

FEDERAL REGISTER

Vol. 81

Monday,

No. 243

December 19, 2016

Book 1 of 2 Books

Pages 91643–92120

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 81, No. 243

Monday, December 19, 2016

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 984

[Doc. No. AMS–SC–16–0062; SC16–984–2 FR]

Walnuts Grown in California; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule implements a recommendation from the California Walnut Board (Board) to increase the assessment rate established for the 2016–17 and subsequent marketing years from \$0.0379 to \$0.0465 per kernelweight pound of assessable walnuts. The Board locally administers the marketing order and is comprised of growers and handlers of walnuts operating within the area of production. Assessments upon walnut handlers are used by the Board to fund reasonable and necessary expenses of the program. The marketing year began on September 1 and ends August 31. The assessment rate will remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Effective December 20, 2016.

FOR FURTHER INFORMATION CONTACT:

Terry Vawter, Senior Marketing Specialist, or Jeffrey Smutny, Regional Director, California Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (559) 487–5901, Fax: (559) 487–5906, or Email: Terry.Vawter@ams.usda.gov or Jeffrey.Smutny@ams.usda.gov.

Small businesses may request information on complying with this regulation by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program,

AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Richard.Lower@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Order No. 984, as amended (7 CFR part 984), regulating the handling of walnuts grown in California, hereinafter referred to as the “order.” The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.”

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Orders 12866, 13563, and 13175.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the order now in effect, California walnut handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable walnuts beginning on September 1, 2016, and continue until amended, suspended, or terminated.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA’s ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule increases the assessment rate for the 2016–17 and subsequent marketing years from \$0.0379 to \$0.0465 per kernelweight pound of assessable walnuts.

The order provides authority for the Board, with the approval of USDA, to formulate an annual budget of expenses

and collect assessments from handlers to administer the program. All members of the Board, but one, are growers and handlers of California walnuts. They are familiar with the Board’s needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2015–16 and subsequent marketing years, the Board recommended, and USDA approved, an assessment rate of \$0.0379 per kernelweight pound of assessable walnuts that would continue in effect from year to year unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Board or other information available to USDA.

The Board met on June 9, 2016, and unanimously recommended 2016–17 expenditures of \$23,143,050 and an assessment rate of \$0.0465 per kernelweight pound of assessable walnuts. In comparison, last year’s budgeted expenditures were \$22,668,980. The assessment rate of \$0.0465 is \$0.0086 per pound higher than the rate currently in effect. The quantity of assessable walnuts for the 2016–17 marketing year is estimated at 553,000 tons inshell or 497,700,000 kernelweight pounds, which is the three-year average of walnut production. At the recommended higher assessment rate of \$0.0465 per kernelweight pound, the Board should collect approximately \$23,143,050 in assessment income, making income and expenses equal. The Board estimates it will begin the 2016–17 marketing year with \$9,827,284 in its monetary reserve, which is well within the requirements of the order.

The Board noted that sales of California walnuts in the domestic market have been declining in recent years, and embarked upon an enhanced market development and promotion program in the 2015–16 marketing year that was designed to reverse the trend. Noting that making such a commitment for a single year would likely not result in long-term gains, they voted to continue such market development and promotion programs. Thus, it is

maintaining its programs at a level near that of the 2015–16 marketing year.

In addition, personnel changes will result in an overlap of duties and expenses, as some positions will be added so that experience and continuity can be maintained despite staff

retirements. Thus, employee costs are expected to be higher this marketing year. Added to that, the implementation of the Food Safety Modernization Act (FSMA) may result in added costs to the industry and, in some cases, to the Board as well. For that reason, the

Grades and Standards Committee and the Production Research Committee requested increased budgets.

The following table compares major budget expenditures recommended by the Board for the 2015–16 and 2016–17 marketing years:

Budget expense categories	2015–16	2016–17
Employee Expenses	\$ 1,846,500	\$ 2,292,000
Travel/Board Expenses/Annual Audit	191,000	206,000
Office Expenses	254,000	262,000
Controlled Purchases	10,000	10,000
Crop Acreage Survey	10,000	0
Crop Estimate	130,000	130,000
Production Research Director	94,500	175,000
Production Research	1,700,000	1,800,000
Sustainability Project	75,000	75,000
Grades and Standards Research	600,000	800,000
Domestic Market Development	18,478,440	18,398,040
Reserve for Contingency	32,790	59,010

The assessment rate recommended by the Board was derived by dividing anticipated assessment revenue needed by estimated shipments of California walnuts certified as merchantable. The 553,000 ton (inshell) estimate for merchantable shipments is an average of shipments during three prior years. Pursuant to § 984.51(b) of the order, this figure is converted to a merchantable kernelweight basis using a factor of 0.45 (553,000 tons × 2,000 pounds per ton × 0.45), which yields 497,700,000 kernelweight pounds. At \$0.0465 per pound, the new assessment rate should generate \$23,143,050 in assessment income, which is equal to estimated expenses.

Section 984.69 of the order authorizes the Board to carry over excess funds into subsequent marketing years as a reserve, provided that funds already in the reserve do not exceed approximately two years' budgeted expenses. Current reserve funds total \$9,827,284 and are well within that requirement.

The assessment rate established in this rule will continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Board or other available information.

Although this assessment rate will be effective for an indefinite period, the Board will continue to meet prior to or during each marketing year to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Board meetings are available from the Board or USDA. Board meetings are open to the public, and interested persons may express their views at these meetings. USDA will evaluate Board recommendations

and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Board's 2016–17 budget and those for subsequent marketing years would be reviewed and, as appropriate, approved by USDA.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 5,700 growers of California walnuts in the production area and approximately 90 handlers subject to regulation under the order. The Small Business Administration (SBA) defines small agricultural businesses as those having annual receipts of less than \$750,000, and small agricultural service firms are defined as those having annual receipts of less than \$7,500,000 (13 CFR 121.201).

According to USDA's National Agricultural Statistics Service's (NASS's) 2012 Census of Agriculture, approximately 86 percent of California's walnut farms were smaller than 100

acres. Further, NASS reports that the average yield for 2014 was 1.97 tons per acre, and the average price received for 2014 was \$3,230 per ton.

A 100-acre farm with an average yield of 1.97 tons per acre would therefore have been expected to produce about 197 tons of walnuts during the 2014–15 marketing year. At \$3,230 per ton, that farm's production would have had an approximate value of \$636,310. Since Census of Agriculture information indicates that the majority of California's walnut farms are smaller than 100 acres, it could be concluded that the majority of the growers had receipts of less than \$636,310 in 2014–15, which is well below the SBA threshold of \$750,000. Thus, the majority of California's walnut growers would be considered small growers according to SBA's definition.

According to information supplied by the Board, approximately two-thirds of California's walnut handlers shipped merchantable walnuts valued under \$7,500,000 during the 2014–15 marketing year and would, therefore, be considered small businesses according to the SBA definition.

This rule increases the assessment rate established for the Board and collected from handlers for the 2016–17 and subsequent marketing years from \$0.0379 to \$0.0465 per kernelweight pound of assessable walnuts. At its meeting on June 9, 2016, the Board unanimously recommended 2016–17 expenditures of \$23,143,050 and an assessment rate of \$0.0465 per kernelweight pound of assessable walnuts. The assessment rate of \$0.0465 is \$0.0086 higher than the 2015–16 rate. The quantity of assessable walnuts for the 2016–17 marketing year is estimated at 553,000 tons inshell weight, or

497,700,000 kernelweight pounds. Thus, the \$0.0465 rate should provide \$23,143,050 in assessment income, which is equal to the estimated expenses.

The increased assessment rate is due to continuing domestic marketing and promotion programs, as well as to increased personnel and committee expenses. The Board believes that California walnut sales can be improved in the domestic market through continued promotional activities. In addition, the Grades and Standards Committee and Production Research Committee have asked for additional funds in case the implementation of FSMA requires new methods or processes for growing, harvesting, and shipping walnuts.

The major expenses for the 2016–17 marketing year include: \$2,292,000 for employee expenses; \$206,000 for travel, Board expenses, and annual audit expenses; \$262,000 for office expenses; \$10,000 for controlled purchases; \$0 for the crop acreage survey; \$130,000 for the crop estimate; \$175,000 for the salary of the Production Research Director; \$1,800,000 for production research; \$75,000 for sustainability; \$800,000 for grades and standards research; \$18,398,040 for domestic market development projects; and \$59,010 for the contingency reserve.

In comparison, the major expenses for the 2015–16 marketing year included: \$1,846,500 for employee expenses; \$191,000 for travel, board expenses, and annual audit expenses; \$254,000 for office expenses; \$10,000 for controlled purchases; \$100,000 for the crop acreage survey; \$130,000 for the crop estimate; \$94,500 for the salary of the Production Research Director; \$1,700,000 for production research; \$75,000 for sustainability; \$600,000 for grades and standards research; \$18,478,440 for domestic market development projects; and \$32,790 for the contingency reserve.

The Board reviewed and unanimously recommended 2016–17 expenditures of \$23,143,050 at its meeting on June 9, 2016. Prior to arriving at this budget, the Board considered a recommendation from the Budget and Personnel Committee (Committee), which also reviewed the proposed budget. The Committee debated the relative value of the increased assessment rate, given the focus on domestic promotion programs. It also considered information from various other committees, who deliberated and formulated their own budgets of expenses and made their recommendations to the Committee. Those committees include the Market Development, Production Research, and Grades and Standards Committees.

The Budget and Personnel Committee considered alternative expenditure levels, such as reducing the proposed budgets recommended by the other committees and changing the funding for domestic marketing projects, as well as not increasing the assessment rate. The Committee ultimately decided that the proposed expenditures and assessment rate were reasonable and necessary to assist in improving domestic sales, maintaining staff continuity, and preparing for potential FSMA mandates. Thus, the Committee unanimously agreed to recommend the budget to the Board.

The assessment rate of \$0.0465 per kernelweight pound of assessable walnuts was derived by dividing anticipated assessment revenue needed by expected shipments of California walnuts certified as merchantable. Merchantable shipments for the year are estimated at 497,700,000 pounds. It was determined that \$23,143,050 in assessment income was needed, and assessment income will equal expenses of \$23,143,050.

Unexpended funds may be retained in a financial reserve, provided that funds in the financial reserve do not exceed approximately two years' budgeted expenses.

According to NASS, the season average grower prices for the years 2013 and 2014 were \$3,710 and \$3,230 per ton, respectively. These prices provide a range within which the 2016–17 season average price could fall. Dividing these average grower prices by 2,000 pounds per ton provides an inshell price per pound range of \$1.62 to \$1.86. Dividing these inshell per pound prices by the 0.45 conversion factor (inshell to kernelweight) established in the order yields a 2016–17 price range estimate of \$3.60 to \$4.13 per kernelweight pound of assessable walnuts.

To calculate the percentage of grower revenue represented by the assessment rate, the assessment rate of \$0.0465 per kernelweight pound is divided by the low and high estimates of the price range. The estimated assessment revenue for the 2016–17 marketing year as a percentage of total grower revenue will thus likely range between 1.13 and 1.29 percent.

This action increases the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. However, these costs are offset by the benefits derived by the operation of the marketing order. In addition, the Board's meeting was widely publicized throughout the California walnut industry, and all interested persons

were invited to attend the meeting and encouraged to participate in Board deliberations on all issues. Like all Board meetings, the June 9, 2016, meeting was a public meeting, and all entities, both large and small, were free to express views on this issue.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the order's information collection requirements have been previously approved by the Office of Management and Budget (OMB) and assigned OMB No. 0581–0178 (Vegetable and Specialty Crop Marketing Orders). No changes in those requirements as a result of this action are necessary. Should any changes become necessary, they would be submitted to OMB for approval.

This rule imposes no additional reporting or recordkeeping requirements on either small or large California walnut handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this action.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

A proposed rule concerning this action was published in the **Federal Register** on September 16, 2016 (FR 81 63718). Copies of the rule were provided to all walnut handlers, as well as to Board members. Finally, the proposal was made available through the internet by USDA and the Office of the Federal Register. A 30-day comment period, ending October 17, 2016, was provided for interested persons to respond to the proposal. Two comments were received: one supportive of the increase and the other questioning the impact of the rule on small businesses.

The commenter who questioned the increase noted that the budget for the 2016–17 marketing year contained not only funds to continue the expanded marketing programs but also to fund additional staff members hired to work alongside existing staff who are preparing to retire. The Board's goal is for the newly hired staff members to learn from the retiring employees so that minimal staff expertise is lost. While the commenter did not object to the practice, the commenter questioned why small California walnut handlers, who comprise the majority of walnut

handlers, have to bear the burden of the increased assessment rate.

As previously noted, assessments are minimal and uniform on all handlers. Thus, small handlers bear a proportional burden compared to larger handlers. The increase was recommended unanimously by the Board, which is made up of small and large growers, representing the entire California walnut industry. The Board made the unanimous recommendation based upon deliberations by four of its standing committees: the Market Development Committee, Production Research Committee, Grades and Standards Committee, and Budget and Personnel Committee. All four committees reviewed the proposed expenses and crop size, and considered alternative assessment rates. All of the committees recommended the increased assessment rate and determined that the budget was prudent, resulting in a unanimous recommendation from the Board.

Accordingly, no changes will be made to the rule as proposed, based on the comments received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/rules-regulations/moa/small-businesses>. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Board and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because handlers are already receiving 2016–17 crop walnuts from growers, the crop year began on September 1, 2016, and the assessment rate applies to all walnuts received during the 2016–17 and subsequent seasons. Further, handlers are aware of this rule, which was recommended at a public meeting. Also, a 30-day comment period was provided for in the proposed rule.

List of Subjects in 7 CFR Part 984

Marketing agreements, Nuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 984 is amended as follows:

PART 984—WALNUTS GROWN IN CALIFORNIA

■ 1. The authority citation for 7 CFR part 984 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Section 984.347 is revised to read as follows:

§ 984.347 Assessment rate.

On and after September 1, 2016, an assessment rate of \$0.0465 per kernelweight pound is established for California merchantable walnuts.

Dated: December 12, 2016.

Bruce Summers,

Associate Administrator, Agricultural Marketing Service.

RIN 1651–AA96

Definition of Form I–94 To Include Electronic Format

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: Final rule.

SUMMARY: This final rule adopts, without change, interim amendments to the Department of Homeland Security (DHS) regulations which were published in the **Federal Register** on March 27, 2013, as CBP Dec. No. 13–06. These amendments enabled DHS to transition the issuance of the Form I–94 (Arrival/Departure Record) to an automated process. In the automated process, DHS creates a Form I–94 in an electronic format based on passenger, passport and visa information DHS obtains electronically from air and sea carriers and the Department of State (DOS) as well as through the inspection process. This document addresses the comments received in response to the interim rule and discusses some operational modifications to the Form I–94 process that were implemented after publication of the interim rule.

DATES: This final rule is effective January 18, 2017.

Executive Summary

The Form I–94 (Arrival/Departure Record) is issued by DHS to certain nonimmigrant foreign nationals upon arrival in the United States or when they change status in the United States.

The Form I-94 is used to document arrival and departure and provides evidence of the terms of admission or parole. The Form I-94 is also used by individuals granted asylum in the United States as a proof of their grant of asylum and by refugees as proof of their refugee status. CBP, a component of DHS, generally issues the Form I-94 to nonimmigrants at the time they lawfully enter the United States. Nonimmigrant travelers use the Form I-94 for various purposes such as completing the Form I-9 to verify employment eligibility, applying for immigration benefits, or presenting to a university to verify eligibility for enrollment.

On March 27, 2013, CBP published an interim final rule (IFR) in the **Federal Register** (78 FR 18457) that added to the regulations a definition of “Form I-94” to allow the Form I-94 to be in either paper or electronic format. Prior to the effective date of the IFR, the Form I-94 was a paper form only. The IFR made necessary changes to the regulations to enable CBP to transition from only paper to allow for an electronic form. In the case of air and sea ports of entry, the regulation allowed CBP to transition to an automated process whereby CBP creates an electronic Form I-94 based on information collected via the Advance Passenger Information System (APIS) along with visa information transmitted to CBP by the Department of State. The automated process applies only to nonimmigrants arriving at air and sea ports of entry because APIS data is currently collected only for air and sea. The automation of the Form I-94 process for nonimmigrants arriving by air or sea eliminates duplicative information collections and saves time

and money for the traveling public, carriers, and CBP.

CBP makes the electronic Form I-94 available through a Web site. To access the Form I-94 through the Web site the traveler inputs information from his/her passport. If needed, nonimmigrants may print out a copy of the Form I-94 from the Web site and present it to third parties in lieu of the paper form. CBP continues to provide a paper Form I-94 to certain classes of aliens, such as asylees, certain parolees, and others upon request or whenever CBP determines the issuance of a paper form is appropriate.¹

This regulation also is consistent with CBP’s enhancements to the I-94 Web site to enable travelers arriving at a land port of entry to submit the Form I-94 information to CBP and pay the required fee prior to arrival. Unlike the automated process for air and sea where CBP creates an electronic Form I-94 based on information collected via APIS and other sources, this I-94 land border process enables travelers to provide the Form I-94 information to CBP electronically prior to arrival to facilitate the land border issuance process. The enhanced I-94 Web site launched on September 29, 2016.

DHS received eighteen submissions in response to the IFR. Most of these submissions contained comments providing support, voicing concerns, highlighting issues, or offering suggestions for modifications to the automation process. After review of the comments, CBP has decided to finalize the interim final rule without change. However, CBP has made some operational changes, primarily to the I-94 Web site, in response to the

comments. These changes, which are described in the comment responses, are intended to help travelers retrieve their Form I-94 information and travel history more easily.

CBP has completed an updated economic assessment analyzing the effects of the automation of the Form I-94. This rule affects CBP, air and sea carriers that transport foreign nationals to the United States, and the foreign nationals themselves. CBP will incur costs associated with linking its data systems and building and maintaining the I-94 Web site. CBP benefits through lower printing, storage, and contract costs. CBP estimated a net benefit of \$15.5 million for CBP in 2013. Carriers benefit as a result of lower printing and storage costs. CBP estimated a net benefit of \$1.3 million for carriers in 2013. Foreign nationals traveling to the United States incur opportunity costs associated with logging onto the Web site to access their electronic Form I-94, printing their Form I-94, and, for some travelers, the cost to drive to a location with internet access so they can access and print their electronic Form I-94. Foreign nationals benefit from a reduced opportunity cost associated with filling out a paper Form I-94 and reduced opportunity and fee costs associated with filing a Form I-102 to replace a lost Form I-94. CBP estimates a net benefit of between \$4141.1 million and \$6565.9 million in 2013 for foreign travelers. In total, CBP estimates that net benefits to all parties ranged from \$5757.9 million to \$8282.7 million in 2013. Net benefits to U.S. entities (carriers and CBP) totaled \$16.8 million in 2013. Net benefits are summarized in table ES-1 below.

EXHIBIT ES-1—NET BENEFITS

[Undiscounted 2012\$]*

	2012	2013	2014	2015	2016	2017

* Estimates may not total due to rounding.

¹ As of September 2015, CBP has automated the Form I-94 process for refugees. Refugees can now

access their Form I-94 from the I-94 Web site. CBP no longer provides a paper Form I-94 to refugees

unless one is requested or CBP determines that it is appropriate to issue one.

Background

The Form I-94

Prior to the implementation of the IFR, the Form I-94 was generally issued to foreign nationals at ports of entry (POEs) at the time they lawfully enter the United States. See 8 CFR 235.1(h). The Form I-94 is also issued when a foreign national changes immigration status within the United States. The Form I-94 is used to document status in the United States, the authorized length of stay, and departure. The Form I-94 collects biographical information, visa and passport information, and the address and phone number where the traveler can be reached while in the United States.

The Form I-94 has been used for approximately 50 years by DHS, its predecessor agencies, and external stakeholders for a variety of purposes. CBP and U.S. Immigration and Customs Enforcement (ICE), components of DHS, use the form to document arrival and departure, as well as class of admission or duration of parole. U.S. Citizenship and Immigration Services (USCIS), also a component of DHS, issues Forms I-94 to foreign nationals extending their authorized length of stay or changing their immigration status while in the United States and to individuals granted asylum or refugee status in the United States as proof of their grant of asylum or refugee status. USCIS also uses Form I-94 information to verify lawful admission or parole when adjudicating immigration benefit requests, confirming employment authorization for employers participating in USCIS's E-Verify program, or verifying immigration status for benefit granting state and federal government agencies participating in USCIS's Systematic Alien Verification for Entitlements (SAVE) program. The Form I-94 is also used by the Social Security Administration (SSA), state agencies, such as Departments of Motor Vehicles (DMV), and public assistance agencies and organizations, to verify eligibility for benefits. The form is used by certain foreign nationals for evidence of lawful admission or parole, as well as, where applicable, employment eligibility and eligibility for public benefits. For more complete information on the Form I-94, its uses, and the automation, please refer to the background section of the IFR.

Automation of the Form I-94 at Airports and Seaports

Nearly all of the traveler information collected on the Form I-94 is also collected by CBP in advance of the traveler's arrival via the Advance

Passenger Information System (APIS). Using information collected via APIS along with visa information transmitted to CBP by DOS, CBP is now able to generate Forms I-94 electronically, which reduces paperwork burdens for travelers and reduces costs for air and sea carriers and CBP.

On March 27, 2013, CBP published an IFR in the **Federal Register** (78 FR 18457) amending the DHS regulations to include new definitions at 8 CFR 1.4 for the term "Form I-94" and other terms when used in relation to the Form I-94. The IFR became effective on April 26, 2013, and on that date, CBP began the transition to an automated Form I-94 process whereby CBP creates an electronic Form I-94 for travelers arriving by air or sea based on the information in its databases. CBP continues to provide a paper Form I-94 to those who request such form, as well as to certain classes of aliens, such as asylees, certain parolees, and whenever CBP determines the issuance of a paper form is appropriate. For these individuals arriving by air and sea carriers, an electronic Form I-94 is also created.

Travelers are able to access and print their electronic Form I-94 via the Web site CBP has established for this purpose: www.cbp.gov/I94.² Travelers to whom an electronic Form I-94 has been issued may log on to the Web site using identifying information and print a copy of the electronic Form I-94. In order to access the Form I-94 from the Web site, the traveler is required to enter information from his or her passport; thus, a third party without access to the traveler's passport is not able to access the Form I-94 from the Web site. The printout from the Web site is the equivalent of the departure portion of the paper form and contains the same information as the departure portion of the paper form. CBP continues to stamp the traveler's passport at the time of inspection and will annotate the stamp with the class of admission or parole and duration of admission or parole.

Enhanced Form I-94 Land Border Process

In addition to the automation of the Form I-94 at air and sea ports of entry, on September 29, 2016, CBP modified the process by which a traveler arriving at the land border can provide Form I-94 information and pay the related fee by adding an electronic option. Specifically, CBP enhanced the I-94 Web site to enable travelers arriving at a land port of entry to submit the Form

I-94 information to CBP and pay the required fee prior to arrival. CBP expects that these enhancements will result in time savings to travelers who choose this option.

Before September 29, 2016, when a traveler requiring a Form I-94 arrived at the land border, he/she provided the I-94 information to a CBP officer who input the data into a CBP computer system. After determining the traveler's admissibility, the CBP officer printed a Form I-94A³ for the traveler and referred him/her to the cashier to pay the \$6 fee.⁴

Under the new process, a traveler who requires an I-94 and intends to enter the United States at a land port of entry will have the option to either follow the above process or to apply for an I-94 and pay the \$6 fee up to seven days in advance of arrival. Using the I-94 Web site, the traveler enters all of the necessary data for I-94 processing that would be collected by CBP at the port of entry. Upon paying the fee, the traveler will receive a "provisional I-94". This "provisional I-94" will become effective after the traveler presents it to a CBP officer at a land port of entry and completes the issuance process with a CBP officer. If the "provisional I-94" is not processed within 7 days of submitting the application, it will expire and the fee will be forfeited.

The I-94 Web site will instruct the traveler to appear at the land port of entry for an interview and biometric collection. When the traveler arrives at the port of entry, he/she completes the issuance process with a CBP officer. The CBP officer will locate the traveler's information by swiping the traveler's passport or other travel document in CBP's database. This will verify that the fee was paid and pre-populate the data fields from the document swipe and the information provided by the traveler in the Web site. If the CBP officer determines that the traveler is admissible, the CBP officer will print out a Form I-94A to give to the traveler.

Discussion of Comments

Overview

Although CBP promulgated the IFR without first soliciting public comment, CBP provided a thirty-day post-promulgation comment period soliciting public comments that CBP would consider before adopting the interim regulations as final. CBP received

³ The Form I-94A is the version of the Form I-94 that CBP issues at land ports of entry.

⁴ The amount of fee for the issuance of the Form I-94 at a land border port of entry is provided for in 8 CFR 103.7(b)(1)(ii)(D).

² The direct link is: <https://i94.cbp.dhs.gov/I94/request.html>.

eighteen submissions in response to the IFR. Commenters included individuals, the American Immigration Lawyers Association (AILA), the American Council on International Personnel (ACIP), the Society for Human Resource Management (SHRM), Feld Entertainment, Inc., the Intel Corporation, NAFSA: Association of International Educators (NAFSA), and the Airports Council International-North America (ACI-NA). Many commenters raised multiple issues, and several issues were raised by numerous commenters. Of the eighteen submissions, most included comments seeking clarification of specific issues, highlighting concerns or issues with the Form I-94 automation, or offering solutions to issues or alternatives. Several of the operational issues raised by commenters have already been addressed by CBP, which our responses reflect. CBP has grouped the issues by topic and provides responses below.

Benefits of Automation

Comment: Many commenters were supportive of the change to an electronic Form I-94, saying that it will provide increased efficiency for passengers, airlines, and CBP. Commenters said that no longer requiring passengers to fill out the paper form on the plane while en route to the United States would not only save passengers time, but would also save air carriers time and money and would free up airline staff to perform other duties. Commenters also anticipated reduced wait times at the POEs, and increased officer efficiency.

Response: CBP appreciates this feedback and agrees that the automation of the Form I-94 benefits the traveling public, air and sea carriers, and CBP.

Comment: One commenter requested that the Form I-94 be automated for the land ports as well as air and sea, as this will help reduce wait times and improve commerce at the land border.

Response: CBP agrees that automating the Form I-94 at land POEs would provide benefits to travelers and is exploring expanding automation to include land border POEs. However, the electronic Form I-94 relies in large part on information collected via APIS, and APIS data is currently collected only for air and sea. Therefore, CBP cannot fully automate the Form I-94 process at land border POE's at this time. CBP's enhanced Form I-94 land border process, however, is expected to increase the efficiency of the entry process and reduce administrative duties for CBP officers, ultimately resulting in shorter wait times for travelers requiring a Form I-94.

Regulatory Amendments

Comment: One commenter requested that the Form I-94 printout from the I-94 Web site be added to the list of evidence of registration for purposes of Immigration and Nationality Act (INA) section 264(e).

Response: The list of acceptable registration documents for purposes of INA 264(e) is found in 8 CFR 264.1(b). The Form I-94, Arrival-Departure Record, is already included in the list of evidence of registration in 8 CFR 264.1(b). The IFR added a new provision to the regulations to define "Form I-94" and related terms. The new definition makes clear that the Form I-94 now includes information collected electronically, and also defines "original Form I-94" to include the printout from the I-94 Web site. Due to the new definition provided for the Form I-94, CBP believes it is clear that the printout constitutes evidence of registration and no further change is needed.

Comment: One commenter requested that the definition of "original document" in 8 CFR 274a.2(b)(1)(v) be amended to include a Form I-94 printout.

Response: CBP believes that the definition of "original Form I-94" included in the IFR accomplishes the desired result, and, therefore, it is not necessary to amend 8 CFR 274a.2(b)(1)(v). That definition provides that the term "original Form I-94" includes, but is not limited to, any printout or electronic transmission of information from DHS systems containing the electronic record of admission or arrival/departure. See 8 CFR 1.4(d). 8 CFR 274a.2 concerns the Form I-9, which is a USCIS form. USCIS agrees that a printout of the Form I-94 from the Web site constitutes an "original document" under this regulation.

Comment: One commenter, NAFSA, requested that paragraph (e) of section 1.4 be amended to add "or electronic transmission" after the word "printout." The commenter states that the revision would clarify that a traveler may present an electronic version of the Form I-94, such as a PDF or image scan.

Response: CBP believes that such amendment is unnecessary and could cause confusion as to what can be presented or submitted in various situations. For example, at this time, a printout of the Form I-94 is still necessary in a number of situations, including the completion of the USCIS Form I-9. However, the current definition specifically states that the terms in question "are not limited to" providing a printout, and thus, could be

applied more broadly as appropriate by stakeholders. Although CBP is hopeful that the Form I-94 in electronic form will be accepted in the future by all stakeholders to whom these regulations apply and that a printout will not always be required, that is not the case now.

Administrative Procedure Act

Comment: One commenter, Feld Entertainment, Inc., disagreed that the rulemaking is procedural. The commenter states that because the rule was promulgated without prior notice and comment, it violates the Administrative Procedure Act (APA). The commenter was also concerned that the comments received in response to the IFR would be disregarded.

Response: The IFR enabled CBP to transition to an automated process whereby CBP creates a Form I-94 in an electronic format. CBP has not changed the substantive regulations relating to the Form I-94, but only the operational means by which CBP issues the form. Thus, the rule is a procedural rule exempt from prior notice-and-comment requirements under the APA. CBP already has adopted a number of the commenters' operational suggestions, which are described in many of the responses below. Many of the commenters' questions have been addressed on the FAQs page of the I-94 Web site for easy reference.

Web Site and Printouts

Comment: One commenter noted that the Web site option is helpful for those who lose or misplace their Forms I-94, or when the paper form becomes so worn that it is no longer accepted by agencies.

Response: CBP appreciates this feedback, and agrees that the Web site makes it easier for travelers to obtain copies of their Forms I-94 when necessary. Since the implementation of the Form I-94 automation, CBP has expanded the Web site to provide additional benefits, including allowing nonimmigrants to access their five-year travel history.

Comment: A few commenters requested that the Web site be updated to reflect changes in status granted by USCIS. Commenters said that, if this is done, nonimmigrants who have had a change of status will not have to file a Form I-102 for a replacement Form I-94 if needed.

Response: CBP agrees that providing this information through the Web site would be helpful and would reduce the number of Forms I-102 that would be filed. The Form I-102 is the USCIS form

nonimmigrants use to apply for a new or replacement Form I-94. Adding information about changes of status granted by USCIS to the Web site is not currently possible. However, CBP is looking into whether USCIS information can be reliably added to the Web site in the future. Any updates on this issue will be included in the FAQs page of the I-94 Web site.

Comment: A few commenters, including AILA, disagreed with the assumption in the economic analysis that B-1/B-2 visa holders would not access the Web site. Commenters said that these visa holders, especially those in the United States for at least six months, would have reason to obtain their Form I-94 records or may wish to obtain a record of their admission for future use.

Response: CBP agrees that some B-1/B-2 visa holders, including those who are given a year to stay as a B-1/B-2 visa holder, may have a need to access the I-94 Web site. Accordingly, CBP has revised the assumption in the economic analysis. Based on Web site query history since the interim rule went into effect, we now assume that one percent of B-1/B-2 visa holders will access the I-94 Web site. In addition, CBP agrees that some travelers may wish to obtain a record of their admission for future use. CBP has made changes to the I-94 Web site to allow travelers to access their most recent Form I-94 record as well as a five-year travel history. This can now be accessed by travelers who have already left the United States in addition to those present in the United States.

Comment: Some commenters noted that CBP is assuming all travelers will have access to a printer. The commenters stated that it is not as easy as CBP assumes for a foreign national to access public libraries soon after arrival in the United States. They would have to learn that public libraries offer internet, that one can print from them, that there is a library nearby, that public transportation is available, how to navigate public transportation, and explain what library resources are needed.

One commenter, the Intel Corporation, was concerned that employees would not be able to access the Web site before they must start work in the United States, which is problematic because the Form I-94 is required to complete the Form I-9. The commenter stated that it has a company policy to complete the Form I-9 during new employee orientation, which requires the employee to have his or her Form I-94 in hand. The company does not allow new hires access to company

computers until after the new employee orientation, and due to data privacy protection protocol, the company cannot allow employees to access Personally Identifiable Information (PII) on a computer assigned to someone else. The commenter suggests CBP provide a way for the employer to access the new hire's Form I-94 number directly.

Several commenters suggested that CBP print a copy of the departure portion for the traveler and include instructions on how to print more copies, or alternatively, that CBP provide kiosks at the airports where foreign nationals can inspect and print the Form I-94.

Response: CBP recognizes that access to the internet and printers is a barrier to many travelers who need their electronic Form I-94, including those who need to present their Form I-94 when completing the Form I-9. For this reason employers, or third parties, may access Form I-94 records when consent is obtained from the record holder. For more information on third party consent visit: <https://i94.cbp.dhs.gov/I94/request.html>.

In the regulatory assessment for the interim final rule, CBP discussed the difficulties some foreign nationals face when they need to access the I-94 Web site to print their electronic Form I-94. The analysis estimated that approximately 1,028,876 travelers would need to drive 20 miles and that it would take 60 minutes of a traveler's time to access and print their electronic Form I-94. CBP estimated that this cost aliens about \$21 million in 2013. We have updated these estimates for this final rule in the economic assessment. For more information, see the below section entitled *Executive Order 12866 (Regulatory Planning and Review) and Executive Order 13563 (Improving Regulation and Regulatory Review)*. CBP now estimates that it cost \$17 million in 2014 (the first full year the rule is in effect). CBP acknowledges that this represents a significant negative impact to these travelers and strives to minimize this burden to the extent possible. To that end, CBP continues to provide paper Forms I-94 upon request when the individual arrives in the United States at the port's secondary inspection station and at Deferred Inspection Sites (DISs) once the traveler is in the United States.

CBP recognizes the potential usefulness of placing kiosks at ports where foreign nationals could inspect and print their Forms I-94 and has evaluated the merits of placing such kiosks at the busiest 20 airports and the busiest 20 seaports. Based on this analysis, for travelers' benefits to exceed

the kiosks costs, greater than one percent of the subset of travelers who would otherwise need to travel to access and print their electronic Form I-94 would instead need to use a kiosk. Based on the few travelers who currently request paper Forms I-94, CBP does not believe there are enough foreign nationals who would take advantage of the kiosks to offset CBP's costs of installing them. In addition, due to budget constraints, CBP does not have the funds to acquire these kiosks at this time. See the *Regulatory Alternatives* section of the economic assessment below for more information.

Comment: One commenter had concerns about what a traveler would do if he or she loses his or her passport and cannot access the necessary information to retrieve the Form I-94 from the Web site.

Response: CBP believes that making the Form I-94 available on the Web site will not put travelers who lose their passports in a worse position than they were in prior to the automation of the Form I-94. Paper Forms I-94 were typically stored or stapled into a traveler's passport; thus, prior to automation, loss of a passport would have required the traveler to obtain a new Form I-94 as well. With automation, if the traveler loses his or her passport, but has the passport information documented elsewhere, he or she will be able to obtain the Form I-94 from the Web site. CBP has made various updates to the I-94 Web site to address some of the comments. One of these updates is that a traveler no longer needs to enter the date and class of admission, which will make accessing the Form I-94 record easier for travelers.

Comment: Many commenters encouraged CBP to make archival records of Form I-94 records available indefinitely, as this will reduce the administrative burden placed on CBP to respond to Freedom of Information Act (FOIA) requests.

Response: CBP has made changes to the I-94 Web site to allow travelers to access their most recent Form I-94 record, even if the traveler has already departed the United States. Although CBP is not able to make the Form I-94 records available on the Web site indefinitely, CBP has updated the Web site so that Form I-94 records are available dating back five years. The Web site also now allows travelers to request their five-year U.S. border crossing history. Travelers frequently request their five-year travel history from DHS, as this history is often required when they apply for certain benefits. CBP agrees that providing this information through the Web site will

help reduce FOIA requests regarding travel history. More details about the benefits CBP anticipates from this change can be found in the economic assessment below, entitled “*Executive Order 12866 (Regulatory Planning and Review) and Executive Order 13563 (Improving Regulation and Regulatory Review)*.”

Comment: One commenter asked whether nonimmigrants who received paper Forms I–94 would be able to get replacements from the Web site.

Response: The Web site now provides access to Forms I–94 issued up to five years prior to the query date. Currently, nonimmigrants who have received paper Forms I–94 since 2009 are able to access their Form I–94 information via the Web site.

Comment: Several commenters were concerned that foreign nationals may not be able to access their records on the Web site due to typographical or biographical errors that occur during the creation of the electronic Form I–94 record. In particular, a few commenters noted that information is frequently entered incorrectly on visas, especially incorrect name spellings. Information drawn from visas would then be incorrect, and travelers would not be successful when querying their Form I–94 record.

Response: Most of the biographical information CBP uses in creating the electronic Form I–94 is drawn from the traveler’s passport. The only information drawn from the visa for the Form I–94 is the visa classification and issuance date. The exact format of the name used in the electronic Form I–94 is found in the Machine Readable Zone (MRZ) of the passport, found at the bottom of the biographical page of the passport. A traveler having trouble finding his or her Form I–94 record should look at the way his or her name is formatted in the passport MRZ. The MRZ shows the traveler’s name immediately following the three letter country code, as last/surname and given name separated by chevrons (<<<<). A traveler should not include the country code when querying his or her Form I–94 record. The MRZ does not use punctuation such as hyphens or apostrophes. In some cases, a traveler’s name might be truncated in the MRZ; in such cases, the traveler should query the truncated version of the name. CBP has included guidance on this issue on the FAQs page of the I–94 Web site, along with an example passport page for reference.

Comment: A few commenters requested that CBP ensure that the Web site is accessible on a variety of platforms and browsers, including

mobile devices. Commenters also requested that both www.cbp.gov/I-94 and www.cbp.gov/I-94 [note the hyphen in I–94] direct users to the proper Web site.

Response: Although CBP does not have the resources to conduct testing on multiple platforms, CBP has not received any feedback concerning a lack of functionality on any platform. Due to updates that CBP has made to www.cbp.gov as a whole, the full address for the Form I–94 retrieval Web site is now: <https://i94.cbp.dhs.gov/I-94/request.html>. Both web addresses www.cbp.gov/I-94 and www.cbp.gov/I-94 direct users to a Web site with information about the Form I–94, and includes a link to the Form I–94 retrieval page.

Comment: Several commenters, including AILA, ACIP, SHRM, and Feld Entertainment, suggested adding an endorsement or other information on the printout to help educate those stakeholders who are not accustomed to seeing Form I–94 printouts from the Web site, and might be reluctant to accept the printout. Some commenters also suggested including a phone number or email address on the printout.

Response: CBP agrees that additional language on the printout would help educate stakeholders, and has added language to the printout indicating that the Form I–94 has now been automated for most nonimmigrants. While CBP has decided not to add a phone number or email to the printout, there is a link on the I–94 retrieval Web site that directs users to the CBP help desk.

Comment: A few commenters stated that it was unclear how CBP would prevent fraudulent printouts.

Response: CBP does not believe that the printout creates a greater risk of fraud than the paper Forms I–94, which did not contain any security features. CBP continues to encourage stakeholders to verify a traveler’s information through SAVE or E-Verify, when registered or enrolled, respectively, in these services, and only as authorized.

The SAVE program is a USCIS service that helps federal, state, and local benefit-issuing agencies, institutions, and licensing agencies determine the immigration status of benefit applicants so only those entitled to benefits receive them. More information on SAVE can be found at: <http://www.uscis.gov/save>.

E-Verify is a web-based system that allows businesses to confirm the eligibility of their employees to work in the United States. More information on E-Verify can be found at: <http://www.uscis.gov/e-verify>.

Comment: A few commenters had privacy concerns related to the Web site. One commenter was concerned that CBP will automatically collect information on those persons attempting to access the Form I–94 information from the Web site. Another commenter was concerned that the personal information available on the Web site could be accessed by unauthorized parties, which put refugees or those seeking asylum in the United States at risk.

Response: DHS/CBP has issued a Privacy Impact Assessment (PIA), which describes the I–94 Web site, and posted it online at: <https://www.dhs.gov/sites/default/files/publications/privacy/PIAs/pia-cbp-16-I-94-automation-20130227.pdf>. DHS/CBP has also updated and reissued the System of Records Notice (SORN) for the Nonimmigrant and Immigrant Information System (NIIS) at 80 FR 13398, a system for maintaining the arrival and departure records of nonimmigrants, and for APIS at 80 FR 13407. CBP is in the process of updating the PIA, which will discuss how the I–94 Web site will retain information about attempts to access the I–94 Web site (*i.e.* the search history) for only three months and as part of the Web site’s audit log. The search history, as part of the audit log, is part of the Web site’s infrastructure. The audit log is only maintained in the Web site’s infrastructure, and the search history is retained for only three months, to reduce the risk of improper use or disclosure of the search history. The benefits of keeping an audit log of searches conducted on the I–94 Web site include preventing improper and unauthorized use of the Web site, and holding accountable anyone who uses the I–94 Web site improperly or without authorization.

CBP believes that the benefits of having an audit log outweigh the small and limited risks of improper use and disclosure of search histories. The log of search histories allows CBP to conduct audits and uncover when an unauthorized party is attempting to obtain information from the I–94 Web site. For example, if a single access point conducts multiple searches for different individuals, CBP will investigate whether someone or something is conducting searches without the travelers’ consent. CBP has included a new security consent page to the Form I–94 retrieval Web site that users must read and accept before querying an Form I–94 record. The security page requires users to affirm that they are authorized to obtain that traveler’s history, and to understand

that unauthorized or improper use could result in criminal and civil penalties. With respect to information pertaining to persons whose asylee status is prohibited from public disclosure pursuant to 8 CFR 208.6, CBP is taking the added precaution of requiring asylees to manually submit verifiable identity information before they may access their Form I-94 information. Asylees will continue to receive a paper Form I-94. Refugees and certain parolees may access their Form I-94 via the Web site.

Automatic Revalidation

Comment: Numerous commenters were concerned about how the automation of the Form I-94 would affect automatic revalidation.⁵ Commenters noted that nonimmigrants seeking to use the automatic revalidation provisions will have to demonstrate to carriers that they are legally allowed to board the plane or vessel with an expired visa and a passport stamp that reflects a change or extension of status. Thus, commenters encourage CBP to require air and sea carriers to provide instructions to their personnel regarding the documentation for such persons.

Specifically, commenters suggested that CBP officers would need to override a nonimmigrant's automated departure record when a nonimmigrant seeks readmission under 22 CFR 41.112(d). Commenters also recommended that CBP emphasize in training that CBP officers will be expected to reactivate previously closed Form I-94 records for automatic revalidation.

Commenters were concerned that admission errors are common in automatic revalidation and that nonimmigrants without a paper Form I-94 may experience challenges during the inspection process. Commenters additionally noted that for nonimmigrants to print Forms I-94 to retain in the event they go to Canada or Mexico and wish to use the automatic revalidation provisions upon return to the United States would be very burdensome on those with limited internet and printing capabilities.

Response: The IFR expanded the definition of a Form I-94 to include electronic means. It did not change the requirements for the issuance and use of

the Form I-94. Automatic revalidation requirements are outlined in 8 CFR 214.1(b) and 22 CFR 41.112(d). Under the automatic revalidation provisions, certain temporary visitors holding expired nonimmigrant visas who seek to return to the United States may be admitted at a U.S. port of entry by CBP if they meet certain requirements including, but not limited to certain nonimmigrants with a valid, unexpired admission stamp on the Form I-94 or an electronic Form I-94. CBP maintains the electronic Form I-94 record in CBP systems and will use the electronic format to revalidate a previous, unexpired admission or extension of stay if all other revalidation requirements are met.

CBP has provided guidance to CBP officers at POEs regarding automatic revalidation. The primary processing system allows a CBP officer to re-use an existing Form I-94 when automatic revalidation requirements are met. CBP has also conducted outreach with the travel industry about the new documentary requirements. CBP has updated the Carrier Information Guide to assist carriers in recognizing acceptable documents and to ensure that carriers are informed of the Form I-94 automation. The Carrier Information Guide now includes an example of the electronic Form I-94 Web site printout and guidance to carriers on automatic revalidation.

An air carrier or vessel may require evidence of an unexpired admission by a traveler prior to embarkation. The Form I-94 Web site printout is evidence of that admission and can be presented to a carrier if requested. CBP has made changes to the I-94 Web site to allow travelers to access their Form I-94 records after departure. This allows travelers who have already departed the United States, but who may need the printout for automatic revalidation purposes to obtain the printout to present to a carrier.

CBP has included guidance on automatic revalidation in the FAQs on the I-94 Web site.

Departure

Comment: Some commenters stated that it was unclear what procedures were to be followed at the time of departure. Commenters were particularly concerned about the procedures that should be followed in the case of a nonimmigrant arriving by air or sea but departing by land. The commenters were concerned that CBP's database would record the arrival information, but would not record the departure, which could create difficulties for nonimmigrants seeking

to travel to the United States in the future. Commenters wanted to know whether nonimmigrants departing by land have any affirmative duties to ensure that departures by land are recorded correctly.

Response: CBP has added information concerning departure by land to the FAQs page of the I-94 Web site. CBP and the Canadian Border Services Agency (CBSA) have partnered to create an entry/exit system that exchanges entry information at land border ports of entry for certain individuals. Information collected on entry to one country is shared in order to electronically record as exit from the other. Thus, entry into Canada from the United States now creates a departure record for the United States.

CBP does not currently have a system for automatically recording departures by land to Mexico. If a traveler departs the United States by land to Mexico, the traveler may wish to retain evidence of departure to Mexico. Evidence of departure can include, but is not limited to, entry stamps in a passport, transportation tickets, pay stubs and/or other receipts. A traveler can request an entry stamp from the Instituto Nacional de Migración (INM) when entering Mexico. CBP is not, however, placing any affirmative duty on the travelers to carry such evidence.

Travelers departing the United States by air or sea will have their departures recorded automatically when the air or sea carrier sends CBP departure manifests.

Comment: One commenter was concerned that airlines do not always timely update their departure manifests when travelers cancel and rebook flights. Where CBP relies on carrier data, CBP might document inaccurate departure data, which could result in denial of benefits. The traveler would have no means to seek redress.

Response: APIS reports whether a person is "on board" or "not on board" in order to accurately reflect changes in reservations. CBP relies on confirmed departure information, and has updated the I-94 Web site to ensure that only confirmed departures are reflected. DHS is able to independently verify departures through DHS law enforcement databases, and overstay records are reviewed before any adverse action is taken.⁶

⁵ Automatic revalidation allows certain persons to seek readmission to the United States for the duration of an unexpired period of a previous admission. Pursuant to 8 CFR 214.1 and 22 CFR 41.112, automatic revalidation allows readmittance of certain aliens who have been out of the United States for thirty days or less in a contiguous territory and who have an unexpired nonimmigrant visa.

⁶ According to confirmation studies conducted by CBP and outside studies conducted by contractors and GAO, CBP estimates that 99% of APIS departure data is accurate. CBP also confirms departure data independently by using information travelers send from outside the U.S., visa information from the State Department, or subsequent arrival data.

The DHS TRIP program is an established means for a traveler to inquire to seek resolution to any difficulties experienced during travel into or departure from the United States. A traveler can submit evidence of a timely departure in DHS TRIP. If a traveler believes that CBP maintains incorrect departure information, the traveler can apply for redress at <http://www.dhs.gov/dhs-trip>.

Visa Classification

Comment: A number of commenters requested clarification on how visa classification data will populate an automated Form I-94 when a nonimmigrant has more than one visa.

Response: CBP receives visa information from DOS. There may be instances where a traveler has multiple eligible visa classifications. In these cases, the CBP officer determines at the time of entry which visa classification the traveler qualifies for and admits the traveler under that class of admission. The electronic Form I-94 record will reflect the class of admission chosen by the CBP officer at the time of entry. This process is substantially the same as the process followed during issuance of a paper Form I-94.

Comment: Commenters asked how nonimmigrants seeking to enter the United States from Visa Waiver Program (VWP) countries would be handled in view of the Form I-94 automation.

Response: Travelers entering the United States under the VWP used to receive a Form I-94W, which is different than the Form I-94. The Form I-94W was automated by the Electronic System for Traveler Authorization (ESTA) in August 2010. VWP visitors no longer receive a Form I-94W when arriving in the United States by air or sea, but rather must apply for and receive an ESTA prior to travel to the United States. For further information about ESTA, see 8 CFR 217.5 and www.cbp.gov/esta/. Upon arrival in the United States, VWP visitors receive an annotated stamp in their passports. This process is not affected by the automation of the Form I-94.

Errors and CBP Officer Training

Comment: A few commenters were concerned that frequently there are errors in admission records due to CBP officer error or misapplication of periods of stay for the various nonimmigrant visa categories. Commenters believe that more training is necessary for CBP officers on visa categories, automatic revalidation, and creation of the automated Form I-94.

Response: CBP officers are trained in all aspects of the inspection process.

CBP conducts ongoing training in the form of field guidance, musters, on-the-job training, and online training modules. CBP has provided field guidance and musters to CBP officers at the Ports of Entry (POEs) regarding the Form I-94 automation process. CBP has issued additional guidance to CBP officers to help the officers properly create the electronic Form I-94. CBP continues to instruct officers to verify information and make any needed corrections prior to creating the electronic Form I-94.

Comment: Some commenters were concerned that the regulations do not require CBP to stamp the passport, and state that CBP does not currently stamp passports consistently. Thus, there is no way for some travelers to review their admission information at the time of entry.

Response: It is CBP's policy to stamp the passport of visitors to the United States, or provide them a receipt, as in the case of Global Entry members.⁷ CBP has provided extensive guidance and training to CBP officers at POEs regarding the documentation of a lawful admission into the United States with a CBP admission stamp. CBP will continue to provide guidance and training to CBP officers at the POEs to ensure that officers are stamping passports consistently. CBP notes, however, that a traveler will be able to find his or her admission record on the I-94 retrieval Web site regardless of whether the passport contains an admission stamp.

Comment: Some commenters noted that variations on naming conventions and other data occur in travel documents and records. These commenters stated that there are often variations due to inconsistent rules for transliterating non-Latin alphabets, and inconsistent rules for non-standard characters or naming conventions. The systems must be configured so that travelers are not harmed by variations in names and systems. Commenters prefer that CBP use information from the biographical page of the passport rather than information from the visa, as the visa name is often incorrect. The commenters indicated that DOS naming conventions are often not compatible with the conventions of other agencies. In particular, the First Name Unknown (FNU) or Last Name Unknown (LNU) designations create problems for nonimmigrants when the U.S. visa is

used as the primary source for an official name.

Response: CBP has met with USCIS, DOS, and representatives from ICE's Student and Exchange Visitor Program (SEVP) to discuss naming conventions and to attempt to resolve inconsistencies. Currently, CBP creates the Form I-94 admission record using the name found in the MRZ of the passport, not the visa. APIS and CBP use standard International Civil Aviation Organization (ICAO) naming conventions. CBP will use FNU or LNU only when a traveler does not have both a given and surname.

Comment: A few commenters suggested that CBP establish additional resources to help address questions and correct errors. Specific suggestions included creating an ombudsman for the electronic Form I-94, creating a Web site with guidance, and establishing dedicated help lines and email addresses for use by travelers, employers, and other government agencies. Commenters were concerned that there was not a mechanism established for correcting errors in the electronic records and no access to the Web site at the time of entry into the United States.

Response: Although CBP does not have the resources to create a dedicated helpline or ombudsman, CBP has included additional guidance on the I-94 Web site under the FAQs tab. Travelers can check the passport admission stamp obtained at the time of entry into the United States to verify the correct date and class of admission, and ask the CBP officer to make corrections if needed.

CBP will correct any errors in Form I-94 records that originated with CBP at CBP's Deferred Inspection Sites (DISs). DISs, located at most major airports, will provide assistance to travelers requiring Form I-94 corrections or modifications. In many cases, corrections can be completed through a telephone call to a DIS. However, in some cases, the traveler may be required to appear in person in order to verify identity or to provide additional documentation to CBP. CBP has provided guidance and training to the CBP officers at the DISs about Form I-94 corrections. A list of all DISs can be found at <http://www.cbp.gov/document/forms/deferred-inspection-sites>.

Travelers may also visit the CBP INFO Center at <https://help.cbp.gov> for assistance. The INFO Center has staff dedicated to responding to Form I-94 issues. CBP has included a link to the CBP INFO Center on the Form I-94 retrieval Web site.

⁷ Nonimmigrant Global Entry members receive a printed Form I-94 from the Global Entry kiosk, and can also retrieve the Form I-94 from the I-94 Web site.

Coordination With Other Agencies

Comment: Some commenters complained of disparate guidance from various government agencies concerning the automated Form I-94. For example, some commenters stated that the SSA published guidance indicating that either an unexpired admission stamp or a printout from the Form I-94 Web site will be accepted as proof of nonimmigrant status. USCIS, however, has published guidance on its Web site stating that USCIS and state DMVs will require a printout of the Form I-94. Further, one commenter noted that at least one DMV office still required a stamp on the Form I-94 and had not heard of the change to the automated Form I-94.

Response: CBP has conducted extensive outreach to other agencies and to DMVs regarding the automation of the Form I-94. The requirements of various federal and state agencies may differ for practical or legal reasons, resulting in some agencies being able to accept the admission stamp while others may still require a printout of the Form I-94. Per commenters' suggestions, CBP has added the following language on the Form I-94 printout to aid in educating stakeholders not familiar with the electronic Form I-94:

Effective April 26, 2013, DHS began automating the admission process. An alien lawfully admitted or paroled into the United States is no longer required to be in possession of a preprinted Form I-94. A record of admission printed from the CBP Web site constitutes a lawful record of admission. See 8 CFR 1.4(d).

Comment: Some commenters had particular concerns about completing USCIS's Form I-9, as that form requests the Form I-94 number. Commenters suggested that either the period of admission or the passport number and country of issuance serve as the required data fields on the Form I-9. Otherwise, workers without internet access will have trouble completing the Form I-9.

Response: USCIS, the owner of the Form I-9 (Employment Eligibility Verification), is reviewing its forms and applicable regulations and policies, but at this time, it is not able to change the required information on Section 1 of the Form I-9. For completion of Section 2 of Form I-9, employees who are aliens authorized for employment with a specific employer incident to their nonimmigrant status may choose to present their foreign passport together with Form I-94 in paper format (which includes a printout from the Web site); admission stamps are not acceptable for

Form I-9 purposes. Refugees and asylees may also choose to present Forms I-94 for completion of Section 2 and Section 3 of the Form I-9, although they also have the option to present other documents instead. Refugees may choose to present a Form I-94 printout or a paper Form I-94 with a refugee stamp as an acceptable receipt for Form I-9 purposes that does not need to be paired with any other document. Asylees who wish to show a Form I-94 may present their paper Form I-94 as a List C document in combination with a valid List B document.

Comment: A few commenters, including AILA and the Intel Corporation, were concerned that inconsistent rules regarding when a Form I-94 printout is acceptable will materially affect foreign nationals' access to employment and benefits, such as Social Security cards, driver's licenses and extensions or changes of nonimmigrant status. Commenters also said that inconsistent rules could adversely affect U.S. businesses; for example, if DHS continues to require printouts bearing an admission number, employers could be fined by DHS for failure to record this number on the Form I-9. A delay or grace period in any enforcement actions related to the I-9 regarding the entry of admission numbers is encouraged.

Response: The requirements to record document numbers on Section 2 of the Form I-9 have not changed. DHS regulations require employers to record the necessary information from documents the employee presents to complete Form I-9 within three days from the date of hire. Section 1 of Form I-9 requires employees who attest to being aliens authorized to work in the United States to record either their alien number (or USCIS number) or Form I-94 admission number. Section 1 of Form I-9 must be completed by the employee at the time of hire (*i.e.*, first day of work for pay). The Form I-94 number can be found on the Form I-94 printout; there is no requirement that the number must come from the Form I-94 itself. The timing requirements for Form I-9 completion are regulatory. DHS may provide more flexibility in the timing requirements in a future rulemaking.

Employees are still required to present documents of their choice from the Lists of Acceptable Documents specified in the Form I-9 to show identity and employment authorization on Form I-9. To satisfy 8 CFR 274a.2, original documents must be presented to employers, which employers must examine to make a determination regarding whether the documents appear to be genuine and to reasonably

relate to the person presenting them. According to USCIS, which issues the Form I-9, if an employee chooses to present a Form I-94 along with their foreign passport to show identity and employment authorization in Section 2 of the Form I-9, he or she will need to present to his or her employer a Form I-94 in paper format, which includes a Form I-94 printed out from the CBP Web site. If an employee provides the Form I-94 he or she obtained from the CBP Web site with his or her foreign passport as a List A document, the employer should accept these documents if they appear to be genuine and reasonably relate to the person presenting them. Form I-9 rules permit employees to present certain receipts in lieu of the original document(s): 1. A receipt for a replacement of a lost, stolen, or damaged document; 2. the arrival portion of the Form I-94 or Form I-94A containing a Temporary I-551 stamp and photograph; and 3. the departure portion of Form I-94 or I-94A with an unexpired refugee admission stamp. 8 CFR 274a.2(b). USCIS has determined that a Form I-94 printed out from the CBP Web site by a refugee is acceptable for Form I-9 purposes without an unexpired refugee admission stamp as long as the printout provides the class of admission as "RE" and duration of admission as "D/S [duration of status]."

In the benefits-granting context, DHS will continue its outreach to other federal, State, and local agencies to indicate that when a Form I-94 is required as proof of valid admission to the United States, a Form I-94 in either paper or print-out format is acceptable.

Comment: Commenters encouraged CBP to continue education outreach to agencies, employers, and other stakeholders that might remain unaware of the change to electronic Forms I-94. Commenters specifically urged education to improve access to and use of DHS verification tools, such as SAVE and E-Verify.

Response: CBP has conducted extensive outreach to local, state, and federal agencies, scholarly organizations, and other non-governmental entities both before and after automation. CBP involved all DHS components, DOS, SSA, and the Department of Commerce in the automation process through working groups. CBP in conjunction with USCIS provided guidance and support to all major DMVs that participate in the SAVE program. CBP coordinated with NAFSA and other student organizations to inform academic institutions. CBP has met with the U.S. Chamber of Commerce, the travel and tourism

industry, refugee and asylum groups, local law enforcement representatives, and other interested organizations during planning and development of the electronic Form I-94.

Employers seeking employment eligibility verification can do so through the E-Verify program offered by USCIS. Government agencies have access to status verification or other inquiries through a variety of sources, including law enforcement channels and the SAVE program offered by USCIS.

SEVIS

Comment: One commenter, NAFSA, suggested that CBP should include the SEVIS number in the electronic Form I-94 record for nonimmigrants who are monitored through SEVIS. The commenter stated that this would further DHS's fulfillment of its responsibility to notify educational institutions and exchange program sponsors that the student has been properly admitted into the United States. The commenter noted that CBP officers often write the SEVIS number on the paper Form I-94 of F and M students and J exchange visitors, and that this notation is used by Designated School Officials and Responsible Officers to ensure that the POE information is associated with the correct SEVIS record.

Another commenter asked how the admission record will be tied to the proper SEVIS number, if a student has more than one SEVIS record. The commenter stated that this is of particular concern because CBP is no longer stamping the Form I-20 or DS-2019 upon entry in the United States, and there is no way that the student can make sure the correct SEVIS I-20 is getting mapped to the admission number.

Response: The Student and Exchange Visitor Information System (SEVIS) is utilized to track and monitor schools, exchange visitor programs, and F, M and J nonimmigrants while they visit the United States and participate in the U.S. education system. The SEVIS number is the number generated when a Form I-20 or Form DS-2019 is issued to an individual to participate in a specific educational or cultural exchange program at a specific institution. CBP currently verifies SEVIS numbers prior to admission into the United States. CBP now requires officers to document SEVIS numbers, if applicable, in the electronic Form I-94 record, but these numbers are not accessible to the public or academic institution. The SEVIS number is not currently documented on the Form I-94 Web site or printout, as it is not a data

element required or collected on the paper version of the Form I-94. CBP will explore the feasibility of including the SEVIS number on the Web site and printout. CBP has provided guidance to the field to include the SEVIS number on the foreign travel document with the CBP admission stamp when practical.

CBP has updated its systems to help ensure that the correct SEVIS record is mapped to the proper arrival/departure record. The SEVIS information is stored in CBP systems, and the Arrival and Departure Information System (ADIS) feeds information to SEVP for each student. CBP is continuing to work to enhance its systems to do a real-time query of the SEVIS number to prevent admission on an invalid SEVIS number.

Comment: One commenter requested that CBP establish a mechanism for Designated School Officials to request a review when there is a problem with a SEVIS record.

Response: If there is a problem with the SEVIS record, the Designated School Official should contact SEVP, which oversees SEVIS. SEVP would then work with CBP if SEVP determines that the problem relates to the electronic Form I-94 or is otherwise CBP-related. More information about SEVIS can be found on the SEVIS Web site: www.ice.gov/sevis/.

Additional Comments

Comment: A few commenters requested that CBP include additional information on the tear sheet that is handed out to travelers at the POEs to include the purposes of the Form I-94 and a help line phone number or email address. Commenters stated that not all foreign nationals understand the importance of the Form I-94 or how soon they might need to print one.

Response: CBP designed the tear sheet to fit into the traveler's passport and inform travelers, in 12 languages, how to access their Form I-94 records. Due to the size of the tear sheet and the desirability of including any information in multiple languages, CBP is not able to add additional information. Additionally, as the traveling public becomes more familiar with the Form I-94 automation, CBP plans to phase out distribution of the tear sheets.

Comment: One commenter asked when all nonimmigrants arriving in the United States by air or sea will be processed electronically.

Response: CBP rolled out the Form I-94 automation over the weeks following the effective date of the IFR, April 26, 2013. The Form I-94 automation for air and sea passengers is now complete.

Comment: One commenter asked if the 11 digit admission number from the Form I-94 will continue to be used in the electronic Form I-94 format and whether it will be provided to the traveler at the time of admission.

Response: The 11 digit number has not changed and will continue to be issued electronically to travelers. Travelers can use the I-94 Web site to find their Form I-94 number.

Comment: One commenter was concerned about travelers having notice of the option to request a paper Form I-94 from CBP. The commenter stated that requesting a paper form is not in the regulations and it is not clear if the traveler should make the request on the plane or at the POE.

Response: Travelers may request the paper form at the POE from the CBP officer. CBP has updated information on the Web site, www.cbp.gov/I94, to indicate that a paper form may be requested at the time of inspection. If someone requests a paper form, the person will be given the card stock form, properly annotated, with their electronic Form I-94 number written on the card. Due to the extra time this process takes, issuance of a paper Form I-94 will be completed in the secondary inspection area. Conclusion

Based on the analysis of the comments received, DHS is adopting the interim regulations as a final rule. In response to the comments, CBP has made some operational changes regarding the issuance of the Form I-94 that are described below.

Operational Changes to the Form I-94 Process

In response to some public comments received, and after studying usage and common problems of the I-94 Web site, CBP has made some changes to the I-94 Web site since the initial rollout of the Form I-94 automation, including the addition of new features. These changes and new features are summarized below. As described in several of the comment responses, CBP believes these changes make the Web site a better resource for the public and address user concerns.

First, the Web site now allows a traveler to retrieve his or her most recent Form I-94 even if he or she has departed the United States. A traveler may retrieve a Form I-94 issued up to five years prior to the request date.

Second, a traveler may now retrieve his or her five-year United States border crossing history from the Web site. The border crossing history information is drawn from Form I-94 records. If a traveler has entered and departed the United States with more than one travel

document during the five years, for example an old and new passport, he or she will need to query each document to retrieve the complete five-year history. CBP expects that this update to the Web site will provide a convenient alternative to the filing of a FOIA request when a traveler needs his or her five-year border crossing history when applying for certain benefits.

Third, the date and class of admission are no longer required to retrieve a Form I-94, as these data points were commonly problematic for travelers attempting to retrieve their Form I-94. This change also allows travelers to input the same information to retrieve both the Form I-94 and the travel history.

Additional operational changes include a new security consent page that addresses both privacy and security issues, an endorsement added to the Form I-94 printout indicating that the Form I-94 has been automated, and updates to the FAQs page of the I-94 Web site to reflect these changes and to address additional common questions.

Statutory and Regulatory Requirements

Executive Order 13563 and Executive Order 12866 (Regulatory Planning and Review) and (Improving Regulation and Regulatory Review)

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule is an “economically significant regulatory action” under section 3(f)(1) of Executive Order 12866. Accordingly, the Office of Management and Budget has reviewed this regulation.

1. Purpose of the Rule

This rule amends the definition of the Form I-94, Arrival/Departure Record, to include an electronic format. This revision enables DHS to transition to an automated process for air and sea ports of entry whereby DHS creates a Form I-94 in an electronic format based on passenger, passport, and visa information DHS obtains electronically from air and sea carriers and the Department of State as well as through the inspection process. This rule also is consistent with CBP’s transition to

accepting I-94 submissions online for use at the land border.

This rule results in substantial cost savings (benefits) for travelers, carriers, and CBP. CBP estimates the total net benefits to both domestic and foreign entities in 2013 ranged from \$57.9 million to \$82.7 million.⁸ Separately, CBP estimates a net benefit in 2013 of between \$41.1 million and \$65.9 million for foreign travelers, \$1.3 million for carriers, and \$15.5 million for CBP. Net benefits to U.S. entities (carriers and CBP) in 2013 totaled \$16.8 million. In the following regulatory assessment, we present the costs and benefits to CBP, carriers, and travelers from Form I-94 automation using a six-year period of analysis beginning in year 2012.

2. Baseline Condition and Affected Parties

a. Automation at the Air and Sea Ports of Entry

Prior to the implementation of the interim final rule CBP published on March 27, 2013 in the **Federal Register** (78 FR 18457), CBP required any alien traveling to the United States, other than under the Visa Waiver Program, to complete a paper Form I-94 prior to arrival. When arriving by air and sea, the carrier provided the form to the alien while en route to the United States. The alien typically completed the form while en route to the United States, spending approximately 8 minutes filling out the form.⁹ Upon arrival at the U.S. airport or seaport, the alien presented the completed Form I-94 to the CBP officer for inspection. If permitted to enter the United States, the officer tore the form at the perforation, stamped the lower portion, and returned it to the alien. The officer sent the top portion of the form to a centralized facility where all Forms I-94 were entered into CBP’s data systems. Generally, the alien later returned the lower portion of the Form I-94 to the carrier upon departure from the United States, who in turn returned it to CBP.

In addition to acting as an arrival and departure record, the Form I-94 also serves as evidence of admission or parole into the United States for nonimmigrants. Some third parties,

such as universities or local or state government benefit-granting agencies, may require an alien to present evidence of admission or parole to the United States. Prior to the interim final rule, in these cases, the alien could present the bottom portion of the Form I-94, which was returned to them when they were admitted, paroled, or adjusted to an immigration status. Aliens could also choose to present Form I-94 to establish employment eligibility and identity or eligibility for certain public benefits.

If an alien loses the bottom portion of the Form I-94, he or she may file Form I-102, Application for Replacement/Initial Nonimmigrant Arrival-Departure Document, with USCIS to request a replacement. The form has a Paperwork Reduction Act burden of 25 minutes per form and a fee of \$330. According to the USCIS, prior to the implementation of this rule, 17,700 Forms I-102 were filed each year. At the time the interim final rule was published, USCIS estimated that the rule would result in a decrease in the number of Forms I-102 filed to 8,804 in 2013 and 5,771 in later years.¹⁰ Following the implementation of the rule in April 2013, the total number of Forms I-102 filed in 2013 was 13,715. USCIS now expects 6,782 Forms I-102 to be filed each year.¹¹ This is a reduction of 10,918 each year due to this rule.

According to the Office of Immigration Statistics (OIS),¹² about 53.9 million aliens entered the United States using a Form I-94 or equivalent (i.e. using a Form I-94W or obtaining an electronic travel authorization when entering under the Visa Waiver Program) in 2012. Of these, about 20.3 million entered under the Visa Waiver Program (VWP). These aliens do not use a Form I-94 and are therefore unaffected by this rule,¹³ so we exclude them from this analysis. Additionally, OIS figures include all modes of transportation. I-94 automation affects only aliens

¹⁰ Communication with USCIS on February 8, 2013.

¹¹ Supporting Statement for Form I-102. Available at http://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201402-1615-001. Accessed September 28, 2016.

¹² 2012 Yearbook of Immigration Statistics. Table 28. <https://www.dhs.gov/yearbook-immigration-statistics>. Accessed October 26, 2016.

¹³ In addition to automating the Form I-94, this final rule adds a valid, unexpired nonimmigrant DHS admission or parole stamp to the list of documents that constitute evidence of registration. Thus, such a stamp can serve as evidence of registration for Visa Waiver Program travelers and for travelers arriving by land who would otherwise be required to comply with any registration requirement under the INA. However, the addition of the passport stamp to the list of documents that constitute evidence of registration does not have an economic impact on travelers. Therefore, this analysis focuses on the changes to the Form I-94.

⁸ OMB Circular A-4 states regulatory analyses should focus on benefits and costs that accrue to citizens and residents of the United States (http://www.whitehouse.gov/sites/default/files/omb/assets/regulatory_matters_pdf/a-4.pdf; see “Scope of Analysis” section on page 15). In order to make this distinction clear, CBP has shown the costs and benefits to foreign travelers as well as impacts to U.S. entities.

⁹ See 78 FR 70570 (November 26, 2013) for the latest burden estimate for the Form I-94’s information collection.

arriving by air and sea, so we must exclude those arriving by land. We therefore subtract the number of aliens entering the U.S. at land border ports using a Form I-94 in 2012. According to CBP's Office of Field Operations, about 15.4 million aliens arriving from Mexico and 1.2 million arriving from Canada entered the United States at the land border using a Form I-94 in 2012. We subtract these from the admission total, leaving 16,952,996 non-VWP aliens who arrived in the U.S. by air or sea using a Form I-94 in 2012.

We next estimate the number of Form I-94 travelers to the United States in the rest of the period of analysis.¹⁴ For 2013 and 2014, we again use actual data from the Office of Immigration statistics. For 2015 through 2017, we use the traveler projections developed by the Office of Travel and Tourism Industries (OTTI) within the U.S. Department of Commerce.¹⁵ The OTTI forecasts travel growth through 2020 for the 20 countries with the highest 2014 travel volume. Since the vast majority of travelers from most countries arrive in the United States by air and sea, we assume that OTTI's travel growth rates best reflect air and sea travel growth. For Mexico and Canada, we subtract the number of Form I-94 travelers arriving by land in 2012 before applying the OTTI growth rates.¹⁶ We apply the OTTI projected growth rates to the number of Forms I-94 by country we obtained from OIS. For countries not separately forecasted by OTTI, we use OTTI's average growth rate for overseas travel for each year to determine overseas travel from these countries. We present the total number of projected Forms I-94 for each year from 2012–2017 absent the rule in Exhibit 1 below.

EXHIBIT 1—PROJECTED FORM I-94 RESPONDENTS TRAVELING BY AIR AND SEA

[*denotes projection]

2012	16,952,996
2013	16,832,602
2014	20,680,611
2015	21,700,329

¹⁴ 2013 and 2014 Yearbook of Immigration Statistics. Table 28. <https://www.dhs.gov/yearbook-immigration-statistics>. Accessed October 26, 2016.

¹⁵ U.S. Department of Commerce, Office of Travel and Tourism Industries "Forecast of International Travelers to the United States by Top Origin Countries." October 2015. Available at <http://travel.trade.gov/view/f-2000-99-001/forecast/Forecast-COUNTRIES.pdf>.

¹⁶ For the purposes of these projections, we assume that aliens arriving from Mexico and Canada at land borders are Mexican and Canadian citizens. There are a small number of citizens of other countries who enter the U.S. at land borders. Because the number for each country is small, the effect on the projections is minimal.

EXHIBIT 1—PROJECTED FORM I-94 RESPONDENTS TRAVELING BY AIR AND SEA—Continued

[*denotes projection]

2016	22,628,579
2017	23,871,524

b. Electronic Implementation at the Land Border

This rule affects the process of obtaining a Form I-94 for travelers arriving by air and sea and is consistent with CBP's transition to accepting I-94 submissions online for use at the land border. In addition to the automation at air and sea ports of entry, CBP modified the process by which a traveler arriving at the land border can provide Form I-94 information and pay the related fee by adding an electronic option. The enhanced I-94 Web site launched on September 29, 2016.

Due to the differences in documentary requirements for land border entries, the Form I-94 issuance process varies slightly at a land border port of entry than at an air or sea port of entry. Currently when a traveler requiring a Form I-94 arrives at the land border, he/she goes to secondary inspection where he/she provides the I-94 information to a CBP officer who inputs the data into a computer. The process takes approximately 8 minutes in addition to the time of the actual inspection. After determining the traveler's admissibility, the CBP officer then prints a Form I-94 for the traveler and refers him/her to the cashier to pay the associated \$6 fee.¹⁷ It takes approximately 20 minutes to wait in line to pay the fee and approximately 2 minutes to pay the fee.

3. Costs

We next estimate the costs and benefits of this rule for all affected parties. For the interim final rule, we assumed that the rule would go into effect on January 1, 2013. The rule actually went into effect on April 22, 2013. Because certain key data on arrivals by class of admission is only available publicly on an annual basis, we incorporate some prorated arrivals estimates into this analysis. For the purpose of this analysis, we assume that the rule went into effect on May 1, 2013 and we prorate the 2013 estimates to reflect that the rule was in effect for 8 months of the year. To the extent that travel among various classes of admission is not consistent throughout the year, the 2013 estimates may be overstated or understated.

¹⁷ The amount of fee for the issuance of the Form I-94 at a land border port of entry is provided for in 8 CFR 103.7(b)(1)(ii)(D).

The costs of this rule are borne by both CBP and aliens traveling to the United States.

a. Costs to CBP of Automation at the Air and Sea Ports of Entry

This rule allows for the automation of the paper Form I-94 in the air and sea environments.¹⁸ Almost all of the traveler information collected on the Form I-94 prior to the implementation of this rule was redundant in the air and sea environments because CBP already obtained the same information electronically from other sources. In advance of the implementation of this rule, CBP linked its data systems to use the information from these alternate sources to create an electronic Form I-94 during the admission process. CBP creates the electronic Form I-94 by pulling information from the traveler's Advance Passenger Information System (APIS) record and any Consular Consolidated Database (CCD) record and then by entering any additional data obtained during the inspection process. This electronic process allows stakeholders that have access to CBP's databases to continue to have access to traveler information electronically. CBP's Office of Information Technology estimates the cost to link data systems and to fully automate the Form I-94 was about \$1 million in calendar year 2012. In addition, it estimates the cost to develop the secure Web site was about \$321,000 in 2012. CBP anticipates spending \$92,000 per year in operations and maintenance costs for these systems. In total, CBP incurred costs of \$1,321,000 in 2012 and will incur costs of \$92,000 in following years.

b. Costs of Electronic Implementation at the Land Border

CBP's Office of Information Technology estimates that it cost approximately \$540,000 in 2016 to develop the Web site and create the online payment capabilities. CBP will not bear any additional costs to process travelers as a result of this process.

Travelers will not face new costs or time burdens under the new optional process at the land border. Under this process, travelers will have the option to use a new CBP Web site to answer the Form I-94 questions and to pay the \$6 fee in advance of travel. As the Form I-94 questions are not changing, the time burden to submit the information is not changing. Similarly, we estimate that it will take the traveler 2 minutes to pay the fee online, which is the same as the

¹⁸ A small number of paper Forms I-94 are still being used for certain aliens such as asylees, certain parolees, and those who request a paper Form I-94.

time it takes if the traveler pays at the border, and the fee itself is not changing.

c. Costs Borne by Travelers to the United States From Automation at Air and Sea Ports of Entry

Although most travelers do not use the Form I-94 for any reason once they are admitted or paroled to the United States, some aliens do make use of the form to demonstrate lawful admission or parole to the United States to the Social Security Administration, universities, state agencies such as Departments of Motor Vehicles, public assistance agencies and organizations, or some other party.

Aliens may also choose to present a Form I-94 to establish employment eligibility and identity, or eligibility for certain public benefits. To accommodate this need for the Form I-94, CBP has made an electronic Form I-94 available to aliens on the secure I-94 Web site. Travelers receive written information on how to access the Web site upon their arrival to the United States. Aliens may log into the Web site using 5 pieces of basic identifying information that is either known to the traveler (e.g. their first name, last/surname, and date of birth) or readily available on their passport (e.g. passport number, country

of issuance). CBP estimates that it takes the traveler 4 minutes to log into the Web site using identifying information and to print the electronic form. This is less time than the paper Form I-94's 8 minute time burden for entering 17 data elements. This 4 minute estimate does not include the time it takes to travel to a location with computer and internet access; that cost is treated separately later in this section.

In addition, CBP makes the paper Form I-94 available to certain classes of aliens and upon request at the secondary inspection station at ports of entry and at CBP Deferred Inspection Sites (DIS), which are located at most ports of entry and are largely open during regular business hours. Since the interim final rule went into effect, very few travelers have requested the paper form.

To estimate the costs to travelers to access their Form I-94 electronically, we must first determine the number of aliens who access the Web site, the number who do not have ready access to the internet, the distance they have to travel to access the internet, and the average wage rate for all aliens entering the United States by air or sea. First, we assess the number of aliens who access the Web site. Exhibit 2 shows the

number of travelers who entered the United States by air or sea in 2012 sorted by various categories of admission.¹⁹ The majority of Form I-94 visitors to the United States—about 76 percent—are tourists and business travelers entering on B-1/B-2 visas. In most cases, these travelers do not have a need for their Form I-94 now that the passport stamp serves as evidence of alien registration. While in the U.S., these B-1/B-2 visa travelers may use their foreign driver's license, so there is generally no need for them to apply for a U.S. driver's license. They are ineligible for employment or enrollment in a university while traveling on a B-1/B-2 visa. They are generally not eligible for public benefits without a change in status. For these reasons, for the analysis for the interim final rule, we assumed that no B-1/B-2 visa holders would need to access the Web site to obtain their electronic Form I-94. However, public comments stated that some B-1/B-2 travelers do in fact need their Form I-94. According to the Web site's query history, approximately 1 percent of B-1/B-2 travelers access the Web site.²⁰ Therefore, for this analysis, we assume that 1 percent of these travelers will continue to access the Web site in the future.

EXHIBIT 2—2012 AIR AND SEA FORM I-94 RESPONDENTS BY CLASS OF ADMISSION *

	Number	Percentage
Tourists and Business Travelers (B-1/B-2)	12,938,329	76.3
Temporary workers	1,631,683	9.6
Students	1,594,816	9.4
Other/Unknown	461,935	2.7
Diplomats	326,233	1.9
Total	16,952,996	

* Estimates may not total due to rounding.

Because so many parties at various levels of government and outside of the government use the Form I-94, prior to the implementation of the interim final rule CBP could not estimate the number of non-B-1/B-2 travelers that would access the Web site. For the analysis of the interim final rule, we assumed that all travelers, other than B-1/B-2 travelers, who previously received a paper Form I-94 would log into the Web site to print off their electronic Form I-

94. According to the Web site's query history since the implementation of the interim final rule, approximately 75 percent of non-B-1/B-2 travelers access the Web site. Exhibit 3 shows the number of travelers we estimate will access their electronic Form I-94 via the CBP Web site during the period of analysis. We note that those with a need for a Form I-94 who face obstacles to accessing their Form I-94 electronically may request a paper Form I-94 at the

secondary inspection station upon their arrival at the port or at a DIS during their stay in the United States. However, according to CBP subject matter experts, very few aliens have requested paper Forms I-94 at the ports of entry and those who have requested them at DIS have done so primarily to correct erroneous information on their electronic Form I-94.

2017	182,140	4,243,163	4,425,303

* Other includes temporary workers, students, diplomats, and others/unknowns.

** 2013 travelers are estimated based on the rule being in effect for two thirds (8 months) of the year.

We next estimate the number of aliens who do not have ready access to the internet while in the United States and would need to travel to access their electronic Form I-94. We assume that students and diplomats have ready access to the internet at their schools or places of business respectively. The 1 percent of B-1/B-2 travelers who access their electronic Form I-94 typically need it when staying in the United States for over 6 months. These people likely have other uses for the internet during their stay and could access their electronic Form I-94 when using the internet for another purpose. Therefore, we assume they do not need to travel to access their electronic Form I-94. Also, as noted above, CBP will continue to make the paper Form I-94 available upon request at the secondary inspection station at ports of entry or at DIS to those with a need for a Form I-94 and who face obstacles to accessing their electronic Form I-94.

Temporary workers come to the United States for varying lengths of time to fill positions where there is a shortage of labor in the United States. These positions can be in very highly technical occupations, such as computer programming, but they can also be in less technical occupations such as agricultural labor.

Because this category of admission includes such a wide range of workers, we cannot say with certainty that all temporary workers have ready access to the internet while in the United States. Similarly, we do not know how accessible the internet is for those in the "Other/Unknown" category. The aliens least likely to have internet access are those working as temporary agricultural laborers.

According to the U.S. Department of Agriculture (USDA), approximately 67 percent of farms have internet access.²¹ The primary use for the electronic Form I-94 for these temporary workers is to

demonstrate employment eligibility to their employers. Generally, this document will be the only acceptable evidence of employment authorization that such workers will have to satisfy the Employment Eligibility Verification (Form I-9) requirements. Because of the Form I-9 requirements, many employers do not allow their employees to begin working for pay until the workers have presented them with the print-out of their electronic Form I-94. The employers have spent a considerable amount of money bringing these foreign workers to the United States to work. By offering internet access to employees, employees and employers can complete the employment eligibility verification process timely, which allows the employee to begin working sooner. Because this incremental use of the internet is virtually costless to the employer and the employer would benefit from their employee's prompt access to their electronic Form I-94, we assume that employers with internet access allow their employees to use their internet connection to access their electronic Forms I-94.²² As stated previously, 67 percent of farms have internet access. For the purposes of this analysis, we assume that 33 percent (100 percent–67 percent) of travelers in the "Temporary Workers" and "Other/Unknown" categories (for example, 690,894 in 2012) would need to travel to access their electronic Form I-94.

CBP received several public comments regarding the ability of travelers to obtain their printed electronic Form I-94 before they need it. One employer of temporary workers commented that according to their company policy, employees cannot use company computers to access the

internet until they have demonstrated their legal admission to the United States by presenting a copy of their Form I-94.

While CBP believes that most employers with internet access allow their employees to use a company computer to access their Form I-94, we acknowledge that a small number of employers may choose not to do so, or company policy may prohibit non-employees from accessing company equipment. These travelers are included in the 33 percent of temporary workers who we assume have to travel to access the internet.

One commenter noted that employees sometimes need to start work very soon after arrival and do not have time to travel to a location where they can print their electronic Form I-94. Once again, CBP notes that any traveler, but particularly travelers with an immediate need for their Form I-94 may request a paper Form I-94 at the secondary inspection station at ports of entry or at CBP DIS. Another commenter said that travelers often do not know they need a Form I-94 until after they have left the airport, so requesting a paper Form I-94 at the port is not a practical option. CBP acknowledges that many people may not know that they need their Form I-94 until it is asked of them. As such, CBP has made access to the I-94 Web site as easy as possible and will continue to provide paper Forms I-94 upon request at CBP DIS. Another commenter suggested that CBP provide kiosks at the ports of entry where travelers could print their electronic Form I-94 prior to leaving the airport. CBP has explored the possibility of placing kiosks at the largest airports and seaports to give travelers the opportunity to print their Form I-94 prior to leaving the port of entry. CBP has determined that the benefits to the public do not outweigh the cost to CBP, so it is not proceeding with kiosks at this time. See the Regulatory Alternatives section for more information.

Now that we have estimated the number of aliens who do not have ready access to the internet, we need to

²¹ United States Department of Agriculture National Agricultural Statistics Service. "Farm Computer Usage and Ownership." August 2013. Available at: <http://usda.mannlib.cornell.edu/usda/current/FarmComp/FarmComp-08-20-2013.pdf>. Accessed June 4, 2014.

²² It is also possible that some employers without internet access help transport their employees to a location with internet access. Employers have expended considerable effort to sponsor temporary workers and they may view this as part of the cost of using foreign temporary workers. However, as the burden of demonstrating employment eligibility is on the worker, we assume that the worker must bear any travel costs to obtain their electronic Form I-94. To the extent that the employer is able to provide more efficient access to the internet, costs to workers will be lower.

develop an assumption for how long it takes to travel to a location where they can access the internet. Based on our online review of internet services provided by public libraries, we found that virtually all public libraries provide public access to computers and the internet, though many charge a nominal fee for printing. There are 16,766 public libraries in the United States.²³ According to the Department of Education, 94 percent of households live within 10 miles of a public library and 83 percent live within 5 miles of one.²⁴ Given the large number of library locations nationwide that provide access to the internet and the fact that CBP makes the paper Form I-94 available upon request at ports and DIS, we believe most aliens who travel to access the internet to print their electronic Form I-94 only need to travel a short distance to do so. We estimate that round-trip distance required to access a computer terminal and printing station at a public library is 20 miles. We also assume that traveling to and from a library takes 60 minutes of an aliens' time, which includes travel time and the time to enter the library, locate an available computer, wait to access the computer and print a Form I-94. In this analysis, we assume that users pay \$0.25 to print their electronic Form I-94 based on a review of available online printing fees charged at public libraries.

We next estimate the value of time for those travelers affected by this rule. Federal agencies typically estimate a monetary value of time used or saved as a result of their regulatory actions. This allows agencies to estimate the additional costs and benefits of their regulatory actions on affected parties. The U.S. Department of Transportation (DOT) provides guidance on the value of time to use for economic analysis.²⁵ This guidance provides point estimates as well as ranges for values of time for travelers based on average wage rate analysis for different categories of travel.

According to DOT estimates, the value of travel time is more than twice as high for air travelers than for those traveling by surface modes, which can

be explained by the relatively high cost of air travel. We note that the DOT estimates are intended to be used to analyze actions that will reduce the time spent traveling. A person's value of time while traveling may differ from their value of reducing travel time. In most instances, this rule does not reduce the time spent traveling because an alien typically completes the Form I-94 while en route to the United States, but rather reduces the time spent on paperwork while traveling. The traveler is now able to spend this time on leisure or business activities such as reading or drafting documents. CBP believes that using the DOT values of travel time in this situation is the most appropriate estimate because it reflects the higher values of time for air travelers. Further, we note that to the extent a person's value of time while traveling is different than their value of reducing travel time, this difference is likely encompassed in the DOT plausible range for the value of travel time. The DOT estimates are in 2009 dollars, but the DOT provides a methodology to inflate its estimates for future years. We have inflated the estimates to 2012 dollars, which is the first year of our period of analysis.²⁶

As a primary estimate, we use the DOT's point estimate for the value of time for all-purpose air travel, which includes both personal and business travel. This point estimate is \$44.15, when inflated to 2012 dollars. We also use the DOT's range for all-purpose travel to show a range of low and high estimates. This range is from \$36.50 to \$54.75 when inflated to 2012 dollars. We apply these low, primary, and high values of time to the travelers in our analysis. We use this travel value of time framework to estimate the costs and savings of this rule, since affected aliens previously completed the paper Form I-94 while traveling.

We recognize that those who must travel to access the internet are a special case of travelers and probably have different values of time than the average air traveler. As previously discussed, the aliens least likely to have internet access are those working as temporary agricultural laborers. To estimate the value of time for these aliens, we use the wage rate for H-2A seasonal (temporary) agricultural workers.

According to the Department of Labor, H-2A temporary agricultural workers have an average wage rate of 9.79 per hour.²⁷ We recognize that there are

other classes of temporary workers, notably H-1B visa holders, who likely have higher wage rates; however, these workers are predominantly in specialized occupations such as medicine and computer programming and are likely to have ready access to the internet. Employers of these employees have an incentive to provide this access as it is virtually costless and would allow workers to start working earlier. We note that, notwithstanding the benefits to the employer of providing this access, we received public comments indicating that some employers of H-1B employees may not allow their workers to access computers to print their electronic Form I-94. CBP does not believe this represents a large number of employers.

Further, workers in occupations such as medicine and computer programming are likely to have internet access from other sources, such as their hotel or other place of lodging. Finally, as discussed above, we have assumed that all temporary workers would access their electronic Form I-94 and that 33 percent of them would have to travel to do so. Any H-1B worker who must travel to access their electronic Form I-94 is included in these estimates. But because we do not believe the H-1B workers make up a large portion of the temporary workers who must travel to access their electronic Form I-94, we use the estimated wage of H-2A workers as our estimate for the value of time for those who must travel to access their electronic Form I-94.

Now that we have estimated the number of aliens who log into CBP's Web site to print their electronic Form I-94, the time it takes to access that Web site, the number of people who need to travel to access the internet, the time it takes to travel to and from an internet access site, and the values of time for these groups, we can calculate this rule's cost to these travelers. We first address the cost to log into CBP's electronic Form I-94 Web site. Once again, CBP estimates that it takes travelers 4 minutes to access and print their electronic Form I-94, and that it costs them \$0.25 per page to print their electronic Form I-94. Exhibit 4 shows the 2013 to 2017 travelers' costs for accessing and printing their electronic Forms I-94.²⁸ As shown, in 2013,

weighted average of state average wage rates. Available at: http://www.foreignlaborcert.doleta.gov/pdf/OFLC-2012-Annual_Report-11-29-2013-Final%20Clean.pdf.

Accessed on June 16, 2014.
²⁸ The annual estimates of Forms I-94 in Exhibit 4 are based on projections for all visa categories using growth rate estimates developed OTTI. We adjust these estimates using our assumptions that

²⁵ U.S. Department of Transportation: "Revised Departmental Guidance on Valuation of Travel Time in Economic Analysis." September 28, 2011. Table 5. Available at http://www.dot.gov/sites/dot.dev/files/docs/vot_guidance_092811c.pdf. Accessed June 4, 2014.

²⁶ To determine the hourly value of travel time savings in 2012 U.S. dollars, we applied the DOT's suggested growth rate of 1.6 percent per year to the hourly time values listed in 2009 U.S. dollars.

²⁷ Calculated from the Office of Foreign Labor Certification's FY 2012 Annual Report using the

traveler costs of time to access electronic Forms I-94 and their cost to print them ranged from \$5.5 million to \$8.1 million with a primary estimate of \$6.6 million.

* Estimates may not total due to rounding.

We next address the travel costs for those aliens who do not have ready access to the internet. Once again, we assume that 33 percent of travelers in the “Temporary Workers” and “Other/Unknown” categories (approximately 12 percent of the total, see exhibit 2) would

need to travel 20 miles roundtrip and spend 60 minutes of time to access their electronic Form I-94. We also assume that these travelers have a value of time best characterized by the average H-2A wage rate of \$9.79 per hour. For the cost of travel, we use the 2012 IRS standard

mileage rate for business travel of \$0.555 per mile.²⁹ Exhibit 5 shows the 2013 to 2017 aliens’ travel costs to access the internet. As shown we estimate that the total travel costs were \$9.3 million in 2013.

EXHIBIT 5—TRAVEL COSTS *

	2013	2014	2015	2016	2017
Affected Aliens	444,381	818,952	859,333	896,092	945,312
H2A Wage Rate (\$)	9.79	9.79	9.79	9.79	9.79
Time Cost (\$)	4,350,487	8,017,542	8,412,870	8,772,738	9,254,608
Mileage Cost (\$)	4,932,626	9,090,369	9,538,597	9,946,618	10,492,967
Total Travel Cost (\$)	9,283,113	17,107,912	17,951,467	18,719,357	19,747,575

* Estimates may not total due to rounding. Undiscounted dollars.

To summarize, both CBP and aliens bear costs as a result of this rule. CBP bore the costs to link its data systems and to build a Web site so aliens can access their electronic Forms I-94. CBP continues to incur annual costs to operate and maintain the I-94 Web site. Temporary workers and aliens in the “Other/Unknown category (see Exhibit 2) bear costs when logging into the Web site, traveling to a location with public internet access and printing a paper copy of their electronic Form I-94. The costs averaged \$24.08 per traveler in

2013 for those in the temporary worker and “Other/Unknown” categories who have to travel to access their electronic Form I-94. Aliens arriving as B-1/B-2 travelers, diplomats, students, and those temporary workers and aliens in the “Other/Unknown” category who do not need to travel to access their Form I-94 bear costs when logging into the Web site and printing electronic Forms I-94. Using the primary estimate for a traveler’s value of time, these costs for these groups averaged \$3.19 per person.

Exhibit 6 summarizes the 2012–2017 costs of this rule. As shown, costs for this rule in 2013 ranged from \$15.0 million to \$17.5 million. In our primary estimate, costs for this rule are \$16.0 million in 2013. Less than one percent of these costs are incurred by the U.S. entities. These are CBP’s costs for automating the electronic Form I-94 and developing the Web site travelers use to access their electronic Form I-94. In 2013, CBP’s costs were \$92,000.

* Estimates may not total due to rounding.

4. Benefits

a. Benefits of Automation at Air and Sea Ports of Entry

This rule has benefits for CBP, carriers, and travelers to the United States. Prior to the implementation of the interim final rule, CBP returned the bottom portion of the Form I-94 to the traveler and retained the top portion of the form. The information on the top portion of the form was entered into CBP systems for use by CBP and other agencies. CBP also received this information electronically from other sources. In 2012, CBP linked its data systems to create an electronic Form I-94, thus eliminating the need to continue entering the data from the paper Form I-94 for air and sea travelers into CBP systems. Prior to the implementation of the interim final rule, CBP spent approximately \$17.8 million per year on contract support for manual Form I-94 data entry. CBP still must spend approximately \$2.4 million in contract expenses to enter data from the paper Forms I-94 collected at the land border and the few that continue to be collected at airports and seaports. We therefore estimate that this rule saves CBP \$15.4 million each year in contract costs. It is possible that these savings could grow in future years if large numbers of travelers at the land border opt for the voluntary electronic option.

CBP processing has also become more efficient as a result of this rule. Prior to the implementation of the interim final rule, when the traveler gave the completed Form I-94 to the CBP officer during the inspection, the officer reviewed the form for errors and made corrections as needed. The officer then stamped the top and bottom portions of

the form with the admission or parole stamp, notated the alien's classification and duration of admission or parole and stapled it to the traveler's passport. The interim final rule eliminated this process.

A study of the processing times at three major U.S. airports immediately following the implementation of the interim final rule yielded mixed results; one airport showed a decrease in processing time following the change in process, another showed an increase, and the third showed no statistically significant difference in processing times. We note that CBP has since resolved some technical issues with the user interface design of the system used by CBP officers during primary inspection that arose with the automated process. CBP has anecdotal evidence that processing times have now dropped nationwide as a result of the transition to the automated Form I-94 process.

CBP is conducting a more comprehensive time study that will examine the entire time period following the implementation of the automated process, but results of this study are not yet available. Accordingly, for the purposes of this analysis, we assume that this rule will not affect CBP processing times. To the extent that eliminating the paper Form I-94 reduced processing times, CBP was able to focus its resources on other areas, improving security and expediting the processing of passengers.

We next examine the printing savings this rule generates for CBP and carriers. Prior to the implementation of the interim final rule, both CBP and carriers printed and stored Forms I-94. CBP printed forms for use in primary and

secondary passenger inspections when the traveler did not fill out a form in advance or when the traveler made an error in filling out the form. Prior to this rule, CBP spent \$153,360 each year printing the Form I-94 for air and sea travelers. Since the interim final rule's implementation, CBP no longer needs to print the Form I-94 for most of these travelers,³⁰ which eliminates this expense.

Before the implementation of the interim final rule, carriers printed the Forms I-94 for their passengers to complete before their arrival in the United States. To estimate printing costs for carriers, CBP obtained an estimate of total Form I-94 printing and storage costs from a major airline. We increased this cost proportionally based on annual international inbound passenger volumes to estimate the entire industry's cost to print and store paper Forms I-94. Based on this methodology, CBP estimates that carriers spent \$1,344,450 annually to print and store the Form I-94. Since the interim final rule's implementation, carriers no longer need to print or store the Form I-94, which eliminates these expenses.

We next estimate the value of air and sea travelers' time savings resulting from the elimination of the paper Form I-94. Prior to the implementation of the interim final rule, travelers spent 8 minutes filling out the Form I-94 while in transit to the United States. This rule eliminates the paper Form I-94 for air and sea travelers and, with it, the 8-

³⁰ CBP still prints a small number of forms for use at airports and seaports for certain aliens such as asylees, certain parolees, and those who request a paper Form I-94.

minute time burden.³¹ We again apply the DOT range of plausible values of time for air travelers, as well as their point estimate for this value, to these aliens to determine the time savings

from the Form I-94 automation. Exhibit 7 shows the 2013 to 2017 travelers' reduction in time burden resulting from no longer needing to fill out the paper Form I-94. As shown, in 2013, the value

of the reduction in time burden ranged from \$54.6 million to \$81.9 million. In our primary estimate, the reduction in time burden was \$66.1 million in 2013.

EXHIBIT 7—REDUCTION IN TIME BURDEN*

	2013	2014	2015	2016	2017
Forms I-94	11,221,734	20,680,611	21,700,329	22,628,579	23,871,524
DOT—Low (\$)	36.50	36.50	36.50	36.50	36.50
DOT—Primary (\$)	44.15	44.15	44.15	44.15	44.15
DOT—High (\$)	54.75	54.75	54.75	54.75	54.75
Benefit—Low (\$)	54,608,355	100,638,110	105,600,365	110,117,513	116,166,058

* Estimates may not total due to rounding.

We next examine the savings to aliens who need a replacement Form I-94. Prior to the implementation of the interim final rule, if aliens lost the bottom portion of their Form I-94, they could file Form I-102, Application for Replacement/Initial Nonimmigrant Arrival-Departure Document, with USCIS to request a replacement. The form has a Paperwork Reduction Act

burden of 25 minutes per response and a fee of \$330. As stated earlier, prior to the implementation of the interim final rule, 17,700 Forms I-102 were filed annually. In 2013, 13,715 Forms I-102 were filed and USCIS expects 6,782 to be filed each year starting in 2014, a reduction of 10,918 each year due to this rule. Now these travelers are able to access their electronic Form I-94, which

saves these individuals 25 minutes and \$330.³² We calculate the value of this time savings using USCIS's hourly wage estimate for Form I-102 filers of \$30.74.³³ Exhibit 8 shows the time and fee cost savings for those who would otherwise have needed to file a Form I-102 from 2013 to 2017. As shown, in 2013 the value of this time and fee savings was \$1.4 million.

EXHIBIT 8—I-102 COST SAVINGS *

	2013	2014	2015	2016	2017

* Estimates may not total due to rounding. Undiscounted dollars.

Following the enactment of the interim final rule, travelers could only access their current electronic Form I-94 until they departed the United States. In response to public comments on the interim final rule, CBP has enhanced the Web site to allow travelers to access their most recent Form I-94 for 5 years from the date of issuance. In addition, the Web site now provides foreign travelers with a 5 year record of their travel history. Doing so has reduced Freedom of Information Act requests received by CBP by approximately 2 percent.

Accessing the information via the Web site can be done within minutes rather than the months it can take to

receive information from a FOIA request, which is a benefit to the traveler. In addition, this saves the CBP FOIA office time, which it can spend processing other FOIA requests. CBP is exploring whether it can expand the Web site to include travel history dating back farther than 5 years. CBP is also considering whether the Web site can be set up to include travel history for non-Form I-94 users such as U.S. citizens and legal permanent residents. CBP estimates that expanding the travel history past 5 years has reduced the number of FOIA requests received by approximately 6 percent and expanding it to include travel history for U.S. citizens and legal permanent residents

will reduce FOIA requests by an additional 20 percent.

In summary, CBP, carriers, and aliens accrue benefits as a result of this rule. CBP saves on contract and printing costs as well as FOIA processing burdens. Carriers save on printing costs. All aliens save the 8 minute time burden for filling out the paper Form I-94 and certain aliens who lose their Form I-94 save the \$330 fee and 25 minute time burden for filling out the Form I-102; and, certain aliens save processing time from the elimination of the FOIA process. Because we only expect one percent of B-1/B-2 travelers to use the Web site to access their electronic Form I-94, the benefits associated with the

³¹ For those with a need to access their electronic Form I-94, this burden relief is partially offset by the 4 minute time burden to access the Web site. The costs for this access are discussed in the costs section above.

³² As discussed in the costs section, we estimate a 4 minute time burden for travelers who need to

access their electronic Form I-94. See the cost section for a complete discussion of the costs of accessing the Web site as well as the cost to travel to a location where they can access the Web site, where necessary.

³³ USCIS estimates are based on U.S. Bureau of Labor data for occupational employment statistics.

The latest supporting statement for the I-102 is available at: http://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201206-1615-003. Accessed June 4, 2014. This supporting statement uses a wage estimate of \$30.74.

Form I-102 accrue primarily to non-B-1/B-2 travelers. Using the primary estimate for a traveler's value of time, the time burden savings for all travelers is \$5.89 per traveler. In addition, those

non-B-1/B-2 travelers who no longer need to use a Form I-102 would achieve an additional time and fee savings of \$343.81 per traveler. Exhibit 9 summarizes the benefits of air and sea

automation to each party. As shown, total benefits for this rule ranged from \$72.9 million to \$100.2 million in 2013. In our primary estimate, the benefits of this rule were \$84.3 million in 2013.

b. Benefits From Electronic Implementation at the Land Border

Under the new voluntary electronic I-94 submission process at the land border, once the traveler arrives at the port, he/she will go through secondary inspection, as they do under the paper process, where the CBP officer will locate the traveler's information through a document swipe in CBP's database. This will indicate that the fee was paid and pre-populate the data fields from the document swipe and the information provided by the traveler in the Web site. Once the CBP officer has determined the traveler's admissibility, the CBP officer will print out a paper I-94 to give to the traveler. The traveler will already have paid the fee, so once he/she has cleared the secondary inspection he/she will be able to enter the United States.

This voluntary process is purely beneficial to any traveler who opts into it. By paying the fee online, the traveler avoids an average 20 minute wait to do so at the port of entry. Using our primary estimate for the value of travel

time of \$44.15, the value of this time savings is \$14.72 per traveler. As this process is just a few months old, CBP does not have data on how many travelers will opt to answer the Form I-94 questions and pay the fee online. CBP is engaging in public outreach to notify the public of the option, but only travelers who have access to a computer or other device with internet connectivity will be able to participate. In 2015, nearly 7 million travelers arrived in the United States at the land border using a Form I-94. CBP does not yet have sufficient data on how many travelers will opt for the online fee payment option. For the purposes of this analysis, CBP estimates that 5 percent of these travelers, or approximately 350,000, will opt for the advance I-94 information submission and payment process, for a total savings to travelers of \$5,152,000. To the extent that the reduction in CBP officer time inputting data and processing fees results in shorter wait times, travelers would have additional time savings benefits.

This process would save CBP 8 minutes of data input time and 2 minutes of fee processing time, a total of 10 minutes of CBP officer time per traveler. Based on the estimate that 350,000 travelers will opt for the advance I-94 information submission and payment, and using the fully loaded wage rate of a CBP Officer of \$85.47 per hour,³⁴ we estimate that this process would save CBP officers 58,333 hours and \$4,985,750. We note that this is a time savings that is monetized for analytical purposes and not a budgetary savings. This time savings could be spent on other priorities including reducing wait times. In addition, this rule would reduce the amount of cash being handled at ports of entry, which would simplify port of entry oversight and auditing.

c. Aggregate Benefits

Exhibit 10 shows the total benefits of the rule—both the benefits of air and sea automation and the land border implementation.

* Estimates may not total due to rounding.

While this rule has a large net benefit to travelers as a whole, it is important to note that the net benefits do not accrue uniformly across all travelers. We next examine the effect of this rule on each type of traveler. Exhibit 14 summarizes the costs and benefits per traveler for each class of alien discussed in this analysis. With this rule, no traveler needs to fill out the paper Form I-94 while en route to the United States, saving all travelers 8 minutes, an estimated \$5.89 per traveler. The 1 percent of B-1/B-2 travelers and 75

percent of other foreign travelers who need to access the Web site experience a cost of \$2.95 per person because of the 4 minute time burden to access the Web site. In addition, those who need to print their Form I-94 incur a \$0.25 printing cost. Those temporary workers and aliens in the “Other/Unknown” category who need to travel to access the Web site and print their Form I-94 have an additional travel cost. They need to travel an estimated 20 miles and 60 minutes round-trip to reach a location with internet access, at a cost

of \$20.89 per traveler. We reiterate that those with obstacles to accessing their electronic Forms I-94 may request a paper Form I-94 at secondary inspection stations at ports of entry or at CBP DIS. In addition, any travelers who would otherwise need to file a Form I-102 and pay the \$330 fee to obtain a replacement Form I-94 receive an additional benefit of \$342.81 as a result of this rule. Travelers who opt for the electronic filing option receive an additional benefit of \$14.72.

EXHIBIT 15—ANNUAL EFFECT OF RULE BY CLASS OF ALIEN
[Undiscounted 2012\$] *

	8 minute time cost savings	Cost of time to access & cost to print electronic Form I-94	Travel costs	Net impact**
Travelers who do not Access Website	5.89	0	0	5.89
1 percent of Tourists and Business Travelers (B-1/B-2)	5.89	- 3.19	0	2.70
75 percent of Students	5.89	- 3.19	0	2.70
75 percent of Temporary workers	5.89	- 3.19	- 20.89	- 18.21
75 percent of Other/Unknown	5.89	- 3.19	- 20.89	- 18.21
75 percent of Diplomats	5.89	- 3.19	0	2.70

* Estimates may not total due to rounding.

** In addition to this net impact, a small number of travelers experience savings resulting from no longer needing to file a Form I-102. The primary estimate of Form I-102 cost savings to travelers is \$342.81 per traveler. We do not include the Form I-102 cost savings in the net impact column of Exhibit 14 because few travelers benefit from this compared to the overall population of travelers impacted by the rule. Based on data from USCIS, we estimate that 10,918 Form I-102s per year are no longer need to be filed as a result of this rule. This is far less than one percent of the annual population of travelers affected by the rule (10,918 Form I-102s ÷ 20,815,527 travelers in 2014 <1%).

Annualized costs and benefits to all entities affected by the rule, whether

domestic or foreign, are presented in the following accounting statement.

ACCOUNTING STATEMENT: CLASSIFICATION OF EXPENDITURES FOR U.S. ENTITIES, 2012–2017
[2012 \$]

	3% Discount rate	7% Discount rate
U.S. Costs:		
Annualized monetized costs	\$23.5 million	\$21.0 million.
Annualized quantified, but non-monetized costs.	None	None.
Qualitative (non-quantified) costs	None	None.
U.S. Benefits:		
Annualized monetized benefits	\$104.1 million	\$101.1 million.
Annualized quantified, but non-monetized benefits.	None	None.
Qualitative (non-quantified) benefits	Reduced primary inspection processing times	Reduced primary inspection processing times.

We estimate annualized costs to all entities affected by this rule to range from \$21.0 million to \$23.5 million. Monetized benefits of this rule range from \$101.9 million to \$104.1 million to

all entities. Non-quantified benefits of this rule include the reduced processing time that could result because of the automation of the Form I–94.

Annualized costs and benefits to U.S. entities are presented in the following accounting statement, as required by OMB Circular A–4.

ACCOUNTING STATEMENT: CLASSIFICATION OF EXPENDITURES FOR U.S. ENTITIES, 2012–2017
[2012 \$]

	3% Discount rate	7% Discount rate
U.S. Costs:		
Annualized monetized costs	\$0.454 million	\$0.466 million.
Annualized quantified, but non-monetized costs.	None	None.
Qualitative (non-quantified) costs	None	None.
U.S. Benefits:		
Annualized monetized benefits	\$13.5 million	\$13.3 million.
Annualized quantified, but non-monetized benefits.	None	None.
Qualitative (non-quantified) benefits	Reduced primary inspection processing times	Reduced primary inspection processing times.

We estimate annualized costs to U.S. entities as a result of this rule to range from \$0.454 million to \$0.466 million. These are CBP's costs for automating the electronic Form I–94 and developing the Web site travelers use to access their electronic Form I–94. Monetized benefits of this rule of \$13.3 million to \$13.5 million to U.S. entities (CBP and carriers) represent reduced Form I–94 printing and storage costs, reduced data entry contract costs, and reduced time costs for CBP officers. Non-quantified benefits of this rule include the reduced processing time that could result because of the automation of the Form I–94.

6. Regulatory Alternatives

In the analysis for the interim final rule, we considered two alternatives to the rule: (1) Eliminating the paper Form I–94 in the air and sea environments entirely and (2) providing the paper Form I–94 to all travelers who are not B–1/B–2 travelers. As a result of public comments on the interim final rule, we add a third alternative to our analysis: (3) Providing kiosks at major ports of entry where travelers have the option to

print their electronic Form I–94 prior to leaving the airport.

Under alternative one, if CBP were to eliminate the paper Form I–94 entirely in the air and sea environments, there are certain classes of vulnerable aliens who would be harmed. Under the rule, asylees and certain parolees are provided a paper Form I–94. These aliens have an immediate need for the Form I–94 and cannot wait to access their electronic Form I–94 from the Web site. These aliens represent a very small portion of overall international travel and providing them with a paper Form I–94 and entering the information into CBP data systems is not a significant cost to CBP. In addition, under this rule, CBP has continued to make the paper Form I–94 available to those travelers who request it at secondary inspection stations and at DIS. CBP provides this flexibility as a way to minimize the effect on those who face obstacles to accessing their electronic Form I–94.

CBP does not have statistics on the number of travelers who request a paper Form I–94. Anecdotal evidence suggests that few, if any, travelers go to a secondary inspection station or a DIS for

the purpose of obtaining a paper Form I–94. This may be because the travelers who need a paper Form I–94 do not know they need it when at the airport or because they find it more efficient to access the I–94 Web site and print the form than to go to secondary inspection or a DIS. Requesting a paper Form I–94 at one of these locations can take longer than the 4 minutes we estimate it takes to access the I–94 Web site and the 60 minutes in travel time we estimate that those with obstacles to internet access spend to obtain their Form I–94. As few aliens request a paper Form I–94 at secondary inspection stations or DIS, the cost to CBP for printing and data entry for these forms is minimal. Eliminating the paper Form I–94 option for asylees, certain parolees, and those travelers who request one would not result in a significant cost savings to CBP and would burden travelers who have an immediate need for an electronic Form I–94 or who face obstacles to accessing their electronic Form I–94.

Under alternative two, all non-B–1/B–2 travelers required to complete a Form I–94 would receive and complete the

paper Form I-94 during their inspection when they arrive in the United States. The electronic Form I-94 would still be automatically created during inspection, but the CBP officer would need to verify that the information appearing on the form matches the information in CBP's data systems. In addition, CBP would need to write the Form I-94 number on each paper Form I-94 so that their paper form matches the electronic record. As noted earlier, over four million, or 23.7 percent, aliens were non-B-1/B-2 travelers in 2012. Filling out and processing this many paper Forms I-94 at airports and seaports would increase processing times considerably and it would only provide at best small savings to the individual traveler. As noted in the "Net Benefits" section, the net cost of this rule to the 75 percent of temporary workers and those in the "Other/Unknown" category of aliens who need a printed Form I-94 is only \$18.20 per traveler. Conversely, this rule provides net benefits to travelers who do not need a printed Form I-94 and those arriving as students or diplomats.

CBP received several public comments related to the obstacles travelers face in accessing a computer to print their electronic Form I-94. Commenters said that many travelers need their Form I-94 very soon after arrival, sometimes within hours of arrival, and they may have difficulty learning that public libraries offer internet access, where public libraries are, and how to travel to a public library. An employer submitted a comment stating that company privacy standards prevent it from allowing new hires to access the internet in order to access the I-94 Web site. Separately, commenters pointed out problems with the accuracy of the Form I-94 information that prevent them from logging into the Web site. Others noted that there is no way to check their Form I-94 for accuracy at time of entry into the United States. One commenter suggested a solution to these problems: That CBP provide kiosks at the airports where foreign nationals can inspect and print their electronic Form I-94. CBP

considered this suggestion and made it an additional alternative to the rule.

Under alternative three, we consider the costs and benefits of placing kiosks at the busiest U.S. airports and seaports to allow travelers to inspect and print their electronic Form I-94 before leaving the port of entry. For the purposes of this alternative analysis, we examine the impact of placing dedicated kiosks at the busiest 20 airports and the busiest 20 seaports. These locations account for 92 percent of international air travelers and 95 percent of international sea travelers.³⁵

CBP uses kiosks at many major airports for the Global Entry program. These kiosks are dedicated for use by members of that program, but similar kiosks could be purchased to allow travelers to access the I-94 Web site and print their Form I-94. According to CBP's Office of Field Operations, kiosks would cost \$20,000 each and have an annual operations and maintenance cost of \$8,732. Placing a kiosk at each of the busiest 20 airports and the busiest 20 seaports would cost \$800,000 the first year and \$349,280 in each subsequent years.

The benefit of placing kiosks at the busiest airports and seaports depends on the number of people who would use the kiosks if they were available. CBP has no data on the extent to which travelers would choose to use the kiosks if they were available to them. As stated previously, few travelers request paper Forms I-94 upon their arrival in the United States, but that might be because doing so means going to the secondary inspection station, which can take a considerable amount of time. We also do not know how many people find errors on their electronic Forms I-94 that they could correct immediately if they were already at an airport or seaport rather than visiting a Deferred Inspection Site at a later time, though data suggests this could be a large number. In 2013, according to an analysis of data provided by CBP's Office of Field Operations, about 14 percent of unique visitors to the I-94 Web site were not able to locate their electronic Form I-94. This may have

been because of erroneous data on their Form I-94, but it could also be because they did not actually have an Form I-94 on the Web site (for example, if they are a U.S. citizen or if they already departed the country prior to accessing the Web site).

Accessing the Web site via a kiosk would take 4 minutes of a traveler's time, the same amount of time as via a personal computer. Therefore, we do not believe that those who do not currently access their electronic Forms I-94 (as stated earlier, this includes the 99 percent of B-1/B-2 travelers and 25 percent of non-B-1/B-2 travelers) would now access them via the kiosks. Similarly, those with easy computer access would experience no time savings by accessing their Form I-94 via the kiosk instead of via the Web site, so we do not include their benefits in the analysis. The travelers who would benefit from the availability of kiosks to access their electronic Form I-94 are those who would otherwise need to travel to access the internet. These travelers would no longer incur the opportunity cost of traveling 60 minutes or the mileage cost of driving 20 miles roundtrip. In our analysis above, we have estimated that 33 percent of travelers in the "Temporary Workers" and "Other/Unknown" categories of travelers would need to travel to access the internet. In 2014 (the first full year the interim final rule is in effect) this represents approximately 819,000 travelers. Since we do not know how many of these travelers would choose to use the kiosks, we present the costs and benefits (using the primary estimates for travel and mileage costs) that would accrue to these travelers under a wide range of assumptions of their kiosk use. The benefits reflect the total travel costs, including travel time and mileage, derived earlier in the analysis (See Exhibit 5). We present the reduction in travel costs (which is a benefit) that would result if different percentages of travelers use a kiosk rather than travel to a location where they can access the internet. The results of our analysis are presented in Exhibit 16.

EXHIBIT 16—COMPARISON OF KIOSK COSTS AND POTENTIAL BENEFITS

[Undiscounted 2012\$]*

	Kiosk use rate* (%)	2013	2014	2015	2016	2017
Benefits	100	9,283,113	17,107,912	17,951,467	18,719,357	19,747,575
	75	6,962,334	12,830,934	13,463,600	14,039,517	14,810,681
	50	4,641,556	8,553,956	8,975,733	9,359,678	9,873,788

³⁵ CBP's Operations Management Reporting database. Accessed June 30, 2014.

EXHIBIT 16—COMPARISON OF KIOSK COSTS AND POTENTIAL BENEFITS—Continued
[Undiscounted 2012\$]*

	Kiosk use rate * (%)	2013	2014	2015	2016	2017
	25	2,320,778	4,276,978	4,487,867	4,679,839	4,936,894
	10	928,311	1,710,791	1,795,147	1,871,936	1,974,758
	5	464,156	855,396	897,573	935,968	987,379
	1	92,831	171,079	179,515	187,194	197,476
CBP Costs			800,000	329,280	329,280	329,280

* Note that Kiosk Use Rate represents the percentage of those who would otherwise need to travel to access a computer, not total Form I-94 travelers. Only approximately 4 percent of total Form I-94 travelers need to travel to access the Web site (12 percent of travelers in the "Temporary Worker" or "Other/Unknown" categories times 33 percent of those categories who would need to travel to access the internet = 4 percent).

As shown in Exhibit 15, kiosks have a large potential for benefits if they are used by a substantial number of travelers. If 100 percent of travelers who would otherwise need to travel to access a computer used the kiosks instead, benefits would outpace the costs of the kiosks by a margin of \$17.2 million to \$0.8 million in 2014 and by more in later years. Even if only 5 percent of travelers who would otherwise need to travel to access a computer use the kiosks, benefits would exceed costs. However, based on CBP's experience with travelers requesting paper Forms I-94 at the ports of entry, CBP does not believe enough travelers would use the kiosks to merit the expense. Further, due to budget constraints, CBP does not have funds to acquire these kiosks at this time.

The Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996, requires an agency to prepare a regulatory flexibility analysis that describes the effect of a proposed rule on small entities when the agency is required to publish a general notice of proposed rulemaking. A small entity may be a small business (defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act); a small not-for-profit organization; or a small governmental jurisdiction (locality with fewer than 50,000 people). Since a notice of proposed rulemaking was not necessary, a regulatory flexibility analysis was not required. Nonetheless, DHS has considered the impact of this rule on small entities.

This rule primarily regulates individuals and individuals are not considered small entities. In addition, the individual travelers may obtain a paper Form I-94 upon request, which would eliminate the impacts of this rule

for those travelers. Employers who have internet access may choose to allow their employees to use their internet connection to access the employee's electronic Form I-94, but they are not required to do so and are therefore not directly regulated by this rule. To the extent an employer chooses to assist an employee with accessing the internet and printing a Form I-94, this impact would not rise to being an economically significant impact under the Regulatory Flexibility Act.

This rule also regulates air and sea carriers by eliminating the need for them to provide the paper Form I-94 to their passengers. This rule would impact all small carriers that transport passengers to the United States. We therefore conclude that this rule has an impact on a substantial number of small entities.

As stated in the economic impact analysis above, we estimate that carriers spend \$1.3 million a year printing and storing forms for their passengers, based on 2011 passenger volumes. In 2011, 16,586,753 Forms I-94 provided by carriers were filed at airports and seaports. Dividing these figures, we estimate that carriers spent 8 cents per form on printing and storage costs.

Under this rule, carriers would no longer need to print and store the Forms I-94, thus eliminating these costs. According to a 2013 study by the Department of Commerce's Office of Travel and Tourism Industries,³⁶ the average airline ticket price for an international traveler traveling to the United States is \$1,588. The cost to the carrier of printing a Form I-94 is less than one hundredth of one percent of the revenue a carrier receives from the

average passenger. We therefore do not believe that this rule has a significant economic impact on small entities. We also note that any impact to small carriers would be purely beneficial.

Privacy

CBP will ensure that all Privacy Act requirements and policies are adhered to in the implementation of this rule, and will be updating the Privacy Impact Assessment (PIA) for the I-94 Web site. CBP will outline in the updated PIA how CBP will ensure compliance with Privacy Act protections. In the updated PIA, CBP will explain the privacy risks and mitigations CBP has implemented during this phase of the Form I-94 automation process. DHS/CBP will post the updated PIA online at: <http://www.dhs.gov/privacy-documents-us-customs-and-border-protection>. The PIA that covers the earlier phase of Form I-94 automation, and describes how CBP complies with the Privacy Act, is available at: <https://www.dhs.gov/sites/default/files/publications/privacy/PIAs/pia-cbp-16-I-94-automation-20130227.pdf>.

Paperwork Reduction Act

The collection of information regarding the CBP Form I-94 (Arrival/Departure Record) was previously reviewed and approved by OMB in accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) under OMB Control Number 1651-0111. This OMB Control Number also includes the Electronic System for Travel Authorization (ESTA), ESTA fee, and Form I-94W, all of which are unaffected by this rule. In addition, information for the electronic Form I-94 is comprised of information already collected for APIS under approval 1651-0088. An agency may not conduct, and a person is not required to respond to, a collection of information unless the collection of

³⁶ Department of Commerce, National Travel and Tourism Office. "Profile of Overseas Travelers to the United States: 2013 Inbound." Available at http://travel.trade.gov/outreachpages/download_data_table/2013_Overseas_Visitor_Profile.pdf. Accessed July 10, 2014.

information displays a valid control number assigned by OMB.

The burden hours associated with the collections of information contained in this Final Rule were previously reviewed and approved by OMB. The automation of the paper Form I-94 for commercial aircraft and vessel passengers in accordance with this Final Rule results in a reduction of 1,278,456 annual burden hours under OMB control number 1651-0111.

Also in accordance with this Final Rule, the electronic Form I-94 is available to aliens on a secure Web site.

Passengers may log into the Web site using 7 pieces of basic identifying information that is either known to the traveler (their first name, last name and date of birth) or readily available on their passport (passport number, country of issuance, date of entry, and class of admission). The estimated annual burden associated with this Web site, is 254,680 hours under OMB control number 1651-0111.

The automation of the paper Form I-94 for commercial aircraft and vessel passengers in accordance with this Final Rule results in an estimated reduction of

10,918 Forms I-102, Application for Replacement/Initial Nonimmigrant Arrival-Departure Document, filed, and an estimated reduction of 4,541.89 burden hours under OMB control number 1615-0079.

Exhibit 16 summarizes the difference in the burden for the previous process and the process under this rule. As OMB Control Number 1651-0111 includes ESTA and Form I-94W, we include those burden hours for informational purposes. We note that these burden hours are unaffected by this rule.

EXHIBIT 16—PRA BURDEN EFFECTS OF THE RULE

BILLING CODE 9111-14-P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Parts 317 and 381

[Docket No. FSIS-2016-0048]

RIN 0583-AD05

Uniform Compliance Date for Food Labeling Regulations

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is establishing January 1, 2020, as the uniform

compliance date for new meat and poultry product labeling regulations that are issued between January 1, 2017, and December 31, 2018. FSIS periodically announces uniform compliance dates for new meat and poultry product labeling regulations to minimize the economic impact of label changes.

DATES: This rule is effective December 19, 2016. Comments on this final rule must be received on or before January 18, 2017.

ADDRESSES: FSIS invites interested persons to submit relevant comments on this final rule. Comments may be submitted by the following methods:

- *Federal eRulemaking Portal:* This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to <http://www.regulations.gov/>. Follow the online instructions at that site for submitting comments.

- *Mail, including CD-ROMs:* Send to Docket Clerk, U.S. Department of Agriculture (USDA), FSIS, OPPD, Patriots Plaza 3, 1400 Independence Avenue SW., Mailstop 3782, Room 8-163A, Washington, DC 20250-3700.

- *Hand- or courier-delivered items:* Send to Docket Clerk, U.S. Department of Agriculture (USDA), FSIS, OPPD,

Patriots Plaza 3, 355 E Street SW., Room 8-163A, Washington, DC 20250-3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS-2016-0048. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to <http://www.regulations.gov/>.

Docket: For access to background documents or comments received, go to the FSIS Docket Room at Patriots Plaza 3, 355 E Street SW., Room 8-164, Washington, DC 20250-3700 between 8:00 a.m. and 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Rosalyn Murphy-Jenkins, Director, Labeling and Program Delivery Division, Office of Policy and Program Development, Food Safety and Inspection Service, U.S. Department of Agriculture, Telephone: 301-504-0879.

SUPPLEMENTARY INFORMATION:

Background

FSIS periodically issues regulations that require changes in the labeling of meat and poultry food products. Many meat and poultry establishments also produce non-meat and non-poultry food

products that are subject to the jurisdiction of the Food and Drug Administration (FDA). FDA also periodically issues regulations that require changes in the labeling of products under its jurisdiction.

On December 14, 2004, FSIS issued a final rule that established January 1, 2008, as the uniform compliance date for new meat and poultry labeling regulations issued between January 1, 2005, and December 31, 2006. The 2004 final rule also provided that the Agency would set uniform compliance dates for new labeling regulations in 2-year increments and periodically issue final rules announcing those dates. Consistent with that final rule, the Agency has published five final rules establishing the uniform compliance dates of January 1, 2010, January 1, 2012, January 1, 2014, January 1, 2016, and January 1, 2018 (72 FR 9651, 73 FR 75564, 75 FR 71344, 77 FR 76824, and 79 FR 71007).

The Final Rule

This final rule establishes January 1, 2020, as the uniform compliance date for new meat and poultry product labeling regulations that are issued between January 1, 2017 and December 31, 2018, and is consistent with the previous final rules that established uniform compliance dates. In addition, FSIS's approach for establishing uniform compliance dates for new food labeling regulations is consistent with FDA's approach. FDA is also planning to publish a final rule establishing a new compliance date.

Two-year increments enhance the industry's ability to make orderly adjustments to new labeling requirements without unduly exposing consumers to outdated labels. With this approach, the meat and poultry industry is able to plan for use of label inventories and to develop new labeling materials that meet the requirements of all labeling regulations made within the two year period, thereby minimizing the economic impact of labeling changes.

This compliance approach also serves consumer's interests because the cost of multiple short-term label revisions that would otherwise occur would likely be passed on to consumers in the form of higher prices.

FSIS encourages meat and poultry companies to comply with new labeling regulations as soon as it is feasible. If companies initiate voluntary label changes, they should consider incorporating any new requirements that have been published as final regulations.

The new uniform compliance date will apply only to final FSIS regulations

that require changes in the labeling of meat and poultry products and that are published after January 1, 2017, and before December 31, 2018. For each final rule that requires changes in labeling, FSIS will specifically identify January 1, 2020, as the compliance date. All meat and poultry food products that are subject to labeling regulations promulgated between January 1, 2017, and December 31, 2018, will be required to comply with these regulations on products introduced into commerce on or after January 1, 2020. If any food labeling regulation involves special circumstances that justify a compliance date other than January 1, 2020, the Agency will determine an appropriate compliance date and will publish that compliance date in the rulemaking.

In rulemaking that began with the May 4, 2004, proposed rule, FSIS provided notice and solicited comment on the concept of establishing uniform compliance dates for labeling requirements (69 FR 24539). In the March 5, 2007, final rule, FSIS noted that the Agency received only four comments in response to the proposal, all fully supportive of the policy to set uniform compliance dates. Therefore, in the March 5, 2007, final rule, FSIS determined that further rulemaking for the establishment of uniform compliance dates for labeling requirements is unnecessary (72 FR 9651). The Agency did not receive comments on the 2007 final rule, and the comments FSIS received on the 2012 final rule on the uniform compliance date were outside the scope of the rule (77 FR 76824). Consistent with its statement in 2007, FSIS finds at this time that further rulemaking on this matter is unnecessary. However, FSIS is providing an opportunity for comment on the uniform compliance date established in this final rule.

Executive Order 12988

This final rule has been reviewed under the Executive Order 12988, Civil Justice Reform. Under this final rule: (1) All state and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) no retroactive proceedings will be required before parties may file suit in court challenging this rule.

Executive Orders 12866 and 13563 and the Regulatory Flexibility Act

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits

(including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order (E.O.) 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This final rule has been reviewed under E.O. 12866. The Office of Management and Budget (OMB) has determined that it is a not significant regulatory action under section 3(f) of E.O. 12866 and, therefore, it has not been reviewed by OMB.

This rule does not have a significant economic impact on a substantial number of small entities; consequently, a regulatory flexibility analysis is not required (5 U.S.C. 601–612).

Paperwork Requirements

There are no paperwork or recordkeeping requirements associated with this policy under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E-Government Act Compliance

FSIS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, *et seq.*) by, among other things, promoting the use of the Internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

USDA Nondiscrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf, or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email:

Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW., Washington, DC 20250–9410.

Fax: (202) 690–7442

Email: program.intake@usda.gov.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.), should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

Additional Public Notification

FSIS will announce this rule online through the FSIS Web page located at http://www.fsis.usda.gov/regulations_and_policies/Interim_and_Final_Rules/index.asp.

FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included. The Update is also available on the FSIS Web page. In addition, FSIS offers an electronic mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at http://www.fsis.usda.gov/News_and_Events/Email_Subscription/. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

Dated: December 14, 2016.

Alfred V. Almanza,
Acting Administrator.

BILLING CODE 3410-DM-P

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R-1553]

RIN 7100-AE63

Regulation D; Reserve Requirements of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending Regulation D, Reserve Requirements of Depository Institutions, to reflect the annual indexing of the reserve requirement exemption amount and the

low reserve tranche for 2017. The Regulation D amendments set the amount of total reservable liabilities of each depository institution that is subject to a zero percent reserve requirement in 2017 at \$15.5 million (up from \$15.2 million in 2016). This amount is known as the reserve requirement exemption amount. The Regulation D amendments also set the amount of net transaction accounts at each depository institution (over the reserve requirement exemption amount) that is subject to a three percent reserve requirement in 2017 at \$115.1 million (up from \$110.2 million in 2016). This amount is known as the low reserve tranche. The adjustments to both of these amounts are derived using statutory formulas specified in the Federal Reserve Act.

The Board is also announcing changes in two other amounts, the nonexempt deposit cutoff level and the reduced reporting limit, that are used to determine the frequency at which depository institutions must submit deposit reports.

DATES: Effective date: January 18, 2017.

Compliance dates: The new low reserve tranche and reserve requirement exemption amount will apply to the fourteen-day reserve maintenance period that begins January 19, 2017. For depository institutions that report deposit data weekly, this maintenance period corresponds to the fourteen-day computation period that begins December 20, 2016. For depository institutions that report deposit data quarterly, this maintenance period corresponds to the seven-day computation period that begins December 20, 2016. The new values of the nonexempt deposit cutoff level, the reserve requirement exemption amount, and the reduced reporting limit will be used to determine the frequency at which a depository institution submits deposit reports effective in either June or September 2017.

FOR FURTHER INFORMATION CONTACT: Clinton N. Chen, Attorney (202/452-3952), Legal Division, or Ezra A. Kidane, Financial Analyst (202/973-6161), Division of Monetary Affairs; for users of Telecommunications Device for the Deaf (TDD) only, contact (202/263-4869); Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Section 19(b)(2) of the Federal Reserve Act (12 U.S.C. 461(b)(2)) requires each depository institution to maintain reserves against its transaction accounts and nonpersonal time deposits, as prescribed by Board regulations, for the

purpose of implementing monetary policy. Section 11(a)(2) of the Federal Reserve Act (12 U.S.C. 248(a)(2)) authorizes the Board to require reports of liabilities and assets from depository institutions to enable the Board to conduct monetary policy. The Board's actions with respect to each of these provisions are discussed in turn below.

Reserve Requirements

Pursuant to section 19(b) of the Federal Reserve Act (Act), transaction account balances maintained at each depository institution are subject to reserve requirement ratios of zero, three, or ten percent. Section 19(b)(11)(A) of the Act (12 U.S.C. 461(b)(11)(A)) provides that a zero percent reserve requirement shall apply at each depository institution to total reservable liabilities that do not exceed a certain amount, known as the reserve requirement exemption amount. Section 19(b)(11)(B) provides that, before December 31 of each year, the Board shall issue a regulation adjusting the reserve requirement exemption amount for the next calendar year if total reservable liabilities held at all depository institutions increase from one year to the next. No adjustment is made to the reserve requirement exemption amount if total reservable liabilities held at all depository institutions should decrease during the applicable time period. The Act requires the percentage increase in the reserve requirement exemption amount to be 80 percent of the increase in total reservable liabilities of all depository institutions over the one-year period that ends on the June 30 prior to the adjustment.

Total reservable liabilities of all depository institutions increased by 2.3 percent, from \$7,477 billion to \$7,648 billion between June 30, 2015, and June 30, 2016. Accordingly, the Board is amending Regulation D to set the reserve requirement exemption amount for 2017 at \$15.5 million, an increase of \$0.3 million from its level in 2016.¹

Pursuant to Section 19(b)(2) of the Act (12 U.S.C. 461(b)(2)), transaction account balances maintained at each depository institution over the reserve requirement exemption amount and up to a certain amount, known as the low reserve tranche, are subject to a three percent reserve requirement. Transaction account balances over the low reserve tranche are subject to a ten percent reserve requirement. Section

¹ Consistent with Board practice, the low reserve tranche and reserve requirement exemption amounts have been rounded to the nearest \$0.1 million.

19(b)(2) also provides that, before December 31 of each year, the Board shall issue a regulation adjusting the low reserve tranche for the next calendar year. The Act requires the adjustment in the low reserve tranche to be 80 percent of the percentage increase or decrease in total transaction accounts of all depository institutions over the one-year period that ends on the June 30 prior to the adjustment.

Net transaction accounts of all depository institutions increased 5.5 percent, from \$2,064 billion to \$2,178 billion between June 30, 2015 and June 30, 2016. Accordingly, the Board is amending Regulation D to increase the low reserve tranche for net transaction accounts by \$4.9 million, from \$110.2 million for 2016 to \$115.1 million for 2017.

The new low reserve tranche and reserve requirement exemption amount will be effective for all depository institutions for the fourteen-day reserve maintenance period beginning Thursday, January 19, 2017. For depository institutions that report deposit data weekly, this maintenance period corresponds to the fourteen-day computation period that begins December 20, 2016. For depository institutions that report deposit data quarterly, this maintenance period corresponds to the seven-day computation period that begins December 20, 2016.

2. Deposit Reports

Section 11(b)(2) of the Federal Reserve Act authorizes the Board to require depository institutions to file reports of their liabilities and assets as the Board may determine to be necessary or desirable to enable it to discharge its responsibility to monitor and control the monetary and credit aggregates. The Board screens depository institutions each year and assigns them to one of four deposit reporting panels (weekly reporters, quarterly reporters, annual reporters, or nonreporters). The panel assignment for annual reporters is effective in June of the screening year; the panel assignment for weekly and quarterly reporters is effective in September of the screening year.

In order to ease reporting burden, the Board permits smaller depository institutions to submit deposit reports less frequently than larger depository institutions. The Board permits depository institutions with net transaction accounts above the reserve requirement exemption amount but total transaction accounts, savings deposits, and small time deposits below a specified level (the “nonexempt deposit

cutoff”) to report deposit data quarterly. Depository institutions with net transaction accounts above the reserve requirement exemption amount and with total transaction accounts, savings deposits, and small time deposits greater than or equal to the nonexempt deposit cutoff are required to report deposit data weekly. The Board requires certain large depository institutions to report weekly regardless of the level of their net transaction accounts if the depository institution’s total transaction accounts, savings deposits, and small time deposits exceeds or is equal to a specified level (the “reduced reporting limit”). The nonexempt deposit cutoff level and the reduced reporting limit are adjusted annually, by an amount equal to 80 percent of the increase, if any, in total transaction accounts, savings deposits, and small time deposits of all depository institutions over the one-year period that ends on the June 30 prior to the adjustment.

From June 30, 2015 to June 30, 2016, total transaction accounts, savings deposits, and small time deposits at all depository institutions increased 5.8 percent, from \$10,807 billion to \$11,433 billion. Accordingly, the Board is increasing the nonexempt deposit cutoff level by \$19.3 million to \$436.2 million in 2017 (from \$416.9 million for 2016). The Board is also increasing the reduced reporting limit by \$88 million to \$1.989 billion for 2017 (from \$1.901 billion in 2016).²

Beginning in 2017, the boundaries of the four deposit reporting panels will be defined as follows. Those depository institutions with net transaction accounts over \$15.5 million (the reserve requirement exemption amount) or with total transaction accounts, savings deposits, and small time deposits greater than or equal to \$1.989 billion (the reduced reporting limit) are subject to detailed reporting, and must file a Report of Transaction Accounts, Other Deposits and Vault Cash (FR 2900 report) either weekly or quarterly. Of this group, those with total transaction accounts, savings deposits, and small time deposits greater than or equal to \$436.2 million (the nonexempt deposit cutoff level) are required to file the FR 2900 report each week, while those with total transaction accounts, savings deposits, and small time deposits less than \$436.2 million are required to file the FR 2900 report each quarter. Those depository institutions with net transaction accounts less than or equal

² Consistent with Board practice, the nonexempt deposit cutoff level has been rounded to the nearest \$0.1 million, and the reduced reporting limit has been rounded to the nearest \$1 million.

to \$15.5 million (the reserve requirement exemption amount) and with total transaction accounts, savings deposits, and small time deposits less than \$1.989 billion (the reduced reporting limit) are eligible for reduced reporting, and must either file a deposit report annually or not at all. Of this group, those with total deposits greater than \$15.5 million (but with total transaction accounts, savings deposits, and small time deposits less than \$1.989 billion) are required to file the Annual Report of Deposits and Reservable Liabilities (FR 2910a) report annually, while those with total deposits less than or equal to \$15.5 million are not required to file a deposit report. A depository institution that adjusts reported values on its FR 2910a report in order to qualify for reduced reporting will be shifted to an FR 2900 reporting panel.

Notice and Regulatory Flexibility Act. The provisions of 5 U.S.C. 553(b) relating to notice of proposed rulemaking have not been followed in connection with the adoption of these amendments. The amendments involve expected, ministerial adjustments prescribed by statute and by the Board’s policy concerning reporting practices. The adjustments in the reserve requirement exemption amount, the low reserve tranche, the nonexempt deposit cutoff level, and the reduced reporting limit serve to reduce regulatory burdens on depository institutions. Accordingly, the Board finds good cause for determining, and so determines, that notice in accordance with 5 U.S.C. 553(b) is unnecessary. Consequently, the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601, do not apply to these amendments.

List of Subjects in 12 CFR Part 204

Banks, banking, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Board is amending 12 CFR part 204 as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS (REGULATION D)

- 1. The authority citation for part 204 continues to read as follows:

Authority: 12 U.S.C. 248(a), 248(c), 371a, 461, 601, 611, and 3105.

- 2. Section 204.4(f) is revised to read as follows:

§ 204.4 Computation of required reserves.

* * * * *

(f) For all depository institutions, Edge and Agreement corporations, and United States branches and agencies of

foreign banks, required reserves are computed by applying the reserve requirement ratios below to net

transaction accounts, nonpersonal time deposits, and Eurocurrency liabilities of

the institution during the computation period.

Reservable liability	Reserve requirement
Net Transaction Accounts:	
\$0 to reserve requirement exemption amount (\$15.5 million)	0 percent of amount.
Over reserve requirement exemption amount (\$15.5 million) and up to low reserve tranche (\$115.1 million).	3 percent of amount.
Over low reserve tranche (\$115.1 million)	\$2,988,000 plus 10 percent of amount over \$115.1 million.
Nonpersonal time deposits	0 percent.
Eurocurrency liabilities	0 percent.

By order of the Board of Governors of the Federal Reserve System, acting through the Director of the Division of Monetary Affairs under delegated authority, October 26, 2016.

Robert deV. Frierson,

Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL HOUSING FINANCE BOARD

12 CFR Part 955

FEDERAL HOUSING FINANCE AGENCY

12 CFR Parts 1201, 1267, 1268, and 1281

RIN 2590–AA69

Acquired Member Assets

AGENCY: Federal Housing Finance Board; Federal Housing Finance Agency.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Agency (FHFA) is issuing this final rule to reorganize and relocate the current regulation governing the Federal Home Loan Banks' (Banks) Acquired Member Asset (AMA) programs. More significantly, as required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), it removes and replaces references in the current regulation to, and requirements based on, ratings issued by a Nationally Recognized Statistical Ratings Organization (NRSRO). It also provides a Bank greater flexibility in choosing the model it can use to estimate the credit enhancement required for AMA loans. Additionally, the final rule adds a provision allowing a Bank to authorize the transfer of mortgage servicing rights on AMA loans to any institution, including a nonmember of the Federal Home Loan Bank System (Bank System). The final rule allows the Banks to acquire mortgage loans that exceed the conforming loan limits if they are guaranteed or insured by a department

or agency of the U.S. government. The final rule excludes a proposed provision that would have eliminated the use of private, loan-level, supplemental mortgage insurance (SMI) in the member credit enhancement structure required by the AMA regulation, but does require Banks to establish financial and operational standards that insurers must meet to be qualified to provide insurance on AMA loans. Finally, the final rule deletes some obsolete provisions from the current regulation, and clarifies certain other provisions.

DATES: The final rule is effective January 18, 2017.

SUPPLEMENTARY INFORMATION:

I. Background

A. The Bank System

The eleven Banks are wholesale financial institutions organized under the Federal Home Loan Bank Act (Bank Act).¹ The Banks are cooperatives; only members of a Bank may purchase the capital stock of a Bank, and only members or certain eligible housing associates (such as state housing finance agencies) may obtain access to secured loans, known as advances, or other products provided by a Bank.² Each Bank serves the public interest by enhancing the availability of residential credit through its member institutions. Any eligible institution (generally, a federally insured depository institution

or state-regulated insurance company) may become a member of a Bank if it satisfies certain criteria and purchases a specified amount of the Bank's capital stock.³ As government-sponsored enterprises (GSEs), the Banks have certain privileges under federal law, which allow them to borrow funds at spreads over the rates on U.S. Treasury securities of comparable maturity that are narrower than those available to corporate borrowers generally. The Banks pass along a portion of their funding advantage to their members and housing associates—and ultimately to consumers—by providing advances⁴ and other financial services at rates that would not otherwise be available to their members. Among those financial services are the Banks' AMA programs, under which the Banks provide financing for members' housing finance activities by purchasing mortgage loans that meet the requirements of the AMA regulation.

B. Overview of the Existing AMA Regulation

The current AMA regulation has been in effect since July 2000. It authorizes the Banks to acquire certain assets (principally, conforming residential mortgage loans) from their members and housing associates as a means of advancing their housing finance mission, and prescribes the parameters within which the Banks may do so.

The core of the current AMA regulation is a three-part test, which establishes the requirements for a mortgage loan or other asset to qualify as AMA. The three-part test embodies the underlying policy regarding the acquisition of mortgages and other eligible AMA assets by the Banks. First, the asset requirement establishes that assets must be whole conforming mortgage loans, certain interests in such loans, whole loans secured by

³ See 12 U.S.C. 1424; 12 CFR part 1263.

⁴ Members are required to pledge specific collateral, mainly mortgages or other real estate related assets, to secure any advance taken down from a Bank. See 12 CFR 1266.7.

¹ See 12 U.S.C. 1423, 1432(a).

² See 12 U.S.C. 1426(a)(4), 1430(a), 1430b.

manufactured housing, certain state and local housing finance agency (HFA) bonds, and certain other assets that qualify as eligible collateral for a Bank advance. Second, assets must meet a member nexus requirement, meaning that a Bank must acquire the AMA assets from a member or housing associate that is a participating financial institution⁵ in the Bank's AMA program or that of another Bank. In either case, the assets acquired by a Bank must be originated or held for a valid business purpose by a participating financial institution (or an affiliate thereof). Finally, to meet the credit risk-sharing requirement, a Bank must structure its AMA products such that a substantial portion of the associated credit risk of the acquired asset is borne by a participating financial institution.

C. The Proposed Rule

The Federal Housing Finance Board (Finance Board)⁶ adopted the current AMA regulation in July 2000, and neither the Finance Board nor FHFA subsequently has amended the regulation. FHFA issued the proposed rule in part to incorporate the AMA provisions into its own regulations and in part to give effect to section 939A of the Dodd-Frank Act, which requires federal agencies to remove from their regulations all references to, or requirements based on, ratings issued by NRSROs.⁷ To comply with the Dodd-Frank Act requirements, the proposed rule would have eliminated the existing requirement for the Banks' members to credit enhance the AMA assets to specific NRSRO rating levels. Instead, the proposal would have required the Banks to establish a level of credit enhancement for each AMA product, using models and methodologies of their own choosing.

The proposed rule also contemplated making a number of other substantive changes, which would have: (1) Added several credit enhancement model-related provisions; (2) allowed for the transfer of servicing on AMA loans to

nonmembers, so long as the transfer did not cause the associated mortgage loan to cease to comply with the requirements of the AMA rule; (3) allowed for federal insurance or guarantees to provide the required credit enhancement, and eliminated the requirement for a member to bear the risk of loss from unreimbursed servicing expenses; (4) removed the provisions that allow for the use of SMI or pool insurance as part of the credit enhancement structure; (5) generally prohibited Banks from acquiring loans made to any insiders of the Bank or of the selling institution; and (6) added a new "grandfather" provision to allow a Bank to continue to hold AMA loans acquired as AMA products that the Finance Board or FHFA previously authorized.

Additionally, FHFA asked for comments relating to three specific issues. First, FHFA asked whether the regulation should continue to limit the size of AMA loans to those that meet the conforming loan limits and, more broadly, on any issues related to a Bank's purchase of AMA loans on properties located in designated high-cost areas. Second, FHFA asked whether FHFA should continue to authorize the purchase of AMA loans on manufactured housing that were deemed to be chattel loans under state law. Third, FHFA asked for comments related to the use and importance of SMI and pool insurance in credit enhancement structures that were acceptable under the regulation. FHFA specifically asked what type of standards should replace those in the current AMA regulation, which are based on an insurer's NRSRO rating, and how a Bank might evaluate the claims-paying ability of an insurer in the absence of a specific NRSRO credit rating requirement. FHFA also requested comments on whether, if it were to adopt specific requirements in the rule for SMI providers, such requirements also should apply to private mortgage insurance (PMI) providers.

In developing the proposed rule, FHFA retained the key policies underlying the original AMA regulation, which the Finance Board adopted in 2000, after the courts had upheld the authority of the Finance Board to permit the Banks to engage in this activity.⁸ More specifically, the proposed rule retained the Finance Board's determination that the acquisition of AMA loans is the functional equivalent

of making advances such that it: (1) Allows the member or housing associate to use its eligible assets to access liquidity for further mission-related lending; and (2) requires all, or a material portion of, the credit risk attached to the mortgage assets to be borne by the member or housing associate.

FHFA also carried forward in the proposed rule the basic tenet of the current AMA regulation, which is that the Banks and their members each take advantage of their respective core competencies. As such, current AMA requirements allow members to do what they do best (manage their customer relationship) and for the Banks to do what they do best (manage the interest rate risk associated with those loans).⁹ The proposed rule also maintained the basic AMA credit risk-sharing structure of the current regulation, which the Finance Board purposefully designed to mirror the risk allocation of advances. Specifically, when a Bank extends an advance to a member, the member is exposed to the credit risk (on the housing assets that the advances ultimately support), and the Bank is exposed to the interest rate risk associated with funding the advance. Under the current AMA regulation, the Bank and its member similarly allocate the interest rate risk and credit risk associated with funding and holding mortgage loans whenever a member sells the Bank an AMA loan.¹⁰

The current AMA rule's "three-part test" also embodies additional underlying policy determinations related to the acquisition of mortgage assets by Banks. The asset requirement, *i.e.*, limiting AMA to loans that do not exceed the conforming loan limit, addresses mission issues and establishes a level playing field among the Banks, Federal National Mortgage Association (Fannie Mae), and Federal Home Loan Mortgage Corporation (Freddie Mac) with respect to the types of residential mortgages loans eligible for purchase. The member or housing associate nexus requirement, *i.e.*, limiting the potential sellers of AMA to a Bank member or housing associate, ensures that the Banks do not extend the benefits of their GSE status to institutions that are not part of the Bank System, thus aligning

⁵ A participating financial institution is a member or housing associate approved by a Bank to sell mortgage loans to the Bank or otherwise participate in its AMA program.

⁶ The Finance Board was regulator for the Bank System prior to the creation of FHFA in 2008, at which time supervisory and oversight responsibilities for the Bank System were transferred to FHFA. By statute, the Finance Board regulations, including the existing AMA regulations, remain in effect until such time as FHFA acts to modify or supersede them. See 12 U.S.C. 4511 note.

⁷ See 15 U.S.C. 78o-7. Although FHFA cannot include within its regulations requirements based on NRSRO ratings, the Dodd-Frank Act does not prohibit the Banks from using such ratings in conducting their business.

⁸ See *Texas Savings and Community Bankers Association v. Federal Housing Finance Board*, 201 F.3d 551 (5th Cir. 2000) (*hereinafter Texas Savings*).

⁹ Although the AMA regulation requires the member to bear a significant amount of the credit risk (which may be accomplished through a variety of ways), the Bank remains exposed to some credit risk from those loans.

¹⁰ The advance and AMA risk-allocation structures are different from the risk-allocation structure used by Fannie Mae and Freddie Mac, whereby they are exposed to the credit risk and sell the interest rate risk.

the program with the cooperative structure of the System. The credit risk-sharing requirement encourages members or housing associates to use sound underwriting practices by requiring them to retain a material exposure to the credit risk associated with the mortgage assets sold to the Bank.

The underlying policy considerations embodied in the current and proposed AMA rule are also closely aligned with the legal reasoning that supported the Finance Board's initial authorization of the mortgage loan purchase pilot program, an approval that predated adoption of the AMA regulation. Although the Federal Home Loan Bank Act (Bank Act) does not specifically authorize a Bank to purchase mortgage loans, the Finance Board determined that the authority conferred by section 11(e) of the Bank Act, which authorizes a Bank to carry out activities that are incidental to those specifically authorized by the Bank Act, provided authority for the Banks to purchase mortgage loans from their members.¹¹ Certain parties challenged the Finance Board's approval of the pilot program, but the Fifth Circuit Court of Appeals agreed with the Finance Board that the incidental powers provision of the Bank Act provided authority for the mortgage purchase program and upheld the Finance Board approval of the program.¹²

In reaching its conclusion, the court considered the Finance Board's determination that a Bank's purchase of mortgages from its members involved an activity that was incidental to the Banks' housing finance mission and represented another method by which the Banks could act as a reservoir of liquidity for members' housing finance lending, albeit in a manner that was "technically more sophisticated than, yet functionally similar to, that which occur[red] when a [Bank] makes an advance."¹³ The court also determined that the Finance Board had authority to define the scope of the incidental powers provision, given its ambiguity, and that the Finance Board's construction of that power with regard to the mortgage purchase pilot program was permissible because it was consistent with the structure and purpose of the Bank Act. In particular, the court noted that under the pilot program, the Banks used their access to low-cost funds in capital markets in an effort to improve the level of housing finance. The basic structure and

requirements for the mortgage purchase pilot program reviewed by the court later formed the basis for the specific provisions of the current AMA regulation, including the core three-part test.

D. Overview of Comments on the Proposed Regulation

The proposed rule provided a comment period of 120 days, which closed on April 15, 2016. FHFA received 65 comment letters on the proposed rule, two of which were not responsive to issues raised by the proposed rule. FHFA reviewed every comment letter and considered all of the comments in developing the final rule.

Approximately three-quarters of the commenter letters came from Bank System members, most of whom filed a substantively similar letter. The eleven Banks filed a joint letter. Eight of the nine Banks that offer the Mortgage Partnership Finance (MPF) program to their members also filed a separate joint letter, which addressed issues beyond those addressed by the joint letter from the eleven Banks. FHFA also received letters from trade associations, including the American Bankers Association, five state banking associations, an association of mortgage insurers, and one mortgage insurance company.

Taken as a whole, the comments requested changes to the proposed rule that would be at odds with the existing policy and legal principles underlying the three-part test. Some commenters suggested that Banks be permitted to purchase loans from institutions that are not Bank System members, which would effectively extend the benefits of membership to institutions that cannot become members and thus cannot receive advances from the Banks. Further, some commenters suggested Banks be permitted to create their own risk-sharing structures under which members would not necessarily be required to retain a meaningful exposure to the credit risk associated with the mortgage loans they sold to the Banks under AMA programs. None of these comments provided a reasoned analysis addressing how their proposed revisions to the proposed rule would be consistent with the legal and policy determinations on which the current regulation is predicated. After considering these comments, FHFA has determined not to alter the basic three-part test for AMA, as set forth in the proposed rule, which remains the most appropriate means of ensuring that the AMA programs operate consistently with the Banks' legal authority and with the policy and safety and soundness

goals established by the Finance Board. These goals include limiting the benefits of GSE funding to those institutions that Congress has authorized for membership or for housing associate status, which is consistent with the cooperative nature of the Bank System, and that members maintain a degree of financial "skin-in-the game" with regard to AMA assets, which helps to ensure that loans are well underwritten, protects the Banks against the expected credit risk associated with the purchased assets, and is consistent with the sharing of financial risks that are present when Banks make advances to their members.

The comments also generally opposed FHFA's proposal to remove the option of allowing SMI or pool insurance as part of the credit enhancement structure, even though no AMA products currently use that option. They further opposed the imposition of any requirements on a Bank's ability to buy loans on which any director, officer, employee, attorney, or agent of a Bank, or of the selling member institution, was the borrower. Several commenters advocated allowing the Banks to buy AMA loans with principal balances that exceed the conforming loan limits applicable to Fannie Mae and Freddie Mac, while others made a number of specific technical suggestions for changes to language of proposed rule provisions.

The primary comments regarding each of the substantive aspects of the proposed rule, as well as FHFA's responses to some of those comments, are discussed below. Comments addressing specific rule provisions are discussed in part II of **SUPPLEMENTARY INFORMATION**, which describes the final rule in detail and the ways in which it differs from the proposed rule.

1. Comments on the Definitions

Commenters recommended that FHFA make a number of technical suggestions to several of the definitions in the proposed rule. Some commenters suggested that FHFA revise the proposed definition of "AMA product" to exclude loans that the Banks acquire and hold temporarily until they aggregate a sufficient number of loans to transfer the loans to another entity, such as is done under certain off-balance sheet programs.

Other comments suggested that FHFA revise the proposed definition of "investment quality" to capture the unique characteristics of the mortgage loans acquired for the AMA program. These Banks pointed out that they acquire AMA loans over time with the expectation that a certain number of

¹¹ See 12 U.S.C. 1431(e).

¹² See, *Texas Savings*, 201 F.3d at 551.

¹³ *Id.* at 554–555.

such loans will become delinquent or go into default. Thus, even if credit enhancements were to allow a Bank to recoup full repayment of principal for a particular loan, the payments received on such a loan may not be “timely” as required by the proposed definition. Moreover, the commenters noted that the models used by the Banks to calculate the credit enhancement and pricing for a particular AMA loan already take into account the expected delinquencies and defaults for the loan pool as a whole.

Commenters also suggested that FHFA revise the proposed definition of “participating financial institution” to reflect that an institution may participate in an AMA program in more than one way, *i.e.*, as a seller, servicer, or credit enhancer of the AMA assets, but not necessarily all of these activities. The proposed definition would have included only those members that the Bank had approved to sell loans into an AMA program and, therefore, would not have captured the full set of potential participating financial institutions.

Commenters further suggested that FHFA change the proposed definition of “pool” to reflect that FHFA has allowed Banks to offer AMA products for which they aggregate loans that have been purchased from different sellers into a single pool. The proposed definition had implied that a pool would include only those loans sold by a single seller under a single master commitment.

2. Comments on the Authorization of AMA

Section 1268.2 of the proposed rule would have authorized the Banks to invest in assets that qualify as AMA under the terms of the proposed rule, but also would have added a provision regarding “grandfathered transactions,” meaning those authorized under the current AMA regulation.

Commenters suggested that FHFA expand the proposed grandfather provision to include any purchase of mortgage loans pursuant to any AMA purchase commitment agreements that remained open as of the effective date of any final rule. They suggested that FHFA make this change to address the possibility that any of the previously approved AMA products might not comply with the requirements of the final rule. The commenters, however, did not identify any specific category of current AMA loans or products to which these requested changes could apply, and did not identify which of FHFA’s proposed changes to the rule might conceivably cause any active AMA products or structures to fail to comply with the final rule.

A number of commenters urged FHFA to include within the final rule a provision allowing the Banks to sell AMA loans, or participation interests therein, to other Banks and to Bank members, including members of other Bank districts. They also asked FHFA to allow the sale of AMA loans and pools or interests in such loans or pools to any party—not just members. The commenters noted that any such sales would reduce a Bank’s exposure to market risk and free up resources for additional purchases. Commenters also asked that FHFA allow the Banks the flexibility to design other means to transfer risk associated with AMA purchase to third parties, apart from sales of the loans or interests in the loans. None of these comments provided specific requirements or suggestions for structuring such sales or any analyses of compliance issues that may arise under other regulatory requirements that could apply to such sales, including issues that could arise under federal securities laws or the risk retention rule for asset securitizations.¹⁴ Given the lack of specifics provided, FHFA has not altered the proposed rule in response to any of these comments, but notes that nothing in the current or proposed rule would prevent a Bank from selling AMA loans or developing a program to transfer risk on those loans to third parties. Any such transactions, however, would likely require that the Banks obtain FHFA approval under the new business activity regulation, which would also require that the Banks demonstrate that they have the legal authority under the Bank Act to undertake the proposed activity. Given that an assessment of the legal authority and risks associated with any such proposed transactions is apt to depend significantly on the particular facts of each proposal, FHFA does not believe that it would be appropriate to provide a general authorization for such as part of this rulemaking. Instead, FHFA expects that it would be more appropriate to identify and assess any legal, regulatory, or policy issues associated with such proposals after a Bank has devoted the time and resources to develop a specific structure and identify the market for such transactions.

3. Comments on the Asset Requirement

The proposed rule at § 1268.3(a)(1) retained the current prohibition on the Banks acquiring AMA loans that exceed the conforming loan limits. In proposing the rule, FHFA expressly asked for comments regarding loan size, including

any issues related to a Bank’s purchase of loans in designated high-cost areas, as well as whether FHFA should continue to limit the size of AMA loans to those that meet the conforming loan limits.¹⁵ A few commenters supported allowing the Banks to acquire loans that exceed the conforming loan limits, while one commenter opposed that change, and others supported the change, provided that the nonconforming loans were limited to those that are guaranteed or insured by a department or agency of the U.S. government.

The proposed rule would have added new provisions at §§ 1268.3(a)(3) and (b) to restrict the Banks from acquiring as AMA any mortgage loans that had been made to a director, officer, employee, attorney, or agent of the Bank or of the selling institution unless the Bank’s board of directors specifically approved such a purchase and FHFA endorsed the Bank’s resolution. The Bank Act generally prohibits the Banks from accepting such mortgage loans as collateral for advances.¹⁶ FHFA had proposed extending the substance of that provision to the AMA programs, reasoning that a statutory prohibition on taking a security interest in such loans logically should apply as well to the purchase of those same loans because ownership of the loan confers on the Bank a greater interest in the loan, along with the attendant risks, than does the acquisition of a security interest in the same loan. Nearly every comment letter FHFA received requested that FHFA remove the proposed provision from the final rule. Generally, commenters noted that participating financial institutions underwrite loans to such persons to the same standards as all other AMA loans, and, therefore, there is little likelihood that persons employed by the Bank or its members will obtain mortgage loans on favorable terms that might expose the Bank to increased credit risk. Accordingly, those commenters urged FHFA to permit the Banks to purchase the loans without restriction.

The proposed rule at § 1268.3(b) would have continued to authorize the Banks to purchase as AMA manufactured housing loans regardless of whether such housing qualifies as real property under state law, which would include as AMA chattel loans on manufactured housing. FHFA requested specific comments on this provision.¹⁷ A couple of commenters urged FHFA to retain this provision in the final rule, contending that manufactured housing fulfills a need for affordable housing

¹⁵ See Proposed Rule, 80 FR at 78691.

¹⁶ See 12 U.S.C. 1430(b); 12 CFR 1266.7(f).

¹⁷ See Proposed Rule, 80 FR at 78692.

¹⁴ See 12 CFR part 1234.

and that Banks should be able to continue to support their members' determinations about how to meet those needs in their market areas. No commenters opposed the provision.

The proposed rule at § 1268.3(a), which is substantively unchanged from the existing regulation, would have allowed the Banks to acquire as AMA any whole mortgage loans that are eligible to secure advances under FHFA's advances collateral regulation.¹⁸ One commenter contended that the Banks should be able to buy as AMA mortgage loans on multifamily properties, as well as residential land acquisition, development and construction loans, given that these loans also qualify as collateral for advances. FHFA notes that the existing AMA regulation already allows the Banks to buy those types of loans as AMA, given that they may qualify as other real estate-related collateral under the advance collateral regulation. The proposed amendments would not change that authority. Before commencing a program to buy such loans as AMA, however, a Bank likely would have to obtain FHFA approval under the new business activity regulation, and would have to demonstrate that the new AMA product otherwise satisfied all of the requirements of the AMA rule.

4. Comments on the Member or Housing Associate Nexus Requirement

Section 1268.4 of the proposed rule would have retained the member nexus requirement, which requires that AMA assets must have been originated or held for a valid business purpose by a member or housing associate, and must be acquired from a member or housing associate of the acquiring Bank, or from another Bank. As previously discussed, the Finance Board originally adopted this requirement to ensure that the benefits of Bank System membership are not extended to nonmembers. Commenters suggested that FHFA amend the AMA regulation to authorize the Banks to acquire mortgage loans directly from affiliates of their members, which would include nonmember institutions.

5. Comments on the Credit Risk-Sharing Requirement

The Finance Board originally established the credit risk-sharing requirement to ensure that members have a material exposure to the credit risk associated with the AMA assets that they sell to their Banks, which was consistent with the risks undertaken by

members when funding loans for their own portfolios with Bank advances. FHFA received many comments on different aspects of the credit risk-sharing requirement, nearly all of which generally supported loosening the requirement in some fashion. The comments on the individual credit risk-sharing sections, taken together, would have the effect of permitting the Banks to create what they characterized as their own risk-sharing structures, but would not necessarily have required that the Banks structure their AMA products such that the participating financial institution actually continued to have a material exposure to the credit risk associated with the mortgages they sell to the Banks. For example, some commenters asked that the Banks be allowed to transfer the credit enhancement obligation to nonmember institutions, which would have the effect of eliminating the current structure under which members bear the expected losses on the AMA products. Other commenters requested that FHFA permit arrangements under which an affiliate of a member, rather than a member itself, could satisfy any portion of the credit enhancement obligation or that FHFA allow a member to transfer its credit enhancement obligation to any other institution that is willing to assume that obligation.

Some commenters requested that FHFA allow Banks to create an AMA structure that would permit participating financial institutions to accept a price adjustment for the mortgage loans, in lieu of providing a credit enhancement for those loans. Under such an arrangement, the participating financial institution would receive a lesser price from the Bank in return for the Bank agreeing to bear the credit risk, and the price adjustment would vary in proportion to the amount of credit risk the Bank would bear. Other commenters requested that a participating financial institution meet part, or all, of its credit enhancement obligation simply by pledging collateral. Those commenters, however, did not explain how such an arrangement would work or how it would differ from the current enhancement approach used under the Mortgage Partnership Finance (MPF) program, in which a participating financial institution pledges collateral to secure its obligation to absorb a specified amount of the credit losses on mortgage loans sold to the Bank.

The proposed rule also would have carried over the timing requirements of the current regulation regarding the date by which a Bank must calculate a member's total credit enhancement obligation. Thus, the proposal would

have required that a Bank make that determination at the earlier of 270 days from the time a Bank acquires a loan from the member for a particular pool or when the pool reaches \$100 million. Commenters asked that the final rule allow the timing of determining the final credit enhancement vary based on the structure of the particular product. For example, commenters noted that under products where the member pre-funds the credit obligation the Banks should be able to calculate the required credit enhancement at the time the pool closes.

The proposed rule would have added several model-related requirements at § 1268.5(e). Specifically, the proposed rule would have required a Bank to: (1) Validate its model and methodology at least annually and make the results available to FHFA upon request; (2) institute and maintain a process for monitoring model performance that would include tracking, back-testing, benchmarking, and stress testing the model and methodology; (3) inform FHFA prior to making any material changes to the model and methodology, and (4) promptly change its model and methodology as directed by FHFA. Commenters generally requested that the final rule provide general guidance regarding models and methodologies, rather than the specific provisions proposed in the rule, described above.

The proposed rule would have eliminated the option of allowing members to use SMI and/or pool insurance to meet a part of their credit enhancement for AMA assets. The current AMA regulation allows the use of SMI as part of the credit enhancement if the insurance provider has obtained a rating from an NRSRO of no lower than the second highest investment grade. The regulation also allowed pool insurance if the insurance were used to enhance against geographic concentration or pool size risk.

FHFA proposed to remove the option of using SMI and pool insurance in the credit enhancement structure in part based on the experience during the financial crisis, when no private mortgage insurance company was able to maintain an NRSRO credit rating at the minimum level required by the current AMA regulation, and on concerns that other private mono-line insurers could face similar problems in the future. Further, FHFA considered that the Banks have in place alternate AMA structures and products that do not rely on SMI and that eliminating the use of SMI from authorized credit enhancement structures would remain consistent with the intent of the AMA regulation to require participating

¹⁸ See 12 CFR 1266.7.

financial institutions to bear the direct economic consequences of the credit risk associated with AMA assets and not transfer such risk to third parties.¹⁹ Finally, because the current AMA regulation relies on an NRSRO rating to define eligible insurers, FHFA must change or delete that provision in order to comply with section 939A of the Dodd-Frank Act, which bars federal regulatory agencies from incorporating NRSRO ratings requirements into their regulations.

In the preamble to the proposed rule, FHFA specifically requested comments regarding the use and importance of SMI or pool insurance as part of an allowable credit enhancement structure.²⁰ In particular, FHFA solicited comments on what type of requirements could replace the specific credit rating requirement for insurance providers if it were to retain these insurance options as part of the credit enhancement structure. Further, FHFA requested comments on how a Bank might evaluate the claims-paying ability of an insurer in the absence of a specific credit rating requirement. Finally, FHFA requested comments on whether, if it were to adopt in the AMA regulation specific minimum requirements of SMI and pool insurance, such requirements also should apply to PMI providers.

No commenters responded to the specific questions FHFA posed in the proposed rule regarding these topics, but many comments opposed the elimination of a provision that would authorize the use of SMI and pool insurance as part of the credit enhancement structure, and no commenters supported the removal of this option. Commenters generally argued that FHFA did not articulate a sound reason for removing the insurance option from the rule and that FHFA's focus on credit ratings for mortgage insurers ignored the actual claims paying abilities of these firms. They also pointed out that mortgage insurance providers, including those in run-off, have paid all "valid" claims, with 96 percent of claims paid in cash and the remainder due over time.²¹ Commenters also noted that mortgage insurers and their regulators have taken steps to enhance the financial strength of the insurers, improve regulatory oversight, and increase clarity and

reduce ambiguity in master insurance policies. At least one commenter noted that using insurance in the credit enhancement structure did not undermine the incentive to sell quality loans under the AMA regulation because lower insurance premiums would be associated with lower-risk mortgages.

Commenters also noted that use of SMI and pool insurance provided important economic benefits to members that sell AMA loans to the Banks, by reducing capital charges on the retained credit enhancement and transferring risk associated with the enhancement to third parties. A number of commenters stated that the Banks could develop internal ratings for SMI and pool insurance providers and pointed to the Enterprises' Private Mortgage Insurer Eligibility Requirements (PMIERS) recently adopted by Fannie Mae and Freddie Mac as an example of acceptable standards, although some commenters said that PMIERS should not be the only standard used for qualifying insurance providers. These commenters suggested that FHFA could condition use of such internal standards on a Bank demonstrating the effectiveness of its approach prior to introducing products that use SMI or pool insurance. Some comments also suggested that the rule not restrict insurance providers to mono-line mortgage insurers, although the current AMA regulation only requires that insurance be provided by an insurer. Thus, the AMA regulation already allows multiline insurers to provide SMI or pool insurance if they meet the other requirements in the regulation.

