

would be considered for salvage harvest. Salvage logging treatments would be accomplished by a combination of ground-based and skyline logging systems. All salvage units would be reforested as described in the site-preparation and planting section.

(6) Site Preparation and Planting (without salvage) (458 acres)—Forest stands selected for site preparation and tree planting are predominately plantations composed of standing dead trees generally under 16 inches in diameter at breast height. Both manual and mechanical methods would be used to cut or masticate standing dead trees depending on slope steepness, accessibility and feasibility. Activity-generated fuels would be treated using a variety of methods including piling and burning, underburning, or lop and scattering. Reforestation would be accomplished by directly planting nursery-grown seedlings or by allowing natural regeneration.

(7) Horse Creek SIA (184 acres)—Treatment within the Horse Creek SIA includes, hazard tree removal, placing trees with rootwads into the riparian reserve, and planting hardwood and conifers within the riparian reserves.

Connected Actions

- Road Access—Access for this project would be mainly accomplished by use of roads on National Forest Transportation System. Temporary roads are estimated at this time and will be finalized to comply with standards and guidelines as designated within the forest plan.

- Landings—Existing landings will be used where possible. Landing size will be commensurate with operation safety. Skyline landings will use roads where possible. Skyline landings off the road system and ground-based landings will average one acres in size but will not exceed 1.5 acres in size. Both new and existing landings will be hydrologically stabilized at the end of the project.

Responsible Official

C. Christine Frisbee, Klamath National Forest Acting Forest Supervisor, 1711 South Main Street, Yreka, California 96097, will prepare and sign the Record of Decision at the conclusion of the National Environmental Policy Act (NEPA) review.

Nature of Decision To Be Made

The Forest Service is lead agency for the project. Based on the result of the NEPA analysis, the Forest Supervisor's Record of Decision regarding the Horse Creek Project will recommend implementation of one of the following:

(1) The proposed action and mitigation necessary to minimize or avoid adverse impacts; (2) An alternative to the proposed action and mitigation necessary to minimize or avoid adverse impacts; or (3) The no-action alternative. The Record of Decision will also document the consistency of the proposed action or one of the alternatives with the Klamath National Forest Land and Resource Management Plan.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: November 16, 2016.

Ted O. McArthur,

Acting Deputy Forest Supervisor.
