

capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs. This ICR also rounds all calculated total values to 3 significant figures.

Privacy Act of 1974; System of Records

AGENCY: Office of Environmental Information, Environmental Protection Agency (EPA).

ACTION: Notice of amended Privacy Act system of records final.

SUMMARY: The FOIA Request and Appeal File system of records is being amended to include all information and data elements that are being collected by the Environmental Protection Agency (EPA) and participating agencies as it relates to FOIA requests, appeals and responses. This information is being removed from the Federal Docket Management System (FDMS) system of records and being added to the FOIA Request and Appeal File (EPA-9) system of records. The FOIA Request and Appeal File system of records is also being amended to provide an additional routine use for the system. The additional routine use being added to this system of records, will allow the National Archives and Records Administration (NARA), Office of Government Information Services (OGIS), and the EPA to share information in the FOIA Request and Appeal File system in order to mediate and resolve disputes between requesters and administrative agencies without delay. OGIS will work directly with each agency using FOIAonline to access case level information that is not

publically available in order to perform mediation services.

Records are stored in a secure, password protected electronic system that utilizes security hardware and software to include multiple firewalls, active intruder detection and role-based accessed controls. Additional safeguards vary by participating agencies. EPA also has records from the period prior to its use of the FOIAonline system which are stored in file folders in lockable file cabinets. The FOIA Request and Appeal File system is maintained under the authority of the Freedom of Information Act, 5 U.S.C. 552.

SUPPLEMENTARY INFORMATION: The Freedom of Information Act (FOIA) Request and Appeal File (EPA-9) system contains a copy of each FOIA request and appeal received by the EPA and a copy of all correspondence related to the request, including name, affiliation address, telephone numbers, and other information about a requester. FOIAonline is managed and used by the EPA and other agencies to process, track and respond to FOIA requests and appeals. The FOIAonline system provides the EPA and partner agencies with a secure, password protected Web site to electronically receive, process, track and store requests from the public for federal records; post responsive records to a Web site; collect data for annual reporting requirements to the Department of Justice and manage internal FOIA administration activities.

In addition, the FOIA system allows the public to submit and track FOIA requests and appeals; access requests and responsive records online and obtain the status of requests filed with the EPA and partner agencies. FOIAonline is a software application used by the EPA and other agencies. Social security numbers and other types of personally identifiable information may be provided in requests or in responsive documents. In some cases, agencies may require this information to fulfill a request. All participating agencies will ensure that sensitive PII is not made publicly available. The name of a FOIA requester may be publicly available and searchable by the public based on an agency's policies. With the exception of a requester's name, any other personally identifiable information provided by a requester during the process of completing the online request form or creating an online account (e.g., home addresses, email address and contact information) will not be posted to the Web site, nor will it be searchable by the public. Personally identifiable information determined to be publicly releasable and contained in documents released to the public under FOIA (e.g., the names and official contact information of government employees or the names of agency correspondents) will be publicly available and searchable by the public if posted by a participating agency. Individuals accessing the system are FOIA Officers, FOIA coordinators, subject matter experts and members of the public. Computer records are maintained in a secure, password protected computer system that operates in compliance with Federal Security Information Modernization Act (FISMA) moderate level requirements located at EPA's National Computer Center located at 109 T.W. Alexander Drive, Durham, NC 27709. All records are maintained in secure, access-controlled areas or buildings. The system is maintained in the EPA's Office of Environmental Information, Headquarter Program Offices, Regional Offices and the Office of General Counsel.
