of vibratory pile driving) for tidal marsh restoration associated within the Minhoto-Hester Marsh Restoration Project (Phase 1) in Elkhorn Slough (Monterey, CA).  
3. General Conditions  
   (a) A copy of this IHA must be in the possession of, its designees, and work crew personnel operating under the authority of this IHA.  
   (b) The species authorized for taking is the Pacific harbor seal (Phoca vitulina richardi).  
   (c) The taking, by Level B harassment only, is limited to the species listed in condition 3(b). See Table 6 (above) for numbers of take authorized.  
   (d) The taking by injury (Level A harassment), serious injury, or death of the species listed in condition 3(b) of the Authorization or any taking of any other species of marine mammal is prohibited and may result in the modification, suspension, or revocation of this IHA.  
   (e) The taking of any marine mammal in a manner prohibited under this IHA must be reported immediately to the Office of Protected Resources, NMFS.  
   (f) CADFW shall conduct briefings between construction supervisors and crews, marine mammal monitoring team, and CADFW staff prior to the start of all construction activities for tidal marsh restoration, and when new personnel join the work, in order to explain responsibilities, communication procedures, marine mammal monitoring protocol, and operational procedures.  
4. Mitigation Measures  
   The holder of this Authorization is required to implement the following mitigation measures:  
   (a) Timing Restrictions: Construction work shall occur only during daylight hours.  
   (b) Construction Activities: If a seal enters the project area after installation of barriers, CADFW shall notify NMFS immediately. In addition, the construction contractor shall begin construction activities gradually each day (e.g., by moving around the project area and starting equipment sequentially).  
   (c) Pupping Season: If a pup less than one week old (neonate) comes within 20 m of where heavy machinery is working, construction activities in that area would be delayed until the pup has left the area. In the event that a pup less than one week old remains within those 20 m, NMFS would be consulted to determine the appropriate course of action.  
   (d) Vibratory Pile Driving: An exclusion zone (shutdown zone) of 15 m shall be established during pile driving. Pile extraction or driving shall not commence (or re-commence following a shutdown) until marine mammals are not sighted within the exclusion zone for a 15-minute period. If a marine mammal enters the exclusion zone during sheet pile work, work shall stop until the animal leaves the exclusion zone or until 15 minutes has elapsed without observation of the animal within the zone.  
5. Monitoring  
   The holder of this Authorization is required to abide by the following monitoring conditions:  
   (a) Visual Monitoring  
      Qualified Protected Species Observer (PSO) (a NMFS approved biologist) shall be used to detect, document, and minimize impacts to marine mammals. Qualifications for PSOs for visual monitoring include:  
      (i) Visual acuity in both eyes (correction is permissible) sufficient for discernment of harbor seals on land or in the water with ability to estimate target size and distance; use of binoculars may be necessary to correctly identify the target;  
      (ii) Advanced education in biological science or related field (undergraduate degree or higher required);  
      (iii) Experience and ability to conduct field observations and collect data according to assigned protocols (this may include academic experience);  
      (iv) Experience or training in the field identification of marine mammals, including the identification of behaviors;  
      (v) Sufficient training, orientation, or experience with the construction operation to provide for personal safety during observations;  
      (vi) Writing skills sufficient to prepare a report of observations including but not limited to the number and species of marine mammals observed; dates and times when construction activities were conducted; dates and times when construction activities were suspended to avoid potential incidental injury from construction sound or visual disturbance of marine mammals observed; and marine mammal behavior; and  
      (vii) Ability to communicate orally, by radio or in person, with project personnel to provide real-time information on marine mammals observed in the area as necessary.  
   (b) PSO Monitoring and Data Collection  
      Monitoring shall be conducted before, during, and after construction activities. In addition, PSOs shall record all incidents of marine mammal occurrence, regardless of distance from activity, and shall document any behavioral reactions in concert with distance from construction activities. PSOs will be placed at the best vantage point(s) practicable to monitor for marine mammals.  
   The PSO shall also conduct biological resources awareness training for construction personnel. The awareness training will be provided to brief construction personnel on identification of marine mammals (including neonates) and the need to avoid and minimize impacts to marine mammals.  
If new construction personnel are added to the project, the contractor shall ensure that the personnel receive the mandatory training before starting work. The PSO would have authority to stop construction if marine mammals appear distressed (evasive maneuvers, rapid breathing, inability to flush) or in danger of injury. Monitoring requirements also include:  
   (i) Monitoring during Construction Activity: To document disturbance and possible incidental take during construction activities, the monitoring protocols shall be implemented at all times when work is occurring (1) in-water, (2) north of a line starting at 36°48’38.91 N., 121°45’08.03 W., and ending 36°48’38.91 N., 121°45’27.11 W., (see Figure 1 of the monitoring plan in the application), and (3) within 30.5 m (100 feet) of tidal waters. When work is occurring in other areas, the monitoring protocols shall be implemented for the first three days of construction and anytime there is a significant change in activities or location of construction activities within the project area. If disturbance is noted at any time, then monitoring shall continue until there are three successive days of no disturbance. If there is a gap in
construction activities of more than one week the monitoring protocols shall again be implemented for the first three days that construction resumes.

Data collection during marine mammal monitoring shall consist of hourly counts of all marine mammals by species, number, sex, age class, a description of behavior (if possible), location, direction of movement, type of construction that is occurring, time construction activities starts and ends, any noise or visual disturbance, and time of the observation. When responses are observed, the type of take (i.e., alert and flush, movement of more than one m, or change in direction of movement) and the assumed cause (whether related to construction activities or not) shall be noted. Environmental conditions such as weather, visibility, temperature, tide level, current, and sea state shall also be recorded. A written log of dates and times of monitoring activity will be kept. The log shall report the following information:

- Time of PSO arrival on site;
- Time of the commencement of construction activities;
- Distances to all marine mammals relative to the disturbance;
- Observations, notes on marine mammal behavior during construction activities, as described above, and on the number and distribution observed in the project vicinity;
- For observations of all other marine mammals (if observed) the time and duration of each animal’s presence in the project vicinity; the number of animals observed; the behavior of each animal, including any response to construction activities;
- Time of the cessation of construction activities;
- Time of PSO departure from site; and
- An estimate of the number (by species) of marine mammals that are known to have been disturbed by construction activities (based on visual observation) with a discussion of any specific behaviors those individuals exhibited. Disturbance must be recorded according to NMFS’ three-point scale.

Individuals implementing the monitoring protocol will assess its effectiveness using an adaptive approach. PSOs will use their best professional judgment throughout implementation and seek improvements to these methods when deemed appropriate. Any modifications to protocol will be coordinated between NMFS and the CDFW.

(v) Post-activity Monitoring: At least 30 minutes following the cessation of all construction activities, the PSO(s) must conduct observations on the number, type(s), location(s), and behavior(s) of marine mammals.

6. Reporting

(a) The CDFW shall submit a draft report to NMFS within 90 days of the completion of marine mammal monitoring, or sixty days prior to the issuance of any subsequent IHA for this project (if required), whichever comes first. The report shall include marine mammal observations pre-activity, during-activity, and post-activity of construction, and shall also provide descriptions of any behavioral responses by marine mammals due to disturbance from construction activities and a complete description of total take estimate based on the number of marine mammals observed during the course of construction. If comments are received from the NMFS Office of Protected Resources on the draft report, a final report shall be submitted to NMFS within 30 days thereafter following resolution of comments on the draft report from NMFS. If no comments are received from NMFS, the draft report will be considered to be the final report. This report must contain the informational elements described above and in the monitoring plan of the application and at minimum shall also include:

(b) Reporting injured or dead marine mammals:

(i) In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner prohibited by this IHA, such as an injury (Level A harassment), serious injury, or mortality, CDFW shall immediately cease the specified activities and report the incident to the NMFS’ Office of Protected Resources and the West Coast Regional Stranding Coordinator. The report must include the following information:

1. Time and date of the incident;
2. Description of the incident;
3. Environmental conditions (e.g., wind speed and direction, tidal conditions, cloud cover, and visibility);
4. Description of all marine mammal observations and active sound source use in the 24 hours preceding the incident;
5. Species identification or description of the animal(s) involved;
6. Fate of the animal(s); and
7. Photographs or video footage of the animal(s).

Activities shall not resume until NMFS is able to review the circumstances of the prohibited take. NMFS will work with CDFW to determine what measures are necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. CDFW may not resume their activities until notified by NMFS.

(ii) In the event that CDFW discovers an injured or dead marine mammal, and the lead PSO determines that the cause of the injury or death is unknown and the death is relatively recent (e.g., in less than a moderate state of decomposition), CDFW shall immediately report the incident to the NMFS’ Office of Protected Resources and the West Coast Regional Stranding Coordinator.

The report must include the same information identified in 6(b)(i) of this IHA. Activities may continue while NMFS reviews the circumstances of the incident. NMFS will work with the CDFW to determine whether additional mitigation measures or modifications to the activities are appropriate.

(iii) In the event that the CDFW discovers an injured or dead marine mammal, and the lead PSO determines that the injury or death is not associated with or related to the activities authorized in the IHA (e.g., previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), the CDFW shall report the incident to the NMFS’ Office of Protected Resources and the West Coast Regional Stranding Coordinator within 24 hours of the discovery. CDFW shall provide photographs or video footage or other documentation of the stranded animal sighting to NMFS. This Authorization may be modified, suspended or withdrawn if the holder fails to abide by the conditions prescribed herein, or if NMFS determines the authorized taking is having more than a negligible impact on the species or stock of affected marine mammals.

Request for Public Comments

We request comment on our analysis, the draft authorization, and any other aspect of this Notice of Proposed IHA for CDFW’s tidal marsh restoration activities. Please include with your comments any supporting data or literature citations to help inform our final decision on the CDFW’s request for an MMPA authorization.

Dated: September 26, 2016.

BILLING CODE 3510–22–P
DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE812

Pacific Island Fisheries; Aquaculture

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to prepare a Programmatic Environmental Impact Statement; public meetings; request for comments.

SUMMARY: NMFS, in coordination with the Western Pacific Fishery Management Council, intends to prepare a Programmatic Environmental Impact Statement (PEIS) to analyze the potential environmental impacts of a proposed Pacific Islands Region aquaculture management program and alternatives. The PEIS would support offshore aquaculture development, including appropriate management unit species for aquaculture, reasonably foreseeable types of offshore aquaculture operations, and permitting and reporting requirements for persons conducting aquaculture activities in Federal waters.

DATES: NMFS must receive written comments by October 31, 2016. The meeting dates are:

1. October 18, 2016, 6 p.m. to 9 p.m., Saipan.
2. October 20, 2016, 6 p.m. to 9 p.m., Guam.

ADDRESSES: The meeting locations are:

1. Saipan—October 18, 2016, 6 p.m. to 9 p.m., Northern Marianas College, As Terlaje Campus, Building S, Room S–1, Saipan, MP 96950.
2. Guam—October 20, 2016, 6 p.m. to 9 p.m., Hilton Guam Resort & Spa, 202 Hilton Road, Tumon Bay, Guam 96913.

You may submit comments on this action, identified by NOAA–NMFS–2016–0111, by any of the following methods:

• Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to http://www.regulations.gov/docket?D=NOAA-NMFS-2016-0111, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.
• Mail: Send written comments to Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Regional Office, 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818.
• Scoping Meeting: Submit written comments at a scoping meeting held by NMFS for this action.

Instructions: You must submit comments by the above methods to ensure that NMFS receives, documents, and considers your comments. NMFS may not consider comments sent by any other method, to any other address or individual, or received after the end of the comment period. NMFS will consider all comments received as part of the public record and will generally post comments for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: David Nichols, NMFS, Pacific Islands Regional Office, (808) 725–5180.

SUPPLEMENTARY INFORMATION: NMFS previously published a Notice of Intent to prepare a PEIS to analyze the potential environmental impacts of a proposed Pacific Islands aquaculture management program and alternatives (81 FR 57567, August 23, 2016). Details regarding development of the PEIS may be found in that Notice of Intent, and are not repeated here.

NMFS is holding two additional public scoping meetings in Guam and Saipan (see DATES and ADDRESSES) to help identify alternatives and determine the scope of environmental issues for consideration in the PEIS.

NMFS will again ask for additional public comments once NMFS publishes the Draft PEIS, probably in late spring 2017. You may find more information about the NMFS aquaculture program and the progress of the PEIS at www.fpir.noaa.gov/SFD/SFD_aq.html.

Dated: September 27, 2016.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice: public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scallop Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Monday, October 17, 2016 at 10:30 a.m.

ADDRESSES: The meeting will be held at the Hilton Garden Inn, Boston Logan, 100 Boardman Street, Boston, MA 02128; phone: (617) 567–6799; fax: (617) 481–0798.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda
The Committee will review Framework 28 (FW28) alternatives and analyses. The Committee will review any concepts or recommendations that come out of the joint Scallop PDT/AP meeting being held on October 13, 2016. The primary focus of this meeting will be to provide input on the range of specification alternatives. FW28 will set specifications including ABC/ACLs, DAS, access area allocations for LA and LAGC, hard-TAC for NGOM management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2017 and default specifications for fishing year 2018. Management measures in FW28 include: (1) Measures to restrict the possession of shell stock inshore of 42°20’ N.; (2) measures to apply spatial management to fishery specifications (ACL Flowchart); (3) measures to modify the Closed Area I access area boundary, consistent with potential changes to habitat and groundfish mortality closed areas. The Committee may discuss scallop related issues under consideration in groundfish Framework 56. Other business will be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues
arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council’s intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 et seq.

Dated: September 27, 2016.

Tracey L. Thompson,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XE671

Taking of Marine Mammals Incidental to Specified Activities; Construction of the East Span of the San Francisco-Oakland Bay Bridge

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that we have issued an incidental harassment authorization (IHA) to California Department of Transportation (CALTRANS) to incidentally harass, by Level B harassment only, seven species of marine mammals during activities associated with the East Span of the San Francisco-Oakland Bay Bridge (SFOBB) in the San Francisco Bay (SFB), California.

DATES: This authorization is effective from September 19, 2016 through September 18, 2017.

FOR FURTHER INFORMATION CONTACT: Shane Guan, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 et seq.) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined “negligible impact” in 50 CFR 216.103 as “. . . an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.”

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the U.S. can apply for a one-year authorization to incidentally take small numbers of marine mammals by harassment, provided that there is no potential for serious injury or mortality to result from the activity. Section 101(n)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny the authorization.

Summary of Request

On March 11, 2016, CALTRANS submitted a request to NMFS for the potential harassment of a small number of marine mammals incidental to the dismantling of the East Span of the original SFOBB in SFB, California, between July 16, 2016, and July 15, 2017. On May 16, 2016, CALTRANS submitted a revision of its IHA application based on NMFS comments. NMFS determined that the IHA application was complete on May 19, 2016.

Description of the Specified Activity

CALTRANS proposes removal of the East Span of the original SFOBB by mechanical dismantling and by use of controlled charges to implode the pier into its open cellular chambers below mudline. Activities associated with dismantling the original East Span potentially may result in incidental take of marine mammals. These activities include vibratory pile driving, vibratory pile extraction/removal, impact pile driving, and the use of highly controlled charges to dismantle the Pier E4 and Pier E5 marine foundations.

A one-year IHA was previously issued to CALTRANS for pile driving/removal and mechanical dismantling activities on July 17, 2015 (80 FR 43710; July 23, 2015), based on activities described on CALTRANS’ IHA application dated April 13, 2013. This IHA is valid until July 16, 2016. On September 9, 2015, NMFS issued another IHA to CALTRANS for demolition of Pier E3 of the original SFOBB by highly controlled explosives (80 FR 57584; September 24, 2015). This IHA expired on December 30, 2015. Since the construction activities related with the original SFOBB dismantling will last for another two years, CALTRANS is requesting an IHA that covers take of marine mammals from both pile driving/removal and confined explosion.

Construction activities for the replacement of the SFOBB east span commenced in 2002 and are expected to be completed in 2016 with the completion of the bike/pedestrian path and eastbound on ramp from Yerba Buena Island. The new east span is now open to traffic. On November 10, 2003, NMFS issued the first project-related IHA to CALTRANS, authorizing the take of small numbers of marine mammals incidental to the construction of the SFOBB Project. Over the years, CALTRANS has been issued a total of nine IHAs for the SFOBB Project to date, excluding the application currently under review.

The demolition of Piers E4 and E5 through controlled implosion are planned to occur in October, November, or December 2016, and pile driving and pile removal activities may occur at any time of the year.

The SFOBB project area is located in the central San Francisco Bay (SFB or Bay), between Yerba Buena Island (YBI) and the city of Oakland. The western limit of the project area is the east portal of the YBI tunnel, located in the city of San Francisco. The eastern limit of the project area is located approximately 1,312 ft (400 m) west of the Bay Bridge toll plaza, where the new and former spans connect with land at the Oakland Touchdown in the city of Oakland.

Detailed description of CALTRANS East Span Removal Project is provided in the Federal Register notice for this proposed IHA (81 FR 48745; July 24, 2016). No changes have been made since the
publication of that notice. A summary of CALTRANS activities is provided below.

1. Vibratory and Impact Driving of Temporary Piles

CALTRANS anticipates temporary access trestles, in-water falsework, and cofferdams may be required to dismantle the existing bridge. Permanent access trestles, supported by temporary marine piles, and cofferdams may be needed to provide construction access. CALTRANS estimates that a maximum of 200 temporary piles may be installed during the 1-year period of IHA coverage. Types of temporary piles to be installed may include sheet piles, 14-in (0.34-m) H-piles, and steel pile piles, equal to or less than 36-in (0.91-m) in diameter. A maximum of 132 days of pile driving may be required to install and/or remove piles during the one-year period of IHA coverage.

2. Removal of Piers E4 and E5

CALTRANS proposes the removal of Piers E4 and E5 of the original East Span by use of controlled charges to implode each pier into its open cellular chambers below the mudline. A Blast Attenuation System (BAS) will be used to minimize potential impacts on biological resources in the Bay. Both NMFS and CALTRANS believe that the results from the Pier E3 Demonstration Project support the use of controlled charges as a more expedient method of removal that will cause less environmental impact as compared to approved mechanical methods using a dry (fully dewatered) cofferdam.

Piers E4 and E5 of the original East Span are located between the OTD area and YBI, and just south of the SFOBB new East Span. These piers are concrete cellular structures that occupy areas deep below the mudline, within the water column, and above the water line of the Bay.

Comments and Responses

A notice of NMFS’ proposal to issue an IHA was published in the Federal Register on July 24, 2016 (81 FR 48745). During the 30-day public comment period, NMFS received a comment letter from the Marine Mammal Commission (Commission). Specific comments and responses are provided below.

Comment 1: The Commission states that the method used to estimate the numbers of takes, which sums fractions of takes for each species across days, does not account for NMFS’s 24-hour reset policy. The Commission states that instead of summing fractions of takes across days and then rounding to estimate total takes, NMFS should have calculated a daily take estimate (determined by multiplying the estimated density of marine mammals in the area by the daily ensonified area) and then rounding to that to a whole number before multiplying by it by the number of days that activities would occur. Thus, the Commission recommends that NMFS (1) follow its policy of a 24-hour reset for enumerating the number of each species that could be taken, (2) apply standard rounding rules before summing the numbers of estimated takes across days, and (3) for species that have the potential to be taken but model-estimated or calculated takes round to zero, use group size to inform the take estimates—these methods should be used consistently for all future incidental take authorizations.

Response: While for certain projects NMFS has rounded to the whole number for daily takes, the circumstance for projects like this one when the objective of take estimation is to provide more accurate assessments for potential impacts to marine mammals for the entire project, the rounding in the middle of calculation will introduce large errors into the process. In addition, while NMFS uses a 24-hour reset for its take calculation to ensure that individual animals are not counted as a take more than once per day, that fact does not make the calculation of take across the entire activity period inherently incorrect. There is no need for daily (24-hour) rounding in this case because there is no daily limit of takes, so long as total authorized takes of marine mammal are not exceeded. In short, the calculation of predicted take is not an exact science and there are arguments for taking different mathematical approaches in different situations, and for making qualitative adjustments in other situations. NMFS is currently engaged in developing a protocol to guide more consistent take calculation given certain circumstances. We believe, however, that the prediction for this action remains appropriate.

Comment 2: The Commission notes that in the proposed IHA NMFS would require protected species observers (PSOs) to implement 100 percent monitoring for Level A harassment zones of all pile driving, but only 20 percent monitoring for Level B harassment zones for vibratory pile driving and removal. The Commission recommends that NMFS require CALTRANS to implement full-time monitoring of Level A and B harassment zones during all pile driving and pile removal activities.

Response: NMFS agrees with the Commission’s recommendation, and discussed it with CALTRANS. CALTRANS agrees that 100 percent monitoring is feasible and will conduct visual monitoring for all pile driving and pile removal activities. The IHA issued to CALTRANS includes such measures.

Description of Marine Mammals in the Area of the Specified Activity

Seven species of marine mammals regularly inhabit or rarely or seasonally enter the San Francisco Bay (Table 1). The two most common species observed are the Pacific harbor seal (Phoca vitulina richardii) and the California sea lion (Zalophus californianus). Juvenile northern elephant seals (Mirounga angustirostris) seasonally enter the Bay (spring and fall), while harbor porpoises (Phocoena phocoena) may enter the western side of the Bay throughout the year, but rarely occur near the SFOBB east span. Gray whales (Eschrichtius robustus) may enter the Bay during their northward migration in the late winter and spring. In addition, though rare, northern fur seals (Callorhinus ursinus) and bottlenose dolphins (Tursiops truncatus) have also been sighted in the Bay. None of these species are listed as endangered or threatened under the Endangered Species Act (ESA), or as depleted or a strategic stock under the MMPA.

* The E. North Pacific population is not listed under the ESA.

More detailed information on the marine mammal species found in the vicinity of the SFOBB construction site can be found in CALTRANS IHA application, and in NMFS stock assessment report (Caretta et al., 2015), which is available at the following URL: http://www.nmfs.noaa.gov/pr/sars/pdf/pacific_sars_2014_final_noaa_swsc_tm_549.pdf. Refer to these documents for additional information on these species.

**Potential Effects of the Specified Activity on Marine Mammals**

This section includes a summary and discussion of the ways that the types of stressors associated with the specified activity (e.g., pile removal and pile driving) have been observed to impact marine mammals. This discussion may also include reactions that we consider to rise to the level of a take and those that we do not consider to rise to the level of a take (for example, with acoustics, we may include a discussion of studies that showed animals not reacting at all to sound or exhibiting barely measurable avoidance). This section is intended as a background of potential effects and does not consider either the specific manner in which this activity will be carried out or the mitigation that will be implemented, and how either of those will shape the anticipated impacts from this specific activity. The “Estimated Take by Incidental Harassment” section later in this document will include a quantitative analysis of the number of individuals that are expected to be taken by this activity. The “Analysis and Determinations” section will include the analysis of how this specific activity will impact marine mammals and will consider the content of this section, the “Estimated Take by Incidental Harassment” section, the “Mitigation” section, and the “Anticipated Effects on Marine Mammal Habitat” section to draw conclusions regarding the likely impacts of this activity on the reproductive success or survivorship of individuals and from that on the affected marine mammal populations or stocks.

When considering the influence of various kinds of sound on the marine environment, it is necessary to understand that different kinds of marine life are sensitive to different frequencies of sound. Based on available behavioral data, audiograms have been derived using auditory evoked potentials, anatomical modeling, and other data, NMFS (2016) designate “marine mammal hearing groups” for marine mammals and estimate the lower and upper frequencies of hearing of the groups. The marine mammal groups and the associated frequencies are indicated below (though animals are less sensitive to sounds at the outer edge of their functional range and most sensitive to sounds of frequencies within a smaller range somewhere in the middle of their hearing range):

- Low frequency cetaceans (13 species of mysticetes): Functional hearing is estimated to occur between approximately 7 hertz (Hz) and 35 kilohertz (kHz);
- Mid-frequency cetaceans (32 species of dolphins, seven species of larger toothed whales, and 19 species of beaked and bottlenose whales): Functional hearing is estimated to occur between approximately 150 Hz and 160 kHz;
- High frequency cetaceans (eight species of true porpoises, seven species of river dolphins, Kogia, the franciscana, and four species of cephalorhynchids): Functional hearing is estimated to occur between approximately 275 Hz and 160 kHz;
- Phocid pinnipeds in Water: Functional hearing is estimated to occur between approximately 50 Hz and 86 kHz; and
- Otariid pinnipeds in Water: Functional hearing is estimated to occur between approximately 60 Hz and 39 kHz.

As mentioned previously in this document, seven marine mammal species (three cetacean and four pinniped species) are likely to occur in the vicinity of the SFOBB pile driving/removal and controlled pier detonation area. Of the two cetacean species, one belongs to low-frequency cetacean (gray whale), one mid-frequency cetacean (bottlenose dolphin), and one high-frequency cetacean (harbor porpoise). Two species of pinnipeds are phocid (Pacific harbor seal and northern elephant seal), and two species of pinniped is otariid (California sea lion and northern fur seal). A species’ functional hearing group is a consideration when we analyze the effects of exposure to sound on marine mammals.

**Potential Effects From In-Water Pile Driving and Pile Removal**

The CALTRANS SFOBB construction work using in-water pile driving and pile removal could adversely affect marine mammal species and stocks by exposing them to elevated noise levels in the vicinity of the activity area.

Exposure to high intensity sound for a sufficient duration may result in auditory effects such as a noise-induced threshold shift—an increase in the auditory threshold after exposure to noise (Finneran et al., 2005). Factors that influence the amount of threshold shift include the amplitude, duration, frequency content, temporal pattern, and energy distribution of noise exposure. The magnitude of hearing threshold shift normally decreases over time following cessation of the noise exposure. The amount of threshold shift just after exposure is the initial threshold shift. If the threshold shift eventually returns to zero (i.e., the threshold returns to the pre-exposure value), it is a temporary threshold shift (Southall et al., 2007).

**Threshold Shift (noise-induced loss of hearing)—**When animals exhibit reduced hearing sensitivity (i.e., sounds must be louder for an animal to detect them) following exposure to an intense sound or sound for long duration, it is referred to as a noise-induced threshold shift (TS). An animal can experience temporary threshold shift (TTS) or permanent threshold shift (PTS). TTS can last from minutes or hours to days (i.e., there is complete recovery), can occur in specific frequency ranges (i.e., an animal’s hearing sensitivity might be reduced initially by only 6 decibel (dB) or reduced by 30 dB). PTS is permanent, but some recovery is possible. PTS can also occur in a specific frequency range and amount as mentioned above for TTS.
For marine mammals, published data are limited to the captive bottlenose dolphin, beluga, harbor porpoise, and Yangtze finless porpoise (Finneran et al., 2000, 2002, 2003, 2005, 2007, 2010a, 2010b; Finneran and Schlundt, 2010; Lucke et al., 2009; Mooney et al., 2009a, 2009b; Popov et al., 2011a, 2011b; Kastelein et al., 2012a; Schlundt et al., 2000; Nachtgall et al., 2003, 2004). For pinnipeds in water, data are limited to measurements of TTS in harbor seals, an elephant seal, and California sea lions (Kastak et al., 1999, 2005; Kastelein et al., 2012b).

Lucke et al. (2009) found a threshold shift (TS) of a harbor porpoise after exposing it to airgun noise with a received sound pressure level (SPL) at 202.0 dB (peak-to-peak) re: 1 micropascal (µPa), which corresponds to a sound exposure level of 164.5 dB re: 1 µPa² s after integrating exposure. NMFS currently uses the root-mean-square (rms) of received SPL at 180 dB and 190 dB re: 1 µPa as the threshold above which permanent threshold shift (PTS) could occur for cetaceans and pinnipeds, respectively. Because the airgun noise is a broadband impulse, one cannot directly determine the equivalent of rms SPL from the reported peak-to-peak SPLs. However, applying a conservative conversion factor of 16 dB for broadband signals from seismic surveys (McCauley, et al., 2000) to correct for the difference between peak-to-peak levels reported in Lucke et al. (2009) and rms SPLs, the rms SPL for TTS would be approximately 184 dB re: 1 µPa, and the received levels associated with PTS (Level A harassment) would be higher. This is still above NMFS' current 180 dB rms re: 1 µPa threshold for injury. However, NMFS recognizes that TTS of harbor porpoises is lower than other cetacean species empirically tested (Finneran & Schlundt, 2010; Finneran et al., 2002; Kastelein and Jennings, 2012).

Marine mammal hearing plays a critical role in communication with conspecifics, and interpretation of environmental cues for purposes such as predator avoidance and prey capture. Depending on the degree (elevation of threshold in dB), duration (i.e., recovery time), and frequency range of TTS, and the context in which it is experienced, TTS can have effects on marine mammals ranging from disorienting to serious (similar to those discussed in auditory masking, below). For example, a marine mammal may be able to readily compensate for a brief, relatively small amount of TTS in a non-critical frequency range but occurs during a time where ambient noise is lower and there are not as many competing sounds present. Alternatively, a larger amount and longer duration of TTS sustained during time when communication is critical for successful mother/calf interactions could have more serious impacts. Also, depending on the degree and frequency range, the effects of PTS on an animal could range in severity, although it is considered generally more serious because it is a permanent condition. Of note, reduced hearing sensitivity as a simple function of aging has been observed in marine mammals, as well as humans and other taxa (Southall et al., 2007), so one can infer that strategies exist for coping with this condition to some degree, though likely not without cost.

In addition, chronic exposure to excessive, though not high-intensity, noise could cause masking at particular frequencies for marine mammals that utilize sound for vital biological functions (Clark et al., 2009). Acoustic masking is when other noises such as from human sources interfere with animal detection of acoustic signals such as communication calls, echolocation sounds, and environmental sounds important to marine mammals. Therefore, under certain circumstances, marine mammals whose acoustical sensors or environment are being severely masked could also be impaired from maximizing their performance fitness in survival and reproduction.

Masking occurs at the frequency band that the animals utilize. Therefore, since noise generated from vessels dynamic positioning activity is mostly concentrated at low frequency ranges, it may have less effect on high frequency echolocation sounds by odontocetes (toothed whales). However, lower frequency man-made noises are more likely to affect detection of communication calls and other potentially important natural sounds such as surf and prey noise. It may also affect communication signals when they occur near the noise band and thus reduce the communication space of animals (e.g., Clark et al., 2009) and cause increased stress levels (e.g., Foote et al., 2004; Holt et al., 2009).

Unlike TS, masking, which can occur over large temporal and spatial scales, can potentially affect the species at population, community, or even ecosystem levels, as well as individual levels. Masking affects both senders and receivers of the signals and could have long-term chronic effects on marine mammal species and populations. Recent science suggests that low frequency ambient sound levels have increased by as much as 20 dB (more than three times in terms of sound pressure level) in the world's ocean from pre-industrial periods, and most of these increases are from distant shipping (Hildebrand 2009). For CALTRANS' SFOBB construction activities, noises from vibratory pile driving contribute to the elevated ambient noise levels in the project area, thus increasing potential for or severity of masking. Baseline ambient noise levels in the Bay are very high due to ongoing shipping, construction and other activities in the Bay.

Finally, marine mammals' exposure to certain sounds could lead to behavioral disturbance (Richardson et al., 1995), such as: Changing durations of surfacing and dives, number of blows per surfacing, or moving direction and/or speed; reduced/increased vocal activities; changing/cessation of certain behavioral activities (such as socializing or feeding); visible startle response or aggressive behavior (such as tail/fluke slapping or jaw clapping); avoidance of areas where noise sources are located; and/or flight responses (e.g., pinnipeds flushing into water from haulouts or rookeries). The onset of behavioral disturbance from anthropogenic noise depends on both external factors (characteristics of noise sources and their paths) and the receiving animals (hearing, motivation, experience, demography) and is also difficult to predict (Southall et al., 2007). Currently NMFS uses a received level of 160 dB re 1 µPa (rms) to predict the onset of behavioral harassment from impulse noises (such as impact pile driving), and 120 dB re 1 µPa (rms) for continuous noises (such as vibratory pile driving). For the CALTRANS SFOBB construction activities, both of these noise levels are considered for effects analysis because CALTRANS plans to use both impact and vibratory pile driving, as well as vibratory pile removal.

The biological significance of many of these behavioral disturbances is difficult to predict, especially if the detected disturbances appear minor. However, the consequences of behavioral modification could be biologically significant if the change affects growth, survival, and/or reproduction, which depends on the severity, duration, and context of the effects.

Potential Effects From Controlled Pier Implosion

It is expected that an intense impulse from the Piers E4 and E5 controlled implosion would have the potential to impact marine mammals in the vicinity. The majority of impacts would be startle behavior and temporary behavioral modification from marine mammals.
However, a few individual animals could be exposed to sound levels that would cause TTS.

The underwater explosion would send a shock wave and blast noise through the water, release gaseous by-products, create an oscillating bubble, and cause a plume of water to shoot up from the water surface. The shock wave and blast noise are of most concern to marine animals. The effects of an underwater explosion on a marine mammal depend on many factors, including the size, type, and depth of both the animal and the explosive charge; the depth of the water column; and the standoff distance between the charge and the animal, as well as the sound propagation properties of the environment. Potential impacts can range from brief effects (such as behavioral disturbance), tactile perception, physical discomfort, slight injury of the internal organs and the auditory system, to death of the animal (Yelverton et al., 1973; DoN, 2001). Non-lethal injury includes slight injury to internal organs and the auditory system; however, delayed lethality can be a result of individual or cumulative sublethal injuries (DoN, 2001).

Immediate lethal injury would be a result of massive combined trauma to internal organs as a direct result of proximity to the point of detonation (DoN, 2001). Generally, the higher the level of impulse and pressure level exposure, the more severe the impact to an individual.

Injuries resulting from a shock wave take place at boundaries between tissues of different density. Different velocities are imparted to tissues of different densities, and this can lead to their physical disruption. Blast effects are greatest at the gas-liquid interface (Landsberg, 2000). Gas-containing organs, particularly the lungs and gastrointestinal tract, are especially susceptible (Goertner 1982; Hill 1978; Yelverton et al., 1973). In addition, gas-containing organs including the nasal sacs, larynx, pharynx, trachea, and lungs may be damaged by compression/expansion caused by the oscillations of the blast gas bubble. Intestinal walls can bruise or rupture, with subsequent hemorrhage and escape of gut contents into the body cavity. Less severe gastrointestinal tract injuries include contusions, petechiae (small red or purple spots caused by bleeding in the skin), and slight hemorrhaging (Yelverton et al., 1973).

Because the ears are the most sensitive to pressure, they are the organs most sensitive to injury (Ketten 2000). Sound-related damage associated with blast noise can be theoretically distinct from injury from the shock wave, particularly farther from the explosion. If an animal is able to bear a noise, at some level it can damage its hearing by causing decreased sensitivity (Ketten 1995). Sound-related trauma can be lethal or sublethal. Lethal impacts are those that result in immediate death or serious debilitation in or near an intense source and are not, technically, pure acoustic trauma (Ketten 1995). Sublethal impacts include hearing loss, which is caused by exposures to perceptible sounds. Severe damage (from the shock wave) to the ears includes tympanic membrane rupture, fracture of the ossicles, damage to the cochlea, hemorrhage, and cerebrospinal fluid leakage into the middle ear. Moderate injury implies partial hearing loss due to tympanic membrane rupture and blood in the middle ear. Permanent hearing loss also can occur when the hair cells are damaged by one very loud event, as well as by prolonged exposure to a loud noise or chronic exposure to noise. The level of impact from blasts depends on both an animal’s location and, at outer zones, on its sensitivity to the residual noise (Ketten 1995).

However, the above discussion concerning underwater explosion only pertains to open water detonation in a free field. CALTRANS’ Pier E4 and E5 demolition project using controlled implosion uses a confined detonation method, meaning that the charges would be placed within the structure. Therefore, most energy from the explosive shock wave would be absorbed through the destruction of the structure itself, and would not propagate through the open water. Measurements and modeling from confined underwater detonation for structure removal showed that energy from shock waves and noise impulses were greatly reduced in the water column (Hempen et al., 2007; CALTRANS 2016). Therefore, with monitoring and mitigation measures discussed above, CALTRANS Pier E4 and E5 controlled implosions are not likely to cause injury or mortality to marine mammals in project vicinity. Instead, NMFS believes that CALTRANS’ Pier E4 and E5 controlled implosions in the San Francisco Bay are most likely to cause Level B behavioral harassment and maybe TTS in a few individual of marine mammals, as discussed below.

Changes in marine mammal behavior are expected to result from an acute stress response. This expectation is based on the idea that some sort of physiological trigger must exist to change any behavior that is already being performed. The exception to this rule is the case of auditory masking, which is not likely since the CALTRANS’ controlled implosion is only two short, sequential detonations that last for approximately 3-4 seconds.

### Potential Effects on Marine Mammal Habitat

The removal of the SFOBB East Span is not likely to negatively affect the habitat of marine mammal populations because no permanent loss of habitat will occur, and only a slight, temporary modification of habitat will occur. The original SFOBB area is not used as a haul-out site by pinnipeds or as a major foraging area. Therefore, demolition of the concrete marine foundations and pile installation and removal activities are unlikely to permanently decrease fish populations in the area and are unlikely to affect marine mammal populations.

Project activities will not affect any pinniped haul-out sites or pupping sites. The YBI harbor seal haul-out site is on the opposite site of the island from the SFOBB Project area. Because of the distance and the island blocking the sound, underwater noise and pressure levels from the SFOBB Project will not reach the haul-out. Other haul-out sites for sea lions and harbor seals are at a sufficient distance from the SFOBB Project area that they will not be affected. The closest recognized harbor seal pupping site is at Castro Rocks, approximately 8.7 mi (14 km) from the SFOBB Project area. No sea lion rookeries are found in the Bay.

The addition of underwater sound from SFOBB Project activities to background noise levels can constitute a potential cumulative impact on marine mammals. However, these potential cumulative noise impacts will be short in duration. SPLs from impact pile driving and pier implosion have the potential to injure or kill fish in the immediate area. During previous pier implosion and pile driving activities, CALTRANS has reported mortality to marine mammals’ prey species, including northern anchovies and Pacific herring (CALTRANS 2016). These few isolated fish mortality events are not anticipated to have a substantial effect on prey species population or their availability as a food resource for marine mammals.

Studies also suggest that larger fish are generally less susceptible to death or injury than small fish. Moreover, elongated forms that are round in cross section are less at risk than deep-bodied forms. Orientation of fish relative to the shock wave front and extent of injury. Open water pelagic fish (e.g., mackerel) seem to be less affected than...
reef fishes. The results of most studies are dependent upon specific biological, environmental, explosive, and data recording factors.

The huge variation in fish populations, including numbers, species, sizes, and orientation and range from the detonation point, makes it very difficult to accurately predict mortalities at any specific site of detonation. Most fish species experience a large number of natural mortalities, especially during early life stages, and any small level of mortality caused by the CALTRANS’ two controlled implosions will likely be insignificant to the population as a whole.

Mitigation Measures

In order to issue an incidental take authorization under section 101(a)(5)(D) of the MPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses.

1. Mitigation Measures for In-Water Pile Driving and Pile Removal

For the CALTRANS SFOBB construction activities, NMFS requires the following mitigation measures to minimize the potential impacts to marine mammals in the project vicinity. The primary purpose of these mitigation measures is to detect marine mammals within or about to enter designated exclusion zones corresponding to NMFS current injury thresholds and to initiate immediate shutdown or power down of the piling hammer, making it very unlikely potential injury or TTS to marine mammals would occur, and to reduce the intensity of Level B behavioral harassment.

Use of Noise Attenuation Devices

To reduce impact on marine mammals, CALTRANS shall use a marine pile driving energy attenuator (i.e., air bubble curtain system), or other equally effective sound attenuation method (e.g., dewatered cofferdam) for all impact pile driving, with the exception of pile proofing and H-piles.

Establishment of Exclusion and Level B Harassment Zones

Before the commencement of in-water construction activities, which include impact pile driving and vibratory pile driving, CALTRANS shall establish “exclusion zones” where received underwater SPLs are higher than 180 dB (rms) and 190 dB (rms) re 1 μPa for cetaceans and pinnipeds, respectively, and “Level B behavioral harassment zones” where received underwater sound pressure levels (SPLs) are higher than 160 dB (rms) and 120 dB (rms) re 1 μPa for impulse noise sources (impact pile driving) and non-impulses noise sources (vibratory pile driving), respectively. Before the sizes of actual zones are determined based on hydroacoustic measurements, CALTRANS shall establish these zones based on prior measurements conducted during SFOBB constructions, as described in Table 2 of this document.

Once the underwater acoustic measurements are conducted during initial test pile driving, CALTRANS shall adjust the size of the exclusion zones and Level B behavioral harassment zones, and monitor these zones accordingly.

NMFS-approved protected species observers [PSO] shall conduct initial survey of the exclusion zones to ensure that no marine mammals are seen within the zones before impact pile driving of a pile segment begins. If marine mammals are found within the exclusion zone, impact pile driving of the segment would be delayed until they move out of the area. If a marine mammal is seen above water and then dives below, the contractor would wait 15 minutes for pinnipeds and small cetaceans (harbor porpoises and bottlenose dolphins), and 30 minutes for gray whales. If no marine mammals are seen by the observer in that time it can be assumed that the animal has moved beyond the exclusion zone.

If pile driving of a segment ceases for 30 minutes or more and a marine mammal is sighted within the designated exclusion zone prior to commencement of pile driving, the observer(s) must notify the Resident Engineer (or other authorized individual) immediately and continue to monitor the exclusion zone. Operations may not resume until the marine mammal has exited the exclusion zone.

Soft Start

In order to provide additional protection to marine mammals near the project area by allowing marine mammals to vacate the area prior to receiving a higher noise exposure, CALTRANS and its contractor will also “soft start” the hammer prior to operating at full capacity. This should expose fewer animals to loud sounds both underwater and above water. This would also ensure that, although not expected, any pinnipeds and cetaceans that are missed during the initial exclusion zone monitoring will not be injured.

Shut-Down Measure

CALTRANS shall implement shutdown measures if a marine mammal is sighted approaching the Level A exclusion zone, or within 10 m of the pile driving and pile removal equipment, whichever is smaller. In-water construction activities shall be suspended until the marine mammal is sighted moving away from the exclusion zone, or if a pinniped, harbor porpoise, or bottlenose dolphin is not sighted for 15 minutes after the shutdown, or if a
gray whale is not sighted for 30 minutes after the shutdown.

CALTRANS shall implement shutdown if a species for which authorization has not been granted (including but not limited to Guadalupe fur seals) or if a species for which authorization has been granted but the authorized takes are met, approaches or is observed within the Level B harassment zone.

2. Mitigation Measures for Confined Implosion

For CALTRANS’ Piers E4 and E5 controlled implosion, NMFS requires the following mitigation measures to minimize the potential impacts to marine mammals in the project vicinity. The primary purposes of these mitigation measures are to minimize sound levels from the activities, to monitor marine mammals within designated exclusion zones and zones of influence (ZOI). Specific mitigation measures are described below.

Time Restriction

Implosion of Piers E4 and E5 would only be conducted during daylight hours and with enough time for pre and post implosion monitoring, and with good visibility when the largest exclusion zone can be visually monitored.

Installation of Blast Attenuation System

Prior to the Piers E4 and E5 demolition, CALTRANS shall install a Blast Attenuation System (BAS) as described above to reduce the shockwave from the implosion.

Establishment of Level A Exclusion Zone

Due to the different hearing sensitivities among different taxa of marine mammals, NMFS has established a series of take thresholds from underwater explosions for marine mammals belonging to different functional hearing groups (Table 3). Under these criteria, marine mammals from different taxa will have different impact zones (exclusion zones and zones of influence).

4. **Zone of Influence**

As shown in Table 3, for harbor and northern elephant seals, this will cover the area out to 212 dB peak SPL or 177 dB SEL, whichever extends out the furthest. Hydroacoustic modeling indicates this isopleth would extend out to 1,658 ft (505 m) from the pier. For harbor porpoises, this will cover the area out to 195 dB peak SPL or 146 dB SEL, whichever extends out the furthest, to 5,580 ft (1,701 m) from the pier. As discussed previously, the presence of harbor porpoises in this area is unlikely but monitoring will be employed to confirm their absence. For California sea lions, the distance to the Level B TTS zone of influence will cover the area out to 212 dB peak SPL or 200 dB SEL. This distance was calculated at 261 ft (80 m) from Pier E3, well within the exclusion zone previously described. Hearing group specific Level B TTS zone of influence ranges are provided in Table 4.

**Establishment of Level B Temporary Hearing Threshold Shift (TTS) Zone of Influence**

As shown in Table 3, for harbor seals and northern elephant seals, this will cover the area out to 172 dB SEL. Hydroacoustic measurement indicates this isopleth would extend out to 2,460 ft (750 m) from the pier. For harbor porpoises, this will cover the area out to 141 dB SEL. Hydroacoustic measurement indicates this isopleth would extend out to 8,171 ft (2,941 m) from the pier. As discussed previously, the presence of harbor porpoises in this area is unlikely but monitoring will be employed to confirm their absence. For California sea lions, the distance to the Level B behavioral harassment ZOI will cover the area out to 195 dB SEL. This distance was calculated at 387 ft (118 m) from the pier, well within the exclusion zone previously described. Hearing group specific Level B TTS zone of influence ranges are provided in Table 4.

**Communication**

All PSOs will be equipped with mobile phones and a VHF radio as a backup. One person will be designated as the Lead PSO and will be in constant contact with the Resident Engineer on site and the blasting crew. The Lead PSO will coordinate marine mammal sightings with the other PSOs. PSOs will contact the other PSOs when a sighting is made within the exclusion zone or near the exclusion zone so that the PSOs within overlapping areas of responsibility can continue to track the animal and the Lead PSO is aware of the animal. If it is within 30 minutes of blasting and an animal has entered the exclusion zone or is near it, the Lead PSO will notify the Resident Engineer and blasting crew. The Lead PSO will keep them informed of the disposition of the animal.

**Mitigation Conclusions**

NMFS has carefully evaluated the mitigation measures and considered a range of other measures in the context of ensuring that NMFS prescribes the means of effecting the least practicable impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one another:
- The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals.
- The proven or likely efficacy of the specific measure to minimize adverse impacts as planned.
- The practicability of the measure for applicant implementation.

Any mitigation measure(s) prescribed by NMFS should be able to accomplish, have a reasonable likelihood of accomplishing (based on current science), or contribute to the accomplishment of one or more of the general goals listed below:

1. Avoidance or minimization of injury or death of marine mammals wherever possible (goals 2, 3, and 4 may contribute to this goal).
2. A reduction in the numbers of marine mammals (total number or number at biologically important time or location) exposed to received levels of pile driving and pile removal or other activities expected to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).
3. A reduction in the number of times (total number or number at biologically important time or location) individuals would be exposed to received levels of pile driving and pile removal, or other activities expected to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).
4. A reduction in the intensity of exposures (either total number or number at biologically important time or location) to received levels of pile driving, or other activities expected to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing the severity of harassment takes only).
5. Avoidance or minimization of adverse effects to marine mammal habitat, paying special attention to the food base, activities that block or limit passage to or from biologically important areas, permanent destruction of habitat, or temporary destruction/disturbance of habitat during a biologically important time.
6. For monitoring directly related to mitigation—an increase in the probability of detecting marine mammals, thus allowing for more effective implementation of the mitigation.

Based on our evaluation of the applicant’s proposed mitigation measures, as well as other measures considered by NMFS, NMFS has determined that the mitigation measures provide the means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring and Reporting
In order to issue an incidental take authorization (ITA) for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth, “requirements pertaining to the monitoring and reporting of such taking.” The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for ITAs must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the proposed action area. CALTRANS has proposed marine mammal monitoring measures as part of the IHA application. It can be found at http://www.nmfs.noaa.gov/pr/permits/incidental.htm.

