

45, and granted the licensee a possess-but-not-operate status. By letter dated August 18, 1988, the NRC amended DPC's Provisional Operating License No. DPR-45 to Possession Only License No. DPR-45 to reflect the permanently defueled configuration at LACBWR. Therefore, pursuant to the provisions of §§ 50.82(a)(1)(iii) and 50.82(a)(2) of title 10 of the *Code of Federal Regulations* (10 CFR), DPC's part 50 license does not authorize operation of LACBWR or emplacement or retention of fuel into the reactor vessel.

The NRC issued an order to authorize decommissioning of LACBWR and approve the licensee's proposed Decommissioning Plan (DP) on August 7, 1991. Because the NRC approved DPC's DP before August 28, 1996, pursuant to 10 CFR 50.82, the DP is considered the Post-Shutdown Decommissioning Activities Report (PSDAR) for LACBWR. The PSDAR public meeting was held on May 13, 1998, and subsequent updates to the LACBWR decommissioning report have combined the DP and PSDAR into the "LACBWR Decommissioning Plan and Post-Shutdown Decommissioning Activities Report" (D-Plan/PSDAR).

The DPC developed an on-site independent spent fuel storage installation (ISFSI) and completed the movement of all 333 spent nuclear fuel elements from the Fuel Element Storage Well to dry cask storage at the ISFSI by September 19, 2012 (ADAMS Accession No. ML12290A027). The remaining associated buildings and structures are ready for dismantlement and decommissioning activities.

By Order dated May 20, 2016 (ADAMS Accession No. ML16123A073), the NRC approved the direct transfer of Possession Only License No. DPR-45 for LACBWR from DPC to LaCrosseSolutions, LLC (LS), a wholly-owned subsidiary of EnergySolutions, LLC, and approved a conforming license amendment, pursuant to 10 CFR 50.80 and 50.90, to reflect the change. The Order was published in the **Federal Register** on June 2, 2016 (81 FR 35383). The transfer assigns DPC's licensed possession, maintenance, and decommissioning authorities for LACBWR to LS in order to implement expedited decommissioning at the LACBWR site. Decommissioning of LACBWR is scheduled to be completed in 2018.

By letter dated June 27, 2016 (ADAMS Accession No. ML16200A095), LS submitted the License Termination Plan (LTP) for LACBWR in accordance with 10 CFR 50.82(a)(9). The LTP includes a site characterization to ensure that final radiation surveys (FRS) cover all areas

where contamination existed, remains, or has the potential to exist or remain; identification of remaining dismantlement activities; plans for site remediation; a description of the FRS plan to confirm that LACBWR will meet the release criteria in 10 CFR part 20, subpart E; dose-modeling scenarios that ensure compliance with the radiological criteria for license termination; an estimate of the remaining site-specific decommissioning costs; and a supplement to the Environmental Report describing any new information or significant environmental changes associated with proposed license termination activities. The LACBWR LTP is currently being reviewed by the NRC.

By letter dated June 27, 2016 (ADAMS Accession No. ML16181A068), LS submitted a request for approval to remove portions of the site from the part 50 License, No. DPR-45. Specifically, LS intends to remove and release five radiologically non-impacted portions of the site from its part 50 license in accordance with 10 CFR 50.83(b), "Release of part of a power reactor facility or site for unrestricted use." This request is the subject of this notice.

Dated at Rockville, Maryland this 12th day of October 2016.

For The Nuclear Regulatory Commission.

Ted Carter,

Acting Chief, Reactor Decommissioning Branch, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.
