The archived data can be retrieved upon request. In archive data, CHUMS retains case data indefinitely. The Records Retention Schedule for CHUMS/F17 is listed in the HUD Records Disposition Schedules Handbook (2225.6) Appendix A—Single Family Home Mortgage Insurance Program Records. In addition, processes are being put in place to align all practices where information will be retained and disposed of in accordance with HUD Records Disposition Schedule Handbook (2225.6), which has been approved by the National Archives and Records Administration. According to Records Management Office and Schedule 20 of HUD’s Record Retention Schedule, the requirement is to retain for 6 years after the term of the loan. In some cases, this may be up to 36 years, at which time the information should be transferred to NARA. The transfer of the data would eliminate the concern of not having access to the information if needed in the future.

According to GRS 1.2 DAA—GRS–2013–0008–0001, records collected and stored for HUD Certified Housing Counselor Certification and/or Client Housing Counseling Certificates that reside in the systems will be kept for a minimum 10 years after the final action is taken on the file, document, and/or transaction. Longer retention is authorized if required for business use (Reference: GRS 1.2 DAA—GRS–2013–0008–0001).

After the record retention requirements have been met (a minimum of 10 years), the data and records can be purged or deleted from the system. If paper records are generated from the system, they can be archived at the local Federal Records Center after the final action or transaction has taken place.

Page 62658, in the first column is being updated to identify new disclosure requirements related to Federal Housing Administration’s Office of Housing by adding routine use (7) to clarify that records from this SORN may be disclosed to Government Sponsored...
Enterprises and other authorized entities to enhance HUD’s programs operations and performance through automated underwriting, credit scoring, and risk management, and records related to counseling certification requirements, by adding routine use (11) to clarify that records will be disclosed from the system to third party fee collection service for payment of examination fees, and routine use (11) to clarify that non-PII records will be made available to the general public from the system. 

Pursuant to the Privacy Act and the Office of Management and Budget (OMB) guidelines, the amended notices meet threshold requirements for having to transmit a report to OMB, the Senate Committee on Homeland Security and Governmental Affairs, and the House Committee on Oversight and Government Reform, as instructed by paragraph 4c of Appendix I to OMB Circular No. A–130, “Federal Agencies Responsibilities for Maintaining Records About Individuals,” November 28, 2000.

Dated: October 12, 2016.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**
Section 203, National Housing Act, Public Law 79–479, enables HUD/FHA to process applications for HUD mortgage insurance and respond to inquiries regarding applications and insured mortgages; The Housing and Community Development Act of 1987, 42 U.S.C. 3543, authorizes HUD to collect SSNs Social Security numbers for FHA Connect users are collected to ensure mortgagee eligibility requirements are met, 12 U.S.C. § 1708(d)); Subtitle D of title XIV of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (July 21, 2010); Section 106 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701x.

**PURPOSE(S):**
The Loan Application Management System (LAMS) is developed to better assist FHA with its automated processing, analysis, and screening of the appraisal documentation. CHUMS is developed to support lenders and HUD staff in the processing of insurance applications for single-family mortgages, from the initial loan application all the way through endorsement. Various mortgage loan types are processed through CHUMS, including loans for First Time Homebuyers, Home Equity Conversion Mortgages (HECM), Section 184 Indian Home Loan Guarantee, and 203K rehabilitation loans. CHUMS provides HUD field office staff functionality for tracking and processing cases, and allows monitoring of workloads by field office management. CHUMS also contains the FHA TOTAL (Technology Open to Approved Lenders) Scorecard, which evaluates the overall creditworthiness of mortgage loan applications submitted through Automated Underwriting Systems based on a number of credit variables, and determines the associated level of risk for loans submitted for FHA insurance.

