In addition to content and format recommendations for each type of DHCP letter, the guidance also includes advice on consulting with FDA to develop a DHCP letter, when to send a letter, what type of letter to send, and conducting an assessment of the letter's impact.

Based on a review of FDA's Document Archiving, Reporting and Regulatory Tracking System for 2012 to 2015, we

identified DHCP letters that were sent and the identity of each sponsor sending out a DHCP letter for each year. We estimate that we will receive approximately 25 DHCP Letters annually from approximately 18 application holders. FDA professionals familiar with DHCP letters and with the recommendations in the guidance estimate that it should take an application holder approximately 100

hours to prepare and send DHCP letters in accordance with the guidance.

In the **Federal Register** of March 10, 2016 (81 FR 12734), we published a 60-day notice requesting public comment on the proposed extension of this collection of information. No comments were received.

FDA estimates the annual reporting burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response (hours)	Total hours
Annual average	18	1.4	25	100	2,500

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.
