SUPPLEMENTARY INFORMATION:
I. Extension of the Comment Period

On October 4, 2016, at 81 FR 68504, OSHA published a Notice of Proposed Rulemaking (NPRM) titled “Standards Improvement Project-Phase IV.” In this NPRM, OSHA continues its efforts to remove or revise outdated, duplicative, unnecessary, and inconsistent requirements in its safety and health standards by proposing 18 revisions to existing standards in its recordkeeping, general industry, maritime, and construction standards, with most of the revisions to its construction standards. The NPRM provides an explanation of the rule and its economic analysis, and solicits comments from the public regarding the contents of the proposal. The period for submitting comments was to expire on December 5, 2016. However, two stakeholders have requested an extension of 45 days for submitting written comments and information. Both stakeholders noted that the NPRM addresses 18 separate standards that each require separate analysis of the proposed changes.

OSHA believes that a 30 day extension is sufficient to facilitate the submission of thorough reviews and provide OSHA with a complete record for this proposed rule so that OSHA has all the information needed to develop a final rule. Accordingly, OSHA extends the comment period by 30 days, and written comments must be submitted by January 4, 2017.

II. Submission of Comments and Access to the Docket

OSHA invites comments on the proposed revisions described, and the specific issues raised, in the NPRM. These comments should include supporting information and data. OSHA will carefully review and evaluate these comments, information, and data, as well as any other information in the rulemaking record, to determine how to proceed. When submitting comments, parties must follow the procedures specified in the previous sections titled DATES and ADDRESSES. The comments must provide the name of the commenter and docket number (OSHA–2012–0007). The comments also should identify clearly the provision of the proposal each comment is addressing, the position taken with respect to the proposed provision or issue, and the basis for that position. Comments, along with supporting data and references, submitted on or before the end of the specified comment period will become part of the proceedings record, and will be available for public inspection and copying at http://www.regulations.gov.
