of death information for deceased subjects, thus reducing the need to request copies of death certificates from the states. The NDI Plus option currently provides the International Classification of Disease (ICD) codes for the underlying and multiple causes of death for the years 1979–2015. CDC requests OMB approval to update the three data collection forms used by NCHS to administer NDI services. The form updates include editorial changes needed to capture current modes of data transfer and service payment options, clarifications to the instructions for NDI applicants, the inclusion of an item to capture any resulting publications, and additional terms and conditions associated with the confidentiality agreement.

To collect the information in bidding Forms A and B for the Round 1 Recompete. We are now seeking approval to collect the information in Forms A and B for competitions that will occur before 2017. For these upcoming competitions CMS will publish a slightly modified version of the RFB instructions and accompanying Forms A and B so that suppliers will be better able to identify and understand the requirements of the program. We decided to modify the RFB instructions and forms based on our experience from the last round of competition. The end result is expected to produce more complete and accurate information to evaluate suppliers. No new collection requirements have been added to the modified RFB instructions or Form A or B. Finally, we are retaining without change the Change of Ownership (CHO) Purchaser Form and the CHOW Contract Supplier Notification Form, the Subcontracting Disclosure Form, and Forms C, and D and their associated burden under this ICR.
