Massachusetts, to be included in the Special Exposure Cohort under the Energy Employees Occupational Illness Compensation Program Act of 2000.

FOR FURTHER INFORMATION CONTACT:
Stuart L. Hinnefeld, Director, Division of Compensation Analysis and Support, National Institute for Occupational Safety and Health, 1090 Tuvalu Avenue, MS C–46, Cincinnati, OH 45226–1938, Telephone 877–222–7570. Information requests can also be submitted by email to DCAS@CDC.GOV.

SUPPLEMENTARY INFORMATION:
Authority: 42 CFR 83.9–83.12.

Pursuant to 42 CFR 83.12, the initial proposed definition for the class being evaluated, subject to revision as warranted by the evaluation, is as follows:

Facility: Metals & Controls Corp.
Location: Attleboro, Massachusetts.
Job Titles and/or Job Duties: All Facilities Construction & maintenance workers including Lubrication/Oilers, Industrial Pipefitters, Engineering Technicians (Mechanical, Electrical, Structural), Maintenance Supervisors, Electricians, Plumbers, Millwrights, Carpenters, Instrumentation Technicians, Chemical Handlers, Waste Treatment Operators, and Production Workers to include Machine Operators/Helpers, and Repair & Maintenance (commonly called R&M) workers.

John Howard,
Director, National Institute for Occupational Safety and Health.

National Institute on Aging: Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting. The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Aging Special Emphasis Panel, Alzheimer’s Disease Drug Development.
Date: January 19, 2017.
Time: 2:00 p.m. to 4:00 p.m.
Agenda: To review and evaluate grant applications.
Place: National Institute on Aging, Gateway Building 2C/212, 7201 Wisconsin Avenue, Bethesda, MD 20892.
(Telephone Conference Call).
Contact Person: Alexander Parasadanian, Ph.D., Scientific Review Officer, National Institute on Aging, Gateway Building 2C/212, 7201 Wisconsin Avenue, Bethesda, MD 20892, 301–496–9666, Parasadanianadnia.nih.gov.

Center for Scientific Review; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting. The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Psycho/Neuropathology, Lifespan Development, and STEM Education.
Date: November 29, 2016.
Time: 4:00 p.m. to 6:00 p.m.
Agenda: To review and evaluate grant applications.
Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).
Contact Person: John H Newman, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3222, MSC 7808, Bethesda, MD 20892, (301) 435–0629, newmanjh@ocr.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Dated: November 21, 2016.
Sylvia L. Neal,
Program Analyst, Office of Federal Advisory Committee Policy.

Announcement of Requirements and Registration for “Storytelling About Health and Wellness in American Indian and Alaska Native Communities” Challenge

SUMMARY: In recognition of Native American Heritage Month, the Tribal Health Research Office in the Division of Program Coordination, Planning, and Strategic Initiatives, in the Office of the Director of the National Institutes of Health (NIH), announces the “Storytelling about Health and Wellness in American Indian and Alaska Native Communities” Challenge. The goal of this Challenge is to develop a brief digital story (i.e., a video) that communicates how traditions and heritage promote health in American Indians and Alaska Natives (AI/AN).

Winners announced: Week of March 6, 2017.

FOR FURTHER INFORMATION CONTACT: Please contact NIH’s Tribal Health Research Office at NIHTribe@nih.gov or 301–402–9852 with questions about this challenge.

SUPPLEMENTARY INFORMATION:
Statutory Authority to Conduct the Challenge: This challenge is consistent with the statutory authority of the Division of Program Coordination, Planning, and Strategic Initiatives, National Institutes of Health. The Division identifies research that represents important areas of emerging scientific opportunities, rising public
ongoing efforts to inform a strengthened American Indians and Alaska Natives. AI/AN communities; and (2) how future participation in this challenge to share promotes their health and well-being. traditions, and how their culture communities, their heritage and strengths and resilience of these incentivize the public to showcase the geographical access to care, and levels socioeconomic status, gender/sex, age, include social and historical factors, known to contribute to health disparities/cancer-health-disparities. higher rates of diseases and disorders across several areas of health such as: diabetes, chronic liver disease, certain cancers, mental health, and substance use (http://www.cdc.gov/nchs/data/nvsr/nvsr65/nvsr65_05.pdf) and http://www.cancer.gov/cancertopics/factsheet/disparities/cancer-health-disparities). Factors known to contribute to health status and disparities are complex, and include social and historical factors, ethnicity, culture, historical trauma, socioeconomic status, gender/sex, age, geographical access to care, and levels of insurance as well as underlying biology, physiology, and genetics. The NIH hopes that this challenge will incentivize the public to showcase the strengths and resilience of these communities, their heritage and traditions, and how their culture promotes their health and well-being.