A number of commenters stated that FHFA should not impose specific requirements in the regulation on providers of borrower-financed PMI and instead should continue current practice of letting the Banks identify acceptable providers. Other commenters said that if FHFA wished to add such a requirement, it should require the PMI provider to meet PMIERS. Still other commenters urged FHFA to consider a broader range of insurance products as part of the credit enhancement structure and allow a member to rely on insurance to cover the entire credit enhancement obligation rather than just the amount in excess of the member required direct enhancement, as under the current regulation.

6. Comments on Mortgage Servicing Rights

No commenter objected to FHFA's proposal to allow a participating financial institution to transfer servicing

rights on AMA loans to any institution approved by the Bank, regardless of whether it was a member. Some commenters objected to a related change that would have relieved a participating financial institution of the responsibility for paying the unreimbursed servicing expenses on loans guaranteed or insured by a federal department or agency as a means of meeting its credit enhancement obligation for such loans. FHFA had proposed that change in order to facilitate the transfer of mortgage servicing rights on federally insured or guaranteed AMA loans to a nonmember institution, because for such loans the responsibility for unreimbursed servicing expenses transfers with servicing rights. The commenters disagreed with FHFA's statement that requiring a member to retain exposure to unreimbursed servicing expenses on loans guaranteed or insured by a department or agency of the U.S. government was unlikely to substantially affect the underwriting for such loans, given the requirements and standards already imposed by the provider of the federal guarantee or insurance. They believed that the proposed change would alter the underlying premise for AMA in the case of such federally guaranteed or insured loans—namely that members needed to have "skin in the game" for loans sold to the Banks. The commenters did not address why continuing to allow SMI or pool insurance would not similarly be contrary to this aspect of the AMA program.

7. Comments on Administrative Transactions and Agreements Between Banks

Section 1268.8 of the proposed rule addressed the delegation of administrative AMA program duties (*i.e.*, back-office operations) and the ability to terminate AMA agreements between Banks. FHFA made no substantive changes to this section of the rule when it proposed the amendment. Commenters asked FHFA to make two changes to this section. First, commenters asked to add regulatory language to the delegation of administrative duties provisions to allow a Bank to contract with other parties (including other Banks) to provide services related to administration of its own or its delegated AMA program without having to disclose such delegation to participating financial institutions. Second, commenters asked to add regulatory language to the delegation of pricing provision to allow Banks to specify that a Bank that has delegated its AMA pricing function to another Bank

¹⁹ See Proposed Rule, 80 FR at 78694–95.

²⁰ See *id.*

²¹ Payments "due over time" represent obligations of indefinite duration issued by insurers that they will pay the remainder of any amounts owed under a claim at some point in the future. In many cases, troubled insurers paid only part of what was owed under a claim (*e.g.*, 50 cents on the dollar) with the remaining amount due over time.

may retain its right to refuse to acquire AMA at certain prices pursuant to contractual provisions among the parties.

8. Comments on Other FHFA Regulations

FHFA received comments requesting that it consider two other regulations—those pertaining to Bank housing goals and new business activities—as part of its review of the AMA rule, even though FHFA had not proposed to address either of those matters as part of this rulemaking. FHFA believes that the issues raised by commenters pertain to matters that are beyond the scope of this rulemaking and are best considered as part of FHFA rulemakings related to the other regulations.

As to the matter of Bank housing goals, these commenters called on FHFA to align the AMA regulation and the new housing goals regulation. Without providing specific examples, the commenters suggested that the AMA regulation should provide flexibility for the Banks to offer AMA products and purchase AMA loans as one means to satisfy the housing goals regulation requirements. FHFA also received many comments asking it to address FHFA's current new business activity regulation, as it may be applied to the Banks' AMA programs. The majority of commenters believed that the new business activity filings were burdensome and resulted in significant delays to the Banks' ability to improve their programs. More specifically, they sought to exclude from the new business activity review process certain types of modifications or expansions to existing AMA programs and products. These suggestions are much the same as those received in response to a separate rulemaking in which FHFA had proposed certain amendments to the existing new business activity regulation, and which FHFA will consider as part of that rulemaking.

II. Section-by-Section Analysis of the Final Rule

A. Definitions—§ 1268.1

The proposed rule included definitions for four new terms to be used in the AMA regulation, which are: “AMA product,” “AMA program,” “participating financial institution,” and “pool.” FHFA intended for these terms to help simplify and clarify other provisions in the regulation and, with the exception of revisions made in response to certain comments, as discussed below, is adopting those definitions as proposed. FHFA has expanded the proposed definition of

“participating financial institution” to reflect the fact that a participating financial institution may be approved to sell AMA loans to a Bank, but also could be approved (either in conjunction with or apart from its role as a seller of loans) to service those loans, or provide a credit enhancement for them. FHFA has also clarified the wording for the definition of “pool” to reflect the fact that FHFA has authorized some Banks to aggregate AMA pools, which requires that the definition make clear that a pool may contain loans sold by more than one member or other source.

FHFA has also modified somewhat the proposed definition of “AMA product” to make clear that while each Bank may develop and establish different AMA products and structures, all such products and structures must comply with the provisions of the AMA regulation. This change was based on language suggested by the comments. FHFA did not, however, alter the definition to specifically exclude loans held by a Bank on its balance sheet for a short time prior to transferring them to another entity, as some commenters requested. Generally speaking, mortgage loans purchased under the Banks' off-balance sheet programs are not intended to qualify as AMA, and thus do not have all of the features that are necessary for a mortgage loan to qualify as AMA. Therefore, such loans would not come within the new definition of “AMA product”, which specifically includes only those loans that comply with all of the requirements of the AMA regulation.²² In light of that fact, there is no need to specifically exclude these loans from the definition.

In response to issues raised by the commenters, FHFA is also adding new definitions in the final rule for the terms “AMA investment grade” and “qualified insurer.” The term “AMA investment grade” modifies and replaces the proposed definition of “investment quality.” FHFA developed the definition of “AMA investment grade” based on comments received on the proposed definition of “investment quality.” The term “qualified insurer” is used in provisions that FHFA is adding back to § 1268.5, which will allow Banks to use pool and loan-level insurance as part of an eligible credit

²² In approving most of these off-balance sheet products, FHFA specifically recognized that the loans did not qualify as AMA loans. The one exception was the MPF Government MBS product. However, in that case, part of FHFA's reasoning for approving the product was that the Bank would purchase loans that qualified as AMA and would treat the loans as AMA loans while it accumulated them on its balance sheet.

enhancement structure for AMA products. FHFA addresses these new definitions in more detail below, in its discussion of § 1268.5 of the final rule. FHFA is also adopting, without further change, its proposed amendments to the definitions of “expected losses” and “acquired member assets” in 12 CFR part 1201.²³

B. Authorization for Acquired Member Assets—§ 1268.2

FHFA is adopting § 1268.2 as proposed.²⁴ This section generally authorizes the Banks to invest in AMA, subject to the requirements of FHFA's AMA and new business activity regulations. This section also includes a “grandfather” provision that authorizes a Bank to continue to hold as AMA any loans that FHFA or the Finance Board previously authorized for purchase, even if the loan would not meet one or more of the requirements of the final rule. The grandfather provision covers all loans that were previously authorized for purchase by any regulation, order, or other agency action, such as waiver of particular requirements that allowed a Bank to purchase the loan.²⁵ The grandfather provision at § 1268.2(b), however, does not allow a Bank to continue to purchase new loans that do not meet the requirements of the final rule after the rule becomes effective.

One commenter requested that FHFA expand the grandfather provision to include any purchase of mortgage loans pursuant to any open commitment as of the effective date of the final rule. The commenter stated that this would assure the Banks could fulfill any existing commitments to purchase loans if any of the existing Bank AMA products did not meet the requirements of the final rule. FHFA noted in proposing the rule, however, that it believed that all currently active AMA products would

²³ See Proposed Rule, 80 FR at 78690–91. FHFA also made non-substantive changes to the wording of the definition of “expected losses” to clarify the meaning of the term, but these changes were not intended to alter the scope of the proposed definition.

²⁴ Section 1268.2 carries over the substance of the general Bank authority to purchase and hold AMA now found at 12 CFR 955.2. As part of the final rule, however, FHFA is moving the loan type, member nexus, and credit-enhancement requirements also now found in current 12 CFR 955.2 to §§ 1268.3, 1268.4, and 1268.5. FHFA is also making other changes to these provisions.

²⁵ For example, on August 5, 2011, FHFA waived the ratings requirement for SMI providers in the current regulation to allow Banks to continue to buy loans that used SMI as part of the credit enhancement structure, even though no SMI provider met the ratings requirement. This grandfather provision would allow the Banks that bought loans pursuant to that waiver to continue to hold those loans.

meet the requirements of the proposed rule.²⁶ The commenter did not provide an example of an active AMA product that would not meet the requirements of the proposed rule. As a consequence, FHFA has not revised the proposed grandfather provision in response to the comment. In the unlikely event that a Bank determines that an existing AMA product would not meet all of the requirements under this final rule, FHFA would allow the Bank to continue to honor any contractual obligations it had entered into under a commitment that had been entered into prior to the effective date of this rule and that complied in all respects with the requirements of the existing AMA regulation.

C. Asset Requirement—§ 1268.3

1. Asset Types

Section 1268.3 of the final rule sets forth the four categories of asset types that are eligible for purchase as AMA. As adopted, it closely follows current 12 CFR 955.2(a), although the final rule also incorporates specific authority for Banks to acquire as AMA certain certificates representing interests in AMA-qualified whole loans, which is based on a Finance Board approval of a similar transaction in 2002. The first of these categories allows a Bank to acquire as AMA any whole loans that are eligible to secure advances to members under FHFA's advances regulation, at 12 CFR 1266.7. These assets include: (1) Fully disbursed, whole first mortgage loans on improved residential real property not more than 90 days delinquent; (2) mortgages or other loans, regardless of delinquency status, to the extent that they are insured or guaranteed by the United States or any agency thereof, and such insurance or guarantee is for the direct benefit of the holder of the mortgage or loan; (3) loans that qualify as "other real estate-related collateral," which requires that such loans also have a readily ascertainable value, can be reliably discounted to account for liquidation and other risks, can be liquidated in due course, and in which the Bank can perfect a security interest; and (4) loans acquired from community financial institution (CFI) members or their affiliates, for small business, small farm, small agri-business, or community development purposes, and which are fully secured by collateral other than real estate, or securities representing a whole interest in such secured loans. Such CFI collateral also must have a readily ascertainable value, be able to be

reliably discounted to account for liquidation and other risks, and be able to be liquidated in due course.

As under current 12 CFR 955.2(a), § 1268.3 of the final rule authorizes a Bank to purchase as AMA manufactured housing loans regardless of whether such housing constitutes real property under state law. FHFA specifically requested comment on whether it should continue to authorize the purchase of manufactured housing loans as AMA if relevant state law considers the loans to be chattel loans. FHFA received only a few comments in response to this request, which supported retaining the current regulatory text, citing, among other things, the importance of manufactured housing in meeting affordable housing needs in certain markets. As a result, FHFA has determined not to change the scope of existing authority and the final rule will continue to allow Banks to purchase as AMA manufactured housing loans regardless of whether state law considers them to be real property or chattel loans. The third category of asset types is state and local housing finance agency bonds, which is unchanged from the corresponding provision of the current regulation. FHFA received no comments advocating for changes to this provision.

The fourth category of asset types pertains to certain certificates that represent interests in loans that qualify as AMA. This category of assets is not addressed by the current regulation, but the Finance Board had previously approved a Bank's request to acquire such assets as AMA. The effect of including this provision in the final rule is to codify the previous Finance Board determination that such assets may qualify as AMA. When the Finance Board adopted the current AMA regulation, it noted, in response to comments, that the rule would allow the Banks to buy structured products as AMA, provided the products met certain identified conditions.²⁷ Section 1268.3(d) incorporates these conditions, which require that any such certificate must: (i) Be backed by loans that themselves qualify as AMA and that meet the member nexus requirement; (ii) Meet the requirement that the certificate is enhanced to AMA investment grade; (iii) Be issued

²⁷ Currently, this authority is set forth in a discussion in the **SUPPLEMENTARY INFORMATION** of the **Federal Register** release originally adopting the AMA regulation. See Final Rule: Federal Home Loan Bank Acquired Member Assets, Core Mission Activities, Investments and Advances, 65 FR at 43974, 43977 (July 17, 2000) (*hereinafter* 2000 Final AMA Rule). The Finance Board approved one AMA product under this authority (in December 2002), which is now inactive.

pursuant to an agreement between the Bank and the participating financial institution under which the participating financial institution shares credit risk as required by the regulation; and (iv) Are acquired substantially by the initiating Bank or Banks.

By incorporating the substance of the Finance Board's earlier approval into the regulatory text, FHFA would clarify that such programs are possible under the amended regulation and would bring all relevant authority into a single provision within the regulatory text. FHFA would interpret the provisions of § 1268.3(d) of the final rule to permit the use of a third party to securitize the whole loans, as that arrangement would merely represent the use of a vehicle to invest in certain types of AMA under more favorable terms. However, if any such certificates were to have been created as a security that initially was available to investors generally, they would not qualify as AMA under this provision.²⁸

2. Restrictions on Certain Loans

Although, as discussed above, whole loans eligible to secure advances may qualify as AMA, both the current regulation and the proposed rule explicitly excluded from AMA any single-family home mortgage loans that exceed the conforming loan limits and any loans made to an entity, or secured by property, that is not located in a state. The final rule carries over without change the existing exclusion for loans not located in a state, and modifies the conforming loan provision, as described below. In proposing the rule, FHFA specifically requested comments on whether the final rule should continue to limit AMA loans to those that meet the conforming loan limits more generally.²⁹ Some commenters suggested that FHFA remove the limits for all loans, while other commenters suggested loans that are guaranteed or insured by a department or agency of the U.S. government be allowed to exceed the conforming loan limits.

After considering the comments, FHFA has decided that it would be appropriate to allow the Banks to acquire as AMA loans guaranteed or insured by a department or agency of the U.S. government without regard to the conforming loan limit, while continuing to apply the limit to other types of loans. FHFA considers the conforming loan limit, which is a statutory requirement, to be an appropriate public policy guide in determining how the GSE subsidy that

²⁸ *Id.*

²⁹ See Proposed Rule, 80 FR at 78691.

²⁶ See Proposed Rule, 80 FR at 78691.

accrues to the Banks should be used to support the housing finance efforts of their members when making loans without any federal guarantee or insurance. Because other federal statutes separately authorize certain agencies or departments of the U.S. government to insure or guarantee mortgage loans that exceed the conforming loan limit, FHFA views those provisions as evidence that public policy would favor allowing the Banks to also support those market segments, and to do so in a manner that is consistent with the limits of those programs. Accordingly, § 1268.3(a)(1) of the final rule will carry forward the existing AMA rule provision that excludes from AMA those single-family mortgages where the loan amount exceeds the conforming loan limits established pursuant to 12 U.S.C. 1717(b)(2), but will also exempt from that prohibition loans that are insured or guaranteed by a department or agency of the U.S. government.³⁰

As discussed earlier, the proposed rule would have barred a Bank from purchasing as AMA any home mortgage loans on which a director, officer, employee, attorney, or agent of a Bank or of the selling member institution was the borrower, unless the board of directors of the Bank specifically approved such purchase.³¹ As commenters point out, in the current mortgage market any loans made to such “insiders” should meet the same AMA underwriting standards that the member or other originator would apply to all of AMA-eligible loans and thus would not have a different risk profile from those other loans. Commenters also contended that such a requirement would present significant operational difficulties. For example, because of the breadth of the proposal, it would effectively require the Banks to screen out of their AMA pools not only those loans that had been made to a member’s executives, but also to any of its rank and file employees. FHFA is persuaded that the costs to the Banks of implementing this provision would likely outweigh whatever benefits might accrue from it. FHFA also recognizes that the statutory language to which FHFA looked in proposing this provision was likely intended to address the risks associated with particular practices that are less of a concern in

today’s mortgage marketplace. The original statutory provision, which pertains only to the acceptance of such loans as collateral and dates to the original Bank Act, likely was intended to prevent the Banks from accepting as collateral mortgage loans that savings and loan association members had made to their “insiders” and which may not have been underwritten as rigorously as their other loans. Given that today’s mortgage markets are much more uniform, in terms of underwriting practices, than was the case in the 1930s, it is unlikely that removing the prohibition would create any significant risks for the Banks.

While the final rule adopts or retains specific restrictions on certain loans, it does not limit the total amount of AMA assets a Bank may acquire. Nevertheless, FHFA expects each Bank’s board of directors to establish a prudential limit on its maximum holdings of AMA, which should be governed by the Bank’s ability to manage the risks inherent in funding and holding such mortgage loans.

D. Member or Housing Associate Nexus Requirement—§ 1268.4

Section 1268.4 of the proposed rule would have carried forward without substantive change the member nexus requirement of the current AMA regulation, found at 12 CFR 955.2(b). After considering the issues raised by the commenters, described below, FHFA has decided to adopt this provision of the final rule without any substantive differences from the proposed rule. Under this “member nexus” provision, an asset may be eligible for purchase as AMA only if the participating financial institution has originated or issued the assets or has held it for a valid business purpose. The “valid business purpose” provision was intended to recognize the fact that some members may conduct their mortgage lending operations through both the origination and purchase of mortgage loans, which may include the acquisition of loans from nonmember institutions as part of the normal course of business, and may then wish to sell both categories of loans to their Bank. The Finance Board and FHFA have interpreted this provision as excluding any loans that merely pass from a nonmember through a member to a Bank, because such arrangements would have the effect of extending the benefits of membership to the nonmember.³²

³² See Proposed Rule: Federal Home Loan Bank Acquired Member Assets, Core Mission Activities, Investments and Advances, 65 FR 25676, 25681 (May 3, 2000) (*hereinafter* 2000 Proposed AMA Rule).

Commenters suggested that FHFA amend the AMA rule to allow Banks to acquire loans directly from the affiliates of a Bank member, which they contend would streamline the process of acquiring loans. The Banks believe that the current requirement is inefficient because it requires the use of a two-step process whereby a nonmember affiliate that originates a mortgage loan must first assign the loan to its affiliated member prior to the member is able to sell the loan to the Bank. FHFA acknowledges that the current process may be inefficient for such members, but believes that the Finance Board struck an appropriate balance when it first adopted the AMA rule between the need for operational efficiency and the need to ensure that the benefits of Bank membership are made available only to institutions that are eligible for membership. Accordingly, FHFA decided to adopt the provision generally as proposed.

The reference in § 1268.4(a) of the final rule to assets issued “through, or on behalf of the participating financial institution” carries over from the current regulation, and is intended to address the terms under which HFA bonds may qualify as AMA. As under the current regulation, this provision allows HFA bonds issued by an underwriter for the participating financial institution, *i.e.*, a housing finance agency that has become a housing associate of the Bank, to qualify as AMA.³³ In § 1268.4(b), FHFA is also carrying over without substantive change the provisions of the current regulations that address the process through which a Bank may purchase HFA bonds as AMA from a housing associate of another Bank. Under this provision, a Bank may acquire initial-offering taxable HFA bonds from out-of-district associates, provided the Bank in whose district the HFA is located (local Bank) has a right of first refusal to purchase, or negotiate the terms of, a particular bond issue. If the local Bank refuses, or does not respond within three business days, the HFA may then offer the bonds to an out-of-district Bank.

E. Credit Risk-Sharing Requirement—§ 1268.5

1. Overview

FHFA proposed to reorganize the current credit risk-sharing requirements from two provisions of the Finance Board regulations, 12 CFR 955.2(c) and 955.3, into a single provision of the final rule, § 1268.5. The proposed rule would

³³ *Id.* at 25681.

³⁰ For loans not guaranteed or insured by a department or agency of the U.S. government, the rule allows loans on properties located in designated “high-cost areas,” where the conforming loan limit is adjusted in accordance with the criteria established in 12 U.S.C. 1717(b)(2), to remain eligible for purchase as AMA as long as the loan value is within the adjusted conforming loan limit.

³¹ See Proposed Rule, 80 FR at 78691–92.

have carried over several of the credit risk-sharing provisions without substantive changes, including the requirement that all AMA loans carry a credit enhancement and the design requirement for the credit enhancement structure to ensure that the participating financial institution retained a material economic incentive to reduce actual losses on any AMA loans.³⁴ To comply with Dodd-Frank Act mandates that generally bar regulatory agencies from incorporating NRSRO credit rating requirements into their regulations, FHFA also proposed to amend those provisions of the current AMA regulation that were based on or referenced NRSRO ratings, including allowing the Banks flexibility to use a non-NRSRO methodology and model for calculating the credit enhancement obligation. Finally, FHFA had proposed to delete existing provisions that authorize the use of private SMI or pool insurance as part of the credit enhancement structure and, as a consequence, also remove provisions from the current regulation requiring eligible SMI providers to maintain specific NRSRO ratings.

FHFA has made several changes to the credit enhancement provisions of the proposed rule in response to comments, including restoring to the rule provisions allowing the use of SMI or pool insurance as part of the credit enhancement structure. Related to that provision, and as addressed in more detail below, FHFA is also adding to the final rule a requirement that a Bank must develop and maintain written financial and operational standards under which it will review and approve insurers as eligible to provide mortgage insurance on AMA loans. This requirement replaces the provisions of the current regulation, which had required the Banks to use NRSRO ratings for evaluating mortgage insurers. The final rule will carry over from the current rule the requirements that all AMA loans be covered by a member-provided credit enhancement, and that such credit enhancement on loans other than those loans covered by a federal guarantee or insurance bear the direct economic consequences of losses from the first dollar up to expected losses, or immediately following expected losses but in an amount that is equal to or exceeding the expected losses.³⁵

2. Determining Credit Enhancements on AMA pools

Section 1268.5(b)(1) of the final rule sets forth the general requirements for how a Bank is to determine the total credit enhancement that a participating financial institution must provide for an asset or pool to qualify as AMA. Unlike under the current rule, the final rule does not require that Banks calculate the credit enhancement for AMA using NRSRO models and methodologies, or that the credit enhancement raises the credit quality of an asset or pool to a level that is equivalent to a specific NRSRO-determined rating. Instead, the final rule requires the Banks to determine and document that AMA assets are enhanced at least to “AMA investment grade.” The rule defines “AMA investment grade” as:

... a determination made by the Bank with respect to an asset or pool, based on documented analysis, including consideration of applicable insurance, credit enhancements, and other sources for repayment on the asset or pool, that the Bank has a high degree of confidence that it will be paid principal and interest in all material respects, even under reasonably likely adverse changes to expected economic conditions.

The term “AMA investment grade,” as well as its definition, represents a change from the proposed rule that FHFA made in response to comments received on the proposal. The proposed rule would have required that the enhancement on AMA assets raise them to at least “investment quality,” which would have been defined by reference to the definition of that term that is used in the Bank investment regulation, at 12 CFR 1267.1. Commenters pointed out, however, that the term “investment quality” as used in the investment regulation generally applies to debt securities and that, unlike when Banks purchase debt securities, Banks buy AMA assets with the knowledge and expectation that some of those assets will default, and become delinquent.³⁶ Thus, as commenters further noted, the fact that the definition of “investment quality” in the Bank investment rule references expectations of “full and timely payment of principal and interest” means the definition cannot be readily applied to individual mortgages or mortgage pools purchased as AMA.

game,” the rule provides them an incentive to sell high-quality loans to the Banks and the opportunity to benefit financially from good underwriting practices. See Proposed Rule, 80 FR at 78693.

³⁶ The Banks take account of these expected defaults and delinquencies and related losses when determining pricing for their purchases of AMA loans and in structuring the AMA products.

FHFA agrees with the comments and has revised the proposed definition to address those commenters’ concerns. In particular, the definition of “AMA investment grade” that is adopted in the final rule replaces the references to expectations that a Bank will receive “full and timely payment of principal and interest” with language suggested by commenters, *i.e.*, that a Bank has a high degree of confidence that “it will be paid principal and interest in all material respects.” The change recognizes that Banks will, upon purchase of the AMA asset, expect certain levels of payment defaults and delinquencies. The final definition continues to require that the Bank’s analysis of the possibility for repayment take account of adverse stress to future expected economic conditions and that the Bank should consider such adverse stresses in their analysis, to the extent that such adverse changes could reasonably occur given current economic conditions and outlooks.

While the proposed rule would not have changed the existing requirement that a Bank determine the necessary credit enhancement on a pool at the earlier of 270 days from the date of the Bank’s acquisition of the first loan in a pool or the date at which the pool reaches \$100 million in assets, § 1268.5(b)(1) of the final rule has revised those provisions such that a Bank now must determine the total credit enhancement obligation no later than 30 calendar days after a pool closes or the Bank completes the purchase of an AMA asset.³⁷ FHFA made this change based on comments that the rule should allow a Bank to calculate the credit enhancement in a manner that is consistent with the terms of specific loan funding commitments. Commenters provided as an example the Mortgage Partnership Program (MPP) for which calculating the credit enhancement at the time the pool closes would bring more certainty to participating financial institutions as to their ongoing financial obligations. FHFA believes that the change in the final rule will provide Banks sufficient flexibility to meet the concerns raised by commenters while still ensuring that all AMA pools are enhanced to levels

³⁷ As FHFA previously noted, some AMA eligible assets would be in the form of a security or certificate, such as an HFA bond or a certificate of security representing interest in a pool of whole loans. For those AMA products that involve a Bank’s purchase of a single security or instrument, and not the purchase of a pool of individual loans, the relevant date for applying this provision would be the date the purchase of the instrument is completed.

³⁴ See 2000 Final AMA Rule, 65 FR at 43976–77.

³⁵ As FHFA noted in proposing the new AMA rule, the credit risk-sharing requirements provide that participating financial institutions selling mortgages must retain a substantial portion of the credit risk, given their expertise in underwriting mortgages. In requiring the participating financial institution to have such financial “skin in the

consistent with the terms and conditions of the specific AMA product.

Under § 1268.5(b)(1), the Bank could continue to specify, as part of the terms and conditions for a particular AMA product, that a participating financial institution must provide a credit enhancement greater than that needed to enhance the asset or pool to AMA investment grade. The final rule further provides that a Bank must make its credit enhancement determinations using a model and methodology of the Bank's choosing, subject to the requirements of § 1268.5(f), which requires the Banks to provide information about their model and methodology to FHFA upon request, and which reserves FHFA's right to require changes to a Bank's model or methodology. As FHFA noted in the proposed rule, a Bank may continue to use the same NRSRO model it currently uses for making credit enhancement determinations under the final rule, and in such a case, would not need to alter the credit enhancement levels it currently requires, unless FHFA directs it to do so or its estimated enhancement levels otherwise do not comply with the rule.³⁸ For example, a Bank would need to increase credit enhancement levels if it determined that the credit enhancement currently estimated by its NRSRO model was not sufficient for an asset or pool to be AMA investment grade under the definition of that term.

FHFA is adopting as proposed the requirement that a Bank document the basis for its conclusion that the contractual credit enhancement required for a particular pool is sufficient to meet the required credit enhancement obligation for a particular AMA product, given the Bank's chosen model's relevant stress scenarios.³⁹ This provision is located at § 1268.5(b)(2) of the final rule, and that information will help FHFA monitor the Banks' use of their models and the adequacy of the specific credit enhancement structures used in each AMA product.

Section 1268.5(c) of the final rule addresses the credit risk-sharing structure for AMA products. As is the case under existing regulations, this provision generally requires that the participating financial institution providing the credit enhancement bear

the direct economic consequences of actual credit losses on the assets from the first dollar of loss up to expected losses, or immediately following expected losses in an amount equal to or exceeding expected losses.⁴⁰ This requirement would not apply to federally insured or guaranteed mortgage loans.⁴¹

As noted previously by the Finance Board, this requirement helps ensure that a participating financial institution bears the direct consequences of the credit quality of the asset or pool, and thereby has the incentive to maintain high underwriting standards for any AMA loans sold to a Bank.⁴² The participating financial institution cannot transfer this responsibility to an affiliate or nonmember entity.

While the current regulation defines "expected losses" as the base loss scenario in the methodology of an NRSRO applicable to a particular AMA asset, the final rule amends this definition to refer to the loss on the particular AMA asset or pool given the expected future economic and market conditions in the model or methodology used by the Bank to calculate the credit enhancement for an AMA product. This change results from the fact that the final rule no longer requires a Bank to use an NRSRO model, and also accommodates the potential for a Bank to adopt a model that applies a methodology that differs from that used in the Banks' current models. Otherwise, FHFA believes that this change does not alter the substance of what is currently required by the AMA rule; nor is it intended to alter how a Bank would calculate "expected losses" if the Bank continues to use its current model.

Section 1268.5(c) also continues to require that the credit enhancement remain in place at all times, *i.e.*, for the

life of the asset or pool.⁴³ This requirement effectively prohibits the Banks from using structures, for example, that comply with the credit rating requirement during in the first year, but that then scale back the amount of the member's credit enhancement in subsequent years so that the pool would no longer be credit enhanced to a level that is consistent with the terms and conditions of the AMA product.⁴⁴

Section 1268.5(c)(1)(ii) of the final rule also will retain the existing requirement that a participating financial institution must secure fully its credit enhancement obligation, and that it do so in the same manner that a member must secure its obligation to repay an advance under part 1266 of the FHFA advances regulations. This provision is intended to prevent a Bank from being exposed to any additional credit risk as a result of a member's failure to comply with its contractual obligation to absorb a specified portion of the credit losses on its AMA loans. While some commenters asked FHFA to delete this requirement so that the Banks could have added flexibility in designing different types of credit enhancement structures, FHFA believes that the collateral requirement provides a necessary level of protection for the Banks should a participating financial institution be unable to fulfill its credit enhancement obligation, and also is consistent with the legal rationale for the AMA programs, which views the acquisition of AMA loans as being functionally equivalent to the extension of credit via an advance, which members must fully secure with eligible collateral.

3. Transfer of Credit Enhancement Obligation

The final rule will carry over, with some modifications, the provisions of the existing regulations that establish alternative means by which a member may provide the credit enhancement for its AMA loans, including a transfer of the enhancement obligation to certain parties, subject to certain limitations. The revised provision would be located at § 1268.5(c)(2) of the final rule. The use of these structures requires the approval of the Bank, which could do so either by establishing the required form of credit enhancement in the terms of a particular AMA product, or by

⁴⁰ The economic responsibility of the expected credit losses may be borne by the member or housing associate in a variety of ways. For instance, under the product developed by the Chicago Bank known as MPF 100, a Bank establishes an account to absorb credit losses. As the Bank incurs losses, the member reimburses the Bank through the reduction of credit enhancement fees paid to the member by the Bank and, therefore, is exposed to the credit risk of the loans starting with the first dollar of loss. Essentially, the fees paid to the member are contingent upon the performance of the asset. Also, the rule allows for a member-provided credit enhancement to be positioned after expected losses. Authorizing this structure in the rule allows for the existing MPF Original product.

⁴¹ As is discussed below, FHFA is amending the requirement that for government insured or guaranteed loans the members or housing associates must bear responsibility for unreimbursed servicing expenses up to the amount of expected losses for the loan to qualify as AMA.

⁴² See 2000 Proposed AMA Rule, 65 FR at 25683; *see also*, 2000 Final AMA Rule, 65 FR at 43976.

⁴³ Where the Bank returns the credit enhancement to a participating financial institution, it would only do so if the credit quality of the asset or pool continues to meet the terms and conditions of the AMA product.

⁴⁴ See 2000 Final Rule, 65 FR at 43976.

³⁸ See Proposed Rule, 80 FR at 78693.

³⁹ This requirement replaces 12 CFR 955.3(b) and (c) which state that a Bank had to obtain the NRSRO verifications with regard to the adequacy of the credit enhancement structure and Bank's use of the NRSRO model for estimating the required enhancement in each AMA product. Given that under the amendments made by this final rule, FHFA no longer requires a Bank to use NRSRO models, the NRSRO verification requirements are obsolete, and FHFA has removed them.

providing specific approval for the transfer.

Specifically, § 1268.5(c)(2)(i) authorizes a participating financial institution to transfer its credit enhancement obligation to its insurance affiliate, but only where the insurance provided by the affiliate is positioned after the participating financial institution bears the financial losses on the AMA loan in an amount at least equal to the expected losses. Similarly, the final rule carries over the substance of two provisions of the current regulations, which allow a participating financial institution to transfer its credit enhancement obligation to another participating financial institution, which may be either a member of the same Bank or, subject to certain conditions, a member of another Bank. Those provisions are located at § 1268.5(c)(2)(iv) and (v) of the final rule. These provisions remain consistent with the existing regulations, as well as with current Bank practice with regard to AMA product structures and permissible transfers of the credit enhancement obligations.

As already discussed, FHFA had proposed eliminating provisions of the existing regulation that allow a participating financial institution to meet part of its credit enhancement obligation through the purchase of loan-level SMI or pool insurance. After considering the comments on this issue, however, FHFA has determined to retain those provisions, which are located at § 1268.5(c)(2)(ii) and (iii) of the final rule. Thus, a participating financial institution can continue to provide part of its credit enhancement obligation by purchasing loan-level SMI, but only if the SMI is positioned in the credit enhancement structure to cover losses remaining after the participating financial institution has borne the direct economic consequences of the actual credit losses, as required by § 1268.5(c)(1)(i). Similarly, the participating financial institution can continue to purchase pool insurance, but only where such insurance covers that portion of the credit enhancement obligation attributable to the geographic concentration or size of the pool and is positioned last in the credit enhancement structure.

The provisions pertaining to the use of SMI or pool insurance generally carry over the substance of the existing regulations, with one significant exception related to the rating requirement for insurance providers. The existing AMA regulations require that insurance be maintained at all times with an insurer that has been assigned a rating from an NRSRO that is

at least equal to the second highest investment grade NRSRO rating. Because the Dodd-Frank Act requires that FHFA remove such ratings-based provisions from its regulations, FHFA is replacing this requirement with a requirement that the participating financial institution may obtain its SMI or pool insurance only from an institution that at all times is a “qualified insurer,” as defined by the final rule.⁴⁵ To implement this “qualified insurer” requirement, FHFA is adopting as part of the final rule a new provision, to be located at § 1268.5(e)(1), which directs a Bank to develop and maintain a written financial and operational standards that it will apply in approving an entity as a “qualified insurer.” That provision also makes clear that a Bank can rely on another provision of the final rule, § 1268.8, to delegate to another Bank or group of Banks the responsibility for developing and applying these standards. The provision will allow a group of Banks to develop a common policy and common list of qualified insurers for AMA programs if they choose.

The rule allows a Bank one year to develop these new insurance provider standards. The FHFA expects that Banks will develop the new standards and qualify under these standards any mortgage insurers with which the Banks intend to do business under their AMA programs within this one-year timeframe. Until the end of this one-year grace period, Banks can continue to do business with the insurance counterparties that it currently allows to provide insurance on AMA assets or can add new insurance counterparties based on existing standards that the Banks may have in place.⁴⁶ Once the new standards are in place, § 1268.5(e)(1) also requires that a Bank review qualified insurers at least once every two years and verify that they continue to meet the Bank’s standards.⁴⁷

⁴⁵ FHFA also has adopted in § 1268.1 a definition for “qualified insurer,” which includes any insurance company that a Bank approves in accordance with § 1268.5(e) to provide any form of mortgage insurance on assets and pools purchased under an AMA program. Consistent with suggestions by commenters, this definition does not restrict potential qualified insurers just to mono-line mortgage insurance providers, but could include any insurance company.

⁴⁶ The grandfather provision in § 1268.2(b) allows a Bank to continue to hold loans purchased prior to the end of the phase-in period for adopting the qualified insurer standards even if the PMI or other insurance on those loans is provided by an entity that does not meet the Bank’s new standards.

⁴⁷ Section 1268.8 of the final rule allows a Bank to delegate the administration of its AMA program to another Bank, which would allow a Bank to delegate the responsibility for conducting this

FHFA expects that any standards a Bank adopts under § 1268.5(e)(1) will be rigorous and will set minimum financial and operating standards that an insurer must meet to help ensure that the insurer will have the financial resources to fulfill its obligations under insurance policies on AMA assets. While the rule does not provide specific requirements that the Banks must meet in developing these standards, FHFA notes that the PMIERS recently implemented by the Enterprises represent a good model of the type of analytical approach that FHFA would expect of the Banks’ standards under this provision. FHFA expects to review a Bank’s qualified insurer standards as part of its regular supervisory examination and off-site monitoring of Bank activities. FHFA also expects Banks periodically to review their qualified insurer standards, and to revise them as appropriate.

In order to ensure a degree of uniformity with respect to the financial condition of entities that may provide insurance in connection with the AMA programs, FHFA is also adopting new § 1268.5(e)(2), which will allow only those entities that are “qualified insurers” to provide either the loan-level or pool insurance policies allowed as part of the credit enhancement structure under § 1268.5(c)(2)(ii) and (iii) or the private mortgage insurance on loans purchased as AMA. In proposing this rule, FHFA specifically requested comments on whether any eligibility requirements for providers of SMI or pool insurance should also apply to PMI providers.⁴⁸ Few commenters responded to this request, but the commenters generally expressed the view that FHFA should not impose specific requirements on PMI providers and, instead, should continue to allow Banks to adopt their own standards for those providers. One of the commenters noted, however, that if the FHFA did impose requirements, PMI providers should be required to meet PMIERS. After consideration of these comments, FHFA has determined to apply the “qualified insurer” requirements of § 1268.5(e)(1) to providers of PMI, SMI and pool insurance. By requiring that providers of all types of mortgage insurance used in AMA products meet rigorous financial and operational standards, this provision helps assure that Banks engage in sound counterparty risk management and maintain strong safety and soundness measures for their AMA programs. Moreover, given that § 1268.5(e)

required periodic review to another Bank or Banks should it so wish.

⁴⁸ See Proposed Rule, 80 FR at 78695.

provides the Banks with latitude to develop their own standards for what constitutes a “qualified insurer,” the application of this provision to PMI providers should not represent a significant change from the existing approach.

4. Loans Guaranteed or Insured by a Department or Agency of the U.S. Government

Section 1268.5(d) of the final rule addresses the purchase of federally insured or guaranteed mortgage loans as AMA. The existing regulatory text allows a portion of the credit enhancement to be provided through the purchase of loan-level insurance, including insurance provided by a federal mortgage insurance or guarantee program. Although the federal insurance or guarantee generally eliminates the credit risk to the member selling mortgage loans to its Bank, the Finance Board had determined that the member’s potential liability to bear the unreimbursed servicing expenses on such loans served the same purpose of providing an economic incentive for the member to sell only well-underwritten loans to the Bank. The final rule carries over much of the substance of current agency policy, and simply states that a participating financial institution may provide the required credit enhancement by purchasing loan-level guarantees or insurance from departments or agencies of the U.S. government, provided that the guarantee or insurance remains in effect for however long the Bank owns the loan. The requirement that the guarantee or insurance remain in effect does not require that the Bank member be the party that maintains the guarantee or insurance for that period, which would allow any other entity servicing the loan to maintain the guarantee or insurance. The final rule differs from the existing regulations, however, in that it does not require loans guaranteed or insured by a department or agency of the U.S. government to meet the specific credit enhancement structure requirements, *i.e.*, wherein the member must bear the first dollar of losses for a loan or pool up to the amount of expected losses or must bear losses immediately following the expected losses in an amount that equals or exceeds expected losses.⁴⁹ Even under this new provision, however, the federal guarantee or insurance must be sufficient so that the underlying asset or pool meets the required credit enhancement specified as part of the terms and conditions that

the Bank has established for the relevant AMA product.

As already noted, the Finance Board has described the purpose of the AMA credit enhancement structure requirement as being to ensure that participating financial institutions, “when responsible for such losses, [had] incentive to seek ways to achieve better than expected performance [for the loans sold as AMA].”⁵⁰ As the Finance Board explained, for a participating financial institution to meet this structure requirement with respect to federally guaranteed or insured loans, given that losses eventually would be covered by the guarantee or insurance, the participating financial institution would have to bear the economic responsibility of all unreimbursed servicing expenses associated with those loans, up to the amount of the expected losses.⁵¹ As a result, under the current regulation the member’s credit enhancement obligation for AMA government loans is tied closely to its servicing obligations. An unintended consequence of tying the credit enhancement obligation to the servicing obligation is that such a requirement effectively limits a participating financial institution’s ability to transfer the mortgage-servicing rights for any AMA government loans to non-participating financial institutions. In addition, as FHFA noted in proposing the rule, after having had the opportunity to review the Banks’ AMA programs since 2000, FHFA has come to the conclusion that requiring a member to retain an obligation to cover unreimbursed servicing expenses for AMA government loans provides no meaningful additional incentive to improve underwriting to achieve better than expected loan performance.⁵²

A small number of commenters objected to this proposed revision. These comments noted that the proposed change would have altered one of the key underlying premises for AMA with regard to government loans, namely that the members need to have “skin in the game” to assure high quality underwriting. After considering these comments in light of its own experience in monitoring the Banks’ AMA programs, FHFA has concluded that, with regard to federally guaranteed or insured loans, the underwriting standards imposed by the relevant

government department or agency address the same policy objective of the credit enhancement requirements, which is to encourage the members to underwrite the loans to a high level. Therefore, FHFA finds that requiring the participating financial institution to also remain responsible for unreimbursed servicing expenses would add little, if any, incentive to underwrite its mortgage loans to a materially different level above the already high level required by the federal guarantor or insurer. At the same time, FHFA believes that the ability to transfer the servicing rights on federally insured or guaranteed loans is important in the current marketplace. Thus by carrying over to the final rule a provision that would prevent participating financial institutions from transferring servicing rights on such loans FHFA could negatively affect members’ ability to use the AMA program to obtain liquidity to support this segment of the mortgage market.⁵³ FHFA, therefore, is adopting § 1268.5(d), as proposed.

5. Model and Methodology

Section 1268.5(f) of the final rule addresses the model and methodology that a Bank uses to estimate the required credit enhancement, and has been simplified in response to certain recommendations from the commenters. The final rule requires a Bank to establish a model and methodology for estimating the required member credit enhancements for AMA loans that a participating financial institution sells to a Bank.⁵⁴ The new provision, consistent with the Dodd-Frank Act requirements, no longer requires a Bank to use an NRSRO model.⁵⁵ The final rule does require a Bank to provide to FHFA upon request any information about the Bank’s model and methodology including results of any model runs and testing performed by the Bank. While the final rule does not require that FHFA approve the model

⁴⁹ As FHFA noted when it proposed this rule, the flexibility allowed in transferring mortgage-servicing rights under the amended provision would prove beneficial for many smaller or medium sized members. These members, in particular, might wish to sell their AMA government loans into AMA government products but may lack the ability to perform the servicing obligations, as now required by the AMA regulation. In addition, given changes in the mortgage industry, Banks may find it increasingly difficult to find member institutions willing to take on the servicing obligations for AMA government loans. *Id.*

⁵⁴ The provision was proposed as § 1268.5(e). *See* Proposed Rule, 80 FR at 78698.

⁵⁵ Nothing in the final rule, however, prohibits a Bank from continuing to use an NRSRO model to estimate the credit enhancement requirement, provided that the Bank otherwise complies with § 1268.5(f).

⁴⁹ FHFA is readopting these requirements as § 1268.5(c)(1) of this final rule.

⁵⁰ 2000 Final AMA Rule, 65 FR at 43977.

⁵¹ *Id.* In the supplementary information section of the original rule, the Finance Board explained how loans guaranteed or insured by a department or agency of the U.S. government would meet the credit enhancement requirements of the original AMA rule.

⁵² Proposed Rule, 80 FR at 78695.

and methodology that a Bank uses to estimate the required credit enhancement, it specifically reserves to FHFA the right to direct a Bank to make changes to its model and methodology and further requires that a Bank promptly implement any such changes once FHFA directs it to do so.

As noted above, FHFA has altered the final version of § 1268.5(f) from what it proposed based on the comments received, a number of which thought that the proposed provision was too prescriptive and would hinder the Banks' ability to adjust their models and methodologies in response to advances in technologies and methods. These commenters believed that it would be more appropriate for the final rule to provide only general guidance relating to the models and methodologies, and rely on advisory bulletins and other forms of supervisory guidance with regard to specific practices on evaluating and monitoring performance. The commenters also noted that FHFA generally follows their suggested approach with regard to Banks' use of models in other areas.

FHFA agrees with the comments, and has note included as part of the final rule the proposed requirements related to a Bank's validation and monitoring of its model, or that requiring a Bank to inform FHFA prior to making any material changes to its model and methodology. Instead, FHFA will address these items through its supervisory process, and will issue guidance to the Banks on these topics as the need arises. FHFA, however, continues to expect a Bank to have risk management policies and procedures commensurate with the complexity of the model and methodology. Effective model risk management should entail a comprehensive approach in identifying risk throughout the model lifecycle and should be consistent with any applicable FHFA guidance.

F. Servicing of AMA Loans—§ 1268.6

Section 1268.6 of the final rule addresses the servicing of AMA loans, which FHFA is adopting as proposed. This provision incorporates current FHFA positions, as set forth in a recent regulatory interpretation, on the rights of the Banks to allow for the transfer of mortgage servicing rights from the participating financial institution that originally sold the AMA loans to the Bank.⁵⁶ FHFA received no comments on this provision.⁵⁷

Thus, § 1268.6 allows for the transfer of servicing rights on AMA loans, including federally guaranteed or insured loans, to any institution, including a non-Bank System member. The provision specifically provides that any such transfer cannot result in the AMA loan failing to meet any other AMA requirement, including the credit enhancement requirement.⁵⁸ Section 1268.6 also requires the approval of each Bank that has any ownership interest in the underlying loans, no matter how small that interest may be, prior to the transfer of the servicing obligation. Finally, § 1268.6 states that the Banks must have policies and procedures that ensure the transfer of servicing would not negatively affect the credit enhancement on the underlying loans or substantially increase the Bank's exposure to risk. As it noted when proposing the rule, FHFA expects such policies and procedures specifically to address transfers to non-Bank System member servicers and provide contingency plans to address a case in which a large servicer fails or is otherwise unable to continue to service a Bank's AMA portfolio.⁵⁹

G. Administrative Arrangements Between Banks—§ 1268.8

Proposed § 1268.8 would have carried over without substantive change the provisions of § 955.5 of the current regulation, which addresses administrative transactions and agreements between Banks involving AMA. This provision allows Banks to delegate to another Bank the administration of its AMA program, but requires the delegating Bank to disclose to a participating financial institution the existence of the delegation or the possibility of such delegation, in its AMA-related agreements with the participating financial institution.

Commenters requested technical changes to the proposed rule to clarify that Banks can contract with third parties, including another Bank, to provide services for their AMA programs separate and apart from the administrative delegation contemplated in this provision without triggering additional disclosure obligations. They

eliminate the requirement that members bear the unreimbursed servicing expenses for U.S. government insured loans as part of their AMA credit enhancement obligation. These comments were addressed in the section above addressing credit enhancement requirements.

⁵⁶ As FHFA noted in proposing the rule, this means that a member cannot transfer any part of the credit enhancement obligation on a non-U.S. government insured loan to a non-member institution as part of the transfer of servicing rights. See Proposed Rule, 80 FR at 78696.

⁵⁹ *Id.*

also suggested a change in wording to make clear that a Bank may, by contract, define specific parameters on its delegation of pricing authority for its AMA program to another Bank. FHFA agrees that the suggested changes appropriately clarify the scope of the requirements in § 1268.8 and raise no safety and soundness or other concerns. Therefore, FHFA has incorporated the Banks' suggested language into the final rule. Otherwise, proposed § 1268.8 is adopted as final without further changes.

H. Other Provisions—§ 1268.7

As proposed, FHFA is carrying over without change the current rule's data reporting requirements for AMA, which would be located at § 1268.7. FHFA received no comments on that provision. Also as proposed, FHFA is deleting from the AMA rule the provision that had established risk-based capital requirements for AMA, which has been superseded by the statutory risk-based capital requirement and thus has no continuing applicability.⁶⁰ FHFA received no comments on its proposal to delete this provision.

III. Consideration of Differences Between the Banks and the Enterprises

When promulgating regulations relating to the Banks, section 1313(f) of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 requires the Director to consider the differences among the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation (together, the Enterprises) and the Banks with respect to the Banks' cooperative ownership structure; mission of providing liquidity to members; affordable housing and community development mission; capital structure; and joint and several liability.⁶¹ The amendments made by this rulemaking apply exclusively to the Banks. In preparing the proposed and final rules the Director considered the differences between the Banks and the Enterprises as they relate to the above factors, and the proposed rule requested public comments on the extent to which the rule might implicate any of the statutory factors. FHFA received a comment suggesting that the continued use of the conforming loan limit for Bank AMA purchases would not appropriately take into account the differences between the Banks and the Enterprises. As already discussed above, in connection with the section of the

⁶⁰ *Id.*

⁶¹ See 12 U.S.C. 4513(f).

⁵⁶ See Regulatory Interpretation, 2015–RI–01 (June 23, 2015).

⁵⁷ As discussed previously, FHFA received comments objecting to amendments that would

final rule relating to the conforming loan limits, the Director has considered this comment and has determined that it is appropriate to continue to refer to the conforming loan limit as a policy guide for establishing reasonable limits on the use of the Banks' GSE subsidy in connection with their purchase of non-federally insured or guaranteed mortgage loans.

IV. Paperwork Reduction Act

The information collection, entitled "Federal Home Loan Bank Acquired Member Assets, Core Mission Activities, Investments and Advances" contained in current 12 CFR part 955 of the regulations that is transferred to 12 CFR part 1268 by this final rule has been assigned control number 2590-0008 by the Office of Management and Budget (OMB). The final rule does not substantively or materially modify the current, approved information collection.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires that a regulation that has a significant economic impact on a substantial number of small entities, small businesses, or small organizations must include an initial regulatory flexibility analysis describing the regulation's impact on small entities. FHFA need not undertake such an analysis if the agency has certified the regulation will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). FHFA has considered the impact of the final rule under the Regulatory Flexibility Act.

FHFA certifies that the final rule will not have a significant economic impact on a substantial number of small entities because the regulation is applicable only to the Banks, which are not small entities for purposes of the Regulatory Flexibility Act.

List of Subjects

12 CFR Part 955

Community development, Credit, Federal home loan banks, Housing, Reporting and recordkeeping requirements.

12 CFR Part 1201

Administrative practice and procedure, Federal home loan banks, Government-sponsored enterprises, Office of Finance, Regulated entities.

12 CFR Part 1267

Community development, Credit, Federal home loan bank, Housing, Reporting and recordkeeping requirements.

12 CFR Part 1268

Acquired member assets, Credit, Federal home loan bank, Housing, Nationally recognized statistical rating agency.

12 CFR Part 1281

Credit, Federal home loan banks, Housing, Mortgages, Reporting and recordkeeping requirements.

Authority and Issuance

For reasons stated in the **SUPPLEMENTARY INFORMATION**, and under the authority of 12 U.S.C. 1430, 1430b, 1431, 4511, 4513, 4526, FHFA is amending subchapter G of chapter IX and subchapters A, D, and E of chapter XII of title 12 of the Code of Federal Regulations as follows:

CHAPTER IX—FEDERAL HOUSING FINANCE BOARD

Subchapter G—[Removed and Reserved]

- 1. Subchapter G, consisting of part 955, is removed and reserved.

CHAPTER XII—FEDERAL HOUSING FINANCE AGENCY

Subchapter A—Organization and Operations

PART 1201—GENERAL DEFINITIONS APPLYING TO ALL FEDERAL HOUSING FINANCE AGENCY REGULATIONS

- 2. The authority citation for part 1201 continues to read as follows:

Authority: 12 U.S.C. 4511(b), 4513(a), 4513(b).

- 3. Amend § 1201.1 by revising the definition of "Acquired member assets" to read as follows:

§ 1201.1 Definitions.

* * * * *

Acquired member assets or *AMA* means assets acquired in accordance with, and satisfying the applicable requirements of, part 1268 of this chapter.

* * * * *

Subchapter D—Federal Home Loan Banks

PART 1267—FEDERAL HOME LOAN BANK INVESTMENTS

- 4. The authority citation for part 1267 continues to read as follows:

Authority: 12 U.S.C. 1429, 1430, 1430b, 1431, 1436, 4511, 4513, 4526.

§ 1267.2 [Amended]

- 5. Amend § 1267.2 in paragraph (a) by removing "955 of this title" and adding in its place "1268 of this chapter".
- 6. Part 1268 is added to subchapter D to read as follows:

PART 1268—ACQUIRED MEMBER ASSETS

Sec.

- 1268.1 Definitions.
- 1268.2 Authorization for acquired member assets.
- 1268.3 Asset requirement.
- 1268.4 Member or housing associate nexus requirement.
- 1268.5 Credit risk-sharing requirement.
- 1268.6 Servicing of AMA loans.
- 1268.7 Reporting requirements for acquired member assets.
- 1268.8 Administrative transactions and agreements between Banks.

Authority: 12 U.S.C. 1430, 1430b, 1431, 4511, 4513, 4526.

§ 1268.1 Definitions.

As used in this part:

Affiliate means any business entity that controls, is controlled by, or is under common control with, a member.

AMA investment grade means a determination made by the Bank with respect to an asset or pool, based on documented analysis, including consideration of applicable insurance, credit enhancements, and other sources for repayment on the asset or pool, that the Bank has a high degree of confidence that it will be paid principal and interest in all material respects, even under reasonably likely adverse changes to expected economic conditions.

AMA product means a structure that is defined by a specific set of terms and conditions that comply with this part 1268 and that is established by a Bank for purposes of governing the Bank's purchase of AMA-eligible loans.

AMA program means a Bank-established program to buy mortgage loans that meet the requirements of this part, which may comprise multiple AMA products.

Expected losses means the loss on the asset or pool given the expected future economic and market conditions in the model or methodology used by the Bank under § 1268.5 and applicable to an AMA product.

Participating financial institution means a member or housing associate of a Bank that is authorized to sell, credit enhance, or service mortgage loans to or for its own Bank through an AMA program, or a member or housing associate of another Bank that has been authorized to sell, credit enhance, or service mortgage loans to or for the other Bank pursuant to an agreement between the Bank acquiring the AMA product and the Bank of which the selling institution is a member or housing associate.

Pool means a group of loans acquired under one or more loan funding

commitments, contractual agreements, or similar arrangements.

Qualified insurer means an insurer that a Bank approves in accordance with § 1268.5(e)(1) to provide any form of mortgage insurance coverage on assets and pools purchased under an AMA program.

Residential real property has the meaning set forth in § 1266.1 of this chapter.

§ 1268.2 Authorization for acquired member assets.

(a) *General.* Each Bank is authorized to invest in assets that qualify as AMA, subject to the requirements of this part and part 1272 of this chapter.

(b) *Grandfathered transactions.* Notwithstanding paragraph (a), a Bank may continue to hold as AMA assets that were previously authorized by the Federal Housing Finance Board or FHFA for purchase as AMA, provided that the assets were purchased, and continue to be held, in compliance with that authorization.

§ 1268.3 Asset requirement.

Assets that qualify as AMA shall be limited to the following:

(a) Whole loans that are eligible to secure advances under § 1266.7(a)(1)(i),

(a)(2)(ii), (a)(4), or (b)(1) of this chapter, excluding:

(1) Single-family mortgage loans where the loan amount exceeds the limits established pursuant to 12 U.S.C. 1717(b)(2), unless the loan is guaranteed or insured by an agency or department of the U.S. government, in which case the limits in 12 U.S.C. 1717(b)(2) do not apply; and

(2) Loans made to an entity, or secured by property, not located in a state;

(b) Whole loans secured by manufactured housing, regardless of whether such housing qualifies as residential real property under applicable state law;

(c) State and local housing finance agency bonds; or

(d) Certificates representing interests in whole loans if:

(1) The loans qualify as AMA under paragraphs (a) or (b) of this section and meet the nexus requirement of § 1268.4; and

(2) The certificates:

(i) Meet the credit enhancement requirements of § 1268.5;

(ii) Are issued pursuant to an agreement between the Bank and a participating financial institution to share risks consistent with the requirements of this part; and

(iii) Are acquired substantially by the initiating Bank or Banks.

§ 1268.4 Member or housing associate nexus requirement.

(a) *General provision.* To qualify as AMA, any assets described in § 1268.3 must be acquired in a purchase or funding transaction only from:

(1) A participating financial institution, provided that the asset was:

(i) Originated or issued by, through, or on behalf of the participating financial institution, or an affiliate thereof; or

(ii) Held for a valid business purpose by the participating financial institution, or an affiliate thereof, prior to acquisition by the Bank; or

(2) Another Bank, provided that the asset was originally acquired by the selling Bank consistent with this section.

(b) *Special provision for housing finance agency bonds.* In the case of housing finance agency bonds acquired by a Bank from a housing associate located in the district of another Bank (local Bank), the arrangement required by the definition of “participating financial institution” in § 1268.1 between the acquiring Bank and the local Bank may be reached in accordance with the following process:

(1) The housing finance agency shall first offer the local Bank right of first refusal to purchase, or negotiate the terms of, its proposed bond offering;

(2) If the local Bank indicates, within three business days, it will negotiate in good faith to purchase the bonds, the housing finance agency may not offer to sell or negotiate the terms of a purchase with another Bank; and

(3) If the local Bank declines the offer, or has failed to respond within three business days, the acquiring Bank will be considered to have an arrangement with the local Bank for purposes of this section and may offer to buy or negotiate the terms of a bond sale with the housing finance agency.

§ 1268.5 Credit risk-sharing requirement.

(a) *General credit risk-sharing requirement.* For each AMA product, the Bank shall implement and have in place at all times, a credit risk-sharing structure that:

(1) Requires a participating financial institution to provide the credit enhancement necessary to enhance an eligible asset or pool to the credit quality specified by the terms and conditions of the AMA product, provided, however, that such credit enhancement results in the eligible asset or pool being at least AMA investment grade, as defined in § 1268.1; and

(2) Meets the requirements of this section.

(b) *Determination of necessary credit enhancement.* (1) No later than 30

calendar days after the purchase of the asset or after a pool closes, the Bank shall determine the total credit enhancement necessary to enhance the asset or pool to at least AMA investment grade and to be consistent with the terms and conditions of a specific AMA product. The enhancement shall be for the life of the asset or pool. The Bank shall make this determination for each AMA product using a model and methodology that the Bank deems appropriate, subject to paragraph (f) of this section.

(2) A Bank shall document its basis for concluding that the contractual credit enhancement required from each participating financial institution with regard to a particular asset or pool will equal or exceed the credit enhancement level specified in the terms and conditions of the AMA product and determined in accordance with paragraph (b)(1) of this section.

(c) *Credit risk-sharing structure.* Under any credit risk-sharing structure, the credit enhancement provided by the participating financial institution shall at all times meet the following requirements:

(1) The participating financial institution that is providing the credit enhancement required under this paragraph (c) shall in all cases:

(i) Bear the direct economic consequences of actual credit losses on the asset or pool:

(A) From the first dollar of loss up to the amount of expected losses; or

(B) Immediately following expected losses, but in an amount equal to or exceeding the amount of expected losses; and

(ii) Fully secure its direct credit enhancement obligation in accordance with § 1266.7; and

(2) The participating financial institution also may provide all or a portion of the credit enhancement, with the approval of the Bank, by:

(i) Contracting with an insurance affiliate of that participating financial institution to provide an enhancement, but only where such insurance is positioned in the credit risk-sharing structure so as to cover only losses remaining after the participating financial institution has borne losses as required under paragraph (c)(1)(i) of this section;

(ii) Purchasing loan-level insurance only where:

(A) The participating financial institution is legally obligated at all times to maintain such insurance with a qualified insurer; and

(B) Such insurance is positioned in the credit enhancement structure so as to cover only losses remaining after the

participating financial institution has borne losses as required under paragraph (c)(1)(i) of this section;

(iii) Purchasing pool-level insurance only where:

(A) The participating financial institution is legally obligated at all times to maintain such insurance with a qualified insurer;

(B) Such insurance insures that portion of the required credit enhancement attributable to the geographic concentration and size of the pool; and

(C) Such insurance is positioned last in the credit enhancement structure so as to cover only those losses remaining after all other elements of the credit enhancement structure have been exhausted;

(iv) Contracting with another participating financial institution in the Bank's district to provide a credit enhancement consistent with this section, in return for compensation; or

(v) Contracting with a participating financial institution in another Bank's district, pursuant to an arrangement between the two Banks, to provide a credit enhancement consistent with this section, in return for compensation.

(d) *Loans guaranteed or insured by a department or agency of the U.S. government.* Instead of the structure set forth in paragraph (c) of this section, a participating financial institution also may provide the required credit enhancement through loan-level insurance that is issued by an agency or department of the U.S. government or is a guarantee from an agency or department of the U.S. government, provided that the government insurance or guarantee remains in place for as long as the Bank owns the loan.

(e) *Qualified insurers.* (1) Within one year of January 18, 2017, each Bank must develop, and subsequently maintain, written financial and operational standards that an insurer must meet for the Bank to approve it as a qualified insurer. A Bank shall review qualified insurers at least once every two years to determine whether they still meet the financial and operational standards set by the Bank. A Bank may delegate responsibility for development of these standards and approval of qualified insurers to another Bank or group of Banks pursuant to § 1268.8.

(2) Only qualified insurers may provide private loan insurance on AMA eligible assets or the loan or pool insurance allowed as part of the credit enhancement structure for AMA products under paragraphs (c)(2)(ii) or (iii) of this section.

(f) *Appropriate methodology for calculating credit enhancement.* A Bank

shall use a model and methodology for estimating the amount of credit enhancement for an asset or pool. A Bank shall provide to FHFA upon request information about the model and methodology, including and without limitation results of any model runs and the results of any tests of the model performed by the Bank. FHFA reserves the right to direct a Bank to make changes to its model and methodology, and a Bank promptly shall institute any such FHFA-directed changes.

§ 1268.6 Servicing of AMA loans.

(a) Servicing of AMA loans may be performed by or transferred to any institution, including an institution that is not a member of the Bank System, provided that the loans, after such transfer, continue to meet all requirements to qualify as AMA under §§ 1268.3, 1268.4, and 1268.5.

(b) The transfer of mortgage servicing rights and responsibilities must be approved by the Bank or Banks that own the loan or a participation interest in the loan.

(c) A Bank shall have in place policies and procedures to ensure that the transfer of mortgage servicing rights does not negatively affect the credit enhancement on the loans in question or substantially increase the Bank's exposure to the credit risk for the asset or pool.

§ 1268.7 Reporting requirements for acquired member assets.

Each Bank shall report information related to AMA in accordance with the instructions provided in the Data Reporting Manual issued by FHFA, as amended from time to time.

§ 1268.8 Administrative transactions and agreements between Banks.

(a) *Delegation of administrative duties.* A Bank may delegate the administration of an AMA program to another Bank whose administrative office has been examined and approved by FHFA, or previously examined and approved by the Federal Housing Finance Board, to process AMA transactions. The existence of such a delegation, or the possibility that such a delegation may be made, must be disclosed to any potential participating financial institution as part of any AMA-related agreements signed with that participating financial institution. A Bank may contract with one or more parties, including without limitation another Bank, to provide services related to the administration of its own AMA program or the AMA program of another Bank for which it has been

delegated administrative responsibility, without the necessity for further disclosure to the participating financial institutions.

(b) *Termination of agreements.* Any agreement made between two or more Banks in connection with the administration of any AMA program may be terminated by any party after a reasonable notice period.

(c) *Delegation of pricing authority.* A Bank that has delegated its AMA pricing function to another Bank shall retain a right to refuse to acquire AMA at prices it does not consider appropriate, pursuant to contractual provisions among the parties.

Subchapter E—Housing Goals and Mission

PART 1281—FEDERAL HOME LOAN BANK HOUSING GOALS

■ 7. The authority citation for part 1281 continues to read as follows:

Authority: 12 U.S.C. 1430c.

■ 8. Amend § 1281.1 by revising the definitions of “Acquired Member Assets (AMA) program” and “AMA-approved mortgage” to read as follows:

§ 1281.1 Definitions.

* * * * *

Acquired Member Assets (AMA) program means a program that authorizes a Bank to hold assets acquired from or through Bank members or housing associates by means of either a purchase or funding transaction, subject to the requirements of parts 1268 and 1272 of this chapter.

AMA-approved mortgage means a mortgage that meets the requirements of an AMA program at part 1268 of this chapter, which program has been approved to be implemented under part 1272 of this chapter.

FEDERAL HOUSING FINANCE AGENCY

12 CFR Part 1272

RIN 2590–AA84

Federal Home Loan Bank New Business Activities

AGENCY: Federal Housing Finance Agency.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Agency (FHFA) is amending its regulations addressing requirements for the Federal Home Loan Banks' (Banks) new business activity (NBA) notices. The final rule reduces the scope of activities requiring submission of an NBA notice, modifies the submission requirements, and establishes new timelines for agency review and approval of such notices. The final rule also reorganizes a part of the regulations to clarify the protocol for FHFA review of NBA notices.

DATES: The final rule is effective on January 18, 2017.

FOR FURTHER INFORMATION CONTACT: Lara Worley, Principal Financial Analyst, Lara.Worley@FHFA.gov, 202-649-3324, Division of Federal Home Loan Bank Regulation; or Winston Sale, Assistant General Counsel, Winston.Sale@FHFA.gov, 202-649-3081 (these are not toll-free numbers), Office of General Counsel, Federal Housing Finance Agency, Constitution Center, 400 Seventh Street SW., Washington, DC 20219. The telephone number for the Telecommunications Device for the Hearing Impaired is 800-877-8339.

SUPPLEMENTARY INFORMATION:

I. Background

On August 23, 2016, FHFA published a proposed rule that would have modified FHFA's regulation establishing the process for the submission, review, and agency approval of Bank NBA notices. The proposed rule would have narrowed the scope of activities requiring submission of an NBA notice to those that entail "material risks not previously managed by the Bank" and would have excluded from the definition of "new business activity" the acceptance of new types of advance collateral. The proposed rule would have streamlined the NBA notice content requirements, thereby providing the Banks with greater flexibility to tailor their notices to the nature of the particular activity in which they seek to engage. The proposed rule also would have established new 30 and 80 business-day review timelines, under which FHFA would approve or deny notices. Those time periods could be tolled while FHFA awaited responses from the Banks for additional information, or in the event that the FHFA Director (Director) determined that the notice raised significant policy, supervisory, or legal issues that require additional time to resolve. The proposed rule generally provided that if FHFA were to fail to respond to, approve, or deny the notice, as applicable, within the appropriate timeline, then the notice

would be deemed to have been approved as of the end of the applicable time period. The proposed rule also included an exception to the deemed to be approved concept for those notices for which the Director has elected to extend the review timeline by an additional 60 business days. For such notices, FHFA's affirmative approval would be required before the requesting Bank could commence the proposed activity. The proposed rule also would have delegated to the Deputy Director for Federal Home Loan Bank Regulation (Deputy Director) the authority to approve NBA notices, which delegation is in substance identical to the similar delegations of authority set forth in FHFA's procedures regulations, under which the Deputy Director can grant approvals and issue non-objection letters on behalf of the Director.¹

II. Consideration of Differences Between the Banks and the Enterprises

When promulgating regulations relating to the Banks, section 1313(f) of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 requires the Director to consider the differences among the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation (together, the Enterprises) and the Banks with respect to the Banks' cooperative ownership structure; mission of providing liquidity to members; affordable housing and community development mission; capital structure; and joint and several liability.² The changes in this rulemaking apply exclusively to the Banks and generally affect the scope and timing of their NBA notifications. Apart from those changes, the substance of this final rule is substantially similar to that of the existing NBA regulation. In preparing the proposed and final rules the Director has considered the differences between the Banks and the Enterprises as they relate to the above factors and has determined that none of the statutory factors would be implicated by the final rule. The proposed rule requested public comments on the extent to which the rule would implicate any of the statutory factors, but none of the comment letters addressed this requirement.

III. Response to Comment Letters

In response to the proposed rule, FHFA received four substantive comment letters, a joint letter from the Banks and one letter each from the

National Association of Home Builders (NAHB), the Independent Community Bankers of America, and a private citizen. Most of the letters generally supported the proposed rule, but also recommended different ways in which FHFA should revise certain aspects of the rule. In response to these recommendations, FHFA has incorporated two revisions into the final rule, which are discussed below. The following sections of this document describe the issues raised by the commenters, along with FHFA's responses, which are included as part of FHFA's descriptions of the particular provisions of the final rule for which the commenters had suggested revisions. For other provisions of the proposed rule about which the commenters raised no issues, FHFA has adopted them without change.

IV. Final Rule

FHFA has made two revisions to the regulatory text of the final rule in response to comments received on the proposed rule, each of which is discussed below. Apart from those revisions, the regulatory text of the final rule is unchanged from that of the proposed rule. FHFA has declined to make certain revisions recommended by the commenters, which also are discussed below.

A. Comments Incorporated Into the Final Rule

1. Submission Requirements (1272.3)

Section 1272.3 of the rule describes the types of information that a Bank must include as part of its NBA notice. The proposed rule had required that a Bank indicate in its NBA notice whether the contemplated activity had been previously approved by FHFA for any other Bank. FHFA had included this requirement in the proposed rule to help expedite its review of NBA notices in cases in which a Bank is seeking approval of an activity it knows to have been approved for another Bank, and thus should raise no new legal or policy issues. The Banks commented that this requirement should be limited to instances where the requesting Bank actually has knowledge that FHFA has approved the same activity for another Bank. The Banks explained that FHFA should have the most comprehensive information on which Banks have previously been approved for particular activities, and that because NBA notices, and any corresponding FHFA approvals, are not public documents, a Bank would not necessarily know whether FHFA has previously approved a given activity for another Bank. The

¹ See 12 CFR 1211.3 and 1211.4.

² See 12 U.S.C. 4513(f).

Banks offered specific revisions to the regulatory text to address their concern. FHFA agrees with this recommendation and has revised the final rule by adding the language suggested by the Banks to limit the applicability of this provision to instances where the requesting Bank has actual knowledge that FHFA has previously approved the activity for another Bank.

2. Approval Standard (1272.4)

Section 1272.4(e) of the proposed rule would have added a new, explicit standard under which FHFA would approve NBA notices. In substance, that standard would have provided that FHFA would approve an NBA notice only if it determined that the Bank could conduct the proposed activities in a safe and sound manner, and that the activity would be consistent with the housing finance and community investment mission of the Banks, and with the cooperative nature of the Federal Home Loan Bank System (Bank System). The Banks commented that the proposed approval standard failed to reference that portion of the Banks' statutory mission that requires them to be a source of liquidity for their members, and did not encompass certain other services that they are legally authorized to provide to their members. The Banks also objected to the use of the phrase "cooperative nature of the Bank System" as part of the approval standard, contending that it is vague and is not supported by statutory language. FHFA agrees that the Banks' overall mission includes serving as a source of liquidity for their members and has incorporated language into the final rule's approval standard reflecting the same.³ The final rule, however, retains the language referring to the "cooperative nature of the Bank System" as part of the approval standard. By statutory design, the Banks are cooperative institutions, meaning that they provide products and services to their member institutions, and only to their members, and those members collectively own the Bank. Moreover, the very provision of the statute that the Banks cited in support of their request to include a liquidity element as part of the approval standard also refers to the "cooperative ownership structure" of the Banks.⁴

FHFA's intent in including this language in the standard was to ensure that before approving a Bank's request to engage in any new type of activity FHFA would confirm that the proposed activity would in some manner benefit

the members of the Bank. Examples of activities that would be consistent with the cooperative nature of the Bank System, and which have been the subject of prior NBA notice approvals, would include proposals to purchase mortgage loans from Bank members or otherwise facilitate the members' sale of such loans, as well as proposals to allow members to pledge new types of collateral to support their borrowing from the Banks, which would no longer require an NBA notice under the final rule. With respect to the Banks' comment that the proposed standard also should consider certain services the Banks are legally authorized to provide to their members, the intent of this provision of the rule is to articulate a general standard against which FHFA can assess a proposed activity in deciding whether to approve the notice. It is not intended to be a list of all products or services that a Bank may provide to its members or of all investments and activities in which the Banks now engage.

B. Comments Not Incorporated Into the Final Rule

1. Definition of NBA (1272.1)

The proposed rule would have narrowed the scope of the NBA regulation in two ways: (1) By limiting it to activities that introduce new material risks to the Bank; and (2) By eliminating the need to file an NBA notice prior to accepting new types of collateral. The final rule retains both of those provisions. In explaining the rationale for excluding new collateral types from the NBA definition, the supplementary information for the proposed rule stated that "the remaining universe of new types of collateral that might potentially fall into the [other real estate related collateral] category is small."⁵ The Banks commented that this language could be interpreted either to limit the types of assets that qualify as other real estate related collateral to the specific items already approved by FHFA, or to limit the proposed exclusion from the NBA filing requirement to those types of collateral that FHFA has previously approved for other Banks. The Banks asked that FHFA confirm in the final rule that FHFA did not intend the statement in the proposed rule to have either of those effects. The intent of the statement in the proposed rule was simply to acknowledge that, as a practical matter, the Banks and their members likely have already identified most of the types of assets held by the members that

could qualify as "other real estate related collateral," and thus any new types of such collateral would likely not present any materially different risks beyond those that the Banks currently manage with their existing collateral. The language of the final rule is unqualified, meaning that all types of new collateral are excluded from the term "new business activity" and thus would not trigger the requirement to file an NBA notice.

The proposed rule did not specifically address the extent to which the NBA regulations would apply to the Banks' mortgage programs or products, including Acquired Member Asset (AMA) programs or products. Nonetheless, commenters requested that FHFA revise the definition of "new business activity" to exclude: (1) Any new AMA product involving federally-insured or guaranteed loans; (2) any modifications that a Bank proposed to make to its existing AMA programs or products, and; (3) any proposals by one Bank to begin offering a new AMA program or product that FHFA has previously approved for another Bank. The three areas commenters identified for exclusion would likely encompass all activities related to mortgage programs and products. The Banks had raised similar comments in response to a separate proposed rulemaking to amend and relocate the current AMA regulations.⁶ FHFA has not included any of these revisions in the final rule. As noted above, under the final rule any new activity will require the submission of an NBA notice if it entails new material risks to the Bank. To the extent that modifications to a Bank's existing mortgage program or product, or the establishment of new products involving federally-insured or guaranteed loans, would present new material risks to the requesting Bank, they would require the submission of an NBA notice. Similarly, while a request to offer a mortgage program or product that FHFA has already approved for another Bank would not raise new legal or policy issues, it could raise supervisory issues with respect to the requesting Bank, such as with respect to its ability to manage the particular risks associated with the program or product. FHFA believes that a Bank should apply the new material risk standard equally to all types of new activities in which it might engage. FHFA does not believe that it should grant a blanket exclusion from its review of any particular area of the Banks' business.

FHFA expects that there may be instances in which a Bank is unsure

³ See 12 U.S.C. 4513(f)(1)(B).

⁴ See 12 U.S.C. 4513(f)(1)(A).

⁵ See 81 FR 57501 (August 23, 2016).

⁶ See 80 FR 78689 (December 17, 2015).

whether the risks associated with a particular new activity or modification to an existing activity are material, for purposes of the new business activity regulation. As is the case under the current regulation, FHFA is available to consult with the Banks regarding the need to file an NBA notice with respect to a proposed activity, and will make every effort to promptly advise a Bank whether a filing is required. With respect to new activities that the Banks commence after determining that they do not present new material risks, FHFA will assess those the risks associated with those activities as part of its regular supervisory process, including examinations.

2. Review Process (1272.4)

The proposed rule had used “business days” for calculating the length of the FHFA review periods. The Banks recommended that replacing that term with “calendar days” would be more convenient and consistent with other regulations. Doing so, however, also would have the effect of reducing the period of time available for FHFA to review and act on an NBA notice. FHFA had proposed the 30 and 80 business-day review periods based on its experience in considering prior NBA notices, some of which are straightforward and others of which present significant policy or legal issues, which require more time to assess. Accordingly, FHFA has decided to retain these time periods in the final rule, and does not believe that either it or the Banks would face any undue difficulty in determining the length of the review period based on business days.

In the Supplementary Information to the proposed rule, FHFA stated that the 30 business-day review period established in § 1272.4(a) would be “generally intended for activities already approved for other Banks[.]”⁷ The NAHB requested that the final rule explicitly provide that all NBA notices pertaining to activities that FHFA has previously approved for other Banks be required to be reviewed under the 30 business-day timeline. Although FHFA believes that in many cases it will in fact process such NBA notices within 30 business days, it declines to incorporate this request into the regulation because of the possibility that Bank-specific conditions could raise supervisory issues necessitating review under the 80 business-day timeline.

The proposed rule included provisions that would deem any NBA notice to be approved if FHFA did not

respond within the applicable 30 or 80 business-day timeline. The proposed rule, however, did not include such an automatic approval provision for those notices for which the Director extended the review period for an additional 60 business days, beyond the 80 business-day period. For those notices, the Banks could commence the activities only upon affirmative approval from FHFA. The Banks requested that FHFA revise the final rule so that even those notices that were subject to the Director’s 60 business-day extended review period would also be subject to a deemed approved provision if the Director did not act by the end of the extended period. The Banks commented that the 80-day review period offers sufficient time for FHFA to act on a notice without the Director’s 60-day extension and that it is unclear what regulatory or public policy benefit would be served by extending the proposed time frame. FHFA declines to accept the Banks’ suggestion, principally because notices for which the Director has extended the review period will most likely involve significant policy or legal issues, in which the Director will be directly involved. Such matters may present issues of first impression for the agency that require an extended period to fully vet, and thus do not lend themselves to being approved automatically by the passage of time. Moreover, such an automatic approval provision could inappropriately conflict with the Director’s statutory oversight authority, which provides the Director with broad latitude to exercise such incidental powers necessary in the supervision and regulation of the Banks.⁸

3. Approval of Notices (1272.7)

The proposed rule included a provision delegating authority to the Deputy Director to approve NBA notices for the agency. That provision mirrored existing regulatory delegations of authority to the Deputy Director for determining whether to grant “approvals” and to issue “non-objection letters” under FHFA’s procedures regulations.⁹ The delegation in the proposed rule, like those in the other regulations, included language to the effect that the Director reserved the right to modify, rescind, or supersede any approval granted by the Deputy Director under the delegation of authority. Commenters expressed concern that this reservation of authority to the Director would create uncertainty for Banks, which may have committed substantial resources to implement approved

activities, as to the possibility that the Director might rescind the delegated approval well after the fact. To eliminate this uncertainty, commenters requested that the final rule require that the Director grant all NBA approvals. FHFA declines to accept the commenters’ requests and has adopted the delegation of authority provision as proposed. FHFA included the delegation of authority provision within the proposed rule in large part to expedite the approval process for those NBA notices that do not raise significant policy, supervisory, or legal issues. This delegation of authority for the NBA notices is nearly identical to the existing delegations under which the Deputy Director has granted approvals for other transactions or issued non-objection letters to the Banks, and thus should create no greater uncertainty for the Banks than already exists with respect to approvals and non-objections letters. Further, as a matter of agency practice, the Deputy Director generally consults with the Director before granting any delegated authority approvals, particularly those raising significant supervisory, policy, or legal issues, and should continue to do so under the final rule.

V. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*) requires that regulations involving the collection of information receive clearance from the Office of Management and Budget (OMB). The final rule contains no such collection of information requiring OMB approval under the PRA. Consequently, no information has been submitted to OMB for review.

VI. Regulatory Flexibility Act

The final rule applies only to the Banks, which do not come within the meaning of small entities as defined in the Regulatory Flexibility Act (RFA). See 5 U.S.C. 601(6). Therefore, in accordance with section 605(b) of the RFA, FHFA certifies that this final rule is not likely to have a significant economic impact on a substantial number of small entities.

Federal home loan banks, Reporting and recordkeeping requirements.

Authority and Issuance

■ Accordingly, for reasons stated in the preamble and under the authority of 12 U.S.C. 1431(a), 1432(a), 4511(b), 4513, 4526(a), FHFA hereby amends subchapter D of chapter XII of title 12 of the Code of Federal Regulations by revising part 1272 to read as follows:

⁸ See 12 U.S.C. 4513(a)(2)(B).

⁹ See 12 CFR 1211.3(a) and 1211.4(a).

⁷ 81 FR 57502 (August 23, 2016).

PART 1272—NEW BUSINESS ACTIVITIES

Sec.

- 1272.1 Definitions.
- 1272.2 Limitation on Bank authority to undertake new business activities.
- 1272.3 New business activity notice requirement.
- 1272.4 Review process.
- 1272.5 Additional information.
- 1272.6 Examinations.
- 1272.7 Approval of notices.

Authority: 12 U.S.C. 1431(a), 1432(a), 4511(b), 4513, 4526(a).

§ 1272.1 Definitions.

As used in this part:

Business Day means any calendar day other than a Saturday, Sunday, or legal public holiday listed in 5 U.S.C. 6103.

NBA Notice Date means the date on which FHFA receives a new business activity notice.

New business activity (NBA) means any business activity undertaken, transacted, conducted, or engaged in by a Bank that entails material risks not previously managed by the Bank. A Bank's acceptance of a new type of advance collateral does not constitute an NBA.

§ 1272.2 Limitation on Bank authority to undertake new business activities.

No Bank shall undertake an NBA except in accordance with the procedures set forth in this part.

§ 1272.3 New business activity notice requirement.

Prior to undertaking an NBA, a Bank shall submit a written notice of the proposed NBA that provides a thorough, meaningful, complete, and specific description of the activity such that FHFA will be able to make an informed decision regarding the proposed activity. At a minimum, the notice should include the following information:

(a) A written opinion of counsel identifying the specific statutory, regulatory, or other legal authorities under which the NBA is authorized and, for submissions raising legal questions of first impression, a reasoned analysis explaining how the cited authorities can be construed to authorize the new activity;

(b) A full description of the proposed activity, including, when applicable, infographics and definitions of key terms. In addition, the Bank shall indicate whether the proposed activity represents a modification to a previously approved activity in which the Bank is engaged or is an activity that FHFA has approved for any other Banks, if known to the requesting Bank, and if applicable;

(c) A discussion of why the Bank proposes to engage in the new activity and how the activity supports the housing finance and community investment mission of the Bank;

(d) A discussion of the risks presented by the new activity and how the Bank will manage these risks; and

(e) A good faith estimate of the anticipated dollar volume of the activity, and the income and expenses associated with implementing and operating the new activity, over the initial three years of operation.

§ 1272.4 Review process.

(a) Within 30 business days of the NBA Notice Date, FHFA will take one of the following actions:

(1) Approve the proposed NBA;

(2) Deny the proposed activity; or

(3) Inform the Bank that the activity raises policy, legal, or supervisory issues that require further evaluation. If FHFA fails to take any of those actions by the 30th business day following the NBA Notice Date, the NBA notice shall be deemed to have been approved and the Bank may commence the activity for which the notice was submitted.

(b) In the case of any notice that FHFA has determined requires further evaluation, FHFA will approve or deny the notice by no later than the 80th business day following the NBA Notice Date. If FHFA fails to approve or deny a NBA notice by that date, and the Director has not extended the review period, the NBA notice shall be deemed to have been approved and the Bank may commence the activity for which the notice was submitted.

(c) For purposes of calculating the review period, no days will be counted between the date that FHFA has requested additional information from the Bank pursuant to § 1272.5 and the date that the Bank responds to all questions communicated.

(d) Notwithstanding anything contained in this part, the Director may extend the 80 business-day review period by an additional 60 business days if the Director determines that additional time is required to consider the notice. In such a case, FHFA will inform the Bank of any such extension before the 80th business day following the NBA Notice Date, and the Bank may not commence the NBA until FHFA has affirmatively approved the notice.

(e) In considering any NBA notice, FHFA will assess whether the proposed activity will be conducted in a safe and sound manner and is consistent with the housing finance, community investment, and liquidity missions of the Banks and the cooperative nature of the Bank System. FHFA may deny an

NBA notice or may approve the notice, which approval may be made subject to the Bank's compliance with any conditions that FHFA determines are appropriate to ensure that the Bank conducts the new activity in a safe and sound manner and in compliance with applicable laws or regulations and the Bank's mission.

§ 1272.5 Additional information.

FHFA may request additional information from a Bank necessary to issue a determination regarding an NBA. After an initial request for information, FHFA may make subsequent requests for information only to the extent that the information provided by the Bank does not fully respond to a previous request, the subsequent request seeks information needed to clarify the Bank's previous response, or the information provided by the Bank raises new legal, policy, or supervisory issues not evident based on the Bank's NBA notice or responses to previous requests for information. Nothing contained in this paragraph shall limit the Director's authority to request additional information from a Bank regarding an NBA for which the Director has extended the review period.

§ 1272.6 Examinations.

Nothing in this part shall limit in any manner the right of FHFA to conduct any examination of any Bank relating to its implementation of an NBA, including pre- or post-implementation safety and soundness examinations, or review of contracts or other agreements between the Bank and any other party.

§ 1272.7 Approval of notices.

The Deputy Director for Federal Home Loan Bank Regulation may approve requests from a Bank seeking approval of any NBA notice submitted in accordance with this part. The Director reserves the right to modify, rescind, or supersede any such approval granted by the Deputy Director, with such action being effective only on a prospective basis.

Dated: December 12, 2016.

Melvin L. Watt,

Director, Federal Housing Finance Agency.

BILLING CODE 8070–01–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2016-7425; Directorate Identifier 2014-NM-244-AD; Amendment 39-18741; AD 2016-25-15]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2011-17-05, for certain Airbus Model A300 B2-1C, A300 B2-203, A300 B2K-3C, A300-B4-103, A300 B4-203, and A300 B4-2C airplanes. AD 2011-17-05 required repetitive inspections in sections 13 through 18 of the fuselage between rivets of the longitudinal lap joints between frames (FRs) 18 and 80 for cracking, and repair or modification if necessary. This new AD requires a revised repetitive inspection program of all longitudinal lap joints and repairs between FRs 18 and 80 to address widespread fatigue damage (WFD). This AD was prompted by an evaluation done by the design approval holder indicating that certain sections of the longitudinal lap joints are subject to WFD; therefore, a revised inspection program is necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 23, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of November 16, 2011 (76 FR 63177, October 12, 2011).

ADDRESSES: For service information identified in this final rule, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-7425.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-7425; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-2125; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:**Discussion**

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2011-17-05, Amendment 39-16769 (76 FR 63177, October 12, 2011) (“AD 2011-17-05”). AD 2011-17-05 applied to certain Airbus Model A300 B2-1C, A300 B2-203, A300 B2K-3C, A300-B4-103, A300 B4-203, and A300 B4-2C airplanes. The NPRM published in the **Federal Register** on July 7, 2016 (81 FR 44232). The NPRM was prompted by an evaluation done by the design approval holder indicating that certain sections of the longitudinal lap joints are subject to WFD. The NPRM proposed to continue to require repetitive inspections in sections 13 through 18 of the fuselage between rivets of the longitudinal lap joints between FRs 18 and 80 for cracking, and repair or modification if necessary. The NPRM also proposed to require a revised repetitive inspection program of all longitudinal lap joints and repairs between FRs 18 and 80 to address this WFD. We are issuing this AD to detect and correct fatigue cracking of the longitudinal lap joints of the fuselage, which could result in reduced structural integrity of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2014-0265, dated December 9, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the

MCAI”), to correct an unsafe condition for the specified products.

The MCAI states:

Cracks were found on in-service aeroplanes in sections 13 to 18 of the fuselage between rivets of longitudinal lap joints between frames (FR) 18 and FR80.

This condition, if not detected and corrected, could affect the structural integrity of the aeroplane.

To address this unsafe condition, Airbus developed an inspection programme for the longitudinal lap joints and repairs between FR18 and FR80, and EASA issued AD 2007-0091 [which corresponds to FAA AD 2011-17-05] to require the implementation of that programme.

Since EASA AD 2007-0091 was issued, [a] new Widespread Fatigue Damage regulation has been issued. This new regulation led to the revision of the maintenance programme for the longitudinal lap joints and repairs between FR18 and FR80.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2007-0091, which is superseded, and requires implementation of the revised inspection programme.

Required actions include repetitive inspections of the bonded inner doublers of the longitudinal lap joints in sections 13 through 18 for disbonding or corrosion, and repairing any disbonding and corrosion; a follow-on rototest or ultrasonic inspection to verify cracking, and repair of any cracking. The repetitive inspection interval ranges from 3,000 flight cycles up to 8,000 flight cycles, depending on airplane configuration. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2016-7425.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Costs of Compliance

We estimate that this AD affects 4 airplanes of U.S. registry.

ESTIMATED COSTS

Action	Labor cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2011–17–05	3,735 work-hours × \$85 per hour = \$317,475	\$317,475	\$1,269,900
New inspections	140 work-hours × \$85 per hour = \$11,900	\$11,900	\$47,600

We have received no definitive data that enables us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2011–17–05, Amendment 39–16769 (76 FR 63177, October 12, 2011), and adding the following new AD:

2016–25–15 Airbus: Amendment 39–18741; Docket No. FAA–2016–7425; Directorate Identifier 2014–NM–244–AD.

(a) Effective Date

This AD is effective January 23, 2017.

(b) Affected ADs

This AD replaces AD 2011–17–05, Amendment 39–16769 (76 FR 63177, October 12, 2011) ("AD 2011–17–05").

(c) Applicability

This AD applies to Airbus Model A300 B2–1C, A300 B2–203, A300 B2K–3C, A300–B4–103, A300 B4–203, and A300 B4–2C airplanes; certificated in any category; all manufacturer serial numbers, except those on which Airbus Modification 2611 has been embodied in production.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by an evaluation done by the design approval holder indicating that certain sections of the longitudinal lap joints are subject to widespread fatigue damage. We are issuing this AD to detect and correct fatigue cracking of the longitudinal lap joints of the fuselage, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Fuselage Inner Doubler Inspections and Repair, With Revised Formatting

This paragraph restates the requirements of paragraph (l) of AD 2011–17–05, with revised

formatting. For airplanes on which any inspections of the fuselage bonded inner doublers of the longitudinal lap joints in sections 13 through 18 (except sections 16 and 17 at stringer 31 left-hand and right-hand) for disbonding and cracking have not been done as of November 16, 2011 (the effective date of AD 2011–17–05), as specified by Airbus Service Bulletin A300–53–229: Prior to the accumulation of 24,000 total flight cycles or within 15 years since new, whichever occurs first; or within 60 days after November 16, 2011; whichever occurs later; do a detailed inspection of the fuselage bonded inner doublers of the longitudinal lap joints in sections 13 through 18 (except sections 16 and 17 at stringer 31 left-hand and right-hand) for disbonding and cracking, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997. If no disbonding and no cracking are found, repeat the inspection thereafter at the applicable intervals specified in paragraph (h) of this AD.

(1) If no cracking is found, and "minor" disbonding, as defined in Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997, is found: Repeat the inspection thereafter at intervals not to exceed 1 year for areas below stringer 22, and at intervals not to exceed 2 years for areas above and including stringer 22.

(2) If no cracking is found, and "major" disbonding, as defined in Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997, is found: Within 1,000 flight cycles after doing the inspection, repair, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997.

(3) If any cracking is found, repair prior to further flight, in accordance with Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997.

(h) Retained Repetitive Intervals for Inspections for Disbonding and Cracking, With No Changes

This paragraph restates the repetitive intervals specified in table 1 of AD 2011–17–05, with no changes. At the applicable time specified in paragraph (h)(1) or (h)(2) of this AD, repeat the inspection required by paragraph (g) of this AD.

(1) For sections 13 and 14 as specified in Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997: Repeat the inspection at intervals not to exceed 7 years or 12,000 flight cycles, whichever occurs first.

(2) For sections 15 through 18 as specified in Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997: Repeat the inspection within 8.5 years or 12,000 flight cycles, whichever occurs first.

(i) Retained Fuselage Inner Doubler Inspections and Repair, With No Changes

This paragraph restates the requirements of paragraph (m) of AD 2011-17-05, with no changes. For airplanes on which any inspections of the fuselage bonded inner doublers of the longitudinal lap joints in sections 13 through 18 (except sections 16 and 17 at stringer 31 left-hand and right-hand) for disbonding and cracking have been done as of November 16, 2011 (the effective date of AD 2011-17-05), as specified in Airbus Service Bulletin A300-53-229; except for airplanes on which a repair of that area has been done as specified in Airbus Service Bulletin A300-53-229: Within 7 years or 12,000 flight cycles (for sections 13 and 14), or within 8.5 years or 12,000 flight cycles (for sections 15 and 18), after doing the inspection, whichever occurs first; or within 60 days after November 16, 2011, whichever occurs later, do a detailed inspection of the fuselage bonded inner doublers of the longitudinal lap joints in sections 13 through 18 (except sections 16 and 17 at stringer 31 left-hand and right-hand) for disbonding and cracking, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997. If no disbonding and no cracking are found, repeat the inspection at the applicable time specified in paragraph (h) of this AD.

(1) If no cracking is found, and "minor" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Repeat the inspection thereafter at intervals not to exceed 1 year for areas below stringer 22, and at intervals not to exceed 2 years for areas above and including stringer 22.

(2) If no cracking is found, and "major" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Within 1,000 flight cycles after doing the inspection, repair, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(3) If any cracking is found, repair prior to further flight, in accordance with Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(j) Retained Fuselage Inner Doubler Inspections and Repair, With No Changes

This paragraph restates the requirements of paragraph (n) of AD 2011-17-05, with no changes. For airplanes on which any inspections of the fuselage bonded inner doublers of the longitudinal lap joints in sections 16 and 17 at stringer 31 left-hand and right-hand for disbonding and cracking have not been done as of November 16, 2011 (the effective date of AD 2011-17-05), as specified in Airbus Service Bulletin A300-53-229: Prior to the accumulation of 24,000 total flight cycles or within 12 years since new, whichever occurs first; or within 60 days after November 16, 2011, whichever occurs later, do a detailed inspection of the fuselage bonded inner doublers of the longitudinal lap joints in sections 16 and 17 at stringer 31 left-hand and right-hand for disbonding and cracking, in accordance with the Accomplishment Instructions of Airbus

Service Bulletin A300-53-229, Revision 5, dated April 8, 1997. If no disbonding and no cracking are found, repeat the inspection thereafter at intervals not to exceed 7 years or 12,000 flight cycles, whichever occurs first.

(1) If no cracking is found, and "minor" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Repeat the inspection thereafter at intervals not to exceed 1 year for areas below stringer 22, and at intervals not to exceed 2 years for areas above and including stringer 22. Doing a repair in accordance with Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, terminates the repetitive inspections required by this paragraph for that area.

(2) If no cracking is found, and "major" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Within 1,000 flight cycles after doing the inspection, repair, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(3) If any cracking is found, repair prior to further flight, in accordance with Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(k) Retained Fuselage Inner Doubler Inspections and Repair, With No Changes

This paragraph restates the requirements of paragraph (o) of AD 2011-17-05, with no changes. For airplanes on which any inspections of the fuselage bonded inner doublers of the longitudinal lap joints in sections 16 and 17 at stringer 31 left-hand and right-hand for disbonding and cracking have been done as of November 16, 2011, as specified in Airbus Service Bulletin A300-53-229; except airplanes on which a repair of that area has been done as specified in Airbus Service Bulletin A300-53-229: Within 7 years or 12,000 flight cycles after doing the inspection, whichever occurs first; or within 60 days after November 16, 2011; whichever occurs later; do a detailed inspection of the fuselage bonded inner doublers of the longitudinal lap joints in sections 16 and 17 at stringer 31 left-hand and right-hand for disbonding and cracking, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997. If no disbonding and no corrosion are found, repeat the inspection thereafter at intervals not to exceed 7 years or 12,000 flight cycles, whichever occurs first.

(1) If no cracking is found, and "minor" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Repeat the inspection thereafter at intervals not to exceed 1 year for areas below stringer 22, and at intervals not to exceed 2 years for areas above and including stringer 22. Doing a repair, in accordance with Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, terminates the repetitive inspections required by this paragraph for that area.

(2) If no cracking is found, and "major" disbonding, as defined in Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997, is found: Within 1,000 flight

cycles after doing the inspection, repair, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(3) If any cracking is found, repair prior to further flight, in accordance with Airbus Service Bulletin A300-53-229, Revision 5, dated April 8, 1997.

(l) New Repetitive Inspections and Repair

Within 180 days after the effective date of this AD, do rototest and ultrasonic inspections, as applicable, for cracking of all longitudinal lap joints and repairs between frames 18 and 80; and repair any cracking before further flight; using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). Repeat the applicable inspection, including post-repair inspections, thereafter at intervals approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. Accomplishing the initial inspection and applicable repairs required by this paragraph terminates the actions required by paragraphs (g) through (k) of this AD.

(m) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-2125; fax 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Related Information

Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2014-0265, dated December 9, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-7425.

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on November 16, 2011 (76 FR 63177, October 12, 2011).

(i) Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997, including Appendix A300SB/53–229, dated April 10, 1989. Only pages 1, 2, 5, 11, and 12 of Airbus Service Bulletin A300–53–229, Revision 5, dated April 8, 1997, show revision level 5 and issue date April 8, 1997; pages 3, 4–10, and 13–17 show revision level 4 and issue date March 30, 1994; and pages 1–17 of Appendix A300SB/53–229 show issue date April 10, 1989.

(ii) Reserved.

(4) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>.

(5) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(6) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on December 1, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 97**

[Docket No. 31107; Amdt. No. 3723]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff

Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective December 19, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 19, 2016.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE., West Bldg., Ground Floor, Washington, DC 20590–0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK 73169 (Mail Address: P.O. Box

25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPs, Takeoff Minimums and/or ODPs. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part § 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may

require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR part 97:

Air Traffic Control, Airports, Incorporation by reference, Navigation (Air).

Issued in Washington, DC, on November 18, 2016.

John S. Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

14 CFR Part 97

[Docket No. 31109; Amdt. No. 3725]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective December 19, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 19, 2016.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE., West Bldg., Ground Floor, Washington, DC 20590-0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

Nichols, Flight Procedure Standards Branch (AFS-420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954-4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPs, Takeoff Minimums and/or ODPs. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part § 97.20. The applicable FAA forms are FAA Forms 8260-3, 8260-4, 8260-5, 8260-15A, and 8260-15B when required by an entry on 8260-15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex

nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and

contrary to the public interest and, where applicable, under 5 U.S.C 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, Navigation (Air).

Issued in Washington, DC, on December 2, 2016.

John S. Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

BILLING CODE 4910-13-P

SOCIAL SECURITY ADMINISTRATION**20 CFR Part 421**

[Docket No. SSA–2016–0011]

RIN 0960–AH95

Implementation of the NICS Improvement Amendments Act of 2007**AGENCY:** Social Security Administration.
ACTION: Final rules.

SUMMARY: These final rules implement provisions of the NICS Improvement Amendments Act of 2007 (NIAA) that require Federal agencies to provide relevant records to the Attorney General for inclusion in the National Instant Criminal Background Check System (NICS). Under these final rules, we will identify, on a prospective basis, individuals who receive Disability Insurance benefits under title II of the Social Security Act (Act) or Supplemental Security Income (SSI) payments under title XVI of the Act and who also meet certain other criteria, including an award of benefits based on a finding that the individual's mental impairment meets or medically equals the requirements of section 12.00 of the Listing of Impairments (Listings) and receipt of benefits through a representative payee. We will provide pertinent information about these individuals to the Attorney General on not less than a quarterly basis. As required by the NIAA, at the commencement of the adjudication process we will also notify individuals, both orally and in writing, of their possible Federal prohibition on possessing or receiving firearms, the consequences of such prohibition, the criminal penalties for violating the Gun Control Act, and the availability of relief from the prohibition on the receipt or possession of firearms imposed by Federal law. Finally, we also establish a program that permits individuals to request relief from the Federal firearms prohibitions based on our adjudication. These changes will allow us to fulfill responsibilities that we have under the NIAA.

DATES: This final rule will be effective on January 18, 2017. However, compliance is not required until December 19, 2017.

SUPPLEMENTARY INFORMATION:**Background**

On May 5, 2016, we published a notice of proposed rulemaking (NPRM) in the *Federal Register* (81 FR 27059) in which we proposed adding part 421 to our regulations in order to implement our obligations under the NIAA. We

proposed rules under which we would identify and report to the Attorney General, on a prospective basis, information about any title II or title XVI beneficiary whom we are required to report for inclusion in the NICS because that person is subject to the Federal mental health prohibitor as a result of our adjudication.¹ Under our proposed rules, we would: (1) Identify relevant records and report pertinent information to the NICS, (2) provide oral and written notification to our title II and title XVI beneficiaries who meet the requisite criteria, and (3) permit our beneficiaries who meet the requisite criteria to apply to us for relief from the firearms prohibition imposed by 18 U.S.C. 922(d)(4) or (g)(4) by virtue of our adjudication. We provided additional information and discussion of the reasons we issued our proposed rules in the preamble to those rules at 81 FR 27059.

We adopt the proposed rules as final rules, with several changes outlined in the discussion of the public comments and our responses. The final rules allow a person to apply for relief any time after our adjudication that the person meets the requirements of the Federal mental health prohibitor has become final. The final rules also set out several circumstances in which we will notify the Attorney General to remove a person's name from the NICS. We also made minor changes to the definition of the term "affected individual" in section 421.105 and to section 421.110(b)(2). The changes in both of these sections are for clarity, and do not substantively change the rules.

Public Comments and Discussion

In our NPRM, we provided a 62-day comment period, which ended July 5, 2016. As we stated in our proposed rules, the NIAA, the President's January 2013 Memorandum to Federal agencies, and the Department of Justice's (DOJ) March 2013 guidance require Federal agencies with any record demonstrating that a person falls within one of the categories in 18 U.S.C. 922(g) or (n) to provide the pertinent information contained in the record to the Attorney General, not less frequently than quarterly, for inclusion in the NICS.²

¹ As part of our responsibilities under the NIAA, we will also provide the Attorney General with copies of court orders that we receive, beginning on or after the compliance date of these final rules, regarding adult title II and title XVI disability claimants and beneficiaries who have been declared legally incompetent by a State or Federal court. The FBI will identify those court orders that meet the requirements of the Federal mental health prohibitor.

² NIAA, sec. 101(a)(4), 121 Stat. at 2161; Memorandum for the Heads of Executive

Departments and Agencies, *Improving Availability of Relevant Executive Branch Records to the National Instant Criminal Background Check System*, 78 FR 4297 (2013); Department of Justice, *Guidance to Agencies Regarding Submission of Relevant Records to the NICS* (March 2013) ("DOJ Guidance"). We included the relevant portion of the DOJ Guidance in the preamble to our proposed rules (81 FR at 27060–27061).

Because our proposed rules were limited to our process for satisfying our mandated reporting and relief requirements, comments about issues that do not pertain to our proposed rules are outside of the scope of our rulemaking authority. We have not responded here to comments outside of the scope of our proposed rules. We received 91,243 timely submitted comments that addressed issues within the scope of our proposed rules. We carefully considered the concerns expressed in these comments. Due to the high volume of the comments submitted, we summarized and grouped them by main issue expressed. We present the views received, and address the relevant and significant issues raised by the commenters. Of the timely-submitted comments, 86,860 were identical letters from different members of one advocacy group, and 324 were signatures on one comment letter. These letters urged us to withdraw the proposed rules, which the commenters thought would adversely affect individuals' Second Amendment rights. We address that comment below.

Various advocacy groups and individuals submitted the remaining 4,059 comments. Many of these commenters questioned our legal authority to provide the names of Social Security beneficiaries to DOJ for inclusion in the NICS. The majority of these comments focused on how DOJ would use the information we provide—*i.e.*, what the effect would be on the Second Amendment rights of individuals whose names would be included in the NICS. Other legal issues raised included due process and equal protection concerns. Many commenters questioned the criteria we proposed to use to identify names for inclusion in the NICS. Some of these comments were based on an incorrect understanding of the information we provided in the NPRM. We also address those misunderstandings below. Several commenters appeared to misunderstand the process we would need to follow to revise these criteria in the future.

Some commenters cautioned about the potential for stigmatization of those with mental health disorders, and questioned why we did not provide evidence demonstrating the correlation between mental health and gun-related

Departments and Agencies, *Improving Availability of Relevant Executive Branch Records to the National Instant Criminal Background Check System*, 78 FR 4297 (2013); Department of Justice, *Guidance to Agencies Regarding Submission of Relevant Records to the NICS* (March 2013) ("DOJ Guidance"). We included the relevant portion of the DOJ Guidance in the preamble to our proposed rules (81 FR at 27060–27061).

violence. Commenters also expressed apprehension about the potential violation of privacy rights, including rights under the Health Insurance Portability and Accountability Act (HIPAA). Commenters also questioned our existing processes for determining the presence of a disability based on a mental impairment and our process for appointing representative payees. Multiple commenters asked about our process for seeking relief and the removal of names from the NICS. Several commenters expressed that the policy we proposed was an unnecessary expenditure of Federal Government funds.

We also received multiple comments in support of the rules. These individuals and advocacy group commenters spoke as appointed representatives of Social Security beneficiaries with mental illness or as proponents of greater gun control efforts.

We respond in greater detail below to the relevant comments submitted in response to the proposed rule. We organize the comments and our responses by category for ease of review.

Legal Authority

Comment: Multiple individuals questioned our authority to report any information to the NICS database. Some commenters opined that NIAA section 101(c)(1)(C) prohibited us from reporting information to DOJ that is “based solely on a medical finding of disability. . . .” Another commenter suggested that we should not be able to submit any medical information to the NICS without a court order.

Response: Our authority to report the information we include in these final rules stems from section 101(a)(4) of the NIAA, which requires that we provide to the Attorney General for inclusion in the NICS pertinent information included in any record demonstrating that a person falls within one of the categories in 18 U.S.C. 922(g) or (n).³ NIAA section 101(c)(1)(C) does not prohibit us from reporting this information to the NICS. The commenters who relied on section 101(c)(1)(C) only cited part of the section in their comments. In its entirety, section 101(c)(1)(C) of the NIAA states: “No department or agency of the Federal Government may provide to the Attorney General any record of an adjudication related to the mental health of a person or any commitment of a person to a mental institution if . . . (C) the adjudication or commitment, respectively, is based

solely on a medical finding of disability, without an opportunity for a hearing by a court, board, commission, or other lawful authority, and the person has not been adjudicated as a mental defective consistent with section 922(g)(4) of title 18, United States Code, except that nothing in this section or any other provision of law shall prevent a Federal department or agency from providing to the Attorney General any record demonstrating that a person was adjudicated to be not guilty by reason of insanity, or based on lack of mental responsibility, or found incompetent to stand trial, in any criminal case or under the Uniform Code of Military Justice.”

We are not reporting information in records based solely on a medical finding of disability without the person being adjudicated as subject to the Federal mental health prohibitor “consistent with 18 U.S.C. 922(g)(4).” The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) has clarified through regulations that this prohibition covers individuals who have been determined by a court, board, commission or other lawful authority as a result of marked subnormal intelligence, or mental illness, incompetency, condition or disease to be a danger to himself or to others, or who lacks the mental capacity to contract or manage his or her own affairs.⁴

The DOJ Guidance specifically indicates that records relevant to the NICS include “agency records of adjudications of an individual’s inability to manage his or her own affairs if such adjudication is based on marked subnormal intelligence or mental illness, incompetency, condition or disease.” The DOJ further indicated that this category of records “includes certain agency designations of representative or alternate payees for program beneficiaries.”⁵

As we explained in the NPRM, our adjudication is an adjudication by a lawful authority, by virtue of the authority granted to the Commissioner of Social Security under the Social Security Act. We also are not basing our reporting of records to the NICS solely on a medical finding of disability. Rather, consistent with section 101(a)(4) of the NIAA and the ATF’s implementing regulation, we are basing our report on the individual’s inability to manage his or her affairs as a result of his or her mental impairment. However, we will not include medical information in our reports to the NICS—

we will report only the beneficiary’s name, full date of birth, sex, and Social Security number. In addition, we will only inform the FBI of the fact that the individual meets the criteria for inclusion in the NICS under the NIAA due to a mental health prohibitor, but we will not provide any details on the individual’s specific diagnosis.

Comment: Multiple commenters questioned our authority to declare an individual to be subject to the Federal mental health prohibitor, and argued that only a court can make that decision.

Response: By these rules, we are complying with the requirements of the NIAA by identifying individuals in our records who meet the criteria of the mental health prohibitor in 18 U.S.C. 922(g). As we noted previously, our authority to do so derives from section 101(a)(4) of the NIAA. DOJ’s guidance indicates that relevant records under the mental health prohibitor category include not only court adjudications but also agency records of adjudications of an individual’s inability to manage his or her own affairs, including the agency’s designation of a representative payee because of his or her mental impairment. As we noted above and in the proposed rules, the ATF’s regulations require that the individual be found to be subject to the Federal mental health prohibitor “by a court, board, commission or other lawful authority. . . .”⁶ Consequently, neither the NIAA nor the ATF’s implementing regulations require an agency to report information to the NICS based only on a court order, as some of the commenters suggested.

Comment: One commenter asked if the determinations would be secret or open, and if there are safeguards in place to ensure that the people making the designations are free of bias or prejudice.

Response: We will use our regular program rules to determine whether an individual is disabled due to a mental impairment that is severe enough to meet the requirements of our mental disorder listings, and to determine if that person also requires a representative payee because of his or her mental impairment. We apply our program rules to *all* claimants *equally*, regardless of whether or not one meets the NICS criteria. We expect all of our adjudicators to fulfill their duties with fairness and impartiality, and we have existing procedures in place that allow us to address claims of bias or prejudice in our administrative process.

By “open” we assume that the commenter’s concern was over the

⁴ 27 CFR 478.11(a)(1)–(2).

⁵ 81 FR at 27061.

⁶ 27 CFR 478.11(a).

³ NIAA 101(a)(4), 121 Stat. at 2161.

privacy of the information that we would report to the NICS. A determination regarding inclusion in the NICS would be open to the individual affected, and we will apply the safeguards set out in these rules, such as oral and written notification to the individual at the commencement of the adjudication, to ensure that the individual who may be subject to reporting has adequate information about the reporting process, the effect of our reporting, and options for relief.

In addition, we will apply the protections against unauthorized disclosure in the Privacy Act of 1974, 5 U.S.C. 552a; our regulations, 20 CFR part 401; and the Social Security Act, 42 U.S.C. 1306(a). Thus, we may only disclose information in accordance with these laws and regulations. We also provide claim information to individuals upon request of the claimant. Under the Privacy Act of 1974 and our regulations, an individual may request access to his or her records maintained in agency Privacy Act systems of records, including those under which we maintain diagnosis information.⁷

Constitutional Issues: Second Amendment and Equal Protection

Comment: Many commenters expressed concern that these rules would violate the affected individuals' rights under the Second Amendment to the Constitution, and would also violate their equal protection rights under the Constitution. Most of these comments were provided in largely identical letters, and they asserted that our rules would take firearms away from elderly recipients of Social Security retirement benefits.

Response: With these rules, we are seeking to satisfy our obligations under the NIAA, which requires Federal agencies to provide relevant records to the Attorney General for inclusion in the NICS. While the rule addresses reporting requirements, it is the Federal Gun Control Act, not the Social Security Act, that governs when a person can possess a firearm. The criteria we will use under these rules do not focus on one age group, such as the elderly or recipients of Social Security retirement benefits, nor do they categorize and treat individuals who are similarly situated differently. Consequently, these final rules do not violate principles of equal protection. In addition, as we stated in the preamble to our NPRM and in the requirements listed in section 421.110(b)(4) of our rules, we will identify certain individuals who have

attained age 18, but have not yet attained full retirement age. We do not intend under these rules to report to the NICS any individual for whom we appoint a representative payee based solely on the individual's application for and receipt of Social Security retirement benefits.

With regard to the broader point the commenters raised about the constitutionality of our actions under the Second Amendment, we note that the Supreme Court recognized in *District of Columbia v. Heller*, 554 U.S. 570, 595 (2008), "that the Second Amendment conferred an individual right to keep and bear arms." The Court emphasized, however, that, "[l]ike most rights, the right secured by the Second Amendment is not unlimited," *id.*, at 626, and that "nothing in [the Court's] opinion should be taken to cast doubt on longstanding prohibitions on the possession of firearms by felons and the mentally ill." *Id.* Our actions, taken in accordance with the Congress' directives in the NIAA, the President's January 2013 memorandum to Executive agencies, and DOJ's March 2013 guidance, are fully consistent with the Supreme Court's recognition in *Heller* of the validity "of longstanding prohibitions on the possession of firearms by . . . the mentally ill." Nothing in the rules we are issuing today is inconsistent with the scope of the Second Amendment as interpreted in *Heller*. Accordingly, we have not made any changes to the rule in response to comments asserting that our actions were inconsistent with an individual's Second Amendment right.

Due Process

Comment: Multiple commenters also stated that the rules as written would violate beneficiaries' right to due process, particularly because they do not allow affected individuals to appeal the inclusion of their names in the NICS before we submit them to the DOJ. One commenter suggested that we should obtain a beneficiary's written permission before submitting information to the DOJ.

Response: Affected individuals will have the opportunity to apply for relief from the Federal firearms prohibitions imposed by 18 U.S.C. 922(g)(4) at any time after our adjudication has become final. We have clarified our rules to make that point. We will follow the requirements of the NIAA and apply principles of due process in determining applicants' entitlement to relief from the burdens imposed by inclusion in the NICS. Under these rules, we will provide individuals with advance notice at the commencement of the

adjudication that we may report their information to NICS if we find they meet the criteria for reporting when the adjudication is final. An individual can request relief any time after the adjudication is final but we cannot delay fulfilling our obligations under the NIAA to provide relevant records to the Attorney General while the person decides whether to request relief.

When an individual requests relief, we provide an opportunity for the individual to submit evidence in support of the request, which will be reviewed by an impartial decisionmaker who was not involved in making the finding that the applicant's benefit payments be made through a representative payee. We will notify the applicant in writing of our action regarding the request for relief and explain the reasons for our action. We will also inform the applicant that if he or she is dissatisfied with our action, he or she has 60 days from the date he or she receives the notice of our action to file a petition seeking judicial review in Federal district court. And, of course, judicial review of our action denying an applicant's request for relief is available in accordance with the standards prescribed in 18 U.S.C. 925(c). These procedures provide a beneficiary with ample due process protections. In response to the other commenter's concern, we note that nothing in the NIAA or any other provision of law requires us to obtain a beneficiary's written permission to disclose information to the DOJ for the NICS. We will publish a system of records notice (SORN) that will explain the purposes for which information will be maintained and disclosed, and the public will have an opportunity to comment on the SORN.

Comment: Several commenters questioned whether individuals who meet our criteria would receive adequate notice or be given the opportunity to appeal before we share their information with the DOJ. One commenter expressed concern that, "[m]any people will not be informed of the action." Other commenters asked whether "an existing beneficiary with a representative payee [would] be notified and given the opportunity to appeal before they are reported to NICS" or if we would "allow the person a reasonable amount of time to appeal that action."

Response: Consistent with the NIAA, we will provide oral and written notice to the beneficiary at the commencement of the adjudication, which we define as after we have determined that he or she meets the medical requirements for disability based on a finding that his or

⁷ 5 U.S.C. 552a(d); 20 CFR 401.35–401.40.

her impairment(s) meets or medically equals the requirements of the mental disorders listings, but before we find that he or she requires a representative payee. Under these final rules, we will provide individuals with the opportunity to apply for relief from the Federal firearms prohibitions once the adjudication becomes final and those prohibitions are imposed.

Because we will only identify individuals for reporting on a prospective basis, existing beneficiaries with representative payees will not be affected by these final rules. Individuals who currently receive benefits but who would not qualify for reporting to the NICS because they do not currently satisfy all five requirements will be reported should a continuing disability review or other disability review, such as an age-18 redetermination, demonstrate a change in status that would satisfy all five requirements. In that circumstance, we would provide the beneficiary oral and written notice of his or her potential reporting to the NICS under the regular notice requirements established by these rules before we take any action to determine capability. In addition, under our regulations, our determination to appoint a representative payee for a beneficiary is subject to our administrative review process and, ultimately, to judicial review after the individual receives our final decision.

Comment: Several commenters expressed the belief that pursuing relief would be a highly expensive process for beneficiaries, and thus beneficiaries who could not afford what might be prohibitively expensive activities, would effectively be denied due process.

Response: We will not impose a fee in connection with the filing of a request for relief. We anticipate that the cost for acquiring the evidence that we require and providing it to us directly will be reasonable. In addition to providing us with a completed relief application form, consistent with the requirements set forth in section 421.151(b) of this final rule, an applicant for relief will only be required to provide us with: (1) A current statement from his or her primary mental health provider that assesses the applicant's current mental health status and mental status for the 5 years preceding the date of the relief request; and (2) written statements and any other evidence regarding the applicant's reputation. We will obtain the applicant's criminal history report.

The requirement that the individual provide us with medical evidence, in the form of a current statement from the applicant's primary mental health

provider assessing the applicant's current mental health status and mental health status for the 5 years preceding the date of the request for relief, stems from the requirements of the NIAA. Section 101(c)(2)(A)(iii) of the NIAA⁸ provides that "[r]elief and judicial review with respect to" an agency's relief program "shall be available according to the standards prescribed in" 18 U.S.C. 925(c). Section 925(c), in turn, provides that relief may be granted "if it is established to [an agency's] satisfaction that the circumstances regarding the disability, and the applicant's record and reputation, are such that the applicant will not be likely to act in a manner dangerous to public safety and that the granting of the relief would not be contrary to the public interest." In order for us to determine whether "the applicant will not be likely to act in a manner dangerous to public safety," we must necessarily have evidence assessing the individual's mental status. The evidentiary requirements we are including in final section 421.151(c) will allow us to make the determination the NIAA and section 925(c) require us to make.

Reporting Criteria

Comment: Multiple individuals commented on the criteria we proposed for identifying individuals whose names we would report to the DOJ. Many questioned how we selected these criteria for inclusion. One commenter suggested that, "there should be a more specific review of these criteria." Another individual asked why we did not propose to send information on individuals who, among other things, are felons, domestic abusers, or unlawful users of controlled substances. Another commenter suggested that we conduct a criminal background history as an additional step prior to reporting an individual's information to the DOJ. One commenter suggested that we include an additional factor to consider an individual's propensity for violence, aggressive behavior, or self-destructive behavior.⁹

⁸ 121 Stat. at 2563.

⁹ One commenter raised the issue of our reporting felons to the NICS database. This issue is outside the scope of this final rule. However, we note that our Office of the Inspector General (OIG) has independent statutory obligations under the Inspector General Act of 1978 (Pub. L. 95-452; 92 Stat. 1101), as amended. Our OIG reports that it provides records to the NICS for individuals on whom it has opened an investigation and who are subsequently prosecuted in a State or local court. The OIG provides information on individuals who fall into the following categories: (1) Certain felons (with judgment and conviction orders from a court); certain fugitive felons; and (3) certain persons under indictment. The OIG does not provide information from their investigations prosecuted in

Response: As we explained in the NPRM, in choosing the criteria we sought to find the best fit between our adjudication regarding a claimant's entitlement to benefits and the decision to designate a representative payee and the regulatory definition of an individual who is subject to the Federal mental health prohibitor. For the reasons we discussed in the NPRM,¹⁰ we believe that there is a reasonable and appropriate fit between the criteria we use to decide whether some of our beneficiaries are disabled (e.g., a primary diagnosis of a mental impairment and meeting or equaling the requirements of one of the Mental Disorders Listing of Impairments (Listings) and requiring a representative payee because of that mental impairment) and the Federal mental health prohibitor.

We have not adopted the comment that we conduct a criminal background history in advance, because it does not comport with the criteria we are using to identify individuals for referral to NICS and, within that framework, a criminal background check is unnecessary. To reiterate, we will report an individual's record to the NICS based on his or her inability to manage his or her affairs due to a disabling mental impairment that meets or equals the criteria found in one of the Mental Disorders Listings. A criminal background check is not necessary for us to make a determination on that issue. However, we will obtain a criminal background check as part of the relief process. The relief inquiry focuses on whether the applicant will be likely to act in a manner dangerous to public safety, and whether the granting of the relief would be contrary to the public interest. The distinction we have made in these rules, under which we will obtain a criminal background check as part of the relief process, but not as part of the referral process, is consistent with the NIAA.

With respect to the commenters' questions about other categories of individuals, such as domestic abusers or unlawful users of controlled substances, we note that we do not have records regarding individuals who are domestic abusers. In addition, in adjudicating disability claims, we do not determine whether a claimant has "lost the power of self-control with reference to the use of a controlled substance," as contemplated by the ATF regulation. 27 CFR 478.11. Rather, our focus is on whether the claimant is capable of

Federal courts, because this information is already provided to NICS.

¹⁰ 81 FR at 27062.

engaging in substantial gainful activity despite his or her impairments. Even where our records identify a claim as involving either drugs only or both drugs and alcohol, our electronic records do not include structured data on the type of drug use, the extent of the use, or on how recently the controlled substance was used. Consequently, we have determined that we do not have records that meet DOJ's criteria for reporting individuals in this category to the NICS.

Regarding the suggestion that we consider an individual's propensity for violence, aggressive behavior or self-destructive behavior before we refer an individual's record to the NICS, the relevant Federal law and implementing regulation do not require us to find that a beneficiary has a propensity for violence, aggressive behavior, or self-destructive behavior before we report his or her name to the NICS. The governing ATF regulation defines the Federal mental health prohibitor as involving a determination by a court, board, commission or other lawful authority that a person, as a result of marked subnormal intelligence, or mental illness, incompetency, condition or disease, is a danger to himself or to others; or lacks the mental capacity to contract or manage his own affairs.¹¹

The regulation distinguishes between (1) the requirements of being a danger to one's self or others; and (2) the lacking of mental capacity to contract or manage one's affairs. The DOJ Guidance specifically notes that records relevant to the Federal mental health prohibitor include agency adjudications of an individual's inability to manage his or her own affairs, if the adjudication is based on marked subnormal intelligence or mental illness, incompetency, condition or disease, and it includes certain agency designations of representative or alternate payees for program beneficiaries.¹² Accordingly, in light of the ATF regulation and DOJ Guidance, we believe that we are required to find that an individual meets the requirements for the Federal mental health prohibitor if he or she meets either of the two factors set out in the ATF regulation.

Comment: Several commenters protested against what they thought would be our evaluation of all Social Security beneficiaries for potential inclusion in the NICS.

Response: The comment reflects a misunderstanding of our proposed rules. We will not evaluate all Social Security beneficiaries for potential

inclusion in the NICS. As we indicate in section 421.110(b) of our rules, the beneficiaries whose names we would submit to the NICS must meet five well-defined criteria. The criteria are that the individual must have: (1) Filed a claim based on disability; (2) been determined by us to be disabled based on a finding at step three of our sequential evaluation process that the individual's impairment(s) meets or medically equals the requirements of one of the Mental Disorders Listings; (3) a primary diagnosis code in our records that is based on a mental impairment; (4) attained age 18, but have not yet attained full retirement age; and (5) benefit payments made through a representative payee because we have found him or her incapable of managing benefit payments. We will not include any beneficiary who does not meet all of those criteria in our reporting to the NICS.

Comment: We received a significant number of comments expressing the view that we should not report certain categories of people to the DOJ for inclusion in the NICS based solely on one qualifier. Commenters erroneously expressed the belief that we would report names to the NICS if they belonged to any one of the following categories: (1) Recipients of any type of Social Security benefits; (2) recipients of Supplemental Security Income (SSI) payments or Disability Insurance (DI) beneficiaries under the Social Security Act; (3) senior citizens; (4) DI beneficiaries for other physical, non-mental disabilities; (5) DI beneficiaries based on a mental impairment, but who do not have a representative payee; (6) have a representative payee for retirement benefits but do not receive DI benefits; (7) have a representative payee but do not receive DI benefits because of a listing-level mental impairment; or (8) no longer receive any type of Social Security benefits.

Response: As we noted in our response to the previous comment, this comment reflects a misunderstanding of our rules. As we indicate in section 421.110(b) of our rules, the beneficiaries whose names we would submit to the NICS must meet *all five* well-defined criteria. We will not report any beneficiary who does not satisfy *all five* criteria to the NICS.

Comment: One commenter stated that, because we do not make medical determinations about Social Security retirement beneficiaries' health, we do not have the right to make decisions concerning their mental status.

Response: We agree that we do not make a medical determination when an individual files a claim for Social

Security retirement benefits. For that reason, our proposed rules and these final rules provide that in order for us to refer an individual's record to the NICS, he or she must, among other things, have filed a claim for disability insurance benefits under title II of the Act or supplemental security income payments based on disability under title XVI of the Act. We do not and will not review the medical records of individuals simply because they file a claim for retirement benefits. Our authority to make a determination regarding an individual's capacity and the appointment of a representative payee is in accordance with the authority granted to the Commissioner under the Act.¹³

When we appoint a representative payee, we base our determination on available medical or other evidence, such as statements from relatives, friends, or people in positions to observe the beneficiary.¹⁴ This process includes gathering medical evidence from the disability folder or a treating physician, obtaining information from family members or friends about the person's ability to manage finances, and asking the individual how he or she handles monthly expenses and financial decisions.¹⁵

Comment: Multiple commenters expressed the belief that we would report beneficiaries to the NICS solely based on their having a representative payee. Further, commenters opined that having an alternate payee, or requiring some help with financial arrangements such as receipt of Social Security benefits, does not demonstrate mental incompetence.

Response: As noted in our responses to previous comments, this comment reflects a misunderstanding of our rules. As we indicate in section 421.110(b) of our rules, the beneficiaries whose names we would submit to the NICS must meet *all five* well-defined criteria. We will not report to the NICS any beneficiary who does not satisfy *all five* of those criteria. We will not report a person to the NICS simply because the person has a representative payee if they do not meet all of the other criteria.

The DOJ Guidance, with which we are complying, specifically indicates that records relevant to the NICS include "agency records of adjudications of an individual's inability to manage his or her own affairs if such adjudication is based on marked subnormal intelligence or mental illness, incompetency, condition or disease." The DOJ further

¹¹ 27 CFR 478.11(a)(1)–(2).

¹² 81 FR at 27061.

¹³ 42 U.S.C. 405(b)(1), and (j).

¹⁴ 20 CFR 404.2015(b) and (c); 416.615(b) and (c).

¹⁵ *Id.*

indicated that this category of records includes certain agency designations of representative or alternate payees for program beneficiaries.¹⁶

Comment: Several individuals expressed concern that we would decide to expand the categories of names to submit to the NICS beyond the scope of the current rules without justification or prior notice.

Response: Prior to making any changes that would revise or otherwise substantively change the scope of the current rules, we would follow the Administrative Procedure Act's procedures of notice and comment rulemaking, similar to the process we followed in publishing these rules.

Mental Illness

Connection to Violence, Potential for Stigmatization

Comment: Commenters questioned the decision to add beneficiaries' names to the NICS based on mental illness, stating we had not provided data indicating that mental illness was a precursor for violence (particularly gun violence).

Response: We are not attempting to imply a connection between mental illness and a propensity for violence, particularly gun violence. Rather, we are complying with our obligations under the NIAA, which require us to provide information from our records when an individual falls within one of the categories identified in 18 U.S.C. 922(g). As we have noted previously, the ATF has clarified through regulation that the prohibitor referenced in 18 U.S.C. 922(g)(4) covers an individual determined by a court, board, commission or other lawful authority to be a danger to himself or others or to lack the mental capacity to contract or manage his or her own affairs as a result of marked subnormal intelligence, or mental illness, incompetency, condition or disease.¹⁷ A finding regarding an individual's ability to manage his or her own affairs does not require us to find that an individual has a propensity for violence before we report his or her name to the NICS. For that reason, the studies that the commenters cited regarding the relationship between mental illness and gun violence do not require us to make any changes to these rules.

Comment: Multiple commenters opined that these rules would unfairly stigmatize those with mental illness.

Response: We are committed to treating all beneficiaries with dignity

and respect. To that end, we regularly collaborate and consult with mental health and other advocacy groups and organizations to stay informed and responsive to the needs of beneficiaries with mental health issues. Our collaboration with these organizations includes, among other activities, hosting regular meetings, soliciting input on agency initiatives, and participating in national and regional conferences. We are not attempting to stigmatize individuals who have a mental illness, but are simply following the requirements imposed by Congress in the NIAA.

We would also like to highlight that when we report a beneficiary for inclusion in the NICS, we will disclose directly to the FBI a beneficiary's name, full date of birth, sex, and Social Security number. We will not include specific medical information with our report. We will inform the FBI only of the fact that the individual meets the criteria for inclusion in the NICS due to a mental health prohibitor, but we will not provide any details on the individual's specific diagnosis. The information will not be made public, and will be used solely for the purposes of the NICS program. Moreover, a Federal Firearms Licensee (FFL) who submits a NICS request when an individual attempts to purchase a firearm from the FFL would not know the reason for the individual's inclusion, or even which Federal agency had reported the individual's name to NICS. FFLs only receive a transaction number and a status of Delay, Deny, or Proceed (for the firearm purchase), which will avoid embarrassment or stigmatization for Social Security beneficiaries whose names we refer for inclusion in NICS.

Comment: Some commenters expressed concern that individuals might choose not to seek mental health treatment or apply for Social Security benefits out of fear that we would submit their information to the DOJ for inclusion in the NICS. One commenter stated that, "[t]he end result of this will be many will be very reluctant to seek help, and will refuse the help of a payee, if that is to be automatically reported in this way." Another commenter suggested that, "[o]ne unintended consequence of the proposed action will be to introduce a tremendous disincentive to those who would seek medical assistance."

Response: It is not our intent to discourage individuals from seeking disability benefits or appropriate mental health services. While the outcome of our decision may mean that some beneficiaries will meet the criteria for

inclusion in the NICS as detailed in section 421.110(b)(1)–(5) of our rules, our disability process will remain the same. It is also important to note that an FFL who submits a NICS request when an individual attempts to purchase a firearm from the FFL would not know the reason for the individual's inclusion, or even which Federal agency had reported the individual's name to NICS. FFLs only receive a transaction number and a status of Delay, Deny, or Proceed (for the firearm purchase), avoiding embarrassment or stigmatization for Social Security beneficiaries whose names we refer for inclusion in NICS.

Mental Illness Determination

Comment: We received several comments questioning how we determine whether individuals are disabled based on their diagnosed mental disorders. One commenter stated that, "[t]he parameters established within this rule are entirely too vague." The commenter went on to opine that the proposed rules rely on factors that are "severely error-prone," suggesting that our system "'red flags' too many claims based simply on the mentioning of certain terms (*i.e.* 'red flagging' claims as 'suicidal' based solely on the term 'suicide' within a person's records . . . even if the actual reference is 'claimant states he does not have any suicidal ideations.'") Another commenter stated that we do not explain the severity required to satisfy a mental disability listing.

Response: The Act and our implementing regulations set out the rules we apply for deciding whether an individual is disabled. The Act defines "disability" as the inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment(s) which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. A medically determinable physical or mental impairment is an impairment that results from anatomical, physiological, or psychological abnormalities, which are demonstrated by medically acceptable clinical and laboratory diagnostic techniques. The medical evidence must establish a physical or mental impairment consisting of signs, symptoms, and laboratory findings. An individual's statement of symptoms is not sufficient basis for a determination of disability.

Our rules for evaluating mental disorders can be found in 20 CFR 404.1520a and 416.920a. We consider the medical severity of mental

¹⁶ 81 FR at 27061.

¹⁷ 27 CFR 478.11(a)(1)–(2).

disorder(s) using the mental disorders listings in appendix 1 of 20 CFR part 404, subpart P. We describe the severity required to satisfy a mental disorders listing in sections 404.1525 and 416.925 of our rules. For adults, the Listings describe impairments that we consider severe enough to prevent an individual from doing any gainful activity, regardless of his or her age, education, or work experience. Most of the listed impairments are permanent or expected to result in death, or the listing includes a specific statement of duration. For all other listings, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months. Our criteria for deciding disability may differ from the criteria applied in other government and private disability programs.

When we make an initial determination whether an individual has a severe medical impairment or an impairment that meets or equals the severity of an impairment in the Listings, a team consisting of a doctor and disability examiner reviews the claimant's statements and the relevant evidence together. We base a determination on a thorough review and evaluation of an individual's record and not solely on the use of one term or "flag." The criteria that we use to determine disability for individuals with mental impairments is well-known and is published in the Act, our regulations, and our sub-regulatory instructions, all of which are available to the public on our Internet site.

Comment: Multiple commenters stated that, because our adjudication of an individual as disabled under our mental disorders listings causes the individual's name to be included in the NICS, commenters' perceived flaws in the adjudication process could lead to unfair inclusion in the NICS. Concerns were raised about the ability of our employees to participate in what seems to be a medical decision. Commenters also discussed the possible lack of input by medical professionals during the determination process. Multiple commenters raised the idea that it is difficult to properly diagnose mental illness at all.

Response: Our disability determination process for adults includes making medical determinations and evaluating claimants' mental impairments based on medical and other evidence. We follow a required sequential evaluation process in order and stop as soon as we can make a determination or decision. The steps are:

1. Is the individual working, and is the work substantial gainful activity? If

the answer is yes, we will find him or her not disabled. If the answer is no, we will move on to step 2.

2. Does the individual have a severe impairment? If the individual does not have an impairment or combination of impairments that significantly limits his or her physical or mental ability to do basic work activities, we will find him or her not disabled. If the individual does, we will go on to step 3.

3. Does the individual have an impairment(s) that meets or medically equals the severity of an impairment in the Listings? The Listings are examples of impairments that we consider severe enough to prevent an adult from doing any gainful activity. If the individual has an impairment(s) that meets or medically equals the severity of an impairment in the Listings, and the impairment(s) meets the duration requirement, we will find him or her disabled.¹⁸

When we evaluate whether an individual has a severe medical impairment or whether an impairment meets or equals the severity of an impairment in the Listings at the third step of our sequential evaluation, a team consisting of a doctor and disability examiner reviews the claimant's statements and the relevant evidence together. Our team will ask the claimant's doctors about the claimant's medical impairments, when the impairments began, how the impairments limit the claimant's activities, what the results of medical tests were, and what treatment the claimant received. They will also ask the claimant's doctors for information about the claimant's ability to perform work-related activities, such as walking, lifting, carrying, and remembering instructions.

Although mental impairments are qualitatively different from impairments that affect physical body systems, such as the cardiovascular or musculoskeletal body systems, mental impairments can and do prevent people from working. Our mental disorders listing criteria, which we recently updated effective January 17, 2017, accurately and reliably identify the mental impairments that prevent claimants from engaging in any gainful activity. Additionally, section 221(h)(1) of the Act requires us to make reasonable efforts to ensure that a qualified psychiatrist or psychologist completes the medical review of cases involving mental impairments before we

make a determination on a claim for benefits.¹⁹

Comment: Multiple commenters focused on our classification and diagnosis of mental disorders in general. One commenter asked which mental disorders would be included in the criteria under section 421.110 of our rules. One commenter stated that the term "mental impairment" itself is unclear and asked "[h]ow and who will define this impairment and to what degree will be considered worthy to report? If I have a panic attack is that worthy?" Another wondered if, "[f]or purposes of this rule, anxiety, abnormal sleep/appetite, inflated self-esteem, or decreased energy, combined with alleged difficulty in managing money, are sufficiently disabling to disqualify a person from possessing firearms." Hundreds of commenters asked if Post Traumatic Stress Disorder (PTSD) was an included impairment. Multiple commenters expressed concern that the disorders included in section 12.00 of the Listings are too broad, and equate "severe mental issues the same as other issues" such as "eating and anxiety disorders."

Response: As we explained in the NPRM, we will report an individual's record only if we have determined the individual to be disabled based on a finding that his or her impairment(s) meets or medically equals the requirements of one of the mental disorder listings and if he or she meets all the other four criteria. If any of these criteria are not met, we will not submit the individual's name to the NICS.

For an impairment to meet or medically equal a listing, an individual's symptoms must establish that he or she has a medically determinable mental impairment. A medically determinable mental impairment results from anatomical, physiological, or psychological abnormalities demonstrated by medically acceptable clinical and laboratory diagnostic techniques. The impairment must be established by medical evidence consisting of signs, symptoms, and laboratory findings, not only by the claimant's statement of symptoms alone.²⁰ Specific signs or symptoms of a mental impairment combined with an alleged difficulty in managing money, alone, will not meet or equal one of the mental disorders listings. The claimant's mental impairment must also result in limitations in the claimant's ability to

¹⁸ We will not report to the NICS individuals whom we find disabled at step 5 of the sequential evaluation process.

¹⁹ 42 U.S.C. 421(h)(1), as amended by section 832(a) of the Bipartisan Budget Act of 2015, Public Law 114-74, 129 Stat. 584, 613.

²⁰ 20 CFR 404.1508 and 416.908.

function to the degree required by the listing criteria.

The Listings cover many categories of mental impairments to ensure that we can evaluate the types of impairments with which claimants are diagnosed. The Listings include criteria that, when satisfied, indicate that a person has a mental impairment that is disabling under our rules. PTSD is an example of an impairment that could meet or equal one of the Listings, if the claimant's signs, symptoms, and functional limitations rise to the level of severity required in the listing for PTSD.

On September 26, 2016, we published a comprehensive update to our mental disorders Listings, ensuring that the criteria we use to determine the presence of disability based on a mental impairment—and, by extension, the criteria that underlie our referrals to NICS—reflect the most modern medical standards in this area.²¹

Privacy and Confidentiality

Comment: Several commenters stated that our sending information to the NICS would violate beneficiaries' right to privacy, both generally and with regard to their medical information.

Response: We have stringent privacy and disclosure policies that protect our beneficiaries' right to privacy. We will not report any specific medical information when we report to the NICS. To meet the NIAA's requirement to report relevant records to the NICS, we will report only the name, full date of birth, sex, and Social Security number for each beneficiary who meets the criteria for inclusion in the NICS. The FBI will only be informed of the fact that the individual meets the criteria for inclusion in the NICS due to a mental health prohibitor, but we will not provide any details on the individual's specific diagnosis. Moreover, FFLs submitting a NICS request when an individual attempts to purchase a firearm from the FFL would not know the reason for the individual's inclusion, or even which Federal agency had reported the individual's name to NICS. FFLs only receive a transaction number and a status of Delay, Deny, or Proceed (for the firearm purchase), further protecting the privacy of Social Security beneficiaries whose names we refer for inclusion in NICS.

Our disclosure of individual information to the DOJ for the NICS

complies with the Privacy Act of 1974, 5 U.S.C. 552a; our privacy regulations, 20 CFR part 401; and all other applicable Federal law. We are publishing a new Privacy Act systems of records notice and, as appropriate, we will amend existing systems of records notices to cover the maintenance and disclosure of information for reporting individuals to the NICS.²² The systems of records notices will describe how we will report data to the NICS and the permitted uses of the data. Any systems of records from which we disclose information to the DOJ for the NICS will contain routine uses authorizing the disclosure of the information, without the consent of the individuals to whom the information pertains.²³

Comment: We received multiple comments from individuals stating that our proposed rules conflicted with HIPAA privacy rights or doctor-patient confidentiality.

Response: Our rules do not conflict with HIPAA because we will not share any specific medical information with the NICS. When we report an individual's record to the NICS, we will provide only his or her name, full date of birth, sex, and Social Security number. Moreover, HIPAA and any laws governing doctor-patient confidentiality do not apply to our disclosure of information from information maintained in agency systems of records to the DOJ for the NICS.

Representative Payee Appointment

Comment: We received many comments expressing concern about the manner in which we appoint representative payees. Some comments expressed the belief that we may force the appointment of representative payees for certain beneficiaries who do not require their services. Other commenters conveyed that perceived flaws in the representative payee appointment process would result in the unnecessary appointment of a representative payee and, consequently, unfair inclusion of names in the NICS. Multiple commenters questioned the manner in which we appoint representative payees. One individual questioned the thoroughness of our representative payee evaluation process, while others suggested that we should require direct medical evidence to support the need for a representative payee.

Response: Congress first authorized us to direct the payment of an individual's benefits to a representative payee as part of the Social Security Act Amendments

of 1939, so we have over 75 years of experience making capability findings and appointing payees for individuals. Under our policy, we presume that a legally competent adult beneficiary can manage or direct the management of his or her benefits unless there are indicators to the contrary. We will appoint a representative payee for a beneficiary who is under age 18 or a beneficiary who is age 18 or older and is legally incompetent or unable to manage or direct management of his or her benefits due to a physical or mental condition.²⁴ When we appoint a representative payee because a beneficiary is legally incompetent, we base our determination to do so on a court order.²⁵

We do not appoint a payee for an individual unless we determine this is necessary because the individual's interests would be better served by the appointment of a payee. We do not, and under these rules we will not, appoint a payee for any individual who does not need one. When we appoint a representative payee for reasons other than the beneficiary's legal incompetency, we base our determination on the available medical or other evidence, such as statements from relatives, friends, or people in positions to observe the beneficiary.²⁶ This process includes gathering medical evidence from the disability folder or a treating medical source, obtaining information from family members or friends about the person's ability to manage finances, and asking the individual how they handle monthly expenses and financial decisions.²⁷ We then identify an individual or organization to serve as representative payee.

When we propose to appoint a representative payee because of incapability, we provide the beneficiary with the right to protest and appeal the capability determination prior to the appointment. The beneficiary can also protest our choice of payee.²⁸

We are committed to continuous improvement of the representative payee program. Our goal is to ensure that beneficiaries who cannot manage or direct the management of their benefits have representative payees who will serve their best interests. When selecting payees, we look for any factors that could disqualify a person from

²¹ 81 FR 66138. The revised mental impairment listings will become effective on January 17, 2017. *Id.* at 66138. We based this revision to our mental impairment listings on the American Psychiatric Association's latest revision to the *Diagnostic and Statistical Manual of Mental Disorders*, the fifth edition, published in May 2013. *Id.*, at 66139.

²² 5 U.S.C. 552a(e)(4).

²³ 5 U.S.C. 552a(b)(3).

²⁴ We will not appoint a representative payee for a beneficiary who is age 15 to 17 and is emancipated under State law, unless we determine the beneficiary is incapable.

²⁵ 20 CFR 404.2015(a) and 416.615(a).

²⁶ 20 CFR 404.2015(b) and (c); 416.615(b) and (c).

²⁷ *Id.*

²⁸ 20 CFR 404.902 and 416.1402.

serving as a payee. For example, a person who has committed Social Security fraud may not be a payee. In addition, we conduct criminal background checks on certain representative payee applicants. We also bar representative payee applicants who have been convicted of serious felonies from serving as a representative payee.

The Social Security Protection Act of 2004 (SSPA) expanded our monitoring program by requiring us to conduct periodic reviews for any organizational payee that serves 50 or more beneficiaries, and individual payees serving 15 or more beneficiaries. In addition to these required reviews, we also conduct additional reviews of organizational and individual payees.

The SSPA provided us with additional methods to penalize representative payees found to have misused benefits, including: Making payees forfeit fee for service monies; enhancing our ability to hold payees liable for misused benefits; and granting us authority to impose civil monetary penalties when a payee misuses benefits.

In response to the SSPA, we developed an online misuse tracking system that we use to store and track all allegations of misuse of benefits. To help prevent misuse, we improved our training materials for individual and organizational representative payees. We also published revised instructions for our technicians, providing them with clarified and streamlined policies and procedures for processing misuse cases.

We also have sought recommendations for representative payee program improvement from external entities such as the National Academy of Sciences and National Academy of Medicine.

Comment: Several commenters questioned beneficiaries' ability to remove a representative payee once we appoint one. One commenter asked how we determine if an individual no longer needs a representative payee, and another opined that it is much more difficult to remove a representative payee than it is to obtain one.

Response: Our general policy starts with a presumption that every beneficiary has the right to direct payment.²⁹ At any time, a beneficiary whom we have determined to be incapable may request a capability determination. We may also conduct a capability determination if we have reason to believe that an incapable beneficiary may have become capable of managing or directing management of

his or her own benefits. We apply the same standards for the appointment or removal of a representative payee—ability or inability to manage or direct the management of benefits due to a physical or mental condition. If the beneficiary proves that he or she is capable, he or she will receive direct payment.³⁰ However, in response to these comments, we have clarified in these final rules that we will notify the Attorney General, or his or her designate, that an individual's record should be removed from the NICS when we find that an individual whom we previously required to have benefit payments made through a representative payee is now capable of managing his or her benefit payments without the need for a representative payee. We also have clarified several other situations in which we will notify the Attorney General to remove an individual's name from the NICS.

Comment: One commenter stated, "Presumably, a current recipient who can manage his/her own financial affairs and is in fact receiving benefits directly (e.g., direct deposit to bank account) would not fall under the above-mentioned phrase, and would retain the right to own, possess, etc., firearms. If this is true, I would recommend making that clearer in the [final] Rule." Another asked, "If disability benefits under Title II or Title XVI of the Social Security Act are NOT received through a representative payee (i.e., a third party), does the proposed rule to the NIAA still apply?" Many commenters expressed concern that an individual who assigns a representative payee for a temporary period or for convenience would be unfairly reported for inclusion in the NICS. A common scenario described by commenters was that of retired individuals who asked their children to pay their bills during an extended vacation. Another scenario described was that of a mentally capable individual with a physical disability who, due to an inability to write checks or drive, was assigned a representative payee.

Response: We clearly state in section 421.110(b) of our rules that the beneficiaries whose names we will submit to the NICS must meet *all five* well-defined criteria. We will not include any beneficiary who does not meet *all of these* criteria. We will not report a person to the NICS simply because the person has a representative payee if he or she does not meet *all* of the other criteria. Conversely, we will not report information regarding an individual who has a mental

impairment if we have not appointed a representative payee for the individual, because that individual would not meet all of the criteria for NICS reporting in our rules.

Beneficiaries cannot appoint a representative payee, nor can we name a representative payee without evidence indicating that the individual is legally incompetent or unable to manage or direct management of his or her benefits due to a physical or mental condition.³¹ We presume that a legally competent adult beneficiary can manage or direct the management of his benefits unless there are indicators to the contrary. Therefore, we do not appoint a representative payee for beneficiaries solely because they require assistance with financial matters or as a matter of convenience for the beneficiary.

Relief Process

Comment: Multiple commenters asked for specific information about the relief process, including when and at what points in the NICS inclusion decision process a request for relief could be submitted and reviewed, what documentation and evidence would be required to request relief, and who would review the evidence and make relief decisions.

Response: As we explained in the NPRM, consistent with section 101(a)(2)(A) of the NIAA, we will allow a person who is subject to the Federal mental health prohibitor to apply for relief from the Federal firearms prohibitions as a result of our adjudication. In section 421.150(a) of our rules, we indicate that an individual may apply for relief once our adjudication has become final.

In addition to providing us with a completed relief application form, consistent with the requirements set forth in section 421.151(b) of this final rule, we require the individual who requests relief to provide us with evidence from his or her primary mental health provider regarding his or her current mental health status and mental health status for the past 5 years, including a statement addressing whether the applicant has ever been a danger to himself or others and whether the applicant would pose a danger to himself or others if we granted the applicant's request for relief and the applicant purchased and possessed a firearm and ammunition. We also require an applicant for relief to submit written statements and any other evidence regarding the applicant's reputation including a statement addressing whether the applicant would

²⁹ 20 CFR 404.2001 and 416.601.

³⁰ 20 CFR 404.2055 and 416.655.

³¹ 20 CFR 404.2001; 416.601.

pose a danger to himself or others if we granted the applicant's request for relief and the applicant purchased and possessed a firearm and ammunition. We will obtain and consider a relief applicant's criminal history report as part of the relief process. We specify the details of the evidentiary requirements in section 421.151 of our rules.

We have not yet determined the details regarding who in our agency would review the evidence and issue relief decisions. We will publish this information in the **Federal Register** as part of the Paperwork Reduction Act process once we have finalized our business process, and the public will have an opportunity to review and respond to more relief details, including what information will be required and who will review the request.

Comment: Commenters suggested that we simplify the relief process for beneficiaries and representatives. Many expressed their disapproval that affected individuals would be required to request that their names be removed from the list and to provide evidence to our satisfaction to be removed from the list. Many highlighted the fact that the burden of proof for non-inclusion would lie with the individual. Other commenters found it problematic that our relief process does not make provision for a formal hearing before an adjudicative authority or allow the examination of witnesses. Several others suggested that we should provide legal counsel to those individuals whom we report to the DOJ.

Response: We have established a simple and direct process that satisfies the requirements of the NIAA. In addition to providing us with a completed relief application form, consistent with the requirements set forth in section 421.151(b) of this final rule, an applicant for relief will only be required to provide us with: (1) A current statement from his or her primary mental health provider assessing the applicant's current mental health status and mental status for the 5 years preceding the date of the relief request; and (2) written statements and any other evidence regarding the applicant's reputation. We will not impose a fee in connection with the filing of a request for relief. We anticipate that the cost for acquiring the evidence that we require and providing it to us directly will be reasonable. Moreover, the required evidence is more easily attained by the applicant directly. We will obtain the applicant's criminal history report on his or her behalf.

Section 101(a)(2)(A) of the NIAA provides that relief shall be available according to the standards prescribed in

18 U.S.C. 925(c). Section 925(c) states that relief may be granted if it is established that the circumstances regarding the disability, and the applicant's record and reputation, are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest. It is generally appropriate under the law to place the burden of production and proof on the proponent of an order. In this case, that means the person who applies for relief must demonstrate his or her entitlement to relief, and there is no indication in the NIAA or any other provision of law that Congress intended to alter that normal rule. Similarly, the NIAA does not provide for the appointment of legal counsel for those seeking relief, nor is the appointment of counsel generally required under civil law.

Finally, in addition to the successful pursuit of relief from the NICS prohibitions, in new section 421.130 of the final rules, we have added three additional bases for removal of an individual's information from the NICS database. These bases apply when: (1) We find that an individual whom we previously required to have benefit payments made through a representative payee is now capable of managing his or her benefit payments without the need for a representative payee; (2) We are notified that the individual has died; or (3) We receive information that we reported an individual's record to the NICS in error (e.g., we reported to the NICS the record of an individual who does not have a primary diagnosis code in our records that is based on a mental impairment, or we reported the record of an individual who does not have a representative payee).

Comment: Multiple commenters sought clarification about what evidence we would consider when we review a request for relief. One commenter specifically asked about issues relating to documents attesting to a person's character and 5 years of mental health records, such as the availability of these records and who would be required or allowed to provide them. The commenter questioned whether a "clean" criminal record or State background check would qualify as documentation attesting to a person's character. Another commenter questioned the specifics of how we would propose that relief "may" be granted if an individual could establish to our "satisfaction" that the applicant will not be likely to act in a manner dangerous to public safety.

Response: The relief process that we outlined in the NPRM is based on the

NIAA, which indicates that relief and judicial review "shall be available according to the standards prescribed in section 925(c) of title 18, United States Code." That section of the law states that relief may be granted "if it is established to [an agency's] satisfaction that the circumstances regarding the disability, and the applicant's record and reputation, are such that the applicant will not be likely to act in a manner dangerous to public safety and that the granting of the relief would not be contrary to the public interest."

Section 421.151 of our rules specifies the evidence we will consider when we decide whether to grant an application for relief. It indicates that we will consider the applicant's record, which must include the applicant's mental health records and a criminal history report, and written statements regarding the applicant's character. We will obtain a criminal history report on the applicant's behalf. The rule states that the applicant must provide evidence from his or her primary mental health provider and written statements regarding the applicant's character. This evidence must include statements addressing (1) whether the applicant would pose a danger to himself or others if we granted the applicant's request for relief, and the applicant then purchased and possessed a firearm and ammunition, and (2) whether the applicant has a reputation for violence in the community.

We will provide other procedural details of our relief process in sub-regulatory guidance, as well as in the **Federal Register** as part of the Paperwork Reduction Act process, once we have finalized our business process. The public will have an opportunity to review and respond to additional details about the relief process, including what information will be required, in response to the Paperwork Reduction Act process.

Comment: One commenter questioned how beneficiaries could find out what their specific primary diagnosis was in order to best seek relief from inclusion in the NICS. The commenter also asked about the possibility of disputing the diagnosis, particularly when a secondary diagnosis is also involved in the adjudication of being disabled.

Response: We provide claim information to individuals upon their request. Under the Privacy Act of 1974 and our regulations, an individual may request access to his or her records maintained in agency Privacy Act systems of records, including those under which we maintain diagnosis

information.³² Our regulations require individuals to verify their identity when making an access request.³³ A beneficiary who proves his or her identity has the right to access his or her disability file in accordance with our rules.³⁴ The medical records include information about the beneficiary's primary and secondary diagnosis, if applicable.

Criteria for inclusion in the NICS include that an individual is disabled based on a finding at step three of our sequential evaluation process that the individual's impairment(s) meets or medically equals the requirements of one of the mental disorders listings.³⁵ These listings consist of medical conditions that we consider severe enough to prevent a person from doing any gainful activity, regardless of age, education, or work experience. Individuals whose impairments meet a listing are the most severely disabled individuals we serve. If we find an individual to be disabled based on a listing-level mental impairment, and he or she satisfies all of the remaining four requirements, we are required to report them to the NICS. If we do not find an individual to be disabled based on a mental impairment, he or she has not met the reporting requirements and we will not report them to the NICS.

Our administrative review process and the request for relief process are two different processes. If an individual wishes to appeal our disability determination or decision they may do so within the appeal period, which is generally 60 days after being notified of our determination or decision.

However, appealing a disability decision is not part of the NICS relief process. It is important to note that the qualifications for inclusion in the NICS are not the same as the qualifications for relief prescribed by 18 U.S.C. 925(c); that is, proof that he or she is not likely to act in a manner dangerous to public safety and that granting relief from the prohibitions will not be contrary to the public interest.

Comment: Several individuals expressed concern over the anticipated length of time for the processing of a request for relief, stating that 30 days was insufficient time to gather and submit all of the required information, particularly as it involved actions by other government agencies or individuals. One individual expressed

concern about the 30-day deadline for the submission of evidence supporting a beneficiary's request for relief in contrast to our 365-day response time. Several other commenters also questioned our ability to respond within the 365-day period, given current delays in the NICS-related relief programs run by other Federal agencies.

Response: In response to the comments we received expressing concerns about the 30-day deadline, we have revised the rules to eliminate this timeframe. Under the final rules, an individual may request relief at any time after our adjudication that the individual is subject to the Federal mental health prohibitor has become final. We will accept an individual's request for relief once he or she has compiled all of the evidence that we require, as set forth in section 421.151 of this final rule. We believe that this revised process for requiring that the applicant submit his or her evidence along with a request for relief comports with due process and allows us to process the application for relief no later than 365 days after receipt of the complete application and all required supporting documentation and evidence, as required under the NIAA. We will work in good faith to respond to all requests for relief promptly and within the 365-day period. Finally, there is no limit to the number of times a person can apply for relief.

Comment: One commenter suggested that we should not report to the DOJ individuals awaiting a response to their petition for relief unless a judge deems it appropriate.

Response: This suggestion is contrary to the language of the NIAA, which permits a person to apply for relief from the firearms prohibitions imposed by 18 U.S.C. 922(g)(4) and does not require judicial review prior to reporting. Further, as noted under section 421.170 of our rules, if we deny the applicant's request for relief, he or she may then seek judicial review of our action.

Comment: Multiple commenters asked if we would develop a procedure other than seeking relief to request the removal of individuals' names from the NICS for individuals who no longer meet the criteria that were the cause of their original inclusion in the NICS.

Response: As we noted in response to a prior comment, in addition to the successful pursuit of relief from the NICS prohibitions, in section 421.130 to the final rules, we have added three additional bases for removal of an individual's information from the NICS database. Specifically, we will notify the Attorney General to remove an individual's name from the NICS when:

(1) We find that an individual whom we previously required to have benefit payments made through a representative payee is now capable of managing his or her benefit payments without the need for a representative payee; (2) We are notified that the individual has died; or (3) We receive information that we reported an individual's record to the NICS in error (e.g., we reported to the NICS the record of an individual who does not have a primary diagnosis code in our records that is based on a mental impairment, or we reported the record of an individual who does not have a representative payee).

Comment: One commenter stated that, "there is no guarantee that the same prejudices that the rule creates in the first place won't reassert themselves" in the relief process.

Response: We use the same process to determine disability and to determine whether the individual needs a representative payee for each individual who applies for disability benefits. We determine whether a beneficiary is eligible for inclusion in the NICS after the disability process is complete. Therefore, there will be no opportunity for prejudice or bias concerning whether a beneficiary should be included in the NICS, because it is not a consideration during the disability determination process.

In addition, there will be no opportunity for bias or prejudice when we process a request for relief because, under 20 CFR 421.165, a different decision maker who was not involved in the beneficiary's disability or capability determinations, will review the evidence and act on the request for relief. We will follow the requirements of the NIAA and apply principles of due process in determining applicants' entitlement to relief from the Federal firearms prohibitions imposed as a result of our adjudication. Judicial review of our action denying an applicant's request for relief is available according to the standards set forth in 18 U.S.C. 925(c).

Resources Concerns

Comment: Several commenters expressed that this policy would be an unnecessary waste of the Government's time and resources. One commenter opined that implementing the proposed rules would add to the workload of SSI cases and risk additional backlogs, without any offsetting improvement to public safety.

Response: While we note the commenters' concerns, in issuing these rules we are satisfying our legal obligations under the NIAA that require Federal agencies to provide relevant

records to the Attorney General for inclusion in the NICS.

Comments in Support of the Rule

Multiple commenters expressed support for the rule. Several individual commenters were in favor of our reporting certain individuals to the NICS database based on their expressed belief that some persons with mental illness should not be allowed to own firearms, because they could pose a danger to themselves or others. Some commenters spoke in their capacity as relatives and representative payees for Social Security beneficiaries with mental illness. One such commenter stated that if “someone does not have enough mental capacity to handle personal finances, he certainly does not have enough mental capacity to have access to guns.” Another commenter opined that medical professionals should support the rules, because clinicians would not want to authorize anyone to possess a firearm for legal liability reasons.

Several advocacy groups also articulated support for the rules. One group supported the rules as written. One group suggested we should expand the criteria used to identify names for inclusion in the NICS, stating that, “One issue not addressed by the proposed rule is the NICS status of future applicants for benefits who are dangerous due to severe mental illness, but who do not have third party representatives who receive payments on their behalf.” This commenter encouraged us to consider ways to expand the rule to include those beneficiaries who pose a danger to themselves or others, regardless of whether their payments are made to a representative payee.

Regulatory Procedures

Executive Order 12866

We have consulted with the Office of Management and Budget (OMB) and determined that these final rules meet the requirements for a significant regulatory action under Executive Order 12866 and were subject to OMB review.

Regulatory Flexibility Act

We certify that these final rules would not have a significant economic impact on a substantial number of small entities because they only affect individuals. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act, as amended.

Paperwork Reduction Act

These final rules contain new public reporting burdens in sections § 421.150(b), 421.151(b)(1) and (2),

421.151(c)(1), (2) and (3), 421.152, and 421.165(b) that require OMB approval under the Paperwork Reduction Act of 1995 (PRA). Since we will create new forms for these requirements, we will solicit public comment for them in a separate future notice in the **Federal Register** as part of the PRA process, and we will submit a separate information collection request to OMB. We will not collect the information referenced in these burden sections until we receive OMB approval.

List of Subjects 20 CFR Part 421

Administrative practice and procedure, Freedom of information, Privacy, Reporting and recordkeeping requirements.

Carolyn W. Colvin,

Acting Commissioner of Social Security.

For the reasons set out in the preamble, we add part 421 to chapter III of title 20 of the Code of Federal Regulations to read as follows:

PART 421—NATIONAL INSTANT CRIMINAL BACKGROUND CHECK SYSTEM (NICS)

Sec.

- 421.100 What is this part about?
- 421.105 Definitions of terms used in this part.
- 421.110 Identifying records relevant to the NICS.
- 421.120 NICS reporting requirements.
- 421.130 Removal of an individual's record from the NICS.
- 421.140 Notice requirements for an affected individual.
- 421.150 Requesting relief from the Federal firearms prohibitions.
- 421.151 Evidentiary requirements and processing a request for relief.
- 421.152 Timing of processing a request for relief.
- 421.155 Burden of proof in requests for relief.
- 421.160 Granting a request for relief.
- 421.165 Actions on a request for relief.
- 421.170 Judicial review following a denial of a request for relief.

Authority: 42 U.S.C. 902(a)(5); sec. 101, Pub. L. 110–180, 121 Stat. 2559, 2561 (18 U.S.C. 922 note).

§ 421.100 What is this part about?

The rules in this part relate to the Brady Handgun Violence Prevention Act (Brady Act), as amended by the NICS Improvement Amendments Act of 2007 (NIAA) (Pub. L. 110–180). The Brady Act required the Attorney General to establish the National Instant

Criminal Background Check System (NICS), which allows a Federal firearms licensee to determine whether the law prohibits a potential buyer from possessing or receiving a firearm. Among other things, the NIAA requires a Federal agency that has any records demonstrating that a person falls within one of the categories in 18 U.S.C. 922(g) or (n) to report the pertinent information contained in the record to the Attorney General for inclusion in the NICS. The rules in this part define key terms and explain which records we will report to the NICS. They also explain how we will provide oral and written notification to our title II and title XVI beneficiaries who meet the requisite criteria. Finally, the rules in this part explain how beneficiaries who meet the requisite criteria may apply for relief from the Federal firearms prohibitions, and how we will process a request for relief.

§ 421.105 Definitions of terms used in this part.

For the purposes of this part:

Adjudicated as a mental defective, in accordance with 18 U.S.C. 922(g)(4), as amended, means a determination by a court, board, commission, or other lawful authority that a person, as a result of marked subnormal intelligence, or mental illness, incompetency, condition, or disease: Is a danger to himself or others; or lacks the mental capacity to contract or manage his own affairs.

Affected individual means an individual:

(1) Who has been found disabled based on a finding that the individual's impairment(s) meets or medically equals the requirements of one of the Mental Disorders Listing of Impairments (section 12.00 of appendix 1 to subpart P of part 404 of this chapter) under the rules in part 404, subpart P, of this chapter, or under the rules in part 416, subpart I, of this chapter; and

(2) For whom we need to make a capability finding under the rules in part 404, subpart U, of this chapter, or under the rules in part 416, subpart F, of this chapter, as a result of a mental impairment.

Commencement of the adjudication process means, with respect to an affected individual, the beginning of the process we use to determine whether, as a result of a mental impairment:

(1) An individual is capable of managing his or her own benefits; or

(2) Whether his or her interests would be better served if we certified benefit payments to another person as a representative payee, under the rules in part 404, subpart U, of this chapter, or

the rules in part 416, subpart F, of this chapter.

Full retirement age has the meaning used in § 404.409 of this chapter.

NICS means the National Instant Criminal Background Check System established by the Brady Handgun Violence Prevention Act, Public Law 103–159, 107 Stat. 1536 (codified at 18 U.S.C. 922 note), as amended.

Primary diagnosis code means the code we use to identify an individual's primary medical diagnosis in our records. The primary diagnosis refers to the basic condition that renders an individual disabled under the rules in part 404, subpart P, of this chapter, or under the rules in part 416, subpart I, of this chapter.

Us or We means the Social Security Administration.

§ 421.110 Identifying records relevant to the NICS.

(a) In accordance with the requirements of the NIAA, we will identify the records of individuals whom we have “adjudicated as a mental defective.” For purposes of the Social Security programs established under titles II and XVI of the Social Security Act, we have “adjudicated as a mental defective” any individual who meets the criteria in paragraphs (b)(1) through (5) of this section.

(b) During our claim development and adjudication process, or when we take certain post-entitlement or post-eligibility actions, we will identify any individual who:

(1) Has filed a claim based on disability;

(2) Has been determined to be disabled based on a finding that the individual's impairment(s) meets or medically equals the requirements of one of the Mental Disorders Listing of Impairments (section 12.00 of appendix 1 to subpart P of part 404 of this chapter) under the rules in part 404, subpart P, of this chapter, or under the rules in part 416, subpart I, of this chapter;

(3) Has a primary diagnosis code in our records based on a mental impairment;

(4) Has attained age 18, but has not attained full retirement age; and

(5) Requires that his or her benefit payments be made through a representative payee because we have determined, under the rules in part 404, subpart U, of this chapter, or the rules in part 416, subpart F, of this chapter, that he or she is mentally incapable of managing benefit payments.

(c) We will apply the provisions of this section to:

(1) Capability findings that we make in connection with initial claims on or

after December 19, 2017 under the rules in part 404, subpart U, of this chapter or the rules in part 416, subpart F, of this chapter; or

(2) Capability findings that we make in connection with continuing disability reviews (including age-18 disability redeterminations under § 416.987 of this chapter) on or after December 19, 2017 under the rules in part 404, subpart U, of this chapter, or the rules in part 416, subpart F, of this chapter. We will apply the provisions of this paragraph (c)(2) only with respect to capability findings in which we appoint a representative payee for an individual in connection with a continuing disability review.

§ 421.120 NICS reporting requirements.

On not less than a quarterly calendar basis, we will provide information about any individual who meets the criteria in § 421.110 to the Attorney General, or his or her designate, for inclusion in the NICS. The information we will report includes the name of the individual, his or her full date of birth, his or her sex, and his or her Social Security number. We will also report any other information that the Attorney General determines Federal agencies should report to the NICS.

§ 421.130 Removal of an individual's record from the NICS.

(a) *General.* We will identify when the record of an individual that we previously identified for submission to the NICS under § 421.110 should be removed from the NICS database. We will notify the Attorney General, or his or her designate, that an individual's record should be removed from the NICS database only in the circumstances in paragraphs (b)(1) through (4) of this section.

(b) We will notify the Attorney General, or his or her designate, that an individual's record should be removed from the NICS when:

(1) We find that an individual whom we previously required to have benefit payments made through a representative payee is now capable of managing his or her benefit payments without the need for a representative payee;

(2) We are notified that the individual has died;

(3) We receive information that we reported an individual's record to the NICS in error (e.g., we reported to the NICS the record of an individual who does not have a primary diagnosis code in our records that is based on a mental impairment, or we reported the record of an individual who does not have a representative payee); or

(4) We grant the individual's request for relief under the rules in §§ 421.150

through 421.165, or a Federal court grants the individual's request for relief under the rules in § 421.170.

§ 421.140 Notice requirements for an affected individual.

At the commencement of the adjudication process, we will provide both oral and written notice to an affected individual that:

(a) A finding that he or she meets the criteria in § 421.110(b)(1) through (5), when final, will prohibit the individual from purchasing, possessing, receiving, shipping, or transporting firearms and ammunition, pursuant to 18 U.S.C. 922(d)(4) and (g)(4);

(b) Any person who knowingly violates the prohibitions in 18 U.S.C. 922(d)(4) or (g)(4) may be imprisoned for up to 10 years or fined up to \$250,000, or both, pursuant to 18 U.S.C. 924(a)(2); and

(c) Relief from the Federal firearms prohibitions imposed by 18 U.S.C. 922(d)(4) and (g)(4) by virtue of our adjudication is available under the NIAA.