Monitoring measures prescribed by NMFS should accomplish one or more of the following general goals:

1. An increase in the probability of detecting marine mammals, both within the mitigation zone (thus allowing for more effective implementation of the mitigation) and in general to generate more data to contribute to the analyses mentioned below;
2. An increase in our understanding of how many marine mammals are likely to be exposed to levels of pile driving that we associate with specific adverse effects, such as behavioral harassment, TTS, or PTS;
3. An increase in our understanding of how marine mammals respond to stimuli expected to result in take and how anticipated adverse effects on individuals (in different ways and to varying degrees) may impact the population, species, or stock (specifically through effects on annual rates of recruitment or survival) through any of the following methods:
   • Behavioral observations in the presence of stimuli compared to observations in the absence of stimuli (need to be able to accurately predict received level, distance from source, and other pertinent information);
   • Physiological measurements in the presence of stimuli compared to observations in the absence of stimuli (need to be able to accurately predict received level, distance from source, and other pertinent information);
   • Distribution and/or abundance comparisons in times or areas with concentrated stimuli versus times or areas without stimuli;

(4) An increased knowledge of the affected species; and

(5) An increased in our understanding of the effectiveness of certain mitigation and monitoring measures.

Monitoring Measures

1. Monitoring for Pile Driving and Pile Removal

(1) Visual Monitoring

NMFS made changes to the visual monitoring protocol during CALTRANS’ pile driving and pile removal activities based, on a comment from the Marine Mammal Commission. Specifically, the revised visual monitoring protocol requires that PSOs conduct 100 percent visual monitoring of marine mammals during all pile driving and pile removal activities. In the proposed IHA, only 20 percent visual monitoring would have been required for Level B harassment zones during vibratory pile driving and pile removal activities. A complete description of the monitoring measure is provided below.

Besides using monitoring for implementing mitigation (ensuring exclusion zones are clear of marine mammals before pile driving begins and after shutdown measures), marine mammal monitoring will also be conducted to assess potential impacts from CALTRANS construction activities. CALTRANS will implement onsite marine mammal monitoring for all unattenuated impact pile driving of H-piles for 180– and 190–dB re 1 μPa exclusion zones and 160–dB re 1 μPa Level B harassment zone and attenuated impact pile driving (except pile proofing) for 180– and 190–dB re 1 μPa exclusion zones. CALTRANS will also monitor all attenuated impact pile driving for the 160–dB re 1 μPa Level B harassment zone, and all vibratory pile driving for the 120–dB re 1 μPa Level B harassment zone.

(2) Monitoring Protocol

Monitoring of the pinniped and cetacean exclusion zones shall be conducted by a minimum of three qualified NMFS-approved PSOs. Observations will be made using high-quality binoculars (e.g., Zeiss, 30 x 42 power). PSOs will be equipped with radios or cell phones for maintaining contact with other observers and CALTRANS engineers, and range finders to determine distance to marine mammals, boats, buoys, and construction equipment.

(3) Data Collection

Data on all observations will be recorded and will include the following information:

• Location of sighting;
• Species;
• Number of individuals;
• Number of calves present;
• Duration of sighting;
• Behavior of marine animals sighted;
• Direction of travel; and
• When in relation to construction activities did the sighting occur (e.g., before, “soft-start”, during, or after the pile driving or removal).

2. Monitoring for Confined Implosion of Piers E4 and E5

Monitoring for implosion impacts to marine mammals will be based on the SFOBB pile driving monitoring protocol. Pile driving has been conducted for the SFOBB construction project since 2000 with development of several NMFS-approved marine mammal monitoring plans (CALTRANS 2004; 2013). Most elements of these marine mammal monitoring plans are similar to what would be required for underwater implosions. These monitoring plans would include monitoring an exclusion zone and ZOIs for TTS and behavioral harassment described above.

(1) Protected Species Observers

A minimum of 8–10 PSOs would be required during the Piers E4 and E5 controlled implosion so that the exclusion zone, Level B Harassment TTS and Behavioral ZOIs, and surrounding area can be monitored. One PSO would be designated as the Lead PSO and would receive updates from other PSOs on the presence or absence of marine mammals within the exclusion zone and would notify the Environmental Compliance Manager of a cleared exclusion zone prior to the implosion.

(2) Monitoring Protocol

Implosions of Piers E4 and E5 will be conducted only during daylight hours and with enough time for pre and post-implosion monitoring, and with good weather (i.e., clear skies and no high winds). This work will be conducted so that PSOs will be able to detect marine mammals within the exclusion zones and beyond. The Lead PSO will be in contact with other PSOs. If any marine mammals enter an exclusion zone within 30 minutes of blasting, the Lead PSO will notify the Environmental Compliance Manager that the implosion may need to be delayed. The Lead PSO will keep the Environmental Compliance Manager informed about the disposition of the animal. If the animal remains in the exclusion zone, blasting will be delayed until it has left the exclusion zone. If the animal dives and is not seen again, blasting will be delayed at least 15 minutes. After the implosion has occurred, the PSOs will continue to monitor the area for at least 60 minutes.
(3) Data Collection

Each PSO will record the observation position, start and end times of observations, and weather conditions (i.e., sunny/cloudy, wind speed, fog, visibility). For each marine mammal sighting, the following will be recorded, if possible:
- Species.
- Number of animals (with or without pup/calf).
- Age class (pup/calf, juvenile, adult).
- Identifying marks or color (e.g., scars, red pelage, damaged dorsal fin).
- Position relative to Piers E4 or E5 (distance and direction).
- Movement (direction and relative speed).
- Behavior (e.g., logging [resting at the surface], swimming, spy-hopping [raising above the water surface to view the area], foraging).

(4) Post-Implosion Survey

Although any injury or mortality from the implosions of Piers E4 and E5 is very unlikely, boat or shore surveys will be conducted for three days following the event, to determine whether any injured or stranded marine mammals are in the area. If an injured or dead animal is discovered during these surveys or by other means, the NMFS-designated stranding team will be contacted to pick up the animal. Veterinarians will treat the animal or will conduct a necropsy to attempt to determine whether the animal was stranded because of the Piers E4 and E5 implosions.

Reporting Measures

CALTRANS would be required to submit a draft monitoring report within 90 days after completion of the construction work or the expiration of the IHA, whichever comes earlier. This draft report would detail the monitoring protocol, summarize the data recorded during monitoring, and estimate the number of marine mammals that may have been harassed. NMFS would have an opportunity to provide comments on the draft report within 30 days, and if NMFS has comments, CALTRANS would address the comments and submit a final report to NMFS within 30 days. If no comments are provided by NMFS after 30 days receiving the report, the draft report is considered to be final.

Marine Mammal Stranding Plan

A stranding plan for the Pier E3 implosion was prepared in cooperation with the local NMFS-designated marine mammal stranding, rescue, and rehabilitation center. An updated version of this plan will be implemented during implosions of Piers E4 and E5. Although avoidance and minimization measures likely will prevent any injuries, preparations will be made in the unlikely event that marine mammals are injured. Elements of the plan will include the following:

1. The stranding crew will prepare treatment areas at an NMFS-designated facility for cetaceans or pinnipeds that may be injured from the implosions. Preparation will include equipment to treat lung injuries, auditory testing equipment, dry and wet caged areas to hold animals, and operating rooms if surgical procedures are necessary.
2. A stranding crew and a veterinarian will be on call near the Piers E4 and E5 area at the time of the implosions, to quickly recover any injured marine mammals, provide emergency veterinary care, stabilize the animal’s condition, and transport individuals to an NMFS-designated facility. If an injured or dead animal is found, NMFS (both the regional office and headquarters) will be notified immediately, even if the animal appears to be sick or injured from causes other than the implosions.
3. Post-implosion surveys will be conducted immediately after the event and over the following three days to determine whether any injured or dead marine mammals are in the area.
4. Any veterinarian procedures, euthanasia, rehabilitation decisions, and time of release or disposition of the animal will be at the discretion of the NMFS-designated facility staff and the veterinarians treating the animal. Any necropsies to determine whether the injuries or death of an animal was the result of an implosion or other anthropogenic or natural causes will be conducted at an NMFS-designated facility by the stranding crew and veterinarians. The results will be communicated to both the CALTRANS and to NMFS as soon as possible, followed by a written report within a month.

Estimated Take by Incidental Harassment

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as: Any act of pursuit, torment, or annoyance, which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment) or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

The distance to marine mammal threshold criteria for pile driving and blasting activities, and corresponding ZOI have been determined based on underwater sound and pressure measurements collected during perevious activities in the SFOBB Project area. The numbers of marine mammals by species that may be taken by each type of take were calculated based on distance to the specific marine mammal harassment thresholds, number of days of the activity, and the estimated density of each species in the ZOI.

Estimates of Species Densities of Marine Mammals

No systematic line transect surveys of marine mammals have been performed in the San Francisco Bay. Therefore, the in-water densities of harbor seals, California sea lions, and harbor porpoises were calculated based on 15 years of observations during monitoring for the SFOBB construction and demolition. The amount of monitoring performed per year varied depending on the frequency and duration of construction activities with the potential to affect marine mammals. During the 237 days of monitoring from 2000 through 2015 (including 15 days of baseline monitoring in 2003), 822 harbor seals, 77 California sea lions, and nine harbor porpoises were observed within the waters of the SFOBB east span. Density estimates for other species were made from stranding data, provided by the Marine Mammal Center (MMC).

1. Pacific Harbor Seal Density Estimates

Harbor seal density was calculated from all observations of animals in water during SFOBB Project monitoring from 2000 to 2015, divided by the size of the project area. These observations included data from baseline, pre-, during and post-pile driving, mechanical dismantling, onshore blasting, and offshore implosion activities. During this time, the population of harbor seals in the Bay remained stable (Manugian 2013). Therefore, substantial differences in numbers or behaviors of seals hauling out, foraging, or in their movements are not anticipated. All harbor seal observations within a 1 km² area were used in the estimate. Distances were recorded using a laser range finder (Bushnell Yardage Pro Elite 1500; ± 1.0 yard accuracy). Care was taken to eliminate multiple observations of the same animal, although this was difficult when more than three seals were foraging in the same area. Density of harbor seals was highest near YBI and Treasure Island, probably because of the haul-out site and nearby foraging areas in Coast Guard and
Clipper coves. Therefore, density estimates were calculated for a higher density area within 4,921 ft (1,500 m) west of Piers E4 and E5, which included the two foraging coves. A lower density estimate was calculated from the areas east of Piers E4 and E5, and beyond 4,921 ft (1,500 m) north and south of the bridge. Harbor seal densities in these two areas in spring-summer and fall-winter seasons are provided in Table 5.

2. California Sea Lion Density Estimates

Within the SFOBB Project area, California sea lion density was calculated from all observations of animals in water during SFOBB Project monitoring from 2000 to 2015, divided by the size of the project area. These observations included data from baseline, pre, during, and post-pile driving, mechanical dismantling, onshore blasting, and offshore implosion activities. All sea lion observations within a 1 km² area were used in the estimate. Distances were recorded using a laser range finder (Bushnell Yardage Pro Elite 1500; ± 1.0 yard accuracy). Care was taken to eliminate multiple observations of the same animal, although most sea lion observations involve a single animal. California sea lion densities in late spring-early summer and late summer-fall seasons are provided in Table 5.

3. Northern Elephant Seal Density Estimates

Northern elephant seal density in the project area was calculated from the stranding records of the MMC, from 2004 to 2014. These data included both injured or sick seals and healthy seals. Approximately 100 elephant seals were reported in the Bay during this time; most of these hauled out and likely were sick or starving. The actual number of individuals in the Bay may have been higher because not all individuals would necessarily have hauled out. Some individuals may have simply left the Bay soon after entering. Data from the MMC show several elephant seals stranding on Treasure Island, and one healthy elephant seal was observed resting on the beach in Clipper Cove in 2012. Elephant seal pups or juveniles also may have stranded after weaning in the spring and when they returned to California in the fall (September through November). Density of northern elephant seal is estimated as the number of stranded seals over the SFOBB project area, which is 0.03 animal/km² (Table 5).

4. Harbor Porpoise Density Estimates

Harbor porpoise density was calculated from all observations during SFOBB Project monitoring, from 2000 to 2015. These observations included data from baseline, pre, during and post-pile driving, and onshore implosion activities. Over this period, the number of harbor porpoises that were observed entering and using the Bay increased. During the 15 years of monitoring in the SFOBB Project area, only nine harbor porpoises were observed, and all occurred between 2006 and 2015 (including two in 2014 and five in 2015). Density of harbor porpoise is estimated to be 0.021 animal/km² (Table 5).

5. Gray Whale Density Estimate

Gray whale density was estimated for the entire Bay as no observations have occurred of gray whales in the SFOBB Project area. Each year, two to six gray whales enter the Bay, presumably to feed, in the late winter through spring (February through April), per the MMC. Gray whales rarely occur in the Bay from October through December. The gray whale density was estimated based on a maximum of 6 whales occurring within the main area of San Francisco Bay, which yielded a density of 0.00004/km² (Thorson, pers. comm., 2014).

Note: Densities for Pacific harbor seals, California sea lions and harbor porpoises are based on monitoring for the east span of the SFOBB from 2000 to 2013. Gray whale and elephant seal densities are estimated from sighting and stranding data from the MMC.

Estimated Takes by Pile Driving and Pile Removal

The numbers of marine mammals by species that may be taken by pile driving were calculated by multiplying the ensonified area above a specific species exposure threshold by the days of the activity and by the estimated density of each species in the ensonified area. As discussed above, threshold distances were determined based on previously measured distances to thresholds during the driving of 42-inch-diameter (1.07 meters) pipe piles. The same threshold distances have been applied to all types and sizes of piles proposed for installation and removal (i.e., H-piles, and pipe piles equal to or less than 36 inches (0.91 meter)). The take estimate is based on 332 days of pile driving to install 200 piles.

For rare species of which the density estimates are unknown, such as northern fur seal and bottlenose dolphin, NMFS worked with CALTRANS and allotted 20 northern fur seals and 10 bottlenose dolphin for incidental take by Level B behavioral harassment to cover the chance encounter in case these animals happen to occur in the project area.

A summary of estimated takes by in-water pile driving and pile removal is provided in Table 6.
The number of marine mammals by species that may be taken by implosion of Piers E4 and E5 were calculated based on distances to the marine mammal threshold for explosions (Table 4) and the estimated density of each species in the ensonified areas (Table 5). A summary of estimated and requested takes by controlled implosion is provided in Table 8.

However, the number of marine mammals in the area at any given time is highly variable. Animal movement depends on time of day, tide levels, weather, and availability and distribution of prey species. Therefore, to account for potential high animal density that could occur during the short window of controlled implosion, NMFS worked with CALTRANS and adjusted the estimated number upwards for the requested takes. These adjustments were based on likely group sizes of these animals.

A summary of estimated takes by implosion of Piers E4 and E5 is provided in Table 8.

A summary of the request incidental takes of marine mammals for CALTRANS SFOBB construction activity, including from in-water pile driving/pile removal and controlled implosion for Piers E4 and E5 is provided in Table 9. These take estimates represent “instances” of take and are likely overestimates of the number of individual animals taken, since some individuals are likely taken on multiple days. The more likely the individuals are to remain in the action area for multiple days, the greater the overestimate of individuals.

Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing

On August 4, 2016, NMFS released its Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing (Guidance). This new guidance established new thresholds for predicting auditory injury, which equates to Level A harassment under the MMPA. In the Federal Register notice (81 FR 51694), NMFS explained the approach it would take during a transition period, wherein we balance the need to consider this new best available science with the fact that some applicants have already committed time and resources to the development of analyses based on our previous guidance and have constraints that preclude the recalculation of take estimates, as well as where the action is in the agency’s decision-making pipeline. In that Notice, we included a non-exhaustive list of factors that would inform the most appropriate approach for considering the new Guidance, including: The scope of effects; how far in the process the applicant has progressed; when the authorization is needed; the cost and complexity of the analysis; and the degree to which the guidance is expected to affect our analysis. In this case, CALTRANS submitted an adequate and complete application in a timely manner and indicated that they would need to receive an IHA (if issued) by early September 2016. The CALTRANS analysis put forth in the proposed IHA contemplated the potential for small numbers of permanent or temporary threshold shift, but ultimately concluded that permanent threshold shift will not occur. Consideration of the new Guidance suggested that in the absence of mitigation a small number of Level A takes could potentially occur to one harbor seal. However, CALTRANS has a robust and practicable monitoring and mitigation program—and in addition they enlarged the exclusion zone for pile driving from 95 m to 156 m for 14” H-pile and to 183 m for 36” steel pipe when driven by an impact hammer, providing further protection. When this mitigation is considered in combination with the fact that a fair number of marine mammals are expected to intentionally avoid approaching within distances of this slow-moving source that would result in injury, we believe that injury is unlikely. In summary, we have considered the new Guidance and believe that the likelihood of injury is adequately addressed in the analysis and appropriate protective measures are in place in the IHA.

Analysis and Determinations

Negligible Impact

Negligible impact is “an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival” (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (i.e., population-level effects). An estimate of the number of Level B harassment takes, alone, is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be “taken” through behavioral harassment, NMFS must consider other factors, such as the likely nature of any responses (their intensity, duration, etc.), the context of any responses (critical reproductive time or location, migration, etc.), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and effects on habitat.

To avoid repetition, this introductory discussion of our analyses applies to all the species listed in Table 9, given that the anticipated effects of CALTRANS’ SFOBB construction activities involving pile driving and pile removal and controlled implosions for Piers E4 and E5 on marine mammals are expected to be relatively similar in nature. There is no information about the nature or severity of the impacts, or the size, status, or structure of any species or stock that would lead to a different analysis for this activity, or else species-specific factors would be identified and analyzed.

No injuries or mortalities are anticipated to occur as a result of CALTRANS’ SFOBB construction activity associated with pile driving and pile removal and controlled implosion to demolish Piers E4 and E5, and none are authorized. The relatively low marine mammal density, relatively small Level A harassment zones, and robust mitigation plan make injury takes of marine mammals unlikely, based on take calculation described above. In addition, the Level A exclusion zones would be thoroughly monitored before the implosion, and detonation activity would be postponed if an marine mammal is sighted within the exclusion zone.

The takes that are anticipated and authorized are expected to be limited to short-term Level B harassment (behavioral and TTS). Marine mammals (Pacific harbor seal, northern elephant seal, California sea lion, northern fur seal, gray whale, harbor porpoise, and bottlenose dolphin) present in the vicinity of the action area and taken by Level B harassment would most likely show overt brief disturbance (startle reaction) and avoidance of the area from elevated noise level during pile driving and pile removal and the implosion noise. A few marine mammals could experience TTS if they occur within the Level B TTS ZOI during the two implosion events. However, as discussed early in this document, TTS is a temporary loss of hearing sensitivity when exposed to loud sound, and the hearing threshold is expected to recover completely within minutes to hours. Therefore, it is not considered an injury.

In addition, even if an animal receives a TTS, the TTS would be a one-time event from a brief impulse noise (about 5 seconds), making it unlikely that the TTS would involve into PTS. Finally, there is no critical habitat or other biologically important areas in the vicinity of CALTRANS’ Pier E4 and E5 controlled implosion areas (Calambokidis et al., 2015).

The project also is not expected to have significant adverse effects on affected marine mammals’ habitat, as analyzed in detail in the “Anticipated Effects on Marine Mammal Habitat” section. There is no biologically important area in the vicinity of the SFOBB project area. The project activities would not permanently modify existing marine mammal habitat. The activities may kill some fish and
cause other fish to leave the area temporarily, thus impacting marine mammals’ foraging opportunities in a limited portion of the foraging range; but, because of the short duration of the activities and the relatively small area of the habitat that may be affected, the impacts to marine mammal habitat are not expected to cause significant or long-term negative consequences.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that the total marine mammal take from CALTRANS’s SFOBB construction activity and the associated Piers E4 and E5 demolition via controlled implosion will have a negligible impact on the affected marine mammal species or stocks.

Small Numbers

The requested takes represent less than 4.33 percent of all populations or stocks potentially impacted (see Table 9 in this document). These take estimates represent the percentage of each species or stock that could be taken by Level B behavioral harassment and TT5 (Level B harassment). The numbers of marine mammals estimated to be taken are small proportions of the total populations of the affected species or stocks. In addition, the mitigation and monitoring measures (described previously in this document) prescribed in the IHA are expected to reduce even further any potential disturbance to marine mammals.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that small numbers of marine mammals will be taken relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

There are no subsistence uses of marine mammals in the project area; and, thus, no subsistence uses impacted by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act

NMFS has determined that issuance of the IHA will have no effect on listed marine mammals, as none are known to occur in the action area.

National Environmental Policy Act

NMFS prepared an Environmental Assessment (EA) for the take of marine mammals incidental to construction of the East Span of the SFOBB and made a Finding of No Significant Impact (FONSI) on November 4, 2003. Due to the modification of part of the construction project and the mitigation measures, NMFS reviewed additional information from CALTRANS regarding empirical measurements of pile driving noises for the smaller temporary piles without an air bubble curtain system and the use of vibratory pile driving. NMFS prepared a Supplemental Environmental Assessment (SEA) and analyzed the potential impacts to marine mammals that would result from the modification of the action. A FONSI was signed on August 5, 2009. In addition, for CALTRANS’ Piers E4 and E5 demolition using controlled implosion, NMFS prepared an SEA and analyzed the potential impacts to marine mammals that would result from the modification. A FONSI was signed on September 3, 2015. The activity and expected impacts remain within what was previously analyzed in the EA and SEAs. Therefore, no additional NEPA analysis is warranted. A copy of the SEA and FONSI is available upon request (see ADDRESSES).

Authorization

As a result of these determinations, NMFS has issued an IHA to CALTRANS for the take of marine mammals, by Level B harassment, incidental to conducting SFOBB project in the San Francisco Bay, which also includes the mitigation, monitoring, and reporting requirements described in this Notice.

Dated: September 26, 2016.

Donna S. Wieting,
Director, Office of Protected Resources,
National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: This action deletes products from the Procurement List previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Effective Date: 10/30/2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Deletions

On 7/22/2016 (81 FR 47777–47778), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities.
The major factors considered for this certification were:
1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.
2. The action may result in authorizing small entities to furnish the products to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O’Day Act (41 U.S.C. 8501–8506) in connection with the products deleted from the Procurement List.

End of Certification

Accordingly, the following products are deleted from the Procurement List:

Products:

8415–00–NIB–1101—Jacket, Tanker, USMC, Pewter Gray, Size 52R
8415–00–NIB–1111—Jacket, Tanker, USMC, Pewter Gray, Size 52L
8415–00–NIB–1112—Jacket, Tanker, USMC, Pewter Gray, Size 54R
8415–00–NIB–1113—Jacket, Tanker, USMC, Pewter Gray, Size 54L

The major factors considered for this action were:
1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.
2. The action may result in authorizing small entities to furnish the products to the Government.

End of Certification

Accordingly, the following products are deleted from the Procurement List:

Products:

8415–00–NIB–1099—Jacket, Tanker, USMC, Pewter Gray, Size 54L
8415–00–NIB–1098—Jacket, Tanker, USMC, Pewter Gray, Size 48L
8415–00–NIB–1097—Jacket, Tanker, USMC, Pewter Gray, Size 48R
8415–00–NIB–1096—Jacket, Tanker, USMC, Pewter Gray, Size 44L
8415–00–NIB–1095—Jacket, Tanker, USMC, Pewter Gray, Size 44R
8415–00–NIB–1094—Jacket, Tanker, USMC, Pewter Gray, Size 42L
8415–00–NIB–1093—Jacket, Tanker, USMC, Pewter Gray, Size 42R
8415–00–NIB–1092—Jacket, Tanker, USMC, Pewter Gray, Size 40L
8415–00–NIB–1091—Jacket, Tanker, USMC, Pewter Gray, Size 40R
8415–00–NIB–1090—Jacket, Tanker, USMC, Pewter Gray, Size 40S
8415–00–NIB–1089—Jacket, Tanker, USMC, Pewter Gray, Size 38L
8415–00–NIB–1088—Jacket, Tanker, USMC, Pewter Gray, Size 38R

The Committee is proposing to add a service to the Procurement List that will be provided by a nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products previously furnished by such agency.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Addition and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add a service to the Procurement List that will be provided by a nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products previously furnished by such agency.

COMMODITY FUTURES TRADING COMMISSION

Privacy Act of 1974 System of Records Notice

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice; alterations of Privacy Act systems of records.

SUMMARY: The Commodity Futures Trading Commission (CFTC) is consolidating and revising several notices of systems of records under the Privacy Act of 1974. It is consolidating two system of records notices, CFTC–3, “Employee Personnel/Payroll Records,” and CFTC–4, “Employee Leave, Time,
and Attendance,” into one, CFTC–5,
“Employee Personnel, Payroll, Time
and Attendance,” to reflect more
integrated business processes and
applications, and to be more descriptive
of its contents and enhancements. The
Commission also is consolidating three
system of records notices, CFTC–34,
“Telecommunications Services,” CFTC–
35, “Interoffice and Internet Email,” and
CFTC–36, “Internet Security Gateway
Systems,” into one system of records
notice, CFTC–35, entitled “General
Information Technology Records” to
reflect more integrated business
processes and applications, and to be
more descriptive of its contents and
enhancements. The revised CFTC–35,
“General Information Technology
Records,” broadly covers the
information in identifiable form needed
for the CFTC information technology
network to provide communications and
operate effectively and securely.

DATES: Comments must be received on
or before October 31, 2016. This action
will be effective without further notice on
November 9, 2016, unless revised
pursuant to comments received.

ADDRESSES: You may submit comments
identified by “Employee Personnel,
Payroll, Time and Attendance Records”
or “General Information Technology
Records,” as applicable, by any of the
following methods:
• Agency Web site, via Its Comments
Online process: http://
comments.cftc.gov. Follow the
instructions for submitting comments
through the Web site.
• Federal eRulemaking Portal:
Comments may be submitted at http://
www.regulations.gov. Follow the
instructions for submitting comments.
• Mail: Christopher Kirkpatrick,
Secretary of the Commission,
Commodity Futures Trading
Commission, Three Lafayette Centre,
1155 21st Street NW., Washington, DC
20581.
• Hand Delivery/Courier: Same as
Mail, above.
Please submit your comments using
only one method.
All comments must be submitted in
English, or if not, accompanied by an
English translation. Comments will be
posted as received to http://
www.cftc.gov. You should submit only
information that you wish to make
available publicly. If you wish the
Commission to consider information
that you believe is exempt from
disclosure under the Freedom of
Information Act, a petition for
confidential treatment of the exempt
information may be submitted according
to the procedures established in § 145.9
of the Commission’s regulations, 17 CFR
145.9.

The Commission reserves the right,
but shall have no obligation, to review,
pre-screen, filter, redact, refuse or
remove any or all of a submission from
http://www.cftc.gov that it may deem to
be inappropriate for publication, such as
obscene language. All submissions that
have been redacted or removed that
contain comments on the merits of the
notice will be retained in the public
comment file and will be considered as
required under all applicable laws and
may be accessible under the Freedom of
Information Act.

FOR FURTHER INFORMATION CONTACT:
Kathy Harman-Stokes, Chief Privacy
Officer, kharman-stokes@cftc.gov, 202–
418–6629, Office of the Executive
Director, Commodity Futures Trading
Commission, Three Lafayette Centre,
1155 21st Street NW., Washington, DC
20581.

SUPPLEMENTARY INFORMATION:
I. The Privacy Act

Under the Privacy Act of 1974, 5
U.S.C. 552a, a “system of records” is
defined as any group of records under
the control of a federal government
agency from which information about
individuals is retrieved by name or
other personal identifier. The Privacy
Act establishes the means by which
government agencies must collect,
maintain, and use personally
identifiable information associated with
an individual in a government system of
records.

Each government agency is required
to publish a notice in the Federal
Register of a system of records in which
the agency identifies and describes each
system of records it maintains, the
reasons why the agency uses the
personally identifying information
therein, the routine uses for which the
agency will disclose such information
outside the agency, and how individuals
may exercise their rights under the
Privacy Act to determine if the system
contains information about them.

II. Routine Uses

Information in the systems of records
covered by this Federal Register notice
may be disclosed as specifically stated
in the applicable notice and also in
accordance with the blanket routine
uses numbered 1 through 19 published
at 76 FR 5974 (Feb. 2, 2011). These
blanket routine uses apply to all CFTC
systems of records, except as otherwise
provided in a specific system of records
notice.

III. Employee Personnel, Payroll, Time
and Attendance

The Employee Personnel, Payroll,
Time and Attendance System is a
collection of information concerning
CFTC employees, including interns and
volunteers. This System contains certain
personnel records not covered by
government-wide system of records
notices, including records related to
telework, requests for reasonable
accommodation, student loan
repayment program documentation,
employee counseling, and grievances
and other employee matters not
appealed to the Merit Systems
Protection Board (MSPB). This System
also contains records related to payroll,
pay deductions for taxes, benefits,
garnishments, and other matters, all
forms of leave and absences, and time
and attendance. The System includes,
but is not limited to: Name; business
and personal contact information; social
security number; date of birth; medical
and other information provided for
leave requests and requests for
reasonable accommodation; pay and
benefit information; and direct deposit
information.

IV. CFTC’s General Information
Technology Records

The General Information Technology
Records system covers certain records
that the CFTC computer systems
routinely compile and maintain about
users of those systems to enable the
information technology ("IT") network
and its hardware, software, applications,
databases, communications, and
Internet access to function effectively,
reliably and securely, and for activities
to be logged for auditing, system
improvement, and security purposes.
While the CFTC IT network contains a
broad array of hardware, software,
applications, databases, communications
tools, and means to access the Internet, this General
Information Technology Records system of
records notice ("SORN") covers the
personally identifiable information
("PI") processed or generated by the IT
network that would be covered by the
Privacy Act of 1974 and is not covered
by another SORN, for individuals who
currently or previously had access to
the CFTC IT network, including current and
former employees, volunteers, interns,
contractors, and consultants. This
system of records includes, but is not
limited to: Network user information
needed for the IT network and its
components to function effectively and
securely and for the CFTC to control
access to software, applications, data
and information; network activity
information including activity logs, audit trails, identification of devices used to access CFTC systems, Internet sites visited, and information input into sites visited, logs of calls to and from a CFTC network user on desk or mobile phones, and similar communication data traffic logs, and, if needed to locate a misplaced CFTC mobile device or for related purposes, the location of that device; and logs of calls placed using CFTC calling cards. Many CFTC computer systems collect and maintain additional information, other than system use data, about individuals inside and outside the CFTC. For a complete list of CFTC Privacy Act systems, please see http://www.cftc.gov/Transparency/PrivacyOffice/SORN/index.htm to learn about other categories of information collected and maintained about individuals in the CFTC’s computer system.

Issued in Washington, DC, on September 26, 2016, by the Commission.

Christopher J. Kirkpatrick, Secretary of the Commission.

CFTC–5

SYSTEM NAME: Employee Personnel, Payroll, Time and Attendance.

SECURITY CLASSIFICATION: Unclassified.

SYSTEM LOCATION: This system is located in the Office of the Executive Director, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581 and on a computer system at the Commission’s payroll processor, Department of Agriculture’s National Finance Center, New Orleans, LA.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM: Former and current Commission employees, including volunteers and interns.

CATEGORIES OF RECORDS IN THE SYSTEM: Categories of records include personnel records not covered by government-wide system of records notices, including records related to telework and requests for reasonable accommodation, which may include medical information; student loan repayment program application and information; and employee counseling, grievances and other employee matters not appealed to the MSPB. This System also contains records related to payroll, including salary information, awards and pay increases; benefits information needed for processing payment of benefits; direct deposit information; pay deductions, including tax and retirement deductions; life insurance, health and dental insurance deductions, flexible spending account deductions, savings allotments, transit and parking deductions, garnishments, debts owed to the Commission, and charity deductions; salary offset under part 141 of the Commission’s rules; all forms of leave requests, balances and credits; all other absence types, including suspension; information necessary to administer the Commission’s voluntary leave transfer program, including leave donated or used and any supporting documentation, which may include medical information; hours worked; and time and attendance records. The System includes identifying information, such as name; business and personal contact information; social security number; date of birth; citizenship; bank account information for direct deposit; and employee identification number.

PURPOSE(S): Information is collected to allow the Commission to handle personnel, payroll, time and attendance functions, including personnel functions involving records not covered by government-wide system of records notices, telework requests, requests for reasonable accommodation, student loan repayment program documentation, employee counseling, grievances and other employee matters not appealed to the Merit Systems Protection Board (MSPB), and payroll, pay deductions, leave requests, time and attendance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. The information may be provided to the Department of Justice, the Office of Personnel Management or other Federal agencies, or used by the Commission in connection with any investigation administrative or legal proceeding involving any violation of Federal law or regulation thereunder.

b. Certain information will be provided, as required by law, to the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services Federal Parent Locator System (FPLS) and Federal Tax Offset System to enable state jurisdictions to locate individuals and identify their income sources to establish paternity, establish and modify orders of support, and for enforcement action.

c. Certain information will be provided, as required by law, to the Office of Child Support Enforcement for release to the Social Security Administration for verifying social security numbers in connection with the operation of the FPLS by the Office of Child Support Enforcement.

d. Certain information will be provided, as required by law, to the Office of Child Support Enforcement for release to the Department of Treasury for purposes of administering the Earned Income Tax Credit Program (Section 32, Internal Revenue Code of 1986) and verifying a claim with respect to employment in a tax return.

e. The information may be provided to insurance companies providing, or proposing to bid on a solicitation to provide, health benefits to Commission employees. This data may include, but is not limited to: Name, social security number, date of birth, age, gender, marital status, service computation date, date of initial appointment with the Commission, geographic location, standard metropolitan service area, home phone number, and home address of the Commission employee. For each enrolled dependent of the Commission employee, this information may include, but is not limited to: Dependent’s name, relationship of the dependent to the Commission employee, date of birth, age, gender, social security number, home address, marital status, student status, and handicap status where applicable. This information may be used to verify eligibility, pay claims, or provide accurate bids.

f. For employees who request repayment of student loans through the CFTC Student Loan Repayment Program, certain information will be provided to the organizations that hold the requesting employees’ loan notes for the purpose of verifying outstanding loan amounts and administering such program.

g. To provide information to officials of labor organizations recognized under 5 U.S.C. Chapter 71 when relevant and necessary to their duties of exclusive representation concerning personnel
policies, practices, and matters affecting work conditions.

Information in this system also may be disclosed in accordance with the blanket routine uses that appear at the beginning of the Commission’s compilation of its system of records notices, see, e.g., 76 FR 5974 (Feb. 2, 2011), and the Commission’s Web site, www.cftc.gov.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:
None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are stored in file folders, and electronic records, including computer files, are stored on the Commission’s network, the National Finance Center Personnel/Payroll System, and other electronic media as needed.

RETRIEVABILITY:

By the name, identification number, or other personally identifying information of the employee, volunteer or intern.

SAFEGUARDS:

Records are protected from unauthorized access and improper use through administrative, technical and physical security measures. Technical security measures within CFTC include restrictions on computer access to authorized individuals who have a legitimate need to know the information; required use of strong passwords that are frequently changed; multi-factor authentication for remote access and access to many CFTC network components; use of encryption for certain data types and transfers; firewalls and intrusion detection applications; and regular review of security procedures and best practices to enhance security. Only specifically authorized individuals may access the National Finance Center computer system. Physical measures include restrictions on building access to authorized individuals, 24-hour security guard service, and maintenance of records in lockable offices and filing cabinets.

RETENTION AND DISPOSAL:

These records are maintained according to retention schedules prescribed by the General Records Schedule for each type of workforce record.

SYSTEM MANAGER(S) AND ADDRESS:

Executive Director, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves, seeking access to records about themselves in this system of records, or contesting the content of records about themselves contained in this system of records should address written inquiries to the Office of General Counsel, Paralegal Specialist, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581. Telephone (202) 418-5011.

RECORDS SOURCE CATEGORIES:

Individual about whom the record is maintained; CFTC human resources office records; records from the National Finance Center; and information from third parties providing benefits or other services to covered individuals.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

CFTC–35

SYSTEM NAME:

General Information Technology Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

This system is located in the Commission’s Office of Data and Technology at its principal office at Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by the system include current and former CFTC network users, including current or former employees, interns, volunteers, contractors and consultants.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system of records covers certain records that the CFTC computer systems routinely compile and maintain about users of its systems to enable the information technology (“IT”) network and its hardware, software, applications, databases, communications and Internet access to function effectively, reliably and securely, and for activities to be logged for auditing, system improvement, and security purposes, to the extent such records are covered by the Privacy Act of 1974 and not included in another system of records. This system includes but is not limited to: Network user information needed for the IT network and its components to function effectively and securely and for the CFTC to control access to software, applications, data and information; network activity information including, for example, activity logs, audit trails, identification of devices used to access CFTC systems, Internet sites visited, and similar communication data traffic logs, and, if needed to locate a misplaced CFTC mobile device or for related purposes, the location of that device; and logs of calls made using CFTC calling cards. Many CFTC computer systems collect and maintain additional information, other than system use data, about individuals inside and outside the CFTC. For a complete list of CFTC Privacy Act systems, please see http://www.cftc.gov/Transparency/PrivacyOffice/SORN/index.htm to learn about other categories of information collected and maintained about individuals in the CFTC’s computer system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

PURPOSE(S):

The purpose of the system of records is to enable effective, reliable and secure operation of the information technology network and its hardware, software, applications, databases, communications and Internet access that CFTC staff members rely upon to perform their job duties and carry out the agency’s mission. This includes: To monitor usage of computer systems; to ensure the availability and reliability of the agency computer facilities; to document and/or control access to various computer systems; to audit, log, and alert responsible CFTC personnel when certain personally identifying information is accessed in specified systems; to identify the need for and to conduct training programs, which can include the topics of information security, acceptable computer practices, and CFTC information security policies and procedures; to monitor security on computer systems; to add and delete users; to investigate and make referrals for disciplinary or other action if improper or unauthorized use is suspected or detected.
ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in this system will be routinely used by CFTC staff members in the Office of Data and Technology to: Facilitate authorized access to and use of CFTC email accounts and internal individual and shared electronic storage and collaboration platforms; enable appropriate access and controls over access to other CFTC systems, applications and information; implement privacy and security controls over CFTC resources and information; generate audit trails for review by staff to understand vulnerabilities and issues to improve system effectiveness and security; and support the communications, telecommunications and audiovisual services CFTC staff members need to fulfill their job duties. Information in this system also may be disclosed in accordance with the blanket routine uses that appear at the beginning of the Commission’s compilation of its system of records notices, see, e.g., 76 FR 5974 (Feb. 2, 2011), and the Commission’s Web site, http://www.cftc.gov.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS CONTROLS, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are stored in file folders and electronic records are stored on the Commission’s network and other electronic media as needed, such as encrypted hard drives and back-up media.

RETRIEVABILITY:

Certain information covered by this SORN may be retrieved by name, CFTC username, identification number, title, user id, Internet Protocol address assigned to CFTC IT network components, email address, and calling card or phone number of the CFTC network user.

SAFEGUARDS:

Records are protected from unauthorized access and improper use through administrative, technical and physical security measures. Technical security measures within CFTC include restrictions on computer access to authorized individuals who have a legitimate need to know the information; required use of strong passwords that are frequently changed; multi-factor authentication for remote access and access to many CFTC network components; use of encryption for certain data types and transfers; firewalls and intrusion detection applications; and regular review of security procedures and best practices to enhance security. Physical measures include restrictions on building access to authorized individuals, 24-hour security guard service, and maintenance of records in lockable offices and filing cabinets.

RETENTION AND DISPOSAL:

The records will be maintained in accordance with records disposition schedules approved by the National Archives and Records Administration. The schedules are available at www.cftc.gov.

SYSTEM MANAGER(S) AND ADDRESS:

The Chief Information Officer, Office of Data and Technology, located at the Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves, seeking access to records about themselves in this system of records, or contesting the content of records about themselves contained in this system of records should address written inquiries to the Office of General Counsel, Paralegal Specialist, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581. Telephone (202) 418–5011.

RECORD SOURCE CATEGORIES:

Current and former CFTC IT network users, including current and former employees, interns, volunteers, contractors and consultants; individuals communicating with CFTC network users through CFTC communications platforms; and CFTC hardware, software and system components that generate information reflecting activity on the CFTC IT network.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

ACTION: Notice; withdrawal of a Privacy Act system of records notice.

SUMMARY: In accordance with the Privacy Act of 1974, the Commodity Futures Trading Commission (CFTC) is providing notice that it is withdrawing one system of records notice, CFTC–8, “Employment Applications,” from its inventory of record systems because the relevant records are covered by an existing government-wide system notice.

DATES: Effective upon publication.

FOR FURTHER INFORMATION CONTACT:

Kathy Harman-Stokes, Chief Privacy Officer, kharman-stokes@cftc.gov, 202–418–6629, Office of the Executive Director, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, and as part of the Commodity Futures Trading Commission’s effort to review and update system of records notices, the Commission is withdrawing one system of records notice, CFTC–8, “Employment Applications.” The Commission is withdrawing the system notice because the records are covered by an existing government-wide notice, OPM/GOVT–5, “Recruiting, Examining, and Placement Records.” The Commission will continue to collect and maintain records regarding recruiting, examining and placement as a custodian for such records for the Office of Personnel Management and will rely upon and follow the existing Federal government-wide system of records notice, OPM/GOVT–5 (71 FR 35351, June 19, 2006). Eliminating CFTC–8 will not have an adverse impact on individuals and will promote the overall streamlining and management of CFTC Privacy Act record systems.

Accordingly, this notice formally terminates system of records notice CFTC–8 and removes it from the inventory of the Commodity Futures Trading Commission.

Issued in Washington, DC, on September 26, 2016, by the Commission.

Christopher J. Kirkpatrick, Secretary of the Commission.

Privacy Act of 1974 System of Records Notice

AGENCY: Commodity Futures Trading Commission.

TIME AND DATE: 10:00 a.m., Friday, October 7, 2016.
DEPARTMENT OF DEFENSE

Department of the Air Force

Air University Board of Visitors’ Air Force Institute of Technology Subcommittee Notice of Meeting

AGENCY: Department of the Air Force, Air University, Air Force Institute of Technology.

ACTION: Meeting notice.

SUMMARY: Under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150, the Department of Defense announces that the Air University Board of Visitors’ Air Force Institute of Technology (AFIT) Subcommittee meeting will take place on 16 and 17 October, 2016 at the Air Force Institute of Technology, located at 2950 Hobson Way, Wright-Patterson AFB, Dayton, Ohio. The meeting will occur from approximately 8:00 a.m.–4:30 p.m. on Monday, 17 October, 2016 and from approximately 8:00 a.m.–3:00 p.m. on Tuesday, 18 October, 2016. The session that will be closed to the general public will be held from 1:25 p.m. to 5:00 p.m. on 17 October, 2016. The purpose of this Air Force Institute of Technology Subcommittee meeting is to provide independent advice and recommendations on matters pertaining to the educational policies, programs, and strategic direction of the Air Force Institute of Technology and to apportion time for Air Force senior leaders to brief the Air Force Institute of Technology Subcommittee on their most vital STEM updates and concerns. In accordance with 5 U.S.C. 552b, as amended, and 41 CFR 102–3.155, a portion of the AFIT Subcommittee meeting will be closed to the general public because they will discuss For Official Use Only (FOUO) information and matters covered by Section 552b of Title 5, United States Code, subsection (c), subparagraph (1).

Any member of the public that wishes to attend this meeting or provide input to the AFIT Subcommittee must contact the BOV meeting organizer at the phone number or email address listed in this announcement at least ten working days prior to the meeting date. Please ensure that you submit your written statement in accordance with 41 CFR 102–3.140(c) and section 10(a)(3) of the Federal Advisory Committee Act. Statements being submitted in response to the agenda mentioned in this notice must be received by the BOV meeting organizer at least ten calendar days prior to the meeting commencement date. The BOV meeting organizer will review all timely submissions and respond to them prior to the start of the meeting identified in this notice. Written statements received after this date may not be considered by the AFIT Subcommittee until their next scheduled meeting.

FOR FURTHER INFORMATION CONTACT: The BOV meeting organizer, Ms. Lisa Arnold at lisa.arnold.2@us.af.mil or 334–953–2989; Headquarters Air University, Chief, Advisory Boards, 55 LeMay Plaza South, Maxwell AFB, AL 36112.

Henry Williams,
Acting Air Force Federal Register Officer.

You may also submit comments and recommendations, identified by Docket ID number and title of the information collection, by the following method:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number and title for this Federal Register document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at http://www.regulations.gov as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari.

Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directives Division, 4800 Mark Center Drive, East Tower, Suite 03FS9, Alexandria, VA 22350–3100. Dated: September 27, 2016.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

Number of Respondents: 75,000.
Responses per Respondent: 1.
Annual Responses: 75,000.
Average Burden per Response: 25 minutes.
Annual Burden Hours: 10,000.
Needs and Uses: West Point candidates provide personal background information which allows the West Point Admissions Committee to make subjective judgements on non-academic experiences. Data are also used by West Point’s Office of Institutional Research for correlation with success in graduation and military careers.

AFFECTED PUBLIC: Individuals or households.

Frequency: On occasion.

Respondent’s Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Ms. Jasmeet Seehra.

Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at Oira_submission@omb.eop.gov. Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directives Division, 4800 Mark Center Drive, East Tower, Suite 03FS9, Alexandria, VA 22350–3100. Dated: September 27, 2016.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.
DEPARTMENT OF DEFENSE

Office of the Secretary

Board of Regents, Uniformed Services University of the Health Sciences; Notice of Federal Advisory Committee Meeting

AGENCY: Uniformed Services University of the Health Sciences ("the University"). Department of Defense.

ACTION: Quarterly meeting notice.

SUMMARY: The Department of Defense is publishing this notice to announce the following meeting of the Board of Regents, Uniformed Services University of the Health Sciences ("the Board").

DATES: Tuesday, November 1, 2016, from 8:00 a.m. to 10:40 a.m. (Open Session) and 10:45 a.m. to 11:30 a.m. (Closed Session).

ADDRESSES: Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Everett Alvarez Jr. Board of Regents, Room (D3001), Bethesda, Maryland 20814.

FOR FURTHER INFORMATION CONTACT: Jennifer Nuetzi James, Designated Federal Officer, 4301 Jones Bridge Road, D3002, Bethesda, Maryland 20814; telephone 301–295–3066; email jennifer.nuetzi-james@usuhs.edu.

SUPPLEMENTARY INFORMATION: This meeting notice is being published under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

Purpose of the Meeting: The purpose of the meeting is to provide advice and recommendations to the Secretary of Defense, through the Under Secretary of Defense for Personnel and Readiness, on academic and administrative matters critical to the full accreditation and successful operation of the University.

These actions are necessary for the University to pursue its mission, which is to educate, train and comprehensively prepare uniformed services health professionals, officers, scientists and leaders to support the Military and Public Health Systems, the National Security and National Defense Strategies of the United States, and the readiness of our Uniformed Services.

Agenda: The actions scheduled to occur include the review of the minutes from the Board meeting held on August 2, 2016; recommendations regarding the awarding of post-baccalaureate degrees; recommendations regarding the approval of the appointments and promotions; and recommendations regarding award nominations. The University President will provide a report on recent actions affecting academic and operational aspects of the University. Member Reports will include an Academics Summary consisting of reports from the Armed Forces Radiobiology Research Institute, University Faculty Senate, and the Henry M. Jackson Foundation for the Advancement of Military Medicine. Member Reports will also include a Finance and Administration Summary consisting of reports from the Senior Vice President, Southern Region; Vice President for Finance and Administration; Vice President for External Affairs; and the Office of Accreditation and Organizational Assessment. The Dean of the F. Edward Hébert School of Medicine, Dean of the Daniel K. Inouye Graduate School of Nursing, and Executive Dean of the Postgraduate Dental College will provide quarterly updates; a report will be provided on the College of Allied Health Sciences, and the meeting will conclude with an update on the USU School of Medicine Honor Code. A closed session will be held, after the open session, to discuss active investigations and personnel actions.

Meeting Accessibility: Pursuant to Federal statutes and regulations (5 U.S.C., Appendix, 5 U.S.C. 552b, and 41 CFR 102–3.140 through 102–3.165) and federal statutes and regulations (5 U.S.C., Appendix, 5 U.S.C. 552b, and 41 CFR 102–3.150), the meeting will be closed as necessary to protect against the disclosure of investigatory records compiled for law enforcement purposes. Pursuant to 5 U.S.C. 552(b)(2), 5–7, the Department of Defense has determined that the portion of the meeting from 10:45 a.m. to 11:30 a.m. shall be closed to the public. The Under Secretary of Defense (Personnel and Readiness), in consultation with the Office of the Defense General Counsel, has determined in writing that this portion of the committee’s meeting will be closed as the discussion will disclose sensitive personnel information, will include matters that relate solely to the internal personnel rules and practices of the agency, will involve allegations of a person having committed a crime or censuring an individual, and may disclose investigatory records compiled for law enforcement purposes.