The NIH invites the public to participate in this challenge to share stories about: (1) How heritage and tradition leads to health and wellness in AI/AN communities; and (2) how future research can improve the health of American Indians and Alaska Natives. The videoaugmentation the agency’s ongoing efforts to inform a strengthened research portfolio that advances AI/AN research needs. This challenge is also designed to attract more interest and attention to the research needs of these communities and communicate these needs in a culturally appropriate manner.

Eligibility Rules for Participating in the Challenge: Official Rules: The challenge is open to any “Contestant.” A “Contestant” may be (i) an entity, or (ii) an individual or group of individuals (i.e., a team), each of whom is a U.S. citizen or permanent resident of the United States and 18 years of age or older. For example, Contestants may be communities or community members, schools, organizations, research participants, and others. Contestants may submit more than one entry.

1. To be eligible to win a prize under this challenge, the Contestant—
   a. Shall have registered to participate in the challenge under the rules promulgated by the NIH as published in this notice;
   b. Shall have complied with all the requirements set forth in this notice;
   c. In the case of a private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen or permanent resident of the United States;
   d. May not be a federal entity; tribal governments and employees are eligible to submit;
   e. May not be a federal employee acting within the scope of the employee’s employment and, further, in the case of Department of Health and Human Services employees, may not work on their submission(s) during assigned duty hours. Federal employees seeking to participate in this challenge outside the scope of their employment should consult their ethics official prior to developing their submission;
   f. May not be an employee of the NIH, a member of the technical evaluation panel or judge of the Challenge, or any other party involved with the design, production, execution, or distribution of the Challenge or the immediate family of such a party (i.e., spouse, parent, step-parent, sibling, step-sibling, child, or step-child).

2. Federal grantees may not use federal funds to develop their Challenge submissions.

3. Federal contractors may not use federal funds from a contract to develop their Challenge submissions.

4. Submissions must not infringe upon any copyright or any other rights of any third party.

5. By participating in this Challenge, a Contestant agrees to assume any and all risks and waive claims against the federal government and its related entities (as defined in the COMPETES Act), except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from participation in this Challenge, whether the injury, death, damage, or loss arises through negligence or otherwise.

6. Based on the subject matter of the Challenge, the type of work that it will possibly require, as well as an analysis of the likelihood of any claims for death, bodily injury, property damage, or loss potentially resulting from Challenge participation, Contestants are not required to obtain liability insurance or demonstrate financial responsibility in order to participate in this Challenge.

7. By participating in this Challenge, each Contestant agrees to indemnify the federal government against third-party claims for damages arising from or related to Challenge activities.

8. A Contestant shall not be deemed ineligible because the individual or entity used federal facilities or consulted with federal employees during the Challenge if the facilities and employees are made available to all Contestants participating in the Challenge on an equitable basis.

9. By participating in this Challenge, each Contestant grants to the NIH irrevocable, paid-up, royalty-free, nonexclusive worldwide license to post, link to, share, and display publicly on the web the submitted document. Each participant will retain all other intellectual property rights in their submissions, as applicable.

10. The NIH reserves the right to (a) cancel, suspend, modify the Challenge, and/or (b) not award any prizes if no entries are deemed worthy.

11. Each Contestant agrees to follow all applicable federal, state, and local laws, regulations, and policies.

12. Each Contestant participating in this Challenge must comply with all terms and conditions of these rules, and participation in this Challenge constitutes each such participant’s full and unconditional agreement to abide by these rules. Winning is contingent upon fulfilling all requirements herein.

Registration and Submission Process for Participants: The registration and submission process for entering the Challenge can be found at: https://dpcpsi.nih.gov/thro/news and at https://www.challenge.gov/.

Submission Requirements: The submission is a video that describes:

1. How heritage and tradition leads to
health and wellness in AI/AN communities; and (2) how future research can improve the health of American Indians and Alaska Natives.

Submissions are limited to a video that may not exceed five minutes. Winning entries may be posted on the NIH Web site. Submissions must be substantially free of scientific jargon and understandable by viewers without scientific/technical backgrounds. The video must include at least one member of a federally recognized tribe(s) and address the following:

- A brief historical background that puts the story in context. For example, what is the traditional or cultural practice? How does it contribute to health and wellness in AI/AN populations?
- A description of how this tradition or culture affects people’s lives. The impact could be lives saved, suffering reduced, fewer visits to health care facilities, adopting a healthier lifestyle, and similar such benefits. How is this practice promoted within tribal populations?
- Information about the unmet health and wellness needs of AI/AN communities. What is the unmet need? Is there an understanding of what interventions or actions may help address these needs?
- A discussion of how biomedical or behavioral research can further Tribal health and wellness. What are the current gaps in Tribal health research and opportunities for improving health in AI/AN communities? What are some of the barriers or challenges in closing these gaps? How would addressing them reduce mortality, improve quality of life, or otherwise positively affect Tribal communities? The video must convey the research question of interest as part of a holistic picture of Tribal health or AI/AN communities.

