

different locations and combinations of facilities serving as a community-based outpatient clinic (CBOC), a multi-specialty outpatient clinic (MSOC), and a residential rehabilitation treatment program (RRTP) facility; expanding, renovating, or vacating existing facilities; and taking no action. The new preferred Alternative, referred to as A-2 in the Final EIS, is a hybrid of Alternatives A and C evaluated in the Draft EIS. It was identified by consulting parties during the public comment period on the Draft EIS and includes renovating Building 12 on the existing Hot Springs campus to operate as a CBOC a new MSOC (replacing the existing leased CBOC), and a 100-bed RRTP in Rapid City.

VA is substituting the implementation and review procedures of Section 102 of NEPA for consultation under Section 106 of the NHPA. This process meets the integration intent of the NEPA regulations (40 CFR 1500.2(c) and 1502.25(a)) and the substitution intent of the NHPA regulations (36 CFR 800.8(c)). This process follows the joint CEQ-ACHP guidance for integrating NEPA and Section 106 compliance (CEQ-ACHP 2013). The EIS includes identification and evaluation of impacts to historic properties. Formal consultation and identification and resolution of effects to historic properties are documented throughout the Final EIS.

In the Final EIS, VA has analyzed the environmental impacts of the Proposed Action/Preferred Alternative, a reasonable range of alternatives, and a No Action Alternative.

The Final EIS considers comments on the Draft EIS, including those submitted during the public comment period that officially began on November 6, 2015, and ended on June 20, 2016, following three comment period extensions. The extensions were provided in response to requests from the public and other stakeholders, including consulting parties participating in the NEPA/NHPA substitution and consultation process.

As indicated above, VA's purpose and need is to improve the availability of high quality, safe and accessible health care services for Veterans residing in the VA BHHCS service area.

While developing the Final EIS, VA considered the alternatives analyzed in

the Draft EIS, the comparisons of impacts for each resource area, and input received on the Draft EIS, including the identification of a new hybrid alternative A-2. Based on the information presented in the Final EIS, VA has identified Alternative A-2—operation of a CBOC in a renovated Building 12 on the existing Hot Springs campus and a new MSOC and RRTP in Rapid City—as its preferred alternative in the Final EIS.
