SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No.1910–5173; (2) Information Collection Request Title: The American Assured Fuel Supply Program; (3) Type of Review: Extension; (4) Purpose: The U.S. Department of Energy (DOE) created the American Assured Fuel Supply (AFS), a reserve of low enriched uranium (LEU) to serve as a backup fuel supply for foreign recipients to be supplied through U.S. persons or for domestic recipients, in the event of fuel supply disruption. DOE is committed to making the AFS available to eligible recipients in the case of supply disruptions in the nuclear fuel market. This effort supports the United States Government's nuclear nonproliferation objectives by supporting civilian nuclear energy development while minimizing proliferation risks. DOE published a Notice of Availability for AFS on August 18, 2011, and published an application on December 2, 2013, in the **Federal Register** to standardize the information that must be provided in a request to access the material in the AFS as set forth in the Notice of Availability 76 FR 51357, 51358. L. 95–242) to encourage the widespread use of atomic energy for peaceful purposes, and to cooperate with other nations by distributing nuclear material where appropriate safeguards measures are in place to ensure the material is properly controlled and used for peaceful purposes. In 2005, DOE set aside a portion of its LEU inventory to be used to support the International Atomic Energy Agency's (IAEA) International Nuclear Fuel Bank (INFBN) initiative, which is envisioned as an LEU reserve that will be administered by the IAEA and that will serve as a back-up for global supply disruptions. Congress later appropriated \$49,540,000