Contestants may submit more than one entry. However, the cultural and traditional practices and research described in each submission must be distinct. If a Contestant enters substantially similar submissions, as determined by the NIH, the agency may disqualify the later entries or require the Contestant to choose one entry to enter into the Challenge.

Contestants must include a link to a public or unlisted video on YouTube.com, Vimeo.com, or other internet accessible site. The submission may be disqualified if the video is commercially promotional, contains inappropriate material or language, or presents material unrelated to this challenge, as determined by the NIH. A video must:

- Be in English, if dialogue is present. Use of Native language is encouraged but must include an English caption or other method of translation to English.
- Be no longer than five minutes. The NIH recognizes that there may be a desire to prepare a longer video. However, any part of a video exceeding five minutes will be disregarded as part of the judging process.
- Not include copyrighted material, such as music or photos, unless the Contestant has obtained written permission to use such material.
- Not include proprietary information.
- Include captioning or submission of a written transcript in English for any video with dialogue, to ensure the video can be understood by viewers with disabilities.
- The video must remain posted at the URL submitted with the entry for at least one year after the Challenge closes. The video (or the link to it) may be displayed publicly on the NIH Web site.
- Before posting a video online, a Contestant must obtain consent from anyone appearing in the video. If a minor appears in the video, the Contestant must obtain consent from the minor’s parent or legal guardian.

Amount of the Prize: The Challenge will have no more than five winning submissions. Winning submissions will receive an award and recognition on the NIH Tribal Health Research Office Web site and possibly other NIH outlets. The first place winner will receive $4,000; second place will receive $3,000; third place will receive $2,000; and two honorable mentions will each receive $500. The first place winner will also be invited to an upcoming meeting of the NIH Tribal Consultation Advisory Committee. Travel will be reimbursed for those invitees. If two or more submissions describe the same general advance and are judged to be equally meritorious, the prize will go to either the first submitted submission or the prize will be split between or among the Contestants at the discretion of the NIH. If a team submits a winning entry, a single prize will be awarded to that team to divide amongst the winners, as determined by that entrant. Winning is contingent upon fulfilling all requirements of the Challenge rules. The name, city, state, and submission of winning Contestants will be posted on the NIH Tribal Health Research Office Web site.

The award-approving official will be the NIH Deputy Director for Program Coordination, Planning, and Strategic Initiatives. The winners will be notified by email, telephone, or mail after the date of the judging. Prizes awarded under this Challenge will be paid by electronic funds transfer and may be subject to federal income taxes. The NIH will comply with the Internal Revenue Service withholding and reporting requirements, where applicable.

Basis Upon Which Submissions Will Be Evaluated: This section describes judging criteria and the evaluation process. Submissions first will be assessed by a technical evaluation panel consisting of individuals who will review the relevance of the entry to the AI/AN communities, the accuracy of the advance and impact on AI/ANs, cultural sensitivity, and confirmation of the unmet research need(s) in AI/AN populations. The technical evaluation panel will forward its assessment of each submission to a qualified judging panel composed of NIH program directors and other federal employees involved in AI/AN research. The judging panel will evaluate all submissions and recommend winners based on the assessments from the technical evaluation panel and the following judging criteria:

- Quality, clarity, and historical accuracy. Is the information presented accurately and clearly?
- Impact. Is the story educational, inspiring, and persuasive? Does it clearly convey how the culture or tradition being practiced promotes health and wellness? Does it clearly convey where research could continue to improve health and well-being?
- Originality. The Challenge submission cannot have been previously published.
- Digital technology. Does the video effectively use lighting, sound, and editing to tell the story? Is the dialogue clear and easy to understand? Do visual effects (if any) contribute to the message or detract from it? Does the video convey the intended message in the five minute limit? Is the video of sufficient quality to be posted on the Web? Is captioning or English translation available?

Additional Information: If Contestants choose to provide the NIH with personal information by providing a submission to this Challenge, that information will be used to respond to Contestants in matters regarding their submission, announcements of entry, finalists, and winners of the Challenge.
