

Second Subdivision at Milepost (MP) 38.0 and MP 41.0 at Davenport, ND. When FRA conditionally approved abandonment of the automatic interlocking plant located at the Davenport junction (see Docket Number FRA-1999-5621) in November 1999, one of the conditions of approval required the installation of stop signs at all four quadrants of the RR/VW's crossing at grade between the Second and Fourth Subdivisions. Four stop signs were installed at the four junction switches, located at MP 17.0 and MP 19.0, on the Fourth Subdivision and MPs 38.0 and 41.0 on the Second Subdivision.

The reason given for the proposed discontinuance is that RR/VW experienced a change in traffic patterns in the last decade and a significant change this past year. The Second Subdivision mainline track has experienced a decline in traffic due to shuttle train traffic rerouting through a new turnout installed at Davenport that now handles a majority of these trains over the Fourth Subdivision instead of the Second Subdivision. Yard limits would remain in effect on both the Second and Fourth Subdivisions. Maximum authorized track speed for these restricted limits is 20 mph, being able to stop short within half the range of vision of the stop sign and other requirements listed by the General Code of Operating Rules 6.13 and 6.27. Maximum speed through the interlocking is 12 mph.

In accordance with part 211 of Title 49 of Code of Federal Regulations (CFR), this provides the public notice that by a document dated August 16, 2016, the Appanoose County Community Railroad (APNC) has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR 223.11. FRA assigned the petition Docket Number FRA-2016-0087.

APNC has petitioned FRA to grant a waiver of compliance from 49 CFR part 223, Safety Glazing Standards—Locomotives, Passenger Cars and

APNC is a shortline railroad that operates over approximately 34.5 miles of track, and the majority of its operations are through rural or lightly populated areas. Locomotive number APNC 973 is a GP-7 type locomotive and was built in 1953. Locomotive number APNC 116 is a GP-7M type locomotive and was built in 1953.