§ 421.150 Requesting relief from the Federal firearms prohibitions.

(a) When our adjudication that an individual meets the criteria in § 421.110(b)(1) through (5) becomes final, he or she may apply for relief from the Federal firearms prohibitions imposed by Federal law as a result of our adjudication. If such an individual requests relief from us, we will apply the rules in §§ 421.150 through 421.165.

(b) An application for relief filed under this section must be in writing and include the information required by § 421.151. It may also include any other supporting data that we or the applicant deem appropriate. When an individual requests relief under this section, we will also obtain a criminal history report on the individual before deciding whether to grant the request for relief.

§ 421.151 Evidentiary requirements and processing a request for relief.

(a) When we decide whether to grant an application for relief, we will consider:

(1) The circumstances regarding the firearms prohibitions imposed;

(2) The applicant's record, which must include the applicant's mental health records and a criminal history report; and

(3) The applicant's reputation, developed through witness statements or other evidence.

(b) *Evidence.* The applicant must provide the following evidence to us in support of a request for relief:

(1) A current statement from the applicant's primary mental health

provider assessing the applicant's current mental health status and mental health status for the 5 years preceding the date of the request for relief; and

(2) Written statements and any other evidence regarding the applicant's reputation.

(c) *Evidentiary requirements*—(1) *A current statement from the applicant's primary mental health provider submitted under paragraph (b)(1) of this section.* We will consider a statement from the applicant's primary mental health provider to be current if it is based on a complete mental health assessment that was conducted during the 90-day period immediately preceding the date we received the applicant's request for relief under paragraph (b)(1) of this section. The statement must specifically address:

(i) Whether the applicant has ever been a danger to himself or herself or others; and

(ii) Whether the applicant would pose a danger to himself or herself or others if we granted the applicant's request for relief and the applicant purchased and possessed a firearm or ammunition.

(2) *Written statements regarding the applicant's character submitted under paragraph (b)(2) of this section.* The statements must specifically:

(i) Identify the person supplying the information;

(ii) Provide the person's current address and telephone number;

(iii) Describe the person's relationship with and frequency of contact with the applicant;

(iv) Indicate whether the applicant has a reputation for violence in the community; and

(v) Indicate whether the applicant would pose a danger to himself or herself or others if we granted the applicant's request for relief and the applicant purchased and possessed a firearm or ammunition.

(3) The applicant may obtain written statements from anyone who knows the applicant, including but not limited to clergy, law enforcement officials, employers, friends, and family members, as long as the person providing the statement has known the applicant for a sufficient period, has had recent and frequent contact with the beneficiary, and can attest to the beneficiary's good reputation. The individual submitting the written statement must describe his or her relationship with the applicant and provide information concerning the length of time he or she has known the applicant and the frequency of his or her contact with the applicant. The applicant must submit at least one statement from an individual who is not

related to the applicant by blood or marriage.

§ 421.152 Timing of processing a request for relief.

(a) An individual may request relief at any time after our adjudication that results in that person becoming prohibited by 18 U.S.C. 922(d)(4) or (g)(4) becomes final.

(b) We will process an application for relief under § 421.150 when the applicant has provided us with all the necessary evidence required under § 421.151(b)(1) through (3).

§ 421.155 Burden of proof in requests for relief.

An applicant who requests relief under § 421.150 must prove that he or she is not likely to act in a manner dangerous to public safety and that granting relief from the prohibitions imposed by 18 U.S.C. 922(d)(4) and (g)(4) will not be contrary to the public interest.

§ 421.160 Granting a request for relief.

(a) We may grant an applicant's request for relief if the applicant establishes, to our satisfaction, that the circumstances regarding the disability, and the applicant's record and reputation, are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

(b) We will not grant an applicant's request for relief if the applicant is prohibited from possessing firearms by the law of the State in which the applicant resides.

§ 421.165 Actions on a request for relief.

(a) After the applicant submits the evidence required under § 421.151 and any other evidence he or she wants us to consider, we will review the evidence, which will include any evidence from our records that we determine is appropriate. A decision maker who was not involved in making the finding that the applicant's benefit payments be made through a representative payee will review the evidence and act on the request for relief. We will notify the applicant in writing of our action regarding the request for relief.

(b) If we deny an applicant's request for relief, we will send the applicant a written notice that explains the reasons for our action. We will also inform the applicant that if he or she is dissatisfied with our action, he or she has 60 days from the date he or she receives the notice of our action to file a petition seeking judicial review in Federal district court.

(c) If we grant an applicant's request for relief, we will send the applicant a written notice that explains the reasons for our action. We will inform the applicant that we will notify the Attorney General, or his or her delegate, that the individual's record should be removed from the NICS database. We will also notify the applicant that he or she is no longer prohibited under 18 U.S.C. 922(g)(4) from purchasing, possessing, receiving, shipping, or transporting firearms or ammunition based on the prohibition that we granted the applicant relief from. We will notify the Attorney General, or his or her delegate, that the applicant's record should be removed from the NICS database after we grant the applicant's request for relief.

(d)(1) The NIAA requires us to process each application for relief not later than 365 days after the date we receive it. We consider the application date for the request for relief to be the date on which all evidence required under § 421.151(a) is submitted.

(2) If we fail to resolve an application for relief within that period for any reason, including a lack of appropriated funds, we will be deemed to have denied the relief request without cause. In accordance with the NIAA, judicial review of any petition brought under this paragraph (d) shall be de novo.

§ 421.170 Judicial review following a denial of a request for relief.

(a) Judicial review of our action denying an applicant's request for relief is available according to the standards contained in 18 U.S.C. 925(c). An individual for whom we have denied an application for relief may file a petition for judicial review with the United States district court for the district in which he or she resides.

(b) If, on judicial review, a Federal court grants an applicant's request for relief, we will notify the Attorney General that the individual's record should be removed from the NICS database.

BILLING CODE 4191–02–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Food and Drug Administration****21 CFR Part 101**

[Docket No. FDA-2013-P-0047]

RIN 0910-AH43

Food Labeling: Health Claims; Dietary Saturated Fat and Cholesterol and Risk of Coronary Heart Disease**AGENCY:** Food and Drug Administration, HHS.**ACTION:** Interim final rule; request for comments.

SUMMARY: The Food and Drug Administration (FDA or we) is amending the regulation authorizing a health claim on the relationship between dietary saturated fat and cholesterol and risk of coronary heart disease (CHD) to permit raw fruits and vegetables that fail to comply with the “low fat” definition and/or the minimum nutrient content requirement to be eligible to bear the claim. We are taking this action in response to a petition submitted by the American Heart Association (the petitioner). The amendment expands the use of this health claim to certain fruits and vegetables that are currently ineligible for the health claim.

DATES: This interim final rule is effective December 19, 2016. Interested persons may submit either electronic or written comments by March 6, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.
- If you want to submit a comment with confidential information that you

do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2013-P-0047 for “Food Labeling: Health Claims; Dietary Saturated Fat and Cholesterol and Risk of Coronary Heart Disease.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access

the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Vincent de Jesus, Center for Food Safety and Applied Nutrition (HFS-830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740-3835, 240-402-1450.

SUPPLEMENTARY INFORMATION:**Executive Summary****Purpose of the Regulatory Action**

This interim final rule amends the regulation authorizing a health claim on the relationship between dietary saturated fat and cholesterol and risk of coronary heart disease (CHD). The interim final rule permits raw fruits and vegetables that fail to comply with the “low fat” definition and/or the minimum nutrient content requirement to be eligible to bear the claim. Health claims, in general, must meet certain nutrient requirements that we establish to ensure that health claims are used on foods with nutritional value. For example, except where provided for in other regulations, foods bearing a health claim must contain one or more of vitamin A, vitamin C, iron, calcium, protein, or fiber at or above 10 percent of the Reference Daily Intake (RDI) or Daily Reference Value (DRV), before any nutrient addition (§ 101.14(e)(6) (21 CFR 101.14(e)(6)). Additionally, for foods bearing health claims related to CHD, the food often must be a “low fat” food (see e.g., §§ 101.75(c)(2)(ii) and 101.81(c)(2)(iii)(D)). An unintended consequence of these general requirements is that some foods that are generally considered to contribute to a healthy diet are ineligible to bear certain health claims. A small number of fruits and vegetables, for example, are ineligible to bear the dietary saturated fat and cholesterol and risk of CHD health claim because they do not meet the requirement to have 10 percent of the RDI or DRV of certain nutrients and/or they do not meet the definition of a “low fat” food. However, consumption of fruits and vegetables is encouraged by dietary recommendations, and low saturated fat and low cholesterol fruits and vegetables should not be excluded

from bearing this health claim. To address this unintended consequence, this interim final rule includes provisions that exempt raw fruits and vegetables from:

(1) Needing to meet the 10 percent nutrient content requirement in § 101.14(e)(6).

(2) Needing to meet the definition for a “low fat” food in § 101.62.

The Nutrition Labeling and Education Act of 1990 (the 1990 amendments) (Pub. L. 101–535) amended the Federal Food, Drug, and Cosmetic Act (the FD&C Act) by clarifying, among other things, FDA’s authority to regulate health claims on food labels and in food labeling. Using that authority, in 1993 we issued § 101.75, which authorizes a health claim about the relationship between diets low in saturated fat and cholesterol and a reduced risk of CHD (58 FR 2739, January 6, 1993).

Section 403(r)(4) of the FD&C Act (21 U.S.C. 343(r)(4)) establishes a mechanism for any person to petition us to issue a regulation relating to a claim that characterizes the level of any nutrient or the relationship of any nutrient to a disease or a health-related condition. We received a petition, under section 403(r)(4) of the FD&C Act, requesting that we amend the dietary saturated fat and cholesterol and risk of CHD health claim to permit raw fruits and vegetables, as well as single-ingredient or mixtures of frozen or canned fruits and vegetables that contain no added fat or sugars, which fail to comply with the “low fat” definition and/or the minimum nutrient content requirement, to be eligible to bear the claim. This interim final rule responds to that petition.

Summary of the Major Provisions of the Regulatory Action in Question

Under the interim final rule, raw fruits and vegetables are exempt from needing to meet the minimum nutrient content requirement of the general principles for health claims and from the requirement specifically included in the dietary saturated fat and cholesterol and risk of CHD health claim that a food meet the definition for “low fat” to be eligible to bear the claim. Current FDA regulations, at § 101.75(c)(1), state that all requirements set forth in § 101.14 must be met. The interim final rule revises § 101.75(c)(1) to provide an exemption for raw fruits or vegetables from meeting the minimum nutrient content requirement in § 101.14(e)(6).

Current FDA regulations, at § 101.75(c)(2)(ii), establish requirements regarding the nature of the food, except for fish and game meats; the food must meet all nutrient content requirements

of § 101.62 for a “low saturated fat,” “low cholesterol,” and “low fat” food. We are amending § 101.75(c)(2)(ii) to provide an exemption from meeting the nutrient content requirements of § 101.62 for “low fat” if the food is a raw fruit or vegetable.

I. Background

A. The Nutrition Labeling and Education Act of 1990

The 1990 amendments amended the FD&C Act in a number of important ways. Among other changes, the 1990 amendments clarified our authority to regulate health claims on food labels and in food labeling. Under this authority, we issued several regulations, including § 101.14, *Health claims: General requirements* (58 FR 2478 at 2533), which sets forth general principles for the authorization and use of health claims, and § 101.70, *Petitions for health claims* (58 FR 2478 at 2534), which sets forth a process for petitioning us to authorize health claims about substance-disease relationships, and sets out the types of information that any such petition must include. Among other provisions, the general principles for health claims include requirements for determining the eligibility of a food to bear a health claim. Examples include disqualifying nutrient levels (§ 101.14(a)(4)), which are specific nutrient thresholds not to be exceeded by a food bearing a health claim as required by § 101.14(e)(3), and also a minimum nutrient content requirement (§ 101.14(e)(6)) to ensure that a food bearing a health claim provide meaningful nutritive value as determined by meeting specific nutrient content levels.

B. Dietary Saturated Fat and Cholesterol and Risk of Coronary Heart Disease Health Claim

When implementing the 1990 amendments, we also conducted a review of evidence for a relationship between dietary saturated fat and cholesterol and risk of CHD. Based on the totality of the publicly available scientific evidence, we concluded that there was significant scientific agreement among qualified experts that diets low in saturated fat and cholesterol may reduce the risk of CHD. Therefore, we authorized a health claim about the relationship between diets low in saturated fat and cholesterol and a reduced risk of CHD (§ 101.75; 58 FR 2739 at 2757, January 6, 1993). Among the specific requirements included in § 101.75 are requirements that, in addition to the general requirements set forth in § 101.14, foods must meet all of

the nutrient content requirements in § 101.62 for a “low saturated fat,” “low cholesterol,” and “low fat” food in order to be eligible to bear the health claim, except that fish and game meats (*i.e.*, deer, bison, rabbit, quail, wild turkey, geese, and ostrich) may meet the requirements for “extra lean” in § 101.62.

II. Petition and Grounds

We received a petition from the American Heart Association (Docket No. FDA–2013–P–0047) on October 1, 2012, under section of 403(r)(4) of the FD&C Act. The petition requested that we amend the dietary saturated fat and cholesterol and risk of CHD health claim (§ 101.75) to permit raw fruits and vegetables, as well as single-ingredient or mixtures of frozen or canned fruits and vegetables that contain no added fat or sugars, which fail to comply with the “low fat” definition and/or the minimum nutrient content requirement, to be eligible to bear the claim. In addition, the petition requested that we issue an interim final rule by which fruits and vegetables that fail to comply with the “low fat” definition and/or the minimum nutrient content requirement could be eligible to bear the claim before publication of a final rule. Section 403(r)(4) of the FD&C Act establishes a mechanism for any person to petition us to issue a regulation relating to a claim that characterizes the level of any nutrient or the relationship of any nutrient to a disease or a health-related condition. On January 10, 2013, we notified the petitioner that we had completed our initial review of the petition, that the petition had been filed for further action in accordance with section 403(r)(4) of the FD&C Act, and that the filing date was January 9, 2013. Under the FD&C Act, if we do not act, by either denying the petition or issuing a proposed regulation to authorize the health claim, within 90 days of the date of filing for further action, the petition is deemed to be denied unless an extension is mutually agreed upon by us and the petitioner (21 U.S.C. 343(r)(4)(A)(i) and § 101.70(j)(3)(iii)). On April 9, 2013, we mutually agreed with the petitioner to extend the deadline to October 7, 2013. Later, through subsequent agreements, we mutually agreed to extend the deadlines several times, with the last deadline being March 17, 2017.

The petitioner explained that some of our requirements for the dietary saturated fat and cholesterol and risk of CHD health claim prevent a number of fruits and vegetables from being eligible to bear the claim. The minimum nutrient content requirement for all

health claims requires that, to be eligible to bear a health claim, a food contains 10 percent or more of the Reference Daily Intake or the Daily Reference Value for vitamin A, vitamin C, iron, calcium, protein, or fiber per reference amount customarily consumed (RACC) prior to any nutrient addition (see § 101.14(e)(6)). Although most fruits and vegetables meet this minimum requirement for one or more of the described nutrients, a small number of fruits and vegetables do not meet the minimum nutrient content requirement. For example, grapes, plums, beets, and cucumbers do not contain 10 percent of the RDI or DRV of vitamin A, vitamin C, iron, calcium, protein, or fiber per RACC. Additionally, the dietary saturated fat and cholesterol and risk of CHD health claim requires that a food bearing the claim meet all of the nutrient content requirements of § 101.62 for “low saturated fat,” “low cholesterol,” and “low fat” (§ 101.75(c)(2)(ii)). Again, most fruits and vegetables meet the requirement for “low fat,” but at least one fruit, avocados, does not meet the requirement and therefore is not eligible to bear the claim, even though the fruit meets the requirements for “low saturated fat” and “low cholesterol.”

The petition requested that fruits and vegetables, as a category of foods, be exempted from meeting the minimum nutrient content requirement and the “low fat” requirement for the dietary saturated fat and cholesterol and risk of CHD health claim. The petition asserted that, based on the scientific evidence, fruits and vegetables as a group contribute to reduced risk of CHD regardless of their inherent fat content or their ability to meet 10 percent of the RDI or DRV of vitamin A, vitamin C, iron, calcium, protein, or fiber per RACC. The petition described the scientific evidence relating consumption of fruits and vegetables and risk of CHD, including large observational studies (*e.g.*, the Women’s Health Study) (Ref. 1) and intervention studies on fruit and vegetable intake and surrogate endpoints for CHD risk (*e.g.*, low-density lipoprotein concentration) (Ref. 2). Additionally, the petition detailed the numerous current public health recommendations, such as the Dietary Guidelines for Americans (DGA) 2010, published by the U.S. Department of Health and Human Services (HHS) and the U.S. Department of Agriculture (USDA) (Ref. 3) and the National Cholesterol Education Program (NCEP) of the National Heart Lung and Blood Institute (NHLBI) of the National Institutes of Health (NIH) (Ref. 4), which

consistently encourage fruit and vegetable consumption as an integral part of a healthful diet, regardless of the specific nutrient contents of individual fruits and vegetables.

The petition requested the following specific changes in the regulation governing the dietary saturated fat and cholesterol and risk of CHD health claim:

- Modify § 101.75(c)(2)(ii) to create a new paragraph (A) and remove “low fat” food from the list of nutrient content requirements in § 101.62 a food must meet.
- Modify § 101.75(c)(2)(ii) to create a new paragraph (B) that provides an exemption to the nutrient content requirements of § 101.62 for a “low fat” food if it is a raw fruit or vegetable, or is a single-ingredient or mixture of frozen or canned fruits and vegetables that contains no fats or sugars in addition to the fats or sugars inherently present in the fruit or vegetable product.
- Modify § 101.75(c)(1) to exempt raw fruits and vegetables, or single-ingredient or mixtures of frozen or canned fruits and vegetables from meeting the requirement of § 101.14(e)(6).

In addition, the petition requested that we issue an interim final rule under section 403(r)(7)(A) of the FD&C Act, stating that the evidence is compelling and the potential to encourage fruit and vegetable consumption is important for public health and that issuing an interim final rule would allow affected fruit and vegetable products to become eligible to bear these health claims as expeditiously as possible.

III. Decision To Amend the Health Claim

A. Current Dietary Recommendations for Fruit and Vegetable Intake

The DGA, issued every 5 years by USDA and HHS, sets forth the Federal Government’s official recommendations regarding healthy eating and construction of a healthful diet (Ref. 5). The 2015–2020 DGA is the most recent version. At the core of the 2015–2020 DGA, as stated in Chapter 1 (“Key Elements of Healthy Eating Patterns”), “is the importance of consuming overall healthy eating patterns, including vegetables, fruits, grains, dairy, protein foods, and oils—eaten within an appropriate calorie level and in forms with limited amounts of saturated fats, added sugars, and sodium.” Key recommendations of the 2015–2020 DGA are to “Shift to consume more vegetables” and “Shift to consume more fruits.” For example, Chapter 2 (“Shifts Needed to Align With Healthy Eating

Patterns”) of the 2015–2020 DGA discusses intakes and states that “For most individuals, following a healthy eating pattern would include an increase in total vegetable intake from all vegetable subgroups, in nutrient-dense forms, and an increase in the variety of different vegetables consumed over time.” Chapter 2 likewise states that “To help support healthy eating patterns, most individuals in the United States would benefit from increasing their intake of fruits, mostly whole fruits, in nutrient-dense forms.”

We note that the recommendations in the 2015–2020 DGA regarding fruits and vegetables are directed at intakes of fruit and vegetables as a group. Particularly, in the discussions on fruit and vegetable intake throughout the report, the 2015–2020 DGA considers fruits and vegetables as a category of foods when discussing the associations between fruit and vegetable intake and reduced risk of cardiovascular disease or other chronic diseases (Ref. 5). Our reliance on dietary recommendations in this rulemaking and in previous health claim regulations is based on provisions of the 1990 amendments that direct us to issue health claim regulations that take into account the role of the nutrients in food in a way that will enhance the chances of consumers maintaining healthy dietary practices (see section 403(r)(3)(A) and (r)(3)(B) of the FD&C Act and previous health claim regulations for plant sterol/stanol esters and reduced risk of CHD (§ 101.83) and soluble fiber from certain foods and risk of CHD (§ 101.81)). Thus, general eligibility requirements that establish which types of foods are able to bear health claims have been typically determined based on the current dietary recommendations and guidelines at the time. The requirements are established to include foods and categories of foods that are encouraged to be consumed for their benefits to health, while restricting foods whose consumption is not encouraged from bearing health claims (*see* 58 FR 2478 at 2490).

B. Low Fat

Our regulations authorizing CHD-related health claims (§§ 101.75, 101.81, 101.82, and 101.83) require, with a few exceptions, that foods bearing such claims meet: (1) The “low fat” criterion defined by § 101.62(b)(2); (2) the “low saturated fat” criterion defined by § 101.62(c)(2); and (3) the “low cholesterol” criterion defined by § 101.62(d)(2).

The term “low fat” may be used on the label or in the labeling of food, except meal products as defined in § 101.13(l) and main dish products as

defined in § 101.13(m), provided that the food has a reference amount customarily consumed greater than 30 grams (g) or greater than 2 tablespoons and contains 3 g or less of fat per reference amount customarily consumed; or the food has a reference amount customarily consumed of 30 g or less or 2 tablespoons or less and contains 3 g or less of fat per reference amount customarily consumed and per 50 g of food (for dehydrated foods that must be reconstituted before typical consumption with water or a diluent containing an insignificant amount, as defined in § 101.9(f)(1), of all nutrients per reference amount customarily consumed, the per 50-g criterion refers to the “as prepared” form) (§ 101.62(b)(2)).

The term “low saturated fat” may be used on the label or labeling of foods, except meal products as defined in § 101.13(1) and main dish products as defined in § 101.13(m), provided that the food contains 1 g or less of saturated fatty acids per reference amount customarily consumed and not more than 15 percent of calories from saturated fatty acids (§ 101.62(c)(2)).

The term “low cholesterol,” under § 101.62(d)(2), may be used on the label or in the labeling of foods, except meal products as defined in § 101.13(l) and main dish products as defined in § 101.13(m), provided that, for foods that have a reference amount customarily consumed greater than 30 g or greater than 2 tablespoons and contain 13 g or less of total fat per reference amount customarily consumed and per labeled serving, the food contains 20 milligrams or less of cholesterol per reference amount customarily consumed or the food contains 2 g or less of saturated fatty acids per reference amount customarily consumed.

The petition noted that a fruit such as an avocado exceeds the 3 g total fat per RACC criterion of the “low fat” definition and therefore would never be able to bear the health claim for diets low in saturated fat and cholesterol and reduced risk of CHD. According to our nutrient data on the 20 most frequently consumed fruits (§§ 101.42 through 101.45 and appendix C to part 101), avocados contain 4.5 g total fat per RACC and do, indeed, exceed 3 g total fat per RACC. Barring an exemption to the “low fat” requirement, avocados (and any other fruit or vegetable with a total fat content in excess of the criteria for “low fat”) are not eligible to bear the dietary saturated fat and cholesterol and risk of CHD health claim.

In the 1993 final rule authorizing the dietary saturated fat and cholesterol and

risk of CHD health claim (58 FR 2739), we established “low fat” as a qualifying criterion for eligibility for the claim asserting that “while total fat is not as strongly or directly linked to increased risk of CHD . . . it may have significant indirect effects.” We discussed how “low fat foods generally help individuals in reducing their intake of saturated fat and cholesterol” and how excess calories, of which fat contributes more per gram than the other energy nutrients, is associated with two health-related conditions (obesity and diabetes) that are risk factors for heart disease (58 FR 2739 at 2742). In support of these determinations, we noted that, “Low fat diets are recommended in all Federal Government and National Academy of Sciences’ dietary guidelines for reducing the risk of heart disease” (58 FR 2739 at 2742).

Since we published the final rule for the dietary saturated fat and cholesterol and risk of CHD health claim in 1993, the science related to intake of total fat has evolved, and the current dietary recommendations no longer contain a recommendation encouraging the consumption of diets low in total fat. Beginning with the 2000 DGA, recommendations for total fat intake shifted from recommending diets low in fat to diets moderate in total fat (Ref. 6). The recommendations reflected a shift in focus to types of fat consumed (*i.e.*, saturated versus unsaturated fat) and their relation to effects on blood cholesterol concentrations. The recommendations for moderate fat intake continued through the 2005 DGA (Ref. 7) with even more discussion on types of fat in the diet (*e.g.*, polyunsaturated and monounsaturated fats) and their influence on cardiovascular disease. The discussion on total fat intake in the 2010 DGA (Ref. 3) focused on the importance of staying within the Institute of Medicine (IOM) of the National Academies of Science Acceptable Macronutrient Distribution Range (AMDR) for total fat intake of 20 to 35 percent of energy for adults and an AMDR of 25 to 35 percent of energy for children age 4 to 18 years (Ref. 8). The AMDRs are associated with reduced risk of chronic diseases, such as cardiovascular disease, while providing for adequate intake of essential nutrients (Ref. 8).

The 2015–2020 DGA does not focus on total fat intake, but instead makes recommendations about types of fat. Chapter 1 (“Key Elements of Healthy Eating Patterns”) states that “[a] healthy eating pattern limits . . . [s]aturated fats and *trans* fats . . .” and contains a key recommendation to “[c]onsume less than 10 percent of calories per day from

saturated fats. . . .” In this same chapter, the 2015–2020 DGA notes that “[t]he recommendation to limit intake of calories from saturated fats to less than 10 percent per day is a target based on evidence that replacing saturated fats with unsaturated fats is associated with reduced risk of cardiovascular disease” (Ref. 5, page 15).

As a result of the modifications in the dietary recommendations for total fat intake over the years, we have exempted certain foods at times from needing to meet the “low fat” requirement to be eligible to make a health claim related to CHD if those foods are consistent with dietary recommendations. For example, whole oats are exempt from meeting the “low fat” requirement to be eligible for “Soluble Fiber from Certain Foods and Risk of Coronary Heart Disease” health claim (§ 101.81). In providing the exemption, we discussed that consumption of whole oats was consistent with the recommendations regarding fat intake in the 2005 DGA and that consumption of foods such as whole oats was helpful in reducing the risk of CHD (73 FR 23947 at 23951, May 1, 2008).

We find that not imposing a “low fat” requirement for raw fruits and vegetables is consistent with the 2015–2020 DGA recommendations to increase intake of fruits and vegetables to help support healthy eating patterns (Ref. 5), as well as the 2015–2020 DGA emphasis on types of fat rather than total fat when discussing CHD risk (Refs. 5 and 7). We note that the fruits and vegetables that we are exempting from meeting the definition of “low fat” must still comply with general health claim requirements in order to be eligible to bear the claim, including, but not limited to, the requirement in § 101.14(e)(3) that the level of fat must not exceed the disqualifying nutrient level for total fat in § 101.14(a)(4).

C. Minimum Nutrient Content

In the 1993 final rule on the general requirements for health claims (58 FR 2478), we established the minimum nutrient content requirement for eligibility of foods to bear health claims. We stated that foods bearing health claims should be those consistent with dietary guidelines and that the value of health claims should not be trivialized or compromised by their use on foods of little or no nutritional value. We also stated that claims intended to promote the consumption of food that is incompatible with dietary guidelines would be misleading to consumers (58 FR 2478 at 2521). We developed an approach that would limit health claims to foods that contribute certain nutrients

to the diet and, thus, are sources of more than calories (58 FR 2478 at 2521). We concluded that a food must contain one or more of vitamin A, vitamin C, iron, calcium, protein, or fiber at or above 10 percent of the RDI or DRV, prior to any nutrient addition, noting that most foods consistent with dietary guidelines met this criterion. Therefore, we added § 101.14(e)(6) to state that, except for dietary supplements that are not in conventional food form, the food must contain 10 percent or more of the Reference Daily Intake or the Daily Reference Value for vitamin A, vitamin C, iron, calcium, protein, or fiber per reference amount customarily consumed before any nutrients are added. We adopted this requirement in light of Congressional intent that health claims be used to help Americans maintain a balanced and healthful diet consistent with dietary guidelines (58 FR 2478 at 2521).

We later published technical amendments to the health claim regulations acknowledging that certain food products that had limited nutritional value may be determined to be appropriate foods to bear a health claim (58 FR 44036, August 18, 1993). We noted that we intended to address such situations in the regulations authorizing specific health claims, such as through an exception to the general requirements expressed in § 101.14(e)(6) (58 FR 44036).

Thus, we have recognized that exemptions to the minimum nutrient content requirement may be necessary in certain situations to help consumers construct overall daily diets that conform to current dietary guidelines and that otherwise promote good health. Multiple such exemptions have already been granted. For example, on August 23, 1996, we exempted noncariogenic carbohydrate sweeteners (carbohydrate sweeteners that do not promote the development of tooth decay) from the minimum nutrient content requirement to be eligible for the “dietary noncariogenic carbohydrate sweeteners and dental caries” health claim (§ 101.80) (61 FR 43433 at 43436). We reiterate that the minimum nutrient content requirements of § 101.14(e)(6) are important, but that an exemption from the minimum nutrient content requirements for fruits and vegetables as a group is warranted for these products to be eligible to bear the health claims authorized in § 101.75, given current dietary guideline recommendations. The value of these health claims will not be trivialized or compromised by their use on fruits and vegetables because current dietary guidelines emphasize that increased intake of fruits and vegetables

is an integral part of creating healthful diets and reducing the risk of chronic disease.

D. Conclusion

We agree with the petitioner that some current requirements for the dietary saturated fat and cholesterol and risk of CHD health claim prevent a number of fruits and vegetables from being eligible to bear the claim. We also agree that fruits and vegetables as a group appear to contribute to a reduced risk of CHD regardless of their inherent fat content or their ability to meet 10 percent of the RDI or DRV of vitamin A, vitamin C, iron, calcium, protein, or fiber per RACC. We previously have exempted foods from needing to meet individual requirements for health claim eligibility when, as here, consumption of the foods is consistent with contemporary science-based dietary recommendations. We conclude that raw fruits and vegetables should be exempt from needing to meet the minimum nutrient content requirement of the general principles for health claims and from the requirement specifically included in the dietary saturated fat and cholesterol and risk of CHD health claim that a food meet the definition for “low fat” to be eligible to bear the claim.

Although the petition requested that a “single-ingredient or mixture of frozen or canned fruits and vegetables that contains no fats or sugars in addition to the fats or sugars inherently present in the fruit or vegetable product” also be exempt from the low fat and minimum nutrient content requirements, we are not including these types of products in the exemptions at this time. We are able to easily determine which foods fall into the category of raw fruits and vegetables. With single-ingredient or mixtures of canned or frozen fruit and vegetable products, however, the categories are very broadly described, and it is difficult to know all of the types of products that may become included in an exemption. There are many food products that could conceivably be considered “fruit or vegetable products,” including products with varying degrees of processing, with numerous possibilities of ingredients in a “mixture,” or with a number of packaging variations. We determine that providing an exemption for raw fruits and vegetables will affect the public health positively, but it is unclear if all single-ingredient and mixtures of frozen or canned fruits and vegetables that contain no fats or sugars in addition to the fats or sugars inherently present in the fruit or vegetable product would have similar effects. Therefore, we

decline to extend any exemptions to this category of fruit and vegetable products at this time. However, we invite comments on this issue. If we receive information related to the possible iterations of canned and frozen fruit and vegetable products and also on their effects on health, we may consider expanding the foods included in the exemption in the future. Indeed, the petition encouraged FDA to proceed with exemptions solely for raw fruits and vegetables if the canned and frozen products required additional consideration.

IV. Description of Amendments to § 101.75

We are revising § 101.75(c) to: (1) Provide an exemption at § 101.75(c)(1) for raw fruits or vegetables from meeting the minimum nutrient content requirement in § 101.14(e)(6), and (2) revise § 101.75(c)(2)(ii) to provide an exemption from meeting the nutrient content requirements of “low fat” if the food is a raw fruit or vegetable.

V. Economic Analysis of Impacts

A. Introduction

We have examined the impacts of the interim final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the interim final rule. We believe that this interim final rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because this interim final rule concerns voluntary claims, we certify that the interim final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in

the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. This interim final rule would not result in an expenditure in any year that meets or exceeds this amount.

B. Summary of Benefits and Costs of the Interim Final Rule

This interim final rule amends the regulation authorizing a health claim on the relationship between dietary saturated fat and cholesterol and risk of CHD by expanding its use to raw fruits and vegetables that do not meet the “low fat” definition (§ 101.62(b)(2)) and/or the minimum nutrient content requirement (§ 101.14(e)(6)). We believe that a business will only incur the additional costs of analyzing the health claim requirements and relabeling a previously ineligible product if the additional revenue it anticipates to generate by attracting more customers to its products is greater than these additional costs. This implies zero net costs from this interim final rule to such businesses, as well as to any businesses that decide not to include new CHD health claims on previously ineligible and now eligible fruits and vegetables.

We have very little data on the current consumer usage of CHD claims on labels and labeling, how these practices would change in response to this interim final rule, or how the consumers will respond to new CHD claims on raw fruits and vegetables that were previously ineligible for such claims. Because of this data gap, we acknowledge that we do not have sufficient evidence at this point to quantify the benefits and the administrative and labeling costs of this interim final rule. Industry will only use a new CHD health claim on the label and labeling of a previously ineligible product if it believes consumers are willing to pay more for such product or buy more of it due to the new CHD claim. If consumers value such new CHD health information, we expect there to be changes in consumer behavior that would result in public health benefits from the reduced annual number of CHD cases. The benefits therefore will only be realized, and labels will only be changed, if the new CHD information on labels and labeling increases consumer demand for the previously ineligible and now eligible for a CHD health claim fruits and vegetables. Otherwise, the firms will not use the CHD health claim on their labels for these fruits and vegetables.

The full analysis of economic impacts is available in the docket for this interim final rule (Ref. 9) and at <http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm>.

VI. The Paperwork Reduction Act of 1995

This interim final rule contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

VII. Analysis of Environmental Impact

We have determined under § 25.32(p) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Federalism

We analyzed this interim final rule in accordance with the principles set forth in Executive Order 13132. We have determined that the interim final rule will have a preemptive effect on State law. Section 4(a) of the Executive order requires Agencies to “construe . . . a Federal statute to preempt State law only where the statute contains an express preemption provision or there is some other clear evidence that the Congress intended preemption of State law, or where the exercise of State law conflicts with the exercise of Federal authority under the Federal statute.” Section 403A(a) of the FD&C Act provides that no State or political subdivision of a State may directly or indirectly establish under any authority or continue in effect as to any food in interstate commerce any requirement respecting any claim of the type described in section 403(r)(1) of the FD&C Act made in the label or labeling of food that is not identical to the requirement of section 403(r) of the FD&C Act.

This interim final rule amends the existing food labeling regulations on health claims for dietary saturated fat and cholesterol and risk of CHD (§ 101.75) in the label or labeling of food under section 403(r) of the FD&C Act. Although this interim final rule has a preemptive effect in that it precludes States from issuing any health claim labeling requirements for dietary saturated fat and cholesterol and the risk of CHD, this preemptive effect is consistent with what Congress set forth in section 403A(a) of the FD&C Act. Section 403A(a)(5) of the FD&C Act displaces both State legislative

requirements and State common law duties.

We have complied with all of the applicable requirements under Executive Order 13132 and have determined that the preemptive effects of this interim final rule are consistent with Executive Order 13132.

IX. Issuance of an Interim Final Rule and Immediate Effective Date

We are issuing this rule as an interim final rule, effective immediately, with an opportunity for public comment. Section 403(r)(7) of the FD&C Act authorizes us to make proposed regulations issued under section 403(r) of the FD&C Act effective upon publication pending consideration of public comment and publication of a final regulation, if the Agency determines that such action is necessary for public health reasons. This authority enables us to act promptly on petitions that provide for information that is necessary to: (1) Enable consumers to develop and maintain healthy dietary practices; (2) enable consumers to be informed promptly and effectively of important new knowledge regarding nutritional and health benefits of food; or (3) ensure that scientifically sound nutritional and health information is provided to consumers as soon as possible. Proposed regulations made effective upon publication under this authority are deemed to be final Agency action for purposes of judicial review. The legislative history indicates that such regulations should be issued as interim final rules (H. Conf. Rept. No. 105–399, at 98 (1997)).

The petition requested that we issue an interim final rule amending § 101.75 to indicate that the evidence is compelling and the potential to encourage fruit and vegetable consumption is important for public health. It noted that we have used this authority to issue interim final rules for health claims a number of times (e.g., 65 FR 54685, September 8, 2000) and using an interim final rule would be consistent with our past practices.

We are satisfied that all three criteria in section 403(r)(7)(A) of the FD&C Act have been met for the amendment to the dietary saturated fat and cholesterol and risk of CHD health claim to permit raw fruits and vegetables that fail to comply with the “low fat” definition and/or the minimum nutrient content requirement, to be eligible to bear the claim. First, we conclude that these amendments for eligibility for foods to bear these health claims could help enable consumers to develop and maintain healthy dietary practices. Second, these amendments to this health claim will enable consumers

to be informed promptly and effectively of important new knowledge regarding nutritional and health benefits of food. Third, these amendments to this health claim will ensure that scientifically sound nutritional and health information regarding the benefits of fruit and vegetable intake and reduction of CHD risk can be provided to consumers as soon as possible. The past few editions of the DGA have been moving away from a focus on total fat and have instead communicated to consumers the need to focus on type of fat consumed instead of total amount of fat. Recent editions of the DGA have also encouraged increased intake of fruits and vegetables for a healthful diet. Prompt issuance of an interim final rule that reflects the current recommendations is necessary for consumers to be able to have the most current information on nutrition and diet. Consumers will be better able to construct healthful diets if they have prompt access to information that is consistent with the current recommendations on fat content and on consumption of fruits and vegetables. Therefore, we are using the authority in section 403(r)(7)(A) of the FD&C Act to issue an interim final rule amending the general requirements for the health claim for dietary saturated fat and cholesterol and risk of CHD and to make the interim final rule effective immediately.

This regulation is effective upon publication in the **Federal Register**. We invite public comment on this interim final rule. We will consider modifications to this interim final rule based on comments made during the comment period. We will address comments and confirm or amend the interim final rule in a final rule.

[Docket No. FDA–2015–N–5017]

RIN 0910–AH02

Banned Devices; Powdered Surgeon's Gloves, Powdered Patient Examination Gloves, and Absorbable Powder for Lubricating a Surgeon's Glove

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that Powdered Surgeon's Gloves, Powdered Patient Examination Gloves, and Absorbable Powder for Lubricating a Surgeon's Glove present an unreasonable and substantial risk of illness or injury and that the risk cannot be corrected or eliminated by labeling or a change in labeling. Consequently, FDA is banning these devices.

DATES: This rule is effective on January 18, 2017.

ADDRESSES: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and insert the docket number found in brackets in the

heading of this final rule into the "Search" box and follow the prompts, and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

I. Executive Summary

A. Purpose and Coverage of the Final Rule

Medical gloves play a significant role in the protection of both patients and health care personnel in the United States. Health care personnel rely on medical gloves as barriers against transmission of infectious diseases and contaminants when conducting surgery, as well as when conducting more limited interactions with patients. Various types of powder have been used to lubricate gloves so that wearers could don the gloves more easily. However, the use of powder on medical gloves presents numerous risks to patients and health care workers, including inflammation, granulomas, and respiratory allergic reactions.

A thorough review of all currently available information supports FDA's

conclusion that powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove should be banned. FDA has concluded that the risks posed by powdered gloves, including health care worker and patient sensitization to natural rubber latex (NRL) allergens, surgical complications related to peritoneal adhesions, and other adverse health events not necessarily related to surgery, such as inflammatory responses to glove powder, are important, material, and significant in relation to the benefit to public health from their continued marketing. FDA has carefully evaluated the risks and benefits of powdered gloves and the risks and benefits of the state of the art, which includes viable non-powdered alternatives that do not carry any of the risks associated with glove powder, and has determined that the risk of illness or injury posed by powdered gloves is unreasonable and substantial. Further, FDA believes that this ban would likely have minimal economic and shortage impact on the health care industry. Thus, a transition to alternatives in the marketplace should not result in any detriment to public health.

This rule applies to powdered patient examination gloves, powdered surgeon's gloves, and absorbable powder for lubricating a surgeon's glove. This includes all powdered medical gloves except powdered radiographic protection gloves. Because we are not aware of any powdered radiographic protection gloves that are currently on the market, FDA lacks the evidence to determine whether the banning standard would be met for this particular device. The ban does not apply to powder used in the manufacturing process (e.g., former-release powder) of non-powdered gloves, where that powder is not intended to be part of the final finished glove. Finished non-powdered gloves are expected to include no more than trace amounts of residual powder from these processes, and the Agency encourages manufacturers to ensure finished non-powdered gloves have as little powder as possible. In our 2008 Medical Glove Guidance Manual (Ref. 1), we recommended that non-powdered gloves have no more than 2 milligrams (mg) of residual powder and debris per glove, as determined by the Association for Testing and Materials (ASTM) D6124 test method (Ref. 2). The Agency continues to believe this amount is an appropriate maximum level of residual powder. The ban also does not apply to powder intended for use in or on other

medical devices, such as condoms. FDA has not seen evidence that powder intended for use in or on other medical devices, such as condoms, presents the same public health risks as that on powdered medical gloves.

B. Summary of the Major Provisions of the Final Rule

In this final rule, FDA is banning the following devices: (1) Powdered surgeon's gloves, (2) powdered patient examination gloves, and (3) absorbable powder for lubricating a surgeon's glove. Because the classification regulations for these device types do not distinguish between powdered and non-powdered versions, FDA is amending the descriptions of these devices in the regulations to specify that the regulations for patient examination and surgeon's gloves will apply only to non-powdered gloves while the powdered version of each type of glove will be added to the listing of banned devices in the regulations.

Many comments requested that FDA revise the scope of the ban to include all NRL gloves. Many comments from industry requested that the proposed effective date be extended beyond 30 days after the date of publication of the final rule. Of the comments that do not support the ban, commenters noted the need for powdered gloves to aid in donning gloves and tactile sense and the reduced risks associated with current powdered gloves that have less powder. The remaining comments are not clearly in support or opposition to the proposal.

C. Legal Authority

Powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove are defined as devices under section 201(h) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 321(h)). Section 516 of the FD&C Act (21 U.S.C. 360f) authorizes FDA to ban a device if it finds, on the basis of all available data and information, that the device presents substantial deception or unreasonable and substantial risks of illness or injury, which cannot be corrected by labeling or a change in labeling. This rule amends 21 CFR 878.4460, 878.4480, 880.6250, 895.102, 895.103, and 895.104. FDA's legal authority to modify §§ 878.4460, 878.4480, 880.6250, 895.102, 895.103, and 895.104 arises from the device and general administrative provisions of the FD&C Act (21 U.S.C. 352, 360f, 360h, 360i, and 371).

D. Costs and Benefits

The final rule is expected to provide a positive net benefit (estimated benefits minus estimated costs) to society. Banning powdered glove products is not expected to impose any costs to society, but is expected to reduce the number of adverse events associated with using powdered gloves. The primary public health benefit from adoption of the rule would be the value of the reduction in adverse events associated with using powdered gloves. The Agency estimates maximum total annual net benefits to range between \$26.8 million and \$31.8 million.

II. Background

A. Need for the Regulation/History of the Rulemaking

On March 22, 2016, FDA issued a proposed rule to ban powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove (81 FR 15173). Section 516(a)(1) of the FD&C Act authorizes FDA to ban a device intended for human use by regulation if it finds, on the basis of all available data and information, that such a device "presents substantial deception or an unreasonable and substantial risk of illness or injury." For a more detailed discussion of the banning standard, we refer you to the preamble of the proposed rule. FDA issued the proposed regulation because it determined that powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove present an unreasonable and substantial risk of illness or injury and that the risk cannot be corrected or eliminated by labeling or a change in labeling.

The preamble to the proposed rule describes the history of powdered gloves and the citizen petitions received by the Agency that request a ban on powdered gloves. We refer readers to that preamble for information about the development of the proposed rule. The level and types of risk presented by powdered gloves varies depending on the composition and intended use of the glove. In aggregate, the risks of powdered gloves include severe airway inflammation, hypersensitivity reactions, allergic reactions (including asthma), allergic rhinitis, conjunctivitis, dyspnea, as well as granuloma and adhesion formation when exposed to internal tissue. We refer readers to the preamble of the proposed rule for details on the level and types of risks presented by powdered gloves. The benefits of powdered gloves appear to only include greater ease of donning

and doffing, decreased tackiness, and a degree of added comfort, which FDA believes are nominal when compared to the risks posed by these devices.

The state of the art of both surgeon's and patient examination gloves includes non-powdered alternatives that provide similar performance as the various powdered glove types do. That is, there are many non-powdered gloves available that have the same level of protection, dexterity, and performance. Thus, based on a careful evaluation of the risks and benefits of powdered gloves and the risks and benefits of the current state of the art, which includes readily available alternatives that carry none of the risks posed by powdered gloves, FDA has determined that the standard to ban powdered gloves has been met, and that it is appropriate to issue this ban.

Finally, as discussed in the proposed rule, FDA also determined the ban should apply to devices already in commercial distribution and devices already sold to the ultimate user, as well as to devices that would be sold or distributed in the future (see 21 CFR 895.21(d)(7)). This means that powdered gloves currently being used in the marketplace would be subject to this ban and adulterated under section 501(g) of the FD&C Act (21 U.S.C. 351(g)), and thus subject to enforcement action.

B. Summary of Comments to the Proposed Rule

The Agency requested public comments on the proposed rule, and the comment period closed on June 20, 2016. The Agency received approximately 100 comment letters on the proposed rule by the close of the comment period, each containing one or more comments on one or more issues. We received comments from a cross-section of patients and consumers, medical professionals, device manufacturers, and professional and trade associations. A majority of the comments supported the objectives of the rule in whole or in part, while a minority of the comments opposed the objectives of the rule. Some comments suggested changes to specific elements of the proposed rule or requested clarification of matters discussed in the proposed rule. See Section IV for the description of comments on the proposed rule and FDA's responses.

C. General Overview of the Final Rule

FDA published a proposed rule to ban powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove, because FDA

determined that these devices present an unreasonable and substantial risk of illness or injury and that the risk cannot be corrected or eliminated by labeling or a change in labeling (81 FR 15173).

In this final rule, FDA is banning the following devices: (1) Powdered surgeon's gloves (21 CFR 878.4460), (2) powdered patient examination gloves (21 CFR 880.6250), and (3) absorbable powder for lubricating a surgeon's glove (21 CFR 878.4480). Because the classification regulations for these device types do not distinguish between powdered and non-powdered versions, FDA is amending the descriptions of these devices in the regulations to specify that the regulations for surgeon's gloves (21 CFR 878.4460) and patient examination gloves (21 CFR 880.6250) will apply only to non-powdered gloves while the powdered version of each type of glove will be added to 21 CFR part 895, subpart B—Listing of Banned Devices.

D. Clarifying Changes to the Rule

While FDA believes that the preamble to the proposed rule was clear that the proposed ban would apply to all powdered surgeon's gloves and all powdered patient examination gloves, in reviewing the terminology used in the proposed additions to 21 CFR part 895, FDA determined that term "synthetic latex" would not cover every type of non-NRL material that is used to manufacture powdered gloves. It was not FDA's intent to limit the ban to only powdered NRL and powdered synthetic latex gloves, and we believe that this intent was clear from the content of the preamble to the proposed rule, which stated that the ban "would apply to all powdered gloves except powdered radiographic protection gloves." As such, FDA has now revised the identification in this final rule to clarify that the ban applies to all powdered surgeon's gloves and powdered patient examination gloves without reference to the type of material from which they are made. Additionally, the identification of non-powdered surgeon's gloves and non-powdered patient examination gloves is also being revised to remove reference to material.

III. Legal Authority

Powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove are defined as medical devices under section 201(h) of the FD&C Act (21 U.S.C. 321). Section 516 of the FD&C Act (21 U.S.C. 360f) authorizes FDA to ban a device if it finds, on the basis of all available data and information, that the device

presents substantial deception or unreasonable and substantial risks of illness or injury, which cannot be corrected by labeling or a change in labeling. This rule amends §§ 878.4460, 878.4480, 880.6250, 895.102, 895.103, and 895.104. FDA's legal authority to modify §§ 878.4460, 878.4480, 880.6250, 895.102, 895.103, and 895.104 arises from the device and general administrative provisions of the FD&C Act (21 U.S.C. 352, 360f, 360h, 360i, and 371).

IV. Comments on the Proposed Rule and FDA's Responses

A. Introduction

We received approximately 100 comment letters on the proposed rule by the close of the comment period, each containing one or more comments on one or more issues. We received comments from a cross-section of patients and consumers, medical professionals, device manufacturers, and professional and trade associations. A majority of the comments supported the objectives of the rule in whole or in part, while a minority of the comments opposed the objectives of the rule. Some comments suggested changes to specific elements of the proposed rule or requested clarification of matters discussed in the proposed rule.

We describe and respond to the comments in section IV.B through E. We have numbered each comment to help distinguish between different comments. We have grouped similar comments together under the same number, and, in some cases, we have separated different issues discussed in the same comment and designated them as distinct comments for purposes of our responses. The number assigned to each comment or comment topic is purely for organizational purposes and does not signify the comment's value or importance or the order in which comments were received.

B. Description of General Comments and FDA Response

Many comments made general remarks supporting or opposing the proposed rule without focusing on a particular proposed provision. In the following paragraphs, we discuss and respond to such general comments.

(Comment 1) Many comments support the proposed ban on powdered patient examination gloves and powdered surgeon's gloves. These comments from individual consumers, health care professionals, academia, and industry highlight several risks of the continued use of powdered gloves, including, among others, allergic reactions, post-

operative adhesions, and delayed wound healing.

(Response 1) FDA agrees with these comments. After further review of all available information and the comments submitted to the proposed rule, FDA has concluded that the public's exposure to the risks of powdered gloves is unreasonable and substantial in relation to the nominal public health benefit derived from the continued marketing of these devices, especially when considering the benefits and risks posed by readily available alternative devices. Therefore, FDA has determined that the standard for a ban on these devices has been met.

C. Description of Comments That Oppose the Regulation and FDA Response

FDA received some comments that oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves for various reasons. We address each of these reasons for opposition in this section. After reviewing these comments, FDA has determined that the standard to ban powdered gloves has been met, and that it is appropriate to issue this ban. We are finalizing the ban with only clarifying changes.

(Comment 2) Comments oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves because of difficulty donning or doffing non-powdered gloves. Two commenters specifically discuss hyperhidrosis with claims that it can add to the difficulty donning and doffing non-powdered gloves. One commenter has asserted that double-gloving is more difficult when using non-powdered gloves.

(Response 2) As described in the preamble of the proposed rule, we have concluded that the benefit of ease of donning or doffing powdered gloves is generally nominal (Ref. 3) in comparison to the risks posed by the continued marketing of powdered gloves, which, among others, include severe airway inflammation, hypersensitivity reactions, and allergic reactions (including asthma). Also, as noted in the proposed rule, a study of various brands of powdered and non-powdered NRL gloves by Cote et al. found that there are non-powdered latex gloves that are easily donned with wet or dry hands with relatively low force compared to the forces required to don powdered latex examination gloves (Ref. 3). Thus, FDA has considered ease of donning and doffing as a benefit as it applies within the banning standard, and has determined that the standard is met.

(Comment 3) Comments oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves because of difficulty donning non-powdered gloves, leading to greater propensity of non-powdered gloves to tear. Some of these comments express concern that the reduced ability to separate the opening of a non-powdered glove or the greater propensity of non-powdered gloves to tear could potentially lead to a higher degree of contamination and post-procedure infections.

(Response 3) FDA disagrees with the assertion that non-powdered gloves have a higher propensity to tear and thus disagrees that use of non-powdered gloves presents a greater risk of contamination, post-procedure infections, or exposure of the user to blood. FDA does not believe there is compelling evidence to support the assertion that non-powdered gloves have a higher propensity to tear. Korniewicz, et al., determined that the presence of powder did not affect the durability of gloves or enhance glove donning (Ref. 4). Although Kerr, et al., identified a statistically significant difference in the durability of non-powdered vinyl gloves compared to powdered vinyl gloves, this difference may be attributed to glove type, manufacturer, and the fingernail length of users rather than the presence or absence of powder (Ref. 5). This study also found that vinyl gloves in general are less durable and have a greater propensity to tear compared to nitrile, neoprene, and latex gloves. Furthermore, as discussed in the response to comment 4, several studies have found that alternatives to non-powdered NRL gloves, such as nitrile and neoprene gloves, offer the same level of protection against contamination and exposure to blood as powdered NRL gloves (Refs. 5, 6, 7, 8, 9, and 10). Therefore, FDA has determined that suitable alternatives to powdered gloves are readily available in the marketplace.

(Comment 4) Commenters oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves because the fit of powdered gloves is more comfortable than non-powdered gloves. Some of these comments assert that the reduced fit of non-powdered gloves inhibits the tactile sensation necessary to perform medical procedures.

(Response 4) FDA disagrees with the assertion that non-powdered gloves inhibit the tactile sensation necessary to perform medical procedures. The ban does not include non-powdered NRL gloves, which offer the same

performance characteristics of powdered NRL gloves, and several studies have found that alternatives, such as nitrile and neoprene gloves, offer the same level of protection, dexterity, and performance as NRL gloves (Refs. 5, 6, 7, 8, 9, and 10). Furthermore, the numerous risks posed by the continued marketing of powdered gloves outweigh the benefit of whatever additional level of comfort is provided from using powdered gloves instead of the non-powdered alternatives that carry none of these risks.

(Comment 5) Some comments oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves, citing a lack of scientific evidence that gloves with reduced powder content, as those in use today, have the same risks as previously used gloves that had higher powder content.

(Response 5) FDA agrees that the maximum residual level of powder on powdered gloves is less than earlier types of powdered gloves. Historically, powdered medical gloves contained powder levels ranging from 50 to over 400 mg of powder per glove. Effective in 2002, the ASTM International recommended limits on powder levels is 15 mg per square decimeter for surgical gloves (ASTM D3577–2001) (Ref. 11) and 10 mg per square decimeter for patient examination gloves (ASTM D3578) (Ref. 12). As a result, FDA believes that gloves in use after 2002 follow these recommended limits and generally have lower powder content than earlier types of powdered gloves. Even so, several studies indicate that gloves with reduced powder levels continue to present unreasonable and substantial risks to patients and health care workers. For instance, a study conducted on the incidence of skin reactions for Greek endodontists from 2006 to 2012 found that glove powder accounted for the majority of skin reactions, and the replacement of powdered NRL gloves with non-powdered gloves resolved the majority of the adverse reactions (Ref. 13). Similarly, the risks of powdered gloves persist in non-clinical studies using gloves with reduced powder content, as demonstrated by the 2013 finding that surgeries performed with powdered gloves increased the number, density, and fibrotic properties of peritoneal adhesions in rats compared with surgeries performed with non-powdered gloves (Ref. 14). Also, the reduction in cases of NRL-induced occupational contact urticaria coincided with French hospitals transitioning to non-powdered gloves after 2004–2005 (Ref. 13).

Finally, FDA is not aware of any report in the literature that supports the assertion that currently marketed powdered gloves with lower powder content reduce the risks presented by powdered gloves (Ref. 15). In summary, FDA concludes that the risks of powder continue to be unreasonable and substantial for currently marketed powdered gloves despite lower powder content than previous generations of powdered gloves.

(Comment 6) Two comments oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves, because the commenters believe a warning on the risks of powdered gloves is sufficient to mitigate the risks posed by these devices.

(Response 6) As described in Section IV of the proposed rule, FDA has determined that no change in labeling could correct the risk of illness or injury presented by the continued use of these devices. Powdered gloves have additional or increased risks to health compared to non-powdered gloves related to the spread of powder, and the fact that powder-transported contaminants such as NRL allergens can become aerosolized. Exposure to powder or latex allergens presents significant risks to health care workers and patients when inhaled or when exposed to internal tissue during oral, vaginal, gynecological, and rectal exams. Although labeling can raise awareness of these risks, we conclude that labeling cannot effectively mitigate these risks because it cannot prohibit the spread of glove powder or powder-transported contaminants. In addition, an important aspect of these devices is their ability to affect persons other than the individual who decides to wear or use them. For example, patients often do not know the type of gloves being worn by the health care professional treating them, but are still exposed to the potential dangers. Similarly, glove powder's ability to aerosolize and carry NRL proteins exposes individuals to harm via inhalation or surface contact. Thus, some of the risks posed by glove powder can impact persons completely unaware or unassociated with its employment and without the opportunity to consider the devices' labeling. Because of this inherent quality, adequate directions for use or warnings cannot be written that would provide reasonable assurance of the safe and effective use of these devices for all persons that might come in contact with them.

Due to the ability of powder to affect people who would not have an opportunity to read warning labels, and

because potential warning labels would raise awareness of the risks, but would not eliminate the risks posed by glove powder, FDA has determined no label or warning can correct the risks posed by these devices.

(Comment 7) One comment opposes the proposed ban on powdered patient examination gloves and powdered surgeon's gloves, because the solvent used to remove powder during the manufacture of non-powdered gloves may cause adverse reactions to the glove user.

(Response 7) FDA is not aware of any report in the literature that supports the assertion of widespread adverse reactions to solvent used in the manufacturing process. Non-powdered patient examination and surgeon's gloves require premarket notification (510(k)) submissions prior to marketing. During the review of these submissions, FDA evaluates the final finished glove, including manufacturing solvents that are present on the final glove. FDA recommends that manufacturers conduct and submit skin irritation and dermal sensitization studies in these submissions to evaluate potential issues with components, including manufacturing solvents (Ref. 1). Although individual hypersensitivity reactions to different materials may occur, FDA has been unable to find evidence in the literature of hypersensitivity to typical glove manufacturing materials other than glove powder or NRL. However, Palosuo, et al., reports that the use of hand sanitizers containing isopropyl alcohol prior to donning gloves could cause dermatitis reaction if the gloves are donned before the alcohol dries (Ref. 16). The occurrence of this reaction is unrelated to the manufacture of non-powdered gloves and unrelated to the use of non-powdered gloves as an alternative to powdered gloves. Given the lack of evidence of adverse reactions to solvents used in the manufacturing of non-powdered gloves, and the established evidence demonstrating the risks of powdered glove use, FDA continues to believe that powdered gloves and glove powder meet the banning standard.

(Comment 8) Several comments oppose the proposed ban on powdered patient examination gloves and powdered surgeon's gloves due to the expectation that users will ultimately have to pay more for medical gloves once the ban is finalized, because the cost of non-powdered gloves is currently higher than the cost of powdered gloves.

(Response 8) We do not find any evidence to support the claims that

current prices of non-powdered gloves are significantly higher than powdered gloves. As we stated in the preliminary regulatory impact analysis (PRIA), extensive searches of glove distributor pricing indicate that non-powdered gloves have become as affordable as powdered gloves. Our searches also revealed that the market is saturated with alternatives to powdered gloves, resulting in downward pressure on the prices of non-powdered gloves. In addition, the share of powdered medical gloves sales has been declining since at least 2000 while total sales of all disposable medical gloves have increased (Ref. 17). We would not expect this trend to be occurring without regulatory action if users of disposable medical gloves faced significantly higher prices for switching to non-powdered gloves. We therefore do not find it necessary to update our analysis based on these comments.

(Comment 9) We received one comment that disagrees with our determination that the availability of examination and surgical gloves would not be reduced.

(Response 9) We do not find any evidence to support these claims. As we stated in the PRIA, research shows only 7 percent of total sales of examination and surgical gloves to medical workers were projected to be from powdered gloves in 2010 (Ref. 17). Global Industry Analysts (GIA) projected the share of powdered disposable medical gloves sales to decrease to 2 percent in 2015, while total sales of all disposable medical gloves continue to increase (Ref. 17). We would not expect this trend to be occurring without regulatory action if there were a reduction in the availability of disposable examination and surgical gloves. We therefore do not find it necessary to update our analysis based on these comments.

(Comment 10) Commenters suggest there would be a loss in consumer utility due to the preference some medical workers may have for powdered gloves due to comfort and ease of use.

(Response 10) We stated in the PRIA that the remaining 7 percent continuing to use these powdered gloves may experience utility loss from the removal of powdered gloves from the market (Ref. 17). The potential loss in consumer utility would be due to the perceived loss in comfort from powdered gloves users switching to non-powdered gloves. However, as the GIA report shows, there has been a downward trend in total sales of powdered gloves since at least the year 2000 while total sales of all disposable medical gloves has increased (Ref. 17). We would not

expect this trend to be occurring without regulatory action if the loss in consumer utility to current medical workers were substantial. Korniewicz et al. reported no loss in consumer satisfaction in a sample of operating room staff switching to non-powdered surgical gloves (Ref. 4). We have not estimated this potential burden, but the evidence described here suggests that any burden would not be substantial. Further, even having considered that some degree of consumer comfort may be lost by banning powdered gloves, FDA continues to believe that this benefit is considerably outweighed by the numerous risks posed by powdered gloves.

(Comment 11) One comment opposes the proposed ban on powdered patient examination gloves and powdered surgeon's gloves, because the risks identified for powdered gloves are due to contaminants, such as pesticides and herbicides, in the powder that would not be present if the powder were manufactured in the United States.

(Response 11) FDA disagrees with the assertion that contaminated powder is the source of the risks identified for powdered gloves. FDA's proposal to ban powdered gloves and glove powder is based on various studies on the risks of powdered gloves due to the properties of the powder itself. Powdered gloves have additional or increased risks to health compared to non-powdered gloves. For example, powder on NRL gloves can aerosolize latex allergens, resulting in sensitization to latex and allergic reactions. Latex sensitization and allergic reactions are unrelated to any potential presence of manufacturing contaminants, such as pesticides and herbicides. Additional risks of powdered gloves include severe airway inflammation, conjunctivitis, dyspnea, as well as granuloma and adhesion formation when exposed to internal tissue. FDA's assessment of the available literature and information indicates that these risks are attributable to the powder itself, as opposed to any potential presence of manufacturing contaminants, such as pesticides and herbicides.

In addition, the powder used on powdered gloves is required to comply with FDA's Quality System regulation, which includes requirements for quality and inspection for the final finished gloves that protect against the introduction of contaminated devices into commerce. Among other requirements, device manufacturers must establish and maintain procedures to prevent contamination of equipment or product by substances that could reasonably be expected to have an

adverse effect on product quality (21 CFR 820.70(e)). FDA's Quality System regulation applies to gloves and glove powder sold in the United States, regardless of the manufacturing location.

D. Description of Comments on Scope of Ban and FDA Response

FDA received several comments requesting revision of the scope of the ban. The scope of the proposed ban includes powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove. The glove types include all powdered patient examination and surgeon's gloves, including NRL and synthetic latex gloves. In the following paragraphs, we discuss and respond to comments requesting revision of the scope of the ban. We are finalizing the ban without change to the scope, but clarifying that all powdered patient examination gloves and powder surgical gloves are banned, regardless of the material from which they are made.

(Comment 12) Several comments identify risks that result from the use of powdered and non-powdered NRL gloves. These comments request FDA to extend the ban to all NRL gloves, both powdered and non-powdered.

(Response 12) Unlike with powdered latex gloves, which have the ability to aerosolize glove powder and carry allergenic proteins, FDA believes the risk of allergic reaction to non-powdered NRL gloves, which affects the user and patients in direct contact with the glove, is adequately mitigated through already-required labeling that alerts users to this risk. NRL gloves must include a statement to alert users to the risk of allergic reactions caused by NRL (21 CFR 801.437). Further, several studies have indicated that the use of non-powdered NRL gloves reduces the risk of sensitization to allergenic NRL proteins and the number of allergic reactions experienced by those who are already sensitized (Refs. 18, 19, and 20). FDA believes that these study results, when considered alongside the risk mitigation that follows from FDA's required labeling for NRL products, demonstrates that non-powdered latex gloves can be safely used with appropriate caution for latex-sensitive patients and health care workers. Therefore, FDA has determined not to ban the use of all NRL gloves.

(Comment 13) Several comments raise the issue of life threatening latex allergy events that result from various uses of NRL gloves including food preparation and food service. Several of these comments assert that the Agency should broaden the scope of the ban to cover all

NRL gloves for all uses including food preparation and food service.

(Response 13) We have concluded that it is not appropriate to address a proposal to ban gloves used for food preparation because these gloves do not meet the definition of a device under section 201(h) of the FD&C Act and are thus not subject to section 516 of the FD&C Act (21 U.S.C. 360f), which provides the statutory authority to ban devices within FDA's authority to regulate such products.

(Comment 14) One comment asserts that the ban on powdered gloves should not apply to dental practice, because the risks are not applicable to dental practice.

(Response 14) FDA disagrees with the assertion that the risks of powdered gloves are not applicable to dental practice. Dentists and dental patients face the same risks as other medical practices in terms of the potential for powder exposure to open cavities or open wounds, and for powder, if used with NRL gloves, to carry protein allergens. Several studies documenting the risks of powdered gloves in dental practices have been conducted, including Saary, et al., which identified that changing to low-protein and non-powdered NRL gloves reduced NRL allergy in dental students (Ref. 18). In addition, Charous et al., reported in 2000 that a dental office was able to reduce airborne NRL antigen levels to undetectable levels with the exclusive use of non-powdered NRL gloves, permitting a highly sensitized staff member to continue to work there (Ref. 21). These studies, among others (Refs. 13 and 22), indicate that the risks of powdered medical gloves apply to dental practice. Therefore, FDA has determined that the scope of the ban on powdered medical gloves should continue to include powdered gloves used in dental practice.

E. Description of Other Specific Comments and FDA Response

Many comments made specific remarks requesting clarification or revision to the proposed rule. In the following paragraphs, we discuss and respond to such specific comments.

(Comment 15) A number of comments request extension of the effective date of the ban. The proposed rule included a proposed effective date of 30 days after publication of the final rule for all devices, including those already in commercial distribution. The comments suggest a range of effective dates of 90 days to 18 months after publication of the final rule and assert that a longer transition period is necessary to allow

existing inventory to flow through the supply chain to providers and patients.

(Response 15) FDA is not extending the effective date of the ban for devices already in commercial distribution. We have concluded that powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's glove present an unreasonable and substantial risk of illness or injury and that the risk cannot be corrected or eliminated by labeling or a change in labeling. The continued marketing of these devices beyond the 30 day effective date would allow for the continued sale and purchase of devices that FDA has determined present an unreasonable and substantial risk to patients and health care workers. Therefore, FDA does not believe that it is in the best interest of the public health to extend the effective date for devices already in commercial distribution. In order to minimize the risk of continued exposure of health care workers and patients to these devices, the effective date for devices remains 30 days after the date of publication of this final rule.

(Comment 16) One comment requests that FDA not extend the effective date of the ban to allow companies to deplete their inventory of the devices.

(Response 16) As described in the response to comment 15, FDA agrees that it is in the best interest of the public health to not extend the effective date of the ban for devices already in commercial distribution. Therefore, the effective date of the ban for devices already in commercial distribution remains at 30 days after the date of publication of the final rule.

(Comment 17) A few comments request recommendations on the means of disposal or recycling of powdered gloves.

(Response 17) FDA recommends that unused inventories of powdered medical gloves remaining at domestic manufacturing and distribution locations be disposed of in accordance with standard industry practices. Unused supplies at hospitals, outpatient centers, clinics, medical and dental offices, other service delivery points (nursing homes, etc.), and in the possession of end users, will need to be disposed of according to established procedures of the local community's solid waste management system. Established procedures for these materials typically involve disposal in landfills or incineration. FDA has concluded that this final rule will not have a significant impact on the human environment. (See Section VII. Analysis of Environmental Impact.)

(Comment 18) One comment requests clarification on whether after the effective date of the ban the Agency will permit a manufacturer to export powdered medical gloves that are already physically located at distribution centers in the United States.

(Response 18) After the effective date of this final rule, manufacturers will not be allowed to import powdered medical gloves. However, while powdered medical gloves will be banned in the United States on the effective date of this final rule, manufacturers may export existing inventory of powdered gloves to a foreign country if the device complies with the laws of that country and has valid marketing authorization by the appropriate authority, as described in section 802 of the FD&C Act (21 U.S.C. 382)). If eligible for export under section 802 of the FD&C Act, a device intended for export will not be deemed adulterated or misbranded if it

(A) accords to the specifications of the foreign purchaser,

(B) is not in conflict with the laws of the country to which it is intended for export,

(C) is labeled on the outside of the shipping package that it is intended for export, and

(D) is not sold or offered for sale in domestic commerce.

V. Effective Date

This rule is effective January 18, 2017. The effective date of this rule applies to devices already in commercial distribution and those already sold to the ultimate user, as well as to devices that would be sold or distributed in the future. All powdered surgeon's gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon's gloves must be removed from the market upon the effective date of this final rule. Section 501(g) of the FD&C Act (21 U.S.C. 351(g)) deems a device to be adulterated if it is a banned device.

VI. Economic Analysis of Impacts

A. Introduction

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety,

and other advantages; distributive impacts; and equity). We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the final rule. We believe that this final rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because this rule imposes no new burdens, we certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. This final rule would not result in an expenditure in any year that meets or exceeds this amount.

B. Summary of Costs and Benefits

The final rule prohibits marketing of powdered surgeon’s gloves, powdered patient examination gloves, and absorbable powder for lubricating surgeon’s gloves. The rule does not cover or include powdered radiographic gloves.

The final rule is expected to provide a positive net benefit (estimated benefits minus estimated costs) to society. Banning powdered glove products is not expected to impose any costs to society. Extensive searches of glove distributor pricing indicate that improvements to non-powdered gloves have made these products as affordable as powdered gloves. The ban is expected to reduce the adverse events associated with using powdered gloves. The Agency estimates maximum total annual net benefits to range between \$26.8 million and \$31.8 million. The present discounted value of the estimated benefits over 10 years ranges from \$228.9 million to \$270.8 million at a 3 percent discount rate and from \$188.5 million to \$223 million at a 7 percent discount rate.

FDA has examined the economic implications of the rule as required by the Regulatory Flexibility Act. If a rule will have a significant economic impact on a substantial number of small

entities, the Regulatory Flexibility Act requires us to analyze regulatory options that would lessen the economic effect of the rule on small entities. This rule will not impose any new burdens on small entities, and thus will not impose a significant economic impact on a substantial number of small entities.

The full discussion of the economic impacts of the rule, which includes a list of changes made in the final regulatory impact analysis, in accordance with Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act, and the Unfunded Mandates Reform Act is available at <https://www.regulations.gov> under the docket number (FDA–2015–N–5017) for this rule and at <http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm#> (Ref. 23).

VII. Analysis of Environmental Impact

FDA has carefully considered the potential environmental effects of this final rule and of possible alternative actions. In doing so, the Agency focused on the environmental impacts of its action as a result of disposal of unused powdered surgeon’s gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon’s glove that will need to be handled after the rule is finalized.

The environmental assessment (EA) considered each of the alternatives in terms of the need to provide maximum reasonable protection of human health without resulting in a significant impact on the environment. The EA considered environmental impacts related to landfill and incineration of solid waste at municipal solid waste (MSW) facilities nationwide. The selected action, if finalized, will result in an initial batch disposal of unused powdered surgeon’s gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon’s glove from user facilities to MSW facilities nationwide, followed by a rapid decrease in the rate of disposal of these devices, as supplies are depleted. The selected action does not change the ultimate disposition of these devices but expedites their rate of disposal and ceases future production. Overall, given the limited number of powdered surgeon’s gloves, powdered patient examination gloves, and absorbable powder for lubricating a surgeon’s glove, currently in commercial distribution, the selected action is expected to have no significant impact on MSW and landfill facilities and the environment in affected communities.

The Agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The Agency’s finding of no significant impact and the evidence supporting that finding, contained in an EA, may be seen in the Division of Dockets Management (see **ADDRESSES**) between 9 a.m. and 4 p.m., Monday through Friday (Ref. 24).

VIII. Paperwork Reduction Act of 1995

This final rule contains no collection of information. Therefore, FDA is not required to seek clearance by Office of Management and Budget under the Paperwork Reduction Act of 1995.

IX. Federalism

We have analyzed this final rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the rule does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, we conclude that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

List of Subjects

21 CFR Parts 878 and 880

Medical devices.

21 CFR Part 895

Administrative practice and procedure, Labeling, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 878, 880, and 895 are amended as follows:

PART 878—GENERAL AND PLASTIC SURGERY DEVICES

■ 1. The authority citation for part 878 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Amend § 878.4460 by revising the section heading and paragraph (a) to read as follows:

§ 878.4460 Non-powdered surgeon's glove.

(a) *Identification.* A non-powdered surgeon's glove is a device intended to be worn on the hands of operating room personnel to protect a surgical wound from contamination. A non-powdered surgeon's glove does not incorporate powder for purposes other than manufacturing. The final finished glove includes only residual powder from manufacturing.

* * * * *

§ 878.4480 [Removed]

■ 3. Remove § 878.4480.

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

■ 4. The authority citation for part 880 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 371.

■ 5. Amend § 880.6250 by revising the section heading and paragraph (a) to read as follows:

§ 880.6250 Non-powdered patient examination glove.

(a) *Identification.* A non-powdered patient examination glove is a disposable device intended for medical purposes that is worn on the examiner's hand or finger to prevent contamination between patient and examiner. A non-powdered patient examination glove does not incorporate powder for purposes other than manufacturing. The final finished glove includes only residual powder from manufacturing.

* * * * *

PART 895—BANNED DEVICES

■ 6. The authority citation for part 895 continues to read as follows:

Authority: 21 U.S.C. 352, 360f, 360h, 360i, 371.

■ 7. Add § 895.102 to read as follows:

§ 895.102 Powdered surgeon's glove.

(a) *Identification.* A powdered surgeon's glove is a device intended to be worn on the hands of operating room personnel to protect a surgical wound from contamination. A powdered surgeon's glove incorporates powder for purposes other than manufacturing.

(b) [Reserved]

■ 8. Add § 895.103 to read as follows:

§ 895.103 Powdered patient examination glove.

(a) *Identification.* A powdered patient examination glove is a disposable device intended for medical purposes that is worn on the examiner's hand or finger to prevent contamination between patient and examiner. A powdered patient examination glove incorporates powder for purposes other than manufacturing.

(b) [Reserved]

■ 9. Add § 895.104 to read as follows:

§ 895.104 Absorbable powder for lubricating a surgeon's glove.

Absorbable powder for lubricating a surgeon's glove is a powder made from cornstarch that meets the specifications for absorbable powder in the United States Pharmacopeia (U.S.P.) and that is intended to be used to lubricate the surgeon's hand before putting on a surgeon's glove. The device is absorbable through biological degradation.

Dated: December 13, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Food and Drug Administration****21 CFR Part 880**

[Docket No. FDA–2015–N–0701]

General Hospital and Personal Use Devices: Renaming of Pediatric Hospital Bed Classification and Designation of Special Controls for Pediatric Medical Crib; Classification of Medical Bassinet

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to rename pediatric hospital beds as pediatric medical cribs and establish special controls for these devices. FDA is also establishing a separate classification regulation for medical bassinets, previously under the pediatric hospital bed classification regulation, as a class II (special controls) device. In addition, this rule continues to allow both devices to be exempt from premarket notification and use of the device in traditional health care settings and permits prescription use of pediatric medical cribs and bassinets outside of traditional health care settings.

DATES: This order is effective on January 18, 2017.

FOR FURTHER INFORMATION CONTACT:

I. Executive Summary**A. Purpose and Coverage of the Final Rule**

Pediatric medical cribs that meet the definition of a device in section 201(h) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 321(h)) (referred to as pediatric medical cribs or cribs intended for medical purposes) (product code FMS) are regulated by FDA and will have to comply with the special controls identified in this rule for pediatric medical cribs. Cribs that do not meet the device definition (referred

to as cribs for non-medical purposes) must meet the Consumer Product Safety Commission's (CPSC's) regulations and guidelines.

In the **Federal Register** of December 28, 2010 (75 FR 81766), the CPSC issued a final rule prohibiting the use of the drop-side rail design for non-medical cribs in consumer households as of June 28, 2011. CPSC's rule established new standards for full-size and non-full-size cribs intended for non-medical purposes, which effectively prohibited the manufacture or sale of cribs intended for non-medical purposes with a drop-side rail design in households, child care facilities, family child care homes, and places of public accommodation. This rule did not affect pediatric medical cribs regulated by FDA, which typically contain a drop-side rail design that includes movable and latchable side and end rails. Although drop-side cribs intended for non-medical purposes are now prohibited, there is still a need for pediatric medical cribs with drop-side rails inside and outside of traditional health care settings. Pediatric medical cribs with drop-side rails are extremely helpful for patient care in hospital settings and even outside of traditional health care settings, such as day care centers caring for infants and children with disabilities, because they allow parents and care givers easy access to children to perform routine and emergency medical procedures, including, but not limited to, cardiopulmonary resuscitation (CPR), blood collection, intravenous (IV) insertion, respiratory care, and skin care. These drop-side rail cribs also make it easier for hospital staff to facilitate safe patient transport and reduce the chance of care giver injury.

Over the last 5 years, FDA has received over 500 adverse event reports, or Medical Device Reports (MDRs), associated with open pediatric medical cribs, through the Agency's Manufacturer and User Facility Device Experience (MAUDE) database. There were adverse event reports of serious injuries, including reports of entrapment, which were predominantly entrapments of extremities (legs or arms). The majority of MDRs for medical cribs were for malfunctions such as drop-side rails not latching or lowering, brakes not holding, wheels or casters breaking, and where applicable, scales not reading correct weights. As a result of the risks to health and need for continued use of pediatric medical cribs in traditional health care settings and non-traditional settings, FDA is revising the identification for § 880.5140 (21 CFR 880.5140) to include only pediatric

medical cribs, establishing special controls for these devices, and changing the name of the classification regulation.

In addition, FDA has received adverse event reports from hospitals regarding incidents of medical bassinet tipping and improper cleaning of the basket or bed component that caused cracks and crazing, which have resulted in patient injury. Historically, medical bassinets have been regulated as pediatric hospital beds (§ 880.5140, product code NZG). As a result, this rule creates a separate regulation for medical bassinets and establishes special controls for this device type to provide a reasonable assurance of safety and effectiveness.

B. Summary of the Major Provisions of the Final Rule

In this final rule, FDA is amending the classification “pediatric hospital bed” in § 880.5140 to change the name of the classification regulation from “pediatric hospital bed” to “pediatric medical crib” and imposing special controls for pediatric medical cribs to provide a reasonable assurance of safety and effectiveness for these devices. This rule also creates a separate regulation, under § 880.5145, for medical bassinets and imposes special controls for this device type to provide a reasonable assurance of safety and effectiveness. In addition, use of pediatric medical cribs and medical bassinets outside of traditional health care settings will be limited to prescription use in accordance with § 801.109 (21 CFR 801.109). The Agency believes that the applicable special controls established and imposed by this final rule, together with the general controls, will provide reasonable assurance of the safety and effectiveness of these devices. Also, once this rule is effective, the Agency will move the following medical devices listed under § 880.5140 to classification regulations of other class II devices with similar intended uses and premarket notification requirements: Pediatric cribs with integrated air mattresses; youth beds; pediatric stretchers; and crib enclosure beds as identified in section II.C of this final rule.

C. Legal Authority

Pediatric medical cribs and medical bassinets are medical devices under section 201(h) of the FD&C Act. For devices, FDA has the authority under section 513(a)(1)(B) of the FD&C Act (21 U.S.C. 360c(a)(1)(B)) to issue a regulation to establish special controls for class II devices for which general controls by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish

special controls to provide such assurance. Under this authority, FDA is establishing special controls for the class II pediatric medical cribs and medical bassinets (§§ 880.5140 and 880.5145).

D. Costs and Benefits

This rule establishes special controls for medical bassinets and pediatric medical cribs, and permits use of these devices outside of traditional health care settings for prescription use only. This regulation will also change the name of the classification regulation for “pediatric hospital beds” to “pediatric medical cribs” and establish a separate classification regulation for medical bassinets as a class II device. The special control requirements set forth in this rule will clarify safety standards and minimize the risk of injury to pediatric patients, providing reasonable assurance of safety and effectiveness. The special control requirements that are definitely not currently practiced are the warning labeling requirements for both devices. The special controls will clarify for manufacturers the safety standards and help minimize the risk of injury to pediatric patients. The benefits of the new warning label are not readily quantifiable, but it is expected to reduce the risk of the bassinet from tipping or other user error and thus, reduce potential injury to pediatric patients. Additionally, the provision permitting prescription use of medical bassinets and pediatric medical cribs outside of traditional health care settings will benefit pediatric patients who require the specialized care provided by these devices. Costs estimated in this analysis include costs related to the new warning labeling requirements, the prescription use and performance testing for medical bassinets and pediatric medical cribs, as well as physical modification of pediatric cribs. The annual costs are \$2,379,400, and include the costs of the warning labels and prescription provision. The cost of performance testing is \$3,360 per unit and the cost of modifying a pediatric crib is \$1,125 per unit.

II. Background

The FD&C Act (21 U.S.C. 301 *et seq.*), as amended, establishes a comprehensive system for the regulation of medical devices intended for human use. Section 513 of the FD&C Act establishes three categories (classes) of devices, based on the regulatory controls needed to provide reasonable assurance of their safety and effectiveness. The three categories of devices are class I (general controls),

class II (special controls), and class III (premarket approval).

Most generic types of devices that were on the market before May 28, 1976, the date of the 1976 amendments (generally referred to as preamendments devices), have been classified by FDA through the issuance of regulations in accordance with the procedures set forth in section 513(c) and (d) of the FD&C Act into one of these three regulatory classes. Devices introduced into interstate commerce for the first time on or after May 28, 1976 (generally referred to as post-amendments devices), are automatically classified by section 513(f) of the FD&C Act into class III without any FDA rulemaking process. These devices remain in class III and require premarket approval, unless FDA initiates one of the following procedures: (1) FDA reclassifies the device into class I or II; (2) FDA issues an order classifying the device into class I or II in accordance with section 513(f)(2) of the FD&C Act; or (3) FDA issues an order finding the device to be substantially equivalent, under section 513(i) of the FD&C Act, to a predicate device that is already legally marketed. The Agency determines whether new devices are substantially equivalent to predicate devices through review of premarket notifications under section 510(k) of the FD&C Act (21 U.S.C. 360(k)). Section 510(k) of the FD&C Act and its implementing regulations, codified in title 21 of the Code of Federal Regulations (21 CFR) part 807, subpart E, require persons who intend to market a new device that does not require a premarket approval application under section 515 of the FD&C Act (21 U.S.C. 360e) to submit a premarket notification (510(k)) containing information that allows FDA to determine whether the new device is “substantially equivalent” within the meaning of section 513(i) of the FD&C Act to a legally marketed device that does not require premarket approval.

Section 513(a)(1)(B) of the FD&C Act defines class II devices as those devices for which the general controls in section 513(a)(1)(A) by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but for which there is sufficient information to establish special controls to provide such assurance, including the issuance of performance standards, postmarket surveillance, patient registries, development and dissemination of guidelines, recommendations, and any other appropriate actions the Agency deems necessary to provide such assurance (see also 21 CFR 860.3(c)(2)).

Section 510(m)(2) of the FD&C Act provides that FDA may exempt a class II device from the premarket notification requirements on its own initiative or upon petition of an interested person, if FDA determines that a 510(k) is not necessary to provide reasonable assurance of the safety and effectiveness of the device. Devices under the pediatric hospital bed classification regulation, including pediatric cribs and medical bassinets, were made exempt from premarket notification, subject to certain limitations, in accordance with section 510(m) of the FD&C Act (63 FR 59222 at 59229, November 3, 1998).

A. Need for the Regulation/History of This Rulemaking

Pediatric medical cribs are medical devices intended for the treatment, cure, or mitigation of diseases or illnesses of pediatric patients. Prior to the issuance of this final rule, a pediatric hospital bed was defined as “a device intended for medical purposes that consists of a bed or crib designed for the use of a pediatric patient, with fixed end rails and movable and latchable side rails. The contour of the bed surface may be adjustable.” FDA classified pediatric medical cribs in 1980 as pediatric hospital beds (§ 880.5140, product code FMS), class II devices (45 FR 69678 at 69695, October 21, 1980), and exempted them in 1998 from premarket notification (510(k)) under section 510(m) of the FD&C Act in the final rule (63 FR 59222 at 59229). Pediatric medical cribs with drop-side rails are extremely helpful for patient care in hospital settings and even outside of traditional health care settings, such as day care centers caring for infants and children with disabilities, because they allow parents and care givers easy access to children in order to perform routine and emergency medical procedures, including, but not limited to, CPR, blood collection, IV insertion, respiratory care, and skin care.

FDA published a proposed rule in the **Federal Register** of October 8, 2015 (80 FR 60809), proposing to (1) change the identification and name of § 880.5140, *Pediatric hospital bed* to *Pediatric medical crib*, and remove references to “beds” within the regulation, as appropriate, (2) establish special controls for pediatric medical cribs, (3) rearrange the devices within § 880.5140 so that it includes only pediatric medical cribs and move other devices that were within the prior hospital bed regulation to more appropriate classification regulations, and (4) create a separate regulation for medical

bassinets with special controls. This rule finalizes those proposals.

Pediatric medical cribs that meet the definition of a device in section 201(h) of the FD&C Act are regulated by FDA. Cribs that do not meet the definition of device must meet the CPSC’s regulations and guidelines. Because drop-side rail cribs for non-medical purposes and pediatric medical cribs are regulated by different agencies, CPSC consulted with FDA about the impact their final rule (75 FR 81766) could have on settings, such as nursery schools and day care centers, where pediatric medical cribs with drop-side rails are often used for pediatric patients after they have been discharged from a health care facility. In comparison to CPSC’s experience with drop-side rail cribs for non-medical purposes, FDA received fewer and less severe adverse event reports for pediatric medical cribs with the drop-side design. In addition, FDA determined that there is a need for continued access to pediatric medical cribs with drop-side rails inside and outside of traditional health care settings because of the utility of the drop-side design (Ref. 1). Based on the consultation with CPSC, FDA determined that it should establish special controls to provide reasonable assurance of the safety and effectiveness of pediatric medical cribs and permit continued use of these devices outside of traditional health care settings.

This rule also creates a separate classification regulation for medical bassinets, § 880.5145. Historically, medical bassinets have also been regulated as pediatric hospital beds (§ 880.5140, product code NZG). A medical bassinet is a non-powered device that consists of two components: (1) A basket, the sleep or bed component, which is typically made of plastic and (2) a frame with wheels, which holds the basket or bed component (FDA refers to this component as a “basket or bed component” interchangeably in this rule). The basket or bed component is a box-like structure, generally made of a clear, high-impact resistant plastic material, with an open top and four walls to keep the infant in place. Medical bassinets are typically used in hospital settings for infants up to 5 months in age. The beneficial features of medical bassinets are portability, ease of cleaning, and, when it is made of a clear material, the ability to see the infant from all sides.

Based on the risks to health identified in FDA’s proposed rule for pediatric medical cribs and bassinets, along with MDRs the Agency received from January 2005 to September 2015, FDA

determined that general controls alone are insufficient to provide a reasonable assurance of safety and effectiveness for these devices for their intended use. Thus, with this rule, FDA is imposing special controls on these devices, which along with general controls, will provide reasonable assurance of safety and effectiveness of these devices and will permit their continued use in traditional health care settings. FDA will also permit the use of pediatric medical cribs with drop-side rail designs and bassinets outside of traditional health care settings through prescription use only. The special controls are designed to address the adverse event reports for pediatric medical cribs and bassinets. For pediatric medical cribs, there were adverse event reports of serious injuries including reports of entrapment, which were predominantly extremity entrapments of legs or arms. The majority of these reports were for malfunctions such as drop-side rails not latching or lowering, brakes not holding, wheels or casters breaking, and where applicable, scales not reading correct weights. For medical bassinets, hospitals have reported to FDA incidents of tipping and improper cleaning of the basket or bed component that caused cracks and crazing, which have resulted in patient injury.

B. Summary of Comments to the Proposed Rule

FDA requested comments on the proposed rule (80 FR 60809), and the comment period closed on December 7, 2015. The Agency received 11 comments on the proposed rule by the close of the comment period; some of the comments contained comments on more than one issue. We received comments from a cross-section of consumers, device manufacturers, and professional and trade associations. All of the comments supported the changes identified in the proposed rule in whole or in part; however, some comments suggested changes to the proposed special controls or requested clarification of matters discussed in the proposed rule. See section IV for the description of comments on the proposed rule and FDA’s responses.

C. General Overview of Final Rule

FDA is amending the classification pediatric hospital bed in § 880.5140 to change the name of the classification regulation from “pediatric hospital bed” to “pediatric medical crib” and to establish special controls for pediatric medical cribs to provide a reasonable assurance of safety and effectiveness. This rule also creates a separate regulation, under § 880.5145, for

medical bassinets and establishes special controls for this device type to provide a reasonable assurance of safety and effectiveness. In addition, use of pediatric medical cribs and medical bassinets outside of traditional health care settings will be limited to prescription use in accordance with § 801.109. The Agency believes that the applicable special controls, together with the general controls, will provide reasonable assurance of the safety and effectiveness of these devices.

Devices that do not meet the final identification under § 880.5140 for

“pediatric medical crib” will be administratively moved to more appropriate class II regulations for devices with more similar intended uses that are also class II, 510(k) exempt, and will not be located under the final pediatric medical crib classification regulation. Shortly after the effective date of this final rule, FDA will send manufacturers of the remaining pediatric hospital beds notices identifying the new classification regulation and product code under which the device will be classified. These devices include: Open pediatric

medical cribs, medical bassinets, pediatric cribs with integrated air mattresses, youth beds, pediatric stretchers, and crib enclosure beds. A more complete list of the devices from § 880.5140 and to where they are being moved is provided in table 1.

This action will not have any substantive effect on the current marketing status of the devices. However, manufacturers of these devices will need to refer to the new regulation classification and product code provided by the Agency in future interactions with FDA.

TABLE 1—MEDICAL DEVICES REMOVED FROM § 880.5140

New CFR regulation	Classification name	Device class
21 CFR 890.5170	Pediatric cribs with integrated air mattresses	II
21 CFR 880.5100 or 21 CFR 880.5120 (depending on whether they are powered).	Youth Beds	II
21 CFR 880.6910	Pediatric Stretchers	II
21 CFR 880.6760	Crib Enclosure Beds	II

III. Legal Authority

Pediatric medical cribs and medical bassinets are defined as medical devices under section 201(h) of the FD&C Act. For devices, FDA has the authority under section 513(a)(1)(B) of the FD&C Act to issue a regulation to establish special controls for class II devices for which general controls by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide such assurance. Under this authority, FDA is establishing special controls for the class II pediatric medical cribs and bassinets (§§ 880.5140 and 880.5145).

IV. Comments on the Proposed Rule and FDA’s Responses

A. Introduction

In response to the proposed rule (80 FR 60809) to revise § 880.5140 to specify that it will only be for regulation of pediatric medical cribs, with proposed special controls and to create a separate regulation for medical bassinets, also with proposed special controls, FDA received 11 comments to Docket No. FDA–2015–N–0701. The comments and FDA’s responses to the comments are summarized in this document. Certain comments are grouped together under a single number because the subject matter of the comments is similar. The number assigned to each comment is purely for organizational purposes and does not signify the comment’s value or importance or the order in which it was submitted.

B. Specific Comments and FDA Response

(Comment 1) Multiple comments made recommendations that we revise the requirements for medical bassinet warning labels. One comment suggested that the warning label be affixed in a prominent location; another comment recommended that the warning label be required to be permanently affixed on all sides of the bassinet. One comment also recommended that the special control require 9 point font for visibility.

(Response 1) FDA believes that a warning label for medical bassinets should be readable, prominent, and in the same location on each device. While the proposed rule required the warning label to be placed on the bassinet cabinet, FDA has determined that some medical bassinets do not include a “cabinet,” but all of the devices do have a plastic basket or bed component. As a result, FDA has revised the special control requiring a warning label to specify that the label will need to be affixed to at least two sides of the plastic basket or bed component of the bassinet with the language in text of at least 9 millimeters in height.

(Comment 2) FDA received a comment requesting that FDA require warning labels for pediatric medical cribs.

(Response 2) Based on the adverse event reports received on pediatric medical cribs, FDA agrees that a warning label is warranted for pediatric medical cribs. These devices have a number of moving parts that can present a risk of head and limb entrapment,

crushing, pinching, and lacerations to a pediatric patient. FDA has therefore revised the special controls for pediatric medical cribs to include a labeling requirement that mandates that a warning label be affixed to the medical crib that states that pediatric patients must be attended at all times whenever a movable side of the crib is in its lowest, or most open, position when accessing the child. This will serve as a mitigation for the risks of physical harm, such as falling out of the crib and possible pinching or lacerations to pediatric patients and help provide a reasonable assurance of safety and effectiveness of the device.

(Comment 3) Multiple comments requested clarification of the scope of the rule and the applicability of the special controls. One comment requested that the special controls identified in this rule apply to devices that have already been sold in interstate commerce.

(Response 3) After the effective date of this rule, manufacturers of pediatric medical cribs or medical bassinets, whether or not they have been legally marketed prior to January 18, 2017, must comply with the special controls identified in this rule to provide a reasonable assurance of safety and effectiveness of these devices. However, FDA does not intend to enforce the special controls for devices legally marketed prior to this date due to the logistical issues associated with requiring manufacturers to locate devices that have been sold.

(Comment 4) One comment suggested that we provide educational material for

users of prescription medical pediatric cribs in non-traditional health care settings that address use errors.

(Response 4) The FD&C Act and its implementing regulations require all devices to be accompanied by adequate instructions for use (see section 502(f) of the FD&C Act (21 U.S.C. 352(f)) and § 801.5). In addition, the special controls identified in this rule include a requirement for “adequate instructions for users to care for, maintain, and clean the crib” and for warning labels alerting users to risks associated with crib use. The Agency believes these requirements sufficiently address the commenter’s concern regarding use error.

(Comment 5) One comment stated that this rule should not affect contractors or business owners who provide a unique service or product.

(Response 5) To the extent the unique product referred to in the comment is a pediatric medical crib or medical bassinet that meets the definition of a custom device in section 520(b) of the FD&C Act (21 U.S.C. 360j(b)), these devices are exempt from, among other things, premarket approval requirements and conformance to mandatory performance standards (sections 514 and 515 of the FD&C Act (21 U.S.C. 360d and 360e)). However, the definition of custom device is narrow and requires a fact specific analysis. FDA expects that few “unique” pediatric medical cribs or bassinets will qualify as custom devices. FDA notes that patient-specific or patient-matched devices—those that have ranges of different specifications on one general design—are not generally regarded as custom devices. Manufacturers should see FDA’s “Custom Device Exemption” guidance document for more information (Ref. 2). It is important that this rule apply to all pediatric medical cribs and bassinets that do not meet the custom device exemption to provide the broadest protection to users.

(Comment 6) One comment requested that we expand the device identification for pediatric medical cribs to include specialty cribs that allow parents who are disabled to access their children.

(Response 6) This rule establishes an identification and special controls specific to pediatric medical cribs intended for medical purposes and use with a pediatric patient. FDA developed the special controls only after considering the manufacture, use, and risks to health specific to these cribs. The special controls were not developed with other cribs, such as the specialty cribs described in the comment, in mind. As a result, FDA disagrees with including specialty cribs used by

disabled parents for access to their children under this regulation classification.

(Comment 7) One comment requested that FDA make the following changes to the proposed rule regarding pediatric medical crib dimensions: (1) Citing FDA’s reference of ASTM F1169–13 (formerly the American Society for Testing and Materials), section 5.7.2.1, in relation to rail height requirement, the commenter stated that, “Based on user need we believe that this reference should be removed to allow for full access to the patient without interference from the siderail [sic] in the lowest height position.” The commenter stated that they believe dimensions should be determined through the design process and should balance risks and benefits. (2) The proposed rule suggested that “no gap shall exist between the edge of the bottom rail and the top of the mattress surface,” based on ASTM F1169–13. The commenter proposed instead that, based on International Electrotechnical Commission (IEC) 60601–2–52, a maximum gap of $2\frac{3}{8}$ inches be allowed. The commenter stated that a requirement for “no gap” would be practically difficult to design. (3) The commenter also pointed out that the proposed requirement for the height of the side rail is inconsistent with the requirement provided by ASTM F1169–13, section 5.7.2.2, and recommended harmonization with ASTM F1169–13.

(Response 7) FDA agrees that clarification of dimensional requirements is needed for the special controls to mitigate entrapment, pinching, lacerations, and other risks associated with pediatric medical cribs. The Agency responds to the previous comments as follows: (1) Given the many potential differences in crib designs, including different mattress heights, a specific requirement for the height of a pediatric medical crib’s side rail at the lowest position is unnecessary and may not mitigate the risk of falls as effectively in all designs. As a result, FDA has removed the specific height requirement when side rails are in their lowest position, but revised the height requirement when the rail is in the highest position (as described as follows in this response). Also, FDA has added a requirement for a warning label that states that pediatric patients should be attended to whenever a rail is in its lowest, or most open, position, regardless of design, to monitor and mitigate the risk of the patient falling out of the medical crib.

(2) FDA agrees that it may be difficult to design for “no gap”; however, the Agency does not agree that $2\frac{3}{8}$ inches

is an appropriate maximum dimension, as this may leave room for entrapment or impingement. FDA has revised the special controls to eliminate the requirement for “no gap,” but is retaining the requirement that crib mattresses must fit tightly around all four sides of the crib, such that the occurrence of entrapment and impingement is prevented.

(3) FDA agrees that the proposed requirement height of 20 inches was incorrect because the measurement failed to include the CPSC standard as required in CPSC’s guidance entitled “Full-Size Baby Crib Business Guidance” for a pediatric medical crib mattress that requires the height measurement for the mattress to be 6 inches thick (Ref. 3). As a result, FDA is revising the special control requirement to be consistent with that standard. The height of the rail and end panel as measured from the top of the rail or panel in its highest position to the top of the mattress support in its lowest position shall be at least 26 inches (66 centimeters). The mattress will also be required to not exceed 6 inches in thickness. This requirement is to ensure that high mattresses do not create a hazard by reducing the rail height.

(Comment 8) One comment opposed the proposed rule because it did not require any safety testing data be reviewed by FDA. According to the commenter, testing was especially important given the lack of scientific evidence that drop-side rail cribs provide important benefits in hospital settings.

(Response 8) Section 510(m)(2) of the FD&C Act permits FDA to exempt a class II device from the premarket notification requirements on its own initiative or upon petition of an interested person, if FDA determines that a 510(k) is not necessary to provide reasonable assurance of the safety and effectiveness of the device. Pediatric medical cribs have been exempt from premarket notification since 1998 and they have been essential to the provision of efficient medical care to pediatric patients since they entered the market. FDA reviewed the MedSun Survey (Ref. 1) and analyzed the MDRs submitted to the MAUDE database for medical cribs to identify the relevant risks to health associated with these devices (section IV of the proposed rule) and determined that, based on these risks, the number of MDRs received, and FDA’s experience with these devices, there is sufficient information available to establish special controls that in combination with the general controls will provide a reasonable assurance of

safety and effectiveness by mitigating the risks to health associated with these devices (section VI of the proposed rule) without the need to reinstate the requirement for 510(k) review. The special controls require manufacturers to perform appropriate testing to demonstrate the mechanical and structural stability of their pediatric medical cribs, among other things. As a result, FDA does not agree that it needs to review the testing data through review of a manufacturer's premarket notification (510(k)) to provide reasonable assurance of the safety and effectiveness.

(Comment 9) One comment suggested that FDA make the effective date 120 days after the publication of this rule to allow manufacturers of devices legally on the market to have time to conduct gap analysis, plan for design changes, and comply with other special controls.

(Response 9) FDA does not intend to extend the effective date to 120 days for the established special controls in this rule for both pediatric medical cribs and bassinets because many of the special controls in this rule are consistent with current industry practice among many manufacturers of products currently on the market. As stated earlier, due to the CPSC rule prohibiting the use of cribs with a drop-side rail design for non-medical purposes, FDA believes it is necessary to allow consumers to use pediatric medical cribs and bassinets in non-traditional health care facilities as soon as possible if they are prescribed by a health care professional. As a result, FDA has decided to change the effective date from the proposed 60 days stated in the proposed rule to now being 30 days after its publication in the **Federal Register** as stated in this final rule to provide a reasonable assurance of safety and effectiveness of these devices.

Also, FDA is unaware of a possible shortage of devices entering the market due to manufacturers having to comply with the new special controls; however, FDA does not intend to enforce compliance with the special controls for manufacturers of new devices until they have been brought onto the market.

C. Clarifying Changes to the Rule

In addition to the revisions made to the special controls for pediatric medical cribs and bassinets based on the comments submitted for the proposed rule, FDA is making additional clarifying changes to the special controls. FDA has determined that CPSC's Standard for the Flammability of Mattresses and Mattress Pads (FF 4-72, Amended) and Standard for the Flammability (Open Flame) of Mattress

Sets (16 CFR parts 1632 and 1633) are inapplicable to medical bassinets because the mattresses for medical bassinets do not meet the measurements required for CPSC's mattress flammability standards. FDA is therefore removing this special control.

In addition, FDA has revised the labeling special control for both medical cribs and medical bassinets to include adequate instructions for cleaning of the device. The labeling for adequate maintenance of a bassinet should include the use of proper cleaning materials to allow safe and continuous use of these devices for both pediatric patients and personnel in traditional health care settings.

FDA believes that the special controls, listed in the revised regulations § 880.5140 and new regulation § 880.5145, in combination with the general controls, will provide a reasonable assurance of safety and effectiveness for pediatric medical cribs and medical bassinets for their intended use.

V. Effective/Compliance Dates

This final rule will become effective 30 days after its publication in the **Federal Register**.

VI. Economic Analysis of Impacts

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601-612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the final rule. We believe that this final rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because the expected costs associated with this rule are expected to be modest, we certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing "any

rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year." The current threshold after adjustment for inflation is \$146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. This final rule would not result in an expenditure in any year that meets or exceeds this amount.

This rule establishes special controls for medical bassinets and pediatric medical cribs, and permits prescription use of these devices outside of traditional health care settings. This regulation will also change the name of the classification regulation for "pediatric hospital beds" to "pediatric medical cribs" and establish a separate classification regulation for medical bassinets as a class II device. The special control requirements set forth in this rule will clarify safety standards to help minimize the risk of injury to pediatric patients posed by these devices. Additionally, permitting use of pediatric medical cribs by prescription outside of traditional health care settings will benefit pediatric patients who require the specialized care provided by these devices. Costs estimated in this analysis include costs related to the new warning labeling requirements, the prescription and performance testing for medical bassinets and pediatric medical cribs, along with physical modification of pediatric medical crib design. The annual costs are \$2,379,400, and include the costs of the warning labels and prescription provision. The cost of performance testing is \$3,360 per unit and the cost of modifying a pediatric crib is \$1,125 per unit.

The full discussion of economic impacts is available in Docket No. FDA-2015-N-0701 and at <http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm> (Ref. 4).

VII. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Paperwork Reduction Act of 1995

The final rule refers to previously approved collections of information found in FDA regulations. These collections of information are subject to

review by the Office of Management and Budget (OMB) and the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information regarding premarket notification submissions (part 807, subpart E), are approved under OMB control number 0910–0120. The collections of information regarding labeling (21 CFR part 801), including prescription device labeling and adequate directions for use, are approved under OMB control number 0910–0485. The collections of information regarding current good manufacturing practice quality systems (21 CFR part 820), including design controls (as referenced in §§ 880.5140(b)(1) and 880.5145(b)(1) and (3) of this document), are approved under OMB control number 0910–0073. The collections of information in 16 CFR parts 1632 and 1633, regarding mattress flammability, are approved under OMB control number 3041–0014.

In addition, FDA concludes that the warning labels for pediatric medical cribs and medical bassinets are not subject to review by OMB because they do not constitute a “collection of information” under the PRA. Rather, the labeling statements are “public disclosure(s) of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public” (5 CFR 1320.3(c)(2)).

IX. Federalism

FDA has analyzed this final rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the rule does not contain policies that would have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, the Agency has concluded that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

List of Subjects in 21 CFR Part 880

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 880 is amended as follows:

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

- 1. The authority citation for part 880 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 371.

- 2. Revise § 880.5140 to read as follows:

§ 880.5140 Pediatric medical crib.

(a) *Identification.* A pediatric medical crib is a prescription device intended for medical purposes for use with a pediatric patient that consists of an open crib, fixed end rails, movable and latchable side rail components, and possibly an accompanying mattress. The contour of the crib surface may be adjustable.

(b) *Classification.* Class II (special controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to § 880.9. The special controls for this device are:

- (1) Crib design and performance testing shall demonstrate the

mechanical and structural stability of the crib under expected conditions of use, including the security of latches and other locking mechanisms when engaged;

- (2) Materials used shall be appropriate for the conditions of use, allow for proper sanitation, and be free from surface defects that could result in injuries;

- (3) The height of the rail and end panel as measured from the top of the rail or panel in its highest position to the top of the mattress support in its lowest position shall be at least 26 inches (66 centimeters). Any mattress used in this crib must not exceed a thickness of 6 inches;

- (4) Hardware and fasteners shall be designed and constructed to eliminate mechanical hazards to the patient;

- (5) The distance between components of the side rail (*i.e.*, slats, spindles, and corner posts) shall not be greater than $2\frac{3}{8}$ inches (6 centimeters) apart at any point;

- (6) The mattress must fit tightly around all four sides of the crib base, such that entrapment or impingement of occupant is prevented;

- (7) The mattress for the crib shall meet the Consumer Product Safety Commission (CPSC) Standard for the flammability of mattresses and mattress pads (FF 4–72, amended) and Standard for the flammability (open flame) of mattress sets, 16 CFR parts 1632 and 1633, respectively; and

- (8) Each device must have the following label(s) affixed:

- (i) Adequate instructions for users to care for, maintain, and clean the crib; and

- (ii) A warning label on at least two sides of the medical crib with the following language in text of at least 9 millimeters in height:

WARNING: Never leave a child unsupervised when the moveable side is open or not secured.

- 3. Add § 880.5145 to subpart F to read as follows:

§ 880.5145 Medical bassinet.

(a) *Identification.* A medical bassinet is a prescription device that is a small bed intended for use with pediatric patients, generally from birth to approximately 5 months of age. It is intended for medical purposes for use in a nursery, labor and delivery unit, or patient room, but may also be used outside of traditional health care settings. A medical bassinet is a non-powered device that consists of two components: The plastic basket or bed component and a durable frame with wheels, which holds the basket or bed

component. The basket or bed component is a box-like structure, generally made of a clear, high impact-resistant plastic material, with an open top and four stationary walls to hold the pediatric patient. The frame can include drawers, shelving, or cabinetry that provides space to hold infant care items. The wheels or casters allow the bassinet to transport the infant throughout the care setting.

(b) *Classification.* Class II (special controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to § 880.9. The special controls for this device are:

(1) The manufacturer must conduct performance testing to determine material compatibility with cleansing products labeled to clean the device. Testing must demonstrate that the cleaning instructions provided by the manufacturer do not cause crazing, cracking, or deterioration of the device;

(2) Manufacturers shall conduct performance testing to ensure the mechanical and structural stability of the bassinet under expected conditions of use, including transport of patients in the bassinet. Testing must demonstrate that failures such as wheel or caster breakage do not occur and that the device does not present a tipping hazard due to any mechanical failures under expected conditions of use; and

(3) Each device must have the following label(s) affixed:

(i) Adequate instructions for users to care for, maintain, and clean the bassinet; and

(ii) A warning label on at least two sides of the plastic basket or bed component with the following language in text of at least 9 millimeters in height:

WARNING: To avoid tipping hazards of this device, make sure that the basket or bed component sits firmly in the base and that all doors, drawers, and casters are secure.

Dated: December 12, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9805]

RIN 1545–BN18

Guidance Under Section 355(e) Regarding Predecessors, Successors, and Limitation on Gain Recognition; Guidance Under Section 355(f)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that provide guidance regarding the distribution by a distributing corporation of stock or securities of a controlled corporation without the recognition of income, gain, or loss. The temporary regulations provide guidance in determining whether a corporation is a predecessor or successor of a distributing or controlled corporation for purposes of the exception under section 355(e) of the Internal Revenue Code (Code) to the nonrecognition treatment afforded qualifying distributions, and they provide certain limitations on the recognition of gain in certain cases involving a predecessor of a distributing corporation. The temporary regulations also provide rules regarding the extent to which section 355(f) of the Code causes a distributing corporation (and in certain cases its shareholders) to recognize income or gain on the distribution of stock or securities of a controlled corporation. These temporary regulations affect corporations that distribute the stock or securities of controlled corporations and the shareholders or security holders of those distributing corporations. The text of these temporary regulations also serves as the text of the proposed regulations in the related notice of proposed rulemaking (REG–140328–15) set forth in the Proposed Rules section in this issue of the **Federal Register**.

DATES: *Effective date:* These temporary regulations are effective on December 19, 2016.

Applicability date: For dates of applicability see § 1.355–8T(i) and (j).

FOR FURTHER INFORMATION CONTACT: Richard K. Passales, (202) 317–5024 or Marie C. Milnes-Vasquez, (202) 317–7700 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background and Explanation of Provisions

1. Overview

On November 22, 2004, the Department of the Treasury (Treasury Department) and the IRS published in the **Federal Register** (69 FR 67873) a notice of proposed rulemaking (REG–145535–02) containing proposed regulations under section 355(e)(4)(D) of the Code (the proposed regulations). After considering the comments received on the proposed regulations and taking into account subsequently issued guidance as described in part 3. of this preamble, the Treasury Department and the IRS are issuing temporary regulations that adopt the proposed regulations with significant modifications based on the comments received on the proposed regulations. The temporary regulations also serve as the text of new proposed regulations in the related notice of proposed rulemaking (REG–140328–15) published in the Proposed Rules section in this issue of the **Federal Register**.

The temporary regulations amend 26 CFR part 1 under section 355 to provide necessary guidance under section 355(e)(4)(D) regarding the identity of predecessor and successor corporations of distributing and controlled corporations and to enable taxpayers to utilize the benefit of certain gain limitation rules. The temporary regulations also provide guidance regarding the extent to which section 355(f) precludes the application of section 355 to certain distributions and exchanges between members of an affiliated group. Finally, the regulations provide guidance regarding the application of section 336(e) to certain distributions of controlled stock to which section 355(e) applies.

A. Section 355 in General

Section 355(a) generally provides that if a distributing corporation (Distributing) distributes stock or securities of a controlled corporation (Controlled) to Distributing's shareholders or security holders and certain requirements are met, then no gain or loss is recognized by (and no amount is includible in the income of) Distributing's shareholders or security holders upon their receipt of the Controlled stock. Section 355(c) generally provides that Distributing does not recognize gain or loss on any distribution of qualified property to which section 355 (or so much of section 356 as relates to section 355) applies. Similar rules under section 361(c) apply in the case of a divisive reorganization under section

368(a)(1)(D) (a divisive D reorganization). Controlled stock or securities are qualified property under section 355(c)(2)(B) (or section 361(c)(2)(B)(ii) in the case of a divisive D reorganization), unless certain exceptions apply.

B. Sections 355(e) and (f)

One exception to treating Controlled stock or securities as qualified property is provided under section 355(e), which was enacted as part of the Taxpayer Relief Act of 1997, Public Law 105–34, section 1012(a), 111 Stat. 788. Under section 355(e), stock or securities of Controlled generally will not be treated as qualified property under sections 355(c)(2) or 361(c)(2) if the stock or securities are distributed as part of a plan or series of related transactions (a *Plan*) pursuant to which one or more persons acquire directly or indirectly stock representing a 50-percent or greater interest in the stock of Distributing or Controlled (a Planned 50-percent Acquisition). Section 1.355–7 of the Income Tax Regulations provides additional guidance on the meaning of a Plan.

Under section 355(e)(2)(C), the existence of a purported Plan that includes a Planned 50-percent Acquisition will not prevent Controlled stock or securities from being treated as qualified property for purposes of section 355(c)(2) or section 361(c)(2) if, immediately after the completion of such Plan, Distributing and each Controlled are members of a single affiliated group, as defined in section 1504 without regard to section 1504(b) (an Expanded Affiliated Group or EAG). As a result, section 355(e) generally does not apply to a distribution between members of the same EAG unless the distribution precedes a distribution of Controlled stock or securities outside of the EAG (an External Distribution) so that Controlled and Distributing are not members of the same EAG after completion of the Plan.

Section 355(f) provides a special rule that applies to certain distributions between certain related corporations that do not qualify for the exception from section 355(e) under section 355(e)(2)(C). In particular, section 355(f) provides that, except as provided in regulations, section 355 (or so much of section 356 as relates to section 355) does not apply to the distribution of stock from one member of an affiliated group (as defined in section 1504(a)) to another member of the group if the distribution is part of a Plan that includes a Planned 50-percent Acquisition and is not described in section 355(e)(2)(C). For example,

assume that a Planned 50-percent Acquisition of stock of a corporation (a Higher-Tier Distributing) that is the common parent of an affiliated group, as defined in section 1504(a), occurs when the Higher-Tier Distributing owns all of the stock of a subsidiary member (a Lower-Tier Distributing), which in turn owns all of the stock of Controlled (also a member of the affiliated group). Under the Plan, the Lower-Tier Distributing distributes Controlled stock to the Higher-Tier Distributing (an Internal Distribution), and the Higher-Tier Distributing then distributes the Controlled stock in an External Distribution. Under these facts, section 355(e) would apply to the Internal Distribution of all of Controlled's stock by the Lower-Tier Distributing to the Higher-Tier Distributing because the distribution is part of a Plan (after application of any exceptions to section 355(e), including section 355(e)(2)(C)). However, section 355(f) provides that section 355 (or so much of section 356 as applies to section 355) would not apply to such an Internal Distribution. Therefore, the Internal Distribution would be taxable to the Lower-Tier Distributing under section 311 and to the Higher-Tier Distributing under section 301 (subject to any available dividends received deduction and section 1059) or subject to the special rules of § 1.1502–13(f) for distributions between members of the same consolidated group.

Without the application of section 355(f), the Lower-Tier Distributing would recognize any gain in the Controlled stock by reason of section 355(e) (section 355(e) gain) in the Internal Distribution, but the Higher-Tier Distributing would be afforded nonrecognition treatment under section 355(a) on the receipt of Controlled stock. As a result, the Higher-Tier Distributing would not take a fair market value basis in the Controlled stock under section 301(d), but a basis determined under section 358(g), despite the Lower-Tier Distributing's recognition of section 355(e) gain. The Higher-Tier Distributing would also likely recognize additional section 355(e) gain on the subsequent External Distribution of the Controlled stock. Section 355(f) is intended to provide a benefit to such an affiliated group by effectively ensuring that the group recognizes section 355(e) gain only once at the lowest-tier Distributing, rather than at multiple levels. In addition, application of section 355(f) may eliminate duplicated loss, in some cases.

Section 355(e)(3)(B) provides that, if the assets of Distributing or any

Controlled are acquired by a successor corporation in a reorganization under section 368(a)(1)(A), (C), or (D), or any other transaction specified in regulations by the Secretary, the shareholders (immediately before the acquisition) of the corporation acquiring such assets are treated as acquiring stock in the corporation from which the assets were acquired.

Section 355(e)(4)(D) provides that, for purposes of section 355(e), any reference to Controlled or Distributing includes a reference to any predecessor or successor of such corporation. As a result, Controlled stock or securities generally will not be treated as qualified property under section 355(c)(2) or 361(c)(2) if there is a Planned 50-percent Acquisition of the stock of a predecessor or successor of Distributing or Controlled.

2. Summary of Proposed Regulations

Section 355(e) does not provide a definition of a predecessor or successor of Distributing or Controlled. The proposed regulations generally defined the terms *predecessor* and *successor* for purposes of section 355(e) and provided guidance regarding the acquisition or deemed acquisition of the stock of predecessors of Distributing and certain other acquisitions. As more fully described in part 2.E. of this preamble, the proposed regulations also limited Distributing's recognition of gain in two cases and provided an overall gain limitation. Parts 2.A. through 2.F. of this preamble describe the proposed regulations, which the temporary regulations largely adopt with the modifications described in part 3. of this preamble.

A. Predecessor of Distributing

The preamble to the proposed regulations stated that the definition of a *Predecessor of Distributing* (a POD) in those regulations was intended to reflect the fact that section 355(e) generally denies tax-free treatment under sections 355(c)(1) and 361(c)(1) if there is a division of Distributing's assets to which section 355(a) applies that is coupled with a Planned 50-percent Acquisition of Distributing or Controlled. The proposed regulations attempted to provide a similar result in cases in which the ownership of a POD's assets (rather than those of Distributing) would otherwise be divided tax-free as part of a Plan that included a Planned 50-percent Acquisition of a POD or Distributing.

The proposed regulations generally defined a POD as a corporation that transferred its property in a transaction to which section 381(a) applies (section

381 transaction) to Distributing (a combining transfer) but only if Distributing then transferred some, but not all, of the property acquired in the combining transfer to Controlled in a transferred basis transaction before the distribution (a separating transfer). The definition was slightly different if Controlled stock was an asset transferred in the combining transfer. In addition, under the proposed regulations, no corporation could have been a predecessor of a POD.

In addition, the proposed regulations provided three operating rules relating to the determination of predecessor status. The first was a substitute asset rule that prevented a corporation from avoiding treatment as a POD simply because property received by Distributing in a combining transfer (or by Controlled in a separating transfer) was transferred by Distributing before the separating transfer (or by Controlled before the distribution) in exchange for other property in a nonrecognition transaction. The second rule provided that the transferor corporation and resulting corporation in a reorganization under section 368(a)(1)(F) (an F reorganization) would be treated as the same entity for purposes of determining whether a corporation is a POD or a *Predecessor of Controlled* (POC), as described in part 2.B. of this preamble. Without such a rule, a corporation could circumvent the proposed regulations by engaging in an F reorganization, because the proposed regulations did not take into account predecessors of a POD or POC. The third rule provided that there may be more than one POD, for example, if multiple corporations merged directly with and into Distributing in distinct transactions to which section 381 applied.

Under the proposed regulations, the definition of a POD was not tied to the existence of a Plan. Accordingly, a combining transfer and a separating transfer would be taken into account in identifying a POD even if neither transfer was part of a Plan; as a result, taxpayers would have been required to track the assets of any potential POD for an unlimited period prior to the distribution. In addition, once a POD had been identified, it would have been necessary to determine whether the distribution and any acquisitions (deemed or actual) of stock of the POD were part of a Plan, although the proposed regulations included no guidance relating to whether acquisitions of the stock of a POD and the distribution were part of a Plan.

B. Predecessor of Controlled

The proposed regulations defined a POC as a corporation that transferred its assets to Controlled in a section 381 transaction before the distribution. However, whether a corporation was a POC was only taken into account for very limited purposes: (1) The definition of a POD, (2) the gain limitation rules described in part 2.E. of this preamble, and (3) the application of section 355(e)(2)(C), which is described in part 2.F. of this preamble. Other than for those limited purposes, a corporation would not be a POC under the proposed regulations. Further, no corporation could have been a predecessor of a POC.

C. Successor of Distributing and Controlled

The proposed regulations defined a *Successor* of Distributing or Controlled as a corporation to which Distributing or Controlled, respectively, transferred its assets in a section 381 transaction after the distribution (a *Successor Transaction*). If, after the distribution, Distributing transferred its assets to a Successor in a *Successor Transaction*, the proposed regulations provided that the shareholders of the Successor immediately before the transaction would be deemed to acquire Distributing stock (and stock of any POD) in the Successor Transaction. Subsequent acquisitions of stock of the Successor would be treated as acquisitions of Distributing (and any PODs).

D. Special Rules for Measuring Acquisitions

Under the proposed regulations, the determination of whether there was a Planned 50-percent Acquisition was made separately with respect to Distributing and the POD. Therefore, Distributing may have been required to recognize section 355(e) gain if there was a Planned 50-percent Acquisition of a POD, but not of Distributing, and vice versa.

The proposed regulations provided special rules to determine whether there had been an acquisition of the stock of a POD in connection with and after a combining transfer from a POD to Distributing. Consistent with section 355(e)(3)(B), the proposed regulations provided that each person that owned an interest in Distributing immediately before the combining transfer would be treated as acquiring stock of the POD in the transaction. For example, if Distributing acquired the assets of a POD in a statutory merger qualifying as a reorganization under section

368(a)(1)(A) (an A reorganization), and individual A owned stock of Distributing immediately before the merger, A would be treated as acquiring stock of the POD in the transaction. In addition, an acquisition of Distributing that occurred after Distributing's combination with a POD would be treated not only as an acquisition of Distributing, but also as an acquisition of the POD. For example, if Distributing acquired the assets of a POD in a statutory merger qualifying as an A reorganization and, after the merger, individual B acquired stock of Distributing, B would be treated as acquiring not only stock of Distributing, but also stock of the POD. Similar rules applied with respect to Controlled except that there was no provision for a deemed acquisition of the stock of a POC because such acquisitions were of no consequence under the proposed regulations.

In addition, the proposed regulations provided that acquisitions of the stock of a corporation and its Successors would be combined to determine whether there had been a Planned 50-percent Acquisition of the corporation. For example, planned acquisitions of the stock of a POD, Distributing, and Distributing's Successors would be combined to determine whether there had been a Planned 50-percent Acquisition of the POD. Similarly, planned acquisitions of the stock of Distributing and its Successors would be combined to determine whether there had been a Planned 50-percent Acquisition of Distributing. In addition, planned acquisitions of the stock of Controlled and its Successors would be combined to determine whether there had been a Planned 50-percent Acquisition of Controlled.

E. Limitations on Gain Recognition

Generally, if there is a Planned 50-percent Acquisition of Distributing (or a POD), Controlled, or their Successors, then section 355(e) requires Distributing to recognize the full amount of the built-in gain in the Controlled stock on the date of the distribution under section 355(c)(2) or section 361(c)(2), as applicable. The proposed regulations provided two gain limitation rules limiting the amount of gain that Distributing must recognize in certain cases in which there was a POD and a third gain limitation rule providing an overall limitation on Distributing's gain.

The first gain limitation rule applied when there was a Planned 50-percent Acquisition of one or more PODs. In those cases, the calculation of the section 355(e) gain focused on assets of the POD(s) that were transferred to

Controlled and any Controlled stock transferred by the POD(s) to Distributing. Specifically, the proposed regulations limited the section 355(e) gain recognized by Distributing to the amount of gain, if any, that any PODs would have recognized if, immediately before the distribution each POD had (1) transferred the property that was transferred to Controlled (and any stock of Controlled that the POD transferred to Distributing) to a newly-formed, wholly-owned corporation solely for stock of such corporation in an exchange to which section 351 applied (section 351 exchange), and (2) then sold the stock of that corporation to an unrelated person in exchange for cash equal to its fair market value. In applying this first gain limitation rule, the proposed regulations provided four operating rules. The first operating rule was a substitute asset rule (similar to that described in part 2.A. of this preamble) that applied if property received by Distributing in a combining transfer had been exchanged tax-free. In such case, the property Distributing received in the exchange would be treated as property received in the combining transfer. The second operating rule provided that (other than Controlled stock) the only property taken into account for purposes of the first gain limitation rule would be property that was transferred to Controlled in the separating transfer (or a substitute asset received in a tax-free exchange for property received in the separating transfer) and held by Controlled at the time of the distribution. Under the third operating rule, the basis and value of the property (other than Controlled stock) would be determined as of the date of the distribution. The fourth operating rule provided that the basis and value of any Controlled stock that the POD transferred to Distributing would be measured on the date of the combining transfer.

The second gain limitation rule applied if a section 381 transaction (for example, an A reorganization of a POD into Distributing) caused a Planned 50-percent Acquisition of Distributing stock. Under those circumstances, the second gain limitation rule effectively limited the amount of section 355(e) gain that Distributing would recognize to the excess of the amount described in section 355(c)(2) or section 361(c)(2), as applicable, over any section 355(e) gain that Distributing would have been required to recognize if there had been a Planned 50-percent Acquisition of one or more PODs (but not Distributing). The section 355(e) gain computed on the hypothetical Planned 50-percent

Acquisition of Distributing would take into account the first gain limitation rule.

The third gain limitation rule was an overall limitation on gain recognition. This rule limited the total amount of section 355(e) gain that could be recognized by Distributing as a result of the distribution to the amount of the built-in gain in the Controlled stock that, without regard to the first and second gain limitation rules, would be taken into account under section 355(c)(2) or section 361(c)(2).

F. Special Rule for Affiliated Groups

As described in part 1.B. of this preamble, section 355(e)(2)(C) provides that section 355(e) does not apply to a distribution between members of an EAG if, immediately after completion of the Plan, Distributing and Controlled both remain members of the same EAG. The proposed regulations included a special rule that would rationalize the application of section 355(e)(2)(C) within an EAG, following a section 381 transaction. The proposed regulations provided that, for purposes of section 355(e)(2)(C), a POD or POC that was a member of the same EAG as Distributing or Controlled (as relevant) at the time of the section 381 transaction would be treated as continuing in existence within the EAG following its transfer of property to Distributing or Controlled in the section 381 transaction. Similarly, Distributing or Controlled would be treated as continuing in existence following a transfer of property to a Successor that was a member of the same EAG. Without this rule, for example, because a POD that was a historic member of the EAG would not continue to exist for Federal income tax purposes after transferring property to Distributing in a combining transfer, section 355(e)(2)(C) would not prevent section 355(e) from applying to a Planned 50-percent Acquisition of the stock of a POD, even if Distributing and Controlled remained members of the same EAG immediately after completion of the Plan.

3. Summary of Comments and Modifications Adopted in the Temporary Regulations

The Treasury Department and the IRS received formal and informal comments regarding the proposed regulations. The comments and modifications to the proposed regulations adopted in the temporary regulations are discussed here. The temporary regulations retain many of the rules of the proposed regulations; however, in response to comments, the temporary regulations modify some provisions and add new

provisions, as discussed in parts 3.A. through 3.D. of this preamble. In addition, the temporary regulations include certain non-substantive modifications to the organization of the rules of the proposed regulations.

A. Comments Regarding Definition of POD

i. Scope of Definition of a POD and Application of § 1.355-7 Plan Rules

The Treasury Department and the IRS received a comment regarding the narrow scope of the definition of a POD in the proposed regulations. Under the proposed regulations, the definition of a POD was limited to a corporation that, before the distribution, transferred property to Distributing in a section 381 transaction. Further, following the transfer from a POD, Distributing must have transferred some (but not all) of the acquired property to Controlled (or to a POC, as described below), and the basis of such property immediately after the transfer to Controlled (or a POC) must have been determined in whole or in part by reference to the basis of the property in the hands of Distributing immediately before the transfer. The commenter noted that the results contemplated by the definition of a POD of the proposed regulations (the tax-free separation of the POD's assets in the distribution, coupled with a potential 50-percent acquisition of the POD's stock) could be effectively replicated in a manner that would circumvent that definition and thereby avoid the application of section 355(e) in substantially similar transactions. For example, assume that corporation D2 owns 100 percent of both classes (voting class A and voting class B) of corporation D1's stock, and D1 owns all of the stock of corporation C. The three corporations together file a consolidated return (the D2 group). Assume that the following steps occur as part of a Plan: D2 acquires all of the stock of unrelated corporation P in exchange for 10 percent of D2's only class of outstanding stock in a reorganization under section 368(a)(1)(B). After joining the D2 group, P transfers an asset to D1 for less than 20 percent of D1's voting class A stock in a section 351 exchange by application of § 1.1502-34. D1 then transfers the asset to C and distributes all the C stock with respect to its voting class B stock to D2 in a transaction qualifying under section 355(a). D2 in turn distributes all the C stock to its shareholders in a transaction qualifying under section 355(a). In such a case, P's assets have been divided tax-free as a result of the distribution of C stock, and P has undergone a 50-percent acquisition of

its stock, but section 355(e) would not apply because P did not engage in a section 381 transaction, although all steps occurred under a Plan.

Commenters also expressed concern that the definition of a POD in the proposed regulations would apply without regard to whether the combining transfer or separating transfer were part of a Plan. These commenters further noted that the Plan rules of § 1.355-7, which were published after the proposed regulations, did not provide express guidance regarding their application in cases involving an acquisition of a POD's stock that could implicate section 355(e). The commenters recommended that the proposed regulations be modified to include: (1) A rule stating that a corporation can satisfy the definition of a POD only if both the combining transfer and the separating transfer are part of a Plan, and (2) express guidance regarding the application of the § 1.355-7 Plan rules in cases involving an acquisition of a POD's stock. The comments indicated that, absent the requirement that the combining transfer and the separating transfer both be part of a Plan, there could be uncertainty as to whether section 355(e) would apply to the acquisition of a potential POD if there is no Plan in existence at the time of the section 381 transaction. Further, this uncertainty would burden taxpayers by requiring assets acquired by Distributing in any section 381 transaction at any time to be tracked through the date of the distribution without knowing whether section 355(e) would apply.

The Treasury Department and the IRS have determined that the normal construct of the Plan rules in § 1.355-7 generally should apply to acquisitions of POD stock (as well as to acquisitions of the stock of Distributing, Controlled, and their Successors). Accordingly, the temporary regulations provide a general rule that references in § 1.355-7 to Distributing or Controlled are treated as references to a POD, POC, or Successor of Distributing or Controlled, as the context may require. Further, a reference to a distribution generally includes a reference to a distribution and other related pre-distribution transactions that together effect a division of the assets of a POD. However, special rules apply with regard to the actions taken into account in determining whether a 50-percent acquisition of a POD occurs as part of Plan. Although a 50-percent acquisition of a POD may occur contemporaneously with a distribution made by Distributing, the acquisition and distribution might occur as part of a

Plan of the POD, but without the participation (or even the knowledge) of Distributing. Because Distributing would be the corporation that could recognize section 355(e) gain, the Treasury Department and the IRS have determined that it is not appropriate to apply the rules of § 1.355-7 by imputing to Distributing the actions of a POD or its shareholders. Accordingly, these temporary regulations provide that any agreement, understanding, arrangement, or substantial negotiations with regard to the acquisition of a POD is analyzed under § 1.355-7 by taking into account the actions of officers or directors of Distributing or Controlled, controlling shareholders (as defined in § 1.355-7(h)(3)) of Distributing or Controlled, or a person acting with the implicit or explicit permission of one of those parties. The actions of officers or directors of a POD and other parties that might be relevant with regard to an analysis under § 1.355-7 if the POD were an actual Distributing are not considered unless those actions otherwise would be examined under the preceding sentence (for example, if a POD or its shareholder is a controlling shareholder of Distributing).

In addition, the Treasury Department and the IRS agree with the comment that the definition of a POD in the proposed regulations, with its exclusive application to transferors in section 381 transactions, did not adequately address section 355(e) policy concerns regarding the use of section 355 to facilitate tax-free dispositions of assets. The Treasury Department and the IRS also agree with commenters that the existence of a Plan should be relevant to the determination of whether a corporation is a POD, to minimize the burden of tracking a corporation's assets prior to the distribution. Therefore, as described in the following paragraphs, the modified definition of a POD contained in the temporary regulations takes into account both of these comments.

ii. Modifications to Definition of a POD a. Synthetic Spin-Off Analysis

Study by the Treasury Department and the IRS arising from consideration of the comments received on the proposed regulations has led to the identification of a variety of pre-distribution transactions that taxpayers could use to achieve results substantially similar to a combining transfer and separating transfer. For example, as described in part 3.A.i. of this preamble, a corporation could transfer some, but not all, of its assets to Distributing in a section 351 exchange, with those assets ultimately

being held by Controlled when its stock is distributed by Distributing. However, under the proposed regulations, POD status would not attach to the transferor because the division of the transferor's assets would be accomplished using a section 351 exchange and not in a section 381 transaction (that is, a combining transfer).

The Treasury Department and the IRS have reviewed the major goal of the proposed regulations, as discussed at part 2.A. of this preamble: To apply section 355(e) in cases in which, as part of a Plan, a tax-free division of the ownership of the POD's assets would otherwise be achieved through the use of a section 355 distribution. Although not discussed in depth in the preamble of the proposed regulations, the overarching theory was to apply section 355(e) to a section 355 distribution if, as part of a Plan, some of the assets of a POD were transferred to Controlled without full recognition of gain, and the distribution accomplished a division of the POD's assets. The Treasury Department and the IRS viewed (and continue to view) this type of transaction as a vehicle for achieving, as a result of the distribution of Controlled stock, the tax-free separation of the assets that the POD transferred to Distributing that are further transferred to Controlled (a synthetic spin-off). The POD might have separated those assets in a divisive D reorganization, without the intervention of Distributing. However, in that case, section 355(e) may have applied to the section 355 distribution, whereas, absent treatment as a POD, a synthetic spin-off of the POD's assets would not be subject to section 355(e).

The proposed regulations defined a POD narrowly, so that a corporation that transferred some of its assets to Controlled would be a POD only if it first transferred those assets to Distributing in a section 381 transaction. To achieve the goal of applying section 355(e) to synthetic spin-offs more effectively, these temporary regulations have both broadened and limited the scope of the definition of a POD. As discussed in greater detail in part 3.A.ii.b. of this preamble, the temporary regulations eliminate the formalistic requirements of a combining transfer followed by a separating transfer and generally identify as a POD any corporation whose assets are divided as part of a Plan as a result of some but not all of those assets being transferred to Controlled without the recognition of all of the built-in gain on the transferred assets before the distribution. No specific transactional form is required with regard to the transfer(s) of assets to

Controlled, although such transfers must be made as part of a Plan. Thus, Distributing may recognize section 355(e) gain on a distribution of Controlled stock if Controlled acquired assets of any corporation identified as a POD, and the POD experiences a Planned 50-percent Acquisition of its stock.

b. Definition of a POD in the Temporary Regulations

Consistent with the synthetic spin-off analysis described in part 3.A.ii.a. of this preamble, the temporary regulations focus in a more conceptual manner on the division of property of any corporation other than Distributing or Controlled (a *Potential Predecessor*) as part of a Plan. Certain property of a Potential Predecessor (Relevant Property) is required to be tracked for the purpose of determining whether a division of the Potential Predecessor's property has occurred. *Relevant Property* is defined as any property held, directly or indirectly, by the Potential Predecessor at any point during the Plan Period. The *Plan Period*, in turn, is defined as the period that ends immediately after the distribution and begins on the earliest date on which any pre-distribution step that is part of the Plan is agreed to or understood, arranged, or substantially negotiated by one or more officers or directors acting on behalf of Distributing or Controlled, by controlling shareholders of Distributing or Controlled, or by another person or persons with the implicit or explicit permission of one or more of such officers, directors, or controlling shareholders. The temporary regulations generally do not treat as Relevant Property any property of a Potential Predecessor that was held directly or indirectly by Distributing or Controlled before a Plan existed. Rather, the definition of Relevant Property of a Potential Predecessor excludes any property held directly or indirectly by Distributing unless that property was directly or indirectly transferred to Distributing as part of a Plan, and it was Relevant Property of the Potential Predecessor before the transfer.

Because POD status under the temporary regulations depends in large part upon the division of the Relevant Property of a Potential Predecessor, Relevant Property must be carefully defined and transfers of Relevant Property as part of a Plan must be tracked to achieve the goals of the temporary regulations. Thus, although the modified definition of a POD is conceptual in nature, it is implemented through application of a set of defined terms. In addition to Relevant Property

and Plan Period, the following defined terms are integral to applying the modified definition of a POD:

Relevant Stock—Stock that is a Potential Predecessor's Relevant Property.

Substitute Asset—In general, any property that is held directly or indirectly by Distributing during the Plan Period and that was received in exchange for Relevant Property that was acquired directly or indirectly by Distributing if all gain on the transferred Relevant Property is not recognized in the exchange. In addition, stock received by Distributing in a distribution qualifying under section 305(a) or section 355(a) on Relevant Stock is a Substitute Asset.

Separated Property—Each item of Relevant Property that is transferred to Controlled as part of a Plan and is held by Controlled immediately before the distribution. Also, Controlled stock that is Relevant Property and that is transferred to, and distributed by, Distributing as part of a Plan.

Underlying Property—Property directly or indirectly held by a corporation that is the issuer of Relevant Stock.

The definition of a POD, which focuses on the division of Relevant Property as part of a Plan, requires the satisfaction of both pre-distribution and post-distribution requirements. There are two pre-distribution requirements: A Relevant Property requirement and a reflection of basis requirement. The Relevant Property requirement may be satisfied in two ways. The Relevant Property requirement may be satisfied if, before the distribution and as part of a Plan, Distributing directly or indirectly acquires Controlled stock in exchange for a direct or indirect interest in Relevant Property. In addition, Controlled must directly or indirectly hold Relevant Property immediately before the distribution, and the gain in the Relevant Property must not have been fully recognized as part of the Plan. The Relevant Property requirement also may be satisfied if any Controlled stock that is distributed as part of the Plan is Relevant Property, and the full amount of gain on that Controlled stock is not recognized as part of the Plan. In either case and as discussed earlier in this part 3.A.ii.b., for purposes of determining POD status, a Potential Predecessor will not be treated as an indirect owner of property that is directly or indirectly held by Distributing unless that property was transferred to Distributing as part of a Plan.

The reflection of basis requirement is satisfied only if any Controlled stock

distributed in the distribution reflects the basis of any Separated Property. This requirement ensures that there is a connection between the gain in the property of a POD and the gain that would be included under an application of section 355(e) and these temporary regulations. For example, under this rule, if section 355(e) applies to each of two sequential distributions of Controlled stock, the Controlled stock that is distributed in the second distribution might not reflect any gain in Separated Property of a Potential Predecessor of the first Distributing. In that case, the Potential Predecessor will not be treated as a POD for purposes of the second distribution, even though that Potential Predecessor may have been a POD for purposes of the first distribution.

In addition to the two pre-distribution requirements, a single post-distribution requirement applies: Immediately after the distribution, direct or indirect ownership of Relevant Property must have been divided between Controlled on the one hand, and Distributing or the Potential Predecessor (or a successor of a Potential Predecessor) on the other hand. For purposes of the preceding sentence, if a Potential Predecessor transfers property in a section 381 transaction to a corporation (other than Distributing or Controlled) during the Plan Period, the corporation is a successor to the Potential Predecessor. If all of the Relevant Property of a Potential Predecessor is transferred to Controlled before the distribution, that Potential Predecessor is not a POD because its assets have not been divided.

Special rules apply to ensure that the occurrence of a reorganization under section 368(a)(1)(E) or (F) to which Distributing is a party does not affect the analysis of whether Distributing stock or Distributing's direct and indirect assets are treated as Relevant Property.

The definition of a POD under the temporary regulations captures many of the same transactions that would have been captured under the proposed regulations without modification. For example, the merger of a Potential Predecessor into Distributing as part of a Plan, followed by the transfer of some (but not all) of the assets of the Potential Predecessor to Controlled as part of the Plan would result in the Potential Predecessor being treated as a POD under both regulations. However, the definition of a POD under the temporary regulations will reach a number of other Potential Predecessors, including indirect transferors, particularly because, under the modified definition, Relevant Property expressly includes

both the directly and indirectly-held property of a Potential Predecessor. Therefore, in determining whether Relevant Property has been divided (and, thus, whether a POD exists), the temporary regulations consider an expanded pool of Potential Predecessors. For example, if a Potential Predecessor transfers Relevant Property to Distributing in a section 351 exchange as part of a Plan, the Potential Predecessor may be a POD, as may be a direct or indirect corporate shareholder of the Potential Predecessor (an indirect owner of the Relevant Property during the Plan Period), if the Potential Predecessor's Relevant Property (directly or indirectly held) is ultimately divided, as part of the Plan, as a result of the distribution. As another example, a Potential Predecessor that merges into Distributing in a forward triangular merger as part of a Plan may be a POD, as well as a direct or indirect corporate shareholder of the Potential Predecessor during the Plan Period. However, as discussed earlier in this part 3.A.ii.b., in either case, the Potential Predecessor's Relevant Property ultimately must be divided as part of the Plan to satisfy the post-distribution requirement.

As discussed earlier in this part 3.A.ii.b., the temporary regulations require the tracking of assets for purposes of identifying PODs; as discussed further in part 3.B. of this preamble, the temporary regulations also require asset tracking for purposes of application of the gain limitation rules. However, to alleviate this burden (as identified in the comments received on the proposed regulations), the temporary regulations provide that only direct or indirect transfers of Relevant Property (including Controlled stock) by a Potential Predecessor to Distributing (or to a POD (see discussion in part 3.A.iii. of this preamble)) that occur as part of a Plan are relevant in determining whether a Potential Predecessor is treated as a POD or a predecessor of a POD (the Plan Limitation). Similarly, only assets transferred as part of a Plan are relevant for application of the gain limitation rules. If no transfer of property of a Potential Predecessor to Distributing or Controlled occurs as part of a Plan, there is no requirement for taxpayers to track assets of any Potential Predecessor under the temporary regulations.

The Treasury Department and the IRS recognize that there may be potential difficulties in applying section 355(e) to a POD that does not cease to exist as a result of the transaction in which it becomes a POD. However, it is expected that in many (if not most) cases, a POD

will cease to exist as a result of the transaction in which it becomes a POD. Further, under the first gain limitation rule of the temporary regulations, Distributing will recognize section 355(e) gain on the division of Relevant Property only if there has been a Planned 50-percent Acquisition of a POD. Because only acquisitions of a POD's stock that occur as part of a Plan are relevant to these inquiries, Distributing should be in possession of the necessary information to determine whether section 355(e) will apply. The Treasury Department and the IRS request comments regarding the integration of the Plan Limitation rule and the definition of a POD under the temporary regulations.

iii. Substitute Assets and POCs

As discussed in part 3.A.ii.b. of this preamble, the POD status under these temporary regulations depends in large part upon the division of Relevant Property of a Potential Predecessor as part of a Plan. Therefore, to better effectuate the tracking of Relevant Property (and, by extension, Separated Property), these temporary regulations broaden the definition of a Substitute Asset, which is treated as Relevant Property. Under these temporary regulations, a Substitute Asset is any property that is held directly or indirectly by Distributing during the Plan Period and was received in exchange for Relevant Property that was acquired directly or indirectly by Distributing if all gain on the transferred Relevant Property is not recognized on the exchange. Controlled stock may constitute a Substitute Asset (and thus, Relevant Property) only if that Controlled stock received (or deemed received) in the exchange reflects the basis of Relevant Stock and the issuer of that Relevant Stock ceases to exist for Federal income tax purposes under the Plan. Treatment of this type of Controlled stock as Relevant Property eliminates the need for application of the POC concept for purposes of determining POD status and computing gain limitations. Accordingly, these temporary regulations reduce the scope of the POC rule to apply solely for purposes of applying the affiliated group rule of section 355(e)(2)(C).

iv. Successive Predecessors

The Treasury Department and the IRS have determined that the Plan Limitation rule described in part 3.A.ii.b. of this preamble mitigates much of the burden associated with tracking successive PODs. Thus, the temporary regulations treat a predecessor of a POD as a POD. A

corporation is a predecessor of a POD if it transfers assets to the POD as part of a Plan, and all additional pre- and post-distribution requirements are satisfied with respect to its assets. The temporary regulations include a similar rule with respect to a predecessor of a POC. Because the temporary regulations recognize successive predecessors of Distributing and Controlled, it is no longer necessary to include the general operating rule contained in the proposed regulations that would have treated the resulting corporation in an F reorganization as the same corporation that engaged in the reorganization. Accordingly, the temporary regulations eliminate this operating rule.

B. Special Rules for Gain Recognition

The gain limitation rules of the proposed regulations are incorporated in the temporary regulations, with modifications to address certain concerns of commenters. Commenters expressed three main concerns with respect to the first gain limitation in the proposed regulations, which applies if there is a Planned 50-percent Acquisition of a POD.

First, commenters stated that the hypothetical section 351 exchange construct used in the first gain limitation rule to determine Distributing's section 355(e) gain on a Planned 50-percent Acquisition of a POD was unnecessarily complicated because of its reliance on rules ancillary to section 351. Specifically, commenters were uncertain as to whether (or how) the loss importation rules under then-recently-enacted section 362(e) would apply to the hypothetical section 351 exchange. Commenters requested that, in lieu of the hypothetical section 351 exchange, gain be limited to the difference between the aggregate basis in the POD's assets actually transferred to Controlled and the aggregate fair market value of those assets immediately before the distribution.

The second main concern of commenters was that the proposed regulations imposed a tracking burden with respect to a POD's assets. Third, commenters noted that measuring the value of Controlled stock acquired by Distributing from a POD at the time of the combining transfer (as opposed to at the time of the distribution, as is the case with other property) could be burdensome.

With regard to the first concern, the Treasury Department and the IRS do not agree with the commenters' suggestion that the first gain limitation rule applicable to a Planned 50-percent Acquisition of a POD should be measured solely by reference to the

difference between the aggregate basis and the aggregate fair market value in a POD's assets transferred to Controlled. Outside of the POD context, application of section 355(e) results in the recognition of gain on Controlled stock, rather than on assets held by Controlled. As discussed in part 3.A.ii.a. of this preamble, the policy underlying the proposed regulations was to apply section 355(e) to result in section 355(e) gain equivalent to that obtained if some of the assets of a POD had been transferred to a hypothetical Controlled without full recognition of gain, and a division of the POD's assets were accomplished through a hypothetical distribution to which section 355(e) applied. That theory continues to underlie these temporary regulations. Therefore, the Treasury Department and the IRS have determined that a limitation on section 355(e) gain equal to the gain in the stock of a hypothetical Controlled following a transfer of POD assets is appropriate. In addition, the commenters' concerns regarding the possible application of section 362(e), highlighted by the use of a hypothetical section 351 and sale construct in the proposed regulations, should be eased by the intervening promulgation of final regulations under section 362(e)(1) and (2). See §§ 1.362-3 and 1.362-4. However, to avoid confusion regarding the applicable Code provisions to be applied in determining the appropriate amount of section 355(e) gain to be recognized by Distributing, these temporary regulations modify the first and second gain limitation rules to result in section 355(e) gain that would have been present in hypothetical Controlled stock, had Distributing transferred assets to a hypothetical Controlled and distributed its stock in a hypothetical reorganization under section 368(a)(1)(D) and section 355(e) (*a Hypothetical D/355(e) Reorganization*), rather than a section 351 exchange followed by a hypothetical sale. This formulation will more closely reflect the policy underlying the proposed regulations and these temporary regulations.

With regard to the second concern, as discussed in part 3.A.ii.b. of this preamble, these temporary regulations mitigate the burden of tracking assets by providing that a Potential Predecessor can be a POD only if the assets of the Potential Predecessor are transferred as part of a Plan. If such a transfer occurs as part of a Plan, the required tracking burden is knowable by Distributing; if there is no Plan, there is no requirement to track any assets of a Potential Predecessor under the temporary

regulations. In addition, the Treasury Department and the IRS continue to view the burden of tracking a POD's assets imposed by the first gain limitation rule as preferable to requiring Distributing to recognize the full amount of section 355(e) gain that Distributing would otherwise recognize under section 355(c)(2) or 361(c)(2) (the Statutory Recognition Amount) in the absence of such a rule. Nevertheless, the temporary regulations provide that Distributing may choose not to apply the first or second gain limitation rules to a distribution, and instead may recognize the Statutory Recognition Amount, by reporting the Statutory Recognition Amount on its original or amended Federal income tax return for the year of the distribution.

With regard to the measurement of gain on Controlled stock that is Separated Property, the Treasury Department and the IRS agree that it is preferable to measure this gain as of the time of the distribution. Using the date of the distribution to measure the gain attributable to the POD's Controlled stock allows for investment adjustments to be made with respect to such stock if Distributing is a member of a consolidated group. Such adjustments often will mitigate the effect of multiple layers of taxation on the same economic gain. Accordingly, these temporary regulations include modifications to the proposed regulations that address the commenters' concerns.

The temporary regulations implement the modifications discussed using terminology that is consistent with the modification of the definition of a POD. Thus, the temporary regulations provide that the first gain limitation rule applicable to a Planned 50-percent Acquisition of a POD equals the amount of section 355(e) gain Distributing would have recognized if, immediately before the distribution, Distributing had transferred all the Separated Property received from the POD to a newly-formed corporation in exchange solely for stock of such corporation in a Hypothetical D/355(e) Reorganization.

With regard to situations in which there is a Planned 50-percent Acquisition of Distributing, the temporary regulations modify the language of the second gain limitation rule to conform to the modified definition of a POD. However, the substance of the rule remains: If the Planned 50-percent Acquisition of Distributing stock occurs in a section 381 transaction in which a POD transfers its assets to Distributing, the amount of section 355(e) gain recognized is limited. This rule is intended to minimize the Federal

income tax impact of directionality between economically equivalent section 381 transactions. That is, the same result should obtain under the temporary regulations regardless of which party to the section 381 transaction is the transferor corporation and which is the acquiring corporation.

Because the temporary regulations require the tracking of both the direct and indirect assets of PODs, the Treasury Department and the IRS have determined that certain additional limitations on the recognition of gain are appropriate. First, the definition of Separated Property excludes property indirectly held by a POD if the stock of the corporation that directly owns the property is Separated Property (and thus is already taken into account for gain recognition purposes). Thus, a corporation's Underlying Property is excluded from the gain recognition computation if the corporation's stock is Relevant Stock transferred to Controlled as part of a Plan and held by Controlled immediately before the distribution. The temporary regulations also provide a prohibition on counting the same asset as Relevant Property of successive PODs, as well as a more general anti-duplication rule, which ensures that the same economic gain is not captured multiple times under section 355(e) and these regulations.

C. Section 336(e) Election

Effective for certain sales, exchanges, or distributions of stock made by a domestic corporation on or after May 15, 2013, regulations under section 336(e) permit, in certain circumstances, a domestic corporation to elect to treat a sale, exchange, or distribution of the stock of a corporation as an asset sale. See §§ 1.336-1 through 1.336-5. The temporary regulations clarify that Distributing may elect to apply the regulations under section 336(e) to a distribution of Controlled stock to which the temporary regulations apply, provided that the transaction otherwise satisfies the requirements of the regulations under section 336(e), and Distributing would otherwise be required under these temporary regulations to recognize the Statutory Recognition Amount with respect to the Controlled stock it distributes.

D. Successors

In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments regarding whether transferees of the property of Distributing or Controlled in transactions other than section 381 transactions should be considered Successors. One comment on the

proposed regulations endorsed treating a transferee in a section 351 or section 721 transaction as a Successor, but only in limited circumstances. Although the Treasury Department and the IRS continue to study this issue, the temporary regulations treat as a Successor for section 355(e) purposes only a transferee to which Distributing or Controlled transferred its assets in a section 381 transaction after a distribution.

E. Section 355(f)

As described in part 1.B. of this preamble, by operation of section 355(e)(2)(C), section 355(e) does not apply to an Internal Distribution if immediately after the Plan Distributing and each Controlled remain members of the same Expanded Affiliated Group. Also, as described in part 1.B. of this preamble, section 355(f) prevents section 355 from applying to an Internal Distribution if section 355(e) would otherwise apply to such distribution (that is, if after the Plan, Controlled or the Lower-Tier Distributing is not a member of the affiliated group as a result of an External Distribution). Because section 355 would not apply, the Internal Distribution would be taxable, and the shareholder or security holder would take the Controlled stock or securities with a fair market value basis under section 301(d). Upon the subsequent External Distribution, there typically no longer would be built-in gain in the Controlled stock or securities to result in additional section 355(e) gain.

The Treasury Department and the IRS have determined that the application of section 355(f) may frustrate the policy underlying the first and second gain limitation rules of these temporary regulations in certain cases. Specifically, if there is a Planned 50-percent Acquisition of only a predecessor of the Lower-Tier Distributing (and not of Controlled or the Lower-Tier Distributing), the stock or securities of Controlled are distributed in an Internal Distribution by the Lower-Tier Distributing, and each of the acquisition(s) and the Internal Distribution precedes an External Distribution of Controlled as part of the same Plan, then section 355(f) would be expected to apply to the Internal Distribution. If section 355(f) were to apply, no part of section 355 would apply (including the gain limitation rules under these temporary regulations). Without application of the first and second gain limitation rules, the full amount of built-in gain in the Controlled stock or securities would be recognized by the Lower-Tier

Distributing under section 311 on its distribution of Controlled stock, even though section 355(f) would have applied only as a result of a Planned 50-percent Acquisition of a predecessor of the Lower-Tier Distributing (and not of Controlled or the Lower-Tier Distributing). However, there may be circumstances under which taxpayers wish to apply section 355(f) to such distributions instead of the first or second gain limitation rules provided by these temporary regulations.

Accordingly, these temporary regulations provide that section 355(f) does not apply if there is a Planned 50-percent Acquisition of the stock of a predecessor of a Lower-Tier Distributing but not of the stock of the Lower-Tier Distributing or Controlled. As a result, section 355(e), including the first and second gain limitation rules in these temporary regulations, applies to the Internal Distribution. However, the temporary regulations provide that a Lower-Tier Distributing may choose to apply section 355(f) to an Internal Distribution it makes without any limitation on the gain it recognizes, but only if each member of the affiliated group (as defined in section 1504(a)) of which the Lower-Tier Distributing is a member reports the Federal income tax consequences of the Internal Distribution consistent with the application of section 355(f).

Effective/Applicability Date

These temporary regulations apply to distributions that occur after January 18, 2017. However, these regulations do not apply to a distribution that is: (1) Made pursuant to a binding agreement in effect on or before December 16, 2016, and at all times thereafter, (2) described in a ruling request submitted to the IRS on or before December 16, 2016 for a transaction that is not modified after such date, or (3) described on or before December 16, 2016 in a public announcement or in a filing with the Securities and Exchange Commission. In addition, Distributing and any affiliated group of which it is a member may consistently apply these regulations in their entirety to any distribution occurring after November 22, 2004. If so, taxpayers must consistently apply this section in its entirety to all distributions occurring after November 22, 2004, that are part of the same Plan.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a

regulatory impact assessment is not required. These temporary regulations are necessary to provide necessary guidance regarding the identity of predecessor and successor corporations of distributing and controlled corporations, to enable taxpayers to utilize the benefit of certain gain limitation rules with respect to certain section 355(e) transactions, and to enable taxpayers to choose to apply or not to apply section 355(f). These subjects were framed for discussion in a prior notice of proposed rulemaking (REG-145535-02) and modifications to the proposed regulations in these temporary regulations either flow directly from comments received relating to the definition of a Predecessor of Distributing set forth in that notice of proposed rulemaking or permit taxpayers to effectively elect the tax consequences of transactions subject to the proposed regulations. For this reason, it has been determined, pursuant to 5 U.S.C. 553(b)(B), that good cause exists for dispensing with the notice and public comment procedures. However, to minimize their effect on pending transactions, these regulations apply only to distributions occurring 30 days or more after the date this Treasury decision is published in the **Federal Register**. For the applicability of the Regulatory Flexibility Act (5 U.S.C. chapter 6), refer to the Special Analyses section of the preamble of the cross-referenced notice of proposed rulemaking published in the Proposed Rules section of this issue of the **Federal Register**. Pursuant to section 7805(f) of the Internal Revenue Code, this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small businesses.

Drafting Information

The principal author of these regulations is Lynlee C. Baker, formerly of the Office of Associate Chief Counsel (Corporate). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding an entry in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.355–8T also issued under 26 U.S.C. 336(e) and 355(e)(5).

■ **Par. 2.** Section 1.355–0 is amended by revising the introductory text and adding an entry for § 1.355–8T to read as follows:

§ 1.355–0 Outline of sections.

In order to facilitate the use of §§ 1.355–1 through 1.355–8T, this section lists the major paragraphs in those sections as follows:

* * * * *

§ 1.355–8T *Definition of predecessor and successor and limitations on gain recognition under section 355(e) and section 355(f).*

- (a) In general.
- (1) Scope.
- (2) Purpose.
- (3) Overview.
- (4) References.
- (i) References to Distributing or Controlled.
- (ii) References to Plan or distribution.
- (iii) Plan Period.
- (b) Predecessor of Distributing.
- (1) Definition.
- (i) In general.
- (ii) Pre-distribution requirements.
- (A) Relevant Property.
- (B) Reflection of basis.
- (iii) Post-distribution requirement.
- (2) Additional definitions and rules related to paragraph (b)(1) of this section.
- (i) References to Distributing and Controlled.
- (ii) Potential Predecessor.
- (iii) Successors of Potential Predecessors.
- (iv) Relevant Property; Relevant Stock.
- (A) In general.
- (B) Property held by Distributing.
- (C) Certain reorganizations.
- (v) Stock of Distributing as Relevant Property.
- (A) In general.
- (B) Certain reorganizations.
- (vi) Substitute Asset.
- (vii) Separated Property.
- (viii) Underlying Property.
- (ix) Scope of definition of Predecessor of Distributing.
- (x) Deemed exchanges.
- (c) Additional definitions.
- (1) Predecessor of Controlled.
- (2) Successors.
- (i) In general.
- (ii) Determination of Successor status.
- (3) Section 381 transaction.
- (d) Special acquisition rules.
- (1) Deemed acquisitions of stock in section 381 transactions.
- (2) Deemed acquisitions of stock after section 381 transactions.
- (3) Separate counting for Distributing and each Predecessor of Distributing.
- (e) Special rules for gain recognition.
- (1) In general.
- (2) Planned 50-percent or greater acquisitions of a Predecessor of Distributing.
- (i) In general.
- (ii) Operating rules.
- (A) Separated Property other than Controlled stock.

(B) Controlled stock that is Separated Property.

(C) Anti-duplication rule.

(3) Planned 50-percent Acquisition of Distributing in a section 381 transaction.

(4) Overall gain recognition.

(5) Section 336(e) election.

(f) Predecessor or Successor as a member of the affiliated group.

(g) Inapplicability of section 355(f) to certain intra-group distributions.

(1) In general.

(2) Alternative application of section 355(f).

(h) Examples.

(i) Effective/applicability date.

(1) In general.

(2) Transition rule.

(i) In general.

(ii) Definition of distribution.

(3) Exception.

■ **Par. 3.** Section 1.355–8T is added to read as follows:

§ 1.355–8T Definition of predecessor and successor and limitations on gain recognition under section 355(e) and section 355(f) (temporary).

(a) *In general*—(1) *Scope.* This section provides rules under section 355(e)(4)(D) to determine whether a corporation is treated as a predecessor or successor of a distributing corporation (Distributing) or a controlled corporation (Controlled) for purposes of section 355(e). This section also provides rules limiting the amount of Distributing's gain recognized under section 355(e) on the distribution of Controlled stock if section 355(e) applies to an acquisition by one or more persons, as part of a Plan (within the meaning of § 1.355–7 as modified by paragraph (a)(3) of this section), of stock that in the aggregate represents a 50-percent or greater interest (a Planned 50-percent Acquisition) of a Predecessor of Distributing (as defined in paragraph (b) of this section), or of Distributing. In addition, this section provides rules regarding the application of section 336(e) to a distribution to which this section applies and the application of section 355(f) to a distribution of Controlled stock in certain cases.

(2) *Purpose.* The rules in this section have two principal purposes. The first is to ensure that section 355(e) applies to a section 355 distribution if, as part of a Plan, some of the assets of a Predecessor of Distributing (as defined in paragraph (b)(1) of this section) are transferred directly or indirectly to Controlled without full recognition of gain, and the distribution accomplishes a division of the assets of the Predecessor of Distributing. The second is to ensure that section 355(e) applies when there is a Planned 50-percent Acquisition of a Successor of Distributing or Successor of Controlled

(as defined in paragraph (c)(2) of this section). The rules of this section must be interpreted and applied in a manner that is consistent with and reasonably carries out the purposes of this section.

(3) *Overview.* This section applies if a distribution of Controlled stock (or stock and securities) is part of the same Plan that includes a Planned 50-percent Acquisition of a Predecessor of Distributing, Distributing, Controlled, a Successor of Distributing, or a Successor of Controlled. Paragraph (a)(4) of this section provides rules regarding references to the terms Distributing, Controlled, distribution, Plan, and Plan Period for purposes of section 355(e), § 1.355–7, and this section. Paragraph (b) of this section defines the term Predecessor of Distributing and several related terms. A corporation generally will be a Predecessor of Distributing if: As part of a Plan, the distribution accomplishes a division of the assets that the corporation directly and indirectly held during the Plan Period; that division occurs through transfers, as part of a Plan, resulting in Controlled directly or indirectly holding some but not all of those assets immediately after the distribution; and all of the gain on that corporation's assets directly or indirectly held by Controlled is not recognized before the distribution. In addition, a corporation generally will be a Predecessor of Distributing if: As part of a Plan, the distribution accomplishes a division of the assets that it directly and indirectly held during the Plan Period; that division occurs as a result of the direct or indirect transfer of Controlled stock by that corporation to Distributing without the transfer of all of the corporation's other assets to Controlled; and all of the gain on the corporation's assets (including the Controlled stock) directly or indirectly held by Controlled is not recognized before the distribution. In both cases, Controlled stock distributed in the distribution must reflect the basis of any Separated Property (as defined in paragraph (b)(2)(vii) of this section). Paragraph (c) of this section defines other terms, including Predecessor of Controlled and Successor (of Distributing or Controlled). Paragraph (d) of this section provides guidance with regard to acquisitions and deemed acquisitions of stock if there is a Predecessor of Distributing or a Successor of either Distributing or Controlled. Paragraph (e) of this section provides two rules that may limit the amount of Distributing's gain on the distribution of Controlled stock if there is a Predecessor of Distributing, as well as an overall gain limitation. Paragraph

(e) of this section also provides guidance with respect to the application of section 336(e). Regardless of whether there is a predecessor or successor of Distributing or Controlled, paragraph (f) of this section provides a special rule relating to section 355(e)(2)(C), which provides that section 355(e) does not apply to certain transactions within an affiliated group (as defined in section 1504(a) without regard to section 1504(b)). Paragraph (g) of this section provides rules coordinating the application of section 355(f) with the rules of this section. Paragraph (h) of this section contains examples that illustrate the rules of this section.

(4) *References*—(i) *References to Distributing or Controlled*. For purposes of section 355(e) and the regulations thereunder, except as otherwise provided in this section, any reference to Distributing or Controlled includes, as the context may require, a reference to any Predecessor of Distributing (as defined in paragraph (b)(1) of this section) or Predecessor of Controlled (as defined in paragraph (c)(1) of this section), respectively, or any Successor (as defined in paragraph (c)(2) of this section) of Distributing or Controlled, respectively. However, except as otherwise provided in this section, a reference to a Predecessor of Distributing or to a Successor of Distributing does not include a reference to Distributing, and a reference to a Predecessor of Controlled or to a Successor of Controlled does not include a reference to Controlled.

(ii) *References to Plan or distribution*. Except as otherwise provided in this section, references to a Plan in this section are references to a plan within the meaning of § 1.355–7. References to a distribution in § 1.355–7 include a reference to a distribution and other related pre-distribution transactions that together effect a division of the assets of a Predecessor of Distributing. In determining whether a distribution and a Planned 50-percent Acquisition of a predecessor or successor of Distributing or Controlled are part of a Plan, the rules of § 1.355–7 apply. In those cases, references to Distributing or Controlled in § 1.355–7 generally include references to a predecessor or successor of Distributing or Controlled. However, with regard to any possible Planned 50-percent Acquisition of a Predecessor of Distributing, any agreement, understanding, arrangement, or substantial negotiations with regard to the acquisition of the stock of the Predecessor of Distributing is analyzed under § 1.355–7 with regard to the actions of officers or directors of Distributing or Controlled, controlling

shareholders (as defined in § 1.355–7(h)(3)) of Distributing or Controlled, or a person acting with permission of one of those parties. For that purpose, references in § 1.355–7 to Distributing do not include references to a Predecessor of Distributing. Therefore, the actions of officers or directors, or controlling shareholders of a Predecessor of Distributing, or a person acting with the implicit or explicit permission of one of those parties are not considered unless those parties otherwise would be treated as acting on behalf of Distributing or Controlled under § 1.355–7 (for example, if a Predecessor of Distributing is a controlling shareholder of Distributing).

(iii) *Plan Period*. For purposes of this section, the term *Plan Period* means the period that ends immediately after the distribution and begins on the earliest date on which any pre-distribution step that is part of the Plan is agreed to or understood, arranged, or substantially negotiated by one or more officers or directors acting on behalf of Distributing or Controlled, by controlling shareholders of Distributing or Controlled, or by another person or persons with the implicit or explicit permission of one or more of such officers, directors, or controlling shareholders. For purposes of the preceding sentence, references to Distributing and Controlled do not include references to any predecessor or successor of Distributing or Controlled.

(b) *Predecessor of Distributing*—(1) *Definition*—(i) *In general*. A Potential Predecessor (as defined in paragraph (b)(2)(ii) of this section) is a Predecessor of Distributing if, taking into account the special rules of paragraph (b)(2) of this section, the pre-distribution requirements of paragraph (b)(1)(ii) of this section and the post-distribution requirements of paragraph (b)(1)(iii) of this section are satisfied.

(ii) *Pre-distribution requirements*—(A) *Relevant Property*. Before the distribution, and as part of a Plan, either—

(1) Any Controlled stock distributed in the distribution was directly or indirectly acquired (or deemed acquired under paragraph (b)(2)(x) of this section) by Distributing in exchange for any direct or indirect interest in Relevant Property (as defined in paragraph (b)(2)(iv) of this section)—

(i) That is held directly or indirectly by Controlled immediately before the distribution; and

(ii) The gain on which was not recognized in full as part of a Plan; or

(2) Any Controlled stock that is distributed in the distribution is Relevant Property of the Potential

Predecessor, and the gain on that Controlled stock was not recognized in full as part of a Plan.

(B) *Reflection of basis*. Any Controlled stock distributed in the distribution reflects the basis of any Separated Property (as defined in paragraph (b)(2)(vii) of this section).

(iii) *Post-distribution requirement*. Immediately after the distribution, direct or indirect ownership of Relevant Property has been divided between Controlled on the one hand, and Distributing or the Potential Predecessor (or a successor of a Potential Predecessor) on the other hand. For purposes of this paragraph (b)(1)(iii), if Controlled stock that is distributed in the distribution is Relevant Property of a Potential Predecessor, then Controlled is deemed to have received Relevant Property of the Potential Predecessor.

(2) *Additional definitions and rules related to paragraph (b)(1) of this section*—(i) *References to Distributing and Controlled*. For purposes of paragraphs (b)(1)(ii) and (b)(1)(iii) of this section, references to Distributing and Controlled do not include references to any predecessor or successor of Distributing or Controlled.

(ii) *Potential Predecessor*. The term *Potential Predecessor* means a corporation other than Distributing or Controlled.

(iii) *Successors of Potential Predecessors*. For purposes of paragraph (b)(1)(iii) of this section, if a Potential Predecessor transfers property in a section 381 transaction to a corporation (other than Distributing or Controlled) during the Plan Period, the corporation is a successor to the Potential Predecessor.