The new LAMS tool is being created to become the eventual replacement system for CHUMS. The existing functionality in CHUMS will be moved into LAMS in stages over the next five years. In its initial release, LAMS will enable HUD to start collecting case binder data into an industry-wide electronic format that is acceptable to Mortgage Industry Standard Maintenance Organization (MISMO) data standards. The improved enhancements will allow HUD to screen out errors in the appraisal and endorsement process more efficiently. In the past, HUD has identified far too late in the appraisal and endorsement process when a loan was at risk or in danger of fraud. Implementing the new LAMS tool and new evaluation process will allow HUD to better evaluate errors in the appraisal and endorsement process, and avoid endorsing unqualified loans. FHA believes that having the mortgage insurance documentation evaluated earlier on in the process will over time have a tremendous impact on the performance of HUD’s mortgage insurance programs. The existing HUD data collected on applications for single-family mortgage insurance endorsements, includes electronic copies of mortgage documentation, along with the results of automated risk scoring and fraud validations, electronic copies of the lender submitted mortgage insurance appraisal records, the underlying data and metadata of documentation obtained in the application, underwriting, insuring and closing stages of the mortgage loan transaction will be used for risk management evaluation studies of the abovementioned mortgage insurance portfolios. The purpose for collecting the new records that will be maintained by this system is to verify the participating agency’s compliance with HUD’s Housing Counseling Program requirements. Other statutory changes to improve the effectiveness of housing counseling include increasing the breadth of counseling services so that they are comprehensive with respect to homeownership and rental counseling and issuing client Certificates of Housing Counseling to verify counseling requirements for FHA and other Federal, State, and local programs, as applicable. HUD’s Housing Counseling Program currently provides comprehensive homeownership and rental counseling. As noted in the proposed rule published on September 13, 2013, an individual counselor, in contrast to multiple counseling agencies, will have to show competency (through passage of an examination) in identifying and understanding the breadth of homeownership and rental counseling services. Currently, a potential homebuyer or homeowner is likely to seek a housing counseling agency that specializes in a specific area and receive comprehensive counseling by a counselor in that specific area. As a result of increasing the breadth of counseling service knowledge, a housing counselor providing counseling on a specific area requested by the client would also be trained to identify cross-cutting issues that a client may not have identified when seeking out a specific counselor or during the intake process by the housing counseling agency. In addition, certifying individual counselors may further enhance the high regard of agencies and counselors participating in HUD’s Housing Counseling Program.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**
In addition to those disclosures generally permitted under 5 U.S.C. Section 552a (b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a (b) (3) as follows:

In some cases, this may be up to 36 years, at which time the information should be transferred to NARA. The transfer of the data would eliminate the concern of not having access to the information if needed in the future. Program management reports are generated by IDIS to provide data on the status of program participants’ commitment and disbursement of HOME funds. These reports are provided to HUD staff as well as to HOME PJs.

Management reports required in conjunction with the Annual Performance Report (§ 92.509) are used by HUD Field Offices to assess the effectiveness of locally designed programs in meeting specific statutory requirements and by Headquarters in preparing the Annual Report to Congress. Specifically, these reports permit HUD to determine compliance with the requirement that PJs provide a 25 percent match for HOME funds expended during the Federal fiscal year (Section 220 of the Act) and that program income be used for HOME eligible activities (Section 219 of the Act), as well as the Women and Minority Business Enterprise requirements (§ 92.351(b)).

Financial, project, tenant and owner documentation is used to determine compliance with HOME Program cost limits (Section 212(e) of the Act), eligible activities (§ 92.205), and eligible costs (§ 92.206), as well as to determine whether program participants are achieving the income targeting and affordability requirements of the Act (Sections 214 and 215). Other information collected under Subpart H (Other Federal Requirements) is primarily intended for local program management and is only viewed by HUD during routine monitoring visits. The written agreement with the owner for long-term obligation (§ 92.504) and tenant protections (§ 92.253) are required to ensure that the property owner complies with these important elements of the HOME Program and are also reviewed by HUD during monitoring visits. HUD reviews all other data collection requirements during monitoring to assure compliance with the requirements of the Act and other related laws and authorities.

HUD tracks PJ performance and compliance with the requirements of 24 CFR parts 91 and 92. PJs use the required information in the execution of
