ENVIRONMENTAL PROTECTION AGENCY

[FRL–9954–11–OGC]

Proposed Settlement Agreement, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (“CAA”), notice is hereby given of a proposed settlement agreement to settle a lawsuit filed by Air Alliance Houston, Community In-Power and Development Association, Inc., Louisiana Bucket Brigade, and Texas Environmental Justice Advocacy (“Petitioners”), in the United States Court of Appeals for the D.C. Circuit: *Air Alliance Houston, et al. v. EPA*, Case No. 15–1210. On July 10, 2015, Petitioners filed a petition for review challenging a final action issued by the United States Environmental Protection Agency (“EPA”) entitled “New and Revised Emission Factors for Flares and Other Refinery Process Units

and Determination for No Changes to VOC Emission Factors for Tanks and Wastewater Treatment Systems.” 80 FR 26925 (May 11, 2015) (“Emission Factor Action”). Under the terms of the proposed settlement agreement, if EPA performs specified actions by December 16, 2016, the Petitioners will dismiss their lawsuit.

DATES: Written comments on the proposed settlement agreement must be received by November 14, 2016.

ADDRESSES: Submit your comments, identified by Docket ID number EPA–HQ–OGC–2016–0582, online at www.regulations.gov. For comments submitted at www.regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from www.regulations.gov. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Settlement Agreement

On May 1, 2013, Petitioners filed a lawsuit against EPA alleging that the EPA had failed to review and, if necessary, revise emissions factors at least once every three years as required in CAA section 130. *Air Alliance Houston, et al. v. McCarthy*, No. 1:13–cv–00621–KBJ (D.D.C.). In that lawsuit, the Petitioners sought to compel EPA to

review the volatile organic compounds (VOC) emissions factors for industrial flares (“flares”), liquid storage tanks (“tanks”), and wastewater collection, treatment and storage systems (“wastewater treatment systems”), and, if necessary, revise those emission factors. EPA entered into a consent decree with the Petitioners to settle that lawsuit. Under the terms of the consent decree, on April 20, 2015, EPA finalized a new VOC emissions factor for flares and finalized a determination that it was not necessary to revise the VOC emissions factors for tanks and wastewater treatment systems, and posted these actions on its AP–42 Web site (“the Emission Factor Action”). AP–42 is a guidance document that contains emissions factors and process information for more than 200 air pollution source categories.

On July 10, 2015, the Petitioners filed a petition for review in the D.C. Circuit Court of Appeals seeking judicial review of EPA's Emission Factor Action posted on its Web site on April 20, 2015, which was taken in response to the consent decree described above. Petitioners have challenged the Emission Factor Action by raising the following five issues: (1) The total hydrocarbon (“THC”) emissions factor for flares used in Section 13.5 of EPA's official Compilation of Air Pollutant Emission Factors known as “AP–42”; (2) the minimum heat value of the gas in the combustion zone of the flare test data used to develop the VOC emissions factors in Section 13.5 of AP–42; (3) the average destruction efficiency of the flare test data used to develop the VOC emissions factor in Section 13.5 of AP–42; (4) the molecular weights used in the calculation of the VOC emissions factor in Section 13.5 of AP–42; and (5) the source classification codes (“SCCs”) associated with the flare emissions factors in Section 13.5 of AP–42.

The proposed settlement agreement would settle Petitioners' lawsuit in the United States Court of Appeals for the D.C. Circuit challenging, under CAA section 307(b)(1), the Emission Factor Action. Under the terms of the proposed settlement agreement, if EPA performs specified actions by December 16, 2016, the Petitioners will dismiss their lawsuit. Consistent with EPA practice and the terms of the settlement agreement, EPA will post any actions it takes on its AP–42 Web site at <https://www.epa.gov/air-emissions-factors-and-quantification/ap-42-compilation-air-emission-factors>. The proposed settlement agreement also provides for each party to bear its own litigation costs.