Written Statements: Pursuant to section 106(c)(3) of the Federal Advisory Committee Act of 1972 and 41 CFR 102–3.140, the public or interested organizations may submit written comments to the Board about its approved agenda pertaining to this meeting or at any time regarding the Board’s mission. Individuals submitting a written statement must submit their statement to the Designated Federal Officer at the address listed in FOR FURTHER INFORMATION CONTACT. Written statements that do not pertain to a scheduled meeting of the Board may be submitted at any time. However, if individual comments pertain to a specific topic being discussed at the planned meeting, then these statements must be received at least 5 calendar days prior to the meeting, otherwise, the comments may not be provided to or considered by the Board until a later date. The Designated Federal Officer will compile all timely submissions with the Board’s Chair and ensure such submissions are provided to Board Members before the meeting.

Dated: September 27, 2016.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2016–23674 Filed 9–29–16; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[DOCKET ID: DOD–2016–OS–0047]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by October 31, 2016.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571–372–0493.

SUPPLEMENTARY INFORMATION: Title, Associated Form and OMB Number: Representations to Implement Appropriation Act Provisions on Felony Convictions and Unpaid Federal Tax Liabilities; OMB Control Number 0704–0494.

Type of Request: Extension. Number of Respondents: 2,500. Responses per Respondent: 6. Annual Responses: 15,000. Average Burden per Response: 5 minutes. Annual Burden Hours: 1,250 hours.

Needs and Uses: The information collection requirement is necessary to enable DoD awarding officials to

Federal Register / Vol. 81, No. 190 / Friday, September 30, 2016 / Notices 67333
exercise due diligence and continue to comply with provisions found in Sections 745 and 746 of the Financial Services and General Government Appropriations Act, 2016 (Division E of Pub. L. 114–113, the Consolidated Appropriations Act, 2016), as well as similar provisions that future years’ appropriations acts may include. The requirements of these provisions were originally enacted in three Fiscal Year (FY) 2012 appropriations acts that made funds available to DoD Components for obligation. The details of the provisions in the three FY 2012 acts varied somewhat but they generally required DoD to consider suspension or debarment before using appropriated funding to enter into a grant or cooperative agreement with a corporation if the awarding official was aware that the corporation had an unpaid federal tax liability or was convicted of a felony criminal violation within the preceding 24 months. The FY 2012 provisions were in:

- Sections 8124 and 8125 of the Department of Defense Appropriations Act, 2012 (Division A of Pub. L. 112–74, the Consolidated Appropriations Act, 2012);
- Section 514 of the Military Construction and Veterans Affairs and Related Agencies Appropriations Act, 2012 (Division H of Pub. L. 112–74); and
- Sections 504 and 505 of the Energy and Water Development Appropriations Act, 2012 (Division B of Pub. L. 112–74).

Generally, the requirements related to these provisions of the FY 2012 appropriations acts have been included in each subsequent fiscal year’s appropriations acts. Since FY 2015, the provisions related to felony convictions and unpaid federal tax liabilities have been enacted in the government-wide general provisions portion of the Financial Services and General Government Appropriations Act.

Affected Public: Not-For-Profit Institutions; Business or other for-profit.

Frequency: On occasion.

Respondent’s Obligation: Required to Obtain or Retain Benefits.

OMB Desk Officer: Ms. Jasmeet Seehra.

Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at Oira_submission@omb.eop.gov. Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

Instructions: All submissions received must include the agency name, Docket number and title for this Federal Register document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at http://www.regulations.gov as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari.

Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directive Division, 4800 Mark Center Drive, East Tower, Suite 03P09, Alexandria, VA 22350-3100.

Dated: September 27, 2016.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.
[FR Doc. 2016–23636 Filed 9–29–16; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Availability and Notice of Public Meetings for the Draft Supplemental Environmental Impact Statement for Land Acquisition and Airspace Establishment To Support Large-Scale Marine Air Ground Task Force Live-Fire and Maneuver Training at the Marine Corps Air Ground Combat Center, Twentynine Palms, California

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: Pursuant to section (102)(2)(c) of the National Environmental Policy Act (NEPA) of 1969, and regulations implemented by the Council on Environmental Quality (40 Code of Federal Regulations [CFR] Parts 1500–1508), Department of Navy (DoN) NEPA regulations (32 CFR part 775) and U.S. Marine Corps (USMC) NEPA directives (Marine Corps Order P5090.2A, changes 1–3), the DoN has prepared and filed with the U.S. Environmental Protection Agency (EPA) a Draft Supplemental Environmental Impact Statement (EIS) evaluating the potential environmental impacts that may result from implementing alternative desert tortoise translocation plans at the Marine Corps Air Ground Combat Center, Twentynine Palms (hereinafter “the Combat Center”). The Supplemental EIS is a supplement to the Final EIS for “Land Acquisition and Airspace Establishment to Support Large-Scale Marine Air Ground Task Force Live Fire and Maneuver Training” dated July 2012 (hereinafter “2012 Final EIS”) (77 FR 44234).

With the filing of the Draft Supplemental EIS, the DoN is initiating a 45-day public comment period and has scheduled three public open house meetings to receive oral and written comments on the Draft Supplemental EIS. Federal, state and local agencies and interested parties are encouraged to provide comments in person at any of the public open house meetings, or in writing anytime during the public comment period. This notice announces the dates and locations of the public meetings and provides supplementary information about the environmental planning effort.

DATES: The Draft Supplemental EIS public review period will begin September 30, 2016, and end on November 14, 2016. The USMC is holding three informational open house style public meetings to inform the public about the proposed action and the alternatives under consideration, and to provide an opportunity for the public to comment on the proposed action, alternatives, and the adequacy and accuracy of the Draft Supplemental EIS. USMC representatives will be on hand to discuss and answer questions on the proposed action, the NEPA process and the findings presented in the Draft Supplemental EIS. Public open house meetings will be held:

(1) Tuesday, October 25, 2016, 5:00 p.m. to 8:00 p.m., at the Joshua Tree Community Center, 6171 Sunburst Avenue, Joshua Tree, CA 92252.

(2) Wednesday, October 26, 2016, 5:00 p.m. to 8:00 p.m., at the Palm Springs Convention Center, 277 N. Avenida Caballeros, Palm Springs, CA 92262.

(3) Thursday, October 27, 2016, 5:00 p.m. to 8:00 p.m., at the Barstow Harvey House, 681 N. 1st Avenue, Barstow, CA 92311.

Attendees will be able to submit written comments at the public meetings. A stenographer will be present to transcribe oral comments. Equal weight will be given to oral and written statements. All statements, oral transcription and written, submitted during the public review period will become part of the public record on the Draft Supplemental EIS and will be responded to in the Final Supplemental EIS. Comments may also be submitted
by U.S. mail or electronically via the project Web site provided below.

**ADDRESSES:** A copy of the Draft Supplemental EIS is available at the project Web site, http://www.SEISforLA.com, and at the local libraries identified at the end of this notice. Comments on the Draft Supplemental EIS can be submitted via the project Web site or submitted in writing to: 29Palms SEIS Project Team, c/o Cardno Government Services, 3888 State Street, Ste. 201, Santa Barbara, CA 93105. All comments must be postmarked or received by November 14, 2016, to ensure they become part of the official record. All timely comments will be responded to in the Final Supplemental EIS.

**FOR FURTHER INFORMATION CONTACT:** The Resource Management Group at the Combat Center 760–830–3737.

**SUPPLEMENTARY INFORMATION:**

A Notice of Intent to prepare the Supplemental EIS was published in the Federal Register on August 24, 2016 (Vol. 81, No. 164, p. 57891–57893).

**Proposed Action**

Pursuant to 40 CFR 1502.9(c), the Draft Supplemental EIS evaluates new information relevant to environmental concerns associated with translocation of tortoises from specific training areas on newly acquired lands. Translocation was deemed necessary to mitigate the moderate to high levels of impact on the tortoise population from the Marine Expeditionary Brigade (MEB) training activities assessed in the 2012 Final EIS. A 2012 Biological Opinion (hereinafter “the 2012 BO”) issued by the United States Fish and Wildlife Service (USFWS) approved several conservation measures pertaining to the desert tortoise, including a 2011 General Translocation Plan (GTP). Since the 2012 Final EIS, and the subsequent Record of Decision (ROD) signed by the DON in February 2013 (hereinafter “the 2013 ROD”), the Marine Corps has conducted additional detailed studies and worked cooperatively with the USFWS, the California Department of Fish and Wildlife (CDFW), and the Bureau of Land Management (BLM) on alternative translocation plans for the desert tortoise, as required in the 2012 BO.

The proposed action for this Supplemental EIS includes four fundamental and interrelated components that are reflected in all alternatives:

1. **Recipient and Control Areas.** The 2011 BO identified criteria for selection of recipient areas that should be met for successful translocation to occur. These criteria are consistent with the goals, objectives, and recovery strategies of the 2011 USFWS revised recovery plan for the Mojave population of the desert tortoise and the 2010 USFWS plan development guidance for translocation of desert tortoises.

2. **Translocation Methods.** Translocation methods would include handling procedures, fencing, translocation, and clearance surveys. All tortoise handling would be accomplished by the techniques outlined in the Desert Tortoise Field Manual, including the most recent disease prevention techniques. Juvenile tortoises that are too small to wear transmitters would be moved to established juvenile pens at Tortoise Research and Captive Rearing Sites (TRACRS) or Special Use Areas where they may become part of the head start program (the Combat Center’s tortoise rearing program). Tortoise exclusion fencing would be installed along certain borders of newly designated Special Use Areas (areas that have not been identified as part of the large-scale training scenarios and that contain habitat supporting desert tortoises) on Combat Center land near maneuver or high use areas.

3. **Post-Translocation Monitoring.** Radio-telemetry tracking of all translocated tortoises is impractical; however, 20 percent of translocated tortoises, and a similar number of resident and control tortoises, would be tracked using radio-telemetry. Repeated readings of mark-recapture plots where tortoises have been translocated would be conducted to yield information on survival of translocated tortoises, population demography, repatriation, and health. Mark-recapture plots would be used to estimate the tortoise population size by capturing, marking, and releasing a portion of the population, then later capturing another portion and counting the number of marked individuals. Capture, marking, and releasing activities would not involve any ground disturbance. Four subject areas would be investigated by monitoring, each of which is described below:

4. **Other Research.** The Marine Corps, in consultation with USFWS, identified a research program to benefit recovery of the species. Research topics include translocation effectiveness, constrained dispersal (“repatriation” in the 2011 GTP), stocking densities, habitat, and disease.

Two main research topics that would be implemented are summarized below, both of which are anticipated to provide results that are topical and important for recovery.

a. **Experimental Translocation Densities.** The intent behind this research is to evaluate the capability of the habitat to sustain a certain density of tortoises.

b. **Constrained Dispersal:** Constrained dispersal (called “repatriation” in the 2011 GTP) is a technique wherein tortoises are translocated to a fenced site to encourage settling before the fence is removed.

**Purpose and Need**

The purpose of the proposed action evaluated in the Supplemental EIS is to study alternative translocation plans in support of the project that was described in the 2012 Final EIS, selected in the 2013 Record of Decision (ROD)(78 FR 11632), and authorized by the National Defense Authorization Act for Fiscal Year 2014. The 2011 GTP, developed during the section 7 Endangered Species Act (ESA) consultation on the 2012 Final EIS proposed action, identified proposed recipient areas, translocation methods,
and research treatments based on information available at the time of publication. Studies were planned over the following 3 years to provide information necessary to refine these areas, methods, and treatments. The 2011 GTP explicitly recognized that as a result of these studies, the Combat Center could refine these areas to specific sites and determine better recipient sites not considered in the 2011 GTP. The results of these efforts and further consultation with USFWS and CDFW, identified refinements to translocation methods, recipient sites, and research treatments that could better support the goals of the translocation effort (and became the basis for the action alternatives considered in this Supplemental EIS). The alternative selected in the ROD for the Supplemental EIS will be implemented prior to conducting sustained, combined-arms, live-fire, and maneuver field training for MEB-sized Marine Air Ground Task Forces (MAGTFs) contemplated in the 2012 Final EIS.

The Marine Corps needs to implement the proposed action to satisfy requirements identified in the 2012 Final EIS and associated 2012 BO. The 2012 BO concluded that the implementation of the Preferred Alternative from the 2012 Final EIS would likely result in the “take” of desert tortoises associated with military training, tortoise translocation efforts, and authorized and unauthorized Off-Highway Vehicle (OHV) use by recreationists displaced from former areas of the Johnson Valley OHV Area.

Alternatives Considered in the Draft Supplemental EIS

In light of the purpose and need for the proposed action, the DON has identified two potential action alternatives and a No-Action Alternative for the translocation of desert tortoise from training impact areas.

Each alternative includes recipient areas/sites (to which tortoises would be translocated) and control areas/sites (where the resident tortoise populations will be studied to provide comparative data on survival, threats to survival, habitat stability and changes, and health and disease relative to the translocated tortoise populations at the recipient sites). Each alternative also specifies the details of the proposed tortoise translocation, including specific handling procedures, fencing, clearance surveys, 30 years of post-translocation monitoring, and other research activities.

The Combat Center identified and applied screening criteria from the 2011 USFWS revised recovery plan for the Mojave population of the desert tortoise and the 2011 USFWS revised recovery plan development guidance for translocation of desert tortoises to evaluate and select the proposed recipient areas/sites under each alternative. These criteria relate to land use, habitat quality, population levels, disease prevalence, and distance from collection. The Combat Center also screened for research and monitoring feasibility.

Under the No-Action Alternative, the Marine Corps would conduct translocation of desert tortoises in accordance with the 2011 GTP described in the 2012 BO. Alternatives 1 and 2 primarily differ from the No-Action Alternative in the selection of proposed recipient and control areas and in the distribution of desert tortoises at each release site. Compared to the No-Action Alternative, Alternatives 1 and 2 would also include additional research studies and reflect updated information obtained from the 3-year program of surveys conducted since the 2012 Final EIS. Alternative 2 differs from Alternative 1 in that: (1) One less recipient site would be used; (2) the pairing of control sites to recipient sites would be different; (3) the Bullion control site would be located on the Combat Center instead of within the Cleghorn Lakes Wilderness Area; and (4) translocation densities would be different.

Environmental Effects Identified in the Draft Supplemental EIS

Potential impacts were evaluated in the Draft Supplemental EIS under all alternatives for the following resources: Biological resources, land use, air quality, and cultural resources. The Draft Supplemental EIS analysis evaluates direct, indirect, short-term and long-term impacts, as well as cumulative impacts from other relevant activities.

The Draft Supplemental EIS includes mitigation measures, including special conservation measures, and features of project design to avoid or minimize potential impacts. The proposed action would fully comply with regulatory requirements for the protection of environmental resources. A desert tortoise translocation plan has been submitted to the USFWS in compliance with Section 7 of the ESA. The USFWS will issue a revised BO that will be included with the Final Supplemental EIS. In addition, the USMC is coordinating with the California State Historic Preservation Office and affected Native American tribes under Section 106 of the National Historic Preservation Act, and with the Mojave Desert Air Quality Management District under the Clean Air Act.

The proposed action would result in unavoidable impacts related to biological resources (due to desert tortoise translocation as well as impacts to vegetation and desert tortoise habitat resulting from construction of fences and associated maintenance roads); land use (due to desert tortoise translocation); air quality (due to air emissions from construction activities); and potentially cultural resources (due to the fence and road construction; although the fences/roads would be routed to avoid cultural resource sites). Schedule: The Notice of Availability (NOA) and Notice of Public Meetings (NOMP) publication in the Federal Register and local print media starts the 45-day public comment period for the Draft Supplemental EIS. The DoN will consider and respond to all written, oral and electronic comments, submitted as described above, in the Final Supplemental EIS. The DoN intends to issue the Final Supplemental EIS in January 2017, at which time an NOA will be published in the Federal Register and local print media. A Record of Decision is expected to be published in February 2017.

Copies of the Draft Supplemental EIS can be found on the project Web site, http://www.SEISforLA.com or at the following locations:

1. Newton T. Bass Apple Valley Branch Library, 14901 Dale Evans Parkway, Apple Valley, CA 92307

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0106]

Agency Information Collection Activities; Comment Request;
Targeted Teacher Shortage Areas

AGENCY: Office of Postsecondary Education (OPE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 et seq.), ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before November 29, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use http://www.regulations.gov by searching the Docket ID number ED–2016–ICCD–0106. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at http://www.regulations.gov by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery.

Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Freddie Cross, 202–453–7224.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requests and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Targeted Teacher Shortage Areas.

OMB Control Number: 1840–0595.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 57.

Total Estimated Number of Annual Burden Hours: 4,275.

Abstract: This request is for approval of reporting requirements that are contained in the Federal Family Education Loan Program regulations which address the targeted teacher deferment provision of the Higher Education Act of 1965, as amended. The information collected is necessary for a state to support it’s annual request for designation of teacher shortage areas within the state. In previous years, the data collection was conducted by paper and pencil, mail-in method. Beginning with the 2017 collection, data collection will be conducted completely online thus reducing burden to the respondents.

Dated: September 27, 2016.

Kate Mullan,
Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

DEPARTMENT OF ENERGY

[OE Docket No. EA–429]

Application To Export Electric Energy; CWP Energy

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of application.

SUMMARY: CWP Energy (Applicant or CWP Energy) has applied for authority to transmit electric energy from the United States to Mexico pursuant to section 202(e) of the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before October 31, 2016.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity Delivery and Energy Reliability, Mail Code: OE–20, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585–0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to Electricity.Exports@hq.doe.gov, or by facsimile to 202–586–8008.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On September 14, 2016, DOE received an application from CWP Energy for authority to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities.

In its application, CWP Energy states that it does not own or control any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that CWP Energy proposes to export to Mexico would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by the Applicant have already been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to

DEPARTMENT OF ENERGY

67337
become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning CWP Energy’s application to export electric energy to Mexico should be clearly marked with OE Docket No. EA–429. An additional copy is to be provided to both Ruta Kalvaitis Skucˇas, Pierce Atwood LLC, 1875 K St. NW., Suite 700, Washington, DC 20006 and Pascal Massey, CWP Energy, 407 McGill Street, Suite 315, Montreal, PQ, H2Y 2G3.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE’s National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system. Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at http://energy.gov/node/11845, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Issued in Washington, DC, on September 27, 2016.

Christopher Lawrence,
Electricity Policy Analyst, Office of Electricity Delivery and Energy Reliability.

DEPARTMENT OF ENERGY

Environmental Impact Statement for the Recapitalization of Infrastructure Supporting Naval Spent Nuclear Fuel Handling at the Idaho National Laboratory

AGENCY: Department of Energy.

ACTION: Notice of availability.

SUMMARY: The U.S. Department of Energy (DOE) Naval Nuclear Propulsion Program (NNPP) announces the availability of the Final Environmental Impact Statement for the Recapitalization of Infrastructure Supporting Naval Spent Nuclear Fuel Handling at the Idaho National Laboratory (DOE/EIS–0453–F). The Final EIS evaluates the potential environmental impacts associated with recapitalizing the infrastructure needed to ensure the long-term capability of the NNPP to support naval spent nuclear fuel handling until at least 2060.

DATES: The NNPP will publish a Record of Decision no sooner than 30 days after publication of the U.S. Environmental Protection Agency’s (EPA) Notice of availability in the Federal Register.

ADDRESSES: Copies of the Final EIS are available in public reading rooms and libraries as indicated in the SUPPLEMENTARY INFORMATION portion of this notice. The Final EIS is also available for review at www.ecfrecapitalization.us and on the DOE’s NEPA Web site at http://energy.gov/nea.

FOR FURTHER INFORMATION CONTACT: For further information about this Final EIS, contact: Erik Anderson, Naval Sea Systems Command, 1240 Isaac Hull Avenue SE., Stop 8036, Washington Navy Yard, DC 20376–8036.

For information regarding the DOE NEPA process, please contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance (GC–54), U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, Telephone (202) 586–4600, or leave a message at (800) 472–2756.

SUPPLEMENTARY INFORMATION: The NNPP prepared this Final EIS in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 et seq.), the Council on Environmental Quality (CEQ) regulations for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), and the DOE NEPA implementing procedures (10 CFR 1021). This Final EIS addresses all public comments on the Draft EIS which was issued on June 19, 2015 (80 FR 35331). The NNPP is committed to managing naval spent nuclear fuel in a manner that is consistent with the Department of Energy (DOE) Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final Environmental Impact Statement (DOE/EIS–0203–F), and to complying with the Settlement Agreement, as amended in 2008, among the State of Idaho, the DOE, and the Navy concerning the management of naval spent nuclear fuel. Consistent with the Record of Decision for DOE/EIS–0203–F, naval spent nuclear fuel is shipped by rail from shipyards and prototype facilities to the Idaho National Laboratory (INL) for processing. To allow the NNPP to continue to unload, transfer, and package naval spent nuclear fuel for disposal, three alternatives are evaluated in the Final EIS: No Action Alternative, Overhaul Alternative, and New Facility Alternative. The preferred alternative to recapitalize the infrastructure supporting naval spent nuclear fuel handling is to build a new facility (New Facility Alternative).

Background

The mission of the NNPP, also known as the Naval Reactors Program, is to provide the U.S. with safe, effective, and affordable naval nuclear propulsion plants and to ensure their continued safe and reliable operation through lifetime support, research and development, design, construction, specification, certification, testing, maintenance, and disposal. A crucial component of this mission, naval spent nuclear fuel handling, occurs at the end of a nuclear propulsion system’s useful life or when naval nuclear fuel has been depleted. The NNPP is responsible for removal of the naval spent nuclear fuel through a defueling or refueling operation. Both operations remove the naval spent nuclear fuel from the reactor, but a defueling operation also involves installing new fuel, allowing the nuclear-powered ship to be redeployed into the U.S. Navy fleet. Once the naval spent nuclear fuel has been removed from an aircraft carrier, submarine, or prototype, it is sent to the Naval Reactors Facility (NRF) for examination and further naval spent nuclear fuel handling including transferring, preparing, and packaging for transfer to an interim storage facility or geologic repository.

The NNPP ensures that naval spent nuclear fuel handling is performed in a safe and environmentally responsible manner in accordance with 50 U.S.C. 2406 and 2511 (codifying Executive Order 12344). Nuclear fuel handling is an intricate and intensive process requiring a complex infrastructure.

Proposed Action

NNPP is proposing to recapitalize the current naval spent nuclear fuel handling capabilities provided by the Expended Core Facility (ECF) located at the NRF on the INL. The purpose of the proposed action is to provide the infrastructure necessary to support the naval nuclear reactor defueling and refueling schedules required to meet the operational needs of the U.S. Navy. The proposed action is needed because significant upgrades are necessary to ECF infrastructure and water pools to continue safe and environmentally responsible naval spent nuclear fuel handling until at least 2060. The transfer, preparation, and packaging of naval spent nuclear fuel
are vital to the NNPP’s mission of maintaining the reliable operation of the naval nuclear fleet and developing effective nuclear propulsion plants. Although ECF continues to be operated in a safe and environmentally responsible manner, the ECF infrastructure and equipment necessary to accomplish the work of naval spent nuclear fuel handling need significant upgrades to continue safe and environmentally responsible naval spent nuclear fuel handling until at least 2060. Efforts are ongoing to sustain this infrastructure, preserve these essential capabilities, and ensure that the high NNPP standards for protecting the environment continue to be met. However, major portions of this infrastructure have been in service for over 50 years.

Alternatives

Consistent with the Record of Decision for DOE/EIS–0203–F, naval spent nuclear fuel would continue to be shipped by rail from shipyards and prototypes to NRF for processing. To allow the NNPP to continue to unload, transfer, prepare, and package naval spent nuclear fuel for disposal, three alternatives were identified and analyzed in this Final EIS.

1. No Action Alternative

The No Action Alternative involves maintaining ECF without a change to the present course of action or management of the facility. The current naval spent nuclear fuel handling infrastructure would continue to be used while the NNPP performs only preventative and corrective maintenance. The No Action Alternative does not meet the purpose for the proposed action because it would not provide the infrastructure necessary to support the naval nuclear reactor defueling and refueling schedules required to meet the operational needs of the U.S. Navy. The No Action Alternative does not meet the NNPP’s need because significant upgrades are necessary to the ECF infrastructure to continue safe and environmentally responsible naval spent nuclear fuel handling until at least 2060. As currently configured, the ECF infrastructure cannot support use of the new M–290 shipping containers. Significant changes in configuration of the facility and spent fuel handling processing locations in the water pool would be required to support unloading fuel from the new M–290 shipping containers. In addition, over the next 45 years, preventative and corrective maintenance without significant upgrades and refurbishments may not be sufficient to sustain the proper functioning of ECF infrastructure and equipment. Upgrades and refurbishments needed to support use of the new M–290 shipping containers and continue safe and environmentally responsible operations would not meet the definition of the No Action Alternative; therefore, these actions are represented by the Overhaul Alternative.

The implementation of the No Action Alternative (i.e., failure to perform upgrades and refurbishments), in combination with the NNPP’s commitment to only operate in a safe and environmentally responsible manner, may result in ECF eventually being unavailable for handling naval spent nuclear fuel. If the NNPP naval spent nuclear fuel handling infrastructure were to become unavailable, the inability to transfer, prepare, and package naval spent nuclear fuel could immediately and profoundly impact the NNPP’s mission and national security needs to refuel and defuel nuclear-powered submarines and aircraft carriers. In addition, the U.S. Navy could not ensure its ability to meet the requirements of the Settlement Agreement and its 2008 Addendum.

Since the No Action Alternative does not meet the purpose and need for the proposed action, it is considered to be an unreasonable alternative; however, the No Action Alternative is included in the Final EIS as required by CEQ regulations.

2. Overhaul Alternative

The Overhaul Alternative involves continuing to use the aging infrastructure at ECF, while incurring increasing costs to provide the required refurbishments and work-around actions necessary to ensure uninterrupted aircraft carrier and submarine refuelings and defuelings. Under the Overhaul Alternative, the NNPP would operate ECF in a safe and environmentally responsible manner by continuing to maintain ECF while implementing major refurbishment projects for the ECF infrastructure and water pools. This would entail:

- Short-term actions necessary to keep the infrastructure and equipment in safe working order, including regular upkeep sufficient to sustain their proper functioning (e.g., the ongoing work currently performed in ECF to inspect and repair deteriorating water pool concrete coatings).
- Facility, process, and equipment reconfigurations needed for specific capabilities required in the future. These actions involve installation of new equipment and processes, and relocation of existing equipment and processes, within the current facility to provide a new capability (e.g., modification of ECF and reconfiguration of the water pool as necessary to handle M–290 shipping containers).

- Major refurbishment actions necessary to sustain the life of the infrastructure (e.g., to the extent practicable, overhaul the water pools to bring them up to current design and construction standards).

Refurbishment activities would take place in parallel with ECF operations for the majority of the Overhaul Alternative time period. The first 33 years of the 45 years (i.e., the refurbishment period) would include refurbishment and operations activities being conducted in parallel. During certain refurbishment phases, operations could be limited due to the nature of the refurbishment activities (e.g., operations would not continue in water pools that are under repair). There would then be a 12-year period where only operational activities would take place in ECF (i.e., the post-refurbishment operational period).

Failure to implement this overhaul in advance of infrastructure deterioration would impact the ability of ECF to operate for several years. Further, overhaul actions would necessitate operational interruptions for extended periods of time.

3. New Facility Alternative

A New Facility Alternative would acquire capital assets to recapitalize naval spent nuclear fuel handling capabilities. While a new facility requires new process and infrastructure assets, the design could leverage use of the newer, existing ECF support facilities and would leverage use of newer equipment designs. The facility would be designed with the flexibility to integrate future identified mission needs.

Under the current budget and funding levels for the New Facility Alternative, it is anticipated that construction activities would occur over approximately a 5-year period.

Construction of the New Facility Alternative would occur in parallel with ECF operations. An approximately 2-year period would follow the construction of the New Facility Alternative when new equipment would be installed and tested, and training would be provided to qualify the operations workforce.

A new facility would include all current naval spent nuclear fuel handling operations conducted at ECF. In addition, it would include the capability to unload naval spent nuclear fuel from M–290 shipping containers in
the water pool and handle aircraft carrier naval spent nuclear fuel assemblies without prior disassembly for preparation and packaging for disposal. Such capability does not currently exist within the ECF water pools, mainly due to insufficient available footprint in areas of the water pool with the required depth of water.

The NNPP will continue to operate ECF during new facility construction, during a transition period, and after the new facility is operational for examination work. To keep the ECF infrastructure in a safe working order during these time periods, some limited upgrades and refurbishments may be necessary. Details are not currently available regarding which specific actions will be taken; therefore, they are not explicitly analyzed as part of the New Facility Alternative. The environmental impacts from these upgrades and refurbishments are considered to be bounded by the environmental impacts described in the Refurbishment Period of the Overhaul Alternative.

Changes From Draft EIS

The Draft EIS was published by the NNPP in June 2015. The NNPP has considered all public comments received in preparing this Final EIS, which includes the NNPP’s responses to those comments. The Final EIS highlights changes that were made to address these comments as well as changes that have resulted from additional design and planning for the New Facility Alternative. Changes to the design and planning for the New Facility Alternative include changes to the seismic design strategy, water management strategy, and analysis of potential air emissions related to operation of concrete batch plants.

Public Reading Rooms and Libraries

The Final EIS is available for review at the following reading rooms:

- Idaho Falls Public Library, 457 W. Broadway, Idaho Falls, ID 83402, Telephone: (208) 612–8460
- Shoshone-Bannock Library, Bannock and Pima Streets, P.O. Box 306, Fort Hall, ID 83203, Telephone: (208) 238–3882

BILLING CODE 4450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4093–035]

McMahan Hydroelectric, L.L.C.; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Original license.

c. Date filed: March 30, 2015.

d. Applicant: McMahan Hydroelectric, L.L.C.

e. Name of Project: Bynum Hydroelectric Project.

f. Location: On the Haw River, near the Town of Pittsboro and the Town of Chapel Hill, North Carolina, in Chatham County, North Carolina. The project does not occupy federal lands.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791 (a)–825(r).

h. Applicant Contact: Mr. Andrew J. McMahan, President, McMahan Hydroelectric, L.L.C., 105 Durham Euahs Road, Pittsboro, NC 27312; (336) 509–2148; email—mcmahannhydro@gmail.com.

i. FERC Contact: Sean Murphy at (202) 502–6145; or email at sean.murphy@ferc.gov, or Dustin Wilson at (202) 502–6528; or email at dustin.wilson@ferc.gov.

j. Deadline for filing comments, motions to intervene and protests: 60 days from the issuance date of this notice.

The Commission strongly encourages electronic filing. Please file motions to intervene and protests using the Commission’s eFiling system at http://www.ferc.gov/docs-filing/efiling.asp. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at http://www.ferc.gov/docs-filing/ecomment.asp. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERConlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The first page of any filing should include docket number P–4093–035.

The Commission’s Rules of Practice and Procedures require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing, but is not ready for environmental analysis at this time. When the application is ready for environmental analysis, the Commission will issue a public notice requesting comments, recommendations, terms and conditions, or prescriptions.

l. The existing Bynum Project includes: (1) A 20-acre reservoir (referred to as Odell Lake) at elevation 315.0 feet mean sea level, with 100 acre-feet of gross storage and no net storage; (2) a 900-foot-long, 10-foot-high stone masonry dam (Bynum Dam, or Odell Lake Dam), consisting of a 750-foot-long uncontrolled spillway section and a 150-foot-long non-overflow section that contains canal intake facilities; (3) two hydraulically controlled 6-foot-wide Tainter gates that allow water to flow into an intake canal; (4) a 2,000-foot-long power canal varying in width from 25 to 40 feet that (a) extends from Bynum Dam to the powerhouse, and (b) includes a drainage gate located immediately upstream of the powerhouse; (5) a powerhouse with (a) an intake protected by a trashrack having a bar spacing of 2.75 inches, and (b) a single turbine/generator unit; (6) a 500-foot-long tailrace varying in width from 40 to 50 feet; (7) a 2,500-foot-long bypassed reach; (8) an interconnection within the transmission system at a nearby substation; and (9) appurtenant facilities.
Take notice that on September 15, 2016, WBI Energy Transmission, Inc. (WBI Energy), 1250 West Century Avenue, Bismarck, North Dakota 58503, filed in Docket No. CP16–500–000 a prior notice request pursuant to sections 157.205 and 157.216(b) of the Commission’s regulations under the Natural Gas Act (NGA), requesting authorization to abandon by sale approximately 2,370 feet of the Walhalla 3-inch mainline and the Walhalla Town Border Station in Pembina County, North Dakota, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at http://www.ferc.gov using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the environmental documents issued by the Commission staff. The filing will not receive copies of all documents associated with the Commission’s environmental review process. Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter’s will be placed on the Commission’s environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission’s environmental review process.

Any questions concerning this application may be directed to Lori Myerchin, Manager, Regulatory Affairs, WBI Energy Transmission, Inc., 1250 West Century Avenue, Bismarck, North Dakota 58503, by telephone at (701) 530–1563 or by email at lori.myerchin@wbienergy.com. Any person or the Commission’s staff may, within 60 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission’s Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to section 157.205 of the regulations under the NGA (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the allowed time for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission’s rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission’s public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff’s issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission’s public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff’s FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter’s will be placed on the Commission’s environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission’s environmental review process.

Environmental commenter’s will not be required to serve copies of filed documents on all other parties. However, the non-party commentary, will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission’s final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission’s Web site (www.ferc.gov) under the “e-Filing” link. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717–01–P
DEPARTMENT OF ENERGY
Federal Energy Regulatory Commission

[Docket No. ID–8011–000]

Wheeler, Brent E.; Notice of Filing

Take notice that on September 22, 2016, Brent E. Wheeler filed an application for authorization to hold interlocking positions, pursuant to section 305(b) of the Federal Power Act, 16 U.S.C. 825d(b), Part 45 of the Regulations of the Federal Energy Regulatory Commission (Commission), 18 CFR part 45, and Order 664.1

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the “eFiling” link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the “eLibrary” link and is available for electronic review in the Commission’s Public Reference Room in Washington, DC. There is an “esubscription” link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlinesupport@ferc.gov, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on October 13, 2016.

Background

On April 11, 2016, the Commission issued a Notice of Intent to Prepare an Environmental Assessment for the Planned Northern Lights 2017 Expansion Project and Request for Comments on Environmental Issues (NOI). The NOI was issued during the pre-filing review of the Project in Docket No. PF15–33–000 and was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comments from the Minnesota Department of Natural Resources (MN DNR) and the U.S. Environmental Protection Agency (EPA). The primary issue raised by the MN DNR was a request to describe potential impacts to the Rum River and any associated mitigation measures. The primary issues raised by the EPA were requests to address a range of specific environmental issues of concern in pipeline construction.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the Project is available from the Commission’s Office of External Affairs at (866) 208–FERC or on the FERC Web site (www.ferc.gov). Using the “eLibrary” link, select “General Search” from the eLibrary menu, enter the selected date range and “Docket Number” excluding the last three digits (i.e., CP16–472), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at FERCOnlinesupport@ferc.gov. The eLibrary link on the FERC Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: September 26, 2016.

Kimberly D. Bose, Secretary.

DEPARTMENT OF ENERGY
Federal Energy Regulatory Commission

[Docket Nos. CP16–472–000; PF15–33–000]

Northern Natural Gas Company; Notice of Schedule for Environmental Review of the Northern Lights 2017 Expansion Project

On June 25, 2016, Northern Natural Gas Company (Northern) filed an application in Docket No. CP16–472–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Northern Lights 2017 Expansion Project (Project), and would expand the capacity of Northern’s market area facilities in Minnesota.

On July 8, 2016, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff’s Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff’s planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—November 9, 2016

90-day Federal Authorization Decision Deadline—February 7, 2017

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project’s progress.

Project Description

The proposed Project includes 2 miles of 8-inch-diameter pipeline loop in Sherburne County, Minnesota; 2.8 miles of 12-inch-diameter pipeline loop in Isanti County, Minnesota; as well as an additional 15,900-horsepower compression unit at Northern’s existing Faribault Compressor Station in Rice County, Minnesota. The Project would allow Northern to transport an incremental load of approximately 76,000 dekatherms per day.

Kimberly D. Bose, Secretary.

FR Doc. 2016–23679 Filed 9–29–16; 8:45 am

BILLING CODE 6717–01–P
DEPARTMENT OF ENERGY
Federal Energy Regulatory
Commission
[Docket No. IC16–11–000]

Commission Information Collection
Activities (FERC Form Nos. 1, 1–F, and
3–Q); Comment Request

AGENCY: Federal Energy Regulatory
Commission.

ACTION: Comment request.

SUMMARY: The Commission previously
issued a 60-day Notice in the Federal
Register (81 FR 38169, 6/13/2016)
requesting public comments on FERC
Form Nos. 6, 580, 1, 1–F, and 3–Q. The
Commission received no comments
regarding FERC Form Nos. 6 and 580
and issued a separate 30-day Notice on
those collections (81 FR 62112, 9/8/2016).

The Commission did receive comments
(responding to the 60-day Notice) regarding FERC Form Nos. 1, 1–F, and 3–Q. This Notice addresses
those comments and solicits additional
comments on FERC Form Nos. 1, 1–F,
and 3–Q.

In compliance with the requirements
of the Paperwork Reduction Act of 1995,
44 U.S.C. 3507(a)(1)(D), the Federal
Energy Regulatory Commission
(Commission or FERC) is submitting the
FERC Form No. 1 (Annual Report of
Major Electric Utilities, Licensees, and
Others), FERC Form No. 1–F (Annual
Report for Nonmajor Public Utilities and
Licensees), and FERC Form No. 3–Q
(Quarterly Financial Report of Electric
Utilities, Licensees, and Natural Gas
Companies) to the Office of
Management and Budget (OMB) for
review of the information collection
requirements. Any interested person
may file comments directly with OMB
and should address a copy of those
comments to the Commission as
explained below.

DATES: Comments on the FERC Form
Nos. 1, 1–F, and 3–Q are due by October
31, 2016.

ADDRESSES: Comments filed with OMB,
identified by the OMB Control Nos.
1902–0021 (FERC Form No. 1), 1902–
0029 (FERC Form No. 1–F), and 1902–
0205 (FERC Form No. 3–Q) should be
sent via email to the Office of
Information and Regulatory Affairsoira_submission@omb.gov, Attention:
Federal Energy Regulatory Commission
Desk Officer. A copy of the comments
should also be sent to the Commission, in Docket
No. IC16–11–000, by either of the
following methods:

- eFiling at Commission’s Web site:
  http://www.ferc.gov/docs-filing/
efiling.asp
- Mail/Hand Delivery/Courier:
  Federal Energy Regulatory Commission,
  Secretary of the Commission, 888 First
  Street NE., Washington, DC 20426.

Instructions: All submissions must be
formatted and filed in accordance with
submission guidelines at: http://
For user assistance, contact FERC
Online Support by email at
ferconlinesupport@ferc.gov, or by phone
at: (866) 208–3676 (toll-free), or (202)
502–8659 for TTY.

Docket: Users interested in receiving
automatic notification of activity in this
docket or in viewing/downloading
comments and issuances in this docket
may do so at http://www.ferc.gov/docs-
filining/docs-filing.asp.

FOR FURTHER INFORMATION CONTACT:
Ellen Brown may be reached by email
DataClearance@FERC.gov, by
telephone at (202) 502–8663, and by fax
at (202) 273–0873.

SUPPLEMENTARY INFORMATION:
Type of Request: Three-year extension of
the information collection
requirements for FERC Form Nos. 1,
1–F, and 3–Q, with no changes to the
current reporting requirements. Please
note that each collection is distinct from
the next.

Comments: Comments are invited on:
(1) Whether the collections of
information are necessary for the proper
performance of the functions of the
Commission, including whether the
information will have practical utility;
(2) the accuracy of the agency’s
estimates of the burden and cost of the
collections of information, including the
validity of the methodology and
assumptions used; (3) ways to enhance
the quality, utility and clarity of the
information collections; and (4) ways to
minimize the burden of the collections
of information on those who are to
respond, including the use of automated
collection techniques or other forms of
information technology.

FERC Form No. 1, Annual Report of
Major Electric Utilities, Licensees, and
Others

OMB Control No.: 1902–0021.

Abstract: The FERC Form No. 1 (Form
No. 1) is a comprehensive financial and
operating report submitted annually for
electric rate regulation, market oversight
analysis, and financial audits by Major
electric utilities, licensees and others.
Major pertains to utilities and licensees
having in each of the three previous
calendar years, sales or transmission
services that exceed one of the
following: (1) One million megawatt
hours of total annual sales; (2) 100
megawatt hours of annual sales for
resale; (3) 500 megawatt hours of annual
power exchanges delivered; or (4) 500
megawatt hours of annual wheeling for
others (deliveries plus losses).1

The Form No. 1 is designed to collect
financial and operational information
and is considered to be a non-
confidential public use form. The Form
No. 1 includes a basic set of financial
statements: Comparative Balance Sheet,
Statement of Income, Statement of
Retained Earnings, Statement of Cash
Flows, Statements of Accumulated
Comprehensive Income, Comprehensive
Income, and Hedging Activities; and
Notes to Financial Statements.

Supporting schedules contain
supplementary information and outlines
of corporate structure and governance;
information on formula rates; and
description of important changes during
the year. Other schedules provide
information on revenues and the related
quantities of electric sales and
electricity transmitted; account balances
for all electric operation and
maintenance expenses; selected plant
cost data; and other statistical
information.

Type of Respondent: Major electric
utilities.

Comments: In response to the 60-day
Notice, the Commission received
comments from The Bureau of
Economic Analysis (BEA) collectively
on Forms 1 and 1–F.2 A summary of the
comments and the Commission’s
responses follow.

The Bureau of Economic Analysis
(BEA) submitted comments on 7/28/
2016 on Forms 1 and 1–F.3

BEA Comments: BEA uses data from
Forms 1 and 1–F in estimating the
national income and product account
(NIPA) structures investment estimate.
BEA states: “While BEA uses this
information indirectly through the [U.S.
Census Bureau’s Construction Value
Put-In Place] program, it is considered
an indispensable data source to the
NIPA estimates.”4 BEA would like to
explore receiving data directly from the
Commission with aggregated industry

1 As detailed in 18 CFR 101 (Uniform System of
Accounts Prescribed for Public Utilities and
Licensees Subject to the Provision of the Federal
Power Act, General Instructions) and 18 CFR 141.1.
Nonoperating entities formerly designated as Major
and new entities that expect to be in the Major
category should file as detailed in 18 CFR 101.

2 The submittals are posted at http://
elibrary.ferc.gov/idms/common/
opennat.asp?fileID=14318233 and http://
elibrary.ferc.gov/idms/common/
opennat.asp?fileID=14318200.

3 Id.

4 Id.
totals of particular line items from Forms 1 and 1–F. BEA also suggests that the Commission expand the Form 1 and 1–F collection to include additional information regarding details on capital expenditures.

FERC Response: BEA may access Form 1 and 1–F data directly: (1) Using the Form 1 viewer and historical data that is accessible via the Commission’s Web site at www.ferc.gov/docs-filing/forms.asp; or (2) by searching for individual filings in eLibrary at http://www.ferc.gov/docs-filing/elibrary.asp. The Commission is not presently considering modifications to collect additional information on the Forms 1 and 1–F. Separately, the Commission is looking at modernizing data collection in Docket No. AD15–11, but that is an activity not addressed here.

Estimate of Annual Burden: The estimated annual burden and cost follow:

![Table](image)

The instructions to the Form 1 will be updated to reflect the current burden estimate and email addresses for FERC and OMB.

FERC Form No. 1–F, Annual Report for Nonmajor Public Utilities and Licensees

OMB Control No.: 1902–0029.

Abstract: The FERC Form No. 1–F (Form No. 1–F) is a financial and operating report submitted annually for electric rate regulation, market oversight analysis, and financial audits by Nonmajor electric utilities and licensees. Nonmajor pertains to utilities and licensees having total annual sales of 10,000 megawatt-hours or more in the previous calendar year and not classified as Major.8

The Form No. 1–F is designed to collect financial and operational information and is considered to be a non-confidential public use form. The Form No. 1–F includes a basic set of financial statements: Comparative Balance Sheet, Statement of Retained Earnings, Statement of Cash Flows, Statement of Comprehensive Income and Hedging Activities, and Notes to Financial Statements. Supporting schedules contain supplementary information and include revenues and the related quantities of electric sales and electricity transmitted; account balances for all electric operation and maintenance expenses; selected plant cost data; and other statistical information.

The instructions to the Form 1–F will be updated to reflect the current burden estimate and email addresses for FERC and OMB.

FERC Form No. 3–Q, Quarterly Financial Report of Electric Utilities, Licensees, and Natural Gas Companies

OMB Control No.: 1902–0205.

Abstract: The FERC Form No. 3–Q (Form No. 3–Q) is a quarterly financial and operating report for rate regulation, market oversight analysis, and financial audits which supplements the (a) Form 1–F, below. These changes were inadvertently omitted from the 60-day Notice in Docket No. IC16–11. The cost estimate [wages plus benefits] is $78.66/hour and is used for the Form Nos. 1, 1–F, and 3–Q. The $78.66/hour [wages plus benefits] is based on figures from the Bureau of Labor Statistics National Industry—Specific Occupational and Employment Wage Estimates (May 2015 estimates at http://www.bls.gov/oes/current/naics2_22.htm, and benefits information for December 2015 at http://www.bls.gov/news.release/ecenc.nsh.htm) and is an average of the following: (a) Management (code 11–0000) of $88.94/hour; (b) business and financial operations occupations (code 13–0000) of $56.86/hour; (c) legal (code 23–0000) of $128.94/hour; and (d) office and administrative support (code 43–0000) of $39.91/hour.

8 As detailed in 18 CFR 101 (Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject to the Provision of the Federal Power Act, General Instructions) and 18 CFR 141.2. Nonoperating entities formerly designated as Nonmajor and new entities that expect to be in the Nonmajor category should file as detailed in 18 CFR 101.
Nos. 1 and 1–F for the electric industry, or the (b) Form No. 2 (Major Natural Gas Pipeline Annual Report; OMB Control No. 1902–0028) and Form No. 2–A (Nonmajor Natural Gas Pipeline Annual Report; OMB Control No. 1902–0030) (for the natural gas industry). The Form No. 3–Q is submitted for all Major and Nonmajor electric utilities and natural gas companies.9

Form No. 3–Q includes a basic set of financial statements: Comparative Balance Sheet, Statement of Income and Statement of Retained Earnings, Statement of Cash Flows, Statement of Comprehensive Income and Hedging Activities and supporting schedules containing supplementary information. Electric respondents report revenues and the related quantities of electric sales and electricity transmitted; account balances for all electric operation and maintenance expenses; selected plant cost data; and other statistical information. Natural gas respondents include monthly and quarterly quantities of gas transported and associated revenues; storage, terminating and processing services; natural gas customer accounts and details of service; and operational expenses, depreciation, depletion and amortization of gas plant.

**Type of Respondent:** Major and Nonmajor electric utilities and natural gas pipelines.

**Comments:** In response to the 60-day Notice, the Commission received comments from two parties on Form 3–Q. A summary of the comments and the Commission’s responses follow.

- **BEA submitted comments on 7/28/2016 on Form 3–Q.10**
  - **BEA Comments:** BEA relies heavily on data from Forms 3–Q to calculate components of both the industry and national economic accounts to estimate gross output, intermediate inputs and value added to the U.S. economy from the utilities industry. Similar to BEA’s comments on Forms 1 and 1–F, BEA is interested in the inclusion of additional information in Form 3–Q regarding details related to capital expenditures. BEA suggests expansions to the Form 3–Q such as adding “new versus replacement capital expenditures for certain line items”; including “annual payments for equipment, software, and structures leased under operating leases from others”; and improving “questions to help identify plants producing services in the current period (in service) versus plant not in service or offline”.

**FERC Response:** The Commission is not presently considering modifications to collect additional information on the Form 3–Q but as noted above is looking at modernizing data collection, which is a separate activity not addressed here.