(iv) *Relevant Property; Relevant Stock*—(A) *In general*. Except as otherwise provided in this paragraph (b)(2)(iv), the term *Relevant Property* means any property that was held, directly or indirectly, by the Potential Predecessor during the Plan Period. The term *Relevant Stock* means stock of a corporation if that stock is a Potential Predecessor's Relevant Property.

(B) *Property held by Distributing*. Except as provided in paragraph (b)(2)(iv)(C) of this section, property held directly or indirectly by Distributing (including Controlled stock) is Relevant Property of a Potential Predecessor only to the extent that the property was transferred directly or indirectly to Distributing during the Plan Period, and it was Relevant Property of the Potential Predecessor before the direct or indirect transfers. For example, if during the Plan Period a subsidiary corporation of a Potential Predecessor merges into Controlled in a

reorganization under section 368(a)(1)(A) and (2)(D), and, as a result, the Potential Predecessor directly or indirectly owns Distributing stock received in the merger, the subsidiary's assets held by Controlled will be Relevant Property of that Potential Predecessor.

(C) *Certain reorganizations.* For purposes of paragraph (b)(2)(iv)(B) of this section, the transferor and transferee in any reorganization described in section 368(a)(1)(F) (F reorganization) are treated as a single corporation. Therefore, for example, Relevant Property acquired during the Plan Period by a corporation that is a transferor (as to a later F reorganization) is treated as having been acquired directly (and from the same source) by the transferee (as to the later F reorganization) during the Plan Period. In addition, any transfer (or deemed transfer) of assets to Distributing in an F reorganization will not cause the transferred assets to be treated as Relevant Property.

(v) *Stock of Distributing as Relevant Property—(A) In general.* For purposes of paragraph (b)(1)(ii) of this section, except as provided in paragraph (b)(2)(v)(B) of this section, stock of Distributing is not Relevant Stock (and thus not Relevant Property) to the extent that the Potential Predecessor becomes, as part of a Plan, the direct or indirect owner of that stock as the result of the transfer to Distributing of direct or indirect interests in the Potential Predecessor's Relevant Property. For example, stock of Distributing is not Relevant Stock if it is acquired by a Potential Predecessor as part of a Plan in an exchange to which section 351(a) applies.

(B) *Certain reorganizations.* For purposes of paragraph (b)(1)(ii) of this section, stock of Distributing is Relevant Stock (and thus Relevant Property) to the extent that the Potential Predecessor becomes, as part of the Plan, the direct or indirect owner of that stock as the result of a transaction described in section 368(a)(1)(E).

(vi) *Substitute Asset.* The term *Substitute Asset* means any property that is held directly or indirectly by Distributing during the Plan Period and was received, during the Plan Period, in exchange for Relevant Property that was acquired directly or indirectly by Distributing if all gain on the transferred Relevant Property is not recognized on the exchange. For example, property received by Controlled in exchange for Relevant Property in a transaction qualifying under section 1031 is a Substitute Asset. Irrespective of the general rule of this paragraph (b)(2)(vi),

stock of Controlled received in exchange for a direct or indirect transfer of Relevant Property by Distributing generally is not a Substitute Asset. However, if Controlled stock received or deemed received in an exchange reflects in whole or in part the basis of Relevant Stock the issuer of which ceases to exist for Federal income tax purposes under the Plan, then that Controlled stock will constitute a Substitute Asset. See paragraph (b)(2)(x) of this section. In addition, stock received by Distributing in a distribution qualifying under section 305(a) or section 355(a) on Relevant Stock is a Substitute Asset. For purposes of this section, a Substitute Asset is treated as Relevant Property with the same ownership and transfer history as the Relevant Property for which (or on which) it was received.

(vii) *Separated Property.* The term *Separated Property* means each item of Relevant Property that is described in paragraph (b)(1)(ii)(A) of this section. However, if Relevant Stock is Separated Property, Underlying Property (as defined in paragraph (b)(2)(viii) of this section) associated with that stock is not treated as Separated Property. In addition, if Distributing directly or indirectly acquires Relevant Stock in a transaction in which gain is recognized in full, Underlying Property associated with that stock is not treated as Separated Property.

(viii) *Underlying Property.* The term *Underlying Property* means property directly or indirectly held by a corporation that is the issuer of Relevant Stock.

(ix) *Scope of definition of Predecessor of Distributing.* If there are multiple Potential Predecessors that satisfy the requirements of paragraph (b)(1) of this section, each of those Potential Predecessors will be a Predecessor of Distributing. For example, a Potential Predecessor that transfers property to a Predecessor of Distributing without full recognition of gain (and that otherwise meets the requirements of paragraph (b)(1) of this section) is also a Predecessor of Distributing if the applicable transfer occurred as part of a Plan that existed at the time of such transfer.

(x) *Deemed exchanges.* For purposes of paragraph (b)(1)(ii) and (b)(2)(vi) of this section, Distributing is treated as acquiring Controlled stock in exchange for a direct or indirect interest in Relevant Property if the basis of Distributing in that Controlled stock reflects the basis of the Relevant Property in whole or in part.

(c) *Additional definitions—(1) Predecessor of Controlled.* Solely for purposes of applying paragraph (f) of

this section, a corporation is a *Predecessor of Controlled* if, before the distribution, it transfers property to Controlled in a section 381 transaction as part of a Plan. Other than for the purpose described in the preceding sentence, no corporation can be a Predecessor of Controlled. For purposes of this paragraph (c)(1), a reference to Controlled includes a reference to a Predecessor of Controlled. If multiple corporations satisfy the requirements of this paragraph (c)(1), each of those corporations will be a Predecessor of Controlled. For example, a corporation that transfers property to a Predecessor of Controlled in a section 381 transaction is also a Predecessor of Controlled if the section 381 transaction occurred as part of a Plan that existed at the time of such transaction.

(2) *Successors—(i) In general.* A *Successor* of Distributing or Controlled, respectively, is a corporation to which Distributing or Controlled transfers property in a section 381 transaction after the distribution (a *Successor Transaction*).

(ii) *Determination of Successor status.* More than one corporation may be a Successor of Distributing or Controlled. Therefore, if Distributing transfers property to another corporation (X) in a section 381 transaction, and X transfers property to another corporation (Y) in a section 381 transaction, then each of X and Y may be a Successor of Distributing. In this case, the determination of whether Y is a Successor of Distributing is made after the determination of whether X is a Successor of Distributing.

(3) *Section 381 transaction.* The term *section 381 transaction* means a transaction to which section 381 applies.

(d) *Special acquisition rules—(1) Deemed acquisitions of stock in section 381 transactions.* Each person that owned an interest in the acquiring corporation immediately before a section 381 transaction (an *Acquiring Owner*) is treated for purposes of this section as acquiring, in the section 381 transaction, stock representing an interest in the distributor or transferor corporation, to the extent that the Acquiring Owner did not hold an equivalent direct or indirect interest in the distributor or transferor corporation before the section 381 transaction. For example, if Distributing held a 25-percent interest in a Predecessor of Distributing before a section 381 transaction in which the Predecessor of Distributing transfers its assets to Distributing, each person that owns an interest in Distributing is treated as acquiring in the section 381 transaction

a proportionate share of the remaining 75-percent interest in the Predecessor of Distributing. Similarly, each Acquiring Owner of a Successor of Distributing is treated as acquiring, in the Successor Transaction, stock of Distributing, to the extent that the Acquiring Owner did not hold an equivalent direct or indirect interest in Distributing before the section 381 transaction.

(2) *Deemed acquisitions of stock after section 381 transactions.* For purposes of this section, after a section 381 transaction (including a Successor Transaction), an acquisition of stock of an acquiring corporation (including a deemed stock acquisition under paragraph (d)(1) of this section) is treated also as an acquisition of an interest in the stock of the distributor or transferor corporation. For example, an acquisition of the stock of Distributing that occurs after a section 381 transaction is treated not only as an acquisition of the stock of Distributing, but also as an acquisition of the stock of any Predecessor of Distributing whose assets were acquired by Distributing in a prior section 381 transaction. Similarly, an acquisition of the stock of a Successor of Distributing that occurs after the Successor Transaction is treated not only as an acquisition of the stock of the Successor of Distributing, but also as an acquisition of the stock of Distributing.

(3) *Separate counting for Distributing and each Predecessor of Distributing.* The measurement of whether one or more persons have acquired stock of any specific corporation in a Planned 50-percent Acquisition is made separately from the measurement of any potential Planned 50-percent Acquisition of any other corporation. Therefore, there may be a Planned 50-percent Acquisition of a Predecessor of Distributing even if there is no Planned 50-percent Acquisition of Distributing. Similarly, there may be a Planned 50-percent Acquisition of Distributing even if there is no Planned 50-percent Acquisition of a Predecessor of Distributing.

(e) *Special rules for gain recognition—*
(1) *In general.* If there are Planned 50-percent Acquisitions of multiple corporations (for example, two Predecessors of Distributing), Distributing must recognize gain in the amount described in section 355(c)(2) or 361(c)(2) (the Statutory Recognition Amount), as applicable, with respect to each such corporation, subject to the limitations in paragraph (e)(2) of this section (relating to the Planned 50-percent Acquisition of a Predecessor of Distributing) and paragraph (e)(3) of this section (relating to the Planned 50-percent Acquisition of Distributing), if

applicable. The limitations in paragraphs (e)(2) and (e)(3) of this section are applied separately to the Planned 50-percent Acquisition of each such corporation to determine the amount of gain required to be recognized. Paragraph (e)(4) of this section sets forth an overall limitation based on the full amount of gain otherwise required to be recognized by Distributing by reason of section 355(e). Paragraph (e)(5) of this section clarifies the availability of an election under section 336(e) with regard to certain distributions.

(2) *Planned 50-percent or greater acquisitions of a Predecessor of Distributing—*(i) *In general.* If there is a Planned 50-percent Acquisition of a Predecessor of Distributing, the amount of gain recognized by Distributing by reason of section 355(e) as a result of the Planned 50-percent Acquisition is limited to the amount of gain, if any, that Distributing would have recognized if, immediately before the distribution, Distributing had engaged in the following transaction: Distributing transferred all Separated Property received from the Predecessor of Distributing to a newly-formed corporation in exchange solely for stock of such corporation in a reorganization under section 368(a)(1)(D) and then distributed the stock of such corporation to the shareholders of Distributing in a transaction to which section 355(e) applied (a Hypothetical D/355(e) Reorganization). This computation is applied regardless of whether Distributing actually directly held the Separated Property.

(ii) *Operating rules.* For purposes of applying paragraph (e)(2)(i) of this section, the following rules apply:

(A) *Separated Property other than Controlled stock.* The basis and fair market value of Separated Property other than stock of Controlled treated as transferred by Distributing to a hypothetical Controlled in a Hypothetical D/355(e) Reorganization equal the basis and fair market value, respectively, of such property in the hands of Controlled immediately before the distribution of Controlled stock.

(B) *Controlled stock that is Separated Property.* The basis and fair market value of the stock of Controlled that is Separated Property treated as transferred by Distributing to a hypothetical Controlled in a Hypothetical D/355(e) Reorganization equal the basis and fair market value, respectively, of such stock in the hands of Distributing immediately before the distribution of Controlled stock.

(C) *Anti-duplication rule.* A Predecessor of Distributing's Separated

Property is taken into account for purposes of applying this paragraph (e)(2) only to the extent such property was not taken into account by Distributing in a Hypothetical D/355(e) Reorganization with respect to another Predecessor of Distributing. Further, appropriate adjustments must be made to prevent other duplicative inclusions of section 355(e) gain under this paragraph (e) reflecting the same economic gain.

(3) *Planned 50-percent Acquisition of Distributing in a section 381 transaction.* This paragraph (e)(3) applies if there is a Planned 50-percent Acquisition of Distributing (by application of paragraph (d)(1) of this section) that occurs as part of a Plan as the result of a transfer by a Predecessor of Distributing to Distributing in a section 381 transaction. In that case, the amount of gain recognized by Distributing by reason of section 355(e) as a result of the acquisition is the excess, if any, of the Statutory Recognition Amount, as applicable, over the amount of gain, if any, that Distributing would have been required to recognize under paragraph (e)(2) of this section if there had been a Planned 50-percent Acquisition of the Predecessor of Distributing, but not of Distributing, in the section 381 transaction. For purposes of this paragraph (e)(3), references to Distributing are not references to a Predecessor of Distributing.

(4) *Overall gain recognition.* The sum of the amounts required to be recognized by Distributing under section 355(e) and the regulations thereunder (taking into account paragraphs (e)(2) and (3) of this section) with regard to a single distribution will not exceed the Statutory Recognition Amount, as applicable. In addition, Distributing may choose not to apply the limitations of paragraph (e)(2) and (3) of this section to a distribution, and instead may recognize the Statutory Recognition Amount. Distributing indicates its choice to apply the preceding sentence by reporting the Statutory Recognition Amount on its original or amended Federal income tax return for the year of the distribution.

(5) *Section 336(e) election.* Distributing is not eligible to make a section 336(e) election with respect to a distribution to which this section applies unless Distributing would, absent the making of a section 336(e) election (as defined in § 1.336-1(b)(11)), recognize the Statutory Recognition Amount with respect to a distribution of Controlled stock under paragraph (e)(2), (e)(3), and (e)(4) (without regard to the final two sentences thereof) of this

section. See §§ 1.336–1 through 1.336–5 for additional requirements with regard to a section 336(e) election.

(f) *Predecessor or Successor as a member of the affiliated group.* For purposes of section 355(e)(2)(C), if a corporation transfers its assets to a member of the same affiliated group (as defined in section 1504 without regard to section 1504(b)) in a section 381 transaction, the transferor will be treated as continuing in existence within the same affiliated group.

(g) *Inapplicability of section 355(f) to certain intra-group distributions—(1) In general.* Section 355(f) does not apply to a distribution if there is a Planned 50-percent Acquisition of a Predecessor of Distributing (but not of Distributing, Controlled, or their Successors), except as provided in paragraph (g)(2) of this section. Therefore, except as provided in paragraph (g)(2) of this section, section 355 (or so much of section 356 as relates to section 355) and the regulations thereunder, including the gain limitation rules of paragraph (e)(2) of this section, apply, without regard to section 355(f), to the distribution of Controlled within an affiliated group if the distribution and the Planned 50-percent Acquisition of the Predecessor of Distributing are part of a Plan. For purposes of this paragraph (g)(1), references to the distribution (and Distributing and Controlled) include references to a distribution (and Distributing and Controlled) to which section 355 would apply but for the application of section 355(f).

(2) *Alternative application of section 355(f).* Distributing may choose not to apply paragraph (g)(1) of this section to each distribution (that occurs under a single Plan) to which section 355(f) would otherwise apply absent paragraph (g)(1) of this section and may instead apply section 355(f) to all such distributions according to its terms, but only if all members of the same affiliated group (as defined in section 1504(a) without regard to section 1504(b)) report consistently the Federal income tax consequences of the distributions that are part of the Plan (determined without regard to section 355(f)). In such a case, no gain limitation under paragraph (e)(2) or (3) of this section is available with regard to any applicable distribution. Distributing indicates its choice to apply section 355(f) consistently to all applicable distributions by reporting the Federal income tax consequences of each distribution in accordance with section 355(f) on its Federal income tax return for the year of the distribution.

(h) *Examples.* The following examples illustrate the principles of this section.

Unless the facts indicate otherwise, assume throughout these examples that: Distributing (D) owns all the stock of Controlled (C), and none of the shares of C held by D has a built-in loss; D distributes the stock of C in a distribution to which section 355 applies, but to which section 355(d) does not apply; X, Y, and Z are individuals; each of D, D1, D2, C, P, P1, P2, and R is a corporation having one class of stock outstanding, and none is a member of a consolidated group; and each transaction that is part of a Plan defined in this section is respected as a separate transaction under general Federal income tax principles. No inference should be drawn from any example concerning whether any requirements of section 355 are satisfied other than those of section 355(e):

Example 1. Predecessor of Distributing—(i) Facts. X owns 100% of the stock of P, which holds multiple assets. Y owns 100% of the stock of D. The following steps occur as part of a Plan: P merges into D in a reorganization under section 368(a)(1)(A). Immediately after the merger, X and Y own 10% and 90%, respectively, of the stock of D. D then contributes to C one of the assets (Asset 1) acquired from P in the merger. At the time of the contribution, Asset 1 has a basis of \$40x and a fair market value of \$110x. In exchange for Asset 1, D receives additional C stock and \$10x. D distributes the stock of C (but not the cash) to X and Y, pro rata. The contribution and distribution constitute a reorganization under section 368(a)(1)(D), and D recognizes \$10x of gain under section 361(b) on the contribution. Immediately before the distribution, taking into account the \$10x of gain recognized by D on the contribution, Asset 1 has an adjusted basis of \$50x under section 362(b) and a fair market value of \$110x, and the stock of C held by D has a basis of \$100x and a fair market value of \$200x.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D. Immediately before the distribution and as part of a Plan, C holds P Relevant Property (Asset 1) the gain on which was not recognized in full as part of a Plan. Further, some of the C stock distributed in the distribution was acquired by D in exchange for Asset 1, and it reflects the basis of Separated Property (Asset 1). In addition, immediately after the distribution, D continues to hold Relevant Property of P. Therefore, P's Relevant Property has been divided between C and D.

(B) *Acquisition of predecessor stock.* Under paragraph (d)(1) of this section, Y is treated as acquiring stock representing 90% of the voting power and value of P as a result of the merger of P into D. Accordingly, there has been a Planned 50-percent Acquisition of P.

(C) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$100x of gain (\$200x of aggregate fair market value minus \$100x of aggregate basis of the C stock held by D), the Statutory Recognition Amount

described in section 361(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of the deemed acquisition of P stock will not exceed \$60x, an amount equal to the amount of gain D would have recognized had D transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for C1 stock and distributed the C1 stock to D's shareholders in a Hypothetical D/355(e) Reorganization. For purposes of this computation, the basis and fair market value of Asset 1 equal the basis and fair market value of Asset 1 in the hands of C immediately before the distribution of C stock. Under section 361(c)(2), D would recognize \$60x of gain, an amount equal to the gain in the hypothetical C1 stock (excess of the \$110x fair market value over the \$50x basis). Therefore, D recognizes \$60x of gain.

(iii) *Plan not in existence at time of acquisition of Potential Predecessor's Property.* The facts are the same as in paragraph (i) of this Example 1 except that the merger of P into D occurred before the existence of a Plan. Even though D transferred P property (Asset 1) to C, Asset 1 was not Relevant Property of P because P did not hold Asset 1 during the Plan Period. See paragraphs (b)(2)(iv) and (a)(4)(iii) of this section. Because Asset 1 is not Relevant Property, D did not receive C stock distributed in the distribution in exchange for Relevant Property when it contributed Asset 1 to C, none of the distributed stock reflects the basis of Separated Property, and C does not hold Relevant Property immediately before the distribution. Further, Relevant Property of P has not been divided. Therefore, P is not a Predecessor of D.

Example 2. Planned acquisition of Distributing, but not Predecessor of Distributing—(i) Facts. X owns 100% of the stock of P, which holds multiple assets. Y owns 100% of the stock of D. The following steps occur as part of a Plan: P merges into D in a reorganization under section 368(a)(1)(A). Immediately after the merger, X and Y own 90% and 10%, respectively, of the stock of D. D then contributes to C one of the assets (Asset 1) acquired from P in the merger. In exchange for Asset 1, D receives additional C stock. D distributes the stock of C to X and Y, pro rata. The contribution and distribution constitute a reorganization under section 368(a)(1)(D). Immediately before the distribution, Asset 1 has a basis of \$50x and a fair market value of \$110x, and the stock of C held by D has a basis of \$120x and a fair market value of \$200x.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D. Immediately before the distribution and as part of a Plan, C holds P Relevant Property (Asset 1) the gain on which was not recognized in full as part of a Plan. Further, some of the C stock distributed in the distribution was acquired by D in exchange for Asset 1, and it reflects the basis of Separated Property (Asset 1). In addition, immediately after the distribution, D continues to hold Relevant Property of P. Therefore, P's Relevant Property has been divided between C and D.

(B) *Acquisition of predecessor stock.* Under paragraph (d)(1) of this section, Y is treated

as acquiring stock representing 10% of the voting power and value of P as a result of the merger of P into D. The 10% acquisition of P stock does not cause section 355(e) gain recognition or cause application of paragraph (e)(2) of this section because there has not been a Planned 50-percent Acquisition of P. X acquires 90% of the voting power and value of D as a result of the merger of P into D. The acquisition of greater than 50% of the D stock implicates section 355(e) and results in gain recognition, subject to the rules of paragraph (e) of this section.

(C) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$80x of gain (\$200x of fair market value minus \$120x of basis of the C stock held by D), the Statutory Recognition Amount described in section 361(c)(2). However, under paragraph (e)(3) of this section, D's gain recognized by reason of X's acquisition of D stock will not exceed \$20x, the excess of the Statutory Recognition Amount (\$80x) over the amount of gain that D would have been required to recognize under paragraph (e)(2) of this section if there had been a Planned 50-percent Acquisition of the Predecessor of D but not D in the section 381 transaction (\$60x). The hypothetical gain under paragraph (e)(2) of this section equals the amount D would have recognized had it transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed the C1 stock in a Hypothetical D/355(e) Reorganization. Under section 361(c)(2), D would recognize \$60x of gain, an amount equal to the gain in the hypothetical C1 stock (excess of the \$110x fair market value over the \$50x basis). Therefore, D recognizes \$20x of gain (\$80x – \$60x).

Example 3. Predecessor of Distributing owns Controlled stock; gain duplication—(i) Facts. X owns 100% of the stock of P, which holds multiple assets, including Asset 2. Y owns 100% of the stock of D. P owns 35% of the stock of C (Block 1), and D owns the remaining 65% of the C stock (Block 2). The following steps occur as part of a Plan: P merges into D in a reorganization under section 368(a)(1)(A), and D immediately thereafter distributes all of the C stock to X and Y pro rata. Immediately after the merger, X and Y own 10% and 90%, respectively, of the D stock, and, prior to the distribution, D owns Block 1 with a basis of \$40x and a fair market value of \$45x, and Block 2 with a basis of \$10x and a fair market value of \$65x. D continues to hold Asset 2.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D. Some of the Controlled stock distributed in the distribution was Relevant Property of P, the gain on which was not recognized in full as part of a Plan. See paragraph (b)(1)(ii)(A)(2) of this section. This Controlled stock is Separated Property. See paragraph (b)(2)(vii) of this section. Because the gain on the P Controlled stock was not recognized in full, this stock reflects the basis of Separated Property. See paragraph (b)(1)(ii)(B) of this section. Because some of the Controlled stock distributed in the distribution was Relevant Property of P, C is deemed to have received Relevant Property of P. See paragraph (b)(1)(iii) of this

section. Further, D continues to hold Relevant Property of P immediately after the distribution. Therefore, P's Relevant Property has been divided between C and D.

(B) *Acquisition of predecessor stock.* Under paragraph (d)(1) of this section, Y is treated as acquiring stock representing 90% of the voting power and value of P, as a result of the merger of P into D. Accordingly, there has been a Planned 50-percent Acquisition of P.

(C) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$60x of gain (\$110x of fair market value minus \$50x of basis of the C stock held by D), the Statutory Recognition Amount under section 355(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of the deemed acquisition of P stock will not exceed \$5x, an amount equal to the amount D would have recognized had it transferred Block 1 of the C stock (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed the C1 stock to D shareholders in a Hypothetical D/355(e) Reorganization. For purposes of this computation, the basis and fair market value of the Block 1 C stock equal their basis and fair market value in the hands of D immediately before the distribution of C stock. Under section 361(c)(2), D would recognize \$5x of gain, an amount equal to the gain in the hypothetical C1 stock (\$45x – \$40x). Therefore, D recognizes \$5x of gain.

Example 4. Controlled stock as Substitute Asset—(i) Facts. X owns 100% of the stock of P, which owns multiple assets, including 100% of the stock of R and Asset 2. Y owns 100% of the stock of D. The following steps occur as part of a Plan: P merges into D in a reorganization under section 368(a)(1)(A) (the P–D reorganization). Immediately after the merger, X and Y own 10% and 90%, respectively, of the stock of D. D then causes R to transfer all of its assets to C in a reorganization under section 368(a)(1) (the R–C reorganization). At the time of the P–D reorganization, the R stock has a basis of \$40x and a fair market value of \$110x. D distributes the stock of C to X and Y, pro rata. D continues to directly hold Asset 2. Immediately before the distribution, the C stock held by D that was deemed received in the R–C reorganization has a basis of \$40x and a fair market value of \$110x, and all of the stock of C held by D has a basis of \$100x and a fair market value of \$200x.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D. D is treated as acquiring a block of C stock in exchange for a direct or indirect interest in R stock (Relevant Stock) in the R–C reorganization because the basis of D in that C stock reflects the basis of the R stock. See paragraph (b)(2)(x) of this section. Further, because the block of C stock is treated as received in exchange for R stock, that block of C stock is a Substitute Asset, which is treated as Relevant Property. See paragraph (b)(2)(vi) of this section. Therefore, some of the C stock distributed in the distribution was Relevant Property of P, gain on which was not recognized in full as part of a Plan. This C stock is Separated Property. See paragraph (b)(2)(vii) of this section.

Because the gain on P's R Stock (for which C stock is substituted) was not recognized in full, this C stock reflects the basis of Separated Property. See paragraph (b)(1)(ii)(B) of this section. Finally, under paragraph (b)(1)(iii) of this section, C is deemed to have received Relevant Property of P, and, immediately after the distribution, D continues to hold Asset 2, which is Relevant Property of P. Therefore, P's Relevant Property has been divided between C and D.

(B) *Acquisition of predecessor stock.* Under paragraph (d)(1) of this section, Y is treated as acquiring stock representing 90% of the voting power and value of P, as a result of the P–D reorganization. Accordingly, there has been a Planned 50-percent Acquisition of P.

(C) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$100x of gain (\$200x of fair market value minus \$100x of basis of all C stock held by D), the Statutory Recognition Amount described in section 355(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of the deemed acquisition of P stock will not exceed \$70x, an amount equal to the amount D would have recognized had it transferred the C stock deemed received in the R–C reorganization under section (b)(2)(x) of this section (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed the C1 stock to D shareholders in a Hypothetical D/355(e) Reorganization. Under section 361(c)(2), D would recognize \$70x of gain, an amount equal to the gain in the hypothetical C1 stock (excess of the \$110x fair market value over the \$40x basis). Therefore, D recognizes \$70x of gain.

Example 5. Predecessor of Distributing; section 351 transaction—(i) Facts. X owns 100% of the stock of P, which holds multiple assets, including Asset 1, Asset 2, and Asset 3. Y owns 100% of the stock of D. The following steps occur as part of a Plan: P transfers Asset 1 and Asset 2 to D and Y transfers property to D in an exchange qualifying under section 351. Immediately after the exchange, P and Y own 10% and 90%, respectively, of the stock of D. D then contributes Asset 1 to C in exchange for additional C stock. D distributes all of the stock of C to P and Y, pro rata. D continues to directly hold Asset 2, and P continues to directly hold Asset 3. The contribution and distribution constitute a reorganization under section 368(a)(1)(D). Immediately before the distribution, Asset 1 has a basis of \$40x and a fair market value of \$110x, and the stock of C held by D has a basis of \$100x and a fair market value of \$200x. Following the distribution, and as part of the same Plan, Z acquires 51% of the P stock.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D. Immediately before the distribution, and as part of a Plan, C holds P Relevant Property (Asset 1), the gain on which was not recognized in full as part of a Plan. Further, the C stock distributed in the distribution was acquired by D in exchange for an interest in P Relevant Property transferred to C, and the basis of the C stock reflects the basis of Separated Property (Asset

1). In addition, immediately after the distribution, each of P and D holds Relevant Property of P. Therefore, P's Relevant Property has been divided between C, on the one hand, and P and D on the other hand.

(B) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$100x of gain (\$200x of fair market value minus \$100x of basis of the C stock held by D), the Statutory Recognition Amount described in section 361(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of Z's acquisition of P stock will not exceed \$70x, an amount equal to the amount D would have recognized had it transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for voting stock and distributed the C1 stock to D shareholders in a Hypothetical D/355(e) Reorganization. Under section 361(c)(2), D would recognize \$70x of gain, an amount equal to the gain in the hypothetical C1 stock (excess of the \$110x fair market value over the \$40x basis). Therefore, D recognizes \$70x of gain.

Example 6. Predecessor of Distributing; forward triangular merger—(i) Facts. X owns 100% of the stock of P, which owns multiple assets, including 100% of the stock of R and Asset 2. Y owns 100% of the stock of D. The following steps occur as part of a Plan: R merges into C in a reorganization under section 368(a)(1)(A) and (2)(D). Immediately after the merger P and Y own 10% and 90%, respectively, of the stock of D. D distributes the stock of C to P and Y pro rata. Immediately before the distribution, R's directly-held assets have a basis of \$40x and a fair market value of \$110x. Immediately before the distribution, D has a basis in the C stock of \$60x and a fair market value of \$200x. Pursuant to the same Plan, Z acquires 51% of P stock. P continues to hold Asset 2.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, P is a Predecessor of D because immediately before the distribution, and as part of a Plan, C holds directly P Relevant Property (Underlying Property of R) the gain on which was not recognized in full as part of a Plan. Further, the C stock distributed in the distribution was acquired by D, in part, in deemed exchange for P Relevant Property (see paragraph (b)(2)(x) of this section), and the C stock reflects the basis of Separated Property (Underlying Property of R). See § 1.358-6(c)(1). In addition, immediately after the distribution, P's Relevant Property has been divided between C, on the one hand, and P and D on the other hand.

(B) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$140x of gain (\$200x of fair market value minus \$60x of basis of the C stock held by D), the Statutory Recognition Amount under section 355(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of the 51% acquisition of P stock by Z will not exceed \$70x, an amount equal to the amount D would have recognized had it transferred the Underlying Property of R to a newly-formed corporation (C1) solely in exchange for stock and distributed the C1 stock to D shareholders in a Hypothetical D/355(e)

Reorganization. Under section 361(c)(2), D would recognize \$70x of gain, an amount equal to the gain in hypothetical C1 stock (excess of the \$110x aggregate fair market value of the Underlying Property of R over the \$40x basis). Therefore, D recognizes \$70x of gain.

Example 7. Potential Predecessor in sequential distributions—(i) Facts. X owns 100% of P, which owns multiple assets, including Asset 1 and Asset 2. Y owns 100% of the stock of D, D owns 100% of the stock of D1, and D1 owns 100% of the stock of C. The following steps occur as part of a Plan: P merges into D1 in a reorganization under section 368(a)(1)(A). Immediately after the merger, X and D own 10% and 90%, respectively, of the stock of D1. D1 contributes Asset 1 to C in exchange for additional C stock, but D1 continues to hold Asset 2. D1 distributes the stock of C to D and X, pro rata in a distribution to which section 355 applies (First Distribution), and D distributes to Y all of the stock of C that it received from D1 in a distribution to which section 355 applies (Second Distribution). The contribution of Asset 1 by D1 to C and the First Distribution constitute a reorganization under section 368(a)(1)(D). Immediately before the First Distribution and the Second Distribution, Asset 1 has a basis of \$10x and a fair market value of \$60x, and the stock of C has a fair market value of \$200x. Immediately before the First Distribution, the stock of C held by D1 has a basis of \$100x. The stock of C held by D immediately before the Second Distribution has a basis of \$80x.

(ii) *Analysis—(A) Predecessor in First Distribution.* Under paragraph (b)(1) of this section, P is a Predecessor of D1. Immediately before the First Distribution, and as part of a Plan, C holds P Relevant Property (Asset 1), the gain on which was not recognized in full as part of a Plan. Further, the C stock distributed in the First Distribution was directly acquired by D1 in exchange for P Relevant Property, and it reflects the basis of Separated Property (Asset 1). In addition, immediately after the First Distribution, each of C and D1 continues to hold Relevant Property of P. Therefore, P's Relevant Property has been divided between C and D1.

(B) *Predecessor in Second Distribution.* Under paragraph (b)(1) of this section, P is not a Predecessor of D. Immediately before the Second Distribution, the stock of C distributed does not reflect the basis of Separated Property (Asset 1). Because there has been no Planned 50-percent Acquisition of D, C, or a Predecessor of D, there is no application of section 355(e) to the Second Distribution.

(C) *Gain on First Distribution.* By application of section 355(f), section 355 and the regulations thereunder (including the gain limitation rules in paragraph (e) of this section) would not apply to the First Distribution. Therefore, D1 would be required to recognize \$100x of gain (excess of the \$200x fair market value over the \$100x basis of C stock held by D1) under section 311(b), and D would be treated as receiving a distribution of \$180x to which section 301 applied. However, under paragraph (g)(1) of

this section, section 355(f) will not apply to the First Distribution. As a result, section 355, including the gain limitation rules of paragraph (e)(2) of this section, will apply to the First Distribution. Under paragraph (e)(2) of this section, D1's gain recognized by reason of the deemed acquisition of P stock by D will not exceed \$50x, an amount equal to the amount D1 would have recognized had it transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed the C1 stock to D1 shareholders in a Hypothetical D/355(e) Reorganization. Under section 361(c)(2), D1 would recognize \$50x of gain, an amount equal to the gain in the hypothetical C1 stock (excess of the \$60x fair market value over the \$10x basis). Therefore, D1 recognizes \$50x of gain. Under paragraph (g)(2) of this section, however, D1 may choose to apply section 355(f) to the First Distribution, in which case D1 would recognize \$100x of gain under section 311(b) and section 301 would apply to the distribution of C stock to D.

Example 8. Sequential Predecessors—(i) Facts. X owns 100% of P1, which holds multiple assets, including Asset 1 and Asset 2. Y owns 100% of P2, which holds Asset 3, and Z owns 100% of D. The following steps occur as part of a Plan: P1 merges into P2 in a reorganization under 368(a)(1)(A). Immediately after the merger, X and Y own 10% and 90%, respectively, of the stock of P2. P2 then transfers Asset 1 to D and Z transfers property to D in an exchange qualifying under section 351. As a result of the exchange, P2 and Z own 10% and 90%, respectively, of the stock of D. D then contributes Asset 1 to C in exchange for additional C stock, and P2 retains Asset 2 and Asset 3. D distributes all of the stock of C to P2 and Z, pro rata. The contribution and distribution constitute a reorganization under 368(a)(1)(D), and D recognizes no gain under section 361. Immediately before the distribution, Asset 1 has a basis of \$40x and a fair market value of \$100x, and the stock of C held by D has a basis of \$100x and a fair market value of \$200x.

(ii) *Analysis—(A) P2 as Predecessor of D.* Under paragraph (b)(1) of this section, P2 is a Predecessor of D. Immediately before the distribution, and as part of a Plan, C holds P2 Relevant Property (Asset 1), the gain on which was not recognized in full as part of a Plan. Further, the C stock distributed in the distribution was acquired by D in exchange for a direct interest in P2 Relevant Property (Asset 1), and it reflects the basis in Separated Property (Asset 1). In addition, immediately after the distribution, P2 continues to hold P2 Relevant Property. Therefore, P2's Relevant Property has been divided between C and P2.

(B) *P1 as Predecessor of D.* Under paragraph (b)(1) of this section, P1 is a Predecessor of D. P1 transferred property to P2 (a Predecessor of D) as part of a Plan. Immediately before the distribution, and as part of a Plan, C holds P1 Relevant Property (Asset 1) the gain on which was not recognized in full as part of a Plan. Further, the C stock distributed in the distribution was acquired by D in exchange for a direct interest in P1 Relevant Property, and it reflects the basis in Separated Property (Asset

1). In addition, immediately after the distribution, P2 (a successor of P1 under paragraph (b)(2)(iii) of this section) continues to hold Relevant Property of P1. Therefore, P1's Relevant Property has been divided between C and P2 (the successor of P1).

(C) *Acquisition of predecessor stock.* Under paragraph (d)(1) of this section, Y is treated as acquiring stock representing 90% of the voting power and value of P1 as a result of the merger of P1 into P2. Accordingly, there has been a Planned 50-percent Acquisition of P1. There is no acquisition of P2 stock.

(D) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$100x of gain (\$200x of aggregate fair market value minus \$100x of aggregate basis of the C stock held by D), the Statutory Recognition Amount described in section 361(c)(2), because there has been a Planned 50-percent Acquisition of P1, a Predecessor of D. However, under paragraph (e)(2) of this section, D's gain recognized by reason of the deemed acquisition of P1 stock will not exceed \$60x, an amount equal to the amount D would have recognized had it transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed the C1 stock to D shareholders in a Hypothetical D/355(e) Reorganization. Under section 361(c)(2), D would recognize \$60x, an amount equal to the gain in hypothetical C1 stock (excess of the \$100x fair market over the \$40x basis). The fact that there is no Planned 50-percent Acquisition of either P2 or D does not change this result. Therefore, D recognizes \$60x of gain.

Example 9. Multiple Predecessors of Distributing—(i) Facts. X owns 100% of the stock of P1, which holds multiple assets, including Asset 1 and Asset 3. Y owns 100% of the stock of P2, which holds multiple assets, including Asset 2 and Asset 4. Z owns 100% of the stock of D. The following steps occur as part of a Plan: Each of P1 and P2 merges into D in a reorganization under section 368(a)(1)(A). Immediately after the mergers, each of X and Y owns 10%, and Z owns 80%, of the stock of D. D then contributes to C Asset 1 (acquired from P1), and Asset 2 (acquired from P2). In exchange for Asset 1 and Asset 2, D receives additional C stock. D distributes the stock of C to X, Y, and Z, pro rata. D's contribution of Asset 1 and Asset 2 and the distribution constitute a reorganization under section 368(a)(1)(D). D continues to hold Asset 3 and Asset 4. Immediately before the distribution, Asset 1 has a basis of \$50x and a fair market value of \$110x, Asset 2 has a basis of \$70x and a fair market value of \$90x, and the stock of C held by D has a basis of \$130x and a fair market value of \$220x.

(ii) *Analysis—(A) Predecessor.* Under paragraph (b)(1) of this section, each of P1 and P2 is a Predecessor of D. Immediately before the distribution and as part of a Plan, C holds P1 Relevant Property (Asset 1) and P2 Relevant Property (Asset 2), each of which was transferred as part of a Plan without full gain recognition. The C stock distributed in the distribution was acquired by D in exchange for Asset 1 and Asset 2, and that stock reflects the basis in both Asset 1 and Asset 2 (Relevant Property). In addition,

immediately after the distribution, D continues to hold Relevant Property of P1 and P2. Therefore, each of P1's and P2's Relevant Property has been divided between C and D.

(B) *Acquisition of Predecessor stock.* Under paragraph (d)(1) of this section, Z is treated as acquiring stock representing 80% of the voting power and value of each of P1 and P2 as a result of the mergers of P1 and P2 into D. Accordingly, there has been a Planned 50-percent Acquisition of P1 and P2.

(C) *Gain limited.* Without regard to the limitations in paragraph (e) of this section, D would be required to recognize \$90x of gain (\$220x of fair market value minus \$130x of basis of the C stock held by D), the Statutory Recognition Amount under section 361(c)(2). However, under paragraph (e)(2) of this section, D's gain recognized by reason of the deemed acquisition of P1 stock will not exceed \$60x (\$110x fair market value minus \$50x basis), an amount equal to the amount D would have recognized had it transferred Asset 1 (Separated Property) to a newly-formed corporation (C1) solely for stock and distributed that (C1) stock to D shareholders in a Hypothetical D/355(e) Reorganization. D's gain recognized by reason of the deemed acquisition of P2 stock will not exceed \$20x (\$90x fair market value minus \$70x basis), an amount equal to the amount D would have recognized had it transferred Asset 2 (Separated Property) to a second newly-formed corporation (C2) solely for stock and distributed the (C2) stock to D shareholders in a Hypothetical D/355(e) Reorganization. Therefore, D will recognize \$80x of gain (\$60x + \$20x).

Example 10. Successor of Controlled—(i) Facts. X owns 100% of the stock of each of D and R. The following steps occur as part of a Plan: D distributes all of its C stock to X. Immediately before the Distribution, D's C stock has a basis of \$10x and a fair market value of \$30x. C then merges into R in a reorganization under section 368(a)(1)(D). Immediately after the merger, X owns all of the R stock. As part of the same Plan, Z purchases 51% of the stock of R from X.

(ii) *Analysis—(A) Successor.* Under paragraph (c)(2) of this section, R is a Successor of C because after the distribution C transfers property to R in a section 381 transaction. Accordingly, under paragraph (d)(2) of this section, Z's acquisition of stock of R is treated as an acquisition of stock of C. Therefore, Z is treated as acquiring 51% of the stock of C.

(B) *Gain not limited.* The special gain limitation rules in paragraph (e)(2) or (3) of this section do not apply because there is not an acquisition of stock of D or a Predecessor of D. Therefore, because the distribution and Z's acquisition of a 51% interest in R are part of a Plan, D is required to recognize gain in the amount of \$20x (\$30x fair market value minus \$10x basis of the C stock held by D), the Statutory Recognition Amount under section 355(c)(2).

Example 11. Multiple Successors—(i) Facts. X owns 100% of the stock of both D and R. Y owns 100% of the stock of S. The following steps occur as part of a Plan: D distributes all of the C stock to X. Immediately after the distribution, D merges

into R in a reorganization under section 368(a)(1)(A). Following the merger, R merges into S in a reorganization under section 368(a)(1)(A). As a result of the merger of R into S, X and Y own 10% and 90%, respectively, of the S stock. Immediately before the distribution, D's C stock has a basis of \$10x and a fair market value of \$30x.

(ii) *Analysis—(A) Successor.* Under paragraph (c)(2)(i) of this section, R is a successor of D because, after the distribution, D transfers property to R in a section 381 transaction. Under paragraph (c)(2)(ii), S is also a successor of D because R (a successor of D) transfers property to S in a section 381 transaction.

(B) *Acquisition of Successor Stock.* Under paragraph (d)(1) of this section, there is no deemed acquisition of D stock as a result of the merger of D into R because X wholly owns the stock of D before the merger and wholly owns the stock of R after the merger. Under paragraph (d)(1) of this section, Y is treated as acquiring stock representing 90% of the voting power and value of R (Successor of D) as a result of the merger of R into S. Under paragraph (d)(2) of this section, an acquisition of the R stock is also treated as an acquisition of the D stock.

(C) *Gain.* The special gain limitation rules in paragraph (e)(2) or (3) of this section do not apply because there is not an acquisition of stock of D or a Predecessor of D. Therefore, because there is a Planned 50-percent Acquisition of R (Successor of D), D is required to recognize \$20x of gain (\$30x fair market value minus \$10x basis of the C stock held by D), the Statutory Recognition Amount described in section 355(c)(2).

(i) *Effective/applicability date—(1) In general.* Except as provided in paragraph (i)(2) or (3) of this section, this section applies to distributions occurring after January 18, 2017.

(2) *Transition rule—(i) In general.* Except as provided in paragraph (i)(3) of this section, this section does not apply to a distribution (as defined in paragraph (i)(2)(ii) of this section) that is—

(A) Made pursuant to a binding agreement in effect on or before December 16, 2016 and at all times thereafter;

(B) Described in a ruling request submitted to the Internal Revenue Service on or before December 16, 2016; or

(C) Described on or before December 16, 2016 in a public announcement or in a filing with the Securities and Exchange Commission.

(ii) *Definition of distribution.* For purposes of paragraphs (i)(2)(i) and (3) of this section, references to a distribution include a reference to a distribution and other related pre-distribution transactions that together effect a division of the assets of a Predecessor of Distributing. Therefore, for example, if a corporation would qualify as a Predecessor of Distributing under paragraph (b)(1) of this section,

Distributing may claim the benefit of the transition rule of paragraph (i)(2) of this section only if all steps relevant to the determination of Predecessor of Distributing status are described in the binding agreement, ruling request, announcement, or filing described in paragraph (i)(2)(i) of this section.

(3) *Exception.* Notwithstanding paragraph (i)(1) or (2) of this section, Distributing and any affiliated group that it is a member of as of the beginning of the date on which a distribution (as defined in paragraph (i)(2)(ii) of this section) may apply this section in its entirety to that distribution if it occurs after November 22, 2004. However, under this paragraph (i)(3), taxpayers must consistently apply this section in its entirety to all distributions occurring after November 22, 2004, that are part of the same Plan.

(j) *Expiration date.* The applicability of this section expires on or before December 16, 2019.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Approved: December 1, 2016.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

Premium Tax Credit Regulation VI

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final Regulations.

SUMMARY: This document contains final regulations relating to the health insurance premium tax credit (premium tax credit). These final regulations affect individuals who enroll in qualified health plans through Health Insurance Exchanges (Exchanges, also called Marketplaces) and claim the premium tax credit, and Exchanges that make qualified health plans available to individuals and employers. These final regulations also affect individuals who are eligible for employer-sponsored health coverage.

DATES: *Effective Date:* These regulations are effective December 19, 2016.

Applicability Date: For dates of applicability, see §§ 1.36B-1(o), 1.36B-2(e), 1.36B-3(n), 1.36B-5(h), and 1.6011-8(b).

FOR FURTHER INFORMATION CONTACT:

Steve Toomey at (202) 317-4735, Shareen Pflanz at (202) 317-4727, or Lisa Mojiri-Azad at (202) 317-4649 (not toll-free calls).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545-2232.

The collection of information in these regulations is in § 1.36B-5. The collection of information is necessary to reconcile advance payments of the premium tax credit and determine the allowable premium tax credit. The collection of information is required to comply with the provisions of section 36B of the Internal Revenue Code (Code). The likely respondents are Marketplaces that enroll individuals in qualified health plans.

The burden for the collection of information contained in these regulations will be reflected in the burden estimate for Form 1095-A, *Health Insurance Marketplace Statement*, which is the form that the Marketplace will use to submit the information described in the final regulations.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Background

This document contains final regulations amending the Income Tax Regulations (26 CFR part 1) under section 36B relating to the health insurance premium tax credit. Section 36B was enacted by the Patient Protection and Affordable Care Act, Public Law 111-148 (124 Stat. 119 (2010)), and the Health Care and Education Reconciliation Act of 2010, Public Law 111-152 (124 Stat. 1029 (2010)) (collectively, the Affordable Care Act). Final regulations under section 36B (TD 9590) were published on May 23, 2012 (77 FR 30,385). These regulations were amended in 2014 by TD 9663, published on May 7, 2014 (79 FR 26,117), and in 2015 by TD 9745, published December 18, 2015 (80 FR

78,974). On July 8, 2016, a notice of proposed rulemaking (REG-109086-15) was published in the **Federal Register** (81 FR 44,557). Written comments responding to the proposed regulations were received. The comments have been considered in connection with these final regulations and are available for public inspection at www.regulations.gov or on request. No public hearing was requested or held. After consideration of all the comments, the proposed regulations are adopted, in part, as amended by this Treasury decision. The rules proposed under REG-109086-15 on the effect of opt-out arrangements on an employee's required contribution for employer-sponsored coverage have been reserved and the Treasury Department and the IRS expect to finalize those regulations separately (see, section 1.d of this preamble).

Summary of Comments and Explanation of Provisions

1. Eligibility

a. Applicable Taxpayers

A taxpayer is eligible for a premium tax credit only if the taxpayer is an applicable taxpayer. To be an applicable taxpayer, a taxpayer's household income generally must be between 100 percent and 400 percent of the Federal poverty line (FPL) for the taxpayer's family size. The existing regulations in § 1.36B-2(b)(6) allow a taxpayer whose household income is below 100 percent of the applicable FPL to be treated as an applicable taxpayer if (1) the taxpayer or a family member enrolls in a qualified health plan, (2) an Exchange estimates at the time of enrollment that the taxpayer's household income for the taxable year will be between 100 and 400 percent of the applicable FPL, (3) advance credit payments are authorized and paid for one or more months during the taxable year, and (4) the taxpayer would be an applicable taxpayer but for the fact that the taxpayer's household income for the taxable year is below 100 percent of the applicable FPL.

An applicable taxpayer is allowed a premium tax credit for a month only if one or more members of the applicable taxpayer's family is enrolled in one or more qualified health plans through an Exchange and is not eligible for minimum essential coverage in that month. Section 36B(c)(2), § 1.36B-2(a). In general, government-sponsored programs are minimum essential coverage. Section 1.36B-2(c)(1). Under § 1.36B-2(c)(2)(v), an individual is treated as not eligible for Medicaid, the Children's Health Insurance Program (CHIP), or a similar program for a period of coverage under a qualified health

plan if, when the individual enrolls in the qualified health plan, an Exchange determines or considers (within the meaning of 45 CFR 155.302(b)) the individual to be ineligible for such program.

In addition, coverage under an eligible employer-sponsored plan is generally minimum essential coverage.¹ However, an individual who may (but does not) enroll in an employer-sponsored plan is generally considered eligible for that plan only if the plan is considered affordable and provides minimum value. Section 36B(c)(2)(C), § 1.36B–2(c)(3). In addition, under the employee safe harbor in § 1.36B–2(c)(3)(v)(A)(3), an employer-sponsored plan is not considered affordable for a plan year if, when the employee or a related individual enrolls in a qualified health plan for a period coinciding with the plan year, an Exchange determines that the employer-sponsored plan is not affordable for that plan year.

The existing regulations describing the employee safe harbor contain an exception for reckless disregard for the facts. Under the exception, the safe harbor does not apply in situations in which an Exchange determines that an individual is not eligible for affordable employer-sponsored coverage because an individual, with reckless disregard of the facts, provides incorrect information to the Exchange regarding affordability of the plan.

The proposed regulations add two additional intentional or reckless disregard exceptions to provisions regarding eligibility determinations by the Exchanges. First, to reduce the likelihood that individuals who recklessly or intentionally provide inaccurate information to an Exchange will benefit from the rule in § 1.36B–2(b)(6) (regarding an Exchange determination that the taxpayer's household income for the taxable year will be between 100 and 400 percent of the applicable FPL), the proposed regulations provide that a taxpayer whose household income is below 100 percent of the applicable FPL for the taxpayer's family size does not receive the benefit of that rule if, with

intentional or reckless disregard for the facts, the taxpayer provided incorrect information to an Exchange for the year of coverage.

Second, the proposed regulations provide that an individual who was determined or considered by an Exchange to be ineligible for Medicaid, CHIP, or a similar program (such as a Basic Health Program) does not receive the benefit of the rule in § 1.36B–2(c)(2)(v) (regarding an Exchange determination that an individual was not eligible for coverage under Medicaid, CHIP, or a similar program) if, with intentional or reckless disregard for the facts, the individual (or a person claiming a personal exemption for the individual) provided incorrect information to an Exchange for the year of coverage.

In each of the three instances in the existing and proposed section 36B regulations where an intentional or reckless disregard for the facts exception is provided, the proposed regulations clarify that a reckless disregard of the facts occurs if the taxpayer makes little or no effort to determine whether the information provided to the Exchange is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct a reasonable person would observe. The proposed regulations also provide that a disregard of the facts is intentional if the taxpayer knows the information provided to the Exchange is inaccurate.

Commenters asked that the final regulations clarify how the IRS will determine whether an individual has acted with reckless or intentional disregard of the facts, and how these standards will be applied and enforced. Some commenters requested that the final regulations clarify the definition of “reckless disregard” and provide examples. Other commenters expressed concern that the proposed rule would make taxpayers responsible for information provided by third parties who provide assistance with enrollment. Thus, the commenters recommended that the final regulations clarify that an individual is only responsible for information he or she provides to the Exchange and is not responsible for information provided by third parties. The commenters also suggested that the final regulations provide that individuals who use an expert to assist with enrolling in coverage should not be considered to have acted recklessly when relying on the expert's professional advice. Other commenters requested that the final regulations require that individuals be notified of the consequences of potential income-based eligibility fraud.

A commenter also stated that, under the final regulations, the IRS should have the burden of showing that a taxpayer's incorrect information was provided to the Exchange with intentional or reckless disregard for the facts. One commenter suggested that the final regulations clarify that the reckless or intentional disregard for the facts exceptions will be applied on an individual basis. In addition, the commenter asked that the final regulations address how the intentional or reckless disregard for the facts exception, as it applies to the employee safe harbor in § 1.36B–2(c)(3)(v)(A)(3), will be implemented by the Exchanges.

Finally, one commenter requested that the final regulations not adopt the intentional or reckless disregard for the facts exceptions.

After careful consideration of the comments received, the final regulations adopt the intentional or reckless disregard for the facts exception, and the definition of its terms, to the section 36B eligibility safe harbors for household income below 100 percent of the FPL, government programs such as Medicaid, and employer-sponsored coverage. As clarified in the proposed and final regulations, the intentional or reckless disregard for the facts exception applies only when the taxpayer knowingly provides inaccurate information to the Exchange or makes little or no effort to determine whether the information provided is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct of a reasonable person. The commenters' concerns are further addressed in this preamble.

These final regulations, in adopting the intentional or reckless disregard for the facts exceptions set forth in the proposed regulations without modification, do not create new or heightened standards or rules for determining whether a taxpayer acted with intentional or reckless disregard for the facts. Rather, the phrase “intentional or reckless disregard for the facts” as used in the section 36B regulations has a similar meaning and application currently used in other areas of the Code. For example, an intentional or reckless disregard standard also is applied in determining eligibility for other tax credits such as the earned income tax credit and the American opportunity tax credit, see sections 32(k) and 25A(i)(7)(A).

The IRS is responsible for enforcement of the intentional or reckless disregard for the facts exceptions during an examination of a taxpayer's tax return. Thus, the IRS must make the initial showing of facts

¹ In general, an eligible employer-sponsored plan is coverage provided by an employer to its employees (and their dependents) under a group health plan maintained by the employer. See section 5000A(f)(2) and § 1.5000A–2(c). Under section 5000A(f)(3) and § 1.5000A–2(g), minimum essential coverage does not include any coverage that consists solely of excepted benefits described in section 2791(c)(1), (c)(2), (c)(3), or (c)(4) of the Public Health Service Act (PHS Act) (42 U.S.C. 300gg–91(c)), or regulations issued under those provisions (45 CFR 148.220). In general, excepted benefits are benefits that are limited in scope or are conditional.

demonstrating intentional or reckless behavior. Exchanges have no role in enforcing or implementing this standard, although other provisions of law provide Exchanges the authority to impose penalties on individuals who provide incorrect information to an Exchange.

To provide additional clarity, in general, the intentional or reckless disregard for the facts exception only applies to the conduct of the individual attesting to the Exchange. Thus, an individual is only responsible for the information that he or she provides to the Exchange and is not liable for inaccurate information provided by third parties, such as an employer.

An individual's attestations, however, may affect the eligibility of all individuals who are listed on a Marketplace Application for Health Coverage and who the taxpayer intends at the time of enrollment to claim as a dependent. For example, if a taxpayer, with intentional or reckless disregard for the facts, provides incorrect information to an Exchange concerning his household income and receives advance credit payments for coverage of himself and his three dependents, and his actual household income is below 100% of the applicable FPL, then the taxpayer is not an applicable taxpayer and a premium tax credit is not allowed for his coverage or the coverage of his three dependents.

Similarly, many individuals solicit and receive assistance with enrollment and completing the Marketplace Application for Health Coverage. To ensure effective and efficient enrollment through the Exchange, the Department of Health and Human Services uses Navigators, as described at 45 CFR 155.210, to assist potential applicants. In addition, the Marketplaces administer a program for individuals and entities to apply for and receive recognition as a certified application counselor, as defined in 45 CFR 155.225, who may formally offer and provide enrollment assistance to individuals and small businesses. Finally, 45 CFR 155.220 provides standards under which agents and brokers may register and facilitate enrollments through the Marketplaces. Navigators, certified application counselors, agents, and brokers (collectively, authorized advisors) receive comprehensive training on enrollment and completion of a Marketplace Application for Health Coverage, and individuals are encouraged to use them when making enrollment and advance credit payment decisions. Accordingly, for purposes of the final regulations, an individual does

not act recklessly when following the advice of an authorized advisor, so long as the individual provided the authorized advisor with necessary and accurate information. Whether reliance on advice provided by a person other than an authorized advisor is reckless will depend on all of the relevant facts and circumstances, including whether reliance was reasonable and whether the taxpayer provided necessary and accurate information to the other person.

To illustrate, assume Individual D is told by a Navigator that the child support payments D receives from her former spouse are included in her household income in determining whether she is eligible for advance credit payments. Relying on that information, D reports on a Marketplace Application for Health Coverage that her household income for the year of coverage will be over 100 percent of the applicable FPL for D's family size, and D receives the benefit of advance credit payments for the year. When filing her tax return for the year of coverage, D learns that child support payments are not included in her household income for the year of coverage and, thus, her household income is actually under 100 percent of the applicable FPL. D is not considered to have acted with intentional or reckless disregard for the facts because she relied on the advice of a Navigator in providing the information that the Marketplace used to determine whether she was eligible for advance credit payments. Thus, the provision in § 1.36B-2(b)(6) that allows a taxpayer whose household income is below 100 percent of the applicable FPL to be treated as an applicable taxpayer will apply to D despite the fact that her household income for the taxable year is below 100 percent of the applicable FPL.

In contrast, assume Individual E told the Navigator assisting with E's Marketplace Application for Health Coverage that E's lowest-cost option for purchasing self-only employer-sponsored coverage that provides minimum value would cost E \$10,000 for the taxable year, when in fact E knew that he could purchase such coverage for \$5,000. Based on the information E provided, the Navigator advises E that he should indicate on his Marketplace Application for Health Coverage that his required contribution for employer-sponsored coverage is \$10,000. E follows this advice and consequently receives the benefit of advance credit payments for the year. During a subsequent examination, the IRS determines that E could have purchased employer-sponsored

coverage that provides minimum value for \$5,000. For the year of coverage, E is not considered to have reasonably relied on the advice of a Navigator in providing information to the Marketplace because E knowingly provided inaccurate information to the Navigator. Thus, the employee safe harbor in § 1.36B-2(c)(3)(v)(A)(3) does not apply to E.

b. Nonappropriated Fund Health Benefits Program of the Department of Defense

The proposed regulations provide that the Nonappropriated Fund Health Benefits Program of the Department of Defense (the Program) is treated as an eligible employer-sponsored plan for purposes of determining if an individual is eligible for minimum essential coverage under section 36B. This treatment conforms the regulations under section 36B to the regulations under section 5000A, which treat the Program as an eligible employer-sponsored plan. Thus, if coverage under the Program does not provide minimum value (under § 1.36B-2(c)(3)(vi)) or is not considered affordable (under § 1.36B-2(c)(3)(v)) for an individual who does not enroll in the coverage, he or she is not treated as eligible for minimum essential coverage under the Program for purposes of premium tax credit eligibility.

One commenter requested that the final regulations clarify how Marketplaces will determine and verify whether an offer of coverage under the Program provides minimum value and is affordable. In general, employers are required to provide certain information to employees about the coverage that they offer, including information that is relevant to affordability and minimum value. These regulations do not make any changes to those requirements.

c. Eligibility for Employer-Sponsored Coverage for Months During a Plan Year

The existing section 36B regulations provide that an individual is eligible for minimum essential coverage through an eligible employer-sponsored plan if the individual had the opportunity to enroll in the plan and the plan is affordable and provides minimum value. Because in some instances individuals may not be allowed an annual opportunity to decide whether to enroll in eligible employer-sponsored coverage, the proposed regulations provide that if an individual declines to enroll in employer-sponsored coverage for a plan year and does not have the opportunity to enroll in that coverage for one or more succeeding plan years, for purposes of section 36B, the individual

is treated as ineligible for that coverage for the succeeding plan year or years for which there is no enrollment opportunity. This rule relating to eligibility for employer-sponsored coverage is proposed to apply for taxable years beginning after December 31, 2016.²

One commenter sought clarification on how this rule relating to eligibility for employer-sponsored coverage applies to employers with fiscal-year employer plans. The commenter also requests a delay in the effective date to allow additional time for implementation.

The rule in the proposed regulations relating to eligibility for employer-sponsored coverage applies to fiscal year plans in the same manner that it applies to calendar year plans. For example, assume an employer offers an employee affordable, minimum value coverage for a plan year of April 1, 2017 through March 30, 2018. In addition, under the terms of the employer's plan, if the employee declines the coverage beginning on April 1, 2017, the employee is precluded from enrolling for the plan year of April 1, 2018 through March 30, 2019, absent a special enrollment period. Under the proposed regulations, the employee is treated as eligible for this employer-sponsored coverage only for the period between April 1, 2017 and March 31, 2018. Thus, assuming the employee does not enroll in the employer-sponsored coverage through a special enrollment period, the employee is not considered eligible for this employer coverage during the period April 1, 2018 through March 31, 2019.

The final regulations do not adopt the commenter's suggestion to delay the applicability date of the provision relating to eligibility for employer-sponsored coverage to a year after 2017. The Treasury Department and the IRS believe that it would be unfair to employees and their family members who do not have an annual opportunity to enroll in coverage offered to them by an employer to delay the applicability date of this provision. Consequently, the final regulations provide that this

provision is applicable for taxable years beginning after December 31, 2016.

d. Opt-Out Arrangements and An Employee's Required Contribution

The proposed regulations provide rules on the effect of payments made available under opt-out arrangements on an employee's required contribution for purposes of eligibility for the premium tax credit and an exemption from the section 5000A individual shared responsibility provision.³ An opt-out arrangement is an arrangement under which a payment (called an opt-out payment) is made available to an employee by an employer only if the employee declines coverage under an eligible employer-sponsored plan offered by the employer. Prior to the proposed regulations, the Treasury Department and the IRS released Notice 2015–87, 2015–52 I.R.B. 889, which also addressed the effect of opt-out arrangements on an employee's required contribution.

Several comments on the proposed rule were received. The Treasury Department and the IRS continue to examine the issues raised by opt-out arrangements and expect to finalize regulations on the effect of opt-out arrangements on an employee's required contribution at a later time.

As provided in Notice 2015–87, Q&A 9, and reiterated in the proposed rule, the regulations on opt-out arrangements generally will apply only for periods after the applicability of those final regulations. Until those final regulations are applicable, individuals and employers can continue to rely on the guidance provided in Notice 2015–87 and on the proposed rule, including transition relief as clarified and expanded in section 2.f of the preamble to the proposed rule (for opt-out arrangements contained in collective bargaining agreements in effect before December 16, 2015). See 81 FR 44,561.

Accordingly, until the applicability date of final regulations on opt-out arrangements, individuals may treat opt-out payments made available under unconditional opt-out arrangements (as defined in the Background section of the preamble to the proposed regulations (see 81 FR 44,560)) as increasing the employee's required contribution for purposes of sections 36B and 5000A. In addition, for the same period, an individual who can demonstrate that he or she meets the condition(s) (in

addition to declining the employer's health coverage) that must be satisfied to receive an opt-out payment under a conditional opt-out arrangement (as defined in the Background section of the preamble to the proposed regulations (see 81 FR 44,560)), may treat the amount of the conditional opt-out payment as increasing the employee's required contribution for purposes of sections 36B and 5000A.

In contrast, until the applicability date of final regulations on opt-out arrangements, employers are not required to increase an employee's required contribution by the amount of an opt-out payment made available under an opt-out arrangement (other than a payment made available under a non-relief-eligible opt-out arrangement⁴) for purposes of section 6056 (Form 1095–C, Employer-Provided Health Insurance Offer and Coverage), and an opt-out payment made available under an opt-out arrangement (other than a payment made available under a non-relief-eligible opt-out arrangement) will not be treated as increasing an employee's required contribution for purposes of any potential consequences under section 4980H.

e. Effective Date of Eligibility for Minimum Essential Coverage When Advance Credit Payments Discontinuance Is Delayed

The proposed regulations provide that if an individual who is enrolled in a qualified health plan for which advance credit payments are made informs the Exchange that the individual is or will soon be eligible for other minimum essential coverage and that advance credit payments should be discontinued, but the Exchange does not discontinue advance credit payments for the first calendar month beginning after the month the individual notifies the Exchange, the individual is treated as eligible for the other minimum essential coverage no earlier than the first day of the second calendar month beginning after the first month the individual may enroll in the other minimum essential coverage. Similarly, if a determination is made that an individual is eligible for Medicaid or CHIP but advance credit payments are not discontinued for the first calendar month beginning after the eligibility determination, the individual is treated as eligible for Medicaid or CHIP no earlier than the first day of the second

² Note that for purposes of section 4980H, in general, an applicable large employer will not be treated as having made an offer of coverage to a full-time employee for a plan year if the employee does not have an effective opportunity to elect to enroll in the coverage at least once with respect to the plan year. For this purpose, a plan year must be twelve consecutive months, unless a short plan year of less than twelve consecutive months is permitted for a valid business purpose. For additional rules on the definition of "offer" and "plan year" under section 4980H, see §§ 54.4980H–1(a)(35), 54.4980H–4(b), and 54.4980H–5(b).

³ The amount of an employee's required contribution has consequences under section 4980H and the related reporting requirements under section 6056. For more information, see Notice 2015–87, Q&A 7–9 and section 2.f of the preamble to the proposed rule (see 81 FR 44,561).

⁴ For a discussion of non-relief-eligible opt-out arrangements, see Notice 2015–87, Q&A 9 and section 2.f of the preamble of the proposed rule. See 81 FR 44,561.

calendar month beginning after the determination.

Commenters noted that the proposed regulations do not address how the IRS will identify and verify scenarios in which an individual requested prospective discontinuation of advance credit payments but there was a delay in the discontinuation. The commenters also pointed out that consumers may request an accelerated termination if the Exchange and health plan issuer allow it and the proposed regulations do not address how these scenarios will be handled. Consequently, the commenters requested that the IRS issue clear instructions and guidance for taxpayers and tax preparers for situations in which there is a delay discontinuing or terminating advance credit payments to ensure that taxpayers will not be subject to penalties or repayment of advance credit payments for which they are not responsible.

The Instructions to Form 8962, Premium Tax Credit (PTC), and Publication 974, Premium Tax Credit, will include a discussion of this rule concerning eligibility for certain non-Marketplace minimum essential coverage when the discontinuance of advance credit payments is delayed. Furthermore, the IRS intends to, in Questions and Answers on www.irs.gov, address situations in which there is a delay in the discontinuance of advance credit payments and the taxpayer is allowed a premium tax credit for a month for which the taxpayer receives a Form 1095-B or Form 1095-C showing that the taxpayer was enrolled in non-Marketplace minimum essential coverage.

Commenters requested that the final regulations acknowledge that this rule concerning eligibility for non-Marketplace minimum essential coverage when there has been a delay in the discontinuance of advance credit payments does not change the obligations of health plan issuers for prior years, notwithstanding that the rule in the proposed regulations may be relied on by taxpayers for taxable years beginning after December 31, 2013. Although the obligations of health plan issuers are generally outside the scope of these regulations, it is the understanding of the Treasury Department and the IRS, in consultation with the Department of Health and Human Services (HHS), that this rule regarding when an individual is eligible for certain non-Marketplace coverage does not affect the obligations of health plan issuers or the deadlines imposed by or on those issuers.

One commenter requested that the rule extend to other situations, such as

when an individual receiving the benefit of advance credit payments is incarcerated after disposition of charges. Under section 1312(f)(1)(B) of the Affordable Care Act (42 U.S.C. 18032(f)(1)(B)), incarcerated individuals may not be enrolled through a Marketplace. However, unlike an individual enrolled in minimum essential coverage outside of the Marketplace, if there is a delay in disenrolling the incarcerated individual and discontinuing the advance credit payments, neither section 36B nor its regulations prohibit a taxpayer from claiming a premium tax credit for an incarcerated individual's Marketplace coverage. Thus, the final regulations do not adopt this comment.

The same commenter also requested a change in the rule concerning delays in discontinuance of advance credit payments after a Medicaid or CHIP determination. Under the proposed regulations, if there is a delay in discontinuance of advance credit payments following a Medicaid or CHIP eligibility determination, the individual is treated as eligible for Medicaid or CHIP no earlier than the first day of the second calendar month beginning after the determination. The commenter stated that, under the final regulations, an individual should be treated as eligible for Medicaid or CHIP no earlier than the first day of the second calendar month beginning after the eligibility determination is communicated to the Exchange.

The final regulations do not adopt this comment. The commenter is likely concerned about a situation in which the office that made a Medicaid or CHIP determination for an individual does not promptly notify the Marketplace of that status and the individual remains enrolled in Marketplace coverage with advance credit payments for multiple months. However, individuals enrolled in Marketplace coverage with advance credit payments who are determined eligible for Medicaid or CHIP should also promptly notify their Marketplace to discontinue the advance credit payments. Amending the rule to delay eligibility until the second month after the determination is communicated to the Marketplace effectively allows individuals who fail to promptly communicate with their Marketplaces to be dual enrolled for multiple months with advance credit payments.

2. Premium Assistance Amount

a. Payment of Taxpayer's Share of Premiums for Advance Credit Payments Following Appeal Determinations

Under existing § 1.36B-3(c)(1)(ii), a month is a coverage month for an individual only if the share of the premium for the individual's coverage for the month not covered by advance credit payments is paid by the unextended due date of the income tax return for the year of coverage of the taxpayer claiming a personal exemption for the individual.

As discussed in the preamble to the proposed regulations, instances arise in which an individual is initially determined ineligible for advance credit payments, does not enroll in a qualified health plan pending the individual's appeal of the determination, and is later determined to be eligible for advance credit payments through the appeals process. If the individual then elects to be retroactively enrolled in an Exchange health plan, the deadline for paying premiums for the retroactive coverage may be after the unextended due date for filing an income tax return for the year of coverage. To address this issue, the proposed regulations provide that a taxpayer who is eligible for advance credit payments pursuant to an eligibility appeal for a member of the taxpayer's coverage family who, based on the appeals decision, retroactively enrolls in a qualified health plan, is considered to have met the requirement in § 1.36B-3(c)(1)(ii) for a month if the taxpayer pays the individual's share of the premium for coverage under the plan for the month on or before the 120th day following the date of the appeals decision (the appeal premium payment period).

A commenter opined that to ensure accurate and consistent identification and reporting of payment deadlines, the triggering event that begins the appeal premium payment period under the section 36B regulations should align with the triggering event provided in 45 CFR 155.400(e)(1)(iii), which provides as follows: "For coverage to be effectuated under retroactive effective dates, . . . the deadline for making the binder payment must be no earlier than 30 calendar days from the date the issuer receives the enrollment transaction." The commenter notes that the date the appeal premium payment period begins under the proposed regulations (the date of the appeals decision) is different from the date the period begins under 45 CFR 155.400(e)(1)(iii) (the date the issuer receives the enrollment transaction) and suggests that the final regulations

conform to the language in 45 CFR 155.400(e)(1)(iii) because qualified health plan issuers would not know the date of the appeals decision and would not know whether the premium payment was made within 120 days of the appeals decision. The commenter also opined that the 120-day period in the proposed regulations may be too long for some retroactive enrollment scenarios, such as a situation in which an individual is enrolled in retroactive coverage for only a few months. The commenter also suggested that the appeal premium payment rule in the section 36B regulations should apply only in situations in which the appeal decision is after the individual's unextended due date for filing an income tax return for the year of coverage.

The final regulations do not adopt the suggested changes. The purpose of the appeal premium payment period in the section 36B regulations is to ensure that taxpayers who pay their premiums within a reasonable time following a favorable appeal decision may qualify for a premium tax credit. On the other hand, the payment date rule in 45 CFR 155.400(e)(1)(iii) relates to when the payment must be made to effectuate the retroactive coverage. Qualified health plan issuers need to know the date they received the enrollment transaction and thus whether the premium payments were timely made to effectuate the retroactive coverage, but have no need to know whether the payments were made within 120 days of the appeal decision. In addition, the 120-day period is needed to provide equitable treatment, whether the appeal decision is before or after the unextended due date for filing an income tax return for the year of coverage. It would be inequitable to allow a taxpayer who gets a favorable appeal decision five days after the unextended due date of his or her tax return the benefit of the 120-day appeal premium payment period but not extend the same benefit to a taxpayer who gets an appeal decision five days before the unextended due date.

3. Benchmark Plan Premium

a. Pediatric Dental Benefits

Under the existing section 36B regulations, if a member of a taxpayer's coverage family is enrolled in a stand-alone dental plan, the portion of the monthly premium for the stand-alone dental plan allocable to pediatric dental benefits is added to the taxpayer's monthly enrollment premium in determining the taxpayer's premium assistance amount for the month. Under the existing regulations, however, the

portion of the monthly premium for a stand-alone dental plan allocable to pediatric dental benefits does not affect the taxpayer's applicable benchmark plan premium.

Because the existing regulations frustrate the goal of section 36B of making coverage for essential health benefits affordable to individuals eligible for the premium tax credit, the proposed regulations provide that, if an Exchange offers one or more silver-level qualified health plans that do not include pediatric dental benefits, the applicable benchmark plan is determined by ranking (1) the premiums for the silver-level qualified health plans that include pediatric dental benefits offered by the Exchange and (2) the aggregate of the premiums for the silver-level qualified health plans offered by the Exchange that do not include pediatric dental benefits plus the portion of the premium allocable to pediatric dental benefits for stand-alone dental plans offered by the Exchange. In constructing this ranking, the premium for the lowest-cost silver plan that does not include pediatric dental benefits is added to the premium allocable to pediatric dental benefits for the lowest cost stand-alone dental plan, and similarly, the premium for the second lowest-cost silver plan that does not include pediatric dental benefits is added to the premium allocable to pediatric dental benefits for the second lowest-cost stand-alone dental plan. The second lowest-cost amount from this combined ranking of premiums is the taxpayer's applicable benchmark plan premium. Finally, the proposed regulations provide that the rule for determining the applicable benchmark plan for situations in which an Exchange offers one or more silver-level qualified health plans that do not cover pediatric dental benefits (the pediatric dental rule) is applicable for taxable years beginning after December 31, 2018.

One commenter noted that the effect of the rule in the proposed regulations relating to pediatric dental benefits is that some taxpayers will have a lower monthly premium assistance amount as compared to their monthly premium assistance amount under the existing section 36B regulations. In particular, the commenter pointed to Example 4 of § 1.36B–3(f)(9) of the proposed regulations in which the taxpayer's benchmark plan premium is lower under the rules of the proposed regulations than under the existing section 36B regulations. Under this example, the applicable benchmark plan premium would be based on the lowest-cost rather than the second-lowest-cost

silver-level qualified health plan. The commenter suggested that this is likely not a result intended by the Treasury Department and the IRS and recommended that the final regulations include a revision to the language of the proposed regulations to fix this unintended result.

The final regulations adopt the recommendation in this comment. Under the final regulations, if one or more silver-level qualified health plans offered through an Exchange do not cover pediatric dental benefits, the premium for the applicable benchmark plan is determined based on the second lowest-cost option among (i) the silver-level qualified health plans that are offered by the Exchange to the members of the coverage family and that provide pediatric dental benefits; and (ii) the silver-level qualified health plans that are offered by the Exchange to the members of the coverage family that do not provide pediatric dental benefits in conjunction with the second lowest-cost portion of the premium for a stand-alone dental plan (within the meaning of section 1311(d)(2)(B)(ii) of the Affordable Care Act (42 U.S.C. 18031(d)(2)(B)(ii)) offered by the Exchange to the members of the coverage family that is properly allocable to pediatric dental benefits. Thus, under the final regulations, if a taxpayer's coverage family is able to enroll in one or more silver-level qualified health plans that do not provide pediatric dental benefits, the second lowest-cost portion of the premium for a stand-alone dental plan offered by the Exchange to the members of the coverage family that is properly allocable to pediatric dental benefits is added to the premium for each of those silver-level plans in determining the taxpayer's applicable benchmark plan.

One commenter requested clarification on how to determine the portion of the premium of a stand-alone dental plan properly allocable to the cost of pediatric dental benefits. According to the commenter, the portion of a plan's premium that is allocable to each essential health benefit (EHB) is determined by using an EHB factor (a multiplier that applies to the plan and represents the portion of the total benefit package that represents the EHB), and the EHB factor does not change based on who is purchasing the plan and what benefits they are eligible to use. The commenter asks for clarification on if, and how, an EHB factor is to be applied to a stand-alone dental plan and whether a stand-alone dental plan should have a different EHB factor apply based on whether children, or only adults, are enrolled in the plan.

The determination of the portion of the premium of a stand-alone dental plan properly allocable to pediatric dental benefits is outside the scope of these regulations. However, HHS has confirmed that, under its guidance, if no members of a taxpayer's coverage family are eligible for pediatric dental benefits, the portion of the premium allocable to pediatric dental benefits for all stand-alone dental plans the family may enroll in is \$0.

Another commenter stated that the pediatric dental rule in the proposed regulations is inconsistent with the provisions of section 36B. Specifically, the commenter contends that the clear meaning of section 36B(b)(3)(E) is that the portion of a stand-alone pediatric dental plan premium allocable to pediatric dental benefits is added only to the enrollment premium, not the benchmark plan premium, in computing the premium tax credit, and is added only for taxpayers who have a family member who enrolls in a stand-alone dental plan. In addition, the commenter opines that the pediatric dental rule in the proposed regulations is overly complex and provides minimal benefit to a small group of taxpayers.

The Treasury Department and the IRS disagree that the pediatric dental rule is inconsistent with the provisions of section 36B. Although, as noted by the commenter, section 36B(b)(3)(E) relates only to the portion of a stand-alone dental plan premium that is added to a taxpayer's enrollment premium, the proposed regulations do not rely upon an interpretation of section 36B(b)(3)(E). Rather, as discussed in the preamble of the proposed regulations, the pediatric dental rule is based on statutory references to "self-only coverage" and "family coverage" in section 36B(b)(3)(B)(ii), and is consistent with the overall goal of section 36B, which is to make affordable the coverage of each of the essential health benefits described in section 1302(b) of the Affordable Care Act for individuals eligible for a premium tax credit. As discussed, that coverage may be obtained from either a qualified health plan covering all of the essential health benefits or one covering all benefits except pediatric dental in combination with a stand-alone dental plan. Finally, although the pediatric dental rule does add some complexity to the determination of a taxpayer's applicable benchmark plan, the rule will, in general, not result in more complexity to taxpayers because they generally use the benchmark plan premium amount reported to them by Exchanges to compute their premium tax credit. In addition, the pediatric dental rule in the final regulations,

which, for stand-alone dental plans, considers just the second lowest-cost portion of the premium properly allocable to pediatric dental benefits in the determination of a taxpayer's applicable benchmark plan, is less complex than the rule in the proposed regulations, which requires consideration of both the lowest-cost and the second lowest-cost portion.

Other commenters supported the pediatric dental rule and asked that taxpayers be allowed to compute their applicable benchmark plan using the pediatric dental rule in the proposed regulations for taxable years beginning before January 1, 2019. However, taxpayers must know their benchmark plan premium amount to properly compute their premium tax credit and, consequently, Exchanges must provide this information to taxpayers. Because this pediatric dental rule involves a change in the manner in which a taxpayer's applicable benchmark plan is determined, Exchanges need time to implement the new rule and have indicated that they are likely unable to do so for taxable years beginning before January 1, 2019. Consequently, the final regulations do not adopt this comment.

b. Members of Coverage Family Residing in Different States

Under existing § 1.36B-3(f)(4), if members of a taxpayer's family reside in different states and enroll in separate qualified health plans, the premium for the taxpayer's applicable benchmark plan is the sum of the premiums for the applicable benchmark plans for each group of family members living in the same state. Because this rule may not accurately reflect the cost of available coverage for a taxpayer whose family members reside in different locations in the same state, the proposed regulations provide that if members of a taxpayer's coverage family reside in different locations, whether within the same state or in different states, the taxpayer's benchmark plan premium is the sum of the premiums for the applicable benchmark plans for each group of coverage family members residing in different locations, based on the plans offered to the group through the Exchange for the rating area where the group resides. The proposed regulations provide that the rules for calculating the premium tax credit operate the same for families residing in multiple locations within a state and families residing in multiple states.

One commenter expressed concern that the rule in the proposed regulations concerning the benchmark plan premium for members of the coverage family residing in different locations

could result in unequal treatment of separate families, particularly in Marketplaces in which there are many rating areas within a relatively small geographic area and numerous plans are available for enrollment in many or all rating areas. Thus, the commenter asked that Marketplaces be allowed to use their own benchmark plan rating methodology rather than the rule in the proposed regulations for members of the coverage family who reside in different locations within a state.

The final regulations do not adopt this comment. The amount of a taxpayer's premium tax credit depends on the taxpayer's applicable benchmark plan and the premium for that plan. Allowing Exchanges to use different methodologies to determine the benchmark plan premium could result in inequitable treatment of taxpayers in different locations. One Exchange's methodology would undoubtedly provide a more generous benchmark plan premium for taxpayers who enroll in a qualified health plan through that Exchange as compared to taxpayers who enroll through another Exchange using a different methodology.

Another commenter asked that the final regulations clarify how the rule relating to family members residing in different locations works for farm workers who frequently migrate to find agricultural work, especially those who stay enrolled in the same plan despite the relocations. The rule concerning family members residing in different locations has no unique effect for individuals who frequently move to new locations and thus the final regulations include no new rules addressing this situation. HHS regulations at 45 CFR 155.335(e) require individuals who move to a new rating area to inform the Exchange in the new rating area of their move. The move may require a recomputation of the individual's advance credit payments, or perhaps necessitate the individual to enroll in a new qualified health plan, both of which are determined by the Exchange in the new rating area.

c. Aggregation of Silver-level Policies

Existing § 1.36B-3(f)(3) provides that if one or more silver-level plans offered through an Exchange do not cover all members of a taxpayer's coverage family under one policy (for example, because an issuer will not cover a taxpayer's dependent parent on the same policy the taxpayer enrolls in), the premium for the applicable benchmark plan may be the premium for a single policy or for more than one policy, whichever is the second lowest-cost silver option. Because this rule is complex for

taxpayers and difficult for Exchanges and the IRS to administer, the proposed regulations delete the existing rule and provide a new rule in its place. Under the proposed regulations, if a silver-level plan offers coverage to all members of a taxpayer's coverage family who reside in the same location under a single policy, the plan premium taken into account for purposes of determining the applicable benchmark plan is the premium for that policy. However, if a silver-level plan would require multiple policies to cover all members of a taxpayer's coverage family who reside in the same location, the plan premium taken into account for purposes of determining the applicable benchmark plan is the sum of the premiums for self-only policies under the plan for each member of the coverage family who resides in the same location. The proposed regulations also requested comments on an alternative rule under which the sum of the premiums for self-only policies under a plan for each member of the taxpayer's coverage family would always be used to determine a taxpayer's applicable benchmark plan.

One commenter asked that the final regulations adopt the alternative rule discussed in the preamble to the proposed regulations concerning the determination of a taxpayer's applicable benchmark plan, not the rules in the proposed regulations, which vary based on whether a single policy or multiple policies are needed to cover a taxpayer's family. The commenter opined that this alternative rule has the potential to streamline the applicable benchmark plan calculation with minimal impact to the amount of premium tax credit a taxpayer is allowed.

The final regulations do not adopt this comment. Under HHS regulations, the qualified health plan premium for a taxpayer with three dependents is not increased by adding one or more additional dependents to the taxpayer's family. 45 CFR 147.102(c)(1). That is, the portion of the premium due to the taxpayer's dependents is capped at three dependents and does not increase as a result of adding more dependents to the family. However, if the alternative rule suggested by the commenter is adopted, a taxpayer with four or more dependents would have a higher benchmark plan premium than a similarly-situated taxpayer with three dependents even though the additional dependents do not add to the cost of the coverage for the taxpayer with four or more dependents. Thus, aggregating the sum of the self-only policies under a plan for each member of a taxpayer's coverage family may provide an undue

benefit to taxpayers with four or more dependents. Accordingly, this approach should be limited to situations in which a silver-level plan requires multiple policies to cover all members of a taxpayer's coverage family who reside in the same location.

d. Effective/Applicability Dates

Under the proposed regulations, the changes to the rules concerning the determination of a taxpayer's applicable benchmark plan are proposed to be applicable for tax years beginning after December 31, 2018. Commenters noted that State-based Marketplaces often have very different eligibility and enrollment systems from the Federally-Facilitated Marketplace and from each other, and the changes to the applicable benchmark plan rules will require significant changes to their systems and long timelines for implementation. Consequently, the commenters asked that the Treasury Department and the IRS provide flexibility to State-based Marketplaces and provide ample time between the effective date of the final regulations and the date the states must implement the benchmark plan changes.

The final regulations do not alter the applicability date for the rule for computing the benchmark plan. Doing so would permit inequitable treatment of taxpayers in different locations and potentially have an adverse impact on certain taxpayers. Thus, the final regulations provide that the changes to the benchmark plan rules are applicable for taxable years beginning after December 31, 2018.

4. Information Reporting

The proposed regulations provide that when multiple families enroll in a single qualified health plan and advance credit payments are made for the coverage, the enrollment premiums reported by the Exchange for each family are the family's allocable share of the enrollment premiums, which is based on the proportion of each family's applicable benchmark plan premium. One commenter requested clarification that this reporting rule applies only in situations in which a taxpayer requests financial assistance through advance credit payments or cost-sharing reductions, or is seeking to enroll in Medicaid. The final regulations, like the proposed regulations, provide that the Exchange must report a portion of the plan's enrollment premium to each enrolled family if multiple families enroll in a single qualified health plan and advance credit payments are made for coverage under the plan. The portion reported is based on the proportion of

each family's applicable benchmark plan premium.

The proposed regulations also provide that, if an individual's coverage in a qualified health plan is terminated before the last day of a month, or if an individual is enrolled in coverage after the first day of a month and the coverage is effective on the date of the individual's birth, adoption, or placement for adoption or in foster care, or on the effective date of a court order, an Exchange must report the enrollment premiums for the month (excluding the premium allocated to benefits in excess of essential health benefits), reduced by any amount that was refunded because the enrollment was for less than a full month. This reporting requirement was proposed to apply for taxable years beginning after December 31, 2016.

One commenter expressed concern with the rule requiring that Exchanges reduce the reported enrollment premium by any amounts of the enrollment premiums that are refunded by the issuer of the qualified health plan. The commenter stated that this requirement is not something that currently is captured by its reporting system, and updating the system would require an effort that would be out of scale with the small size of the population enrolled for less than a full month. The commenter suggests that refund information could be obtained when a taxpayer computes his or her premium tax credit on the taxpayer's Federal income tax return.

Alternatively, the commenter requested that this requirement become effective for a taxable year later than 2017. To provide enrollment systems additional time to implement the updates and system modifications necessary to accurately report refunds for partial months of coverage, the final regulations delay the applicability date for this rule by two years, so that it applies for taxable years beginning after December 31, 2018. Exchanges able to comply with the reporting rule before that date are encouraged to do so.

Effective/Applicability Date

Except as otherwise provided, these final regulations apply for taxable years beginning after December 31, 2016. The rules relating to the benchmark plan premium described in section 3 of this preamble and the rules relating to reporting by the Exchanges described in section 4 of this preamble apply for taxable years beginning after December 31, 2018. As discussed in the Effective/Applicability Date section of the preamble to the proposed regulations, taxpayers may rely on certain provisions

of the proposed regulations for taxable years ending after December 31, 2013.

See section 1.d of this preamble for a discussion of the effective date/applicability date for proposed regulations regarding opt-out arrangements.

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory assessment is not required.

It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that the information collection required under these regulations is imposed under section 36B. Consistent with the statute, these regulations require Exchanges to report certain coverage information to the IRS and to furnish a statement to the responsible individual who enrolled an individual or family in the coverage. These regulations merely provide the method for reporting the information and furnishing the statements required under section 36B. Moreover, the regulations attempt to minimize the burden associated with this collection of information by limiting reporting to the information that the IRS requires to administer the premium tax credit.

Based on these facts, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking that preceded this regulation was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business. No comments were received.

Drafting Information

The principal authors of these proposed regulations are Lisa Mojiri-Azad, Shareen S. Pflanz, and Stephen J. Toomey of the Office of Associate Chief Counsel (Income Tax and Accounting). However, other personnel from the IRS and the Treasury Department participated in the development of the regulations.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes,

Penalties, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 301 are amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.36B–0 is amended by:

- 1. Adding the entries for § 1.36B–2(b)(6)(i) and (ii).
- 2. Redesignating entry for § 1.36B–2(c)(4) as (c)(5) and adding new entries for § 1.36B–2(c)(3)(v)(A)(7), (c)(4), (c)(4)(i), (c)(4)(ii), (c)(4)(ii)(A), (c)(4)(ii)(B), (c)(5), (d), and (e).
- 3. Redesignating entry for § 1.36B–3(c)(4) as (c)(5) and adding a new entry for § 1.36B–3(c)(4).
- 4. Revising entries for § 1.36B–3(d)(1) and (2).
- 5. Revising entries for § 1.36B–3(f)(3), (4), and (5).
- 6. Adding entries for § 1.36B–3(f)(5)(i) and (ii).
- 7. Revising entries for § 1.36B–3(f)(6) and (7).
- 8. Adding entries for § 1.36B–3(f)(8), (f)(9), (m), and (n).
- 9. Adding entries for § 1.36B–5(c)(3)(iii), (c)(3)(iii)(A), and (c)(3)(iii)(B).

The revisions and additions read as follows:

§ 1.36B–0 Table of contents.

■ **Par. 3.** Section 1.36B–1 is amended by revising paragraphs (l), (m), and (o) to read as follows:

§ 1.36B–1 Premium tax credit definitions.

* * * * *

(l) *Self-only coverage.* Self-only coverage means health insurance that covers one individual and provides coverage for the essential health benefits as defined in section 1302(b)(1) of the Affordable Care Act (42 U.S.C. 18022).

(m) *Family coverage.* Family coverage means health insurance that covers more than one individual and provides coverage for the essential health benefits as defined in section 1302(b)(1) of the Affordable Care Act (42 U.S.C. 18022).

* * * * *

(o) *Effective/applicability date.* Except for paragraphs (l) and (m), this section applies to taxable years ending after December 31, 2013. Paragraphs (l) and (m) of this section apply to taxable years beginning after December 31, 2018. Paragraphs (l) and (m) of § 1.36B–1 as contained in 26 CFR part I edition revised as of April 1, 2016, apply to taxable years ending after December 31, 2013, and beginning before January 1, 2019.

■ **Par. 4.** Section 1.36B–2 is amended by:

- 1. Revising paragraph (b)(6) introductory text and paragraphs (b)(6)(i) and (ii).
- 2. Adding three sentences to the end of paragraph (c)(2)(v).
- 3. Revising paragraph (c)(3)(i).
- 4. Revising paragraph (c)(3)(iii)(A).
- 5. Removing the sentence at the end of the paragraph (c)(3)(v)(A)(3) and adding in its place three new sentences.
- 6. Adding paragraph (c)(3)(v)(A)(7).
- 7. Revising paragraph (c)(4).
- 8. Removing and reserving paragraph (d).
- 9. Adding paragraph (e).

The revisions and additions read as follows:

§ 1.36B–2 Eligibility for premium tax credit.

* * * * *

(b) * * *

(6) *Special rule for taxpayers with household income below 100 percent of the Federal poverty line for the taxable year*—(i) *In general.* A taxpayer (other than a taxpayer described in paragraph (b)(5) of this section) whose household income for a taxable year is less than 100 percent of the Federal poverty line for the taxpayer's family size is treated as an applicable taxpayer for the taxable year if—

(A) The taxpayer or a family member enrolls in a qualified health plan through an Exchange for one or more months during the taxable year;

(B) An Exchange estimates at the time of enrollment that the taxpayer's household income will be at least 100 percent but not more than 400 percent of the Federal poverty line for the taxable year;

(C) Advance credit payments are authorized and paid for one or more months during the taxable year; and

(D) The taxpayer would be an applicable taxpayer if the taxpayer's household income for the taxable year was at least 100 but not more than 400 percent of the Federal poverty line for the taxpayer's family size.

(ii) *Exceptions.* This paragraph (b)(6) does not apply for an individual who, with intentional or reckless disregard for the facts, provides incorrect information to an Exchange for the year of coverage. A reckless disregard of the facts occurs if the taxpayer makes little or no effort to determine whether the information provided to the Exchange is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct a reasonable person would observe. A disregard of the facts is intentional if the

taxpayer knows the information provided to the Exchange is inaccurate.

* * * * *

(c) * * *

(2) * * *

(v) * * * This paragraph (c)(2)(v)

does not apply for an individual who, with intentional or reckless disregard for the facts, provides incorrect information to an Exchange for the year of coverage. A reckless disregard of the facts occurs if the taxpayer makes little or no effort to determine whether the information provided to the Exchange is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct a reasonable person would observe. A disregard of the facts is intentional if the taxpayer knows that information provided to the Exchange is inaccurate.

* * * * *

(3) * * *

(i) *In general.* For purposes of section 36B, an employee who may enroll in an eligible employer-sponsored plan (as defined in section 5000A(f)(2) and the regulations under that section) that is minimum essential coverage, and an individual who may enroll in the plan because of a relationship to the employee (a related individual), are eligible for minimum essential coverage under the plan for any month only if the plan is affordable and provides minimum value. Except for the Nonappropriated Fund Health Benefits Program of the Department of Defense, established under section 349 of the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103–337; 10 U.S.C. 1587 note), government-sponsored minimum essential coverage is not an eligible employer-sponsored plan. The Nonappropriated Fund Health Benefits Program of the Department of Defense is considered eligible employer-sponsored coverage, but not government-sponsored coverage, for purposes of determining if an individual is eligible for minimum essential coverage under this section.

* * * * *

(iii) * * *

(A) *Failure to enroll in plan.* An employee or related individual may be eligible for minimum essential coverage under an eligible employer-sponsored plan for a month during a plan year if the employee or related individual could have enrolled in the plan for that month during an open or special enrollment period for the plan year. If an enrollment period relates to coverage for not only the upcoming plan year (or the current plan year in the case of an enrollment period other than an open enrollment period), but also coverage in

one or more succeeding plan years, this paragraph (c)(3)(iii)(A) applies only to eligibility for the coverage in the upcoming plan year (or the current plan year in the case of an enrollment period other than an open enrollment period).

* * * * *

(v) * * *

(A) * * *

(3) * * * This paragraph (c)(3)(v)(A)(3) does not apply for an individual who, with intentional or reckless disregard for the facts, provides incorrect information to an Exchange concerning the portion of the annual premium for coverage for the employee or related individual under the plan. A reckless disregard of the facts occurs if the taxpayer makes little or no effort to determine whether the information provided to the Exchange is accurate under circumstances that demonstrate a substantial deviation from the standard of conduct a reasonable person would observe. A disregard of the facts is intentional if the taxpayer knows that the information provided to the Exchange is inaccurate.

* * * * *

(7) *Opt-out arrangements.* [Reserved]

* * * * *

(4) *Special eligibility rules*—(i) *Related individual not claimed as a personal exemption deduction.* An individual who may enroll in minimum essential coverage because of a relationship to another person eligible for the coverage, but for whom the other eligible person does not claim a personal exemption deduction under section 151, is treated as eligible for minimum essential coverage under the coverage only for months that the related individual is enrolled in the coverage.

(ii) *Exchange unable to discontinue advance credit payments*—(A) *In general.* If an individual who is enrolled in a qualified health plan for which advance credit payments are made informs the Exchange that the individual is or will soon be eligible for other minimum essential coverage and that advance credit payments should be discontinued, but the Exchange does not discontinue advance credit payments for the first calendar month beginning after the month the individual informs the Exchange, the individual is treated as eligible for the other minimum essential coverage no earlier than the first day of the second calendar month beginning after the first month the individual may enroll in the other minimum essential coverage.

(B) *Medicaid or CHIP.* If a determination is made that an individual who is enrolled in a qualified

health plan for which advance credit payments are made is eligible for Medicaid or CHIP but the advance credit payments are not discontinued for the first calendar month beginning after the eligibility determination, the individual is treated as eligible for the Medicaid or CHIP no earlier than the first day of the second calendar month beginning after the eligibility determination.

(d) [Reserved]

(e) *Effective/applicability date.* (1) Except as provided in paragraph (e)(2) of this section, this section applies to taxable years ending after December 31, 2013.

(2) Paragraph (b)(6)(ii), the last three sentences of paragraph (c)(2)(v), paragraph (c)(3)(i), paragraph (c)(3)(iii)(A), the last three sentences of paragraph (c)(3)(v)(A)(3), and paragraph (c)(4) of this section apply to taxable years beginning after December 31, 2016. Paragraphs (b)(6), (c)(3)(i), (c)(3)(iii)(A), and (c)(4) of § 1.36B–2 as contained in 26 CFR part I edition revised as of April 1, 2016, apply to taxable years ending after December 31, 2013, and beginning before January 1, 2017.

■ **Par. 5.** Section 1.36B–3 is amended by:

■ 1. Redesignating paragraph (c)(4) as paragraph (c)(5) and adding a new paragraph (c)(4).

■ 2. Revising paragraph (d)(1).

■ 3. Revising paragraph (d)(2).

■ 4. Revising paragraph (f).

■ 5. Adding paragraph (n).

The revisions and additions read as follows:

§ 1.36B–3 Computing the premium tax credit amount.

* * * * *

(c) * * *

(4) *Appeals of coverage eligibility.* A taxpayer who is eligible for advance credit payments pursuant to an eligibility appeal decision implemented under 45 CFR 155.545(c)(1)(ii) for coverage of a member of the taxpayer's coverage family who, based on the appeal decision, retroactively enrolls in a qualified health plan is considered to have met the requirement in paragraph (c)(1)(ii) of this section for a month if the taxpayer pays the taxpayer's share of the premiums for coverage under the plan for the month on or before the 120th day following the date of the appeals decision.

* * * * *

(d) * * *

(1) *Premium assistance amount.* The premium assistance amount for a coverage month is the lesser of—

(i) The premiums for the month, reduced by any amounts that were refunded, for one or more qualified health plans in which a taxpayer or a member of the taxpayer's family enrolls (enrollment premiums); or

(ii) The excess of the adjusted monthly premium for the applicable benchmark plan (benchmark plan premium) over $\frac{1}{12}$ of the product of a taxpayer's household income and the applicable percentage for the taxable year (the taxpayer's contribution amount).

(2) *Examples.* The following examples illustrate the rules of paragraph (d)(1) of this section.

Example 1. Taxpayer Q is single and has no dependents. Q enrolls in a qualified health plan with a monthly premium of \$400. Q's monthly benchmark plan premium is \$500, and his monthly contribution amount is \$80. Q's premium assistance amount for a coverage month is \$400 (the lesser of \$400, Q's monthly enrollment premium, and \$420, the difference between Q's monthly benchmark plan premium and Q's contribution amount).

Example 2. (i) Taxpayer R is single and has no dependents. R enrolls in a qualified health plan with a monthly premium of \$450. The difference between R's benchmark plan premium and contribution amount for the month is \$420.

(ii) The issuer of R's qualified health plan is notified that R died on September 20. The issuer terminates coverage as of that date and refunds the remaining portion of the September enrollment premiums (\$150) for R's coverage.

(iii) R's premium assistance amount for each coverage month from January through August is \$420 (the lesser of \$450 and \$420). Under paragraph (d)(1) of this section, R's premium assistance amount for September is the lesser of the enrollment premiums for the month, reduced by any amounts that were refunded (\$300 (\$450–\$150)) or the difference between the benchmark plan premium and the contribution amount for the month (\$420). R's premium assistance amount for September is \$300, the lesser of \$420 and \$300.

Example 3. The facts are the same as in *Example 2* of this paragraph (d)(2), except that the qualified health plan issuer does not refund any enrollment premiums for September. Under paragraph (d)(1) of this section, R's premium assistance amount for September is \$420, the lesser of \$450 and \$420.

* * * * *

(f) *Applicable benchmark plan—*(1) *In general.* Except as otherwise provided in this paragraph (f), the applicable benchmark plan for each coverage month is the second-lowest-cost silver plan (as described in section 1302(d)(1)(B) of the Affordable Care Act (42 U.S.C. 18022(d)(1)(B))) offered to the taxpayer's coverage family through the Exchange for the rating area where the taxpayer resides for—

(i) Self-only coverage for a taxpayer—
(A) Who computes tax under section 1(c) (unmarried individuals other than surviving spouses and heads of household) and is not allowed a deduction under section 151 for a dependent for the taxable year;

(B) Who purchases only self-only coverage for one individual; or

(C) Whose coverage family includes only one individual; and

(ii) Family coverage for all other taxpayers.

(2) *Family coverage.* The applicable benchmark plan for family coverage is the second lowest-cost silver plan that would cover the members of the taxpayer's coverage family (such as a plan covering two adults if the members of a taxpayer's coverage family are two adults).

(3) *Silver-level plan not covering pediatric dental benefits.* If one or more silver-level qualified health plans offered through an Exchange do not cover pediatric dental benefits, the premium for the applicable benchmark plan is determined based on the second lowest-cost option among—

(i) The silver-level qualified health plans that are offered by the Exchange to the members of the coverage family and that provide pediatric dental benefits; and

(ii) The silver-level qualified health plans that are offered by the Exchange to the members of the coverage family that do not provide pediatric dental benefits in conjunction with the second lowest-cost portion of the premium for a stand-alone dental plan (within the meaning of section 1311(d)(2)(B)(ii) of the Affordable Care Act (42 U.S.C. 18031(d)(2)(B)(ii)) offered by the Exchange to the members of the coverage family that is properly allocable to pediatric dental benefits determined under guidance issued by the Secretary of Health and Human Services.

(4) *Family members residing in different locations.* If members of a taxpayer's coverage family reside in different locations, the taxpayer's benchmark plan premium is the sum of the premiums for the applicable benchmark plans for each group of coverage family members residing in different locations, based on the plans offered to the group through the Exchange where the group resides. If all members of a taxpayer's coverage family reside in a single location that is different from where the taxpayer resides, the taxpayer's benchmark plan premium is the premium for the applicable benchmark plan for the coverage family, based on the plans offered through the Exchange to the

taxpayer's coverage family for the rating area where the coverage family resides.

(5) *Single or multiple policies needed to cover the family*—(i) *Policy covering a taxpayer's family.* If a silver-level plan or a stand-alone dental plan offers coverage to all members of a taxpayer's coverage family who reside in the same location under a single policy, the premium (or allocable portion thereof, in the case of a stand-alone dental plan) taken into account for the plan for purposes of determining the applicable benchmark plan under paragraphs (f)(1), (f)(2), and (f)(3) of this section is the premium for this single policy.

(ii) *Policy not covering a taxpayer's family.* If a silver-level qualified health plan or a stand-alone dental plan would require multiple policies to cover all members of a taxpayer's coverage family who reside in the same location (for example, because of the relationships within the family), the premium (or allocable portion thereof, in the case of a stand-alone dental plan) taken into account for the plan for purposes of determining the applicable benchmark plan under paragraphs (f)(1), (f)(2), and (f)(3) of this section is the sum of the premiums (or allocable portion thereof, in the case of a stand-alone dental plan) for self-only policies under the plan for each member of the coverage family who resides in the same location.

(6) *Plan not available for enrollment.* A silver-level qualified health plan or a stand-alone dental plan that is not open to enrollment by a taxpayer or family member at the time the taxpayer or family member enrolls in a qualified health plan is disregarded in determining the applicable benchmark plan.

(7) *Benchmark plan terminates or closes to enrollment during the year.* A silver-level qualified health plan or a stand-alone dental plan that is used for purposes of determining the applicable benchmark plan under this paragraph (f) for a taxpayer does not cease to be the applicable benchmark plan for a taxable year solely because the plan or a lower cost plan terminates or closes to enrollment during the taxable year.

(8) *Only one silver-level plan offered to the coverage family.* If there is only one silver-level qualified health plan or one stand-alone dental plan offered through an Exchange that would cover all members of a taxpayer's coverage family who reside in the same location (whether under one policy or multiple policies), that plan is used for purposes of determining the taxpayer's applicable benchmark plan.

(9) *Examples.* The following examples illustrate the rules of this paragraph (f). Unless otherwise stated, in each

example the plans are open to enrollment to a taxpayer or family member at the time of enrollment and are offered through the Exchange for the rating area where the taxpayer resides:

Example 1. Single taxpayer enrolls in Exchange coverage. Taxpayer A is single, has no dependents, and enrolls in a qualified health plan. The Exchange in the rating area in which A resides offers only silver-level qualified health plans that provide pediatric dental benefits. Under paragraphs (f)(1) and (f)(2) of this section, A's applicable benchmark plan is the second lowest cost silver plan providing self-only coverage for A.

Example 2. Single taxpayer enrolls with dependent child through an Exchange where all qualified health plans provide pediatric dental benefits. Taxpayer B is single and claims her 12-year old daughter, C, as a dependent. B purchases family coverage for herself and C. The Exchange in the rating area in which B and C reside offers qualified health plans that provide pediatric dental benefits but does not offer qualified health plans without pediatric dental benefits. Under paragraphs (f)(1) and (f)(2) of this section, B's applicable benchmark plan is the second lowest-cost silver plan providing family coverage to B and C.

Example 3. Single taxpayer enrolls with dependent child through an Exchange where one or more qualified health plans do not provide pediatric dental benefits. (i) Taxpayer D is single and claims his 10-year old son, E, as a dependent. The Exchange in the rating area in which D and E reside offers three silver-level qualified health plans, one of which provides pediatric dental benefits (S1) and two of which do not (S2 and S3), in which D and E may enroll. The Exchange also offers two stand-alone dental plans (DP1 and DP2) available to D and E. The monthly premiums allocable to essential health benefits for the silver-level plans are as follows:

S1—\$650
S2—\$620
S3—\$590

(ii) The monthly premiums, and the portion of the premium allocable to pediatric dental benefits, for the two dental plans are as follows:

DP1—\$50 (\$20 allocable to pediatric dental benefits)
DP2—\$40 (\$15 allocable to pediatric dental benefits).

(iii) Under paragraph (f)(3) of this section, D's applicable benchmark plan is the second lowest cost option among the following offered by the rating area in which D resides: Silver-level qualified health plans providing pediatric dental benefits (\$650 for S1) and the silver-level qualified health plans not providing pediatric dental benefits, in conjunction with the second lowest-cost portion of the premium for a stand-alone dental plan properly allocable to pediatric dental benefits (\$590 for S3 in conjunction with \$20 for DP1 = \$610 and \$620 for S2 in conjunction with \$20 for DP1 = \$640). Under paragraph (e) of this section, the adjusted monthly premium for D's applicable benchmark plan is \$640.

Example 4. Single taxpayer enrolls with dependent adult through an Exchange where one or more qualified health plans do not provide pediatric dental benefits. (i) The facts are the same as in Example 3, except Taxpayer D's coverage family consists of D and D's 22-year old son, F, who is a dependent of D. The monthly premiums allocable to essential health benefits for the silver-level plans are as follows:

S1—\$630
S2—\$590
S3—\$580

(ii) Because no one in D's coverage family is eligible for pediatric dental benefits, \$0 of the premium for a stand-alone dental plan is allocable to pediatric dental benefits in determining A's applicable benchmark plan. Consequently, under paragraphs (f)(1), (f)(2), and (f)(3) of this section, D's applicable benchmark plan is the second lowest-cost option among the following options offered by the rating area in which D resides: Silver-level qualified health plans providing pediatric dental benefits (\$630 for S1) and the silver-level qualified health plans not providing pediatric dental benefits, in conjunction with the second lowest-cost portion of the premium for a stand-alone dental plan properly allocable to pediatric dental benefits (\$580 for S3 in conjunction with \$0 for DP1 = \$580 and \$590 for S2 in conjunction with \$0 for DP1 = \$590). Under paragraph (e) of this section, the adjusted monthly premium for D's applicable benchmark plan is \$590.

Example 5. Single taxpayer enrolls with dependent and nondependent. Taxpayer G is single and resides with his 25-year old daughter, H, and with his 14-year old son, I. G may claim I, but not H, as a dependent. G, H, and I enroll in coverage through the Exchange in the rating area in which they all reside. The Exchange offers only silver-level plans providing pediatric dental benefits. Under paragraphs (f)(1) and (f)(2) of this section, G's applicable benchmark plan is the second lowest-cost silver plan covering G and I. However, H may qualify for a premium tax credit if H is otherwise eligible. See paragraph (h) of this section.

Example 6. Change in coverage family. Taxpayer J is single and has no dependents when she enrolls in a qualified health plan. The Exchange in the rating area in which she resides offers only silver-level plans that provide pediatric dental benefits. On August 1, J has a child, K, whom she claims as a dependent. J enrolls in a qualified health plan covering J and K effective August 1. Under paragraphs (f)(1) and (f)(2) of this section, J's applicable benchmark plan for January through July is the second lowest-cost silver plan providing self-only coverage for J, and J's applicable benchmark plan for the months August through December is the second lowest-cost silver plan covering J and K.

Example 7. Minimum essential coverage for some coverage months. Taxpayer L claims his 6-year old daughter, M, as a dependent. L and M are enrolled for the entire year in a qualified health plan that offers only silver-level plans that provide pediatric dental benefits. L, but not M, is eligible for government-sponsored minimum essential

coverage for September to December. Thus, under paragraph (c)(1)(iii) of this section, January through December are coverage months for M, and January through August are coverage months for L. Because, under paragraphs (d) and (f)(1) of this section, the premium assistance amount for a coverage month is computed based on the applicable benchmark plan for that coverage month, L's applicable benchmark plan for January through August is the second lowest-cost option covering L and M. Under paragraph (f)(1)(i)(C) of this section, L's applicable benchmark plan for September through December is the second lowest-cost silver plan providing self-only coverage for M.

Example 8. Family member eligible for minimum essential coverage for the taxable year. The facts are the same as in *Example 7*, except that L is not eligible for government-sponsored minimum essential coverage for any months and M is eligible for government sponsored minimum essential coverage for the entire year. Under paragraph (f)(1)(i)(C) of this section, L's applicable benchmark plan is the second lowest-cost silver plan providing self-only coverage for L.

Example 9. Benchmark plan premium for a coverage family with family members who reside in different locations. (i) Taxpayer N's coverage family consists of N and her three dependents O, P, and Q. N, O, and P reside together but Q resides in a different location. The monthly applicable benchmark plan premium for N, O, and P is \$1,000 and the monthly applicable benchmark plan premium for Q is \$220.

(ii) Under paragraph (f)(4) of this section, because the members of N's coverage family reside in different locations, the monthly premium for N's applicable benchmark plan is the sum of \$1,000, the monthly premiums for the applicable benchmark plan for N, O, and P, who reside together, and \$220, the monthly applicable benchmark plan premium for Q, who resides in a different location than N, O, and P. Consequently, the premium for N's applicable benchmark plan is \$1,220.

Example 10. Aggregation of silver-level policies for plans not covering a family under a single policy. (i) Taxpayers R and S are married and live with S's mother, T, whom they claim as a dependent. The Exchange for their rating area offers self-only and family coverage at the silver level through Issuers A, B, and C, which each offer only one silver-level plan. The silver-level plans offered by Issuers A and B do not cover R, S, and T under a single policy. The silver-level plan offered by Issuer A costs the following monthly amounts for self-only coverage of R, S, and T, respectively: \$400, \$450, and \$600. The silver-level plan offered by Issuer B costs the following monthly amounts for self-only coverage of R, S, and T, respectively: \$250, \$300, and \$450. The silver-level plan offered by Issuer C provides coverage for R, S, and T under one policy for a \$1,200 monthly premium.

(ii) Under paragraph (f)(5) of this section, Issuer C's silver-level plan that covers R, S, and T under one policy (\$1,200 monthly premium) and Issuer A's and Issuer B's silver-level plans that do not cover R, S and T under one policy are considered in

determining R's and S's applicable benchmark plan. In addition, under paragraph (f)(5)(ii) of this section, in determining R's and S's applicable benchmark plan, the premium taken into account for Issuer A's plan is \$1,450 (the aggregate premiums for self-only policies covering R (\$400), S (\$450), and T (\$600) and the premium taken into account for Issuer B's plan is \$1,000 (the aggregate premiums for self-only policies covering R (\$250), S (\$300), and T (\$450)). Consequently, R's and S's applicable benchmark plan is the Issuer C silver-level plan covering R's and S's coverage family and the premium for their applicable benchmark plan is \$1,200.

Example 11. Benchmark plan premium for a taxpayer with family members who cannot enroll in one policy and who reside in different locations. (i) Taxpayer U's coverage family consists of U, U's mother, V, and U's two daughters, W and X. U and V reside together in Location 1 and W and X reside together in Location 2. The Exchange in the rating area in which U and V reside does not offer a silver-level plan that covers U and V under a single policy, whereas all the silver-level plans offered through the Exchange in the rating area in which W and X reside cover W and X under a single policy. Both Exchanges offer only silver-level plans that provide pediatric dental benefits. The silver plan offered by the Exchange for the rating area in which U and V reside that would cover U and V under self-only policies with the second-lowest aggregate premium costs \$400 a month for self-only coverage for U and \$600 a month for self-only coverage for V. The monthly premium for the second-lowest cost silver plan covering W and X that is offered by the Exchange for the rating area in which W and X reside is \$500.

(ii) Under paragraph (f)(5)(ii) of this section, because multiple policies are required to cover U and V, the members of U's coverage family who reside together in Location 1, the premium taken into account in determining U's benchmark plan is \$1,000, the sum of the premiums for the second-lowest aggregate cost of self-only policies covering U (\$400) and V (\$600) offered by the Exchange to U and V for the rating area in which U and V reside. Under paragraph (f)(5)(i) of this section, because all silver-level plans offered by the Exchange in which W and X reside cover W and X under a single policy, the premium for W and X's coverage that is taken into account in determining U's benchmark plan is \$500, the second-lowest cost silver policy covering W and X that is offered by the Exchange for the rating area in which W and X reside. Under paragraph (f)(4) of this section, because the members of U's coverage family reside in different locations, U's monthly benchmark plan premium is \$1,500, the sum of the premiums for the applicable benchmark plans for each group of family members residing in different locations (\$1,000 for U and V, who reside in Location 1, plus \$500 for W and X, who reside in Location 2).

Example 12. Qualified health plan closed to enrollment. Taxpayer Y has two dependents, Z and AA. Y, Z, and AA enroll in a qualified health plan through the Exchange for the rating area where the family

resides. The Exchange, which offers only qualified health plans that include pediatric dental benefits, offers silver-level plans J, K, L, and M, which are, respectively, the first, second, third, and fourth lowest cost silver plans covering Y's family. When Y's family enrolls, Plan J is closed to enrollment. Under paragraph (f)(6) of this section, Plan J is disregarded in determining Y's applicable benchmark plan, and Plan L is used in determining Y's applicable benchmark plan.

Example 13. Benchmark plan closes to new enrollees during the year. (i) Taxpayers BB, CC, and DD each have coverage families consisting of two adults. In that rating area, Plan 2 is the second lowest cost silver plan and Plan 3 is the third lowest cost silver plan covering the two adults in each coverage family offered through the Exchange. The BB and CC families each enroll in a qualified health plan that is not the applicable benchmark plan (Plan 4) in November during the annual open enrollment period. Plan 2 closes to new enrollees the following June. Thus, on July 1, Plan 3 is the second lowest cost silver plan available to new enrollees through the Exchange. The DD family enrolls in a qualified health plan in July.

(ii) Under paragraphs (f)(1), (f)(2), (f)(3), and (f)(7) of this section, the silver-level plan that BB and CC use to determine their applicable benchmark plan for all coverage months during the year is Plan 2. The applicable benchmark plan that DD uses to determine DD's applicable benchmark plan is Plan 3, because Plan 2 is not open to enrollment through the Exchange when the DD family enrolls.

Example 14. Benchmark plan terminates for all enrollees during the year. The facts are the same as in *Example 13*, except that Plan 2 terminates for all enrollees on June 30. Under paragraphs (f)(1), (f)(2), (f)(3), and (f)(7) of this section, Plan 2 is the silver-level plan that BB and CC use to determine their applicable benchmark plan for all coverage months during the year, and Plan 3 is the applicable benchmark plan that DD uses.

Example 15. Exchange offers only one silver-level plan. Taxpayer EE's coverage family consists of EE, his spouse FF, and their two dependent children GG and HH, who all reside together. The Exchange for the rating area in which they reside offers only one silver-level plan that EE's family may enroll in and the plan does not provide pediatric dental benefits. The Exchange also offers one stand-alone dental plan in which the family may enroll. Under paragraph (f)(8) of this section, the silver-level plan and the stand-alone dental plan offered by the Exchange are used for purposes of determining EE's applicable benchmark plan under paragraph (f)(3) of this section. Moreover, the lone silver-level plan and the lone stand-alone dental plan offered by the Exchange are used for purposes of determining EE's applicable benchmark plan regardless of whether these plans cover EE's family under a single policy or multiples policies.

* * * * *

(n) *Effective/applicability date.* (1) Except as provided in paragraph (n)(2) of this section, this section applies to

taxable years ending after December 31, 2013.

(2) Paragraphs (c)(4), (d)(1) and (d)(2) of this section apply to taxable years beginning after December 31, 2016. Paragraph (f) of this section applies to taxable years beginning after December 31, 2018. Paragraphs (d)(1) and (d)(2) of § 1.36B–3, as contained in 26 CFR part I edition revised as of April 1, 2016, applies to taxable years ending after December 31, 2013, and beginning before January 1, 2017. Paragraph (f) of § 1.36B–3, as contained in 26 CFR part I edition revised as of April 1, 2016, applies to taxable years ending after December 31, 2013, and beginning before January 1, 2019.

■ **Par. 6.** Section 1.36B–5 is amended by:

- 1. Adding a sentence to the end of paragraph (c)(3)(i).
- 2. Adding paragraphs (c)(3)(iii) and (h).

The additions read as follows:

§ 1.36B–5 Information reporting by Exchanges.

(c) * * *
(3) * * *
(i) * * * If advance credit payments are made for coverage under the plan, the enrollment premiums reported to each family under paragraph (c)(1)(viii) of this section are the premiums allocated to the family under § 1.36B–3(h) (allocating enrollment premiums to each taxpayer in proportion to the premiums for each taxpayer’s applicable benchmark plan).

(iii) *Partial month of coverage.*—(A) *In general.* Except as provided in paragraph (c)(3)(iii)(B) of this section, if an individual is enrolled in a qualified health plan after the first day of a month, the amount reported for that month under paragraphs (c)(1)(iv), (c)(1)(v), and (c)(1)(viii) of this section is \$0.

(B) *Certain mid-month enrollments.* For information reporting that is due on or after January 1, 2019, if an individual’s qualified health plan is terminated before the last day of a month, or if an individual is enrolled in coverage after the first day of a month and the coverage is effective on the date of the individual’s birth, adoption, or placement for adoption or in foster care, or on the effective date of a court order, the amount reported under paragraphs (c)(1)(iv) and (c)(1)(v) of this section is the premium for the applicable benchmark plan for a full month of coverage (excluding the premium allocated to benefits in excess of essential health benefits), and the

amount reported under paragraph (c)(1)(viii) of this section is the enrollment premium for the month, reduced by any amounts that were refunded.

(h) *Effective/applicability date.* Except for the last sentence of paragraph (c)(3)(i) of this section and paragraph (c)(3)(iii) of this section, this section applies to taxable years ending after December 31, 2013. The last sentence of paragraph (c)(3)(i) of this section and paragraph (c)(3)(iii) of this section apply to taxable years beginning after December 31, 2018. Paragraph (c)(3) of § 1.36B–5 as contained in 26 CFR part I edition revised as of April 1, 2016, applies to information reporting for taxable years ending after December 31, 2013, and beginning before January 1, 2019.

■ **Par. 7.** Section 1.5000A–3 is amended by adding a new paragraph (e)(3)(ii)(G) to read as follows:

§ 1.5000A–3 Exempt individuals.

(e) * * *
(3) * * *
(ii) * * *
(G) *Opt-out arrangements.* [Reserved]

■ **Par. 8.** Section 1.6011–8 is revised to read as follows:

§ 1.6011–8 Requirement of income tax return for taxpayers who claim the premium tax credit under section 36B.

(a) *Requirement of return.* Except as otherwise provided in this paragraph (a), a taxpayer who receives the benefit of advance payments of the premium tax credit under section 36B must file an income tax return for that taxable year on or before the due date for the return (including extensions of time for filing) and reconcile the advance credit payments. However, if advance credit payments are made for coverage of an individual for whom no taxpayer claims a personal exemption deduction, the taxpayer who attests to the Exchange to the intention to claim a personal exemption deduction for the individual as part of the determination that the taxpayer is eligible for advance credit payments must file a tax return and reconcile the advance credit payments.

(b) *Effective/applicability date.* Except as otherwise provided, this section applies for taxable years beginning after December 31, 2016. Paragraph (a) of § 1.6011–8 as contained in 26 CFR part I edition revised as of April 1, 2016, applies to taxable years ending after December 31, 2013, and beginning before January 1, 2017.

PART 301—PROCEDURE AND ADMINISTRATION

■ **Par. 9.** The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805. * * *

Section 301.6011–2 also issued under 26 U.S.C. 6011(e). * * *

§ 301.6011–2 [Amended]

■ **Par. 10.** Section 301.6011–2(b)(1) is amended by adding “1095–B, 1095–C” after “1094 series”, and removing “1095 series”.

John Dalrymple,

Deputy Commissioner for Service and Enforcement.

Approved: December 8, 2016.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–P

DEPARTMENT OF JUSTICE

28 CFR Parts 0 and 44

[CRT Docket No. 130; AG Order No. 3791–2016 No. RIN 1190–AA71]

Standards and Procedures for the Enforcement of the Immigration and Nationality Act

AGENCY: Civil Rights Division, Department of Justice.

ACTION: Final rule.

SUMMARY: This rule revises the Department of Justice’s (Department’s) regulations implementing a section of the Immigration and Nationality Act (INA) concerning unfair immigration-related employment practices. The revisions conform the regulations to the statutory text as amended, simplify and add definitions of statutory terms, update and clarify the procedures for filing and processing charges of discrimination, ensure effective investigations of unfair immigration-related employment practices, reflect developments in nondiscrimination jurisprudence, reflect changes in existing practices (e.g., electronic filing of charges), reflect the new name of the office within the Department charged with enforcing this statute, and replace outdated references.

DATES: This rule is effective on January 18, 2017.

FOR FURTHER INFORMATION CONTACT: Alberto Ruisanchez, Deputy Special Counsel, Office of Special Counsel for Immigration-Related Unfair Employment Practices, Civil Rights Division, 950 Pennsylvania Avenue

NW., Washington, DC 20530, (202) 616–5594 (voice) or (800) 237–2515 (TTY); or Office of Special Counsel for Immigration-Related Unfair Employment Practices, Civil Rights Division, 950 Pennsylvania Avenue NW., Washington, DC 20530, (202) 353–9338 (voice) or (800) 237–2515 (TTY).

SUPPLEMENTARY INFORMATION:

Executive Summary

The anti-discrimination provision of the Immigration and Nationality Act (INA), section 274B, codified at 8 U.S.C. 1324b, was enacted by Congress as part of the Immigration Reform and Control Act of 1986 (IRCA), Public Law 99–603, to prohibit certain unfair immigration-related employment practices. Congress provided for the appointment of a Special Counsel for Immigration-Related Unfair Employment Practices (Special Counsel) to enforce this provision. Congress has amended 8 U.S.C. 1324b several times. On November 29, 1990, by section 535 of the Immigration Act of 1990, Public Law 101–649, Congress added a new subsection (a)(6) prohibiting covered entities from requesting more or different documents or rejecting valid documents during the employment eligibility verification process. *See* 8 U.S.C. 1324b(a)(6) (1994). On September 30, 1996, by section 421 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, div. C, Congress further amended that provision by providing that unfair documentary practices were unlawful only if done “for the purpose or with the intent of discriminating against an individual in violation of” 8 U.S.C. 1324b(a)(1). *See* 8 U.S.C. 1324b(a)(6) (2000). The Department has not updated the set of regulations implementing section 1324b, 28 CFR part 44, to reflect the statutory text as amended by IIRIRA. The revisions promulgated by this final rule apply to the Special Counsel’s investigations and to cases adjudicated under section 1324b.

The revisions to 28 CFR part 44 incorporate the intent requirement contained in the amended statute, and also change the regulatory provisions regarding the Special Counsel’s investigation of unfair immigration-related employment practices. Specifically, the revisions update the ways in which charges of discrimination can be filed, clarify the procedures for processing such charges, and conform the regulations to the statutory text to clarify the timeframes within which the Special Counsel may file a complaint with the Office of the Chief Administrative Hearing Officer

(OCAHO). The revisions also simplify the definitions of certain statutory terms and define additional statutory terms to clarify the full extent of the prohibitions against unfair immigration-related employment practices and to eliminate ambiguities in the regulatory text. Additionally, the revisions codify the Special Counsel’s existing authority to seek and ensure the preservation of evidence during investigations of alleged unfair immigration-related employment practices. The revisions also replace references to the former Immigration and Naturalization Service with references to the Department of Homeland Security (DHS), where applicable, in accordance with the Homeland Security Act of 2002, Public Law 107–296 (HSA).

Finally, the revisions reflect the change in the name of the office within the Department’s Civil Rights Division that enforces the anti-discrimination provision, from the Office of Special Counsel for Immigration-Related Unfair Employment Practices (OSC) to the Immigrant and Employee Rights Section.

Summary of Changes to the Final Rule

The Department carefully considered the 47 individually-submitted comments received in response to the Notice of Proposed Rulemaking (NPRM) entitled Standards and Procedures for the Enforcement of the INA that was published in the **Federal Register** on August 15, 2016 (81 FR 53965). Following several commenters’ requests for an extension of the original 30-day comment period, on September 14, 2016, the Department extended the comment period by an additional 30 days, for a total of 60 days (81 FR 63155). The comment period closed on October 14, 2016. After consideration of the comments, the Department is making four changes: One change to the definition of “discriminate” at § 44.101(e) to make clear that intent to discriminate must be based on national origin or citizenship status in order to violate 8 U.S.C. 1324b; one change to § 44.101(k)(3) to make the regulatory language mirror the statutory language; one change to § 44.200(a)(3)(ii) to clarify the cross reference in that paragraph; and one technical change to § 44.300(d) to correct the citation to Title VII of the Civil Rights Act of 1964, as amended.

Background on Legal Authority

The authority to promulgate this rule lies in two sections of the INA. *See* 8 U.S.C. 1103, 1324b. By statute, the Special Counsel serves in the Department and enforces the anti-discrimination provision of the INA. 8

U.S.C. 1324b(c). The INA lays out the Attorney General’s authority to administer and enforce those laws within Title 8, United States Code, that are conferred upon the Attorney General. 8 U.S.C. 1103(a)(1). In addition to the Attorney General’s authority to administer and enforce laws expressly conferred to the Attorney General under the INA, “determination and ruling by the Attorney General with respect to all questions of law shall be controlling.” *Id.* The same section of the INA authorizes the Attorney General to “establish such regulations . . . , delegate such authority, and perform such other acts as the Attorney General determines to be necessary for carrying out this section.” 8 U.S.C. 1103(g)(2); *see also* Homeland Security Act of 2002, Public Law 107–296, sec. 1102 (adding “(g)” as a “subsection” of section 1103); *Cormia v. Home Care Giver Servs., Inc.*, 10 OCAHO no. 1160, 3 (2012) (noting that “Congress gave the Attorney General the power to promulgate regulations to effectuate and enforce § 1324b, as well as the power to delegate that authority”) (citing 8 U.S.C. 1103(g)). In addition to the broad grant of authority to the Attorney General under 8 U.S.C. 1103, the anti-discrimination provision itself includes express delegations of rulemaking and other authorities to the Attorney General. *See, e.g.*, 8 U.S.C. 1324b(c)(4) (to establish regional offices); 8 U.S.C. 1324b(f)(2) (to ensure that administrative law judges hearing cases under the statute and the Special Counsel have “reasonable access” to examine evidence of persons or entities being investigated); *cf.* 8 U.S.C. 1324b(b)(1) (providing that charges “shall contain such information as the Attorney General requires”); 8 U.S.C. 1324b(e)(2) (providing that the Attorney General shall designate the administrative law judges who consider cases under section 1324b).

Discussion of Comments

The following section reviews comments the Department received in response to the NPRM and sets forth the Department’s responses to those comments. The Department received 47 comments on the NPRM by the close of the comment period, October 14, 2016. The Department’s responses to comments regarding this rule’s economic impact are included in the Regulatory Procedures section of this rule. Other comments are summarized below, along with the Department’s responses.

General Comments

Issue: Five commenters express support for the proposed rule, in whole

or in part. One commenter “strongly supports the entirety of the Department’s proposed rulemaking.” Another commenter states that its employer members “generally support those sections of the proposed rule that will clarify existing investigation and enforcement procedures for the Special Counsel and update existing language to reflect statutory changes.”

Response: The Department acknowledges these expressions of support.

Issue: The Department received one comment two days before the close of the comment period requesting an extension of the comment period “until executive and legislative positions are filled in 2017.”

Response: The Department declines to grant the request made through this comment. The Department has provided a 60-day comment period, which is reasonable and appropriate. The Department has reviewed all comments carefully and sees no reason to delay the publication of this rule.

Issue: A number of commenters ask the Department not to promulgate the rule based on various concerns. The Department is addressing the specific concerns raised by these commenters below, by subject.

Response: The Department addresses below the specific concerns that these commenters raise. The Department will make this rule final as proposed with four changes.

Issue: One commenter asks the Department not to promulgate the rule on the basis that it is “ultra vires to the rule making authority and functions vested in the [Attorney General] and OSC by Congress.” This commenter cites to 8 U.S.C. 1103(g)(1) to support the commenter’s position that the Attorney General is limited to promulgating substantive rules under the INA relating only to the functions of the Executive Office for Immigration Review, another component within the Department. Based on that reading, this commenter claims that the Attorney General and Special Counsel lack the authority to issue rules “with regard to the interpretation and enforcement of the immigration-related anti-discrimination provisions of INA § 274B.” This commenter also claims that the Attorney General and the Special Counsel lack the authority “to regulate standards governing the order and burden of proof to be applied by administrative law judges (ALJs) and the courts for the purpose of evaluating claims of citizenship or national origin discrimination, or document abuse.” This commenter points to the fact that the Attorney General and the Special

Counsel have “refrain[ed] for 30 years from issuing rules regarding the burden and standard of proof governing claims of discrimination under INA § 274B” as an implicit recognition that “these adjudicative functions lie exclusively with OCAHO administrative law judges.” Another commenter describes the NPRM as an “unlawful, ultra vires, expansion of DOJ OSC power.”

Response: The Department disagrees with these comments and has decided that it will promulgate this rule. As discussed in the Background on Legal Authority section above, the Attorney General has the authority to promulgate this rule. While one commenter believes that 8 U.S.C. 1103(g)(1) precludes the Department from issuing these regulations, we contend that that paragraph cannot be read in isolation. As discussed above, 8 U.S.C. 1103(a)(1) together with subsection 1103(g)—and section 1324b—provide the Attorney General with the necessary authority to promulgate this rule. Furthermore, nothing in this rule alters the burden or standards of proof for assessing whether a person or entity has violated the statute, nor does the rule alter the authority of administrative law judges to adjudicate cases under section 1324b.

Issue: Two commenters express concern that the Department does not enforce this law sufficiently. One of these commenters expresses appreciation for the government’s interest in solving these problems, and states, “[t]hese immigrants, who are not being hired and wish to fight the prejudice” cannot combat discrimination in hiring because of “their lack of knowledge of the U.S legal system. They already have to face obstacles of coming to the United States and taking on a new challenge of trying to establish themselves and then business owners are denying them the basic rights every American is given.”

Response: Although the Department recognizes the challenges that many employment-authorized immigrants face in overcoming discriminatory barriers, the Department has vigorously enforced this law to combat the discriminatory barriers identified by the commenter. The Department also engages in extensive outreach to the public to educate workers and employers about their rights and responsibilities under this law. Moreover, promulgating this rule is critical to conforming the existing regulations to the law. Information about the Department’s enforcement and outreach work under this law is available at <http://www.justice.gov/crt/about/osc>.

Issue: One commenter expresses concern that an employer that refuses to

hire a worker who lacks employment authorization will be accused of discrimination, and that the employer that hires the same worker will be accused of violating the separate prohibition against knowingly hiring an unauthorized worker, found at 8 U.S.C. 1324a.

Response: The Department disagrees with the accuracy of the example set forth in this comment. Section 1324b protects only employment-authorized individuals from discrimination under the INA. 8 U.S.C. 1324b(a)(1) (“It is an unfair immigration-related employment practice for a person or other entity to discriminate against any individual (other than an unauthorized alien, as defined in section 1324a(h)(3) of this title) . . .” (emphasis added)); see also 8 U.S.C. 1324a(h)(3) (defining “unauthorized alien” as an alien that is not “lawfully admitted for permanent residence” or “authorized to be so employed”). As a result, an employer’s refusal to hire a worker based on that worker’s lack of employment authorization does not violate the INA’s anti-discrimination provision. See 8 U.S.C. 1324b(a)(2)(C). The Department, along with DHS’s U.S. Citizenship and Immigration Services (USCIS) and Immigration and Customs Enforcement (ICE), has issued several public education materials that discuss how employers can avoid discrimination while also complying with legal requirements to verify employment eligibility and ensure they do not knowingly employ a worker who lacks employment authorization. For more information, visit www.justice.gov/crt/employer-information; <https://www.uscis.gov/i-9-central>; <https://www.ice.gov/sites/default/files/documents/Document/2015/i9-guidance.pdf>.

Office Name Change

Issue: One commenter disagrees with the proposal to change the name of the office that enforces section 1324b, from the Office of Special Counsel for Immigration-Related Unfair Employment Practices to the Immigrant and Employee Rights Section. The commenter claims that the new name “is . . . not in line with the statute” because section 274b(c) of the INA requires the President to appoint a Special Counsel to handle “Immigration-Related Unfair Employment Practices,” not for “Employee Rights” more generally. Moreover, the commenter claims that changing the name of the office will alter the Special Counsel’s authority to enforce the law.

Response: The Department disagrees with this comment. The statute does not prescribe a name for the office that enforces section 1324b and the change in office name does not affect the Special Counsel's authority under the law. For the reasons discussed in the NPRM, in particular to eliminate public confusion regarding two offices in the Federal Government with the same name, the Department is changing the office's name to the Immigrant and Employee Rights Section.

Comments Related to the Rule's Interpretation of Discrimination

The Department received approximately 30 comments on the proposed rule's revisions related to the meaning of discrimination under section 1324b, many of which cited § 44.101(e) and (g) as areas of concern. Most of the comments about these proposed revisions raised one or more of the following concerns: (1) The proposed revisions seek to remove the statutory requirement to show discriminatory intent; (2) the proposed revisions seek to change the long-established evidentiary paradigms used by courts to determine whether discrimination has been proved; and (3) the proposed revision to § 44.200(a)(3) would remove a showing of "harm" to establish a violation.

Throughout the comments, many commenters expressed concerns that the proposed revisions would lead to "strict liability" for "innocent" or "unintentional conduct." Some commenters indicate that the proposed revisions would lead to violations under the statute based on a disparate impact theory of discrimination. Other commenters object to the proposed revisions for not requiring that an employer act with ill will or animus in order to violate the statute.

The Department agrees that section 1324b requires a showing of intentional discrimination on the basis of a protected characteristic and that a violation cannot be established under a strict liability standard or a disparate impact theory. The Department's position remains that ill will or animus is not required to commit discrimination under the statute. To the extent that the proposed revisions created any confusion on these points, the Department is discussing these comments in more detail below.

1. *Comments on the proposed revisions' effect on discriminatory intent.* Most comments relating to the meaning of discriminatory intent under section 1324b address the definitions of "discriminate" at § 44.101(e) and the phrase "for the purpose or with the

intent of discriminating against an individual in violation of paragraph (1)" at § 44.101(g). Regardless of whether the discussion is about discrimination in hiring, firing, or recruitment and referral for a fee in violation of 8 U.S.C. 1324b(a)(1), or about discrimination in unfair documentary practices under 8 U.S.C. 1324b(a)(6), the analysis for determining discriminatory intent is the same so the Department will address comments on the topic of intent together.

Issue: One commenter expresses support for the definition of "discriminate" at § 44.101(e). This commenter states that the "clarity provided by the proposed regulation with regard to § 1324b(a)(6) is of particular importance because," in the commenter's experience, including that of its affiliate unions, "it is not uncommon for employers to require more or different documents for employment verification from non-citizens than from U.S. citizens, or from certain groups of workers based on their national origin as opposed to workers who 'appear' to be U.S. citizens."

Response: The Department agrees with this comment and, as discussed in the NPRM, this definition clarifies what discrimination means under section 1324b. As the commenter suggests, and as discussed below, the definition of "discriminate" includes intentionally treating individuals differently from others because of a protected characteristic.

Issue: Several commenters believe that the proposed revisions seek to remove the discriminatory intent element from section 1324b altogether. Many of these commenters discuss at length the Ninth Circuit decision in *Robison Fruit Ranch, Inc. v. United States*, 147 F.3d 798 (9th Cir. 1998), in which the Court held that post-1996, a violation of 8 U.S.C. 1324b(a)(6) required a showing of discriminatory intent. *Id.* at 801. Numerous commenters provide the following example of a situation that the commenters believe could violate the law under the proposed revisions: A U.S. citizen decides unprompted to show a driver's license and unrestricted Social Security card for the employment eligibility verification process while a lawful permanent resident decides unprompted to show a Form I-551 Permanent Resident Card. One commenter further objects that the proposed definition of discriminate "appears to include any employer conduct regardless of whether that conduct is in any way related to an employee's immigration status." (emphasis in original).

Response: The Department agrees that the statute prohibits only intentional discrimination, and added paragraphs (e) and (g) to make that intent requirement clear. Indeed, for claims under section 1324b(a)(6), the regulations must be revised because the regulations in effect today include no intent requirement, even though the statute was amended to require discriminatory intent in 1996 and the Special Counsel has enforced the law as amended since 1996. However, in light of these comments, the Department is making one clarifying edit to the definition of "discriminate" in paragraph (e) to address any confusion. The Department is also more clearly explaining these proposed revisions to address any confusion about the meaning of discrimination and to reiterate that discriminatory intent is required in order to violate the statute.

As an initial matter, paragraph (e)'s definition of "discriminate" as proposed solely addressed what that term means, namely, "intentionally treating an individual differently from other individuals, regardless of the explanation for the differential treatment, and regardless of whether such treatment is because of animus or hostility." In the sentence in which the term "discriminate" appears in section 1324b(a)(1), the statute makes clear that any discrimination must be "because of" a protected characteristic, *i.e.*, citizenship status or national origin. Reading the regulatory definition together with the statute, the language prohibits intentionally treating an individual differently from others because of a protected characteristic—the classic definition of disparate treatment discrimination. Nonetheless, based on the comments received, the Department recognizes the possibility that when read alone, paragraph (e)'s definition as proposed may create confusion. Therefore, the Department has decided to add language to the regulatory text to make even clearer that the definition at paragraph (e) must be read together with the statute's broader prohibition against discrimination based on national origin or citizenship status.

To the extent that commenters believe the proposed revisions would seek to prohibit any difference in treatment whatsoever, the law and regulations make clear that only disparate treatment based on a protected characteristic is prohibited. See 8 U.S.C. 1324b(a)(1), (a)(6). Further, as discussed in the NPRM, a primary purpose of updating these regulations is to conform the regulations to the statute, which was amended in 1996 to provide that unfair documentary practices were unlawful

only if done “for the purpose or with the intent of discriminating against an individual in violation of” 8 U.S.C. 1324b(a)(1). The definition at paragraph (g) makes clear that discrimination under 8 U.S.C. 1324b(a)(6) also requires “intentionally treating an individual differently based on national origin or citizenship status.”

The definitions in these paragraphs reflect longstanding black letter civil rights law and the Special Counsel’s long-held position on what constitutes intentional discrimination under section 1324b. *See, e.g., City of Los Angeles Dep’t of Water and Power v. Manhart*, 435 U.S. 702, 711 (1978) (finding sex discrimination where employer required female employees to make larger contributions than men to its pension fund because such treatment satisfies “the simple test of whether the evidence shows ‘treatment of a person in a manner which, but for that person’s sex, would be different’”); *Int’l Union v. Johnson Controls, Inc.*, 499 U.S. 187, 200 (1991) (applying the “simple test” in *Manhart*). The holding in *Robison*, 147 F.3d 798, on which several commenters rely for their position that the Department is seeking to remove the intent requirement from the statute, is also in harmony with the Special Counsel’s position. In that case, the Ninth Circuit held that “Congress intended a discrimination requirement in the 1990 statute and merely clarified the statute to state that intent in its 1996 amendment.” *Robison Fruit Ranch, Inc.*, 147 F.3d at 801. The Court did not find discrimination because the employer’s documentary requests were made to both U.S. citizens and non-U.S. citizens. *Id.* This decision is consistent with the Department’s position on what discrimination means under the statute.

While several commenters state that the Department’s proposed definition of discrimination is based exclusively on references to OCAHO decisions or the Special Counsel’s prior positions, the NPRM and this rule contain several references to seminal Supreme Court cases that support the Department’s proposed definition. Moreover, the suggestion that OCAHO case law is insufficient is misguided because Congress authorized OCAHO administrative law judges (ALJs) to decide cases under the statute. *See* 8 U.S.C. 1324b(e)(2).

In one example provided by a number of commenters mentioned above, a lawful permanent resident chooses to show a Permanent Resident Card for the employment eligibility verification process while a U.S. citizen provides a driver’s license and Social Security card, both “without any prompting by

the employer.” The employer in this example would not face liability unless the employer was requesting specific, more, or different documents from workers for employment eligibility verification purposes because of the workers’ protected characteristic. If, however, the employer allows each worker to show his or her choice of valid documentation for the employment eligibility verification process, the employer would not be discriminating in violation of the statute.

Issue: A number of commenters object to what they claim is an attempt to apply a strict liability standard to “innocent” or “unintentional conduct” that lacks the necessary “ill will or animus.” One commenter points to the dictionary definitions of “discriminate,” claiming that the proper legal definition of “discriminate” involves “unfair or bad treatment,” and that if the definition just meant “different” treatment, employers who engage in “innocent behavior [would be] swept up in the enforcement apparatus.” Another commenter states that Congress intended a showing of animus or ill will to establish a violation and the regulation should reflect that legislative intent. This commenter objects that the definition of “discriminate” would “actually apply to employers who intentionally treat individuals differently even if [the employers] want to help [the employees] through the employment eligibility process.” The commenter suggests that under the proposed revisions, providing sign language assistance to a worker completing the Form I-9 or allowing a family member or friend to serve as an interpreter could constitute intentional discrimination and violate the law. Other commenters provide different examples of conduct they see as helpful to a worker that they claim could be a violation of the law under the proposed revisions, such as an employer that asks a lawful permanent resident who neglects to include a USCIS/alien number in Section 1 “for documentation,” or an employer that says to a worker who selected lawful permanent resident in Section 1 of the Form I-9, “Oh, I see you are a permanent resident. Do you have your green card for completion of Section 2 [of the Form I-9]?” Two commenters share a similar example involving a human resources associate who seeks to assist new employees complete the Form I-9 by asking whether the employee is a U.S. citizen or born outside of the United States, and depending upon the answer, suggests

specific documents that could satisfy Form I-9 requirements. Another commenter, relying on “good faith” defenses set forth in section 1324a, suggests that discrimination can never include “good faith efforts to verify the employment eligibility” of workers. This commenter also criticizes the NPRM’s use of language from *United States v. Life Generations Healthcare, LLC*, 11 OCAHO no. 1227, 22–23 (2014), arguing that the Department’s references to *Life Generations* fail to support the proposition that discrimination in violation of section 1324b does not require ill will or malice.

Response: The Department disagrees that the law requires a showing of animus or ill will to establish discriminatory intent or that section 1324b recognizes a “good faith” defense to discrimination. An employer cannot justify discriminatory conduct simply by claiming a lack of ill will or animus, or that differential treatment based on citizenship or national origin is nevertheless legal because the employer is trying to assist workers in “good faith.” The Department’s position mirrors the Supreme Court’s and other courts’ analyses on what constitutes intentional discrimination in a variety of contexts, including the principle that explicit discrimination is disparate treatment even absent a malevolent motive, and is consistent with OCAHO case law. *See, e.g., Johnson Controls*, 499 U.S. at 199 (stating that, in the context of Title VII, “absence of a malevolent motive does not convert a facially discriminatory policy into a neutral policy with a discriminatory effect. Whether an employment practice involves disparate treatment through explicit facial discrimination does not depend on why the employer discriminates but rather on the explicit terms of the discrimination.”); *Life Generations Healthcare, LLC*, 11 OCAHO no. 1227 at 22–23 (“It is not required that malice or ill will be shown, and the absence of a malevolent motive does not alter the character of a discriminatory policy.”) (citing *Johnson Controls*)); *see also Kentucky Retirement Systems v. E.E.O.C.*, 554 U.S. 135, 161 (2008) (stating that, under the Age Discrimination in Employment Act (ADEA), “an otherwise discriminatory employment action cannot be rendered lawful because the employer’s motives were benign”); *Manhart*, 435 U.S. at 711 (articulating the “simple test of [sex discrimination as] whether the evidence shows ‘treatment of a person in a manner which but for that person’s sex would be different’”); *E.E.O.C. v. Baltimore Cnty.*, 747 F.3d 267, 273 (4th

Cir. 2014) (“To prove facial discrimination under the ADEA, a plaintiff is not required to prove an employer’s discriminatory animus.”); *Holland v. Gee*, 677 F.3d 1047, 1059 (11th Cir. 2012) (stating that in an employment discrimination case that “insofar as [a respondent] insists that there must be proof of ill will or ‘animus,’ that suggestion is misguided”); *Community House, Inc. v. City of Boise*, 490 F.3d 1041, 1049 (9th Cir. 2006) (stating that “ostensibly benign purpose” for differential treatment does not overcome discriminatory intent under the Fair Housing Act); *Bangerter v. Orem City Corp.*, 46 F.3d 1491, 1500–01 (10th Cir. 1995) (holding that “a plaintiff need not prove the malice or discriminatory animus of a defendant to make out a case of intentional discrimination where the defendant expressly treats someone protected by the [Fair Housing Act] in a different manner than others”). This same interpretation of discrimination has long been described in the Special Counsel’s public education materials, Web site, and outreach presentations. In short, a definition of discrimination that requires complainants to prove that an employer acted with ill will, hostility or animus, in addition to showing differential treatment on the basis of a protected characteristic, finds no support in the statutory text or case law.

While some commenters criticize the NPRM’s characterization of *Life Generations*, the *Life Generations* case makes clear that “a person has the intent to discriminate if he or she would have acted differently but for the protected characteristic.” 11 OCAHO no. 1227 at 29. The ALJ in *Life Generations* explained that the proper test to determine discriminatory intent asks whether the outcome or treatment received would have been different if the protected classes had been reversed. *Id.* at 22–23. The ALJ in that case found the requisite discriminatory intent because it was “evident . . . that had the groups been reversed, the outcome would have differed” despite the fact that the human resources personnel “bore no hostile motives toward foreign-born employees, and had no subjective discriminatory intent.” *Id.* In finding that the employer had the requisite discriminatory intent under section 1324b(a)(6), the ALJ relied on Supreme Court precedent establishing that “the absence of a malevolent motive does not alter the character of a discriminatory policy.” *Id.* at 23 (citing *Johnson Controls*, 499 U.S. at 199); see also *United States v. Gen. Dynamics Corp.*, 3 OCAHO no. 517, 1121, 1163 (1993)

(“An employer knowingly and intentionally discriminates on a prohibited basis if it deliberately treats a job applicant differently on the basis of the applicant’s citizenship status regardless of the employer’s motivation for the discrimination.”). The proposed revisions correctly characterize the *Life Generations* ruling and are consistent with its analysis of discriminatory intent under section 1324b.

We further note that a number of the commenters’ examples would not violate the statute as long as the employers are not treating employees differently because of a protected characteristic. In one example, an employer allows an employee’s friend or family member to help translate the Form I–9 for the employee. Such an act would not be considered discrimination unless the employer allowed only certain employees to have a friend or family member assist in completing the Form I–9 based on citizenship status or national origin.

We agree that other commenters’ examples could raise potential violations, but this conclusion is based on the statutory language in effect for decades and the Special Counsel’s longstanding positions. In the example of the employer who asks a lawful permanent resident for documentation after the worker fails to provide a USCIS/alien number in Section 1, the employer would be discriminating in violation of section 1324b(a)(6) if the employer did not ask other workers for documentation to verify missing information in Section 1. In other words, if an employer requested that lawful permanent residents who failed to write their USCIS/alien number show a document with that number, but did not request the same of U.S. citizens who left Form I–9 fields blank (e.g., zip code or date of birth), that employer may well violate section 1324b(a)(6). More broadly, it is not clear from the example why the hypothetical employer would not simply ask the lawful permanent resident to write in the missing USCIS/alien number instead of asking for a document.

In another example, an employer that says to a lawful permanent resident, “Oh, I see you are a lawful permanent resident. Do you have your green card for Section 2?” may also be acting in violation of the law. Employers may not request specific documents for employment eligibility verification purposes based on a worker’s citizenship status or national origin. Regarding this specific example, lawful permanent residents do not have to show their permanent resident card or “green card” when they start working;

if an employer requests specific documentation from lawful permanent residents but does not request specific documents of U.S. citizens, it would be discrimination. And as with the above example, the employer in this example would be liable under the current statutory language, regardless of whether the Department amended the implementing regulations.

Similarly, in the example involving a human resources associate asking for an employee’s citizenship status and then offering suggestions for documentation that the employee might have based on the answer, the act may indeed violate the law if the employer’s actions amount to requesting specific documents for employment eligibility verification purposes from workers based on their citizenship status or national origin.

The Department further notes that many of the examples provided by commenters characterize the act of asking for specific documents from workers during the employment eligibility verification process as “assistance.” The Department disagrees with this characterization. Requesting specific employment eligibility verification documents from employees unnecessarily limits their choice of documentation. An employer that is interested in helping workers through the employment eligibility verification process should provide all workers with the Lists of Acceptable Documents and explain to them that they may present one List A document or one List B document and one List C document.

Because the text of section 1324b does not contain a “good faith” defense, unlike section 1324a, the Department will not insert such a defense to discrimination in the proposed revisions.

Issue: One commenter disagrees with changes to § 44.200(a)(1)’s description of the prohibition against discrimination in hiring, firing, recruitment and referral for a fee. Specifically, this commenter disagrees with the removal of the word “knowingly” and states, “one must ‘know’ they are discriminating to be liable under this intentional act” and that it was “illogical” for the Department to remove what the commenter believes is a “required element” for establishing a violation.

Response: The Department disagrees with this comment and is adopting the language from the proposed rule without change. The proposed revision properly reflects the statute’s requirement that a person or entity must engage in “intentional” discrimination. Further, the Department disagrees that a person or entity must know it is

discriminating to violate the statute; as discussed in the responses to other comments above, the statute requires that an employer intentionally treat individuals differently based on their citizenship status or national origin. An employer's "knowledge" that this disparate treatment constitutes "discrimination" is not an element of a violation.

Issue: A number of commenters disagree with the change in terminology in § 44.200(a)(3) from "documentation abuses" to "unfair documentary practices." These commenters stated that these changes "blur[] the line of intent required" to establish a violation and are part of a "march toward strict liability."

Response: The Department disagrees with these comments. As discussed in the NPRM, the change from "documentation abuses" to "unfair documentary practices" is intended to more clearly describe the prohibited conduct. In addition, this change in terminology more closely tracks the statutory language and has no impact on the intent required to prove a violation.

2. *Comments regarding the proper evidentiary frameworks for establishing discrimination.* Several commenters raise concerns that the proposed revisions do not comply with the proper evidentiary frameworks for analyzing discrimination claims.

Issue: A number of commenters claim that the rule's definition of "discriminate" shifts the burden to the employer, contrary to well-established discrimination case law. Several commenters believe the proposed definition of "discriminate" "steamrolls over the substance and procedure of well-established Title VII law," and, according to another commenter, converts cases under 8 U.S.C. 1324b to "disparate impact cases that are outside of OSC's jurisdiction." One commenter claims that the Department is seeking to import a complainant's burden of proof at the liability stage in a pattern or practice case to the disparate treatment circumstantial evidence context. This commenter insists that paragraph (e)'s definition of "discriminate" in the NPRM "directly contradicts" the traditional burden-shifting framework recognized by OCAHO in *U.S. v. Diversified Technology and Services of Virginia, Inc.*, 9 OCAHO no. 1095, 13 (2003). Yet another commenter states that "[t]he proposed rule would essentially presume discrimination at the first stage." Another commenter believes the proposed revisions would "effectively remove the employer's ability to offer any defense or non-

discriminatory explanation for its actions."

Response: The Department disagrees that the definition of "discriminate" or any other proposed revision alters the long-established evidentiary burdens to prove discrimination, but as discussed above has added clarifying language to the definition of "discriminate" to address any confusion about what is required to show discrimination in violation of the law.

Section 1324b is modeled after Title VII of the Civil Rights Act of 1964, and case law under that statute "has long been held to be persuasive in interpreting § 1324b." *Sodhi v. Maricopa Cty. Special Health Care Dist.*, 10 OCAHO no. 1127, 7–8 (2008). The evidentiary frameworks set forth in *McDonnell Douglas Corp. v. Green*, 411 U.S. 792, 802 (1973), for individual claims of discrimination and in *International Brotherhood of Teamsters v. United States*, 431 U.S. 324, 360–62 (1977), for pattern or practice claims of discrimination apply to cases under section 1324b. The Department has consistently relied on such frameworks when litigating cases before OCAHO. Moreover, OCAHO has analyzed cases under section 1324b using these traditional frameworks, including in *Diversified Technology*, 9 OCAHO no. 1095, and *Life Generations*, 11 OCAHO no. 1227. The definition of "discriminate" in the proposed rule does not alter the parties' respective burdens in a pattern or practice claim or individual claim, and the *McDonnell Douglas* and *Teamsters* frameworks set forth by the Supreme Court in interpreting Title VII continue to apply.

An example provided by several commenters helps to illustrate the traditional framework for establishing an intentional discrimination claim, which the proposed revisions do not change. In this example, an employer's Forms I–9 show "that the overwhelming majority of non-citizens had provided a List A document (their [Form I–551 Permanent Resident] card), whereas the overwhelming majority of U.S. citizens had provided a List B and a List C document," and "the employer offers no guidance to new employees on completing the Form I–9 and accepts precisely the documents volunteered by the employees." The commenters believe that under the proposed revisions and the recent OCAHO decision in *Life Generations*, 11 OCAHO no. 1227 at 22, the Special Counsel and OCAHO could nevertheless "find discriminatory intent by the employer, triggering sanctions." This concern misinterprets the proposed revisions and the *Life Generations* case. Although

statistical disparities can "serve an important role" in establishing a *prima facie* case of discrimination, *Teamsters*, 431 U.S. at 339–40, the employer's action in the commenters' example does not amount to discrimination because the employer did not request more, different or specific documents, or reject valid documentation, based on a protected class. Even assuming a different example where a complainant makes out a *prima facie* case of discrimination that includes statistical evidence showing that different protected classes presented different documents, the employer could then provide a legitimate, non-discriminatory reason for the statistical disparity. For instance, the employer may state that the employees volunteered to show those documents with no request by the employer. The complainant would then have an opportunity to offer evidence rebutting the employer's legitimate non-discriminatory reason. Ultimately, the burden still rests on the complainant to prove that the employer requested specific documents from employees based on their protected class.

Given the above, the Department disagrees that the NPRM's quotes from the *Life Generations* case are taken out of context. While *Life Generations* applied the evidentiary framework in *Teamsters*, the definition at paragraph (e) applies regardless of whether a case involves an individual claim of discrimination analyzed under *McDonnell Douglas*, a pattern or practice claim decided under *Teamsters*, or a case based on direct evidence of discrimination. What the Department wishes to make clear in these proposed revisions, and specifically in the definitions in paragraphs (e) and (g) of § 44.101 that the Department is adopting in this rule, is that an employer cannot overcome evidence of discrimination simply by claiming that the discriminatory behavior (which in the context of unfair documentary practices would be requests for more, different, or specific documents, or the rejection of valid documentation, based on an employee's citizenship status or national origin) was somehow justified because it was meant to "help" workers or was not based on "ill will" or "animus." Such explanations cannot constitute legitimate, non-discriminatory reasons because, by their very terms, the explanations acknowledge that there is disparate treatment based on a protected class.

As noted above, the Department agrees that disparate impact liability is unavailable under section 1324b. None

of the proposed revisions affects that conclusion.

Issue: In contrast to the comments above, one commenter believes that 8 U.S.C. 1324a offers the preferred framework over Title VII for interpreting discrimination under 8 U.S.C. 1324b. This commenter states that section 1324b “is not a ‘stand-alone’ anti-discrimination statute, and that [the Special Counsel] cannot interpret the statute as if it were. Rather, § [1324b] is irrevocably tethered to the scope of the employer sanctions regime, and [the Special Counsel’s] regulatory jurisdiction does not extend beyond those anti-discrimination concerns that are reasonably related to employer sanctions or the employment verification requirements of § [1324a].” This commenter points to a shared historical context for the two provisions and the fact that 8 U.S.C. 1324a requires that employers treat certain individuals differently in particular contexts based on the lack of, type of, or duration of employment authorization. This commenter further states that “Congress intended § [1324b] . . . to account for the particular complexities in the immigration field that differ from the broader and more absolute prohibitions against employment discrimination in the Title VII context,” and that “§ [1324b] stands . . . on a different footing from other types of employment discrimination.”

Response: The Department does not believe any change to the rule is required by this comment. It is well-accepted that section 1324b should be read within the context of the overarching scheme that Congress created in IRCA. However, employers that comply with section 1324a can also comply with section 1324b, and the fact that the law requires employers to treat employees differently based on their immigration status in some instances under section 1324a does not justify using a different standard for what discrimination under section 1324b means, thereby departing from black letter civil rights law and the Special Counsel’s long-held positions. OCAHO has long looked to Title VII case law in interpreting section 1324b. *See Sodhi*, 10 OCAHO no. 1127 at 7–8 (“Because § 1324b was expressly modeled on Title VII of the Civil Rights Act of 1964 as amended . . . case law developed under that statute has long been held to be persuasive in interpreting § 1324b.”). The Department agrees with OCAHO precedent that the evidentiary frameworks and principles that the Supreme Court has established to analyze employment discrimination cases under Title VII are highly

instructive in interpreting section 1324b.

The Department also disagrees with the commenter’s suggestion that because section 1324a requires employers to treat certain individuals differently in particular contexts based on their employment authorization, citizenship status and national origin should be viewed as qualitatively different than other protected classes. Section 1324b carefully lays out the available exceptions to the general prohibition against discrimination based on citizenship status or national origin. *See* 8 U.S.C. 1324b(a)(2)(A), (a)(2)(C), (a)(4). Apart from those exceptions, the Department believes that citizenship status and national origin should be viewed and analyzed in the same manner as any other protected class for discrimination purposes.

3. *Comments on the “harm” required to establish a violation of section 1324b(a)(6).* The Department received a number of comments regarding how, if at all, the proposed revisions would change the conduct required to establish an unfair documentary practice, namely, what is required to establish a “harm” under the statute.

Issue: One commenter expresses support for the proposed revisions to § 44.200(a)(3), and states that it is “entirely consistent with the statute’s remedial scheme to allow OSC or a private complainant to seek to remedy unfair documentary practices even where no employee has experienced economic harm, as both reviewing courts and administrative law judges have held.”

Response: The Department appreciates this comment.

Issue: A number of commenters state that this rule would remove the requirement to show an individual was “harmed” to establish liability. The commenters do not specify what they refer to as “harm,” though some specifically pointed to the proposed revision’s clarification at § 44.200(a)(3)(ii), which explains that a violation of section 1324b(a)(6) does not require proof of an “economic harm.” Another commenter states that discrimination under section 1324b(a)(6) must include some harm other than just treating people differently, such as “unfavorable” treatment or “abusive” behavior.

Response: The Department believes no change is warranted by these comments. As discussed above, a finding of a violation under the law is premised on a showing of discrimination. As discussed in the NPRM, the statutory text does not include any language requiring an

economic injury to establish a violation under section 1324b(a)(6). Moreover, the harm or “unfavorable” treatment in a claim under section 1324b(a)(6) is subjecting a worker to a discriminatory document request or rejection based on the worker’s citizenship status or national origin. This has been the statutory requirement since the 1996 amendments, and the proposed revisions make no change to the elements required to establish a violation.

Definitions

The Department received several comments regarding the definitions in § 44.101 and discusses them below.

Issue: The Department received one comment on the definition of “charge” in paragraph (a). The commenter disagrees with the change in this definition to eliminate the requirement upon a charging party to identify the injured party’s specific immigration status to satisfy the regulatory definition of a charge. According to this commenter, this change may cause the Special Counsel to “not properly allocate its resources” because the Special Counsel would not have information about immigration status. The comment also states that if the Department has eliminated the requirement to provide immigration status information “because persons in the U.S. are sometimes unclear as to their legal status, then that point further evidences the complexity of this system for employees and employers alike.”

Response: The Department declines to change this definition as proposed. The charging party is still required to provide citizenship status information, and nothing in the regulations prohibits the Special Counsel from requesting additional information, as needed, regarding the injured party’s immigration status. As discussed in the NPRM, immigration status information is not required to determine whether the Special Counsel has jurisdiction to investigate an alleged unfair immigration-related employment practice, and the Department will not require this information to deem a submission to constitute a charge under § 44.101(a). The Department does not believe that the absence of this information upfront from a charging party will have any effect on its ability to properly allocate resources.

Issue: The Department received a number of comments on the definition of charging party in paragraph (b) and its cross reference to the “injured party” definition in paragraph (i). These commenters disagree with the use of the term “injured party,” which is defined

as “an individual who claims to be adversely affected directly by an unfair immigration-related employment practice.” 28 CFR 44.101(i). The commenters state that referring to the person claiming an injury as “injured” before making a determination on the merits of the claim “essentially presumes that which must be proven, suggesting an effort to write out of the statute the requirement to prove ‘adverse effect’ and moving to a ‘strict liability’ standard.” The commenters believe that “a party should be a ‘charging party’ or an ‘individual’ until they have proven that they are ‘injured.’” Another commenter believes the charging party definition should remain as it is or changed to “a neutral term, such as ‘claimant’” in order “to eliminate the impression, even if only subliminally, that an individual filing a claim has been ‘injured.’”

Response: The Department disagrees with the commenters’ suggestion that by simply using the term “injured party,” the Department is making a judgment on the merits of a claim. “Injured party” is defined as “an individual who claims to be adversely affected” in order to avoid any presumption of the merits of the claim. This term has also been in the regulations since they were initially promulgated in 1987 without impacting the impartiality of the Special Counsel’s investigations. See Unfair Immigration-Related Employment Practices, 52 FR 9277 (Mar. 23, 1987) (codified at 28 CFR pt. 44). An “injured party” may or may not be a “charging party” as the statute allows that a person acting on behalf of an individual who “is adversely affected directly by an unfair immigration-related employment practice” may also file a charge. 8 U.S.C. 1324b(b)(1). The Department declines to make any changes to the definition of “charging party” or “injured party” as proposed.

Issue: The Department received three comments about the definition of “citizenship status” in paragraph (c). One commenter requests that the Department define “citizenship status” using a “flexible definition of immigration status” that includes individuals whose status is unclear. Another commenter believes that the Department is seeking through this definition to expand the class of individuals protected from citizenship status discrimination beyond those who meet the “protected individual” definition in 8 U.S.C. 1324b(a)(3) to include all non-citizens. A third commenter claims that the statute provides no basis to include “immigration status” in the definition of “citizenship status.” This commenter also stated that the term “immigration

status” is ambiguous and would require human resources personnel to be “immigration law expert[s]” to determine what it means.

Response: The Department disagrees with these comments and will adopt the language of the proposed definition without change. The proposed definition does not address the issue of or attempt to modify the classes of individuals who are protected from unfair immigration-related employment practices under the statute. Rather than addressing particular immigration statuses, this definition simply makes clear that “citizenship status” connotes more than just whether an individual is or is not a U.S. citizen, and also includes a non-U.S. citizen’s immigration status. See, e.g., *Kamal-Griffin v. Cahill Gordon & Reindel*, 3 OCAHO no. 568, 1641, 1647 (1993) (“Congress intended the term ‘citizenship status’ to refer both to alienage and to non-citizen status.”). In addition, understanding what constitutes immigration status discrimination does not require human resources personnel to be immigration experts. To comply with this law, the employer does not need to know the intricacies of a particular immigration status or what an individual needs to show to qualify for employment given such a status. Rather, if an employer, based on an individual’s immigration status, treats that individual differently in the hiring, firing, recruitment or referral for a fee process, or commits an unfair documentary practice, the employer may violate the law. Using an example from the NPRM, an employer that refuses to hire a refugee based on that person’s status as a refugee may well violate section 1324b(a)(1).

Issue: The Department received three comments on paragraph (f)’s definition of “for purposes of satisfying the requirements of section 1324a(b).” One commenter expresses support for paragraph (f)’s definition of “for purposes of satisfying the requirements of section 1324a(b)” as “a reasonable construction of the statutory language.”

Two commenters raise concerns that paragraph (f) is overly broad. The first commenter believes the statute’s prohibition against unfair documentary practices is unambiguous and refers only to the Form I-9 process. This commenter claims that the use of E-Verify does not “satisfy the requirements of [section] 1324a(b)” because the statute authorizing E-Verify does not explicitly reference section 1324a(b), and therefore discrimination in the use of E-Verify cannot constitute an unfair documentary practice under 8 U.S.C. 1324b. This commenter further

believes that under the definition in the proposed rule, employment processes that have nothing to do with satisfying the requirements of section 1324a(b) would be covered, such as requesting documents as part of vaccination law compliance, tax law compliance, and criminal background checks. The second commenter states that section 1324b(a)(6) does not cover discrimination involving E-Verify because Congress was aware of electronic verification when it amended section 1324b in 1996 and chose not to include “any electronic system” in section 1324b.

Response: The Department declines to make any change to this definition as proposed in the NPRM. As noted in the NPRM, OCAHO has recognized that unfair documentary practices can occur outside of the actual completion of the Form I-9. For example, discriminatory documentary requests at the application stage to verify employment eligibility can constitute unfair documentary practices in violation of the law. See *United States v. Mar-Jac Poultry, Inc.*, 10 OCAHO no. 1148, 11 (2012) (recognizing potential liability for unfair documentary practices committed against job applicants).

