FOR FURTHER INFORMATION CONTACT:

Direct any requests for additional information or copies of the information collection instruments and instructions to Rebecca Peterson at Electricity2017@eia.gov or at 202–586–4509. The collection instruments and instructions are also available on the Internet at: <http://www.eia.gov/survey/changes/electricity/solar/>.

SUPPLEMENTARY INFORMATION: This information collection request contains:

- (1) OMB No.: 1905–0129;
- (2) *Information Collection Request Title:* Electricity and Renewables Power Surveys;
- (3) *Type of Request:* Extension, with changes of a currently approved collection;
- (4) *Purpose:* The electricity and renewables surveys collect data from entities involved in the production, transmission, delivery, and sale of electricity, and in maintaining the reliable operation of the power system. The data collected are the primary source of information on the nation’s electric power industry. EIA uses the data collected on the electric power surveys to answer queries from the U.S. Congress, other federal and state

agencies, the electric power industry, and the public; and as input to the National Energy Modeling System (NEMS) and to EIA’s other forecasting and analytical activities. Other users of the data include policy makers, regulators, energy market analysts, and the energy industries.

Changes to the currently approved forms in this package can be summarized as follows:

- *Form EIA–63B:* Change from a monthly only to an annual and monthly collection and eliminate questions about photovoltaic cells which will result in a significant decrease in burden;
 - *Form EIA–411:* Discontinue the collection of historical information associated with demand, capacity, transactions, and reserve margins;
 - *Form EIA–826:* Discontinue this form and replace it with Form EIA–861M (see further below);
 - *Form EIA–860:* Require plants in Puerto Rico to begin reporting and add questions concerning storage capacity, solar generators, virtual net metering agreements, and planned retirement dates of environmental equipment;
 - *Form EIA–860M:* Add questions regarding net metering agreements involving newly operable solar generators;
 - *Form EIA–861:* Add questions regarding small scale storage and virtual net metered capacity;
 - *Form EIA–861 M (which replaces the Form EIA–826):* Add questions regarding capacity;
 - *Form EIA–923:* Reduce the current monthly sample via a more efficient model-based cutoff design; require plants in Puerto Rico to begin reporting, remove data protection for coal and petroleum stocks, collect the mercury removal rate for environmental equipment, collect data from plants that are operating under test conditions;
 - *Form EIA–930:* Require respondents to report hourly sub-regional demand, hourly net generation by standard fuel type, and their hourly total actual demand within 30 minutes (instead of the current 60 minutes) of the end of the data hour.
- (5) *Annual Estimated Number of Respondents:* The annual estimated number of respondents on the electric and solar surveys is 16,770;
- (6) *Annual Estimated Number of Total Responses:* The annual estimated number of total responses is 65,716;
- (7) *Annual Estimated Number of Burden Hours:* The annual estimated number of burden hours is 152,120 which represents an increase of 10,975 burden hours from the prior renewal of this collection. Most of the overall change is driven by an overall 17-

percent increase in survey respondents due to rapid growth in the electric power industry. To a smaller extent, the increase is due to additional questions that are needed on certain surveys to optimize data coverage while adding only a minimal increase in burden and to the requirement for plants in Puerto Rico to begin reporting on the Forms EIA–860 and EIA–923.

(8) *Annual Estimated Reporting and Recordkeeping Cost burden:* New respondents will incur a one-time total startup cost of \$14,400. This will apply to the 25 power companies in Puerto Rico that will be new respondents (25 companies times 8 hours times \$72.02 per hour, the current hourly rate for an EIA employee). EIA estimates that for each of these companies it will take 8 hours to configure their reporting systems, review instructions, search their data systems and receive authentication for EIA’s Single Sign-on Internet Data Collection System in order to report electronically. Additional costs to respondents are not anticipated beyond costs associated with response burden. This information is maintained in the normal course of business. The total annual cost of burden hours to the respondents for all nine surveys is estimated to be \$10,955,682 (152,120 burden hours times \$72.02 per hour). Other than the cost of burden hours, EIA estimates that there are no additional costs for generating, maintaining, and providing the information.