- **EEI submitted comments on 8/12/2016 on the Form 3–Q.11**
  - **EEI Comments:** In its comments, EEI proposes eliminating the Form 3–Q or reducing its frequency. EEI claims that the Commission’s Form 3–Q has little to no value to the Commission’s objective to achieve vigilant oversight of reporting entities. EEI states that it is unclear exactly how and to what extent the Commission uses the quarterly data and that no EEI member has ever been contacted about a Form 3–Q filing. EEI poses that Form 3–Q does not lend itself to identification of emerging trends or the economic effects of significant transactions and events and that Form 3–Q has no bearing on formula rate determination. As such EEI recommends that the Commission eliminate Form 3–Q or alternately adopt a mid-year frequency.

Regarding the accuracy of the Commission’s burden and cost estimates, EEI comments that the Commission’s estimates are reasonable, but that EEI does not believe the burden and costs are warranted.

**FERC Response:** The Commission currently uses the Form 3–Q report to perform oversight analysis and make timely evaluations of current financial information submitted to the Commission. Additionally, Form 3–Q is used to validate the debt and equity information of filings under Part 34 of the Commission’s regulations when the most recent 12-month filing occurred more than 4 months prior to the application under Part 34. The Commission is not presently considering modifications to the collection or frequency of collection of the Form 3–Q, but may consider doing so in the future, at which time EEI will be able to submit comments on this issue.

**Estimate of Annual Burden:** The estimated annual burden and cost (as rounded) follow. (The estimated hourly cost used for the Form No. 3–Q is $78.66 (wages plus benefits) and is described above, under the Form No. 1.)

[FR Doc. 2016–23681 Filed 9–29–16; 8:45 am]**

**BILLING CODE 6717–01–P**

---

9 18 CFR 260.1(f) states that for natural gas companies, Major, as defined by the Natural Gas Act, pertains to a company whose combined gas transported or stored for a fee exceed 50 million Dth in each of the three previous calendar years. 18 CFR 260.2(b) states that for natural gas companies, Nonmajor as defined by the Natural Gas Act, pertains to a company not meeting the filing threshold for Major, but having total gas sales or volume transported exceeding 200,000 Dth in each of the three previous calendar years.

11 The estimated number of electric filers of the Form No. 3–Q is 213 (rather than the 215 total for the number of filers of the Form Nos. 1 and 1–F) due to waivers granted by the Commission in Docket No. AC04–105.
Compressor Station in Atchison County, Kansas. Southern Star notes that is Atchison Compressor will continue to operate using Unit 5. Southern Star asserts that these units are not needed operationally or to provide firm service, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at http://www.ferc.gov using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOntlineSupport@ferc.gov or toll free at (866) 208–3676, or TTY, contact (202) 502–8659.

Any questions concerning this application may be directed to Ronnie C. Hensley II, Regulatory Compliance, Manager, Southern Star Central Gas Pipeline, Inc., 4700 State Highway 56, Owensboro, Kentucky 42301, by telephone at (270) 852–4658.

Any person or the Commission’s staff may, within 60 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission’s Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to section 157.205 of the regulations under the NGA (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the allowed time for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission’s rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission’s public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestonens, the anticipated date for the Commission staff’s issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission’s public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff’s FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter’s will be placed on the Commission’s environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission’s environmental review process. Environmental commenter’s will not be required to serve copies of filed documents on all other parties.

However, the non-party commenter, will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission’s final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the “eFiling” link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Kimberly D. Bose, Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16–456–000]

Southern Star Central Gas Pipeline, Inc.; Notice of Schedule for Environmental Review of the Shidler Line Abandonment Project

On May 6, 2016, Southern Star Central Gas Pipeline, Inc. (Southern Star) filed an application in Docket No. CP16–456–000 requesting authorization pursuant to Section 7(b) of the Natural Gas Act to abandon certain natural gas pipeline facilities. The proposed project is known as the Shidler Line Abandonment Project (Project), and would abandon about 31.2 miles of 16-inch-diameter natural gas pipeline and associated aboveground facilities in Osage County, Oklahoma.

On May 19, 2016, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff’s Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff’s planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—October 28, 2016

90-day Federal Authorization Decision Deadline—January 26, 2017

If a schedule change becomes necessary, an additional notice will be provided so that the relevant agencies are kept informed of the Project’s progress.

Project Description

Southern Star proposes to abandon about 31.2 miles of 16-inch-diameter pipeline and appurtenant facilities of the Shidler Line (also referred to as “Line ME” or the “Blackwell—Cotton Valley Line”), in Osage County, Oklahoma. The abandonment will require cutting and capping of the pipeline just east of the Shidler Town Border and slightly west of the Bowring Meter Station. The pipeline would be cut, capped, and abandoned in place by filling the pipe with grout at two improved road crossings. All associated aboveground facilities would be removed, including two mainline valve settings, three domestic taps, four rectifiers, 14 cathodic protection test stations, and the pipeline markers. The remainder of pipeline facilities would be abandoned in place.

Background

On June 6, 2016, the Commission issued a Notice of Intent to Prepare an Environmental Assessment for the Proposed Shidler Line Abandonment Project and Request for Comments on Environmental Issues (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comment letters from the Oklahoma Archeological Survey, the Oklahoma Natural Heritage Inventory, the Oklahoma Department of Wildlife Conservation, and the Osage Nation. The letters provided occurrence records
for listed species, and requested cultural resources surveys and tribal consultations.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the Project is available from the Commission’s Office of External Affairs at (866) 208–FERC or on the FERC Web site (www.ferc.gov). Using the “eLibrary” link, select “General Search” from the eLibrary menu, enter the selected date range and “Docket Number” excluding the last three digits (i.e., CP16–456), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or by email at FERConlineSupport@ferc.gov. The eLibrary link on the FERC Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: September 26, 2016.
Kimberly D. Bose,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

Request for Public Comments To Be Sent to Versar, Inc., on an Interim List of Perchlorate in Drinking Water Expert Peer Reviewers and Draft Peer Review Charge Questions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of request for public comment.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing the release of materials for public comment that relate to the expert peer review of documents intended to support the EPA’s Safe Drinking Water Act decision making for perchlorate. This request is one of two Federal Register notices being published concurrently, seeking public comment on two separate sets of materials. This notice requests comments on the interim list of peer review candidates and the draft charge for the expert peer review panel, to be sent to EPA’s contractor, Versar, Inc. The comments will be considered to help inform the final selection of expert panelists and the development of the peer review panel’s charge. A companion notice, published today, requests comments on draft materials to inform the EPA’s Safe Drinking Water Act decision making on perchlorate; those materials are the draft Biologically Based Dose-Response Model and an accompanying draft model report entitled “Biologically Based Dose-Response Models for the Effect of Perchlorate on Thyroid Hormones in the Infant, Breast Feeding Mother, Pregnant Mother, and Fetus: Model Development, Revision, and Preliminary Dose-Response Analyses.” Versar, Inc., will consider the comments received on this notice in selecting the final peer review panel, which will collectively provide appropriate expertise spanning the subject matter areas covered by the draft model and draft report and, to the extent feasible, best provide a balance of perspectives.

DATES: Comments on the draft peer review panel charge questions and interim list of peer review candidates must be received on or before October 21, 2016.

ADDRESSES: Submit your comments on the interim list of peer review candidates and draft charge to Versar, Inc., no later than October 21, 2016 by one of the following methods:

- Email: perchlorate@versar.com (subject line: Perchlorate Peer Review).

Please be advised that public comments are subject to release under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Questions concerning the interim list of expert peer review candidates and draft peer review charge questions should be directed to Versar, Inc., at 6850 Versar Center, Springfield, VA 22151; by email perchlorate@versar.com (subject line: Perchlorate Peer Review); or by phone: (703) 642–6815 (ask for David Bottimore).

SUPPLEMENTARY INFORMATION:

I. Process of Obtaining Candidate Reviewers

Versar, Inc., will assemble a panel of scientific experts to evaluate the draft BBDR model and draft report. As part of the peer review process, EPA announced a public nomination period from March 1, 2016, to March 31, 2016, in the Federal Register (81 FR 10617; March 1, 2016), during which members of the public were able to nominate scientific experts whom have knowledge and experience in one or more of the following areas: (1) Physiologically-based pharmacokinetic (PBPK), physiologically-based pharmacokinetic/pharmacodynamic (PBPK/PD) and/or Biologically Based Dose-Response (BBDR) modeling, (2) fetal and neonatal thyroid endocrinology (clinical and experimental), (3) iodide homeostasis, and (4) perchlorate toxicology and mode of action or adverse outcome pathway.

On June 3, 2016, the Agency announced in the Federal Register (81 FR 35760) that, to achieve efficiency, it was expanding the scope of the peer review announced in March to include review of a draft approach for application of the draft BBDR model, to inform the development of a perchlorate MCLG. EPA has reevaluated that approach in response to concerns that a simultaneous review of a methodology to applying the model to develop a perchlorate MCLG would not allow the Agency or peer reviews to consider peer reviewer comments on the draft BBDR model prior to evaluating the alternative methodologies to applying the model to derive an MCLG. Today’s notice therefore seeks input only on the peer review of the model, not its application. EPA will seek input on a second peer review of methods for applying the model to inform development of a perchlorate MCLG in a future notice.

Versar, Inc., also conducted an independent search for scientific experts to augment the list of publically-nominated candidates. In total, the contractor evaluated 35 candidates, including those nominated during the public nomination periods and those identified by the contractor.

Selection Process

Versar, Inc., considered and screened all candidates against the selection criteria described in the March 1, 2016 Federal Register notice (81 FR 10617), which included the candidates being free of any conflict of interest and being available to participate in-person in the peer review meeting in the Washington, DC area, which will be open to the public, projected to occur in late 2016 (exact date to be determined). Following the screening process, the contractor narrowed the list of potential reviewers to 19 candidates. EPA is now soliciting comments on this list. EPA requests that the public provide relevant information or documentation on the experts that
the contractor should consider in evaluating these candidates. Once the public comments on the interim list of candidates have been reviewed and considered, the contractor will select the final list of peer reviewers.

Responsibilities of Peer Reviewers
Peer reviewers will be charged with evaluating and preparing written comments on the draft BBDR model and draft report. Versar, Inc., will provide reviewers with a summary of public comments on the draft BBDR model and report submitted to EPA’s docket (ID number EPA–HQ–OW–2016–0438) during the 45-day public comment period, for their consideration.

Reviewers will participate in the meeting expected to be held in the Washington, DC metro area in early 2017 (exact date to be determined) to discuss the scientific basis supporting these materials. Following the meeting, Versar, Inc., will provide a report to EPA summarizing the peer reviewer’s evaluation of the scientific and technical merit of the draft model and draft report and their responses to the charge questions. EPA will make the final report available to the public (exact date to be determined). In preparing the final BBDR model and report, EPA will consider Versar’s report as well as the written public comments submitted to the docket.

II. Interim List of Peer Reviewers
Versar, Inc., is considering the following candidates for the peer review panel. Biosketches are available through the docket at http://www.regulations.gov (Docket ID No. EPA–HQ–OW–2016–0439). After review and consideration of public comments, Versar, Inc., will select the final peer reviewers from this list, who will, collectively, best provide expertise spanning the previously mentioned areas of knowledge and experience and, to the extent feasible, best provide a balance of perspectives.

EPA will announce the peer review panel meeting date, location and registration details along with the final list of peer reviewers selected by Versar, Inc., at least 30 days prior to the meeting.

Name of Nominee, Degree, Place of Employment
1. Hugh A. Barton, Ph.D., Pfizer, Inc.
2. Nancy Carrasco, M.D., Yale School of Medicine
3. Jonathan Chevrier, Ph.D., McGill University Faculty of Medicine
4. Claude Emond, Ph.D., University of Montreal
5. John P. Gibbs, M.D., Tronox LLC

ENVIRONMENTAL PROTECTION AGENCY

Board of Scientific Counselors (BOSC) Air, Climate, and Energy Subcommittee Meeting—October 2016

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, the U.S. Environmental Protection Agency (EPA), Office of Research and Development (ORD), gives notice of a meeting of the Board of Scientific Counselors (BOSC) Air, Climate, and Energy Subcommittee.

DATES: The meeting will be held on Tuesday, October 25, 2016, from 8:00 a.m. to 5:00 p.m., and will continue on Wednesday, October 26, 2016, from 8:30 a.m. until 12:15 p.m. All times noted are Eastern Time. The meeting may adjourn early if all business is finished. Attendees should register by October 18, 2016. Requests for the draft agenda or for making oral presentations at the meeting will be accepted up to one business day before the meeting.

ADDRESS: The meeting will be held at the EPA’s RTP Main Campus Facility, 109 T.W. Alexander Drive, Research Triangle Park, North Carolina 27711. Submit your comments, identified by Docket ID No. EPA–HQ–ORD–2015–0365, by one of the following methods:

• www.regulations.gov: Follow the on-line instructions for submitting comments.
• Email: Send comments by electronic mail (email) to ORD.Docket@epa.gov, Attention Docket ID No. EPA–HQ–ORD–2015–0365.
• Fax: Fax comments to: (202) 566–0224, Attention Docket ID No. EPA–HQ–ORD–2015–0365.

Hand Delivery or Courier: Deliver comments to: EPA Docket Center (EPA/DC), Room 3334, William Jefferson Clinton West Building, 1301 Constitution Ave. NW., Washington, DC, Attention Docket ID No. EPA–HQ–ORD–2015–0365. Note: This is not a mailing address. Deliveries are only accepted during the docket’s normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–ORD–2015–0365. The EPA’s policy is that all comments received will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or email. The www.regulations.gov Web site is an “anonymous access” system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through www.regulations.gov, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about the EPA’s public docket visit the EPA Docket Center homepage at http://www.epa.gov/dockets/

Docket: All documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in www.regulations.gov or in hard copy at the Board of Scientific Counselors (BOSC) Air, Climate, and Energy Subcommittee Docket, EPA/DC, William Jefferson Clinton West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the ORD Docket is (202) 566–1752.

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer via mail at: Tim Benner, Mail Code 8104R, Office of Science Policy, Office of Research and Development, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; via phone/voice mail at: (202) 564–6769; via fax at: (202) 565–2911; or via email at: benner.tim@epa.gov.

SUPPLEMENTARY INFORMATION: General Information: The meeting is open to the public. Any member of the public interested in receiving a draft agenda, attending the meeting, or making a presentation at the meeting may contact Tim Benner, the Designated Federal Officer, via any of the contact methods listed in the FOR FURTHER INFORMATION CONTACT section above. In general, each individual making an oral presentation will be limited to a total of three minutes. For security purposes, all attendees must provide their names to the Designated Federal Officer or register online at https://www.eventbrite.com/e/us-epa-bosc-air-climate-and-energy-subcommittee-meeting-tickets-28117149150 by October 18, 2016, and must go through a metal detector, sign in at the security desk, and show REAL ID Act-compliant government-issued photo identity card before entering the building. Attendees must attend the meeting in business attire. "Business attire" means any attire that is professional and neat. Attendees must not wear sleeveless shirts, tank tops, or footwear typically worn for athletic or leisure activities. If you are not able to attend the meeting in business attire, you will not be allowed to attend the meeting. If you are unable to attend the meeting due to a medical condition, please contact Designated Federal Officer via email at: benner.tim@epa.gov to discuss alternative arrangements. Check-in arrangements should be made for delivery of boxed information. The telephone number for the ORD Docket is (202) 566–1752.

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer via email at: Alice Chan, Mail Code 8104R, Office of Science Policy, Office of Research and Development, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; via phone/voice mail at: (202) 564–6769; via fax at: (202) 565–2911; or via email at: chan.alice@epa.gov.
will be reviewed by an expert peer review panel and the panelists will consider the public comments received. A companion notice published on this date requests comments on the interim list of peer reviewers and draft peer review charge questions to be sent to EPA’s contractor, Versar, Inc.

**DATES:** Comments on the draft Biologically Based Dose-Response (BBDR) model and draft report must be received by EPA on or before November 14, 2016.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA–HQ–OW–2016–0438, to the Federal eRulemaking Portal: [http://www.regulations.gov](http://www.regulations.gov). Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e., on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit [http://www2.epa.gov/lockets/commenting-epa-dockets](http://www2.epa.gov/lockets/commenting-epa-dockets).

**FOR FURTHER INFORMATION CONTACT:** For additional information concerning the draft BBDR model and the draft report, please contact Russ Perkinson at U.S. EPA, Office of Ground Water and Drinking Water, Standards and Risk Management Division (Mail Code 4607M), 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone: 202–564–4901; or email: perkinson.russ@epa.gov.

**SUPPLEMENTARY INFORMATION:**

**I. Information on EPA’s Biologically Based Dose-Response (BBDR) Model for Perchlorate in Drinking Water**

EPA has begun development of a national primary drinking water regulation (NDPWR) for perchlorate, in accordance with the requirements of the Safe Drinking Water Act (SDWA). One statutory requirement is that the Agency must request comment from EPA’s Science Advisory Board (SAB) prior to proposal of a maximum contaminant level goal (MCLG) and a NPDR.

In 2012, EPA sought guidance from the SAB on how best to consider and interpret life stage information, epidemiologic and biomonitoring data, physiologically-based pharmacokinetic (PBPK) analyses and the totality of perchlorate health information to derive an MCLG for perchlorate.

In 2013, the SAB recommended that, “... EPA derive a perchlorate MCLG that addresses sensitive life stages through physiologically-based pharmacokinetic/pharmacodynamic (PBPK/PD) modeling based upon its mode of action rather than the default MCLG approach using the reference dose and specific chemical exposure parameters’’ (Advice on Approaches to Derive a Maximum Contaminant Level Goal for Perchlorate, EPA–SAB–13–004).

Based on the SAB’s recommendations, EPA, with contributions from Food and Drug Administration scientists, developed a BBDR (also known as a PBPK/PD) model. The BBDR model was developed by integrating PBPK models for perchlorate and iodide with BBDR models for thyroid hormones to predict the effect of perchlorate on the thyroid gland in formula-fed and breast-fed infants for the postnatal period from days 7 to 90, as well as lactating women. The draft model is focused on the condition of hypothyroxinemia as an indicator of the potential adverse health effects. This integrated draft model predicts the effects of perchlorate on serum thyroid hormone concentrations in the pregnant and lactating mother exposed to perchlorate in the diet and in infants exposed via ingestion of perchlorate in formula or breast milk.

**II. How To Obtain the Draft BBDR Model and Draft Reports**

III. Exclusion for Peer Review Candidates

Important: Anyone wishing to be considered as an expert peer reviewer must not submit comments during the public comment period. Candidates on the interim list not selected for the panel peer review (see companion Peer Review Federal Register notice, published on September 30, 2016 will be given a limited opportunity to submit public comments once the final peer reviewers are selected by Versar, Inc., the EPA contractor managing this peer review process.

Joel Beauvais,
Deputy Assistant Administrator, Office of Water.

Federal Register / Vol. 81, No. 190 / Friday, September 30, 2016 / Notices 67351

FEDERAL COMMUNICATIONS COMMISSION
[OMB 3060–0667 and 3060–1104]

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission’s burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before November 29, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESS: Direct all PRA comments to Cathy Williams, FCC, via email PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0667.

Title: Section 76.630, Compatibility with Consumer Electronics Equipment; Section 76.1621, Equipment Compatibility Offer; Section 76.1622, Consumer Education of Equipment Compatibility.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 8,250 respondents; 66,501 responses.

Estimated Time per Response: .017 hours-3 hours.

Frequency of Response: Recordkeeping and third party disclosure requirements; On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Section 4(i) and Section 632 of the Communications Act of 1934, as amended.

Total Annual Burden: 17,353 hours.

Total Annual Cost: $1,355.

Privacy Act Impact Assessment: No impact.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: 47 CFR 76.630(a) states a cable system operator shall not scramble or otherwise encrypt signals carried on the basic service tier. This requirement is subject to certain exemptions explained below. Requests for waivers of this prohibition, which are allowed under 47 CFR 76.630(a)(2), must demonstrate either a substantial problem with theft of basic tier service or a strong need to scramble basic signals for other reasons. As part of this showing, cable operators are required to notify subscribers by mail of waiver requests. The notice to subscribers must be mailed no later than thirty calendar days from the date the request waiver was filed with the Commission, and cable operators must inform the Commission in writing, as soon as possible, of that notification date. The notification to subscribers must state:

On (date of waiver request was filed with the Commission), (cable operator's name) filed with the Federal Communications Commission a request for waiver of the rule prohibiting scrambling of channels on the basic tier of service. The request for waiver states (a brief summary of the waiver request). A copy of the request for waiver is on file for public inspection at (the address of the cable operator’s local place of business).

Individuals who wish to comment on this request for waiver should mail comments to the Federal Communications Commission by no later than 30 days from (the date the notification was mailed to subscribers). Those comments must be addressed to: the Federal Communications Commission, Media Bureau, Washington, DC 20554, and should include the name of the cable operator to whom the comments are applicable. Individuals should also send a copy of their comments to (the cable operator at its local place of business). Cable operators may file comments in reply no later than 7 days from the date subscriber comments must be filed.

47 CFR 76.1621 states a cable system operator that use scrambling, encryption or similar technologies in conjunction with cable system terminal devices, as defined in §15.3(e) of this chapter, that may affect subscribers’ reception of signals shall offer to supply each subscriber with special equipment that will enable the simultaneous reception of multiple signals. The equipment offered shall include a single terminal device with dual descramblers/decoders and/ or timers and bypass switches. Other equipment, such as two independent set-top terminal devices may be offered at the same time that the single terminal device with dual tuners/ descramblers is offered. For purposes of this rule, two set-top devices linked by a control system that provides functionality equivalent to that of a single device with dual descramblers is considered to be the same as a terminal device with dual descramblers/decoders.

(a) The offer of special equipment shall be made to new subscribers at the time they subscribe and to all subscribers at least once each year (i.e., in subscriber billings or pre-printed information on the bill).
(b) Such special equipment shall, at a minimum, have the capability:
(1) To allow simultaneous reception of any two scrambled or encrypted signals and to provide for tuning to alternative channels on a pre-programmed schedule; and
(2) To allow direct reception of all other signals that do not need to be processed through descrambling or decryption circuitry (this capability can generally be provided through a separate by-pass switch or through internal by-pass circuitry in a cable system terminal device).

(c) Cable system operators shall determine the specific equipment needed by individual subscribers on a case-by-case basis, in consultation with the subscriber. Cable system operators are required to make a good faith effort to provide subscribers with the amount and types of special equipment needed to resolve their individual compatibility problems.

(d) Cable operators shall provide such equipment at the request of individual subscribers and may charge for purchase or lease of the equipment and its installation in accordance with the provisions of the rate regulation rules for customer premises equipment used to receive the basic service tier, as set forth in §76.923. Notwithstanding the required annual offering, cable operators shall respond to subscriber requests for special equipment for reception of multiple signals that are made at any time.

Information Collection Requirements

In October 2012, the Commission loosened its prohibition on encryption of the basic service tier. This rule change allows all-digital cable operators to encrypt, subject to certain consumer protection measures. 77 FR 67290 (Nov. 9, 2012); 47 CFR 76.630(a)(1).

Encryption of all-digital cable service will allow cable operators to activate and/or deactivate cable service remotely, thus relieving many consumers of the need to wait at home to receive a cable technician when they sign up for or cancel cable service, or expand service to an existing cable connection in their home.

In addition, encryption will reduce service theft by ensuring that only paying subscribers have decryption equipment. Encryption could reduce cable rates and reduce the theft that often degrades the quality of cable service received by paying subscribers. Encryption also will reduce the number of service calls necessary for manual installations and disconnections, which may have beneficial effects on vehicle traffic and the environment.

Because this rule change allows cable operators to encrypt the basic service tier without filing a request for waiver, we expect that the number of requests for waiver will decrease significantly. 47 CFR 76.1622 states that Cable system operators shall provide a consumer education program on compatibility matters to their subscribers in writing, as follows:

(a) The consumer information program shall be provided to subscribers at the time they first subscribe and at least once a year thereafter. Cable operators may choose the time and means by which they comply with the annual consumer information requirement. This requirement may be satisfied by a once-a-year mailing to all subscribers. The information may be included in one of the cable system’s regular subscriber billings.

(b) The consumer information program shall include the following information:

(1) Cable system operators shall inform their subscribers that some models of TV receivers and videocassette recorders may not be able to receive all of the channels offered by the cable system when connected directly to the cable system. In conjunction with this information, cable system operators shall briefly explain, the types of channel compatibility problems that could occur if subscribers connected their equipment directly to the cable system and offer suggestions for resolving those problems. Such suggestions could include, for example, the use of a cable system terminal device such as a set-top channel converter. Cable system operators shall also indicate that channel compatibility problems associated with reception of programming that is not scrambled or encrypted programming could be resolved through use of simple converter devices without descrambling or decryption capabilities that can be obtained from either the cable system or a third party retail vendor.

(2) In cases where service is received through a cable system terminal device, cable system operators shall indicate that subscribers may not be able to use special features and functions of their TV receivers and videocassette recorders, including features that allow the subscriber to: View a program on one channel while simultaneously recording a program on another channel; record two or more consecutive programs that appear on different channels; and, use advanced picture-in-picture display features such as “Picture-in-Picture,” channel review and other functions that necessitate channel selection by the consumer device.

(3) In cases where cable system operators offer remote control capability with cable system terminal devices and other customer premises equipment that is provided to subscribers, they shall advise their subscribers that remote control units that are compatible with that equipment may be obtained from other sources, such as retail outlets. Cable system operators shall also provide a representative list of the models of remote control units currently available from retailers that are compatible with the customer premises equipment they employ. Cable system operators are required to make a good faith effort in compiling this list and will not be liable for inadvertent omissions. This list shall be current as of no more than six months before the date the consumer education program is distributed to subscribers. Cable operators are also required to encourage subscribers to contact the cable operator to inquire about whether a particular remote control unit the subscriber might be considering for purchase would be compatible with the subscriber’s customer premises equipment.

OMB Control Number: 3060–1104.
Title: Section 73.682(d), DTV Transmission and Program System and Information Protocol ("PSIP") Standards.

Form Number: N/A.
Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; not for-profit institutions.

Number of Respondents and Responses: 1,812 respondents and 1,812 respondents.

Estimated Hours per Response: 0.50 hours.

Frequency of Response: Third party disclosure requirement; weekly reporting requirement.

Total Annual Burden: 47,112 hours.
Total Annual Cost: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Sections 309 and 337 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: Confidentiality is not required with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: Section 73.682(d) of the Commission’s rules incorporates by reference the Advanced Television Systems Committee, Inc. ("ATSC") Program System and Information Protocol ("PSIP") standard “A/65C.” PSIP data is transmitted along with a TV
broadcast station’s digital signal and provides viewers (via their DTV receivers) with information about the station and what is being broadcast, such as program information. The Commission has recognized the utility that the ATSC PSIP standard offers for both broadcasters and consumers (or viewers) of digital television (“DTV”).

ATSC PSIP standard A/65C requires broadcasters to provide detailed programming information when transmitting their broadcast signal. This standard enhances consumers’ viewing experience by providing detailed information about digital channels and programs, such as how to find a program’s closed captions, multiple streams and V-chip information. This standard requires broadcasters to populate the Event Information Tables (“EITs”) (or program guide) with accurate information about each event (or program) and to update the EIT if more accurate information becomes available. The previous ATSC PSIP standard A/65–B did not require broadcasters to provide such detailed programming information but only general information.

Federal Communications Commission.

Marlene H. Dortch,
Secretary, Office of Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: National Study of Title IV–E Child Welfare Waiver Demonstrations.

OMB No.: New Collection.

Description: The National Study of the Title IV–E Child Welfare Waiver Demonstrations is sponsored by the Children’s Bureau, Administration for Children and Families of the U.S. Department of Health and Human Services and involves the conduct of a cross-site study of jurisdictions (referred to as waiver jurisdictions) approved to operate demonstrations authorized by section 1130 of the Social Security Act, as amended by the Child and Family Services Improvement and Innovation Act, Public Law 112–34. The demonstrations involve waivers of certain provisions of the foster care program authorized by title IV–E of the Social Security Act. Child welfare agencies in waiver jurisdictions are operating demonstrations to implement a variety of programs and interventions that serve children and families in an effort to improve their safety, permanency, and well-being. Each waiver jurisdiction is required to conduct a third-party evaluation of its demonstration. The National Study will examine the extent to which safety, permanency, and well-being outcomes have improved for children and families; the characteristics of waiver jurisdictions where improvements in outcomes have occurred; expenditure patterns and the types of activities for which waiver jurisdictions have increased funding; and the extent to which waiver jurisdictions have experienced practice and systems-level changes.

The National Study uses a mixed-method approach to examine 25 waiver jurisdictions (including 23 states, the District of Columbia and one tribal government) with Terms and Conditions approved in Federal Fiscal years 2012, 2013, and 2014. Proposed data collection methods are two topically-focused telephone surveys: (a) A telephone survey of waiver jurisdiction representatives and evaluators who are focused on measuring well-being, and (b) a second telephone survey of waiver jurisdiction representatives and evaluators that is focused on understanding practice and systems-level changes within child welfare service systems. Also proposed is a Web-based survey of waiver jurisdiction representatives and evaluators who will be a census sample of the 23 waiver jurisdictions who are involved with the assessment of child and family well-being in their waiver jurisdictions. The Measuring Well-Being telephone survey will be administered once during the National Study. The respondents to the Web-Based Survey will be a purposive sample of an estimated 250 waiver jurisdiction representatives and evaluators drawn from the 25 waiver jurisdictions with waiver demonstration projects (Arkansas, Arizona, Colorado, Hawaii, Illinois, Kentucky, Maine, Maryland, Massachusetts, Michigan, Nebraska, Nevada, New York, Oklahoma, Oregon, Pennsylvania, Port Gamble S’Klallam Tribe, Rhode Island, Tennessee, Texas, Utah, Washington, Washington DC, West Virginia, Wisconsin). The respondents will be identified by the 25 jurisdiction demonstration project leaders using the Web-Based Survey Sampling Form. The Web-Based Survey Sampling Form and the Web-Based Survey will be administered once during the National Study.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Announcing the Domestic Violence Awareness Month YouTube Challenge; CFDA Number: 93.592

AGENCY: Family and Youth Services Bureau, ACYF, ACF, HHS

ACTION: Notice.

SUMMARY: The Administration for Children and Families (ACF), Administration on Children, Youth and Families (ACYF), Family and Youth Services Bureau (FYSB), Division of Family Violence and Prevention Services (FVPSA), announces a Domestic Violence Awareness Month YouTube Challenge. This Challenge is open to individuals and organizations that support children and youth exposed to domestic violence and their abused parents. The goal is to bring attention to the most innovative and inclusive approaches, practices, policies, programs, safe spaces, activities, and strategies that the public is using to improve safety, promote healing, and provide support for this special population.

DATES: Acceptance of video submissions will open on October 12, 2016, 12:00:00 a.m., ET. The video submission period will be open for exactly 3 weeks (21 calendar days) and will close November 2, 2016, at 11:59:59 p.m., ET. Waiver forms, video link, and written transcript of the video must be submitted on www.challenge.gov/domestic-violence-video-challenge by the deadline.

FOR FURTHER INFORMATION CONTACT: Mao Yang, Family and Youth Services Bureau, 300 C Street SW., Washington, DC 20201. Telephone: 202–401–5082, email: mao.yang@acf.hhs.gov.

SUPPLEMENTARY INFORMATION: In an effort to stimulate innovation, in this Challenge, FVPSA is asking the public (as Challenge-solvers) to submit videos featuring their most innovative means of helping to improve safety, promote healing, and build the resilience of children and youth exposed to domestic violence and their abused parents. The Challenge seeks innovative, creative, and inclusive practices, policies, programs, safe spaces, activities, and strategies to meet this end. Our goal is to learn more about, and bring attention to, new, emerging, and effective methods that go beyond traditional services, programs, and supports and that communities are using with this special population.

Eligibility

The Challenge is open to individuals and organizations. See the section on Video Submission Requirements.

To be eligible to win a prize under the Challenge, those entering:

1. Must register to participate in the competition under the rules in this notice by submission of a waiver form with their video and script. The waiver form is available on the Domestic Violence YouTube Challenge as listed on www.challenge.gov/domestic-violence-video-challenge;

2. Must comply with all submission, content, and format the requirements; (3) In the case of a private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen or permanent resident of the United States; and

4. May not be a federal entity or federal employee acting within the scope of their employment.

Video Submission Requirements

Each individual or organization is limited to entering one video in the Challenge. Multiple submissions from the same source will be disqualified. Only the first 150 videos that fulfill the following requirements and are submitted by the deadline will be accepted for the competition.

To be eligible to participate in the Challenge, the Challenge solver must submit a video that meets the following requirements:

• Be 1–3 minutes long in length;

• Be in a compatible YouTube format with the proper codecs: WebM files, MPEG4, 3GPP, MOV, AVI, MPEGPS, WMV, FLV with suggested aspect of 16:9;

• Entrants must post their video submission to their favorite video sharing site and send the link to the link to their video entry on the Domestic Violence YouTube Challenge listed on www.challenge.gov/domestic-violence-video-challenge by the deadline;

• Highlight one or more new, innovative, emerging, and effective approach(es), practice(s), policy(ies), program(s), safe space(s), activity(ies), strategy(ies), and any other way(s) that help to improve safety, promote healing, and build resilience of children exposed to domestic violence and their abused parents;

• Include a written transcript for the video (for closed captioning purposes); and

• Be aligned with the vision of FYSB (a future in which all of our nation’s youth, individuals, and families, no matter what challenges they may face, can live healthy, productive, violence-free lives. More information can be found on www.acf.hhs.gov/fysb.)

Video Content

Videos must focus on children and youth exposed to domestic violence and
their parents. In the 1–3 minute video, Challenge-solvers must highlight one or more approach(es), practice(s), policy(ies), program(s), safe space(s), activity(ies), and strategy(ies) that support children and youth beyond traditional services, programs, and supports. Videos should strive to raise awareness of available support for this special population. Challenge-solvers may focus on culturally specific and other groups of children and youth. Applicants should strive to be creative, innovative, and educational in their video content. Videos may include explanations or instruction on how the idea can be replicated in different communities. So that the privacy, confidentiality, and safety of survivors and clients of domestic violence prevention programs are respected, survivors and program clients may not be featured in contestant videos. Each video entry must be accompanied by a written transcript.

Public Voting

After the submission period is closed, a public voting period will commence on www.challenge.gov/domestic-violence-video-challenge. To assist FVPSA in making this award, voters should vote for a video based on some of the criteria discussed in the Video Criteria section.

Voting will be open for 2 weeks (14 calendar days) that will begin after the submission deadline and end no later than November 30, 2016. The actual dates and deadline for public voting period will be posted on the www.challenge.gov/domestic-violence-video-challenge Web site.

Winner Selection

The top 15 videos with highest scores at the public voting deadline will move on to the next round of judging. In addition, FVPSA employees will select an additional five videos based on whether the videos demonstrate a new emerging and effective approach, to move on to the next round of judging by the panel of subject matter experts.

The judges, made up of the panel of subject matter experts, will evaluate, score, and rank the top 20 finalists’ videos. The top three scoring videos will win the Challenge. FVPSA will award three prizes as follows: First Prize: $5,000; Second Prize: $3,000; and Third Prize: $2,000. All prize awards are subject to FVPSA verification of the winners’ identity, eligibility, and participation in the Challenge. Awards will be paid using electronic funds transfers and may be subject to federal income taxes. FVPSA will comply with the International Revenue Service (IRS) withholding and reporting requirements, where applicable.

Judging Criteria

The judging panel of experts will use a 100-point scale to evaluate the top 15 videos from the public voting and the 5 videos selected by FVPSA staff. In case of tied results, the winners will be selected by majority vote. The judging criteria are:

- The extent to which the video content highlights one or more new, innovative, emerging, and effective approach(es), practice(s), policy(ies), program(s), safe space(s), activity(ies), strategy(ies), and any other way(s) that help to improve safety, promote healing, and build the resilience of children exposed to domestic violence and their abused parents. (25 points)
- The extent to which the video content aligns with FYSB’s vision of a future in which all our nation’s youth, individuals, and families—no matter what challenges they may face—can live healthy, productive, violence-free lives (FYSB’s vision can be found at www.acf.hhs.gov/fysb). (15 points)
- The extent to which the video content increases awareness of domestic violence issues. (15 points)
- The extent to which the video content is educational, imparts knowledge, or deepens understanding of supports for children, youth, and parents. (15 points)
- The extent to which the video content is innovative. (15 points)
- The extent to which the video content is creative. (15 points)

Waivers and Releases

To enter the Domestic Violence Awareness Month YouTube Challenge, registered participants must sign a waiver, agreeing to assume any and all risks and waive claims against the Federal Government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from their participation in a competition, whether the injury, death, damage, or loss arises through negligence or otherwise. Participants shall be required to obtain liability insurance or demonstrate financial responsibility for claims, as detailed in 15 U.S.C. 3719(i)(2).

Challenge-solvers must also obtain a signed ACF photo/video release waiver for individuals featured on the videos and submit it with their video link by the submission deadline listed in the DATES section. The waiver is available at www.challenge.gov/domestic-violence-video-challenge.

Restrictions

Challenge-solvers cannot use funding from the Federal Government (either through grants or contracts) to compete in the Domestic Violence Awareness Month YouTube Challenge.

More details on the Challenge are available on www.challenge.gov/domestic-violence-video-challenge. Submitted videos may be featured at FVPSA meetings and events and posted on the FVPSA Web site.

Dated: September 28, 2016.

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects

Title: Provision of Child Support Services in IV–D cases under the Hague Child Support Convention; Federally Approved Forms.

OMB No.: New Collection.

Description: On January 1, 2017, the 2007 Hague Convention on the International Recovery of Child Support and Other Forms of Family Maintenance will enter into force for the United States. This Convention contains groundbreaking provisions that, for the first time on a worldwide scale, will establish uniform, simple, fast, and inexpensive procedures for the processing of international child support cases. Once the Convention is in effect, U.S. states will process child support cases with other countries that have ratified the Convention under the requirements of the Convention and Article 7 of the Uniform Interstate Family Support Act (UIFSA 2008). In order to comply with the Convention, the U.S. must implement the Convention’s case processing forms.

State and Federal law require states to use Federally-approved case processing forms. Section 311(b) of UIFSA 2008, which has been enacted by all 50 states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands, requires States to use forms mandated by Federal law. 45 CFR 303.7 also requires child
support programs to use federally-approved forms in intergovernmental IV–D cases unless a country has provided alternative forms as a part of its chapter in a Caseworker’s Guide to Processing Cases with Foreign Reciprocating Countries.

ANNIVERSARY OF INFORMATION TECHNOLOGY

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 370 L’Enfant Promenade SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. Email address: infocollection@acf.hhs.gov. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,
Reports Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
[Docket No. FDA–2016–N–0007]

Fee for Using a Tropical Disease Priority Review Voucher in Fiscal Year 2017

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the fee rates for using a tropical disease priority review voucher for fiscal year (FY) 2017. The Federal Food, Drug, and Cosmetic Act (the FD&C Act), as amended by the Food and Drug Administration Amendments Act of 2007 (FDAAA), authorizes FDA to determine and collect priority review user fees for certain applications for approval of drug or biologics products when those applications use a tropical disease priority review voucher awarded by the Secretary of Health and Human Services. These vouchers are awarded to the sponsors of certain tropical disease product applications, submitted after September 27, 2007, upon FDA approval of such applications. The amount of the fee submitted to FDA with applications using a tropical disease priority review voucher is determined each fiscal year based on the difference between the average cost incurred by FDA in the review of a human drug application subject to priority review in the previous fiscal year, and the average cost incurred in the review of an application that is not subject to priority review in the previous fiscal year.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

of such products. Under section 524, the sponsor of an eligible human drug application submitted after September 27, 2007, for a tropical disease (as defined in section 524(a)(3) of the FD&C Act), shall receive a priority review voucher upon approval of the tropical disease product application. The recipient of a tropical disease priority review voucher may either use the voucher with a future submission to FDA under section 505(b)(1) of the FD&C Act (21 U.S.C. 355(b)(1)) or section 351 of the Public Health Service Act (42 U.S.C. 262), or transfer (including by sale) the voucher to another party. The voucher may be transferred (including by sale) repeatedly until it ultimately is used for a human drug application submitted to FDA under section 505(b)(1) of the FD&C Act or section 351(a) of the Public Health Service Act. A priority review is a review conducted with a Prescription Drug User Fee Act (PDUFA) goal date of 6 months after the receipt or filing date, depending upon the type of application. Information regarding the PDUFA goals is available at: http://www.fda.gov/downloads/Drugs/prescriptiondruguserfee/prescriptiondruguserfee/ucm270412.pdf.

The applicant that uses a priority review voucher is entitled to a priority review but must pay FDA a priority review user fee in addition to any other fee required by PDUFA. FDA published draft guidance on its Web site about how this tropical disease priority review voucher program operates (available at: http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/ucm080599.pdf).

This notice establishes the tropical disease priority review fee rate for FY 2017 as $2,706,000 and outlines FDA’s process for implementing the collection of the priority review user fees. This rate is effective on October 1, 2016, and will remain in effect through September 30, 2017, for applications submitted with a tropical disease priority review voucher. The payment of this priority review user fee is in addition to the payment of any other fee that would normally apply to such an application under PDUFA before FDA will consider the application complete and acceptable for filing.

II. Tropical Disease Priority Review User Fee for FY 2017

FDA interprets section 524(c)(2) of the FD&C Act as requiring that FDA determine the amount of the tropical disease priority review user fee each fiscal year based on the difference between the average cost incurred by FDA in the review of a human drug application subject to priority review in the previous fiscal year, and the average cost incurred by FDA in the review of a human drug application that is not subject to priority review in the previous fiscal year.

A priority review is a review conducted with a PDUFA goal date of 6 months after the receipt or filing date, depending on the type of application. Under the PDUFA goals letter, FDA has committed to reviewing and acting on 90 percent of the applications granted priority review status within this expedited timeframe. Normally, an application for a human drug or biological product will qualify for priority review if the product is intended to treat a serious condition and, if approved, would provide a significant improvement in safety or effectiveness. An application that does not receive a priority designation will receive a standard review. Under the PDUFA goals letter, FDA committed to reviewing and acting on 90 percent of standard applications within 10 months of the receipt or filing date, depending on the type of application. A priority review involves a more intensive level of effort and a higher level of resources than a standard review.

As interpreted by FDA, section 524(c)(2) of the FD&C Act requires that the fee amount should be based on the difference between the average cost incurred by the Agency in the review of a human drug application subject to a priority review in the previous fiscal year, and the average cost incurred by FDA in the review of a human drug application that is not subject to priority review in the previous fiscal year. FDA is setting fees for FY 2017, and the previous fiscal year is FY 2016. However, the FY 2016 submission cohort has not been closed out yet, and the cost data for FY 2016 are not complete. The latest year for which FDA has complete cost data is FY 2015. Furthermore, because FDA has never tracked the cost of reviewing applications that get priority review as a separate cost subset, FDA estimated this cost based on other data that the Agency has tracked. FDA uses data that the Agency estimates and publishes on its Web site each year—standard costs for review. FDA does not publish a standard cost for “the review of a human drug application subject to priority review in the previous fiscal year.” However, we expect all such applications would contain clinical data. The standard cost application categories with clinical data that FDA does publish each year are: (1) New drug applications (NDAs) for a new molecular entity (NME) with clinical data and (2) biologicals license applications (BLAs).

The worksheets for standard costs for FY 2015, show a standard cost (rounded to the nearest thousand dollars) of $5,251,000 for a NME NDA and $5,055,000 for a BLA. Based on these standard costs, the total cost to review the 56 applications in these two categories in FY 2015 (32 NME NDAs with clinical data and 24 BLAs) was $289,352,000. (Note: These numbers exclude the President’s Emergency Plan for AIDS Relief NDAs; no investigational new drug review costs are included in this amount.) 25 of these applications (18 NDAs and 7 BLAs) received priority review, which would mean that the remaining 31 received standard reviews. Because a priority review compresses a review that ordinarily takes 10 months into 6 months, FDA estimates that a multiplier of 1.67 (10 months divided by 6 months) should be applied to non-priority review costs in estimating the effort and cost of a priority review as compared to a standard review. This multiplier is consistent with published research on this subject which supports a priority review multiplier in the range of 1.48 to 2.35 (Ref. 1). Using FY 2015 figures, the costs of a priority and standard review are estimated using the following formula:

\[
(25 \times 1.67) + (31 \times 1) = 289,352,000 \\
\text{where “}a\text{” is the cost of a standard review and “}a \times 1.67\text{” is the cost of a priority review. Using this formula, the cost of a standard review for NME NDAs and BLAs is calculated to be $3,977,000 (rounded to the nearest thousand dollars) and the cost of a priority review for NME NDAs and BLAs is 1.67 times that amount, or $6,642,000 (rounded to the nearest thousand dollars). The difference between these two cost estimates, or $2,665,000, represents the incremental cost of conducting a priority review rather than a standard review.

For the FY 2017 fee, FDA will need to adjust the FY 2015 incremental cost by the average amount by which FDA’s average costs increased in the three years prior to FY 2016, to adjust the FY 2015 amount for cost increases in FY 2016. That adjustment, published in the Federal Register on July 28, 2016 (see 81 FR 49674 at 49676), setting FY 2017 PDUFA fees, is 1.5468 percent for the most recent year, not compounded. Increasing the FY 2015 incremental priority review cost of $2,665,000 by 1.5468 percent estimates the estimated cost of $2,706,000 (rounded to the nearest thousand dollars). This is the
tropical disease priority review user fee amount for FY 2017 that must be submitted with a priority review voucher for a human drug application in FY 2017, in addition to any PDUFA fee that is required for such an application.

III. Fee Schedule for FY 2017

The fee rate for FY 2017 is set out in Table 1:

<table>
<thead>
<tr>
<th>Fee category</th>
<th>Fee rate for FY 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application submitted with a tropical disease priority review voucher in addition to the normal PDUFA fee .....</td>
<td>$2,706,000</td>
</tr>
</tbody>
</table>

IV. Implementation of Tropical Disease Priority Review User Fee

Under section 524(c)(4)(A) of the FD&C Act, the priority review user fee is due upon submission of a human drug application for which the priority review voucher is used. Section 524(c)(4)(B) of the FD&C Act specifies that the application will be considered incomplete if the priority review user fee and all other applicable user fees are not paid in accordance with FDA payment procedures. In addition, FDA may not grant a waiver, exemption, reduction, or refund of any fees due and payable under this section of the FD&C Act and FDA may not collect priority review voucher fees “except to the extent provided in advance in appropriation Acts.” Section 524(c)(4)(C) and 524(c)(4)(B). Beginning with FDA’s appropriation for FY 2009, the annual appropriation language states specifically that “priority review user fees authorized by 21 U.S.C. 360n (section 524 of the FD&C Act) may be credited to this account, to remain available until expended.” (Pub. L. 111–8, Section 5, Division A, Title VI).

The tropical disease priority review fee established in the new fee schedule must be paid for any application that is received on or after October 1, 2016, and submitted with a priority review voucher. This fee must be paid in addition to any other fee due under PDUFA. Payment must be made in U.S. currency by electronic check, check, bank draft, wire transfer, credit card, or U.S. postal money order payable to the order of the Food and Drug Administration. The preferred payment method is online using electronic check (Automatic Clearing House (ACH) also known as eCheck). Secure electronic payments can be submitted using the User Fees Payment Portal at https://userfees.fda.gov/pay. Once you search for your invoice, click “Pay Now” to be redirected to Pay.gov. Note that electronic payment options are based on the balance due. Payments must be drawn on U.S. bank accounts.

FDA has partnered with the U.S. Department of the Treasury to use Pay.gov, a Web-based payment application, for online electronic payment. The Pay.gov feature is available on the FDA Web site after the user fee ID number is generated. The user fee identification (ID) number should be included on the check, followed by the words “Tropical Disease Priority Review.” Payments can be mailed to: Food and Drug Administration, P.O. Box 979107, St. Louis, MO 63197–9000.

If checks are sent by a courier that requests a street address, the courier can deliver the checks to: U.S. Bank, Attention: Government Lockbox 979107, 1005 Convention Plaza, St. Louis, MO 63101. (Note: This U.S. Bank address is for courier delivery only. If you have any questions concerning courier delivery contact the U.S. Bank at 314–418–4013. This telephone number is only for questions about courier delivery.) The FDA post office box number (P.O. Box 979107) must be written on the check. The tax identification number of FDA is 53–0196965.