Discriminatory documentary practices, such as requesting more or different documents or rejecting valid documentation, in the E-Verify process likewise violate 8 U.S.C. 1324b(a)(6). The E-Verify process flows from and is inextricably intertwined with 8 U.S.C. 1324a(b), and E-Verify’s primary purpose is to assist employers with confirming an individual’s work authorization status once the individual and the employer have completed the Form I-9 as required by 8 U.S.C. 1324a(b). Contrary to one commenter’s assertion, the E-Verify statute, found at 8 U.S.C. 1324a note, explicitly references 8 U.S.C. 1324a(b) in several places. See, e.g., 8 U.S.C. 1324a note, secs. 403(a)(2)(A); 403(a)(2)(B)(ii); 403(a)(4)(A); 403(b)(2)(A); 403(b)(3); 403(b)(4); 403(c). Moreover, when Congress created several pilot programs in 1996, including what would later be named E-Verify, Congress mandated reports at the end of the third and fourth years of the pilot projects to assess, among other things, the degree to which these programs “assist in the enforcement of section 274A” of the INA. 8 U.S.C. 1324a note, Sec. 405(a)(3). While Congress authorized the electronic program that would be later named E-Verify at the same time that it last amended section 1324b(a)(6), the electronic program did not launch until 1997. *History and Milestones of the E-Verify Program*, U.S. Citizenship and

Immigration Services, <https://www.uscis.gov/e-verify/about-program/history-and-milestones> (last updated July 15, 2015). Therefore, it is no surprise that Congress did not include a reference to this program in the 1996 amendments to section 1324b(a)(6).

Because an employer's use of E-Verify is inextricably intertwined with "the requirements of section 1324a(b)," the use of E-Verify is covered by the definition. However, to the extent that an employer adopts a practice that does not have the purpose of verifying employment authorization, such as making document requests for tax or vaccination purposes, that practice would fall outside the scope of the definition and the law's prohibition against unfair documentary practices.

Issue: Several commenters express concern about the definition of "hiring" at paragraph (h). One commenter claims that this definition "would now include an unlimited range of employer activity," and that "any employer conduct may constitute discrimination (regardless of intent) during the pre-hire process." This commenter also raises concerns that this new definition would interfere with an employer's ability to ask applicants general questions about eligibility to work in the United States and to ask questions associated with a post-hire background check, including asking an applicant to identify the applicant's country of origin, present an identification document from the applicant's country of origin, or respond to questions about issues that arise in the background check.

One commenter raises a concern that the proposed definition is so broad that it would "require every person working for a single employer to be a Form I-9 expert" and suggests that the proposed definition would expand liability for employers based on the acts of those who are not "decision maker[s]," using, as one example, an 18-year old assembly line worker who tells his sibling that his employer is hiring and to "go to the office" and "bring your license, social security card and green card."

Other commenters criticize the definition's inclusion of "recruitment" and "onboarding." These commenters cite to *United States v. Mar-Jac Poultry, Inc.*, 10 OCAHO no. 1148, 11 (2012) and *Mid-Atlantic Reg'l Org. Coal. v. Heritage Landscape Servs.*, 10 OCAHO no. 1134, 8 (2012), as support for a narrower definition of "hiring" that would include only "the entire selection process." The commenters argue that there is only one reference to "recruitment" in both 8 U.S.C. 1324a and 8 U.S.C. 1324b, namely, "recruitment or referral for a fee," and

therefore argue that the statute does not apply to a prospective employer's pre-hire activity like recruitment. The commenters further claim that there is no authority to include "onboarding" processes like training or new employee orientation in this definition.

Response: The Department declines to make any changes to this definition as proposed in the NPRM. Nevertheless, based on comments received, the Department offers further clarification below. The Department's proposed definition of "hiring" is in line with OCAHO case law and the Special Counsel's longstanding position that discrimination at any point in the hiring process can violate the statute. At the outset, an employer that asks all applicants whether they are eligible to work would not violate the statute because there would be no differential treatment based on citizenship status or national origin. As a result, and contrary to one commenter's concern, this proposed definition would not affect an employer's ability to ask all job applicants about eligibility to work in the United States.

The Department further disagrees that this definition imputes any liability to an employer for acts of employees that could not already be imputed to an employer under the statute, regulations in effect today, and relevant case law. The question of when an employer is liable for the acts of its employees is very fact-specific and is not addressed by this proposed definitional change.

Although the Department agrees that recruitment as used in paragraph (h) could not include "recruitment for a fee," the Department distinguishes between "recruiting" that occurs in the process of hiring an individual and "recruiting for a fee" as used in the statute. While recruitment by an employer is the act of soliciting applicants and applications, recruiting for a fee involves a third party soliciting applicants as a paid service to an employer. The Department believes that an employer soliciting applicants and applications must be included in the definition of "hiring" because such recruiting activity is an integral part of the selection process. Recruiting may impact, and in some cases determine, who learns about the job vacancy, who applies for a position, and who is selected for a position. Including recruiting in the definition of "hiring" is also supported by OCAHO case law. See, e.g., *Mid-Atlantic Reg'l Org. Coal.*, 10 OCAHO no. 1134 at 8 (noting that section 1324b "specifically applies to recruitment for employment as well as to hiring"). Finally, the statute's explicit reference to "recruitment for a fee" by

a third party does not mean that an employer's hiring efforts cannot encompass both recruitment of and selection of prospective employees.

The definition of "hiring" must also include the onboarding process to capture all of the steps necessary to select individuals and place them in positions to work. Employers vary widely in their terminology, practices, and views regarding what steps are necessary to complete the selection process. For instance, some employers make a job offer, which the employee accepts, but which is conditioned implicitly or explicitly on meeting other requirements like passing drug tests, completing a formal application, or completing the Form I-9. This "selection" of a candidate is only tentative; it is not final because it is conditioned on the completion of other tasks.

Including onboarding in the definition of "hiring" would ensure that all these steps to place an individual in a position to start work are covered by the statute. For instance, the definition would capture such practices as discriminatory background checks that may occur after a conditional offer is made and accepted, but before actual employment begins. To the extent that employers impose background checks on new hires in a discriminatory manner based on citizenship status or national origin, this could violate the law. Finally, an employer that requests documentation as part of the background check process as a proxy for verifying authorization to work based on a worker's citizenship status or national origin, may violate the statute's prohibition against discrimination in hiring, in addition to the prohibition against unfair documentary practices.

This view is consistent with OCAHO case law, which has "long held that it is the entire selection process, and not just the hiring decision alone, which must be considered in order to ensure that there are no unlawful barriers to opportunities for employment." *Id.* For instance, in *United States v. Townsend Culinary, Inc.*, 8 OCAHO no. 1032, 454, 510-11 (1999), OCAHO found that discrimination in the employment eligibility verification process (which occurred at the onboarding stage) violated not only the statute's prohibition against unfair documentary practices but also the statute's general prohibition against discrimination in hiring, firing, and recruitment or referral for a fee under 8 U.S.C. 1324b(a)(1).

Issue: The Department received one comment on the definition of "more or different documents than are required under such section" in paragraph (j).

This commenter believes that the statute does not provide support for the definition's inclusion of "any limitation on an individual's choice of acceptable documentation to present to satisfy the requirements of 8 U.S.C. 1324a(b)." This commenter also believes the definition is confusing because Form I-9 rules already impose limitations on which documents individuals completing the Form I-9 may present. The commenter further raises the example of E-Verify's requirement that an individual who chooses to show a List B document for the Form I-9 for an employer that uses E-Verify can only show a List B document that contains a photo.

Response: The Department disagrees with this comment and is adopting the definition as the Department proposed with no change. For the reasons discussed in the NPRM, OCAHO case law supports the reading of the statute reflected in this definition, and the Special Counsel's longstanding position has been that discriminatory requests for specific documents violate the statute. *See, e.g., Townsend Culinary, Inc.*, 8 OCAHO no. 1032 at 507; *United States v. Strano Farms*, 5 OCAHO no. 748, 206, 222–23 (1995); *United States v. Beverly Ctr.*, 5 OCAHO no. 762, 347, 351 (1995); *United States v. A.J. Bart, Inc.*, 3 OCAHO no. 538, 1374, 1387 (1993); *see also United States v. Zabala Vineyards*, 6 OCAHO no. 830, 72, 85–88 (1995) (holding, prior to the enactment of IIRIRA, that 8 U.S.C. 1324b(a)(6) did not prohibit an employer's request for specific documents "in the absence of evidence that . . . aliens but not other new hires were required to rely on and produce specific documents").

Regarding the comment that the definition is confusing in light of existing limitations on the documents individuals can provide, the examples the commenter provides do not involve an employer imposing a limitation based on an individual's citizenship status or national origin. The fact that Form I-9 rules impose, as the commenter states, "limitation[s] on the documents that may be presented" does not implicate a specific discrimination concern. In the commenter's example involving an E-Verify user, if an employer specifies that a worker who wishes to show a List B document can only show a List B document with a photo based on the employer's use of E-Verify, and applies this E-Verify obligation consistently regardless of its workers' citizenship status or national origin, the employer would not violate the statute because of that specification. However, an employer that imposes limitations on the types of valid and

acceptable Form I-9 documents a worker can present due to the worker's protected class is likely to violate the statute.

Issue: The Department received one comment on the definition of "protected individual" in paragraph (k). This commenter raises a concern that the definition excludes lawful permanent residents who do not apply for naturalization within six months of the date the lawful permanent resident first becomes eligible.

Response: The Department will not make the change proposed by the commenter because the definition of "protected individual" comes directly from the statute at 8 U.S.C. 1324b(a)(3), and only Congress can change the meaning of "protected individual." However, the Department is modifying the definition of "protected individual" to make the regulatory language mirror the statutory language by adding the words "granted the status of" to paragraph (k)(3).

Issue: One commenter expresses support for the definition of "recruitment and referral for a fee" in paragraph (l) and also asks the Department to clarify that "the exclusion of union hiring halls applies to" this definition "in the same manner as [the exclusion] applies to the parallel phrases in 8 CFR 274a.1(d) & (e)."

Response: The Department agrees with the commenter that the definition at paragraph (l) as proposed excludes union hiring halls. This definition has the same meaning as "recruit for a fee" and "refer for a fee," respectively, in 8 CFR 274a.1, and those definitions expressly exclude union hiring halls as well.

Issue: One commenter requests that the Department add a definition to the rule to "clarify that [section 1324b] of the INA protects all work authorized individuals from unfair documentary practices." This commenter believes the proposed rule "does not adequately guard all work-authorized individuals from unfair documentary practices." The commenter states that while there is a conflict in the case law on this issue, it believes that "the more persuasive cases hold that the prohibition on document abuse, 8 U.S.C. 1324b(a)(6), extends to all work-authorized individuals."

Response: The Department declines to add regulatory language addressing this issue. The Department notes that the revised rule incorporates the amended statutory language found in 8 U.S.C. 1324b(a)(6).

Charge Processing

Issue: A number of commenters raise concerns about paragraph (d) of § 44.301, which allows a 45-day period for a charging party to provide requested information to allow the Special Counsel to determine whether to deem what is initially an inadequate submission a charge. Some commenters believe that there is no statutory support for the use of such a grace period, pointing to what the commenters believe are "specific and relatively strict filing deadlines." Another commenter claims that the proposed revision would "in practice all but eliminate" the 45-day period because the Special Counsel could proceed to investigate while waiting for the missing information even if the individual never provides the information.

Response: The Department disagrees with these comments and is adopting the language as the Department proposed with no changes. The Department agrees with commenters that the statute requires that the charging party file a charge within 180 days of the alleged unfair immigration-related employment practice. However, the statute also gives the Attorney General broad discretion to determine what information is necessary to constitute a charge. 8 U.S.C. 1324b(b)(1) ("Charges shall be in writing under oath or affirmation and shall contain such information as the Attorney General requires."). Pursuant to the authority granted in 8 U.S.C. 1324b(b)(1), the Attorney General has provided several ways a charging party can meet its charge filing obligations. First, a charging party can timely file a charge that on its face satisfies the definition of "charge" at § 44.101(a). Second, a charging party can file a submission that is "inadequate to constitute a complete charge as defined in § 44.101(a)" but then provide additional information to make the charge "complete." Section 44.301(d)(1) and (d)(2). Third, the Special Counsel can deem a submission to "be a complete charge even though it is inadequate to constitute a charge as defined in § 44.101(a)." Section 44.301(e). As long as the initial submission is timely, nothing in the statute prevents the Attorney General from later deeming the submission to be a charge.

The Department's regulations on the handling of inadequate submissions are consistent with case law interpreting similar statutory language in Title VII. *See Edelman v. Lynchburg Coll.*, 535 U.S. 106, 109 (2002) (upholding an EEOC regulation that permitted "an otherwise timely filer to verify a charge

after the time for filing has expired.”). Like section 1324b, Title VII contains time limits for filing charges. 42 U.S.C. 2000e–5(e)(1). Title VII also contains language nearly identical to the language in 8 U.S.C. 1324b(b)(1). 42 U.S.C. 2000e–5(b) (“Charges shall be in writing under oath or affirmation and shall contain such information and be in such form as the Commission requires.”). Like the Department, the EEOC has promulgated regulations governing what information is required to file a charge. See 29 CFR 1601.12(a) (laying out information to be contained in a charge); 29 CFR 1601.12(b) (providing that notwithstanding the requirements for a charge’s contents in paragraph (a), a charge can be “amended” to “cure technical defects or omissions, including failure to verify the charge, or to clarify and amplify allegations made therein” and that amendments regarding acts “related to or growing out of the subject matter of the original charge will relate back to the date the charge was first received.”). The Supreme Court in *Edelman* upheld the EEOC’s rule regarding charges filed under Title VII as “reasonable.” 535 U.S. at 114. While the Department is adopting regulatory language distinct from that in the EEOC’s regulations, the same reasoning supports the Attorney General’s authority to determine the information required for a charge and to adopt these regulations regarding charge processing.

Moreover, the Department’s decision to maintain a 45-day grace period for submitting additional information promotes certainty and finality for respondents and the Special Counsel by using a definite timeframe for the charging party to provide the requested information. The regulations are necessary to prevent the Special Counsel from investigating claims that clearly fall outside of its jurisdiction, while at the same time ensuring that timely-filed meritorious submissions that may be missing some information can still be considered timely. The statute’s remedial purpose would be frustrated, and meritorious claims would be foreclosed, if the Special Counsel imposed a harsh and rigid rule requiring dismissal of timely-filed charges that may allege a violation of section 1324b, but that do not initially set forth all the elements necessary to be deemed a complete charge.

Issue: One commenter writes in support of § 44.301, which sets forth how the Special Counsel handles submissions and charges received more than 180 days after the date of alleged discrimination. This commenter appears to refer to language in paragraph (g) that

provides that the Special Counsel shall dismiss charges and submissions received more than 180 days after the date of alleged discrimination “unless the Special Counsel determines that the principles of waiver, estoppel, or equitable tolling apply.”

Response: The Department appreciates this comment. As discussed more in the NPRM, these principles are well-established in relevant administrative decisions. See, e.g., *Lardy v. United Airlines, Inc.*, 4 OCAHO no. 595, 31, 73 (1994); *Halim v. Accu-Labs Research, Inc.*, 3 OCAHO no. 474, 765, 779 (1992).

Issue: The Department received three comments criticizing the proposed language in § 44.301(g) regarding the acceptance of charges more than 180 days after the alleged violation where principles of waiver, estoppel or equitable tolling apply. One commenter objects to § 44.301(g)’s lack of express language describing the frequency with which the principles of waiver, estoppel, or equitable tolling will apply. Another commenter claims that it is “not appropriate” for the Special Counsel “to accept late filings at its discretion” because it “subjects employers to uncertainty and lack of finality.” A third commenter states that these “‘equitable’ provisions provide the Special Counsel with immense leeway to obviate the statutory 180-day filing deadline” in section 1324b.

Response: The Department is satisfied that the explanation provided in the preamble and acknowledged by the commenters—that those equitable modifications of filing deadlines would be “sparingly applied”—is sufficient. Because the Department will make exceptions only rarely, the Department does not agree that this proposed change creates the level of uncertainty and lack of finality that outweighs the need for flexibility in rare circumstances, such as where the charging party’s untimely filing was due to circumstances beyond the charging party’s control. As noted in the response to the previous comment, these principles are well-established in relevant administrative decisions.

Investigation

Issue: Some commenters claim that § 44.302 would substantially broaden the Special Counsel’s investigatory powers without a legal basis and in a way that would raise constitutional concerns under the Fourth Amendment, all without sufficient explanation as to the reasons. These commenters also cite to *In re Investigation of Charge of Estela Reyes-Martinon v. Swift & Co.*, 9 OCAHO no. 1058 (2000), to assert that the Special Counsel lacks the

investigatory power under section 1324b to seek written interrogatory answers or to require that respondents create evidence not yet in existence. Another commenter claims that this new “broad, sweeping authority” would allow the Special Counsel to “subpoena anything, in any format, at any time.” For example, this commenter asks whether this would mean that “employers must now keep Forms I–9 for an indefinite period of time,” a requirement that in this commenter’s view could violate other federal and state laws.

Response: The Department disagrees with these comments and is adopting the language as proposed with no changes. First, neither the law nor the regulations on their face violate the Fourth Amendment. See *United States v. Salerno*, 481 U.S. 739, 745 (1987) (Facial challenges are “the most difficult . . . to mount successfully.”); *City of Los Angeles v. Patel*, 135 S. Ct. 2443, 2450 (2015) (“[C]laims for facial relief under the Fourth Amendment are unlikely to succeed when there is substantial ambiguity as to what conduct a statute authorizes.”); *Sibron v. New York*, 392 U.S. 40, 59 (1968) (“The constitutional validity of a warrantless search is pre-eminently the sort of question which can only be decided in the concrete factual context of an individual case.”). If a person or entity believes that in a particular case the Department is applying the statute or regulations in an unconstitutional manner, they may bring an as-applied constitutional challenge.

Second, the Department agrees that while a person or entity being investigated must respond to requests for information and also respond to requests for documents that already exist, the person or entity is not required to otherwise create new documents or to provide documents in a format that does not exist at the time of the subpoena. For example, if an employer does not make and retain copies of Form I–9 documentation, the employer is not obligated to provide copies of Form I–9 documentation, nor should it ask its employees to provide a copy or present their documentation anew to make copies. However, the Department disagrees that the proposed revisions in the NPRM require otherwise. Moreover, Department regulations have allowed the Special Counsel to propound interrogatories since originally promulgated in 1987, which is consistent with the Special Counsel’s authority to have, “in accordance with regulations of the Attorney General[,] . . . reasonable access to examine evidence of any

person or entity being investigated.” 8 U.S.C. 1324b(f)(2).

The Department also disagrees with the comment that the *Swift* decision precludes the Special Counsel from propounding interrogatories. Although these commenters are correct that the ALJ in *Swift* determined that OCAHO lacked authority to order a party to respond to interrogatories propounded by the Special Counsel, 9 OCAHO no. 1058 at 14, the ALJ also recognized that the Special Counsel might still have the authority to propound interrogatories, *id.* at 8, 13, and also acknowledged that other OCAHO ALJs had ordered respondents to comply with subpoenas seeking both documents and answers to interrogatories. *Id.* at 12–13. The ALJ in *Swift* further acknowledged but declined to follow a prior case, *In re Investigation of Strano Farms*, in which a different ALJ held that “the fact that the evidence sought in the subpoena at issue does not currently exist in documentary form does not invalidate the subpoena in question.” 3 OCAHO no. 521, 1217, 1223 (1993). Because *Swift* concerned OCAHO authority, not the Special Counsel’s authority, and in light of the conflict in case law, the Department does not believe *Swift* is determinative on this issue. The Department is relying on the broad authority under 8 U.S.C. 1324b(f)(2) and OCAHO case law that supports the Special Counsel’s ability to propound interrogatories and, when necessary, seek a subpoena to obtain answers. This is in accord with the Special Counsel’s current practice of requesting both documents and information during investigations and obtaining a subpoena from OCAHO as necessary to ensure that the Special Counsel receives needed information and documents.

Third, regarding concerns on Form I–9 retention requirements, while an employer being investigated is obligated to maintain potentially relevant documents, which would include Forms I–9, other employers are subject only to the general retention requirements in section 1324a and any other federal, state or local record retention obligations (including any preservation requirements under other investigations/suits).

Issue: One commenter questions why the Department has sought to codify a respondent’s preservation obligations in § 44.302(d), asserting that the proposed document retention provisions “are overly vague, confusing, and unnecessary.” In particular, the commenter said that “[t]he proposal gives little guidance to employers concerning how they are to determine what evidence is ‘potentially relevant’

to an allegation or how to apply that ‘potentially relevant’ formulation.”

Response: The Department disagrees with this commenter’s suggested conclusions but is providing here additional explanation for the proposals. OCAHO has acknowledged that an employer is on notice of its obligation to preserve potentially relevant evidence when it receives notice of a charge filed against it under section 1324b. *See Sefic v. Marconi*, 9 OCAHO no. 1123, 13–14 (2007). In *Sefic*, OCAHO cited to *Occidental Life Ins. Co. v. EEOC*, 432 U.S. 355, 372 (1977), for the proposition that “unlike a litigant in a private suit who may get notice only when a complaint is filed, a Title VII defendant gets notice of the possibility of a suit when the charge is served.” *Sefic*, 9 OCAHO no. 1123 at 14. Paragraph (d) reflects this obligation. Moreover, the paragraph applies the preservation obligation to any alleged unfair immigration-related employment practice, meaning that the respondent has notice of the alleged violation(s) that the Special Counsel is investigating.

What constitutes “potentially relevant” evidence will vary depending upon the scope of the Special Counsel’s investigation and the evidence the employer has. In the context of an investigation by the Special Counsel, potentially relevant evidence will often include evidence relating to a person or entity’s recruiting, hiring, employment eligibility verification, and firing policies and practices. As with other types of employment discrimination claims, this may commonly include job applications, personnel records, a person or entity’s policies, and applicant flow information. Potentially relevant evidence under section 1324b will also include Forms I–9 along with any attachments, and E-Verify information. The Department notes that these examples are merely illustrative and by no means reflect the universe of what can be considered potentially relevant to an investigation by the Special Counsel. After considering the public comments, the Department is adopting this paragraph as it was proposed.

Authority To File OCAHO Complaints

Issue: Several commenters disagree with the proposed revision to § 44.303(d) regarding the timeframe for the Special Counsel to file a charged-based complaint with OCAHO. One of these commenters raises a concern that the Department is attempting to extend the applicable statute of limitations for the Special Counsel to file a complaint, rather than clarifying existing statutory limitations. This commenter believes

this proposed revision will cause investigations under this law to go “in perpetuity” and that the timeframe to file a complaint would be “excessive and unreasonable.” The commenter further believes this change will promote abusive and costly litigation and asks the Department to reconsider. A different commenter disagrees with the Department’s interpretation of the statutory language, reading the statute to limit the Special Counsel to filing a complaint by the end of the additional 90-day period during which the Special Counsel continues to have the right to investigate the charge and file a complaint. Another commenter states that this proposed revision is “extremely burdensome and disruptive to employers.” A different commenter states that “this puts employers in the position of having to potentially wait years to know whether a claim will be pursued.”

Response: The Department declines to make any changes to § 44.303(d) as proposed because the proposed revision makes no change to the applicable statutory time limits for charge-based complaints filed by the Special Counsel and is consistent with case law under both this law and a similar provision in Title VII. *See, e.g., United States v. Agripac, Inc.*, 8 OCAHO no. 1028, 399, 404 (1999); *United States v. Gen. Dynamics Corp.*, 3 OCAHO no. 517, 1121, 1156–57 (1993); *Occidental Life Ins. Co. of Calif. v. EEOC*, 432 U.S. 355, 361 (1977). As noted in the NPRM, the proposed revisions simply clarify that the Special Counsel is not bound by the statutory time limits for filing a complaint that are applicable to private actions. Moreover, the Department does not anticipate any significant changes to the speed with which it handles its investigations, and any costs that employers incur as a result of protracted litigation exist regardless of this proposed revision. For the reasons discussed in the NPRM, the Department believes this proposed revision is appropriate.

Issue: A number of comments address the proposed revision to § 44.304(b) regarding the timeframe for the Special Counsel to file a complaint with OCAHO based on an investigation opened at the Special Counsel’s initiative. One commenter expresses support for the proposed revision, stating that “[i]t is in the interest of all parties—employers, employees, and OSC—if this filing deadline is removed so that OSC can thoroughly and accurately investigate a case before formally filing a case against an employer.” This commenter also states that “nothing in the Immigration and

Nationality Act . . . provides for a filing deadline for these cases” and “[t]he [EEOC], a sister federal agency that protects against employment discrimination, has no similar filing deadline.”

Several commenters are critical of the proposed revision. Some commenters believe “[t]he Special Counsel’s time to bring a complaint and the scope of that complaint should be consistent with Congress’ clear directive in Section 1324b(d)(3).” These commenters appear to believe that because the statute lays out a clear timeframe for filing charges, there should be a comparable limit on the timeframe imposed on the Special Counsel for filing a complaint. One commenter disagrees with the Department’s reading of the statute, insisting that it requires the Special Counsel to file a complaint within 180 days of the discriminatory act. Another commenter argues that the NPRM inappropriately relies on *Agripac, Inc.*, 8 OCAHO no. 1028, and *General Dynamics Corp.*, 3 OCAHO no. 517, for the proposition that “the statute contains no time limits for an independent investigation.” This commenter similarly dismisses the Department’s reliance on *Occidental Life Insurance*, 432 U.S. 355. Other commenters point to the original regulatory text as support for why the Department cannot revise that regulatory text to align more closely with the statutory text.

Response: The Department declines to make any change to § 44.304(b) as proposed. As discussed in the NPRM, the most reasonable application of 8 U.S.C. 1324b(d)(3), which specifies that “[n]o complaint may be filed respecting any unfair immigration-related employment practice occurring more than 180 days prior to the date of the filing of the charge with the Special Counsel,” is that the Special Counsel may not file a complaint unless the Special Counsel opened an investigation on the Special Counsel’s own initiative pursuant to 8 U.S.C. 1324b(d)(1) within 180 days of the last known act of discrimination, as the opening of the Special Counsel’s investigation is the nearest equivalent to the filing of a charge. This reading of the statute is also supported by case law. See *United States v. Fairfield Jersey, Inc.*, 9 OCAHO no. 1069, 5 (2001) (acknowledging the absence of a statutory time limitation for the filing of a complaint arising out of an independent investigation). Furthermore, in the NPRM the Department cited to *Agripac*, *General Dynamics Corporation*, and *Occidental Life Insurance* when discussing the Special Counsel’s time limits for filing

a *charge-based* complaint, not—as one commenter suggests—when discussing the Special Counsel’s time limits for filing a complaint based on an independent investigation that the Special Counsel opened pursuant to 8 U.S.C. 1324b(d)(1). The Department agrees with the commenter that *Agripac* was not based on an independent investigation opened pursuant to 8 U.S.C. 1324b(d)(1). The Department cited to *Agripac* and *General Dynamics Corporation* in the NPRM for the broader proposition that the Special Counsel is not bound by the statutory time limits that are applicable to individuals filing private actions, and cited to *Occidental Life Insurance* as instructive given the similar charge-filing procedures and virtually identical timetables found in Title VII. The Department has considered the view expressed by this commenter. However, the Department is not changing its long-held interpretation of 8 U.S.C. 1324(d)(3), but rather, is conforming the regulatory text to more closely align with the statutory text.

Issue: Some commenters object more broadly to the clarified time limitations for the Department to file a complaint, based on a view that the timelines are contrary to public policy. In particular, these commenters state that a longer deadline for the Department to file complaints would interfere with the availability of witnesses, employers’ ability to preserve evidence, and witnesses’ ability to recall the events in question, and would burden employers by requiring a longer document retention period. A number of commenters also object to the Department’s reliance on a five-year limitations period under 28 U.S.C. 2462 for bringing actions to impose civil penalties.

Response: The Department will make no changes to its clarified time limitations for filing a complaint in either § 44.303(d) or § 44.304(b) and is adopting these subsections as proposed with no changes. These timelines are consistent with the statute and OCAHO case law cited in the NPRM and discussed in the prior comment response above. In addition, section 1324b is aimed at stopping discriminatory practices and providing redress for victims of discrimination. In the Department’s view, public policy would not be served by imposing time limitations on this remedial statute that are unsupported by the statutory language. Furthermore, any delays or costs associated with protracted litigation exists independent of this proposed revision. Finally, the Department’s reliance on 28 U.S.C. 2462

for imposing a time limit for the Special Counsel to bring an action involving civil penalties is not new, but rather, reflects the Department’s long-standing position regarding the outer time limits imposed on the Special Counsel. As discussed in the NPRM, similar to the EEOC, the Special Counsel is still bound by equitable limits on the filing of a complaint. See *EEOC v. Propak Logistics, Inc.*, 746 F.3d 145 (4th Cir. 2014).

Other Comments

Issue: Two commenters express support for reforming U.S. immigration laws and in particular reforming immigration laws for employment-based visas. One commenter raised concerns about the wait times for beneficiaries of employment-based visas.

Response: These comments fall outside the scope of this rule. The proposed revisions implemented by this final rule do not change U.S. immigration laws or the employment-based visa process, including wait times. The proposed revisions implement existing law prohibiting unlawful employment discrimination based on citizenship status or national origin.

Issue: One commenter raises concerns about the Form I–9 employment eligibility verification process and asked that “everyone, federal agencies, employers and employees, lawyers, Congress, etc. should together establish a timely efficient effective employment verification process, or scrap it.”

Response: USCIS, within DHS, publishes the Form I–9 and accompanying guidance and determines which documents are acceptable for employment eligibility verification, pursuant to the requirements of 8 U.S.C. 1324a. This issue falls outside the scope of this rule and the Department refers the commenter to USCIS for more information on this issue.

Issue: One commenter seeks guidance on whether an employer may refuse to accept for employment eligibility verification purposes a driver’s license or identification card issued by a state that does not have “citizenship requirements.”

Response: USCIS publishes the Form I–9 and accompanying guidance and determines which documents are acceptable for employment eligibility verification. This issue falls outside the scope of this rule and the Department refers the commenter to USCIS for more information on this issue.

Issue: One commenter requests guidance on the issue of states recognizing other states’ driver’s licenses and “certifications” as “valid

eligibility” for individuals to obtain licenses in a state where a particular immigration status may otherwise disqualify that individual.

Response: This issue falls outside the scope of this rule and the Department refers the commenter to USCIS for more information on this issue.

Regulatory Procedures

Executive Order 12866 (Regulatory Planning and Review) and Executive Order 13563 (Improving Regulation and Regulatory Review)

The rule has been drafted and reviewed in accordance with Executive Order 12866 (Sept. 30, 1993), and Executive Order 13563 (Jan. 18, 2011). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits (while recognizing that some benefits and costs are difficult to quantify), reducing costs, harmonizing rules, and promoting flexibility.

Under Executive Order 12866, the Department must determine whether a regulatory action is “significant” and, therefore, subject to the requirements of the Executive Order and Office of Management and Budget (OMB) review. Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as any regulatory action that is likely to result in a rule “that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or

the principles set forth in this Executive Order.”

The Department has determined that the rule is not an economically significant regulatory action under section 3(f)(1) of Executive Order 12866 because the Department estimates that its annual economic impact will be a one-time, first-year-only cost of approximately \$28.0 million—far less than \$100 million. The Department has quantified and monetized the costs of the rule over a period of 10 years (2017 through 2026) to ensure that its estimate captures all major benefits and costs, but has determined that all quantifiable costs will be incurred only during the first year after the regulation is implemented. Because the Department was unable to quantify the benefits of the rule due to data limitations, the benefits are described qualitatively.

The Department considered the following factors when measuring the rule’s impact: (a) Employers familiarizing themselves with the rule, (b) employers reviewing and revising their employment eligibility verification policies, and (c) employers and employees viewing training webinars. The largest cost is the cumulative costs that employers would have to incur to review and revise their employment eligibility verification policies, which the Department estimates to be \$17,858,003. The next largest cost is the cost employers would have to incur to familiarize themselves with the rule, which the Department estimates to be \$10,132,200.

The economic analysis presented below covers all employers with four or more employees, consistent with the statute’s requirement that a “person or entity” have more than three employees to fall within the Special Counsel’s jurisdiction for citizenship status and national origin discrimination in hiring, firing, and recruitment or referral for a fee. 8 U.S.C. 1324(a)(2).

In the following sections, the Department first presents a summary of the public comments received on the economic analysis, the Department’s responses to these comments, and changes made to the estimation of the costs of this rule in response to those comments. Next, the Department presents a subject-by-subject analysis of the costs of the rule. The Department

then presents the undiscounted 10-year total cost (\$28.0 million) and a discussion of the expected benefits of the rule. Because the costs are incurred entirely in the first year, they are not discounted.

The Department did not identify any transfer payments associated with the provisions of the rule. Transfer payments, as defined by OMB Circular A–4, are “monetary payments from one group to another that do not affect total resources available to society.” OMB Circular A–4 at 38 (Sept. 17, 2003). Transfer payments do not result in additional costs or benefits to society.

In the subject-by-subject analysis, the Department presents the labor and other costs for each provision of the rule. Exhibit 1 displays the labor categories that are expected to experience an increase in the level of effort (workload) due to the rule. To estimate the cost, the Department multiplied each labor category’s hourly compensation rate by the level of effort. The Department used wage rates from the Mean Hourly Wage Rate calculated by the Bureau of Labor Statistics.¹ Wage rates are adjusted using a loaded wage factor to reflect total compensation, which includes health and retirement benefits. The loaded wage factor was calculated as the ratio of average total compensation to average wages in 2015, which resulted in 1.44 for the private sector.² The Department then multiplied the loaded wage factor by each labor category’s wage rate to calculate an hourly compensation rate.

¹ Bureau of Labor Statistics, December 2015 National Occupational Employment and Wage Estimates: United States (Mar. 10, 2016), http://www.bls.gov/schedule/archives/ecec_nr.htm#2015.

² The Department calculated average total compensation by taking the average of the cost of total compensation for all workers in December, September, June, and March of 2015 (((\$31.70 + \$31.53 + \$31.39 + \$31.65)/4 = \$31.57), and calculated average wages by taking the average of the cost of wages and salaries for those employees in each of those four months (((\$22.14 + \$21.98 + \$21.82 + \$21.94)/4 = \$21.97). See data retrieved from the BLS data retrieval tool, Private Industry Total Compensation for All Occupations and Private Industry Wages and Salaries for All Occupations, <http://data.bls.gov/cgi-bin/survey/most?cm>. (http://www.bls.gov/schedule/archives/ecec_nr.htm.) The Department then calculated the loaded wage factor by taking the ratio of average total compensation to average total wages (\$31.57/\$21.97 = 1.44).

EXHIBIT 1—CALCULATION OF HOURLY COMPENSATION RATES

Position	Average hourly wage	Loaded wage factor	Hourly compensation rate
	a	b	c = a × b
Human Resources Manager	\$56.29	1.44	\$81.0576
Attorney	65.51		94.3344

1. Public Comments on Regulatory Assessment and Department Responses

This section discusses public comments to the economic analysis that accompanied the proposed rule, the Department's responses to those comments, and changes made to the estimation of costs of this rule in response to those comments.

The Department received 24 comments related to the economic analysis accompanying the proposed rule. However, 18 of these comments had similar, although not identical, text. The remaining six comments presented unique input on the economic analysis.

a. Comments Regarding the Number of Employers Affected by the Rule

Many commenters disagreed with the methodology included in the economic analysis for estimating the number of impacted employers. The commenters indicated that the Department has underestimated the number of impacted employers because it used a basis of the number of organizational members of the Council for Global Immigration (CGI) and the Society for Human Resource Management (SHRM), totaling 56,685 firms. The commenters suggested using data from the U.S. Census of Business, compiled by the Office of Advocacy of the U.S. Small Business Administration (SBA), which shows that there were 2,182,169 firms with more than four employees in 2012, the most recent year for which the data is available.

Relying on 2012 U.S. Census Bureau data, one commenter indicated that 3,916,991 employers with at least five employees should be included in the analysis. The commenter stated that it is not reasonable to limit the analysis to organizations with developed human resources practices because, regardless of whether an organization has developed human resources practices, it can be held accountable for unfair immigration-related unfair employment practices.

One commenter asserted that the number of organizational members of CGI and SHRM should not be the basis for the number of impacted employers because those associations do not

represent the entire universe of employers with developed human resource practices, which is equal to approximately 2 million employers.

For purposes of calculating rule familiarization costs, one commenter stated that firms with fewer than four employees should be included because these firms will have to familiarize themselves with the rule to figure out its scope and how changes to their business would impact the applicability of the rule.

For purposes of calculating the costs to review and revise existing policies, procedures, and management training materials, one commenter indicated that either the SBA data on covered employers should have been used (*i.e.*, 2,182,169 firms) or the Department should have taken the readily available information from USCIS about employers using the E-Verify system (more than 600,000 employers) to estimate better the number of employers likely to have some formal employment eligibility verification policy.

The Department does not agree that all employers covered by the law should be included to estimate the costs of the rule, nor does the Department agree that all E-Verify employers or all employers with fewer than four employees should be included. The revisions to the current regulations are meant to clarify obligations that employers already have under the statute and current regulations, and do not impose new burdens for compliance.

The number of employers that will be impacted by the revisions to the current regulations is limited to those employers that have sufficiently detailed policies for avoiding discrimination under section 1324b such that the revisions will require them to review and update their policies. Many E-Verify and other employers may have basic policies in place for the proper administration of the Form I-9 and E-Verify processes, and many employers may have anti-discrimination policies concerning hiring and firing. In the Department's experience investigating discrimination claims, however, and in the Department's experience educating employers

through its hotline and other training opportunities, few employers already have policies in place governing how to avoid the types of discrimination covered by section 1324b. In the Department's experience, even fewer employers already have policies that describe information about the Special Counsel's complaint-filing deadlines, charge-filing procedures, and definitions of statutory terms, as this type of information does not typically relate to the duties of human resources professionals, which are at the heart of the revisions.

Accordingly, the Department estimates that very few employers—including E-Verify employers—have employment policies so detailed that they will require revisions to their policies. Within the small group of employers that have detailed discrimination policies that describe employer obligations under section 1324b, a smaller number of employers may include the name of the office that enforces this statute in their written policies. Similarly, in the Department's experience, very small employers—those with fewer than four employees—are least likely to have developed policies relating to discrimination under section 1324b in part because their size makes it much less likely that they employ a full-time human resources professional dedicated to developing and implementing policies, but also because section 1324b clearly limits jurisdiction for discrimination in hiring, firing, and recruitment or referral for a fee to employers with four or more employees.

The Department also disagrees that the appropriate number of employers is the number of E-Verify users because, in the Department's experience regularly educating and working with these employers, E-Verify employers are not necessarily more likely to have detailed written policies relating to section 1324b that will require any updates based on the revisions made to the existing regulations.

b. Comments Regarding the Methodology for Estimating the Number of Organizations Represented Among CFGI and SHRM Membership

To determine the number of employers affected by the rule, the analysis assumed that the same ratio of organizational members to individual members existed for CFGI and SHRM. A commenter stated that it is not accurate to assume that the ratio of CFGI individual contacts to organizational members is the same as the ratio of SHRM individual members to the number of organizations that employ them. The commenter asserted that the more accurate estimate of the number of organizations represented in SHRM's membership is 125,000, rather than 56,455 organizations.

The Department will adopt the number of estimated organizational members that SHRM and CFGI provided, which is 125,000. The Department believes that the number of organizational members of SHRM and CFGI provides the best estimate of the number of employers likely to have detailed written policies discussing employer obligations under section 1324b. The Department reasonably expects that most of the limited number of employers that already have policies discussing employer obligations under section 1324b will be unlikely to have to make any revisions to those policies. The reason for this is that the revisions do not impose any new compliance obligations.

The Department requested membership information from SHRM and CFGI before the publication of the NPRM and appreciates receiving that information now.

c. Comments Regarding the "Upfront, One-Time Cost" Assumption

A commenter expressed disagreement with the assumption that the rule imposes an "upfront, one-time cost." Instead, the commenter indicated that in addition to the costs of initial implementation, employers will incur legal costs and training costs every time they are presented with a unique situation that is not covered by the employer's general policy against discrimination, *e.g.*, any acknowledgment of citizenship status during the hiring process.

The Department does not agree that there will be ongoing training costs because the costs described by the commenter relate not to burdens that are imposed by the revisions to the current regulations, but instead relate to the overall burden of compliance. As noted, employers have the same obligations

under the statute and current regulations not to discriminate or retaliate.

d. Comments Regarding the Estimated Costs for Implementation of the Rule

A commenter stated that the Department significantly underestimates the number of employees who will be involved in reading, reviewing, and making changes to policies by assuming that only one human resources manager per employer will do so. The commenter asserted that it is almost certain that more people will be involved in making these changes, including supervisors and, in many cases, in-house and outside counsel. Additionally, the commenter asserted that after changes are made, all employees involved in the hiring process will have to be brought up to speed, which will necessitate additional training. The commenter also asserted that the Department underestimates the amount of time required to review the rule, revise policies, and update staff on the new regulation and policies. In particular, this commenter pointed to the SHRM Knowledge Center five-step process for developing human resources policies as instructive for assessing the appropriate amount of time needed for an entity to revise current policies based on the regulatory changes.

The Department does not agree that, for most employers, more than one staff member needs to be involved in reading, reviewing, and making changes to policies as a result of the rule. Although employers may have different experiences in implementing HR updates, the Department estimates, based on its experience with entities covered by this law, that on average, only one individual will be involved in making the few if any changes. Instead, it appears that the commenters are concerned about reviewing and educating themselves about existing obligations to prevent discrimination, which relates to compliance with the law in general but not the changes in the rule. For example, employers are already prohibited from discriminating in hiring, firing, and recruiting or referring for a fee based on citizenship status and national origin. Also, employers already must allow each employee to choose which valid documentation to provide for employment eligibility verification purposes, regardless of citizenship status or national origin. If an employer decides to create a new policy explaining those obligations and train its staff accordingly, these costs are not tied to changes promulgated in this rule but instead to obligations that have

existed since at least 1996 and in some cases 1986.

The Department does not agree that additional training is required for the changes promulgated through this rule because relatively few employers have sufficiently detailed policies that would be impacted by revisions to the current regulations.

Although the Department recognizes that employers may have different practices, the Department does not believe, based on its experience with covered entities, that, in general, more than one-and-a-half hours is required to review the new rule and update policies that require revisions. In the Department's view, the five-step process cited by one commenter for *developing* human resources policies would not apply in this context. The first step in the five-step process, which is "identifying the need for a policy," is inapplicable because an entity should be assessing the need for a policy based not on these regulatory changes but based on the entity's legal obligations required by statute. Likewise, the second step, "determine policy content," would flow not from these regulatory revisions but from the statute. The Department similarly disagrees that steps three and four—obtaining stakeholder support and updating staff about the regulatory changes—should be factored into this calculation, as staff seeking to comply with their statutory and current regulatory obligations would not need to be updated on these types of regulatory revisions and, as discussed throughout this rule, the revisions to the regulations create no new obligations. While the fifth step, which involves updating and revising the policy, may apply in some instances, the Department has accounted for this in its assessment of one-and-a-half hours for reviewing and revising policies.

e. Comments Regarding the Estimated Cost for Training

A commenter stated that the estimated training costs are based on untenable assumptions. Specifically, the commenter expressed disagreement that only 347 people would receive the training. Instead, the commenter indicated that it should be assumed that one employee for each of the affected employers would take the one-hour training. Also, the commenter stated that the training cost component will not be a one-time cost item but, instead, will be a recurring cost as new or replacement managers are hired. Additionally, the formation of new employer companies will trigger future additional training costs. Similarly,

another commenter stated that the Department fails to account for the significant staff time that will be required to ensure that those involved in the hiring process are aware of the new regulation and policies and, therefore, underestimates the training cost of this rule “by many orders of magnitude.”

The Department does not agree with the assertions by these commenters and has already addressed three of these four issues above in responses to other comments. In response to concerns about training costs to new employers, the Department also does not agree that the formation of new employers requires additional costs. When an employer is formed, the employer should learn of its obligations under various employment, labor, and other laws, but the changes promulgated through this rule likely have no effect on new employers because they do not alter employers’ core obligations to comply with section 1324b, and any training on these obligations would have occurred anyway—regardless of this rule’s changes to the current regulations. For example, learning about the name of the office that enforces section 1324b is less critical than an employer learning about its core statutory obligations not to discriminate. A new employer would have no need to revise any policies to reflect the narrow changes in this rule because the employer could simply prepare a policy that incorporates longstanding obligations not to discriminate unlawfully based on citizenship status or national origin, and not to retaliate. In response to concerns that the training cost is a recurring cost as new or replacement managers are hired, the Department does not agree. For the same reasons that a new employer would not incur costs flowing from the changes to the regulations, a new or replacement manager would need training on the employer’s core obligations to comply with section 1324b and not training to understand the changes between the previous and current regulations.

f. Comments Regarding Specific Costs Not Accounted for in the Economic Analysis

A commenter stated that the Department does not account for (1) increases in legal fees and penalties for defending discrimination claims due to the new regulation, or (2) additional costs for document retention employers will incur due to changes in the statute of limitations for the Special Counsel to file a charge.

The Department does not agree that there is sufficient basis for the assertion

that the revisions will cause an increase in legal fees and penalties. The revisions make no change to the applicable statutory time limits for charge-based complaints filed by the Special Counsel and are consistent with case law under both this law and Title VII. Moreover, the Department does not anticipate any significant changes to the speed with which it handles its investigations, and any costs that employers incur as a result of protracted litigation exist regardless of this revision.

Moreover, the Department currently extends investigation times through stipulations with respondents and, when needed, by seeking leave from the Office of the Chief Administrative Hearing Officer (OCAHO). Finally, the Special Counsel has filed nine lawsuits in the last five years combined and has entered into a total of 100 settlements during that same period. Thus, a relatively small number of employers are affected by litigation costs, and these employers have no basis to expect that the revisions would increase the level of litigation. If anything, the revisions would better assist employers in understanding the case law that is reflected in the revisions, helping them to comply with the law and avoid litigation altogether. Moreover, the Department makes many free resources available to employers to assist them with compliance, including (1) a public Web site containing an employer tab with over 20 employer guidance documents, a frequently asked questions section, free educational videos, and technical assistance letters; (2) a toll-free employer hotline; and (3) free hardcopy educational materials distributed in many forums.

Employers investigated by the Special Counsel already have document retention requirements, and the revisions do not change those requirements. Those requirements end once a matter is resolved, after the conclusion of any monitoring period, which ordinarily takes two to three years. Employers that are not subject to an investigation by the Special Counsel would continue to operate under their existing retention policies. The commenters did not provide estimates for these additional retention requirements.

g. Other General Comments on the Economic Analysis

A few commenters stated that the NPRM does not satisfy the requirements of the Regulatory Flexibility Act or that it underestimates the impacts of the rule on employers. A commenter stated that the rule exceeds the \$100 million threshold under the Regulatory

Flexibility Act requirements, arguing that the rule should be further analyzed by the Office of Information and Regulatory Affairs within OMB. The commenter, however, did not provide an explanation for how the commenter arrived at this estimated amount.

Accordingly, the Department is unable to analyze the specifics of the commenter’s comment and therefore declines to agree with this comment and instead relies upon its own analysis of the economic impact of these revisions, and as discussed in responses provided above to other comments.

2. Subject-by-Subject Analysis

a. Employers Familiarize Themselves With the Rule

During the first year of the rule, employers with a developed human resources practice will need to read and review the rule to learn about the new requirements. The Department determined that no costs will be incurred by employers to familiarize themselves with the rule in years two through ten because (1) the cost for an existing employer to familiarize itself with the rule if it delays doing so until a subsequent year is already incorporated into the first-year cost calculations; and (2) for employers that are newly created in years two through ten, the cost of familiarization is the same as exists under the current regulations and, therefore, there is no incremental cost.

Employers will incur labor costs to familiarize themselves with the new rule. To estimate the labor cost of this provision, the Department first estimated the number of employers that will need to familiarize themselves with the rule by relying on the number of organizational members in CFGI and SHRM.³ The Department used the number of organizational members in these two organizations as a proxy for the number of employers with a developed human resources practice that can be expected to institutionalize the regulatory changes.

The Department then multiplied the estimated number of employers by the assumed number of human resources managers per employer, the time required to read and review the new rule, and the hourly compensation rate.

³ The Department obtained the estimated number of organizational members in CFGI and SHRM, 125,000, directly from these two organizations in their comment in response to the economic analysis accompanying the proposed rule. The estimated total number of employers is 125,000.

The Department estimated this one-time cost to be \$10,132,200.⁴

b. Employers Review and Revise Employment Eligibility Verification Policies

The rule will require some employers to revise their employment eligibility verification policies. Although under 8 U.S.C. 1324a, all U.S. employers must properly complete a Form I-9 for each individual they hire for employment in the United States to verify the individual's identity and employment authorization, only a subset of employers has detailed written policies specifically addressing compliance with section 1324b. The Department assumed that these employers would be in the practice of saving their policies in an electronic format that can be readily modified. For the policy revisions, employers will complete a simple "search-and-replace" to update the agency's name and possibly replace the term "documentation abuse(s)" with "unfair documentary practice(s)."

Only a very limited subset of those employers that have detailed written employment eligibility verification policies will need to make additional modifications to their policies. The Department estimated costs only for those employers that have written employment eligibility verification policies and that will review their policies and make changes as needed. The time involved will depend on the changes employers need to make, whether those changes need to be made to one or more documents or resource materials, and how many sections of the policy will need to be modified.

Employers with policies for verifying employment eligibility (and possibly employers with hiring or termination policies, even if they lack policies for verifying employment eligibility) might conduct a front-to-back review of their policies to determine whether any additional changes are needed.

These changes and reviews will represent an upfront, one-time cost to employers. The Department estimates this cost as the sum of the cost of revising the policies by making word replacements; the cost, for some employers, of making additional changes beyond word replacements; and the cost of conducting a front-to-back review of the employment eligibility verification policies.

⁴ The Department estimated the cost of this review by multiplying the estimated number of employers (125,000) by the number of HR managers per employer (1), the time needed to read and review the rule (1 hour), and the hourly compensation rate (\$81.0576). This calculation yields a labor cost of \$10,132,200.

To estimate the labor cost for making word replacements to the employment eligibility verification policies, the Department first estimated the number of employers that will make these revisions because of the rule by relying on the number of organizational members in SHRM and CFGI. The Department then multiplied the estimated number of employers by the assumed number of human resources managers per employer, the time required to make the revisions, and the hourly compensation rate.⁵ This calculation yields \$2,533,050 in labor costs related to revising employment eligibility verification policies in the first year of the rule. Dollar values presented in this section may not sum because of rounding error.

To estimate the additional cost to those employers making changes beyond word replacements in the first year of the rule, the Department assumed that 5 percent of employers (*i.e.*, the number of organizational members in CFGI and SHRM) will make these changes. The Department then multiplied the number of employers that will make these additional changes by the assumed number of human resources managers per employer, the time required to make the changes, and the hourly compensation rate. This calculation yields \$126,653 in labor costs in the first year of the rule.⁶

To estimate the cost of conducting a front-to-back review of the policies for verifying employment eligibility (or hiring and termination policies), the Department multiplied the number of employers (*i.e.*, the number of organizational members in CFGI and SHRM) by the number of human resources managers per employer, the time required for a review, and the hourly compensation rate. This

⁵ To estimate the cost of making revisions, the Department multiplied the estimated number of employers (125,000) by the assumed number of human resources managers per employer (1), the hourly compensation rate (\$81.0576), and the time required to make the revisions (0.25 hours). This calculation results in a cost of \$2,533,050.

⁶ To estimate the cost of making changes beyond word replacements, the Department first calculated the number of employers that will make these changes. The Department obtained the number of employers that will make these additional changes by multiplying the number of affected employers (125,000) by the assumed percentage of employers that will make these additional changes (5%). This calculation yields the number 6,250. The Department then multiplied that number of employers (6,250) by the number of human resources managers per employer (1), the hourly compensation rate (\$81.0576), and the time required to make the changes (0.25 hours). This calculation results in a cost of \$126,653.

calculation yields \$15,198,300 in labor costs in the first year of the rule.⁷

In total, the one-time costs to employers to revise policies for verifying employment eligibility by making word replacements, to make additional changes beyond word replacements for some employers, and to conduct a front-to-back review of those policies, are estimated to be \$17,858,003 (\$2,533,050 + \$126,653 + \$15,198,300) during the first year of rule implementation.

c. Employers and Employees View Training Webinars

To assist employers, employees, attorneys, and advocates in understanding the changes resulting from the rule, during the first year of implementation, as a part of the Department's ongoing educational webinar series, the Department expects to schedule three live, optional employer training webinars per month and one live, optional advocate/employee training webinar per month. These live one-hour training webinars will cover the full spectrum of employer obligations and employee rights under the statute. The Department also expects to create three one-hour recorded webinars: One for employers and their representatives and two for employees and their representatives (one in English and one in Spanish). All of these resources will be accessible, including to persons with disabilities, online at no cost to the public including employers. They will be accessible remotely and will not require travel. The Department anticipates that participation will occur mostly through viewings of the one-hour recorded webinars. The recorded training webinars developed to explain the post-rule regulatory and statutory obligations and rights will eventually replace the Department's existing live webinars. Therefore, the Department has calculated these costs for employers, employees, and their representatives to be incurred in the first year when learning about the changes, whether through a live or recorded training webinar. After that, newly-created employers will be viewing training webinars instead of (not in addition to) viewing current webinars, with no incremental costs incurred. Periodically,

⁷ To estimate the cost of reviewing the policies, the Department assumed, out of an abundance of caution, that all of the employers affiliated with CFGI or SHRM will dedicate one human resources manager to conduct a front-to-back review of their policies. Accordingly, the Department multiplied the number of employers (125,000) by the assumed number of human resources managers per employer (1), the hourly compensation rate (\$81.0576), and the time required to review the policies (1.5 hours). This calculation results in a cost of \$15,198,300.

the Department may update the webinar content in light of legal and policy developments, and may publish supplemental educational materials for employer and employee audiences on its Web site, including in other languages.

To estimate the cost to employers of viewing training webinars, the Department summed the labor costs for those viewing live webinars and the labor costs for those viewing recorded webinars. To estimate the number of employers viewing the live webinars, the Department used statistics on the average number of employer participants in live webinars. To estimate the number of employers viewing a recorded webinar, the Department used data on the number of viewings of the Department's educational videos about employer obligations under 8 U.S.C. 1324b that are posted on YouTube. Both estimates assume a 15-percent increase in participation following the implementation of the rule.⁸ The Department multiplied the number of employers expected to view a webinar (represented by their human resources managers) by the hourly compensation rate, the time required to view a webinar, and the number of training webinars in the first year for both live and recorded webinars. The total one-time cost to employers for viewing live and recorded webinars is estimated to be \$27,316.⁹

To estimate the cost to employees of viewing live training webinars, the Department used existing statistics on the average participation of employees. To estimate the cost to employees of

viewing recorded webinars, the Department used the employer-to-employee ratio of participation in the live webinars and applied it to the number of views of the Department's educational videos on the Web site *www.YouTube.com*. Both estimates assume a 5-percent increase in participation following the implementation of the rule.¹⁰ These estimates are based upon only the webinars recorded in English because the Department does not expect an increase in the number of views of the Spanish webinars following the implementation of the rule. In the Department's experience, in many cases the live Spanish webinars that have been offered have been canceled due to lack of attendees. In other cases, the Spanish webinars proceeded but with a turnout of fewer than ten participants, who are typically employees (identified as employees by the type of questions they ask or by their registrations with personal email addresses). The Department multiplied the number of employees expected to view webinars (represented by their attorneys) by the hourly compensation rate, the time required to view a webinar, and the number of training webinars in the first year for both live and recorded webinars. The Department estimates a total and aggregate one-time cost of \$1,887 for viewing live or recorded advocate/employee webinars.¹¹

Accordingly, the Department estimates the total one-time cost to

employers and employees of viewing live and recorded webinars to be \$29,203 (\$27,316 + \$1,887).

d. Benefits of the Rule

The Department was not able to quantify the benefits of the rule due to data limitations, particularly the difficulties in calculating the amount of time employers will save from the rule. Several benefits to society will result, however, from the rule, including the following:

Helping employers understand the law more efficiently. The Department projects that the regulatory changes will reduce the time and effort necessary for employers to understand their statutory obligations by incorporating well-established administrative decisions, the Department's long-standing positions, and statutory amendments into the regulations.

Increasing public access to government services. The regulatory changes will streamline the charge-filing process for individuals alleging discrimination. For example, the criteria needed to satisfy the definition of a "charge" have been reduced, and members of the public can now file charges electronically.

Eliminating public confusion regarding two offices in the Federal Government with the same name. The regulatory changes will reflect the change in the name of the office responsible for enforcing 8 U.S.C. 1324b from the Office of Special Counsel for Immigration-Related Unfair Employment Practices to the Immigrant and Employee Rights Section, thereby eliminating delays in processing submissions that currently occur due to confusion associated with having two Offices of Special Counsel in the Federal Government.¹²

Regulatory Flexibility Act and Executive Order 13272 (Consideration of Small Entities)

The Regulatory Flexibility Act (RFA), 5 U.S.C. 603, and Executive Order 13272 (Aug. 13, 2002), require agencies to prepare a regulatory flexibility analysis of the anticipated impact of a regulation on small entities. The RFA provides that the agency is not required to prepare such an analysis if an agency head certifies, along with a statement providing the factual basis for such

⁸ On average, 44.7 individuals participate in live webinars for employers. The Department assumed that there will be a 15-percent increase in the number of participants following the implementation of the rule. Thus, the Department estimated costs for seven employers (*i.e.*, 15 percent of the 44.7 individuals) related to viewing the live webinar. On average, 567 individuals have viewed each of the educational YouTube videos. Thus, the Department estimated costs for 85 employers (*i.e.*, 15 percent of the 567 individuals) related to viewing the recorded webinar.

⁹ The Department estimated the cost of viewing the live webinars by taking the product of the number of employer representatives (human resources managers) viewing the live webinar (7), the hourly compensation rate (\$81.0576), the number of webinars per year (36), and the time required to view the webinar (1 hour). This yielded a cost of \$20,427. The Department then estimated the cost of viewing the recorded webinars by taking the product of the number of employer representatives (HR managers) viewing the recorded webinars (85), the hourly compensation rate (\$81.0576), the number of webinars (1), and the time required to view the webinar (1 hour). This yielded a cost of \$6,890. The total cost of viewing webinars was estimated by taking the sum of the cost of viewing live webinars and the cost of viewing recorded webinars, to obtain a total cost of \$27,316.

¹⁰ On average, 12 individuals participate in live webinars for employees. The Department assumed that there will be a 5-percent increase in individuals following the implementation of the rule. Thus, the Department estimated costs for one employee (*i.e.*, 5 percent of the 12 individuals) related to viewing the live webinars. On average, 567 individuals viewed the educational YouTube videos. The Department assumed the same proportion of employees-to-employers viewing the live webinars ($0.268 = 12/44.7$) will view the recorded webinars. This number will translate to 152 employees or employee advocates viewing the educational YouTube videos. Thus, the Department estimated costs for 8 employees (*i.e.*, 5 percent of the 152 individuals) related to viewing the recorded webinar.

¹¹ The Department estimated the cost of viewing live webinars by taking the product of the number of employee representatives (captured by the attorney occupational category) viewing the live webinar (1), the hourly compensation rate (\$94.3344), the number of webinars (12), and the time required to view the webinar (1 hour). This resulted in a cost of \$1,132. The Department then estimated the cost of viewing recorded webinars by taking the product of the number of employee representatives, assumed to be an attorney, viewing the recorded webinar (8), the hourly compensation rate (\$94.3344), the number of webinars (1), and the time required to view the webinar (1 hour). This resulted in a cost of \$755. The total cost of viewing webinars was estimated by taking the sum of the cost of viewing live webinars and the cost of viewing recorded webinars, to obtain a total cost of \$1,887.

¹² In addition to the Office of Special Counsel for Immigration-Related Unfair Employment Practices located in the Department's Civil Rights Division by 28 CFR 0.53, Congress has established an Office of Special Counsel charged with protecting employees, former employees, and applicants for employment from prohibited personnel practices, among other functions. See 5 U.S.C. 1211–1212.

certification, that the regulation is not expected to have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). Based on the following analysis, the Attorney General certifies that this rule will not have a significant economic impact on a substantial number of small entities.

The Department's analysis focused on small businesses or nonprofits with 20 to 499 employees. The Department assumed that small businesses or nonprofits with fewer than 20 employees would not have a detailed written policy addressing compliance with 8 U.S.C. 1324b.

The Department assumed that, in total, 125,000 entities will be affected by the rule. Of those 125,000 affected entities, the Department estimated that 62,500 entities will be small employers.¹³ Dividing the affected population (62,500) by the total number of small businesses and non-profits (664,094), the Department estimates that the rule will impact 9.4 percent of small entities.¹⁴

¹³ According to the SHRM Web site, approximately 50 percent of the organization's members work in organizations with fewer than 500 employees. See SHRM, About the Society for Human Resource Management, <http://www.shrm.org/about/pages/default.aspx>. Taking 50 percent of the total estimated number of members in SHRM and CFI (125,000) results in 62,500 small entities.

¹⁴ The Department assumed that the total number of small businesses and non-profits is equal to the number of firms with 20 to 499 employees. Because the U.S. Census Bureau did not identify the number of firms with 20 to 499 employees in 2013, the most recent year for which data is available, the Department calculated the estimated number of firms with 20 to 499 employees in that year by calculating the number of establishments with 20 to 499 employees in 2013 and dividing it by the ratio of small establishments to small firms in 2012. To perform that calculation, the Department first determined the estimated number of firms with 20 to 99 employees in 2013 by (1) adding the number of establishments with 20 to 49 employees in 2013 and the number of establishments with 50 to 99 employees in 2013 (652,075 + 221,192 = 873,267); (2) dividing the number of establishments with 20 to 99 employees in 2012 by the number of firms with 20 to 99 employees in 2012 (687,272/494,170 = 1.39076); and (3) dividing the first number by the second (873,267/1.39076 = 627,906). The Department then determined the estimated number of firms with 100 to 499 employees in 2013 by (1) adding the number of establishments with 100 to 249 employees in 2013 and the number of establishments with 250 to 499 employees in 2013 (124,411 + 31,843 = 156,254); (2) dividing the number of establishments with 100 to 499 employees in 2012 by the number of firms with 100 to 499 employees in 2012 (360,207/83,423 = 4.3178); and (3) dividing the first number by the second (156,254/4.3178 = 36,188). Last, to determine the estimated number of firms with 20 to 499 employees in 2013, the Department added the estimated number of firms with 20 to 99 employees in 2013 and the estimated number of firms with 100 to 499 employees in 2013 (627,906 + 36,188 = 664,094). See U.S. Census Bureau, 2013 County Business Patterns (NAICS), <http://censtats.census.gov>; U.S. Census Bureau, 2012

The Department estimated the costs of (a) familiarizing staff with the new requirements in the rule, (b) reviewing and revising their employment eligibility verification policy, and (c) viewing a training webinar. The analysis focused on the first year of rule implementation when all costs of the rule are incurred. The Department estimated that the total one-year cost per small employer is \$324.¹⁵ The Department has determined that the yearly cost of \$324 will not have a significant economic impact on any of the affected small entities. Therefore, the Department has certified that the rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

These regulations contain no information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996. 8 U.S.C. 804. This rule will not result in an annual effect on the economy of \$100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

Unfunded Mandates Reform Act of 1995

For purposes of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532, this rule does not include any Federal mandate that may result in more than \$100 million in expenditures by State, local, and tribal governments in the aggregate or by the private sector.

Statistics of U.S. Businesses, Number of Firms, Number of Establishments, Employment, Annual Payroll, and Estimated Receipts by Enterprise Employment Size for the United States and States, Totals: 2012; http://www.census.gov/econ/subs/historical_data.html.

¹⁵ The Department estimated a cost of \$324 per small entity by taking the sum of the cost per small entity of each of the changes to the rule. This includes the following costs: familiarization with the rule (\$81), revising employment eligibility verification policies by making word replacements (\$20), making additional changes beyond word replacements (\$20), conducting a front-to-back review of the employment eligibility verification policies (\$122), and viewing the training webinar (\$81).

Executive Order 13132 (Federalism)

The agency has reviewed this rule in accordance with Executive Order 13132 (Aug. 4, 1999), and has determined that it does not have "federalism implications." This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

This rule does not have tribal implications under Executive Order 13175 (Nov. 6, 2000) that will require a tribal summary impact statement. The rule will not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Executive Order 13045 (Protection of Children)

This rule is not a covered regulatory action under Executive Order 13045 (Apr. 21, 1997). The rule will have no environmental health risk or safety risk that may disproportionately affect children.

Executive Order 12630 (Constitutionally Protected Property Rights)

This rule does not have takings implications under Executive Order 12630 (Mar. 15, 1988). The rule will not effect a taking or require dedications or exactions from owners of private property.

Executive Order 12988 (Civil Justice Reform Analysis)

This rule was drafted and reviewed in accordance with Executive Order 12988 (Feb. 5, 1996), and will not unduly burden the Federal court system. Complaints respecting unfair immigration-related employment practices are heard in the first instance by the Department of Justice, Executive Office for Immigration Review, Office of the Chief Administrative Hearing Officer, with only a miniscule number appealed each year to the Federal Circuit Courts of Appeal and an even smaller number of subpoenas or orders enforced by Federal District Courts.

List of Subjects

28 CFR Part 0

Authority delegations (government agencies), Government employees,

Organization and functions (government agencies), Privacy, Reporting and recordkeeping requirements, Whistleblowing.

28 CFR Part 44

Administrative practice and procedure, Equal employment opportunity, Immigration.

For the reasons stated in the preamble, the Attorney General amends 28 CFR parts 0 and 44 as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

■ 1. The authority citation for part 0 continues to read as follows:

Authority: 5 U.S.C. 301; 28 U.S.C. 509, 510, 515–519.

■ 2. Section 0.53 is revised to read as follows:

§ 0.53 Immigrant and Employee Rights Section.

(a) The Immigrant and Employee Rights Section shall be headed by a Special Counsel for Immigration-Related Unfair Employment Practices (“Special Counsel”). The Special Counsel shall be appointed by the President for a term of four years, by and with the advice and consent of the Senate, pursuant to section 274B of the Immigration and Nationality Act (INA), 8 U.S.C. 1324b. The Immigrant and Employee Rights Section shall be part of the Civil Rights Division of the Department of Justice, and the Special Counsel shall report directly to the Assistant Attorney General, Civil Rights Division.

(b) In carrying out the Special Counsel’s responsibilities under section 274B of the INA, the Special Counsel is authorized to:

(1) Investigate charges of unfair immigration-related employment practices filed with the Immigrant and Employee Rights Section and, when appropriate, file complaints with respect to those practices before specially designated administrative law judges within the Office of the Chief Administrative Hearing Officer, Executive Office for Immigration Review, U.S. Department of Justice;

(2) Intervene in proceedings involving complaints of unfair immigration-related employment practices that are brought directly before such administrative law judges by parties other than the Special Counsel;

(3) Conduct, on the Special Counsel’s own initiative, investigations of unfair immigration-related employment practices and, where appropriate, file complaints with respect to those practices before such administrative law judges;

(4) Conduct, handle, and supervise litigation in U.S. District Courts for judicial enforcement of subpoenas or orders of administrative law judges regarding unfair immigration-related employment practices;

(5) Initiate, conduct, and oversee activities relating to the dissemination of information to employers, employees, and the general public concerning unfair immigration-related employment practices;

(6) Establish such regional offices as may be necessary, in accordance with regulations of the Attorney General;

(7) Perform such other functions as the Assistant Attorney General, Civil Rights Division may direct; and

(8) Delegate to any subordinate any of the authority, functions, or duties vested in the Special Counsel.

■ 3. Revise part 44 to read as follows:

PART 44—UNFAIR IMMIGRATION-RELATED EMPLOYMENT PRACTICES

Sec.

44.100 Purpose.

44.101 Definitions.

44.102 Computation of time.

44.200 Unfair immigration-related employment practices.

44.201 [Reserved].

44.202 Counting employees for jurisdictional purposes.

44.300 Filing a charge.

44.301 Receipt of charge.

44.302 Investigation.

44.303 Determination.

44.304 Special Counsel acting on own initiative.

44.305 Regional offices.

Authority: 8 U.S.C. 1103(a)(1), (g), 1324b.

§ 44.100 Purpose.

The purpose of this part is to implement section 274B of the Immigration and Nationality Act (8 U.S.C. 1324b), which prohibits certain unfair immigration-related employment practices.

§ 44.101 Definitions.

For purposes of 8 U.S.C. 1324b and this part:

(a) *Charge* means a written statement in any language that—

(1) Is made under oath or affirmation;

(2) Identifies the charging party’s name, address, and telephone number;

(3) Identifies the injured party’s name, address, and telephone number, if the charging party is not the injured party;

(4) Identifies the name and address of the person or other entity against whom the charge is being made;

(5) Includes a statement sufficient to describe the circumstances, place, and date of an alleged unfair immigration-related employment practice;

(6) Indicates whether the basis of the alleged unfair immigration-related

employment practice is discrimination based on national origin, citizenship status, or both; or involves intimidation or retaliation; or involves unfair documentary practices;

(7) Indicates the citizenship status of the injured party;

(8) Indicates, if known, the number of individuals employed on the date of the alleged unfair immigration-related employment practice by the person or other entity against whom the charge is being made;

(9) Is signed by the charging party and, if the charging party is neither the injured party nor an officer of the Department of Homeland Security, indicates that the charging party has the authorization of the injured party to file the charge;

(10) Indicates whether a charge based on the same set of facts has been filed with the Equal Employment Opportunity Commission, and if so, the specific office and contact person (if known); and

(11) Authorizes the Special Counsel to reveal the identity of the injured or charging party when necessary to carry out the purposes of this part.

(b) *Charging party* means—

(1) An injured party who files a charge with the Special Counsel;

(2) An individual or entity authorized by an injured party to file a charge with the Special Counsel that alleges that the injured party is adversely affected directly by an unfair immigration-related employment practice; or

(3) An officer of the Department of Homeland Security who files a charge with the Special Counsel that alleges that an unfair immigration-related employment practice has occurred or is occurring.

(c) *Citizenship status* means an individual’s status as a U.S. citizen or national, or non-U.S. citizen, including the immigration status of a non-U.S. citizen.

(d) *Complaint* means a written submission filed with the Office of the Chief Administrative Hearing Officer (OCAHO) under 28 CFR part 68 by the Special Counsel or by a charging party, other than an officer of the Department of Homeland Security, alleging one or more unfair immigration-related employment practices under 8 U.S.C. 1324b.

(e) *Discriminate* as that term is used in 8 U.S.C. 1324b(a) means the act of intentionally treating an individual differently from other individuals because of national origin or citizenship status, regardless of the explanation for the differential treatment, and regardless of whether such treatment is because of animus or hostility.

(f) The phrase “for purposes of satisfying the requirements of section 1324a(b),” as that phrase is used in 8 U.S.C. 1324b(a)(6), means for the purpose of completing the employment eligibility verification form designated in 8 CFR 274a.2, or for the purpose of making any other efforts to verify an individual’s employment eligibility, including the use of “E-Verify” or any other electronic employment eligibility verification program.

(g) An act done “for the purpose or with the intent of discriminating against an individual in violation of [1324(a)(1)],” as that phrase is used in 8 U.S.C. 1324b(a)(6), means an act of intentionally treating an individual differently based on national origin or citizenship status in violation of 8 U.S.C. 1324b(a)(1), regardless of the explanation for the differential treatment, and regardless of whether such treatment is because of animus or hostility.

(h) *Hiring* means all conduct and acts during the entire recruitment, selection, and onboarding process undertaken to make an individual an employee.

(i) *Injured party* means an individual who claims to be adversely affected directly by an unfair immigration-related employment practice.

(j) The phrase “more or different documents than are required under such section,” as that phrase is used in 8 U.S.C. 1324b(a)(6), includes any limitation on an individual’s choice of acceptable documentation to present to satisfy the requirements of 8 U.S.C. 1324a(b).

(k) *Protected individual* means an individual who—

(1) Is a citizen or national of the United States;

(2) Is an alien who is lawfully admitted for permanent residence, other than an alien who—

(i) Fails to apply for naturalization within six months of the date the alien first becomes eligible (by virtue of period of lawful permanent residence) to apply for naturalization, or, if later, within six months after November 6, 1986; or

(ii) Has applied on a timely basis, but has not been naturalized as a citizen within two years after the date of the application, unless the alien can establish that he or she is actively pursuing naturalization, except that time consumed in the Department of Homeland Security’s processing of the application shall not be counted toward the two-year period;

(3) Is granted the status of an alien lawfully admitted for temporary residence under 8 U.S.C. 1160(a) or 8 U.S.C. 1255a(a)(1);

(4) Is admitted as a refugee under 8 U.S.C. 1157; or

(5) Is granted asylum under 8 U.S.C. 1158.

(l) *Recruitment or referral for a fee* has the meaning given the terms “recruit for a fee” and “refer for a fee,” respectively, in 8 CFR 274a.1, and includes all conduct and acts during the entire recruitment or referral process.

(m) *Respondent* means a person or other entity who is under investigation by the Special Counsel, as identified in the written notice required by § 44.301(a) or § 44.304(a).

(n) *Special Counsel* means the Special Counsel for Immigration-Related Unfair Employment Practices appointed by the President under 8 U.S.C. 1324b, or a duly authorized designee.

§ 44.102 Computation of time.

When a time period specified in this part ends on a day when the Federal Government in Washington, DC is closed (such as on weekends and Federal holidays, or due to a closure for all or part of a business day), the time period shall be extended until the next full day that the Federal Government in Washington, DC is open.

§ 44.200 Unfair immigration-related employment practices.

(a)(1) *General*. It is an unfair immigration-related employment practice under 8 U.S.C. 1324b(a)(1) for a person or other entity to intentionally discriminate or to engage in a pattern or practice of intentional discrimination against any individual (other than an unauthorized alien) with respect to the hiring, or recruitment or referral for a fee, of the individual for employment or the discharging of the individual from employment—

(i) Because of such individual’s national origin; or

(ii) In the case of a protected individual, as defined in § 44.101(k), because of such individual’s citizenship status.

(2) *Intimidation or retaliation*. It is an unfair immigration-related employment practice under 8 U.S.C. 1324b(a)(5) for a person or other entity to intimidate, threaten, coerce, or retaliate against any individual for the purpose of interfering with any right or privilege secured under 8 U.S.C. 1324b or because the individual intends to file or has filed a charge or a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under that section.

(3) *Unfair documentary practices*. It is an unfair immigration-related employment practice under 8 U.S.C. 1324b(a)(6) for—

(i) A person or other entity, for purposes of satisfying the requirements of 8 U.S.C. 1324a(b), either—

(A) To request more or different documents than are required under § 1324a(b); or

(B) To refuse to honor documents tendered that on their face reasonably appear to be genuine and to relate to the individual; and

(ii) To make such request or refusal for the purpose or with the intent of discriminating against any individual in violation of paragraph (a)(1) of this section, regardless of whether such documentary practice is a condition of employment or causes economic harm to the individual.

(b) *Exceptions*. (1) Paragraph (a)(1) of this section shall not apply to—

(i) A person or other entity that employs three or fewer employees;

(ii) Discrimination because of an individual’s national origin by a person or other entity if such discrimination is covered by 42 U.S.C. 2000e–2; or

(iii) Discrimination because of citizenship status which—

(A) Is otherwise required in order to comply with law, regulation, or Executive order; or

(B) Is required by Federal, State, or local government contract; or

(C) The Attorney General determines to be essential for an employer to do business with an agency or department of the Federal, State, or local government.

(2) Notwithstanding any other provision of this part, it is not an unfair immigration-related employment practice for a person or other entity to prefer to hire an individual, or to recruit or refer for a fee an individual, who is a citizen or national of the United States over another individual who is an alien if the two individuals are equally qualified.

§ 44.201 [Reserved]

§ 44.202 Counting employees for jurisdictional purposes.

The Special Counsel will calculate the number of employees referred to in § 44.200(b)(1)(i) by counting all part-time and full-time employees employed on the date that the alleged discrimination occurred. The Special Counsel will use the 20 calendar week requirement contained in Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e(b), for purposes of determining whether the exception of § 44.200(b)(1)(ii) applies, and will refer to the Equal Employment Opportunity Commission charges of national origin discrimination that the Special Counsel determines are covered by 42 U.S.C. 2000e–2.

§ 44.300 Filing a charge.

(a) Who may file: Charges may be filed by:

(1) Any injured party;

(2) Any individual or entity authorized by an injured party to file a charge with the Special Counsel alleging that the injured party is adversely affected directly by an unfair immigration-related employment practice; or

(3) Any officer of the Department of Homeland Security who alleges that an unfair immigration-related employment practice has occurred or is occurring.

(b) Charges shall be filed within 180 days of the alleged occurrence of an unfair immigration-related employment practice. A charge is deemed to be filed on the date it is postmarked or the date on which the charging party otherwise delivers or transmits the charge to the Special Counsel.

(c) Charges may be sent by:

(1) U.S. mail;

(2) Courier service;

(3) Electronic or online submission; or

(4) Facsimile.

(d) No charge may be filed respecting an unfair immigration-related employment practice described in § 44.200(a)(1)(i) if a charge with respect to that practice based on the same set of facts has been filed with the Equal Employment Opportunity Commission under Title VII of the Civil Rights Act of 1964, as amended, unless the charge is dismissed as being outside the scope of such title. No charge respecting an employment practice may be filed with the Equal Employment Opportunity Commission under such title if a charge with respect to such practice based on the same set of facts has been filed under this section, unless the charge is dismissed as being outside the scope of this part.

§ 44.301 Receipt of charge.

(a) Within 10 days of receipt of a charge, the Special Counsel shall notify the charging party and respondent by certified mail, in accordance with paragraphs (b) and (c) of this section, of the Special Counsel's receipt of the charge.

(b) The notice to the charging party shall specify the date on which the charge was received; state that the charging party, other than an officer of the Department of Homeland Security, may file a complaint before an administrative law judge if the Special Counsel does not do so within 120 days of receipt of the charge; and state that the charging party will have 90 days from the receipt of the letter of determination issued pursuant to

§ 44.303(b) by which to file such a complaint.

(c) The notice to the respondent shall include the date, place, and circumstances of the alleged unfair immigration-related employment practice.

(d)(1) If a charging party's submission is found to be inadequate to constitute a complete charge as defined in § 44.101(a), the Special Counsel shall notify the charging party that the charge is incomplete and specify what additional information is needed.

(2) An incomplete charge that is later deemed to be complete under this paragraph is deemed filed on the date the initial but inadequate submission is postmarked or otherwise delivered or transmitted to the Special Counsel, provided any additional information requested by the Special Counsel pursuant to this paragraph is postmarked or otherwise provided, delivered or transmitted to the Special Counsel within 180 days of the alleged occurrence of an unfair immigration-related employment practice or within 45 days of the date on which the charging party received the Special Counsel's request for additional information, whichever is later.

(3) Once the Special Counsel determines adequate information has been submitted to constitute a complete charge, the Special Counsel shall issue the notices required by paragraphs (b) and (c) of this section within 10 days.

(e) In the Special Counsel's discretion, the Special Counsel may deem a submission to be a complete charge even though it is inadequate to constitute a charge as defined in § 44.101(a). The Special Counsel may then obtain the additional information specified in § 44.101(a) in the course of investigating the charge.

(f) A charge or an inadequate submission referred to the Special Counsel by a federal, state, or local government agency appointed as an agent for accepting charges on behalf of the Special Counsel is deemed filed on the date the charge or inadequate submission was postmarked to or otherwise delivered or transmitted to that agency. Upon receipt of the referred charge or inadequate submission, the Special Counsel shall follow the applicable notification procedures for the receipt of a charge or inadequate submission set forth in this section.

(g) The Special Counsel shall dismiss a charge or inadequate submission that is filed more than 180 days after the alleged occurrence of an unfair immigration-related employment practice, unless the Special Counsel

determines that the principles of waiver, estoppel, or equitable tolling apply.

§ 44.302 Investigation.

(a) The Special Counsel may seek information, request documents and answers to written interrogatories, inspect premises, and solicit testimony as the Special Counsel believes is necessary to ascertain compliance with this part.

(b) The Special Counsel may require any person or other entity to present Employment Eligibility Verification Forms ("Forms I-9") for inspection.

(c) The Special Counsel shall have reasonable access to examine the evidence of any person or other entity being investigated. The respondent shall permit access by the Special Counsel during normal business hours to such books, records, accounts, papers, electronic and digital documents, databases, systems of records, witnesses, premises, and other sources of information the Special Counsel may deem pertinent to ascertain compliance with this part.

(d) A respondent, upon receiving notice by the Special Counsel that it is under investigation, shall preserve all evidence, information, and documents potentially relevant to any alleged unfair immigration-related employment practices, and shall suspend routine or automatic deletion of all such evidence, information, and documents.

§ 44.303 Determination.

(a) Within 120 days of the receipt of a charge, the Special Counsel shall undertake an investigation of the charge and determine whether to file a complaint with respect to the charge.

(b) If the Special Counsel determines not to file a complaint with respect to such charge by the end of the 120-day period, or decides to continue the investigation of the charge beyond the 120-day period, the Special Counsel shall, by the end of the 120-day period, issue letters to the charging party and respondent by certified mail notifying both parties of the Special Counsel's determination.

(c) When a charging party receives a letter of determination issued pursuant to paragraph (b) of this section, the charging party, other than an officer of the Department of Homeland Security, may file a complaint directly before an administrative law judge in the Office of the Chief Administrative Hearing Officer (OCAHO) within 90 days after his or her receipt of the Special Counsel's letter of determination. The charging party's complaint must be filed with OCAHO as provided in 28 CFR part 68.

(d) The Special Counsel's failure to file a complaint with respect to such charge with OCAHO within the 120-day period shall not affect the right of the Special Counsel to continue to investigate the charge or later to bring a complaint before OCAHO.

(e) The Special Counsel may seek to intervene at any time in any proceeding brought by a charging party before OCAHO.

§ 44.304 Special Counsel acting on own initiative.

(a) The Special Counsel may, on the Special Counsel's own initiative, conduct investigations respecting unfair immigration-related employment practices when there is reason to believe that a person or other entity has engaged or is engaging in such practices, and shall notify a respondent by certified mail of the commencement of the investigation.

(b) The Special Counsel may file a complaint with OCAHO when there is reasonable cause to believe that an unfair immigration-related employment practice has occurred no more than 180 days prior to the date on which the Special Counsel opened an investigation of that practice.

§ 44.305 Regional offices.

The Special Counsel, in accordance with regulations of the Attorney General, shall establish such regional offices as may be necessary to carry out the Special Counsel's duties.

Dated: December 14, 2016.

Loretta E. Lynch,
Attorney General.

BILLING CODE 4410-13-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1904

[Docket No. OSHA-2015-0006]

RIN 1218-AC84

Clarification of Employer's Continuing Obligation To Make and Maintain an Accurate Record of Each Recordable Injury and Illness

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule.

SUMMARY: OSHA is amending its recordkeeping regulations to clarify that the duty to make and maintain accurate records of work-related injuries and

illnesses is an ongoing obligation. The duty to record an injury or illness continues for as long as the employer must keep records of the recordable injury or illness; the duty does not expire just because the employer fails to create the necessary records when first required to do so. The amendments consist of revisions to the titles of some existing sections and subparts and changes to the text of some existing provisions. The amendments add no new compliance obligations and do not require employers to make records of any injuries or illnesses for which records are not currently required to be made.

The amendments in this rule are adopted in response to a decision of the United States Court of Appeals for the District of Columbia Circuit. In that case, a majority held that the Occupational Safety and Health Act does not permit OSHA to impose a continuing recordkeeping obligation on employers. One judge filed a concurring opinion disagreeing with this reading of the statute, but finding that the text of OSHA's recordkeeping regulations did not impose continuing recordkeeping duties. OSHA disagrees with the majority's reading of the law, but agrees that its recordkeeping regulations were not clear with respect to the continuing nature of employers' recordkeeping obligations. This final rule is designed to clarify the regulations in advance of possible future federal court litigation that could further develop the law on the statutory issues addressed in the D.C. Circuit's decision.

DATES: This final rule becomes effective on January 18, 2017. *Collections of information:* There are collections of information contained in this final rule (see Section XI, Office of Management and Budget Review Under the Paperwork Reduction Act of 1995). Notwithstanding the general date of applicability that applies to all other requirements contained in the final rule, affected parties do not have to comply with the collections of information in the recordkeeping regulations (as revised by this final rule) until the Department of Labor publishes a separate document in the **Federal Register** announcing that the Office of Management and Budget has approved them under the Paperwork Reduction Act.

I. Background

A. The OSH Act and Citation of OSH Act Violations

The Occupational Safety and Health Act of 1970 (OSH Act or Act) arose out of a Congressional finding that personal injuries and illnesses arising out of work situations impose a substantial burden upon, and are a hindrance to, interstate commerce in terms of lost production, wage loss, medical expenses, and disability compensation payments. *See* 29 U.S.C. 651(a). Accordingly, the purpose of the statute is to assure so far as possible every working man and woman in the Nation safe and healthful working conditions. *See* 29 U.S.C. 651(b).

To effectuate the Act's purpose, Congress authorized the Secretary of Labor to promulgate occupational safety and health standards (29 U.S.C. 655); a standard, as defined in the Act, requires conditions, or the adoption or use of one or more practices, means, methods, operations, or processes, reasonably

necessary or appropriate to provide safe or healthful employment and places of employment. *See* 29 U.S.C. 652(8). The Act also grants broad authority to the Secretary to promulgate other types of regulations such as those related to employer self-inspections and keeping employees informed of matters related to occupational safety and health. 29 U.S.C. 657(c). The OSH Act specifically directs the Secretary to promulgate regulations requiring employers to make and maintain accurate records of work-related injuries and illnesses. 29 U.S.C. 657(c)(1) and (2), 673(a); *see also* 651(b)(12), 657(g)(2), 673(e).

OSHA issues citations and assesses monetary penalties when it finds that employers are not complying with the Act or with applicable standards and regulations. 29 U.S.C. 658, 659, 666. Section 9(c) of the OSH Act contains a statute of limitations providing that no citation may be issued after the expiration of six months following "the occurrence of any violation." 29 U.S.C. 658(c). Generally, OSH Act violations continue to occur for as long as employees are exposed to the condition posed by the non-compliant workplace. *See Sec'y of Labor v. Cent. of Georgia R.R. Co.*, 5 BNA OSHC 1209, 1211 (Rev. Comm'n 1977) (explaining that a violation occurs "whenever . . . [a] standard is not complied with and an employee has access to the resulting zone of danger"). Thus, employers have an ongoing obligation to correct conditions that violate OSHA standards and regulations, and under section 9(c), violations are subject to citations and penalties for up to six months after the last instance of employee exposure to the violative condition.

B. OSHA's Recordkeeping Regulations and the Importance of Accurate Workplace Injury and Illness Data

In 1971, OSHA issued its first recordkeeping regulations at 29 CFR part 1904. OSHA promulgated revisions to these regulations in 2001 in an effort to improve the quality of workplace injury and illness records by making OSHA's recordkeeping system easier to use and understand. *See* 66 FR 5916 (January 19, 2001).

OSHA's recordkeeping regulations require employers to record information about certain injuries and illnesses occurring in their workplaces, and to make that information available to employees, OSHA, and the Bureau of Labor Statistics (BLS). Employers must record work-related injuries and illnesses that meet one or more recording criteria, including injuries and illnesses resulting in death, loss of consciousness, days away from work,

restricted work activity or job transfer, medical treatment beyond first aid, or a diagnosis of a significant injury or illness by a physician or other licensed health care professional. 29 CFR 1904.7. Employers must document each recordable injury or illness on an "OSHA 300" form, which is a log of all work-related injuries and illnesses. 29 CFR 1904.29(a) through (b)(1). Employers also must prepare a supplementary "OSHA 301 Incident Report" or equivalent form for each recordable injury and illness; the Incident Reports provide additional details about the injuries and illnesses recorded in the 300 Log. 29 CFR 1904.29(b)(2).

At the end of each calendar year, employers must review their 300 Logs to verify that the entries are complete and accurate. 29 CFR 1904.32(a)(1). Employers also must correct any deficiencies identified during this annual review. *Id.* By February 1 of each year, employers must create, certify, and post annual summaries of the cases listed on their 300 Logs for the prior calendar year. 29 CFR 1904.32(a), (b). Annual summaries must remain posted until April 30 each year. 29 CFR 1904.32(b)(6). Employers must retain their OSHA Logs, Incident Reports, and annual summaries for five years following the end of the calendar year that they cover. 29 CFR 1904.33(a). The regulations contain provisions explaining when records need to be revised during the retention period.

Accurate injury and illness records serve several important purposes. *See* 66 FR at 5916–17, January 19, 2001. One purpose is to provide information to employers. The information in the OSHA-required records makes employers more aware of the kinds of injuries and illnesses occurring and the hazards that cause or contribute to them. When employers analyze and review the information in their records, they can identify and correct hazardous workplace conditions. Injury and illness records are essential for employers to manage their safety and health programs effectively; these records permit employers to track injuries and illnesses over time so they can evaluate the effectiveness of protective measures implemented in response to identified hazards.

Similarly, employees—who have access to OSHA injury and illness records throughout the five-year retention period (*see* 29 CFR 1904.35)—can use information about the occupational injuries and illnesses occurring in their workplaces to become better informed about, and more alert to, the hazards they face. Employees who

are aware of the hazards around them may be more likely to follow safe work practices and to report workplace hazards to their employers. When employees are aware of workplace hazards, and participate in the identification and control of those hazards, the overall level of safety and health in the workplace can improve.

OSHA also has access to employer injury and illness records during the retention period (*see* 29 CFR 1904.40 and 1904.41), and these records are an important source of information for OSHA and enhance its enforcement efforts. During the initial stages of an inspection, an OSHA representative reviews the employer's injury and illness data so that OSHA can focus its inspection on the hazards revealed by the records. In some years, OSHA has also surveyed a subset of employers covered by the OSH Act for their injury and illness data, and used that information to help identify the most dangerous types of worksites and the most prevalent types of safety and health hazards.

Additionally, BLS uses data derived from employers' injury and illness records to develop national statistics on workplace injuries and illnesses. These statistics include information about the source, nature, and type of the injuries and illnesses that are occurring in the nation's workplaces. To obtain the data to develop national statistics, BLS and participating State agencies conduct an annual survey of employers in almost all sectors of private industry. BLS makes the aggregate survey results available for research purposes and for public information. This data provides information about the incidence of workplace injuries and illnesses and the nature and magnitude of workplace safety and health problems. Congress, OSHA, and safety and health policymakers in Federal, State, and local governments use BLS statistics to make decisions concerning safety and health legislation, programs, and standards. And employers and employees can use BLS statistics to compare the injury and illness data from their workplaces with data from the nation as a whole.

C. An Employer's Failure To Record a Recordable Illness or Injury Is a Failure To Maintain Accurate Injury and Illness Records and Is a Continuing Violation

A continuing violation exists when there is noncompliance with "the text of . . . [a] pertinent law [that] imposes a continuing obligation to act or refrain from acting." *Earle v. Dist. of Columbia*, 707 F.3d 299, 307 (D.C. Cir. 2012). Where there is an ongoing obligation to

act, each day the action is not taken results in a continuing, ongoing violation. In other words, "a new claim accrues each day the violation is extant." *Interamericas Inv., Ltd. v. Fed. Reserve Sys.*, 111 F.3d 376, 382 (5th Cir. 1997). For example, in *United States v. Edelkind*, 525 F.3d 388 (5th Cir. 2008), the Fifth Circuit found that willfully failing to pay child support as required by federal law was a continuing offense because "each day's acts . . . [brought] a renewed threat of the substantive evil Congress sought to prevent." *Id.* at 394–95 (internal quotation marks and citations omitted). And in *Postow v. OBA Federal Savings & Loan Association*, 627 F.2d 1370 (D.C. Cir. 1980), the D.C. Circuit held that a lender's failure to provide required disclosures to borrowers was a continuing violation of the Truth-in-Lending Act because the violation subverted the goals of the statute every day the borrowers did not have the information. *Id.* at 1379–80. *See also*, e.g., *United States v. Bailey*, 444 U.S. 394, 413 (1980) (escape from federal custody is a continuing offense in light of "the continuing threat to society posed by an escaped prisoner"); *United States v. George*, 625 F.3d 1124 (9th Cir. 2010) (failure to comply with statute requiring registration as a sex offender is a continuing offense), *vacated on other grounds*, 672 F.3d 1126 (9th Cir. 2012); *United States v. Franklin*, 188 F.2d 182 (7th Cir. 1951) (Alien Registration Act imposes ongoing registration obligation; failure to register is a continuing violation).

OSHA has long treated recordkeeping violations under the OSH Act as continuing violations—and, as explained below in Section II.B.1 of this preamble—this view is consistent with section 8(c) of the Act, in which Congress instructed the Secretary to require employers to make and maintain accurate records of workplace injuries and illnesses. OSHA's longstanding position is that an employer's duty to record an injury or illness continues for the full duration of the record-retention-and-access period, *i.e.*, for five years after the end of the calendar year in which the injury or illness became recordable. This means that if an employer initially fails to record a recordable injury or illness, the employer still has an ongoing duty to record that case; the recording obligation does not expire simply because the employer failed to record the case when it was first required to do so. As long as an employer fails to comply with its ongoing duty to record an injury or illness, and therefore with

its obligation to maintain accurate records, there is an ongoing violation of OSHA's recordkeeping requirements that continues to occur every day employees work at the site. Therefore, OSHA can cite employers for such recordkeeping violations for up to six months after the five-year retention period expires without running afoul of the OSH Act's statute of limitations.¹ OSHA has consistently issued such citations since it enacted its first recordkeeping regulations, as evidenced by the case law in the following paragraph. The purpose of this final rule is simply to clarify what has always been OSHA's interpretation of its recordkeeping regulations.

The Occupational Safety and Health Review Commission has upheld OSHA's position on the continuing nature of recordkeeping violations. *See, e.g., Sec'y of Labor v. Gen. Dynamics*, 15 BNA OSHC 2122 (Rev. Comm'n 1993) (recordkeeping violations "occur" at any point during the retention period when records are inaccurate, so citations for those violations are not barred simply because they are issued more than six months after the obligation to record first arose); *Sec'y of Labor v. Johnson Controls, Inc.*, 15 BNA OSHC 2132 (Rev. Comm'n 1993) (recordkeeping violations continue until correction or expiration of the retention period). The Commission addressed this issue most recently in *Secretary of Labor v. AKM LLC*, 23 BNA OSHC 1414 (Rev. Comm'n 2011) (*Volks II*), confirming that an employer's failure to make a required OSHA record is a continuing violation, and that an uncorrected violation continues until the employer is no longer required to keep OSHA records for the year at issue.²

D. The D.C. Circuit's Decision in Volks II

A panel of the D.C. Circuit reviewed the Commission's *Volks I* decision, and on April 6, 2012, issued a decision—

¹ Of course, OSHA may not issue a citation more than six months after the employer corrects the violation. *See, e.g., Sec'y of Labor v. Mangano Painting Co.*, 21 BNA OSHC 2043, 2048 (Rev. Comm'n 2007) (citation was time-barred where the employer abated the violation more than six months prior to the issuance date).

² Although the Coalition for Workplace Safety stated that OSHA has never expressed a policy of treating recordkeeping violations as ongoing, Ex. 0013, OSHA's citation history—and the Commission decisions upholding those citations—make clear that OSHA took this approach for many years. *See Martin v. OSHRC*, 499 U.S. 144, 157 (1991) (OSHA citations embody the Secretary's interpretation of regulations). *See* discussion in Section I.C, Background, above. Throughout this preamble, exhibit numbers are referred to in the form Ex. XXXX, where XXXX reflects the last four digits of the full document number (OSHA–2015–006–XXXX).

Volks II—reversing the Commission. *AKM LLC v. Sec’y of Labor*, 675 F.3d 752 (D.C. Cir. 2012) (*Volks II*). The majority opinion in *Volks II*, without discussion of Commission precedent to the contrary, held that the OSH Act does not provide authority for the Secretary to impose a continuing recordkeeping obligation on employers, explaining that “the . . . language in [the OSH Act] . . . which deals with record-keeping is not authorization for OSHA to cite the employer for a record-making violation more than six months after the recording failure.” *Id.* at 758; *see also id.* at 756–57. The majority stated that OSHA must cite an employer for failing to record an injury or illness within six months of the first day on which the regulations require the recording; a citation issued later than that, according to the *Volks II* majority, is barred by the OSH Act’s statute of limitations. *Id.* at 753–59.

In a separate opinion concurring in the judgment in *Volks II*, Judge Garland disagreed with the majority’s conclusion that the OSH Act did not permit continuing record-making obligations. Judge Garland agreed with the Secretary that the OSH Act does allow for continuing violations of recordkeeping requirements. He concluded, however, that the specific language in the recordkeeping regulations reviewed by the panel did not implement this statutory authority and did not create continuing recordkeeping obligations. *Id.* at 759–64. Under the analysis in Judge Garland’s concurring opinion, OSHA in fact has statutory authority to create a continuing obligation for employers to make and maintain accurate records of work-related illnesses and injuries, and can revise its recordkeeping regulations to more clearly implement that statutory authority.

Thus, because of the *Volks II* decision, OSHA has decided to clarify employers’ obligations under its recordkeeping regulations and to elaborate on its understanding of the statutory basis for those obligations. OSHA disagrees with the legal holding in the majority opinion in *Volks II*, but agrees with Judge Garland that, while the OSH Act gives the Secretary authority to impose continuing recordkeeping obligations, the text of the recordkeeping regulations did not make clear OSHA’s longstanding intention to fully implement that authority. Therefore, OSHA is changing its recordkeeping regulations to clarify that the duty to make and maintain an accurate record of a work-related illness or injury is an ongoing obligation that continues until the required record is made or until the

end of the record-retention-and-access period prescribed by the regulations. To that end, OSHA is revising the titles of some sections and subparts in part 1904 and changing the text of some of the recordkeeping requirements. OSHA describes the changes in **SUPPLEMENTARY INFORMATION**, Section III, later in this preamble.

E. Events Preceding This Final Rule

On July 29, 2015, OSHA issued a proposed rule entitled “Clarification of Employer’s Continuing Obligation to Make and Maintain an Accurate Record of Each Recordable Injury and Illness.” 80 FR 45116. Before issuing the proposal, OSHA consulted with the Advisory Committee on Construction Safety and Health (ACCSH). OSHA provided ACCSH with a summary and explanation of the proposal and a statement regarding the need for the proposed revisions to 29 CFR part 1904. On December 4, 2014, ACCSH voted to recommend that OSHA proceed with the proposal.³

OSHA provided 60 days for public comment and eventually extended the comment period for an additional 30 days. 80 FR 57765. OSHA received a total of 30 comments. The comments are addressed elsewhere in this preamble.

II. Legal Authority

A. Overview

As explained previously, in **SUPPLEMENTARY INFORMATION**, Section I.A, the OSH Act authorizes the Secretary of Labor to issue “standards” and other “regulations.” *See, e.g.*, 29 U.S.C. 655, 657. An occupational safety and health standard, issued pursuant to section 6 of the Act, prescribes measures to be taken to remedy an identified occupational hazard. Other regulations, issued pursuant to general rulemaking authority found, *inter alia*, in section 8 of the Act, establish enforcement or detection procedures designed to further the goals of the Act generally. 29 U.S.C. 657(c); *Workplace Health and Safety Council v. Reich*, 56 F.3d 1465, 1468 (D.C. Cir. 1995). This final rule amends OSHA’s recordkeeping regulations issued pursuant to authority expressly granted by sections 8 and 24 of the Act. 29 U.S.C. 657, 673. It simply clarifies existing duties under part 1904, and does not impose any new substantive recordkeeping requirements.

Many commenters suggested that OSHA does not have legal authority to

promulgate this rule. Exs. 0003, 0008, 0009, 0010, 0011, 0012, 0013, 0014, 0016, 0017, 0020, 0021, 0023, 0026. OSHA disagrees. As recognized by Judge Garland in his concurring opinion in *Volks II*, and explained in more detail in **SUPPLEMENTARY INFORMATION**, Section II.B, later in this preamble, the OSH Act plainly authorizes this regulatory action. Numerous provisions of the OSH Act both underscore Congress’ acknowledgement that accurate injury and illness records are a critical component of the national occupational safety and health program and give the Secretary broad authority to enact recordkeeping regulations that create a continuing obligation for employers to make and maintain accurate records of work-related illnesses and injuries. Section 2(b)(12) of the Act states that one of the purposes of the OSH Act is to assure, so far as possible, safe and healthful working conditions by providing for appropriate reporting procedures that will help achieve the objectives of the Act and “accurately describe” the nature of the occupational safety and health problem. *See* 29 U.S.C. 651(b)(12). Section 8(c)(1) requires each employer to “make, keep and preserve” and to “make available” to the Secretary such records prescribed by regulation as necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational accidents and illnesses. *See* 29 U.S.C. 657(c)(1). Section 8(c)(2) requires the Secretary to prescribe regulations requiring employers to “maintain accurate records” of, and to make periodic reports on, work-related deaths, injuries and illnesses. *See* 29 U.S.C. 657(c)(2). Section 8(g)(2) of the Act generally empowers the Secretary to prescribe such rules and regulations as he may deem necessary to carry out his responsibilities under the Act. *See* 29 U.S.C. 657(g)(2). Section 24(a) requires the Secretary to develop and maintain an effective program of collection, compilation, and analysis of occupational safety and health statistics and to compile accurate statistics on work injuries and illnesses. *See* 29 U.S.C. 673(a). And Section 24(e) provides that on the basis of the records made and kept pursuant to section 8(c) of the Act, employers must file such reports with the Secretary as the Secretary prescribes by regulation as necessary to carry out his functions under the Act. *See* 29 U.S.C. 673(e).

³ The National Federation of Independent Businesses has requested that the transcript of ACCSH’s meeting be added to the docket of this rulemaking. Ex. 0014. The transcript can now be found at Ex. 0030.

B. The OSH Act Authorizes the Secretary To Impose a Continuing Obligation on Employers To Make and Maintain Accurate Records of Work-Related Injuries and Illnesses, and Incomplete or Otherwise Inaccurate Records Create Ongoing, Citable Conditions

1. Section 8(c) of the Act Governs Employers' Recordkeeping Obligations, and That Provision Authorizes the Imposition of Continuing Obligations on Employers To Make and Maintain Accurate Records of Work-Related Illnesses and Injuries

"Whether [an] . . . obligation is continuing is a question of statutory construction." *Earle*, 707 F.3d at 307. The express language of the OSH Act readily supports a continuing violation theory in recordkeeping cases. And section 8(c) grants the Secretary broad authority to impose requirements he considers "necessary or appropriate," including recordkeeping regulations that provide that an employer's duty to make records of injuries and illnesses is an ongoing obligation. 29 U.S.C. 657(c).

Section 8(c)(2) requires the Secretary to prescribe regulations requiring employers to "maintain accurate records" of work-related deaths, injuries and illnesses. *See* 29 U.S.C. 657(c)(2) (emphasis added). And section 8(c)(1) requires employers to "make, keep and preserve" and to "make available" records that the Secretary identifies as necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational accidents and illnesses. *See* 29 U.S.C. 657(c)(1) (emphasis added). The language Congress used in these provisions therefore authorizes the Secretary to require employers to have on hand and to make available records that accurately reflect *all* of the recordable injuries and illnesses that occurred during the designated time period. Moreover, this statutory language is inconsistent with any suggestion that Congress intended the duty to record an injury or illness to be a discrete obligation that expires if the employer fails to comply on the first day the Secretary's regulations require recording.

This is because the words "accurate" and "maintain" in section 8(c)(2) of the Act connote a continued course of conduct that includes an ongoing obligation to create records. The word "maintain" means to "[c]ause or enable (a condition or state of affairs) to continue," an example being when one works to ensure that something stays "in good condition or in working order

by checking or repairing it regularly." http://www.oxforddictionaries.com/us/definition/american_english/maintain?searchDictCode=all. Therefore, "maintain" plainly implies an ongoing action. *See, e.g., Carey v. Shiley, Inc.*, 32 F.Supp.2d 1093, 1103 (S.D. Iowa 1998) ("continuing duty to maintain records for" the Food and Drug Administration). And "accurate" means "conforming exactly to truth," and is synonymous with "exact." <http://www.merriam-webster.com/dictionary/accurate>. *See also, e.g., Huntington Sec. Corp. v. Busey*, 112 F.2d 368, 370 (6th Cir. 1940) (noting that the term "accurately" . . . in its ordinary use[] means precisely, exactly correctly, without error or defect"). Therefore, the OSH Act's direction to enact regulations requiring employers to "maintain accurate [injury and illness] records" is a mandate for the Secretary to impose an ongoing or continuing duty on employers to have true or exact documentation of recordable incidents. An employer cannot be said to have (or to be keeping or maintaining) accurate (or true or exact) records of injuries and illnesses for a particular calendar year if there are recordable injuries or illnesses that occurred during that year that are missing from those records. Put simply, the Secretary cannot fulfill the statutory obligation of ensuring that employers "maintain accurate records" without imposing on employers an ongoing duty to create records for injuries and illnesses in the first place; a duty to maintain accurate records inherently implies an ongoing obligation to create the records that must be maintained.

The Fourth Circuit recognized as much in *Sierra Club v. Simkins Industries*, 847 F.2d 1109, 1115 (4th Cir. 1988), a Clean Water Act case, when it refused to allow a company to defend against its failure to file and retain water sampling records on the ground that it never collected the data it needed to create the records in the first place. The court ruled that an ongoing duty to maintain records implies a corresponding, and continuing, duty to have those records, explaining that it would not allow the company "to escape liability . . . by failing at the outset to sample and to create and retain the necessary . . . records." *Id. See also, e.g., Big Bear Super Mkt. No. 3 v. INS*, 913 F.2d 754, 757 (9th Cir. 1990) (per curiam) (statutory and regulatory scheme described by the court as requiring companies to "maintain" documents is interpreted to impose a "continuing duty" on those companies "to prepare and make" the documents in the first instance); *Park v. Comm'r of*

Internal Revenue, 136 T.C. 569, 574 (U.S. Tax Ct. 2011) (noting that a party that did not create required records thereby failed to "keep" those records), *rev'd and remanded on other grounds*, 722 F.3d 384 (D.C. Cir. 2013).

The "make, keep, and preserve" and "make available" language in section 8(c)(1) similarly envisions a continuing duty to record and provides additional support for the Secretary's interpretation of the "maintain accurate records" language in section 8(c)(2). "Keep" is a synonym for "maintain," <http://thesaurus.com/browse/maintain>, and both words imply a continued course of conduct, as does "preserve."⁴ *See, e.g., Powerstein v. Comm'r of Internal Revenue*, T.C. Memo 2011-271, 2011 WL 5572600, at *13 (U.S. Tax Ct. Nov. 16, 2011) (interpreting statutory and regulatory requirements to "keep" tax records to mean that taxpayers must "maintain" such records); *Freedman v. Comm'r of Internal Revenue*, T.C. Memo 2010-155, 2010 WL 2942167, at *1 (U.S. Tax Ct. July 21, 2010) (same).

The fact that Congress included the word "make" in a phrase with two other terms that both call for a continuing action suggests that "make" was also intended to signify a continuing course of conduct in the recordkeeping context. The most reasonable reading of section 8(c)(1), particularly in light of the "maintain accurate records" language in section 8(c)(2), is that the phrase "make, keep, and preserve" authorizes one continuous recordkeeping requirement that includes both the creation and the keeping of records. *See, e.g., Davis v. Michigan Dep't of Treasury*, 489 U.S. 803, 809 (1989) (noting a "fundamental canon of statutory construction that the words of a statute must be read in their context and with a view to their place in the overall statutory scheme"). The related authorization to the Secretary to prescribe such recordkeeping regulations as he considers "necessary or appropriate" further emphasizes the breadth of the Secretary's discretion in implementing the statute.

Thus, the Secretary does not believe that section 8(c) authorizes two and only two discrete duties: A duty to create a record that can arise at only one moment in time, and a duty to preserve

⁴ The legislative history of the OSH Act shows that Congress used "keep" and "maintain" synonymously. In a Senate Report, Congress described section 8(c)(2)—which talks about "maintaining" records—as "requiring employers to keep records of all work-related injuries and diseases." S. Rep. No. 91-1282, at 31 (1970), reprinted in Subcomm. on Labor of the Comm. on Labor and Public Welfare, *Legislative History of the Occupational Safety and Health Act of 1970*, at 171 (1971) (emphasis added).

that record if it should be created. Such a view would be inconsistent with the most relevant provision of the Act, section 8(c)(2), which is the provision that specifically addresses the Secretary's authority to prescribe regulations for injury and illness recordkeeping, *i.e.*, to prescribe regulations that require employers to "maintain accurate records" of workplace illnesses and injuries. Nothing about the Congressional direction to "maintain accurate records" is naturally read as creating two entirely discrete obligations, or as conveying Congressional intent to limit the duty to make a required record to a single point in time. Records that omit work-related injuries and illnesses are not accurate, and no purpose is served by maintaining inaccurate records. Instead, Congress intended employers, employees, and the Secretary to have access to accurate information about injuries and illnesses occurring in workplaces.

The requirement in section 8(c)(1) that employers "make available" such records as the Secretary prescribes regarding injuries and illnesses further illustrates that section 9(c)'s statute of limitations does not limit the Secretary to acquiring only six months of accurate injury and illness data. A regulation requiring employers, if requested, to make available accurate records showing injuries and illnesses that have occurred within the past few years is on its face well within the OSH Act's grant of authority. Nothing in the statutory language suggests that the Secretary can only require employers to provide information regarding work-related injuries and illnesses that have occurred within the past six months. Such a limitation would cripple OSHA's ability to gather complete information and to improve understanding of safety and health issues, contrary to Congressional intent. Furthermore, the duty to make accurate multi-year records available upon request arises when the request is made, and the statute of limitations therefore does not begin to run until the request is made and the employer fails to comply.

It therefore follows that section 8(c) of the Act authorizes the Secretary to enact regulations that impose a continuing obligation on employers to make and maintain accurate records of work-related illnesses and injuries. Not only are such recordkeeping regulations expressly called for by the language of section 8(c), but they are also consistent with Congressional intent and the purpose of the OSH Act. The Supreme Court recognizes a "familiar canon of statutory construction that remedial

legislation should be construed broadly to effectuate its purposes." *Tcherepnin v. Knight*, 389 U.S. 332, 336 (1967). And reading the statute in light of its protective purposes further supports the Secretary's interpretation that the Act calls for treating the duty to record injuries and illnesses as a continuing obligation. *See, e.g., United States v. Advance Mach. Co.*, 547 F. Supp. 1085, 1090–91 (D. Minn. 1982) (requirement in Consumer Product Safety Act to "immediately inform" the government of product defects is read as creating a continuing obligation to report because any other reading would frustrate the statute's goal of protecting the public from hazards).

The legislative history of the OSH Act also demonstrates that Congress wanted employers to have accurate injury and illness records both for the purpose of making workplaces safer and healthier and for the purpose of allowing the federal government to study the nation's occupational safety and health problems. As the House Committee on Education and Labor noted, before passage of the OSH Act it was impossible to know the extent of national occupational safety and health issues due to variability in state reporting measures; thus, Congress viewed it as an "evident Federal responsibility" to provide for "[a]ccurate, uniform reporting standards." H.R. Rep. No. 91–1291, at 15 (1970), *reprinted in* Subcomm. on Labor of the Comm. on Labor and Public Welfare, Legislative History of the Occupational Safety and Health Act of 1970, at 845 (1971). *See also* 29 U.S.C. 673(a) ("The Secretary shall compile accurate statistics on work injuries and illnesses . . ."); *Sec'y of Labor v. Gen. Motors Corp.*, 8 BNA OSHC 2036, 2039 (Rev. Comm'n 1980) ("Examination of the legislative history of [sections 8(c)(1) and 8(c)(2)] . . . shows a clear congressional intent that th[e] reporting requirement be interpreted broadly in order to develop information for future scientific use.").

Some commenters, including the Coalition for Workplace Safety and the American Health Care Association, stated a concern that interpreting section 8(c) to authorize continuing violations means that OSHA is claiming unfettered discretion to essentially eliminate any statute of limitations for recordkeeping violations. Exs. 0011, 0013, 0020. OSHA disagrees. OSHA's interpretation does not mean that the Secretary's authority is unconstrained. Under section 8(c)(1), the records the Secretary requires must be "necessary or appropriate" to enforcement of the Act or to gathering information regarding

the causes or prevention of occupational accidents or illnesses. 29 U.S.C. 657(c)(1). Under section 8(d), the Secretary must obtain information with a minimum burden on employers, especially small businesses, and reduce unnecessary duplication to the maximum extent feasible. 29 U.S.C. 657(d). Moreover, under the Paperwork Reduction Act, the Secretary and the Office of Management and Budget must determine that a recordkeeping requirement will have practical utility and will not be unduly burdensome. 44 U.S.C. 3506(c)(3).

2. The OSH Act's Statute of Limitations Does Not Define OSHA Violations or Address When Violations Occur, Nor Does the Language in Section 9(c) Preclude Continuing Recordkeeping Violations

As explained previously, it is section 8(c) of the OSH Act that authorizes the Secretary to establish the nature and scope of employers' recordkeeping obligations. The OSH Act's statute of limitations in section 9(c) deals only with the question of *when* OSHA can cite a violation; it says nothing about what *constitutes* a violation, or when a violation *occurs*. A violation is a breach of a duty, and the question of what duties the Secretary may prescribe must logically be dealt with prior to addressing the statute of limitations. Section 9(c) cannot be read as prohibiting the Secretary from imposing continuing recordkeeping obligations on employers covered by the OSH Act when the text and legislative history of the Act show that section 8(c) authorizes the Secretary to create such obligations. Thus, the OSH Act's statute of limitations simply sets the period within which legal action must be taken *after* the obligation ceases or the employer comes into compliance. *See, e.g., Inst. For Wildlife Prot. v. United States Fish & Wildlife Serv.*, No. 07–CV–358–PK, 2007 WL 4117978, at *6 (D. Or. Nov. 16, 2007) (declining to apply applicable statute of limitations to "nullify . . . [the government's] ongoing duty to designate critical habitat" for an endangered species "and . . . insulate the agency from challenges to any continued inaction").

Moreover, "statutes of limitation in the civil context are to be strictly construed in favor of the Government against repose," *Interamericas*, 111 F.3d at 382 (citing *Badaracco v. Comm'r of Internal Revenue*, 464 U.S. 386 (1984) and *E.I. DuPont De Nemours & Co. v. Davis*, 264 U.S. 456 (1924)), and nothing in section 9(c) precludes continuing violations in recordkeeping cases. To the contrary, the language in section 9(c)

is very general, providing only that “[n]o citation may be issued . . . after the expiration of six months following the occurrence of any violation.” 29 U.S.C. 658(c). The “occurrence” of something is not necessarily a discrete event; it can encompass actions or events that continue over time. For example, one dictionary defines “occurrence” as “the existence or presence of something.” <http://dictionary.cambridge.org/dictionary/american-english/occurrence> 2. See also, e.g., *PECO Energy Co. v. Boden*, 64 F.3d 852, 856–57 (3d Cir. 1995) (scheme of repeated thefts over the span of six years constituted a single “occurrence” such that only one insurance deductible applied to the resulting loss). Similarly, the term “occurrence of any violation” in section 9(c) does not mean that an OSHA violation is necessarily a discrete event that takes place at one, and only one, point in time.

Had Congress wanted the statute of limitations to run from the time a violation *first* occurred, it could have used language so stating. Indeed, Congress has used language more readily susceptible to that interpretation in other statutes. See, e.g., the Multiemployer Pension Plans Amendments Act, 29 U.S.C. 1451(f)(1) (statute of limitations runs from “the date on which the cause of action arose”); the Federal Employers’ Liability Act, 45 U.S.C. 56 (statute of limitations runs from “the day the cause of action accrued”); the general statute of limitations governing civil actions against the United States, 28 U.S.C. 2401(a) (claims barred unless “filed within six years after the right of action first accrues”).

This new rule is intended to clarify that if an employer fails to record an injury or illness within seven days, the obligation to record continues on past the seventh day, such that each successive day where the injury or illness remains unrecorded constitutes a continuing “occurrence” of the ongoing violation. If the employer records the injury on the twentieth, thirtieth, or some later day, the violation ceases to occur at that point, and any citation would need to be issued within six months of the cessation of the violation. This position is entirely consistent with section 9(c). Neither OSHA nor the Commission nor any court has ever treated section 9(c) as precluding all continuing violations. Indeed, continuing violations are common in the OSHA context, with the Commission taking the position that violations of OSHA requirements, including recordkeeping violations, generally continue as long as employees

are exposed to the non-complying conditions. See, e.g., *Sec’y of Labor v. Arcadian Corp.*, 20 BNA OSHC 2001 (Rev. Comm’n 2004) (violation of the OSH Act’s general duty clause stemming from the unsafe operation of a urea reactor); *Johnson Controls*, 15 BNA OSHC 2132 (recordkeeping); *Sec’y of Labor v. Safeway Store No. 914*, 16 BNA OSHC 1504 (Rev. Comm’n 1993) (hazard communication program and material safety data sheets); *Sec’y of Labor v. Yelvington Welding Serv.*, 6 BNA OSHC 2013 (Rev. Comm’n 1978) (fatality reporting); *Cent. of Georgia R.R.*, 5 BNA OSHC 1209 (housekeeping).⁵ Indeed, the *Volks II* panel also acknowledged that the duties to preserve records, to train employees, and to correct unsafe machines may continue. 675 F.3d at 756, 758. The OSH Act simply would not achieve Congress’ fundamental objectives if basic employer obligations were not continuing.

These cases reflect fundamental OSH Act principles. Safety and health standards are rules that require, *inter alia*, “conditions.” 29 U.S.C. 652(8). The absence of a required condition violates the standard. It does not matter when the absence first arose or how long it has persisted. If a condition is required and is not present (e.g., a machine is not guarded or a hazardous materials container is not labeled), a violation occurs and a citation requiring abatement may be issued within six months of the observed noncompliance. This construction follows from the language of the Act and is essential to the Secretary’s ability to enforce compliance. Accordingly, continuing obligations and violations are a regular occurrence under the OSH Act. Nothing in section 9(c), which applies equally to standards and regulations such as recordkeeping requirements, bars them.

In addition, continuing violations have been found to exist under other laws with statutes of limitations that contain language similar to that in section 9(c) of the OSH Act. For example, in *National Railroad Passenger Corporation v. Morgan*, 536 U.S. 101 (2002), the Supreme Court addressed the statute of limitations in Title VII of the Civil Rights Act of 1964, which precludes the filing of claims a certain number of days after the alleged unlawful employment practice

“occurred.” See 42 U.S.C. 2000e–5(e)(1). The Court concluded that the statute authorized application of a continuing violations doctrine in hostile work environment cases, holding that in such cases, an unlawful employment action can “occur” over a series of days or even years. *Morgan*, 536 U.S. at 116–20. Similarly, in *Havens Realty Corporation v. Coleman*, 455 U.S. 363 (1982), the Supreme Court found continuing violations of the Fair Housing Act, which at the time required the commencement of civil actions within 180 days “after the alleged discriminatory housing practice occurred.” And in *Postow*, 627 F.2d 1370, the D.C. Circuit found a continuing violation of the Truth-in-Lending Act, which, at 15 U.S.C. 1640(e), provides that actions must be brought within one year from the date of the “occurrence” of the violation. The language of section 9(c) of the OSH Act is at least equally receptive to continuing violations, since it allows citation within six months of “the occurrence of any violation.” “Occurrence” of “any” violation is open-ended language that does not suggest that a violation can exist at only one moment in time.

Notably, even the *Volks II* majority appeared to recognize that the word “occurrence” does not necessarily have a single fixed meaning, stating that “[o]f course, where . . . a company continues to subject its employees to unsafe machines . . . or continues to send its employees into dangerous situations without appropriate training . . . OSHA may be able to toll the statute of limitations on a continuing violations theory since the dangers created by the violations persist.” 675 F.3d at 758. The court also acknowledged that a violation of the record-retention requirement—through the loss or destruction of a previously-created record—is a violation that continues from the time of the loss or destruction until the conclusion of the five-year retention period. *Id.* at 756; see *id.* at 763 (concurring opinion).

Moreover, continuing violations have been found even under statutes of limitations that contain language that is arguably *less* receptive to continuing violations than section 9(c); courts implicitly recognize that the underlying legal requirement, not the statute of limitations, determines whether there is a continuing legal obligation. For example, courts have found continuing violations of various laws that are governed by the general five-year statute of limitations for criminal cases in 18 U.S.C. 3282(a), which requires initiation of an action “within five years . . . after

⁵ The American Petroleum Institute stated that the OSH Act limits continuing obligations only to “physical hazards.” Ex. 0020. This assertion finds no basis in the statute or case law. In any event, access to accurate injury and illness records helps employers and employees address and avoid physical hazards. See Section II.B.3, Legal Authority.

. . . [the] offense shall have been committed.” See, e.g., *United States v. Bell*, 598 F.3d 366, 368–69 (7th Cir. 2010) (continuing violation of child support payment requirements), *overruled on other grounds*, *United States v. Vizcarra*, 668 F.3d 516 (7th Cir. 2012); *Edelkind*, 525 F.3d 388 (same); *United States v. Are*, 498 F.3d 460 (7th Cir. 2007) (crime of being found in the United States after deportation is a continuing violation).

The D.C. Circuit has suggested that suits alleging a continuing failure to act are permissible even under the general statute of limitations governing civil actions against the United States (28 U.S.C. 2401(a)), which provides that claims are barred unless “filed within six years after the right of action first accrues.” *Wilderness Soc’y v. Norton*, 434 F.3d 584 (D.C. Cir. 2006). In *Wilderness Society*, the court intimated, but did not decide, that an agency’s failure to act in accordance with a statutory deadline for action was a continuing violation, such that a lawsuit to compel agency action would not be time-barred just because it was filed more than six years after the agency first missed the statutory deadline. The court explained that because the suit “‘does not complain about what the agency has done but rather about what the agency has yet to do,’” it likely would not be time-barred. *Id.* at 589 (quoting *In re United Mine Workers of America Int’l Union*, 190 F.3d 545, 549 (D.C. Cir. 1999)). See also, e.g., *Padres Hacia Una Vida Mejor v. Jackson*, No. 1:11–CV–1094 AWI DLB, 2012 WL 1158753 (E.D. Cal. April 6, 2012) (28 U.S.C. 2401(a) did not bar a claim based on EPA’s ongoing failure to act on complaints of discrimination within regulatory deadlines). And the Fifth Circuit found continuing violations of the Bank Holding Company Act in a case governed by the general statute of limitations in 28 U.S.C. 2462, which requires actions to enforce civil fines, penalties, or forfeitures to be “commenced within five years from the date when the claim first accrued.” *Interamericas*, 111 F.3d 376. See also, e.g., *Newell Recycling Co. v. EPA*, 231 F.3d 204 (5th Cir. 2000) (finding a continuing violation of disposal requirements for polychlorinated biphenyls under the Toxic Substances Control Act in a case involving the general statute of limitations at 28 U.S.C. 2462); *Advance Mach Co.*, 547 F.Supp. at 1085 (finding a continuing violation of the Consumer Product Safety Act in a case governed by 28 U.S.C. 2462); cf. *Capital Tel. Co v. FCC*, 777 F.2d 868, 871 (2d Cir. 1985) (per

curiam) (deferring to FCC determination that company’s “actions constituted a ‘continuing violation’” despite an applicable statute of limitations (47 U.S.C. 415(b)) requiring the filing of complaints “within two years from the time the cause of action accrues”).

Finally, concerns about stale claims have little bearing on OSHA recordkeeping cases. OSHA recognizes that statutes of limitations are designed to “keep stale claims out of the courts.” *Havens Realty*, 455 U.S. at 380. They protect parties from having to defend against stale claims and ensure that courts are not faced with “adjudicat[ing] claims that because of their staleness may be impossible to resolve with even minimum accuracy.” *Stephan v. Goldinger*, 325 F.3d 874, 876 (7th Cir. 2003). Claims generally are considered stale when so much time has passed that relevant evidence has been lost and witnesses are no longer available or do not have reliable memories of the relevant occurrence. *Id.* But “[w]here the challenged violation is a continuing one, the staleness concern disappears.” *Havens Realty*, 455 U.S. at 380. And nothing about continuing violations in the context of OSHA recordkeeping violations undermines this general principle.

The American Petroleum Institute cited an example of a case where the employer’s recordkeeper had passed away by the time of the hearing. Ex. 0020. However, reliance on witness recollection is often not necessary in recordkeeping cases because one can ordinarily ascertain whether an injury or illness occurred, and what treatment was necessary, by looking at medical reports, workers’ compensation documents, and other relevant records, even if the affected employee or other witnesses are no longer available. In fact, OSHA’s Recordkeeping Policies and Procedure Manual, CPL 02–00–135 (Dec. 30, 2004), directs compliance officers to review medical records to determine whether an employer has failed to enter recordable injuries and illnesses on the OSHA forms. And with respect to whether the employer recorded the injury or illness, the only evidence the parties and the court will need are the employer’s OSHA Log and Incident Report Forms, which existing regulations require employers to maintain for five years. Furthermore—and contrary to the comment by the American Petroleum Institute that staleness concerns primarily hurt employers (Ex. 0020)—OSHA ultimately bears the burden of proving that a recordable injury or illness occurred and the employer did not record it. Therefore, the absence of documents

and witnesses generally will be more prejudicial to OSHA’s case than to the employer’s defense. See *Secretary v. Home Depot #6512*, 22 BNA OSHC 1863 (Rev. Comm’n 2009) (vacating citation for failure to report employee fatality because Secretary did not provide sufficient evidence to establish fatality was work-related). And any limited staleness concerns that exist are outweighed by the fact that ongoing recordkeeping requirements are essential to fulfilling the purposes of the OSH Act. See generally *Connecticut Light & Power Co. v. Sec’y of Labor*, 85 F.3d 89, 96 (2d Cir. 1996) (“Consideration of limitations periods requires a fair and reasonable weighing of the conflicting concerns of the remedial intent of the [statute]. . . and the desire to keep stale claims out of the courts.”).

Moreover, under this final rule, an employer’s obligation is the same as under the current rule: To record injuries and illnesses within seven days and maintain the records for five years. The new rule simply clarifies that an employer cannot avoid the five-year maintenance requirement by failing to make the record in the initial seven days; rather, the obligation to make the record continues throughout the five-year maintenance period even if the employer fails to meet its initial obligation. Therefore, employers who record injuries and illnesses promptly, as paragraph 1904.29(b)(3) requires, will not face staleness concerns.

3. Incomplete or Otherwise Inaccurate Records of Work-Related Illnesses and Injuries Create an Ongoing Condition Detrimental to Full Enforcement of the Act

OSHA records “are a cornerstone of the Act and play a crucial role in providing the information necessary to make workplaces safer and healthier.” *Gen. Motors Corp.*, 8 BNA OSHC at 2041. As explained previously, in **SUPPLEMENTARY INFORMATION**, Section I.B, employers must give employees (as well as OSHA and BLS) access to injury and illness records. OSHA injury and illness records are designed to be used by employers, employees, the public health community, and the government to learn about the injuries and illnesses that are occurring in American workplaces. See “Improve Tracking of Injuries and Illnesses,” 81 FR 29623 (May 12, 2016). Accurate OSHA injury and illness records enable employers to identify, and correct, hazardous conditions, allow employees to learn about the hazards they face, and permit the government to determine where and why injuries are occurring so that

appropriate regulatory or enforcement measures can be taken. (See **SUPPLEMENTARY INFORMATION**, Section I.B, earlier in this preamble, for a full discussion of the purposes served by OSHA injury and illness records.) Thus, Congress viewed accurate records as necessary for the enforcement of the Act. 29 U.S.C. 657(c). Inaccurate or incomplete injury and illness records will leave all of the relevant parties underinformed, and thereby create an ongoing hazardous condition detrimental to full enforcement of the Act. The Commission has recognized as much. See, e.g., *Gen. Dynamics*, 15 BNA OSHC at 2131 n. 17 (recordkeeping regulations “clearly are safety- and health-related”); *Johnson Controls*, 15 BNA OSHC at 2135–36 (“[A] failure to record an occupational injury or illness . . . does not differ in substance from any other condition that must be abated pursuant to . . . occupational safety and health standards . . .”).

Nor is there any meaningful distinction to be drawn between cases involving inadequate training or unsafe machines (which may also be seen as involving repeated affirmative acts, for example, sending untrained employees to work in hazardous conditions) and recordkeeping cases (involving failures to create and maintain accurate records of workplace illnesses and injuries). The lack of access—by employers, employees and OSHA—to accurate records is as much an ongoing non-complying condition under the Act as is an untrained employee or an unguarded machine. Whether the condition was created by an act of omission or of commission, the condition is one that continues to violate the Act until it is abated.

Moreover, under the system Congress established in the OSH Act, any distinction that can be drawn between action and inaction lacks legal significance. As the Commission recognizes, “unlike other federal statutes in which an overt act is needed to show *any* violation, the OSH Act penalizes both overt acts *and* failures to act in the face of an ongoing, affirmative duty to perform prescribed obligations.” *Volks I*, 23 BNA OSHC at 1417 n.3 (emphasis in original). See also, e.g., *Gen. Dynamics*, 15 BNA OSHC at 2130 (“[T]he Act penalizes the occurrence of noncomplying conditions which are accessible to employees and of which the employer knew or reasonably could have known. That is the only ‘act’ that the Secretary must show to prove a violation.”). That is why it is still a citable violation if an employer has left a hazardous machine unguarded for years—even though the employer has

not done anything to the machine since first removing the guard. That is why it is a violation if an employer fails to label containers of hazardous chemicals or have safety data sheets on hand, regardless of how long the inaction persists or when it first occurred. And courts regularly find that a failure to act in accordance with an ongoing legal obligation constitutes a continuing violation. Such cases have included a lender’s failure to make required disclosures to a borrower (*Postow*, 627 F.2d 1370), a sex offender’s failure to register with authorities (*George*, 625 F.3d 1124), a parent’s failure to pay child support (*Edelkind*, 525 F.3d 388), an agency’s failure to comply with statutory mandates and deadlines (*Wilderness Soc’y*, 434 F.3d 584), a company’s failure to create and maintain water sampling records (*Sierra Club*, 847 F.2d 1109), and a failure on the part of the government to act on complaints of discrimination (*Padres Hacia Una Vida Mejor*, 2012 WL 1158753).

Incomplete and inaccurate OSHA records therefore result in an *ongoing non-complying condition*—namely employers, employees, and the government being denied access to information necessary to full enforcement of the Act. This non-complying condition continues every day that the records are inaccurate.⁶

Additionally, the legislative history of the Act reflects Congress’ concern about harm resulting to employees in workplaces with incomplete records of occupational injuries and illnesses. Most notably, a report of the Senate Committee on Labor and Public Welfare stated that “[f]ull and accurate information is a fundamental precondition for meaningful administration of an occupational safety and health program.” S. Rep. No. 91–1282, at 16 (1970), *reprinted in* Subcomm. on Labor of the Comm. on Labor and Public Welfare, Legislative

History of the Occupational Safety and Health Act of 1970, at 156 (1971) (emphasis added). Additionally, a report from the House of Representatives shows that Congress recognized “comprehensive [injury and illness] reporting” as playing a key role in “effective safety programs.” H.R. Rep. No. 91–1291, at 15 (1970), *reprinted in* Subcomm. on Labor of the Comm. on Labor and Public Welfare, Legislative History of the Occupational Safety and Health Act of 1970, at 845 (1971).

Some commenters, including Nabors Drilling USA and the North American Insulation Manufacturers’ Association, expressed the opinion that this rule will do nothing to improve safety and health. Exs. 0010, 0016, 0017, 0019, 0026. For the reasons already stated, OSHA disagrees, and evidence submitted by other commenters supports OSHA’s conclusion. For example, North America’s Building Trades Unions commented that records of workplace injuries and illnesses are valuable to help identify hazards and correct problems in the workplace, both immediately and over time, and that this information is of particular value in the construction industry where workers change jobsites often. Ex. 0025. The United Steelworkers (USW) provided an example of a company safety committee noticing that the employer was not accurately recording hand lacerations caused by certain equipment; later, an employee using the same equipment suffered an amputation. Ex. 0028. Properly maintained records could have helped alert the employer to the hazardous machine before the amputation occurred. The USW also provided several examples of workplace hazards that emerge as trends over time, including occupational hearing loss, exposure to hazardous chemicals, and musculoskeletal disorders. Injury and illness records are an important tool in the identification of these types of hazards. Ex. 0028.

Additionally, as noted by commenter ORCHSE Strategies, LLC, although most employers are diligent about recording injuries and illnesses as required, some are not.⁷ Ex. 0015. OSHA’s ability to enforce the recordkeeping regulations is an important tool to ensure that accurate information about workplace safety is

⁶ For this reason, *Gabelli v. SEC*, 133 S.Ct. 1316 (2013), cited by Nabors Drilling USA and the National Association of Manufacturers, is inapposite. Exs. 0010, 0026. *Gabelli* deals with the discovery rule, which pertains to whether a claim’s accrual date should be extended until the plaintiff learns of the unlawful conduct. The discovery rule is not needed where, as here, the unlawful conduct is ongoing. In *Gabelli*, which involved a civil enforcement action under the Investment Advisers Act, the Supreme Court held that the five-year statute of limitations in 28 U.S.C. 2462 ran from the date a fraud was complete, not from the date the government discovered the fraud. *Gabelli* does not stand for the proposition that the language in 28 U.S.C. 2462 precludes application of a continuing violation theory. Indeed, in *Gabelli* the government agreed that the alleged illegal activity ended more than five years prior to the filing of the complaint, so there was no issue about the duration of the violative conduct.

⁷ The USW suggested that OSHA incorporate into this rule a prohibition on employer practices that discourage reporting of injuries and illnesses. Ex. 0028. Such a prohibition would be beyond the scope of this rulemaking, which is limited to clarifying existing obligations. However, such practices are addressed in OSHA’s recent rulemaking, “Improve Tracking of Injuries and Illnesses,” 81 FR 29623 (May 12, 2016).

available and that conscientious employers are not placed at a disadvantage by employers who intentionally underreport and thus appear safer than they actually are. Ex. 0015; see Ex. 0024. Although OSHA's recordkeeping rules have always required employers to maintain records for five years, they did not previously expressly state that an employer cannot skirt this requirement by ignoring its obligation to record an injury or illness when first learning of it. This final rule clarifies the recordkeeping requirements and enables OSHA to ensure that employers make and keep an accurate, five-year record of workplace injuries and illnesses. Indeed, without this clarification, as the AFL-CIO noted, the rule would not achieve Congress' intent that the Secretary collect accurate data about workplace safety. Ex. 0024.

4. OSHA Is Acting Within Its Regulatory Authority, and Consistently With the General Case Law, in Issuing This Clarifying Rule

Several commenters expressed the view that the *Volks II* majority opinion prohibits the Secretary from imposing a continuing obligation on employers to record, and maintain records of, injuries and illnesses, with a few commenters stating that OSHA is improperly attempting to "overturn" the *Volks II* decision. Exs. 0003, 0008, 0009, 0010, 0011, 0012, 0013, 0014, 0016, 0017, 0020, 0021, 0023, 0026. OSHA disagrees. For the reasons described below, OSHA does not believe it is improper to respond to the *Volks II* decision by clarifying the regulations before there is any additional litigation over OSHA's statutory authority to establish continuing recordkeeping obligations.

Given that OSHA agrees with Judge Garland that the regulations as previously written did not clearly convey the intended continuing obligation, it would have been fruitless for OSHA to seek further appellate review of the *Volks II* decision, as some commenters suggested. See Exs. 0017, 0020, 0021. The executive branch of the federal government may elect not to appeal an adverse decision from the judiciary for a number of reasons unrelated to its views about the merits of the ruling, and, as the Supreme Court recognizes, the government's decision to forgo appeal in a particular case should not foreclose future review of relevant issues in other appropriate judicial forums. See *United States v. Mendoza*, 464 U.S. 154, 160–61 (1984) (declining to apply non-mutual collateral estoppel against the federal government in part because doing so "would force the . . .

[government] to abandon prudential concerns and to appeal every adverse decision in order to avoid foreclosing further review"). Thus, OSHA has acted reasonably in deciding to clarify its regulations before there is any additional litigation over the issues of statutory interpretation addressed in *Volks II*.

OSHA acknowledges that this clarification of its recordkeeping regulations to address the textual deficiencies identified by Judge Garland leaves unsettled the issue of OSHA's statutory authority to regulate in this manner. (Two of three judges on the *Volks II* panel found that the OSH Act did not permit OSHA to issue continuing recordkeeping regulations; however, Judge Garland disagreed with the majority's holding on this point.) When OSHA implements this rule, that issue will likely be the subject of future litigation in various federal courts, and potentially in the Supreme Court. Courts generally recognize the value of allowing the law to develop through litigation in multiple forums. See, e.g., *Mendoza*, 464 U.S. at 160 (noting "benefit . . . from permitting several courts of appeals to explore a difficult question before this Court grants certiorari"); *Califano v. Yamasaki*, 442 U.S. 682, 702 (1979) ("It often will be preferable to allow several courts to pass on a given class claim in order to gain the benefit of adjudication by different courts in different factual contexts."). See also *Holland v. Nat'l Mining Ass'n*, 309 F.3d 909, 815 (D.C. Cir. 2002) ("Allowing one circuit's statutory interpretation to foreclose . . . review of the question in another circuit would squelch the circuit disagreements that can lead to Supreme Court review.").

OSHA has issued rules with a similar clarifying purpose following adverse court decisions before. For example, after the Fifth Circuit held that OSHA's respirator standard and the training provisions in the asbestos standard did not permit citing an employer for each individual employee who was not provided the required respirator or training, OSHA issued a final rule "to make it unmistakably clear that each covered employee is required to receive PPE and training, and that each instance when an employee subject to a PPE or training requirement does not receive the required PPE or training may be considered a separate violation subject to a separate penalty." 73 FR 75568–01, 75569 (Dec. 12, 2008); see *Chao v. OSHRC and Erik K. Ho*, 401 F.3d 355 (5th Cir. 2005). See also 72 FR 64342–01, 64342–43 (Nov. 15, 2007) (final rule clarifying employers' responsibility to pay for PPE, issued in response to

Commission decision vacating citation for employer's failure to pay).⁸

OSHA also disagrees with the commenters, including the Coalition for Workplace Safety and the National Association of Home Builders, who suggested that a Supreme Court case, *National Cable and Telecommunications Association v. Brand X Internet Services*, 545 U.S. 967 (2005) ("*Brand X*"), precludes the Secretary from promulgating this final rule. Exs. 0011, 0013, 0017, 0020. In holding that the Ninth Circuit should have deferred to the FCC's interpretation of a statutory term instead of following the contrary interpretation the court had adopted in an earlier case, *Brand X* stated that "[a] court's prior judicial construction of a statute trumps an agency construction otherwise entitled to *Chevron* deference *only* if the prior court decision holds that its construction follows from the unambiguous terms of the statute and thus leaves no room for agency discretion." 545 U.S. at 982 (emphasis added). *Brand X* does not control here, however, because *Volks II* did not clearly hold that the OSH Act unambiguously forecloses continuing recordkeeping violations. Indeed, the court expressly acknowledged that the loss or destruction of a record previously made constitutes a continuing violation of the requirement to retain records for five years. 675 F.3d at 756; see *id.* at 763 (concurring opinion). Moreover, although parts of the majority opinion suggest that the "clear" language in the OSH Act's statute of limitations precludes continuing record-making violations (because the majority said that the word "occurrence" requires a discrete action to have taken place within the six-month limitations period, 675 F.3d at 755–56), the court nevertheless acknowledged ambiguity in the meaning of "occurrence" when it agreed that training and machine guarding violations can continue, not because a discrete action occurs within the six-month window, but because "the dangers created by th[ose] violations persist." *Id.* at 758.⁹ Notably, nothing in

⁸ Nor is it uncommon for federal agencies to engage in nonacquiescence when faced with what they believe are erroneous court decisions. See, e.g., Samuel Estreicher & Richard L. Revesz, *Nonacquiescence by Federal Administrative Agencies*, 98 Yale L.J. 679 (1989).

⁹ The Coalition for Workplace Safety also stated that the cases *Local Lodge No. 1424 (Bryan Mfg.) v. NLRB*, 362 U.S. 411 (1960) and *Ledbetter v. Goodyear*, 550 U.S. 618 (2007) prohibit this final rule. Ex. 0013. However, these cases do not control this rule because they involve causes of action that the Court found to accrue at one discrete moment

the OSH Act's statute of limitations distinguishes between standards (such as machine guarding requirements) and regulations (such as recordkeeping requirements). Finally, the fact that Judge Garland disagreed with the majority about what the statute says lends further support to OSHA's view that *Volks II* should not be read as holding that the OSH Act unambiguously forecloses this regulatory action.

As touched upon previously in this preamble, OSHA further believes that general case law on continuing violations clearly supports a continuing violation theory for OSHA recordkeeping violations. The *Volks II* majority stated that recordkeeping violations are not "the sort of conduct we generally view as giving rise to a continuing violation[.]" *i.e.*, the kind of violation "whose 'character as a violation . . . [does] not become clear until . . . repeated during the limitations period . . . because it is . . . [the] cumulative impact . . . that reveals . . . illegality.'" *Volks II*, 675 F.3d at 757 (quoting *Taylor v. FDIC*, 132 F.3d 753, 765 (D.C. Cir. 1997)). While the "cumulative impact" theory is one way to establish a continuing violation (see, e.g., *Morgan*, 536 U.S. 101 (hostile environment claims under Title VII)), established precedent recognizes a second type of continuing violation—a violation that continues to occur on a day-by-day (or act-by-act) basis and whose illegality was clear from the beginning. See, e.g., *Edelkind*, 525 F.3d 388 (failure to pay child support is a continuing offense); *Sierra Club*, 847 F.2d 1109 (finding continuing violations of the Clean Water Act where the company failed to comply with permit requirements for reporting and record retention); *Postow*, 627 F.2d 1370 (violation of Truth-in-Lending Act's disclosure requirements is a continuing violation). This is the type of continuing violation relevant here because all OSHA violations—including recordkeeping violations—"continue" only insofar as non-compliant conditions exist.

The D.C. Circuit explicitly recognized the existence of these two types of continuing violation cases in *Earle*, 707 F.3d 299, 1307—a post-*Volks II* case that made no reference to the *Volks II* majority opinion, but cited, with approval, Judge Garland's concurring

opinion.¹⁰ In *Earle*, the court, quoting Judge Garland, explained that where a statute "imposes a continuing obligation to act, a party can continue to violate it until that obligation is satisfied and the statute of limitations will not begin to run until it does." *Id.* at 307. And "[w]hether the obligation is continuing is a question of statutory construction." *Earle*, 707 F.3d at 307. The court explained that *Postow* had found a continuing violation of the Truth-in-Lending Act because the "goals of the Act" required construing the obligation to be continuing. *Id.* So too, the goals of the OSH Act require construing the recordkeeping obligation to be continuing. The purpose of recording injuries is to allow the recorded information to be used thereafter, throughout the retention and access period. Accurate and complete OSHA records enable employers, employees, and the government to understand the hazards present in the workplace so that corrective measures can be taken. Inaccurate and incomplete records, by contrast, are likely to be misleading.

The Secretary recognizes that one court has said that: "The Supreme Court has made clear . . . that the application of the continuing violations doctrine should be the exception, rather than the rule." *Cherosky v. Henderson*, 330 F.3d 1243, 1248 (9th Cir. 2003) (not referring to any specific decision) (quoted in *Volks II*, 675 F.3d at 757). Even so, the Secretary believes that the language and purposes of the OSH Act make it clear that the duty to maintain and make available records is a continuing obligation for all the reasons set forth previously.¹¹

¹⁰ It is also noteworthy that *Earle* was written by Judge Henderson, who was part of the *Volks II* majority.

¹¹ In *Toussie v. United States*, 397 U.S. 112 (1970), the Supreme Court stated that "the doctrine of continuing offenses should be applied in only limited circumstances since . . . 'the tension between the purpose of a statute of limitations and the continuing offense doctrine is apparent.'" *Id.* at 115 (citations omitted). But *Toussie* was a criminal case subject to the general principle that "criminal limitations statutes are 'to be liberally interpreted in favor of repose.'" *Id.* (emphasis added and citations omitted). See also *Diamond v. United States*, 427 F.2d 1246, 1247 (Ct. Cl. 1970) (per curiam) ("[T]he considerations moving the Court to decide [in *Toussie*] that the offense was not a continuing one were entwined with the criminal aspects of the matter, and the holding was limited to criminal statutes of limitations."). In contrast, as noted previously, in Legal Authority, Section II.B.2, OSHA civil enforcement cases are subject to the opposing principle that "statutes of limitation in the civil context are to be strictly construed in favor of the Government against repose." *Interamericas*, 111 F.3d at 382.

III. Summary and Explanation of the Final Rule

OSHA is amending its recordkeeping regulations, 29 CFR part 1904, to clarify that employers covered by the recordkeeping requirements have a continuing obligation to make and maintain accurate records of all recordable injuries and illnesses. This obligation continues for as long as the employer must maintain records for the year in which an injury or illness became recordable, and it does not expire if the employer fails to create a record when first required to do so.

The continuing obligation to make and maintain accurate records of work-related illnesses and injuries is in accord with longstanding OSHA policy. Thus, this final rule does not impose new or additional obligations on employers covered by part 1904. Employers will not be required to make records of any injuries or illnesses for which records are not currently required; nor are the recording requirements themselves changing. Because the rule imposes no new burdens or obligations and changes no law, it is simply a clarification, not a substantive change (as a few commenters contended; see Exs. 0012, 0014, 0020). As discussed at length previously, the amendments are meant simply to clarify employers' obligations in the wake of the *Volks II* decision. The amendments consist of revisions to various sections of the regulatory text as well as changes to the titles of some sections and subparts. (Titles are useful for clarity but do not change the legal meaning of the text itself. See *Penn. Dept. of Corrections v. Yeskey*, 524 U.S. 206, 212 (1998); *INS v. Nat'l Ctr. for Immigrants' Rights, Inc.*, 502 U.S. 183, 189–90 (1991)).

As discussed in more detail later in this preamble, the amendments clarify the following: (1) *OSHA 300 Log*. Employers must record every recordable injury or illness on the Log. This obligation continues through the five-year record retention-and-access period if employers do not create the record when first required to do so. During that period, employers must update the Log by adding cases not previously recorded and by noting changes to previously recorded cases. (2) *OSHA 301 Incident Report*. Employers must prepare a Form 301 Incident Report for each recordable illness or injury. This obligation continues throughout the five-year retention-and-access period if employers do not prepare the report when first required to do so. Unlike with the Log, employers are not required to update the Incident Report

in time—the illegal execution of a collective bargaining agreement and a particular instance of sex discrimination, respectively. In contrast, a failure to maintain an accurate record of workplace injuries and illnesses is a continuing violation that reoccurs each day it persists.

to show changes to the case that occur after the form is initially prepared. (3) *Year-end records review; preparation certification; and posting of the Form 300A annual summary.* These ancillary tasks are intended to be performed at particular times during each year. They are not continuing obligations.

Many commenters expressed concern that this rule increases recordkeeping obligations and thus will require employers to devote additional time and resources to recordkeeping. Exs. 0008, 0010, 0012, 0013, 0014, 0020, 0021, 0026, 0027. For example, Nabors Drilling USA commented that the new rule will force it “to hire one or more individuals whose sole job will be to police our volumes of OSHA 300, 300A, and 301 logs for accuracy one-hundred percent of the time,” and the National Federation of Independent Businesses stated its belief that the rule imposes on employers “a duty of daily reconsideration” of each “decision to not record or to not fully record an injury.” Exs. 0010, 0014. This concern is misplaced. An employer’s obligation remains the same as it was before: To record workplace injuries and illnesses within seven days and to maintain the record for five years. There is no new requirement to review or reassess existing records over the course of the maintenance period (and, correspondingly, there are no additional costs involved). The new rule simply makes clear that if an employer fails to record an injury or illness within seven days, it is not relieved of the requirement to make and keep an accurate record of all recordable injuries and illnesses for the duration of five years. As explained above in Section I.C, this has long been OSHA’s position. In response to the observation in *Volks II* that a record cannot be maintained if it was never made, 657 F.3d at 756, the new rule is meant to explain that the obligations to make and maintain records go hand-in-hand. An employer cannot skirt the requirement to maintain accurate injury and illness records by failing to make the records in the first place.

The commenters’ concern about needing to regularly reassess recordkeeping determinations applies to only one type of recordkeeping violation—the type in which a well-intentioned employer simply makes a mistake and fails to record a recordable case (e.g., due to administrative oversight or because of an erroneous belief that the case is not recordable). The commenters’ concern has no relevance to cases in which employers simply decide not to record cases they know to be recordable or in which

employers have known, pervasive shortcomings in their recordkeeping policies and systems. *See* Ex. 0019 (comment from American Society of Safety Engineers). While inadvertent mistakes are always a possibility with respect to any regulatory obligation—whether discrete or continuing—OSHA generally focuses its recordkeeping enforcement resources on systematic recording failures, not on one-time errors made in good-faith attempts at compliance.¹² *See, e.g., Secretary v. Pepperidge Farm, Inc.*, 17 BNA OSHC 1993 (Rev. Comm’n 1997) (affirming 176 willful recordkeeping violations where employer failed to train responsible employee on how to complete OSHA forms and failed to record dozens of injuries of a type that affected workers at “an extraordinarily high rate”). And while employers are responsible for complying with the requirement to accurately record workplace injuries and illnesses and to maintain accurate records for five years, there is no separate requirement for daily (or regular) reconsideration of decisions not to record. Thus, even though OSHA may cite an employer for failing to record a recordable case, OSHA would have no basis for separately citing an employer for failing to reconsider prior recordkeeping determinations.

A. Description of Revisions

1. Section 1904.0—Purpose

OSHA received no comments on the proposed changes to § 1904.0 and has adopted the provision as proposed. OSHA has revised this section to clarify and emphasize employers’ ongoing duties to make and maintain accurate records of each and every recordable injury and illness under part 1904. The revised language reflects the longstanding requirement for employers to provide their injury and illness records to certain government representatives and to employees and former employees and their representatives. The additions to the regulatory text include language reiterating that recordkeeping requirements are important in helping OSHA achieve its mission of providing safe and healthful working conditions for the nation’s workers. OSHA also

¹² OSHA notes, however, that an employer may be cited for an OSH Act violation as long as it has knowledge that the cited condition exists, whether or not the employer also has particular knowledge that the cited condition violates the Act. *See, e.g., Secretary v. Shaw Constr., Inc.*, 6 BNA OSHC 1341 (Rev. Comm’n 1978) (finding employer in violation of trenching standard where employer knew trench was not sloped, even though employer was unsure which OSHA standard applied to the trench). Recordkeeping violations are no different from other OSH Act violations in this respect.

added a new sentence at the end of this section to explain that records will be considered “accurate” if correct and complete records are made and maintained for each and every recordable injury and illness in accordance with the provisions of part 1904. This concept is not new, as the requirement for employers to maintain accurate records is derived directly from the OSH Act, 29 U.S.C. 657(c)(2).

2. Subpart C—Making and Maintaining Accurate Records, Recordkeeping Forms, and Recording Criteria

OSHA proposed to amend the title of this Subpart to better reflect the content of revised §§ 1904.4 and 1904.29, which address employers’ duties to make and maintain accurate records, as well as recordkeeping forms and criteria. OSHA received no comments on this proposed change and has adopted the change as proposed.

3. Paragraph (a) of § 1904.4—Basic Requirement

OSHA received no comments on the proposed changes to § 1904.4(a) and has adopted the changes as proposed. OSHA has revised this paragraph to reiterate the requirement that employers make and maintain accurate records of every injury and illness that meets the recording criteria in paragraphs (a)(1) through (3) of § 1904.4. The prior version of paragraph (a), which required employers to “record” injuries and illnesses, was less explicit in expressing OSHA’s intent that employers both create and keep accurate records. The revised language confirms that an employer’s duty includes both creating and preserving accurate records of recordable injuries and illnesses. To be accurate, these records must be correct and complete. The revised language also reflects more closely the language of the OSH Act at 29 U.S.C. 657(c)(1) and (2). OSHA did not propose to change, and is not changing, the recording criteria in paragraphs (a)(1) through (3) of existing § 1904.4.

4. Note to Paragraph (a) of § 1904.4

OSHA proposed to add a note to § 1904.4(a) to clarify the Secretary’s longstanding position that the duty to make and maintain accurate injury and illness records continues throughout the entire record-retention period set out in § 1904.33(a). This retention period runs for five years from the end of the calendar year that the records cover. An employer who fails to create a required record during the seven-day grace period provided for in § 1904.29(b)(3) must still create the record so long as the retention period has not elapsed.

Given this ongoing duty, OSHA may issue recordkeeping citations to employers that have incomplete or otherwise inaccurate records at any point during the retention period, and, under the six-month statute of limitations set out in 29 U.S.C. 658(c), for up to six months thereafter.

OSHA received a number of comments about its proposal to specify that the recordkeeping duty is a continuing one. These comments are addressed in Section II.B, Legal Authority, above. For the reasons stated there, OSHA has adopted the changes as proposed.

5. Paragraph (b)(3) of § 1904.29—How quickly must each injury or illness be recorded?

OSHA proposed to revise paragraph (b)(3) of § 1904.29. The paragraph, as proposed and adopted in this final rule, states OSHA's longstanding requirement that each and every recordable injury and illness must be recorded on both the OSHA 300 Log for that year and a 301 Incident Report within seven calendar days of when the employer receives information that the injury or illness occurred. OSHA is making minor wording changes to the first sentence of paragraph (b)(3), and the remainder of paragraph (b)(3), as proposed and adopted, is designed to make clear that employers who fail to record as required within seven days are not then relieved of the obligation to record. Thus, the obligation to record continues until the five-year retention period in § 1904.33(a) has ended.

North America's Building Trades Unions suggested that OSHA's use of the word "deadline" to refer to the end of the seven-day reporting period might cause confusion about whether the obligation continues after the "deadline" is missed. Ex. 0025. OSHA agrees and is removing this word in the final rule. OSHA has always interpreted the seven-day recording period as a grace period when an employer can gather information on an injury or illness without fear of being cited by OSHA for a failure to record. Similarly, OSHA has always interpreted the obligation to record as continuing throughout the record retention period. The amendments to this paragraph simply clarify OSHA's long-held positions.

Other comments disagreeing with OSHA's proposal to specify that the recordkeeping duty is a continuing one are addressed in Section II.B, Legal Authority, above. For the reasons stated there, OSHA has adopted the remainder of the provision as proposed.

6. Section 1904.32—Year-End Review and Annual Summary

OSHA proposed to amend the title of this section to more accurately describe the topics covered by § 1904.32, which include an employer's year-end review of records. OSHA received no comments on this proposed change and has adopted the change as proposed.

7. Paragraph (a) of § 1904.32—Basic Requirement

OSHA received no comments on the proposed changes to § 1904.32(a) and has adopted the changes as proposed. OSHA has revised paragraph (a)(1) of § 1904.32 to make clear that employers must examine each year's OSHA 300 Log at the end of the year to ensure that each and every recordable injury and illness is recorded on the Log, and that each entry is accurate. If an employer discovers, during this review, that an injury or illness is missing or that any aspect of an entry is inaccurate, the employer must correct the deficiency.

OSHA has added a new paragraph (paragraph (a)(2)) to § 1904.32. This paragraph provides that after reviewing and verifying the Log entries under § 1904.32(a)(1), employers must verify that all entries on the Log are accurately recorded on OSHA 301 Incident Reports. Paragraph (a)(2) clarifies that if an employer discovers, during the § 1904.32(a)(1) review, that an injury or illness was initially left off of the OSHA 300 Log, the employer must both add it to the log and create an accurate Incident Report for that injury or illness.

OSHA is moving the language from paragraph (a)(2) in § 1904.32 to paragraph (a)(3) in the same section. OSHA is adding a clause to that paragraph to explain that the annual summary should be created only after an employer verifies the accuracy of the Log. This language is for clarification purposes only and does not add any new compliance requirements. OSHA is also renumbering paragraphs (a)(3) and (4) of § 1904.32 as paragraphs (a)(4) and (5), respectively. OSHA did not propose to make, and is not making, any substantive changes to these provisions.

The specific tasks required of employers under § 1904.32(a)—to conduct a year-end review of the Log, and to prepare, certify, and post the annual summary—are in addition to the duties described elsewhere in part 1904, and do not supersede or modify them. These other duties include the fundamental continuing obligation for employers to ensure that Logs are accurate and complete and that all recordable cases are included on them. The specific steps required under

§ 1904.32(a) are supplementary tasks designed to help ensure that employers are maintaining accurate records. These supplementary tasks are to be performed at specified times (at the end of each calendar year, and from February 1 to April 30 for posting). Failure to perform one of these supplementary tasks by the required date or during the required time period is a violation of § 1904.32 that may be cited during the following six months. *See Volks II*, 675 F.3d at 761–62 (concurring opinion).

8. Paragraph (b)(1) of § 1904.32—How extensively do I have to review the OSHA 300 Log at the end of the year?

OSHA received no comments on the proposed changes to paragraph (b)(1) of § 1904.32 has adopted the changes as proposed. OSHA is amending paragraph (b)(1) of § 1904.32 to reflect the revisions to § 1904.32(a)(1). The changes to paragraph (b)(1) reiterate that employers must review the Log and its entries sufficiently to verify that all recordable injuries and illnesses for the relevant year are entered, and that those entries are accurate. In addition, OSHA is making one minor, non-substantive change to the heading of paragraph (b)(1).

9. Section 1904.33—Retention and Maintenance of Accurate Records

OSHA proposed to update the title of this section to more accurately reflect the obligations described in § 1904.33. OSHA received no comments on this proposed change and has adopted the change as proposed.

10. Paragraph (b)(1) of § 1904.33—Other than the obligation identified in § 1904.32, do I have further recording duties with respect to OSHA 300 Logs and 301 Incident Reports during the five-year retention period?

OSHA proposed to amend the heading for this paragraph to reflect that employers have recording duties with respect to Incident Reports, as well as OSHA 300 Logs, during the five-year retention period. OSHA also proposed to amend the text of paragraph (b)(1) of § 1904.33 to provide an introduction to the paragraphs that follow.

OSHA proposed to add paragraphs (b)(1)(i) through (iii) to § 1904.33 to provide further guidance to employers on the duties to update Log entries and Incident Reports. Proposed paragraph (b)(1)(i) was designed to clarify employers' duties to make and keep OSHA 300 Log entries for each and every recordable injury and illness that occurs during the year to which the Log relates. There must also be an associated Incident Report for each illness and

injury recorded on the Log. As the proposed language made explicit, these duties continue until the five-year retention period ends; thus, an employer may be required to make an entry on the OSHA Log or fill out an Incident Report for an illness or injury that occurred several years ago, if the employer either just learned of the incident or failed initially to record as required upon learning of the incident.

Proposed paragraph (b)(1)(ii) addressed changes that must be made to OSHA Logs throughout the retention period. As emphasized throughout this rule, employers' OSHA 300 Logs must be accurate. This means that if an employer discovers that any aspect of a previously-recorded case (such as the classification, description, or outcome of the case) has changed, or that a case was recorded incorrectly at the outset, the employer must amend the entry to reflect the new or corrected information.

Proposed paragraph (b)(1)(iii) reiterated the requirement in paragraph (b)(1)(i) that there must be an Incident Report for each and every recordable injury and illness. The primary purpose of proposed paragraph (b)(1)(iii) was to explain that employers are not required to update or correct existing Incident Reports during the retention period. This principle was previously stated in § 1904.33(b)(3).

OSHA received a number of comments questioning its assertion that the proposed changes to paragraph (b)(1) of § 1904.33 would not require anything new of employers. These comments are addressed below and in Section II.B, Legal Authority, above. The proposed language was intended not to change, but rather to state more clearly, what was already required under the recordkeeping rules. The prior recordkeeping rules provided that during the five-year retention period, the employer must update the Logs to include newly discovered recordable injuries and illnesses and to show changes that occurred in previously recorded cases. They did not explicitly state the employer's continuing duty to record cases it initially failed to record as required. Judge Garland's concurring opinion in *Volks II* concluded that the regulation was not worded explicitly enough to create a continuing obligation to record all such cases, as compared with newly discovered cases. *Volks II*, 675 F.3d at 760–61.

At the time OSHA amended the recordkeeping rules in 2001, it was well-established law in the Commission that employers had a continuing duty to record these previously unrecorded injuries and illnesses on their Logs. See *Gen. Dynamics*, 15 BNA OSHC 2122;

Johnson Controls, 15 BNA OSHC 2132. Nothing in the 2001 rulemaking suggested that OSHA had any intention of changing this fundamental requirement. The 2001 recordkeeping regulations required employers to promptly record cases on the 300 Log, and, throughout the five-year retention period, to add to the Log newly discovered cases even if they occurred some time ago. These rules did not assume noncompliance; in other words, the rules did not explicitly state what an employer must do if it failed to record a case that was recordable. But by stating in the 2001 regulations that newly discovered cases should be recorded, the Secretary did not intend to signify that other cases the employer had learned about need not be recorded.

The 2001 regulations also stated that employers were *not* required to “update” Form 301 Incident Reports. In *Volks II*, Judge Garland read this to mean that employers do not have to create a form at all, once the initial seven-day recording period is over. See *Volks II*, 675 F.3d at 760–61 (concurring opinion). That was not the Secretary's intention. The intent was to distinguish between the Log, which employers must update to reflect new and changed information, and the 301 Form, which employers do not need to update. (The Secretary explained that although updating the Log would provide useful, accurate information, updating Incident Reports would not enhance the information in the employer's records sufficiently to warrant the additional burden that would be associated with such a requirement. See 66 FR at 6050, January 19, 2001.) That OSHA did not require employers to update Incident Reports did not mean employers were not required to create the forms in the first place. The language in the final rule clarifies this.

For the reasons stated above and in Section II.B, Legal Authority, OSHA has adopted the proposed revisions to § 1904.33(b)(1) without change.

11. Paragraph (b)(2) of § 1904.33—Do I have to make additions or corrections to the annual summary during the five-year retention period?

OSHA proposed minor changes to paragraph (b)(2) of § 1904.33. These proposed changes were not substantive. The recordkeeping rules do not require employers to update or make changes to annual summaries during the five-year retention period. OSHA received no comments on the proposed changes to § 1904.33(b)(2) and has adopted the changes as proposed.

12. Paragraph (b)(3) of § 1904.33

OSHA proposed to delete paragraph (b)(3) from § 1904.33 and move it, in slightly modified form, to paragraph (b)(1)(iii) in § 1904.33. OSHA received no comments on this proposed change to the regulatory text and has adopted the change as proposed.

13. Section 1904.34—Change in Business Ownership

Commenter Nabors Drilling USA observed that the language in the proposed rule might create confusion about the obligations of a new owner regarding the accuracy of the previous owner's injury logs. Ex. 0010. To eliminate any potential confusion, OSHA is adding a sentence at the end of § 1904.34 to clarify that when a business changes ownership, the new owner is not responsible for recording work-related injuries and illnesses that occurred before the change in ownership.

14. Paragraph (b)(2) of § 1904.35—Do I have to give my employees and their representatives access to the OSHA injury and illness records?

Paragraph (b)(2) of § 1904.35 addresses employee access to records created under part 1904. OSHA proposed only one minor change to this paragraph—the addition of the word “accurate” to describe the records to which employees, former employees, and their representatives must be given access. Accurate records are described in § 1904.0. OSHA received no comments on this proposed change to the regulatory text and has adopted the change as proposed.

15. Paragraph (b)(2)(iii) of § 1904.35—If an employee or representative asks for access to the OSHA 300 Log, when do I have to provide it?

In paragraph (b)(2)(iii) of § 1904.35, OSHA proposed to add the term “accurate” to describe the OSHA 300 Logs to which employees, former employees, and their representatives must be given access. Accurate records are described in § 1904.0. Records are required so they can be used, and records must be accurate if they are to serve this purpose. The duty to provide an accurate record upon request arises when the request is made, not before, so the six-month statute of limitations does not begin to run until the request is made.

Nabors Drilling USA asked whether the change to § 1904.35 creates a private right of action by employees, former employees, and their representatives to pursue claims over recordkeeping. Ex. 0010. It does not. OSHA received no

other comments on the proposed change to § 1904.35 and has adopted the change as proposed.

16. Subpart E—Reporting Accurate Fatality, Injury, and Illness Information to the Government

OSHA proposed to revise the title of Subpart E to more precisely reflect the requirement in the Subpart that government representatives be given access to *accurate* fatality, injury, and illness information. OSHA received no comments on this proposed change and has adopted the change as proposed.

17. Section 1904.40—Providing Accurate Records to Government Representatives

OSHA proposed to revise the title of § 1904.40 to reflect the changes to paragraph (a) of that section. OSHA received no comments on this proposed change and has adopted the change as proposed.

18. Paragraph (a) of § 1904.40—Basic Requirement

OSHA proposed to add the term “accurate” to paragraph (a) of § 1904.40 to reflect OSHA’s longstanding expectation that employers provide government representatives with *accurate* records upon request. OSHA also proposed some non-substantive wording changes to this paragraph.

Nabors Drilling USA suggested that OSHA revisit the four-business-hour timeframe in which employers must provide requested records to government representatives. Ex. 0010. This suggestion is beyond the scope of this rulemaking because this final rule only clarifies, and does not change, existing obligations. OSHA received no other comments on its proposed changes to § 1904.40(a) and has adopted the changes as proposed.

IV. State Plans

The 28 States and U.S. Territories with their own OSHA-approved occupational safety and health plans must adopt a rule comparable to the amendments that Federal OSHA is promulgating to 29 CFR part 1904 in this final rule. The States and U.S. Territories with OSHA-approved occupational safety and health plans covering private employers and State and local government employees are: Alaska, Arizona, California, Hawaii, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Nevada, New Mexico, North Carolina, Oregon, Puerto Rico, South Carolina, Tennessee, Utah, Vermont, Virginia, Washington, and Wyoming. In addition, six States and U.S. Territories have OSHA-approved

State plans that apply to State and local government employees only: Connecticut, Illinois, Maine, New Jersey, New York, and the Virgin Islands.

Under 29 CFR 1952.4(a), States with approved occupational safety and health plans under section 18 of the OSH Act (29 U.S.C. 667) must adopt recordkeeping and reporting regulations that are “substantially identical” to those set forth in 29 CFR part 1904. State plans’ recording and reporting requirements for determining which injuries and illnesses must be recorded, and how they will be recorded, must be the same as the Federal requirements. 29 CFR 1952.4(a). State plans may promulgate injury or illness recording and reporting requirements that are more stringent than, or supplemental to, 29 CFR part 1904, after consulting with, and obtaining approval from, Federal OSHA. *Id.*

State plans may not grant variances from injury and illness recording and reporting requirements for private sector employers; any such variances must be granted by Federal OSHA. 29 CFR 1952.4(b). And a State may grant such a variance for a State or local government entity only after obtaining Federal OSHA approval. *Id.*

V. Final Economic Analysis

These revisions to OSHA’s recordkeeping rules do not constitute an economically significant regulatory action under Executive Order 12866. (See 58 FR 51735, September 30, 1993). Executive Order 12866 requires regulatory agencies to conduct an economic analysis for significant rules. A rule is economically significant under Executive Order 12866 if it will have an annual effect on the economy of \$100 million or more. This rule does not satisfy that criterion; as explained later in this preamble, neither the benefits nor the costs of the rule equal or exceed \$100 million. OSHA has also determined that this rule does not meet the definition of a major rule under the Congressional Review provisions of the Small Business Regulatory Enforcement Fairness Act (SBREFA). See 5 U.S.C. 804(2).¹³

¹³ Nor does this rule present a “novel legal issue” rendering it a significant regulatory action, as the Coalition for Workplace Safety suggests. Ex. 0013. The commenter states that the final rule presents such a novel legal issue because OSHA is “us[ing] a rule to overturn a U.S. Court of Appeals decision.” As explained above in Legal Authority, Section II.B.4, OSHA does not agree with this characterization of the rulemaking. This rule is intended simply to clarify the meaning of the recordkeeping regulations following the *Volks II* decision, and the decision does not deprive OSHA of authority to promulgate this rule.

