Telephone: 202-366-4354; email [nicole.michel@dot.gov](mailto:nicole.michel@dot.gov).

**SUPPLEMENTARY INFORMATION:**

*Background:* Section 5506 of the FAST Act requires FMCSA to produce a study on CDL skills test delays on an annual basis. The requirements of the study are to submit a report describing:

“(A) the average wait time from the date an applicant requests to take a skills test to the date the applicant has the opportunity to complete such test;

(B) the average wait time from the date an applicant, upon failure of a skills test, requests a retest to the date the applicant has the opportunity to complete such retest;

(C) the actual number of qualified commercial driver's license examiners available to test applicants; and

(D) the number of testing sites available through the State department of motor vehicles and whether this number has increased or decreased from the previous year.”

The report is also required to describe “specific steps the Administrator is taking to address skills testing delays in States that have average skills test or retest wait times of more than 7 days.” If this information collection does not occur, FMCSA will not be able to conduct a study on CDL skills test delays, as there is currently no repository of information on skills tests and the required data is not available for all States at this time. If information collection occurs on a less-than-annual basis, FMCSA will not be able to make observations on yearly trends or analyze differences in each State on a year-to-year basis.

FMCSA has met with several stakeholders, including the American Association of Motor Vehicle Administrators, the Commercial Vehicle Training Association, and State Driver Licensing Agencies to ensure that the information being collected in this survey has not already been collected, is not currently available to FMCSA, and

is not in the process of being collected. Extensive background research was conducted to ensure the study was not duplicative. A previous study, done by the Government Accountability Office (GAO) in 2015, asked for similar information but did not produce specific enough data to be used in this study.

The survey will be sent out via email, with the option for online completion using SurveyMonkey®. Each State can respond via email or the online survey depending on which method is more convenient for the respondent. The welcome letter will indicate that FMCSA prefers responses via the online survey tool.

The information collected will be published annually in a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives. The first report is due to Congress no later than June 1, 2017. Subsequent reports will be published on an annual basis thereafter.

*Title:* Survey on CDL Skills Testing Delays.

*OMB Control Number:* To be determined.

*Type of Request:* New collection.

*Respondents:* State CDL Coordinators (one from each of the 50 States, and one from Washington, DC).

*Estimated Number of Respondents:* 51.

*Estimated Time per Response:* 2.2 hours (132 minutes).

*Expiration Date:* N/A. This is a new ICR.

*Frequency of Response:* Annually.

*Estimated Total Annual Burden:* The annual burden is estimated to be no more than 2.2 hours (132 minutes) per respondent, which equates to 112.2 hours over the universe of 51 respondents. This estimate contains a maximum of 2 hours to gather information from State information systems, and an estimated maximum of 12 minutes to respond to the survey. While States that already track and report similar information may need much less than 2 hours to gather information, discussions with subject matter experts led to an agreement that 2 hours was a reasonable maximum time limit to use to estimate the maximum annual burden expected.

The estimate time for survey completion was calculated using Versta Research's methodology for calculating an estimate of survey length, where each question is given a number of points based on the estimated burden required to respond to the question (for example, simple multiple choice questions are 1

point, whereas short answer questions are 3 points per expected short phrase). The total number of points for all questions is then divided by eight (the number of simple questions a user can respond to online in 1 minute) to determine the estimate required length for finishing the survey.

**Public Comments Invited:** You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The Agency will summarize or include your comments in the request for OMB's clearance of this information collection.

Issued under the authority of 49 CFR 1.87 on:

Dated: September 29, 2016.