If paying by wire transfer, please reference your unique user fee ID number when completing your transfer. The originating financial institution may charge a wire transfer fee. Please reference your unique user fee ID number should be included on the check, followed by the words “Tropical Disease Priority Review.” Payments can be mailed to: Food and Drug Administration, P.O. Box 979107, St. Louis, MO 63197–9000.

If you have any questions concerning courier delivery contact the U.S. Bank at 314–418–4013. This telephone number is only for questions about courier delivery. The tax identification number of FDA is 53–0196965.

If paying by wire transfer, please reference your unique user fee ID number when completing your transfer. The originating financial institution may charge a wire transfer fee. Please ask your financial institution about the fee and include it with your payment to ensure that your fee is fully paid. The account information is as follows: U.S. Dept. of Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, Account Number: 75060099, Routing Number: 021030004, SWIFT: FRNYUS33, Beneficiary: FDA, 8455 Colesville Rd., 14th Floor, Silver Spring, MD 20993–0002.

Paying by credit card (Discover, VISA, MasterCard, American Express) is available for balances less than $25,000. If the balance exceeds this amount, only the ACH option is available. Payments must be drawn on U.S. credit cards.

V. Reference

The following reference is on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, and is available for review by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 26, 2016.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
[Docket No. FDA–2016–N–2836]

Agency Information Collection Activities: Proposed Collection; Comment Request; Donor Risk Assessment Questionnaire for the Food and Drug Administration/National Heart, Lung, and Blood Institute-Sponsored Transfusion-Transmissible Infections Monitoring System—Risk Factor Elicitation

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the Federal Register concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on an information collection request regarding risk factors associated with transfusion-transmissible infections (TTI) in blood donors.

DATES: Submit either electronic or written comments on the collection of information by November 29, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions
Submit electronic comments in the following way:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to http://www.regulations.gov will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or
anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on http://www.regulations.gov.

If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions
Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2016–N–2836 for “Donor Risk Assessment Questionnaire for the Food and Drug Administration (FDA)/National Heart, Lung, and Blood Institute (NHLBI)-sponsored Transfusion-Transmissible Infections Monitoring System (TTIMS)—Risk Factor Elicitation (RFE).” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at http://www.regulations.gov or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on http://www.regulations.gov. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: http://www.fda.gov/regulatoryinformation/dockets/default.htm.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to http://www.regulations.gov and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, PRAStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 3 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Donor Risk Assessment Questionnaire for the Food and Drug Administration (FDA)/National Heart, Lung, and Blood Institute (NHLBI)-Sponsored Transfusion-Transmissible Infections Monitoring System (TTIMS)—Risk Factor Elicitation (RFE) OMB Control Number—New

FDA intends to interview blood donors to collect risk factor information associated with testing positive for a TTI. This collection of information is part of a larger initiative called TTIMS which is a collaborative project funded by FDA, the NHLBI of the National Institutes of Health (NIH), and the Department of Health and Human Services (HHS) Office of the Assistant Secretary of Health with input from other agencies in HHS including the Centers for Disease Control and Prevention (CDC). FDA will use these scientific data collected through such interview-based risk factor elicitation of blood donors to monitor and help ensure the safety of the United States blood supply.

Previous assessments of risk factor profiles among blood donors found to be positive for human immunodeficiency virus (HIV) were funded by CDC for approximately 10 years after implementation of HIV serologic screening of blood donors in the mid-1980s, whereas studies of Hepatitis C virus (HCV) seropositive donors, funded by NIH, were conducted in the early 1990s. Information on current risk factors in blood donors as assessed using analytical study designs was next evaluated by the Transfusion-Transmitted Retrovirus and Hepatitis Virus Rates and Risk Factors Study conducted by the NHLBI Retrovirus Epidemiology Donor Study-II (REDS–II) approved under OMB control number 0925–0630. Through a risk factor questionnaire, this study elicited risk factors in blood donors who tested confirmed positive for one of four transfusion-transmissible infections: HIV, HCV, Hepatitis B virus (HBV), and Human T-cell Lymphotropic virus. The study also elicited risk factors from donors who did not have any infections (controls) and compared their responses to those of the donors with confirmed infection (cases). Results from the REDS–II study were published in 2015.
FDA issued a document entitled “Revised Recommendations for Reducing the Risk of Human Immunodeficiency Virus Transmission by Blood and Blood Products, Guidance for Industry” dated December 2015 (http://www.fda.gov/downloads/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/Blood/UCM446580.pdf) which changed the blood donor criterion for men who have sex with men (MSM) from an indefinite (permanent) deferral to a 12-month deferral since last MSM contact. The impact of this change in the deferral criteria requires a national monitoring effort as part of TTIMS to assess if the relative proportions of risk factors for infection in blood donors have changed following the adoption of the 12-month donor deferral for MSM. TTIMS will use similar procedures as the ones used in the REDS–II study to monitor and evaluate risk factors among HIV-positive donors and recently HCV or HBV infected donors as well as controls.

This study will help identify the specific risk factors for TTI and their prevalence in blood donors, and help inform FDA on the proportion of incident (new) infections among all HIV positive blood donors. Donations with incident infections have the greatest potential transmission risk because they could be missed during routine blood screening. The study will help FDA evaluate the effectiveness of screening strategies in reducing the risk of HIV transmission from at-risk donors and to evaluate if there are unexpected safety threats as warranted. In this way, the TTIMS program will maintain standardized, statistically and scientifically robust processes for applying hemovigilance information across blood collection organizations.

The specific objectives are to:
• Determine current behavioral risk factors associated with all HIV infections, incident HBV, and incident HCV infections in blood donors (including parenteral and sexual risks) across the participating blood collection organizations using a case-control study design.
• Determine infectious disease marker prevalence and incidence for HIV, HBV, and HCV overall and by demographic characteristics of donors in the majority of blood donations collected in the country. This will be accomplished by forming epidemiological databases consisting of harmonized operational data from ARC, BSI, NYBC, and OneBlood.
• Analyze integrated risk factor and infectious marker testing data concurrently because when taken together these may suggest that blood centers are not achieving the same degree of success in educational efforts to prevent donation by donors with risk behaviors across all demographic groups.

The respondents will be persons who donated blood in the United States and these participants will be defined as uninfected donors. These data also will inform FDA regarding future blood donor deferral policy options to reduce the risk of HIV transmission, including the feasibility of moving from the existing time-based deferrals related to risk behaviors to alternate deferral options, such as the use of individual risk assessments, and to inform the design of potential studies to evaluate the feasibility and effectiveness of such alternative deferral options.

TTIMS will include a comprehensive interview-based epidemiological study of risk factor information for viral infection-positive blood donors at the American Red Cross (ARC), Blood Systems, Inc. (BSI), New York Blood Center (NYBC), and OneBlood that will identify the current predominant risk factors and reasons for virus-positive donations. The TTIMS program establishes a new, ongoing donor hemovigilance capacity that currently does not exist in the United States. Using procedures developed by the REDS–II study, TTIMS will establish this capacity in greater than 50 percent of all blood donations collected in the country.

As part of the TTIMS project, a comprehensive hemovigilance database will be created that integrates the risk factor information collected through donor interviews of blood donor with the resulting data from disease marker testing and blood components collected by participating organizations into a research database. Following successful initiation of the risk factor interviews, the TTIMS network is poised to be expanded to include additional blood centers and/or re-focused on other safety threats as warranted. In this way, the TTIMS program will maintain standardized, statistically and scientifically robust processes for applying hemovigilance information across blood collection organizations.

FDA estimates the burden of this collection of information as follows:

**TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN**

<table>
<thead>
<tr>
<th>Questionnaire/survey</th>
<th>Number of respondents</th>
<th>Number of responses per respondent</th>
<th>Total annual responses</th>
<th>Average burden per response</th>
<th>Total hours</th>

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–0007]

Fee for Using a Rare Pediatric Disease Priority Review Voucher in Fiscal Year 2017

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the fee rate for using a rare pediatric disease priority review voucher for fiscal year (FY) 2017. The Federal Food, Drug, and Cosmetic Act (the FD&C Act), as amended by the Food and Drug Administration Safety and Innovation Act (FDASIA), authorizes FDA to determine and collect rare pediatric disease priority review user
fees for certain applications for review of human drug or biological products when those applications use a rare pediatric disease priority review voucher. These vouchers are awarded to the sponsors of rare pediatric disease product applications that meet all of the requirements of this program, are submitted 90 days or more after July 9, 2012, and upon FDA approval of such applications. The amount of the fee for using a rare pediatric disease priority review voucher is determined each FY based on the difference between the average cost incurred by FDA in the review of a human drug application subject to priority review in the previous FY, and the average cost incurred in the review of an application that is not subject to priority review in the previous FY. This notice establishes the rare pediatric disease priority review fee rate for FY 2017 and outlines the payment procedures for such fees.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

Section 908 of FDASIA (Pub. L. 112–144) added section 529 to the FD&C Act (21 U.S.C. 360ff). In section 529 of the FD&C Act, Congress encouraged development of new human drugs and biological products for prevention and treatment of certain rare pediatric diseases by offering additional incentives for obtaining FDA approval of such products. Under section 529 of the FD&C Act, the sponsor of an eligible human drug application submitted 90 days or more after July 9, 2012, for a rare pediatric disease (as defined in section 529(a)(3)) shall receive a priority review voucher upon approval of the rare pediatric disease product application. The recipient of a rare pediatric disease priority review voucher may either use the voucher for a future human drug application submitted to FDA under section 505(b)(1) of the FD&C Act (21 U.S.C. 355(b)(1)) or section 351(a) of the Public Health Service Act (42 U.S.C. 262(a)), or transfer (including by sale) the voucher to another party. The voucher may be transferred (including by sale) repeatedly until it ultimately is used for a human drug application submitted to FDA under section 505(b)(1) of the FD&C Act or section 351(a) of the Public Health Service Act. A priority review is a review conducted with a Prescription Drug User Fee Act (PDUFA) goal date of 6 months after the receipt or filing date, depending on the type of application. Information regarding PDUFA goals is available at http://www.fda.gov/downloads/forindustry/userfees/prescriptiondruguserfee/ucm270412.pdf.

The applicant that uses a rare pediatric disease priority review voucher is entitled to a priority review of its eligible human drug application, but must pay FDA a rare pediatric disease priority review user fee in addition to any user fee required by PDUFA for the application. Information regarding the rare pediatric disease priority review voucher program is available at: http://www.fda.gov/Drugs/DevelopmentApprovalProcess/DevelopmentResources/ucm375479.htm.

This notice establishes the rare pediatric disease priority review fee rate for FY 2017 at $2,706,000 and outlines FDA’s procedures for payment of rare pediatric disease priority review user fees. This rate is effective on October 1, 2016, and will remain in effect through September 30, 2017.

II. Rare Pediatric Priority Review User Fee for FY 2017

Under section 529(c)(2) of the FD&C Act, the amount of the rare pediatric disease priority review user fee is determined each fiscal year based on the difference between the average cost incurred by FDA in the review of a human drug application subject to priority review in the previous fiscal year, and the average cost incurred by FDA in the review of a human drug application that is not subject to priority review in the previous fiscal year.

A priority review is a review conducted with a PDUFA goal date of 6 months after the receipt or filing date, depending on the type of application. Under the PDUFA goals letter, FDA has committed to reviewing and acting on 90 percent of the applications granted priority review status within this expedited timeframe. Normally, an application for a human drug or biological product will qualify for priority review if the product is intended to treat a serious condition and, if approved, would provide a significant improvement in safety or effectiveness. An application that does not receive a priority designation will receive a standard review. Under the PDUFA goals letter, FDA has committed to reviewing and acting on 90 percent of standard applications within 10 months of the receipt date depending on the type of application. A priority review involves a more intensive level of effort and a higher level of resources than a standard review.

Section 529 of the FD&C Act specifies that the rare pediatric disease priority review voucher fee amount must be based on the difference between the average cost incurred by the Agency in the review of a human drug application subject to a priority review in the previous fiscal year, and the average cost incurred by the Agency in the review of a human drug application not subject to a priority review in the previous fiscal year. FDA is setting a fee for FY 2017, which is to be based on standard cost data from the previous fiscal year, FY 2016. However, the FY 2016 submission cohort has not been closed out yet, thus the cost data for FY 2016 are not complete. The latest year for which FDA has complete cost data is FY 2015. Furthermore, because FDA has never tracked the cost of reviewing applications that get priority review as a separate cost subset, FDA estimated this cost based on other data that the Agency has tracked. FDA uses data that the Agency estimates and publishes on its Web site each year—standard costs for review. FDA does not publish a standard cost for “the review of a human drug application subject to priority review in the previous fiscal year.” However, we expect all such applications would contain clinical data. The standard cost application categories with clinical data that FDA publishes each year are: (1) New drug applications (NDAs) for a new molecular entity (NME) with clinical data and (2) biologic license applications (BLAs) with clinical data.

The standard cost worksheets for FY 2015 show standard costs (rounded to the nearest thousand dollars) of $5,251,000 for an NME NDA, and $5,055,000 for a BLA. Based on these standard costs, the total cost to review the 56 applications in these two categories in FY 2015 (32 NME NDAs and 24 BLAs with clinical data) was $289,352,000. (Note: These numbers exclude the President’s Emergency Plan for AIDS Relief NDAs, no investigational new drug (IND) review costs are included in this amount.) Twenty-five of these applications (18 NDAs and 7 BLAs) received priority review, which would mean that the remaining 31 received standard reviews. Because a priority review compresses a review schedule that ordinarily takes 10 months into 6 months, FDA estimates that a multiplier of 1.67 (10 months divided by 6 months) should be applied to non-priority review costs in estimating the additional cost of a priority review as compared to a standard review. This multiplier is
consistent with published research on this subject which supports a priority review multiplier in the range of 1.48 to 2.35 (Ref. 1). Using FY 2015 figures, the costs of a priority and standard review are estimated using the following formula:

\[(25 \times 1.67) + (31 \times \alpha) = 289,352,000\]

Where “\(\alpha\)” is the cost of a standard review and “\(\alpha \times 1.67\)” is the cost of a priority review. Using this formula, the cost of a standard review for NME NDAs and BLAs is calculated to be $3,977,000 (rounded to the nearest thousand dollars) and the cost of a priority review for NME NDAs and BLAs is 1.67 times that amount, or $6,642,000 (rounded to the nearest thousand dollars). The difference between these two cost estimates, or $2,665,000, represents the incremental cost of conducting a priority review rather than a standard review.

For the FY 2017 fee, FDA will need to adjust the FY 2015 incremental cost by the average amount by which FDA’s average costs increased in the 3 years prior to FY 2016, to adjust the FY 2015 amount for cost increases in FY 2016. That adjustment, published in the Federal Register on July 28, 2016 (see 81 FR 49674 at 49676), setting the FY 2017 PDUFA fee, is 1.5468 percent for the most recent year, not compounded. Increasing the FY 2015 incremental priority review cost of $2,665,000 by 1.5468 percent results in an estimated cost of $2,706,000 (rounded to the nearest thousand dollars). This is the rare pediatric disease priority review user fee amount for FY 2017 that must be submitted with a priority review voucher for a human drug application in FY 2017, in addition to any PDUFA fee that is required for such an application.

III. Fee Schedule for FY 2017

The fee rate for FY 2017 is set out in table 1:

<table>
<thead>
<tr>
<th>Table 1—Rare Pediatric Disease Priority Review Schedule for FY 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fee category</strong></td>
</tr>
<tr>
<td>Application submitted with a rare pediatric disease priority review voucher in addition to the normal PDUFA fee</td>
</tr>
</tbody>
</table>

IV. Implementation of Rare Pediatric Disease Priority Review User Fee

Under section 529(c)(4)(A) of the FD&C Act, the priority review user fee is due (i.e. the obligation to pay the fee is incurred) when a sponsor notifies FDA of its intent to use the voucher. Section 529(c)(4)(B) of the FD&C Act specifies that the application will be considered incomplete if the priority review user fee and all other applicable user fees are not paid in accordance with FDA payment procedures. In addition, section 529(c)(4)(C) specifies that FDA may not grant a waiver, exemption, reduction, or refund of any fees due and payable under this section of the FD&C Act. Beginning with FDA’s appropriation for FY 2015, the annual appropriation language states specifically that “priority review user fees authorized by 21 U.S.C. 360n and 360ff (section 529 of the FD&C Act) shall be credited to this account, to remain available until expended.” (Pub. L. 113–235, Section 5, Division A, Title VI).

The rare pediatric disease priority review fee established in the new fee schedule must be paid for any application that is received on or after October 1, 2016. In order to comply with this requirement, the sponsor must notify FDA 90 days prior to submission of the human drug application that is the subject of a priority review voucher of an intent to submit the human drug application, including the date on which the sponsor intends to submit the application.

Upon receipt of this notification, FDA will issue an invoice to the sponsor who has incurred a rare pediatric disease priority review voucher fee. The invoice will include instructions on how to pay the fee via wire transfer or check.

As noted in section II, if a sponsor uses a rare pediatric disease priority review voucher for a human drug application, the sponsor would incur the rare pediatric disease priority review voucher fee in addition to any PDUFA fee that is required for the application. The sponsor would need to follow FDA’s normal procedures for timely payment of the PDUFA fee for the human drug application.

V. Reference

The following reference is on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, and is available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

Funding Amount: Up to $977,400 in FY 2016, and subject to availability of appropriated funds, approximately $750,000 in FYs 2017 and 2018. Authority: Consolidated Appropriations Act, 2016 (Pub L. 114–113), Division H, Title II CFDA Number: 93.928.

Classification: The Jurisdictional Approach to Curing Hepatitis C among HIV/HCV Coinfected People of Color demonstration project seeks to: (1) Increase jurisdiction-level capacity to provide comprehensive screening, care and treatment for HCV among HIV/HCV co-infected people particularly in disproportionately affected racial and ethnic minority communities; (2) increase the numbers of HIV/HCV co-infected people who are diagnosed with hepatitis C, treated, and cured; (3) identify and provide technical assistance for jurisdictions to reach goals (1) and (2); and, (4) develop a plan for evaluation of the program impact.

During the original application period, as outlined in Funding Opportunity Announcement HRSA–16–189, no Ryan White Part B recipients (States) applied. This non-competitive single source cooperative agreement award will provide important resources in a part of the country that would not otherwise have any coverage.

NASTAD is a national non-profit alliance of state health department program directors who are responsible for administering HIV/AIDS and viral hepatitis health care, prevention, education, and supportive services programs funded by state and federal governments. These include programs funded by the Centers for Disease Control and Prevention and HRSA. In working closely with its members, NASTAD is dedicated to reducing the incidence of HIV/AIDS and HCV infections in the U.S. and its territories, and supports the provision of comprehensive, compassionate, and high quality care and prevention services to all persons living with HIV/AIDS and HCV, by ensuring responsible and sound public policies and practices. NASTAD’s hepatitis team provides guidance and technical assistance to strengthen the capacity of state and local health departments to develop, maintain, and enhance comprehensive hepatitis programs that address the continuum from prevention through cure. This infrastructure, experience, and strategic partnership between state hepatitis coordinators and AIDS directors make NASTAD the appropriate entity to receive a single-source funding award in an effort to facilitate engagement between the states and HRSA’s viral hepatitis efforts.

Dated: September 26, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary
[Document Identifier: 0990–New—60D]

Agency Information Collection Activities; Proposed Collection; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, announces plans to submit a new Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, OS seeks comments from the public regarding the burden estimate below or any other aspect of the ICR.

DATES: Comments on the ICR must be received on or before November 29, 2016.

ADDRESSES: Submit your comments to Information.Collection.Clearance@hhs.gov or by calling (202) 690–5683.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the document identifier 0990–New—60D for reference.

Information Collection Request Title: Assessment of the Impact of Energy Development on the Behavioral Health of Women in Western North Dakota and Eastern Montana.

Abstract: Region VIII Office of the Assistant Secretary for Health (OASH), Office on Women’s Health (OWH) is requesting approval from the Office of Management and Budget (OMB). The Office on Women’s Health (OWH) in the Office of the Assistant Secretary for Health, U.S. Department of Health and Human Services (HHS) was established in 1991. Its mission is to provide national leadership and coordination to improve the health of women and girls through policy, education and model programs. The vision of the Office on Women’s Health is that all women and girls achieve the best possible health. OASH/OWH has ten regional offices located throughout the country. As a leader in women health, OWH supports the development of culturally-based, gender-sensitive programs to address health disparities. Region VIII OASH/OWH is interested in improving women’s behavioral health associated with the impact of energy development through gender based data collection and analysis. The discovery and subsequent development of the Parshall Oil Field within the Bakken region of Western North Dakota has led to significant economic opportunity and population growth in the region (Eastern Montana and Western North Dakota). Rapid population growth has many intended and unintended consequences, both positive and negative, on the social and economic environment of the region and, consequently, the population’s health and well-being. There are well-documented environmental health issues associated with oil and gas development, including air, water, soil, noise, and light pollution. However, there are additional social, physical and mental health effects that are less well documented. Current research is very limited, but preliminary evidence suggests that women have unmet behavioral health needs due in part to the energy development and population surge in region. In 2013, The U.S. Department of Health and Human Services (HHS), Region VIII Offices, including the Office of the Assistant Secretary for Health (OASH), Office on Women’s Health (OWH) began to have discussions directly with state/local contacts about the impact this was having on public health and the specific impacts on women. Given this history and context, the Region VIII OASH/OWH, is undertaking an assessment to examine the impact of energy development on women’s behavioral health in Western North Dakota and Eastern Montana.

Likely Respondents: Data for this assessment will be collected through three mechanisms—a survey of women living in the assessment geography, approximately 20 focus groups with a cross-section of women and other key groups living in the assessment geography, and approximately 40 interviews with key leaders and stakeholders across a variety of governmental and non-governmental sectors. Combined, these data collection mechanisms will provide a quantitative and qualitative portrait of women’s behavioral health in the region.
OS specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Darius Taylor, Information Collection Clearance Officer.

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting. The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel; NIAID Investigator Initiated Program Project Applications (P01).

Date: October 13, 2016.

Time: 11:30 a.m. to 5:00 p.m.

Location: To review and evaluate grant applications.

Place: National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

Contact Person: Jay R. Radke, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room #3G11B National Institutes of Health, NIAID, 5601 Fishers Lane MSC–9823, Bethesda, MD 20892–9823, (240) 669–5046, jay.radke@nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle. DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2016–0061]

Meeting of the Homeland Security Academic Advisory Council

AGENCY: Department of Homeland Security.

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting.

SUMMARY: The Homeland Security Academic Advisory Council will meet on October 19, 2016 in Washington, DC. The meeting will be open to the public.

DATES: The Homeland Security Academic Advisory Council will meet on Wednesday, October 19, 2016, from 10:00 a.m. to 3:30 p.m. Please note that the meeting may close early if the Council has completed its business.

ADDRESS: The meeting will be held at the Woodrow Wilson International Center (Wilson Center) for Scholars, 1300 Pennsylvania Ave. NW., 6th Floor, Moynihan Board Room, Washington, DC 20004. All visitors to the Wilson Center must bring a Government-issued photo ID.

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, send an email to AcademicEngagement@hq.dhs.gov or contact Lindsay Burton at 202–447–4686 as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Council prior to the adoption of the recommendations as listed in the SUPPLEMENTARY INFORMATION section below. Comments must be submitted in writing no later than Tuesday, October 11, 2016, must include DHS–2016–0061 as the identification number, and may be submitted using one of the following methods:

- Email: AcademicEngagement@hq.dhs.gov. Include the docket number in the subject line of the message.
- Fax: 202–282–1044.
- Mail: Academic Engagement; Office of Academic Engagement/Mailstop 0440; Department of Homeland Security; 245 Murray Lane SW., Washington, DC 20528–0440

Instructions: All submissions received must include the words “Department of Homeland Security” and the docket number for this action. Comments will be posted without alteration at http://www.regulations.gov, including any personal information provided.

Docket: For access to the docket, to read background documents or comments received by the Homeland Security Academic Advisory Council, go to http://www.regulations.gov and search for “Homeland Security Academic Advisory Council” then select the notice dated September 30, 2016.

One thirty-minute public comment period will be held during the meeting on October 19, 2016 after the conclusion of the presentation of draft recommendations, but before the Council deliberates. Speakers will be requested to limit their comments to three minutes. Contact the Office of Academic Engagement as indicated below to register as a speaker.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. appendix. The Homeland Security Academic Advisory Council provides advice and recommendations to the Secretary and senior leadership on matters relating to student and recent graduate recruitment; international students; academic research; campus and community resiliency, security and preparedness; faculty exchanges; and cybersecurity.

Agenda: Department of Homeland Security senior leadership will provide an update on the Department’s efforts in implementing the Council’s approved recommendations as well as its recent initiatives with the academic community. The Council subcommittees may provide progress reports and present draft recommendations for action in response to the tasks issued by the Department.

The meeting materials will be posted to the Council Web site at: http://www.dhs.gov/homeland-security-academic-advisory-council-hsaaac on or before October 14, 2016.

Dated: September 8, 2016.

Trent Frazier,
Executive Director for Academic Engagement. [FR Doc. 2016–22123 Filed 9–29–16; 8:45 am]

BILLING CODE 9110–9B–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

RIN 1615–ZB60

ACTION: Notice.

SUMMARY: On September 28, 2016, President Obama issued a memorandum to the Secretary of Homeland Security
Humanitarian/temporary-protected status

For Liberians by selecting “DED Granted Country: Liberia” from the menu on the left of the DED Web page.

• Further information will also be available at local USCIS offices upon publication of this Notice.

SUPPLEMENTARY INFORMATION:

Table of Abbreviations

DED—Deferred Enforced Departure
DHS—Department of Homeland Security
EAD—Employment Authorization Document
FNC—Final Nonconfirmation
OSC—Department of Justice, Office of Special Counsel for Immigration-Related Unfair Employment Practices
SAVE—USCIS Systematic Alien Verification for Entitlements Program
Secretary—Secretary of Homeland Security
TCN—Tentative Nonconfirmation
TPS—Temporary Protected Status
TTY—Text Telephone
USCIS—U.S. Citizenship and Immigration Services

Presidential Memorandum Extending DED for Certain Liberians

Pursuant to his constitutional authority to conduct the foreign relations of the United States, President Obama has determined that there are compelling foreign policy reasons to again extend Deferred Enforced Departure (“DED”) to Liberian nationals who are currently residing in the United States under the existing grant of DED. The President accordingly directed that Liberian nationals (and eligible persons without nationality who last resided in Liberia) who are physically present in the United States, have continuously resided in the United States since October 1, 2002; and who remain eligible for DED through September 30, 2016, be provided DED for an additional 18-month period. See Presidential Memorandum—Deferred Enforced Departure for Liberians, September 28, 2016 (“Presidential Memorandum”) at https://www.whitehouse.gov/the-press-office/2016/09/28/presidential-memorandum-deferred-enforced-departure-liberians. Note that only individuals who held Temporary Protected Status (TPS) on September 30, 2007, the date that a former TPS designation of Liberia terminated, are eligible for DED, provided they have continued to meet all other eligibility criteria established by the President. The President also directed the Secretary to implement the necessary steps to authorize employment authorization for eligible Liberians for 18 months, from October 1, 2016 through March 31, 2018.

Employment Authorization and Filing Requirements

How will I know if I am eligible for employment authorization under the Presidential Memorandum that extended DED for certain Liberians for 18 months?

The DED extension and the procedures for employment authorization in this Notice apply only to Liberian nationals (and persons without nationality who last habitually resided in Liberia) who:

• Are physically present in the United States;

• Have continuously resided in the United States since October 1, 2002; and

• Are under a grant of DED as of September 30, 2016.

The above eligibility criteria are described in the Presidential Memorandum. Only individuals who held TPS on September 30, 2007, the date that a former TPS designation of Liberia terminated, are eligible for DED under this extension, provided they have continued to meet all other eligibility criteria established by the President. This DED extension does not include any individual:

• Who would be ineligible for TPS for the reasons provided in section 244(c)(2)(B) of the Immigration and Nationality Act, 8 U.S.C. 1254a(c)(2)(B);

• Whose removal the Secretary determines is in the interest of the United States;

• Whose presence or activities in the United States the Secretary of State has reasonable grounds to believe would have potentially serious adverse foreign policy consequences for the United States;

• Who has voluntarily returned to Liberia or his or her country of last habitual residence outside the United States;

• Who was deported, excluded, or removed prior to September 26, 2014; or

• Who is subject to extradition.

What will I need to file if I am covered by DED and would like to have evidence of employment authorization?

If you are covered under DED for Liberia, and would like evidence of your employment authorization during the 16-month extension of DED, you must apply for an EAD by filing an Application for Employment Authorization (Form I–765). USCIS will begin accepting these applications on
Can I file my Application for Employment Authorization (Form I–765) electronically?

No. Electronic filing is not available when filing Application for Employment Authorization (Form I–765) based on DED.

Extension of Employment Authorization and EADs

May I request an interim EAD at my local USCIS office?

No. USCIS will not issue interim EADs to individuals eligible for DED under the Presidential Memorandum at local offices.

Am I eligible to receive an automatic 6-month extension of my current EAD through March 31, 2017?

You are eligible for an automatic 6-month extension of your EAD if you are a national of Liberia (or person having no nationality who last habitually resided in Liberia), you are currently covered by DED through September 30, 2016, and you are within the class of persons approved for DED by the President.

This automatic extension covers EADs issued on the Employment Authorization Document (Form I–766) bearing an expiration date of September 30, 2016. These EADs must also bear the notation “A–11” on the face of the card under “Category.”

When hired, what documentation may I show to my employer as proof of employment authorization and identity when completing Employment Eligibility Verification (Form I–9)?

You can find a list of acceptable document choices on the “Lists of Acceptable Documents” for Employment Eligibility Verification (Form I–9). You can find additional detailed information on the USCIS I–9 Central Web page at http://www.uscis.gov/I-9Central. Employers are required to verify the identity and employment authorization of all new employees by using Employment Eligibility Verification (Form I–9). Within 3 days of hire, an employee must present proof of identity and employment authorization to his or her employer.

You may present any document from List A (reflecting both your identity and employment authorization), or one document from List B (reflecting identity) together with one document from List C (reflecting employment authorization). You may present an acceptable receipt for List A, List B, or List C documents as described in the Employment Eligibility Verification (Form I–9) Instructions. An EAD is an acceptable document under “List A.”

Employers may not reject a document based on a future expiration date.

If your EAD has an expiration date of September 30, 2016, and states “A–11” under “Category,” it has been extended automatically for 6 months by virtue of this Federal Register Notice, and you may choose to present your EAD to your employer as proof of identity and employment authorization for Employment Eligibility Verification (Form I–9) through March 31, 2017 (see the subsection titled “How do my employer and I complete the Employment Eligibility Verification (Form I–9) using an automatically extended EAD for a new job?” for further information). To minimize confusion over this extension at the time of hire, you may also show your employer a copy of this Federal Register Notice confirming the automatic extension of employment authorization through March 31, 2017. As an alternative to presenting your automatically extended EAD, you may choose to present any other acceptable document from List A, a combination of one selection from List B and one selection from List C, or a valid receipt.
What documentation may I show my employer if I am already employed but my current DED-related EAD is set to expire?

Even though EADs with an expiration date of September 30, 2016 that state “A–11” under “Category” have been automatically extended for 6 months by virtue of this Federal Register Notice, your employer will need to ask you about your continued employment authorization by September 30, 2016 to meet its responsibilities for Employment Eligibility Verification (Form I–9) compliance. You should explain to your employer that USCIS has automatically extended your EAD through March 31, 2017. Your employer may need to reinspect your automatically extended EAD to check the expiration date and code and to record the updated expiration date on your Employment Eligibility Verification (Form I–9) if he or she did not keep a copy of this EAD when you initially presented it. However, your employer does not need a new document to reverify your employment authorization until March 31, 2017, the expiration date of the automatic extension. Instead, you and your employer must make corrections to the employment authorization expiration dates in Section 1 and Section 2 of Employment Eligibility Verification (Form I–9) (see the subsection titled “What corrections should my current employer and I make to Employment Eligibility Verification (Form I–9) if my EAD has been automatically extended?” for further information). In addition, you may also show this Federal Register Notice to your employer to explain what to do for Employment Eligibility Verification (Form I–9).

By March 31, 2017, the expiration date of the automatic extension, your employer must reverify your employment authorization. At that time, you must present any document from List A or any document from List C on Employment Eligibility Verification (Form I–9) to reverify employment authorization, or an acceptable List A or List C receipt described in the Employment Eligibility Verification (Form I–9) Instructions. Your employer should complete either Section 3 of the Employment Eligibility Verification (Form I–9) originally completed for the employee or, if this Section has already been completed or if the version of Employment Eligibility Verification (Form I–9) has expired (check the date in the upper right-hand corner of the form), complete Section 3 of a new Employment Eligibility Verification (Form I–9) of the most current version.

Note that employers may not specify which List A or List C document employees must present, and cannot reject an acceptable receipt.

Can my employer require that I produce any other documentation to prove my status, such as proof of my Liberian citizenship?

No. When completing Employment Eligibility Verification (Form I–9), including re-verifying employment authorization, employers must accept any documentation that appears on the “Lists of Acceptable Documents” for Employment Eligibility Verification (Form I–9) that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request documentation that does not appear on the Lists of Acceptable Documents for Employment Eligibility Verification (Form I–9). Therefore, employers may not request proof of Liberian citizenship when completing Employment Eligibility Verification (Form I–9) for new hires, making corrections, or re-verifying the employment authorization of current employees. If presented with EADs that have been automatically extended, employers should accept such EADs as valid List A documents so long as the EADs reasonably appear to be genuine and to relate to the employee. Refer to the Note to Employees section of this Notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin.

What happens after March 31, 2017, for purposes of employment authorization?

After March 31, 2017, employers may no longer accept the EADs that were issued under the previous DED extension of Liberia that this Federal Register Notice automatically extended. Before that time, however, USCIS will endeavor to issue new EADs to eligible individuals covered by DED who request them. These new EADs will have an expiration date of March 31, 2018, and can be presented to your employer for completion of Employment Eligibility Verification (Form I–9). Alternatively, you may choose to present any other legally acceptable document or combination of documents listed on the Lists of Acceptable Documents for Employment Eligibility Verification (Form I–9).

How do my employer and I complete Employment Eligibility Verification (Form I–9) using an automatically extended EAD for a new job?

When using an automatically extended EAD to fill out Employment Eligibility Verification (Form I–9) for a new job prior to March 31, 2017, you and your employer should do the following:

1. For Section 1, you should:
   a. Check “An alien authorized to work”;
   b. Write your alien number (USCIS number or A-number) in the first space (your EAD or other document from DHS will have your USCIS number or A-number printed on it; the USCIS Number is the same as your A-number without the A prefix); and
   c. Write the automatically extended EAD expiration date (March 31, 2017) in the second space.

2. For Section 2, employers should record the:
   a. Document title;
   b. Document number; and
   c. Automatically extended EAD expiration date (March 31, 2017).

By March 31, 2017, employers must reverify the employee’s employment authorization in Section 3 of Employment Eligibility Verification (Form I–9).

What corrections should my current employer and I make to Employment Eligibility Verification (Form I–9) if my EAD has been automatically extended?

If you are an existing employee who presented a DED-related EAD that was valid when you first started your job, but that EAD has now been automatically extended, your employer may need to reinspect your automatically extended EAD if your employer does not have a copy of the EAD on file, and you and your employer should correct your previously completed Employment Eligibility Verification (Form I–9) as follows:

1. For Section 1, you should:
   a. Draw a line through the expiration date in the second space;
   b. Write “March 31, 2017” above the previous date;
   c. Write “DED Ext.” in the margin of Section 1; and
   d. Initial and date the correction in the margin of Section 1.

2. For Section 2, employers should:
   a. Draw a line through the expiration date written in Section 2;
   b. Write “March 31, 2017” above the previous date;
   c. Write “DED Ext.” in the margin of Section 2; and
   d. Initial and date the correction in the margin of Section 2.
By March 31, 2017, when the automatic extension of EADs expires, employers must reverify the employee’s employment authorization in Section 3.

If I am an employer enrolled in E-Verify, what do I do when I receive a “Work Authorization Documents Expiring” alert for an automatically extended EAD?

E-Verify has automated the verification process for employees whose DED was automatically extended in a Federal Register notice. If you have an employee covered under DED who provided a DED-related EAD when he or she first started working for you, you may receive a “Work Authorization Documents Expiring” case alert when the auto-extension period for this EAD is about to expire. By March 31, 2017, you must reverify employment authorization in Section 3 of the Employment Eligibility Verification (Form I-9). Employers should not use E-Verify for reverification.

Note to Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This Notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at I-9Central@dhs.gov. Calls and emails are accepted in English and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (I–9 and E-Verify), employers may also call the U.S. Department of Justice, Office of Special Counsel for Immigration-Related Unfair Employment Practices (OSC) Employer Hotline, at 800–237–2515, which offers language interpretation in numerous languages, or email OSC at oscrt@usdoj.gov.

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email at I–9Central@dhs.gov. Calls are accepted in English, Spanish and many other languages. Employees or applicants may also call the OSC Worker Information Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based upon citizenship, immigration status, or national origin, including discrimination related to Employment Eligibility Verification (Form I–9) and E-Verify. The OSC Worker Information Hotline provides language interpretation in numerous languages.

To comply with the law, employers must accept any document or combination of documents from the List of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt described in the Employment Eligibility Verification (Form I–9) Instructions. Employers may not require extra or additional documentation beyond what is required for Employment Eligibility Verification (Form I–9) completion. Further, employers participating in E-Verify who receive an E-Verify case result of “Tentative Nonconfirmation” (TNC) must promptly inform employees of the TNC and give such employees an opportunity to contest the TNC. A TNC case result means that the information entered into E-Verify from Employment Eligibility Verification (Form I–9) differs from Federal or State government records.

Employers may not terminate, suspend, delay training, withhold pay, lower pay, or take any adverse action against an employee based on the employee’s decision to contest a TNC or because the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result is received when E-Verify cannot verify an employee’s employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY for the hearing impaired is at 877–875–6028). To report an employer for discrimination in the E-Verify process based on citizenship or immigration status, or based on national origin, contact OSC’s Worker Information Hotline at 800–237–2515. Additional information about proper nondiscriminatory Employment Eligibility Verification (Form I–9) and E-Verify procedures is available on the OSC Web site at http://www.justice.gov/crt/about/osc/ and the USCIS Web site at http://www.dhs.gov/E-verify.

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles) 

While Federal Government agencies must follow the guidelines laid out by the Federal Government, state and local government agencies establish their own rules and guidelines when granting certain benefits. Each State may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are covered by DED and/or show you are authorized to work based on DED. Examples are:

1. Your unexpired EAD that has been automatically extended, or your EAD that has not expired;
2. A copy of this Federal Register Notice if your EAD is automatically extended under this Notice;
3. A copy of your past Application for Temporary Protected Status Notice of Action (Form I–797), if you received one from USCIS, coupled with a copy of the Presidential Memorandum extending DED for Liberians; and/or
4. If there is an automatic extension of work authorization, a copy of the fact sheet from the USCIS DED Web site that provides information on the automatic extension.

Check with the government agency regarding which document(s) the agency will accept. You may also provide the agency with a copy of this Federal Register Notice.

Some benefit-granting agencies use the USCIS Systematic Alien Verification for Entitlements Program (SAVE) to verify the current immigration status of applicants for public benefits. You can check the status of your SAVE verification by using CaseCheck at the following link: https://save.uscis.gov/casecheck/, then by clicking the “Check Your Case” button. CaseCheck is a free and fast service that lets you follow the progress of your SAVE verification using your date of birth and one immigration identifier number. If such an agency has denied your application based solely or in part on a SAVE response, the agency must offer you the opportunity to appeal the decision in accordance with the agency’s procedures. If the agency has received and acted upon or will act upon a SAVE verification and you do not believe the response is correct, you may make an InfoPass appointment for an in-person interview at a local USCIS office. Detailed information on how to make corrections or make an appointment can be found at the SAVE Web site at http://www.uscis.gov/save, then by choosing “For Benefit Applicants” from the menu on the left and then selecting “Questions about Your Records?” Travel Authorization and Advance Parole.
Individuals covered under DED who would like to travel outside of the United States must apply for and receive advance parole by filing an Application for Travel Document (Form I–131) with required fee before departing from the United States. See 8 CFR 223.2(a). DHS has the discretion to determine whether to grant advance parole and cannot guarantee advance parole in all cases. In addition, possession of an advance parole document does not guarantee that you will be permitted to re-enter the United States, as that is a decision that will be made by an immigration officer at the port of entry upon your return. If you seek advance parole to travel to Liberia or to your country of last habitual residence outside the United States, you will risk being found ineligible to re-enter the United States under DED because the Presidential Memorandum excludes persons “who have voluntarily returned to Liberia or his or her country of last habitual residence outside the United States.”

You may submit your completed Application for Travel Document (Form I–131) with your Application for Employment Authorization (Form I–765). If you are filing the Application for Travel Document (Form I–131) concurrently with your Application for Employment Authorization (Form I–765), please submit both applications and supporting documentation to the proper address in Table 1.

If you choose to file an Application for Travel Document (Form I–131) separately, please submit the application along with supporting documentation that you qualify for DED to the proper address in Table 2.

### Table 2—Mailing Addresses

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0009]

Agency Information Collection Activities: Petition for Nonimmigrant Worker, Form I–129; Extension, Without Change, of a Currently Approved Collection

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection notice was previously published in the Federal Register on July 19, 2016, at 81 FR 46951, allowing for a 60-day public comment period. USCIS did receive 16 comments in connection with the 60-day notice.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until October 31, 2016. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB USCIS Desk Officer via email at oira_submission@omb.eop.gov. Comments may also be submitted via fax at (202) 395–5806. (This is not a toll-free number.) All submissions received must include the agency name and the OMB Control Number 1615–0009.

You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make. For additional information please read the Privacy Act notice that is available via the link in the footer of http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529–2140, Telephone number (202) 272–8377 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at http://www.uscis.gov, or call the USCIS National Customer Service Center at (800) 375–5283; TTY (800) 767–1833.

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: http://www.regulations.gov and enter USCIS–2005–0030 in the search box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) Type of Information Collection Request: Extension, Without Change, of a Currently Approved Collection.

(2) Title of the Form/Collection: Petition for Nonimmigrant Worker.

(3) Agency form number, if any, and the applicable component of the DHS sponsoring the collection: I–129; USCIS.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Business or other for-profit; Not-for-profit institutions. This form is used by an employer to petition for aliens to come to the U.S. temporarily to perform services, labor, and training or to request extensions of stay or changes in nonimmigrant status for nonimmigrant workers.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: The estimated total number of respondents for the information collection Form I–129 is 333,891 and the estimated hour burden per response is 2.34 hours.

(6) An estimate of the total public burden (in hours) associated with the collection: The estimated total annual hour burden associated with this collection is 1,631,400 hours.

(7) An estimate of the total public burden (in cost) associated with the collection: The estimated total annual cost burden associated with this collection of information is $78,027,021.25.

Dated: September 27, 2016.

Samantha Deshommes,

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
(2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;
(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. HUD encourages interested parties to submit comment in response to these questions.

Anna P. Guido,
Department Paperwork Reduction Act Officer, Office of the Chief Information Officer.

[Docket No. FR–5909–N–70]

30-Day Notice of Proposed Information Collection: Notice of Proposed Information Collection for License for the Use of Personally Identifiable Information Protected Under the Privacy Act of 1974

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for renewal of the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: Comments Due Date: October 31, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street, SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–5535 (this is not a toll-free number) or email at Anna.P.Guido@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410; email Anna P. Guido at Anna.P.Guido@hud.gov or telephone 202–402–5535. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for renewal of the information collection described in Section A. The Federal Register notice that solicited public comment on the information collection for a period of 60 days was published on July 27, 2016 at 81 FR 49247.

A. Overview of Information Collection

Title of Information Collection: License for the Use of Personally Identifiable Information Protected Under the Privacy Act of 1974.

OMB Control Number: 2528–0297.

Type of Request: Revision of a currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: The United States Department of Housing and Urban Development (HUD) has collected and maintains personally identifiable information, the confidentiality of which is protected by the Privacy Act of 1974 (5 U.S.C 522A). HUD wishes to make the data available for statistical, research, or evaluation purposes for qualified organizations capable of research and analysis consistent with the statistical, research, or evaluation purposes for which the data were provided or are maintained, but only if the data are used and protected in accordance with the terms and conditions stated in this license (License). Upon receipt of such assurance of qualification and capability, it is hereby agreed between HUD and (Name of the organization to be licensed) that the license be granted.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

1. Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. The accuracy of the agency’s estimate of the burden of the proposed collection of information;
3. Ways to enhance the quality, utility, and clarity of the information to be collected; and
4. Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–427–7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in National Coalition for the Homeless v. Veterans Administration, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency’s needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as suitable or excess, the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, The Department of Health and Human Services, Room 12–07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. (301)–443–2245 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 or send an email to title5@hud.gov for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the Federal Register, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (e.g., acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: COE: Ms. Brenda Johnson-Turner, HQUSACE/CEMP–CR, 441 G Street NW., Washington, DC 20314, (202)–761–7238; GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040, Washington, DC 20405, (202) 501–0084; INTERIOR: Mr. Michael Wright, Acquisition & Property Management, Department of the Interior, 3960 N. 56th Ave. #104, Hollywood, FL 33021; (443) 223–4639; NASA: Mr. William Brodt, National Aeronautics AND Space Administration, 300 E Street SW., Room 2P85, Washington, DC 20546, (202)–358–1117; NAVY: Ms. Nikki Hunt, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374; (202)–685–9426; (These are not toll-free numbers).
Suitable/Available Properties

Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Habitat Conservation Plans, Clay, Lake, Marion, and Putnam County, FL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment/information.

SUMMARY: We, the Fish and Wildlife Service (Service), are proposing to issue a permit and effect a conservation plan under the Endangered Species Act of 1973, as amended (Act). Vulcan Materials Company requests a 30-year ITP. We request public comment on the permit application and accompanying proposed habitat conservation plan (HCP), as well as on our preliminary determination that the plan qualifies as low-effect under the National Environmental Policy Act (NEPA). To make this determination, we used our environmental action statement and low-effect screening form, which are also available for review.

DATES: To ensure consideration, please send your written comments by October 31, 2016.

ADDRESSES: If you wish to review the application and HCP, you may request documents by email, U.S. mail, or phone (see below). These documents are also available for public inspection by appointment during normal business hours at the office below. Send your comments or requests by any one of the following methods:

Email: northflorida@fws.gov, Attn: Permit number TE96856B–0.
Fax: Field Supervisor, (904) 731–3191, Attn: Permit number TE96856B–0.
In-person drop-off: You may drop off information during regular business hours at the above office address.

FOR FURTHER INFORMATION CONTACT: Erin M. Gawera, telephone: (904) 731–3121; email: erin_gawera@fws.gov.

SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Act (16 U.S.C. 1531 et seq.) and our implementing Federal regulations in the Code of Federal Regulations (CFR) at 50 CFR 17 prohibit the “take” of fish or wildlife species listed as endangered or threatened. Take of listed fish or wildlife is defined under the Act as “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct” (16 U.S.C. 1532). However, under limited circumstances, we issue permits to authorize incidental take—i.e., take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity.

Regulations governing incidental take permits for threatened and endangered species are at 50 CFR 17.32 and 17.22, respectively. The Act’s take prohibitions do not apply to federally listed plants on private lands unless such take would violate State law. In addition to meeting other criteria, an incidental take permit’s proposed actions must not jeopardize the existence of federally listed fish, wildlife, or plants.

Applicants’ Proposal

Vulcan Materials Company proposes incremental mining of sand reserves throughout the 8,660.71-acre permitted mining limits of seven mine sites (Astatula Sand Plant, Goldhead Sand Plant, Keuka Sand Plant, Lake Sand Plant, Marion Sand Plant, Turnpike Sand Plant, and Weirsdale Sand Plant) over the life of the mines, and seeks a 30-year permit for take of foraging and sheltering habitat occupied by scrub-jay and sand skink. The project sites are located in Clay, Lake, Marion, and Putnam Counties within North and Central Florida, Florida. The extent of direct impacts in future phases is currently undetermined; however, based on the current USFWS guidelines, approximately 1,489.31 acres of the site appear to be suitable for the sand skink, and approximately 26 acres of the site appear to be occupied by the Florida scrub-jay. In advance of the progression of the mining operations into future phases, quantitative surveys will be conducted for the Florida scrub-jay and sand skinks, to determine the occupancy and extent of occupancy within suitable areas. The completion of these surveys will be subject to the Service’s approved survey guidelines at the time the surveys are conducted.