The Regulatory Flexibility Act of 1980, as amended by SBREFA in 1996, requires OSHA to determine whether its regulatory actions will have a significant impact on a substantial number of small entities. See 5 U.S.C. 601 *et seq.* OSHA’s analysis indicates that the final rule will not have such an impact.

This final rule simply reiterates and clarifies employers’ existing obligations to record work-related injuries and illnesses. This rule does not require employers to make records of any injuries or illnesses for which records were not already required. Nor does the rule impose any new requirement that employers reconsider or reassess records once they have been made; employers remain subject to the existing requirement that they ensure the accuracy and completeness of their 300 Logs. OSHA estimated the costs of these requirements as part of the final recordkeeping rule issued in January of 2001, see 66 FR 6081–6120, January 19, 2001. The revisions contained in this final rule impose no new cost burden because they do not require employers to do anything new.

A number of commenters stated their belief that the final rule will impose additional costs because it requires employers to reassess, or “think about,” each record of a workplace injury or illness repeatedly over the course of five full years. Exs. 0008, 0010, 0012, 0013, 0020, 0021, 0026, 0027. The National Federation of Independent Businesses estimated, “conservatively,” that this rule will cost the economy \$1,933,710,222 over five years, assuming each employer has one “unrecorded or partially-recorded injury.”¹⁴ Ex. 0014. This concern is misplaced. An employer’s obligations remain the same as they have always been under the recordkeeping rules: To record workplace injuries and illnesses within seven days of when it learns of them and to maintain the records for five years. The final rule does not contain any new requirement to review or reassess existing records over the course of the maintenance period (see Section III, SUMMARY AND EXPLANATION, above); it simply

¹⁴ To arrive at this number, the commenter assumed that “daily reconsideration” would take one minute per day per unrecorded or partially recorded injury or illness, and then multiplied one minute per day by 365 days per year by five years (minus seven days for the regulatory grace period) by an estimated 1,365,985 covered businesses by \$46.72 per hour. Ex. 0014. In addition to assuming a requirement for daily reconsideration that the rule does not impose, this calculation does not account for the fact that concerns about reassessment will apply to only a subset of all recordkeeping cases. See discussion in Section III, SUMMARY AND EXPLANATION, above.

makes clear that if an employer fails to record an injury or illness within seven days of learning about it, it is not relieved of the requirement to have and keep an accurate record of all recordable injuries and illnesses for the duration of five years. Because the final rule imposes no new requirement for review of records, there are no additional costs involved for the time it would take to conduct such review. Moreover, there is no evidence in the record that employers have ever incurred meaningful costs (let alone costs on the level of those described by the National Federation of Independent Businesses) for regularly reassessing or “thinking about” their records—either in the many years before the *Volks II* decision when OSHA was enforcing recordkeeping requirements in a manner consistent with the clarification contained in this final rule, or after the decision, when it is undisputed that the Secretary may cite an employer for a failure-to-record at any time within the six-month period following a violation. Therefore, there is no reason to think employers will incur such costs now.

Even if these revisions to OSHA’s recordkeeping rules would result in some costs beyond those OSHA estimated in 2001, any such costs would be nominal. According to OSHA’s 2016 request to the Office of Management and Budget for an extension of the approval of the information collection requirements in the recordkeeping rules, an estimated 1.99 million injuries and illnesses must be recorded on OSHA logs each year. See http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201604-1218-002.¹⁵ Although OSHA accounted for the costs associated with full recordkeeping compliance as part of the 2001 rulemaking, and finds that this rulemaking will impose no additional costs on employers, OSHA will assume, for the sake of this analysis, that this rule will lead to the recording of a small number of recordable cases (one percent of all recordable cases) that would not have been recorded previously. In other words, OSHA will calculate the costs that would be imposed even if an additional 19,900 injuries and illnesses will be recorded as a result of the final rule. (OSHA took the same approach in

its preliminary economic analysis, although there OSHA referred to this as an assumption involving a one-percent rate of noncompliance. OSHA believes the terminology it used in the proposal led to some confusion, so it has clarified its approach for purposes of this final rule.)¹⁶ OSHA also will examine a sensitivity analysis of the results assuming that this rule will lead to the recording of an even larger number of cases (5 percent of recordable injuries and illnesses).

The National Association of Manufacturers questioned OSHA’s preliminary economic analysis, suggesting that OSHA’s one-percent and five-percent assumptions were too low. Ex. 0026. OSHA believes, however, that the true costs associated with this final rule are zero, and is using the one-percent and five-percent assumptions simply to demonstrate that even if this rule leads to the recording of some additional injuries and illnesses, any costs incurred by employers as a result will be minimal.

In 2014, OSHA prepared a Final Economic Analysis for a final rule addressing the industries entitled to a partial exemption from recordkeeping requirements and the reporting of injuries and fatalities to OSHA. In that analysis, OSHA estimated that it takes .38 of an hour to record an injury or illness on all required OSHA forms, taking into account requirements for providing access to records. See 79 FR 56130, 56165 (September 18, 2014). And according to the 2016 Information Collection Request (ICR), the average hourly rate for an Occupational Health and Safety Specialist (Standard Occupational Classification code 29–9011) is estimated to be \$48.78 (which includes a 43% addition for benefits). See http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201604-1218-002. This means that the total estimated cost of preparing OSHA records is \$18.54 per injury or illness. The American Society of Safety Engineers and the National Association of Manufacturers questioned these estimates of time and cost as too low. Exs. 0019, 0026. OSHA stands by these estimates, however, as they have been developed carefully through multiple notice and comment

rulemakings and Paperwork Reduction Act notices. Those who believe OSHA underestimated these values are failing to recognize that not all costs of investigating an accident are attributable to OSHA’s recordkeeping requirements. Much of the same information has to be collected for workers’ compensation purposes. To avoid overlapping paperwork, OSHA allows, and many employers take advantage of, the option to use equivalent workers’ compensation forms in place of OSHA’s recordkeeping forms. See 29 CFR 1904.29(a), (b)(4).

Thus, if 19,900 cases will be recorded as a result of the final rule, the total cost associated with this regulatory action will be 19,900 times \$18.54, or approximately \$368,946 per year. And if OSHA makes the even more conservative assumption that 5 percent of 1.99 million injuries and illnesses (99,500) would be recorded as a result of the final rule, the total estimated cost of the rule, across all affected employers, would be under \$1.85 million per year. Even this hypothetical cost would only exist if employers are not currently complying fully with the existing rule, but increase their compliance as a result of this clarification.

Just as there are no (or minimal) new costs associated with this rule, the rule will result in no new economic benefits. OSHA believes the revisions to the recordkeeping rules are technologically feasible because they do not require employers to perform any actions that they were not already performing under existing requirements. And because the rule does not impose any significant new compliance costs, OSHA deems it economically feasible.

VI. Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (as amended), OSHA examined the regulatory requirements of the final rule to determine if they would have a significant economic impact on a substantial number of small entities. As indicated in Section V, Final Economic Analysis, earlier in this preamble, the rule is expected to have no effect, or at most a nominal effect, on compliance costs and regulatory burden for employers, whether large or small. Accordingly, OSHA certifies that the rule will not have a significant economic impact on a substantial number of small entities.

VII. Environmental Impact Assessment

OSHA has reviewed the final rule in accordance with the requirements of the National Environmental Policy Act

¹⁵ The National Association of Manufacturers objected that BLS estimates of recordable injuries are larger than OSHA’s estimate of the total injuries that must be recorded. Ex. 0026. This is correct, but not all employers are required to record their injuries. See 29 CFR 1904.1, 2 (describing exemptions for employers with 10 or fewer employees and those in certain industries). OSHA only uses BLS recordable injury estimates for those industries required to record injuries.

¹⁶ Nabors Drilling USA commented that if OSHA is correct that 99% of employers already fully comply with the recordkeeping requirements, this final rule serves no purpose. Ex. 0010. As explained above, however, OSHA is not suggesting that 99% of employers are in full compliance with OSHA recordkeeping requirements. In any event, unlike most OSHA rulemakings, this final rule is not intended to change employers’ behavior, but rather is designed to clarify OSHA’s requirements. Thus, the current rate of recordkeeping compliance is unrelated to the need for this final rule.

(NEPA) (42 U.S.C. 4321 *et seq.*), the regulations of the Council on Environmental Quality (40 CFR parts 1500 through 1508), and the Department of Labor's NEPA procedures (29 CFR part 11). OSHA finds that the revisions included in the rule will have no major negative impact on air, water, or soil quality, plant or animal life, the use of land or other aspects of the environment. And recordkeeping and reporting requirements normally qualify for categorical exclusion from NEPA requirements in any event. *See* 29 CFR 11.10(a).

VIII. Federalism

OSHA reviewed this final rule in accordance with the most recent Executive Order on Federalism (Executive Order 13132, 64 FR 43255, August 10, 1999). This Executive Order requires that Federal agencies, to the extent possible, refrain from limiting State policy options, consult with States prior to taking any actions that would restrict State policy options, and take such actions only when clear constitutional authority exists and the problem is national in scope. Executive Order 13132 provides for preemption of State law only with the expressed consent of Congress. Any such preemption must be limited to the extent possible. Because this rulemaking action involves a regulation that is not an occupational safety and health standard under section 6 of the OSH Act, it does not preempt State law. *See* 29 U.S.C. 667(a). The effect of a final rule on states and territories with OSHA-approved occupational safety and health plans is discussed previously in Section IV, State Plans.

IX. Unfunded Mandates

OSHA cannot enforce compliance with its regulations or standards on "any State or political subdivision of a State." 29 U.S.C. 652(5). Under voluntary agreement with OSHA, some States enforce compliance with their State standards on public sector entities, and these agreements specify that these State standards must be equivalent to OSHA standards. But the final rule does not involve any unfunded mandates being imposed on any State or local government entity. Moreover, as discussed previously, OSHA estimates that there are no, or minimal, compliance costs associated with the rule. Therefore, this rule will not impose a Federal mandate on the private sector in excess of \$100 million in expenditures in any one year. Thus, OSHA certifies that this final rule is not a significant regulatory action within the meaning of Section 202 of the

Unfunded Mandates Reform Act (2 U.S.C. 1532).

X. Consultation and Coordination With Indian Tribal Governments

OSHA reviewed this rule in accordance with Executive Order 13175 (65 FR 67249, November 6, 2000) and determined that it does not have "tribal implications" as defined in that order. The rule does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

XI. Office of Management and Budget Review Under the Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*) and OMB regulations (5 CFR part 1320) require agencies to obtain approval from OMB before conducting any collection of information. The PRA defines a "collection of information" as "the obtaining, causing to be obtained, soliciting, or requiring the disclosure to third parties or the public of facts or opinions by or for an agency regardless of form or format" (44 U.S.C. 3502(3)(A)).

OSHA's existing recordkeeping forms consist of the OSHA 300 Log, the 300A Summary, and the 301 Incident Report. These forms are contained in the Information Collection Request (ICR) titled 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses, which OMB approved under OMB Control Number 1218-0176 (expiration date 01/31/2018).

In accordance with the PRA, OSHA solicited public comments on the July 29, 2015 proposed rule. The proposed rule also invited the public to submit comments to OMB and OSHA on the proposed collections of information with regard to the following:

- Whether the proposed collections of information are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and cost) of the collections of information, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the compliance burden on employers, for example, by using automated or other technological techniques for collecting and transmitting information.

Because the proposal simply reiterated and clarified employers' existing obligations to record and maintain work-related injuries and illnesses and did not add any new collection of information, the Agency maintained the existing burden hour and cost estimates in the Recording and Reporting Occupational Injuries and Illnesses Information Collection Request. The Department also submitted this ICR to OMB for review in accordance with 44 U.S.C. 3507(d) on July 29, 2015. On October 7, 2015, OMB withheld approval of the revised ICR and issued a Notice of Action (NOA) stating that prior to publication of the final rule, the agency should provide a summary of any comments related to the information collection and their response, including any changes made to the ICR as a result of comments. In addition, the agency must enter the correct burden estimates (*see* <http://www.reginfo.gov/public/do/DownloadNOA?requestID=266192>).

The final rule adds no new compliance obligations. The rule simply reiterates and clarifies employers' existing obligations to record work-related injuries and illnesses; it does not require employers to make records of any injuries or illnesses for which records were not already required. Nor does the rule impose any new requirement that employers reconsider or reassess records once they have been made; employers remain subject to the existing requirement that they ensure the accuracy and completeness of their 300 Logs. These revisions impose no new cost burden because they do not require employers to do anything new. The Department of Labor has submitted a final ICR to OMB maintaining the existing burden hours and cost estimates. A copy of this ICR is available at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201610-1218-003. OSHA will publish a separate notice in the **Federal Register** that will announce OMB results of that review. OSHA notes that a Federal agency cannot conduct or sponsor a collection of information unless it is approved by OMB under the PRA, and the collection of information notice displays a currently valid OMB control number (44 U.S.C. 3507(a)(3)). Also, notwithstanding any other provision of law, no employer shall be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number (44 U.S.C. 3512).

OSHA received comments relating to the estimated time necessary to meet the paperwork requirements of the proposed changes published in the July

29, 2015 proposed rule. A number of commenters stated their belief that the rule will impose additional costs because it requires employers to reassess, or “think about,” each record of a workplace injury or illness repeatedly over the course of five full years. Ex. 0008, 0010, 0012, 0013, 0020, 0021, 0026, 0027. This concern is misplaced. An employer’s obligations remain the same as they are under the existing rule: To record workplace injuries and illnesses within seven days of when it learns of them and to maintain accurate records for five years. The final rule does not contain any new requirement to review or reassess existing records over the course of the maintenance period; it simply makes clear that if an employer fails to record an injury or illness within seven days of learning about it, it is not relieved of the requirement to have and keep an accurate record of all recordable injuries and illnesses for the duration of five years. Because the final rule imposes no new requirement for review of records, there are no additional costs involved for the time it would take to conduct such review.

OSHA estimates that it takes .38 of an hour to record an injury or illness on all required OSHA forms, taking into account requirements for providing access to records. The average hourly rate for an Occupational Health and Safety Specialist (Standard Occupational Classification code 29–9011) is estimated to be \$48.78 (which includes a 43% addition for benefits). This means that the total estimated cost of preparing OSHA records is \$18.54 per injury or illness. The American Society of Safety Engineers and the National Association of Manufacturers questioned these estimates of time and cost as too low. Exs. 0019, 0026. OSHA stands by these estimates, however, as they have been developed carefully through multiple notice and comment rulemakings and Paperwork Reduction Act notices. Not all costs of investigating an accident are attributable to OSHA’s recordkeeping requirements. Much of the same information has to be collected for workers’ compensation purposes. To avoid overlapping paperwork, OSHA allows, and many employers take advantage of, the option to use equivalent workers’ compensation forms in place of OSHA’s recordkeeping forms. See 29 CFR 1904.29(a), (b)(4).

As required by 5 CFR 1320.5(a)(1)(iv) and 1320.8(d)(2), the following paragraphs provide information about this ICR.

1. *Title*: 29 CFR part 1904 Recording and Reporting Occupational Injuries and Illnesses.

2. *Number of respondents*: Approximately 640,000 employers with 1,300,000 establishments are regularly required to maintain the forms.

3. *Frequency of responses*: Annually.

4. *Number of responses*: Approximately 1.99 million injury and illness cases are recorded on the OSHA forms.

5. *Average time per response*: Time required completing and maintaining an entry (other than a needlestick) on the OSHA Form 300 ranges from 5 minutes to 30 minutes and averages 14 minutes. Time required completing an entry on the OSHA 301 averages 22 minutes. OSHA estimates 40% of recordable cases are recorded on form 301.

6. *Estimated total burden hours*: The final rule adds no new compliance obligations and does not require employers to make records of any injuries or illnesses for which records are not currently required to be made. The current total burden hours for the recordkeeping (part 1904) ICR are 2,525,458.

7. *Estimated costs (capital-operation and maintenance)*: There are no capital costs for the proposed information collection.

List of Subjects in 29 CFR Part 1904

Health statistics, Occupational safety and health, Safety, Reporting and recordkeeping requirements, State plans.

Authority and Signature

This document was prepared under the direction of David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor. It is issued pursuant to 29 U.S.C. 657, 673; 5 U.S.C. 553; and Secretary of Labor’s Order No. 1–2012 (77 FR 3912, January 25, 2012).

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

Accordingly, the Occupational Safety and Health Administration amends part 1904 of title 29 of the Code of Federal Regulations as follows:

PART 1904—RECORDING AND REPORTING OCCUPATIONAL INJURIES AND ILLNESSES

■ 1. Revise the authority citation for part 1904 to read as follows:

Authority: 29 U.S.C. 657, 658, 660, 666, 669, 673, Secretary of Labor’s Order No. 3–2000 (65 FR 50017), or 1–2012 (77 FR 3912), and 5 U.S.C. 553.

■ 2. Revise § 1904.0 to read as follows:

§ 1904.0 Purpose.

The purpose of this rule (part 1904) is to require employers to make and maintain accurate records of and report work-related fatalities, injuries, and illnesses, and to make such records available to the Government and to employees and their representatives so that they can be used to secure safe and healthful working conditions. For purposes of this part, accurate records are records of each and every recordable injury and illness that are made and maintained in accordance with the requirements of this part.

Note to § 1904.0: Recording or reporting a work-related injury, illness, or fatality does not mean that the employer or employee was at fault, that an OSHA rule has been violated, or that the employee is eligible for workers’ compensation or other benefits.

Subpart C—Making and Maintaining Accurate Records, Recordkeeping Forms, and Recording Criteria

■ 3. Revise the heading of subpart C to read as set forth above.

■ 4. In § 1904.4, revise paragraph (a) introductory text and add a note to § 1904.4(a) to read as follows:

§ 1904.4 Recording criteria.

(a) *Basic requirement.* Each employer required by this part to keep records of fatalities, injuries, and illnesses must, in accordance with the requirements of this part, make and maintain an accurate record of each and every fatality, injury, and illness that:

* * * * *

Note to § 1904.4(a): This obligation to make and maintain an accurate record of each and every recordable fatality, injury, and illness continues throughout the entire record retention period described in § 1904.33.

* * * * *

■ 5. Revise § 1904.29(b)(3) to read as follows:

§ 1904.29 Forms.

* * * * *

(b) * * *

(3) *How quickly must each injury or illness be recorded?* You must enter each and every recordable injury or illness on the OSHA 300 Log and on a 301 Incident Report within seven (7) calendar days of receiving information that the recordable injury or illness occurred. A failure to record within seven days does not extinguish your continuing obligation to make a record of the injury or illness and to maintain accurate records of all recordable injuries and illnesses in accordance

with the requirements of this part. This obligation continues throughout the entire record retention period described in § 1904.33. See §§ 1904.4(a); 1904.32(a)(1); 1904.33(b)(1); and 1904.40(a).

* * * * *

■ 6. Revise the heading and paragraphs (a) and (b)(1) of § 1904.32 to read as follows:

§ 1904.32 Year-end review and annual summary.

(a) *Basic requirement.* At the end of each calendar year, you must:

(1) Review that year's OSHA 300 Log to verify that it contains accurate entries for all recordable injuries and illnesses that occurred during the year, and make any additions or corrections necessary to ensure its accuracy;

(2) Verify that each injury and illness recorded on the 300 Log, including any injuries and illnesses added to the Log following your year-end review pursuant to paragraph (a)(1) of this section, is accurately recorded on a corresponding 301 Incident Report form;

(3) After you have verified the accuracy of the Log, create an annual summary of injuries and illnesses recorded on the Log;

(4) Certify the summary; and

(5) Post the summary.

(b) * * *

(1) *How extensively do I have to review the OSHA 300 Log at the end of the year?* You must review the Log and its entries as extensively as necessary to verify that all recordable injuries and illnesses that occurred during the year are entered and that the Log and its entries are accurate.

* * * * *

■ 7. Revise the heading and paragraph (b) of § 1904.33 to read as follows:

§ 1904.33 Retention and maintenance of accurate records.

* * * * *

(b) *Implementation*—(1) *Other than the obligation identified in § 1904.32, do I have further recording duties with respect to the OSHA 300 Logs and 301 Incident Reports during the five-year retention period?* You must make the following additions and corrections to the OSHA Log and Incident Reports during the five-year retention period:

(i) The OSHA Logs must contain entries for all recordable injuries and illnesses that occurred during the calendar year to which each Log relates. In addition, each and every recordable injury and illness must be recorded on an Incident Report. This means that if a recordable case occurred and you

failed to record it on the Log for the year in which the injury or illness occurred, and/or on an Incident Report, you are under a continuing obligation to record the case on the Log and/or Incident Report during the five-year retention period for that Log and/or Incident Report;

(ii) You must also make any additions and corrections to the OSHA Log that are necessary to accurately reflect any changes that have occurred with respect to previously recorded injuries and illnesses. Thus, if the classification, description, or outcome of a previously recorded case changes, you must remove or line out the original entry and enter the new information; and

(iii) You must have an Incident Report for each and every recordable injury and illness; however, you are not required to make additions or corrections to Incident Reports during the five-year retention period.

(2) *Do I have to make additions or corrections to the annual summary during the five-year retention period?* You are not required to make additions or corrections to the annual summaries during the five-year retention period.

■ 8. Revise § 1904.34 to read as follows:

§ 1904.34 Change in business ownership.

If your business changes ownership, you are responsible for recording and reporting work-related injuries and illnesses only for that period of the year during which you owned the establishment. You must transfer the Part 1904 records to the new owner. The new owner must save all records of the establishment kept by the prior owner, as required by § 1904.33, but need not update or correct the records of the prior owner. The new owner is not responsible for recording and reporting work-related injuries and illnesses that occurred before the new owner took ownership of the establishment.

■ 9. Revise paragraphs (b)(2) introductory text and (b)(2)(iii) of § 1904.35 to read as follows:

§ 1904.35 Employee involvement.

* * * * *

(b) * * *

(2) *Do I have to give my employees and their representatives access to the OSHA injury and illness records?* Yes, your employees, former employees, their personal representatives, and their authorized employee representatives have the right to access accurate OSHA injury and illness records, with some limitations, as discussed below.

* * * * *

(iii) *If an employee or representative asks for access to the OSHA 300 Log,*

when do I have to provide it? When an employee, former employee, personal representative, or authorized employee representative asks for copies of your current or stored OSHA 300 Log(s) for an establishment the employee or former employee has worked in, you must give the requester a copy of the relevant and accurate OSHA 300 Log(s) by the end of the next business day.

* * * * *

Subpart E—Reporting Accurate Fatality, Injury, and Illness Information to the Government

■ 10. Revise the heading of subpart E to read as set forth above.

■ 11. Revise the heading and paragraph (a) of § 1904.40 to read as follows:

§ 1904.40 Providing accurate records to government representatives.

(a) *Basic requirement.* When an authorized government representative requests the records you keep under part 1904, you must provide accurate records, or copies thereof, within four (4) business hours of the request.

* * * * *

BILLING CODE 4510–26–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–1029]

Drawbridge Operation Regulation; Northeast Cape Fear River, Wilmington, NC

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation; modification.

SUMMARY: The Coast Guard has modified a temporary deviation from the operating schedule that governs the CSX Hilton Railroad Bridge across the Northeast Cape Fear River, mile 1.5, at Wilmington, NC. This modified deviation is necessary to manually operate the bridge and perform emergency bridge repairs. This modified deviation allows the bridge to remain in the closed-to-navigation position.

DATES: This modified deviation is effective without actual notice from December 19, 2016 through 6 p.m. on December 30, 2016. For the purposes of enforcement, actual notice will be used from December 9, 2016 at 6 p.m., until December 19, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–1029] is available at <http://www.regulations.gov>. Type the docket number in the “SEARCH” box and click “SEARCH”. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this modified temporary deviation, call or email Mr. Hal R. Pitts, Bridge Administration Branch Fifth District, Coast Guard, telephone 757–398–6222, email Hal.R.Pitts@uscg.mil.

SUPPLEMENTARY INFORMATION: On November 25, 2016, the Coast Guard published a temporary deviation entitled “Drawbridge Operation Regulation; Northeast Cape Fear River, Wilmington, NC” in the **Federal Register** (81 FR 85160). Under that temporary deviation, the bridge will remain in the closed-to-navigation position and open on signal during daylight hours, if at least 3 hours notice is given. The CSX Corporation, owner and operator of the CSX Hilton Railroad Bridge across the Northeast Cape Fear River, mile 1.5, in Wilmington, NC, has requested a modified temporary deviation from the current operating regulations due to an electrical casualty to the submarine cable and electrical components caused by Hurricane Matthew. The bridge is limited to manual operation, which requires personnel to manually operate components of the bridge in locations where additional safety measures are required, limiting the bridge to daylight operations. This modified temporary deviation, extending the date until 6 p.m. on December 30, 2016, is necessary for completion of repairs to the bridge. The bridge is a bascule draw bridge and has a vertical clearance in the closed position of 4 feet above mean high water.

The current operating schedule is set out in 33 CFR 117.829(b). Under this modified temporary deviation, the bridge will remain in the closed-to-navigation position and open on signal during daylight hours, if at least 3 hours notice is given. Communications with the bridge tender may be interrupted during drawbridge operations. Notice may be given via 904–381–5793 (CSX Engineering Help Desk), if unable to contact the bridge tender via normal established methods.

The Northeast Cape Fear River is used by a variety of vessels including small commercial fishing vessels, recreational vessels and tugs and barges. The Coast Guard has carefully coordinated the restrictions with waterway users.

Vessels able to safely pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transit to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: December 13, 2016.

Hal R. Pitts,

Bridge Program Manager, Fifth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2016–0962]

Safety Zone; Captain of the Port Boston Fireworks Display Zone, Boston Harbor, Boston, MA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the subject safety zone for First Night Fireworks on December 31, 2016, to provide for the safety of life on navigable waterways during the fireworks display. Our regulation for Captain of the Port (COTP) Boston fireworks display zone, Boston Harbor, Boston, MA identifies the regulated area for this fireworks display. During the enforcement period, no vessel may transit this regulated area without approval from the COTP Boston or a designated representative.

DATES: The regulation in 33 CFR 165.119(a)(2) will be enforced Saturday, December 31, 2016 from 10 p.m. until 11:59 p.m.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, call or email Mark Cutter, Sector Boston Waterways Management Division, U.S. Coast Guard; telephone

617–223–4000, email Mark.E.Cutter@uscg.mil.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.119(a)(2) on Saturday, December 31, 2016 from 10 p.m. until 11:59 p.m., for the First Night Fireworks in Boston Inner Harbor. This action is being taken to provide for the safety of life on navigable waterways during the fireworks display. Our regulation for COTP Boston fireworks display zone, Boston Harbor, Boston, MA, 33 CFR 165.119(a)(2), specifies the location of the regulated area as all U.S. navigable waters of Boston Inner Harbor within a 700-foot radius of the fireworks barge in the approximate position 42°21′41.2″ N. 071°02′36.5″ W. (NAD 1983), located off of Long Wharf, Boston, MA. The safety zone will include all U.S. navigable waters of Boston Inner Harbor within a 700-foot radius of the firework barge when in position. As specified in 33 CFR 165.119(e), during the enforcement period, no vessel may transit this regulated area without approval from the COTP Boston or a COTP designated representative.

This notice of enforcement is issued under authority of 33 CFR 165.119 and 5 U.S.C. 552(a). In addition to this notice of enforcement in the **Federal Register**, the Coast Guard plans to provide mariners with advanced notification of this enforcement period via the Local Notice to Mariners and Broadcast Notice to Mariners.

Dated: December 7, 2016.

C.C. Gelzer,

Captain, U.S. Coast Guard, Captain of the Port Boston.

BILLING CODE 9110–04–P

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 294

RIN 0596–AD26

Roadless Area Conservation; National Forest System Lands in Colorado

AGENCY: Forest Service, USDA.

ACTION: Final rule and record of decision.

SUMMARY: The U.S. Department of Agriculture (USDA) is reinstating the North Fork Coal Mining Area exception to the Colorado Roadless Rule. The Colorado Roadless Rule is a State-specific rule that establishes management direction for the conservation of roadless area values and

characteristics across approximately 4.2 million acres of land located within the State of Colorado in Roadless Areas on National Forest System (NFS) lands. The North Fork Coal Mining Area exception to the Colorado Roadless Rule provides for the construction of temporary roads, if needed, for coal exploration and coal-related surface activities in the 19,700-acre area defined as the North Fork Coal Mining Area. The Colorado Roadless Rule was promulgated on July 3, 2012, but the U.S. District Court for the State of Colorado ruled that the environmental analysis performed by the U.S. Forest Service on behalf of the USDA pursuant to the National Environmental Policy Act was deficient. The Forest Service prepared a Supplemental Environmental Impact Statement (SEIS) to respond to the specific deficiencies identified in that U.S. District Court ruling. In addition, an administrative correction is being conducted by the USDA for Colorado Roadless Area (CRA) boundaries associated with the North Fork Coal Mining Area based on updated information. The correction adds an additional 200 acres to the roadless area in the 2012 Colorado Roadless Rule. These boundary corrections address changes identified by new road survey information.

DATES: This rule is effective February 17, 2017.

ADDRESSES: The public may inspect the project record for this final rule at the USDA, Forest Service, Rocky Mountain Regional Office, Strategic Planning Staff, 740 Simms Street, Golden, Colorado, between 8 a.m. and 4:30 p.m. on business days. Those wishing to inspect the project record at the Regional Office should call 303-275-5103 ahead of arrival to facilitate an appointment and entrance to the building. In addition, key documents from the project record are posted on the Forest Service Web site at www.fs.usda.gov/goto/coroadlessrule.

FOR FURTHER INFORMATION CONTACT: Jason Robertson; Acting Director; Recreation, Lands, and Minerals; Rocky Mountain Regional Office, at 303-275-5470. Individuals using telecommunication devices for the deaf may call the Federal Information Relay Services at 1-800-877-8339 between 8 a.m. and 8 p.m. Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: This preamble describes the basis and purpose of the rule, summarizes public comments received and Agency responses, describes alternatives considered, and serves as the record of decision for this rulemaking. The

preamble is organized into the following sections:

- Executive Summary
- Background
- Purpose and Need
- Decision
- Decision Rationale
- Public Involvement
- Alternatives Considered
- Environmentally Preferable Alternative
- Comments on the Proposed Rule
- Regulatory Certifications

Executive Summary

The Forest Service manages approximately 14.5 million acres of public lands in Colorado distributed among eight National Forests and two National Grasslands. Of this, the Forest Service designated about 4.2 million acres as CRAs under the 2012 Colorado Roadless Rule.

In January 2001, the Roadless Area Conservation Rule (2001 Roadless Rule) was adopted into regulation (36 CFR 294, Subpart B (2001)). The 2001 Roadless Rule was subject to litigation for more than a decade that created uncertainty over the management of roadless areas throughout the Nation. This uncertainty, along with State-specific concerns, was a key factor that influenced the State of Colorado to petition the USDA for a State-specific roadless rule in 2006.

On July 3, 2012, the USDA promulgated the final Colorado Roadless Rule (36 CFR 294, Subpart D) which replaced the 2001 Roadless Rule authority over roadless areas in Colorado. The Colorado Roadless Rule included a provision that allowed for construction of temporary roads when needed for coal exploration and/or coal-related surface activities for certain lands within CRAs in the North Fork coal mining area of the Grand Mesa, Uncompahgre, and Gunnison National Forests. In July 2013, High Country Conservation Advocates, WildEarth Guardians, and the Sierra Club challenged the North Fork Coal Mining Area exception of the Colorado Roadless Rule, and in June 2014 the District Court of Colorado found the environmental documents supporting the Colorado Roadless Rule to be in violation of the National Environmental Policy Act due to analysis deficiencies. In September 2014, the District Court of Colorado vacated the North Fork Coal Mining Area exception of the Colorado Roadless Rule, but left the remainder of the Rule intact. On April 7, 2015, the Forest Service published a Notice of Intent to prepare a SEIS for rulemaking to reinstate the North Fork Coal Mining Area exception and address the concerns raised by the court (80 FR

18598). On November 20, 2015, the Forest Service published the proposed rule and Supplemental Draft Environmental Impact Statement (SDEIS) for public comment (80 FR 72665).

This Final Rule and Supplemental Final Environmental Impact Statement (SFEIS) focuses on the court-identified deficiencies as well as Endangered Species Act compliance. To address the court-identified deficiencies, the Forest Service quantified carbon dioxide and methane emissions from potential coal-mining operations and combustion of coal from the North Fork Coal Mining Area that could occur from reinstatement of the North Fork Coal Mining Area exception. In addition, the Forest Service conducted a market substitution analysis of coal absent the North Fork Coal Mining Area exception to address the court-identified deficiencies. The Forest Service also reinitiated consultation under the Endangered Species Act due to new species listings that did not exist in 2012 when the original Colorado Roadless Rule was released and changed critical habitat designations as required by the Endangered Species Act; and provided new information regarding fisheries that were not included or available for the 2012 analysis.

The Forest Service analyzed three alternatives in detail in the SEIS. Alternative A is the no action alternative in which the North Fork Coal Mining Area exception is not reinstated and the area is managed as general roadless areas under the Colorado Roadless Rule. Alternative B is the selected alternative and reinstates the North Fork Coal Mining Area exception as written in the 2012 Colorado Roadless Rule to an area of about 19,700 acres. Alternative C is similar to Alternative B in that it reinstates the North Fork Coal Mining Area exception as written in the 2012 Colorado Roadless Rule but would only apply it to an area of about 12,600 acres.

Background

The history of the Colorado Roadless Rule and, in particular, the North Fork Coal Mining Area exception, provide important context for the current rulemaking effort. Colorado Senate Bill 05-243, signed into Colorado law on June 8, 2005, created and identified a 13-member bipartisan task force to examine protection of NFS roadless areas within Colorado. The task force was directed to make recommendations to the Governor regarding management of these lands. On November 13, 2006, then-Governor Bill Owens submitted a petition to the USDA to develop a State-

specific roadless rule. The petition reflected the task force recommendations and included the North Fork Coal Mining Area exception. Governor Owens stated that the petition weighed Colorado's interests and reflected the concerns of the entire State. Specific to coal resources, the task force recommended that the Colorado Roadless Rule not apply to about 55,000 acres of CRAs within the Grand Mesa, Uncompahgre, and Gunnison National Forests. However, the rule would be applied to and protect areas with potential coal resources within CRAs on the Pike-San Isabel, Routt, White River, and San Juan National Forests, eliminating future roaded access to coal resources in those CRAs. The North Fork Coal Mining Area, as originally petitioned by Governor Owens, was about 55,000 acres and included all or portions of Currant Creek, Electric Mountain, Flatirons, Flattops-Elk Park, Pilot Knob, and Sunset CRAs.

After Governor Owens submitted the State's petition, Bill Ritter, Jr. was elected Governor of Colorado. In April 2007, then-Governor Ritter resubmitted the petition with minor modifications. Governor Ritter supported the concept of the Colorado Roadless Rule and the North Fork Coal Mining Area but explicitly asked that the area remain in the Colorado roadless inventory, rather than having the acres removed.

In July 2008, in response to public comments and discussions with coal interests, the USDA reduced the size of the North Fork Coal Mining Area to about 29,000 acres in the proposed Colorado Roadless Rule and included all or portions of Currant Creek, Electric Mountain, Flatirons, Pilot Knob, and Sunset CRAs (73 FR 43543). In 2010, John Hickenlooper was elected Governor of Colorado. Governor Hickenlooper also supported having a North Fork Coal Mining Area exception. In April 2011, in response to additional public comments, the USDA further reduced North Fork Coal Mining Area to approximately 20,000 acres in the revised proposed Colorado Roadless Rule and included all or portions of Currant Creek, Electric Mountain, Flatirons, Pilot Knob, and Sunset CRAs (76 FR 21272).

The State of Colorado, USDA, Forest Service, and the public worked in partnership for many years to find a balance between conserving roadless area characteristics for future generations and allowing management activities—including the construction of temporary roads that would not foreclose coal exploration and development—within CRAs that are important to Colorado's citizens and the

economy. Throughout the rulemaking process, a total of five formal comment periods were held by the State and Forest Service resulting in 27 public meetings and more than 312,000 comments. In addition, five meetings open to the public were held by the Roadless Area Conservation National Advisory Committee, which provided recommendations to the Secretary of Agriculture. The USDA believes that designation of the North Fork Coal Mining Area and its road exception strikes an appropriate balance between conserving roadless area characteristics and addressing State-specific concerns regarding the continued exploration and development of coal resources in the North Fork Valley.

On July 3, 2012, the USDA promulgated the final Colorado Roadless Rule, which replaced the 2001 Roadless Rule authority over roadless areas in Colorado (36 CFR 294, Subpart D). The 2012 Colorado Roadless Rule included a North Fork Coal Mining Area exception for temporary road construction but further reduced its size by removing the acreage in the Currant Creek CRA in response to public concerns and to balance the value of roadless characteristics with economic development. The final rule included a North Fork Coal Mining Area of 19,100 acres but U.S. Forest Service has since learned that number was misrepresented; the actual acreage is 19,500 acres. The reduced North Fork Coal Mining Area included all or portions of the Flatirons, Pilot Knob, and Sunset CRAs (less than 0.5% of the total CRAs). While the North Fork Coal Mining Area was included under the protections of the current rule, that rule also provided for the construction of temporary roads, if needed, for future coal exploration and development activities.

In July 2013, High Country Conservation Advocates, WildEarth Guardians, and the Sierra Club challenged the North Fork Coal Mining Area exception of the Colorado Roadless Rule in part of a larger lawsuit regarding Forest Service and Bureau of Land Management (BLM) decisions related to coal lease modifications and an exploration proposal within the North Fork Coal Mining Area (*High Country Conservation Advocates v. United States Forest Service*, 52 F. Supp. 3d 1174, D. Colo. 2014). With respect to the challenge to the Colorado Roadless Rule, in June 2014, the District Court of Colorado identified environmental analysis deficiencies including failure to disclose greenhouse gas emissions associated with potential mine operations; failure to disclose

greenhouse gas emissions associated with combustion of coal potentially mined from the area; and failure to address a report about coal substitution submitted during a public comment period. In September 2014, the District Court of Colorado vacated the North Fork Coal Mining Area exception of the Colorado Roadless Rule (36 CFR 294.43(c)(1)(ix)) but otherwise left the rule intact and operational. The court also vacated Forest Service and BLM decisions on lease modifications and exploration proposal. *High Country Conservation Advocates v. United States Forest Service*, 67 F. Supp. 3d 1262 (D. Colo. 2014).

On April 7, 2015, the Forest Service published a Notice of Intent to prepare a SEIS to reinstate the North Fork Coal Mining Area exception in the **Federal Register** (80 FR 18598). The SEIS complements the 2012 Final Environmental Impact Statement for the Colorado Roadless Rule and is limited in scope to address the deficiencies identified by the District Court of Colorado in *High Country Conservation Advocates v. United States Forest Service*. The Forest Service prepared the SEIS on behalf of the USDA to reinstate the North Fork Coal Mining Area exception with the Department of the Interior's BLM and Office of Surface Mining Reclamation and Enforcement, and the State of Colorado, Department of Natural Resources all serving as cooperating agencies under the National Environmental Policy Act regulations (40 CFR 1501.6).

Purpose and Need

The overarching purpose and need for reinstating the North Fork Coal Mining Area exception is the same as the purpose and need for the 2012 Colorado Roadless Rule. However, the specific purpose and need for reinstating the North Fork Coal Mining Area exception is to provide management direction for conserving approximately 4.2 million acres of CRAs while addressing the State's interest in not foreclosing opportunities for exploration and development of coal resources in the North Fork Coal Mining Area. The original purpose of and need for action as articulated in the 2012 FEIS is as follows:

The USDA, the Forest Service, and the State of Colorado agree that a need exists to provide management direction for conserving roadless area characteristics within roadless areas in Colorado. In its petition to the Secretary of Agriculture, the State of Colorado indicated a need to develop State-specific regulations for the management

of Colorado's roadless areas for the following reasons:

- Roadless areas are important because they are, among other things, sources of drinking water, important fish and wildlife habitat, semi-primitive or primitive recreation areas that include both motorized and non-motorized recreation opportunities, and naturally appearing landscapes. A need exists to provide for the conservation and management of roadless area characteristics.

- The USDA, the Forest Service, and the State of Colorado recognize that timber cutting, sale, or removal and road construction/reconstruction have the greatest likelihood of altering and fragmenting landscapes, resulting in immediate, long-term loss of roadless area characteristics. Therefore, there is a need to generally prohibit these activities in roadless areas. Some have argued that linear construction zones also need to be restricted.

- A need exists to accommodate State-specific situations and concerns in Colorado's roadless areas. These include:

- reducing the risk of wildfire to communities and municipal water supply systems,
- facilitating the exploration and development of coal resources in the North Fork Coal Mining Area,
- permitting construction and maintenance of water conveyance structures,
- restricting linear construction zones, while permitting access to current and future electrical power lines, and
- accommodating existing permitted or allocated ski areas.
- There is a need to ensure CRAs are accurately mapped.

Decision

USDA hereby reinstates part 294 of Title 36 of the Code of Federal Regulations, 36 CFR 294.43(c)(1)(ix), as described in Alternative B of the "Rulemaking for Colorado Roadless Areas Supplemental Final Environmental Impact Statement." This decision is not subject to Forest Service administrative review regulations.

In addition, USDA is administratively correcting CRA boundaries based on the increased accuracy of the inventory of forest road locations obtained since the promulgation of the Colorado Roadless Rule in 2012.

Decision Rationale

The Colorado Roadless Rule as promulgated in 2012 provides a high level of conservation of roadless area characteristics on approximately 4.2

million acres. The Colorado Roadless Rule achieves this by establishing prohibitions for tree cutting, road construction/reconstruction, and the use of linear construction zones. The 2012 Colorado Roadless Rule also addressed State-specific concerns that are important to the citizens and economy of Colorado. These concerns included: (1) Reducing the risk of wildfire to communities and municipal water supply systems, (2) permitting construction and maintenance of water conveyance structures, (3) restricting linear construction zones, (4) accommodating ski areas, and (5) facilitating exploration and development of coal resources in the North Fork Coal Mining Area. Providing for the State-specific concerns generally allows for tree cutting and road construction/reconstruction beyond what was allowed under the 2001 Roadless Rule. The 2012 Colorado Roadless Rule designated about 1.2 million acres of CRAs as upper tier to offset the potential impacts of providing the exceptions. The upper tier are acres within CRAs where exceptions to road construction/reconstruction and tree cutting are more restrictive and limiting than the 2001 Roadless Rule. The selection of Alternative B as the final rule restores the balance between providing for the conservation of roadless area characteristics across the 4.2 million acres of CRAs and addressing the State-specific concern of preserving the exploration and development opportunities of coal resources in the North Fork Coal Mining Area.

The 2012 Colorado Roadless Rule was developed in a highly collaborative manner. Five formal comment periods were held, which included 27 public meetings and resulted in about 312,000 comments. The final amount of CRA and upper tier acreage was arrived at through a collaborative process between the Forest Service and stakeholders. The final North Fork Coal Mining Area is a result of a series of compromises. The North Fork Coal Mining Area was originally proposed in Governor Owens' 2006 petition as about 55,000 acres including six different CRAs. Through the collaborative process, the North Fork Coal Mining Area was reduced to 29,000 acres in July 2008; then to 20,000 acres in April 2011; and finally to 19,500 acres in July 2012. The reinstatement of the North Fork Coal Mining Area demonstrates USDA's commitment to the public collaborative process and respects the stakeholders' good faith compromises and engagement during the original effort to

develop the 2012 Colorado Roadless Rule.

The main purpose of the SEIS and this rulemaking is to address the deficiencies identified by the District Court of Colorado, which included the quantification of greenhouse gas emissions associated with potential mine operations and coal combustion from the North Fork Coal Mining Area and consideration of coal substitution if the coal in the North Fork Coal Mining Area remained inaccessible. In addition, some public comments to the proposed version of this rule expressed concern regarding the impact the final rule could have on greenhouse gas emissions and climate change. The SEIS estimates that gross greenhouse gas emissions of recovering and combusting all 172 million short tons of coal estimated to be made accessible by the final rule could result in approximately 443 million metric tons of carbon dioxide equivalent (CO₂e) occurring between 2016 and 2054 (the projected timeframe over which coal resources could be produced). The SEIS also estimates gross annual greenhouse gas emissions of approximately 13.5 million metric tons of CO₂e at the projected low production level and 39.9 million metric tons of CO₂e at the projected high production level based on established air quality permits. These estimated emissions are conservative and likely overestimate potential greenhouse gas emissions because the analyses assumed all coal in the North Fork Coal Mining Area would be recovered and the upper bound of the analyses utilized the maximum production rates authorized under state air quality permits, which is unlikely ever to be reached.

The Forest Service conducted an analysis to determine the impact the final rule would have on net greenhouse gas emissions and considered the substitution of North Fork Coal Mining Area coal with other energy sources. This analysis assumes that if the no action alternative were selected, coal that would have otherwise become accessible via the North Fork Coal Mining Area exception would be substituted with other forms of energy or other coal to meet electricity generation demands. This analysis also assumes for modeling purposes that electricity generation across all fuel sources, by year, would remain constant across alternatives. Under the average production scenario, the North Fork Coal Mining Area would produce about 10 million short tons annually.

Results from models used by the Forest Service indicate that absent the final rule, most North Fork Coal Mining Area coal would likely be substituted

with other coal (both underground and surface coal), natural gas, and minor amounts of renewable energies contributing to electrical generation. The Integrated Planning Model (maintained by ICF International) was used by the Forest Service for coal market estimates which included a number of updates to key energy outlooks and regulatory factors (80 FR 64662), as requested by the public and the Environmental Protection Agency during the comment period for the proposed rule and SDEIS.

The SFEIS estimates the final rule would result in a net increase in carbon emissions from energy production, transportation, and combustion of about 17 million metric tons of CO₂ from 2016 to 2054 based on substitution effects. Similarly, the final rule could result in a net increase in methane gas emissions from coal operation releases of 16.7 million metric tons of CO₂e from 2016 to 2054 based on substitution effects.

According to data retrieved from EPA's Greenhouse Gas Data Inventory Explorer, coal mining in the United States accounted for 73.9 million metric

tons CO₂e of GHG emissions in 2014. Estimated annual emissions from extraction of North Fork Coal Mining Area coal would be about 1.5–4.5% of the 2014 coal-mining emissions, depending upon the scenario (assuming a constant emissions rate for comparison purposes). If transportation of North Fork Valley coal is included, estimated emissions would be about 2.4–7% of National 2014 coal-mining emissions (this is likely an overestimate as the National figure does not include transportation). National emissions of CO₂ from fossil fuel combustion for electricity generation were estimated at 2,039 million metric tons in 2014. Estimated annual CO₂ emissions from combustion of North Fork Coal Mining Area coal, including combustion assumed to occur outside the United States, would therefore be about 0.6–1.7% of the 2014 national estimate (assuming a constant emissions rate for comparison purposes). For additional context, the City of Denver estimated its 2013 annual GHG emissions to be about 13 million metric tons CO₂e (Denver Environmental Health, 2015). For the

State of Colorado in 2010 total GHG emissions were about 130 million metric tons CO₂e, of which 96 million metric tons resulted from fossil fuel combustion and 36 million metric tons resulted from coal combustion (CDPHE, 2014).

The Forest Service monetized the climate impacts associated with these projected GHG changes using a range of estimates of the social cost of carbon (SCC) and social cost of methane (SCM) developed by the U.S. Interagency Working Group on the Social Cost of Greenhouse Gases (IWG). The IWG social cost of carbon and methane metrics provide a monetary estimate of the future damages associated with a marginal increase in carbon dioxide and methane emissions, respectively, in a particular year. See Table 1 for the results of this analysis. When accounting for the social cost of both carbon dioxide and methane emissions, the quantified net benefits of the final rule are mostly negative based on the range of social cost of carbon and methane estimates recommended by the IWG for use in regulatory analysis.

TABLE 1—PRESENT NET VALUES OF THE FINAL RULE, 2016–2054

[Millions of 2014 dollars]

Analysis	Lower estimate	3% Discount avg. (lower)	3% Discount avg. (upper)	Upper estimate
SDEIS (carbon dioxide only)	–\$12,468	–\$3,363	–\$1,624	\$1,920
SFEIS (carbon dioxide only)	–1,394	–197	253	457
SFEIS (carbon dioxide and methane)	–3,440	–964	–479	206

USDA reviewed the social cost of carbon and social cost of methane analyses contained in the SEIS. While USDA considered the full range of values presented in the analyses, it primarily focused on the 3% discount average rates for the upper and lower estimates.

USDA recognizes the provisional nature and uncertainties associated with efforts to characterize net benefits of this regulatory action. This is demonstrated by the differences in results used in the SDEIS and SFEIS (see Table 1). At the extreme, the estimated net benefits when excluding the social cost of methane emissions changed from –\$12.5 billion to –\$1.4 billion. These differences were due to a number of changes to future market and regulatory projections between the SDEIS and the SFEIS that include changes to assumptions used in the substitution analysis affected the estimates that were largely based on changes in energy markets:

- Electricity demand was revised downward;

- The natural gas supply assumption was revised, leading to lower gas prices;
- Coal supply was revised, leading to lower coal prices;
- Coal transportation costs were revised due to a higher diesel outlook; and

- The final Clean Power Plan is represented in the SFEIS while a proxy for the proposed Clean Power Plan was represented in the SDEIS.¹

The substantial differences in the estimates conducted only 6 months apart, in addition to the differences across production scenarios and discount rates, demonstrate the provisional nature of this type of analysis. The analysis of the costs of emissions impacts spans 50 years. Greater changes will likely occur during those 50 years in the context of energy

¹ The United States is currently defending the legality of the Clean Power Plan. *West Virginia v. Environmental Protection Agency*, No. 15–1363 (D.C. Cir.). On February 9, 2016, the U.S. Supreme Court stayed the Clean Power Plan pending judicial review before the D.C. Circuit Court of Appeals and any subsequent proceedings in the Supreme Court.

markets, policies for management of greenhouse gases, and new technologies affecting carbon dioxide output than have occurred over the last 6 months. For example, the Department of the Interior announced in January of 2016 it would undertake a broad, programmatic review of the Federal coal program as well as pause from holding lease sales, issuing coal leases, and approving lease modification, with exceptions, during the programmatic review (Dept. of the Interior Sec. Order No. 3338, Jan 15, 2016).

According to the U.S. Energy Information Administration, in 2014 coal provided 39% of U.S. electricity generation and 60% of Colorado's energy generation. The final rule reinstates the exception for temporary road construction and reconstruction within the North Fork Coal Mining area that would facilitate future coal exploration and potential development, which in turn preserves access to approximately 172 million short tons of coal. North Fork Valley coal meets the definition for compliant and super-

compliant coal, indicating the coal has high energy value and low sulfur, ash, and mercury content, making it desirable for generation of electricity. The final rule does not authorize any coal leasing, exploration, or development. These actions would only occur after additional environmental review, public involvement, and Agency decision-making.

The USDA, Forest Service, and State of Colorado maintain that coal production in the North Fork Coal Mining Area provides an important economic contribution and stability for the communities in the North Fork Valley. Employment and income are not considered measures of benefits (in the SEIS, nor in the 2012 analysis), but are a descriptor of distribution of potential impacts of the decision on local or regional economies and populations, consistent with Office of Management and Budget Circular A-4, and Forest Service Manual 1970 and Handbook 1909.17. The SEIS analyzed a study area most affected by mining operations in the North Fork Valley and indicates mining, including all other mining activities in addition to coal mining, could account for approximately 9,500 jobs and \$871 million in labor income (2013 dollars), depending on the number of mines operating in the area. Jobs in the mining sector typically show higher average labor income than both State and study area averages. The SFEIS estimates that implementation of this final rule could support approximately 410 to 1,050 direct jobs and 840 to 2,180 total jobs (direct, indirect, and induced), which could result in \$47 to \$67 million in direct labor income and \$122 to \$172 million in total labor income (direct, indirect, and induced). It is important to note that these economic impact figures are estimates based on available information and analytical assumptions that are subject to changes in coal and energy markets, policies for management of greenhouse gases, technological advancements, and other factors.

Almost half (49%) of mineral royalties collected by the Federal Government on coal leases go to the State in which the lease is located. Of the royalties paid in Colorado, 50% goes to public school funding and 10% funds the Water Conservation Board. The remaining 40% goes to local impact programs with half going directly to the counties and towns and the other half available through a grant program for local governments. The SFEIS estimates that implementation of the final rule could result in about \$6.8 million in Federal mineral royalties. However, any new

leases could undergo negotiations with the BLM and result in a lower royalty rate.

The USDA believes that the final rule is in the public interest because the North Fork Coal Mining Area and its temporary road construction exception strikes an appropriate balance between conserving roadless area characteristics and addressing the State's interest in not foreclosing opportunities for exploration and development of coal resources in the North Fork Valley. As the Colorado Department of Natural Resources noted in its comment letter on the proposed rule, this exception is "fundamental to this balance . . . to ensure that the coal mines in that area would be able to expand and continue to provide critical jobs for Coloradans." The North Fork Coal Mining Area exception applies to about 0.5% of CRAs. Its current size of 19,700 acres represents a substantial reduction of the 55,000-acre area originally proposed by the State of Colorado to be excluded from the Rule entirely. As noted in the District Court of Colorado's decision, the Colorado Roadless Rule is a product of "collaborative, compromise-oriented policymaking" and represents "a balance of important conservation interests with the also important economic need to develop natural resources in Colorado." This decision restores that balance.

USDA has given serious consideration to the potential environmental effects of this decision. This decision preserves the opportunity for subsequent coal exploration and development but does not represent an irreversible or irretrievable commitment of coal resources. Coal resources would not be leased or developed without additional environmental review, public involvement, and decision making.

The USDA considered Alternatives A and C for the final rule. However, Alternative A was not selected as the final rule because it does not meet the purpose of and need for the action to address the State's interest in not foreclosing opportunities for exploration and development of coal resources in the North Fork Coal Mining Area. Alternative C was not selected as the final rule because it provides fewer local economic benefits and makes less coal available than Alternative B.

Public Involvement

The Forest Service and cooperating agencies solicited public comments on the reinstatement of the North Fork Coal Mining Area exception through two public comment periods. The first comment period began on April 7, 2015, with the publication of the notice of

intent to prepare an SEIS in the **Federal Register**. The initial comment period ended on May 22, 2015, (45-day comment period), and approximately 119,400 letters were received. The second comment period began on November 20, 2015, with the publication of the notice of availability for the SDEIS in the **Federal Register**. This comment period ended on January 15, 2016, (45-day comment period with 11-day extension to allow for sufficient time to comment over the holiday season), and approximately 104,500 letters were received, with approximately 700 unique letters and the remainder were form letters. An additional 33,000 letters were received after the close of the comment period. In addition, two public open houses were held, one on December 7, 2015, in Paonia, Colorado, and one on December 9, 2015, in Denver, Colorado, to allow the public to ask questions and clarify information on the proposal to reinstate the North Fork Coal Mining Area exception.

Alternatives Considered

The Forest Service analyzed three alternatives in detail in the SEIS. Alternative A is the required no action alternative and reflects the continuation of current management. The District Court of Colorado vacated only the North Fork Coal Mining Area exception, leaving the remaining Colorado Roadless Rule intact. Currently the North Fork Coal Mining Area is being managed the same as non-upper tier acres with general prohibitions on tree cutting, sale, and removal; road construction/reconstruction; and use of linear construction zones within CRAs.

Alternative B, selected as the final rule, reinstates the North Fork Coal Mining Area exception as written in the 2012 Colorado Roadless Rule. It would apply the exception to about 19,700 acres, which varies from the 2012 North Fork Coal Mining Area by an additional 200 acres to align it with corrected CRA boundaries based on updated road inventory data.

Alternative C is similar to Alternative B in that it reinstates the North Fork Coal Mining Area exception as written in the 2012 Colorado Roadless Rule. The difference is that the North Fork Coal Mining Area boundaries would not include "wilderness capable" acres identified in the 2007 Draft GMUG Forest Plan revision effort per Alternative C. The exception would apply to about 12,600 acres.

All alternatives, including Alternative A, add the administrative boundary correction to CRA boundaries associated with the North Fork Coal Mining Area.

This correction is part of the final decision and will update the official CRA boundaries. The changes are based on road inventories utilizing global positioning systems of roads that existed prior to 2012 in the vicinity of the North Fork Coal Mining Area. The boundaries of the CRAs will be adjusted to match the actual location of the roads on the ground.

In addition to the alternatives analyzed in detail, the Forest Service also considered another 12 alternatives that were not carried into detailed analysis. These alternatives were raised during the public comment process and included:

- methane capture and use or reduction,
- carbon offset,
- carbon fee,
- limit of sale of North Fork coal to facilities using Integrated Gasification Combined Cycle or carbon capture/storage technologies,
- utilizing greenhouse gas and climate effects for determining the value of coal,
- energy efficiency measures and renewable energy,
- providing assistance to coal companies and local communities with switching to renewable energy,
- issuance of new leases based on bond obligations,
- requirement of an irrevocable bond,
- exclusion of the Pilot Knob CRA,
- increased upper tier acreage, and
- increased recreational opportunities.

Environmentally Preferable Alternative

The environmentally preferable alternative is the one that would best promote the national environmental policy as expressed in Section 101 of NEPA, 42 U.S.C. 4331. Generally, this means the alternative that causes the least damage to the biological and physical environment. It also means the alternative that best protects, preserves, and enhances the historic, cultural, and natural resources. In addition, it means the alternative that attains the widest range of beneficial uses of the environment without degradation, risk to health and safety, or other undesirable or unintended consequences.

Of the three alternatives analyzed in detail, Alternative A is the environmentally preferable alternative because it would likely result in the least environmental damage. However, Alternative A does not meet the purpose of and need for the action to address the State's interest in not foreclosing opportunities for exploration and development of coal resources in the North Fork Coal Mining Area.

Comments on the Proposed Rule

U.S. Forest Service received approximately 104,500 timely comments in response to the proposed rule and SDEIS. The Forest Service considered and responded to all substantive comments and modified its analysis as appropriate in the Final SEIS. However, the final rule remains the same as the proposed rule. The following section summarizes the major themes from comments received that suggested a change in the rule and the Agency response. Substantive comments not suggesting a change in the rule (that is, changes to analyses, alleged violation of laws, and so forth) are not included here and can be found in the Supplemental Final Environmental Impact Statement SFEIS, Appendix E.

Comment: The Forest Service should not rely on the BLM's methane rulemaking process to determine the Forest Service's policy on methane capture.

Response: The USDA believes the BLM's effort will provide valuable insight into development of sound public policy on mitigating the effects of waste mine methane. Therefore, the USDA is deferring this issue to the required environmental review that is performed when specific lands are being considered for leasing because the analysis will be better informed and more efficient by:

1. A site-specific proposal when unknown factors that influence the selection of potential capture systems are better known,
2. Agencies in charge of mine safety and mine operations can be consulted, and
3. Knowing the results of BLM's waste mine methane rulemaking effort.

Comment: The Forest Service must utilize the original purpose and need as articulated during scoping. The SDEIS purpose and need was arbitrarily modified and expanded to all CRAs and not just the North Fork Coal Mining Area.

If the Forest Service is going to rely on the arbitrarily modified purpose and need statement, then a broader range of alternatives needs to be developed to address protection of all CRAs.

Response: The purpose and need statements in the scoping notice and SDEIS are paraphrased from the 2012 FEIS. As stated on page 1 of the SDEIS, the purpose and need statement is the same as the 2012 purpose and need statement for the rule. To avoid confusion, the 2012 purpose and need statement is now included verbatim in the SFEIS.

Comment: There is no demonstrated need or immediate need for the exception. There is no demonstrated need for leaving the Pilot Knob Roadless Area in for potential coal exploration and development.

Response: The North Fork Coal Mining exception considers the future long-term opportunities for coal exploration and development, not just the current situation or short-term opportunities. The established legal and regulatory framework governing Federal coal resources has not changed; therefore, the USDA retains responsibility within context of these laws and regulations to manage the surface resources in areas where Federal coal occurs. The Colorado Roadless Rule addresses this established and on-going responsibility. Further, the USDA must honor its commitment to address the concerns of the State of Colorado for management of CRAs.

Comment: The bankruptcy of Arch Coal renders some or all of this proposal moot. It is not the Forest Service's job to prevent bankruptcies.

Response: The reinstatement of the North Fork Coal Mining Area exception is not for the benefit of any specific mining company. The State-specific concern is the stability of local economies in the North Fork Valley and recognition of the contributions that coal mining have provided in the past and may provide in the future to those communities.

The commenter is correct that it is not the role of the Forest Service to prevent bankruptcies of any individual company.

Comment: The North Fork Valley is not dependent on the coal industry, a major argument for the proposal.

Response: It is the position of the State of Colorado that providing the North Fork Coal exception provides a major benefit to the North Fork Valley. It was a concern expressed by the State of Colorado when it identified 55,000 acres in this area for exemption from coverage of the roadless rule. In addition, the SEIS highlights the total employment and labor income for the six-county study area as well as the State of Colorado in 2013 for major industry sectors. The largest study area industries in terms of employment include construction, retail trade, real estate, accommodation/food services, and government. In terms of labor income, the SEIS shows that mining, construction, manufacturing, information, transportation, and the government sectors all show higher average labor income than both the State and the study area total employment averages.

The estimated annual average economic impacts by alternative are displayed in the SEIS. Potential loss of jobs and associated labor income with no additional production associated with the North Fork Coal Mining Area have been disclosed. The energy market's fluctuations have been extensively discussed. The SEIS further recognized that layoffs have occurred within the study area for the coal mining, oil/gas, and dairy sectors, and the impact of the loss of direct jobs within any sector would be followed by changes to other sectors as the ripple effects of lost wages work their way through the economy. The SEIS also acknowledged that any new layoffs within a community can be difficult, from the directly affected workers, to real estate values and local school enrollment. Not all communities within the economic study area would be affected the same; for example, some communities have diversified economies, have attracted retiree populations, or are less dependent on coal mining. Those communities that are still dependent on coal mining would be most directly affected.

Comment: The Forest Service must evaluate an alternative that forecloses exploration and mining on some of the North Fork Coal Mining Area to conserve roadless character. Alternative C is not the only reasonable alternative that the Forest Service must analyze to provide the public and decision maker a range of reasonable alternatives.

The SDEIS fails to evaluate a range of reasonable alternatives as required by NEPA and case law.

Response: The Forest Service evaluated a total of 15 alternatives, which included three alternatives considered in detail (the no action alternative and two action alternatives) and 12 alternatives that were considered but eliminated from detailed study. As an SEIS, the scope of this analysis is narrowly focused on the reinstatement of the North Fork Coal Mining Area exception into the Colorado Roadless Rule. The purpose of the Rule is to conserve roadless area characteristics while accommodating State-specific concerns, which include not foreclosing exploration and development of coal resources in the North Fork Valley. The Colorado Roadless Rule is a landscape-level programmatic rule that addresses roadless areas and prohibits road construction and tree cutting. The Colorado Roadless Rule is not a coal-mining regulation but a regulation to manage CRAs. Therefore, many of the alternatives suggested through public comments that would regulate coal mining operations were dismissed from

detailed analyses. These alternatives are better considered when site-specific proposals are submitted and additional necessary information is known. At this time, 80% of the area has not been explored and little is known. Mining may or may not occur throughout the area. It is less speculative and more efficient and practical to evaluate these alternatives in subsequent environmental analyses.

One of the purposes of a range of alternatives is to sharply define the issues and provide a clear basis for choice among options by the decision maker and the public (40 CFR 1502.14). From a roadless conservation standpoint, the primary decision is if and how much the North Fork Coal Mining Area exception should apply to roadless areas under the 2012 Colorado Roadless Rule. The range of alternatives is adequate to define this issue and provides a clear basis for choice; in this case, whether to apply the exception to 0, 12,600, or 19,700 acres.

Comment: The SDEIS fails to evaluate mitigation measures as required by NEPA and case law. The SDEIS contains no mitigation measures, instead asserting measures can wait until later stages of analyses. Then there is no description of what those measures actually are. The SDEIS fails to evaluate alternatives and mitigation measures.

Response: As an initial matter, the Colorado Roadless Rule mitigates for the exceptions that accommodate the State-specific concerns. Specifically, the Colorado Roadless Rule added 409,500 acres into the roadless inventory that were not managed under the 2001 Roadless Rule; designated 1,219,200 acres as upper tier roadless lands where exceptions to tree cutting and road construction are more restrictive and limiting than the 2001 Roadless Rule; and restricted the use of linear construction zones, which were not restricted under the 2001 Roadless Rule. These features offset or mitigated the environmental impacts of the Colorado Roadless Rule exceptions, such as the North Fork Coal Mining Area exception, to provide a final rule that is more protective to CRAs than the 2001 Roadless Rule.

The Colorado Roadless Rule includes regulatory provisions to mitigate impacts of road construction within CRAs. Specifically:

- Within a native cutthroat trout catchment or identified recovery watershed, road construction will not diminish, over the long-term, conditions in the water influence zone and the extent of the occupied native cutthroat trout habitat (36 CFR 294.43(c)(2)(iv)).

- Watershed conservation practices will be applied to all projects occurring in native cutthroat trout habitat (36 CFR 294.43(c)(2)(v)).

- Conduct road construction in a manner that reduces effects on surface resources and prevents unnecessary or unreasonable surface disturbance (36 CFR 294.43(d)(1)).

- Decommission any road and restore the affected landscape when it is determined that the road is no longer needed for the established purpose prior to, or upon termination or expiration of a contract, authorization, or permit, if possible. Require the inclusion of a road decommissioning provision in all contracts or permits. Design decommissioning to stabilize, restore, and revegetate unneeded roads to a more natural state to protect resources and enhance roadless area characteristics (36 CFR 294.43(d)(2)).

Moreover, mitigation measures would be discussed and considered in connection with NEPA compliance at the project-specific stage. Listing of potential mitigation measures that would and could be applied to future coal mining activities and then describing what they are would be redundant, inefficient, and marginally useful at the rulemaking stage. Standard mitigation measures, performance standards, and reclamation requirements applied to coal mining activities by the Forest Service, BLM, Office of Surface Mining Reclamation and Enforcement, and the State of Colorado have proven to be sufficient to protect resources based on the condition of areas previously used for surface activities related to coal mining. Hundreds of standard mitigation measures are applied to mining operations and to describe all of them in this SEIS would be encyclopedic and detract from the primary reason for this SEIS, which is to decide whether or not temporary road construction should be allowed in the North Fork Coal Mining Area.

Comment: Methane flaring should be reconsidered because it is a safe practice, and would reduce 90% of methane emissions.

Response: The Agency reconsidered methane flaring, as well as other capture and reduction measures, and did not carry this alternative through detailed study (See Chapter 2, *Alternatives Considered but Eliminated from Detailed Study* section). Methane flaring (like capture) is best considered at the leasing stage when there is more information on the specific minerals to be developed and the lands that would be impacted by a flaring operation. This decision does not foreclose any future

lease stipulations related to methane capture and use or reduction. Temporary roads authorized under this exception may also be used for collecting and transporting coal mine methane, including any buried infrastructure, such as pipelines needed for the capture, collection, and use of coal mine methane.

In addition, making flaring a regulatory requirement for coal mining operations in the North Fork Coal Mining Area could be problematic because the Mine Safety and Health Administration could ultimately decide not to allow flaring if it determined it jeopardizes the safety of the miners. To date, the Mine Safety and Health Administration has not approved a flaring system for a coal mine in the Western United States. This could result in the coal mining company being required to flare by two agencies but not allowed to flare by another agency charged with miner safety, which would be inappropriate from the perspective of agency-to-agency coordination.

Comment: If an exception is being made for coal mining, then an exception should be made to allow companies to harvest dead and diseased trees in the area.

Response: Tree cutting, including the harvesting of dead and diseased trees, is generally prohibited in CRAs with limited exceptions. The Colorado Roadless Rule allows tree cutting in non-upper tier:

- within the first 0.5 mile of a community protection zone;
- within the first 0.5 to 1.5 miles of a community protection zone if a community wildfire protection plan identifies the area as a need for treatment;
- outside of a community protection zone if there is a significant risk to a municipal water supply;
- to maintain or restore ecosystem composition, structure, and processes;
- incidental to a management activity not otherwise prohibited by the Rule; or
- for personal or administrative use.

Just because an exception is made for temporary road construction for coal removal, it does not follow that an exception should be made for tree removal. The purpose of this rule is to amend the North Fork Coal Mining Area exception by addressing identified analysis deficiencies, not to expand the existing prohibitions or exceptions that have already been decided in the 2012 Colorado Roadless Rule.

Comment: The Roadless Rule is too restrictive. The rule leaves very little flexibility for safety, fire suppression, water demands, or forest health.

Response: The Colorado Roadless Rule has several other exceptions specifically designed to address fire and fuels, water supply, and forest health. The Rule balances the need to address these issues while conserving roadless area characteristics.

Comment: Please also consider allowing bikes on all (or most) trails. The original intent of wilderness was not to preclude human powered exploration of our forests, but rather to encourage it. This rule has been warped over the years and needs to be amended.

Response: This rulemaking does not propose any activity within designated Wilderness areas. The Wilderness Act prohibits mechanized use (including bicycles) in designated Wilderness Areas. The Colorado Roadless Rule only prohibits tree-cutting, sale, or removal and road construction or reconstruction—with some exceptions in CRAs. Mountain biking access is considered as a part of individual forests' travel management plans, but is not necessarily precluded from roadless areas.

Comment: Attempts to create de facto wilderness through alternate means such as removing "wilderness capable lands" from the North Fork Coal Mining Area are beyond the scope of this analysis. For this reason, we find Alternative C to be fatally flawed due to the inclusion of such a provision. We suggest that no special consideration be given to "wilderness capable lands" in any alternatives included in future versions of the SEIS.

Response: Recommendations for Wilderness under the 1982 forest planning regulations were processed through several screens to determine if an area was to be recommended. One of the first screens was "wilderness capable." The polygons identified to be removed from the North Fork Coal Mining Area in Alternative C did not pass through the next wilderness review screen to move forward. The SEIS states that removing these acres from the North Fork Coal Mining Area does not recommend them for Wilderness. The use of the term "wilderness capable" is only a mechanism to identify these lands that were requested for removal in a scoping comment for consideration as an alternative.

Comment: The process used to create the Colorado Roadless Rule revealed that much of the land identified as "roadless" were not in-fact roadless and had contained roads used for mining, grazing, and recreational vehicles. Once, reclamation is completed, there will be more roadless than there was before. As the roaded lands recover, they will serve as a carbon sink.

Response: It is correct that some of the CRAs once contained roads used for mining, grazing, recreation, and other uses. The basis of keeping the North Fork Coal Mining Area within the roadless inventory is recognition that areas with temporary roads can regain roadless character once roads are reclaimed and the area has had time to recover.

Comment: There is increasing pressure on National Forests and wilderness by summer campers and fall hunters seeking, naturalness, solace, isolation, and peace so more roadless areas are needed.

Response: About 29% of NFS lands in Colorado have been identified as roadless and are managed under the Colorado Roadless Rule. About 22% of NFS lands in Colorado have been congressionally designated as Wilderness. Activities in Wilderness are limited to non-motorized uses, while activities in roadless areas can be motorized, mechanized, as well as non-motorized uses. The final rule reasonably balances the multiple use mandate for use of NFS lands and conservation of roadless area characteristics.

Comment: The Pilot, Sunset, and Flatiron Roadless Areas were designated precisely because they meet the criteria for roadless areas and thus should not be opened up for an exception.

Response: During the Governor's petition process, the North Fork Coal Mining area was specifically identified as an area that many interest groups desired to see managed as roadless with an exception for temporary road construction for coal development. USDA evaluated this approach and determined that these lands are best managed as described in the final rule.

Comment: Mining operations should include mitigation strategies that will minimize the environmental impact.

Response: Coal mining operations are subject to performance standards, mitigation measures, and reclamation requirements set forth in the Surface Mining Control and Reclamation Act of 1977, as well as State-specific coal mining statutes, among other Federal and State laws. The Colorado Division of Reclamation, Mining and Safety ensures that coal mining operations in the state comply with these laws. In addition, under its legal and regulatory authority associated with coal leasing, the Forest Service applies mitigation measures in the form of lease stipulations when an application for a new coal lease or lease modification has been received. The Forest Service provides these mitigation measures (stipulations) to the BLM as a condition

of consent to lease (43 CFR 3425.3, 3432.3). At the permitting stage, the Forest Service also brings forward conditions within its jurisdiction to mitigate use and effects on NFS lands for the State to include in coal mine permits.

Comment: Regulatory authorities must conduct due diligence on the financial positions of present and future self-bond guarantors, particularly with respect to prior or duplicate encumbrance of their assets. If surface mine reclamation self-bonds are found to be secured by assets that will not be available in the event of a reclamation claim, State regulatory authorities must require alternative, collateralized financial assurance. The danger of effectively unsecured reclamation bonds is especially acute in a time of significant debt loads and shrinking coal markets.

Response: The State of Colorado administers reclamation bonds under its delegated Surface Mining Control and Reclamation Act authority from Office Surface Management Reclamation and Enforcement.

Comment: The Forest Service and Office of Surface Mining Reclamation and Enforcement should require all bonding as necessary to complete all future reclamation and restoration needs in the exception area considering the company's recent bankruptcy filing will not jeopardize the prior or future commitments to reclamation and restoration associated with any and all operations of the West Elk Mine. The Office of Surface Mining Reclamation and Enforcement has admitted that bonding is not high enough to complete remediation.

Response: Reclamation bonds are required and administered by the State of Colorado under its delegated Surface Mining Control and Reclamation Act authority from the Office Surface Mining Reclamation and Enforcement. It is inefficient and impractical for the Forest Service to engage in this analysis, which is focused on the prohibition of road construction/reconstruction and tree cutting within roadless areas.

Comment: The road construction will open up the area to off road activities. Temporary roads never stay temporary because of things like pipelines and management facilities. The temporary roads should be open to off road vehicles/motorcycles. The temporary roads should only be open to recreational access.

Response: The 2012 Colorado Roadless Rule is specific on future road use in order to maintain the roadless character of the CRAs. For any use of an exception that allows for a temporary

road, those temporary roads are not open to public travel. For further information, please see 36 CFR 294.43(c)(4):

Comment: A legally sufficient analysis would have found that Pilot Knob provides winter range for deer and bald eagles, and that it alone provides the only severe winter range for elk.

Response: The specialist reports, Biological Evaluation, and Biological Assessment for the 2012 Colorado Roadless Rule Final Environmental Impact Statement used explicit information about occurrence of wildlife and special status species by roadless area that were available at the time from accepted reputable sources, including Colorado Parks and Wildlife records, Colorado Natural Heritage Program, and Forest Service records. This included information similar to what the commenter describes for the roadless areas associated with the North Fork Coal Mining Area. The data did inform the evaluation of alternatives for the Colorado Roadless Rule. The Forest Service is unaware of substantial new information since that time for general fish and wildlife resources or concerns, whether for the larger roadless network or specifically for the North Fork exception area. Consequently, the evaluations in the SEIS focus on those species of plants and animals for which there was substantial new information since the 2012 rulemaking, specifically related to more recent Endangered Species Act listings and critical habitat designations affecting National Forests in Colorado. The Agency also reconsidered the effects of the roadless rule and North Fork Coal Mining Area exception and changed the 2012 determination for the endangered fishes of the Upper Colorado River. Wildlife-related concerns like the commenter identified will be addressed and mitigated as appropriate in future NEPA evaluations, forest plan consistency reviews, and Forest Service decisions. Site-specific information existing at the time a proposal is made to explore for or mine coal—which could be 50 years in the future—will better inform the analysis.

Comment: Rural areas could make a lot of money from drought resistant farming if we would fix our rail lines. Make Arch build more rail lines rather than more roads.

Response: The Forest Service is not familiar with the success of drought resistant farming on the privately held lands in and around the North Fork Valley. The Agency is not familiar with problems with the existing rail lines. It is not within the Forest Service's authority to make companies build

infrastructure that is outside the purview of the Forest Service.

Comment: The proposed action is not in the public interest because it would release climate pollution, waste methane, adversely impact the global economy and environment with billions in climate damages, degrade high elevation-forests and wildlife habitat, and benefit only one company—now bankrupt Arch Coal.

The new decision should be based on the SDEIS analysis and not the prior deals made. The SDEIS demonstrates the 2012 FEIS was wrong in its conclusion, and the Rule would have little impact on climate change.

Response: The Secretary of Agriculture or his designee considered the public interest, SFEIS, comments received on the SDEIS, and additional information contained in the project record, as needed, to determine whether to reinstate the North Fork Coal Mining Area exception.

Comment: Many commenters urged the selection of a certain alternative for multiple reasons. Support and opposition were voiced for all the alternatives presented in the SDEIS. The majority of comments urged the selection of Alternative A, the no action alternative, for a wide variety of reasons including, but not limited to:

- Adverse impacts to roadless areas, climate change, local real estate values, wildlife habitat, listed species, recreation values, and human health/safety;
- Ecosystem services are greater than the benefits of the coal;
- Social cost and damage to the global environment;
- Contribution to social unrest;
- Undermining of the renewable energy industry;
- Coal is available elsewhere;
- Lack of rationale presented in the SDEIS for selection of an action alternative; and
- Lack of need.

Reasons commenters gave for the selection of Alternative B included, but were not limited to:

- The multi-year collaborative effort to develop the 2012 final rule;
- Mining jobs are among the highest paying jobs in the area;
- Quality of North Fork Valley coal;
- Impacts to local economies; and
- U.S. energy needs.

Reasons commenters gave for selection of Alternative C included, but were not limited to: It protects the most sensitive and wilderness capable areas while providing economic opportunities, and protects nearly as much resources as Alternative A.

Response: The Secretary of Agriculture or his designee considered

the public interest, SFEIS, and comments received on the SDEIS, and additional information contained in the project record, as needed, to determine whether to reinstate the North Fork Coal Mining Area exception.

Regulatory Certifications

Regulatory Planning and Review

When the proposed rule was circulated for public comment, USDA identified that it had been designated as a non-significant regulatory action under Executive Order 12866. USDA consulted with the Office of Management and Budget (OMB) during the preparation of the final rule, and OMB determined that the regulation was economically significant. The SFEIS includes a detailed benefit-cost analysis.

Regulatory Flexibility Act and Consideration of Small Entities

The USDA certifies that the final regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities as determined in the 2012 Regulatory Flexibility Analysis because the final rule does not subject small entities to regulatory requirements. Therefore, notification to the Small Business Administration's Chief Council for Advocacy is not required pursuant to Executive Order 13272.

Energy Effects

The Colorado Roadless Rule and the North Fork Coal Mining Area exception do not constitute a "significant energy action" as defined by Executive Order 13211. No adverse effects to supply, distribution, or use of energy are anticipated beyond what has been addressed in the 2012 FEIS or the Regulatory Impact Analysis prepared in association with the final 2012 Colorado Roadless Rule. The reinstatement of the North Fork Coal Mining Area exception does not restrict access to privately held mineral rights, or mineral rights held through existing claims or leases, and allows for disposal of mineral materials. The final rule does not prohibit future mineral claims or mineral leasing in areas otherwise open for such. The rule provides a regulatory mechanism for consideration of requests for modification of restriction if adjustments are determined to be necessary in the future.

Federalism

The USDA has determined that the final rule conforms to the Federalism principles set out in Executive Order 13132 and does not have Federalism implications. The rule would not

impose any new compliance costs on any State, and the rule would not have substantial direct effects on States, on the relationship between the National Government and the States, nor on the distribution of power and responsibilities among the various levels of government.

The final rule is based on a petition submitted by the State of Colorado under the Administrative Procedure Act at 5 U.S.C. 553(e) and pursuant to USDA regulations at 7 CFR 1.28. The State's petition was developed through a task force with local government involvement. The State of Colorado is a cooperating agency pursuant to 40 CFR 1501.6 of the Council on Environmental Quality regulations for implementation of NEPA.

Takings of Private Property

The USDA analyzed the final rule in accordance with the principles and criteria contained in Executive Order 12630. The Agency determined that the final rule does not pose the risk of a taking of private property.

Civil Justice Reform

The USDA reviewed the final rule in context of Executive Order 12988. The USDA has not identified any State or local laws or regulations that are in conflict with this final rule or would impede full implementation of this rule. However, if this rule were adopted, (1) all State and local laws and regulations that conflict with this rule or would impede full implementation of this rule would be preempted; (2) no retroactive effect would be given to this rule; and (3) this rule would not require the use of administrative proceedings before parties could file suit in court.

Executive Order 13175/Tribal Consultation

This final rule has been reviewed in accordance with the requirements of Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments". Executive Order 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

The Forest Service has assessed the impact of this final rule on Indian tribes and determined that this rule does not,

to our knowledge, have tribal implications that require consultation under E.O. 13175. If a Tribe requests consultation, the Forest Service will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified herein are not expressly mandated by Congress.

Unfunded Mandates

The USDA has assessed the effects of the Colorado Roadless Rule on state, local, and tribal governments and the private sector. This rule does not compel the expenditure of \$100 million or more by State, local, or tribal governments, or anyone in the private sector. Therefore, a statement under section 202 of title II of the Unfunded Mandates Reform Act of 1995 is not required.

Paperwork Reduction Act

This final rule does not call for any additional recordkeeping, reporting requirements, or other information collection requirements as defined in 5 CFR 1320 that are not already required by law or not already approved for use. The rule imposes no additional paperwork burden on the public. Therefore the Paperwork Reduction Act of 1995 does not apply to this proposal.

List of Subjects in 36 CFR Part 294

National Forests, Recreation areas, Navigation (air), State petitions for inventoried roadless area management.

For the reasons set forth in the preamble, the Forest Service amends part 294 of title 36 of the Code of Federal Regulations as follows:

PART 294—SPECIAL AREAS

Subpart D—Colorado Roadless Area Management

- 1. The authority citation for part 294, subpart D, continues to read as follows:

Authority: 16 U.S.C. 472, 529, 551, 1608, 1613; 23 U.S.C. 201, 205.

- 2. In § 294.43, revise paragraph (c)(1)(ix) to read as follows:

§ 294.43 Prohibition on road construction and reconstruction

(c) * * *

(1) * * *

(ix) A temporary road is needed for coal exploration and/or coal-related surface activities for certain lands with Colorado Roadless Areas within the North Fork Coal Mining Area of the Grand Mesa, Uncompahgre, and Gunnison National Forests as defined by the North Fork Coal Mining Area displayed on the final Colorado

Roadless Areas map. Such roads may also be used for collecting and transporting coal mine methane. Any buried infrastructure, including pipelines, needed for the capture, collection, and use of coal mine methane, will be located within the rights-of-way of temporary roads that are otherwise necessary for coal-related surface activities including the installation and operation of methane venting wells.

* * * * *

Robert Bonnie,

Under Secretary, Natural Resources and Environment.

[FR Doc. 2016–30406 Filed 12–16–16; 8:45 am]

BILLING CODE 3411–15–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 35

[EPA–HQ–OW–2016–0569; FRL–9953–24–OW]

RIN 2040–AF63

Credit Assistance for Water Infrastructure Projects

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule; request for comments.

SUMMARY: The Environmental Protection Agency (EPA) is issuing an interim final rule to implement a new program authorized under Subtitle C of the Water Resources Reform and Development Act of 2014 (WRRDA), which is referred to as the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA). WIFIA authorizes EPA to provide secured (direct) loans and loan guarantees to eligible water infrastructure projects. Projects will be evaluated and selected by the Administrator of the EPA based on criteria set out in this rule using weightings established in a separate Notice of Funding Availability (NOFA). Following project selection, individual credit agreements will be developed through negotiations between the project sponsors and EPA. EPA is soliciting comments on an interim final rule that establishes the guidelines for the new credit assistance program for water and infrastructure projects and the process by which EPA will administer such credit assistance. The interim final rule primarily restates and clarifies statutory language while establishing approaches to specific procedural issues left to EPA's discretion. This interim final rule pertains to a matter involving a federal

loan and loan guarantee program and is therefore exempt from the rulemaking requirements of the Administrative Procedure Act. As such, EPA is issuing this rule as interim final.

DATES: Effective December 19, 2016.

Comments must be received on or before February 17, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OW–2016–0569, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa.dockets>.

 - L. National Environmental Policy Act
 - M. Congressional Review Act

I. Background

Congress enacted the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA) as part of the Water Resources Reform and Development Act of 2014, as amended by sec. 1445 of Public Law 114–94¹ and codified at 33 U.S.C. 3901–3914. WIFIA establishes a new federal credit program for water infrastructure projects to be administered by EPA.

Congress authorized EPA to provide federal credit assistance through WIFIA in the form of loans or loan guarantees to eligible entities: Corporations; partnerships; joint ventures; trusts; Federal, State, or local governmental entities, agencies, or instrumentalities; tribal governments or consortiums of tribal governments; or State infrastructure finance authorities.

WIFIA authorizes EPA to provide assistance for a wide variety of projects.

¹ Section 1445 of Public Law 114–94 amends WIFIA by deleting 33 U.S.C. 3907(a)(5) which prohibited EPA from providing credit assistance to a project financed (directly or indirectly) by the proceeds of a tax-exempt obligation.

Eligible projects, as defined in 33 U.S.C. 3905, include:²

- Projects eligible under the Clean Water and Drinking Water State Revolving Fund Programs (SRFs);
- Projects for enhanced energy efficiency in the operation of a public water system or a publicly owned treatment works;
- Projects for repair, rehabilitation, or replacement of a treatment works, community water system, or aging water distribution or waste collection facility (including a facility that serves a population or community of an Indian reservation);
- Brackish or sea water desalination projects;
- Managed aquifer recharge or water recycling projects;
- Acquisition of real property or an interest in real property if the acquisition is integral to an already eligible project or pursuant to an existing plan that, in the judgment of the Administrator, would mitigate the environmental impacts of water resources infrastructure projects otherwise eligible for assistance; and
- A combinations of projects submitted to EPA by an SRF program under a single application; and
- A combination of projects secured by a common security pledge for which there is a single application.

Sections 3902, 3905, and 3907 of title 33, U.S.C., describe the conditions that govern a project's eligibility under WIFIA. Generally, projects must have eligible costs of not less than \$20 million. However, for projects eligible for assistance under categories (1) or (2) below (*i.e.*, SRF eligible projects), that serve a community of not more than 25,000 individuals, eligible project costs must be no less than \$5 million. The types of projects eligible for assistance are listed in 33 U.S.C. 3905 and are also summarized below in 40 CFR 35.10005(m).

II. Water Infrastructure Needs and Current Sources of Financing

In the United States, localities are primarily responsible for providing water infrastructure services and funding these services through user fees. Today, some communities face formidable challenges in providing adequate and reliable water infrastructure services. Existing water infrastructure in some of these

communities is aging, and investment is not always keeping up with the needs. As described in greater detail below, EPA estimates the national funding need for capital improvements for such facilities totals approximately \$660 billion over the next 20 years.³ In many cases, meeting these needs will require significant increases in capital investment.

Water infrastructure capital projects are typically funded with pay-as-you-go or debt financed through the municipal bond market. The U.S. Conference of Mayors estimates that in 2008, local governments invested \$93 billion in their water systems, of which 40% went to capital investments, with the remainder for operations and maintenance.⁴ In 2014, municipal bond issuance for water and sewer projects totaled \$31.9 billion according to the Securities Industry and Financial Markets Association (SIFMA). Total municipal bond issuance in 2014 was \$314.9 billion, of which \$28.2 billion was tax-exempt.⁵ From 2003 through 2012, tax-exempt financing for water and sewer facilities totaled \$258 billion.⁶ While a summary of bond ratings for water and sewer debt is not available, a 2014 analysis of outstanding municipal market debt shows that 19 percent of issues were rated BBB or below, or were unrated.⁷ As such, the potential market for lower-rated investment-grade municipal borrowers, which could benefit most from WIFIA, is significant.

After pay-as-you-go and bonds, the next largest source of water infrastructure financing are the Clean Water State Revolving Fund (CWSRF) and Drinking Water State Revolving Fund (DWSRF) programs. The SRFs are state-operated finance programs that receive capitalization grants from EPA. These capitalization grants, combined with required state match and loan repayments with interest, allow the SRFs to provide a far greater amount of assistance annually than the amount appropriated for the programs. The SRFs provided \$7.9 billion in assistance

to projects across the country in 2015.⁸ In addition, communities also received water infrastructure funding through at least two other federal agencies in 2015. The Department of Housing and Urban Development authorized \$333.4 million in block grants to communities for water infrastructure projects, and the United States Department of Agriculture (USDA) approved \$1.5 billion in grants and loans for small communities.

EPA's 2012 Clean Watersheds Needs Survey (CWNS)⁹ estimated that the total capital wastewater and stormwater treatment and collection needs for the nation are \$271 billion as of January 2012. The CWNS does not represent all needs for the 20-year period from January 2012 through December 2031. Because states often do not have documentation that demonstrates needs that far into the future, nearly all needs included in the CWNS are for projects that will be completed within 5 years (*i.e.*, 2012–2017) and are documented in capital improvement plans and other short term planning documents. Needs without existing independent documentation are not included in the CWNS. In addition, the CWNS does not include information about privately owned wastewater facilities, projects on tribal lands, and operations and maintenance needs. Stormwater management needs are also underestimated due to not all states reporting in this category. For these reasons, actual 20 year needs are likely to be significantly higher.

EPA's 2011 Drinking Water Infrastructure Needs Survey (DWINS)¹⁰ estimates a total capital drinking water infrastructure need of \$384.2 billion for the 20-year period from January 2011 through December 2030. This estimate includes needs for American Indian and Alaska Native Village systems. Like the CWNS, this figure does not represent all of the needs. The scope of the survey is limited to those needs eligible to receive DWSRF assistance—thus excluding some capital projects, including projects related primarily to future population growth. Moreover, needs for which no independent documentation exists are represented in the DWINS by default values which are conservative. The DWINS does not include operations and maintenance needs.

Other studies report significantly larger estimates of needs. For example, the American Society of Civil Engineers estimates approximately 240,000 water

² Projects described by 33 U.S.C. 3905(1) are not eligible for purposes of the WIFIA program as operated by EPA. Section 3902(b)(2) specifies that EPA can provide WIFIA assistance to all eligible projects categories except for (1). The Army Corps of Engineers is responsible for establishing a WIFIA program that provides assistance to such projects.

main breaks annually.¹¹ The American Water Works Association estimates that \$1 trillion is needed to restore existing distribution system pipe at the end of its useful life and to expand pipe networks to meet growing population needs between 2011 and 2035.¹²

The Administration has pointed to an increased need for infrastructure financing through its Build America Initiative. In its initial report, the Department of Treasury noted that “increasing fiscal pressures at all levels of government have led to reduced commitments for infrastructure and a greater reliance on debt financing, which, in turn, has contributed to increased debt ratios and reduced debt service coverage levels for certain issuers. At the same time, stagnant economic growth and absence of support for new or increased user fees have curtailed increased debt capacity among many issuers.”¹³ The Build America Initiative aims to make infrastructure financing more affordable and to encourage innovative financing and public-private partnerships.

As suggested by the estimated size of national water infrastructure needs, currently available funding sources are not sufficient. SRF programs under the Clean Water Act and Safe Drinking Water Act are designed to primarily provide a benefit to smaller projects, typically under \$100 million, in communities that often have limited access to funding. There is a large segment of need associated with projects that the SRFs cannot fund due to project size or ownership. The average CWSRF wastewater treatment project is \$3.5 million, while the average DWSRF project is \$2.4 million. According to the most recent data, states issued only 180 CWSRF loans over \$50 million, and 35 of those were over \$100 million, out of over 14,000 loans issued since 2004. Since 2009, states issued only 20 DWSRF loans over \$50 million, and ten of those were over \$100 million, out of over 6,700 loans.¹⁴ Private wastewater treatment facilities are not eligible for most CWSRF financing.

Bond-financing requires strong debt service coverage to benefit from low

interest rates and long tenors. In addition, private entities generally cannot access the tax-exempt bond market. Finally, grant funding and USDA loans are targeted at specific underserved sectors and are generally less applicable to large projects.

Similar to large-scale transportation projects, the financing of large water infrastructure projects can be addressed through the use of several financing tools and techniques that, when combined, can result in a highly efficient capital structure that minimizes the financial impact on system users. WIFIA will assist in delivering on these needs in the water sector. It is in a position to promote the use of public-private partnerships in this area by reducing the cost of private participation. At the same time, WIFIA will have limited impact on the municipal bond market. Total municipal bond issuance was \$314.9 billion in 2014, of which water infrastructure accounted for 10%. Even if WIFIA is able to provide \$1 billion annual assistance, it will account for approximately 3% of the market for water infrastructure bonds such that the program is not expected to impact the municipal bond market.

III. Program Information

A. Funding

The Federal Credit Reform Act of 1990 (FCRA) requires agencies to estimate the long-term cost of providing a direct loan or loan guarantee on a present value basis, and requires that an agency have the necessary budget authority appropriated to the agency before entering into an obligation for a loan or loan guarantee. Section 3912(a) of WIFIA authorizes annual amounts to be appropriated for the cost of loans or loan guarantees in FY2015 through FY2019. However, to date no annual appropriations have been provided for the cost of loans or loan guarantees under WIFIA. EPA will not know the amount of budget authority that will be available until it is appropriated.

B. Applicant Eligibility

Section 3904 of title 33, U.S.C., defines entities that are eligible for WIFIA assistance. To be eligible, an applicant must be one of the following:

1. A corporation;
2. A partnership;
3. A joint venture;
4. A trust;
5. A federal, state, or local

governmental entity, agency, or instrumentality;

6. A tribal government or consortium of tribal governments; or

7. A state infrastructure financing authority.

C. Project Eligibility

Section 3905 of title 33, U.S.C., defines projects eligible for assistance. To be eligible, a project must fall under one of the following categories:

1. One or more activities that are eligible for assistance under section 603(c) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c)), notwithstanding the public ownership requirement under paragraph (1) of that subsection.

2. One or more activities described in section 1452(a)(2) of the Safe Drinking Water Act (42 U.S.C. 300j–12(a)(2)).

3. A project for enhanced energy efficiency in the operation of a public water system or a publicly owned treatment works.

4. A project for repair, rehabilitation, or replacement of a treatment works, community water system, or aging water distribution or waste collection facility (including a facility that serves a population or community of an Indian reservation).

5. A brackish or sea water desalination project, a managed aquifer recharge project, or a water recycling project.

6. Acquisition of real property or an interest in real property—

- a. If the acquisition is integral to a project described in paragraphs (1) through (5); or

- b. Pursuant to an existing plan that, in the judgment of the Administrator, would mitigate the environmental impacts of water resources infrastructure projects otherwise eligible for assistance under this section.

7. A combination of projects, each of which is eligible under paragraph (1) or (2), for which a State infrastructure financing authority submits to the Administrator a single application.

8. A combination of projects secured by a common security pledge, each of which is eligible under paragraph (1), (2), (3), (4), (5), or (6), for which an eligible entity, or a combination of eligible entities, submits a single application.

D. Threshold Criteria Required by Statute

The WIFIA statute contains the following requirements, as paraphrased below, that do not require interpretation and are restated in the rule without further explanation:

- Public or private applicants for credit assistance will be required to submit applications to EPA in order to be considered for approval.
- Project financing shall be repayable, in whole or in part, from State or local

¹³ U.S. Department of the Treasury Office of Economic Policy. “Expanding our Nation’s Infrastructure through Innovative Financing.” September 2014.

¹⁴ Collection of project specific data began in 2004 for the CWSRF program and 2009 for the DWSRF program.

taxes, user fees, or other dedicated revenue sources that also secure the senior project obligations of the project; shall include a rate covenant, coverage requirement, or similar security feature supporting the project obligations; and may have a lien on revenues subject to any lien securing project obligations;

- In the case of a project that is undertaken by an entity that is not a State or local government or an agency or instrumentality of a State or local government, or a tribal government or consortium of tribal governments, the project that the entity is undertaking must be publicly sponsored. Public sponsorship means that the recipient can demonstrate, to the satisfaction of the Administrator, that it has consulted with the affected state, local, or tribal government in which the project is located, or is otherwise affected by the project, and that such government supports the proposed project. Support can be shown by a certified letter signed by the approving municipal department or similar agency, mayor or other similar designated authority, local ordinance, or any other means by which local government approval can be evidenced.

- To be eligible for financing, a prospective borrower must have developed an operations and maintenance plan that identifies adequate revenues to operate, maintain, and repair the project during its useful life.

Further detail will be available in a program handbook that will be posted on the WIFIA program public Web site.

E. Application Process

For each fiscal year for which credit assistance is made available by Congress, EPA will publish a NOFA in the **Federal Register** to solicit letters of interest for credit assistance. EPA will also publish the NOFA on the WIFIA program Web site, at www.epa.gov/wifia. The notice will provide detailed instructions for submitting letters of interest and applications, as well as the respective due dates for submissions. It will advise prospective borrowers of the estimated amount of funding available to support WIFIA credit instruments and information required in a letter of interest and application.

The application process has two steps. The first step requires the submission of a letter of interest prior to the deadline set out in the NOFA. Then, projects selected by EPA to continue in the application process will be invited to submit an application. EPA will only select those projects that it expects might reasonably proceed to closing.

The Letter of Interest has four primary purposes: (i) Validate the eligibility of the prospective borrower and the proposed project, (ii) perform a preliminary creditworthiness assessment, (iii) perform a preliminary engineering feasibility assessment, and (iv) evaluate the project against the selection criteria and identify which projects EPA will invite to submit applications. The Letter of Interest addresses the WIFIA eligibility criteria, WIFIA selection criteria, and identifies other specific information that must be provided to EPA to be considered for credit assistance. This serves to familiarize EPA with basic information relating to the project and the prospective borrower.

The Letter of Interest will require items such as:

1. *Prospective Borrower Information:* The Letter of Interest should describe the proposed obligor's organizational structure, identify the entity that will serve as the applicant, list other significant members of the project team, describe the proposed obligor's relationship to subsidiaries or affiliates, if any, and provide a Web site link where additional information can be found.

2. *Project Plan:* The Letter of Interest should describe the project, including its location, population served, purpose, design features, estimated capital cost, and development schedule. The prospective borrower will also describe how the project fits into one of the eight project types eligible for assistance under WIFIA. The Letter of Interest also requests inclusion of any other relevant information that could affect the development of the project, such as community support, pending legislation, or litigation. The Project Plan section will also serve to summarize the status of the project's environmental review, engineering report, and other approvals necessary to the project.

3. *Project Operations and Maintenance Plan:* The Letter of Interest should describe the project's plan for operating, maintaining, and repairing the project post-completion, and discuss sources of revenue used to finance these activities.

4. *Financing Plan:* The Letter of Interest should include the proposed sources and uses of funds for the project and state the type and amount of credit assistance to be sought from EPA. The discussion of proposed financing should also identify the source(s) of revenue or other security that would be pledged to the WIFIA assistance. Additionally, this section should describe the credit characteristics of the project and how

the senior obligations of the project will achieve an investment-grade rating. The Letter of Interest should also include a summary financial pro forma and up to three years' audited financial statements, if available.

5. *Selection Criteria:* The Letter of Interest should describe the potential benefits to be achieved through the use of WIFIA assistance with respect to each of the WIFIA selection criteria.

6. *Contact Information:* The Letter of Interest should identify the point of contact with whom EPA should communicate regarding the Letter of Interest. For the purpose of completing its evaluation, EPA staff may contact a prospective borrower regarding specific information in the Letter of Interest.

7. *Certifications:* The prospective borrower will certify that it will abide by all applicable laws and regulations.

8. *Notification of State Infrastructure Financing Authority:* The interested party will acknowledge that EPA will notify the appropriate State infrastructure financing authority in the State in which the project is located that the prospective borrower submitted this letter of interest; and provide the submitted letter of interest and source documents with it to that State infrastructure financing authority.

Selected interested parties will be invited to submit an application to EPA. The purpose of the application is to provide EPA with materials necessary to underwrite the proposed WIFIA assistance. The application will require items such as:

1. *Detailed Applicant Information:* The applicant will submit information identifying and describing the applying organization, including the applicant's organizational structure, and the applicant's legal authority to apply for WIFIA credit assistance and undertake the project. The applicant will also have to demonstrate its ability to execute the project through past experiences and qualifications of its personnel.

2. *Detailed Project Information:* Materials submitted under this section will detail the applicant's plan for project construction, projected over several years, to include a description of the facility to be built, including design features, and the intended purpose. The applicant will also submit a project management and compliance monitoring plan, including the project construction timeline, and an assessment of the costs expected at each point in the timeline. The applicant will also submit an analysis of the risks that may be encountered during construction, and steps that will be undertaken to minimize those risks. The

applicant will also submit draft or final bid documents.

3. *Detailed Operations and Maintenance Plan:* In this section, the applicant will submit materials supporting the applicant's plan to operate the project after construction. This plan should include an operation and maintenance plan for the tenor of the WIFIA assistance, including an estimate of the associated costs. The applicant should also submit materials describing contractual arrangements that the applicant has already made, or plans to make.

4. *Comprehensive Financing Plan:* The applicant will need to submit a comprehensive plan describing how the project will be financed, and how financing will be repaid over the tenor of the requested WIFIA assistance. This will include a detailed financial model, the sources and seniority of other financing, a description of the dedicated sources of repayment, rate covenants, and security for the proposed credit assistance. The applicant will also submit a preliminary rating letter indicating the possibility of the project's senior obligations obtaining an investment-grade rating from a NRSRO.

5. *Final Certifications:* The applicant will certify that it will abide by all applicable laws and regulations.

This two-step process limits the time, cost and effort required by prospective borrowers prior to having a reasonable expectation of potential WIFIA funding. EPA plans to develop detailed application information contained in a program handbook and will post it on the WIFIA program public Web site at the time of solicitation for letters of interest. EPA welcomes comment on this application process.

F. Creditworthiness

By statute, at 33 U.S.C. 3907(a)(1), the Administrator must determine that every funded project is creditworthy. Therefore, an overarching goal of the creditworthiness determination process is to ensure that each project that is ultimately offered credit assistance advances the WIFIA Program's mission while providing a level of risk exposure that is suitable to EPA. To that end, the WIFIA Program will evaluate applications for financial assistance based on prudent lending practices for the long-term holding of an illiquid asset. The creditworthiness determination will be based on a review of the following:

- Terms, conditions, financial structure, and security features of the proposed financing;
- Dedicated revenue source(s) securing the financing;

- Financial assumptions surrounding the proposed project;
- Financial soundness and credit history and outlook of the borrower; and
- Technical merits and engineering risks of the proposed financing.

Further information will be available in the WIFIA program handbook.

G. Coordination With SRF Programs

In order to promote coordination between the SRF programs and the WIFIA program, the statute includes procedures on the use of existing funding mechanisms. The statutory procedure requires notification by EPA to the relevant state SRF program of the receipt of applications for SRF-eligible projects. Such notification must occur within 30 days of the receipt of an application submitted to the WIFIA program office. Under the statute, the notified SRF program has 60 days to formally declare an intent to fund the project in the program's intended use plan, in place of EPA in an amount equal to or greater than the amount requested in the WIFIA application. If such a declaration is made, EPA may not provide assistance to the project under WIFIA unless the SRF program fails to provide assistance within 180 days from the date of notification or the terms are less favorable than those offered by the WIFIA program.

Those administering SRF programs have expressed concern that the amount of time within which they must receive and review SRF applications and make funding decisions regarding these applications is too short. EPA will therefore provide notice to SRF programs within 30 days of the receipt of a letter of interest. Such notice will include the letter of interest and supporting documentation provided by the prospective borrower. The letter of interest includes a notice to interested parties explaining the notification procedure and allows the prospective borrower to request that EPA not share the letter of interest with the SRF program, though the SRF program will still be notified of the submission, as required by statute. Providing initial notification within 30 days of the receipt of a letter of interest, as opposed to the application, will provide additional time for SRF programs to communicate with the prospective borrower, for the prospective borrower to apply to the SRF program, for funding decisions to be made, and for a formal declaration of the intent to fund the project with a SRF loan to be made.

EPA welcomes comment on providing notification to SRF programs at an earlier time than required by the statute. Though not addressed through this

implementation rule, EPA also welcomes suggestions on the content of the notification to SRF programs.

H. Fees

Sections 3908(b)(7), 3909(b), and 3909(c)(3) of 33 U.S.C., allow EPA to collect user fees from applicants to defray some or all of the costs associated with administering the program. A separate proposed rule governing applicant fees can be found in the docket for the rule at EPA-HQ-OW-2016-0568. While each rule has a separate process for comments, EPA is aware that the similar timelines for comment and the relationship between the two rules may cause confusion. Therefore, in the event that comments are received for this rule under the heading of the fee rule, or vice versa, EPA will consider all comments and respond accordingly. EPA will not be able to collect user fees until the user fee rule is finalized.

I. Credit Assistance

Two types of credit instruments are permitted under WIFIA: Secured (direct) loans and loan guarantees. General rules concerning the terms governing these credit instruments appear at 33 U.S.C. 3908 and 3909. More specific terms will be determined on a project-specific basis during negotiations between EPA and successful applicants.

In general, WIFIA limits the amount of credit assistance that may be provided to a project to not more than 49% of reasonably anticipated eligible project costs. However, the statute authorizes EPA to use up to 25% of its budget authority appropriated through Fiscal Year 2019 to provide credit assistance to one or more projects of up to no more than 80% (statutory cap on federal participation) of the total costs of any given project. EPA will use its budget authority to provide credit assistance greater than 49% of eligible project costs (*i.e.*, up to 80% of the total project costs) only in extraordinarily exceptional circumstances, such as where a project would be unable to proceed to closing absent such additional assistance due to unforeseen events. Unforeseen events that could prevent a project from going to closure may include, but are not limited to: Unexpected cost revisions, unexpected loss of other sources of financing, increased cost of capital, or acts of nature. In such an event, EPA will reexamine the creditworthiness of the project and only provide funding if the project can still meet all requirements of the program. Such a limitation is necessary because the amount of budget

authority that may be used for such purposes is limited and the use of such authority reduces the agency's ability to support other projects. EPA will not entertain requests for use of this authority in a letter of interest or application.

Costs incurred prior to a project sponsor's submission of an application for credit assistance may be considered in calculating eligible project costs only upon approval by EPA. Prospective borrowers may not include application charges or any other expenses associated with the application process (such as charges associated with obtaining the required preliminary rating opinion letter, as discussed below) in the total project cost, as these expenses are not eligible activities per 33 U.S.C. 3906. No costs financed internally or with interim funding may be refinanced later than 1 year following substantial completion of the project.

EPA will not obligate funds for a project that has not received an environmental Categorical Exclusion, Finding of No Significant Impact, or Record of Decision under the National Environmental Policy Act (NEPA).

For planning purposes, and as is standard in construction loan agreements, the credit agreement will include the anticipated schedule for loan disbursements. However, actual disbursements will be based on costs incurred in accordance with the approved construction plan, as evidenced by paid invoices. This requirement protects EPA in the event of non-performance and is typical of most federal loans and grants.

As required by statute, the interest rate on a secured loan will be equal to or greater than the yield on U.S. Treasury securities of comparable maturity on the date of execution of the credit agreement. The base interest rate can be identified through use of the daily rate tables published by the Bureau of the Fiscal Service for the State and Local Government Series (SLGS) investments. The WIFIA program will estimate the yield on comparable Treasury securities by adding one basis point to the SLGS daily rate with a maturity that is closest to the weighted average loan life of the WIFIA credit assistance, measured from first disbursement.

As allowed by statute at 33 U.S.C. 3908(c)(2), scheduled loan repayments of principal or interest on a secured loan will commence not later than 5 years after the date of substantial completion of the project. However, scheduled loan repayments of principal or interest on a secured loan to a State infrastructure financing authority will commence not

later than 5 years after the date on which amounts are first disbursed.

As required by statute, the final maturity date of a secured loan will be the earlier of the date that is 35 years after the date of substantial completion of the project, or if the useful life of the project is less than 35 years, the useful life of the project. However, the final maturity date of a secured loan to a State infrastructure financing authority will be not later than 35 years after the date on which amounts are first disbursed. In determining the useful life of the project, for the purposes of establishing the final maturity date of the WIFIA credit instrument, the Administrator will consider the useful economic life of the asset(s) being financed, as required under OMB Circular A-129.

As required by statute, EPA's Federal credit instrument may have a junior claim to other debt issued for the project in terms of its priority interest in the project's pledged security. However, EPA's claim on assets will not be subordinated to the claims of other creditors in the event of a default leading to bankruptcy, insolvency, or liquidation of the obligor. The EPA's interest may include collateral other than pledged revenues. EPA welcomes comment on its restricted use of the authority to provide credit assistance greater than 49% of eligible project costs and policy on reimbursing project costs financed internally or through interim funding.

J. Small Community Set-Aside

Each fiscal year for which budget authority is made available by Congress, as required by statute, EPA will set aside at least 15% of its appropriated budget authority for projects that serve communities of no more than 25,000 individuals. The statute requires that set-aside budget authority be obligated to small communities prior to the first day of June each year, after which the budget authority will be made available to all other projects. Small communities are eligible for financing regardless of the set-aside.

K. Rating Requirement

EPA, as required by statute at 33 U.S.C. 3907(a)(1)(D)(i), will require each applicant to furnish a preliminary rating opinion letter as part of the application process. This is required with the submission of the application, not the letter of interest. The applicant is responsible for identifying and approaching one or more Nationally Recognized Statistical Rating Organizations (NRSROs) to obtain such letter. This letter must indicate that the

applicant project's senior obligations have the potential of attaining an investment-grade rating and opine on the default risk of the WIFIA credit instrument. This letter will allow EPA to evaluate the application and execute a term sheet upon which funds are obligated. The disbursement of any funds will be contingent upon the execution of a formal credit agreement between EPA and the project sponsor and the receipt of two formal investment-grade ratings on the project's senior obligations. These ratings must apply to all project obligations with claims senior to that of the Federal credit instrument on the security pledged to the Federal credit instrument. In addition, the ratings must specifically refer to the default risk of the WIFIA instrument itself. If the Federal credit instrument is the project's senior obligation, these ratings must apply to the Federal credit instrument as well as all project obligations with claims at parity to that of the Federal credit instrument on the security pledged to the Federal credit instrument.

EPA will require the credit rating to mention the default risk of the WIFIA loan. Given the WIFIA statutory mandate that the Federal interest will not be subordinated in the event of bankruptcy, insolvency, or liquidation of the project, EPA understands that this analysis would already be imbedded in the rating agency review of the senior debt obligations. Therefore, adding the requirement that the credit rating mentions the default risk of the WIFIA loan primarily serves to clarify EPA's expectations that the rating letters should specifically reference the WIFIA credit as well as the project's senior obligations.

L. Tax Status of Loan Guarantees

Section 103(a) of the Internal Revenue Code (IRC), 26 U.S.C. 103(a), provides that "gross income" does not include interest on any state or local bond, with certain exceptions. Section 149(b) of the IRC, 26 U.S.C. 149(b), however, provides that the section 103(a) exclusion from gross income "shall not apply to a state or local bond if such bond is federally guaranteed." Section 149(b) in effect converts tax exempt debt to taxable debt when such debt is guaranteed by the Federal government. WIFIA did not amend the provisions in section 149(b) of the Internal Revenue Code that prohibit the use of direct or indirect Federal guarantees of tax-exempt obligations. Accordingly, the interest income on any project loan that is directly or indirectly federally

guaranteed under WIFIA is not exempt from Federal income taxation.

M. Federal Requirements

Recipients of WIFIA credit assistance must comply with Federal requirements applicable to all Federally-funded projects. The rule provides a non-exhaustive list of these requirements in Supplementary Information Section V.

N. American Iron and Steel

Recipients of WIFIA credit assistance must comply, by statute at 33 U.S.C. 3914, with American Iron and Steel (AIS) requirements, which requires that if any WIFIA assistance is provided to a project for construction, alteration, maintenance, or repair, all of the iron and steel products used in the project must be produced in the United States. The language in the statute is identical to AIS language applicable to the SRF programs. This requirement applies to all iron and steel products, not only those paid for with proceeds from the WIFIA assistance agreement. A waiver may be issued for a case or category of cases where EPA finds (1) that applying these requirements would be inconsistent with the public interest; (2) iron and steel products are not produced in the U.S. in sufficient and reasonably available quantities and of a satisfactory quality; or (3) inclusion of iron and steel products produced in the U.S. will increase the cost of the overall project by more than 25%.

The WIFIA program is adopting all AIS guidance applicable to the SRF programs. Due to the identical nature of the statutory language for each program, as well as the need for consistency between two infrastructure programs administered by EPA, this requirement should be applied to both programs in the same manner. Additionally, the WIFIA program will adopt all relevant national waivers issued by EPA's SRF programs. These waivers allow recipients to purchase certain products from non-American sources. The rationale for these waivers applies equally to both programs. AIS guidance and waivers can be found on EPA's Web site. EPA welcomes comment on the implementation of AIS requirements.

O. Labor Standards

The statute, at 33 U.S.C. 3909(e), requires recipients of WIFIA credit assistance to pay all laborers and mechanics employed by contractors or subcontractors wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the Secretary of Labor. This is commonly referred to as Davis-Bacon

wage requirements. This requirement applies to all laborers and mechanics working on a project, not only those paid from proceeds of the WIFIA assistance agreement. Further guidance will be made available on EPA's WIFIA Web site.

P. Reporting

EPA requires, at a minimum, any recipient of WIFIA credit assistance to submit an annual project performance report and audited financial statements to EPA within 180 days following the recipient's fiscal year-end for each year during which the recipient's obligation to the Federal Government remains in effect. EPA may conduct periodic financial and compliance audits of the recipient, as determined necessary by EPA. The specific credit agreement between the recipient of credit assistance and EPA may contain additional reporting requirements. This is a necessary and important requirement in order to allow EPA to provide proper and sufficient oversight of federally-funded projects and conforms to the requirements of other federal programs. EPA welcomes comment on this requirement.

Q. Selection Criteria

Section 3907(b)(2) of the statute establishes 11 criteria for selecting among eligible projects to receive credit assistance, but allows EPA to identify additional selection criteria. EPA is proposing the following thirteen selection criteria. Eleven are criteria prescribed by the statute (as paraphrased below), and EPA further proposes to supplement certain of those criteria. EPA added criteria (12) and (13) below:

1. The extent to which the project is nationally or regionally significant, with respect to the generation of economic and public health benefits;
2. The likelihood that assistance under this subtitle would enable the project to proceed at an earlier date than the project would otherwise be able to proceed;
3. The extent to which the project uses new or innovative approaches such as the use of energy efficient parts and systems, or the use of renewable or alternate sources of energy; green infrastructure¹⁵; and the development

¹⁵ Green infrastructure includes a wide array of practices at multiple scales that manage wet weather and that maintains and restores natural hydrology by infiltrating, evapotranspiring and harvesting and using stormwater. On a regional scale, green infrastructure is the preservation and restoration of natural landscape features, such as forests, floodplains and wetlands, coupled with policies such as infill and redevelopment that reduce overall imperviousness in a watershed. On

of alternate sources of drinking water through aquifer recharge, water recycling or desalination;

4. The extent to which the project protects against extreme weather events, such as floods or hurricanes, as well as the impacts of climate change;

5. The extent to which the project helps maintain or protect the environment or public health;

6. The extent to which a project serves regions with significant energy exploration, development, or production areas;

7. The extent to which a project serves regions with significant water resource challenges, including the need to address water quality concerns in areas of regional, national, or international significance; water quantity concerns related to groundwater, surface water, or other resources; significant flood risk; water resource challenges identified in existing regional, state, or multistate agreements; and water resources with exceptional recreational value or ecological importance;

8. The extent to which the project addresses identified municipal, state, or regional priorities;

9. The readiness of the project to proceed toward development, including a demonstration by the obligor that there is a reasonable expectation that the contracting process for construction of the project can commence by not later than 90 days after the date on which a Federal credit instrument is obligated for the project under this subtitle;

10. The extent to which the project financing plan includes public or private financing in addition to assistance under this subtitle;

11. The extent to which assistance under this subtitle reduces the contribution of Federal assistance to the project;

12. The extent to which the project addresses needs for repair, rehabilitation or replacement of a treatment works, community water system, or aging water distribution or wastewater collection system; and

13. The extent to which the project serves economically stressed communities, or pockets of economically stressed rate payers within otherwise non-economically stressed communities.

EPA supplemented criteria (3) by adding examples to define EPA's expectations for innovation. These examples align this criterion with the particular innovative projects listed as

the local scale, green infrastructure consists of site- and neighborhood-specific practices, such as bioretention, trees, green roofs, permeable pavements and cisterns.

eligible in the statute at 33 U.S.C. 3905 (4) and (6).

EPA added “as well as the impacts of climate change” to the end of criterion (4) in order to reflect the Administration’s priorities as well as align the criteria with the specific priority project type, “adaptation to extreme weather and climate change including enhanced infrastructure resiliency, water recycling and reuse, and managed aquifer recovery,” which is discussed below.

EPA added “or public health” to the end of criterion (5) in order to reflect essential objectives in the public interest under both the Clean Water Act and the Safe Drinking Water Act.

EPA added criterion (12) in order to align project criteria with statutorily defined project eligibilities and to provide credit to those projects that meet the growing need for repair, rehabilitation, or replacement of treatment works, community water systems, or aging water distribution or wastewater collection systems. Addressing these needs is an Agency priority.

EPA added criterion (13) in order to reflect the Agency’s continuing efforts to address the needs of economically stressed communities where access to financing for critical infrastructure is often lacking or difficult to obtain. While the creditworthiness requirement, as well as the requirement to obtain an investment-grade rating on senior obligations, may be a high bar for access to the WIFIA program by economically stressed communities, there are some options that may allow such communities to meet such requirements. For instance, an economically stressed community may seek a guarantee from a State that would bring the required rating up to an investment-grade level. A community may also seek the participation of an SRF program where the SRF program applies for a WIFIA loan and uses its resources as security in order to meet WIFIA’s creditworthiness requirements. The SRF program can then provide funding to the community and as a result take on a level of risk that EPA is statutorily barred from assuming under WIFIA. EPA welcomes comment on the additions and modifications to the default statutory criteria.

EPA is not assigning weights to these priorities in this rule, but rather will make weighting decisions in the first Notice of Funding Availability and adjust such weights as needed in subsequent notices. Assigning criteria weights in the Notice of Funding Availability, rather than through regulation, allows EPA flexibility to

adapt to changing circumstances and priorities in an efficient and timely manner. In addition, the Administrator may include in the notice additional criteria in order to further reflect the Administrator’s priorities. EPA proposes to provide notice and response to comments prior to the issuance of the second Notice of Funding Availability, and subsequent notices thereafter if necessary, in order to allow for public input on additional criteria or changes to non-statutory criteria. EPA will publish a draft NOFA, when necessary to provide public notice of potential criteria changes or additions, in the **Federal Register** and respond to comments on these changes in the final NOFA. This flexibility will allow the Agency to encourage applications that focus on a particular selection criterion for a given funding cycle, *e.g.*, projects that respond to extreme weather events, focus on climate resiliency, serve economically stressed communities, or address other selection criteria priorities. EPA welcomes comment on the decision to apply weights to criteria in the Notice of Funding Availability rather than by regulation. EPA also wishes to ensure that the public has the opportunity to provide input in the development of additional criteria and changes to non-statutory criteria and welcomes comment on the proposal to provide informal notice and comment prior to issuance of the second Notice of Funding Availability and subsequent notices if necessary. EPA also welcomes other ideas that may provide the opportunity for such input while also allowing EPA to efficiently manage the program and provide assistance in a timely manner.

In addition to the criteria set forth above, the statute includes one additional selection criterion, which is directly related to a project’s creditworthiness, financial viability, and EPA’s capacity to make a loan: “The amount of budget authority required to fund the Federal credit instrument made available under this subtitle.” This criterion will be used to assess projects separate from the assessment under the previous thirteen criteria. In particular, it will inform EPA’s ability to provide funding in an equitable manner to prospective borrowers seeking financing. The amount of budget authority used by a project will be an important consideration when selecting projects. The greater the budget authority used by a project, which is a function of both project size and creditworthiness, the less budget authority is available to finance other projects. Selecting projects will be at the

discretion of the Administrator who may decide that a project that uses a proportionally high level of budget authority provides essential environmental or public health benefits and deserves greater consideration.

IV. Priorities

Criteria weights will be assigned in the first Notice of Funding Availability, and may be adjusted in subsequent notices to address changing circumstances and priorities. This discussion highlights important factors that will inform EPA’s decision-making process prior to issuance of the first criteria weights.

Congress enacted WIFIA with the goal of accelerating investment in our nation’s water infrastructure by providing supplemental credit assistance to creditworthy projects of major importance to the water sector. While the list of projects eligible for funding under WIFIA is expansive, EPA has identified the following project priorities for the first Notice of Funding Availability:

- Adaptation to extreme weather and climate change including enhanced infrastructure resiliency, water recycling and reuse, and managed aquifer recovery¹⁶;
- Enhanced energy efficiency of treatment works, public water systems, and conveyance systems, including innovative, energy efficient nutrient treatment;
- Green infrastructure; and
- Repair, rehabilitation, and replacement of infrastructure and conveyance systems.

EPA’s project priorities for the WIFIA program reflect water sector challenges that require innovative tools to assist municipalities in managing and adapting to our most pressing public health and environmental challenges. They are consistent with EPA’s Strategic Plan, which points to the need for the agency to drive innovation in addressing water quality and EPA’s “Blueprint for Integrating Technology Innovation into the National Water Program,” which builds on the strategic plan and calls for the Agency to promote innovation in energy reduction and treatment facilities, nutrient recovery, greening the nation’s infrastructure, water reuse, and resiliency, among other priorities.¹⁷

¹⁶ Managed aquifer recovery: Storage of excess supply to be used during peak periods of demand, drought, or other conditions.

¹⁷ EPA. “Blueprint for Integrating Technology Innovation into the National Water Program.” March 27, 2013. Available at <https://www.epa.gov/sites/production/files/2014-04/documents/blueprintv1.pdf>.

A. Adaptation to Extreme Weather and Climate Change Including Enhanced Infrastructure Resiliency, Water Recycling and Reuse, and Managed Aquifer Recovery

The capital and operations and maintenance costs associated with extreme weather and climate change are estimated to be between \$448 and \$994 billion for water and energy utilities through 2050.¹⁸ This estimate includes the costs associated with adapting to changes in runoff quantity and timing, seawater intrusion, temperature changes, drought, rising sea levels, increased flood events, changes in precipitation quantity and timing, reduction in source water availability and quantity, and other types of changes associated with climate change. Utilities have a suite of options that can be used to adapt to these changes, including investments in resiliency, recycling and reuse, and aquifer recovery.

Enhanced infrastructure resiliency can include moving essential infrastructure to higher ground, installing backup power sources, and other measures to harden the utility against storms. In other areas, droughts will become more frequent and severe. Water recycling and reuse and managed aquifer recovery are some of the adaptation strategies for such extreme events. Aquifer recharge and aquifer storage and recovery are tools to augment water resources and address climate change, including drought, and increased demand on water supplies related to development. With Superstorm Sandy and extreme droughts in the western states occurring since these costs were estimated, the current needs can reasonably be expected to be significantly higher. As communities are increasingly feeling the effects of extreme weather and climate change, demand for projects to adapt to these changes is expected to be significant.

B. Enhanced Energy Efficiency of Treatment Works, Public Water Systems, and Conveyance Systems Including Innovative, Energy Efficient Nutrient Treatment

Drinking water and wastewater systems account for approximately 3–4% of energy use in the United States, adding over 45 million tons of greenhouse gases annually. Further, drinking water and wastewater plants are typically the largest energy

consumers of municipal governments, accounting for 30–40% of total energy consumed. Energy as a percent of operating costs for drinking water systems can also reach as high as 40% and is expected to increase 20% in the next 15 years due to population growth and tightening drinking water regulations. As a result, energy efficiency and alternative energy projects are increasingly being pursued by water systems. Investments in energy efficiency will also help reduce the impacts of climate change.

For example, municipalities face increased costs to upgrade wastewater treatment in order to remove nutrients (nitrogen, phosphorous) to an extent sufficient to protect receiving waters. Nutrients are a significant water quality concern throughout the United States, with 25% of all water body impairments believed to be due to nutrient-related causes. This human-induced nutrient pollution comes from point and non-point sources, such as urban stormwater runoff, wastewater discharges, Animal Feeding Operations (AFOs) and Concentrated Animal Feeding Operations (CAFOs), agriculture, and atmospheric deposition. The costs of biological nutrient removal vary based on the quality of the source water (for drinking water) and receiving waters (for uses designated in state water quality standards), flows, and whether it is for a new facility or upgrades. Nutrient-induced formation of harmful algal blooms is an additional complicating factor for drinking water treatment. Operations and maintenance costs, particularly energy costs, are one of the primary drivers of the costs associated with nutrient removal. WIFIA can help reduce these costs by driving the development of innovative, energy efficient tools to treat nutrients and assist in their dissemination throughout the country.

While estimates of total energy efficiency needs in treatment works and public water systems are not currently available, recent experience points to a significant demand for these types of projects. SRF programs committed \$1.7 billion of funding received under the American Recovery and Reinvestment Act to Green Project Reserve projects, well above the 20% requirement; 45% of this amount went towards energy efficiency projects.¹⁹ From 2009 through 2015, CWSRF and DWSRF programs have funded \$1.8 billion in energy

efficiency projects. As more utilities seek out energy efficiency improvements, WIFIA can be on the forefront of making these projects come to fruition by reducing the cost of implementing innovative projects.

C. Green Infrastructure

The EPA's CWNS 2012 documented needs of \$48.0 billion for combined sewer overflow (CSO) correction, of which \$4.2 billion was reported for green infrastructure, and \$19.2 billion for stormwater management, of which \$2.8 billion was reported for green infrastructure. Because only 21% of regulated municipal separate storm sewer systems (MS4) submitted data, the actual stormwater needs are likely significantly higher. In 2011, EPA issued a memorandum entitled "Achieving Water Quality through Integrated Municipal Stormwater and Wastewater Plans,"²⁰ which among other options, encourages the integration of green infrastructure in CSO long term control plans. An increasing number of communities are choosing to invest in green infrastructure to manage CSOs and wet weather and to decrease costs and improve livability. Twenty-year investment needs in green infrastructure can reasonably be expected to substantially top the \$7 billion projected by the CWNS 2012.

D. Repair, Rehabilitation, and Replacement of Infrastructure and Conveyance Systems

The EPA's CWNS and DWINS estimate needs of approximately \$660 billion for up to twenty years. The vast majority of that need, 90% or \$591 billion, is for repair, rehabilitation, and replacement of existing infrastructure.

Actual needs in this area are likely even higher than reported to EPA. To calculate water systems' distribution system replacement needs, DWINS applies a default replacement benchmark of 0.5% per year. This default benchmark percentage reflects current replacement rates and assumes water mains have a life expectancy of 200 years though actual life expectancies can be significantly shorter. However, relatively few surveyed systems document needs in excess of the default. Further, the American Water Works Association estimates the total need between 2011 and 2035 for replacement of distribution system is approximately \$526 billion.²¹

¹⁹ U.S. EPA. "Implementation of the American Recovery & Reinvestment Act of 2009: Clean Water & Drinking Water State Revolving Fund Programs." May 2011 (EPA-832-K-11-001). Available at nepis.epa.gov/Exe/ZyPURL.cgi?Dockey=P100BEEI.TXT.

²⁰ Available at: https://www.epa.gov/sites/production/files/2015-10/documents/memointegratedmunicipalplans_0.pdf.

²¹ American Water Works Association. "Buried No Longer: Confronting America's Water

This figure does not include the repair, replacement, and upgrade of wastewater collection systems, nor of drinking water and wastewater treatment facilities.

Additionally, the repair, rehabilitation, and replacement of aging infrastructure can support climate change adaptation—for instance, by improvements to increase the flood resilience of facilities and components, including helping to assure the accessibility, uninterrupted operations, and maintaining public services during and following extreme weather events. Other examples include measures to reduce water loss from leaking drinking water distribution systems in communities where the availability of surface or ground water supplies to meet demand is a significant concern. Distribution system projects can similarly support energy efficiency since loss of water that has previously been treated and pumped is in effect energy lost.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review & Executive Order 13563: Improving Regulation and Regulatory Review

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review. This rule has been determined significant because it affects the rights and obligations of recipients of a loan program and raises novel legal or policy issues arising out of a legal mandate. Any changes made in response to OMB recommendations have been documented in the docket.

B. Executive Orders 11988 and 13690 and the Federal Flood Risk Management Standard

In order to help ensure enhanced resiliency of federally funded projects against floods, and to ensure that those projects do not exacerbate flood risk upstream, downstream, to adjacent properties, or to populations relying on facility services, projects funded under this rule will meet or exceed applicable State, local, Tribal, and Territorial standards for flood risk and floodplain management, as well as Executive Orders 11988 and 13690, the Federal Flood Risk Management Standard, and the Guidelines for Implementing Executive Order 11988, Floodplain Management, and Executive Order 13690, Establishing a Federal Flood Risk

Management Standard and a Process for Further Soliciting and Considering Stakeholder Input (Guidelines). This rule applies to projects funded by the WIFIA program. Other EPA programs may have other approaches to compliance with these Executive Orders.

Under this rule, projects involving new construction, substantial improvement, or to address substantial damage to structures and facilities will use the expanded floodplain standard described in E.O. 13690. Substantial improvement and substantial damage include projects equaling or exceeding 50 percent of the value of the structure or facility. These project applicants shall determine whether the proposed project will occur in the floodplain using any of the approaches provided in section 6(c) of E.O. 11988, as amended. Applicants for proposed projects that are not new construction, substantial improvement, or to address substantial damage will use, at a minimum, the base 100-year floodplain standard for non-Critical Actions, and the 0.2%-annual chance floodplain for Critical Actions.

The Guidelines include an Eight-Step Decision-Making Process for identifying and addressing flood risks. Through that decision-making process, applicants will consider alternatives, including those that would avoid the floodplain, whenever practicable. Applicants will identify potential impacts, and if the project would result in harm to or within the floodplain, take actions to minimize that harm and restore and protect the natural floodplain environment. Under this rule, projects funded under WIFIA will be considered Critical Actions, as that term is defined in E.O. 11988, unless the Administrator provides written notification to the applicant that the particular project is not considered to be a Critical Action.

Specific procedures and additional information are laid out in the program handbook, to be made available on the WIFIA program Web site. EPA welcomes comment on rule requirements related to Executive Orders 11988 and 13690 and the Federal Flood Risk Management Standard.

C. Paperwork Reduction Act (PRA)

The information collection activities in this proposed rule have been submitted for approval to OMB under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2549.01. You can find a copy of the ICR in the docket for this rule.

The collection of information is necessary in order to receive

applications for credit assistance pursuant to section 5024 of the Water Infrastructure Finance and Innovation Act (WIFIA) of 2014, 33 U.S.C. 3903. The purpose of the WIFIA program is to provide Federal credit assistance in the form of direct loans and loan guarantees to eligible clean water and drinking water projects.

WIFIA requires that an eligible entity shall submit to the Administrator an application at such time, in such manner, and containing such information, as the Administrator may require to receive assistance under WIFIA. In order to satisfy these requirements, EPA must collect a letter of interest and an application from entities seeking funding. This collection is necessary to determine whether each proposed project meets creditworthiness and other Federal requirements to receive WIFIA credit assistance. The content of the letter of interest and application are set out in 40 CFR 35.10015(c)(1) and (2), respectively. EPA solicits comments on the information required to be included in this collection.

EPA estimates 25 respondents per year, for a total estimated burden of 1,500 hours (per year) and cost of \$3,064,593.90 (per year) (includes no annualized capital or operation and maintenance costs). This estimate includes the burden for 20 unduplicated respondents for the letter of interest and 5 unduplicated respondents for the application. For the letter of interest, EPA estimates 1,000 annual burden hours and the annualized cost of those hours is \$40,107. EPA used the following median hourly wages from the May 2015 National Occupational Employment and Wage Estimates United States (http://www.bls.gov/oes/current/oes_nat.htm) from the U.S. Bureau of Labor Statistics to calculate the cost of the estimated burden hours: Lawyers = \$55.69; Management = \$47.38; Engineers = \$43.30; and Office and Administrative Support = \$15.96. For the application, EPA estimates 500 annual burden hours and the annualized cost of those hours is \$19,487. EPA estimates 50 legal hours, 55 management hours, 285 technical hours, and 110 clerical hours. As noted, EPA used the median wages from U.S. Bureau of Labor Statistics to calculate the cost of the estimated burden hours.

In addition to the burden hours of compiling the letter of interest and application, EPA estimated that respondents will be charged two fees. An application fee will be due upon submission of the application. The application fee acts as “earnest money” to ensure applicants are committed to

closing the WIFIA credit assistance. This application fee is credited toward the cost of expert services. For applications for projects serving small communities (population of not more than 25,000 people), this application fee is estimated to be \$25,000. For all other applicants, this application fee is estimated to be \$100,000. EPA assumes five applicants, with one being a small community. The annual combined application fee for all five applicants is estimated to be \$425,000.

A credit processing fee will be due at the time of closing for projects selected to receive assistance. The proceeds of any such fees would be used to pay for all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including legal, engineering, and financial advisory services. The fee for each project is directly attributable to the costs incurred by EPA for that project. EPA intends to fund all entities that are invited to apply for WIFIA credit assistance. If the credit agreement is not executed, the applicant must reimburse EPA for costs incurred in negotiating the credit agreement.

The amount for expert firms varies between applicants depending on the complexity of the project. EPA estimates these costs may range from \$350,000 to \$700,000. For the purpose of estimating burden, EPA estimates the cost will be approximately \$400,000. A portion of the credit processing fee may be waived at the discretion of the EPA. EPA will calculate a specific credit processing fee for each project. This credit processing fee will be equal to the cost of expert firms minus the application fee. For example, if the cost of expert firms is \$400,000 and the applicant paid a \$100,000 application fee, a \$300,000 credit processing fee will be due at closing. The total credit processing fee for five applicants will be approximately \$1,575,000.

The cost of general expenses for submitting an application, such as supplies, delivery charges, mailing, copying, and telecommunications, will be \$1,000. The total general expenses will be \$5,000.

WIFIA also requires that an eligible entity shall submit to the Administrator a preliminary rating opinion letter. By statute, applicants are required to submit a preliminary rating letter at the time of application and two (2) final rating letters at the time of closing that indicate that the senior obligation of the project has an investment grade rating. These rating letters must be from a rating a bond rating agency identified by the Securities and Exchange Commission as a nationally recognized

statistical rating organization (NRSRO). The cost of these rating letters vary based on the size and complexity of the project. Based on bond rating agency estimates and industry research, EPA estimates that the final rating letters will cost approximately \$100,000 per letter and that the initial preliminary rating letter is included in the cost of one of the final letters. The total cost for five applicants will be \$1,000,000.

EPA solicits comment on the accuracy of the estimated level of burden of collecting this information and the validity of the assumptions used. EPA also solicits comment on the utility and clarity of the information to be collected and ways EPA can minimize the information collection burden on respondents.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves the ICR, the Agency will announce that approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

D. Regulatory Flexibility Act

This action is not subject to the RFA. The RFA applies only to rules subject to notice and comment rulemaking requirements under the Administrative Procedure Act (APA), 5 U.S.C. 553, or any other statute. This rule pertains to loans and loan guarantees, which the APA expressly exempts from notice and comment rulemaking requirements under 5 U.S.C. 553(a)(2). Moreover, the Water Infrastructure Finance and Innovation Act (sec. 1445 of Pub. L. 114–94) does not require notice and comment rulemaking to take this action.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and

responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. While a tribal government, or a consortium of tribal governments, may apply for WIFIA credit assistance, this action does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

H. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because this action does not address environmental health or safety risks. This rulemaking provides the procedure to apply for credit assistance; the selection criteria used for evaluating and selecting among eligible projects to receive credit assistance contained in the Supplementary Information section of the preamble includes the extent to which the project generates public health benefits.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a “significant energy action” because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. This rulemaking simply provides the procedure to apply for credit assistance; therefore, by itself, this rulemaking will not have any effect on the supply, distribution or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action is not subject to Executive Order 12898 (59 FR 7629, February 16, 1994) because it does not establish an environmental health or safety standard.

L. National Environmental Policy Act

Each project obtaining assistance under this program is required to adhere to the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*). These requirements apply at the time of application for assistance. This rulemaking simply provides the procedure to apply for credit assistance; therefore, by itself, this rulemaking will not have any effect on the quality of the environment.

M. Congressional Review Act

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 35

Environmental protection, Reporting and recordkeeping requirements, and Water finance.

Dated: December 6, 2016.

Gina McCarthy,
Administrator.

For the reasons set forth in the preamble, EPA amends 40 CFR part 35 as follows:

PART 35—STATE AND LOCAL ASSISTANCE

■ 1. The authority citation for part 35 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*; 33 U.S.C. 1251 *et seq.*; 42 U.S.C. 300f *et seq.*; 42 U.S.C. 6901 *et seq.*; 7 U.S.C. 136 *et seq.*; 15 U.S.C. 2601 *et seq.*; 42 U.S.C. 13101 *et seq.*; Pub. L. 104–134, 110 Stat. 1321, 1321–299 (1996); Pub. L. 105–65, 111 Stat. 1344, 1373 (1997), 2 CFR 200.

■ 2. Add Subpart Q to read as follows:

Subpart Q—Credit Assistance for Water Infrastructure Projects

Sec.

- 35.10000 Purpose.
- 35.10005 Definitions.
- 35.10010 Limitations on assistance.
- 35.10015 Application process.
- 35.10020 Small community set-aside.
- 35.10025 Federal requirements.
- 35.10026 Federal flood risk management standard.
- 35.10030 American iron and steel.
- 35.10035 Labor standards.
- 35.10040 Investment-grade ratings.
- 35.10045 Threshold criteria.
- 35.10050 Use of existing financing mechanisms.
- 35.10055 Selection criteria.
- 35.10060 Term sheets and approvals.
- 35.10065 Closing on the credit agreement.
- 35.10070 Credit agreement.
- 35.10075 Reporting requirements.

Subpart Q—Credit Assistance for Water Infrastructure Projects**§ 35.10000 Purpose.**

This part implements a Federal credit assistance program for water infrastructure projects.

§ 35.10005 Definitions.

The following definitions apply to this part:

Community water system has the meaning given the term in section 1401 of the Safe Drinking Water Act (42 U.S.C. 300f).

Credit assistance means a secured loan or loan guarantee under 33 U.S.C. 3908.

Credit agreement means a contractual agreement between the EPA and the project sponsor (and the lender, if applicable) that formalizes the terms and conditions established in the term sheet (or conditional term sheet) and authorizes the execution of a secured loan or loan guarantee.

Credit subsidy cost shall have the same meaning as “cost” under section 502(5) of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a(5)), which is the net present value at the time the obligation is entered into. The credit subsidy cost for a given project is calculated by EPA in consultation with OMB. The credit subsidy cost must be less than the unobligated subsidy amount that has been appropriated by Congress to date.

Eligible project costs mean amounts, substantially all of which are paid by, or for the account of, an obligor in connection with a project, including the cost of:

(1) Development-phase activities, including planning, feasibility analysis (including any related analysis necessary to carry out an eligible project), revenue forecasting, environmental review, permitting, preliminary engineering and design work, and other preconstruction activities;

(2) Construction, reconstruction, rehabilitation, and replacement activities;

(3) The acquisition of real property or an interest in real property (including water rights, land relating to the project, and improvements to land), environmental mitigation (including acquisitions pursuant to section 5026(7)), construction contingencies, and acquisition of equipment; and

(4) Capitalized interest necessary to meet market requirements, reasonably required reserve funds, capital issuance expenses, and other carrying costs during construction. Capitalized interest

on the WIFIA credit instrument is not an eligible project cost.

Federal credit instrument means a secured loan or loan guarantee authorized to be made available under 33 U.S.C. 3901–3914 with respect to a project.

Investment-grade rating means a rating category of BBB minus, Baa3, bbb minus, BBB (low), or higher assigned by a nationally recognized statistical rating organization (NRSRO) to project obligations offered into the capital markets.

Iron and steel products means the following products made primarily of iron or steel: Lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials.

Lender means any non-Federal qualified institutional buyer (as defined in 17 CFR 230.144A(a)), known as Rule 144A(a) of the Securities and Exchange Commission and issued under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*), including:

(1) A qualified retirement plan (as defined in section 4974(c) of the Internal Revenue Code of 1986, 26 U.S.C. 4974(c)) that is a qualified institutional buyer; and

(2) A governmental plan (as defined in section 414(d) of the Internal Revenue Code of 1986, 26 U.S.C. 414(d)) that is a qualified institutional buyer.

Loan guarantee means any guarantee or other pledge by the Administrator to pay all or part of the principal of and interest on a loan or other debt obligation issued by an obligor and funded by a lender.

Nationally recognized statistical rating organization (NRSRO) means a credit rating agency identified and registered by the Office of Credit Ratings in the Securities and Exchange Commission under 15 U.S.C. 78o–7.

Obligor means a party primarily liable for payment of the principal of or interest on a Federal credit instrument, which party may be a corporation; partnership; joint venture; trust; Federal, State, or local governmental entity, agency, or instrumentality; tribal government or consortium of tribal governments; or a State infrastructure finance authority.

Project means:

(1) One or more activities that are eligible for assistance under section 603(c) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c)), notwithstanding the public ownership requirement under paragraph (1) of that subsection;

(2) One or more activities described in section 1452(a)(2) of the Safe Drinking Water Act (42 U.S.C. 300j–12(a)(2));

(3) A project for enhanced energy efficiency in the operation of a public water system or a publicly owned treatment works;

(4) A project for repair, rehabilitation, or replacement of a treatment works, community water system, or aging water distribution or waste collection facility (including a facility that serves a population or community of an Indian reservation).;

(5) A brackish or sea water desalination project, a managed aquifer recharge project, or a water recycling project;

(6) Acquisition of real property or an interest in real property—

(i) If the acquisition is integral to a project described in paragraphs (1) through (5) of this definition; or

(ii) Pursuant to an existing plan that, in the judgment of the Administrator, would mitigate the environmental impacts of water resources infrastructure projects otherwise eligible for assistance under this section;

(7) A combination of projects, each of which is eligible under paragraph (1) or (2) of this definition, for which a State infrastructure financing authority submits to the Administrator a single application; or

(8) A combination of projects secured by a common security pledge, each of which is eligible under paragraph (1), (2), (3), (4), (5), or (6) of this definition, for which an eligible entity, or a combination of eligible entities, submits a single application.

Project obligation means any note, bond, debenture, or other debt obligation issued by an obligor in connection with the financing of a project, other than a Federal credit instrument.

Project sponsor, for the purposes of this part, means an applicant for WIFIA assistance or an obligor, as appropriate.

Publicly sponsored means the obligor can demonstrate, to the satisfaction of the Administrator, that it has consulted with the affected state, local, or tribal government in which the project is located, or is otherwise affected by the project, and that such government supports the proposed project. Support can be shown by a certified letter signed by the approving municipal department or similar agency, mayor or other similar designated authority, local ordinance, or any other means by which local government approval can be evidenced.

Secured loan means a direct loan or other debt obligation issued by an obligor and funded by the Administrator

in connection with the financing of a project under 33 U.S.C. 3908.

State means any one of the fifty states, the District of Columbia, Puerto Rico, or any other territory or possession of the United States.

State infrastructure financing authority means the State entity established or designated by the Governor of a State to receive a capitalization grant provided by, or otherwise carry out the requirements of, title VI of the Federal Water Pollution Control Act (33 U.S.C. 1381 *et seq.*) or section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j–12).

Subsidy amount means the dollar amount of budget authority sufficient to cover the estimated long-term cost to the Federal Government of a Federal credit instrument, calculated on a net present value basis, excluding administrative costs and any incidental effects on governmental receipts or outlays in accordance with the provisions of the Federal Credit Reform Act of 1990 (2 U.S.C. 661 *et seq.*).

Substantial completion means the stage in the progress of the project when the project or designated portion thereof is sufficiently complete in accordance with the contract documents so that the project or a portion thereof can be used for its intended use.

Term sheet means a contractual agreement between the EPA and the project sponsor (and the lender, if applicable) that sets forth the key business terms and conditions of a Federal credit instrument. Execution of this document represents a legal obligation of budget authority.

Treatment works has the meaning given the term in section 212 of the Federal Water Pollution Control Act (33 U.S.C. 1292).

WIFIA means the Water Infrastructure Finance and Innovation Act of 2014, Pub. L. 113–121, 128 Stat. 1332, codified at 33 U.S.C. 3901–3914.

§ 35.10010 Limitations on assistance.

(a) The total amount of credit assistance offered to any project under this part shall not exceed 49% of the anticipated eligible project costs, as measured on an aggregate cash (year-of-expenditure) basis, or, if the secured loan does not receive an investment-grade rating, the total amount of credit assistance shall not exceed the amount of the senior project obligations of the project.

(b) Notwithstanding paragraph (a) of this section, the Administrator may offer credit assistance in excess of 49% of the anticipated eligible project costs as long as such excess assistance combined for all projects does not require greater than

25% of the subsidy amount made available for the fiscal year.

(1) Credit assistance may not exceed 80% of the total project costs due to a statutory restriction on the maximum extent of federal participation in a project, except in the case of certain rural water projects authorized to be carried out by the Secretary of the Interior that includes among its beneficiaries a federally recognized Indian tribe and for which the authorized Federal share of the total project costs is greater than 80%.

(2) Use of the authority to offer credit assistance in excess of 49% of the anticipated eligible project costs shall be considered only under extraordinarily exceptional circumstances.

(3) In the event this authority is used, all other criteria and requirements described in this part must be met and adhered to.

(c) Costs incurred prior to a project sponsor's submission of an application for credit assistance may be considered in calculating eligible project costs only upon approval of the Administrator. In addition, applicants shall not include application charges or any other expenses associated with the application process (such as charges associated with obtaining the required preliminary rating opinion letter) among the eligible project costs. Capitalized interest on the WIFIA credit instrument is not eligible for calculating project costs.

(d) No costs financed internally or with interim funding may be refinanced under this part later than a year following substantial completion of the project.

(e) The Administrator shall not obligate funds for a project that has not received an environmental Categorical Exclusion, Finding of No Significant Impact, or Record of Decision under the National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*

(f) The Administrator shall fund a secured loan based on the project's financing needs. The credit agreement shall include the anticipated schedule for such loan disbursements. Actual disbursements will be based on incurred costs, and in accordance with the approved construction plan, as evidenced by paid invoices.

(g) The interest rate on a secured loan will be equal to or greater than the yield on U.S. Treasury securities of comparable maturity on the date of execution of the credit agreement as identified through use of the daily rate tables published by the Bureau of the Fiscal Service for the State and Local Government Series (SLGS) investments. The yield on comparable Treasury

securities will be estimated by adding one basis point to the SLGS daily rate with a maturity that is closest to the weighted average loan life of the WIFIA credit instrument, measured from first disbursement.

(h) The final maturity date of a secured loan will be the earlier of the date that is 35 years after the date of substantial completion of the project, as determined by the Administrator and identified in the assistance agreement, and if the useful life of the project, as determined by the Administrator, is less than 35 years, the useful life of the project; however, the final maturity date of a secured loan to a State infrastructure financing authority will be not later than 35 years after the date on which amounts are first disbursed. In determining the useful life of the project, for the purposes of establishing the final maturity date of the WIFIA credit instrument, the Administrator will consider the useful economic life of the asset(s) being financed.

(i) A secured loan will not be subordinated to the claims of any holder of project obligations in the event of bankruptcy, insolvency, or liquidation of the obligor of the project.

(j) EPA will establish a repayment schedule for a secured loan based on the projected cash flow from project revenues and other repayment sources. Scheduled loan repayments of principal or interest on a secured loan will commence not later than 5 years after the date of substantial completion of the project as determined by the Administrator; however, scheduled loan repayments of principal or interest on a secured loan to a State infrastructure financing authority will commence not later than 5 years after the date on which amounts are first disbursed.

§ 35.10015 Application process.

(a) Each fiscal year for which budget authority is made available by Congress, the EPA shall publish a **Federal Register** notice to solicit letters of interest for credit assistance called a Notice of Funding Availability. Such notice will specify the relevant due dates, the estimated amount of funding available to support WIFIA credit instruments for the current and future fiscal years, contact name(s), and other details for submissions and funding approvals.

(b) Public and private applicants for credit assistance under this part will be required to submit letters of interest to the EPA in order to be selected by the Administrator to submit an application.

(c) The application process is divided into two steps: letter of interest and application.

(1) The letter of interest provides enough information for EPA to make a project selection and invite prospective borrowers to submit applications. Such information may include, but is not limited to:

- (i) Prospective borrower information;
- (ii) Project plan;
- (iii) Preliminary project operations and maintenance plan;
- (iv) Proposed financing plan and audited financial statements;
- (v) Contact information;
- (vi) Written responses addressing selection criteria;
- (vii) Certifications; and
- (viii) Notification of state infrastructure financing authority.

(2) The application provides all relevant information for EPA to provide credit assistance. Submission of an application does not guarantee that EPA will award credit assistance to a given applicant. At a minimum, such applications shall provide, in addition to the information provided in the letter of interest:

- (i) Detailed applicant information;
- (ii) Detailed project information;
- (iii) Detailed project operation and maintenance plan;
- (iv) Comprehensive financing plan; and
- (v) Complete certifications.

(d) Following successful submission and approval by EPA of the application, EPA will offer the applicant a term sheet, as described in section 35.10060. The applicant may accept or negotiate terms in the term sheet.

(e) Following acceptance of the term sheet, the applicant will proceed to closing, as described in section 35.10065.

(f) An application for a project located in or sponsored by more than one entity shall be submitted to the EPA by just one entity. The sponsoring entities shall designate a single obligor for purposes of applying for, receiving, and repaying WIFIA credit assistance.

§ 35.10020 Small community set-aside.

(a) Each fiscal year for which budget authority is made available by Congress, EPA shall set aside at least 15% of budget authority for projects that serve communities of not more than 25,000 individuals.

(b) Any set-aside budget authority remaining unobligated on June 1 of the fiscal year for which the budget authority is set aside shall be made available for projects other than small community projects.

§ 35.10025 Federal requirements.

All projects receiving credit assistance under this part shall comply with:

(a) Environmental authorities:

- (1) The National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*;
- (2) Archeological and Historic Preservation Act, 16 U.S.C. 469–469c;
- (3) Clean Air Act, 42 U.S.C. 7401 *et seq.*;
- (4) Clean Water Act, 33 U.S.C. 1251 *et seq.*;
- (5) Coastal Barrier Resources Act, 16 U.S.C. 3501 *et seq.*;
- (6) Coastal Zone Management Act, 16 U.S.C. 1451 *et seq.*;
- (7) Endangered Species Act, 16 U.S.C. 1531 *et seq.*;
- (8) Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, Executive Order 12898, 59 FR 7629, February 16, 1994;
- (9) Floodplain Management, Executive Order 11988, 42 FR 26951, May 24, 1977, as amended by Executive Order 13690, 80 FR 6425, February 4, 2015;
- (10) Protection of Wetlands, Executive Order 11990, 42 FR 26961, May 25, 1977, as amended by Executive Order 12608, 52 FR 34617, September 14, 1987;
- (11) Farmland Protection Policy Act, 7 U.S.C. 4201 *et seq.*;
- (12) Fish and Wildlife Coordination Act, 16 U.S.C. 661–666c, as amended;
- (13) Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*;
- (14) National Historic Preservation Act, 16 U.S.C. 470 *et seq.*;
- (15) Safe Drinking Water Act, 42 U.S.C. 300f *et seq.*; and
- (16) Wild and Scenic Rivers Act, 16 U.S.C. 1271 *et seq.*

(b) Economic and miscellaneous authorities:

- (1) Debarment and Suspension, Executive Order 12549, 51 FR 6370, February 21, 1986;
- (2) Demonstration Cities and Metropolitan Development Act, 42 U.S.C. 3301 *et seq.*, as amended, and Executive Order 12372, 47 FR 30959, July 16, 1982;
- (3) Drug-Free Workplace Act, 41 U.S.C. 8101 *et seq.*;
- (4) New Restrictions on Lobbying, 31 U.S.C. 1352;
- (5) Prohibitions relating to violations of the Clean Water Act or Clean Air Act with respect to Federal contracts, grants, or loans under 42 U.S.C. 7606 and 33 U.S.C. 1368, and Executive Order 11738, 38 FR 25161, September 12, 1973; and
- (6) The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601 *et seq.*

(c) Civil Rights, Nondiscrimination, Equal Employment Opportunity Authorities:

(1) Age Discrimination Act, 42 U.S.C. 6101 *et seq.*;

(2) Equal Employment Opportunity, Executive Order 11246, 30 FR 12319, September 28, 1965;

(3) Section 13 of the Clean Water Act, Pub. L. 92–500, codified in 42 U.S.C. 1251;

(4) Section 504 of the Rehabilitation Act, 29 U.S.C. 794, supplemented by Executive Orders 11914, 41 FR 17871, April 29, 1976 and 11250, 30 FR 13003, October 13, 1965;

(5) Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.*; and

(6) Participation by Disadvantaged Business Enterprises in Procurement under Environmental Protection Agency (EPA) Financial Assistance Agreements, 73 FR 15904.

(d) Other Federal and compliance requirements as may be applicable.

§ 35.10026 Federal flood risk management standard.

(a) In making WIFIA funding decisions under this rule, EPA will follow the requirements of Executive Orders 11988 and 13690, the Federal Flood Risk Management Standard, and the Guidelines for Implementing Executive Order 11988, Floodplain Management, and Executive Order 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input (Guidelines). Applicants shall submit information regarding the project that is sufficient for EPA to determine that the project is in compliance with the standards and requirements of these Executive Orders and Guidelines.

(b) Projects funded under the WIFIA program implemented through this rule must also demonstrate that they will meet or exceed applicable State, local, Tribal, and Territorial standards for flood risk and floodplain management.

(c) As a condition of funding projects involving new construction, substantial improvement, or to address substantial damage to structures and facilities, the project sponsor must demonstrate to EPA that it will use the expanded floodplain standard described in E.O. 13690. Projects involving substantial improvement or addressing substantial damage include projects equaling or exceeding 50 percent of the value of the structure or facility. With regard to projects meeting this definition, the project applicant shall determine whether the proposed project will occur in the floodplain using any of the approaches provided in section 6(c) of

Executive Order 11988, as amended. Applicants for proposed projects that are not new construction, substantial improvement, or projects to address substantial damage shall use at minimum, the base 100-year floodplain standard for actions that are not “critical actions” as defined in Executive Order 11988 Section 6(d) and the 0.2%-annual chance floodplain for critical actions.

(d) For purposes of this section, projects funded under WIFIA will be considered Critical Actions as defined in Executive Order 11988, as amended, unless the Administrator determines and provides written notice to the applicant that the particular project is not considered to be a Critical Action.

(e) All applicants shall follow the Guidelines, including the Eight-Step Decision-Making Process described in the Guidelines, as a means of compliance with the requirements of section 2(a) of Executive Order 11988, as amended. EPA shall provide oversight to ensure that project applicants have complied with this process.

(f) The Administrator will not allow WIFIA funding for new construction, substantial improvement, or to address substantial damage to structures and facilities sited in or encroaching on a Floodway or a Coastal High Hazard Area/V-Zone, except for a functionally dependent use or to facilitate an open space use. The Administrator will make the determination of whether a proposed project is a functionally dependent use or a structure that facilitates an open space use. In addition to compliance with paragraphs (a) through (e) of this section, applicants for projects sited in these zones must include engineering plans demonstrating that the facility will be accessible and operational to the elevation of the applicable level, including elevation or floodproofing of buildings, electronics, and mechanical components.

§ 35.10030 American iron and steel.

(a) All projects receiving credit assistance under this part for the construction, alteration, maintenance, or repair of a project shall use only iron and steel products produced in the United States.

(b) By statute, at 33 U.S.C. 3914(b), “iron and steel products” means the following products made primarily of iron or steel: Lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials. Equipment employed in

construction but does not become part of the project is not an “iron and steel product” for purpose of this section.

(c) EPA may issue a waiver for a case or category of cases where EPA finds:

(1) That applying these requirements would be inconsistent with the public interest;

(2) Iron and steel products are not produced in the US in sufficient and reasonably available quantities and of a satisfactory quality; or

(3) Inclusion of iron and steel products produced in the US will increase the cost of the overall project by more than 25%.

(d) All guidance developed for compliance with American Iron and Steel requirements for EPA’s State Revolving Fund programs shall apply to projects receiving credit assistance under this part. Such guidance can be found on EPA’s Web site.

(e) All national waivers issued by EPA in accordance with section 436(b) of Pub. L. 113–76, 128 Stat. 346, 2014, Consolidated Appropriations Act, 2014, shall apply to projects receiving credit assistance under this part in the same manner as they apply to projects receiving assistance under the Clean Water and Drinking Water State Revolving Fund programs, unless such waiver addresses the timing of the submission of engineering plans and specifications as the submission relates to Congressional appropriations for either the Clean Water or Drinking Water State Revolving Fund programs.

§ 35.10035 Labor standards.

All laborers and mechanics employed by contractors or subcontractors on projects receiving credit assistance under this part shall be paid wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the Secretary of Labor.

§ 35.10040 Investment-grade ratings.

(a) At the time a project sponsor submits an application, the EPA shall require a preliminary rating opinion letter. This letter is a conditional credit assessment from a NRSRO that provides a preliminary indication of the project’s overall creditworthiness and that specifically addresses the potential of the project’s senior debt obligations (those obligations having a lien senior to that of the WIFIA credit instrument on the pledged security) to achieve an investment-grade rating and the default risk of the WIFIA loan.

(b) The full funding of a secured (direct) loan or loan guarantee shall be contingent on the assignment of an investment-grade rating by two NRSROs

to all project obligations that have a lien senior to that of the Federal credit instrument on the pledged security along with commentary on the default risk of the WIFIA loan.

(c) Neither the preliminary rating opinion letter nor the formal credit ratings should reflect the effect of bond insurance, unless that insurance provides credit enhancement that secures the WIFIA obligation.

§ 35.10045 Threshold criteria.

(a) To be eligible to receive Federal credit assistance under this part, a project shall meet the following six threshold criteria:

(1) The project and obligor shall be creditworthy;

(2) The project sponsor shall submit a project application to the Administrator;

(3) A project shall have eligible project costs that are reasonably anticipated to equal or exceed \$20 million, or for a project eligible under paragraphs (2) or (3) of 33 U.S.C. 3905 serving a community of not more than 25,000 individuals, project costs that are reasonably anticipated to equal or exceed \$5 million;

(4) Project financing shall be repayable, in whole or in part, from State or local taxes, user fees, or other dedicated revenue sources that also secure the senior project obligations of the project; shall include a rate covenant, coverage requirement, or similar security feature supporting the project obligations; and may have a lien on revenues subject to any lien securing project obligations;

(5) In the case of a project that is undertaken by an entity that is not a State or local government or an agency or instrumentality of a State or local government, or a tribal government or consortium of tribal governments, the project that the entity is undertaking shall be publicly sponsored.

(6) The applicant shall have developed an operations and maintenance plan that identifies adequate revenues to operate, maintain, and repair the project during its useful life.

(b) With respect to paragraph (a)(4) of this section, the Administrator may accept general obligation pledges or general corporate promissory pledges and will determine the acceptability of other pledges and forms of collateral as dedicated revenue sources on a case-by-case basis. The Administrator shall not accept a pledge of Federal funds, regardless of source, as security for the WIFIA credit instrument.

§ 35.10050 Use of existing financing mechanisms.

(a) Within 30 days of receipt of an application for a project eligible under 33 U.S.C. 3905(2) or (3), EPA shall notify the State infrastructure financing authority in the State in which the applicant's project is located that such an application has been received.

(b) EPA may not provide assistance under this chapter if within 60 days of receipt of a notification described in paragraph (a) of this section, the State infrastructure financing authority notifies EPA that it intends to commit funds in an amount equal to or greater than the amount requested in the application to the applicant for the project, as evidenced by an amendment to the State revolving fund program's intended use plan described in § 35.3150 or § 35.3555 unless:

(1) By the date 180 days after receipt of the notification described in paragraph (a) of this section, the State infrastructure financing authority fails to enter into an assistance agreement with the applicant; or

(2) The financial assistance to be provided by the State infrastructure authority will be at rates and terms that are less favorable than the rates and terms of the assistance agreement to be provided under this chapter.

§ 35.10055 Selection criteria.

(a) The Administrator shall assign weights to selection criteria in the first Notice of Funding Availability published in accordance with section 4(a), and adjusted weights in future Notices of Funding Availability to address changing circumstances and priorities. The following thirteen selection criteria will be used for evaluating and selecting among eligible projects to receive credit assistance:

(1) The extent to which the project is nationally or regionally significant, with respect to the generation of economic and public health benefits;

(2) The likelihood that assistance under this subtitle would enable the project to proceed at an earlier date than the project would otherwise be able to proceed;

(3) The extent to which the project uses new or innovative approaches such as the use of energy efficient parts and systems, or the use of renewable or alternate sources of energy; green infrastructure; and the development of alternate sources of drinking water through desalination, aquifer recharge or water recycling;

(4) The extent to which the project protects against extreme weather events, such as floods or hurricanes, as well as the impacts of climate change;

(5) The extent to which the project helps maintain or protect the environment or public health;

(6) The extent to which a project serves regions with significant energy exploration, development, or production areas;

(7) The extent to which a project serves regions with significant water resource challenges, including the need to address water quality concerns in areas of regional, national, or international significance; water quantity concerns related to groundwater, surface water, or other resources; significant flood risk; water resource challenges identified in existing regional, state, or multistate agreements; and water resources with exceptional recreational value or ecological importance;

(8) The extent to which the project addresses identified municipal, state, or regional priorities;

(9) The readiness of the project to proceed toward development, including a demonstration by the obligor that there is a reasonable expectation that the contracting process for construction of the project can commence by not later than 90 days after the date on which a Federal credit instrument is obligated for the project under this subtitle; and

(10) The extent to which the project financing plan includes public or private financing in addition to assistance under this subtitle;

(11) The extent to which assistance under this subtitle reduces the contribution of Federal assistance to the project;

(12) The extent to which the project addresses needs for repair, rehabilitation or replacement of a treatment works, community water system, or aging water distribution or wastewater collection system; and

(13) The extent to which the project serves economically stressed communities, or pockets of economically stressed rate payers within otherwise non-economically stressed communities.

(b) The Administrator may include additional weighted criteria in the Notice of Funding Availability to address changing circumstances and priorities.

(c) In addition, 33 U.S.C. 3907(a)(1)(D)(i) conditions a project's approval for credit assistance on receipt of a preliminary rating opinion letter indicating that the project's senior debt obligations have the potential to attain an investment-grade rating.

§ 35.10060 Term sheets and approvals.

(a) EPA, after review and evaluation of the application, and all other required

documents submitted by the applicant, may offer to an applicant a written Term Sheet signed by the Administrator, including detailed terms and conditions that must be met. The issuance of this Term Sheet represents approval of the application for credit assistance.

(b) To proceed to closing, the applicant must sign the Term Sheet before the expiration date on which the terms offered will expire unless the Administrator agrees in writing to extend the expiration date.

§ 35.10065 Closing on the credit agreement.

(a) Subsequent to the signing of the Term Sheet by the applicant, EPA will set a closing date for execution of a credit agreement, and provide documents articulating the conditions precedent to closing to the applicant.

(b) By the closing date, the applicant must have satisfied all of the detailed terms and conditions required by EPA and all other contractual, statutory, and regulatory requirements. If the applicant has not satisfied all such terms and conditions by the closing date, the Administrator may set a new closing date or rescind the approval of the application.

(c) If at any point following the issuance of the Term Sheet by EPA and prior to the closing date, the terms and conditions of the financing arrangements or the financial status of the obligor change in a material manner from the information used to evaluate the application, the applicant must notify EPA within the time period specified by the Administrator, at which point the Administrator may update the Term Sheet accordingly or rescind the approval of the application.

(d) The Credit Agreement and related documents will include detailed definitions, terms, and conditions necessary and appropriate to protect the interest of the United States over the life of the credit assistance and in the case of default, and will be executed at closing only after EPA has ensured that all requirements and conditions articulated in this rule, the statute, and other relevant laws and regulations have been satisfied.

§ 35.10070 Credit agreement.

(a) Only a credit agreement executed by the Administrator can contractually obligate EPA to provide assistance under WIFIA.

(b) EPA is not bound by oral representations made during the letter of interest step, or application step, or during any negotiation process.

(c) Except if explicitly authorized by an Act of Congress, no Federal funds,

proceeds of Federal loans, or proceeds of loans guaranteed by the Federal Government, may be used by a borrower to pay for credit subsidy costs, administrative fees, or other fees charged by or paid to EPA relating to the WIFIA program.

(d) Prior to the execution by EPA of a credit agreement, EPA must ensure that the following requirements and conditions are satisfied:

(1) The project qualifies as an eligible project under WIFIA;

(2) The face value of the credit agreement is limited to no more than 49 percent of total eligible project costs, or if credit assistance in excess of 49% has been approved, no more than the percentage of eligible project costs agreed upon, not to exceed 80% of eligible project costs;

(3) The applicant is obligated to make full repayment of the principal and interest on the credit instrument over a period of up to the lesser of 35 years or the useful life of the project, after substantial completion; however, the final maturity date of a secured loan to a State infrastructure financing authority will be not later than 35 years after the date on which amounts are first disbursed.

