Additional PortaCount® Quantitative Fit-Testing Protocols: Amendment to Respiratory Protection Standard

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Notice of proposed rulemaking; request for comments.

SUMMARY: OSHA is proposing to add two modified PortaCount® quantitative fit-testing protocols to its Respiratory Protection Standard. The proposed protocols would apply to employers in general industry, shipyard employment, and the construction industry. Both proposed protocols are variations of the existing OSHA-accepted PortaCount® protocol, but differ from it by the exercise sets, exercise duration, and sampling sequence. If approved, the modified PortaCount® protocols would be alternatives to the existing quantitative fit-testing protocols already listed in an appendix of the Respiratory Protection Standard. In addition, OSHA is proposing to amend an appendix to clarify that PortaCount® fit test devices equipped with the N95-Companion™ Technology are covered by the approved PortaCount® protocols.