Our Preliminary Determination

We have determined that the applicants’ proposals, including the proposed mitigation and minimization measures, would have minor or negligible effects on the species covered in their HCPs. Therefore, we have determined that the incidental take permit for this project is “low effect” and qualifies for categorical exclusion under the National Environmental Policy Act (NEPA), as provided by 43 CFR 46.205 and 43 CFR 46.210. A low-effect HCP is one involving (1) Minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources.

Next Steps

We will evaluate the HCPs and comments we receive to determine whether the ITP applications meet the requirements of section 10(a) of the Act (16 U.S.C. 1531 et seq.). If we determine that the application meets these requirements, we will issue ITP number #TE96856B–0. We will also evaluate whether issuance of the section 10(a)(1)(B) ITPs complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue the ITP. If the requirements are met, we will issue the permit to the applicant.

Public Comments

If you wish to comment on the permit application, HCP, and associated documents, you may submit comments by any one of the methods in ADDRESSES.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comments, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we
cannot guarantee that we will be able to do so.

Authority

We provide this notice under Section 10 of the Act and NEPA regulations (40 CFR 1506.6).

Jay B. Herrington, 
Field Supervisor, Jacksonville Field Office, Southeast Region.

Notice of Amended Proposed Withdrawal and Notice of Public Meetings; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary of the Interior for Land and Minerals Management has approved an amendment to a previously filed application to withdraw public domain and Revested Oregon California Railroad lands (O&C) managed by the Bureau of Land Management (BLM) and National Forest System (NFS) lands managed by the U.S. Forest Service (Forest Service) while Congress considers legislation to permanently withdraw those lands. Such legislation is currently pending in the 114th Congress as S. 346 and H.R. 682 and identified as the “Southwestern Oregon Watershed and Salmon Protection Act of 2015.” This Notice amends the prior proposal notice of which was published in the Federal Register on June 29, 2015, to increase the proposed withdrawal term from 5 years to 20 years, and to add that the withdrawal is also being proposed at the request of the BLM and the Forest Service, to protect the Southwestern Oregon watershed from possible adverse effects of mineral development. This notice gives the public an opportunity to comment on the amended application and announces the dates, times, and locations of public meetings.

DATES: Comments must be received by December 29, 2016.

FOR FURTHER INFORMATION CONTACT: Jacob Childers, Oregon State Office, Bureau of Land Management, at 503–808–6225 or by email jccchilders@blm.gov. Individuals who submit written comments are requested to withhold confidentiality from any personal identifying information in your comment, you should be aware that your entire comment—excluding your personal identifying information—may be made publicly available at any time.

Notice is hereby given that public meetings will be held in connection with the amended proposed withdrawal. A notice of the times and places of the public meetings will be announced at least 30 days in advance in the Federal Register and through
local media, newspapers, and the BLM and the USFS Web sites.

The amended application does not affect the current segregation, which expires June 28, 2017, unless the application is denied or canceled or the withdrawal is approved prior to that date.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

Leslie A. Frewing,
Chief, Branch of Land, Minerals, and Energy Resources, Acting.

Notice of Availability of the Draft
Craters of the Moon National Monument and Preserve Plan Amendment and Environmental Impact Statement, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) has prepared a Draft Monument Management Plan (MMP) Amendment and Draft Environmental Impact Statement (EIS) for the Craters of the Moon National Monument and Preserve (Monument) and by this notice is announcing the opening of the public comment period.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the Draft MMP Amendment/Draft EIS by December 29, 2016. The BLM will announce future meetings or hearings and any other public participation activities at least 15 days in advance through public notices, media releases, and/or mailings.

ADDRESSES: You may submit comments related to the Draft MMP Amendment/Draft EIS by any of the following methods:

– email: BLM ID CRMO@blm.gov.
– mail: BLM Shoshone FO, 400 West F Street, Shoshone, ID 83352.

Copies of the Draft MMP Amendment/Draft EIS are available in the Shoshone Field Office at the above address.

FOR FURTHER INFORMATION CONTACT: Lisa Cresswell, Planning Team Lead, telephone 208–732–7200; BLM Shoshone Field Office, 400 West F Street Shoshone, ID 83352; email BLM_ID_CRMO@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact Ms. Cresswell. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question for Ms. Cresswell. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Draft MMP Amendment/Draft EIS for the Craters of the Moon National Monument and Preserve (Monument) is now available. The BLM prepared this document in consultation with cooperating agencies and in accordance with NEPA, FLPMA, implementing regulations, the BLM’s Land Use Planning Handbook (H–1601–1) and National Environmental Policy Handbook (H–1790–1), and other applicable law and policy, including BLM Instruction Memorandum No. 2016–105, Land Use Planning and Environmental Policy Act Compliance within Greater Sage-Grouse Approved Resource Management Plans and Plan Amendments Decision Area.

The original Monument was created in 1924 by President Calvin Coolidge and was expanded in 2000 by President Bill Clinton. The Monument is part of the BLM’s National Conservation Lands and one of two BLM national monuments jointly managed with the National Park Service. The MMP covers the approximately 275,100 BLM-managed acres of the 753,200-acre Monument.

In 2011, the U.S. District Court for the District of Idaho found that the 2007 MMP/EIS did not adequately consider current science and agency policies designed to protect Greater Sage-Grouse (GRSG) habitat, particularly with regard to managing livestock grazing in the Monument. The court also found that BLM violated NEPA by failing to analyze a sufficient range of livestock grazing alternatives. In September 2015, the BLM issued a decision amending BLM land use plans in Idaho and Southwestern Montana to address GRSG conservation, including the 2007 Craters of the Moon MMP. The 2015 decision and supporting analysis addressed several of the deficiencies identified by the Court with regard to GRSG conservation in the Monument, but the BLM determined that issues such as the location and amount of livestock grazing and protection of Monument values required additional analysis, which is addressed in this Draft MMP Amendment/Draft EIS.

The Draft MMP Amendment/Draft EIS analyzes management options for the BLM-managed portions of the Monument that were not evaluated in the EIS for the 2007 MMP, as amended by the 2015 Sage-Grouse Approved Resource Management Plan Amendment (ARMPA). This Draft MMP/EIS will amend the 2007 plan, but will not change decisions from the 2015 Sage-Grouse ARMPA. Its purpose is to consider a range of reasonable alternatives for managing livestock grazing and GRSG on BLM-managed lands in the Monument in a manner that maintains the values identified in the Presidential Proclamations that established and expanded it. The range of alternatives is broad, from those that would reduce the area available for grazing to those that would make the entire planning area unavailable for grazing.

The Draft MMP Amendment/Draft EIS analyzes five alternatives that provide a range of livestock grazing levels and availability. Alternative C is the BLM’s preferred alternative. Alternative A, the no action alternative, would continue the management established in the 2007 MMP as amended by the 2015 Sage-Grouse ARMPA. Under the No Action Alternative, 273,900 acres would be available for livestock grazing, with 38,187 animal unit months (AUMs).

Alternative B would reduce AUMs available for livestock grazing by 75 percent (making 9,432 AUMs available) and close five areas to grazing: Little Park kipuka, the North Pasture of Laidlaw Park Allotment, Larkspur Park kipuka, the North Pasture of Bowl Crater Allotment, and Park Field kipuka. This alternative would adjust two allotment boundaries to make 21,000 acres unavailable for livestock grazing and for the protection of GRSG and other Monument values. A total of 254,100 acres would be available for livestock grazing.

Alternative C, the agency-preferred alternative, would make 273,600 acres available for livestock grazing and adjust two allotment boundaries, which would set the maximum number of AUMs at 37,792. Where appropriate, livestock grazing would be used as a tool to improve and/or protect wildlife habitat. Guidelines for livestock grazing management would be set based on vegetation and wildlife habitat conditions and needs, consistent with the 2015 Sage-Grouse ARMPA.
Alternative D would eliminate livestock grazing from BLM-managed lands within the Monument boundary (0 acres and 0 AUMs available) and adjust two allotment boundaries. All livestock-related developments would be removed, while some fences might be required to exclude livestock from the Monument.

Alternative E would reduce AUMs available for livestock grazing by approximately 50 percent (making 19,388 AUMs available) and close Larkspur Park kipuka to grazing. This alternative would adjust two allotment boundaries and make 272,900 acres available for grazing. No net gain in livestock-related infrastructure would be allowed.

The land use planning process was initiated on June 28, 2013, through a Notice of Intent published in the Federal Register, notifying the public of a formal scoping period and soliciting public participation in the planning process. Four scoping meetings were held in July 2013 in Arco, Carey, Rupert, and American Falls, Idaho. Based on public input regarding relevant issues to consider in the planning process and BLM goals and objectives, the BLM formulated the five alternatives considered and analyzed in the Draft MMP Amendment/Draft EIS. Because nominations for the designation of areas of critical environmental concern (ACECs) were previously analyzed for the 2007 MMP, the BLM did not solicit new ACEC nominations during scoping.

Following the close of the public review and comment period, the Draft MMP Amendment/Draft EIS will be revised in preparation for its release as the Proposed MMP Amendment and Final EIS. The BLM will respond to substantive comments by making appropriate revisions to the document or explain why a comment did not warrant a change.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10, 43 CFR 1610.2.

Timothy M. Murphy,
BLM Idaho State Director.

DEPARTMENT OF THE INTERIOR
National Park Service
[NPS–MWR–THRO–21168; PPMWTHRO00/PROIEUC1380000]

Notice of 30 Day Comment Period for an Environmental Assessment on a Special Use Permit for a Wireless Telecommunication Facility

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: The National Park Service (NPS) is announcing a 30-day review period for an environmental assessment prepared for a permit request from Verizon Wireless to obtain a right-of-way to replace an existing communication tower with a shorter tower at Theodore Roosevelt National Park, North Dakota. This notice is issued in accordance with the procedures of Director’s Order 53, Special Park Uses.

DATES: Comments must be received on, or before October 31, 2016.

ADDRESSES: Information on this application process can be obtained by contacting the Superintendent at Theodore Roosevelt National Park, P.O. Box 7, Medora, North Dakota, 58645–0007, or by telephone at 701–623–4466.

FOR FURTHER INFORMATION CONTACT: Please contact Superintendent Wendy Ross at the address and telephone number listed above.

SUPPLEMENTARY INFORMATION: Theodore Roosevelt National Park (the Park) has received an application from Verizon Wireless to obtain a right of way to replace the Park’s existing communication tower with a shorter tower to accommodate Verizon Wireless equipment and to mitigate adverse impacts to park resources.

The current and proposed telecommunications site, located just northeast of U.S. Highway 85 at the park’s east boundary, is in Township 148 North, Range 99 West, in the northwest quarter of Section 26, in McKenzie County, North Dakota. The current tower accommodates U.S. Forest Service equipment as well as communications equipment belonging to the park that would be relocated to the new tower. The proposed project includes removing the current tower and blinking aviation lighting, and constructing a tower not to exceed 190 feet in height, a 12-foot by 30-foot equipment shed, a small graveled parking area, and supporting underground utilities. The new tower would not have blinking aviation lighting.

The no-action alternative would result in the park continuing to maintain its current tower and require Verizon to construct a second tower just outside the park boundary. The NPS is continuing to evaluate the proposal pursuant to the National Environmental Policy Act, the National Historic Preservation Act, the Telecommunications Act of 1966, and other NPS requirements, policies, and regulations. Impact analyses, including the effects, if any, on cultural resources, will be available for public review on the NPS planning, Environment, and Public Comment (PEPC) Web site at: http://parkplanning.nps.gov/publichome.cfm. A 30-day public review period for the environmental assessment will be held after the publishing of this notice. Project related background material, including press releases, site photographs, public scoping material, and other project related documents previously released, are available on the PEPC Web site at the address listed above.

Dated: July 13, 2016.

Cameron H. Sholly, Regional Director.

National Park Service
[NPS–WASO–NRRNL–21915; PPWOCRADIO, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before September 2, 2016, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by October 17, 2016.

ADDRESSES: Comments may be sent via U.S. Postal Service to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 6th Floor, Washington, DC 20005; or by fax, 202–371–6447.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places.
Places. Nominations for their consideration were received by the National Park Service before September 2, 2016. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

DEPARTMENT OF THE INTERIOR
Bureau of Ocean Energy Management
[Docket No. BOEM–2016–0068]

Draft Programmatic Environmental Impact Statement for Geological and Geophysical Activities on the Gulf of Mexico Outer Continental Shelf (OCS) MAAA104000

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of availability.

SUMMARY: BOEM has prepared a Draft Programmatic Environmental Impact Statement (PEIS) to evaluate potential environmental effects of multiple Geological and Geophysical (G&G) activities on the Gulf of Mexico OCS. These activities include, but are not limited to, seismic surveys, sidescan-sonar surveys, electromagnetic surveys, and geological and geochemical sampling. The Draft PEIS considers G&G activities for the three program areas managed by BOEM: Oil and gas exploration and development; renewable energy; and marine minerals. This notice initiates the public review and comment period and also serves to announce public meetings on the Draft PEIS. After the public meetings and written comments on the Draft PEIS have been reviewed and considered, a Final PEIS will be prepared.

A Notice of Intent (NOI) to prepare the PEIS was published in the Federal Register on May 10, 2013, and scoping comments were received during a comment period that was initially scheduled to close on June 24, 2013. The closing date of the public comment period was corrected to July 9, 2013, by publication of a Federal Register Notice on June 5, 2013.

DATES: Comments on this Draft PEIS will be accepted until November 29, 2016. BOEM has determined that a 60-day public comment period is warranted given the complex and technical nature of this Draft PEIS along with possible requests for extending the comment period. Additionally, due to litigation deadlines, no more than 60-days for public comment will be granted. See public meeting dates in the SUPPLEMENTARY INFORMATION section below.

FOR FURTHER INFORMATION CONTACT: Jill Lewandowski, Ph.D., Chief, Division of Environmental Assessment, Office of Environmental Programs, Bureau of Ocean Energy Management, 45600 Woodland Road, VAM–OEP, Sterling, VA 20166 or by email at godggeis@boem.gov.

SUPPLEMENTARY INFORMATION:
Public Availability: In keeping with the Department of the Interior’s mission to protect natural resources and to limit costs, while ensuring availability to the public, the Draft PEIS and associated information are available on BOEM’s Web site at http://www.boem.gov/nepaprocess/. BOEM will also distribute digital copies of the Draft PEIS on compact discs. BOEM will also be printing and distributing a very limited number of paper copies. You may request a digital or paper copy of the Draft PEIS from the Bureau of Ocean Energy Management, Gulf of Mexico OCS Region, Public Information Office (GM 250C), 1201 Elmwood Park Boulevard, Room 250, New Orleans, Louisiana 70123–2394 (1–800–200–GULF).

Comments: Governmental agencies, Native American tribes, the scientific community, industry groups, environmental interest groups, and any other interested parties may submit written comments on Draft PEIS through the following methods:

1. Federal eRulemaking Portal: http://www.regulations.gov. In the field entitled “Search,” enter “BOEM” and then click “search.” Follow the instructions to submit public comments and view supporting and related materials available for this notice.

Comments must be postmarked by the last day of the comment period to be considered.

3. Via electronic mail to godggeis@boem.gov.
Public Meetings: BOEM will also hold public meetings to solicit comment regarding the Draft Programmatic Environmental Impact Statement. The meetings are scheduled as follows:

- **New Orleans, Louisiana:**
  Wednesday, November 9, 2016, Wyndham Garden New Orleans Airport, 6401 Veterans Memorial Boulevard, Metairie, Louisiana 70003; one meeting beginning at 4:00 p.m. CST and ending at 7:00 p.m. CST;
- **Gulfport, Mississippi:** Thursday, November 10, 2016, Courtyard by Marriott, Gulfport Beachfront MS Hotel, 1600 East Beach Boulevard, Gulfport, Mississippi 39501; one meeting beginning at 4:00 p.m. CST and ending at 7:00 p.m. CST;
- **Fort Walton Beach, Florida:**
  Monday, November 14, 2016, Four Points By Sheraton Destin-Fort Walton Beach, 1325 Miracle Strip Parkway SE, Fort Walton Beach, Florida 32548; one meeting beginning at 4:00 p.m. CST and ending at 7:00 p.m. CST;
- **Mobile, Alabama:**
  Tuesday, November 15, 2016, The Admiral Hotel Mobile, Curio Collection by Hilton, 251 Government Street, Mobile, Alabama 36602; one meeting beginning at 4:00 p.m. CST and ending at 7:00 p.m. CST; and
- **Houston, Texas:**
  Thursday, November 17, 2016, Houston Marriott North, 255 North Sam Houston Pkwy. East, Houston, Texas 77060; one meeting beginning at 4:00 p.m. CST and ending at 7:00 p.m. CST.

Public Disclosure of Names and Addresses: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comments to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: This Notice of Availability is published pursuant to the regulations (40 CFR parts 1503 and 43 CFR part 46) implementing the provisions of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq. (1988)).

Abigail Ross Hopper
Director, Bureau of Ocean Energy Management.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR04310000, 16XR0680A1, RX002361010021000]

Notice of Availability for the Final Environmental Impact Statement for the Continued Implementation of the 2008 Operating Agreement for the Rio Grande Project, New Mexico and Texas

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, the Bureau of Reclamation (Reclamation) has prepared a Final Environmental Impact Statement (FEIS) to analyze the environmental impacts of continuing to implement the 2008 Rio Grande Project Operating Agreement (Operating Agreement) through 2050, and by this Notice is announcing its availability. The Operating Agreement is a written agreement describing how Reclamation allocates, releases from storage, and delivers Rio Grande Project water to the Elephant Butte Irrigation District (EBID) in New Mexico, the El Paso County Water Improvement District No. 1 (EPCWID) in Texas, and to Mexico. In addition, the FEIS evaluates the environmental effects of a proposal to renew a contract to store San Juan-Chama Project water in Elephant Butte Reservoir.

DATES: Reclamation will not issue a final decision on the proposed action for a minimum of 30 days after the date that the Environmental Protection Agency publishes its Notice of Availability of Weekly Receipt of Environmental Impact Statements in the Federal Register. After the 30-day public review period, Reclamation will complete a Record of Decision (ROD). The ROD will state the action that will be implemented and discuss all factors leading to that decision.

ADDRESSES: Copies of the FEIS are available for public inspection at the following locations:

- Bureau of Reclamation, Albuquerque Area Office, 555 Broadway NE., Suite 100, Albuquerque, New Mexico 87102.
- Bureau of Reclamation, El Paso Field Division, 10737 Gateway West, Suite 350, El Paso, Texas 79935.
- Bureau of Reclamation, Upper Colorado Regional Office, 125 South State Street, Room 8100, Salt Lake City, Utah 84138.

Libraries
- New Mexico State University—Branson Library, 1305 Frenger Street, Las Cruces, New Mexico 88003.
- University of Texas at El Paso, 500 West University Avenue, El Paso, Texas 79968.

Electronic copies of the FEIS are available at: http://www.usbr.gov/uc/envdocs/eis.html.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Faler, Area Manager, Albuquerque Area Office, telephone: (505) 462–3600; address: 555 Broadway NE., Suite 100, Albuquerque, New Mexico 87102; email: jfaler@usbr.gov. Any persons wishing to be added to a mailing list of interested parties may write or call Ms. Faler at this address or telephone number.

Persons who use a telecommunications device for the deaf may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, in order to leave a message or question with the above named individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

Reclamation prepared the FEIS in cooperation with five agencies:

- United States Section of the International Boundary and Water Commission,
- Colorado Division of Water Resources,
- EBID,
- EPCWID, and
- Texas Rio Grande Compact Commissioner.

The purpose for the proposed Federal action is to meet contractual obligations of Reclamation to EBID and EPCWID, and to comply with applicable law governing water allocation, delivery, and accounting. These obligations are currently fulfilled under the Operating Agreement. The need for the proposed Federal action is to resolve the long and litigious history of the Rio Grande Project, and to enter into mutually agreeable operational criteria that comply with applicable law, court decrees, settlement agreements, and contracts. The purpose and need for similar action is to respond to a request to store San Juan-Chama Project water in Elephant Butte Reservoir.

The FEIS Analyzes Five Alternatives

The FEIS describes and analyzes five alternatives: The Preferred Alternative (Alternative 1) is continuation of the Operating Agreement and the San Juan-Chama storage contract through 2050.
Alternative 2 would not store San Juan-Chama Project water in Elephant Butte Reservoir. Alternative 3 would not include the carryover accounting provision. Alternative 4 would not include the diversion ratio adjustment. Alternative 5 is the No Action Alternative and it would eliminate both the carryover accounting and diversion ratio adjustment from Rio Grande Project allocation and accounting procedures.

The FEIS analyzes the effect of these five alternatives on (1) water resources (total storage, Elephant Butte Reservoir elevations, allocation, releases, net diversion, farm surface water deliveries, farm groundwater deliveries, groundwater elevations, and water quality); (2) biological resources (vegetation communities including wetlands, wildlife, aquatic species, and special status species and critical habitat); (3) cultural resources (historic properties, Indian sacred sites, and resources of tribal concern); and (4) socioeconomic resources (Indian trust assets, recreation, hydropower, regional economic impacts and economic benefits, and environmental justice).

On January 15, 2014, a Notice of Intent was published in the Federal Register (79 FR 2691) inviting public scoping comments on the proposed action of continuing to implement the Operating Agreement through 2050. A Notice of Availability was published in the Federal Register on March 18, 2016 (81 FR 14886), and the public was invited to provide comments on the Draft EIS during an 83-day comment period ending on June 8, 2016.

Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, please be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Brent Rhees,
Regional Director, Upper Colorado Region.

Notice of Intent To Prepare the Columbia River System Operations Environmental Impact Statement

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD; Bonneville Power Administration, Energy; Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: In accordance with the National Environmental Policy Act, the U.S. Army Corps of Engineers (Corps), Bonneville Power Administration (BPA) (Action Agencies) intend to prepare an environmental impact statement (EIS) on the system operation and maintenance of fourteen Federal multiple purpose dams and related facilities located throughout the Columbia River basin. The Action Agencies will use this EIS process to assess and update their approach for long-term system operations and configuration through the analysis of alternatives and evaluation of potential effects to the human and natural environments, including effects to socio-economics and species listed under the Endangered Species Act (ESA). The Action Agencies will serve as joint lead agencies in developing the EIS.

DATES: Written comments for the Action Agencies’ consideration are due to the addresses below no later than January 17, 2017. Comments may also be made at public meetings. Information on the public meetings is provided under the SUPPLEMENTARY INFORMATION section of this notice.

ADDRESSES: Written comments, requests to be placed on the project mailing list, and requests for information may be mailed by letter to U.S. Army Corps of Engineers Northwestern Division Attn: CRSO EIS, P.O. Box 2870, Portland, OR 97208–2870; or online at comment@crso.info. All comment letters will be available via the project Web site at www.crso.info. All personally identifiable information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Call the toll-free telephone 1–(800) 290–5033 or email info@crso.info. Additional information can be found at the project Web site: www.crso.info.

SUPPLEMENTARY INFORMATION: Background

The fourteen Federal multiple purpose dams and related facilities are operated as a coordinated system within the interior Columbia River basin in Idaho, Montana, Oregon, and Washington. A map identifying the locations of these dams can be found on the project Web site at www.crso.info. The Corps was authorized by Congress to construct, operate and maintain twelve of these projects for flood control, power generation, navigation, fish and wildlife, recreation, and municipal and industrial water supply purposes. The Corps’ projects that will be addressed in this EIS include Libby, Albeni Falls, Dworshak, Chief Joseph, Lower Granite, Little Goose, Lower Monumental, Ice Harbor, McNary, John Day, The Dalles, and Bonneville. Reclamation was authorized to construct, operate, and maintain two projects for purposes of flood control, power generation, navigation, and irrigation. The Reclamation projects that will be addressed in this EIS include Hungry Horse and Grand Coulee. BPA is responsible for marketing and transmitting the power generated by these dams. Together, these Action Agencies are responsible for managing the system for these various purposes.

In the 1990s, the Action Agencies analyzed the socio-economic and environmental effects of operating the system in the Columbia River System Operation Review (SOR) EIS and issued respective Records of Decision in 1997 that adopted a system operation strategy, which included operations supporting ESA-listed fish while fulfilling all other congressionally-authorized purposes. Since the completion of the SOR EIS, the Action Agencies have operated the system consistent with the analyses in the SOR EIS, while some changes to system operations have been adopted under subsequent ESA consultations and project-specific National Environmental Policy Act documents.
Proposal for New EIS

The proposed Columbia River System Operations EIS will assess and update the approach for long-term system operations and configuration. In addition to evaluating a range of alternatives, the EIS will consider the direct, indirect, and cumulative impacts of these alternatives on affected resources, including geology, soils, water quality and quantity, air quality, fish and wildlife (e.g., ESA-listed species and their designated critical habitat), floodplains, wetlands, climate, cultural resources, tribal resources, social and economic resources, and other resources that are identified during the scoping process. The impacts to the resources will be addressed in light of anticipated climate change impacts, such as warmer water temperatures, diminished snow-pack, and altered flows. The Action Agencies will evaluate a range of alternatives in the EIS, including a no-action alternative (current system operations and configuration). Other alternatives will be developed through the scoping period based on public input and Action Agency expertise, and will likely include an array of alternatives for different system operations and additional structural modifications to existing projects to improve fish passage including breaching one or more dams.

The EIS will also identify measures to avoid, offset or minimize impacts to resources affected by system operations and configuration, where feasible. For instance, non-operational mitigation measures to address impacts to the fish resources, such as habitat actions in the tributaries and estuary, avian predation management actions, and conservation and safety net hatcheries, may be proposed.

Additionally, the Action Agencies will comply with all applicable statutory and regulatory requirements in evaluating the proposed action, such as the ESA, Clean Water Act, Section 106 of the National Historic Preservation Act (NHPA), and Executive Orders, including E.O. 12898 Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations.

Request for Comments

The Action Agencies are issuing this notice to: (1) Advise other Federal and state agencies, tribes, and the public of their plan to analyze effects related to system operations and configuration; (2) obtain suggestions and information that may inform the scope of issues and range of alternatives to evaluate in the EIS; and (3) provide notice and request public input on potential effects on historic properties from system operations and configuration in accordance with Section 106 of the NHPA (36 Code of Federal Regulations 800.2(d)(3)).

The Action Agencies are inviting interested parties to provide specific comments no later than January 17, 2017, on issues the agencies should evaluate related to the Columbia River System Operations EIS. All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public.

Public Meetings

The Action Agencies will hold 15 public scoping meetings during the fall and winter of 2016 to invite the public to comment on the scope of the EIS. The 15 public meetings will be held on:

- Monday, October 24, 2016, 4 p.m. to 7 p.m., Wenatchee Community Center, 504 S. Chelan Ave., Wenatchee, Washington.
- Tuesday, October 25, 2016, 4 p.m. to 7 p.m., The Town of Coulee Dam, City Hall, 300 Lincoln Ave., Coulee Dam, Washington.
- Wednesday, October 26, 2016, 4 p.m. to 7 p.m., Priest River Community Center, 5399 Highway 2, Priest River, Idaho.
- Thursday, October 27, 2016, 4 p.m. to 7 p.m., Kootenai River Inn Casino & Spa, 7169 Plaza St., Bonners Ferry, Idaho.
- Monday, November 1, 2016, 4 p.m. to 7 p.m., Red Lion Hotel Kalispell, 20 North Main St., Kalispell, Montana.
- Wednesday, November 2, 2016, 4 p.m. to 7 p.m., City of Libby City Hall, 952 E. Spruce St., Libby, Montana.
- Thursday, November 3, 2016, 4 p.m. to 7 p.m., Hilton Garden Inn Missoula, 3720 N. Reserve St., Missoula, Montana.
- Monday, November 14, 2016, 4 p.m. to 7 p.m., The Historic Davenport Hotel, 10 South Post Street, Spokane, Washington.
- Wednesday, November 16, 2016, 4 p.m. to 7 p.m., Red Lion Hotel Lewiston, Seaport Room, 621 21st St., Lewiston, Idaho.
- Thursday, November 17, 2016, 4 p.m. to 7 p.m., Courtyard Walla Walla, The Blues Room, 550 West Rose St., Walla Walla, Washington.
- Tuesday, November 29, 2016, 4 p.m. to 7 p.m., The Grove Hotel, 245 S. Capitol Blvd., Boise, Idaho.
- Thursday, December 1, 2016, 4 p.m. to 7 p.m., Town Hall, Great Room, 1119 8th Ave., Seattle, Washington.
- Tuesday, December 6, 2016, 4 p.m. to 7 p.m., The Columbia Gorge Discovery Center, River Gallery Room, 5000 Discovery Drive, The Dalles, Oregon.
- Wednesday, December 7, 2016, 4 p.m. to 7 p.m., Oregon Convention Center, 777 NE Martin Luther King Jr. Blvd., Portland, Oregon.
- Thursday, December 8, 2016, 4 p.m. to 7 p.m., The Loft at the Red Building, 20 Basin St., Astoria, Oregon.
- Tuesday, December 13, 2016, 10 a.m. to 11:30 a.m. and 3 p.m. to 4:30 p.m., PST, webinar. For those that cannot participate in person, an online webinar will be provided to interested parties. The webinar will cover the material discussed in the in-person public scoping meetings. Detailed instructions on how to participate in the webinar may be found on the project Web site at www.crso.info. To submit written comments, please follow the instructions in the ADDRESSES section of this notice.

The Action Agencies will consider requests for an extension of time for public comment and additional opportunities for public involvement if requests are received in writing by December 1, 2016. Requests for additional time to comment and opportunities for public involvement should be sent to the address listed in the ADDRESSES section of this notice. Requests should include an explanation of the specific purposes served by the requested extension, and should explain how the extension could benefit the National Environmental Policy Act process and analysis. Announcements for any such further opportunities for public involvement, if appropriate given the court-ordered schedule for this EIS, will be published in the Federal Register and by news releases to the media, newsletter mailings, and posting on the project Web site.

The draft EIS is scheduled to be published by March 2020 for public review and comment, and after it is published, the Action Agencies will hold public comment meetings. The Action Agencies will consider public comments received on the draft EIS and provide responses in the final EIS.

Scott A. Spellmon,
Brigadier General, US Army, Division Commander.
Elliot F. Mainzer,
Administrator, Bonneville Power Administration.
Lorri J. Lee,
Regional Director—Pacific Northwest Region, Bureau of Reclamation.

[FR Doc. 2016-23346 Filed 9–29–16; 8:45 am]
BILLING CODE 4332–90–P
Implementing the Procedural Provisions of NEPA, 40 CFR parts 1500 through 1508; and the Department of the Interior’s (DOI) regulations, 43 CFR part 46, the Bureau of Reclamation (Reclamation) has prepared this Draft Environmental Impact Statement (Draft EIS) that examines the potential environmental impacts from the Navajo Generating Station-Kayenta Mine Complex Project (Project). Cooperating agencies on the Draft EIS include the following:

- **Federal Agencies**—U.S. Department of Agriculture, Forest Service; U.S. Department of the Interior, Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service, National Park Service, Office of Surface Mining and Reclamation Enforcement; U.S. Environmental Protection Agency
- **Tribe Governments**—Gila River Indian Community; Navajo Nation; Pueblo of Zuni
- **Other Agencies**—Arizona Game and Fish Department; Central Arizona Water Conservation District

The Proposed Action would provide Federal approvals and/or decisions necessary to continue the operation and maintenance of the Navajo Generating Station and associated facilities, the proposed Kayenta Mine Complex, and existing transmission systems.

**DATES:** Written comments on the Draft Environmental Impact Statement should be submitted on or before Tuesday, November 29, 2016.

Eleven public meetings will be held to receive comments, answer questions, and facilitate public involvement. See the [SUPPLEMENTARY INFORMATION](https://www.ngskmc-eis.net) section for meeting dates and times.

**ADRESSES:** Send written comments to the Phoenix Area Office, Bureau of Reclamation (ATTN: NGSKMC–EIS), 6150 W. Thunderbird Road, Glendale, Arizona 85306–4001; via facsimile to (623) 773–6486; or email to NGSKMC–EIS@usbr.gov.

To request a compact disc of the Draft Environmental Impact Statement, please use the contact information above, or call (623) 773–6254. The document may also be viewed at the Project Web site [http://www.ngskmc-eis.net](http://www.ngskmc-eis.net).

**FOR FURTHER INFORMATION CONTACT:** Ms. Sandra Eto, (623) 773–6254, or by email at NGSKMC–EIS@usbr.gov. Additional information is available online at [http://www.ngskmc-eis.net](http://www.ngskmc-eis.net).
area, the future operation, if approved, would be identified as the KMC. The proposed KMC permit boundary expansion does not propose future mining of the coal resources remaining at the former Black Mesa Mine.

Current Transmission System Operation

The NGS is served by the Western and Southern transmission systems, each of which is supported by a 323 Grant. Off-reservation, these systems are supported by grants of easement from other agencies. The Southern Transmission System extends south from NGS to just north of Phoenix, Arizona; the Western Transmission System extends west from NGS to near Las Vegas, Nevada. Both transmission systems are part of the Western Interconnection, providing integrated and reliable transmission across the region well beyond the power generated by the NGS.

Under the Proposed Action, no construction, major replacement, or other activities beyond continued operation and as-needed maintenance are anticipated for the transmission line systems, substations, and communications sites. Ongoing maintenance, repair, replacement, and improvement of the transmission lines would continue. These activities include infrequent aerial and ground inspection, repair and replacement of transmission system components, and right-of-way vegetation treatment to reduce safety hazards. The majority of all inspection and maintenance activities would occur along the existing right-of-way, serviced by existing roads leading to the regional highway system.

Other Compliance-related Activities

As part of its consideration of impacts on threatened and endangered species, Reclamation is in the process of formal consultation with the U.S. Fish and Wildlife Service (Service) pursuant to Section 7 of the Endangered Species Act, 16 U.S.C. 1536, and its implementing regulations, 50 CFR part 400. The biological assessment of the Proposed Action prepared by Reclamation for consideration by the Service is available on the Project Web site: http://www.ngskmc-eis.net.

Reclamation is also conducting compliance activities pursuant to Section 106 of the National Historic Preservation Act, 16 U.S.C. 470f, as provided for in 36 CFR 800.2(d)(3) concurrently with the NEPA process, including public involvement requirements and consultation with the State Historic Preservation Office(s) and Tribal Historic Preservation Officer(s). The draft programmatic agreements regarding management of historic properties potentially affected by the Proposed Action are available on the Project Web site: http://www.ngskmc-eis.net.

Alternatives Considered

The Draft EIS analyzes the direct, indirect and cumulative effects of the Proposed Action, three action alternatives, and a No Action Alternative.

Under the Proposed Action, all Federal approvals and/or decisions necessary to continue the operation and maintenance of the NGS and associated facilities, the proposed KMC, and existing transmission systems would be granted through December 22, 2044, plus decommissioning.

b. Natural Gas Partial Federal Replacement Alternative

Under this action alternative, the same Federal approvals and/or decisions required for the Proposed Action would be granted; however, a portion of the energy produced at NGS for the U.S. would be curtailed and replaced by a corresponding amount of energy from existing natural gas resources.

c. Renewable Partial Federal Replacement Alternative

Under this action alternative, the same Federal approvals and/or decisions required for the Proposed Action would be granted; however, a portion of the energy produced at NGS for the U.S. would be curtailed and replaced by a corresponding amount of energy from existing renewable energy resources.

d. Tribal Partial Federal Replacement Alternative

Under this action alternative, the same Federal approvals and/or decisions required for the Proposed Action would be granted; however, a portion of the energy produced at NGS for the U.S. would be curtailed and replaced by a corresponding amount of energy from a newly constructed photovoltaic solar facility on tribal land.

e. No Action Alternative

Under the No Action Alternative, Federal approvals and/or decisions required for the continued operation and maintenance of NGS and associated facilities would not be granted and NGS would be decommissioned by 2020. The proposed KMC would not be authorized and final reclamation of the Kayenta Mine would commence when power generation ends at NGS. The right-of-way for the existing transmission systems would not be granted; however, because these power lines are part of the Western Interconnection, the transmission owners would likely seek authorization of the transmission system under a separate and future process.

Public Meeting Information

Eleven public meetings to receive comments, answer questions, and facilitate public involvement will be held on:

1. Monday, October 24, 2016, 10 a.m. to 1 p.m., Burton Barr Central Library, Pulliam Auditorium, 1221 N. Central Ave., Phoenix, Arizona.
2. Monday, October 24, 2016, 5 p.m. to 8 p.m., Dorothy Powell Senior Adult Center, Dining Room, 405 E. Sixth St., Casa Grande, Arizona.
3. Tuesday, October 25, 2016, 4 p.m. to 7 p.m., Page Community Center, Cafeteria, 699 S. Navajo Dr., Page, Arizona.
4. Wednesday, October 26, 2016, 9 a.m. to 12 p.m., LeChee Chapter House, 5 miles south of Page off of Coppermine Road, LeChee, Arizona.
5. Wednesday, October 26, 2016, 4 p.m. to 7 p.m., Tuba City Chapter House, 220 S. Main St., Tuba City, Arizona.
6. Thursday, October 27, 2016, 10 a.m. to 1 p.m., Shonto Chapter House, E. Navajo Route 221, Shonto, Arizona.
7. Tuesday, November 1, 2016, 4 p.m. to 7 p.m., Monument Valley High School, Cafeteria, Highway 163 and Monument Valley Blvd., Kayenta, Arizona.
8. Wednesday, November 2, 2016, 10 a.m. to 1 p.m., Tewa Community Center, Multipurpose Room, Highway 264 at Milepost 392.8, Polacca, Arizona.
9. Wednesday, November 2, 2016, 4 p.m. to 7 p.m., Hopi Day School, Gym, ¼ mile east of the Village Store on Main St., Kykotsmovi, Arizona.
10. Thursday, November 3, 2016, 10 a.m. to 1 p.m., Forest Lake Chapter House, 17 miles north of Pinon on Navajo Route 41, Pinon, Arizona.
11. Friday, November 4, 2016, 10 a.m. to 1 p.m., Navajo Nation Museum, Conference Room, Highway 264 and Postal Loop Road, Window Rock, Arizona.

Navajo interpreters will be present at meetings on the Navajo Nation and Hopi Reservation; Hopi interpreters will be present at meetings on the Hopi Reservation and Tuba City, Arizona. A court recorder will be available to take oral comments from the public during all meetings.

Public Review and Where To Find Copies of the Draft EIS

A copy of the Draft EIS is available for public review and inspection at the following locations:

- Bureau of Reclamation, Phoenix Area Office, 6150 W. Thunderbird Road, Glendale, Arizona.
DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[167E1700D2 EEA010000 ET1EX0000.SZH000]

Privacy Act of 1974, as Amended; Notice of a New System of Records

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of creation of a new system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Department of the Interior is issuing a public notice of its intent to create the Bureau of Safety and Environmental Enforcement, "Investigations Case Management System," system of records. The system will enable the Bureau of Safety and Environmental Enforcement to conduct and document incident investigations related to the Outer Continental Shelf and employee misconduct investigations. The Investigations Case Management System stores, tracks and analyzes reportable injuries, the loss or damage of property, possible violations of Federal laws and regulations, and investigation information related to operation of the Outer Continental Shelf to identify safety concerns or environmental risks. This newly established system will be included in the Bureau of Safety and Environmental Enforcement’s inventory of record systems.

DATES: Comments must be received by October 31, 2016. This new system will be effective October 31, 2016.

ADDRESSES: Any person interested in commenting on this notice may do so by: Submitting comments in to Teri Barnett, Departmental Privacy Officer, U.S. Department of the Interior, 1849 C Street NW., Mail Stop 7456 MIB, Washington, DC 20240; hand-delivering comments to Teri Barnett, Departmental Privacy Officer, U.S. Department of the Interior, 1849 C Street NW., Mail Stop 7456 MIB, Washington, DC 20240; or emailing comments to Privacy@ios.doi.gov.

FOR FURTHER INFORMATION CONTACT: Rowena Dufford, Bureau of Safety and Environmental Enforcement Privacy Act Officer, 45600 Woodland Road, Mail Stop VAE–MSD, Sterling, VA 20166; or email at Rowena.Dufford@bsee.gov.

SUPPLEMENTAL INFORMATION:

I. Background

The Department of the Interior (DOI), Bureau of Safety and Environmental Enforcement (BSEE), maintains the Investigations Case Management System (CMS) system of records. CMS is an incident investigation management and reporting application that will enable BSEE to conduct and document civil administrative investigations related to incidents, operations on the Outer Continental Shelf (OCS), and employee misconduct investigations. The CMS will store, track and analyze reportable injuries, the loss or damage of property, possible violations of Federal laws and regulations, and investigation information related to operations on the OCS to identify safety concerns or environmental risks.

The CMS is used to conduct civil administrative investigations and is not used for the conduct of criminal investigations. However, the CMS does support referrals of possible criminal activity to internal and external law enforcement organizations as appropriate for investigation. The CMS manages known or suspected civil violations; provides law enforcement agencies with appropriate referral information related to possible criminal activities; captures, integrates, and shares incident related information and observations from other sources; analyzes and prioritizes protection efforts; provides information to justify funding requests and expenditures; assists in managing investigator training; tracks referrals and/or recommendations related to incident investigations; and manages and preserves evidence.

Incident and non-incident data related to activity occurring on the OCS will be collected in support of investigations, regulatory enforcement, homeland security, and security (physical, personnel, stability, environmental, and industrial) activities. This may include data documenting investigation activities, enforcement recommendations, recommendation results, property damage, injuries and fatalities, and analytical or statistical reports. CMS will also provide information for BSEE management to make informed decisions on recommendations for enforcement, civil penalties, and other administrative actions.

In a notice of proposed rulemaking, which is published separately in the Federal Register, DOI is proposing to exempt records maintained in this system from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2).

The system will be effective as proposed at the end of the comment period (the comment period will end 30 days after the publication of this notice in the Federal Register), unless...
comments are received which would require a contrary determination. DOI will publish a revised notice if changes are made, based upon a review of the comments received.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal Agencies collect, maintain, use, and disseminate individuals’ personal information. The Privacy Act applies to records about individuals that are maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency for which information about an individual is retrieved by the name or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident. As a matter of policy, DOI extends administrative Privacy Act protections to all individuals. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations, 43 CFR part 2, subpart K.

The Privacy Act requires each agency to publish in the Federal Register a description denoting the type and character of each system of records that the agency maintains and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such records within the agency. Below is the description of the BSEE–01, Investigations Case Management System, system of records.

In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: September 27, 2016.

Teri Barnett,
Departmental Privacy Officer.

SYSTEM NAME:
Investigations Case Management System (CMS), BSEE–01.

SECURITY CLASSIFICATION:
Unclassified.

SYSTEM LOCATION:
Records in this system are maintained and centrally managed by the Department of the Interior, Bureau of Safety and Environmental Enforcement, 1849 C Street NW., Washington, DC 20240. Records are also located at Bureau of Safety and Environmental Enforcement regional offices and regional sub-offices, and at DOI contractor locations. A current listing of these offices may be obtained by writing to the System Manager or by visiting the BSEE Web site at http://www.bsee.gov.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:
The categories of individuals covered in the system include current and former Bureau of Safety and Environmental Enforcement (BSEE) employees, potential employees, and contractors; other employees and contractors of Federal, tribal, state, and local law enforcement organizations; complainants, informants, suspects, and witnesses; members of the general public, including individuals and/or groups of individuals involved with incidents related to operations on the Outer Continental Shelf (OCS); and individuals or corporations being investigated due to their involvement in incidents occurring on the OCS.

CATEGORIES OF RECORDS IN THE SYSTEM:
The system includes incident reports, investigative activity reports, personnel records, investigative training records, and records related to incidents occurring on the OCS. Records may contain the following information: Names, Social Security numbers, gender, date of birth, place of birth, citizenship status, race or ethnicity, home and work addresses, personal and official phone numbers, personal and official email addresses, emergency contact information, other contact information, medical information, work history, educational history, affiliations, employer information, associated case or activity number, identification numbers assigned to individuals, and other data that may be included in records compiled during investigations.

Incident reports and records may include attachments such as photos, videos, sketches, audio recordings, email and text messages, medical reports, personnel records, written statements, witness interviews, depositions, evidence and information obtained in the course of an investigation, evidence in support of the Action Referral Memoranda and Case Closure Memoranda, administrative agreements, action determinations, company documentation, and other documents related to incidents occurring on the OCS. Incident reports may also include information concerning criminal activity and documentation related to the response and outcome of an incident. Records in this system also contain information concerning Federal, tribal, state and local law enforcement officers such as an officer’s name, contact information, station, and career history.

This system may also contain the names and addresses of business entities, which are not subject to the Privacy Act. However, records pertaining to individuals acting on behalf of corporations and other business entities may reflect personal information that is covered by this system of records notice.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:
Outer Continental Shelf Lands Act of 1953, 43 U.S.C. 1331–1356b; and Oil and Gas and Sulphur Operations in the Outer Continental Shelf, 30 CFR 250.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:
The primary purpose of the CMS system of records is to conduct and document incident investigations and employee misconduct investigations related to operations on the Outer Continental Shelf. The CMS will be used to manage known and suspected civil violations; capture, integrate, and share incident related information and observations from other sources; measure performance of investigative programs and management of investigations; meet incident reporting requirements; analyze and prioritize investigative efforts; provide information to justify funding requests and expenditures; provide employee training; provide referrals to appropriate criminal law enforcement agencies for individuals suspected of committing crimes on or in support of activities conducted on the OCS; collect and preserve evidence; and investigate and prevent injuries on the OCS.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information...
contained in this system may be disclosed outside DOI as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

(1) (a) To any of the following entities or individuals, when the circumstances set forth in paragraph (b) are met:
   (i) The U.S. Department of Justice (DOJ);
   (ii) A court or an adjudicative or other administrative body;
   (iii) A party in litigation before a court or an adjudicative or other administrative body;
   (iv) Any DOI employee acting in his or her individual capacity if DOI or DOJ has agreed to represent that employee or pay for private representation of the employee;
   (b) When:
      (i) One of the following is a party to the proceeding or has an interest in the proceeding:
         (A) DOI or any component of DOI;
         (B) Any other Federal agency appearing before the Office of Hearings and Appeals;
         (C) Any DOI employee acting in his or her official capacity;
         (D) Any DOI employee acting in his or her individual capacity if DOI or DOJ has agreed to represent that employee or pay for private representation of the employee;
      (ii) DOI deems the disclosure to be:
         (A) Relevant and necessary to the proceeding; and
         (B) Compatible with the purpose for which the records were compiled.
(2) To a congressional office in response to a written inquiry that an individual covered by the system, or the heir of such individual if the covered individual is deceased, has made to the office.

(3) To the Executive Office of the President in response to an inquiry from that office made at the request of the subject of a record or a third party on that person’s behalf, or for a purpose compatible with the reason for which the records are collected or maintained.

(4) To any criminal, civil, or regulatory law enforcement authority (whether Federal, state, territorial, local, tribal or foreign) when a record, either alone or in conjunction with other information, indicates a violation or potential violation of law—criminal, civil, or regulatory in nature, and the disclosure is compatible with the purpose for which the records were compiled.

(5) To an official of another Federal agency to provide information needed in the performance of official duties related to reconciling or reconstructing data files or to enable that agency to respond to an inquiry by the individual to whom the record pertains.

(6) To Federal, state, territorial, local, tribal, or foreign agencies that have requested information relevant or necessary to the hiring, firing or retention of an employee or contractor, or the issuance of a security clearance, license, contract, grant or other benefit, when the disclosure is compatible with the purpose for which the records were compiled.

(7) To representatives of the National Archives and Records Administration (NARA) to conduct records management inspections under the authority of 44 U.S.C. 2904 and 2906.

(8) To state, territorial and local governments and tribal organizations to provide information needed in response to court order and/or discovery purposes related to litigation, when the disclosure is compatible with the purpose for which the records were compiled.

(9) To an expert, consultant, or contractor (including employees of the contractor) of DOI that performs services requiring access to these records on DOI’s behalf to carry out the purposes of the system.

