

MMPA for the construction and operation of the Neptune LNG Port facility. For the subject IHA, NMFS reviewed the FEIS to ensure that the analysis contained in that document accurately describes and analyzes the impacts to the human environment of NMFS' action of issuing an MMPA authorization for the maintenance, repair, and decommissioning of the Neptune Port. NMFS has determined that the FEIS sufficiently covers the activities considered in the subject IHA. NMFS issued an amended Record of Decision for issuance of authorizations pursuant to sections 101(a)(5)(D) of the MMPA specific to maintenance, repair, and decommissioning.

Authorization

NMFS has issued an IHA to Neptune for the potential harassment of small numbers of 14 marine mammal species incidental to maintenance, repair, and decommissioning of their Port in [Massachusetts Bay], which includes required mitigation, monitoring and reporting measures.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Advisory Panel will review Framework 28 (FW 28) alternatives and analyses and make final recommendations. FW 28 will set specifications including ABC/ACLs, DAS, access area allocations for LA and LAGC, hard-TAC for NGOM management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2017 and default specifications for fishing year 2018. Management measures in FW 28 may include but are not limit to: (1) Measures to restrict the possession of shell stock inshore of 42°20' N.; (2) Measures to apply spatial management to fishery specifications (ACL flowchart); and (3) Measures to modify the Closed Area I access area boundary, consistent with potential changes to habitat and groundfish mortality closed areas. They will also review and potentially provide input on 2017 scallop work priorities. Other business will be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. The Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*, provides that the Secretary of Commerce is responsible for the conservation and management of marine fisheries resources in the Exclusive Economic Zone (3–200 miles) of the United States. NMFS West Coast Region manages the Pacific Coast Groundfish Fishery in the Exclusive Economic Zone (EEZ) off of Washington, Oregon, and California under the Pacific Coast Groundfish Fishery Management Plan.

In January 2011, NMFS implemented a trawl rationalization program, which is a catch share program, for the Pacific Coast Groundfish Limited Entry Trawl Fishery. The program was implemented through Amendments 20 and 21 to the Pacific Coast Groundfish Fishery Management Plan and the corresponding implementing regulations at 50 CFR part 660. Amendment 20 established the trawl rationalization program that consists of: An individual fishing quota (IFQ) program for the shorebased trawl fleet (including whiting and nonwhiting sectors), and cooperative programs for the at-sea mothership and catcher/processor trawl fleets (whiting only). Amendment 21 set long-term allocations for the limited entry trawl sectors of certain groundfish species.

Under the trawl rationalization program, new permits, accounts, endorsements and licenses were established. These consist of: quota share (QS) permits/accounts, vessel accounts, first receiver site licenses, mothership endorsements on certain limited entry trawl permits, mothership catcher vessel endorsements on certain limited entry trawl permits, catcher/processor endorsements on certain