(4) If the credit instrument is a loan guarantee, the loan guarantee does not finance, either directly or indirectly, tax-exempt debt obligations, consistent with the requirements of section 149(b) of the Internal Revenue Code;

(5) The amount of the credit agreement, when combined with other funds committed to the project, will be sufficient to carry out the project, including adequate contingency funds;

(6) The applicant has pledged project assets and other collateral or surety, including non-project-related assets, determined by EPA to be necessary to secure the repayment of the credit agreement;

(7) The credit agreement and related documents include detailed terms and conditions necessary and appropriate to protect the interest of the United States in the case of default;

(8) The credit agreement is not subordinate to any loan or other debt obligation in the event of bankruptcy, insolvency, or liquidation of the obligor of the project;

(9) There is satisfactory evidence that the applicant is willing, competent, and capable of performing the terms and conditions of the credit agreement, and will diligently pursue the project;

(10) The applicant has taken and is obligated to continue to take those actions necessary to perfect and maintain liens on assets which are

pledged as security for the credit agreement;

(11) EPA or its representatives have access to the project site at all reasonable times in order to monitor the performance of the project;

(12) EPA and the applicant have reached an agreement as to the information that will be made available to EPA and the information that will be made publicly available;

(13) The applicant has filed applications for or obtained any required regulatory approvals for the project and is in compliance, or promptly will be in compliance, where appropriate, with all Federal, State, and local regulatory requirements;

(14) The applicant has no delinquent federal debt, including tax liabilities, unless the delinquency has been resolved with the appropriate federal agency in accordance with the standards of the Debt Collection Improvement Act of 1996;

(15) The credit agreement and related agreements contain such other terms and conditions as EPA deems reasonable and necessary to protect the interests of the United States, including without limitation provisions for (i) such collateral and other credit support for the credit agreement, and (ii) such collateral sharing, priorities and voting rights among creditors and other intercreditor arrangements as, in each case, EPA deems reasonable and necessary to protect the interests of the United States; and

(e) The credit agreement must contain audit provisions which provide, in substance, as follows:

(1) The applicant must keep such records concerning the project as are necessary to facilitate an effective and accurate audit and performance evaluation of the project; and

(2) EPA and the Inspector General, or their duly authorized representatives, must have access, for the purpose of audit and examination, to any pertinent books, documents, papers, and records of the applicant. Examination of records may be made during the regular business hours of the applicant, or at any other time mutually convenient.

§ 35.10075 Reporting requirements.

At a minimum, any recipient of Federal credit assistance under this part shall submit an annual project performance report and audited financial statements to EPA within no more than 180 days following the recipient's fiscal year-end for each year during which the recipient's obligation to the Federal Government remains in effect. EPA may conduct periodic financial and compliance audits of the

recipient of credit assistance, as determined necessary by EPA. The specific credit agreement between the recipient of credit assistance and EPA may contain additional reporting requirements.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2015–0845; FRL–9956–62–Region 5]

Air Plan Approval; Michigan; Part 9 Miscellaneous Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving administrative revisions for incorporation into the Michigan's State Implementation Plan (SIP). The submittal, by the Michigan Department of Environmental Quality (MDEQ) on December 21, 2015, makes minor corrections to Michigan's Air Pollution Control Rules entitled "Emissions Limitations and Prohibitions—Miscellaneous."

DATES: This rule is effective on February 17, 2017, unless EPA receives adverse written comments by January 18, 2017. If EPA receives adverse comments, EPA will publish a timely withdrawal of the rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2015–0845 at <http://www.regulations.gov> or via email to blakley.pamela@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located

outside of the primary submission (*i.e.*, on the Web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the "For Further Information Contact" section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Charles Hatten, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6031, hatten.charles@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

- I. What did Michigan submit?
- II. What action is EPA taking?
- III. Incorporation by Reference
- IV. Statutory and Executive Order Reviews

I. What did Michigan submit?

On December 21, 2015, MDEQ submitted a request to EPA to make minor administrative revisions to rules in Chapter 336, Part 9. The revisions are described below:

R 336.1906 (rule 906)—This existing rule requires notice to MDEQ for the placement of a device that dilutes or conceals emissions. MDEQ requests the rule that is currently in effect at the state level be incorporated into the SIP. The regulatory text of Michigan's current rule, effective May 20, 2015, is identical to the text of the SIP approved rule, which became effective March 19, 2002. The only revision to the text is the effective date of the rule. Because there are no substantive changes to language in the current version of the rule promulgated at the state, EPA finds the 2015 version of rule 906 approvable into the SIP.

R 336.1911 (rule 911) and R 336.1912 (rule 912)—The provisions of these rules do not allow emissions or specifically limit emissions from a source, process equipment, or operation. In the existing rule 911, it requires a malfunction abatement plan in certain situations. A person responsible for the operation of a source of an air contaminant shall prepare a malfunction abatement plan to prevent, detect, and correct malfunctions or equipment failures resulting in emissions exceeding any applicable emission limitation. In this rule the

word "commission" was changed to "department." Malfunction abatement plans are to be submitted to the department because the commission no longer exists.

The existing rule 912 addresses notification and reporting requirements of excess emissions resulting from either an abnormal condition, start-up, shutdown, or malfunction of a source, process equipment, or operation. In section 912(5b), the word "which" was changed to "that."

Because there are no substantive changes to the language in rules 911 and 912, EPA finds the revisions acceptable for approval into the Michigan SIP.¹

Overall, the revisions to Part 9 make minor corrections to rules 906, 911, and 912. The revisions are solely administrative, and do not make any substantive changes to the language in the rules. The revisions to these rules will not increase emissions of pollutants into the atmosphere.

II. What action is EPA taking?

EPA is approving the December 21, 2015, request to revise Michigan's air pollution control rules in Part 9. The revisions will not increase emissions of pollutants into the atmosphere.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective February 17, 2017 without further notice unless we receive relevant adverse written comments by January 18, 2017. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. If we do not receive any comments, this action will be effective February 17, 2017.

¹ On June 12, 2015 (80 FR 33840), EPA finalized a SIP Call to address deficient SIP provisions regarding emissions during facility start-up, shutdown, and malfunctions. In this SIP Call, Michigan was required to revise a rule which allowed an affirmative defense for excess emissions during start-up or shutdown. The SIP Call did not include rule 911 or 912. These two rules address only planning and reporting requirements. Thus, they comply with EPA's policy on start-up, shutdown, and malfunctions.

III. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Michigan regulations described in the amendments to 40 CFR part 52 set forth below. Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.² EPA has made, and will continue to make, these documents generally available electronically through *www.regulations.gov* and/or at the EPA Region 5 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 17, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: December 2, 2016.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

- 2. In § 52.1170, the table in paragraph (c) is amended by revising the entries for R 336.1906, R 336.1911, and R 336.1912 under the heading "Part 9. Emission Limitations and Prohibitions—Miscellaneous" to read as follows:

§ 52.1170 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 81****[EPA–R05–OAR–2016–0277; FRL–9956–95–Region 5]****Reclassification of the Sheboygan, Wisconsin Area To Moderate Nonattainment for the 2008 Ozone National Ambient Air Quality Standards****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is determining that the Sheboygan, Wisconsin area (Sheboygan County) has failed to attain the 2008 ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of July 20, 2016, and that this area is not eligible for an extension of the attainment date. Thus, EPA is reclassifying this area as “moderate” nonattainment for the 2008 ozone NAAQS. The State of Wisconsin must submit State Implementation Plan (SIP) revisions that meet the statutory and regulatory requirements that apply to areas classified as moderate nonattainment for the 2008 ozone NAAQS by January 1, 2017.

DATES: This final rule is effective December 19, 2016.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2016–0277. All documents in the docket are listed in the <http://www.regulations.gov> Web

site. Although listed in the index, some information is not publicly available, *e.g.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through <http://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Kathleen D’Agostino, Environmental Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–1767, dagostino.kathleen@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. What is being addressed in this document?

Clean Air Act (CAA) section 181(b)(2) requires EPA to determine, based on an area’s ozone design value¹ as of the area’s attainment deadline, whether the area has attained the ozone standard by that date. The statute provides a

¹ An area’s ozone design value for the eight-hour ozone NAAQS is the highest three-year average of the annual fourth-highest daily maximum eight-hour average concentrations of all monitors in the area. To determine whether an area has attained the ozone NAAQS prior to the attainment date, EPA considers the monitor-specific ozone design values in the area for the most recent three years with complete, quality-assured monitored ozone data prior to the attainment deadline.

mechanism by which states that meet certain criteria may request and be granted by the EPA Administrator a one-year extension of an area’s attainment deadline. The CAA also requires that areas that have not attained the standard by their attainment deadlines be reclassified to either the next “highest” classification (*e.g.*, marginal to moderate, moderate to serious, *etc.*) or to the classifications applicable to the areas’ design values.

On April 30, 2012, the Sheboygan area was designated as nonattainment for the 2008 ozone NAAQS and was classified as marginal, effective July 20, 2012 (77 FR 30088, May 21, 2012). Wisconsin submitted a letter to EPA requesting a one-year extension of the attainment deadline for the Sheboygan area under section 181(a)(5) of the CAA. In that letter, Wisconsin certified that the State had complied with all requirements and commitments pertaining to the Sheboygan area in the SIP and that all monitors in the area had a fourth highest daily maximum 8-hour average of 0.075 parts per million (ppm) or less for 2014 (*i.e.*, the last full year of air quality data prior to the July 20, 2015, attainment date). On May 4, 2016 (81 FR 26697), based on EPA’s evaluation and determination that the area met the attainment date extension criteria of CAA section 181(a)(5), EPA granted the Sheboygan area a one-year extension of the marginal area attainment date to July 20, 2016.

Wisconsin did not request a second one-year extension for the Sheboygan area, and the area would not have qualified for one under CAA section 181(a)(5) because, at 0.076 ppm, the average of the 2014 and 2015 annual fourth highest daily maximum eight-

hour average ozone concentrations at a monitor in the area is greater than 0.075 ppm. On September 28, 2016 (81 FR 66617), EPA proposed to determine that the Sheboygan area failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2016, is not eligible for an additional one-year attainment date extension, and must be reclassified as moderate nonattainment. EPA also proposed to require Wisconsin to submit SIP revisions to address moderate area requirements by January 1, 2017.

II. What comments did we receive on the proposed rule and how are we responding to those comments?

EPA provided a 30-day review and comment period on the proposed action. Adverse comments are summarized and addressed below.

Comment 1: There are two ozone monitoring sites in the Sheboygan area. The first is located at Kohler Andrae State Park along Lake Michigan and southeast of the City of Sheboygan, the main urban area of the county. The ozone detected by the Kohler monitor does not come from the Sheboygan area, but from areas along southern Lake Michigan, namely Chicago, IL and Gary, IN. This site has been operational since June 1997. The second monitoring site, known as Haven, is located northwest and downwind of the City of Sheboygan and has been operational since April 2014.

EPA's nonattainment re-designation is based exclusively on data from the Kohler Andrae monitor. Once 2016 data are certified, the Haven monitor will have three complete years of data for this site. Based on these data, the Haven monitor will have a design value of 0.069 ppm, as compared to 0.079 ppm at the Kohler Andrae monitor.² These data show that actual air quality within the Sheboygan area is in compliance with the 2008 ozone standard. EPA should allow Wisconsin to certify these data and consider all available regulatory data prior to making a re-designation for the entire county.

Response 1: CAA section 181(b)(2) requires EPA to determine, based on an area's ozone design value as of the area's attainment deadline,³ whether the area has attained the ozone standard by that date. The CAA also requires that any

area⁴ that EPA finds has not attained the standard by the attainment deadline shall be reclassified by operation of law to the higher of the next "highest" classification (e.g., marginal to moderate, moderate to serious, etc.) or the classification applicable to the area's design value. Further, the agency's mandatory duty to make determinations of attainment or failure to attain the NAAQS exists regardless of the nature or effect of transported ozone and emissions on monitored air quality data in a given nonattainment area.⁵

Under EPA regulations at 40 CFR part 50, appendix P, the 2008 ozone NAAQS is attained at a monitoring site when the three-year average of the annual fourth-highest daily maximum eight-hour average ambient air quality ozone concentration is less than or equal to 0.075 ppm.⁶ This three-year average is referred to as the design value. When the design value is less than or equal to 0.075 ppm at each ambient air quality monitoring site within the area, the area is deemed to be meeting the NAAQS. If the design value is greater than 0.075 ppm at any site in the area, the area is deemed to be violating the NAAQS.

Therefore, even if the Haven monitoring site had three years of complete, quality-assured, and certified ozone data showing a design value below the standard for the 2013–2015 time period, EPA would still be compelled to determine that the area failed to attain the standard due to the violation recorded at the Kohler Andrae monitor.

Comment 2: EPA's guidance on monitoring site selection states, "[f]or regulatory compliance, the principle objective is to measure the ozone concentration in the high population density areas and the maximum downwind concentration from the urban region." The Kohler Andrae monitor is not located downwind from sources in the Sheboygan area. The monitor's location in no way could be seen as measuring ozone concentration in an area with the maximum downwind concentration from the urban region.

Response 2: The siting of the Kohler Andrae monitor is consistent with

EPA's monitoring site selection guidance. EPA's monitoring guidance does not prevent placement of monitors upwind of urban source areas. In addition, the Kohler Andrae monitor was not placed to monitor the maximum downwind impacts from the urbanized portion of the Sheboygan area, but to capture maximum downwind impacts from several urban areas along Lake Michigan, including Milwaukee, Wisconsin; Chicago, Illinois; and Gary, Indiana. The fact that the Kohler Andrae site is monitoring the highest ozone concentrations in Wisconsin supports the appropriateness of its selection as a maximum downwind site.

Comment 3: The Haven monitor is located approximately six miles northwest of the City of Sheboygan. Wisconsin established this monitor specifically to provide accurate downwind measurements of air quality for the Sheboygan area. This monitor's location makes it a much more appropriate monitor to use for compliance with ozone standards because it is placed in a location that will actually monitor ozone generated from Sheboygan area facilities.

Response 3: EPA recognizes that the Haven monitor provides additional air quality data that can be used in conjunction with the air quality data from the Kohler Andrae monitor to form a more complete understanding of ozone values throughout the Sheboygan area. This information can be considered when making nonattainment area boundary decisions for any future ozone designations. The Sheboygan area, consisting of the entirety of Sheboygan County, was designated as nonattainment for the 2008 ozone standard on April 30, 2012. EPA considered the recommendation of the state and the information available at the time to determine the appropriate boundary for the area. At that time, the Haven monitor ozone data were not available for consideration. That designation is not being reevaluated in this rulemaking.

In this action EPA is meeting its statutory obligation under section 181(b)(2) of the CAA to determine, based on the area's ozone design value as of the area's attainment deadline, whether the Sheboygan area has attained the 2008 ozone standard. As discussed more completely in response to Comment 1, if any monitor in an area shows a violation of the ozone NAAQS during the most recent three-year period with complete, quality assured, and certified ozone data before the attainment deadline, and the state fails to meet the requirements for an attainment date extension set forth in

² The level of the 2008 ozone standard is 0.075 ppm.

³ Section 181(a)(5) of the CAA gives the Administrator the discretion to grant up to two one-year extensions of the attainment date upon application by any state if certain criteria are met. Wisconsin did not request a second one-year attainment date extension, and the Sheboygan area would not have met the criteria required for EPA to grant one.

⁴ Except those classified as severe or extreme.

⁵ See *Sierra Club v. EPA*, 294 F.3d 155, 160–62 (D.C. Cir. 2002) (holding that the EPA is not permitted to relax mandatory statutory requirements for downwind areas on the basis of interstate transport).

⁶ The rounding convention under 40 CFR part 50, appendix P, dictates that concentrations shall be reported in ppm to the third decimal place, with additional digits to the right being truncated. Thus, a computed three-year average ozone concentration of 0.076 ppm is greater than 0.075 ppm and, therefore, over the standard.

section 181(a)(5) of the CAA, EPA is obligated to determine that the area has failed to attain the standard by the attainment date. Therefore, even were EPA able to consider data from the Haven monitor, EPA cannot ignore the data recorded at the Kohler Andrae monitor, which is also located within the Sheboygan nonattainment area. Quality assured, certified data from the Kohler Andrae monitor show that the area failed to attain the 2008 ozone standard by its attainment deadline and, thus, EPA is obligated to make that finding. EPA's finding that the area failed to attain the standard by the attainment deadline requires EPA to reclassify the area by operation of law. Further, as discussed above, the agency's mandatory duty to make determinations of attainment or failure to attain the NAAQS exists regardless of the nature or effect of transported emissions on monitored air quality data in a given nonattainment area.

Comment 4: The State of Wisconsin has worked with EPA to address the issue of an upwind compliance monitor unfairly subjecting an entire county to a nonattainment designation in Kenosha County. At the very least, EPA should consider changing the geographic boundaries of the Sheboygan nonattainment area to exclude those portions of the county which are clearly in attainment according to data from the Haven monitor. Reclassifying only part of Sheboygan County would allow for more regulatory certainty for businesses and residents of the area as well as provide a more fair and appropriate regulatory solution than holding the entire county accountable as the air quality data clearly shows substantial attainment with the 2008 standard in large portions of the county.

Response 4: As discussed in the previous response, in this action, EPA is meeting its statutory obligation under section 181(b)(2) of the CAA. This action does not grant EPA the authority to reopen the boundary determinations that were made when the Sheboygan area was designated as nonattainment for the 2008 ozone standard.⁷ However, EPA and the states are currently in the process of designating areas under the 2015 ozone standard. The arguments presented by the commenter as well as other supporting information may be provided by the State to support its boundary recommendations for the 2015 ozone NAAQS and would be considered by EPA when finalizing area designations and boundaries for that ozone standard.

Comment 5: Reclassification to moderate increases the emission offsets required for new and modified major sources, which could restrict future growth for sources in the Sheboygan area. In addition, the majority of ozone precursor emissions in the Sheboygan area are located downwind of the Kohler Andrae ozone monitor. These facilities may be subject to increased regulations even though they are not likely contributing on days with higher ozone concentrations at the Kohler Andrae monitor.

Response 5: EPA acknowledges that a reclassification to moderate increases emission offsets required for new and modified major sources from 1.1 to 1 (for marginal areas) to 1.15 to 1 (for moderate areas). This offset ratio is established by section 181(b)(5) of the CAA. Increased offset ratios are intended to mitigate the impact of new ozone precursor sources to an existing ozone air quality problem and to avoid the propagation of this ozone problem to areas downwind of the violating monitoring site.

Comment 6: EPA should not finalize this action. Wisconsin's lakeshore air quality is heavily impacted by ozone precursors originating from out of state. The Sheboygan area, in particular, has long suffered the consequences of diminished air quality and resulting nonattainment due to emissions originating beyond Wisconsin's borders. To meet its CAA obligations, Wisconsin has already taken a wide range of actions to reduce emissions in order to improve the air quality of the Sheboygan area. Source apportionment modeling from the Lake Michigan Air Directors Consortium (LADCO) has suggested that the entire State of Wisconsin contributes less than 10% of the ozone monitored in the Sheboygan area. Any further actions taken by the state to address moderate area planning requirements for this NAAQS are unlikely to significantly improve the Sheboygan area's air quality. EPA must expeditiously and more completely address the contributions of upwind state emissions to this region of Wisconsin.

Response 6: EPA readily acknowledges the role interstate transport of precursors and ozone pollution plays in the efforts of downwind areas to attain and maintain the NAAQS. Section 110(a)(2)(D) of the CAA specifically contains provisions requiring states to address their contribution to nonattainment and maintenance of the NAAQS in other states. CAA section 110(a)(2)(D)(i)(I) requires each state in its SIP to prohibit emissions that will significantly

contribute to nonattainment of a NAAQS, or interfere with maintenance of a NAAQS, in another state. Under section 110(a)(2)(D)(i)(I), each state is required to submit to the EPA new or revised SIPs that contain adequate provisions "prohibiting, consistent with the provisions of this subchapter, any source or other type of emissions activity within the state from emitting any air pollutant in amounts which will . . . contribute significantly to nonattainment in, or interfere with maintenance by, any other state with respect to any such national primary or secondary ambient air quality standard."

EPA has taken a number of steps to fulfill its statutory obligation to enforce CAA section 110(a)(2)(D), or the "good neighbor" provision, including the NO_x SIP Call, the Clean Air Interstate Rule, and the Cross-State Air Pollution Rule (CSAPR). Most recently, on October 26, 2016 (81 FR 74504), EPA updated CSAPR specifically to address the 2008 ozone NAAQS with tightened ozone NO_x emission budgets designed to achieve emission reductions in upwind states before the July 2018 moderate area attainment date.⁸

In addition, in recognition of the regional nature of ozone formation and transport, the Lake Michigan Air Directors Consortium was created to provide a forum for the states surrounding Lake Michigan to work cooperatively to develop attainment strategies for the entire Lake Michigan region. EPA continues to encourage the states to work cooperatively through this forum to reach attainment goals throughout the region.

Nevertheless, as noted previously, the agency's mandatory duty to make determinations of attainment or failure to attain the NAAQS under section 181(b)(2) of the CAA exists regardless of the nature or effect of transported emissions on monitored air quality data in a given nonattainment area.

Comment 7: EPA's proposed rule states "moderate nonattainment areas are required to attain the standard 'as expeditiously as practicable' but no later than six years after the initial designation as nonattainment (which, in the case of the Sheboygan area, would be July 20, 2018)." EPA is proposing to require submission of the necessary

⁸In updating CSAPR to address the 2008 ozone standard, EPA established ozone season NO_x emissions budgets of 14,601 tons for Illinois and 23,303 tons for Indiana. See 81 FR 74504, 74508 (October 26, 2016). This tightened the CSAPR emission budgets of 21,208 tons for Illinois and 46,175 tons for Indiana, which had been established to address the 1997 ozone standard. See 76 FR 48208, 48262–63 (August 8, 2011).

⁷ 77 FR 30088 (May 21, 2012).

moderate area SIP revisions no later than January 1, 2017. EPA is unlikely to finalize a reclassification until just weeks before the proposed January 1, 2017 due date. This is insufficient time for a state to complete all the actions needed to meet moderate nonattainment area requirements for this NAAQS. EPA must finalize a more realistic deadline and ensure the state is not penalized for any deficiency relative to that date.

Response 7: EPA recognizes the extremely tight timeframe and is committed to working with Wisconsin to prepare SIP revisions in a timely manner. EPA's ability to extend deadlines for areas being reclassified as required by CAA section 181(b)(2) is governed by section 182(i) of the CAA, which directs that the state shall meet the new requirements according to the schedules prescribed in those requirements, but provides "that the Administrator may adjust any applicable deadlines (other than attainment dates) to the extent such adjustment is necessary or appropriate to assure consistency among the required submissions." CAA section 182(b), as interpreted by 40 CFR 51.1100 *et seq.*, describes the required SIP revisions and associated deadlines for a nonattainment area classified as moderate at the time of the initial designations. However, these SIP submission deadlines (e.g., three years after the effective date of designation, or July 2015, for submission of an attainment plan and attainment demonstration) have already passed. Accordingly, EPA proposed to exercise its discretion under CAA section 182(i) to adjust the moderate SIP submittal deadlines for the Sheboygan area.

In determining an appropriate deadline for the moderate area SIP revisions for the Sheboygan area, EPA had to consider that pursuant to 40 CFR 51.1108(d), the state must provide for implementation of all control measures needed for attainment no later than the beginning of the attainment year ozone season. The attainment year ozone season is the complete ozone season immediately preceding a nonattainment area's attainment date. In the case of nonattainment areas classified as moderate for the 2008 ozone NAAQS, the attainment year ozone season is the 2017 ozone season (40 CFR 51.1100(h)). Because an extension of the attainment date is not appropriate here, and control measures for other moderate areas are to be implemented no later than the beginning of the 2017 ozone season, EPA determined it would not be appropriate to adjust the attainment date beyond the beginning of the 2017 ozone season for the Sheboygan area.

Further, because ozone seasons begin as early as January 1, EPA determined that a SIP submission deadline of January 1, 2017, is the latest submittal deadline that allows all states to meet 40 CFR 51.1108(d) requirements, and thus assures consistency as directed by 182(i).

While we acknowledge that the timeframe for submitting the required SIP revisions is tight, states have not been prohibited from beginning development of moderate area SIP revisions prior to finalization of the reclassification. In fact, although reclassification of the Sheboygan area is being finalized in this rule, Wisconsin has been aware that EPA would propose to reclassify the Sheboygan area as moderate from the time that 2015 monitoring data became available showing that the Sheboygan area would not qualify for an additional one-year extension. EPA has consistently encouraged states to begin working on moderate area SIP revision requirements ahead of finalization of the reclassification required by the CAA.

Even before the 2015 monitoring data was available, the state was aware that, if a second one-year extension was not appropriate, the state would have very little time to develop and implement an acceptable attainment plan. EPA's policy regarding attainment date extensions and reclassifications of marginal areas⁹ explicitly cautions: "When requesting an extension, States should consider the consequences of eventually not attaining the NAAQS. Although areas can request two 1-year extensions, those that ultimately fail to attain the NAAQS will be bumped up to at least a moderate classification Consequently, areas that are bumped up will be under very tight timeframes to implement the new SIP requirements, in addition to achieving the reductions to meet the new attainment date." Moreover, in providing the initial one-year extension to the Sheboygan area, EPA was clear that "it would be prudent for the state to begin preparing for the possibility that the area may not attain by the July 20, 2016, attainment date." (81 FR at 26703) Accordingly, we believe the area was provided adequate notice that time to develop and submit a moderate area attainment plan was likely to be short given that the moderate area attainment year ozone season is the 2017 ozone season for the 2008 ozone NAAQS and that other

moderate areas were also required to submit their plans in January 2017.

Comment 8: A reclassification to moderate would require the fourth highest ozone value for 2017 to be at or below 0.059 ppm. This would require ozone values to fall below background levels, and absolutely no action available to either the State of Wisconsin or EPA could achieve such a result. EPA is requiring the State of Wisconsin to undergo a time consuming SIP drafting effort in an extremely limited timeframe with no possibility of success. This requirement is as impractical as it is unfair.

Response 8: As discussed in the response to comment 7, the State of Wisconsin has been aware of its potential obligation to meet moderate SIP requirements from the time that the area failed to attain the 2008 ozone standard and the State requested and qualified for a one-year attainment date extension. Further, EPA disagrees that reclassification to moderate would require the fourth highest 8-hour daily average ozone value for 2017 to be at or below 0.059 ppm at the Kohler Andrae monitor. As discussed more completely in response to comment 1, under EPA regulations at 40 CFR part 50, appendix P, the 2008 ozone NAAQS is attained at a monitoring site when the three-year average of the annual fourth-highest daily maximum eight-hour average ambient air quality ozone concentration is less than or equal to 0.075 ppm, when truncated after the third decimal place. The fourth highest 8-hour daily average ozone value for 2015 is 0.081. Preliminary data indicate that the fourth highest 8-hour daily average ozone value for 2016 is 0.085. Thus, providing the preliminary 2016 data remains unchanged upon certification, a fourth highest 8-hour daily average ozone value of 0.061 ppm for 2017 would result in a design value of 0.075 at the Kohler Andres monitor, which would be in attainment of the 2008 ozone standard.

In addition, even if the design value at the Kohler Andres monitor is not attaining the 2008 ozone standard with certified 2015–2017 monitoring data, Wisconsin could still request a one-year extension of the moderate area attainment date for the Sheboygan area. EPA could grant such an extension provided that the State meets the requirements of section 181(a)(5) of the CAA. Subsequently, if the area continued to violate the standard with 2018 data, Wisconsin could request a second one-year attainment date extension, which EPA could grant if the State meets the requirements of section 181(a)(5). It should be noted that, if the

⁹ Memorandum Dated February 3, 1994, from D. Kent Berry entitled "Procedures for Processing Bump Ups and Extension Requests for Marginal Ozone Nonattainment Areas."

Sheboygan area should fail to qualify for a one-year extension (or an additional one-year extension) and/or ultimately fails to attain the 2008 ozone standard by its attainment deadline, EPA would be required to meet its statutory obligation under section 181(b)(2) of the CAA to determine that the area failed to attain the ozone standard by its attainment deadline. This would result in the area being reclassified by operation of law to the next “highest” classification, in this case from moderate to serious.

Alternately, the State of Wisconsin could decide that additional time is needed to adopt the emissions control plan, seek emission controls from upwind states, and implement additional emission controls. In that case, Wisconsin could request that the Sheboygan area be reclassified to serious nonattainment at this time. This would result in establishing a serious area attainment date of July 20, 2021 for the Sheboygan area (rather than the July 20, 2018 moderate attainment deadline), and require the area to meet the serious level requirements of section 182(c) of the CAA while giving the state additional time to develop an ozone attainment plan for the Sheboygan area.

III. What action is EPA taking?

EPA is determining that the Sheboygan area failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2016, and is not eligible for an additional one-year attainment date extension. Therefore, upon the effective date of this rule, the Sheboygan area will be reclassified by operation of law to moderate nonattainment for the 2008 ozone standard. EPA is requiring Wisconsin to submit SIP revisions to address moderate area requirements by January 1, 2017.

IV. Good Cause Exemption Under the Administrative Procedure Act (APA)

Under APA section 553(d)(3), 5 U.S.C. 553(d)(3), an agency may make a rule immediately effective “for good cause found and published with the rule.” The EPA believes that there is “good cause” to make this rule effective upon publication in the **Federal Register** in order to avoid an impractical outcome and to provide time for the state to meet the relevant statutory and regulatory deadlines. Specifically, for any areas classified as moderate nonattainment for the 2008 ozone NAAQS, the EPA has interpreted CAA section 182, in conjunction with 40 CFR 51.1108(d) and 51.1112(a)(3), to require states to submit their moderate area SIP revisions and comply with RACT implementation

requirements by January 1, 2017. While EPA acknowledges and addresses comments related to the compressed timeline associated with this action elsewhere in this notice, the agency believes that establishing an effective date of this action simultaneous with the date of publication will reconcile the competing statutory interests by eliminating a potentially impractical outcome in which the area might otherwise be subject to moderate nonattainment area statutory and regulatory deadlines that would already have passed prior to the normal 30 days post-publication effective date. EPA made clear in the action providing the initial extension for this area that absent a second extension, a state would be under a tight deadline to develop an acceptable attainment plan. See 81 FR 26703. When 2015 monitoring data became available earlier this year showing that the Sheboygan area would not be eligible for a second one-year extension, the state had every reason to anticipate and prepare for reclassification. In addition, EPA published its proposed rule for this reclassification on September 28, 2016, and is providing direct notice to the state of this final action simultaneous with signature of this rule. Accordingly, the EPA finds that the preparation time actually available to the state and the need to reconcile the statutory interest in reclassification with the deadlines for submission of moderate area SIP revisions and compliance with RACT implementation requirements, constitute good cause under 5 U.S.C. 553(d)(3) to make this final action effective upon publication.

V. Statutory and Executive Order Reviews

Under section 181(b)(2) of the CAA, a determination of nonattainment is a factual determination based upon air quality considerations and the resulting reclassification must occur by operation of law. A determination of nonattainment and the resulting reclassification of a nonattainment area by operation of law under section 181(b)(2) does not in and of itself create any new requirements, but rather applies the requirements contained in the CAA. For these reasons, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule does not have tribal implications because it will not have a substantial direct effect on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this

action must be filed in the United States Court of Appeals for the appropriate circuit by February 17, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 81

Environmental protection, Administrative practice and procedure, Air pollution control, Designations and classifications, Intergovernmental relations, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: December 7, 2016.
Robert A. Kaplan,
Acting Regional Administrator, Region 5.

Part 81, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

- 1. The authority citation for part 81 continues to read as follows:
Authority: 42 U.S.C. 7401 *et seq.*
- 2. Section 81.350 is amended by revising the entry for Sheboygan County, WI in the table entitled “Wisconsin—2008 8-Hour Ozone NAAQS (Primary and secondary)” to read as follows:

§ 81.350 Wisconsin.
* * * * *

WISCONSIN—2008 8-HOUR OZONE NAAQS
[Primary and secondary]

Designated area	Designation		Classification	
	Date ¹	Type	Date ¹	Type
* * *	* * *	* * *	* * *	* * *
Sheboygan County, WI; ² Sheboygan County.	1/18/2017	Nonattainment	1/18/2017	Moderate.
* * *	* * *	* * *	* * *	* * *

¹ This date is July 20, 2012, unless otherwise noted.
² Excludes Indian country located in each area, unless otherwise noted.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2015–0658; FRL–9955–45]

Flumioxazin; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of flumioxazin in or on multiple commodities which are identified and discussed later in this document. The Inter-Regional Research Project Number 4 (IR–4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).
DATES: This regulation is effective December 19, 2016. Objections and requests for hearings must be received on or before February 17, 2017, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the SUPPLEMENTARY INFORMATION).
ADDRESSES: The docket for this action, identified by docket identification (ID)

number EPA–HQ–OPP–2015–0658, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.
FOR FURTHER INFORMATION CONTACT: Michael Goodis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; Main telephone number: (703) 305–7090; email address: RDfRNotices@epa.gov.
SUPPLEMENTARY INFORMATION:
I. General Information
A. Does this action apply to me?
You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following

list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?
You may access a frequently updated electronic version of EPA’s tolerance regulations at 40 CFR part 180 through the Government Printing Office’s e-CFR site at http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.
C. How can I file an objection or hearing request?
Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must

identify docket ID number EPA-HQ-OPP-2015-0658 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 17, 2017. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2015-0658, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of November 23, 2015 (80 FR 72941) (FRL-9936-73), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP#5E8399) by Interregional Research No. 4 (IR-4), Rutgers, The State University of New Jersey, 500 College Road East, Suite 201-W, Princeton, NJ 08540. The Agency inadvertently republished this notice on March 16, 2016 (81 FR 14030) (FRL-9942-86). The petition requested that 40 CFR 180.568 be amended by establishing tolerances for residues of the herbicide flumioxazin, 2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isindole-1,3(2H)-dione, in or on berry, low growing, subgroup 13-07G at 0.07 parts per million (ppm); caneberry,

subgroup 13-07A at 0.4 ppm; citrus, group 10-10 at 0.02 ppm; citrus oil at 0.1 ppm; clover, forage at 0.02 ppm; clover, hay at 0.15 ppm; fruit, pome, group 11-10 at 0.02 ppm; fruit, small vine climbing, except for fuzzy kiwifruit, subgroup 13-07F at 0.02 ppm; fruit, stone, group 12-12 at 0.02 ppm; head and stem brassica, subgroup 5A at 0.02 ppm; nut, tree, group 14-12 at 0.02 ppm; onion, bulb subgroup 3-07A at 0.02 ppm; and vegetable, fruiting, group 8-10 at 0.02 ppm.

The petitioner also requested the removal of the following established tolerances based on the establishment of tolerances for the commodities established in this action: Cabbage at 0.02 ppm; cabbage, Chinese, napa at 0.02 ppm; fruit, pome group 11 at 0.02 ppm; fruit, stone, group 12 at 0.02 ppm; garlic at 0.02 ppm; grape at 0.02 ppm; nut, tree group 14 at 0.02 ppm; okra at 0.02 ppm; onion, bulb at 0.02 ppm; pistachio at 0.02 ppm; shallot bulb at 0.02 ppm; strawberry at 0.07 ppm; and vegetable, fruiting group 8 at 0.02 ppm. That document referenced a summary of the petition prepared by Valent USA Corporation, the registrant, which is available in the docket, <http://www.regulations.gov>. Comments were received on these notices of filings. EPA's response to these comments is discussed in Unit IV.C.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue"

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has

sufficient data to assess the hazards of and to make a determination on aggregate exposure for flumioxazin including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with flumioxazin follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

Toxicity associated with flumioxazin includes anemia and effects on the cardiovascular system and liver. Specifically, alterations in hemoglobin parameters were observed in rats, as well as increased renal toxicity in male rats, and increased absolute and relative liver weights and increased alkaline phosphate values were seen in dogs. No evidence of neurotoxicity was seen in male or female rats in the acute or subchronic neurotoxicity studies. The oral and dermal developmental rat studies showed evidence of increased quantitative susceptibility of fetuses, as cardiovascular anomalies (ventral septal defects) were found. These developmental effects in the offspring were more severe and seen at doses lower than those that caused parental and systemic toxicity. The regulatory endpoints for flumioxazin are protective of this increased susceptibility, however, so there is low concern and no residual uncertainties for these effects. Flumioxazin was negative for mutagenicity in most of the available studies, however, there were aberrations in a chromosomal aberration assay. The lack of carcinogenicity in mice and rats permits flumioxazin to be classified as "not likely to be carcinogenic to humans."

Specific information on the studies received and the nature of the adverse effects caused by flumioxazin as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.regulations.gov> in document Flumioxazin: Human Health Risk Assessment for the New Uses on Clover Grown for Seed; Citrus Group 10-10; Caneberry Subgroup 13-07A; Head and Stem Brassica Subgroup 5A; and Crop Group Expansion for Fruiting Vegetable Group 8-10; Low Growing Berry Subgroup 13-07G; Nut Tree Group 14-12; Onion Bulb Subgroup 3-07A; Pome

Fruit Group 11–10; Small Fruit, Vine Climbing, Except Fuzzy Kiwifruit Subgroup 13–07F; and Stone Fruit Group 12–12 at pages 15–22 and 42–55 in docket ID number EPA–HQ–OPP–2015–0658.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/ safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/assessing-human-health-risk-pesticides>.

A summary of the toxicological endpoints for flumioxazin used for human risk assessment is discussed in Unit III, B of the final rule published in the **Federal Register** of September 21, 2012 (77 FR 58493) (FRL–9358–3).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to flumioxazin, EPA considered exposure under the petitioned-for tolerances as well as all existing flumioxazin tolerances in 40 CFR 180.568. EPA assessed dietary exposures from flumioxazin in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure.

Such effects were identified for flumioxazin for females 13–49. In estimating acute dietary exposure, EPA used food consumption information from the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM–FCID) Version 3.16. This software uses 2003–2008 food consumption data from the U.S. Department of Agriculture's (USDA's) National Health and Nutrition Examination Survey, What We Eat in America, (NHANES/WWEIA). As to residue levels in food, EPA incorporated tolerance-level residues, 100 percent crop treated (PCT) for all commodities and DEEM–FCID version 3.16.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the DEEM–FCID Version 3.16. This software uses 2003–2008 food consumption data from USDA's NHANES/WWEIA. As to residue levels in food, EPA incorporated tolerance-level residues, 100 PCT for all commodities.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that flumioxazin does not pose a cancer risk to humans. Therefore, a dietary exposure assessment for the purpose of assessing cancer risk is unnecessary.

iv. *Anticipated residue and percent crop treated (PCT) information.* EPA did not use anticipated residue and/or PCT information in the dietary assessment for flumioxazin. Tolerance level residues and/or 100% CT were assumed for all food commodities.

2. *Dietary exposure from drinking water.* The Agency used screening level water exposure models in the dietary exposure analysis and risk assessment for flumioxazin in drinking water. These simulation models take into account data on the physical, chemical, and fate/transport characteristics of flumioxazin. The estimated drinking water concentrations (EDWCs) are based on aquatic rates of the residues of concern for flumioxazin and its major degradates (482–HA, and APF), expressed as flumioxazin equivalents. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/about-water-exposure-models-used-pesticide>.

Based on the First Index Reservoir Screening Tool (FIRST) model, the EDWCs in surface water for acute exposures are 400 parts per billion (ppb) for flumioxazin only and for chronic exposures are estimated to be 9.4 ppb, 21.6 ppb, and 110.1 ppb for flumioxazin, 482–HA and APF degradates, respectively, for a total

concentration of 141 ppb. Based on the Screening Concentration in Ground Water (SCI–GROW) model, for both acute and chronic (non-cancer) exposures, the EDWCs of 482–HA and APF are estimated to be 45.27 ppb and 2.66 ppb, respectively, for ground water. EDWCs of flumioxazin are estimated to be negligible in ground water for chronic exposures.

Estimates of drinking water concentrations were directly entered into the dietary exposure model as follows. The peak day zero of 0.400 ppm for flumioxazin (degradates 482–HA and APF were not detected) was used to assess the contribution to drinking water for the acute dietary risk assessment, and the day 30 total of 0.141 ppm for flumioxazin, 482–HA and APF degradates was used to assess the contribution to drinking water for the chronic dietary risk assessment.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets). Flumioxazin is currently registered for the following uses that could result in residential exposures: Turf, gardens and trees, and aquatic weeds. EPA assessed residential exposure with the assumption that homeowner handlers wear shorts, short-sleeved shirts, socks, and shoes, and that they complete all tasks associated with the use of a pesticide product including mixing/loading, if needed, as well as the application. Residential handler exposure scenarios for both dermal and inhalation are considered to be short-term only, due to the infrequent use patterns associated with homeowner products.

EPA uses the term “post-application” to describe exposure to individuals that occur as a result of being in an environment that has been previously treated with a pesticide. Flumioxazin can be used in many areas that can be frequented by the general population including residential areas, lakes, and ponds. As a result, individuals can be exposed by entering these areas if they have been previously treated. Therefore, short-term and intermediate-term dermal post-application exposures and risks were assessed for adults and children. In addition, oral post-application exposures and risks were assessed for children to be protective of possible hand-to-mouth, object-to-mouth, and soil ingestion activities that may occur on treated turf areas. Further information regarding EPA standard assumptions and generic inputs for

residential exposures may be found at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/standard-operating-procedures-residential-pesticide>.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider “available information” concerning the cumulative effects of a particular pesticide’s residues and “other substances that have a common mechanism of toxicity.”

EPA has not found flumioxazin to share a common mechanism of toxicity with any other substances, and flumioxazin does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that flumioxazin does not have a common mechanism of toxicity with other substances. For information regarding EPA’s efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA’s Web site at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There is evidence of increased quantitative susceptibility of fetuses in the oral and dermal developmental rat studies, where cardiovascular abnormalities occurred in the absence of maternal toxicity. The rat reproduction study also showed evidence of qualitative and quantitative post-natal susceptibility since reproductive effects in offspring were more severe and were seen at lower doses than those that caused parental/systemic toxicity. Even with this observed increased

susceptibility, the Agency has concluded there is a low concern and no residual uncertainties for pre- and/or postnatal toxicity because the developmental toxicity NOAELs/LOAELs are well-characterized after oral and dermal exposure, and the offspring toxicity NOAEL and LOAEL are well characterized in the reproduction study.

Furthermore, the doses and endpoints have been selected from the developmental and reproductive toxicity studies for risk assessment of the relevant exposed populations (e.g., pregnant females and children), with the exception of the chronic dietary endpoint, for which a chronic study was selected. Therefore, regulatory endpoints for flumioxazin are protective of the increased susceptibility and there are no residual concerns for these effects.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1X for oral and dermal exposures, but retained at 10X for inhalation exposures due to the lack of an inhalation study. That decision is based on the following findings:

i. The toxicity database for flumioxazin is sufficient for assessing the toxicity and characterizing the hazard of flumioxazin. An inhalation study is needed to characterize more completely the potential for adverse effects associated with the inhalation route of exposure; therefore, in order to account for any uncertainty attending the use of the dose and endpoint from an oral rat developmental toxicity study with an estimated 100% default absorption factor, the Agency is retaining the 10X FQPA safety factor for assessing inhalation risk.

ii. There is no indication that flumioxazin is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional UFs to account for neurotoxicity.

iii. There is evidence that flumioxazin may result in increased susceptibility in *in utero* rats or rabbits in the prenatal developmental studies or in young rats in the 2-generation reproduction study. The Agency concluded that while there is an increased susceptibility, there is a low concern and no residual uncertainties for pre-and/or postnatal toxicity because the developmental toxicity NOAELs/LOAELs are well characterized after oral and dermal exposure; the offspring toxicity NOAEL and LOAEL are well characterized in the reproduction study; and the doses and endpoints have been selected from the developmental and reproductive

toxicity studies for the relevant populations, except for the chronic dietary endpoint, for which a chronic study was chosen. Therefore, the regulatory endpoints for flumioxazin are protective of the increased susceptibility seen in the developmental and reproduction studies, and there are no residual concerns for these effects.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100 PCT and tolerance-level residues. EPA made conservative (protective) assumptions in the ground and surface water modeling used to assess exposure to flumioxazin in drinking water. EPA used similarly conservative assumptions to assess postapplication exposure of children as well as incidental oral exposure of toddlers. These assessments will not underestimate the exposure and risks posed by flumioxazin.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to flumioxazin will occupy 76% of the aPAD for females 13–49 years old, the population group receiving the greatest exposure.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to flumioxazin from food and water will utilize 44% of the cPAD for all infants <1 year old, the population group receiving the greatest exposure. Based on the explanation in Unit III.C.3., regarding residential use patterns, chronic residential exposure to residues of flumioxazin is not expected.

3. *Short and intermediate-term risk.* Short-term and intermediate-term aggregate exposure takes into account short-term and intermediate residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Flumioxazin is currently registered for uses that could result in short-term and

intermediate residential exposures, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term and intermediate-term residential exposures to flumioxazin. Since the Agency has determined that the short-term and intermediate-term points of departure are the same the aggregate risks are the same for both short-term and intermediate-term exposures.

Using the exposure assumptions described in this unit for short-term and intermediate-term exposures, EPA has concluded the combined short-term and intermediate-term food, water, and residential exposures result in aggregate MOEs of 110 for adult females 13–49 years and 200 for children less than two years. Because EPA's level of concern for flumioxazin is a MOE of 100 or below, these MOEs are not of concern.

4. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, flumioxazin is not expected to pose a cancer risk to humans.

5. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to flumioxazin residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (gas chromatography (GC) using a nitrogen phosphorous detector (NPD)) is available to enforce the tolerance expression. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: residuemethods@epa.gov.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting

organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level. The Codex has not established any MRLs for flumioxazin.

C. Response to Comments

EPA received five comments to the two published Notice of Filings. Two comments stated, in part and without any supporting information, that EPA should deny this petition because it is a harmful and toxic chemical with no benefits. The Agency recognizes that some individuals believe that pesticides should be banned on agricultural crops. The existing legal framework provided by section 408 of the FFDCA, however, states that tolerances may be set when persons seeking such tolerances or exemptions have demonstrated that the pesticide meets the safety standard imposed by that statute. EPA has assessed the effects of this chemical on human health and determined that aggregate exposure to it will be safe. These comments provide no information to support an alternative conclusion.

Another comment submitted by the Center for Biological Diversity was primarily concerned about the environmental risks and Agency compliance with any relevant obligations under the Endangered Species Act. This comment is not relevant to the Agency's evaluation of safety of the flumioxazin tolerances; section 408 of the FFDCA focuses on potential harms to human health and does not permit consideration of effects on the environment. Additional comments were submitted in support of this petition by Interregional Research Project Number 4 (IR–4) and Dr. A. Stanley Culpepper from the University of Georgia Cooperative Extension.

D. Revisions to Petitioned-For Tolerances

The petitioner proposed a tolerance of flumioxazin on caneberries at 0.4 ppm. Both the petitioner and the Agency used the Organization for Economic Cooperation & Development (OECD) spreadsheet calculator; however, the Agency did not consider the two Oregon trials to be independent since they were conducted at the same location on the same variety of raspberries and applications were made within 30 days of each other. Therefore, the four samples were accounted as two, resulting in an Agency recommended tolerance of 0.5 ppm. All other

tolerances are recommended to be at the same levels as petitioned.

The petitioner proposed a tolerance for head and stem brassica, subgroup 5A at 0.02 ppm; however, the EPA is establishing a tolerance for Vegetable, brassica, head and stem, group 5–16 at 0.02 ppm. In the **Federal Register** of May 3, 2016 (81 FR 26471) (FRL–9944–87) establishing the Vegetable, brassica, head and stem, group 5–16, EPA indicated that, for existing petitions for which a Notice of Filing had been published, the Agency would attempt to conform these petitions to the rule. Therefore, consistent with this rule, EPA is establishing tolerances on Vegetable, brassica, head and stem, group 5–16 rather than head and stem brassica, subgroup 5A. EPA concludes it is reasonable to revise the petitioned-for tolerance so that they agree with the recent crop grouping revisions because (1) the new crop group includes the same commodities as the subgroup except two commodities are no longer in the group and (2) the representative commodities for the revised crop groups/subgroups have not changed.

Finally, the Agency is establishing tolerances for clover, forage and clover, hay with regional registrations in (c) since residue field trial data were only submitted to support registration in Idaho, Washington, and Oregon.

V. Conclusion

Therefore, tolerances are established for residues of flumioxazin, 2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isoindole-1,3(2H)-dione, in or on tolerances for residues of the herbicide flumioxazin, 2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isoindole-1,3(2H)-dione, in or on, berry, low growing, subgroup 13–07G at 0.07 parts per million (ppm); caneberry, subgroup 13–07A at 0.5 ppm; citrus, group 10–10 at 0.02 ppm; fruit, pome, group 11 at 0.02 ppm; fruit, stone, group 12 at 0.02 ppm; nut, tree, group 14–12 at 0.02 ppm; onion, bulb subgroup 3–07A at 0.02 ppm; small fruit, vine climbing, except for fuzzy kiwifruit, subgroup 13–07F at 0.02 ppm; vegetable, brassica, head and stem, group 5–16 at 0.02 ppm; and vegetable, fruiting, group 8–10 at 0.02 ppm.

Additionally, EPA is establishing tolerances with regional registrations for clover, forage at 0.02 ppm and clover, hay at 0.15 ppm. Finally, the EPA is removing tolerances for Cabbage at 0.02 ppm; cabbage, Chinese, napa at 0.02 ppm; fruit, pome group 11 at 0.02 ppm; fruit, stone, group 12 at 0.02 ppm; garlic at 0.02 ppm; grape at 0.02 ppm; nut, tree

group 14 at 0.02 ppm; okra at 0.02 ppm; onion, bulb at 0.02 ppm; pistachio at 0.02 ppm; shallot bulb at 0.02 ppm; strawberry at 0.07 ppm and vegetable, fruiting group 8 at 0.02 ppm since these will be superseded by this action.

VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled “Regulatory Planning and Review” (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled “Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175,

entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 6, 2016.

Daniel J. Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Revise § 180.568 to read as follows:

§ 180.568 Flumioxazin; tolerances for residues.

(a) *General.* Tolerances are established for residues of flumioxazin, 2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isindole-1,3(2H)-dione, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only flumioxazin.

Commodity	Parts per million
Alfalfa, forage	3.0
Alfalfa, hay	8.0
Almond, hulls	0.70

Commodity	Parts per million
Artichoke, globe	0.02
Asparagus	0.02
Berry, low growing, subgroup 13–07G	0.07
Bushberry subgroup 13–07B	0.02
Caneberry, subgroup 13–07A	0.50
Citrus, group 10–10	0.02
Citrus, oil	0.1
Corn, field, forage	0.02
Corn, field, grain	0.02
Corn, field, stover	0.02
Cotton, gin byproducts	0.60
Cotton, undelinted seed	0.02
Fish, freshwater	1.5
Fruit, pome, group 11–10	0.02
Fruit, small vine climbing, except for fuzzy kiwifruit, subgroup 13–07F	0.02
Fruit, stone, group 12–12	0.02
Grain, aspirated fractions	100
Hop, dried cones	0.05
Leaf petioles subgroup 4B	0.02
Nut, tree, group 14–12	0.02
Olive	0.02
Onion, bulb subgroup 3–07A	0.02
Pea and bean, dried shelled, except soybean, subgroup 6C	0.07
Peanut	0.02
Peppermint, tops	0.04
Pomegranate	0.02
Prickly pear, fruit	0.07
Prickly pear, pads	0.06
Rapeseed subgroup 20A	0.40
Soybean forage	0.03
Soybean hay	0.02
Soybean, seed	0.02
Spearmint, tops	0.04
Sugarcane, cane	0.20
Sunflower subgroup 20B	0.50
Vegetable, brassica, head and stem, group 5–16	0.02
Vegetable, cucurbit, group 9	0.03
Vegetable, fruiting, group 8–10	0.02
Vegetable, tuberous and corm, subgroup 1C	0.02
Wheat, forage	0.02
Wheat, grain	0.40
Wheat, hay	0.02
Wheat, straw	6.0

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances are established for residues of flumioxazin, 2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isindole-1,3(2H)-dione, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only flumioxazin.

Commodity	Parts per million
Clover, forage	0.02
Clover, hay	0.15

(d) *Indirect or inadvertent residues.*
[Reserved]

[FR Doc. 2016–30467 Filed 12–16–16; 8:45 am]

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 59

RIN 937–AA04

Compliance With Title X Requirements by Project Recipients in Selecting Subrecipients

AGENCY: Office of Population Affairs, Office of the Secretary, Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Department is amending the regulations that apply to Title X Project Grants for Family Planning Services. The final rule amends eligibility requirements to require that no recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons other than its ability to provide Title X services.

DATES: This Rule is effective on January 18, 2017.

FOR FURTHER INFORMATION CONTACT: Susan B. Moskosky, MS, WHNP–BC, Office of Population Affairs (OPA), 200 Independence Avenue SW., Suite 716G, Washington, DC 20201; telephone (240) 453–2800; email: OPA_Resource@hhs.gov.

SUPPLEMENTARY INFORMATION: On September 7, 2016, The Department issued a proposed rule seeking comment on amending eligibility criteria under the Title X family planning services program so that no recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons unrelated to its ability to provide Title X services effectively. 81 FR 61639. As reiterated below, the proposed rule set forth the need for the amendment and sought public input.

I. Background

A. Title X Background

As discussed in the Notice of Proposed Rule Making (NPRM), the Title X Family Planning Program, Public Health Service Act (PHSA) secs. 1001 *et seq.* [42 U.S.C. 300], was enacted in 1970 as part of the Public Health Service Act. Administered by the Office of Population Affairs (OPA) within the Office of the Assistant Secretary for Health (OASH), Title X is the only federal program focused solely on

providing family planning and related preventive services. In 2015, more than 4 million individuals received services through more than 3,900 Title X-funded health centers.¹

Title X serves women, men, and adolescents to enable individuals to determine freely the number and spacing of children. By law, services are provided to low-income individuals at no or reduced cost. Services provided through Title X-funded health centers assist in preventing unintended pregnancies and achieving pregnancies that result in positive birth outcomes. These services include contraceptive services, pregnancy testing and counseling, preconception health services, screening and treatment for sexually transmitted diseases (STD), HIV testing and referral for treatment, services to aid with achieving pregnancy, basic infertility services, and screening for cervical and breast cancer. By statute, Title X funds are not available to programs where abortion is a method of family planning (PHSA sec. 1008). Additionally, Title X implementing regulations require that all pregnancy options counseling shall be neutral and nondirective. 42 CFR 59.5(a)(5)(ii).

The Title X statute authorizes the Secretary “to make grants to and enter into contracts with public or nonprofit private entities to assist in the establishment and operation of voluntary family planning projects which shall offer a broad range of acceptable and effective family planning methods and services (including natural family planning methods, infertility services, and services for adolescents).” PHSA sec. 1001(a). In addition, in awarding Title X grants and contracts, the Secretary must “take into account the number of patients to be served, the relative need of the applicant, and its capacity to make rapid and effective use of such assistance.” PHSA sec. 1001(b). The statute also requires that local and regional entities “shall be assured the right to apply for direct grants and contracts.” PHSA sec. 1001(b). The statute delegates rulemaking authority to the Secretary to set the terms and conditions of these grants and contracts. PHSA sec. 1006. These regulations were last revised in 2000. 65 FR 41270 (July 3, 2000).

Title X regulations delineating the criteria used to decide which family planning projects to fund and in what amount, include, among other factors,

the extent to which family planning services are needed locally, the number of patients (and, in particular, low-income individuals) to be served, and the adequacy of the applicant’s facilities and staff. 42 CFR 59.7. Project recipients receive funds directly from the federal government following a competitive process. The project recipients may elect to provide Title X services directly, subaward funds to subrecipients, or both. The Department is responsible for monitoring and evaluating the project recipient’s performance and outcomes, and each project recipient that subawards to eligible subrecipients is responsible for monitoring the performance and outcomes of those subrecipients. The subrecipients must meet the same federal requirements as the project recipients, including being a public or private nonprofit entity, and adhering to all Title X and other applicable federal requirements. In the event of poor performance or noncompliance, a project recipient may take enforcement actions as described in the uniform grants rules at 45 CFR 75.371.

B. State Restrictions on Subrecipients

In the past several years, a number of states have taken actions to restrict participation by certain types of providers as subrecipients in the Title X program, for reasons other than the provider’s ability to provide Title X services. In at least several instances, this has led to disruption of services or reduction of services. Since 2011, 13 states have placed restrictions on or eliminated subawards with specific types of providers based on reasons other than their ability to provide Title X services. In several instances, these restrictions have interfered with the “capacity [of the applicant] to make rapid and effective use of [Title X federal] assistance.” PHSA sec. 1001(b). Moreover, states that restrict eligibility of subrecipients have caused limitations in the geographic distribution of services and decreased access to services through trusted providers.

States have restricted subrecipients from participating in the Title X program in several ways. Some states have employed a tiered approach to compete or distribute Title X funds, whereby entities such as comprehensive primary care providers, state health departments, or community health centers receive a preference in the distribution of Title X funds. This approach effectively excludes providers focused on reproductive health from receiving funds, even though they have been shown to provide higher quality services, such as preconception

¹ Fowler, C.I., Gable, J., Wang, J., & Lasater, B. (2016, August). Family Planning Annual Report: 2015 National Summary. Research Triangle Park, NC: RTI International.

services, and accomplish Title X programmatic objectives more effectively.^{2 3} For example, in 2011, Texas reduced its contribution to family planning services, and also re-competed subawards of Title X funds using a tiered approach. The combination of these actions decreased the Title X provider network from 48 to 36 providers, and the number of Title X clients served was reduced dramatically. Although another entity became the statewide project recipient in 2013, the number of Title X clients served decreased from 259,606 in 2011 to 166,538 in 2015.^{4 5} In other cases, states have prohibited specific types of providers from being eligible to receive Title X subawards, which has had a direct impact on service availability, primarily for low-income women. In some cases, experienced providers that have historically served large numbers of patients in major cities or geographic areas have been eliminated from participation in the Title X program. In Kansas, for example, following the exclusion of specific family planning providers in 2011, the number of clients, 87 percent of whom were low income (at or below 200 percent of the Federal Poverty Level), declined from 38,461 in 2011 to 24,047 in 2015, a decrease of more than 37 percent. As with the declines in Texas, this is a far greater decrease than the national average of 20 percent.^{6 7}

In New Hampshire, in 2011, the New Hampshire Executive Council voted not to renew the state's contract with a specific provider that was contracted to provide Title X family planning services for more than half of the state. To restore services to clients in the unserved part of the state, the

Department issued an emergency replacement grant, but there was significant disruption in the delivery of services, and for approximately three months, no Title X services were available to potential clients in a part of the state.

Most recently, in 2016 Florida enacted a law that would have gone into effect on July 1, 2016, prohibiting the state from making Title X subawards to certain family planning providers.⁸ In one county alone, 1,820 clients are served by the family planning provider that would have been excluded, and it is not clear how the needs of those clients would have been met.

None of these state restrictions have been related to the subrecipients' ability to deliver Title X services. Instead, these restrictions are based either on non-Title X funded health services offered or on other activities the providers may separately conduct using non-federal funds, or because of the provider's affiliation. The Title X program provides that the Secretary shall make awards for family planning services based on "the number of patients to be served, the extent to which family planning services are needed locally, the relative need of the applicant, and its capacity to make rapid and effective use of [Title X Federal] assistance." PHSA sec. 1001(b). Allowing project recipients, including states and other entities, to impose restrictions on subrecipients for reasons other than their ability to provide Title X services has been shown to have an adverse effect on the number of people receiving Title X services and the fundamental goals of the Title X program.

C. Litigation

As discussed in the NPRM, litigation concerning these restrictions has led to inconsistency across states in how recipients may choose subrecipients. As the restrictions vary, so have the statutory and constitutional issues raised in the cases.

II. Final Rule and Responses to Public Comments

A. Overview of the Final Rule

The Department is finalizing the proposed rule with modifications. After reviewing the relevant comments, the Department is eliminating the qualifier

"effectively" and changing "unrelated to" to "other than" in the regulatory language. The amendment now reads, "No recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons other than its ability to provide Title X services." The Department does not believe that including the term "effectively" is necessary for operation of this rule. Inclusion of "effectively" has the potential for inconsistent application and could create compliance burdens on recipients trying to apply a measure of "effectiveness" across a range of subrecipients. The revised language addresses the Department's concern that certain Title X recipients have imposed restrictions on subrecipients that are designed to further policy objectives other than the delivery of Title X services. Title X is the only federal program focused solely on providing family planning and related preventive services. Restrictions not directly related to that goal hinder the program's statutory mission and adversely affect the program's intended beneficiaries.

For example, as outlined in the NPRM, state restrictions on subrecipients for activities unrelated to Title X-funded services have kept eligible providers from serving priority populations.⁹ Therefore, restricting participation by certain types of providers for such reasons will not be allowable under the rule. Similarly, while tiering Title X subawards may fulfill some state-based policy goals, tiering does not advance the specific Title X goals of providing "a broad range of acceptable and effective family planning methods and services." PHSA sec. 1001(a). Prohibiting recipients from adding eligibility criteria for a reason other than the provision of Title X services ensures the broadest available pool of applicants for subawards and the use of federal resources in furtherance of statutory goals.

As is currently the case, applicants for new and continuing Title X grants that do not provide all services directly will describe the process and criteria by which they select subrecipients. Following implementation of this new rule, the Department will review this information to determine an applicant's eligibility to receive a new or continuing award. For new awards, the Department will assess whether any subrecipient restrictions are for reasons other than the subrecipient's ability to provide

Title X services. For continuing awards, the Department will work with recipients to help entities come into compliance prior to an award being made. If, despite the Department's assistance, compliance is not achieved, the Department will discontinue funding in accordance with all applicable rules and regulations. If available and as appropriate, this will include administrative appeals and a recoupment and re-awarding of funds. Further, if a current recipient amends the scope of its approved project by changing its process for selecting subrecipients, that request requires prior approval and the Department will apply the same review criteria. 45 CFR 75.308.

B. Responses to Public Comments

Overall, 145,303 comments were received. Approximately 91 percent (132,032) of the total comments received were in favor of the proposed rule. The vast majority of comments both favoring and opposing the rule were duplicate comments. Comments came from a wide variety of individuals and organizations, including private citizens, health care providers, religious organizations, patient advocacy groups, professional organizations, research institutions, consumer organizations, and state and federal agencies and representatives. Many of the comments dealt with a range of issues beyond the scope of this rulemaking including, but not limited to, the separation of church and state, additional confidentiality protections, provider fraud, and general opposition to Title X funding. A summary of the applicable comments, and the Department's responses, follows below.

Comment: One commenter stated the comment period was too short for the rule and did not allow enough time for response on its significant economic and federalism impacts.

Response: Given the limited scope of this rulemaking, the Department believes that notice was sufficient because "interested parties [had] a reasonable opportunity to participate in the rulemaking process" and were not "deprived of the opportunity to present relevant information by lack of notice that the issue was there." *Am. Radio Relay League v. FCC*, 524 F.3d 227, 236 (D.C. Cir. 2008) (citations omitted). In fact, the Department received over 145,000 responses to the notice of proposed rulemaking, many with detailed suggestions on different aspects of the proposed rule. Therefore, the Department does not believe that extending the comment period was necessary or warranted.

Comment: Several commenters suggested the Department lacks legal authority to issue a rule in this area.

Response: The Department disagrees. The Title X statute explicitly provides rulemaking authority for the making of conditions for grants. 42 U.S.C. 300a-4(a). The Department has engaged in rulemaking for this program on multiple occasions. See, e.g., 65 FR 41270 (July 3, 2000); 65 FR 49057 (Aug. 10, 2000); 53 FR 2922 (Feb. 2, 1988). In addition, courts, including the Supreme Court, have consistently upheld this authority. *Rust v. Sullivan*, 500 U.S. 173 (1991). On the very issue of state legislation affecting Title X, the U.S. Court of Appeals for the Tenth Circuit stated: "HHS has deep experience and expertise in administering Title X, and the great breadth of the statutory language suggests a congressional intent to leave the details to the agency. . . . Of course, administrative actions taken by HHS will often be reviewable under the Administrative Procedure Act, but only after the federal agency has examined the matter and had the opportunity to explain its analysis to a court that must show substantial deference." *Planned Parenthood of Kansas & Mid-Missouri v. Moser*, 747 F.3d 814, 824-25 (10th Cir. 2014). The Department is choosing to exercise that authority to promulgate a rule that it believes, as discussed above, is "reasonably related to the purposes of the enabling legislation" (the standard to which the Supreme Court has held previous exercises of this authority). *Mourning v. Family Publication Service*, 411 U.S. 356, 369 (1973).

Comment: Commenters stated the rule was not clear in how it applied to recipients who provide some services directly and contract out some services.

Response: The rule applies to all project recipients whenever they make subawards for the provision of Title X services. It is not intended to require those who directly provide all Title X services to start providing subawards. However, if a project recipient makes subawards for any Title X services, it may not prohibit an entity from participating in the program as a subrecipient for reasons other than that entity's ability to provide Title X services.

Comment: Commenters stated clarification is needed about how the proposed rule will affect services at the state level and speculated that the proposed rule will cause a disruption in services.

Response: The primary goals of the rule change are to ensure consistency of subrecipient participation, improve provision of services, and guarantee

Title X resources are used to fulfill Title X goals. The final rule will be applied in a prospective manner, meaning with the submission of new competitive applications or, for recipients applying for non-competing funds, with the initiation of a new budget period. As a result, it is unlikely that the rule will cause disruption during a budget period, as each renewed budget period requires approval prior to an award. In the instance when a recipient makes a change to its process for selecting subrecipients in the middle of a budget period, if found to be out of compliance it may cause an interruption in the provision of services, but such mid-cycle changes are expected to be very rare. As previously stated, the Department will make every effort to help entities come into compliance, and will award replacement grants to other providers when necessary to minimize any disruption of services.

The final regulation will not invalidate conflicting state laws. Instead, the regulation informs states with conflicting laws that if they intend to apply for new or continuing Title X funds, they would need to comply with federal law under which a recipient may not exclude an entity from participating for reasons other than its ability to provide Title X services. The rule will not interfere with statutory requirements in those states where recipients directly provide all Title X services, or where recipients select subrecipients based solely on their ability to provide Title X services.

Comment: Commenters stated the proposed rule would allow Title X service providers that also provide abortion services to redirect their non-Title X funds toward abortion services or use Title X funding to fund abortion.

Response: Title X funds cannot be used for abortions. The Title X statute prohibits any of the funds appropriated under Title X to be used in programs where abortion is a method of family planning. PHSA sec.1008. Title X provides family planning and related reproductive health services such as: testing and counseling for sexually transmitted diseases (STDs), including HIV; contraceptive methods including method-specific counseling; breast and cervical cancer screening; pregnancy tests and counseling, and other related services to over four million low-income women, men, and adolescents each year.

Additionally, beyond cost-sharing and program income requirements, federal grant programs do not generally have the authority to stipulate what recipients do with non-federal funds. See *Planned Parenthood of C. and N.*

Ariz. v. State of Ariz., 718 F.2d 938, 945 (9th Cir. 1983), in which the court stated: “we hold that as a matter of law, the freeing up theory cannot justify withdrawing all state funds from otherwise eligible entities merely because they engage in abortion-related activities disfavored by the state.” The commenters also assume, without substantiation, that federal funding will supplant private funding for family planning, allowing the private funding to be used to fund abortions instead of additional family planning services and programs. According to the uniform grant rules, grants funds and any program-generated income must be used to further the objectives of the Title X program and would not be allowed to be diverted for non-allowable activities. 45 CFR 75.307 (e). Speculation about the indirect effects of Title X funding is not a sufficient basis to justify making subawards based on reasons other than the ability to provide Title X services.

Comment: Commenters stated that Title X should fund sites that provide comprehensive primary care rather than sites providing primarily reproductive health care.

Response: The Department appreciates the value of providers, such as federally qualified health centers (FQHCs), which deliver comprehensive primary care services in communities. The Department also respects states’ rights to spend their own (non-Federal) funds. However, the Title X program was specifically enacted to offer a broad range of family planning services, and not comprehensive primary care. While Title X has neither the authority nor purpose of providing comprehensive primary care, to the extent FQHCs may be the best providers of family planning services in a particular area, there is no prohibition on FQHCs being selected by project recipients as subrecipients.

OPA’s efforts to ensure widespread access to quality family planning services is consistent with efforts to provide comprehensive care. Family planning is a subset of comprehensive care services, which are particularly important for women and men of reproductive age. Given the fact that family planning services are often not provided, or are provided with poor quality in some primary care settings,¹⁰ OPA efforts are focused on ensuring that quality family planning services are included within the broader set of

comprehensive preventive care needs of all Americans.¹¹

In addition, women of reproductive age often report that their family planning provider is also their usual source of health care.¹² Providers of family planning services serve as entry points for their clients to other essential health care services. Preconception care (PCC), which includes screening for obesity, smoking, and mental health, is a key service provided as part of high quality family planning care. PCC improves women and men’s health and can increase a person’s ability to conceive and to have a healthy birth outcome. In a nationally representative sample of publicly funded clinical administrators, conducted in 2013–2014, written protocols for preconception care screening, which serve as instructions for clinicians providing these services, were more common in dedicated reproductive health centers compared with primary care centers and health departments.¹³

Comment: Commenters stated that the proposed rule would be discriminatory against men and adolescents because the “notice shows HHS intends to impose a preference for prioritizing funding to ‘specific providers with a reproductive health focus.’”

Response: Title X regulations require projects to provide services without regard to religion, race, color, national origin, handicapping condition, age, sex, number of pregnancies, or marital status. 42 CFR 59.5(a)(4). The Title X statute specifically mentions adolescents as a priority population for receiving Title X services. In fact, in 2015 approximately 44 percent of the Title X clients served were between the ages of 15 and 24 years. Moreover, OPA funds projects to improve outreach and male-centered services in an effort to increase the number of men who use Title X services. Between 2003 and 2014, Title X providers served a total of 3.8 million males, nearly doubling the percentage of male family planning users from 4.5 percent in 2003 to 8.8 percent in 2014.¹⁴ In addition, the 2014

report *Providing Quality Family Planning Services: Recommendations of CDC and the U.S. Office of Population Affairs*¹⁵ (QFP) identifies a specific set of family planning and related services that should be provided to men and adolescents.

Comment: Commenters stated that use of the word “effectively” in the proposed rule is vague. The commenters asserted that it would be difficult to determine which policies were allowable under the rule without a clear definition of “effectively.”

Response: As noted previously, after reviewing the relevant comments, the Department recognizes the challenge of measuring effectiveness across all grant recipients and subrecipients as a condition of participation, and is eliminating the qualifier “effectively” from the regulatory language. The amendment now reads, “No recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons other than its ability to provide Title X services.” The Department believes that the revised language addresses the Department’s concern that certain Title X recipients have imposed restrictions on subrecipients that are designed to further policy objectives other than the ability to provide Title X services. A recipient imposing a ban on particular types of providers or imposing a tiering structure is prohibiting subrecipients from participating on factors other than the ability to provide Title X services. Only qualifications of recipients tied to Title X objectives, such as the ability to make rapid and effective use of federal funds and compliance with Title X regulations, are relevant factors. The revised language is clear and does not depend on the meaning of “effectively.”

Comment: Commenters stated that the Title X program lacks a clear evidence-based process for establishing program guidelines.

Response: The Department has adopted an evidence-based approach for defining program guidelines, such as what constitutes “quality” family planning services. Quality family planning services were defined in the 2014 clinical recommendations, *Providing Quality Family Planning*

¹¹ CDC, *Providing Quality Family Planning Services: Recommendations of the CDC and the U.S. Office of Population Affairs*. MMWR Recommendations and Reports, 2014. 63(4): p. 1–54.

¹⁵ Gavin, L., & Pazol, K. (2016). Update: Providing Quality Family Planning Services — Recommendations from CDC and the U.S. Office of Population Affairs, 2015. MMWR. *Morbidity and Mortality Weekly Report* MMWR Morb. Mortal. Wkly. Rep., 65(9), 231–234.

¹⁰ Wood, S., et al., Scope of family planning services available in Federally Qualified Health Centers. *Contraception*, 2014. 89(2): p. 85–90.

Services (QFP).¹⁶ These recommendations were developed using an evidence-based approach, and adopted the Institute of Medicine's (IOM) definition of health care "quality," which is:

"The degree to which health care services for individuals and populations increase the likelihood of desired health outcomes and are consistent with current professional knowledge."¹⁷

The process of developing QFP recommendations was rigorous and aligned with current national and international standards for guidelines development; a priority was placed on clinical services for which there was evidence of effectiveness as defined by the presence of research demonstrating a protective impact on a behavioral or health outcome.^{18 19}

For this reason, the provision of *quality* care is very likely to result in a change in health outcomes. This emphasis on improving the quality of care is consistent with global and national efforts that have highlighted its importance to achieving key outcomes. For example, quality care has been identified by the Institute of Medicine (IOM) and other leaders in health care delivery as the driving factor that will achieve the goals of improved health, client experience and cost savings.^{20 21}

OPA's development and implementation of the QFP recommendations in the Title X program also demonstrates that steps have been taken to address comments from another IOM report published in 2009.²² The 2009 report urged OPA to

ensure that its recipients follow "current evidence-based professional clinical recommendations," and consider "making the Title X guidelines the standard used by all federal health programs."

Comment: Commenters questioned the legitimacy of the findings of the study by Robbins et al.²³ related to Title X service providers cited by the Department including challenging the assumption that the existence of written clinical protocols indicated higher quality care.

Response: Regarding the findings of the study by Robbins et al.,²⁴ the Department clarifies that written clinical protocols are not printed worksheets given to clients. Rather, they are explicit guidance that clinicians use to provide services in accordance with nationally recognized standards of care. Furthermore, written clinical protocols are associated with higher quality care.²⁵

Comment: Commenters requested information about how OPA will ensure that compliance with and enforcement of the proposed rule are integrated into the final rule and Title X award process.

Response: The Department believes that relying on our existing enforcement mechanisms rather than developing new reporting requirements or new certification requirements will be the most efficient means of ensuring compliance. The primary goals of the rule change are to ensure consistency of subrecipient participation, improve provision of services, and guarantee Title X resources are used to fulfill Title X goals. As part of the funding opportunity announcement (FOA) for each grant cycle, applicants are required to describe how their projects will address Title X requirements. This includes, but is not limited to, fully describing if they will not provide all services directly, the process and selection criteria used, or to be used, to select subrecipients, service sites and providers, including a description of eligible entities for funding as

subrecipients.²⁶ Recipients applying for non-competing continuation funds (those with part of their project period remaining after their current budget period, for example, in year one or two of a three-year project period) will also be required to describe, if they will not provide all services directly, the process and selection criteria used or to be used for selection of service sites and providers, including a description of eligible entities for funding as subrecipients. For recipients applying for non-competing continuation funds, the Department will work with them to help entities come into compliance prior to an award being made. If, despite the Department's assistance, compliance is not achieved, the Department will discontinue funding in accordance with all applicable rules and regulations. If available and as appropriate, this will include administrative appeals and a recoupment and re-awarding of funds. Further, if a current recipient amends the scope of its approved project by changing its process for selecting subrecipients, that request requires prior approval and the Department will apply the same review criteria. 45 CFR 75. Additionally, recipients are subject to uniform grant rule requirements related to subawards, 45 CFR 75.352, and all other applicable rules.

Comment: Commenters stated concern that the Department did not consider the alternative of modifying the grant process to make it easier for providers restricted from being eligible as a subrecipient in specific states to receive grants directly from Title X.

Response: The grants process is established by the Department to ensure integrity and accountability in the award and administration of grants, and to protect federal resources across all Departmental programs. As a result, the Department does not consider suggestions to change the grants process for specific applicants under Title X a viable alternative to this rule.

Applicants who meet the eligibility criteria in the funding opportunity announcement (FOA) may submit, directly, an application for consideration as a Title X recipient, independent of the size of the entity. Applicants should also have the option to be considered eligible as a subrecipient. The rule addresses recipients or applicants that propose excluding potential subrecipient entities

based on criteria other than the entity's ability to provide Title X services.

Comment: Commenters stated that states should not have to fund Planned Parenthood because these commenters claim the organization has perpetuated Medicaid fraud. Commenters also stated that the proposed rule would allow for preferential treatment of Planned Parenthood and that by allowing Title X funds to be awarded to Planned Parenthood it could create a monopoly in family planning service providers.

Response: No comment provided evidence to support allegations that any Title X provider has engaged in Medicaid fraud. Entities that are suspended, excluded or debarred from participation in federal health care programs are not eligible to receive awards under the Title X program. Furthermore, the Uniform Administrative Requirements, Cost Principles and Audit Requirements for HHS Awards stipulate requirements for making financial assistance awards to applicants and existing recipients that include the need to take into consideration the ability of the applicant to use federal funds properly in the manner intended. 45 CFR 75.205. These rules also require an assessment of the applicant's ability to meet legal, financial, and administrative obligations prior to receiving federal funds, as well as during the entire duration of the project period in which the federal funds are expended. This is accomplished by several methods, including, but not limited to, the awarding program office and grants management office conducting a risk assessment, which directly assesses the applicant for financial stability, quality of management systems, history of performance, audit reports and findings, and ability to implement effectively statutory, regulatory, and other requirements. The awarding program office and the grants management office also evaluate the applicant using the Federal Awardee Performance and Integrity Information System (FAPIS). These steps must be completed prior to the initial award and are assessed throughout the entire project period. Additionally, Government-wide suspension and debarment activities are used to safeguard federal funds by disallowing awards to organizations and their principals based on a lack of business honesty or integrity. Federal agencies only do business with those organizations, and only provide funding for those principals, that have a satisfactory record of business ethics and integrity. 2 CFR part 180, subpart D.

The rule will not provide any preferential treatment, nor disadvantage

any applicant, from receiving Title X family planning service grants. In contrast to the assertion made by the commenter, this final rule encourages providers to compete based on their ability to provide Title X services. The rule will ensure consistent opportunity of subrecipient participation across geographic areas, and guarantee Title X resources are allocated on the basis of fulfilling Title X goals.

This final rule does not favor particular providers, and does not deter competition between providers; it requires recipients to evaluate potential subrecipients based on their ability to provide Title X services. As a result, new and existing providers will be able to receive Title X funding based on their ability to provide Title X services.

III. Regulatory Impact Analysis

A. Comments Received in Response to Executive Order 13132 Federalism Review

Comment: Several commenters were critical of the Federalism analysis performed under Executive Order 13132. These commenters stated the rule was targeted at states and their traditional authority over health care. Additionally, many commenters suggested the proposed program requirement violated the Tenth Amendment, the Spending Clause, and preemption principles. Several commenters additionally asserted that Title X federal funding conditions should not interfere with state priorities, even when using federal funds.

Response: Title X was enacted in order for family planning projects to offer a broad range of family planning methods and services. It was not enacted as a federal-state cooperative statute, as is evidenced by the eligibility of nonprofit, private entities to apply for grants directly. Currently, 40 nonprofit entities receive Title X funding directly from the Department. Further, every state has at least one Title X recipient, and 13 states and the District of Columbia, have only nonprofit, private recipients.

The Supreme Court has long been clear that the Tenth Amendment limitation on the Congressional regulation of state affairs does not limit the range of conditions legitimately placed on federal grants. *Oklahoma v. Civil Serv. Comm'n*, 330 U.S. 127 (1947). The Department may attach conditions to the awarding of funds to carry out best its statutory goals. *South Dakota v. Dole*, 483 U.S. 203 (1987); *Rust v. Sullivan*, 500 U.S. 173, 191 (1991) ("We have recognized that Congress' power to allocate funds for

public purposes includes an ancillary power to ensure that those funds are properly applied to the prescribed use.") The possible loss of future Title X grants does not amount to coercing the states (or nonprofit private entities) to capitulate to program requirements. Similarly, as the rule only attaches requirements to the receipt of federal funds, it would not invalidate any state laws with which it conflicts. States often opt not to apply for federal grant funds where the federal program requirement conflicts with state law priorities. Therefore, there is no preemption of state laws caused by this rule.

It must also be emphasized that this rule applies to all Title X project recipients, not only to project recipients that represent state health departments. As the NPRM explained, "All project recipients that do not provide services directly must only choose subrecipients on the basis of their ability to deliver Title X required services. Nonprofit recipients that do not provide all services directly must also allow any eligible providers that can provide Title X services in a given area to apply to provide those services, and they may not continue or begin contracting (or subawarding) with providers simply because they are affiliated in some way that is unrelated to the programmatic objectives of Title X." 81 FR at 61643.

Comment: One commenter also suggested that the proposed rule violated spending clause principles. Specifically, the commenter argued, given the vagueness of "effectively," grant recipients would not be on clear notice of what would be expected of them.

Response: As noted above, the Department eliminated the qualifier "effectively" from the regulatory language. The amendment now reads, "No recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons other than its ability to provide Title X services." As explained previously in this preamble, restrictions placed on organizations unrelated to the delivery of Title X services and tiering approaches would not be allowed. As this requirement will only be applied in future FOAs and continuation funding applications, there will be additional opportunities for the Department to provide guidance consistent with this final rule and entities may seek further guidance from the Department as to what other practices may be problematic before applying before applying for funds. Thus, applicants will have the option to

apply for funds knowing the relevant conditions, or to decline to do so.

As stated in the NPRM, Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has federalism implications. This rule will not cause substantial economic impact on states or nonprofit private entities. It may implicate state laws only if those states with contrary laws wish to apply for federal Title X funds. States that choose to do so and also choose to subaward Title X funds will be required to do so in a manner that considers only the ability of the subrecipients to meet the statutory objectives of Title X.

B. Comments Received in Response to Economic Impact Analysis Under E.O. 12866

Comment: Commenters stated concern that the Department did not consider regulatory alternatives.

Response: This regulation is the simplest way to achieve the goal of ensuring that Title X recipients determine subrecipients based on their ability to provide Title X services. As a result, more complex regulatory alternatives in the impact analysis were not discussed. The Department did consider the no action alternative, but concluded that it would not further the statutory goals served by the regulation. These commenters and others described various regulatory alternatives, and these alternatives, such as direct grants, are discussed in the final rule.

Comment: Commenters stated concern that the impact analysis did not address impacts to states and service providers affected by the rule.

Response: Contrary to the assertions made by the commenters, the impact analysis did estimate costs borne by recipients, including recipients that represented state health departments, associated with evaluating the rule and modifying policies to ensure compliance with the rule, and the impact analysis noted that the rule may result in some shifts in funding from some family planning services providers to other family planning services providers.

Comment: Commenters stated concern that the impact analysis did not address the consequences of states electing not to participate in Title X.

Response: The primary goal of the impact analysis was to determine the societal impact of the rule. If a potential recipient decides not to participate in Title X as a result of the rule, this may result in a reallocation of resources, and

under certain circumstances this could result in a reduction in the utilization of services in some areas. If Title X funding and the associated services declined in a specific area, this would correspond with a commensurate increase in services in other areas due to the reallocation of funding. Although the Department does not anticipate this to occur widely, this shift would represent an indirect transfer of federal funding for health care services from individuals in some areas to individuals in other areas, which the Department estimates would have no net effect on total Title X expenditures by the United States.

1. Introduction

The Department has examined the impact of this final rule under Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, September 19, 1980), the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995), and Executive Order 13132 on Federalism (August 4, 1999).

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866. The Department expects that this final rule will not have an annual effect on the economy of \$100 million or more in any one year. Therefore, this rule is not an economically significant regulatory action as defined by Executive Order 12866 or a major rule under either the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1501, or the Congressional Review Act, 5 U.S.C. 801.

The Regulatory Flexibility Act (RFA) requires agencies that issue a regulation to analyze options for regulatory relief of small businesses if a rule has a significant impact on a substantial number of small entities. The RFA generally defines a “small entity” as (1) a proprietary firm meeting the size standards of the Small Business Administration; (2) a nonprofit organization that is not dominant in its field; or (3) a small government jurisdiction with a population of less than 50,000 (States and individuals are

not included in the definition of “small entity”). For similar rules, the Department considers a rule to have a significant economic impact on a substantial number of small entities if at least five percent of small entities experience an impact of more than three percent of revenue. The Department anticipates that the final rule will not have a significant economic impact on a substantial number of small entities.

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing “any rule that includes any Federal mandate that may result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$146 million, using the most current (2015) implicit price deflator for the gross domestic product. This final rule would not trigger the Unfunded Mandate Reform Act because it will not result in any expenditure by states or other government entities.

2. Summary of the Final Rule

Since 2011, 13 states have taken actions to restrict participation by certain types of providers as subrecipients in the Title X program based on reasons other than the providers’ ability to provide Title X services. In at least several instances, this has led to disruption of services or reduction of services in instances where a public entity, such as a state health department, is a Title X recipient and makes subawards to subrecipients for the provision of services. In response to these actions, this final rule requires that any Title X recipient subawarding funds for the provision of Title X services not prohibit an entity from participating as a subrecipient for reasons other than its ability to provide Title X services.

3. Need for the Final Rule

Certain states have policies in place that limit access to family planning services by restricting specific types of providers from participating as subrecipients in the Title X program. These policies, and varying court decisions on their legality, have led to uncertainty among recipients, inconsistency in program administration, and reduced access to services for Title X priority populations. These restrictive state policies exclude certain entities for reasons other than their ability to provide Title X services.

As a result of these state policies, providers previously determined by Title X recipients to be eligible providers of family planning services have been excluded from participation in the Title X program. In turn, the exclusion of these providers is associated with a reduction in the number of Title X service sites, reduced geographic availability of Title X services, and fewer Title X clients served between 2011 and 2014.^{27 28} This final regulation seeks to ensure that state and nonprofit private entity policies regarding Title X do not direct or restrict funding to subrecipients for reasons other than their ability to provide Title X services.

Reducing access to Title X services has many adverse effects. Title X services have a large effect on reducing the number of unintended pregnancies and unplanned births in the United States. For example, the Guttmacher Institute estimates that in 2014 publicly funded contraceptive care at Title X-funded clinics has helped women to prevent approximately 50 percent of an estimated total 1.9 million unintended pregnancies prevented by publically supported services nationally, and 70 percent (904,000) of the 1.3 million unintended pregnancies prevented by women with the help of publicly funded providers. The 904,000 unintended pregnancies would have resulted in an estimated 439,000 unplanned births, 326,000 abortions, and 139,000 miscarriages.²⁹ The Title X program also helps prevent the spread of STDs by providing screening and treatment.³⁰ The program helps reduce maternal morbidity and mortality, as well as low birth weight, preterm birth, and infant mortality.^{31 32} Title X, as it exists today,

is also very cost beneficial: every grant dollar spent on family planning saves an average of \$7.09 in Medicaid-related costs.³³

In addition to reducing access to the Title X program, these policies that restrict specific types of providers from being eligible to participate in the Title X project may reduce the quality of Title X services, as described previously. Research has shown that providers with a reproductive health focus provide services that more closely align with the statutory and regulatory goals and purposes of the Title X program.³⁴ In particular, these entities provide a broader range of contraceptive methods on-site, are more likely to have written protocols that assist clients with initiating and continuing contraceptive use without barriers, disproportionately serve more clients in need of family planning services, and may provide higher quality services.³⁵

The Department is concerned that policies that restrict certain types of entities from becoming subrecipients for reasons other than their ability to provide Title X services could limit the set of available providers for reasons unrelated to the quality of family planning services they provide. This, in turn, could reduce access to care and may reduce the availability of high quality family planning services. This regulation takes the simplest approach to reverse the adverse effects of policies that have excluded certain entities for reasons other than their ability to provide Title X services.

4. Analysis of Benefits and Costs

a. Benefits to Potential Title X Clients and Reduced Federal Expenditures

This final rule directly prohibits Title X recipients that subaward funds for the provision of Title X services from excluding an entity from participating for reasons other than its ability to provide Title X services. Following the implementation of policies this regulation would address, states shifted funding away from family planning

service providers previously determined to be eligible. The Department believes that this final rule is likely to undo these effects. To the extent that a state may come into compliance with this regulation by relinquishing its Title X grant or not applying to continue a Title X grant, other organizations could compete for Title X funding to deliver services in areas where a state entity previously subawarded funds for the delivery of Title X services. In turn, the Department expects that this has the potential to reverse the associated reduction in access to Title X services and deterioration of outcomes for affected populations.

As previously stated, research has shown that every grant dollar spent on family planning saves an average of \$7.09 in Medicaid-related expenditures.³⁶ In addition to reducing spending, these services improve the health and quality of life for affected individuals, suggesting that the return on investment to these family planning services is even higher. For example, these services reduce the incidence of invasive cervical cancer and sexually transmitted infections in addition to improving birth outcomes through reductions in preterm and low birthweight births.³⁷ Data show that specific provider types with a reproductive health focus have been shown to serve disproportionately more clients in need of publicly funded family planning services than do public health departments and FQHCs.³⁸ Therefore, eliminating restrictions against certain providers has the potential to result in an increased number of clients served and services delivered by the Title X program.

b. Costs to the Federal Government Associated With Disseminating Information About the Rule and Evaluating Grant Applications for Conformance With Policy

Following publication of the final rule, OPA will educate Title X program recipients and applicants about the requirement not to prohibit an entity from participating for reasons other than

its ability to provide Title X services. OPA will send a letter summarizing the change to current recipients of Title X funds and post the letter to its Web site. Language conforming to this final rule will be included in forthcoming FOAs and continuation application guidance. OPA also has other existing channels for disseminating information to stakeholders. Therefore, based on previous experience, the Department estimates that preparing and disseminating these materials will require approximately one to three percent of a full-time equivalent OPA employee at the GS-12 step 5 level. Based on federal wage schedule for 2016 in the Washington, DC area, GS-12 step 5 level corresponds to an annual salary of \$87,821. The salary cost is doubled to account for overhead and benefits. As a result, the Department estimates a cost of approximately \$1,800–\$5,300 to disseminate information following publication of the final rule.

c. Grant Recipient Costs To Evaluate and Implement the Policy Change

The Department expects that stakeholders, including grant applicants and recipients potentially affected by this final policy change, will process the information and decide how to respond. This change will not affect the majority of current recipients and, as a result, the majority of current recipients will spend very little time reviewing these changes before deciding that no change on their part is required. For the states that currently hold Title X grants and have laws or policies restricting eligibility of Title X subrecipients based on reasons other than their ability to deliver Title X services, the final rule may implicate the state's law or policy. State agencies that currently restrict subrecipients would need to consider their current practices carefully in order to comply with this final rule if they wish to continue obtaining Title X grants and engaging subrecipients.

The Department estimates that current and potential recipients will spend an average of one to two hours processing the information and deciding what action to take. The Department notes that individual responses are likely to vary, as many parties unaffected by these changes will spend a negligible amount of time in response to these changes. According to the U.S. Bureau of Labor Statistics,¹ the average hourly wage for a chief executive in state government is \$54.26, which the Department believes is a good proxy for the individuals who will spend time on these activities. After adjusting upward by 100 percent to account for overhead and benefits, it is estimated that the per-

hour cost of a state government executive's time is \$108.52. Thus, the average cost per current or potential grant recipient to process this information and decide upon a course of action is estimated to be \$108.52–\$217.04. OPA will disseminate information to an estimated 89 Title X grant recipients. As a result, it is estimated that dissemination will result in a total cost of approximately \$9,700–\$19,300.

d. Summary of Impacts

Public funding for family planning services has the potential to shift to providers that see a higher number of patients and provide higher quality services. Increases in the quantity and quality of Title X service utilization could lead to fewer unintended pregnancies, improved health outcomes, reduced Medicaid costs, and increased quality of life for many individuals and families. The final rule's impacts will take place over a long period of time, as it will allow for the continued flow of funding to provide family planning services for those most in need, and it will prevent future attempts to prohibit Title X funding to current and potential subrecipients for reasons other than their ability to meet the objectives of the Title X program.

The Department estimates approximate costs in the range of \$11,400–\$24,600 in the first year following publication of the final rule. This rule is beneficial to society in increasing access to and quality of care.

e. Analysis of Regulatory Alternatives

The Department carefully considered the option of not pursuing regulatory action. However, as discussed previously, not pursuing regulatory action would allow the continued denial of Title X funds to entities for reasons other than their ability to provide Title X services. This, in turn, means accepting reductions in access to and quality of services to populations who rely on Title X. As a result, the Department chose to pursue regulatory action.

C. Paperwork Reduction Act of 1995

The amendments in this rule will not impose any additional data collection requirements beyond those already imposed under the current information collection requirements that have been approved by the Office of Management and Budget.

Date: December 12, 2016.

Sylvia M. Burwell,
Secretary.

List of Subjects in 42 CFR part 59

Birth control, Family planning, Grant programs.

Therefore, under the authority of section 1006 of the Public Health Service Act as amended, and for the reasons stated in the preamble, the Department amends 42 CFR part 59 as follows:

PART 59—GRANTS FOR FAMILY PLANNING SERVICES

■ 1. The authority citation for Part 59 continues to read as follows:

Authority: 42 U.S.C. 300a–4.

■ 2. Section 59.3 is revised to read as follows:

§ 59.3 Who is eligible to apply for a family planning services grant or to participate as a subrecipient as part of a family planning project?

(a) Any public or nonprofit private entity in a State may apply for a grant under this subpart.

(b) No recipient making subawards for the provision of services as part of its Title X project may prohibit an entity from participating for reasons other than its ability to provide Title X services.

RIN 2137–AF22

Pipeline Safety: Safety of Underground Natural Gas Storage Facilities

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Interim final rule.

SUMMARY: This interim final rule (IFR) revises the Federal pipeline safety regulations to address critical safety issues related to downhole facilities, including wells, wellbore tubing, and casing, at underground natural gas storage facilities. This IFR responds to Section 12 of the Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2016, which was enacted following the serious

natural gas leak at the Aliso Canyon facility in California on October 23, 2015. This IFR incorporates by reference two American Petroleum Institute (API) Recommended Practices (RP): API RP 1170, "Design and Operation of Solution-mined Salt Caverns used for Natural Gas Storage," issued in July 2015; and API RP 1171, "Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs," issued in September 2015.

DATES: *Effective Date:* This IFR is effective January 18, 2017. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of January 18, 2017.

Comments Date: Comments must be received by February 17, 2017.

ADDRESSES: You may submit comments identified by the docket number PHMSA-2016-0016 by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Fax:* 1-202-493-2251.

- *Mail:* Send comments to Docket Operations, M-30; U.S. Department of Transportation, 1200 New Jersey Avenue SE., Room W12-140, West Building Ground Floor, Washington, DC 20590-0001.

- *Hand Delivery or Courier:* Bring comments to Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: If you submit your comments by mail, submit two copies. To receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard.

Note: Comments are posted without changes or edits to <http://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Kenneth Lee, by telephone at 202-366-2694, by fax at 202-366-4566, or by mail at U.S. DOT, PHMSA, 1200 New Jersey Avenue SE., PHP-80, Washington, DC 20590-0001.

SUPPLEMENTARY INFORMATION:

I. Background

A. Underground Natural Gas Storage Facilities

According to the Energy Information Administration,¹ there are approximately 400 interstate and intrastate underground natural gas storage facilities currently in operation in the United States, with more than four trillion cubic feet of natural gas working capacity. Three hundred twenty-six (326) of those facilities store natural gas in depleted hydrocarbon reservoirs, while the remainder store natural gas in salt caverns (31) and depleted aquifers (43). The recent failure of Well SS25 at the Aliso Canyon facility, an intrastate regulated facility located in Southern California, and its aftermath have revealed the need for minimum federal standards for the wells and downhole facilities located at both intrastate and interstate underground storage facilities. The promulgation of minimum federal standards would, for the first time, establish safety standards under the Pipeline Safety Regulations at title 49, CFR parts 191 and 192, for the currently unregulated downhole facilities at 197 interstate underground gas storage facilities and provide consistent, minimum standards for the remaining 203 intrastate facilities.

While there are DOT safety regulations in part 192 that apply to the surface piping at these facilities, there are no regulations in part 192 covering downhole facilities—such as wells, wellbore tubing, and casing—or the operations, maintenance, integrity management, public awareness, and emergency response activities associated with these downhole facilities. Therefore, even if all states had effective regulations for their intrastate facilities, 197 interstate facilities (that cumulatively have several thousand individual wells) would not be subject to any safety regulatory requirements with respect to their downhole facilities in the absence of federal action. In the event of a well failure, the interstate underground storage facilities could have consequences of a similar or even greater magnitude as the Aliso Canyon intrastate facility. The pipe at these facilities is threaded, rather than welded like a pipeline, making the pipe more susceptible to breaks. A broken pipe at any facility would allow gas to escape at a much higher rate and would be

more likely to catch fire, leading to a greater risk to life and property. However, these underground storage facilities are currently not required to meet any part 192 design, operations, or maintenance standards to ensure the integrity and safety of these wells and downhole facilities.

Most of the states that regulate underground gas storage have agencies separate and apart from the PHMSA-certified agency that regulates intrastate pipeline safety. Under the interim final rule, all intrastate transportation-related underground gas storage facilities will become subject to minimum federal safety standards and be inspected either by PHMSA or by a state entity that has chosen to expand its authority to regulate these facilities under a certification filed with PHMSA pursuant to 49 U.S.C. 60105.

Because state regulation of intrastate facilities is done through an annual certification under 49 U.S.C. 60105 and involves state adoption of the minimum federal standards, federal regulations are needed as the basis for effective state regulation as well. While many states have underground storage regulations with material integrity testing components to ascertain a well's condition, most states do not have specific and consistent regulations that include operating procedures and remediation for operations, maintenance, integrity demonstration and verification, monitoring, threat and hazard identification, assessment, remediation, site security, emergency response and preparedness, and recordkeeping requirements. The minimum federal standards will set baseline fitness for service requirements for all interstate and intrastate facilities and will allow state regulators to go above and beyond the minimum federal standards to require additional or more stringent safety safeguards at intrastate facilities. In other words, the regulation of intrastate underground gas storage facilities operates in the same manner as the existing federal-state regulatory scheme for gas and hazardous liquid pipelines.

After issuance of the IFR, PHMSA will further evaluate the need for any additional regulatory requirements for underground storage facilities. PHMSA encourages persons to participate in this rulemaking by submitting comments containing relevant information, data, or views. We will consider all comments received on or before the closing date for comments in finalizing this rule. We will consider late filed comments to the extent practicable.

¹ The Energy Information Administration is part of the U.S. Department of Energy. See http://www.eia.gov/pub/oil_gas/natural_gas/analysis_publications/ngpipeline/undrgrnd_storage.html.

B. Aliso Canyon and Other Incidents

On October 23, 2015, Southern California Gas Company's (SoCal Gas) Aliso Canyon Well SS25 developed a natural gas leak near an area known as Porter Ranch in Los Angeles, CA. The well leak is believed to have originated from the subsurface (downhole) well casing. The well was drilled in 1953 and converted to natural gas storage in 1972. On January 6, California Governor Jerry Brown issued a proclamation declaring the Aliso Canyon incident a state emergency. Before the leak was finally stopped (cement plugged), approximately 5.7 billion cubic feet (BCF) of natural gas had been released into the atmosphere, a volume equivalent to the yearly greenhouse gas emissions of approximately a half-million cars. PHMSA estimates the social costs of the climate-related impacts from these emissions at approximately \$123 million (with a range of \$55 million to \$344 million, depending on the discount rate). Additional operator-reported costs were approximately \$763 million as of November 2, 2016. Over 5,790 households (families) were relocated due to the co-release of natural gas odorant (mercaptans), according to the Aliso Canyon Incident Command briefing report issued on February 16, 2016.

The Aliso Canyon facility has 115 storage wells, and is the second-largest storage facility of its kind in the United States. It is an intrastate facility that is subject to the authority of the California Public Utility Commission (CPUC), which is certified by PHMSA to regulate the intrastate gas pipeline facilities in California in accordance with 49 U.S.C. 60105.

While the root cause of the failure of Well SS25 is the subject of ongoing investigations and assessments, the serious nature of the harm suffered by the public is widely recognized. The initial investigations by the CPUC and its partner agencies indicate that the risk of potential harm to the public could be addressed, at least in part, through the incorporation by reference of API RPs 1170 and 1171 into the pipeline safety regulations and requiring that underground gas storage facilities adopt minimum procedures for operations, maintenance, integrity demonstration and verification, monitoring, threat and hazard identification, assessment, and anomalies that affect safety.

The Aliso Canyon incident is not the only high-profile underground gas storage incident to occur in recent years. On January 17 and 18, 2001, a wellbore failure at an underground storage

facility near Hutchinson, Kansas, caused a natural gas leak from a gas storage field. The gas traveled approximately nine miles underground and exploded under some buildings, killing two people in a mobile home park and destroying two businesses in downtown Hutchinson. Approximately 143 million cubic feet of natural gas escaped from the storage field.²

Similarly, in 2004, a well at an underground storage facility in Liberty County, TX, malfunctioned, resulting in a fire that burned for six and one half days and released approximately 6 BCF of natural gas.³ These incidents have also resulted in heightened awareness from governmental officials and the general public about the safety of these facilities, including the potential for explosions and uncontrolled burns, and the potentially immense environmental damage associated with the uncontrolled release of natural gas into the atmosphere from the failure of even a single one of the thousands of wells at the underground gas storage facilities across the country.

In addition to threatening public safety and causing disruptive evacuations of large areas, when a natural gas storage well such as Well SS25 fails, the very process of attempting a "well kill," which is intended to stop the flow of natural gas from the well by pumping a weighted fluid down the wellbore, puts company workers and first responders directly in life-threatening situations.⁴ Fortunately, an errant spark did not ignite the gas at Aliso Canyon, but well failures often involve such ignition, which can result in flame jets that can be seen from many miles away and take weeks to extinguish.

Based on its field experience and knowledge of the industry, PHMSA is aware that many of the existing underground natural gas storage facilities across the country have wells with characteristics similar to Well SS25. Many wells, like Well SS25, are over 50 years old and were originally designed for petroleum production, where the flow of crude oil from

underground depths actually *reduced* the pressure on the casing pipe as it flowed toward the ground surface. Natural gas storage, in contrast, often has a much lower pressure drop when flowing to the ground surface. These converted facilities also were originally constructed using certain techniques that are different from typical pipeline industry construction, such as having pipe sections joined by threaded coupling, not welds.⁵ They also generally do not have a corrosion-resistant internal or external protective coating, which is required for all new pipelines.

The combined effects of a lack of corrosion-resistant coating, no effective cathodic protection, and a corrosive flow product that includes a mixture of water and other corrosive components presents a serious risk of leakage at some point in the life span of these wells. These risks can be significantly mitigated by an effective operations and maintenance program that includes reassessments and preventive and mitigation measures based upon unique conditions and threats to the well casing, tubing, and wellhead.

Most underground natural gas storage wells operate at pressures ranging from 200 pounds per square inch (psi) to about 4500 psi. By comparison, the maximum U.S. interstate transmission pipeline pressures are about 2000 psi, with most below 1000 psi. Underground storage wells also lack consistent standards for design safety factors to contain the well pressure, which provides a margin of yield strength. If a given grade of steel would deform or yield at 1.00 of its specified minimum yield strength, a safety margin of 25% would equate to a 0.80 design factor. For example, a pipeline generally has a design factor of 0.72 or less (safety margin of 39%), whereas a well casing may not have any safety factor. This means that corrosion of well casing pipe used with no safety factor would need the maximum operating pressure of the casing pipe to be reduced in order to "maintain safety" whenever a loss of wall thickness was found in the casing pipe.

Preventing well-failure incidents is not only a matter of public safety and protecting the environment from methane leaks and catastrophic failures, such as those that have occurred at Aliso Canyon, CA; Liberty County, TX; and Hutchinson, KS, but is also a key part of ensuring the reliable transportation of the nation's energy

⁴ PHMSA maintains "Underground Natural Gas Storage" informational Web pages, which explain underground storage operations. These pages are available to the public at <http://primis.phmsa.dot.gov/ung/index.htm>.

⁵ Threaded casing pipe connections have less strength than a welded connection and are more prone to corrode during the life of the casing pipe.

supplies. If storage facility operators need to rapidly draw down their supplies of gas to reduce the leak rate at a failed well or experience complete interruptions of operations, the public may suffer serious natural gas supply outages. When large underground natural gas storage facilities such as Aliso Canyon fail, the interruption in supply can have a major impact on the availability of heating fuel in colder climates and electricity in hot summer months. Businesses, hospitals, and governmental facilities also rely on the supply and distribution of gas as well as the energy produced by gas turbine electric power plants to keep the economy moving.

C. PHMSA Actions

Recently, PHMSA, along with the Federal Energy Regulatory Commission (FERC), five state regulatory agencies, and numerous industry representatives, participated in the development of two American Petroleum Institute (API) Recommended Practices (RP): API RP 1170, "Design and Operation of Solution-mined Salt Caverns used for Natural Gas Storage" (July 2015), and API RP 1171, "Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs" (September 2015).⁶ Both API RPs 1170 and 1171 recommend that operators of underground natural gas storage facilities implement a wide range of current recommended practices, including construction, maintenance, risk-management, and integrity-management procedures.

On February 5, 2016, PHMSA issued Advisory Bulletin ADB-2016-02 (81 FR 6334).⁷ The advisory bulletin recommended that operators of underground natural gas storage facilities review their operating, maintenance, and emergency response activities to ensure that the integrity of underground natural gas storage facilities is properly maintained. This bulletin informed operators about certain recommended practices and urged operators to take all necessary actions to prevent and mitigate breaches of integrity, leaks, or failures at their underground natural gas storage facilities, to ensure the safety of the public and operating personnel, and to protect the environment. Operators were advised to:

(1) Verify that the pressure required to inject intended natural gas volumes does not exceed the design pressure

limits of the reservoir, wells, wellheads, piping, casing, tubing, or associated facilities;

(2) monitor all wells for the presence of annular gas or liquids on a periodic basis;

(3) inspect the wellhead assembly and attached pipelines for each of the wells used;

(4) conduct periodic functional tests of all surface and subsurface safety valve systems and wellhead pipeline isolation valve(s) for proper function and ability to shut-off or isolate the well and remediate improperly functioning valves;

(5) perform risk assessments in a manner that reviews, at a minimum, the API RP 1171 criteria to evaluate the need for subsurface safety valves on new, removed, or replaced tubing strings or production casing;

(6) conduct ongoing assessments for the verification and demonstration of the mechanical integrity of each well and related piping and equipment;

(7) develop and implement a corrosion monitoring and integrity evaluation program for piping, wellhead, casing, and tubing including the usage of appropriate well log evaluations;

(8) develop and implement procedures for the evaluation of well and attendant storage facilities that include analysis of facility flow erosion, hydrate potential, individual facility component capacity and fluid disposal capability at intended gas flow rates and pressures, and analysis of the specific impacts that the intended operating pressure range could have on the corrosive potential of fluids in the system;

(9) identify potential threats and hazards associated with operation of the underground storage facility;

(10) perform ongoing verification and demonstration of the integrity of the underground storage reservoir or cavern using appropriate monitoring techniques for integrity changes, such as the monitoring of pressure and periodic pressure surveys, inventory (injection and withdrawal of all products), product levels, cavern subsidence, and the findings from adjacent production and water wells, and observation wells;

(11) ensure that emergency procedures are reviewed, conducted, and updated at least annually; and

(12) ensure that records of the processes, procedures, assessments, reassessments, and mitigation measures are maintained for the life of the storage well.

On July 14, 2016, PHMSA held a public meeting on the topic of potentially extending federal pipeline

safety regulations to include transportation-related underground gas storage facilities. The discussion covered both interstate and intrastate storage facilities, including wells and wellbore tubing. PHMSA heard from a diverse group of stakeholders, including state and federal regulators, emergency responders, and residents of the Aliso Canyon area who were directly impacted by the 2015 incident. PHMSA also heard from facility operators and technology experts. Based on its knowledge of storage well facilities across the country, available information concerning the Aliso Canyon accident, and other aspects of the record developed at this public meeting, PHMSA has concluded that the two recently adopted industry recommended practices, developed through the API consensus process, should be incorporated into part 192 of the federal pipeline safety regulations as an urgent first step in preventing similar incidents in the future. If an operator fails to take any measures recommended by API RP 1170 or 1171, then it would need to justify in its written procedures why the measure is impracticable and unnecessary.

Rapid incorporation of API RP 1170 and 1171 into PHMSA's regulations will require operators to assess the operational safety of their underground natural gas storage facilities and document the implementation of identified safety solutions. PHMSA and its state partners will monitor operators' implementation of the requirements in the interim, and once the requirements become effective PHMSA will begin inspecting facilities to enforce the requirements. Based upon facility inspections by PHMSA and its state partners and input from the public, PHMSA plans to continue to monitor and evaluate the safety of underground storage facilities and plans to incrementally build on the framework of the IFR as necessary in order to ensure that operators fully address the safety issues presented by underground natural gas storage.

II. Justification

A. PHMSA Authority and Regulatory History

Under 49 U.S.C. 60101 and 60102, PHMSA sets minimum safety standards for the transportation of natural gas, which includes underground natural gas storage facilities incidental to transportation. While PHMSA's existing part 192 regulations cover much of the surface piping up to the wellhead at underground natural gas storage facilities served by pipeline, PHMSA

⁶ Available at: <http://publications.api.org/IBR-Documents-Under-Consideration.aspx>.

⁷ <http://phmsa.dot.gov/staticfiles/PHMSA/DownloadableFiles/Advisory%20Notices/2016-02228.pdf>.

has not previously issued regulations for the “downhole” portion of these facilities. Accordingly, the only specific regulatory requirements for operators to inspect the safety of their underground natural gas storage facility wellheads, casings, and tubing strings are state standards that apply to intrastate facilities. Not all states have adopted safety standards for underground storage facilities, and while in some cases states that are certified by PHMSA to regulate their intrastate gas pipeline facilities can and have issued state standards for these wells and wellbores, the absence of a minimum federal standard has led to a regulatory gap for the wells and downhole pipe and tubing for the interstate facilities and a lack of adequate, consistent standards for all intrastate facilities.

PHMSA considered regulating the wells and downhole pipe and tubing at underground storage facilities more than 20 years before the Aliso Canyon incident. In 1994, PHMSA’s predecessor agency, the Research and Special Programs Administration (RSPA) held a public meeting (Docket PS–137; 59 FR 30567; June 14, 1994) on underground storage of gas and hazardous liquids, in order to gather information on the extent of then-current regulation and to determine what action RSPA should take on underground storage regulation. At the meeting, representatives of industry, state governments, and the public presented statements on safety issues, industry practices, the status of state underground storage regulations, and the need for additional federal regulations. While different views were expressed on whether RSPA should begin to regulate the wells and downhole pipe and tubing, RSPA’s regulation of the surface piping at these facilities appeared sufficient and further federal regulatory action on the wells was not seen as an immediate need. At that time, however, no widely accepted industry standards existed for the underground storage of natural gas. In addition, much of the underground storage well piping and components, which do not have external coatings and cathodic protection, have aged another 22 years since RSPA conducted the 1994 review. Finally, there have been three significant accidents in the last 15 years, including Aliso Canyon. Taken together, these are compelling factors warranting regulatory action by PHMSA, as discussed more fully in Section D below.

On June 22, 2016, the “Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2016” (the Act), became law (Pub. L. 114–183). Section 12 of the Act mandates that PHMSA

issue regulations for underground gas storage facilities within two years from the date of enactment and that PHMSA “shall, to the extent practicable—

(1) Consider consensus standards for the operation, environmental protection, and integrity management of underground natural gas storage facilities;

(2) Consider the economic impacts of the regulations on individual gas customers;

(3) Ensure that the regulations do not have a significant economic impact on end users; and

(4) Consider the recommendations of the Aliso Canyon natural gas leak task force established under section 31” of the Act.

The Act further provides that PHMSA may allow state authorities to continue exercising their traditional role in the oversight of intrastate gas pipeline facilities and gas transportation, including underground gas storage facilities, in the same manner through an annual certification process under 49 U.S.C. 60105 and the interstate agent provisions of 49 U.S.C. 60106. This mandate reflects the seriousness with which Congress has focused on underground storage facility safety following the Aliso Canyon accident. It also reflects Congress’ desire for states to maintain their role as strong federal partners in protecting the safety of underground gas storage facilities. While the RPs do include material that is relevant to determining whether a given geologic formation or depleted reservoir is suitable for gas storage use, permitting is not a PHMSA function. PHMSA is not authorized to prescribe the location of an underground gas storage facility or to require the Secretary of Transportation’s permission to construct such a facility. Therefore, Congress has preserved the traditional permitting role of the states in the case of intrastate facilities and the Federal Energy Regulatory Commission in the case of interstate facilities.

This latest accident has made PHMSA and other stakeholders, including the public, acutely aware of both the safety and environmental hazards of underground gas storage. Moreover, there is generally a greater awareness on the part of the public of greenhouse gas emissions. The external cost of not regulating such emissions must now be considered by agencies, including PHMSA, as part of executive branch policy governing agency regulatory actions.

Section 31 of the PIPES Act also created the Aliso Canyon Natural Gas Leak Task Force (Task Force), co-chaired by the U.S. Departments of

Energy (DOE) and DOT. The Task Force has provided a mechanism for interagency consultations that has included the U.S. Departments of Health and Human Services, Interior, Commerce, the Environmental Protection Agency, and the Federal Energy Regulatory Commission. The Task Force Report, entitled “Ensuring Safe and Reliable Underground Natural Gas Storage,” was issued by DOT and DOE on October 18, 2016 (Report). PHMSA worked closely with DOE in preparing the Report, which has informed PHMSA’s development of the IFR.

Widely accepted industry standards now exist with the recent development of API RPs 1170 and 1171, both of which were finalized about one year ago. API RPs 1170 and 1171, developed over the course of more than 4 years, are suitable for mandatory incorporation-by-reference into the operating procedures of these facilities, at least as a first step to address safety and environmental concerns with underground storage. This avenue would provide an immediate and reasonable means by which PHMSA would begin to regulate the downhole portions of underground storage of natural gas and respond to emerging risks in the area of underground gas storage, while at the same time implementing section 31 of the PIPES Act.

B. Industry and Public Support for Rulemaking

The recent history of serious underground storage incidents, including the Aliso Canyon incident, has made PHMSA and the public acutely aware of both the safety and environmental hazards of underground natural gas storage. Representatives of both industry and the public have recently requested that PHMSA promulgate minimum federal regulations.

On January 20, 2016, the Interstate Natural Gas Association of America (INGAA), a major industry trade association representing the vast majority of interstate natural gas pipeline transmission companies in the United States and a participant in the development of API RPs 1170 and 1171, petitioned PHMSA to incorporate both API RPs by reference into 49 CFR part 192. In the petition, INGAA supported federal safety regulation and oversight of natural gas storage facilities over the current patchwork of state regulations.

That petition, along with a February 11, 2016, letter from INGAA, urged PHMSA to adopt API RPs 1170 and 1171 as quickly as possible in order to

put into place a set of consensus standards for operators of underground storage facilities to follow in assessing their facilities and establishing procedures to ensure safety. INGAA, the American Petroleum Institute (API), and the American Gas Association (AGA) have all reached out to PHMSA in the aftermath of the Aliso Canyon incident and expressed support from their member companies for the rapid adoption of the API RPs. API recommended practices are frequently adopted by a majority of the industry, and PHMSA has previously adopted other industry consensus standards into the pipeline safety regulations.

The National Technology Transfer and Advancement Act of 1995 (Pub. L. 104–113) directs federal agencies to use voluntary consensus standards in lieu of government-written standards whenever possible. Voluntary consensus standards are standards developed or adopted by voluntary bodies that develop, establish, or coordinate technical standards using agreed-upon procedures. In addition, Office of Management and Budget (OMB) issued OMB Circular A–119 to implement section 12(d) of Public Law 104–113 relative to the utilization of consensus technical standards by federal agencies. This circular provides guidance for agencies participating in voluntary consensus standards bodies and describes procedures for satisfying the reporting requirements in Public Law 104–113.

API elected to issue RPs 1170 and 1171 in the form of “recommended practices,” as opposed to “standards.” This presented PHMSA with the challenge of dealing with concerns about the enforceability of these practices. Accordingly, as part of incorporating the API RPs by reference, PHMSA is adopting the non-mandatory provisions of API RPs 1170 and 1171 in a manner that would make them mandatory (*i.e.*, API provisions containing the word “should” or other non-mandatory language will be considered mandatory), except that operators will be permitted to deviate from the API RPs if they provide a sufficient technical and safety justification in their program or procedural manuals as to why compliance with a provision of the recommended practice is not practicable and not necessary for the safety of a particular facility. PHMSA will evaluate these justifications as part of its compliance inspection process, taking into account whether the operator’s procedures reflect sound engineering principles and achieved acceptable performance as demonstrated by annual reports and incident data. PHMSA will

incorporate lessons learned from these compliance reviews of underground storage facility operations into inspection protocols and inspector training programs.

State pipeline regulators also support the issuance of underground gas storage facility regulations by PHMSA. In 2010, the National Association of Pipeline State Representatives (NAPSR), which represents PHMSA’s state pipeline regulatory partners, submitted a resolution to PHMSA supporting underground natural gas storage facility regulations.⁸ PHMSA’s state partners are a vital element in helping to protect the integrity of the nation’s gas transmission and distribution systems. PHMSA’s expanded role in underground natural gas storage facilities will produce a safer and more environmentally sound system.

C. Good Cause Basis for an IFR

Under the Administrative Procedure Act (APA) and the Federal Pipeline Safety Law, PHMSA may issue an IFR when there is “good cause” to find that the notice-and-comment process would be “impracticable, unnecessary, or contrary to the public interest,” and the agency incorporates that finding and a brief statement of the reasons supporting the finding in the rulemaking document. *See* 5 U.S.C. 553(b)(3)(B), and 49 U.S.C. 60102(b)(6)(C). PHMSA’s pipeline safety regulations similarly recognize this exception at 49 CFR 190.311. However, PHMSA may modify aspects of the IFR issuing the final rule after receiving and reviewing public comments, as well as any other relevant documents. The good cause exception allows PHMSA to respond to safety risks quickly when delay would jeopardize the public interest through risks to public safety and the environment.

PHMSA finds that good cause exists to proceed with this IFR. Normal notice and comment procedures are impracticable and not in the public interest because PHMSA knows, as evidenced by the release at Well SS25 in Aliso Canyon, that existing facilities operating without minimum federal PHMSA safety standards are prone to corrosion due to the combined risks of a lack of corrosion-resistant coating, no effective cathodic protection, and a corrosive flow product that includes a

mixture of water and other corrosive components. The RP’s have sections concerning integrity monitoring methods for safety threats from corrosion of the wellbore piping and wellhead. The other 114 wells at the Aliso Canyon facility are currently being evaluated for integrity deficiencies. However, the concerns about well integrity are not limited to Aliso Canyon. They are national in scope. The lack of applicable PHMSA federal regulations for the downhole facilities presents an immediate threat to safety, public health, and the environment because there is currently no effective means for the agency to ensure compliance with safety standards at underground natural gas storage facilities.

Given the nature of the safety and environmental threat posed by the current lack of federal regulations for underground gas wells, any delay in adopting the API recommended practices would be impracticable and contrary to the public interest. The failure of a single well can cause substantial environmental harm and put populated areas at risk. The Aliso Canyon facility, for example, was located near a densely populated area and resulted in approximately 5,790 households being relocated due to the co-release of natural gas odorant (mercaptans), according to the Aliso Canyon Incident Command briefing report issued on February 17, 2016. Further, while the full extent of the damage caused by the Aliso Canyon incident will not be known until much later, as of June 30, 2016, SoCalGas had made provisions for expenses of nearly \$763 million to control the release, monitor air emissions, relocate residents, and cover its legal and other expenses (Sempra, 2016).⁹ These costs are those incurred by Sempra and do not include additional costs to society as a result of the release.¹⁰ For example,

⁹ Of the \$763 million, Sempra Energy notes “approximately 70% is for the temporary relocation program (including cleaning costs and certain labor costs) and approximately 20% is for efforts to control the well, stop the leak, stop or reduce emissions, and the estimated cost of the root cause investigation. The remaining amount includes legal costs incurred to defend litigation, the value of lost gas, the costs to mitigate the actual natural gas released and other costs. Cost estimate excludes any potential damage awards, restitution and any civil, administrative or criminal fines and other penalties that may be imposed, as well as any additional costs to clean homes and future legal costs necessary to defend litigation, among other potential costs, as we cannot estimate what amounts, if any, will be incurred for such matter.” (Sempra Energy, 2016).

¹⁰ On August 17, 2016, SoCal Gas provided PHMSA with a supplemental data response

⁸ NAPSR Resolution 2010–03 AC.2. The NAPSR resolution contained recommendation including the development of regulations to assess the integrity of existing wellbores used to store natural gas and the safety of operations for geologic formations used to store natural gas. <http://www.napsr.org/SiteAssets/NAPSR-Resolutions-Open/201003%20Storage%20Field%20Wellbores%20Resolution.pdf>.

this figure does not include \$123 million in estimated social costs (ranging from \$55 million to \$344 million) from the climate impacts of approximately 5.7 BCF of gas released into the atmosphere.¹¹

There is also a major public interest in preventing supply interruptions for hundreds of thousands of consumers who need gas to heat their homes. Potential interruptions in the supply of gas can also impact the reliable operation of gas turbine electrical power plants that power businesses and the U.S. economy. The Aliso Canyon incident highlights the need for explicit PHMSA standards relating to the safety of these facilities, and as noted above many of the approximately 400 existing facilities across the country have wells that have similar characteristics to Well SS25.

Upon the effective date of the final rule, PHMSA will move expeditiously to institute a program for identifying, inspecting and enforcing the new standards for all interstate facilities. Implementation at the state level will also involve time for states to update their state codes and in some cases certify additional agencies. Conducting a full notice and comment rulemaking proceeding prior to the incorporation of the API RPs would potentially leave the public unprotected and without any safety standards for underground natural gas storage for months or years to come. It would also leave PHMSA without any enforceable regulations for interstate underground natural gas storage wells and downhole facilities during the rulemaking process. However, in the absence of advance public notice and comment, PHMSA is providing for a post-promulgation comment period and will consider subsequent amendments or modifications in the final rule based on the comments received.

The rapid incorporation of API RPs 1170 and 1171 into part 192 provides PHMSA with an immediate tool to begin inspection and enforcement for interstate underground storage facilities and provides the foundation for states to begin adopting the minimum federal standards for intrastate underground storage facilities for prevention and response to future incidents. PHMSA understands that implementation at the state level will involve time for states to update their state codes and in some cases certify additional agencies, but the

incorporation of the API RPs into the part 192 regulations will not prevent states from adopting additional or more stringent regulations on underground gas storage facilities, provided they are compatible with the new minimum federal standards.

D. The American Petroleum Institute Recommended Practices 1170 and 1171

PHMSA reviewed API RPs 1170 and 1171 for requirements covering design, construction, material, testing, commissioning, reservoir monitoring, and recordkeeping for existing and newly constructed underground natural gas storage facilities. API RPs 1170 and 1171 have operations and maintenance (O&M) procedures and practices for newly constructed and existing underground natural gas storage facilities that include operations, maintenance, threat identification, monitoring, assessment, site security, emergency response and preparedness, training, and recordkeeping. The standards are available for public viewing in a read-only format at <http://publications.api.org/IBR-Documents-Under-Consideration.aspx>.

API RP 1170, "Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage, First Edition" provides the functional recommendations for salt cavern facilities used for natural gas storage service and covers facility geomechanical assessments, cavern well design and drilling, solution mining techniques and operations, including monitoring and maintenance practices. This RP is based on the accumulated knowledge and experience of geologists, engineers, and other personnel in the petroleum and gas storage industries and promotes public safety by providing a comprehensive set of design guidelines. This RP recognizes the nature of subsurface geological diversity and stresses the need for in-depth, site specific geomechanical assessments with a goal of long-term facility integrity and safety. This RP includes the cavern well system from the emergency shutdown (ESD) valve, through the well, including wellhead, casing, tubing, cement, and completion techniques, to the design and construction of the cavern itself.

API RP 1171, "Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs, First Edition" applies to natural gas storage in depleted oil and gas reservoirs and aquifer reservoirs, and focuses on storage well, reservoir, and fluid management for functional integrity in design, construction, operation, monitoring, maintenance,

and documentation practices. Storage design, construction, operation, and maintenance include activities in risk management, site security, safety, emergency preparedness, and procedural documentation and training to embed human and organizational competence in the management of storage facilities. This RP embodies historical knowledge and experience and emphasizes the need for case-by-case and site-specific conditional assessments. This RP applies to both existing and newly constructed facilities. This document recommends that operators manage integrity through monitoring, maintenance, and remediation practices and apply specific integrity assessments on a case-by-case basis.

PHMSA has also added reporting requirements for underground natural gas storage facilities in 49 CFR part 191. Four types of reports are required from operators for underground natural gas storage facilities: Annual reports, incident reports, safety-related condition reports, and National Registry information. PHMSA is requiring this information because there currently are no annual submittal requirements for underground natural gas storage facilities in PHMSA's regulations that include information about the wells and reservoirs. The first type of report noted is an "annual report," which is needed to collect operator name, address and contact information; location of the facility; number of wells including injection, withdrawal and observation wells; and facility operational information such as gas storage volumes, gas storage pressures, well depths, gas injection and withdrawal rates, and maintenance information that is conducted to ensure the safety of the facility. The second type of report is an "incident report" that is needed for operator reporting of an event that involves a release of gas, death or personal injury necessitating in-patient hospitalization, estimated property damage of \$50,000 or more, or unintentional estimated gas loss of three million cubic feet or more. The third type report noted is a "safety-related condition report" that is used to report findings that compromise the safety of the well or reservoir such as casing or tubing corrosion, cracks or other material defects, earthquakes, leaks, or anything that compromises the structural integrity or reliability of an underground natural gas storage facility. Lastly, National Registry information is needed by PHMSA to identify the facility operator that has primary responsibility for operations through an

regarding Aliso Canyon remediation costs as of August 15, 2016.

¹¹ The range reflects different assumptions on the discount rate used in estimating the social cost of methane. See Section 6 in RIA for details.

assigned Operator Identification Number (OPID).

API elected to publish 1170 and 1171 in the form of “Recommended Practices,” as opposed to “Standards.” This presented PHMSA with the problem of how to ensure that the industry practices therein were enforceable as opposed to mere guidance about what operators “should” do. Accordingly, PHMSA is making the API RPs mandatory out of concern that failure to do so would weaken many important safety provisions. However, PHMSA will allow operators to vary from the API RPs when compliance with a provision of the recommended practice is not practicable and not necessary for safety with respect to specified underground storage facilities or equipment as long as they document the technical and safety justification for making such determinations. PHMSA or its state partner would review such justifications during compliance inspections and utilize our range of enforcement tools as necessary to ensure variances are not utilized inappropriately. In addition, PHMSA is able to issue advisory bulletins or otherwise notify operators advising them of variances that have frequently been deemed objectionable and should be avoided under most circumstances. This approach has worked well in pipeline regulation involving incorporation by reference. Therefore, we do not believe this manner of adoption will be a significant departure from expected industry practices. In

addition, operators may submit an application for a special permit under 49 CFR 190.341 that would waive a given requirement or extend a deadline applicable to its facility if PHMSA determined that such waiver would not be inconsistent with safety.

III. Rulemaking Analysis and Notices

A. Statutory/Legal Authority for This Rulemaking

This IFR is published under the authority of the Federal Pipeline Safety Law (49 U.S.C. 60101 *et seq.*). Section 60102 authorizes the Secretary of Transportation to issue regulations governing design, installation, inspection, emergency plans and procedures, testing, construction, extension, operation, replacement, and maintenance of pipeline facilities. The amendments to the requirements for underground gas storage facilities involved in pipeline transportation addressed in this rulemaking are issued under this authority.

B. Executive Orders 12866 and 13563, and DOT Regulatory Policies and Procedures

Under title 5, United States Code, 553(b)(3)(B) and title 49, United States Code, 60102(b)(6)(C), advance notice, public procedure, and analysis of benefits and costs specified in 49 U.S.C. 60102(b)(2)(D) and (E) is not required when PHMSA for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rulemakings issued) that notice and

public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

PHMSA has determined that the underground storage of natural gas is an immediate safety and environmental threat. Therefore, this IFR is being issued to address an emergency situation within the meaning of section 6(a)(3)(D) of Executive Order (E.O.) 12866 (58 FR 51735). Under section 6(a)(3)(D), in emergency situations, an agency must notify the Office of Management and Budget (OMB) as soon as possible and, to the extent practicable, comply with subsections (a)(3)(B) and (C) of section 6 of E.O. 12866. PHMSA has notified and consulted with OMB on this IFR.

The IFR has been designated by OMB as a significant regulatory action under Section 3(f) of E.O. 12866, and therefore was reviewed by OMB. This IFR also is considered significant under the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034) because of substantial congressional, State, industry, and public interest in pipeline safety. PHMSA has prepared a regulatory impact analysis (RIA) for the IFR, which details the potential for incremental benefits and costs. The RIA in the docket for this IFR describes the baseline for the analysis, potential unit costs and benefits from compliance actions, and aggregate compliance costs. A table of the incremental annualized costs, from the RIA, is below:

INCREMENTAL ANNUALIZED COSTS OF THE IFR

[Million 2015\$]¹

Cost component	Incremental costs relative to API RPs implementation baseline					
	Full compliance baseline		Partial compliance baseline		Regulatory compliance only baseline	
	3% Discount rate	7% Discount rate	3% Discount rate	7% Discount rate	3% Discount rate	7% Discount rate
Mechanical integrity testing ²	\$0.0	\$0.0	\$27.2	\$31.7	\$170.6	\$193.6
Other RP elements	0.0	0.0	0.0	0.0	0.0	0.0
Reporting	<0.1	<0.1	<0.1	<0.1	<0.1	<0.1
Total ¹	<0.1	<0.1	27.2	31.7	170.6	193.6

¹ Range reflects the assumed baseline level of compliance with API RPs in absence of regulatory requirements.

² Based on 10-year phase-in of integrity tests and a 10-year interval between tests. See Section 4 for details.

To the degree that the IFR promotes implementation of safer practices by making them mandatory and enforceable, PHMSA expects the benefits of the IFR in general, and of the mechanical integrity testing requirements in particular, to derive from preventing catastrophic natural gas releases due to the failure of storage

wells or of fugitive and vented emissions ancillary to the operation of storage facilities. These benefits include avoided property damage, loss of product, injuries and fatalities, methane emissions, adverse health effects, and others.

PHMSA expects mechanical integrity tests and other measures mandated by

the IFR to reduce the likelihood of well failures in the future by detecting conditions that precede the failures. PHMSA did not find data to estimate quantitatively the reduction in risk that will result from conducting mechanical integrity tests on storage wells but notes that the tests are used to establish existing conditions and to monitor

development of corrosion or other conditions (e.g., mechanical defects or damages) that could lead to a release or other consequences. Corrosion poses a serious threat to maintaining natural gas containment. Without proactive tests, serious integrity conditions may be discovered and addressed only after containment has already been compromised and the casing is leaking.

Reporting requirements incorporated in the IFR will help ensure compliance with the minimum safety measures specified in the API RPs and will provide data PHMSA needs to evaluate whether more stringent safety requirements are warranted to protect people and the environment.

PHMSA requests information from the public that could be used to estimate risk reduction from conducting mechanical integrity tests and the benefits of the IFR.

C. Executive Order 13132

PHMSA has analyzed this IFR according to Executive Order 13132 (“Federalism”). The IFR could impact state requirements because it sets a minimum federal standard applicable to both intrastate and interstate underground storage facilities (see 49 U.S.C. 60104), but the IFR does not have a substantial direct effect on the states, the relationship between the national government and the states, or the distribution of power and responsibilities among the various levels of government. This IFR does not impose substantial direct compliance costs on State and local governments. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply.

D. Executive Order 13175

PHMSA has analyzed this IFR according to the principles and criteria in Executive Order 13175, “Consultation and Coordination with Indian Tribal Governments.” Because this IFR would not significantly or uniquely affect the communities of the Indian tribal governments or impose substantial direct compliance costs, the funding and consultation requirements of Executive Order 13175 do not apply. We invite Tribes to comment on the IFR and PHMSA will take any Tribal comments and impacts into account when the final rule making the IFR permanent is issued.

E. Regulatory Flexibility Act and Executive Order 13272

Section 603 of the Regulatory Flexibility Act (RFA), Public Law 96–354, requires an agency to prepare an initial regulatory flexibility analysis

describing impacts on small entities whenever an agency is required by 5 U.S.C. 553 to publish a notice of proposed rulemaking for any rulemaking. Similarly, section 604 of the RFA requires an agency to prepare a final regulatory flexibility analysis when an agency issues a rulemaking under 5 U.S.C. 553 after being required to publish a general notice of proposed rulemaking. Because of the need to move quickly to address the identified risk, prior notice and comment would be contrary to the public interest. As prior notice and comment under 5 U.S.C. 553 are not required to be provided in this situation, the analyses in 5 U.S.C. 603 and 604 are not required. Nonetheless, PHMSA conducted a screening analysis of the impact of the rule on small entities which is included in the RIA for the rulemaking. The results support a determination that the IFR will not have a “significant impact on a substantial number of small entities” (SISNOSE). PHMSA invites comments on the costs and impact of this rule on small entities.

F. Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act (UMRA) of 1995, Public Law 104–4, requires that federal agencies assess the effects of their regulatory actions on state, local, and tribal governments and the private sector. Under UMRA section 202, PHMSA generally must prepare a written statement, including a cost-benefit analysis, for rulemakings with “Federal mandates” that might result in expenditures by state, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million (adjusted annually for inflation) or more in any one year (i.e., \$151 million in 2015 dollars).

Based on the cost estimates detailed in the RIA for the most likely scenario in which a substantial fraction of the industry is already implementing API RPs 1170 and 1171 in the baseline, PHMSA determined that compliance costs in any given year will be below the threshold set in UMRA.

G. Paperwork Reduction Act

Pursuant to 5 CFR 1320.8(d), PHMSA is required to provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. As a result of the requirements of this rulemaking, the following information collection impacts are expected:

Recordkeeping Requirements for Operators With Underground Storage Facilities

PHMSA is revising § 192.7 to incorporate by reference American Petroleum Institute (API) Recommended Practices (RP): API RP 1170, “Design and Operation of Solution-mined Salt Caverns used for Natural Gas Storage” (July 2015), and API RP 1171, “Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs” (September 2015). Both API RPs recommend that operators of underground natural gas storage facilities should implement a wide range of actions to maintain safety, including the lifetime maintenance of certain records. PHMSA understands that the assessment, monitoring, planning, and recordkeeping activities are already conducted as part of normal business operations and may simply need to be modified and formalized to comply with the RPs. Accordingly, PHMSA estimates that all (estimated 124) owners and operators of underground natural gas storage facilities will take no more than 1 hour annually to comply with these recordkeeping requirements. The general recordkeeping requirements for operators of gas pipeline facilities are contained within the information collection under OMB Control No. 2137–0049. This information collection is being revised to account for the burden associated with these new recordkeeping requirements.

Reporting of Safety-Related Conditions in Underground Storage Facilities

PHMSA is revising § 191.23 to require operators of underground storage facilities to report certain safety-related conditions to PHMSA. PHMSA expects to receive four (4) of these safety-related condition reports annually from operators of underground storage facilities. This information collection is contained under OMB Control No. 2137–0578 which is being revised to account for the increased burden stemming from this requirement.

Incident and Annual Reporting Requirements for Operators With Underground Storage Facilities

PHMSA is revising § 191.15 to require each operator of an underground natural gas storage facility to submit DOT Form PHMSA F7100.2 as soon as practicable but not more than 30 days after detection of an incident. This form is contained under OMB Control No. 2137–0522 which is being revised to account for the estimated additional

burden resulting from this requirement. Currently, PHMSA expects to receive four (4) incident reports involving an underground storage facility each year.

PHMSA is also revising § 191.17 to require each operator of an underground natural gas storage facility to submit an annual report on DOT PHMSA Form 7100.4–1 by March 15, for the preceding calendar year except that the first report must be submitted by July 18, 2017. PHMSA is requesting OMB's approval of this new form which will be contained under OMB Control No. 2137–0522. Currently, PHMSA expects to receive 124 annual report submissions from operators with underground storage facilities. PHMSA expects each operator to spend 8 hours compiling and submitting the requested data.

Operator Registry and Notification Requirements for Underground Storage Facilities

PHMSA is revising § 191.22 to require operators of facilities to obtain, or validate, an Operator Identification Number (OPID) and to notify PHMSA, no less than 60 days prior, of certain events such as construction of a new facility, well drilling, well workover, change of primary entity responsible for the facility and acquisition or divestiture of the facility as fully described in § 191.22(c). This information collection is contained under OMB Control No. 2137–0627 which is being revised to account for the additional burden expected to come from this requirement. As a result of the provisions in this rule, PHMSA expects to receive 24 new OPID requests and 25 ad hoc notifications from operators of underground storage facilities.

PHMSA will submit these information collection revision requests to OMB for approval. These information collections are contained in the pipeline safety regulations, 49 CFR parts 190–199. The following information is provided for each information collection: (1) Title of the information collection; (2) OMB control number; (3) Current expiration date; (4) Type of request; (5) Abstract of the information collection activity; (6) Description of affected public; (7) Estimate of total annual reporting and recordkeeping burden; and (8) Frequency of collection.

The information collection burden for the following information collections are estimated to be revised as follows:

1. Title: Recordkeeping Requirements for Gas Pipeline Operators.

OMB Control Number: 2137–0049.

Current Expiration Date: 04/30/2018.

Abstract: A person owning or operating an underground natural gas

storage facility is required to maintain records, make reports, and provide information to the Secretary of Transportation at the Secretary's request. The types of records involved would include records for design activities, construction, maintenance activities, mechanical integrity tests and repairs, and other operation activities. As these activities have been widely adopted across the industry as RPs, PHMSA expects there to be minimal incremental burden.

Additionally, each operator of a pipeline facility (except master meter operators) must document the justification if it plans to deviate from a provision of the RPs. PHMSA expects 10 percent of the affected community (approx. 12 operators) will make these deviations each year. PHMSA believes it will take operators 8 hours to complete such documentation. This includes the time to gather and draft the information necessary for sufficiently demonstrating that compliance with a RP is not practicable and not necessary for safety with respect to specified underground storage facilities or equipment. This also includes the time necessary to have any deviation technically reviewed and documented by a subject matter expert to ensure there will be no adverse impact on design, construction, operations, maintenance, integrity, emergency preparedness and response, and overall safety; the time to have the deviation dated and approved by a senior executive officer, vice president, or higher office with responsibility of the underground natural gas storage facility; and the time to incorporate such deviations into the operator's program or procedural manual. This will result in an annual burden of 12 responses and 96 hours for this provision and an overall burden increase of 136 responses and 220 hours (124 hours for general recordkeeping + 96 hours to document deviations) for this information collection.

Affected Public: Operators of Underground Natural Gas Storage Facilities.

Annual Reporting and Recordkeeping Burden:

Total Annual Responses: 12,436.

Total Annual Burden Hours: 940,674.

Frequency of Collection: Annual.

2. Title: Reporting Safety-Related Conditions on Gas, Hazardous Liquid, and Carbon Dioxide Pipelines and Liquefied Natural Gas Facilities.

OMB Control Number: 2137–0578.

Current Expiration Date: 07/31/2017.

Abstract: Each operator of a pipeline facility (except master meter operators) must submit to DOT a written report on

any safety-related condition that causes or has caused a significant change or restriction in the operation of a pipeline facility or a condition that is a hazard to life, property or the environment. See 49 U.S.C. 60102. Based on the proposed revisions in this rule, the burden associated with this information collection is increasing by 4 responses and 24 burden hours.

Affected Public: Operators of Underground Natural Gas Storage Facilities.

Annual Reporting and Recordkeeping Burden:

Total Annual Responses: 146.

Total Annual Burden Hours: 876.

Frequency of Collection: On occasion.

3. Title: Incident and Annual Reports for Gas Pipeline Operators.

OMB Control Number: 2137–0522.

Current Expiration Date: 10/31/2017

Abstract: This information collection covers the collection of information from Gas pipeline operators for Incidents and Annual reports. Based on the proposals in the rule the burden associated with this information collection will increase by 128 responses (124 annual report submissions and 4 incident report submissions). PHMSA expects each of the 124 operators who submit the annual report to spend eight (8) hours completing this form, including the time for reviewing instructions, gathering the data needed, and completing and reviewing the collection of information, for an overall burden of 992 hours for annual report submissions. Based on current reporting trends, PHMSA expects to receive four (4) incident reports per year from operators of underground storage facilities. PHMSA expects operators who are required to submit an incident report to spend 10 hours per submission resulting in a burden of 40 hours for incident reporting. These two requirements, combined, will result in an overall burden increase of 128 responses and 1,032 burden hours.

Affected Public: Operators of Underground Natural Gas Storage Facilities.

Annual Reporting and Recordkeeping Burden:

Total Annual Responses: 12,292.

Total Annual Burden Hours: 93,353.

Frequency of Collection: On occasion.

4. Title: National Registry of Pipeline and Liquefied Natural Gas (LNG) Operators.

OMB Control Number: 2137–0627.

Current Expiration Date: 5/31/2018.

Abstract: The National Registry of Pipeline and LNG Operators serves as the storehouse for the reporting

requirements for an operator regulated or subject to reporting requirements under 49 CFR part 192, 193, or 195. This registry incorporates the use of two forms. The forms for assigning and maintaining OPID information are the Operator Assignment Request Form (PHMSA F 1000.1) and National Registry Notification Form (PHMSA F 1000.2). Based on the proposals in this IFR this information collection will increase by 49 responses and 49 burden hours.

Affected Public: Operators of Underground Natural Gas Storage Facilities.

Annual Reporting and Recordkeeping Burden:

Total Annual Responses: 679.

Total Annual Burden Hours: 679.

Frequency of Collection: On occasion.

Requests for copies of these information collections should be directed to Angela Dow or Cameron Satterthwaite, Office of Pipeline Safety (PHP-30), Pipeline Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue, SE., Washington, DC 20590-0001, Telephone (202) 366-4595.

Comments are invited on:

(a) The need for the proposed collection of information for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) The accuracy of the agency's estimate of the burden of the revised collection of information, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques.

Send comments directly to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attn: Desk Officer for the Department of Transportation, 725 17th Street NW., Washington, DC 20503. Comments can be emailed to OMB using the following email address: OIRA_Submission@omb.eop.gov. Comments on the collections of information associated with this IFR should be received by OMB on or prior to January 18, 2017.

H. Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified

Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

I. National Environmental Policy Act

PHMSA analyzed this IFR in accordance with section 102(2)(c) of the National Environmental Policy Act (42 U.S.C. 4321-4347), the Council on Environmental Quality regulations (40 CFR parts 1500 through 1508), and DOT Order 5610.1C, and has preliminarily determined that this action will not significantly affect the quality of the human environment. A preliminary environmental assessment of this rulemaking is available in the docket.

J. Executive Order 13211

This IFR is not a "significant energy action" under Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use). See additional details Section 8.5 of the RIA report. It is not likely to have a significant adverse effect on supply, distribution, or energy use. Further, the Office of Information and Regulatory Affairs has not designated this IFR as a significant energy action.

K. Privacy Act Statement

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (70 FR 19477).

L. Availability of Materials to Interested Parties

PHMSA currently incorporates by reference into 49 CFR parts 192, 193, and 195 all or parts of more than 60 standards and specifications developed and published by standard developing organizations (SDOs). In general, SDOs update and revise their published standards every 3 to 5 years to reflect modern technology and best technical practices.

The National Technology Transfer and Advancement Act of 1995 (Pub. L. 104-113) directs federal agencies to use voluntary consensus standards in lieu of government-written standards whenever possible. Voluntary consensus standards are standards developed or adopted by voluntary bodies that develop, establish, or coordinate technical standards using

agreed-upon procedures. In addition, Office of Management and Budget (OMB) issued OMB Circular A-119 to implement Section 12 (d) of Public Law 104-113 relative to the utilization of consensus technical standards by Federal agencies. This circular provides guidance for agencies participating in voluntary consensus standards bodies and describes procedures for satisfying the reporting requirements in Public Law 104-113.

In accordance with the preceding provisions, PHMSA has the responsibility for determining, via petitions or otherwise, which currently referenced standards should be updated, revised, or removed, and which standards should be added to 49 CFR parts 192, 193, and 195. Revisions to incorporate by reference materials in 49 CFR parts 192, 193, and 195 are handled via the rulemaking process, which allows for the public and regulated entities to provide input. During the rulemaking process, PHMSA must also obtain approval from the Office of the Federal Register to incorporate by reference any new materials.

PHMSA has worked to make the materials to be incorporated by reference reasonably available to interested parties. Section 24 of the "Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011" (Pub. L. 112-90, January 3, 2012), amended 49 U.S.C. 60102 by adding a new public availability requirement for documents incorporated by reference after January 3, 2013. The law states: "Beginning 1 year after the date of enactment of this subsection, the Secretary may not issue guidance or a regulation pursuant to this chapter that incorporates by reference any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge, on an Internet Web site." This section was further amended on August 9, 2013. The current law continues to prohibit the Secretary from issuing a regulation that incorporates by reference any document unless that document is available to the public, free of charge, but removes the Internet Web site requirements (Pub. L. 113-30, August 9, 2013).

Further, the Office of the Federal Register issued a November 7, 2014, rulemaking (79 FR 66278) that revised 1 CFR 51.5 to require that agencies detail in the preamble of a proposed rulemaking the ways the materials it proposes to incorporate by reference are reasonably available to interested parties, or how the agency worked to make those materials reasonably available to interested parties.

To meet the requirements of section 24, PHMSA negotiated agreements with all but one of the standards-setting organizations with standards already incorporated by reference in the pipeline safety regulations to make viewable copies of those standards available to the public at no cost. One organization with which PHMSA has an agreement is API, which will voluntarily make these recommended practices available to the public on its read-only Web site. API's mailing address and Web site is listed in 49 CFR part 192.

List of Subjects

49 CFR Part 191

Underground natural gas storage facility reporting requirements.

49 CFR Part 192

Incorporation by reference, Underground natural gas storage facility safety.

In consideration of the foregoing, PHMSA amends 49 CFR parts 191 and 192 as follows:

PART 191—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE; ANNUAL, INCIDENT REPORTS, AND SAFETY-RELATED CONDITION REPORTS

■ 1. The authority citation for part 191 is revised to read as follows:

Authority: 49 U.S.C. 5121, 60102, 60103, 60104, 60108, 60117, 60118, 60124, 60132, and 60141; and 49 CFR 1.97.

■ 2. In § 191.1, paragraph (a) is revised to read as follows:

§ 191.1 Scope.

(a) This part prescribes requirements for the reporting of incidents, safety-related conditions, annual pipeline summary data, National Operator Registry information, and other miscellaneous conditions by operators

of underground natural gas storage facilities and natural gas pipeline facilities located in the United States or Puerto Rico, including underground natural gas storage facilities and pipelines within the limits of the Outer Continental Shelf as that term is defined in the Outer Continental Shelf Lands Act (43 U.S.C. 1331).

* * * * *

■ 3. In § 191.3, the definition for *Incident* is revised and the definition for *Underground natural gas storage facility* is added in alphabetical order to read as follows:

§ 191.3 Definitions.

* * * * *

Incident means any of the following events:

(1) An event that involves a release of gas from a pipeline, gas from an underground natural gas storage facility, liquefied natural gas, liquefied petroleum gas, refrigerant gas, or gas from an LNG facility, and that results in one or more of the following consequences:

- (i) A death, or personal injury necessitating in-patient hospitalization;
- (ii) Estimated property damage of \$50,000 or more, including loss to the operator and others, or both, but excluding cost of gas lost; or
- (iii) Unintentional estimated gas loss of three million cubic feet or more.

(2) An event that results in an emergency shutdown of an LNG facility or an underground natural gas storage facility. Activation of an emergency shutdown system for reasons other than an actual emergency does not constitute an incident.

(3) An event that is significant in the judgment of the operator, even though it did not meet the criteria of paragraph (1) or (2) of this definition.

* * * * *

Underground natural gas storage facility means an underground natural

gas storage facility as defined in § 192.3 of this chapter.

■ 4. In § 191.15, the section heading and paragraph (c) are revised and paragraph (d) is added to read as follows:

§ 191.15 Transmission systems; gathering systems; liquefied natural gas facilities; and underground natural gas storage facilities: Incident report.

* * * * *

(c) *Underground natural gas storage facility.* Each operator of an underground natural gas storage facility must submit DOT Form PHMSA F7100.2 as soon as practicable but not more than 30 days after detection of an incident required to be reported under § 191.5.

(d) *Supplemental report.* Where additional related information is obtained after a report is submitted under paragraph (a), (b) or (c) of this section, the operator must make a supplemental report as soon as practicable with a clear reference by date to the original report.

■ 5. In § 191.17, the section heading is revised and paragraph (c) is added to read as follows:

§ 191.17 Transmission systems; gathering systems; liquefied natural gas facilities; and underground natural gas storage facilities: Annual report.

* * * * *

(c) *Underground natural gas storage facility.* Each operator of an underground natural gas storage facility must submit an annual report on DOT PHMSA Form 7100.4–1 by March 15, for the preceding calendar year except that the first report must be submitted by July 18, 2017.

■ 6. In § 191.21, the table is revised to read as follows:

§ 191.21 OMB control number assigned to information collection.

* * * * *

OMB CONTROL NUMBER 2137–0522

Section of 49 CFR part 191 where identified	Form No.
191.5	Telephonic.
191.9	PHMSA 7100.1, PHMSA 7100.3.
191.11	PHMSA 7100.1–1, PHMSA 7100.3–1.
191.12	PHMSA 7100.1–2.
191.15	PHMSA 7100.2, PHMSA 7100.3.
191.17	PHMSA 7100.2–1, PHMSA 7100.3–1. PHMSA 7100.4–1.
191.22	PHMSA 1000.1, PHMSA 1000.2.

■ 7. In § 191.22:

■ i. Revise paragraphs (a), (b), and (c) introductory text;

■ ii. Remove the “or” at the end of paragraph (c)(1)(ii);

■ iii. Remove the period at the end of paragraph (c)(1)(iii) and add “; or” in its place;

■ iv. Add paragraph (c)(1)(iv);

■ v. Revise paragraph (c)(2)(iii);

■ vi. Remove the “or” at the end of paragraph (c)(2)(iv);

■ vii. Remove the period at the end of paragraph (c)(2)(v) and add “; or” in its place;

- viii. Add paragraph (c)(2)(vi); and
- ix. Revising the heading for paragraph (d).

The revisions and additions read as follows:

§ 191.22 National Registry of Pipeline and LNG operators.

(a) *OPID request.* Effective January 1, 2012, each operator of a gas pipeline, gas pipeline facility, underground natural gas storage facility, LNG plant or LNG facility must obtain from PHMSA an Operator Identification Number (OPID). An OPID is assigned to an operator for the pipeline or pipeline system for which the operator has primary responsibility. To obtain an OPID, an operator must complete an OPID Assignment Request DOT Form PHMSA F 1000.1 through the National Registry of Pipeline, Underground Natural Gas Storage Facility, and LNG Operators in accordance with § 191.7.

(b) *OPID validation.* An operator who has already been assigned one or more OPID by January 1, 2011, must validate the information associated with each OPID through the National Registry of Pipeline, Underground Natural Gas Storage Facility, and LNG Operators at <http://opsweb.phmsa.dot.gov>, and correct that information as necessary, no later than June 30, 2012.

(c) *Changes.* Each operator of a gas pipeline, gas pipeline facility, underground natural gas storage facility, LNG plant, or LNG facility must notify PHMSA electronically through the National Registry of Pipeline, Underground Natural Gas Storage Facility, and LNG Operators at <http://opsweb.phmsa.dot.gov> of certain events.

(1) * * *

(iv) Construction of a new underground natural gas storage facility or the abandonment, drilling or well workover (including replacement of wellhead, tubing, or a new casing) of an injection, withdrawal, monitoring, or observation well for an underground natural gas storage facility.

(2) * * *

(iii) A change in the entity (e.g., company, municipality) responsible for an existing pipeline, pipeline segment, pipeline facility, underground natural gas storage facility, or LNG facility;

* * * * *

(vi) The acquisition or divestiture of an existing underground natural gas storage facility subject to part 192 of this subchapter.

(d) *Reporting.* * * *

■ 8. In § 191.23, paragraphs (a)(2) through (8) and (b)(3) are revised and paragraph (a)(9) is added to read as follows:

§ 191.23 Reporting safety-related conditions.

(a) * * *

(2) In the case of an underground natural gas storage facility, including injection, withdrawal, monitoring, or observation well, general corrosion that has reduced the wall thickness to less than that required for the maximum well operating pressure, and localized corrosion pitting to a degree where leakage might result.

(3) Unintended movement or abnormal loading by environmental causes, such as an earthquake, landslide, or flood, that impairs the serviceability of a pipeline or the structural integrity or reliability of an underground natural gas storage facility, including injection, withdrawal, monitoring, or observation well for an underground natural gas storage facility, or LNG facility that contains, controls, or processes gas or LNG.

(4) Any crack or other material defect that impairs the structural integrity or reliability of an underground natural gas storage facility or LNG facility that contains, controls, or processes gas or LNG.

(5) Any material defect or physical damage that impairs the serviceability of a pipeline that operates at a hoop stress of 20% or more of its specified minimum yield strength or underground natural gas storage facility, including injection, withdrawal, monitoring, or observations well for an underground natural gas storage facility.

(6) Any malfunction or operating error that causes the pressure of a pipeline or underground natural gas storage facility or LNG facility that contains or processes gas or LNG to rise above its maximum well operating pressure (or working pressure for LNG facilities) plus the margin (build-up) allowed for operation of pressure limiting or control devices.

(7) A leak in a pipeline or an underground natural gas storage facility, including injection, withdrawal, monitoring, or observation well for an underground natural gas storage facility, or LNG facility that contains or processes gas or LNG that constitutes an emergency.

(8) Inner tank leakage, ineffective insulation, or frost heave that impairs the structural integrity of an LNG storage tank.

(9) Any safety-related condition that could lead to an imminent hazard and causes (either directly or indirectly by remedial action of the operator), for purposes other than abandonment, a 20% or more reduction in operating pressure or shutdown of operation of a pipeline or an underground natural gas

storage facility, including injection, withdrawal, monitoring, or observation well for an underground natural gas storage facility, or an LNG facility that contains or processes gas or LNG.

(b) * * *

(3) Exists on a pipeline (other than an LNG facility or Underground Natural Gas Storage facility) that is more than 220 yards (200 meters) from any building intended for human occupancy or outdoor place of assembly, except that reports are required for conditions within the right-of-way of an active railroad, paved road, street, or highway; or

* * * * *

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 9. The authority citation for part 192 is revised to read as follows:

Authority: 49 U.S.C. 5103, 60102, 60104, 60108, 60109, 60110, 60113, 60116, 60118, 60137, and 60141; and 49 CFR 1.97.

■ 10. In § 192.3, a definition for *Underground natural gas storage facility* is added in alphabetical order to read as follows:

§ 192.3 Definitions.

* * * * *

Underground natural gas storage facility means a facility that stores natural gas in an underground facility incident to natural gas transportation, including—

- (1) A depleted hydrocarbon reservoir;
- (2) An aquifer reservoir; or
- (3) A solution-mined salt cavern reservoir, including associated material and equipment used for injection, withdrawal, monitoring, or observation wells, and wellhead equipment, piping, rights-of-way, property, buildings, compressor units, separators, metering equipment, and regulator equipment.

* * * * *

■ 11. In § 192.7, paragraphs (b)(10) and (11) are added to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *

(10) API Recommended Practice 1170, “Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage,” First edition, July 2015 (API RP 1170), IBR approved for § 192.12.

(11) API Recommended Practice 1171, “Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs,”

First edition, September 2015, (API RP 1171), IBR approved for § 192.12.

* * * * *

■ 12. Section 192.12 is added to read as follows:

§ 192.12 Underground natural gas storage facilities.

Underground natural gas storage facilities must meet the following requirements:

(a) Each underground natural gas storage facility that uses a solution-mined salt cavern reservoir for gas storage constructed after July 18, 2017 must meet all requirements and recommendations of API RP 1170 (incorporated by reference, see § 192.7).

(b) Each underground natural gas storage facility that uses a solution-mined salt cavern reservoir for storage including those constructed not later than July 18, 2017 must meet the operations, maintenance, integrity demonstration and verification, monitoring, threat and hazard identification, assessment, remediation, site security, emergency response and preparedness, and recordkeeping requirements and recommendations of API RP 1170, sections 9, 10, and 11 (incorporated by reference, see § 192.7) by January 18, 2018.

(c) Each underground natural gas storage facility that uses a depleted hydrocarbon reservoir or an aquifer reservoir for storage constructed after July 18, 2017 must meet all requirements and recommendations of API RP 1171 (incorporated by reference, see § 192.7).

(d) Each underground natural gas storage facility that uses a depleted hydrocarbon reservoir or an aquifer reservoir for gas storage, including those constructed not later than July 18, 2017 must meet the operations, maintenance, integrity demonstration and verification, monitoring, threat and hazard identification, assessment, remediation, site security, emergency response and preparedness, and recordkeeping requirements and recommendations of API RP 1171, sections 8, 9, 10, and 11 (incorporated by reference, see § 192.7) by January 18, 2018.

(e) Operators of underground gas storage facilities must establish and follow written procedures for operations, maintenance, and emergencies implementing the requirements of API RP 1170 and API RP 1171, as required under this section, including the effective dates as applicable, and incorporate such procedures into their written procedures for operations, maintenance, and emergencies established pursuant to § 192.605.

(f) With respect to the incorporation by reference of API RP 1170 and API RP 1171 in this section, the non-mandatory provisions (*i.e.*, provisions containing the word “should” or other non-mandatory language) are adopted as mandatory provisions under the authority of the pipeline safety laws except when the operator includes or references written technical justifications in its program or procedural manual, described in paragraph (a)(5) of this section, as to why compliance with a provision of the recommended practice is not practicable and not necessary for safety with respect to specified underground storage facilities or equipment. The justifications for any deviation from any provision of API RP 1170 and API RP 1171 must be technically reviewed and documented by a subject matter expert to ensure there will be no adverse impact on design, construction, operations, maintenance, integrity, emergency preparedness and response, and overall safety and must be dated and approved by a senior executive officer, vice president, or higher office with responsibility of the underground natural gas storage facility. An operator must discontinue use of any variance where PHMSA determines and provides notice that the variance adversely impacts design, construction, operations, maintenance, integrity, emergency preparedness and response, or overall safety.

Issued in Washington, DC, on December 9, 2016, under authority delegated in 49 CFR 1.97.

Marie Therese Dominguez,
Administrator.

RIN 0648–XF067

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason General category bluefin tuna quota transfer and retention limit adjustment.

SUMMARY: NMFS is transferring 16.3 metric tons (mt) of Atlantic bluefin tuna (BFT) quota from the 24.3-mt General category December 2017 subquota to the January 2017 subquota period (from January 1 through March 31, 2017, or until the available subquota for this period is reached, whichever comes first). NMFS also is adjusting the Atlantic tunas General category BFT daily retention limit for the January 2017 subquota period to three large medium or giant BFT from the default retention limit of one. This action is based on consideration of the regulatory determination criteria regarding inseason adjustments and applies to Atlantic tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat category permitted vessels when fishing commercially for BFT.

DATES: The quota transfer is effective January 1, 2017, through March 31, 2017. The General category retention limit adjustment is effective January 1, 2017, through March 31, 2017.

FOR FURTHER INFORMATION CONTACT: Sarah McLaughlin or Brad McHale, 978–281–9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006), as amended by Amendment 7 to the 2006 Consolidated HMS FMP (Amendment 7) (79 FR 71510, December 2, 2014). NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

The base quota for the General category is 466.7 mt. See § 635.27(a). Each of the General category time periods (January, June through August, September, October through November, and December) is allocated a portion of the annual General category quota. Although it is called the “January”

subquota, the regulations allow the General category fishery under this quota to continue until the subquota is reached or March 31, whichever comes first. Based on the General category base quota of 466.7 mt, the subquotas for each time period are as follows: 24.7 mt for January; 233.3 mt for June through August; 123.7 mt for September; 60.7 mt for October through November; and 24.3 mt for December. Any unused General category quota rolls forward within the fishing year, which coincides with the calendar year, from one time period to the next, and is available for use in subsequent time periods.

Quota Transfer

Under § 635.27(a)(9), NMFS has the authority to transfer quota among fishing categories or subcategories, after considering regulatory determination criteria provided under § 635.27(a)(8).

NMFS has considered all of the relevant determination criteria and their applicability to this inseason quota transfer and change in retention limit in the General category fishery. The criteria and their application are discussed below.

Transfer of 16.3 mt From the December Subquota to the January Subquota

For the inseason quota transfer, NMFS considered the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock (§ 635.27(a)(8)(i)). Biological samples collected from BFT landed by General category fishermen and provided by tuna dealers provide NMFS with valuable parts and data for ongoing scientific studies of BFT age and growth, migration, and reproductive status.

NMFS also considered the catches of the General category quota to date (including during the winter fishery in the last several years), and the likelihood of closure of that segment of the fishery if no adjustment is made (§ 635.27(a)(8)(ii)). Without a quota transfer from December 2017 to January 2017 for the General category at this time, the quota available for the January period would be 24.7 mt (5.3 percent of the General category quota), and participants would have to stop BFT fishing activities once that amount is met, while commercial-sized BFT may remain available in the areas where General category permitted vessels operate. Transferring 16.3 mt of the 24.3-mt quota available for December 2017 (with 24.3 mt representing 5.2 percent of the General category quota) would result in 41 mt (8.8 percent of the General category quota) being available

for the January subquota period. This quota transfer would provide additional opportunities to harvest the U.S. BFT quota without exceeding it, while preserving the opportunity for General category fishermen to participate in the winter BFT fishery at both the beginning and end of the calendar year.

Regarding the projected ability of the vessels fishing under the particular category quota (here, the General category) to harvest the additional amount of BFT before the end of the fishing year (§ 635.27(a)(8)(iii)), NMFS considered General category landings in the last several years. General category landings in the winter BFT fishery tend to straddle the calendar year as BFT may be available in late November/December and into January of the following year or later. Landings are highly variable and depend on access to commercial-sized BFT and fishing conditions, among other factors. Any unused General category quota from the January subperiod that remains as of March 31 will roll forward to the next subperiod within the calendar year (*i.e.*, the June-August time period). In 2016, NMFS transferred the entire 24.3-mt December subquota to the January time period, for an adjusted January 2016 subquota of 49 mt. Under a three-fish General category daily retention limit, that adjusted subquota allowed the fishery to continue through the end of March.

NMFS also considered the estimated amounts by which quotas for other gear categories of the fishery might be exceeded (§ 635.27(a)(8)(iv)) and the ability to account for all 2017 landings and dead discards. In the last several years, total U.S. BFT landings have been below the available U.S. quota such that the United States has carried forward the maximum amount of underharvest allowed by ICCAT from one year to the next. In 2016, the General category exceeded its adjusted quota (discussed below) but sufficient quota was available to cover the exceedance without affecting the other categories. NMFS will need to account for 2017 landings and dead discards within the adjusted U.S. quota, consistent with ICCAT recommendations, and anticipates having sufficient quota to do that.

This transfer would be consistent with the current quotas, which were established and analyzed in the 2015 BFT quota final rule (80 FR 52198, August 28, 2015), and with objectives of the 2006 Consolidated HMS FMP and amendments. (§ 635.27(a)(8)(v) and (vi)). Another principal consideration is the objective of providing opportunities to harvest the full annual U.S. BFT quota

without exceeding it based on the goals of the 2006 Consolidated HMS FMP and Amendment 7, including to achieve optimum yield on a continuing basis and to optimize the ability of all permit categories to harvest their full BFT quota allocations (related to § 635.27(a)(8)(x)).

NMFS also anticipates that some underharvest of the 2016 adjusted U.S. BFT quota will be carried forward to 2017 and placed in the Reserve category, in accordance with the regulations. This, in addition to the fact that any unused General category quota will roll forward to the next subperiod within the calendar year, along with NMFS' plan to actively manage the subquotas to avoid any exceedances, makes it likely that General category quota will remain available through the end of 2017 for December fishery participants, even with the quota transfer. NMFS also may choose to transfer unused quota from the Reserve or other categories, inseason, based on consideration of the determination criteria, as NMFS did for late 2016, (*i.e.*, transferred 125 mt from the Reserve category (81 FR 70369, October 12, 2016) and later transferred another 85 mt (18 mt from the Harpoon category and 67 mt from the Reserve category) (81 FR 71639, October 18, 2016).

In 2016, NMFS closed the General category quota effective November 4 to prevent further overharvest of the adjusted General category quota. General category landings were relatively high in the fall of 2016, due to a combination of fish availability, favorable fishing conditions, and higher daily retention limits (described below). NMFS anticipates that General category participants in all areas and time periods will have opportunities to harvest the General category quota in 2017, through active inseason management such as retention limit adjustments and/or the timing of quota transfers, as practicable. Thus, this quota transfer would allow fishermen to take advantage of the availability of fish on the fishing grounds, consider the expected increases in available 2017 quota later in the year, and provide a reasonable opportunity to harvest the full U.S. BFT quota.

Based on the considerations above, NMFS is transferring 16.3 mt of the 24.3-mt General category quota allocated for the December 2017 period to the January 2017 period, resulting in a subquota of 41 mt for the January 2017 period and a subquota of 8 mt for the December 2017 period. NMFS will close the General category fishery when the adjusted January period subquota of 41 mt has been reached, or it will close

automatically on March 31, 2017, whichever comes first, and it will remain closed until the General category fishery reopens on June 1, 2017.

Adjustment of General Category Daily Retention Limit

Unless changed, the General category daily retention limit starting on January 1 would be the default retention limit of one large medium or giant BFT (measuring 73 inches (185 cm) curved fork length (CFL) or greater) per vessel per day/trip (§ 635.23(a)(2)). This default retention limit would apply to General category permitted vessels and to HMS Charter/Headboat category permitted vessels when fishing commercially for BFT.

Under § 635.23(a)(4), NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range of zero to a maximum of five per vessel based on consideration of the relevant criteria provided under § 635.27(a)(8), and listed above. For the 2016 fishing year, NMFS adjusted the daily retention limit from the default level of one large medium or giant BFT to three large medium or giant BFT for the January 2016 subquota period (80 FR 77264, December 14, 2015); and five large medium or giant BFT for the June through August 2016 subquota period (81 FR 29501, May 12, 2016). Although NMFS initially adjusted the daily retention limit for the September, October through November, and December periods to five large medium or giant BFT (81 FR 59153, August 29, 2016), NMFS later decreased the limit to four fish effective October 9 (81 FR 70369, October 12, 2016) and to two fish effective October 17 (81 FR 71639, October 18, 2016). NMFS closed the 2016 General category quota effective November 4, 2016. NMFS has considered the relevant criteria and their applicability to the General category BFT retention limit for the January 2017 subquota period.

As described above with regard to the quota transfer, additional opportunity to land BFT would support the collection of a broad range of data for biological studies and for stock monitoring purposes. Regarding the effects of the adjustment on BFT rebuilding and overfishing and the effects of the adjustment on accomplishing the objectives of the fishery management plan, this action would be taken consistent with the previously implemented and analyzed quotas, and it is not expected to negatively impact stock health or otherwise affect the stock in ways not previously analyzed. It is also supported by the 2011

final rule regarding General and Harpoon category management measures, which increased the General category maximum daily retention limit from three to five fish (76 FR 74003, November 30, 2011).