(10) To appropriate agencies, entities, and persons when:
      (a) It is suspected or confirmed that the security or confidentiality of information in the system of records has been compromised; and
      (b) DOI has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interest, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and
      (c) The disclosure is made to such agencies, entities and persons who are reasonably necessary to assist in connection with the DOI’s efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

(11) To the Office of Management and Budget (OMB) during the coordination and clearance process in connection with legislative affairs as mandated by OMB Circular A–19.

(12) To the Department of the Treasury to recover debts owed to the United States.

(13) To the news media and the public, with the approval of the Public Affairs Officer in consultation with Counsel and the Senior Agency Official for Privacy, where there exists a legitimate public interest in the disclosure of the information, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

(14) To DOJ, the Federal Bureau of Investigation, the Department of Homeland Security, and other Federal, state and local law enforcement agencies for the purpose of reporting possible violations of Federal laws and regulations, referring criminal related activities and providing information exchange on law enforcement activity.

(15) To agency contractors, grantees, or volunteers for DOI or other Federal agencies that assist in the performance of a contract, grant, cooperative agreement, or other activity related to this system of records and who need to have access to the records in order to perform the activity.

(16) To any of the following entities or individuals for the purpose of providing information on incident investigations, personal injuries, or the loss or damage of property:
      (a) Individuals involved in such incidents;
      (b) Persons injured in such incidents;
      (c) Owners of property damaged, lost or stolen in such incidents, and/or representatives, administrators of estates, and/or attorneys.

The release of information under these circumstances should only occur when it will not interfere with ongoing investigations or law enforcement proceedings; risk the health or safety of an individual; or reveal the identity of an informant or witness that has received an explicit assurance of confidentiality. Also, Social Security numbers and other sensitive identifying personal information should not be released under these circumstances unless this information belongs to the individual requestor.

(17) To any criminal, civil, or regulatory authority (whether Federal, state, territorial, local, tribal or foreign) for the purpose of providing background search information on individuals for legally authorized purposes, including but not limited to background checks on individuals residing in a home with a minor or individuals seeking employment opportunities requiring background checks.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

Storage:
Electronic records are stored and maintained in a password-protected cloud system that is compliant with the Federal Information Security Modernization Act of 2014. All records are accessed only by authorized personnel who have a need to access the records in the performance of their official duties. Paper records are maintained in file folders and stored in locked file cabinets. Records obtained in a paper format and converted into electronic files for submission into the CMS may be temporarily stored or accessed on DOI network computers, email systems, and approved removable hard drives.

RETRIEVABILITY:
Information may be retrieved by first name, middle name, or last name, home and work addresses, personal and official phone numbers, personal and official email addresses, employer information, and associated case or activity number.

SAFEGUARDS:
The records contained in this system are safeguarded in accordance with 43 CFR 2.226 and other applicable security rules and policies. During normal hours of operation, paper records are maintained in locked file cabinets under the control of authorized personnel. Computerized records systems follow the National Institute of Standards and Technology standards as developed to comply with the Privacy Act of 1974, 5 U.S.C. 552a; Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3521; Federal Information Security Modernization Act of 2014, 44 U.S.C. 3551–3558; and the Federal Information Processing Standards 199: Standards for Security Categorization of Federal Information and Information Systems. Computer servers in which electronic records are stored are located in secured contractor facilities with physical, technical and administrative levels of security to prevent unauthorized access to the network and information assets. Security controls include encryption, firewalls, audit logs, and network system security monitoring. Cloud hosting will only be provided by approved DOI cloud vendors. A privacy impact assessment was conducted to ensure appropriate controls and safeguards are in place to protect the information within the system. Access to records in the system is limited to authorized personnel who have a need to access the records in the performance of their official duties. Electronic data is protected through user identification such as usernames, passwords, database permissions and software controls. These security measures establish different access levels for different types of users. Each user’s access is restricted to only the functions and data necessary to perform their job responsibilities.

System administrators and authorized users are trained and required to follow established internal security protocols, complete all security, privacy, and records management training, and sign the DOI Rules of Behavior. Contract employees with access to the system must also complete mandatory security and privacy training, sign DOI Rules of Behavior, and are monitored by their Contracting Officer Representative and the agency Security Manager.

RETENTION AND DISPOSAL:
Records in this system are maintained under BSEE Bucket 5—Regulatory Oversight and Stewardship (N1–473–12–5), which has been approved by NARA. Records maintained under Item 5F(2)(a), Major Incident Investigative Records, include final reports that document major incidents requiring investigative panels and other reports selected as significant by BSEE, and have a permanent retention. Electronic records are transferred to NARA fifteen years after cut-off, and hardcopy reports are transferred to NARA twenty-five years after cut-off. Records maintained under Item 5F(2)(b), All Other Incident Investigative and Related Records, include records that do not result in the appointment of a panel or are not selected as significant by BSEE. These records have a temporary disposition and are destroyed twenty-five years after cut-off. Other administrative records are maintained under BSEE Bucket-1, Administrative Records (N1–473–12–001), which has been approved by NARA. Records maintained under Item 1G(1), Administrative Function Files/ Audits and Investigation Files, have a temporary disposition, and are cut off at the end of the fiscal year when activity is completed and destroyed ten years after cut off. Approved disposition methods for temporary records include shredding or pulping paper records, and erasing or degaussing electronic records in accordance with 384 Departmental Manual 1 and NARA guidelines.

CONTESTING RECORDS PROCEDURES:
A request for corrections or removal of records in this system from the amendment procedures of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). An individual requesting records on himself or herself should send a signed, written request to the System Manager previously identified. A request for corrections or removal must meet the requirements of 43 CFR 2.238.

RECORD SOURCE CATEGORIES:
Sources of information in the system include Department, bureau, office and program officials, employees, contractors, and other individuals who are associated with or represent DOI; officials from other Federal, tribal, state and local law enforcement organizations, including DOJ, the Federal Bureau of Investigation, and the Department of Homeland Security; and complainants, informants, suspects, victims, and witnesses.

EXEMPTIONS CLAIMED FOR THE SYSTEM:
This system contains civil and administrative law enforcement investigatory records that are exempt from certain provisions of the Privacy Act, 5 U.S.C. 552a(k)(2). Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, DOI has exempted portions of this system from the following subsections of the Privacy Act: (c)(3), (d), (e)(1),(e)(4) (G), (H) and (I), and (f). In accordance with 5 U.S.C. 553(b), (c) and (e), DOI has promulgated a rule, which was published separately in today’s Federal Register.
DEPARTMENT OF JUSTICE

[OMB Number 1117–NEW]

Agency Information Collection Activities; Proposed eCollection Comments Requested; New Collection: Leadership Engagement Survey

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Drug Enforcement Administration, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until November 29, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Donna A. Rodriguez, Ph.D., Unit Chief, Research and Analysis Staff, Drug Enforcement Administration, 8701 Morrissette Drive, Springfield, VA 22152.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

1. Type of Information Collection: New collection.

2. The Title of the Form/Collection: Leadership Engagement Survey (LES).

3. The agency form number, if any, and the applicable component of the Department sponsoring the collection: Online survey.

4. Affected public who will be asked or required to respond, as well as a brief abstract: The affected public is Drug Enforcement Administration employees and Task Force Officers. The LES is an initiative mandated by the Acting Administrator, DEA, to assess and improve competencies and proficiency of leadership across the DEA.

5. An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that approximately 5,000 respondents will complete the survey within approximately 45 minutes.

6. An estimate of the total public burden (in hours) associated with the collection: The estimated public burden associated with this collection is 3,750 hours. It is estimated that respondents will take 45 minutes to complete the survey. In order to calculate the public burden for the survey, 45 minutes was multiplied by 5,000 and divided by 60 (the number of minutes in an hour) which equals 3,750 total annual burden hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: September 27, 2016.

Jerri Murray,
Department Clearance Officer for PRA, U.S. Department of Justice.

DEPARTMENT OF JUSTICE

[OMB Number 1121–0235]

Agency Information Collection Activities; Proposed Collection Comments Requested; Extension, Without Change, of a Currently Approved Collection; Bulletproof Vest Partnership (BVP)

AGENCY: Office of Justice Programs, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Assistance, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. This collection was previously published in the Federal Register at 81 FR 51212, on August 3, 2016, allowing for a 60 day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until October 31, 2016.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact C. Casto at 1–202–353–7193, Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice, 810 7th Street NW., Washington, DC 20531 or by email at Chris.Casto@usdoj.gov. Written comments and/or suggestions can also be sent to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
DEPARTMENT OF LABOR
Office of the Secretary
Agency Information Collection Activities; Submission for OMB Review; Comment Request; Program Reporting and Performance Standards System for Indian and Native American Programs Under Title I, Section 166 of the Workforce Innovation and Opportunity Act

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Employment and Training Administration (ETA) sponsored information collection request (ICR) revision titled, “Program Reporting and Performance Standards System for Indian and Native American Programs Under Title I, Section 166 of the Workforce Innovation and Opportunity Act.” to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 et seq.). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before October 31, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201608-1205-003 (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–ETA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor–OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Program Reporting and Performance Standards System for Indian and Native American Programs Under Title I, Section 166 of the Workforce Innovation and Opportunity Act (WIOA) information collection. The ICR covers Forms ETA–9084, Comprehensive Services Program, and ETA–9085, Supplemental Youth Services Program. It also includes standard data elements for participants, the basis of the current performance standards system for WIOA section 166 grantees. Form ETA–9084 is completed by both tribal and non-profit private sector grantees. Form ETA 9085 is completed only by tribal grantees. This information collection has been classified as a revision, because the agency is incorporating information collections referenced in the WIOA implementing regulations and to update Form ETA–9085 is to increase the age range for youth to twenty-four, in accordance with the WIOA. WIOA sections 166(e) and (h) authorize this information collection. See 29 U.S.C. 3221(e) and (h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205–0422. The current approval is scheduled to expire on September 30, 2016; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the Federal Register on April 22, 2016 (81 FR 23752).
The Bureau of International Labor Affairs, United States Department of Labor.

ACTION: Notice: Request for information and invitation to comment.

SUMMARY: This notice is a request for information and/or comment on three reports issued by the Bureau of International Labor Affairs (ILAB) regarding child labor and forced labor in certain foreign countries. Relevant information submitted by the public will be used by the Department of Labor (DOL) in preparation of its ongoing reporting under Congressional mandates and Presidential directive. The 2015 Findings on the Worst Forms of Child Labor report (TDA report), published on September 30, 2016, assesses efforts by 137 countries to reduce the worst forms of child labor over the course of 2015 and reports whether countries made significant, moderate, minimal, or no advancement during that year. It also suggests actions foreign countries can take to eliminate the worst forms of child labor through legislation, enforcement, coordination, policies, and social programs. The 2016 edition of the List of Goods Produced by Child Labor or Forced Labor (TVPRAL List), published on September 30, 2016, makes available to the public a list of goods from countries that ILAB has reason to believe are produced by child labor or forced labor in violation of international standards. The 2016 edition of the List of Products Produced by Forced or Indentured Child Labor (EO List), most recently published on December 1, 2014, provides a list of products, identified by country of origin, that the Department, in consultation and cooperation with the Departments of State (DOS) and Homeland Security (DHS), have a reasonable basis to believe might have been mined, produced or manufactured with forced or indentured child labor. Relevant information submitted by the public will be used by DOL in preparation of the next edition of the TDA report, to be published in 2017; the next edition of the TVPRA List, to be published in 2018; and for possible updates to the EO List as needed.

DATES: Submitters of information are requested to provide their submission to the Office of Child Labor, Forced Labor, and Human Trafficking (OCFT) at the email or physical address below by 5 p.m. December 16, 2016.

To Submit Information: Information should be submitted directly to OCFT, Bureau of International Labor Affairs, U.S. Department of Labor. Comments, identified as “Docket No. DOL–2016–0006”, may be submitted by any of the following methods:

The portal includes instructions for submitting comments. Parties submitting responses electronically are encouraged not to submit paper copies.

Email: Email submissions should be addressed to both Chanda Uluca (Uluca.Chanda@dol.gov) and Rachel Rigby (Rigby.Rachel@dol.gov).

FOR FURTHER INFORMATION CONTACT:
Chanda Uluca and Rachel Rigby. Please see contact information above.

SUPPLEMENTARY INFORMATION:
I. The Trade and Development Act of 2000 (TDA), Public Law 106–200 (2000), established a new eligibility criterion for receipt of trade benefits under the Generalized System of Preferences (GSP). The TDA amended the GSP reporting requirements of Section 504 of the Trade Act of 1974, 19 U.S.C. 2464, to require that the President’s annual report on the status of internationally recognized worker rights include “findings by the Secretary of Labor with respect to the beneficiary country’s implementation of its international commitments to eliminate the worst forms of child labor.”

DOL fulfills this reporting mandate through annual publication of the U.S. Department of Labor’s Findings on the Worst Forms of Child Labor with respect to countries eligible for GSP. The 2015 TDA report and additional background information will be available on the Internet at https://www.dol.gov/agencies/ilab/resources/reports/child-labor/findings/.

II. Section 105(b)(1) of the Trafficking Victims Protection Reauthorization Act of 2005 (“TVPRAL of 2005”), Public Law 109–164 (2006), directed the Secretary of Labor, acting through ILAB, to “develop and make available to the public a list of goods from countries that the Bureau of International Labor Affairs has reason to believe are produced by...
forced labor or child labor in violation of international standards” (TVPRA List).

Pursuant to this mandate, in December 2007, DOL published in the Federal Register a set of procedural guidelines that ILAB follows in developing the TVPRA List (72 FR 73374). The guidelines set forth the criteria by which information is evaluated; established procedures for public submission of information to be considered by ILAB; and identified the process ILAB follows in maintaining and updating the List after its initial publication.

III. Executive Order No. 13126 (E.O. 13126) declared that it was “the policy of the United States Government . . . that the executive agencies shall take appropriate actions to enforce the laws prohibiting the manufacture or importation of goods, wares, articles, and merchandise mined, produced, or manufactured wholly or in part by forced or indentured child labor.” Pursuant to E.O. 13126, and following public notice and comment, the Department of Labor published in the January 18, 2001 Federal Register, a final list of products (“EO List”), identified by country of origin, that the Department, in consultation and cooperation with the Departments of State (DOS) and Treasury [relevant responsibilities are now within the Department of Homeland Security (DHS)], had a reasonable basis to believe might have been mined, produced or manufactured with forced or indentured child labor (66 FR 5353). In addition to the List, the Department also published on January 18, 2001, “Procedural Guidelines for Maintenance of the List of Products Requiring Federal Contractor Certification as to Forced or Indentured Child Labor,” which provide for maintaining, reviewing, and, as appropriate, revising the EO List (66 FR 5351).

Pursuant to Sections D through G of the Procedural Guidelines, the EO List may be updated through consideration of submissions by individuals or through OCFT’s own initiative.

DOL has officially revised the EO List four times, most recently on July 23, 2013, each time after public notice and comment as well as consultation with DOS and DHS.

Information Requested and Invitation to Comment: Interested parties are invited to comment and provide information regarding these reports. DOL requests comments or information to maintain and update the TVPRA and EO Lists and to update the findings and suggestions for government action for countries reviewed in the TDA report, as well as to assess each country’s individual advancement toward eliminating the worst forms of child labor during the current reporting period compared to previous years. For more information on the types of issues covered in the TDA report, please see Appendix III of the report. Materials submitted should be confined to the specific topics of the TVPRA List, EO List, and TDA report. DOL will generally consider sources with dates up to five years old (i.e., data not older than January 1, 2012). DOL appreciates the extent to which submissions clearly indicate the time period to which they apply. In the interest of transparency in our reporting, classified information will not be accepted. Where applicable, information submitted should indicate its source or sources, and copies of the source material should be provided. If primary sources are utilized, such as research studies, interviews, direct observations, or other sources of quantitative or qualitative data, details on the research or data-gathering methodology should be provided. Please see the TVPRA List, EO List, and TDA report for a complete explanation of relevant terms, definitions, and reporting guidelines employed by DOL.

Carol Pier,
Deputy Undersecretary for International Affairs.

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR
Notice of Publication of 2016 Update to the Department of Labor’s List of Goods Produced by Child Labor or Forced Labor

AGENCY: Office of the Secretary, Bureau of International Labor Affairs, Department of Labor.

ACTION: Announcement of public availability of updated list of goods.

SUMMARY: This notice announces the publication of an updated list of goods—along with countries of origin—that the Bureau of International Labor Affairs (ILAB) has reason to believe are produced by child labor or forced labor in violation of international standards (the List). ILAB is required to develop and make available to the public the List pursuant to the Trafficking Victims Protection Reauthorization Act (TVPRA) of 2005, as amended.

FOR FURTHER INFORMATION, CONTACT:
Director, Office of Child Labor, Forced Labor, and Human Trafficking, Bureau of International Labor Affairs, U.S. Department of Labor, at (202) 693–4843 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Bureau of International Labor Affairs (ILAB) announces the publication of the seventh edition of the List of Goods Produced by Child Labor or Forced Labor (List), pursuant to the Trafficking Victims Protection Reauthorization Act (TVPRA) of 2005, as amended (TVPRA). ILAB published the initial List on September 10, 2009, and has since published six updated editions. The 2016 edition adds three new goods (pepper, potatoes, and silk cocoons) and two new countries (Costa Rica and Sudan) to the List. This edition also features the removal of Jordan from the List.

Section 105(b) of the TVPRA mandates that ILAB develop and publish a list of goods from countries that ILAB “has reason to believe are produced with child labor or forced labor in violation of international standards.” 22 U.S.C. 7112(b)(2). ILAB’s Office of Child Labor, Forced Labor, and Human Trafficking (OCFT) carries out this mandate. The primary purposes of the List are to raise public awareness about the incidence of child labor and forced labor in the production of goods in the countries listed and to promote efforts to eliminate such practices. A full report, including the updated List and a discussion of the List’s methodology, as well as Frequently Asked Questions and a bibliography of sources, are available on the Department of Labor Web site at: http://www.dol.gov/ilab/reports/child-labor/list-of-goods/.

Signed at Washington, DC, this 19 day of September 2016.

Carol Pier
Deputy Undersecretary for International Affairs.

DEPARTMENT OF LABOR
Bureau of Labor Statistics

Proposed Collection, Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed reinstatement with change of the “Contingent Worker Supplement (CWS) to the Current Population Survey (CPS),” to be conducted in May 2017.

A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the ADDRESSES section of this notice.

DATES: Written comments must be submitted to the office listed in the ADDRESSES section of this notice on or before November 29, 2016.

ADDRESSES: Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE., Washington, DC 20212. Written also may be transmitted by fax to 202–691–5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Carol Rowan, BLS Clearance Officer, 202–691–7628 (this is not a toll-free number). (See ADDRESSES section.)

SUPPLEMENTARY INFORMATION:

I. Background

The CPS has been the principal source of the official Government statistics on employment and unemployment since 1940 (over 75 years). Collection of labor force data through the CPS is necessary to meet the requirements in Title 29, United States Code, Sections 1 and 2. The 2017 CWS will provide information on the characteristics of workers in contingent jobs—that is, jobs that are structured to last only a limited period of time. The CWS will also provide information about workers in several alternative employment arrangements, including independent contractors, on-call workers, temporary help agency workers, and workers provided by contract companies. With the exception of February 2003, the CWS was fielded every two years from 1995 to 2005; however, since then, there have been no reliable and comparable statistics to show how the number and characteristics of these workers have changed over time. In order to maintain data comparability, the 2017 CWS questionnaire will be largely the same as that used in 2005. However, because new types of work have emerged since the last collection of the CWS, BLS is proposing to add four new questions to the end of the CWS. These new questions will explore whether individuals obtain customers or online tasks through companies that electronically match them, often through mobile apps, and examine whether work obtained through electronic matching platforms is a source of secondary earnings.

II. Current Action

Office of Management and Budget clearance is being sought for the Contingent Worker Supplement (CWS) to the CPS. A reinstatement with change of this previously approved collection for which approval has expired is needed to provide the Nation with timely information about the number and characteristics of workers in contingent or alternative employment arrangements. Because new types of work have emerged since the last fielding of the CWS, BLS is proposing to add four new questions. Specifically, two questions will focus on whether individuals obtain customers or online tasks through mobile apps. Such jobs include people using their own cars to drive customers from one place to another, delivering something, or doing customers’ household tasks or errands, as well as online tasks such as data entry, translating text, web or software development, or graphic design. In addition, two questions will examine whether work obtained through electronic matching platforms is a source of secondary earnings.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Reinstatement, with change, of a previously approved collection for which approval has expired.

Title: Contingent Worker Supplement to the CPS.

OMB Number: 1220–0153.

Affected Public: Households.

Total Respondents: 47,000.

Frequency: One time.

Total Responses: 47,000.

Average Time per Response: 9 minutes.

Estimated Total Burden Hours: 7050 hours.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 26th day of September, 2016.

Kimberley Hill,
Chief, Division of Management Systems,

[FR Doc. 2016–23639 Filed 9–29–16; 8:45 am]

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Affirmative Decisions on Petitions for Modification Granted in Whole or in Part

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and 30 CFR part 44 govern the application,
processing, and disposition of petitions for modification. This Federal Register Notice notifies the public that MSHA has investigated and issued a final decision on certain mine operator petitions to modify a safety standard.

**ADDITIONAL INFORMATION:** Copies of the final decisions are posted on MSHA’s Web site at http://www.msha.gov/READROOM/ PETITION.HTM. The public may inspect the petitions and final decisions during normal business hours in MSHA’s Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202. All visitors are required to check in at the receptionist’s desk in Suite 4E401.

**FOR FURTHER INFORMATION CONTACT:** Barbara Barron at 202–693–9447 (Voice), barron.barbara@dol.gov (Email), or 202–693–9441 (Telefax). [These are not toll-free numbers].

**SUPPLEMENTARY INFORMATION:**

I. Introduction

Under section 101 of the Federal Mine Safety and Health Act of 1977, a mine operator may petition and the Secretary of Labor (Secretary) may modify the application of a mandatory safety standard to that mine if the Secretary determines that: (1) An alternative method exists that will guarantee no less protection for the miners affected than that provided by the standard; or (2) the application of the standard will result in a diminution of safety to the affected miners. MSHA bases the final decision on the petitioner’s statements, any comments and information submitted by interested persons, and a field investigation of the conditions at the mine. In some instances, MSHA may approve a petition for modification on the condition that the mine operator complies with other requirements noted in the decision.

II. Granted Petitions for Modification

On the basis of the findings of MSHA’s investigation, and as designee of the Secretary, MSHA has granted or partially granted the following petitions for modification:

- **Docket Number:** M–2014–023–C.  
  **FR Notice:** 79 FR 45466 (8/5/2014).  
  **Petitioner:** ACI Tygart Valley, 1200 Tygart Drive, Grafton, West Virginia 26354.
  
  **Mine:** Leer Mine #1, MSHA I.D. No. 46–09192, located in Taylor County, West Virginia.  
  **Regulation Affected:** 30 CFR 75.500(d) (Permissible electric equipment).

- **Docket Number:** M–2014–029–C.  
  **FR Notice:** 79 FR 64625 (10/30/2014).  
  **Petitioner:** North American Drillers, LLC, 130 Meadow Ridge Road, Suite 22, Mount Morris, Pennsylvania 15349.
  
  **Mines:** Tunnel Ridge Mine, MSHA I.D. No. 46–08864, located in Ohio County, West Virginia; Mountain View Mine, MSHA I.D. No. 46–09028, located in Tucker County, West Virginia; Leer Mine, MSHA I.D. No. 46–09192, Taylor County, West Virginia; Monongalia County Mine, MSHA I.D. No. 46–09168, located in Monongalia County, West Virginia; Ohio County Mine, MSHA I.D. No. 46–01436, located in Ohio County, West Virginia; Harrison County Mine, MSHA I.D. No. 46–01318, located in Harrison County, West Virginia; Marshall County Mine, MSHA I.D. No. 46–01437, located in Marshall County, West Virginia; Marion County Mine, MSHA I.D. No. 46–01433, located in Marion County, West Virginia; Powhatan #6 Mine, MSHA I.D. No. 33–01159, located in Belmont County, Ohio; and Federal #2 Mine, MSHA I.D. No. 46–01456, located in Monongalia County, West Virginia.
  
  **Regulation Affected:** 30 CFR 77.1914(a) (Electrical equipment).

- **Docket Number:** M–2015–023–C.  
  **FR Notice:** 81 FR 11843 (3/7/2016).  
  **Petitioner:** Peabody Energy Company, 12968 Illinois State Route 13, Coulterville, Illinois 62237.
  
  **Mine:** Gateway North Mine, MSHA I.D. No. 11–03235, located in Randolph County, Illinois.
  
  **Regulation Affected:** 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 18.35 (Portable trailing cables and cords).

- **Docket Number:** M–2015–028–C.  
  **FR Notice:** 81 FR 11843 (3/7/2016).  
  **Petitioner:** Clinton M Wynn Mining, 419 Shingara Lane, Sunbury, Pennsylvania 17801.
  
  **Mine:** Bottom Rock Slope, MSHA I.D. No. 36–10110, located in Northumberland County, Pennsylvania.
  
  **Regulation Affected:** 30 CFR 75.1200(d) & (i) (Mine map).

- **Docket Number:** M–2016–006–C.  
  **FR Notice:** 81 FR 11843 (3/7/2016).  
  **Petitioner:** Clinton M Wynn Mining, 419 Shingara Lane, Sunbury, Pennsylvania 17801.
  
  **Mine:** Bottom Rock Slope, MSHA I.D. No. 36–10110, located in Northumberland County, Pennsylvania.
  
  **Regulation Affected:** 30 CFR 75.1202 and 75.1202–1(a) (Temporary notations, revisions and requirements).

- **Docket Number:** M–2016–007–C.  
  **FR Notice:** 81 FR 11843 (3/7/2016).  
  **Petitioner:** Clinton M Wynn Mining, 419 Shingara Lane, Sunbury, Pennsylvania 17801.
  
  **Mine:** Bottom Rock Slope, MSHA I.D. No. 36–10110, located in Northumberland County, Pennsylvania.
  
  **Regulation Affected:** 30 CFR 75.1400 (Hoisting equipment; general).

- **Docket Number:** M–2013–003–M.  
  **FR Notice:** 78 FR 11232 (2/15/2013).  
  **Petitioner:** Peabody Midwest Mining Corporation, N7815 County Highway P, Taylor, Wisconsin 54659.
  
  **Mine:** Taylor Plant, MSHA I.D. No. 47–02555, P.O. Box 160, Taylor, Wisconsin 54659, located in Jackson County, Wisconsin.
  
  **Regulation Affected:** 30 CFR 56.13020 (Use of compressed air).

- **Docket Number:** M–2015–007–M.  
  **FR Notice:** 81 FR 4337 (1/26/2016).  
  **Petitioner:** Frontier-Kemper Constructors, Inc., 1605 Allen Road, Evansville, Indiana 47710–3394.
  
  **Mine:** Solvay Chemicals, Inc., P.O. Box 1167, 400 County Road 85, Green Bay, Wisconsin 54304

- **Docket Number:** M–2011–016–C.  
  **FR Notice:** 76 FR 13087 (3/16/2011).  
  **Petitioner:** Division of Labor, State of Ohio, Columbus, Ohio 43215.
  
  **Mine:** Vantage Underground Mine, MSHA I.D. No. 46–01315, located in St. Clair County, Michigan.
  
  **Regulation Affected:** 30 CFR 75.500(d) (Permissible electric equipment).

- **Docket Number:** M–2011–017–C.  
  **FR Notice:** 76 FR 13087 (3/16/2011).  
  **Petitioner:** Division of Labor, State of Ohio, Columbus, Ohio 43215.
  
  **Mine:** Blue Heron Underground Mine, MSHA I.D. No. 46–01315, located in St. Clair County, Michigan.
  
  **Regulation Affected:** 30 CFR 75.500(d) (Permissible electric equipment).

- **Docket Number:** M–2011–018–C.  
  **FR Notice:** 76 FR 13087 (3/16/2011).  
  **Petitioner:** Division of Labor, State of Ohio, Columbus, Ohio 43215.
  
  **Mine:** MINE; Blue Heron Underground Mine, MSHA I.D. No. 46–01315, located in St. Clair County, Michigan.
  
  **Regulation Affected:** 30 CFR 75.500(d) (Permissible electric equipment).
DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by MSHA’s Office of Standards, Regulations, and Variances on or before October 31, 2016.

ADDRESSES: You may submit your comments, identified by “docket number” on the subject line, by any of the following methods:

1. Electronic Mail: zzMSHA-comments@dol.gov. Include the docket number of the petition in the subject line of the message.
3. Regular Mail or Hand Delivery: MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Person’s delivering documents are required to check in at the receptionist’s desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), barron.barbara@dol.gov (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–027–C.
Petitioner: Oak Grove Resources, LLC, 8360 Taylors Ferry Road, Hueytown, Alabama 35023.
Mine: Oak Grove Mine, MSHA I.D. No. 01–00851, located in Jefferson County, Alabama.

Regulation Affected: 30 CFR 75.364(b)(2) (Weekly examination).
Modification Request: The petitioner requests a modification of the existing standard to permit an alternative method of compliance for weekly examinations of the four-part overcast bank located in the Main North entries at spad number 16+20, due to deteriorating roof and rib conditions that have made traveling the area unsafe and conditions in the area are impractical and unsafe to rehabilitate. The petitioner proposes to have a certified person take air quantity and quality measurements at monitoring points 71A and 71C at entrance and exist of overcast bank that will afford the mines the same protection as the existing standard.

The petitioners argue that the existing standard 30 CFR 75.364(b)(2) undermines the safety of the miners by placing them in an area with deteriorated roof and rib conditions. The petitioner states that the following terms and conditions will be followed:

1. Monitoring stations 71A will evaluate air entering overcast bank.
2. Monitoring station 71C will evaluate air as it leaves overcast bank.
3. Signs showing safe travel route to each monitoring station will be posted in adjacent entries. Monitoring stations and routes will be kept free of water accumulations.
4. A certified person will conduct weekly evaluations at each of the monitoring stations. Evaluations will include quantity and quality of air entering or exiting overcast bank. Measurements will be made using MSHA-approved and calibrated hand-held multi gas detectors to check for methane, and oxygen concentrations. Appropriate calibrated anemometers will be used to check airflow and volume.
5. A diagram of normal air flow will be posted at 71A and 71C monitoring points and maintained legible.
6. All monitoring stations and approaches will at all times be maintained in a safe condition. The roof will be supported by bolts and other means to prevent deterioration in the area of monitoring points.
7. Monitoring stations locations will be shown on an annually submitted mine ventilation map. Monitoring stations will not be moved to another location without prior approval by the District Manager as part of the ventilation plan for the mine.
8. For added safety additional roof support will be added under overcasts that belt and track travel through.
9. Prior to implementation of this modification, all mine personnel will be instructed that except along designated routes no travel into the petitioned area will be permitted and all approaches will be fenced or barricaded with “DO NOT ENTER” warning signs.
10. The overcast area is not being used for work or travel, and, upon information and belief, no one has performed work, examinations, inspections, or otherwise traveled in the overcast area in many years.
11. Within 60 days after the Proposed Decision and Order (PDO) becomes final, the petitioner will submit proposed revisions for the approved part 48 training plan to the District
Manager. The revisions will include initial and refresher training regarding compliance with the PDO.

(12) Use of the proposed alternative method described in this petition will prevent miners from being exposed to unnecessary hazards, and will increase the measure of protection to the miners.

The petitioner asserts that application of the existing standard to the particular overcast area will result in a diminution of safety to the miners and that the proposed alternative method will at all times guarantee no less than the same measure of protection to the miners as would be provided by the existing standard.

Sheila McConnell,
Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–23–P

DEPARTMENT OF LABOR
Occupational Safety and Health Administration
[Docket No. OSHA–2010–0008]

Construction Fall Protection Systems Criteria and Practices, and Training Requirements; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning its proposal to extend OMB approval of the information collection requirements contained in the Construction Standards on Fall Protection Systems Criteria and Practices (29 CFR 1926.502), and Training Requirements (29 CFR 1926.503).

DATES: Comments must be submitted (postmarked, sent, or received) by November 29, 2016.

ADDRESSES: Electronically: You may submit comments and attachments electronically at http://www.regulations.gov, which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1994. Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2010–0008, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor’s and Docket Office’s normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

Instructions: All submissions must include the Agency name and the OSHA docket number (Docket No. OSHA–2010–0008) for this Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at http://www.regulations.gov. For further information on submitting comments, see the “Public Participation” heading in the section of this notice titled SUPPLEMENTARY INFORMATION.

Docket: To read or download comments or other material in the docket, go to http://www.regulations.gov or the OSHA Docket Office at the address above. All documents in the docket (including this Federal Register notice) are listed in the http://www.regulations.gov index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue NW., Washington, DC 20210; (202) 693–2044, to obtain a copy of the ICR.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are understandable, and OSHA’s estimate of the information collection burden is correct. The Occupational Safety and Health Act of 1970 (the OSH Act) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act, or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The Standards on Construction Fall Protection Systems Criteria and Practices (29 CFR 1926.502) and Training Requirements (29 CFR 1926.503) ensure that employers provide the required fall protection for their workers. Accordingly, these standards have the following paperwork requirements: Paragraphs (c)(4)(ii) and (k) of 29 CFR 1926.502, which specify certification of safety nets and development of fall protection plans, respectively, and paragraph (b) of 29 CFR 1926.503, which requires employers to certify training records. The training certification requirement specified in paragraph (b) of 29 CFR 1926.503 documents the training provided to workers potentially exposed to fall hazards in construction. A competent person must train these workers to recognize fall hazards and in the use of procedures and equipment that minimize these hazards. An employer must verify compliance with this training requirement by preparing and maintaining a written certification record that contains the name or other identifier of the worker receiving the training, the date(s) of the training, and the signature of the competent person who conducted the training, or of the employer.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

• Whether the proposed information collection requirements are necessary for the proper performance of the Agency’s functions, including whether the information is useful;

• The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;

• The quality, utility, and clarity of the information collected; and

• Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.
III. Proposed Actions

OSHA is requesting that OMB extend its approval of the collection of information requirements contained in the Construction Standards on Fall Protection Systems Criteria and Practices (29 CFR 1926.502) and Training Requirements (29 CFR 1926.503). OSHA is requesting a 31,264 burden hour reduction, from 457,108 hours to 425,844 based on the Agency’s determinations that fewer employers are required to comply with the Standard’s collection of information requirements and that information exchanged during an OSHA compliance inspection is not covered by the PRA. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Construction Fall Protection Systems Criteria and Practices (29 CFR 1926.502) and Training Requirements (29 CFR 1926.503).

OMB Control Number: 1218–0197.

Affected Public: Business or other for-profits; Federal Government; State, Local, or Tribal Government.

Number of Responses: 5,314,317.

Frequency of Record Keeping: On occasion, annually.

Average Time per Response: Time per response ranges from 5 minutes (.08 hour) to certify a safety net to 1 hour to develop a fall protection plan.

Estimated Total Burden Hours: 425,844.

Estimated Cost (Operation and Maintenance): $0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at http://www.regulations.gov, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for this ICR (Docket No. OSHA–2010–0008). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled ADDRESSES). The additional materials must clearly identify your electronic comments by your full name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350. (TTY (877) 889–5627).

Comments and submissions are posted without change at http://www.regulations.gov. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the http://www.regulations.gov index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the http://www.regulations.gov Web site to submit comments and access the docket is available at the Web site’s “User Tips” link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor’s Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on September 27, 2016.

David Michaels,
Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

OFFICE OF MANAGEMENT AND BUDGET

Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity

AGENCY: Executive Office of the President, Office of Management and Budget (OMB).

SUMMARY: The Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity were last revised in 1997 (62 FR 58782, Oct. 30, 1997; see https://www.whitehouse.gov/omb/fedreg/1997standards). Since these revisions were implemented, much has been learned about how these standards have improved the quality of Federal information collected and presented on race and ethnicity. At the same time, some areas may benefit from further refinement. Accordingly, OMB currently is undertaking a review of particular components of the 1997 standard: The use of separate questions measuring race and ethnicity and question phrasing; the classification of a Middle Eastern and North African group and reporting category; the description of the intended use of minimum reporting categories; and terminology used for race and ethnicity classifications. OMB’s current review of the standard is limited to these areas. Specific questions appear under the section, “Issues for Comment.”

DATES: Comments on the review and possible limited revisions to OMB’s Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity detailed in this notice must be in writing. To ensure consideration of comments, they must be received no later than 30 days from the publication of this notice. Please be aware of delays in mail processing at Federal facilities due to increased security. Respondents are encouraged to send comments electronically via email, or http://www.regulations.gov (discussed in ADDRESSES below).

ADDRESSES: Written comments on these issues may be addressed to Katherine K. Wallman, Chief Statistician, Office of Management and Budget, 1800 G St., 9th Floor, Washington, DC 20503. You may also send comments or questions via Email to Race-ethnicity@omb.eop.gov or to http://www.regulations.gov—a Federal E-Government Web site that allows the public to find, review, and submit comments on documents that agencies have published in the Federal Register and that are open for comment. Simply type, “Race-ethnicity” (in quotes) in the Comment or Submission search box, click Go, and follow the instructions for submitting comments. Comments submitted in response to this notice may be made available to the public through relevant Web sites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary...
information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

Electronic Availability: This document is available on the Internet on the OMB Web site at: https://www.whitehouse.gov/sites/default/files/omb/FedReg/1997standards.pdf.

FOR FURTHER INFORMATION CONTACT: Jennifer Park, Senior Statistician, 1800 G St., 9th Floor, Washington, DC 20503, Email address: Race-ethnicity@omb.eop.gov, telephone number: (202) 395–9046.

SUPPLEMENTARY INFORMATION:

Background: Development work on the standards for classification of Federal data on race and ethnicity originated in the activities of the Federal Interagency Committee on Education (FICE), which was originally established by Executive Order 11185 in 1964. The FICE Subcommittee on Minority Education completed a report in April 1973 on higher education for Chicanos, Puerto Ricans, and American Indians, which noted in particular the lack of comparable data on racial and ethnic groups. Accordingly, the report called for the coordinated development of common definitions for racial and ethnic groups, and the Federal collection of racial and ethnic enrollment and other educational data on a compatible and nonduplicative basis.

In June 1974, FICE created an Ad Hoc Committee on Racial and Ethnic Definitions whose 25 members came from Federal agencies with major responsibilities for the collection or use of racial and ethnic data. It took on the task of determining and describing the major groups to be identified by Federal agencies when collecting and reporting racial and ethnic data. The Ad Hoc Committee wanted to ensure that whatever categories the various agencies used could be aggregated, disaggregated, or otherwise combined so that the data developed by one agency could be used in conjunction with the data developed by another agency. In addition, the Ad Hoc Committee recommended that the categories could be subdivided into more detailed ethnic groups to meet users’ needs, but that to maintain comparability, such detail data should aggregate into the minimum racial and ethnic categories.

Following testing of proposed categories, and the receipt of comments and incorporation of suggested modifications, OMB on May 12, 1977, promulgated for use by all Federal agencies minimum standard categories for the collection and presentation of data on race and ethnicity. (See 42 FR 1926 May 12, 1977.) (Although OMB required the agencies to use these racial and ethnic categories at a minimum, it should be emphasized that the standard permitted collection of additional detail if the more detailed categories could be aggregated into the minimum racial and ethnic categories to allow comparability of data.)

In 1994, OMB published a notice of proposed review and possible revision of the standard. (See https://www.whitehouse.gov/omb/fedregnotice_15.) It requested comments on the adequacy of then current categories. Specifically, it asked for comments on the addition of a “multiracial” category; the addition of an “Other Race” category; use of an opened-ended question to solicit information on race and ethnicity; the names of the “Black” category and the “American Indian or Alaska Native” category; including “Native Hawaiians” as a separate reporting category from the “Asian or Pacific Islander” category; adding Hispanic as a racial designation rather than ethnicity; and adding an “Arab or Middle Eastern” category as an ethnicity. OMB established an Interagency Committee for the Review of the Racial and Ethnic Standards, whose members represented the many and diverse Federal needs for racial and ethnic data, including statutory requirements for such data.

In 1997, OMB published the recommendations of the Interagency Committee in its notice of decision. (See https://www.whitehouse.gov/omb/fedreg_1997standards.) Drawing from stakeholder input, Interagency Committee statistical analysis, and public comment, the standard was revised in several ways. It required separate measures of race and ethnicity, with the “Hispanic or Latino” ethnicity presented first. Respondents were offered the option of selecting one or more racial designations, with the use of the instructions “Mark one or more” and “Select one or more.” When AfricanAmerican” was added to the category of “Black.” “Native Hawaiian or Other Pacific Islander” was created as a separate category from “Asian or Pacific Islander.” However, agreement could not be reached regarding the composition of an “Arab/Middle Eastern” category, and no classification or category was therefore defined.

Current Review: Since the 1997 revision, the U.S. population has continued to become more racially and ethnically diverse. Additionally, much has been learned about the implementation of these standards since they were issued approximately two decades ago. In accordance with good statistical practice, several Federal agencies have conducted methodological research to better understand how use of the revised standard informs the quality of Federal statistics on race and ethnicity.

In 2014, OMB formed an Interagency Working Group for Research on Race and Ethnicity to exchange research findings, identify implementation issues, and collaborate on a shared research agenda to improve Federal data on race and ethnicity. The Working Group comprises representatives from ten cabinet departments and three other agencies engaged in the collection or use of Federal race and ethnicity data.

Through its systematic review of the implementation of the 1997 revision and stakeholder feedback, the Working Group identified four particular areas where further revisions to the standard might improve the quality of race and ethnicity information collected and presented by Federal agencies. Specifically, these four areas include:

1. The use of separate questions versus a combined question to measure race and ethnicity and question phrasing;
2. The classification of a Middle Eastern and North African group and distinct reporting category;
3. The description of the intended use of minimum reporting categories; and
4. The salience of terminology used for race and ethnicity classifications and other language in the standard.

Issues for Comment: With this Notice, OMB is seeking comments from the public on: (1) The adequacy of the current standard in the areas identified for focused review (see detailed descriptions below); (2) specific suggestions for the identified areas that have been offered; and (3) principles that should govern any proposed revisions to the standards in the identified areas.

Question Format & Nonresponse: Although many respondents report within the race and ethnicity categories specified by the standard, recent censuses, surveys, and experimental tests have shown that its implementation is not well understood and/or is considered inadequate by some respondents. This results in respondents’ inability and/or
unwillingness to self-identify as the standard intends.

For a growing segment of respondents, this situation arises because of the conceptual complexity that is rooted in the standard’s definitional distinction of race from ethnicity. Nearly half of Hispanic or Latino respondents do not identify within any of the standard’s race categories (Rios et al. 2014; see https://www.census.gov/palnora/population/www/documentation/twps0102/twps0102.pdf). With the projected steady growth of the Hispanic or Latino population, the number of people who do not identify with any of the standard’s race categories is expected to increase (Compton et al. 2012; see https://www.census.gov/2010census/pd/2010_Census_Race_HO_AQE.pdf; Rios et al. 2014). Additionally, although the reporting of multiple races is permitted according to the current standard, reporting multiple Hispanic origins or a mixed Hispanic/non-Hispanic heritage in the current Hispanic ethnicity question is not permitted. (Please note: The terms ‘Hispanic or Latino’ and “Hispanic” are used interchangeably in this Notice.)

To explore this issue further, the U.S. Census Bureau conducted a 2010 Census Race and Hispanic Origin Alternative Questionnaire Experiment (AQE). Among its most notable findings was that a combined question design (rather than the current standard of separate questions) yielded a substantially increased use of OMB standards categories among Hispanic or Latino respondents, signaling that a combined question approach may better reflect how Hispanic or Latino respondents view themselves (see https://www.census.gov/2010census/pdf/2010_Census_Race_HO_AQE.pdf). Qualitative aspects of this research further supported this interpretation. The Federal Interagency Working Group for Research on Race and Ethnicity continues to examine this proposal. If a combined measure were to be used outside of a limited, methodological experiment, it would be necessary for OMB to revise the current standard.

Middle Eastern or North African: According to the current standard, the aggregate reporting category of “White” race includes people having origins in any of the original peoples of Europe, the Middle East, or North Africa. During the periodic review preceding the 1997 revision, OMB’s Interagency Committee for the Review of the Racial and Ethnic Standards considered suggestions to require an additional, distinct minimum reporting category for respondents identifying as “Arabs or Middle Easterners.” At the conclusion of the review, agreement could not be reached among public stakeholders on the intended measurement concept (i.e., whether the category should be based on language, geography, etc.) nor, accordingly, a definition for this category. The Committee took this public disagreement into consideration and thus did not issue a definition nor an additional, minimum reporting category for this group. Instead, OMB encouraged further research be done to determine the best way to improve data for “Arabs/Middle Easterners.” The Federal Interagency Working Group for Research on Race and Ethnicity continues to examine this proposal, with input from multiple stakeholders. If consensus upon a definition for Middle Eastern or North African can be reached, with or without the requirement of an additional, separate, aggregate reporting category, OMB would need to revise the current standard to clarify the classification instructions. This would address potential inconsistencies across data collections where data describing a Middle Eastern or North African group could be reported separately for detailed analyses (for example, where sample size permits), but otherwise could be aggregated into the “White” reporting category to facilitate comparability across information collections that would not have large enough samples to permit separate, detailed reporting.

Intent of Minimum Categories: The standard provides a minimum set of racial and ethnic categories for use when Federal agencies are collecting and presenting such information for statistical, administrative, or compliance purposes. However, it does not preclude the collection and presentation of additional detailed categories for statistical, administrative, or compliance purposes, provided that the additional detailed categories can be aggregated into the minimum set to permit comparisons. Specifically, the current standard advises, “In no case shall the provisions of the standards be construed to signify a data collection of data to the categories described above. The collection of greater detail is encouraged . . . .”

There are numerous examples of Federal agencies collecting detailed race and ethnicity data in their statistical reporting; these are not limited to decennial censuses or extremely large surveys, such as the American Community Survey (ACS). Nonetheless, OMB has learned that the minimum racial and ethnic categories as described in the current standard are often misinterpreted as the only permissible reporting categories. Accordingly, OMB has asked the Federal Interagency Working Group for Research on Race and Ethnicity to examine the language in the current standard in order to improve the understanding of the intended use of minimum categories, that is, to facilitate comparison across information collections, rather than to limit detailed race and ethnic group information collection and presentation.

Terminology: As the diversity of the U.S. continues to increase, it becomes more important for people to understand the racial and ethnic terminology included in Federal data collection systems. The language used to describe race and ethnicity changes over time, and while some terminology continues to resonate with group members, other expressions may fall out of favor or take on other meanings.

For example, the standard currently designates “Black or African American” as the “principal minority race.” This designation provides an option, in certain circumstances, for presentation of the “White” category, the “Black or African American” category (as the ‘principal minority race’) and the “All Other Races” category, without the requirement of also presenting other minimum reporting categories. The designation may warrant revision for several reasons. First, certain definitions of “minority” as including Hispanic (i.e., HR 4238; see https://www.congress.gov/bill/114th-congress/house-bill/4238), and the relative prevalence of the Hispanic or Latino population compared with the Black or African American population, suggest potential revision of the “principal minority race” designation, or the use of alternative terms (e.g., “principal minority race/ethnicity”). Perhaps most broadly, the utility of presenting a category of “All Other Races,” given the diversity of experience among other race/ethnicity groups, and the salience of designating a “principal minority” for presentation purposes, suggests further review. The Federal Interagency Working Group for Research on Race and Ethnicity is examining such terminology for possible revision to the standard.

Guidance for Review: Federal Uses of Race and Ethnicity Data: When providing comment regarding proposed areas for possible revision, it may be helpful to keep in mind how the standard is used. The standard not only guides information collected and presented from the decennial census and numerous other statistical collections, but also is used by Federal agencies for civil rights enforcement and for program
administrative reporting. These include, among others:

- Enforcing the requirements of the Voting Rights Act;
- reviewing State congressional redistricting plans;
- collecting and presenting population and population characteristics data, labor force data, education data, and vital and health statistics;
- establishing and evaluating Federal affirmative action plans and evaluating affirmative action and discrimination in employment in the private sector;
- monitoring the access of minorities to home mortgage loans under the Home Mortgage Disclosure Act;
- enforcing the Equal Credit Opportunity Act;
- monitoring and enforcing desegregation plans in the public schools;
- assisting minority businesses under the minority business development programs; and
- monitoring and enforcing the Fair Housing Act.

