Under the selected alternative, we would continue most current management activities, but also include components from Alternative B including implementing the feral swine control plan and developing and implementing a predator management plan to protect western snowy plover and California least tern. Public access, guided interpretive walks, and environmental education would continue to be offered.

The selected alternative provides guidance for achieving the Refuge's purpose, vision, and goals; forwards the Refuge System mission; addresses the significant issues and relevant mandates; and is consistent with principles of sound fish and wildlife management. Based on the associated environmental assessment, this alternative is not expected to result in significant environmental impacts and therefore does not require an environmental impact statement.
