

alternatives will be explored during the scoping and during preparation of the EIS/EIR. The EIS/EIR will focus on issues for which potentially significant impacts are identified, including: Public recreation and impacts to user groups, biological resources, cultural resources, transportation and parking, water resources and water quality, and others. In addition, the EIS/EIR will analyze the full range of resource topics required by the lead agencies (e.g., noise, land use) and cumulative impacts.

**Permits or Licenses Required**

Permits that may be required before implementation include: A National Pollutant Discharge Elimination System General Construction Permit issued by the Los Angeles Regional Water Quality Control Board, a Section 404 Permit and Section 401 Certification (per the Clean Water Act) issued by the U.S. Army Corps of Engineers, Biological Opinion/Incidental Take Statement issued by USFWS, Section 2081 Incidental Take Permit issued by the California Department of Fish and Wildlife, and a Streambed Alteration Agreement (Section 1602 permits of the California Fish and Game Code) issued by the California Department of Fish and Wildlife. Local traffic control and encroachment permits may be required from the Los Angeles County Department of Public Works or the California Department of Transportation.

**Scoping Process**

The ANF and the WCA are seeking public and agency comment on the proposed project to identify major issues. Comments received will help define the scope of the project and issues to be analyzed in depth. Comments should be as “project specific” as possible. It is important that reviewers provide their comments at

such times and in such a manner that they are useful to the agency’s preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the scoping comment period and should clearly articulate the reviewer’s concerns and contentions in relation to the project. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of NEPA (40 CFR 1503.3) in addressing these points.

The proposed project is consistent with the 2006 Angeles National Forest Land Management Plan, and is subject to project level, pre-decisional administrative review pursuant to 36 CFR 218, Subparts A and B. Comments received on this notice or in subsequent environmental reviews, including names and addresses of those who comment, will be considered as part of the public record on this proposed project, and are subject to the Freedom of Information Act (FOIA) and California Public Records Act (CPRA). Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to object to the subsequent decision.