To most effectively promote information quality, the intended uses of data on race and ethnicity should be considered when changes to the standards are contemplated. Additionally, the possible effects of any proposed changes on the quality and utility of the resulting data must be considered.

**General Principles for the Review of the Racial and Ethnic Data Categories:**

When providing comment on particular areas of the current standard, it also may be helpful to consult the principles that framed the 1977 and 1997 revisions. Comments on these principles are welcomed.

1. The racial and ethnic categories set forth in the standard should not be interpreted as being scientific or anthropological in nature.
2. Respect for individual dignity should guide the processes and methods for collecting data on race and ethnicity; respondent self-identification should be facilitated to the greatest extent possible.
3. To the extent practicable, the concepts and terminology should reflect clear and generally understood definitions that can achieve broad public acceptance.
4. The racial and ethnic categories should be comprehensive in coverage and produce compatible, nonduplicated, exchangeable data across Federal agencies.
5. Foremost consideration should be given to data aggregations by race and ethnicity that are useful for statistical analysis, program administration and assessment, and enforcement of existing laws and judicial decisions, bearing in mind that the standards are not intended to be used to establish eligibility for participation in any Federal program.
6. While Federal data needs for racial and ethnic data are of primary importance, consideration should also be given to needs at the State and local government levels, including American Indian tribal and Alaska Native village governments, as well as to general societal needs for these data.
7. The categories should set forth a minimum standard; additional categories should be permitted provided they can be aggregated to the standard categories. The number of standard categories should be kept to a manageable size, as determined by statistical concerns and data needs.
8. A revised set of categories should be operationally feasible in terms of burden placed upon respondents and the cost to agencies and respondents to implement the revisions.
9. Any changes in the categories should be based on sound methodological research and should include evaluations of the impact of any changes not only on the usefulness of the resulting data but also on the comparability of any new categories with the existing ones.
10. Any revision to the categories should provide for a crosswalk at the time of adoption between the old and the new categories so that historical data series can be statistically adjusted and comparisons can be made.
11. Because of the many and varied needs and strong interdependence of Federal agencies for racial and ethnic data, any changes to the existing categories should be the product of an interagency collaborative effort.

OMB recognizes that these principles may in some cases represent competing goals for the standard. Through the review process, it will be necessary to balance statistical issues, needs for data, and social concerns. The application of these principles to guide the review and possible revision of the standard ultimately should result in consistent, publicly accepted data on race and ethnicity that will meet the needs of the government and the public while recognizing the diversity of the population and respecting the individual’s dignity.

**Howard A. Shelanski,**
Administrator, Office of Information and Regulatory Affairs.

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**

[Notice: (16–069)]

**NASA Advisory Council; Science Committee; Heliophysics Subcommittee; Meeting**

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the Heliophysics Subcommittee of the NASA Advisory Council (NAC). This Subcommittee reports to the Science Committee of the NAC. The meeting will be held for the purpose of soliciting, from the scientific community and other persons, scientific and technical information relevant to program planning.

**DATES:** Tuesday, October 25, 2016, 10:00 a.m.–4:00 p.m., Eastern Time.

**FOR FURTHER INFORMATION CONTACT:** KarSheila Henderson, Science Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–2355, fax (202) 358–2779, or khenderson@nasa.gov.

**SUPPLEMENTARY INFORMATION:** The meeting will be open to the public telephonically and via WebEx. Any interested person may call the USA toll free conference call number 1–888–625–1623, passcode 5538265, to participate in this meeting by telephone. The WebEx link is https://nasa.webex.com/; the meeting number is 999 356 448 and the password is HPS2016!. The agenda for the meeting includes the following topics:

—Living With a Star (LWS) Vision
—LWS Focus Topics for Research Opportunities in Space and Earth Sciences (ROSES) 2017

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

**Patricia D. Rausch,**
Advisory Committee Management Officer, National Aeronautics and Space Administration.

**BILLING CODE 7510–13–P**
Advisory Committee for Social, Behavioral and Economic Sciences; Notice of Meeting

In accordance with Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

**Name:** Advisory Committee for Social, Behavioral and Economic Sciences (#1171).

**Date/Time:**
- October 27, 2016: 9:00 a.m. to 5:00 p.m.
- October 28, 2016: 8:45 a.m. to 12:45 p.m.

**Place:** National Science Foundation, 4201 Wilson Boulevard, Stafford I, Room 1235, Arlington, VA 22230.

**Type of Meeting:** Open.

**Contact Person:** Dr. Deborah Olster, Office of the Assistant Director, Directorate for Social, Behavioral and Economic Sciences, National Science Foundation, 4201 Wilson Boulevard, Room 905, Arlington, Virginia 22230; Telephone: 703–292–8700.

**Summary of Minutes:** May be obtained from contact person listed above.

**Purpose of Meeting:** To provide advice and recommendations to the National Science Foundation on major goals and policies pertaining to Social, Behavioral and Economic Sciences, the Directorate (SBE) programs and activities.

**Agenda**

**Thursday, October 27, 2016**
- SBE Directorate and Division Updates
- NSF Strategic Plan
- Update from the National Institutes of Health
- Division of Social and Economic Sciences (SES) Committee of Visitors Report and SES Response
- The National Academies’ Division of Behavioral and Social Sciences and Education: Reflections from the Executive Director
- NSF “Big Idea” for Future Investment: Navigating the New Artic
- Report to the National Science Board on the NSF’s Merit Review Process Fiscal Year 2015

**Friday, October 28, 2016**
- Meeting with NSF Leadership
- NSF “Big Idea” for Future Investment: Understanding the Rules of Life: Predicting Phenotype
- Reframing the Social and Behavioral Sciences
- Future Meetings, Assignments and Concluding Remarks

NATIONAL SCIENCE FOUNDATION
Advisory Committee for Biological Sciences; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

**Name:** Advisory Committee for Biological Sciences (#1110).

**Date and Time:**
- October 24, 2016: 8:30 a.m.–5:00 p.m.
- October 25, 2016: 8:30 a.m.–11:30 a.m.

**Place:** National Science Foundation, 4201 Wilson Boulevard, Room 1235, Arlington, VA 22230.

**Contact Person:** Dr. Charles Liarakos, National Science Foundation, 4201 Wilson Boulevard, Room 605, Arlington, VA 22230; Tel No.: (703) 292–8400.

**Purpose of Meeting:** The Advisory Committee for the Directorate for Biological Sciences (BIO) provides advice, recommendations, and oversight concerning major program emphases, directions, and goals for the research-related activities of the divisions that make up BIO.

**Agenda:** Agenda items will include a NEO project update, presentations from the Advisory Committee members about leading edge science, a synopsis of the Division of Biological Infrastructure Committee of Visitors’ report, and other matters relevant to the Directorate for Biological Sciences.

Dated: September 26, 2016.

Crystal Robinson,
Committee Management Officer.

NATIONAL SCIENCE FOUNDATION
Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Subcommittee on T–H Phenomena; Notice of Meeting

The ACRS Subcommittees on T–H Phenomenon will hold a meeting on October 5, 2016, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance with the exception of portions that may be closed to protect information that is proprietary pursuant to 5 U.S.C. 552b(c)(4). The agenda for the subject meeting shall be as follows:

**Wednesday, October 5, 2016—8:30 a.m. Until 4:30 p.m.**

The Subcommittee will review the fidelity of methods and codes for operation at AREVA’s Extended Flow Window (plant-specific Monticello). The Subcommittee will hear presentations by and hold discussions with the NRC staff regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Zena Abdullahi (Telephone 301–415–8716 or Email: Zena.Abdullahi@nrc.gov) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 21, 2015, (80 FR 63846).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at http://www.nrc.gov/reading-rm/doc-collections/acrs. Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO.
If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (Telephone 240–888–9835) to be escorted to the meeting room.

Dated: September 26, 2016.

John Lai,
Acting Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request’s acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service’s request(s) can be accessed via the Commission’s Web site (http://www.prc.gov). Non-public portions of the Postal Service’s request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service’s request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. Docket No(s): CP2012–22; Filing Title: Notice of United States Postal Service of Change in Prices Pursuant to Amendment to Parcel Select and Parcel Return Service Contract 3; Filing Acceptance Date: September 23, 2016; Filing Authority: 39 CFR 3015.5; Public Representative: Curtis E. Kidd; Comments Due: October 3, 2016.

This notice will be published in the Federal Register.

Ruth Ann Abrams,
Acting Secretary.

**SECURITIES AND EXCHANGE COMMISSION**

**[Investment Company Act Release No. 32283; 812–14641]**

SerenityShares Investments LLC, et al.; Notice of Application

September 26, 2016.

**AGENCY:** Securities and Exchange Commission (“Commission”).

**ACTION:** Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the “Act”) for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(F) for an exemption from sections 12(d)(1)(A) and 12(d)(1)(B) of the Act. The requested order would permit (a) index-based series of certain open-end management investment companies (“Funds”) to issue shares redeemable in large aggregations only (“Creation Units”); (b) secondary market transactions in Fund shares to occur at negotiated market prices rather than at net asset value (“NAV”); (c) certain Funds to pay redemption proceeds, under certain circumstances, more than seven days after the tender of shares for redemption; (d) certain affiliated persons of a Fund to deposit securities into, and receive securities from, the Fund in connection with the purchase and redemption of Creation Units; and (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the Funds (“Funds of Funds”) to acquire shares of the Funds.

**APPlicants:** SerenityShares Investments LLC (the “Initial Adviser”), a Delaware limited liability company that will be registered as an investment adviser under the Investment Advisers Act of 1940, ETF Series Solutions (the “Trust”), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, and Quasar Distributors, LLC (the “Distributor”), a Delaware limited liability company and broker-dealer registered under the Securities Exchange Act of 1934 (“Exchange Act”).
FILING DATES: The application was filed on April 12, 2016, and amended on September 1, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission’s Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on October 21, 2016, and should be accompanied by proof of service on applicants, in the form of an affidavit, or for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission’s Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants: The Initial Adviser, 6615 Hillandale Road, Chevy Chase, MD 20815; the Trust and the Distributor, 615 East Michigan Street, 4th Floor, Milwaukee, Wisconsin 53202.

FOR FURTHER INFORMATION CONTACT: Christine Y. Greenlees, Senior Counsel, at (202) 551–6879, or David J. Marcinkus, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission’s Web site by searching for the file number, or for an applicant using the Company name box, at http://www.sec.gov/search/search.htm or by calling (202) 551–6900.

Summary of the Application

1. Applicants request an order that would allow Funds to operate as exchange traded funds (“ETFs”). Each Self-Indexing Fund will post on its Web site the identities and quantities of the investment positions that will form the basis for the Fund’s calculation of its NAV at the end of the day. 1 Applicants request that the order apply to the new series of the Trust and any additional series of the Trust, and any other open-end management investment company or series thereof, that may be created in the future (each, included in the term “Fund”), each of which will operate as an ETF and will track a specified index comprised of domestic or foreign equity and/or fixed income securities (each, an “Underlying Index”). Any Fund will be advised by the Initial Adviser or an entity controlling, controlled by, or under common control with the Initial Adviser (each, an “Adviser”) and (b) comply with the terms and conditions of the application.

2. Each Fund will hold investment positions selected to correspond generally to the performance of an Underlying Index. In the case of Self-Indexing Funds, an affiliated person, as defined in section 2(a)(3) of the Act (“Affiliated Person”), or an affiliated person of an Affiliated Person (“Second-Tier Affiliate”), of the Trust or a Fund, of the Adviser, of any sub-adviser to or promoter of a Fund, or of the Distributor will compile, create, sponsor or maintain the Underlying Index.2 Shares will be purchased and redeemed in Creation Units and generally on an in-kind basis. Except where the purchase or redemption will include cash under the limited circumstances specified in the application, purchasers will be required to purchase Creation Units by depositing specified instruments (“Deposit Instruments”), and shareholders redeeming their shares will receive specified instruments (“Redemption Instruments”). The Deposit Instruments and the Redemption Instruments will each correspond pro rata to the positions in the Fund’s portfolio (including cash positions) except as specified in the application. Because shares will not be individually redeemable, applicants request an exemption from section 5(a)(1) and section 2(a)(32) of the Act that would permit the Funds to register as open-end management investment companies and issue shares that are redeemable in Creation Units only.

4. Because shares will not be individually redeemable, applicants also request an exemption from section 22(d) of the Act and rule 22c–1 under the Act as secondary market trading in shares will take place at negotiated prices, not at a current offering price described in a Fund’s prospectus, and not at a price based on NAV. Applicants state that (a) secondary market trading in shares does not involve a Fund as a party and will not result in dilution of an investment in shares, and (b) to the extent different prices exist during a given trading day, or from day to day, such variances occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants represent that share market prices will be disciplined by arbitrage opportunities, which should prevent shares from trading at a material discount or premium from NAV.

5. Applicants also request an exemption from section 12(d)(1)(A) of the Act and, the Funds, and any principal underwriter for the Funds, and/or any broker or dealer registered under the Exchange Act, to sell shares to Funds of Funds beyond the limits of section 12(d)(1)(B) of the Act. The application’s terms and conditions are designed to, among other things, help prevent any potential (i) undue influence over a Fund through control or voting power, or in connection with certain services, transactions, and underwritings, (ii) excessive layering of fees, and (iii) overly complex fund structures, which are the concerns underlying the limits in sections 12(d)(1)(A) and (B) of the Act.

6. With respect to Funds that effect creations and redemptions of Creation Units in kind and that are based on certain Underlying Indexes that include foreign securities, applicants request relief from the requirement imposed by section 22(e) in order to allow such Funds to pay redemption proceeds within fifteen calendar days following the tender of Creation Units for redemption. Applicants assert that the requested relief would not be inconsistent with the spirit and intent of section 22(e) to prevent unreasonable, undisclosed or unforeseen delays in the actual payment of redemption proceeds.

7. Applicants request an exemption to permit Funds of Funds to acquire Fund shares beyond the limits of section 12(d)(1)(A) of the Act; and the Funds, and any principal underwriter for the Funds, and/or any broker or dealer registered under the Exchange Act, to effect sales of Fund shares beyond the limits of section 12(d)(1)(B) of the Act. The application’s terms and conditions are designed to, among other things, help prevent any potential (i) undue influence over a Fund through control or voting power, or in connection with certain services, transactions, and underwritings, (ii) excessive layering of fees, and (iii) overly complex fund structures, which are the concerns underlying the limits in sections 12(d)(1)(A) and (B) of the Act.

8. Applicants request an exemption from sections 17(a)(1) and 17(a)(2) of the Act to permit persons that are Affiliated Persons, or Second Tier Affiliates, of the Funds, solely by virtue of certain ownership interests, to effectuate purchases and redemptions in-kind. The deposit procedures for in-kind purchases of Creation Units and the redemption procedures for in-kind redemptions of Creation Units will be the same for all purchases and redemptions and Deposit Instruments and Redemption Instruments will be valued in the same manner as those investment positions currently held by
the Funds. Applicants also seek relief from the prohibitions on affiliated transactions in section 17(a) to permit a Fund to sell its shares to and redeem its shares from a Fund of Funds, and to engage in the accompanying in-kind transactions with the Fund of Funds.3

The purchase of Creation Units by a Fund of Funds directly from a Fund will be accomplished in accordance with the policies of the Fund of Funds and will be based on the NAVs of the Funds.

Section 6(c)(1) of the Act permits the Commission to exempt any persons or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 12(d)(1)(j) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Section 17(b)(1) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policies of each registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,
Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; The Depository Trust Company: Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, Regarding the Implementation of Functionality To Submit a Cover of Protect on Behalf of Another Participant and the Removal of the Option To Cover of Protect Directly With Agent

September 26, 2016.

On July 29, 2016, The Depository Trust Company (“DTCC”) filed with the Securities and Exchange Commission (“Commission”) proposed rule change SR–DTC–2016–005 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)1 and Rule 19b–4 thereunder.2 The proposed rule change was published for comment in the Federal Register on August 15, 2016.3 The Commission did not receive any comment letters on the proposed rule change. On September 14, 2016, DTCC filed Amendment No. 1 to the proposed rule change, as discussed below. The Commission is publishing this notice to solicit comments on Amendment No. 1 from interested persons and is approving on an accelerated basis the proposed rule change, as modified by Amendment No. 1.

I. Description of the Proposed Rule Change and Notice of Filing Amendment No. 1

The proposed rule change by DTCC, as modified by Amendment No. 1, would update its Procedures4 set forth in the Guide to make changes to certain options within its Participant Subscription Offer Program (“PSOP”)3 and Participant Tender Offer Program (“PTOP”) functions.5 Specifically, DTCC proposes to add an option called “Cover of Protect on Behalf of Another Participant” (“CPAP”) to both PSOP and PTOP (“PSOP/PTOP”) that would allow a Participant to tender subscription rights (“Rights”) or Securities through DTCC to an agent (“Offer Agent”),2 on behalf of another Participant that needs to tender such Rights or Securities in order to receive the shares and/or consideration from (i) a subscription rights offering (a “Rights Offer”); or (ii) a cash tender offer or exchange offer (collectively, a “Tender/Exchange Offer”) [together with Rights Offer, “Offer”]. DTCC would also eliminate an option called “Cover of Protect Submitted Directly to Agent” (“CPDA”) from PSOP/PTOP that has allowed a Participant to tender Rights or Securities through DTCC to be eligible to receive the shares and/or consideration from an Offer, when such Participant submitted its initial acceptance directly to the Offer Agent outside of DTCC. In addition, DTCC proposes to make ministerial changes to the text of the Guide, as more fully described below.6

A. Proposal

As DTCC describes in the Notice, there are times when a Participant that submitted a Protect2 (the “Protecting Participant”) may need to have another Participant (the “Covering Participant”) submit instructions, submit protects, submit cover of protects on behalf of another Participant, and submit withdrawals on various Voluntary Reorganization events.

The Offer Agent is the fiscal agent of the offeror, typically a bank or trust company that is designated to coordinate the process of the Offer.

Instructions on Rights Subscription events. PTS and PBS are user interfaces for DTCC’s Settlement and Asset Services functions. PTS is mainframe-based and PBS is web-based with a mainframe back-end. Participants may use either PTS or PBS, as they are functionally equivalent.

2References in this notice and order to “PTOP” refer to both the PTOP function within the PTS interface and the equivalent “Voluntary Tenders and Exchanges’ function” within the PBS interface. PTOP is a function that is used by Participants to submit instructions, submit protects, submit cover of protects, submit cover of protects on behalf of another Participant, and submit withdrawals on various Voluntary Reorganization events.

3The Offer Agent is the fiscal agent of the offeror, typically a bank or trust company that is designated to coordinate the process of the Offer.

4The description of the proposed rule change herein is based on the statements prepared by DTCC in the Notice. Notice, supra note 3, 81 FR at 54170–72.

5DTCC states that an investor or its broker (“Investor”) may want to accept an Offer but will not have the necessary Rights or Securities, as the case may be, before the expiration date of the Offer. If permitted by the terms of the Offer, the Investor may submit to the Offer Agent the notice of guaranteed delivery for such Offer (“Notice of Guaranteed Delivery”) which serves as protection of the Investor’s acceptance of the Offer (the “Protect”), and sets forth the number of shares being subscribed to or the amount of Securities being tendered, and (ii) a guarantee that the Rights or Securities (the “Cover”) will be delivered to the Offer Agent within the period prescribed by the Offer (the “Protect Period”). Notice, supra note 3, 81 FR at 54171.

6DTCC states that an investor or its broker (“Investor”) may want to accept an Offer but will not have the necessary Rights or Securities, as the case may be, before the expiration date of the Offer. If permitted by the terms of the Offer, the Investor may submit to the Offer Agent the notice of guaranteed delivery for such Offer (“Notice of Guaranteed Delivery”) which serves as protection of the Investor’s acceptance of the Offer (the “Protect”), and sets forth the number of shares being subscribed to or the amount of Securities being tendered, and (ii) a guarantee that the Rights or Securities (the “Cover”) will be delivered to the Offer Agent within the period prescribed by the Offer (the “Protect Period”). Notice, supra note 3, 81 FR at 54171.

3 The requested relief would apply to direct sales of shares in Creation Units by a Fund to a Fund of Funds and redemptions of those shares. Applicants, moreover, are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where a Fund could be deemed an Affiliated Person, or a Second-Tier Affiliate, of a Fund of Funds because an Adviser or an entity controlling, controlled by or under common control with an Adviser provides investment advisory services to that Fund of Funds.
Cover the Protect. Currently, neither PSOP nor PTOP has the specific functionality for a Covering Participant to submit a Cover on behalf of a Protecting Participant. In order to address directly a Participant’s need to submit a Cover of another Participant’s Protect, DTC proposes to add the CPAP option to PSOP/PTOP. With this enhancement, the Protecting Participant would submit a Protect through PSOP/PTOP, and the Covering Participant would be able to submit a Cover through PSOP/PTOP by providing the Protecting Participant’s Protect ID, Protect Sequence Number, and Protect Participant ID. DTC explains that this enhanced functionality would automate the matching of Covers to corresponding Protects, as well as automatically allocate the applicable credits for Securities and/or payments directly to the Protecting Participant, rather than to the Covering Participant. The CPAP option would eliminate the need for Participants to utilize CPDA for the unintended purpose of Covering another Participant’s Protect.11

In addition, to further reduce the risks, burden, and costs to DTC associated with the manual processing of the CPDA option in PSOP/PTOP, DTC is proposing to eliminate that option. When a Participant uses CPDA to submit a Cover for another Participant’s Protect, DTC must manually process the Cover and use manual exception processing to match the Cover to the corresponding Protect. In addition, DTC must allocate the credits for Securities and/or payment directly to the Offerer and return the allocation to the Offer Agent within a narrow timeframe. Therefore, as clarified by Amendment No. 1, DTC proposes that, when a Participant submits a Protect directly to the Offer Agent (i.e., not through DTC), such Participant would need to either (a) submit the Protect directly to the Offer Agent (i.e., again, not through DTC), or (b) request that DTC manually process the Cover, but not through PSOP/PTOP.

B. Technical Changes

The proposed rule change would revise the Guide to make ministerial updates to reflect current terminology and practices, as set forth below. The Guide would be updated to:

- Correct the text of the Guide to accurately reflect names of functions accessible through PTS, and to accurately reflect the names of the corresponding functions that are accessible through PBS. Presently, the Guide assigns PTS functions to PBS, and does not provide the names of the corresponding PBS functions.
- Correct the timeframes within which a Participant can submit a Notice of Guaranteed Delivery on the expiration date of a Rights Offer. Generally, a Participant may submit a Notice of Guaranteed Delivery through PSOP/PTOP from 8:00 a.m. to 2:15 p.m., at which time the window closes to allow for settlement of cash activities. However, DTC would re-open the window from 3:30 p.m. to 5:00 p.m. on the expiration date of the Offer to allow Participants extra time to submit a Notice of Guaranteed Delivery before the Offer expires, provided that the Offer Agent agrees to accept deferred subscription payments. The text of the Guide incorrectly reflects an open window from 8:00 a.m. to 5:00 p.m., which is not the practice. The text would be corrected to reflect the correct 8:00 a.m. to 2:15 p.m. and 3:30 p.m. to 5:00 p.m. windows.
- Pursuant to Participant requests, expand the availability of PTOP for a Participant to submit a Cover of Protect, on the dates specified in the notice of an Offer. The current availability is until 4:15 p.m. or 12:00 p.m., depending on the type of Offer, and the proposed rule change, as modified by Amendment No. 1, would revise the text to reflect availability until 5:00 p.m. or 1:00 p.m., as applicable.
- Remove references to the UNIT Swingovers service. Several years ago, the UNIT Swingovers service was discontinued and, instead, voluntary unit separations and recombinations12 began to be processed under the FAST program.13
- Clarify information regarding available reports and methods of submission and receipt.

C. Notice of Filing of Amendment No. 1

In Amendment No.1, DTC clarifies that when a Participant submits a Protect directly to the Offer Agent (i.e., not through DTC), such Participant could still request that DTC process the Cover, but just not through PSOP/PTOP. Therefore, Amendment No. 1 proposes to set forth in the Guide that, once a Participant has accepted an Offer through the Offer Agent via a hard copy Notice of Guaranteed Delivery submitted directly to the Offer Agent, a Participant would need to either (a) submit the Cover directly to the Offer Agent, or (b) request that DTC manually process the Cover, but not through PSOP/PTOP.

Implementation Date

DTC would announce the effective date via Important Notice upon the Commission’s approval of the proposed rule change, as modified by Amendment No. 1.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. The Commission believes the proposal, as modified by Amendment No. 1, is consistent with Section 17A(b)(3)(F) of the Act as described in detail below.

Section 17A(b)(3)(F) of the Act requires that the rules of the clearing agency be designed, inter alia, to promote the prompt and accurate clearance and settlement of securities transactions. By adding the CPAP option, through which a Participant can properly submit a Cover through PSOP/PTOP on behalf of another Participant,
and by removing the CPDA option, the proposed rule change, as modified by Amendment No. 1, will establish a process that will streamline Cover of Protect transactions, allocations, and recordkeeping for Participants. Further, as DTC explains in the Notice, the proposed rule change, as modified by Amendment No. 1, will reduce for DTC the risks, burdens, and costs associated with its current processing of such transactions. Therefore, adding the CPAP option and removing the CPDA option will promote the prompt and accurate clearance and settlement of securities, consistent with the requirements of the Act, in particular Section 17A(b)(3)(F), cited above.

As the proposed rule change pertains to technical changes to the Procedures, the Commission finds the technical changes also consistent with Section 17A(b)(3)(F) of the Act because technical updates to the Procedures to make them more clear, consistent, and current for Participants that rely on the Procedures support the prompt and accurate clearance and settlement of securities transactions.

III. Solicitation of Comments on Amendment No. 1

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 1 to File Number SR–DTC–2016–005, including whether Amendment No. 1 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an email to rule-comments@sec.gov. Please include File Number SR–DTC–2016–005 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2016–005. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC’s Web site (http://dtcc.com/legal/sec-rule-filings.aspx). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–DTC–2016–005 and should be submitted on or before October 21, 2016.

IV. Accelerated Approval of the Proposed Rule Change, as Modified by Amendment No. 1

The Commission, pursuant to Section 19(b)(2) of the Act, finds good cause to approve the proposed rule change, as modified by Amendment No. 1, prior to the thirtieth day after the date publication of Amendment No. 1 in the Federal Register. In Amendment No.1, DTC clarifies that when a Participant submits a Protect directly to the Offer Agent, such Participant could still request that DTC process the Cover. As such, Amendment No. 1 proposes to set forth in the Guide that, once a Participant has accepted an Offer through the Offer Agent via a hard copy Notice of Guaranteed Delivery submitted directly to the Offer Agent, a Participant would need to either (a) submit a Cover to the Offer Agent, or (b) request that DTC manually process the Cover, but not through PTOP/PSOP.

As discussed more fully above, the Commission finds that the proposed rule change, as modified by Amendment No. 1, will streamline DTC’s processing of Cover of Protect transactions and reduce for DTC the risks, burdens, and costs associated with its current processing of such transactions, thereby promoting the prompt and accurate clearance and settlement of securities, consistent with Section 17A(b)(3)(F), cited above. Accordingly, the Commission finds good cause for approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis, pursuant to Section 19(b)(2) of the Act.

V. Conclusion

On the basis of the foregoing, the Commission finds that the proposal, as modified by Amendment No. 1, is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that proposed rule change SR–DTC–2016–005, as modified by Amendment No. 1, be, and hereby is, APPROVED on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.

Brent J. Fields,
Secretary.

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Fees Schedule

September 26, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”), and Rule 19b–4 thereunder, notice is hereby given that on September 22, 2016, Chicago Board Options Exchange, Incorporated (the “Exchange” or “CBOE”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

17 Id.
21 In approving the proposed rule change, the Commission considered the proposal’s impact on efficiency, competition, and capital formation. 15 U.S.C. 78s(f).
I. Self-Regulatory Organization’s Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange seeks to amend its fees schedule. The text of the proposed rule change is available on the Exchange’s Web site (http://www.cboe.com/CBOELegalRegulatoryHome.aspx), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the place specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule, effective September 26, 2016. Specifically, the Exchange plans to list new options on two FTSE Russell indexes on September 26, 2016.

The Exchange also proposes to apply to AWDE and FTEM, like RUI, RLV, and RLG, the Floor Brokerage Fee of $0.04 per contract ($0.02 per contract for crossed orders). The Exchange also proposes to apply to AWDE and FTEM the CFLEX Surcharge Fee of $0.10 per contract for all AWDE and FTEM orders executed electronically on CFLEX, capped at $250 per trade (i.e., first 2,500 contracts per trade). The CFLEX Surcharge Fee assists the Exchange in recouping the cost of developing and maintaining the CFLEX system. The Exchange notes that the CFLEX Surcharge Fee (and $250 cap) also applies to other proprietary index options, including products in Underlying Symbol List A.

The Exchange also proposes to apply to AWDE and FTEM, like RUI, RLV, and RLG, the Floor Brokerage Fee of $0.04 per contract ($0.02 per contract for crossed orders).
Primary Market-Maker(s) ("DPM(s)") appointed in AWDE and FTEM to offset the initial DPM costs. The Exchange proposes to add AWDE and FTEM to Footnote 43 to the Fees Schedule, which currently provides that DPM(s) appointed for an entire month in either FXTM or UKXM will receive a payment of $7,500 per class per month through December 31, 2016. Because AWDE and FTEM are scheduled to be listed on September 26, 2016, the appointed DPM(s) will not have an appointment in AWDE and FTEM for the entire month of September; thus, the DPM(s) will not receive compensation for September 2016. The DPM(s) appointed for the entire month of October, November, etc. will receive compensation of $7,500 for each entire month the DPM is appointed in AWDE and FTEM through December 31, 2016.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act. Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and coordinating with persons engaged in the processing of transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Additionally, the Exchange believes the proposed rule change is consistent with Section 6(b)(5) of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. Particularly, the Exchange believes it is reasonable to charge different fee amounts to different user types in the manner proposed because the proposed fees are consistent with the price differentiation that exists today for other index products, including RUT, RUI, RLV, and RLG. The Exchange also believes that the proposed fee amounts for AWDE and FTEM orders are reasonable because the proposed fee amounts are the same already assessed for similar products (e.g., RUT, RUI, RLV, and RLG), as well as are within the range of amounts assessed for the Exchange’s other proprietary products.

The Exchange believes that it is equitable and not unfairly discriminatory to assess lower fees to Customers as compared to other market participants because Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Specifically, customer liquidity benefits all market participants by providing more trading opportunities, which attracts Market-Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The fees offered to customers are intended to attract more customer trading volume to the Exchange. Moreover, the options industry has a long history of providing preferential pricing to Customers, and the Exchange’s current Fees Schedule currently does so in many places, as do the fees structures of many other exchanges. Finally, all fee amounts listed as applying to Customers will be applied equally to all Customers (meaning that all Customers will be assessed the same amount).

The Exchange believes that it is equitable and not unfairly discriminatory to, assess lower fees to Market-Makers as compared to other market participants other than Customers because Market-Makers, unlike other market participants, take on a number of obligations, including quoting obligations, that other market participants do not have. Further, these lower fees offered to Market-Makers are intended to incent Market-Makers to quote and trade more on the Exchange, thereby providing more trading opportunities for all market participants. Additionally, the proposed fee for Market-Makers will be applied equally to all Market-Makers (meaning that all Market-Makers will be assessed the same amount). This concept also applies to orders from all other origins. It should also be noted that all fee amounts described herein are intended to attract greater order flow to the Exchange in AWDE and FTEM which should therefore serve to benefit all Exchange market participants.

Similarly, it is equitable and not unfairly discriminatory to assess lower fees to Clearing Trading Permit Holder Proprietary orders than those of other market participants (except Customers and Market-Makers) because Clearing Trading Permit Holders also have a number of obligations (such as membership with the Options Clearing Corporation), significant regulatory burdens, and financial obligations, that other market participants do not need to take on. The Exchange also notes that the AWDE and FTEM fee amounts for each separate type of market participant will be assessed equally to all such market participants (i.e., all Broker-Dealer orders will be assessed the same amount, all Joint Back-Office orders will be assessed the same amount, etc.).

The Exchange believes the proposed AIM transaction fees for Brokers Dealers, Non-Trading Permit Holder Market-Makers, Professionals/Voluntary Professionals, JBOs and Customers are reasonable because the amounts are still lower than assessed for AIM transactions in other proprietary products. The Exchange believes it’s equitable and not unfairly discriminatory to assess lower fees for AIM executions as compared to electronic executions because AIM is a price-improvement mechanism, which the Exchange wishes to encourage and support.

Assessing the Floor Brokerage Fee of $0.04 per contract for non-crossed orders and $0.02 per contract for crossed orders to Floor Brokers (and not other market participants) trading AWDE and FTEM orders is equitable and not unfairly discriminatory because only Floor Brokers are statutorily capable of representing orders in the trading crowd, for which they charge a commission. Moreover, this fee is already assessed, in the same amounts, to the other products in Underlying Symbol List A, including UKXM, FXTM, RUT, RUI, RLV, and RLG.

The Exchange believes that assessing an Index License Surcharge Fee of $0.10 per contract to AWDE and FTEM transactions is reasonable because the Surcharge helps recoup some of the costs associated with the license for AWDE and FTEM options. Additionally, the Exchange notes that the Surcharge amount is the same as, and in some cases lower than, the amount assessed as an Index License Surcharge to other index products. The proposed Surcharge is also equitable and not unfairly discriminatory because the amount will be assessed to all market participants to whom the Surcharge applies. Not applying the AWDE and FTEM Index License Surcharge Fee to Customer orders is equitable and not

---

7 Id.
Proprietary Index Options Rate Table—Underlying

Table—All Index Products Excluding Underlying
products for the same transactions.8 The charged to other proprietary index because it is the same amount currently 2,500 contracts per trade) is reasonable compared to RUT transactions because the costs of the license associated with RUT is greater. Similarly, the Exchange believes assessing a CFLEX Surcharge Fee of $0.10 per contract for all AWDE and FTEM orders executed electronically on CFLEX and capping it at $250 (i.e., first 2,500 contracts per trade) is reasonable because it is the same amount currently charged to other proprietary index products for the same transactions.8 The proposed Surcharge is also equitable and not unfairly discriminatory because the amount will be assessed to all market participants to whom the CFLEX Surcharge applies. Exempting AWDE and FTEM from the Liquidity Provider Sliding Scale, VIP, the Marketing Fee, the Fee Cap, and the exemption from fees for facilitation orders and the ORS and CORS Programs is reasonable because other Underlying Symbol List A products (i.e., other products that are exclusively-listed) are excepted from those same items. This is equitable and not unfairly discriminatory for the same reason; it seems equitable to except AWDE and FTEM from items on the Fees Schedule from which other proprietary products are also excepted.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to waive all transaction fees, including the Floor Brokerage fee, the License Index Surcharge and CFLEX Surcharge Fee because it promotes and encourages trading of these new products and applies to all Trading Permit Holders (“TPHs”). Applying to AWDE and FTEM to the CBOE Proprietary Products Sliding Scale is reasonable because it also applies to other Underlying Symbol List A products. This is equitable and not unfairly discriminatory for the same reason; it seems equitable to apply to AWDE and FTEM the same items on the Fees Schedule that apply to Underlying Symbol List A options classes (i.e., proprietary options classes that are not listed on other exchanges). The Exchange believes it’s reasonable, equitable and not unfairly discriminatory to continue to include AWDE and FTEM in the calculation of the qualifying volume for the Floor Broker Trading Permit Fees rebate because the Exchange wishes to support and encourage open-outcry trading of AWDE and FTEM, which allows for price improvement and has a number of positive impacts on the market system.

Finally, the Exchange believes that it is equitable and not unfairly discriminatory to compensate DPM(s) that are appointed for an entire month in either AWDE and FTEM, DPM(s) incur costs when receiving an appointment, and in the case of AWDE and FTEM, the Exchange believes it is appropriate to provide compensation to the DPM(s) to offset those costs.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition that are not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because, while different fees are assessed to different market participants in some circumstances, these different market participants have different obligations and different circumstances as discussed above. For example, Market-Makers have quoting obligations that other market participants do not have. The Exchange does not believe that the proposed rule change to waive all transaction fees through December 31, 2016 will impose any burden on intramarket competition because it applies to all TPHs and encourages trading in these new products.

The Exchange does not believe that the proposed rule changes will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because AWDE and FTEM will be exclusively listed on CBOE. To the extent that the proposed changes make CBOE a more attractive marketplace for market participants at other exchanges, such market participants are welcome to become CBOE market participants.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 10(b)(3)(A) of the Act8 and paragraph (f) of Rule 19b–4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments
• Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or
• Send an email to rule-comments@sec.gov. Please include File Number SR–CBOE–2016–070 on the subject line.

Paper Comments
• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2016–070. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations: National Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee and Rebate Schedule To Create a Liquidity-Adding Volume Threshold To Benefit From the Current Liquidity Taking Fee in Securities Priced $1.00 or Greater

September 26, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”) and Rule 19b–4 thereunder, notice is hereby given that on September 20, 2016, National Stock Exchange, Inc. (“NSX” or the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change, as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to amend its Fee and Rebate Schedule (the “Fee Schedule”), issued pursuant to Exchange Rule 16.1, to: (1) Create a monthly, liquidity-adding volume threshold that Equity Trading Permit (“ETP”) Holders will be required to meet to continue to pay for [sic] the current liquidity-taking fee in securities priced $1.00 or greater and establish a different, higher liquidity-taking fee for ETP Holders that do not meet the new volume threshold; and (2) make ministerial changes to the Fee Schedule.

The text of the proposed rule change is available on the Exchange’s Web site at http://www.nsx.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule, issued pursuant to Rule 16.1, with the goal of maximizing the effectiveness of its business model and continuing to provide ETP Holders a cost-effective execution venue. To further incentivize ETP Holders to post liquidity on the NSX Book, the Exchange is proposing to create a monthly, liquidity-adding volume threshold that an ETP Holder must reach to continue to pay the current liquidity-taking fee for securities priced $1.00 or greater. The Exchange proposes to adopt a different, higher liquidity-taking fee for ETP Holders that do not meet the new liquidity-adding volume threshold.

Currently, the Exchange charges ETP Holders $0.0003 per share executed for liquidity-taking orders in symbols priced at least 50,000 shares of liquidity-adding volume during a calendar month. An ETP Holder that does not meet at least 50,000 shares of liquidity-adding volume during a calendar month will be charged $0.0030 per executed share for any liquidity-removing order in securities priced at $1.00 or greater. After each calendar month, the Exchange will calculate the number of shares of liquidity-adding volume that each ETP Holder executed and apply the appropriate fee for the ETP Holder’s liquidity-taking executions that calendar month.

The Exchange also proposes to make the ministerial change of adjusting the numbering for Explanatory Notes in light of the addition of proposed Explanatory Note 1.

Pursuant to Exchange Rule 16.1(c), the Exchange will “provide ETP Holders with notice of all relevant dues, fees, assessments and charges of the Exchange” through the issuance of an Information Circular and will post the Fee Schedule and the instant rule filing on the Exchange’s Web site, www.nsx.com.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6(b) of the Act, in general and, in particular, Section 6(b)(4) of the Act, which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The proposed rule change is also consistent with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange not permit unfair discrimination between customers, issuers, brokers, or dealers, and be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange submits that the proposed liquidity-adding volume

threshold that Equity Trading Permit (“ETP”) Holders will be required to meet to continue to pay for [sic] the current liquidity-taking fee in securities priced $1.00 or greater and establish a different, higher liquidity-taking fee for ETP Holders that do not meet the new volume threshold; and (2) make ministerial changes to the Fee Schedule.

The text of the proposed rule change is available on the Exchange’s Web site at http://www.nsx.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule, issued pursuant to Rule 16.1, with the goal of maximizing the effectiveness of its business model and continuing to provide ETP Holders a cost-effective execution venue. To further incentivize ETP Holders to post liquidity on the NSX Book, the Exchange is proposing to create a monthly, liquidity-adding volume threshold that an ETP Holder must reach to continue to pay the current liquidity-taking fee for securities priced $1.00 or greater. The Exchange proposes to adopt a different, higher liquidity-taking fee for ETP Holders that do not meet the new liquidity-adding volume threshold.

Currently, the Exchange charges ETP Holders $0.0003 per share executed for liquidity-taking orders in symbols priced at least 50,000 shares of liquidity-adding volume during a calendar month. An ETP Holder that does not meet at least 50,000 shares of liquidity-adding volume during a calendar month will be charged $0.0030 per executed share for any liquidity-removing order in securities priced at $1.00 or greater. After each calendar month, the Exchange will calculate the number of shares of liquidity-adding volume that each ETP Holder executed and apply the appropriate fee for the ETP Holder’s liquidity-taking executions that calendar month.

The Exchange also proposes to make the ministerial change of adjusting the numbering for Explanatory Notes in light of the addition of proposed Explanatory Note 1.

Pursuant to Exchange Rule 16.1(c), the Exchange will “provide ETP Holders with notice of all relevant dues, fees, assessments and charges of the Exchange” through the issuance of an Information Circular and will post the Fee Schedule and the instant rule filing on the Exchange’s Web site, www.nsx.com.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6(b) of the Act, in general and, in particular, Section 6(b)(4) of the Act, which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The proposed rule change is also consistent with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange not permit unfair discrimination between customers, issuers, brokers, or dealers, and be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange submits that the proposed liquidity-adding volume

threshold that Equity Trading Permit (“ETP”) Holders will be required to meet to continue to pay for [sic] the current liquidity-taking fee in securities priced $1.00 or greater and establish a different, higher liquidity-taking fee for ETP Holders that do not meet the new volume threshold; and (2) make ministerial changes to the Fee Schedule.

The text of the proposed rule change is available on the Exchange’s Web site at http://www.nsx.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule, issued pursuant to Rule 16.1, with the goal of maximizing the effectiveness of its business model and continuing to provide ETP Holders a cost-effective execution venue. To further incentivize ETP Holders to post liquidity on the NSX Book, the Exchange is proposing to create a monthly, liquidity-adding volume threshold that an ETP Holder must reach to continue to pay the current liquidity-taking fee for securities priced $1.00 or greater. The Exchange proposes to adopt a different, higher liquidity-taking fee for ETP Holders that do not meet the new liquidity-adding volume threshold.

Currently, the Exchange charges ETP Holders $0.0003 per share executed for liquidity-taking orders in symbols priced at least 50,000 shares of liquidity-adding volume during a calendar month. An ETP Holder that does not meet at least 50,000 shares of liquidity-adding volume during a calendar month will be charged $0.0030 per executed share for any liquidity-removing order in securities priced at $1.00 or greater. After each calendar month, the Exchange will calculate the number of shares of liquidity-adding volume that each ETP Holder executed and apply the appropriate fee for the ETP Holder’s liquidity-taking executions that calendar month.

The Exchange also proposes to make the ministerial change of adjusting the numbering for Explanatory Notes in light of the addition of proposed Explanatory Note 1.

Pursuant to Exchange Rule 16.1(c), the Exchange will “provide ETP Holders with notice of all relevant dues, fees, assessments and charges of the Exchange” through the issuance of an Information Circular and will post the Fee Schedule and the instant rule filing on the Exchange’s Web site, www.nsx.com.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6(b) of the Act, in general and, in particular, Section 6(b)(4) of the Act, which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The proposed rule change is also consistent with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange not permit unfair discrimination between customers, issuers, brokers, or dealers, and be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange submits that the proposed liquidity-adding volume
threshold and associated fee are reasonable and equitable, as required by Section 6(b)(4) of the Act. The Exchange believes that the volume thresholds are reasonable because they have been set at achievable levels that will incentivize ETP Holders trading on the Exchange to add a greater amount of liquidity to the Exchange. This will result in greater price discovery and price improvement for ETP Holders and market participants. Further, the proposed “taker” fee of $0.0030 per share for securities priced $1.00 or greater is reasonable because it is within the range of fees that other exchanges charge per executed share for orders removing liquidity in securities priced $1.00 or greater.6

The liquidity-adding volume threshold is equitable because each ETP Holder has the same opportunity to post liquidity on the Exchange totaling 50,000 shares in order to continue to pay the current $0.0030 per share “taker” fee, as opposed to the new, higher taker fee. Thus, the Fee Schedule provides for an equitable program which, the Exchange believes, will operate to encourage increased quoting and trading by ETP Holders on the Exchange. The Exchange notes that in the past it has offered, as a part of its Fee Schedule, a similar minimum, liquidity-adding volume threshold to qualify for a more advantageous “taker” fee.9

The Exchange further submits that its proposal that ETP Holders must attain at least 50,000 shares of executed liquidity-adding volume in a calendar month to benefit from the lower “taker” fee of $0.0030 satisfies the requirements of Section 6(b)(5) of the Act in that it does not operate to remove impediments to and perfect the mechanism of a free and open market and a national market system under Section 6(b)(5). B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes will enhance rather than burden competition by operating to incentivize increased liquidity and improve execution quality on the Exchange through reasonable and equivalently allocated economic incentives.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has taken effect upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act10 and subparagraph (f)(2) of Rule 19b-4.11 At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an email to rule-comments@sec.gov. Please include File Number SR–NSX–2016–11 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. All submissions should refer to File Number SR–NSX–2016–11. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements or communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NSX–2016–11 and should be submitted on or before October 21, 2016.
For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.12
Brent J. Fields, Secretary.

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2016–0046]

Charging Standard Administrative Fees for Non-Program Information Requests for Detailed Social Security Earnings

AGENCY: Social Security Administration.

ACTION: Notice of updated schedule of standardized administrative fees.

SUMMARY: On August 22, 2012,1 we announced in the Federal Register a new administrative fee we charge to the public for detailed yearly Social Security earnings information. We charge administrative fees to recover our full costs when we provide information and related services for non-program purposes. We are announcing an update to the previously published fee ($136) for detailed yearly Social Security earnings information.2

The updated standard fee schedule is part of our continuing effort to standardize fees for non-program information requests. We reserve the right to review and update the published standard fees as necessary, but no less than every two years, to ensure we recover the full cost of providing non-program services. Standard fees provide consistency and ensure we recover the full cost of supplying information when we receive a request for a purpose not directly related to the administration of a program under the Social Security Act (Act).

DATES: The changes described in this notice are effective for requests we receive on or after October 1, 2016.

SUPPLEMENTARY INFORMATION: Section 1106 of the Act and the Privacy Act3 authorize the Commissioner of Social Security to promulgate regulations regarding agency records and information and to charge fees for providing information and related services. Our regulations and operating instructions identify when we will charge fees for information.4 Whenever we determine a request for information is for any purpose not directly related to the administration of the Social Security programs, we require the requester to pay the full cost of providing the information.

New Information: Based on the most recent cost analysis, we determined the new standard fee for detailed yearly Social Security Earnings information is $115 for each request. We will certify the detailed earnings information for an additional $33. Note: Certification is usually not necessary. We based this updated standard fee on our most recent cost calculations for supplying this information and the standard fee methodology previously published in the Federal Register. A requester can obtain certified and non-certified detailed yearly Social Security earnings information by completing the Form SSA–7050, Request for Social Security Earnings Information. A requester can continue to obtain non-certified, yearly earnings totals (Form SSA–7004, Request for a Social Security Statement) through our free online service my Social Security, http://socialsecurity.gov/mymyaccount/, a personal online account for Social Security information and services. Online Social Security Statements display uncertified, yearly earnings, free of charge, and do not show any employer information. Certified yearly Social Security earnings totals cost $33, available by completing Form SSA–7050.

We will continue to evaluate all standard fees at least every two years to ensure we capture the full costs associated with providing information for non-program purposes. We require nonrefundable advance payment of the standard fee by check, money order, or credit card. We do not accept cash. Only one form of payment is acceptable in the full amount of the standard fee. If we revise any of the standard fees, we will publish another notice in the Federal Register. For other non-program requests for information not addressed here or within the current schedule of standardized administrative fees, we will continue to charge fees calculated on a case-by-case basis to recover our full cost of supplying the information.

Additional Information

Additional information is available on our Web site at http://socialsecurity.gov/pgm/business.htm or by written request to: Social Security Administration, Office of Public Inquiries, Windsor Park Building, 6401 Security Boulevard, Baltimore, MD 21235.

Carolyn W. Colvin,
Acting Commissioner of Social Security.