Regarding the catches of the particular category quota to date and the likelihood of closure of that segment of the fishery if no adjustment is made, in 2012, 2013, and 2014, the available January subquota (23.1 mt) was reached on January 22, February 15, and March 21, respectively, under a limit of two large medium or giant BFT, and in each of these years, the General category did not reach its available quota by the end of the year. For 2015, the adjusted January subquota of 45.7 was not met under a daily retention limit of three large medium or giant BFT, whereas for 2016, the adjusted subquota of 49 mt was reached, and slightly exceeded, as of March 31 under a three-fish limit.

As noted above, commercial-sized BFT are typically available in January and may continue to be available through March. Considering this information and the transfer of 16.3 mt of the 24.3-mt December 2017 subquota to the January 2017 subquota period (for an adjusted total of 41 mt), the default one-fish limit likely would be overly restrictive. Increasing the daily retention limit from the default may mitigate rolling an excessive amount of unused quota from one time-period subquota to the next and thus help maintain an equitable distribution of fishing opportunities. Although NMFS has the authority to set the daily retention limit up to five fish, the rate of harvest of the January subquota could be accelerated under a high limit (and higher fish availability), and result in a relatively short fishing season or quota exceedance. A short fishing season may preclude or reduce fishing opportunities for some individuals or geographic areas because of the migratory nature and seasonal distribution of BFT.

Based on these considerations, NMFS has determined that a three-fish General category retention limit is warranted for the January 2017 subquota period. It would provide a reasonable opportunity to harvest the U.S. quota of BFT without exceeding it, while maintaining an equitable distribution of fishing opportunities, help optimize the ability of the General category to harvest its available quota, allow collection of a broad range of data for stock monitoring purposes, and be consistent with the objectives of the 2006 Consolidated HMS FMP and amendments. Therefore, NMFS increases the General category retention limit from the default limit (one) to three large medium or giant

BFT per vessel per day/trip, effective January 1, 2017, through March 31, 2017, or until the 41-mt January subquota is harvested, whichever comes first.

Regardless of the duration of a fishing trip, the daily retention limit applies upon landing. For example, during the January 2017 subquota period, whether a vessel fishing under the General category limit takes a two-day trip or makes two trips in one day, the day/trip limit of three fish applies and may not be exceeded upon landing. This General category retention limit is effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for BFT, and applies to those vessels permitted in the General category, as well as to those HMS Charter/Headboat permitted vessels fishing commercially for BFT.

Monitoring and Reporting

NMFS will continue to monitor the BFT fishery closely. Dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. General, HMS Charter/Headboat, Harpoon, and Angling category vessel owners are required to report the catch of all BFT retained or discarded dead, within 24 hours of the landing(s) or end of each trip, by accessing hmspermits.noaa.gov. Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional action (*i.e.*, quota and/or daily retention limit adjustment, or closure) is necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may call the Atlantic Tunas Information Line at (978) 281-9260, or access hmspermits.noaa.gov, for updates on quota monitoring and inseason adjustments.

Classification

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Affording prior notice and opportunity for public comment to implement the

quota transfer and daily retention limit for the January 2017 subquota period at this time is impracticable. NMFS could not have proposed these actions earlier, as it needed to consider and respond to updated data and information from the 2016 General category fishery, including during late 2016, in deciding to transfer the December 2017 quota to the January 2017 subquota period and selecting the appropriate retention limit for the January 2017 subquota period. If NMFS was to offer a public comment period now, after having appropriately considered that data, it would preclude fishermen from harvesting BFT that are legally available consistent with all of the regulatory criteria, and/or could result in selection of a retention limit inappropriately high for the amount of quota available for the period.

Delays in increasing the daily retention limit would adversely affect those General and HMS Charter/Headboat category vessels that would otherwise have an opportunity to harvest more than the default retention limit of one BFT per day/trip and may exacerbate the problem of low catch rates and quota rollovers. Limited opportunities to harvest the respective quotas may have negative social and economic impacts for U.S. fishermen that depend upon catching the available quota within the time periods designated in the 2006 Consolidated HMS FMP, as amended. Adjustment of the retention limit needs to be effective January 1, 2017, or as soon as possible thereafter, to minimize any unnecessary disruption in fishing patterns, to allow the impacted sectors to benefit from the adjustment, and to provide fishing opportunities for fishermen in geographic areas with access to the fishery only during this time period. Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For these reasons, there also is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under §§ 635.23(a)(4) and 635.27(a)(9), and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: December 14, 2016.

[Docket No. 120627194-3657-02]

RIN 0648-XF062

Atlantic Highly Migratory Species; North Atlantic Swordfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; Swordfish General Commercial permit retention limit inseason adjustment for the Northwest Atlantic, Gulf of Mexico, and U.S. Caribbean regions.

SUMMARY: NMFS is adjusting the Swordfish (SWO) General Commercial permit retention limits for the Northwest Atlantic, Gulf of Mexico, and U.S. Caribbean regions for January through June of the 2017 fishing year, unless otherwise later noticed. The SWO General Commercial permit retention limit in each of these regions is increased from the regulatory default limits to six swordfish per vessel per trip. The SWO General Commercial permit retention limit in the Florida SWO Management Area will remain unchanged at the default limit of zero swordfish per vessel per trip. These adjustments apply to SWO General Commercial permitted vessels and Highly Migratory Species (HMS) Charter/Headboat permitted vessels when on a non-for-hire trip. This action is based upon consideration of the applicable inseason regional retention limit adjustment criteria.

DATES: The adjusted SWO General Commercial permit retention limits in the Northwest Atlantic, Gulf of Mexico, and U.S. Caribbean regions are effective from January 1, 2017, through June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Rick Pearson or Randy Blankinship, 727-824-5399.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of North Atlantic swordfish by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. North Atlantic swordfish quota recommended

by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and implemented by the United States into two equal semi-annual directed fishery quotas, an annual incidental catch quota for fishermen targeting other species or taking swordfish recreationally, and a reserve category, according to the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006), as amended, and in accordance with implementing regulations. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

ICCAT Recommendation 13-02 set the North Atlantic swordfish total allowable catch (TAC) at 10,301 metric tons (mt) dressed weight (dw) (13,700 mt whole weight (ww)) through 2016. Of this TAC, the United States' baseline quota is 2,937.6 mt dw (3,907 mt ww) per year. The Recommendation also included an 18.8 mt dw (25 mt ww) annual quota transfer from the United States to Mauritania and limited underharvest carryover to 15 percent of a contracting party's baseline quota. Thus, the United States could carry over a maximum of 440.6 mt dw (586.0 mt ww) of underharvest. A new Recommendation was adopted at the 2016 ICCAT annual meeting, maintaining the provisions related to quota, the transfer to Mauritania, and the carryover limit. Absent adjustments, the codified baseline quota is 2,937 mt dw for the directed fishery in 2017, split equally (1,468.5 mt dw) between two semi-annual periods in 2017 (January through June, and July through December). We anticipate, however, that the 2017 adjusted North Atlantic swordfish quota will be 3,359.4 mt dw (equivalent to the 2016 adjusted quota) when we adjust the quota. At this time, given the extent of underharvest in 2016, we anticipate again carrying over the maximum allowable 15 percent (440.6 mt dw) which, with the Mauritania transfer, would result in a final adjusted North Atlantic swordfish quota for the 2017 fishing year equal to that from last year 3,359.4 mt dw (2,937.6-18.8 + 440.6 = 3,359.4 mt dw). Also as in past years, we anticipate allocating from the adjusted quota, 50 mt dw to the Reserve category for inseason adjustments and research, and 300 mt dw to the incidental category, which includes recreational landings and landings by incidental swordfish permit holders, per § 635.27(c)(1)(i).

This would result in an allocation of 3,009.4 mt dw for the directed fishery, which would be split equally (1,504.7 mt dw) between two semi-annual periods in 2017 (January through June, and July through December).

Adjustment of SWO General Commercial Permit Vessel Retention Limits

The 2017 North Atlantic swordfish fishing year, which is managed on a calendar-year basis and divided into two equal semi-annual quotas, begins on January 1, 2017. Landings attributable to the SWO General Commercial permit are counted against the applicable semi-annual directed fishery quota. Regional default retention limits for this permit have been established and are automatically effective from January 1 through December 31 each year, unless changed based on the inseason regional retention limit adjustment criteria at § 635.24(b)(4)(iv). The default retention limits established for the SWO General Commercial permit are: (1) Northwest Atlantic region—three swordfish per vessel per trip; (2) Gulf of Mexico region—three swordfish per vessel per trip; (3) U.S. Caribbean region—two swordfish per vessel per trip; and, (4) Florida SWO Management Area—zero swordfish per vessel per trip. The default retention limits apply to SWO General Commercial permitted vessels and to HMS Charter/Headboat permitted vessels when fishing on non for-hire trips. As a condition of these permits, vessels may not possess, retain, or land any more swordfish than is specified for the region in which the vessel is located.

Under § 635.24(b)(4)(iii), NMFS may increase or decrease the SWO General Commercial permit vessel retention limit in any region within a range from zero to a maximum of six swordfish per vessel per trip. Any adjustments to the retention limits must be based upon a consideration of the relevant criteria provided in § 635.24(b)(4)(iv), which include: the usefulness of information obtained from biological sampling and monitoring of the North Atlantic swordfish stock; the estimated ability of vessels participating in the fishery to land the amount of swordfish quota available before the end of the fishing year; the estimated amounts by which quotas for other categories of the fishery might be exceeded; effects of the adjustment on accomplishing the objectives of the fishery management plan and its amendments; variations in seasonal distribution, abundance, or migration patterns of swordfish; effects of catch rates in one region precluding vessels in another region from having a

reasonable opportunity to harvest a portion of the overall swordfish quota; and, review of dealer reports, landing trends, and the availability of swordfish on the fishing grounds.

NMFS has considered these criteria as discussed below and their applicability to the SWO General Commercial permit retention limit in all regions for January through June of the 2017 North Atlantic swordfish fishing year, and has determined that the SWO General Commercial permit vessel retention limits in the Northwest Atlantic, Gulf of Mexico, and U.S. Caribbean regions applicable to persons issued a SWO General Commercial permit or HMS Charter/Headboat permit (when on a non for-hire trip) should be increased from the default levels that would otherwise automatically become effective on January 1, 2017.

Among the regulatory criteria for inseason adjustments to retention limits is the requirement that NMFS consider the “effects of the adjustment on accomplishing the objectives of the fishery management plan and its amendments.” Thus, a principal consideration in deciding whether to increase the retention limit is the objective of providing opportunities to harvest the full North Atlantic directed swordfish quota without exceeding it based upon the 2006 Consolidated HMS FMP goal to, consistent with other objectives of this FMP, “manage Atlantic HMS fisheries for continuing optimum yield so as to provide the greatest overall benefit to the Nation, particularly with respect to food production, providing recreational opportunities, preserving traditional fisheries, and taking into account the protection of marine ecosystems.” Consistent with the FMP and its amendments, it is also important for NMFS to continue to provide protection to important swordfish juvenile areas and migratory corridors.

The regulatory criteria also require NMFS to consider the estimated ability of vessels participating in the fishery to land the amount of swordfish quota available before the end of the fishing year. In considering these criteria and their application here, NMFS examined electronic dealer reports, which provide accurate and timely monitoring of landings, and considered recent landing trends and information obtained from biological sampling and monitoring of the North Atlantic swordfish stock. A six swordfish per vessel per trip limit for SWO General Commercial permit holders was in effect in the Northwest Atlantic, Gulf of Mexico, and U.S. Caribbean regions for the entire 2016 fishing season as a result of actions

adjusting those limits upwards in January and July (80 FR 81770 and 81 FR 38966). Even with these higher retention limits, directed swordfish landings for the January through June 2016 semi-annual period were approximately 465.7 mt dw (30.9 percent of the adjusted directed sub-quota). Preliminary 2016 total annual directed swordfish landings through October 31, 2016, are approximately 844.7 mt dw, or 28.1 percent of the 3,009.4 mt dw annual adjusted directed swordfish quota.

The directed swordfish quota has not been harvested for several years and, based upon current landing trends, is not likely to be harvested or exceeded during 2017. This information indicates that sufficient directed swordfish quota should be available from January 1 through June 30, 2017, at the higher retention levels, within the limits of the scientifically-supported TAC and consistent with the goals of the FMP.

The regulatory criteria for inseason adjustments also require us to consider the estimated amounts by which quotas for other categories of the fishery might be exceeded. Based upon recent landings rates from dealer reports, an increase in the vessel retention limit for SWO General Commercial permit holders is not likely to cause quotas for other categories of the fishery to be exceeded as the directed category quota has been significantly underharvested in recent years and landings trends are not expected to vary significantly in 2017. Similarly, regarding the criteria that NMFS consider the effects of catch rates in one region precluding vessels in another region from having a reasonable opportunity to harvest a portion of the overall swordfish quota, NMFS expects there to be sufficient swordfish quota for 2017, and thus increased catch rates in these three regions would not be expected to preclude vessels in the other region (the Florida SWO Management Area) from having a reasonable opportunity to harvest a portion of the overall swordfish quota. This issue is largely moot, however, because the retention limit in the Florida Swordfish Management Area is set at zero for biological and ecological reasons related to the stock, as discussed below.)

Finally, in making adjustments to the retention limits NMFS must consider variations in seasonal distribution, abundance, or migration patterns of swordfish, and the availability of swordfish on the fishing grounds. With regard to swordfish abundance, the 2016 report by ICCAT’s Standing Committee on Research and Statistics indicated that the North Atlantic swordfish stock is

not overfished ($B_{2011}/B_{msy} = 1.14$), and overfishing is not occurring ($F_{2011}/F_{msy} = 0.82$). Increasing the retention limits for this U.S. handgear fishery is not expected to affect the swordfish stock status determination because any additional landings would be within the established overall U.S. North Atlantic swordfish quota allocation recommended by ICCAT. Increasing opportunity beginning on January 1, 2017, is also important because of the migratory nature and seasonal distribution of swordfish. In a particular geographic region, or waters accessible from a particular port, the amount of fishing opportunity for swordfish may be constrained by the short amount of time the swordfish are present as they migrate.

NMFS also has determined that the retention limit will remain at zero swordfish per vessel per trip in the Florida SWO Management Area at this time. As discussed above, NMFS considered consistency with the 2006 HMS FMP and its amendments and the importance for NMFS to continue to provide protection to important swordfish juvenile areas and migratory corridors. As described in Amendment 8 to the 2006 Consolidated HMS FMP (78 FR 52012), the area off the southeastern coast of Florida, particularly the Florida Straits, contains oceanographic features that make the area biologically unique. It provides important juvenile swordfish habitat, and is essentially a narrow migratory corridor containing high concentrations of swordfish located in close proximity to high concentrations of people who may fish for them. Public comment on Amendment 8, including from the Florida Fish and Wildlife Conservation Commission, indicated concern about the resultant high potential for the improper rapid growth of a commercial fishery, increased catches of undersized swordfish, the potential for larger numbers of fishermen in the area, and the potential for crowding of fishermen, which could lead to gear and user conflicts. These concerns remain valid. NMFS will continue to collect information to evaluate the appropriateness of the retention limit in the Florida SWO Management Area and other regional retention limits. This action therefore maintains a zero-fish retention limit in the Florida Swordfish Management Area.

These adjustments are consistent with the 2006 Consolidated HMS FMP as amended, ATCA, and the Magnuson-Stevens Act, and are not expected to negatively impact stock health.

Monitoring and Reporting

NMFS will continue to monitor the swordfish fishery closely during 2017 through mandatory landings and catch reports. Dealers are required to submit landing reports and negative reports (if no swordfish were purchased) on a weekly basis.

Depending upon the level of fishing effort and catch rates of swordfish, NMFS may determine that additional retention limit adjustments or closures are necessary to ensure that available quota is not exceeded or to enhance fishing opportunities. Subsequent actions, if any, will be published in the **Federal Register**. In addition, fishermen may access <http://www.nmfs.noaa.gov/sfa/hms/species/swordfish/landings/index.html> for updates on quota monitoring.

Classification

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP, as amended, provide for inseason retention limit adjustments to respond to changes in swordfish landings, the availability of swordfish on the fishing grounds, the migratory nature of this species, and regional variations in the fishery. Based on available swordfish quota, stock abundance, fishery performance in recent years, and the availability of swordfish on the fishing grounds, among other considerations, adjustment to the SWO General Commercial permit retention limits from the default levels as discussed above is warranted, except that it maintains a zero-fish retention limit in the Florida SWO Management Area. Analysis of available data shows that adjustment to the swordfish daily retention limit from the default levels would result in minimal risks of exceeding the ICCAT-allocated quota. NMFS provides notification of retention limit adjustments by publishing the notice in the **Federal Register**, emailing individuals who have subscribed to the Atlantic HMS News electronic newsletter, and updating the information posted on the "Atlantic HMS Breaking News" Web site at http://www.nmfs.noaa.gov/sfa/hms/news/breaking_news.html. Delays in temporarily increasing these retention limits caused by the time required to publish a proposed rule and accept public comment would adversely and unnecessarily affect those SWO General Commercial permit holders and HMS

Charter/Headboat permit holders that would otherwise have an opportunity to harvest more than the default retention limits of three swordfish per vessel per trip in the Northwest Atlantic and Gulf of Mexico regions, and two swordfish per vessel per trip in the U.S. Caribbean region. Further, any delay beyond January 1, 2017, the start of the first semi-annual directed fishing period, could exacerbate the problem of low swordfish landings and subsequent quota rollovers. Limited opportunities to harvest the directed swordfish quota may have negative social and economic impacts for U.S. fishermen. Adjustment of the retention limits needs to be effective on January 1, 2017, to allow all of the affected sectors to benefit from the adjustment during the relevant time period, which could pass by for some fishermen if the action is delayed for notice and public comment, and to not preclude fishing opportunities for fishermen, particularly in the Gulf of Mexico and U.S. Caribbean regions, who have access to the fishery during a short time period because of seasonal fish migration. Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For all of the above reasons, there is also good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under 50 CFR 635.24(b)(4) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: December 9, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 150903814-5999-02]

RIN 0648-XF073

Fisheries of the Northeastern United States; Summer Flounder Fishery; Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the State of Maine is transferring a portion of its 2016 commercial summer flounder quota to the State of Connecticut. These quota adjustments are necessary to comply with the Summer Flounder, Scup and Black Sea Bass Fishery Management Plan quota transfer provision. This announcement informs the public of the revised commercial quotas for Maine and Connecticut.

DATES: Effective December 16, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Cynthia Hanson, Fishery Management Specialist, (978) 281-9180.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found in 50 CFR 648.100 through 648.110. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through North Carolina. The

process to set the annual commercial quota and the percent allocated to each state are described in § 648.102, and the initial 2016 allocations were published on December 28, 2015 (80 FR 80689).

The final rule implementing Amendment 5 to the Summer Flounder Fishery Management Plan, as published in the **Federal Register** on December 17, 1993 (58 FR 65936), provided a mechanism for transferring summer flounder commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can transfer or combine summer flounder commercial quota under § 648.102(c)(2). The Regional Administrator is required to consider the criteria in § 648.102(c)(2)(i)(A) through (C) in the evaluation of requests for quota transfers or combinations.

Maine is transferring 3,800 lb (1,724 kg) of summer flounder commercial

quota to Connecticut. This transfer was prompted by state officials in Connecticut to ensure their commercial summer flounder quota is not exceeded. The revised summer flounder quotas for calendar year 2016 are now: Maine, 64 lb (29 kg); and Connecticut, 187,166 lb (84,897 kg); based on the initial quotas published in the 2016–2018 Summer Flounder, Scup, and Black Sea Bass Specifications on December 28, 2015 (80 FR 80689).

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 9, 2016.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register

Vol. 81, No. 243

Monday, December 19, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-7491; Directorate Identifier 2015-NE-39-AD]

RIN 2120-AA64

Airworthiness Directives; General Electric Company Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede airworthiness directive (AD) 2016-13-05, which applies to all General Electric Company (GE) GE90-76B, GE90-77B, GE90-85B, GE90-90B, and GE90-94B turbofan engines. AD 2016-13-05 requires eddy current inspection (ECI) of the high-pressure compressor (HPC) stage 8-10 spool at each shop visit for all affected engines and ECI or ultrasonic inspection (USI) for certain affected engines. Since we issued AD 2016-13-05, we determined that the risk of the failure of an HPC stage 8-10 spool was excessive without repetitive USI prior to shop visit. This proposed AD would require initial and repetitive on-wing USIs of the HPC stage 8-10 spool for certain engines prior to shop visit and ECI of all affected engines at each shop visit. We are proposing this AD to correct the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by February 2, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor,

Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact General Electric Company, GE-Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215, phone: 513-552-3272; fax: 513-552-3329; email: geae.aoc@ge.com. You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781-238-7125.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-7491; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: John Frost, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781-238-7756; fax: 781-238-7199; email: john.frost@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2015-7491; Directorate Identifier 2015-NE-39-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On June 15, 2016, we issued AD 2016-13-05, Amendment 39-18569 (81 FR 41208, June 24, 2016; corrected 81 FR 42475, June 30, 2016) ("AD 2016-13-05"), for GE GE90-76B, GE90-77B, GE90-85B, GE90-90B, and GE90-94B turbofan engines. AD 2016-13-05 requires an ECI or USI of the HPC stage 8-10 spool and removing from service those parts that fail inspection. AD 2016-13-05 resulted from an uncontained failure of the HPC stage 8-10 spool, leading to an airplane fire. We issued AD 2016-13-05 to prevent failure of the HPC stage 8-10 spool, uncontained rotor release, damage to the engine, and damage to the airplane.

Actions Since AD 2016-13-05 Was Issued

We issued AD 2016-13-05 without including the repetitive USI prior to shop visit to expedite introduction of the corrective actions to the fleet. Since we issued AD 2016-13-05, we determined that a repetitive USI is required based on analysis that the risk of the failure of an HPC stage 8-10 spool is excessive without this inspection.

Related Service Information

We reviewed GE GE90 Service Bulletin (SB) SB 72-1151 R00, dated June 10, 2016. This SB describes procedures for an on-wing USI of the stage 8 web of the stage 8-10 spool.

We also reviewed Chapter 72-31-08, Special Procedures 003; and Chapter 72-00-31, Special Procedures 006, in the GE GE90 Engine Manual, GEK100700, Revision 68, dated September 1, 2016. These procedures describe how to perform ECI of the stage 8 aft web of the stage 8-10 spool.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would retain all the requirements of AD 2016–13–05. This proposed AD would also require repetitive USI of the HPC 8–10 spool.

Interim Action

We consider this proposed AD interim action. GE is determining the root cause for the unsafe condition identified in this proposed AD. Once a root cause is identified, we will consider additional rulemaking.

Costs of Compliance

We estimate that this proposed AD affects 54 engines installed on airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	7 work-hours × \$85 per hour = \$595 per inspection cycle.	\$0	\$595 per inspection cycle	\$32,130 per inspection cycle.

We estimate the following costs to do any necessary replacements that would

be required based on the results of the proposed inspection. We have no way of

determining the number of engines that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement of spool	0 work-hours × \$85 per hour = \$0	\$780,000	\$780,000

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2016–13–05, Amendment 39–18569 (81 FR 41208, June 24, 2016; corrected 81 FR 42475, June 30, 2016), and adding the following new AD:

General Electric Company: Docket No. FAA–2015–7491; Directorate Identifier 2015–NE–39–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by February 2, 2017.

(b) Affected ADs

This AD replaces AD 2016–13–05, Amendment 39–18569 (81 FR 41208, June 24, 2016; corrected 81 FR 42475, June 30, 2016).

(c) Applicability

This AD applies to General Electric Company (GE) GE90–76B, GE90–77B, GE90–85B, GE90–90B, and GE90–94B turbofan engines with a high-pressure compressor (HPC) stage 8–10 spool, part numbers (P/Ns) 1694M80G04, 1844M90G01, or 1844M90G02, installed.

(d) Subject

Air Transport Association (ATA) of America Code 72, Engine General.

(e) Unsafe Condition

This AD was prompted by an uncontained failure of the HPC stage 8–10 spool. We are issuing this AD to prevent failure of the HPC stage 8–10 spool, uncontained rotor release, damage to the engine, and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) For HPC stage 8–10 spool, P/N 1694M80G04, all serial numbers (S/Ns), or HPC stage 8–10 spool, P/N 1844M90G01 or 1844M90G02, with a S/N listed in Figure 1 to paragraph (f) of this AD; perform an on-wing ultrasonic inspection (USI) of the stage 8 aft web upper face as follows:

(i) Perform an initial USI after reaching 8,000 cycles since new (CSN), but, before exceeding 9,000 CSN, or within 500 cycles in

service after July 29, 2016, whichever occurs later.

(ii) Thereafter, perform a USI of the stage 8 aft web upper face every 500 cycles since last inspection.

(iii) Compliance with paragraph (f)(2)(i) of this AD is terminating action for the initial and repetitive USIs specified by paragraphs (f)(1)(i) and (f)(1)(ii) of this AD.

(2) For all HPC stage 8–10 spools, P/N 1694M80G04, 1844M90G01, or 1844M90G02, perform an eddy current inspection (ECI) of the stage 8 aft upper face as follows:

(i) Perform an initial ECI of the stage 8 aft web upper face at the next shop visit after the effective date of this AD.

(ii) Thereafter, perform an ECI of the stage 8 aft web upper face at each subsequent shop visit.

(3) Remove from service any HPC stage 8–10 spool that fails the inspection required by paragraphs (f)(1) or (f)(2) of this AD, and replace with a spool eligible for installation.

(g) Definition

For the purpose of this AD, an engine shop visit is the induction of an engine into the shop for maintenance during which the compressor discharge pressure seal face is exposed.

(h) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: ANE-AD-AMOC@faa.gov.

(i) Related Information

(1) For more information about this AD, contact John Frost, Aerospace Engineer, Engine Certification Office, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7756; fax: 781–238–7199; email: john.frost@faa.gov.

(2) GE GE90 Service Bulletin (SB) SB 72–1151 R00, dated June 10, 2016, and Chapter 72–31–08, Special Procedures 003, and Chapter 72–00–31, Special Procedures 006, in GE GE90 Engine Manual, GEK100700, Revision 68, dated September 1, 2016, can be obtained from GE using the contact information in paragraph (i)(3) of this AD. This SB describes procedures for an on-wing USI of the stage 8 web of the stage 8–10 spool. These engine manual procedures describe how to perform ECI of the stage 8 aft web of the stage 8–10 spool.

(3) For service information identified in this proposed AD, contact General Electric Company, GE-Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215, phone: 513–552–3272; fax: 513–552–3329; email: geae.aoc@ge.com.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2013–13–16, which applies to all Airbus Model A330–200, A330–200 Freighter, A330–300 series airplanes, and all Airbus Model A340–200, –300, –500, and –600 series airplanes. AD 2013–13–16 currently requires repetitive inspections for discrepancies of the ball-screw assembly of the trimmable horizontal stabilizer actuator (THSA), repetitive greasing of the THSA ball-nut, and replacement of the THSA if necessary; and modification or replacement (as applicable) of the ball-nut assembly,

which ends certain repetitive inspections. Since we issued AD 2013–13–16, we have determined that a modification that automatically detects failure of the ball-screw assembly is necessary. This proposed AD would require an inspection, corrective actions if necessary, lubrication of the ball-nut, modification of the THSA, and removal of certain airplanes from the applicability. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by February 2, 2017.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–9393; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116,

Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA–2016–9393; Directorate Identifier 2014–NM–199–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On June 21, 2013, we issued AD 2013–13–16, Amendment 39–17504 (78 FR 47537, August 6, 2013) (“AD 2013–13–16”). AD 2013–13–16 requires actions intended to address an unsafe condition on all Airbus Model A330–200, A330–200 Freighter, and A330–300 series airplanes, and all Airbus Model A340–200, –300, –500, and –600 series airplanes.

Since we issued AD 2013–13–16, Airbus transferred most of the requirements of AD 2013–13–16 into airworthiness limitations, except the requirements for ECAM fault messages.

The European Aviation Safety Agency (EASA) which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014–0219, dated September 29, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition on all Airbus Model A330 and Model A340 series airplanes. The MCAI states:

Several cases of transfer tube disconnection from the ball-nut of the trimmable horizontal stabilizer actuator (THSA) part number (P/N) 47172 and 47147–400 were detected on the ground during greasing and maintenance. Investigation results showed that this was caused by water ingress into the ball-nut, resulting in the jamming of the ball transfer circuit when the water froze. If the three (independent) ball circuits fail, then the THSA operates on a fail-safe nut (which operates without balls), which jams after several movements on the ball-screw of the THSA.

This condition, if not detected and corrected, could damage the ball-screw and the fail-safe nut, possibly resulting in jamming of the THSA and consequent reduced control of the aeroplane.

To detect at an early stage any distortion or initiation of disconnection, [Directorate General for Civil Aviation] DGAC France issued AD 2001–356 and AD 2001–357 to require repetitive inspections of the transfer tubes and their collars and, depending on findings, corrective action(s).

Prompted by another case of transfer tube disconnection, DGAC France issued AD 2001–356R2 and AD 2001–357R2 to require additional repetitive greasing and reinforcement of the ball-nut maintenance greasing instructions.

Subsequently, DGAC France issued AD 2002–037 and AD 2002–038 to require a modification that was also terminating action for the repetitive inspections and greasing tasks required by DGAC France AD 2001–356R2 and AD 2001–357R2 for the THSA P/N 47172 by application of Service Bulletin (SB) A330–27–3085 or SB A340–27–4089 (equivalent to Airbus production modification 49590), as applicable, changing the THSA P/N from 47172 to 47172–300.

Later on, DGAC France issued AD 2002–414 (later revised to R3) and AD 2002–415 (later revised to R2), which superseded the DGAC France AD 2001–356R2, AD 2001–357R2, AD 2002–037, and AD 2002–038, requiring:

- Repetitive inspections of all THSA P/N in service,
- repetitive lubrication of some THSA P/N, and
- replacement of THSA P/N 47172, 47147–400 and 47147–2XX/–3XX.

In addition, the electrical flight control computers monitor the operation of the THSA and the jamming of this actuator could be detected and indicated by messages on the maintenance system and on the [electronic centralized aircraft monitor] ECAM. For that reason, DGAC France AD 2002–414 and AD 2002–415 also required inspection of the THSA after display of such message(s).

After those [DGAC France] ADs were issued, Airbus introduced 4 new THSA, P/N 47172–500, P/N 47172–510, P/N 47172–520 and P/N 47172–530.

As these new THSA also needed to be inspected/lubricated, EASA issued [EASA] AD 2010–0192 and [EASA] AD 2010–0193, which retained the requirements of DGAC France AD F–2002–414R3 and AD F–2002–415R2 respectively, which were superseded, to add required repetitive inspections and lubrications of the new THSA P/N.

Since those [EASA] ADs were issued, all requirements of EASA AD 2010–0192 and AD 2010–0193 were transferred into Airbus Airworthiness Limitations Section (ALS) Part 4, except the requirement of paragraph (2.3) of those [EASA] ADs. At this time, compliance with ALS Part 4 tasks is required by EASA AD 2013–0268 (A330 aeroplanes) and [EASA] AD 2013–0269 (A340 aeroplanes), respectively [which correspond to FAA AD 2015–16–02, Amendment 39–18227 (80 FR 48019, August 11, 2015); and AD 2014–23–17, Amendment 39–18033 (79 FR 71304, December 2, 2014) (A340 aeroplanes); respectively.]

In addition, Airbus developed a Checkable Shear Pin (CSP) for the THSA and an associated additional electrical harness, which consists of installation of two Electrical Detection Devices (EDD) on the lower attachment secondary load path, which gives an indication to the Flight Control Primary Computers of secondary load path engagement.

After embodiment of these modifications on an aeroplane, the repetitive inspections of the ball-screw assembly for integrity of the primary and secondary load paths is no longer required, because the failure is detected automatically by this new device.

For the reasons described above, this [EASA] AD retains only the requirement of paragraph (2.3) of EASA AD 2010-0192 and 2010-0193 [actions following ECAM fault messages], which are superseded, and requires the installation of CSP and associated additional electrical harness on the THSA of the aeroplane. This [EASA] AD also requires, for A340-500/-600 aeroplanes that are post-SB A340-92-5008 (at Revision 06 or earlier), accomplishment of A340 ALS Part 3 task 274000-B0002-1-C, providing a grace period of 3 months for aeroplanes that have exceeded the applicable threshold or interval.

The unsafe condition is the degraded operation of the THSA, which could result in reduced control of the airplane.

Model A330-223F and A330-243F airplanes have been removed from the applicability of this proposed AD to correspond with the MCAI.

Required actions include a detailed inspection and corrective actions if an ECAM fault message is displayed, repetitive lubrication of the THSA ball-nut, and a modification of the THSA by installing a CSP and associated electrical harness.

Required actions also include certain "Additional Work" that is described in the following service information.

- "Additional Work" in Airbus Service Bulletin A330-27-3143, Revision 01, dated July 10, 2012, is described as removing the closing plug from the electrical harness 4515VB and connecting the electrical harness 4515VB to the THSA.

- "Additional Work" in Airbus Service Bulletin A330-92-3046, Revision 06, dated November 15, 2013; and Airbus Service Bulletin A340-92-4056, Revision 04, dated December 5, 2013; is described as replacement of a certain harness item, installation of placards and cable support, modification of a certain bracket, and installation of a certain spacer.

- "Additional Work" in Airbus Service Bulletin A340-92-5008, Revision 07, dated February 8, 2013, is described as replacing a certain wiring harness, replacing a certain THSA harness, installing additional placards, and modifying a certain wire harness installation order.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9393.

Related Service Information Under 1 CFR Part 51

Airbus has issued the following service information.

The following service information describes procedures for doing repetitive inspections for integrity of the primary and secondary load paths of the ball-screw assembly of the THSA. These service bulletins are distinct because they apply to different airplane models.

- Airbus Service Bulletin A330-27-3102, Revision 09, dated March 29, 2016.

- Airbus Service Bulletin A340-27-4107, Revision 09, dated March 29, 2016.

The following service information describes procedures for installing two electrical detection devices, also called CSPs, on the lower attachment secondary load path of the THSA, and modifying the THSA. These service bulletins are distinct because they apply to different airplane models equipped with THS actuators having different part numbers.

- Airbus Service Bulletin A330-27-3137, dated March 20, 2007; Revision 01, dated December 6, 2007; and Revision 02, dated January 18, 2010. These service bulletins are distinct because each revision contains unique editorial changes.

- Airbus Service Bulletin A330-27-3143, Revision 01, dated July 10, 2012.

- Airbus Service Bulletin A340-27-4136, including Appendix 1, dated March 20, 2007; Revision 01, including Appendix 1, dated December 6, 2007; and Revision 02, including Appendix 1, dated February 24, 2010. These service bulletins are distinct because each revision contains unique editorial changes.

- Airbus Service Bulletin A340-27-4143, dated February 21, 2012.

- Airbus Service Bulletin A340-27-5030, Revision 01, including Appendix 1, dated November 20, 2009.

The following service information describes procedures for installing electrical wiring harnesses and brackets to connect the secondary nut detection device to the monitoring systems. These service bulletins are distinct because they apply to different airplane models.

- Airbus Service Bulletin A330-92-3046, Revision 04, dated July 15, 2010; Revision 05, dated November 7, 2011; and Revision 06, dated November 15, 2013. These service bulletins are

distinct because each revision contains unique editorial changes.

- Airbus Service Bulletin A340-92-4056, Revision 03, dated July 16, 2010; and Revision 04, dated December 5, 2013. These service bulletins are distinct because each revision contains unique editorial changes.

- Airbus Service Bulletin A340-92-5008, Revision 07, dated February 8, 2013.

This service information describes procedures for lubrication of the THSA ball-nut. These documents are distinct because they apply to different airplane models.

- Airbus A330 Airworthiness Limitations Section (ALS) Part 4—System Equipment Maintenance Requirements (SEMRs), Revision 05, dated October 19, 2015, Task 274400-00002-1-E, Lubrication of the THSA ball-nut.

- Airbus A340 ALS Part 4—SEMRs, Revision 04, dated October 19, 2015, Task 274400-00002-1-E, Lubrication of the THSA ball-nut.

- Airbus A340 ALS Part 3—Certification Maintenance Requirements (CMRs), Revision 03, dated October 19, 2015, Task 274000-B0003-1-C, Lubrication of THS Actuator Ball-screw Nut.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Explanation of Proposed Compliance Times

The MCAI requires operators to modify certain airplanes by installing a CSP by a certain date. In order to provide operators with sufficient time to accomplish the modification, we have determined that a 12-month period from the effective date of this AD is acceptable. This difference had been coordinated with the EASA.

Costs of Compliance

We estimate that this proposed AD affects 33 airplanes of U.S. registry.

The actions required by AD 2013–13–16, and retained in this proposed AD take about 1 work-hour per product, at an average labor rate of \$85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2013–13–16 is \$85 per product.

We also estimate that it would take about 67 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$14,198 per product. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$656,469, or \$19,893 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2013–13–16, Amendment 39–17504 (78 FR 47537, August 6, 2013), and adding the following new AD:

Airbus: Docket No. FAA–2016–9393; Directorate Identifier 2014–NM–199–AD.

(a) Comments Due Date

We must receive comments by February 2, 2017.

(b) Affected ADs

This AD replaces AD 2013–13–16, Amendment 39–17504 (78 FR 47537, August 6, 2013) ("AD 2013–13–16").

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1) and (c)(2) of this AD, certificated in any category.

(1) Airbus Model A330–201, –202, –203, –223, –243, –301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes, all manufacturer serial numbers.

(2) Airbus Model A340–211, –212, –213, –311, –312, –313, –541, and –642 airplanes, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Controls.

(e) Reason

This AD was prompted by the determination that a modification that automatically detects failure of the ball-screw assembly is necessary. We are issuing this AD to detect and correct wear on the trimmable horizontal stabilizer actuator (THSA), possibly resulting in damage to the ball-screw and fail-safe nut, which could jam the THSA and result in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Actions for Electronic Centralized Aircraft Monitor (ECAM) Fault Messages

For airplanes other than those identified in figure 1 to paragraphs (g), (h), and (p) of this AD: If, during any flight, one of the "PRIM X PITCH FAULT" or "STAB CTL FAULT" messages is displayed on the ECAM associated with the "PITCH TRIM ACTR (1CS)" maintenance message, before further flight after each time the message is displayed on the ECAM, do the actions specified in paragraphs (g)(1) and (g)(2) of this AD.

(1) Do the applicable detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path; check the checkable shear pins (CSP), if installed; and do all applicable corrective actions; as specified in paragraph (g)(1)(i), (g)(1)(ii), or (g)(1)(iii) of this AD. Do all applicable corrective actions before further flight.

(i) For Model A330 series airplanes: Do the actions in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3102, Revision 09, dated March 29, 2016, except as required by paragraph (n)(1) of this AD.

(ii) For Model A340–200 and –300 series airplanes: Do the actions in accordance with the Accomplishment Instructions of Airbus Service Bulletin A340–27–4107, Revision 09, dated March 29, 2016, except as required by paragraph (n)(1) of this AD.

(iii) For Model A340–500 and –600 series airplanes: Do the actions using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

Note 1 to paragraph (g)(1)(iii) of this AD: Guidance for the inspection of the ball-screw assembly can be found in Task 274000–B0002–1–C, Inspection of the Ball-screw Assembly for Integrity of the Primary and Secondary Load Paths, of the Airbus A340 Airworthiness Limitations Section (ALS) Part 3—Certification Maintenance Requirements (CMR), Revision 03, dated October 19, 2015.

(2) Lubricate the THSA ball-nut in accordance with the applicable service information specified in paragraph (g)(2)(i), (g)(2)(ii), or (g)(2)(iii) of this AD.

(i) Task 274400–00002–1–E, Lubrication of the THSA ball-nut, of Airbus A330 ALS Part 4—System Equipment Maintenance Requirements (SEMR), Revision 05, dated October 19, 2015 (for Model A330 series airplanes).

(ii) Task 274400–00002–1–E, Lubrication of the THSA ball-nut, of Airbus A340 ALS Part 4—SEMR, Revision 04, dated October 19, 2015 (for Model A340–200 and –300 series airplanes).

(iii) Task 274000–B0003–1–C, Lubrication of THS Actuator Ball-screw Nut, of Airbus A340 ALS Part 3—CMR, Revision 03, dated October 19, 2015 (for Model A340–500 and –600 series airplanes).

FIGURE 1 TO PARAGRAPHS (g), (h), AND (p) OF THIS AD—DEFINITION OF AIRPLANE GROUPS

Group	Airplane models	On which the following actions or modifications have been done
Group 1 airplanes	Airbus Model A330–200 and –300 series airplanes.	On which the actions specified in Airbus Service Bulletin A330–27–3137, dated March 20, 2007, or Revision 01, dated December 6, 2007; and Airbus Service Bulletin A330–92–3046, Revision 04, dated July 16, 2010, or Revision 05, dated November 7, 2011; have been embodied in service.
	Airbus Model A340–200 and –300 series airplanes.	On which the actions specified in Airbus Service Bulletin A340–27–4136, including Appendix 1, dated March 20, 2007, or Revision 01, including Appendix 1, dated December 6, 2007; and Airbus Service Bulletin A340–92–4056, Revision 03, dated July 16, 2010; have been embodied in service.
Group 2 airplanes	Airbus Model A330–200 and –300 series airplanes and Model A340–200 and –300 series airplanes.	On which Airbus Modifications 55780, 52269, and 56056 have been embodied in production.
	Airbus Model A340–500 and –600 series airplanes.	On which Airbus Modifications 54882, 52191, and 56058 have been embodied in production.
Group 3 airplanes	Airbus Model A330–200 and –300 series airplanes.	On which Airbus Service Bulletin A330–27–3137, dated March 20, 2007; or Revision 01, dated December 6, 2007; has been embodied in service and Airbus Modifications 52269 and 56056 have been embodied in production.
	Airbus Model A330–200 and –300 series airplanes.	On which Airbus Modification 55780 has been embodied in production and Airbus Service Bulletin A330–92–3046 Revision 04, dated July 16, 2010; or Revision 05, dated November 07, 2011 has been embodied in service.
	Airbus Model A340–200 and –300 series airplanes.	On which Airbus Service Bulletin A340–27–4136, including Appendix 1, dated March 20, 2007; or Revision 01, including Appendix 1, dated December 6, 2007; has been embodied in service and Airbus Modifications 52269 and 56056 have been embodied in production.
	Airbus Model A340–200 and –300 series airplanes.	On which Airbus Modification 55780 has been embodied in production and Airbus Service Bulletin A340–92–4056, Revision 03, dated July 16, 2010, has been embodied in service.

(h) Installation of CSP and Electrical Harness

For all airplanes, except Group 2 airplanes specified in figure 1 to paragraphs (g), (h), and (p) of this AD, and except for airplanes

identified in paragraphs (i), (j), and (n)(2) of this AD: Within 12 months after the effective date of this AD, modify the airplane by installing a CSP on the THSA and an additional electrical harness, in accordance with the Accomplishment Instructions of the

Airbus service information specified in figure 2 to paragraph (h) of this AD, as applicable to the part number of the THSA installed on the airplane, except as provided by paragraph (n)(2) of this AD.

FIGURE 2 TO PARAGRAPH (h) OF THIS AD—APPLICABLE SERVICE INFORMATION FOR MODIFICATION

THSA Part No. (P/N)	Service Bulletin for CSP installation	Service Bulletin for electrical harness installation
47172–300	Airbus Service Bulletin A330–27–3137, Revision 02, dated January 18, 2010, for Airbus Model A330–200 and –300 series airplanes; and Airbus Service Bulletin A330–27–4136, including Appendix 1, Revision 02, dated February 24, 2010, for Airbus Model A340–200 and –300 series airplanes	Airbus Service Bulletin A330–92–3046, Revision 06, dated November 15, 2013, for Airbus Model A330–200 and –300 series airplanes; and

47175–300		

(i) “Additional Work” on Previously Modified Airplanes

For airplanes that have already been modified (installation of CSP on the THSA and electrical harness) before the effective date of this AD in accordance with the Accomplishment Instructions of any previous revision of an Airbus service

bulletin specified in figure 2 to paragraph (h) of this AD, as applicable: Within 12 months after the effective date of this AD, do the “Additional Work” specified in, and in accordance with, the Accomplishment Instructions of the applicable Airbus service information specified in figure 2 to paragraph (h) of this AD.

(j) Installation of Electrical Harness on Airplanes Equipped With a CSP

For airplanes having one of the THSAs installed with a part number listed in figure 3 to paragraph (j) of this AD, and which have been modified by installing a CSP on the THSA as required by paragraph (h) of this AD: Within 12 months after the effective date

of this AD, inspect to determine if the electrical harness identified in the applicable Airbus service information specified in figure 3 to paragraph (j) of this AD is installed on the airplane, and if found not to be installed, modify the airplane by installing an electrical

harness, in accordance with the Accomplishment Instructions of the Airbus service information specified in figure 3 to paragraph (j) of this AD, as applicable to the part number of the THSA installed on the airplane. Airplanes having one of the THSAs

installed with a part number listed in figure 3 to paragraph (j) of this AD already have the CSP installed on the THSA, and only the electrical harness must be installed on the airplane.

FIGURE 3 TO PARAGRAPH (j) OF THIS AD—ELECTRICAL HARNESS INSTALLATION

THSA P/N	Service Information for Electrical Harness Installation
47172–500, 47172–510, 47172–520, 47172–530, 47147–700, 47147–710.	Airbus Service Bulletin A330–92–3046, Revision 06, dated November 15, 2013, for Airbus Model A330–200 and –300 series airplanes. 47175–500, 47175–520, 47175–530	Airbus Service Bulletin A340–92–5008, Revision 07, dated February 8, 2013, for Airbus Model A340–541 and –642 airplanes.

(k) Terminating Action for Repetitive Inspections of Airbus Model A330–200 and –300 Series Airplanes

Accomplishment of a modification before the effective date of this AD in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3137, dated March 20, 2007, or Revision 01, dated December 6, 2007; and Airbus Service Bulletin A330–92–3046, Revision 04, dated July 15, 2010, or Revision 05, dated November 7, 2011; terminates the repetitive inspections specified in paragraphs (k)(1) through (k)(4) of this AD. Modification of an airplane as required by this paragraph does not constitute terminating action for the actions specified in paragraph (g)(2) of this AD or the additional work specified in paragraph (i) of this AD.

(1) Task 274400–00001–1–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and check the gap at the secondary nut trunnion, of Airbus A330 ALS Part 4—SEMR, Revision 05, dated October 19, 2015.

(2) Task 274400–00001–2–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and check the CSPs, of Airbus A330 ALS Part 4—SEMR, Revision 05, dated October 19, 2015.

(3) Task 274400–00001–3–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and check the CSPs, of Airbus A330 ALS Part 4—SEMR, Revision 05, dated October 19, 2015.

(4) Task 274400–00001–4–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and check the CSPs, of Airbus A330 ALS Part 4—SEMR, Revision 05, dated October 19, 2015.

(l) Terminating Action for Repetitive Inspections of Airbus Model A340–200 and –300 Series Airplanes

Accomplishment of a modification in accordance with the Accomplishment Instructions of Airbus Service Bulletin A340–27–4143, dated February 21, 2012; and Airbus Service Bulletin A340–92–4056, Revision 03, dated July 16, 2010; terminates the actions required by paragraph (g)(1) of this AD for modified Airbus Model A340–200 and –300 series airplanes only. Modification of an airplane as specified in

this paragraph does not constitute terminating action for the actions specified in paragraph (g)(2) of this AD, or the additional work specified in paragraph (i) of this AD.

(m) Terminating Action for Repetitive Inspections of Airbus Model A340–200 and –300 Series Airplanes

Accomplishment of a modification before the effective date of this AD in accordance with the Accomplishment Instructions of Airbus Service Bulletin A340–27–4136, including Appendix 1, dated March 20, 2007, or Revision 01, including Appendix 1, dated December 6, 2007; and Airbus Service Bulletin A340–92–4056, Revision 03, dated July 16, 2010; terminates the repetitive inspections specified in paragraphs (m)(1) through (m)(4) of this AD. Modification of an airplane as required by this paragraph does not constitute terminating action for the actions specified in paragraph (g)(2) of this AD, or the additional work specified in paragraph (i) of this AD.

(1) Task 274400–00001–1–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and gap check at the secondary nut trunnion, of Airbus A340 ALS Part 4—SEMR, Revision 04, dated October 19, 2015.

(2) Task 274400–00001–2–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and CSP check, of Airbus A340 ALS Part 4—SEMR, Revision 04, dated October 19, 2015.

(3) Task 274400–00001–3–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and CSP check, of Airbus A340 ALS Part 4—SEMR, Revision 04, dated October 19, 2015.

(4) Task 274400–00001–4–E, Detailed inspection of the ball-screw assembly for integrity of the primary and secondary load path and CSP check, of A340 ALS Part 4—SEMR, Revision 04, dated October 19, 2015.

(n) Exceptions to the Actions in Certain Service Information and Paragraph (h) of This AD

(1) Where Airbus Service Bulletin A330–27–3102, Revision 09, dated March 29, 2016 (for Model A330 series airplanes); or Airbus Service Bulletin A340–27–4107, Revision 09, dated March 29, 2016 (for Model A340 series airplanes); specifies to contact Airbus for a

damage assessment: Before further flight, accomplish the required actions in accordance with the procedures specified in paragraph (s)(2) of this AD.

(2) For airplanes that already had the electrical harness installed during production using Airbus Modifications 52269 and 56056 for Airbus Model A330–200 and –300 series airplanes and Airbus Model A340–200 and –300 series airplanes, and using Airbus Modifications 52191 and 56058 for Model A340–500 and –600 series airplanes: Only the CSP must be installed on the THSA in accordance with applicable Airbus service bulletins and within the compliance time specified in paragraph (h) of this AD.

(o) Terminating Action for Repetitive Inspections for Airplanes on Which Actions Required by Paragraph (h), (i), or (j) of This AD Are Done

Modification of an airplane as required by paragraph (h), (i), or (j) of this AD, as applicable, constitutes terminating action for that airplane for the applicable actions identified in paragraphs (o)(1) through (o)(4) of this AD.

(1) For all airplanes: The actions required by paragraph (g) of this AD.

(2) For Model A340–500 and –600 series airplanes: Task 274000–B0002–1–C, Inspection of the Ball-screw Assembly for Integrity of the Primary and Secondary Load Paths, of Airbus A340 ALS Part 3—CMR, Revision 03, dated October 19, 2015.

(3) For Model A330–200 and –300 series airplanes: The ALS tasks identified in paragraphs (k)(1) through (k)(4) of this AD.

(4) For Model A340–200 and –300 series airplanes: The ALS tasks identified in paragraphs (m)(1) through (m)(4) of this AD.

(p) Ball-Screw Assembly Inspection for Certain Airplanes

For Model A340–500 and –600 airplanes that are in post-Airbus Service Bulletin A340–92–5008, at Revision 06 or earlier, configuration: Before exceeding the threshold or interval, as applicable, of Task 274000–B0002–1–C, Inspection of the Ball-screw Assembly for Integrity of the Primary and Secondary Load Paths, of Airbus A340 ALS Part 3—CMR, Revision 03, dated October 19, 2015, or within 3 months after the effective date of this AD, whichever occurs later, accomplish Task 274000–B0002–1–C, Inspection of the Ball-screw Assembly for

Integrity of the Primary and Secondary Load Paths, of Airbus A340 ALS Part 3—CMR, Revision 03, dated October 19, 2015; and do all applicable corrective actions before further flight using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. Repeat Task 274000-B0002-1-C, Inspection of the Ball-screw Assembly for Integrity of the Primary and Secondary Load Paths, thereafter at the applicable intervals specified in Airbus A340 ALS Part 3—CMR, Revision 03, dated October 19, 2015.

(g) Parts Installation Prohibitions

(1) For all airplanes except Group 2 airplanes as identified in figure 1 to paragraphs (g), (h), and (p) of this AD: After modification of the airplane as required by paragraph (h), (i), or (j) of this AD, as applicable, no person may install any THSA having P/N 47172-300, P/N 47147-500, P/N 47175-200, or P/N 47175-300.

(2) For Group 2 airplanes, as identified in figure 1 to paragraphs (g), (h), and (p) of this AD: As of the effective date of this AD, no person may install on any Group 2 airplane any THSA having P/N 47172-300, P/N 47147-500, P/N 47175-200, or P/N 47175-300.

(r) Credit for Previous Actions

This paragraph provides credit for actions required by paragraph (g)(2) of this AD, if those actions were performed before the effective date of this AD using the applicable service information specified in paragraphs (r)(1) through (r)(4) of this AD.

(1) Task 274400-00002-1-E, Lubrication of the THSA ball-nut, of Airbus A330 ALS Part 4—Ageing Systems Maintenance, Revision 03, dated September 9, 2011 (for Model A330 series airplanes).

(2) Task 274400-00002-1-E, Lubrication of the THSA ball-nut, of Airbus A330 ALS Part 4—Ageing Systems Maintenance, Revision 04, dated August 27, 2013 (for Model A330 series airplanes).

(3) Task 274400-00002-1-E, Lubrication of the THSA ball-nut, of Airbus A340 ALS Part 4—Ageing Systems Maintenance, Revision 02, dated October 12, 2011 (for Model A340-200 and -300 series airplanes).

(4) Task 274400-00002-1-E, Lubrication of the THSA ball-nut, of Airbus A340 ALS Part 4—Ageing Systems Maintenance, Revision 03, dated November 15, 2012 (for Model A340-200 and -300 series airplanes).

(s) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM-116, Transport

Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1138; fax 425-227-1149. Information may be emailed to: 9-ANM-116-ACO-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) Contacting the Manufacturer: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(t) Related Information

(1) Refer to Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0219, dated September 29, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9393.

(2) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>.

(3) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 10, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-140328-15]

RIN 1545-BN17

Guidance Regarding Predecessors and Successors Under Section 355(e); Limitation on Gain Recognition; Guidance Under Section 355(f)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking, notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the IRS is issuing temporary regulations that provide guidance regarding the distribution by a distributing corporation of stock or securities of a controlled corporation without the recognition of income, gain, or loss. The temporary regulations provide guidance in determining whether a corporation is a predecessor or successor of a distributing or controlled corporation for purposes of the exception under section 355(e) of the Internal Revenue Code to the nonrecognition treatment afforded qualifying distributions, and they provide certain limitations on the recognition of gain in certain cases involving a predecessor of a distributing corporation. The temporary regulations also provide rules regarding the extent to which section 355(f) causes a distributing corporation (and in certain cases its shareholders) to recognize income or gain on the distribution of stock or securities of a controlled corporation. Those temporary regulations affect corporations that distribute the stock or securities of controlled corporations and their shareholders or security holders of those distributing corporations. The text of those temporary regulations serves as the text of these proposed regulations.

DATES: Comments and requests for a public hearing must be received by March 20, 2017.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG-140328-15), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG-140328-15), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, or sent electronically, via the Federal eRulemaking Portal at <http://www.regulations.gov/> (REG-140328-15).

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Richard K. Passales at (202) 317-5024 or Marie C. Milnes-Vasquez, (202) 317-7700; concerning submission of comments, and/or requests for public hearing, Regina Johnson at (202) 317-6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background and Explanation of Provisions

On November 22, 2004, the Treasury Department and the IRS published in the **Federal Register** (69 FR 67873) a

notice of proposed rulemaking (REG–145535–02) containing proposed regulations under section 355(e)(4)(D) (the 2004 proposed regulations). Those proposed regulations are withdrawn. This notice of proposed rulemaking cross-references to temporary regulations contained in a Treasury decision published in the Rules and Regulations section of this issue of the **Federal Register** which amend the Income Tax Regulations (26 CFR part 1) relating to section 355(e) by adopting the 2004 proposed regulations with certain significant modifications. The Background and Explanation of Provisions contained in the preamble of the temporary regulations also serves as part of this preamble.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13653. Therefore, a regulatory impact assessment is not required. Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that these proposed regulations would not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that these proposed regulations would primarily affect large corporations with a substantial number of shareholders, as well as corporations that are members of large corporate groups. Therefore, a regulatory flexibility analysis is not required. Pursuant to section 7805(f) of the Code, this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Lynlee C. Baker, formerly of the Office of Associate Chief Counsel (Corporate). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Withdrawal of Notice of Proposed Rulemaking

Accordingly, under the authority of 26 U.S.C. 7805, the notice of proposed rulemaking (REG–145535–02) that was published in the **Federal Register** on Monday, November 22, 2004 (69 FR 67873) is withdrawn.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding an entry in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
Section 1.355–8 also issued under 26 U.S.C. 336(e) and 355(e)(5).

■ **Par. 2.** Section 1.355–0 is amended by revising the introductory text and adding an entry for § 1.355–8 to read as follows:

§ 1.355–0 Outline of sections.

In order to facilitate the use of §§ 1.355–1 through 1.355–8, this section lists the major paragraphs in those sections as follows:

* * * * *

§ 1.355–8 Definition of predecessor and successor and limitations on gain recognition under section 355(e) and section 355(f).

- (a) In general.
- (1) Scope.
- (2) Purpose.
- (3) Overview.
- (4) References.
 - (i) References to Distributing or Controlled.
 - (ii) References to a Plan or distribution.
 - (iii) Plan Period.
- (b) Predecessor of Distributing.
 - (1) Definition.
 - (i) In general.
 - (ii) Pre-distribution requirements.
 - (A) Relevant Property.
 - (B) Reflection of basis.
 - (iii) Post-distribution requirement.
 - (2) Additional definitions and rules related to paragraph (b)(1) of this section.
 - (i) References to Distributing and Controlled.
 - (ii) Potential Predecessor.
 - (iii) Successors of Potential Predecessors.

- (iv) Relevant Property; Relevant Stock.
 - (A) In general.
 - (B) Property held by Distributing.
 - (C) Certain reorganizations.
 - (v) Stock of Distributing as Relevant Property.
 - (A) In general.
 - (B) Certain reorganizations.
 - (vi) Substitute Asset.
 - (vii) Separated Property.
 - (viii) Underlying Property.
 - (ix) Scope of definition of Predecessor of Distributing.
 - (x) Deemed exchanges.
 - (c) Additional definitions.
 - (1) Predecessor of Controlled.
 - (2) Successors.
 - (i) In general.
 - (ii) Determination of Successor status.
 - (3) Section 381 transaction.
 - (d) Special acquisition rules.
 - (1) Deemed acquisitions of stock in section 381 transactions.
 - (2) Deemed acquisitions of stock after section 381 transactions.
 - (3) Separate counting for Distributing and each Predecessor of Distributing.
 - (e) Special rules for gain recognition.
 - (1) In general.
 - (2) Planned 50-percent or greater acquisitions of a Predecessor of Distributing.
 - (i) In general.
 - (ii) Operating rules.
 - (A) Separated Property other than Controlled stock.
 - (B) Controlled stock that is Separated Property.
 - (C) Anti-duplication rule.
 - (3) Planned 50-percent Acquisition of Distributing in a section 381 transaction.
 - (4) Overall gain recognition.
 - (5) Section 336(e) election.
 - (f) Predecessor or Successor as a member of the affiliated group.
 - (g) Inapplicability of section 355(f) to certain intra-group distributions.
 - (1) In general.
 - (2) Alternative application of section 355(f).
 - (h) Examples.
 - (i) Effective/applicability date.
 - (1) In general.
 - (2) Transition rule.
 - (i) In general.
 - (ii) Definition of distribution.
 - (3) Exception.

■ **Par. 3.** Section 1.355–8 is revised to read as follows:

§ 1.355–8 Definition of predecessor and successor and limitations on gain recognition under section 355(e) and section 355(f).

[The text of the proposed amendments to § 1.355–8(a) through (i) is the same as the text of § 1.355–8T published elsewhere in this issue of the **Federal Register**.]

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

[EPA-HQ-OW-2016-0568; FRL 9953-23-OW]

RIN 2040-AF64

Fees for Water Infrastructure Project Applications Under WIFIA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to establish fees related to the provision of federal credit assistance under Subtitle C of the Water Resources Reform and Development Act of 2014 (WRRDA), which is referred to as the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA). WIFIA authorizes EPA to provide secured (direct) loans and loan guarantees to eligible water infrastructure projects and to charge fees to recover all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including financial, engineering, and legal advisory services, in the field of municipal and project finance to assist in the underwriting and servicing of Federal credit instruments. The agency seeks comment on all aspects of this proposal.

DATES: Comments must be received on or before February 17, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OW-2016-0568, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit

<http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Jordan Dorfman, Water Infrastructure Division, Office of Wastewater Management, Mail Code 4201C, Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC, 20460; telephone number: (202)564-0614; email address: dorfman.jordan@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action only applies to entities seeking credit assistance under the WIFIA program for the development and construction of a water infrastructure project. EPA has published an interim final rule to implement this new credit assistance program in the "Rules and Regulations" section of this **Federal Register**. A list of eligible entities and eligible projects can be found in the Interim Final Rule entitled, "Credit Assistance for Water Infrastructure Projects." This interim final rule is available at Docket ID No. EPA-HQ-OW-2016-0569, at <http://www.regulations.gov>.

B. What should I consider as I prepare my comments for EPA?

Submitting Confidential Business Information (CBI). Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk, CD-ROM, or flash drive that you mail to EPA, mark the outside of the disk, CD-ROM, or flash drive as CBI and then identify electronically within the disk, CD-ROM, or flash drive the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

Tips for preparing your comments. When submitting comments, remember to:

- Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions. The Agency may ask you to respond to specific questions.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

- Describe any assumptions and provide any technical information and/or data that you used.

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- Provide specific examples to illustrate your concerns and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What action is the Agency taking?

EPA is proposing to establish fees associated with the provision of federal credit assistance under the WIFIA program. WIFIA authorizes EPA to provide secured (direct) loans and loan guarantees to eligible water infrastructure projects. EPA has published an Interim Final Rule entitled, "Credit Assistance for Water Infrastructure Projects" to establish procedures for the implementation of the WIFIA Program. As specified under 33 U.S.C. 3908(b)(7), 3909(b), and 3909(c)(3), Congress in WIFIA authorizes EPA to charge fees to recover all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including financial, engineering, and legal advisory services, in the field of municipal and project finance to assist in the underwriting and servicing of Federal credit instruments. EPA is proposing an application fee, credit processing fee, servicing fee, and fee for extraordinary expenses to cover these costs to the extent not covered by congressional appropriations.

B. What is the Agency's authority for taking this action?

This proposed rule is issued under the authority of 33 U.S.C. 3908(b)(7), 3909(b), 3909(c)(3), and 3911.

C. What fees are being proposed?

In the Interim Final Rule entitled, "Credit Assistance for Water Infrastructure Projects," EPA established an application process for WIFIA credit assistance that is divided into two steps. The first step requires the submission of a letter of interest. No fees are proposed for the letter of interest step. Projects selected to continue in the application process will then be invited to submit an application at which time the application fee must be paid. For this second step, EPA will

only select those projects that it expects might reasonably proceed to closing. For more information on this process, please refer to the WIFIA Implementation Rule at 40 CFR part 35 subpart Q or in Docket ID No. EPA-HQ-OW-2016-0569, at <http://www.regulations.gov>. Consequently, EPA anticipates that the fees proposed in this notice would apply only to projects the Agency expects are likely to proceed to closing. Detailed application information will be contained in a program guide developed by EPA and will be posted on the WIFIA Web site and made available to the public at the time a solicitation for letters of interest is published. This two-step process limits the time, cost and effort required to be expended by prospective borrowers prior to having a reasonable expectation of funding by WIFIA.

While this rule, and the interim final WIFIA Implementation Rule, have separate processes for comments, EPA is aware that the similar timelines for comment and the relationship between the two rules may cause confusion. Therefore, in the event that comments are received for this rule under the heading of the interim final rule, or vice versa, EPA will consider all comments and respond accordingly.

As described in greater detail below, the types of fees EPA is proposing to establish are consistent with other Federal Credit programs. In particular, the WIFIA program was designed by Congress to resemble the Transportation Infrastructure Finance and Innovation Act program, commonly known as TIFIA. Accordingly, to the extent practicable, the WIFIA program has been crafted by EPA to be implemented in a similar manner as the Department of Transportation implements the TIFIA program. The rationale for establishing these fees is to cover EPA's costs of administering the program to the extent these costs are not covered by congressional appropriations. To effectively administer the program, EPA will incur both internal administrative costs (staffing, program support contracts, and other costs) as well as the costs of retaining expert firms, including legal, engineering, and financial advisory services, in the field of municipal and project finance, to assist in the underwriting of the Federal credit instrument. As explained in greater detail below, the latter costs may range from \$350,000–\$700,000 per project, though EPA cannot provide assurance that costs will not exceed this range. Assuming 10 loans at an average of \$100 million per loan, external expert costs alone could be in the range of \$3.5 million to \$7 million, and those costs

could be higher if a larger number of loans (with a smaller average loan size) were made. The combination of EPA's internal administrative costs and these external expert costs would not be fully covered by the \$2.2 million set aside for administrative costs in WIFIA. To the extent Congress does not appropriate funds to cover these program costs, EPA will need to exercise its authority under WIFIA to recover such costs through fees in order to effectively administer the program.

In many lending contexts, such fees can be reimbursed as part of the principal of the loan. WIFIA, however, prohibits this by not including such fees as eligible project costs. However, other sources of financing can finance the fees. WIFIA assistance can only pay for up to 49% of eligible project costs. The remaining costs must be borne by the borrower, either internally or through another financing source. While fees cannot be used to calculate the amount eligible for WIFIA financing, the fees can still be reimbursed from other sources. While the ability to finance fees with a WIFIA loan could reduce the burden on applicants by allowing the reimbursement for these costs by the loan proceeds, EPA's reading of the statute is that this would require amendment to the WIFIA statute or specific authorizing language in an appropriations bill.

Application Fee

EPA is proposing to require a non-refundable fee for each project that is invited to submit a full application (second step following submission of letter of interest) for credit assistance under WIFIA. EPA is proposing that an application fee will be due upon submission of the application. For fiscal year 2017, EPA is proposing an application fee of \$25,000 for applications for projects serving small communities (population of not more than 25,000 people). For all other project applications, EPA is proposing an application fee of \$100,000. As proposed, these application fees represent an amount equal to 0.5 percent of the minimum threshold project cost (\$5 million for small communities and \$20 million for larger communities, 33 U.S.C. 3907(a)(2)), which EPA considers to be sufficient for the Agency to begin the financial and legal analysis of the project while providing assurance that the applicant intends to proceed to closing, and therefore costs incurred by the Agency may be recovered. EPA will undertake significant costs to evaluate applications and hire expert firms for underwriting and considers an application fee

essential for applicants to show good faith in applying for assistance, to help cover the agency's administrative costs in processing applications, and to ensure effective administration of the program. EPA proposes that these fees be required at the time of submission of the full application and that the full application will not be reviewed without fee payment. Because EPA will only invite projects to submit an application and application fee if the project is expected to proceed to closing, no applicant would pay a fee without a reasonable expectation that the project could receive funding.

For fiscal years 2018 and beyond, the Agency may need to adjust the amount of the application fee based on early program implementation experience. A change in the application fee will not change the total fees charged, only the initial fee which is credited to the final fee at closing, or in the event that the project does not proceed to closing, withdrawal of the application, or denial. EPA seeks comment on proposed regulatory language that would authorize the Agency to change the default application fee in subsequent years through the NOFA. In addition, EPA seeks comment on whether changes to the application fee should be made through notice and comment or, alternatively, whether the agency should establish any criteria or constraints for adjustment of this fee through NOFAs and, if so, what those should be.

Credit Processing Fee

EPA is also proposing to require a credit processing fee at the time of closing, or in the event that the project does not proceed to closing, *e.g.*, if the application is withdrawn or denied, for projects selected to receive assistance in the form of a direct cash payment. The proceeds of any such fees would be used to pay the remaining portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including legal, engineering, and financial advisory services, in the field of municipal and project finance to assist in the underwriting of the Federal credit instrument. EPA proposes that the initial application fee described above would be credited to the credit processing fee. For example, if the total credit processing fee is \$400,000 and the applicant paid \$100,000 with the application, \$300,000 would be due at closing, or in the event that the project does not proceed to closing, *e.g.*, if the application is withdrawn or denied. The fee for each project would be set based on the costs incurred by EPA for that

specific project. Due to the nature of credit processing, the amount is expected to vary among applicants. This variation is a reflection of the amount of time taken to process a loan, which may not directly correlate with the size of the loan. More complicated transactions with lengthy negotiations will have higher costs. EPA estimates these costs could be in the range of approximately \$350,000–\$700,000 per project, broken down as follows:

- *Financial advisor*: \$100,000 to \$250,000 per project;
- *Law firm*: \$200,000 to \$350,000 per project; and
- *Engineering firm*: \$50,000 to \$100,000 per project.

EPA is proposing to authorize the waiver of a portion of the fee charged to an applicant in the event that Congress appropriates resources adequate to pay for EPA's cost of administering the WIFIA program as well as additional funding to pay for loan processing. WIFIA currently provides that EPA may retain \$2.2 million annually from funds appropriated to the program to pay for the administration of the program, including internal administrative costs of staffing, program support contracts (separate from the expert advisory services described previously), and other internal administrative needs. EPA requests comment on including a provision in the final rule allowing EPA to waive fees.

To the extent Congress appropriates administrative funds in excess of those needed for EPA's internal administrative costs, EPA is proposing to authorize the use of the remaining available administrative allowance (less any amount needed for future years' administration) to reduce fees. EPA is proposing three alternative methods by which the Agency could allocate additional administrative funds to reduce fees:

- By reducing fees by an equal amount per loan in the relevant year;
- By reducing fees by an equal amount per loan for those projects serving a population of not more than 25,000; or
- By reducing fees by an equal amount per loan for those projects that serve a population with a median household income that is 80 percent or less of the state median household income.

Alternatively, EPA could allocate such fee reductions through a combination of these three methods. EPA requests comment on each of these potential options or other potential approaches not discussed here. In the final rule, the Agency would expect to

include regulatory text addressing criteria for allocating fee reductions.

Servicing Fee

EPA is also proposing to charge an annual servicing fee during repayment of the loan. The fee will be dependent on the costs of servicing the credit instrument as determined by the Administrator. EPA proposes that such fees would be set at a level to enable the Agency to recover all or a portion of the costs to the Federal Government of servicing WIFIA credit instruments and will be determined at the time of closing. EPA expects such fees to range from \$12,000 to \$15,000 annually per loan.

Extraordinary Expenses

EPA is also proposing a fee to cover extraordinary expenses. In the event that a borrower experiences difficulty relating to technical, financial, or legal matters or other events (e.g., engineering failure or financial workouts) which require EPA to incur time or expenses beyond standard monitoring, EPA will be entitled to payment in full from the borrower of additional fees in an amount determined by EPA and of related fees and expenses of its independent consultants and outside counsel, to the extent that such fees and expenses are incurred directly by EPA and to the extent such third parties are not paid directly by the borrower.

Optional Supplemental Fee

EPA is also proposing to allow a separate fee to be charged, with agreement of the applicant, to reduce the budget authority required to fund the credit instrument. Although EPA considers it unlikely that a scenario will arise under which it would assess such a fee, the Agency sees benefit in establishing the flexibility to allow an applicant to "buy down" the budget authority required for the credit instrument. This could allow an applicant to proceed to closing in the event that sufficient budget authority would not otherwise be available. EPA proposes that any such fee would only be charged upon agreement by an applicant.

Request for Comment

EPA requests comment on each of the proposed fees described above, including whether to establish such fees, proposed fee levels or approaches for calculating fees, and potential criteria and methodologies for waiving all or a portion of such fees in the event that Congress appropriates sufficient funds to permit such a waiver. In particular, EPA requests comments on

prospective borrowers' ability to pay these fees, the use of an upfront application fee, and options for applicants to finance fees. EPA also requests comment on the proposed reduced application fee for small communities and the extent to which this fee reduction is adequate to ensure small communities can effectively access the WIFIA program. EPA understands that payment of fees may be difficult for some applicants and requests comment on potential approaches that could address such concerns while allowing EPA to recover its costs to ensure effective and sustainable administration of the WIFIA program.

III. Statutory and Executive Orders Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review. This rule has been determined significant because it affects the rights and obligations of recipients of a loan program and raises novel legal or policy issues arising out of a legal mandate. Any changes made in response to OMB recommendations have been documented in the docket.

B. Paperwork Reduction Act

This action does not impose an information collection burden under the PRA because this proposal would merely establish fees associated with a previously promulgated rule.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves this ICR, the Agency will announce that approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

C. Regulatory Flexibility Act

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a

substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. Participation in the WIFIA loan program is voluntary. While many projects serving small communities are potentially eligible for WIFIA loans, we anticipate only one to two small community applications per year as small communities have access to below market rate loans and other subsidies through the Clean Water State Revolving Fund, the Drinking Water State Revolving Fund, and other funding sources. A small community will only apply and undertake a WIFIA loan in cases where the WIFIA loan provides positive economic benefits relative to other potential funding sources, based upon consideration of relevant economic factors, including loan rate, loan terms, fees and other transaction costs. We have therefore concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. While a tribal government, or a consortium of tribal governments may apply for WIFIA credit assistance, this action does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because environmental health or safety risks are not addressed by this action.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a “significant energy action” because it is not likely to have a significant adverse effect on the supply, distribution or use of energy. This rulemaking simply imposes fees required to apply for credit assistance; therefore, by itself, this rulemaking will not have any effect on the supply, distribution or use of energy.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

This action is not subject to Executive Order 12898 (59 FR 7629, February 16, 1994) because it does not establish an environmental health or safety standard.

K. National Environmental Policy Act

Each project obtaining assistance under this program is required to adhere to the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*). This rulemaking simply imposes fees required to apply for credit assistance; therefore, by itself, this rulemaking will not have any effect on the quality of the environment.

List of Subjects in 40 CFR Part 35

Environmental protection, Reporting and recordkeeping requirements, and Water finance.

Dated: December 6, 2016.

Gina McCarthy,
Administrator.

For the reasons set forth in the preamble, EPA proposes to amend 40 CFR part 35 as follows:

PART 35—STATE AND LOCAL ASSISTANCE

■ 1. The authority citation for part 35 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*; 33 U.S.C. 1251 *et seq.*; 42 U.S.C. 300f *et seq.*; 42 U.S.C. 6901 *et seq.*; 7 U.S.C. 136 *et seq.*; 15

U.S.C. 2601 *et seq.*; 42 U.S.C. 13101 *et seq.*; Pub. L. 104–134, 110 Stat. 1321, 1321–299 (1996); Pub. L. 105–65, 111 Stat. 1344, 1373 (1997), 2 CFR 200.

■ 2. Add § 35.10080 to read as follows:

§ 35.10080 Fees.

(a) *Application fee.* EPA will require a non-refundable application fee for each project applying for credit assistance under the WIFIA program. An application fee will be due upon submission of the complete application. For applications for projects serving small communities (population of not more than 25,000 people), this application fee will be \$25,000. For all other applications, this application fee will be \$100,000. The initial application fee will be credited to the credit processing fee required under subsection (c).

(b) *Adjustment of application fee.* For each application and approval cycle, EPA may adjust the amount of the application fee described in subsection (a) based on program implementation experience and cost expectations. EPA will publish this amount in each **Federal Register** solicitation for letters of interest.

(c) *Credit processing fee.* Except as otherwise provided in subsection (f), EPA will require an additional credit processing fee for projects selected to receive WIFIA assistance upon closing, or in the event that the project does not proceed to closing, *e.g.*, if the application is withdrawn or denied. The proceeds of any such fees will be used to pay the remaining portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including financial, engineering, and legal advisory services, in the field of municipal and project finance, to assist in the underwriting of the Federal credit instrument. All of, or a portion of, this fee may be waived.

(d) *Servicing fee.* EPA will require borrowers to pay a servicing fee for each credit instrument approved for funding. Separate fees may apply for each type of credit instrument (*e.g.*, a loan guarantee, a secured loan with a single disbursement, or a secured loan with multiple disbursements), depending on the costs of servicing the credit instrument as determined by the Administrator. Such fees will be set at a level sufficient to enable the EPA to recover all or a portion of the costs to the Federal Government of servicing WIFIA credit instruments.

(e) *Optional supplemental fee.* If, in any given year, there is insufficient budget authority to fund the credit instrument for a qualified project that has been selected to receive assistance

under WIFIA, EPA and the approved applicant may agree upon a supplemental fee to be paid by or on behalf of the approved applicant at the time of execution of the term sheet to reduce the subsidy cost of that project. No such fee may be included among eligible project costs.

(f) *Reduced fees.* To the extent that Congress appropriates funds in any given year beyond those sufficient to cover internal administrative costs, EPA may utilize such appropriated funds to reduce fees that would otherwise be charged under subsection (c).

(g) *Extraordinary expenses.* EPA may require payment in full by the borrower of additional fees, in an amount determined by EPA, and of related fees and expenses of its independent consultants and outside counsel, to the extent that such fees and expenses are incurred directly by EPA and to the extent such third parties are not paid directly by the borrower, in the event that a borrower experiences difficulty relating to technical, financial, or legal matters or other events (e.g., engineering failure or financial workouts) which require EPA to incur time or expenses beyond standard monitoring.

RIN 2060-AS82

Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public hearing and extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA) is announcing that a public hearing will be held for the proposed rule titled, "Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements," which published in the *Federal Register* on November 17, 2016. The hearing will be held on Thursday, January 12, 2017, in Washington, DC. The EPA is also announcing extension of the comment period for the proposed

rule to February 13, 2017, to allow sufficient time after the public hearing for commenters to submit comments.

DATES: *Public Hearing.* The public hearing will be held on January 12, 2017, in Washington, DC. Please refer to **SUPPLEMENTARY INFORMATION** for additional information on the public hearing.

Comments. Comments must be received on or before February 13, 2017.

ADDRESSES: *Public Hearing.* The January 12, 2017, public hearing will be held at the EPA, William Jefferson Clinton East Building, Room 1117A, 1201 Constitution Avenue NW., Washington, DC 20004. Identification is required. If your driver's license is issued by Kentucky, Maine, Minnesota, Missouri, Montana, Oklahoma, Pennsylvania, South Carolina or the state of Washington, you must present an additional form of identification to enter (see **SUPPLEMENTARY INFORMATION** for additional information on this location).

Comments. Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2016-0202, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e., on the Web, Cloud or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/comments.html>.

Docket: All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in [http://](http://www.regulations.gov)

www.regulations.gov or in hard copy at the EPA Docket Center Reading Room, in the William Jefferson Clinton West Building, Room 3334, located at 1301 Constitution Avenue NW., Washington, DC 20004. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The phone number for the Public Reading Room is (202) 566-1744.

FOR FURTHER INFORMATION CONTACT: If you would like to speak at the public hearing, please contact Ms. Pamela Long, U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards (OAQPS), Air Quality Planning Division (C504-01), Research Triangle Park, NC 27711, telephone (919) 541-0641, fax number (919) 541-5509, email address long.pam@epa.gov, no later than January 10, 2017. If you have any questions relating to the public hearing, please contact Ms. Long at the above number.

If you have questions concerning the November 17, 2016, proposed rule, please contact Mr. Robert Lingard, Office of Air Quality Planning and Standards (OAQPS), U.S. EPA, at (919) 541-5272 or lingard.robert@epa.gov; or Mr. Lynn Dail, Office of Air Quality Planning and Standards (OAQPS), U.S. EPA, at (919) 541-2363 or dail.lynn@epa.gov. For information on the Information Collection Request (ICR), contact Mr. Butch Stackhouse, Office of Air Quality Planning and Standards (OAQPS), U.S. EPA, at (919) 541-5208 or stackhouse.butch@epa.gov.

SUPPLEMENTARY INFORMATION: The proposal for which the EPA is holding the public hearing was published in the *Federal Register* on November 17, 2016 (81 FR 81276), and is available at: <http://www.epa.gov/ozone-pollution> and also in Docket ID No. EPA-HQ-OAR-2016-0202. The public hearing will provide interested parties the opportunity to present data, views, or arguments concerning the proposal. The EPA may ask clarifying questions during the oral presentations, but will not respond to the presentations at that time. Written statements and supporting information that are submitted during the comment period will be considered with the same weight as any oral comments and supporting information presented at the public hearing. Written comments must be postmarked by the last day of the comment period.

The public hearing will convene at 9:00 a.m. and end at 5:00 p.m. Eastern Time (ET). The EPA will make every effort to accommodate all individuals interested in providing oral testimony. A lunch break is scheduled from 12:00 p.m. until 1:00 p.m. Please note that this

hearing will be held at a U.S. government facility. Individuals planning to attend the hearing should be prepared to show valid picture identification to the security staff in order to gain access to the meeting room. The REAL ID Act, passed by Congress in 2005, established new requirements for entering federal facilities. These requirements took effect July 21, 2014. If your driver's license is issued by Kentucky, Maine, Minnesota, Missouri, Montana, Oklahoma, Pennsylvania, South Carolina or the state of Washington, you must present an additional form of identification to enter the federal building where the public hearing will be held. Acceptable alternative forms of identification include: federal employee badges, passports, enhanced driver's licenses and military identification cards. For additional information for the status of your state regarding REAL ID, go to <http://www.dhs.gov/real-id-enforcement-brief>. In addition, you will need to obtain a property pass for any personal belongings you bring with you. Upon leaving the building, you will be required to return this property pass to the security desk. No large signs will be allowed in the building, cameras may only be used outside of the building, and demonstrations will not be allowed on federal property for security reasons.

If you would like to present oral testimony at the hearing, please notify Ms. Pamela Long, U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards (OAQPS), Air Quality Planning Division (C504-01), Research Triangle Park, NC 27711, telephone (919) 541-0641, fax number (919) 541-5509, email address long.pam@epa.gov, no later than 4:00 p.m. ET on January 10, 2017. Ms. Long will arrange a general time slot for you to speak. The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing.

Oral testimony will be limited to 5 minutes for each commenter. The EPA encourages commenters to provide the EPA with a copy of their oral testimony electronically (via email) or in hard copy form. The EPA will not provide audiovisual equipment for presentations unless we receive special requests in advance. Commenters should notify Ms. Long if they will need specific equipment. Commenters should also notify Ms. Long if they need specific translation services for non-English speaking commenters.

The hearing schedule, including the list of speakers, will be posted on the EPA's Web site at: <http://www.epa.gov/ozone-pollution> prior to the hearing. Verbatim transcripts of the hearing and

written statements will be included in the docket for the rulemaking.

How can I get copies of this document and other related information?

The EPA has established a docket for the proposed rule "Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications and State Implementation Plan Requirements" under Docket ID No. EPA-HQ-OAR-2016-0202 (available at <http://www.regulations.gov>). The EPA has made available information related to the proposed rule at: <http://www.epa.gov/ozone-pollution>.

Dated: December 13, 2016.

Stephen Page,

Director, Office of Air Quality Planning and Standards.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2015-0621; FRL-9956-96-Region 9]

Revisions to the California State Implementation Plan; Imperial County Air Pollution Control District; Stationary Sources Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing action on revisions to the Imperial County Air Pollution Control District (ICAPCD or District) portion of the California State Implementation Plan (SIP). We are proposing full approval of two rules and a limited approval and limited disapproval of one rule. All three rules update and revise the District's New Source Review (NSR) permitting program for new and modified sources of air pollution. We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by January 18, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R09-OAR-2015-0621 at <http://www.regulations.gov>, or via email to R9AirPermits@epa.gov. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). For either manner of

submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Laura Yannayon, EPA Region IX, (415) 972-3534, yannayon.laura@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, "we," "us" and "our" refer to the EPA.

Definitions

For the purpose of this document, we are giving meaning to certain words or initials as follows:

- (i) The word or initials *Act* or *CAA* mean or refer to the Clean Air Act, unless the context indicates otherwise.
- (ii) The initials *CARB* mean or refer to the California Air Resources Board.
- (iii) The initials *CFR* mean or refer to Code of Federal Regulations.
- (iv) The initials or words *EPA*, *we*, *us* or *our* mean or refer to the United States Environmental Protection Agency.
- (v) The initials *FR* mean or refer to **Federal Register**.

(vi) The word or initials *ICAPCD* or *District* mean or refer to the Imperial County Air Pollution Control District, the agency with jurisdiction over stationary sources within Imperial County.

(vii) The initials *NAAQS* mean or refer to National Ambient Air Quality Standards.

(viii) The initials *NSR* mean or refer to New Source Review.

(ix) The initials *PM₁₀* mean or refer to particulate matter with an aerodynamic diameter of less than or equal to 10 micrometers (coarse particulate matter).

(x) The initials *PM_{2.5}* mean or refer to particulate matter with an aerodynamic diameter of less than or equal to 2.5 micrometers (fine particulate matter).

(xi) The initials *SIP* mean or refer to State Implementation Plan.

(xii) The initials *TSD* mean or refer to the technical support document for this action.

I. The State's Submittal

A. What rules did the State submit?

Table 1 lists the rules addressed by this proposal, including the dates they were adopted by ICAPCD and submitted by CARB, which is the governor's designee for California SIP submittals.

TABLE 1—SUBMITTED RULES

Local agency	Rule No.	Rule title	Adopted/revised	Submitted
ICAPCD	204	Applications	9/14/99	05/26/00
ICAPCD	206	Processing of Applications	10/22/13	02/10/14
ICAPCD	207	New and Modified Stationary Source Review	10/22/13	1/21/14

On April 9, 2014 and March 7, 2014, EPA determined that the submittals for ICAPCD Rules 206 and 207, respectively, met the completeness criteria in 40 CFR part 51 Appendix V. The submittal for ICAPCD Rule 204 was deemed by operation of law to meet the completeness criteria in 40 CFR part 51 Appendix V as of October 6, 2000. The completeness criteria in 40 CFR part 51, Appendix V must be met before formal EPA review.

B. Are there other versions of these rules?

There is no previous version of Rule 204 in the SIP; EPA approved previous versions of Rules 206 and 207 into the SIP on January 3, 2007 (72 FR 9) and November 10, 1980 (45 FR 74480), respectively.¹ Section D.1.a of submitted Rule 207 is contained in SIP-approved Rule 209 (Implementation Plans), which was also approved on November 10, 1980.²

C. What is the purpose of the submitted rules?

Section 110(a) of the CAA requires states to submit regulations that include a pre-construction permit program for certain new or modified stationary sources of pollutants, including a permit program as required by Part D of Title I of the CAA.

The purpose of District Rule 204 (Applications), Rule 206 (Processing of Applications) and Rule 207 (New and Modified Stationary Source Review) is

to implement a federal preconstruction permit program for new and modified minor sources of criteria pollutants and new and modified major sources of criteria pollutants for which the area is designated nonattainment. Imperial County is currently designated as a moderate nonattainment area for the 2008 8-hr ozone NAAQS.³ Portions of the county are designated as a serious nonattainment area for the 1987 24-hr *PM₁₀* NAAQS, as a moderate nonattainment area for the 2006 24-hr *PM_{2.5}* NAAQS and as a moderate nonattainment area for the 2012 annual *PM_{2.5}* NAAQS. We present our evaluation under the CAA and EPA's regulations of the amended NSR rules submitted by CARB, as identified in Table 1 and provide our reasoning in general terms below and a more detailed analysis in our TSD, which is available in the docket for this proposed rulemaking.

II. EPA's Evaluation and Action

A. How is EPA evaluating the rules?

The submitted rules must meet the CAA's general requirements for SIPs and SIP revisions in CAA sections 110(a)(2), 110(l), and 193, as well as the applicable requirements contained in part D of title I of the Act (sections 172, and 173) for a nonattainment NSR permit program. In addition, the submitted rules must contain the applicable regulatory provisions of 40 CFR 51.160–51.165 and 40 CFR 51.307.

Among other things, section 110 of the Act requires that SIP rules be enforceable and provides that EPA may not approve a SIP revision if it would interfere with any applicable requirements concerning attainment and reasonable further progress or any other requirement of the CAA. In addition, section 110(a)(2) and section 110(l) of the Act require that each SIP or revision to a SIP submitted by a state must be adopted after reasonable notice and public hearing.

Section 110(a)(2)(c) of the Act requires each SIP to include a permit program to regulate the modification and construction of any stationary source within the areas covered by the SIP as necessary to assure attainment and maintenance of the NAAQS. EPA's regulations at 40 CFR 51.160–51.164 provide general programmatic requirements to implement this statutory mandate commonly referred to as the “minor NSR” or “general NSR” permit program. These NSR program regulations impose requirements for SIP approval of state and local programs that are more general in nature as compared to the specific statutory and regulatory requirements for nonattainment NSR permitting programs under Part D of title I of the Act.

Part D of title I of the Act contains the general requirements for areas designated nonattainment for a NAAQS (section 172), including preconstruction permit requirements for new major sources and major modifications proposing to construct in nonattainment areas (section 173).

Part D of title I of the Act also includes section 182(b), which contains the additional requirements for areas designated as a moderate ozone nonattainment area, and section 189(e), which requires the control of major stationary sources of *PM₁₀* precursors (and hence *PM_{2.5}* precursors) “except

¹ EPA disapproved subparagraph C.5 of SIP-approved Rule 207 because it exempted some sources from the requirement to apply LAER. See 40 CFR 52.233(a)(1).

² EPA's approval of Rule 206 would supersede our prior approval of Rule 206 in the SIP. Likewise, approval of Rule 207 would supersede our prior approval of SIP-approved Rules 207 and 209 and will supersede our prior disapproval of Rule 207, subparagraph C.5 and our Part D conditional approval. We intend to make conforming changes to the regulatory text codified in 40 CFR 52.220, 40 CFR 52.232 and 40 CFR 52.233.

³ Effective March 14, 2008 (73 FR 8209, February 13, 2008), the EPA reclassified Imperial County to a moderate ozone nonattainment area for the 1997 ozone NAAQS. In 2012, EPA designated Imperial County as a nonattainment area for the 2008 ozone NAAQS and classified the area as marginal. 77 FR 30088 (May 21, 2012). The SIP submittal that EPA is now evaluating via this proposal addresses the NNSR requirement for the Imperial County ozone nonattainment area for a moderate classification under the 1997 ozone NAAQS as well as a marginal classification under the 2008 ozone NAAQS.

where the Administrator determines that such sources do not contribute significantly to PM₁₀ [and PM_{2.5}] levels which exceed the standard in the area.” Additionally, 40 CFR 51.165 sets forth EPA’s regulatory requirements for SIP approval of a nonattainment NSR permit program.

The protection of visibility requirements that apply to New Source Review programs are contained in 40 CFR 51.307. This provision requires that certain actions be taken in consultation with the local Federal Land Manager if a new major source or major modification may have an impact on visibility in any mandatory Class I Federal Area.

Section 110(l) of the Act prohibits EPA from approving any SIP revisions that would interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the CAA. Section 193 of the Act, which only applies in nonattainment areas, prohibits the modification of a SIP-approved control requirement in effect before November 15, 1990, in any manner unless the modification insures equivalent or greater emission reductions of such air pollutant.

Our TSD, which can be found in the docket for this rule, contains a more detailed discussion of the approval criteria.

B. Do the rules meet the evaluation criteria?

EPA has reviewed the submitted rules in accordance with the rule evaluation criteria described above. With respect to procedures, based on our review of the public process documentation included in the May 26, 2000, January 21, 2014, and February 10, 2014 submittals, we are proposing to approve the submitted rules in part because we have determined that ICAPCD has provided sufficient evidence of public notice and opportunity for comment and public hearings prior to adoption and submittal of these rules, in accordance with the requirements of CAA sections 110(a)(2) and 110(l).

With respect to substantive requirements, we have reviewed the submitted rules in accordance with evaluation criteria discussed above. We are proposing to approve Rules 204 and 206 as part of ICAPCD’s general NSR permitting program because we have determined that these rules, together with Rule 207, satisfy the substantive statutory and regulatory requirements for a general NSR permit program as contained in CAA section 110(a)(2)(c) and 40 CFR 51.160–51.164.

In addition, we are proposing a limited approval/limited disapproval of Rule 207. We are proposing a limited approval because we have determined that Rule 207 (i) satisfies the statutory and regulatory requirements for a general NSR permit program as set forth in CAA section 110(a)(2)(c) and 40 CFR 51.160–51.164; and (ii) mostly satisfies the statutory and regulatory requirements for a nonattainment NSR permit program for moderate ozone, serious PM₁₀, and moderate PM_{2.5} nonattainment areas as set forth in the applicable provisions of part D of title I of the Act (sections 172 and 173) and in 40 CFR 51.165 and 40 CFR 51.307. We are also proposing a limited disapproval of Rule 207 because we have determined that the rule does not regulate ammonia as a PM_{2.5} precursor consistent with the requirements of 40 CFR 51.165(a)(13). While the District provided a demonstration to support their contention that ammonia is a not a significant contributor to the areas PM_{2.5} nonattainment status, the demonstration was not consistent with EPA’s newly promulgated nonattainment NSR precursor demonstration requirements as set forth in 40 CFR 51.1006(a)(3). Our TSD contains a more detailed discussion of this disapproval issue.

EPA is also proposing to find that it is acceptable for ICAPCD to not incorporate the NSR Reform provisions of 40 CFR 51.165 into its NSR permit program because ICAPCD’s permitting program will not be any less stringent than the federal permitting program.

In addition, EPA is proposing to find that Rules 204, 206 and 207 meet the statutory requirements for SIP revisions as specified in sections 110(l) and 193 of the CAA.

Please see our TSD for more information regarding our evaluation of Rules 204, 206 and 207.

C. Public Comment and Proposed Action

As authorized by CAA section 110(k)(3) and 301(a), we are proposing approval of Rule 204 (Applications) and Rule 206 (Processing of Applications), and we are proposing limited approval of Rule 207 (New and Modified Stationary Source Review) into the ICAPCD portion of the California SIP. If finalized, this action would incorporate the submitted rules into the SIP, including those provisions identified as deficient. The approval of Rule 207 is limited because EPA is simultaneously proposing a limited disapproval of Rule 207 under section 110(k)(3). If finalized, this disapproval would trigger the two-year clock for the federal

implementation plan (FIP) requirement under section 110(c). In addition, final disapproval would trigger sanctions under CAA section 179 and 40 CFR 52.31 unless the EPA approves subsequent SIP revisions that correct the rule deficiencies within 18 months of the effective date of the final action.

We will accept comments from the public on the proposed approvals of Rules 204 and 206 and the proposed limited approval and limited disapproval of Rule 207 for the next 30 days.

In today’s action we are also notifying the public that we intend to make a technical correction to our previous action approving Rule 202—*Exemptions* into the ICAPCD portion of the California SIP.⁴ In that action we stated that approval of Rule 202 into the SIP would supersede and remove Rule 103—*Exemptions*, which EPA has previously approved on May 31, 1972 (37 FR 10832), but we failed to include the necessary regulatory text to effect this change. Our final rulemaking for our action on Rules 204, 206 and 207 will include the necessary regulatory text to remove Rule 103 from the California SIP. We are not seeking public comment on this technical correction because public participation requirements were satisfied as part of our action approving Rule 202 into the SIP.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the ICAPCD rules listed in Table 1 of this notice. The EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and in hard copy at the appropriate EPA office (see the **ADDRESSES** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not

⁴ 76 FR 26615 (May 9, 2011).

submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the

Executive Order. This action is not subject to Executive Order 13045 because it does not impose additional requirements beyond those imposed by state law.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

The EPA lacks the discretionary authority to address environmental justice in this rulemaking.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, New Source Review, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: December 8, 2016.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2015–0845; FRL–9956–61–Region 5]

Air Plan Approval; Michigan; Part 9 Miscellaneous Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve administrative revisions for incorporation into the Michigan’s State

Implementation Plan (SIP). The submittal, by the Michigan Department of Environmental Quality (MDEQ) on December 21, 2015, makes minor corrections to Michigan’s Air Pollution Control Rules entitled “Emission Limitations and Prohibitions—Miscellaneous.”

DATES: Comments must be received on or before January 18, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2015–0845 at <http://www.regulations.gov> or via email to blakley.pamela@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the “For Further Information Contact” section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Charles Hatten, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6031, hatten.charles@epa.gov.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving Michigan’s SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If EPA does not receive adverse comments in response to this rule, no further activity is contemplated. If EPA receives adverse comments, EPA will withdraw the direct final rule and will

address all public comments received in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule, and if that provision can be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register**.

Dated: December 2, 2016.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0095]

Notice of Request for an Extension of Approval of an Information Collection; Interstate Movement of Certain Land Tortoises

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the interstate movement of certain land tortoises.

DATES: We will consider all comments that we receive on or before February 17, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0095>.
- Postal Mail/Commercial Delivery: Send your comment to Docket No. APHIS–2016–0095, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0095> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 7997039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the interstate movement of certain land tortoises, contact Dr. Christa Speekmann, Import-Export Specialist-Aquaculture, NIES, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD, 20737; (301) 851–3365. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at 301–851–2483.

SUPPLEMENTARY INFORMATION:

Title: Interstate Movement of Certain Land Tortoises.

OMB Control Number: 0579–0156.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to prohibit or restrict the interstate movement of animals and animal products to prevent the dissemination within the United States of animal diseases and pests.

APHIS' regulations currently prohibit the importation and restrict the interstate movement of certain land tortoises. The regulations in 9 CFR part 93 prohibit the importation of the leopard tortoise, the African spurred tortoise, and the Bell's hingeback tortoise to prevent the introduction and spread of exotic ticks known to be vectors of heartwater disease, an acute, infectious disease of cattle and other ruminants. The regulations in 9 CFR part 74 prohibit the interstate movement of those tortoises that are already in the United States unless they are accompanied by a health certificate that must be signed by a Federal or accredited veterinarian, and must state that the tortoises have been examined by that veterinarian and found free of ticks. Animal owners may use one of several different types of State health certificates that are issued at the State level. All documents request the same data and can be used and submitted to APHIS. The tortoises are usually moved interstate for sale, health care, adoption, or export to another country.

We are asking OMB to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.5 hours per response.

Respondents: U.S. tortoise breeders, members of tortoise adoption organizations, and Federal or accredited veterinarians.

Estimated annual number of respondents: 50.

Estimated annual number of responses per respondent: 5.

Estimated annual number of responses: 250.

Estimated total annual burden on respondents: 375 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 13th day of December 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of table eggs and exportation of poultry and hatching eggs, contact Dr. Antonio Ramirez, Senior Staff Veterinary Medical Officer, NIES, APHIS, 4700 River Road, Unit 39, Riverdale MD 20737; (301) 851–3355. For copies of more detailed information

on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Table Eggs From Regions Where Newcastle Disease Exists and Exportation of Poultry and Hatching Eggs.

OMB Control Number: 0579–0328.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (the Act, 7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States. In addition, under the Act, APHIS collects information and conducts inspections to ensure that poultry and hatching eggs exported from the United States are free of communicable diseases.

In 9 CFR part 94, § 94.6 governs the importation of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, and other birds to prevent the introduction of Newcastle disease and highly pathogenic avian influenza into the United States. Various conditions for the importation of table eggs from regions where Newcastle disease exists, including Mexico, apply and involve information collection activities, including the issuance of certificates and application of seals by foreign national or accredited veterinarians. APHIS requires certain information for the importation of table eggs that includes a certificate for table eggs from Newcastle disease-affected regions and a government seal issued by the veterinarian accredited by the national government who signed the certificate.

For the export of poultry and hatching eggs from the United States to other countries, receiving countries have specific health requirements. Most importing countries require a certification that our poultry and hatching eggs are free of diseases that are of concern to them. This certification generally must carry a USDA seal and be endorsed by an authorized APHIS veterinarian. In addition, APHIS requires owners and exporters of poultry and hatching eggs

to provide health and identification information, which is supplied by completing a Veterinary Services form entitled “Certificate for Poultry and Hatching Eggs for Export.”

This notice includes a description of the information collection requirements currently approved by the Office of Management and Budget (OMB) for the importation of table eggs from regions where Newcastle disease exists under number 0579–0328, and for requirements for poultry and hatching eggs for export, under number 0579–0048. After OMB approves and combines the burden for both collections under one collection (number 0579–0328), the Department will retire number 0579–0048.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: Owners of poultry and hatching egg operations, and exporters of these products, as well as national animal health authorities who will complete the certificate necessary to export table eggs from certain regions that may pose a risk of introducing Newcastle disease to the United States.

Estimated Annual Number of Respondents: 201.

Estimated Annual Number of Responses per Respondent: 34.

Estimated Annual Number of Responses: 6,803.

Estimated Total Annual Burden on Respondents: 3,405 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual

number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 13th day of December 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Forest Service

Deschutes Provincial Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Deschutes Provincial Advisory Committee (PAC) will meet in Bend, Oregon. The committee is authorized pursuant to the implementation of E-19 of the Record of Decision and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to provide advice and make recommendations to promote a better integration of forest management activities between Federal and non-Federal entities to ensure that such activities are complementary. PAC information can be found at the following Web site: <http://www.fs.usda.gov/detail/deschutes/workingtogether/advisorycommittees>.

DATES: The meeting will be held on January 20, 2017, from 9:00 a.m. to 4:00 p.m.

All PAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

CONTACT.

ADDRESSES: The meeting will be held at the Deschutes National Forest Headquarters Office, 63095 Deschutes Market Road, Bend, Oregon.

Written comments may be submitted as described under *Supplementary Information*. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Deschutes National Forest Headquarters Office. Please call ahead at 541-383-4761 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Beth Peer, Deschutes PAC Coordinator by

phone at 541-383-4761, or via email at bpeer@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and

8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to:

(1) Work on setting goals for committee accomplishments for 2017, particularly in the area of sustainable recreation;

(2) To identify any needs for expanding education on focus topics; and

(3) To address committee rechartering process and membership.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by January 6, 2017, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Beth Peer, Deschutes PAC Coordinator, 63095 Deschutes Market Road, Bend, Oregon, 97701; or by email to bpeer@fs.fed.us, or via facsimile to 541-383-4755.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled *For Further Information Contact*. All reasonable accommodation requests are managed on a case by case basis.

Dated: December 5, 2016.

John Allen,

Forest Supervisor, Deschutes National Forest.

BILLING CODE 3411-15-P

DEPARTMENT OF COMMERCE

U.S. Census Bureau

Proposed Information Collection; Comment Request; Current Population Surveys (CPS) Housing Vacancy Survey (HVS)

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: To ensure consideration, written comments must be submitted on or before February 17, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Kyra Linse, U.S. Census Bureau, 7H045, Washington, DC 20233-8400 at (301) 763-9280.

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Census Bureau plans to request clearance for the collection of data concerning the Housing Vacancy Survey (HVS). The current clearance expires August 31, 2017.

Collection of the HVS in conjunction with the Current Population Survey began in 1956, and serves a broad array of data users. We conduct the HVS interviews with landlords or other knowledgeable people concerning vacant housing units identified in the monthly CPS sample and meeting certain criteria. The HVS provides the only quarterly statistics on rental vacancy rates and homeownership rates for the United States, the four census regions, the 50 states and the District of Columbia, and the 75 largest metropolitan areas (MAs). Private and public sector organizations use these rates extensively to gauge and analyze the housing market with regard to supply, cost, and affordability at various points in time.

In addition, the rental vacancy rate is a component of the index of leading economic indicators published by the Department of Commerce.

Policy analysts, program managers, budget analysts, and congressional staff use these data to advise the executive and legislative branches of government with respect to the number and characteristics of units available for occupancy and the suitability of housing initiatives. Several other government agencies use these data on a continuing basis in calculating consumer expenditures for housing as a component of the gross national product; to project mortgage demands; and to measure the adequacy of the supply of rental and homeowner units. In addition, investment firms use the HVS data to analyze market trends and for economic forecasting.

II. Method of Collection

Field representatives collect this HVS information by personal-visit interviews in conjunction with the regular monthly CPS interviewing. We collect HVS data concerning units that are vacant and intended for year-round occupancy as determined during the CPS interview. Approximately 9,000 units in the CPS sample meet these criteria each month. All interviews are conducted using computer-assisted interviewing.

III. Data

OMB Control Number: 0607-0179.

Form Number: HVS-600 (Fact Sheet for the Housing Vacancy Survey).

Type of Review: Regular submission.

Affected Public: Individuals who have knowledge of the vacant sample unit (e.g., landlord, rental agents, neighbors).

Estimated Number of Respondents: 9,000 per month.

Estimated Time per Response: 3 minutes.

Estimated Total Annual Burden Hours: 5400 hours.

Estimated Total Annual Cost: There is no cost to the respondents other than their time.

Respondents Obligation: Voluntary.

Legal Authority: Title 13, U.S.C., Section 182 and Title 29, U.S.C., Sections 1-9.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE**International Trade Administration**

[A-533-824]

Polyethylene Terephthalate Film, Sheet, and Strip From India: Final Results of Antidumping Duty Administrative Review; 2014-2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 3, 2016, the Department of Commerce (the Department) published the preliminary results of the 2014-2015 administrative review of the antidumping duty (AD) order on polyethylene terephthalate film, sheet, and strip (PET Film) from

India. The period of review (POR) is July 1, 2014, through June 30, 2015. Based on comments received from interested parties, we have made changes to the preliminary results. For the final results of this review, we find that neither Jindal Poly Films Limited (Jindal) nor SRF Limited (SRF) made sales of subject merchandise at less than normal value.

DATES: Effective December 19, 2016.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5255.

SUPPLEMENTARY INFORMATION:**Background**

On August 2, 2016, the Department of Commerce (the Department) published the *Preliminary Results*.¹ For events that have occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.² The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at <http://trade.gov/login.aspx>. The signed Issues and Decision Memorandum and the electronic versions of the Issues and Decision Memorandum are identical in content.

Scope of the Order

The products covered by the order are all gauges of raw, pretreated, or primed PET Film, whether extruded or coextruded. Excluded are metallized films and other finished films that have had at least one of their surfaces modified by the application of a performance-enhancing resinous or inorganic layer of more than 0.00001

¹ See *Polyethylene Terephthalate Film, Sheet, and Strip from India: Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review; 2014-2015*, 81 FR 50684 (August 2, 2016) (*Preliminary Results*).

² See Department Memorandum, "Issues and Decision Memorandum for the Final Results of Antidumping Duty Administrative Review: Polyethylene Terephthalate Film from India; 2014-2015 Administrative Review" (Issues and Decision Memorandum), dated concurrently with, and hereby adopted by, this notice.

inches thick. Imports of PET Film are currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under item number 3920.62.00.90. HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of the order is dispositive.

Analysis of Comments Received

All issues raised in the case brief and rebuttal briefs are addressed in the Issues and Decision Memorandum, which is attached to this notice as an Appendix.

Changes Since the Preliminary Results

Based on our review of the record and comments received from interested parties regarding our *Preliminary Results*, we made changes to SRF's and Jindal's margin calculations.³ The margins for both SRF and Jindal are now zero. In addition, we adjusted Jindal's reported U.S. prices to account for changes in its export subsidies in the final results of the companion countervailing duty administrative review.⁴ Additionally, for companies not selected for individual review, we have assigned a zero rate in the final results of this review, in accordance with section 735(c)(5) of the Tariff Act of 1930, as amended (the Act).

Final Results of Review

As a result of our review, we determine the following weighted-average dumping margins exist for the period July 1, 2014, through June 30, 2015.

Producer or Exporter	Weighted-average dumping margin (percent)
Jindal Poly Films Limited ⁵ ...	0.00
SRF Limited	0.00
Garware Polyester Ltd	0.00
Vacmet India	0.00

³ See Memoranda to Thomas Gilgunn, Program Manager "Analysis Memorandum for the Final Results of the Antidumping Duty Administrative Review of Polyethylene Terephthalate Film, Sheet, and Strip from India: Jindal Poly Films Limited, and "Analysis Memorandum for the Final Results of the Antidumping Duty Administrative Review of Polyethylene Terephthalate Film, Sheet, and Strip from India: SRF Limited," both dated concurrently with these final results.

⁴ See *Polyethylene Terephthalate Film, Sheet, and Strip from India: Preliminary Results and Partial Rescission of Countervailing Duty Administrative Review*; 2014, 81 FR 51186 (August 3, 2016).

⁵ The Initiation Notice lists the company as Jindal Poly Films Limited of India. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 80 FR 53106 (September 2, 2015).

Disclosure

We intend to disclose the calculations performed to parties in this proceeding within five days after the public announcement of the final results, in accordance with section 735(a) of the Act, and 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), the Department determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise, in accordance with the final results of this review. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review. Because we have calculated zero margins in the final results of this review for both mandatory respondents during this POR, in accordance with 19 CFR 351.212 we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Pursuant to 19 CFR 351.106(c)(2), we will instruct CBP to liquidate without regard to antidumping duties any entries produced and/or exported by Garware, Jindal, SRF, or Vacmet during the POR.

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of PET Film from India entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies under review will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published in the completed segment for the most recent period for that company; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established in the completed segment for the most recent period for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any other completed segment of this proceeding, then the cash deposit rate will be the all others rate for this proceeding, 5.71 percent. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notifications to Interested Parties

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

The Department is issuing and publishing these final results of administrative review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221.

Dated: December 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-849]

Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China: Final Results of the 2014-2015 Antidumping Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the "Department") has conducted an

administrative review of the antidumping duty order on certain cut-to-length carbon steel plate (“CTL plate”) from the People’s Republic of China (“PRC”), covering the period November 1, 2014, through October 31, 2015.

DATES: Effective December 19, 2016.

FOR FURTHER INFORMATION CONTACT: Jonathan Hill, AD/CVD Operations, Office IV, Enforcement & Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3518.

Background

On August 12, 2016, the Department of Commerce (“Department”) published its *Preliminary Results* of the review of the antidumping duty order on CTL plate from the PRC for Hunan Valin Xiangtan Iron and Steel Co., Ltd. (“Hunan Valin”) and Wuyang Iron & Steel Co., Ltd. (“Wuyang Steel”).¹ Although invited to do so, interested parties did not comment on our *Preliminary Results*. Thus, we have adopted the *Preliminary Results* as the final results.

Scope of the Order

The product covered by the order is certain cut-to-length carbon steel plate from the PRC. Included in this description is hot-rolled iron and non-alloy steel universal mill plates (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 millimeters (“mm”) but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns of relief), of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances; and certain iron and non-alloy steel flat-rolled products not in coils, of rectangular shape, hot-rolled, neither clad, plated nor coated with metal, whether or not painted, varnished, or covered with plastics or other nonmetallic substances, 4.75 mm or more in thickness and of a width which exceeds 150mm and measures at least twice the thickness. Included as subject merchandise in this order are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been “worked

after rolling”)—for example, products which have been beveled or rounded at the edges. This merchandise is currently classified in the Harmonized Tariff Schedule of the United States (“HTSUS”) under item numbers 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7212.40.5000, and 7212.50.0000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive. Specifically excluded from subject merchandise within the scope of the order is grade X–70 steel plate.

Analysis

In the *Preliminary Results*, the Department determined that Hunan Valin was not eligible for separate rate status and was considered part of the PRC-wide entity, and that Wuyang Steel did not have reviewable transactions during the POR.² No parties commented on the *Preliminary Results*. For these final results of review, we have continued to treat Hunan Valin as part of the PRC-wide entity, and continued to find that Wuyang Steel did not have reviewable transactions during the POR. We are adopting the Preliminary Decision Memorandum for these final results of review.³ The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (“ACCESS”). ACCESS is available to registered users at <http://access.trade.gov> and in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Assessment Rates

Upon issuance of the final results, the Department will determine, and U.S.

Customs and Border Protection (“CBP”) shall assess, antidumping duties on all appropriate entries covered by this review. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review. The Department intends to instruct CBP to liquidate any entries of subject merchandise exported by Hunan Valin at 128.59 percent (the PRC-wide rate).

Additionally, pursuant to the Department’s practice in non-market economy cases, given that we have continued to find that Wuyang Steel had no shipments of subject merchandise during the POR, any suspended entries of subject merchandise exported by Wuyang Steel will be liquidated at the PRC-wide rate.⁴

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of review, as provided by section 751(a)(2)(C) of the Tariff Act of 1930, as amended (the “Act”): (1) For previously investigated or reviewed PRC and non-PRC exporters, which are not under review in this segment of the proceeding, but which have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (2) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, including Hunan Valin, the cash deposit rate will be the PRC-wide rate of 128.59 percent; and (3) for all non-PRC exporters of subject merchandise, which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification of Interested Parties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of the antidumping

¹ See *Certain Cut-to-Length Carbon Steel Plate from the People’s Republic of China: Preliminary Results of Antidumping Administrative Review, and Preliminary Determination of No Shipments, in Part, and Partial Rescission; 2014–2015*, 81 FR 53412 (August 12, 2016) (“*Preliminary Results*”).

² See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance “Decision Memorandum for the Preliminary Results of the Antidumping Duty Administrative Review of Certain Cut-to-Length Carbon Steel Plate from the People’s Republic of China,” dated August 5, 2016 (“*Preliminary Decision Memorandum*”) at 4–5.

³ See Preliminary Decision Memorandum.

⁴ For a full discussion of this practice, see *NME AD Assessment*, 76 FR 65694 (October 24, 2011).

duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (“APOs”) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation that is subject to sanction.

This notice of the final results of this antidumping duty administrative review is issued and published in accordance with sections 751(a)(1) and 777(i) of the Act and 19 CFR 351.213 and 19 CFR 351.221(b)(5).

Dated: December 7, 2016.

Christian Marsh,
Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

SUPPLEMENTARY INFORMATION:

Background

In accordance with sections 735(d) and 777(i)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(c), on October 28, 2016, the Department published its affirmative final determinations in the less-than-fair-value (LTFV) investigations of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE.¹ On December 12, 2016, the ITC notified the Department of its affirmative determinations that an industry in the United States is materially injured within the meaning of section 735(b)(1)(A)(i) of the Act, by reason of the LTFV imports of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE.²

Scope of the Orders

The merchandise covered by these orders is welded carbon-quality steel pipes and tube, of circular cross-section, with an outside diameter (O.D.) not more than nominal 16 inches (406.4 mm), regardless of wall thickness, surface finish (e.g., black, galvanized, or painted), end finish (plain end, beveled end, grooved, threaded, or threaded and coupled), or industry specification (e.g., American Society for Testing and Materials International (ASTM), proprietary, or other), generally known as standard pipe, fence pipe and tube, sprinkler pipe, and structural pipe (although subject product may also be referred to as mechanical tubing). Specifically, the term “carbon quality” includes products in which:

(a) iron predominates, by weight, over each of the other contained elements;

(b) the carbon content is 2 percent or less, by weight; and

(c) none of the elements listed below exceeds the quantity, by weight, as indicated:

(i) 1.80 percent of manganese;

¹ See *Circular Welded Carbon-Quality Steel Pipe from the Sultanate of Oman: Final Determination of Sales at Less Than Fair Value*, 81 FR 75026 (October 28, 2016) (*Oman Final Determination*); *Circular Welded Carbon-Quality Steel Pipe From Pakistan: Final Determination of Sales at Less Than Fair Value*, 81 FR 75028 (October 28, 2016); and *Circular Welded Carbon-Quality Steel Pipe from the United Arab Emirates: Final Determination of Sales at Less Than Fair Value*, 81 FR 75030 (October 28, 2016).

² See ITC Notification Letter to the Deputy Assistant Secretary for Enforcement and Compliance, referencing ITC Investigation Nos. 701–TA–549 and 731–TA–1229, 1300, 1302, and 1303 (December 12, 2016) (ITC Notification).

(ii) 2.25 percent of silicon;

(iii) 1.00 percent of copper;

(iv) 0.50 percent of aluminum;

(v) 1.25 percent of molybdenum;

(vi) 0.30 percent of cobalt;

(vii) 0.40 percent of lead;

(viii) 1.25 percent of nickel;

(ix) 0.30 percent of tungsten;

(x) 0.15 percent of molybdenum;

(xi) 0.10 percent of niobium;

(xii) 0.41 percent of titanium;

(xiii) 0.15 percent of vanadium; or

(xiv) 0.15 percent of zirconium.

Covered products are generally made to standard O.D. and wall thickness combinations. Pipe multi-stenciled to a standard and/or structural specification and to other specifications, such as American Petroleum Institute (API) API–5L specification, may also be covered by the scope of these investigations. In particular, such multi-stenciled merchandise is covered when it meets the physical description set forth above, and also has one or more of the following characteristics: is 32 feet in length or less; Is less than 2.0 inches (50 mm) in outside diameter; has a galvanized and/or painted (e.g., polyester coated) surface finish; or has a threaded and/or coupled end finish.

Standard pipe is ordinarily made to ASTM specifications A53, A135, and A795, but can also be made to other specifications. Structural pipe is made primarily to ASTM specifications A252 and A500. Standard and structural pipe may also be produced to proprietary specifications rather than to industry specifications.

Sprinkler pipe is designed for sprinkler fire suppression systems and may be made to industry specifications such as ASTM A53 or to proprietary specifications.

Fence tubing is included in the scope regardless of certification to a specification listed in the exclusions below, and can also be made to the ASTM A513 specification. Products that meet the physical description set forth above but are made to the following nominal outside diameter and wall thickness combinations, which are recognized by the industry as typical for fence tubing, are included despite being certified to ASTM mechanical tubing specifications:

O.D. in inches (nominal)	Wall thickness in inches (nominal)	Gage
1.315	0.035	20
1.315	0.047	18
1.315	0.055	17
1.315	0.065	16
1.315	0.072	15
1.315	0.083	14
1.315	0.095	13

3.500	0.165	8
4.000	0.148	9
4.000	0.165	8
4.500	0.203	7

The scope of these orders does not include:

(a) pipe suitable for use in boilers, superheaters, heat exchangers, refining furnaces and feedwater heaters, whether or not cold drawn, which are defined by standards such as ASTM A178 or ASTM A192;

(b) finished electrical conduit, *i.e.*, Electrical Rigid Steel Conduit (also known as Electrical Rigid Metal Conduit and Electrical Rigid Metal Steel Conduit), Finished Electrical Metallic Tubing, and Electrical Intermediate Metal Conduit, which are defined by specifications such as American National Standard (ANSI) C80.1–2005, ANSI C80.3–2005, or ANSI C80.6–2005, and Underwriters Laboratories Inc. (UL) UL–6, UL–797, or UL–1242;

(c) finished scaffolding, *i.e.*, component parts of final, finished scaffolding that enter the United States unassembled as a “kit.” A kit is understood to mean a packaged combination of component parts that contains, at the time of importation, all of the necessary component parts to fully assemble final, finished scaffolding;

(d) tube and pipe hollows for redrawing;

(e) oil country tubular goods produced to API specifications;

(f) line pipe produced to only API specifications, such as API 5L, and not multi-stenciled; and

(g) mechanical tubing, whether or not cold-drawn, other than what is included in the above paragraphs.

The products subject to these orders are currently classifiable in Harmonized

Tariff Schedule of the United States (HTSUS) statistical reporting numbers 7306.19.1010, 7306.19.1050, 7306.19.5110, 7306.19.5150, 7306.30.1000, 7306.30.5015, 7306.30.5020, 7306.30.5025, 7306.30.5032, 7306.30.5040, 7306.30.5055, 7306.30.5085, 7306.30.5090, 7306.50.1000, 7306.50.5030, 7306.50.5050, and 7306.50.5070. The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the orders is dispositive.

Amendment to Oman Final Determination

By statute, the term ministerial error includes errors in addition, subtraction, or other arithmetic function, clerical errors resulting from inaccurate copying, duplication, or the like, and any other type of unintentional error which the Secretary considers ministerial.³

Pursuant to section 735(e) of the Act and 19 CFR 351.224 (e) and (f), the Department is amending the *Oman Final Determination* to reflect the correction of a ministerial error it made in calculating the final margin assigned to Al Jazeera Steel Products Co. SAOG (Al Jazeera). In addition, because the Oman all-others rate is based solely on Al Jazeera's dumping margin, we are revising the all-others rate.⁴

Al Jazeera reported its cost of production (COP) data on a different weight basis than its sales data.⁵ In the final determination, we revised Al Jazeera's COP data, consistent with the sales data.⁶ On November 1, 2016, the petitioners⁷ submitted a ministerial error allegation claiming that, in implementing this change, the Department recalculated the total cost of manufacturing of each control number, but neglected to make the same adjustment to the fixed overhead field. We reviewed the record, and agree that we made a ministerial error within the meaning of section 735(e) and 19 CFR 351.224(f). Specifically, we made an unintentional error with regard to the calculation of Al Jazeera's per-unit costs.⁸ Pursuant to 351.224(e), we have corrected this error in this notice.

³ See section 735(e) of the Act.

⁴ See the “Estimated Weighted-Average Dumping Margins” section below.

⁵ See the *Oman Final Determination* and accompanying Issues and Decision Memorandum at Comment 4.

⁶ *Id.*

⁷ The petitioners are Bull Moose Tube Company, EXLTUBE, Wheatland Tube Company, and Western Tube and Conduit (collectively, the petitioners).

⁸ See Memorandum to Christian Marsh, Deputy Assistant Secretary, AD/CVD Operations, entitled

Antidumping Duty Orders

As stated above, on December 12, 2016, in accordance with section 735(d) of the Act, the ITC notified the Department of its final determinations in these investigations, in which it found material injury with respect to circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE.⁹ Therefore, in accordance with section 735(c)(2) of the Act, we are issuing these antidumping duty orders. Because the ITC determined that imports of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE are materially injuring a U.S. industry, unliquidated entries of such merchandise from Oman, Pakistan, and the UAE entered or withdrawn from warehouse for consumption, are subject to the assessment of antidumping duties.

Therefore, in accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise, for all relevant entries of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE. Antidumping duties will be assessed on unliquidated entries of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE entered, or withdrawn from warehouse, for consumption on or after June 8, 2016, the date of publication of the preliminary determinations.¹⁰

Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we will instruct CBP to continue to suspend liquidation on all relevant entries of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE. These

“Allegation of a Ministerial Error in the Final Determination,” dated November 18, 2016.

⁹ See ITC Notification.

¹⁰ See *Circular Welded Carbon-Quality Steel Pipe from the Sultanate of Oman: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 81 FR 36871 (June 8, 2016) (*Oman Preliminary Determination*); *Circular Welded Carbon-Quality Steel Pipe from Pakistan: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination and Extension of Provisional Measures*, 81 FR 36867 (June 8, 2016) (*Pakistan Preliminary Determination*); and *Circular Welded Carbon-Quality Steel Pipe from the United Arab Emirates: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 81 FR 36881 (June 8, 2016) (*UAE Final Determination*).

instructions suspending liquidation will remain in effect until further notice.

We will also instruct CBP to require cash deposits equal to the amounts as indicated below. Accordingly, effective on the date of publication of the ITC's final affirmative injury determinations, CBP will require, at the same time as importers would normally deposit estimated duties on this subject merchandise, a cash deposit equal to the estimated weighted-average dumping margins listed below.¹¹ The relevant all-others rates apply to all producers or exporters not specifically listed.

Provisional Measures

Section 733(d) of the Act states that instructions issued pursuant to an affirmative preliminary determination may not remain in effect for more than four months, except where exporters representing a significant proportion of

exports of the subject merchandise request the Department to extend that four-month period to no more than six months. At the request of exporters that account for a significant proportion of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE, we extended the four-month period to six months in each case.¹² In the underlying investigations, the Department published the preliminary determinations on June 8, 2016. Therefore, the extended period, beginning on the date of publication of the preliminary determinations, ended December 5, 2016. Furthermore, section 737(b) of the Act states that definitive duties are to begin on the date of publication of the ITC's final injury determination.

Therefore, in accordance with section 733(d) of the Act and our practice, we

will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to antidumping duties, unliquidated entries of circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE entered, or withdrawn from warehouse, for consumption on or after December 5, 2016, the date on which the provisional measures expired, until and through the day preceding the date of publication of the ITC's final injury determinations in the **Federal Register**. Suspension of liquidation will resume on the date of publication of the ITC's final determinations in the **Federal Register**.

Estimated Weighted-Average Dumping Margins

The weighted-average dumping margins percentages are as follows:

	Exporter/producer	Dumping margins (percent)
Oman	Al Jazeera Steel Products Co. SAOG	7.36
	All Others	7.36
	Exporter/producer	Dumping margins (percent)
Pakistan	International Industries Limited	11.80
	All Others	11.80
	Exporter/producer	Dumping margins (percent)
United Arab Emirates	Ajmal Steel Tubes & Pipes Ind. L.L.C	6.43
	Universal Tube and Plastic Industries, LLC—Jebel Ali Branch/Universal Tube and Pipe Industries, Ltd./KHK Scaffolding and Framework LLC.	5.58
	All Others	5.95

This notice constitutes the antidumping duty orders with respect to circular welded carbon-quality steel pipe from Oman, Pakistan, and the UAE pursuant to section 736(a) of the Act. Interested parties can find a list of antidumping duty orders currently in effect at <http://enforcement.trade.gov/stats/iastats1.html>.

These orders are published in accordance with section 736(a) of the Act and 19 CFR 351.211.

Dated: December 13, 2016.

Paul Piquado,

Assistant Secretary, for Enforcement and Compliance.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

Limitation of Duty-Free Imports of Apparel Articles Assembled in Haiti Under the Caribbean Basin Economic Recovery Act (CBERA), as Amended by the Haitian Hemispheric Opportunity Through Partnership Encouragement Act (HOPE)

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notification of Annual Quantitative Limit on Imports of Certain Apparel from Haiti.

SUMMARY: CBERA, as amended, provides duty-free treatment for certain apparel articles imported directly from Haiti. One of the preferences is known as the “value-added” provision, which requires that apparel meet a minimum threshold percentage of value added in Haiti, the United States, and/or certain beneficiary countries. The provision is subject to a quantitative limitation, which is calculated as a percentage of total apparel imports into the United States for each 12-month annual period. For the annual period from December 20, 2016 through December 19, 2017, the quantity of imports eligible for preferential treatment under the value-

¹¹ See section 736(a)(3) of the Act.

¹² See *Oman Preliminary Determination*; *Pakistan Preliminary Determination*; and *UAE Preliminary Determination*.

added provision is 337,117,964 square meters equivalent.

DATES: *Effective Date:* December 20, 2016.

FOR FURTHER INFORMATION CONTACT: Maria Goodman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-3651.

SUPPLEMENTARY INFORMATION:

Authority: Section 213A of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703a) (“CBERA”), as amended by the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2006 (“HOPE”) (Title V of the Tax Relief and Health Care Act of 2006), the Haitian Hemispheric Opportunity through Partnership Encouragement Act of 2008 (“HOPE II”) (Subtitle D of Title XV of the Food, Conservation, and Energy Act of 2008), the Haiti Economic Lift Program Act of 2010 (“HELP”), and the Trade Preferences Extension Act of 2015; and as implemented by Presidential Proc. No. 8114, 72 FR 13655 (March 22, 2007), and No. 8596, 75 FR 68153 (November 4, 2010).

Background: Section 213A(b)(1)(B) of CBERA, as amended (19 U.S.C. 2703a(b)(1)(B)), outlines the requirements for certain apparel articles imported directly from Haiti to qualify for duty-free treatment under a “value-added” provision. In order to qualify for duty-free treatment, apparel articles must be wholly assembled, or knit-to-shape, in Haiti from any combination of fabrics, fabric components, components knit-to-shape, and yarns, as long as the sum of the cost or value of materials produced in Haiti or one or more beneficiary countries, as described in CBERA, as amended, or any combination thereof, plus the direct costs of processing operations performed in Haiti or one or more beneficiary countries, as described in CBERA, as amended, or any combination thereof, is not less than an applicable percentage of the declared customs value of such apparel articles. Pursuant to CBERA, as amended, the applicable percentage for the period December 20, 2016 through December 19, 2017, is 55 percent.

For every twelve month period following the effective date of CBERA, as amended, duty-free treatment under the value-added provision is subject to a quantitative limitation. CBERA, as amended provides that the quantitative limitation will be recalculated for each subsequent 12-month period. Section 213A (b)(1)(C) of CBERA, as amended (19 U.S.C. 2703a(b)(1)(C)), requires that, for the twelve-month period beginning

on December 20, 2016, the quantitative limitation for qualifying apparel imported from Haiti under the value-added provision will be an amount equivalent to 1.25 percent of the aggregate square meter equivalent of all apparel articles imported into the United States in the most recent 12-month period for which data are available. The aggregate square meters equivalent of all apparel articles imported into the United States is derived from the set of Harmonized System lines listed in the Annex to the World Trade Organization Agreement on Textiles and Clothing (“ATC”), and the conversion factors for units of measure into square meter equivalents used by the United States in implementing the ATC. For purposes of this notice, the most recent 12-month period for which data are available as of December 20, 2016 is the 12-month period ending on October 31, 2016.

Therefore, for the one-year period beginning on December 20, 2016 and extending through December 19, 2017, the quantity of imports eligible for preferential treatment under the value-added provision is 337,117,964 square meters equivalent. Apparel articles entered in excess of these quantities will be subject to otherwise applicable tariffs.

Dated: December 13, 2016.

Felicia Pullam,

Deputy Assistant Secretary for Textiles, Consumer Goods and Materials.

BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-979]

Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From the People's Republic of China: Final Results of Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On November 3, 2016, the Department of Commerce (the “Department”) published its notice of initiation and preliminary results of a changed circumstances review of the antidumping duty (“AD”) order on crystalline silicon photovoltaic cells, whether or not assembled into modules (“solar cells”), from the People's Republic of China (“PRC”) (*Preliminary Results*). The Department preliminarily determined that Zhejiang ERA Solar

Technology Co., Ltd. (“Zhejiang ERA”) is the successor-in-interest to Era Solar Co., Ltd. (“Era Solar”) for purposes of the AD order on solar cells from the PRC and, as such, is entitled to Era Solar's antidumping duty cash deposit rate with respect to entries of subject merchandise. We invited interested parties to comment on the *Preliminary Results*. As no parties submitted comments, and there is no other information or evidence on the record calling into question our *Preliminary Results*, the Department is making no changes to the *Preliminary Results*. For these final results, the Department continues to find that Zhejiang ERA is the successor-in-interest to Era Solar.

DATES: Effective December 19, 2016.

FOR FURTHER INFORMATION CONTACT: Jeff Pedersen, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-2769.

SUPPLEMENTARY INFORMATION:

Background

On December 7, 2012, the Department published the AD Order on solar cells from the PRC in the **Federal Register**.¹ On August 31, 2016, Zhejiang ERA requested that the Department initiate an expedited changed circumstances review to determine it as the successor-in-interest to Era Solar for AD purposes.² On November 3, 2016, the Department initiated a changed circumstances review and made a preliminary finding that Zhejiang ERA is the successor-in-interest to Era Solar, and is entitled to Era Solar's cash deposit rate with respect to entries of merchandise subject to the AD Order on solar cells from the PRC.³ We provided interested parties 14 days from the date of publication of the *Preliminary Results* to submit case briefs. No interested parties submitted case briefs or requested a hearing.

¹ See *Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value, and Antidumping Duty Order*, 77 FR 73018 (December 7, 2012) (“Order”).

² See Letter from Zhejiang ERA to the Department regarding, “Re: Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules from the People's Republic of China: Request for Expedited Changed Circumstances Review” (August 31, 2016) (“CCR Request”).

³ See *Initiation and Preliminary Results of Antidumping Duty Changed Circumstances Review: Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules From the People's Republic of China*, 81 FR 76561 (November 3, 2016) (“*Preliminary Results*”) and accompanying Preliminary Decision Memorandum.

Scope of the Order

The merchandise covered by the Order is crystalline silicon photovoltaic cells, whether or not assembled into modules, subject to certain exceptions.⁴ Merchandise covered by this Order is currently classified in the Harmonized Tariff System of the United States ("HTSUS") under subheadings 8501.61.0000, 8507.20.80, 8541.40.6020, 8541.40.6030, and 8501.31.8000. While these HTSUS subheadings are provided for convenience and customs purposes; the written description of the scope of this Order is dispositive.

Final Results of Changed Circumstances Review

Because the record contains no information or evidence that calls into question the *Preliminary Results*, for the reasons stated in the *Preliminary Results*, the Department continues to find that Zhejiang ERA is the successor-in-interest to Era Solar, and is entitled to Era Solar's cash deposit rate with respect to entries of merchandise subject to the AD Order on solar cells from the PRC.⁵

Instructions to U.S. Customs and Border Protection

Based on these final results, we will instruct U.S. Customs and Border Protection to collect estimated antidumping duties for all shipments of subject merchandise exported by Zhejiang ERA and entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register** at the current AD cash deposit rate for Era Solar (*i.e.*, 8.52 percent).⁶ This cash deposit requirement shall remain in effect until further notice.

Notification to Interested Parties

This notice serves as a final reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or

conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

We are issuing and publishing this final results notice in accordance with sections 751(b) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.216 and 351.221(c)(3).

Dated: December 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

National Conference on Weights and Measures Interim Meeting

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The Interim Meeting of the National Conference on Weights and Measures (NCWM) will be held in San Antonio, Texas, from Sunday, January 8, 2017, through Wednesday, January 11, 2017. This notice contains information about significant items on the NCWM Committee agendas but does not include all agenda items. As a result, the items are not consecutively numbered.

DATES: The meeting will be held from Sunday, January 8, 2017, through Wednesday, January 11, 2017, Sunday through Tuesday from 8:00 a.m. to 5:00 p.m. Central Time, and on Wednesday, from 9:00 a.m. to 12:00 p.m. Central Time. The meeting schedule is available at www.ncwm.net.

ADDRESSES: This meeting will be held at the Hyatt Regency San Antonio, 123 Losoya Street, San Antonio, Texas 78205.

FOR FURTHER INFORMATION CONTACT: Mr. Kenneth Butcher, NIST, Office of Weights and Measures, 100 Bureau Drive, Stop 2600, Gaithersburg, MD 20899-2600. You may also contact Mr. Butcher at (301) 975-4859 or by email at kenneth.butcher@nist.gov. The meeting is open to the public, but a paid registration is required. Please see the NCWM Web site (www.ncwm.net) to view the meeting agendas, registration forms, and hotel reservation information.

SUPPLEMENTARY INFORMATION: Publication of this notice on the NCWM's behalf is undertaken as a public service; NIST does not endorse,

approve, or recommend any of the proposals or other information contained in this notice or in the publications produced by the NCWM.

The NCWM is an organization of weights and measures officials of the states, counties, and cities of the United States, federal agencies, and representatives from the private sector. These meetings bring together government officials and representatives of business, industry, trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration, and enforcement. NIST participates to encourage cooperation between federal agencies and the states in the development of legal metrology requirements. NIST also promotes uniformity among the states in laws, regulations, methods, and testing equipment that comprise the regulatory control of commercial weighing and measuring devices, packaged goods, and other trade and commerce issues.

The following are brief descriptions of some of the significant agenda items that will be considered at the NCWM Interim Meeting. Comments will be taken on these and other issues during several public comment sessions. At this stage, the items are proposals. This meeting also includes work sessions in which the Committees may also accept comments, and where recommendations will be developed for consideration and possible adoption at the NCWM 2017 Annual Meeting. The Committees may withdraw or carryover items that need additional development.

Some of the items listed below provide notice of projects under development by groups working to develop specifications, tolerances, and other requirements for devices such as those used in weigh-in-motion systems for vehicle enforcement screening. These notices are intended to make interested parties aware of these development projects and to make them aware that reports on the status of the project will be given at the Interim Meeting. The notices are also presented to invite the participation of manufacturers, experts, consumers, users, and others who may be interested in these efforts.

The Specifications and Tolerances Committee (S&T Committee) will consider proposed amendments to NIST Handbook 44, "Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices." Those items address weighing and measuring devices used in commercial applications, that is, devices that are used to buy from or sell to the public

⁴ For a complete description of the scope of the Order, see Preliminary Decision Memorandum.

⁵ For a complete discussion of the Department's findings, which remain unchanged in these final results and which are herein incorporated by reference and adopted by this notice, see generally the Preliminary Decision Memorandum accompanying the Preliminary Results.

⁶ See *Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled into Modules, from the People's Republic of China: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2013-2014*, 81 FR 39905 (June 20, 2016).

or used for determining the quantity of products or services sold among businesses. Issues on the agenda of the NCWM Laws and Regulations Committee (L&R Committee) relate to proposals to amend NIST Handbook 130, "Uniform Laws and Regulations in the area of Legal Metrology and Engine Fuel Quality" and NIST Handbook 133, "Checking the Net Contents of Packaged Goods."

NCWM S&T Committee

The following items are proposals to amend NIST Handbook 44:

General Code

Item 3100–2 G–UR.3.3. Position of Equipment

A weighing and measuring device or system equipped with a primary indicating element and used in a direct sale application must be positioned that its indication can be accurately read and the weighing or measuring operation observed from some reasonable customer and operator position. That is, both the customer and user must be able to observe the operation of the equipment and be provided a view of the indication from some reasonable position. The existing paragraph provides officials the discretion necessary to determine on a case by case basis whether or not these conditions are satisfied. The proposed changes, if adopted, would require officials to base their determination solely on customer readability and ease of being able to conduct a performance test on the equipment. Additionally, in the case of vehicle scales, the changes proposed require that a driver of a vehicle being weighed be able to observe the weight indication from inside the cab of the vehicle. If adopted, this would retroactively require a display on some vehicle scale systems, including mechanical types with beam or dial indication.

Scales

Item 3200–2 S.1.2.2. Verification Scale Interval

Class I and II scales and dynamic monorail scales, any of which that are provided with a scale division value (d) that differs from the verification scale interval (e) must currently comply with the expression: $d < e \leq 10 d$

The S&T Committee will consider a proposal that adds a new subparagraph beneath the Section heading S.1.2.2. Verification Scale Interval which would require the value of "e" to be less than or equal to "d" on Class I and II scales used in a direct sale application (*i.e.*, an application in which both parties, for

example, buyer and seller, are present when the quantity is determined). The new subparagraph being proposed is nonretroactive with no enforcement date yet specified, making evident the submitter's intention that it not apply to equipment already in commercial service.

Item 3200–3 S.1.8.5. Recorded Representations, Point-of-Sale Systems and S.1.9.3. Recorded Representations, Random Weight Packages Labels

The S&T Committee will consider a proposal requiring additional sales information be recorded by cash registers interfaced with a weighing element for items that are weighed at a checkout stand. These systems are currently required to record the net weight, unit price, total price, and the product class or, in a system equipped with price look-up capability, the product name or code number. The change proposed adds "gross weight or tare weight" to the list of sales information already required.

Additionally, the proposal adds a new paragraph requiring a prepackaging scale or device that produces a label for a random weight package to generate labels that contain this same sales information.

Weigh-In-Motion Systems Used for Vehicle Enforcement Screening

Item 3205–1 A. Application and Sections Throughout the Code to Address Commercial and Law Enforcement Applications

In February 2016, the NCWM formed a new task group (TG) to consider a proposal to expand the NIST Handbook 44, Weigh-In-Motion (WIM) Systems Used for Vehicle Enforcement Screening—Tentative Code to also apply to legal-for-trade (commercial) and law enforcement applications. The TG is made up of representatives of WIM equipment manufacturers; the U.S. Department of Transportation Federal Highway Administration; truck weight enforcement agencies; state weights and measures agencies; and others. Mr. Alan Walker (State of Florida) serves as Chair of the TG.

Members of the TG met face to face for the first time at the NCWM Annual Meeting in July 2016. It was agreed at that meeting to eliminate from the proposal any mention of a law enforcement application and focus solely on WIM systems intended for use in commercial applications. The main focus of the TG since the July 2016 meeting has been to concentrate on the development of test procedures that can be used to verify the accuracy of a slow-

speed WIM system while taking into consideration the different axle and tandem axle configurations of the vehicles that will typically be weighed by the system.

Liquefied Petroleum Gas and Anhydrous Ammonia Liquid-Measuring Devices

Item 3302–1 N.3. Test Drafts

The S&T Committee will continue to hear updates on the progress of a "Developing" item on its agenda (carried over from its 2016 agenda) that would propose recognizing the use of calibrated transfer standards (also called "master meters") in the verification and calibration of Liquefied Petroleum Gas and Anhydrous Ammonia Liquid-Measuring Devices. Currently, most official tests of these devices are conducted using volumetric test measures or using gravimetric testing. The proposal outlined in this item includes requirements for a minimum test draft and would recognize the use of "master meters" in both service-related and official testing. This item is also intended to explore the possibility of expanding the use of transfer standards to other types of measuring devices, including those used to measure petroleum at terminals and retail outlets, and to meters used to deliver home heating fuel and other products.

Mass Flow Meters

Item 3307–2 N.3. Test Drafts

The S&T Committee will continue to hear updates on the progress of a "Developing" item on its agenda (also carried over from its 2016 agenda) that would propose recognizing the use of calibrated transfer standards (also called "master meters") in the verification and calibration of Mass Flow Meters. Currently, most official tests of these devices are conducted using gravimetric test procedures. The proposal outlined in this item includes requirements for a minimum test draft, and would recognize the use of "master meters" in both service-related and official testing.

Taximeters

Item 3504–1 A.2. Exemptions;

Item 3504–2 U.S. National Work Group (USNWG) on Taximeters—Taximeter Code Revisions and Global Positioning System (GPS)-Based Systems for Time and Distance Measurement; and

Item 3600–6 5.XX. Transportation Network Systems—Tentative Code and Appendix D. Definitions

For several years, the NIST USNWG on Taximeters has discussed possible

approaches for amending the NIST Handbook 44, Taximeters Code to specifically recognize GPS-based time and distance measuring systems that are used to assess charges for transportation services such as those provided by taxicabs and limousines. Appropriate specifications, tolerances, and other technical requirements for these devices must be developed for manufacturers and users of these devices, as well for weights and measures officials. Such requirements help ensure accuracy and transparency for customers and a level playing field for transportation service companies, enabling consumers to make value comparisons between competing services. In 2016, the USNWG on Taximeters submitted a proposal through multiple regional weights and measures associations to establish a separate NIST Handbook 44 code to address "Transportation Network Measurement Systems (TNMS)." Changes to the current NIST Handbook 44, Taximeters Code are also needed to recognize taximeters that are now being designed to operate using similar features and functionality as TNMS; these changes have been proposed in a separate item. The S&T Committee will examine these proposals to assess how to best address these systems.

NCWM L&R Committee

The following items are proposals to amend NIST Handbook 130 or NIST Handbook 133:

NIST Handbook 130—Section on Uniform Regulation for the Method of Sale of Commodities:

Item 2302–6 Section 2.17. Precious Metals

The L&R Committee will consider a proposal to recommend adoption of a uniform method of sale for precious metals that will enhance the ability of consumers to whether they are getting a fair price for their precious metals. This proposal will allow a consumer to make an informed decision in doing an equitable trade or purchase and also make value comparisons. This proposal is not for precious metals traded on the commodity market. If adopted, the proposal will require sellers to prominently display conversion factors and the unit price they will pay for items containing various amounts of precious metals.

NIST Handbook 133—"Checking the Net Contents of Packaged Goods:"

Item 2600–4 Section 4.5. Polyethylene Sheeting

The current test procedure in NIST Handbook 133, Section 4. Polyethylene

Sheeting has provided a test procedure for only polyethylene sheeting and some bag type products. The L&R Committee will consider a proposal to expand the requirements to also include polyethylene bags (e.g., t-shirt bags that retail stores put consumer goods in for carry-out) and can liners. If adopted, this proposal would clarify the test procedure and improve the accuracy of length determinations when determining test measurements for bags and liners, including bags with a cut out (t-shirt bags).

Authority: 15 U.S.C. 272(b).

Kevin Kimball,

NIST Chief of Staff.

[FR Doc. 2016–30436 Filed 12–16–16; 8:45 am]

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket Number: [161207999–6999–01]

Announcement of Requirements and Registration for National Institute of Standards and Technology Prize Competition—Reusable Abstractions of Manufacturing Processes (RAMP) Challenge

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: In March 2016, National Institute of Standards and Technology (NIST) and ASTM International announced a new international standard that can "map" the critically important environmental aspects of manufacturing processes, leading to significant improvements in sustainability while keeping a product's life cycle low cost and efficient. Sustainability for manufacturing is beginning to be addressed through the recently approved ASTM Standard Guide for Characterizing Environmental Aspects of Manufacturing Processes (ASTM E60.13 E3012–16). The standard provides a science-based, systematic approach to capture and describe information about the environmental aspects for any manufacturing production process or group of processes, and then use that data to make informed decisions on improvements.

NIST is announcing the Reusable Abstractions of Manufacturing Processes (RAMP) Challenge, with support from ASTM International, the National Science Foundation (NSF), and the American Society of Mechanical

Engineers (ASME) Manufacturing Science and Engineering Conference (MSEC) Organizing Committee, to familiarize the community with a recent standard for modeling manufacturing processes that was developed under the ASTM's E60.13 Subcommittee on Sustainable Manufacturing. The RAMP Challenge calls on participants (either as an individual or as a team) to model any manufacturing process and demonstrate application of the ASTM E3012–16 Unit Manufacturing Process (UMP) representation for purposes of information sharing and sustainability assessment. The RAMP Challenge will provide an opportunity for participants to put this standard into practice in modeling a process of their own interest, and to share experiences in applying the standard across a variety of processes. Formal methods for acquiring and exchanging information about manufacturing processes will lead to consistent characterizations and help establish a collection for reuse of these models. Standard methods will ensure effective communication of computational analytics and sharing of sustainability performance data. Results of the competition will assist in demonstrating the use of a reusable standard format leading to models suitable for automated inclusion in a system analysis, such as a system simulation model or an optimization program.

DATES: *Submission Period:* December 19, 2016 to March 20, 2017

Announcement of Finalists: April 17, 2017

Announcement of Winners: June 8, 2017

The Submission Period begins December 19, 2016 at 9:00 a.m. Eastern Time (ET) and ends March 20, 2017, at 5:00 p.m. ET. Prize competition dates are subject to change at the discretion of NIST. Entries submitted before or after the Submission Period will not be reviewed or considered for award.

ADDRESSES: Changes or updates to the prize competition rules will be posted and can be viewed at the Event Web site: <https://www.challenge.gov/challenge/ramp-reusable-abstractions-of-manufacturing-processes/>

Results of the prize competition will be announced on the Event Web site and on the NIST Web site, www.nist.gov. Additional information is located at: <https://www.nist.gov/el/systems-integration-division/astm-sustainable-manufacturing-standards>.

FOR FURTHER INFORMATION CONTACT:

Questions about the prize competition can be directed to NIST via the Event

Web site or by email to Swee Leong, swee.leong@nist.gov.

SUPPLEMENTARY INFORMATION:

RAMP Challenge Sponsor

The National Institute of Standards and Technology (NIST; www.nist.gov) is a non-regulatory Federal agency within the United States Department of Commerce. Founded in 1901, NIST's mission is to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve our quality of life. NIST carries out its mission through its programs, which include: The NIST Laboratories, conducting world-class research, often in close collaboration with industry, that advances the Nation's technology infrastructure and helps U.S. companies continually improve products and services; the Hollings Manufacturing Extension Partnership (MEP), a nationwide network of local centers offering technical and business assistance to smaller manufacturers to help them create and retain jobs, increase profits, and save time and money; and the Baldrige Performance Excellence Program, which promotes performance excellence among U.S. manufacturers, service companies, educational institutions, health care providers, and nonprofit organizations, conducts outreach programs, and manages the annual Malcolm Baldrige National Quality Award, which recognizes performance excellence and quality achievement.

RAMP Challenge Supporting Organizations

ASTM International is a globally recognized leader in the development and delivery of voluntary consensus standards. Today, over 12,000 ASTM standards are used around the world to improve product quality, enhance health and safety, strengthen market access and trade, and build consumer confidence.

The National Science Foundation is an independent federal agency created by Congress in 1950 "to promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense. . . ." NSF's goals—discovery, learning, research infrastructure and stewardship—provide an integrated strategy to advance the frontiers of knowledge, cultivate a world-class, broadly inclusive science and engineering workforce and expand the scientific literacy of all citizens, build the nation's research capability through

investments in advanced instrumentation and facilities, and support excellence in science and engineering research and education through a capable and responsive organization.

The ASME MSEC is held annually and will take place this year at the University of Southern California, June 4–8, 2017. The conference, sponsored by the Manufacturing Engineering Division (MED) of ASME, provides a forum to highlight and disseminate the most recent and cutting edge manufacturing research through both technical presentations, papers, posters, and panel sessions. The ASME is a not-for-profit membership organization that enables collaboration, knowledge sharing, career enrichment, and skills development across all engineering disciplines, toward a goal of helping the global engineering community develop solutions to benefit lives and livelihoods.

Eligibility Rules for Participating in the RAMP Challenge

At the time of Entry, participants must meet the following Eligibility Rules:

To be eligible for a cash prize, the Official Representative (individual or team lead, in the case of a group project) must be age 18 at the time of entry and a U.S. citizen or permanent resident of the United States. In the case of a private entity, the business shall be incorporated in and maintain a primary place of business in the United States or its territories. Participants may not be a Federal entity or Federal employee acting within the scope of their employment. Eligibility excludes NIST employees and NIST Researcher Associates as well as direct recipients of NIST funding awards to collaborate on the development of the ASTM standard E3012–16. Non-NIST Federal employees acting in their personal capacities should consult with their respective agency ethics officials to determine whether their participation in this Competition is permissible. Employees of the NSF, the ASTM, and the ASME Manufacturing Science and Engineering Conference (MSEC) Conference Organizers are excluded from participating but members of these organizations are eligible to enter. Any other individuals or legal entities involved with the design, production, execution, distribution or evaluation of the RAMP Challenge are not eligible to participate.

To be eligible to win a prize, a Participant (whether an individual or legal entity) must register to participate and must comply with all requirements

under section 3719 of title 15, United States Code ("Prize competitions").

A Participant shall not be deemed ineligible because the Participant consulted with Federal employees or used Federal facilities in preparing its submission to the RAMP Challenge if the employees and facilities are made available to all Participants on an equitable basis. Multiple entries are permitted. Each entry will be reviewed independently. Multiple individuals and/or legal entities may collaborate as a group to submit a single entry, in which case a single individual from the group must be designated as the Official Representative and must satisfy all of the eligibility requirements. That designated individual will be responsible for determining eligibility and for meeting all entry and evaluation requirements. Participation is subject to all U.S. federal, state and local laws and regulations. Individuals entering on behalf of or representing a company, institution or other legal entity are responsible for confirming that their entry does not violate any policies of that company, institution or legal entity.

Entry Process for Participants

As stated earlier, the RAMP Challenge calls on participants to model any manufacturing process for purposes of information sharing and sustainability assessment. The modeled process can be one that the submitter has uniquely studied, or from open literature or other 3rd party sources. Any size scale and manufacturing process type (batch, continuous, and discrete event) is acceptable. Entry processes can span sizes from traditional scale down to nanoscale and be based on mechanical, electrical, chemical, biochemical, and bio technologies. Note that sustainability is a balance of competing objectives, including cost and time as well as environmental considerations, so many different types of process performance metrics may be considered. In addition, the use of the models for system-level sustainability performance is encouraged.

To enter, the participant must create an account at challenge.gov and visit the Event Web site, <https://www.challenge.gov/challenge/ramp-reusable-abstractions-of-manufacturing-processes/>. Each entry must characterize one process yet participants can submit more than one entry. The participant must submit an analysis of a Unit Manufacturing Process that uses the ASTM E60.13 E3012–16 Standard Guide for Characterizing Environmental Aspects of Manufacturing Processes, and that meets the criteria described herein.

A complete Entry must be in pdf format and include your analysis (including any figures, tables, and references), the name and email address of the Participant who is officially representing the Entry, names of any additional team members and a team name (if applicable) that is chosen by the team members, and confirmation that you have read and agree to the Competition Rules contained in this Notice. Participants may provide submissions beginning at 9:00 a.m. ET on December 19, 2016, to the Event Web site. Submissions can be made no later than 5:00 p.m. ET on March 20, 2017, to the Event Web site.

Entries submitted before the start date and time, or after the end date and time, will not be evaluated or considered for award. Entries sent to NIST in any manner other than through the Event Web site will not be evaluated or considered for award. Entries that do not comply with the formatting requirements set forth in this Notice will not be evaluated or considered for award. Entries must be complete, must not contain any confidential information and must be in English.

In general, each Entry must:

(a) affirmatively represent that the Participant (and each Participant if more than one) has read and consents to be governed by the Competition rules and that the Official Representative satisfies all of the eligibility requirements to win a prize under 15 U.S.C. 3719;

(b) include an original model of the manufacturing process by application of ASTM E60.13 E3012–16 Standard Guide for Characterizing Environmental Aspects of Manufacturing Processes. Specifically, the Entry must include:

1. A project title page including project name, the name(s) of Participant(s), and the email address and phone number of the Participant who is officially representing the Entry,

2. a Unit Manufacturing Process (UMP) information model. A UMP is defined as the smallest element or sub-process in manufacturing that adds value through the modification or transformation of shape, structure, or property of input material or workpiece. Examples of a UMP are injection molding, die-casting and machining. A die-casting UMP can have individual operations such as die-preparation, clamping, injection, cooling, and ejection. A machining UMP can have multiple operations such as drilling, milling, or grinding.

3. a written narrative (fewer than 1500 words) describing how the Entry meets the Review Criteria described below in the Review Criteria section, and

4. an optional brief description of relevant case studies (fewer than 750 words) and/or a weblink (YouTube or Vimeo) to an original short (fewer than five minutes) video that describes the Entry. Participants must have permission to use all content in the video, including footage, music and images.

Guidelines for UMP Representation to be Provided in the Entry

Participants should choose any manufacturing process to demonstrate the application of a UMP representation using ASTM E60.13 E3012–16. ASTM is providing access to this standard free of charge for the purpose of the RAMP Challenge. To obtain a copy of the standard for use in the RAMP Challenge, Participants should email a request to Stephen Mawn (smawn@astm.org). The standard is further described in a Journal of Manufacturing Science and Engineering paper titled “Standard representations for sustainability characterization of industrial processes.” The paper may be downloaded from the NIST Web site: <https://www.nist.gov/node/1090636>. Examples of typical representations will be posted at the Event Web site.

For the identified UMP information model described in Section b-2 above, include:

(a) Graphical Representation: The four elements shown in the E3012–16 standard must be clearly identified in the graphical representation:

a. Inputs: Identify inputs. Create an example of inputs represented in a structured form such as JSON or XML.

b. Outputs: Identify outputs. Output must include 1 or more metrics, such as energy, cost, tear and wear, and CO2 emissions. Create an example of output represented in a structured form such as JSON or XML.

c. Product and Process Information: Identify the necessary product and process information that would be required to instantiate the transformation functions, such as CAD files, CAM files, technical drawings, and specifications sheets.

d. Resources: Identify specific manufacturing assets, such as machines, tools, and operators, that would be required to instantiate the transformation functions.

(b) Transformation Function: Describe a series of equations that compute the output from the input. The transformation function can be expressed in any readable mathematical format, such as using MS Word, LaTeX, ASCII text, or more formally in a language such as JSONiq or Matlab.

(c) Nomenclature: Describe the nomenclature of the inputs/outputs represented in the structured form as well as the computed values in the transformation functions. This should include information such as names of the computed values, its meaning, type of the input variable, and the unit in which the data is represented in the model.

(d) Validation: Explain how the model is validated. An example of validation includes procuring the data (*i.e.*, inputs and outputs) from a physical (or virtual) manufacturing setting and validate this output against the computed output from the transformation function that is run with inputs from the real manufacturing setting. Compute the degree of error between the outputs from the model and the real manufacturing setting. Other approaches may be taken.

(e) Novelty of UMP analysis: The main category is listed in bold type with various examples included for clarity.

a. Advancements to knowledge and understanding of UMP modeling through innovative and expressive representations and methodologies, novel formal representations, more accurate or specialized metric, metric representations that support cascading to higher production levels, or exploration of variations for families of UMP models.

b. Advancements to standards supporting reuse models. This may include automated methods that allow linking of UMP models into systems, facilitating system composition through naming conventions or other methods, generalization that unifies a collection of processes, or standards-based methods for integration with applications.

c. Advancement of techniques for development and validation of UMP models. This may include demonstration of validation techniques for the effectiveness and accuracy of the UMP models or techniques for producing useful derivatives of UMP models or creative methods for mining documentary model descriptions into formal representations.

(f) Information sources: Source of the information used to define the UMP models, such as existing literature, industry case studies, and textbooks.

(g) Multiple files may be submitted, but should be uploaded as a single file submission (.zip or .pdf.) A template formatted to capture entry requirements is provided on the Event Web site for the submission.

RAMP Challenge Award(s)

The Prize Purse for the RAMP Challenge is a total of \$3,250. The Prize Purse may increase, but will not decrease. Any increases in the Prize Purse will be posted on the Event Web site and published in the **Federal Register**. The Prize Purse will be used to fund one or more awards.

NIST will announce via the Event Web site any Entry(ies) the finalists and those entries to which the Judges have made a cash award (each, an "Award"). The anticipated number and amount of the Awards that will be awarded for this Competition is set forth in this **Federal Register** Notice; however, the Judges are not obligated to make all or any Awards, and reserve the right to award fewer than the anticipated number of Awards in the event an insufficient number of eligible Entries meet any one or more of the Judging Criteria for this Competition, based on the Judges' evaluation of the quality of Entries and in their sole discretion. Awards will be made based on the Judges' evaluation of an Entry's compliance with the Judging Criteria for this Competition.

The designated Official Representative of all finalist entries will be notified in an email from NIST to the email address provided in the submission document that they have been selected as a finalist. Finalists will be required to respond affirmatively and complete further documentation within 5 business days that they meet the eligibility criteria set forth in this notice and they (in the case of a team, one designated representative) are able to participate in person at the 2017 ASME International Manufacturing Science and Engineering Conference (MSEC) June 4–8, 2017, at the University of Southern California. Travel supplements to defray costs of travel and conference participation may be made available as needed. Return of any notification as "undeliverable" will result in disqualification. If a finalist indicates they are unable to participate in the conference or does not respond within 5 business days, NIST reserves the right to invite the next highest ranked entrant (who is not already a finalist), as determined by the subject matter experts, to participate as a finalist.

To win an Award, finalists must give a brief in-person presentation to the Judges during the MSEC conference in a special session dedicated to the RAMP Challenge. Winners will be determined by the Judging Panel at the MSEC Conference, and further verified by NIST. The winner verification process with NIST includes providing the full

legal name, tax identification number or social security number, routing number and banking account to which the prize money can be deposited directly. Return of any notification as "undeliverable" will result in disqualification. After verification of eligibility, Awards will be distributed in the form of electronic funds transfer addressed to the Official Representative specified in the winning Entry. That Official Representative will have sole responsibility for further distribution of any Award among Participants in a group Entry or within a company or institution that has submitted an Entry through that representative. Each list of Entries receiving Awards for the Competition will be made public according to the timeline outlined on the Event Web site. Winners are responsible for all taxes and reporting related to any Award received as part of the Competition.

All costs incurred in the preparation of Competition Entries are to be borne by Participants.

Evaluation, Judging, and Selection of Winner(s)*Submission Evaluation Criteria*

This section discusses how Participant submissions will be evaluated.

Entry Submission and Review

The requirements for submission of a complete Entry are detailed in the section "Entry Process for Participants." Each Entry will be reviewed by subject matter experts, who will assess how well the Entry addressed each of the following evaluation criteria. For each Entry, subject matter experts will generate a numerical rating from 0 to 100 based on the five (5) equally weighted review criteria listed below. This rating will be supported by a brief narrative (fewer than 500 words) of the technical merits of the submission in terms of the review criteria. Subject matter experts will provide their individual assessments to the NIST Challenge Manager. The NIST Challenge Manager will identify the top eight submissions ("finalist entries"). The finalist entries and the accompanying subject matter expert evaluations, both the rating and narrative, will be provided to the Judging Panel for their deliberation.

Review Criteria

Subject matter experts will consider five equally weighted review criteria when evaluating submissions:

1. **Completeness:** Submission follows the guidelines and includes all necessary components. All submissions

must describe the approach taken to validate the work and provide both a graphical and formal representation of the UMP information model. An example will be posted on the competition Web site.

2. **Complexity:** Model reflects the complexities of the manufacturing process, especially those which influence sustainability indicators such as energy and material consumption.

3. **Clarity:** Model is clear in describing the process and the process-related information.

4. **Accuracy:** Submission accurately models the process as shown through validation.

5. **Novelty:** Approach taken develops new techniques to advance model reusability or reliability.

Judging Criteria

Eight finalist entries will be evaluated by the Judges in advance of and during the Finalist Presentations to take place at the 2017 ASME International Manufacturing Science and Engineering Conference. NIST reserves the right to name fewer than eight finalists. A panel of three (3) to five (5) judges will then be convened to rank the finalist entries and determine the winners. Judges will review each of the Entries and any corresponding technical assessments provided by subject matter experts. Judges will participate in a session at the 2017 ASME International Manufacturing Science and Engineering Conference where the finalists will give a 10–15 minute in-person presentation describing their submission and how well it meets the judging criteria. Time permitting, this will include a question and answer session after each presentation. Judges will deliberate and then rank the finalist entries using the weighted Judging Criteria (percentage in parentheses):

1. **Complexity:** Model reflects the complexities of the manufacturing process, especially those which influence sustainability indicators such as energy and material consumption. (10%)

2. **Clarity:** Model is clear in describing the process and the process-related information. (10%)

3. **Accuracy:** Submission accurately models the process as shown through validation. (35%)

4. **Novelty:** Approach taken develops new techniques to advance model reusability or reliability. (35%)

5. **Presentation:** Quality and content conveyed in a brief in-person presentation at the 2017 MESC Conference. (10%)

Awards

First, Second, and Third Place Prizes, and up to five runners-up, will be selected by the Judges.

- First Place Prize is \$1,000
- Second Place Prize is \$750
- Third Place Prize is \$500
- Runners Up Prize is \$200

Subject Matter Experts and Judging Panel

Subject Matter Experts, to be selected by the NIST with assistance from Challenge supporters, will, as a body, represent a high degree of experience with manufacturing processes, process modeling, and sustainability assessment of manufacturing processes, and a balance of perspectives from relevant manufacturing sectors. Subject Matter Experts may consist of NIST Federal Employees, NIST Associates, employees of RAMP Challenge supporters, or their representatives. Subject Matter Experts will not select winners of any awards.

The NIST Director will appoint a panel of highly qualified Judges. The Judging Panel will consist of individuals who are experts in the field of sustainability of manufacturing processes. Judges will deliberate and rank finalist entries according to the Judging Criteria described above. The top (up to eight) Entries ranked by the Judges will be selected to receive an Award. Judges may not have personal or financial interests in, or be an employee, officer, director, or agent of, any entity that is a registered Participant in this Competition and may not have a familial or financial relationship with an individual who is a registered Participant. In the event of such a conflict, a Judge must recuse himself or herself. Should this occur, a new Judge may be appointed to the panel.

Intellectual Property Rights

Other than as set forth herein, NIST does not make any claim to ownership of your Entry or any of your intellectual property or third party intellectual property that it may contain. By participating in the Competition, you are not granting any rights in any patents or pending patent applications related to your Entry; provided that by submitting an Entry, you are granting NIST certain limited rights as set forth herein.

By submitting an Entry, you grant to NIST the right to review your Entry as described above in the section "Entry Submission and Review," to describe your Entry in connection with any materials created in connection with the Competition and to have the Subject Matter Experts, Judges, Competition

administrators, and the designees of any of them, review your Entry.

By submitting an Entry, you grant a non-exclusive, irrevocable, paid up right and license to NIST to use your name, likeness, biographical information, image, any other personal data submitted with your Entry and the contents in your Entry, in connection with the RAMP Challenge for any purpose, including promotion and advertisement of the Challenge and future challenges.

You agree that nothing in this Notice grants you a right or license to use any names or logos of NIST or the Department of Commerce or any supporting agency or entity, or any other intellectual property or proprietary rights of NIST or the Department of Commerce or any supporting agency or entity or their employees or contractors. You grant to NIST the right to include your name and your company or institution name and logo (if your Entry is from a company or institution) as a Participant on the Event Web site and in materials from NIST announcing winners of or Participants in the Competition. Other than these uses or as otherwise set forth herein, you are not granting NIST any rights to your trademarks.

Entries containing any matter, including team names, which, in the sole discretion of NIST, is indecent, defamatory, in obvious bad taste, which demonstrates a lack of respect for public morals or conduct, which promotes discrimination in any form, which shows unlawful acts being performed, which is slanderous or libelous, or which adversely affects the reputation of NIST, will not be accepted. If NIST, in its sole discretion, finds any Entry to be unacceptable, then such Entry shall be deemed disqualified and will not be evaluated or considered for award. NIST shall have the right to remove any content from the Event Web site in its sole discretion at any time and for any reason, including, but not limited to, any online comment or posting related to the Competition.

Confidential Information

By making a submission to the RAMP Challenge, you agree that no part of your submission includes any confidential or proprietary information, ideas or products, including but not limited to information, ideas or products within the scope of the Trade Secrets Act, 18 U.S.C. 1905. Because NIST will not receive or hold any submitted materials "in confidence," it is agreed that, with respect to your Entry, no confidential or fiduciary relationship or obligation of secrecy is established between NIST and

you, your Entry team, the company or institution you represent when submitting an Entry, or any other person or entity associated with any part of your Entry.

Warranties

By submitting an Entry, you represent and warrant that all information you submit is true and complete to the best of your knowledge, that you have the right and authority to submit the Entry on your own behalf or on behalf of the persons and entities that you specify within the Entry, and that your Entry (both the information and software submitted in the Entry and the underlying technologies or concepts described in the Entry):

(a) is your own original work, or is submitted by permission with full and proper credit given within your Entry;

(b) does not contain confidential information or trade secrets (yours or anyone else's);

(c) does not knowingly violate or infringe upon the patent rights, industrial design rights, copyrights, trademarks, rights in technical data, rights of privacy, publicity or other intellectual property or other rights of any person or entity;

(d) does not contain malicious code, such as viruses, malware, timebombs, cancelbots, worms, Trojan horses or other potentially harmful programs or other material or information;

(e) does not and will not violate any applicable law, statute, ordinance, rule or regulation, including, without limitation, United States export laws and regulations, including, but not limited to, the International Traffic in Arms Regulations and the Department of Commerce Export Administration Regulations; and

(f) does not trigger any reporting or royalty or other obligation to any third party; and

(g) does not contain any statement that is abusive, defamatory, libelous, obscene, fraudulent, or is in any other way unlawful or in violation of applicable laws.

Limitation of Liability

By participating in the RAMP Challenge, you agree to assume any and all risks and to release, indemnify and hold harmless NIST or any supporting agency or entity from and against any injuries, losses, damages, claims, actions and any liability of any kind (including attorneys' fees) resulting from or arising out of your participation in, association with or submission to the RAMP Challenge (including any claims alleging that your Entry infringes, misappropriates or violates any third

party's intellectual property rights). In addition, you agree to waive claims against the Federal Government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from your participation in the RAMP Challenge, whether the injury, death, damage, or loss arises through negligence or otherwise.

NIST is not responsible for any miscommunications such as technical failures related to computer, telephone, cable, and unavailable network or server connections, related technical failures, or other failures related to hardware, software or virus, or incomplete or late Entries. Any compromise to the fair and proper conduct of the RAMP Challenge may result in the disqualification of an Entry or Participant, termination of the RAMP Challenge, or other remedial action, at the sole discretion of NIST. NIST reserves the right in its sole discretion to extend or modify the dates of the RAMP Challenge, and to change the terms set forth herein governing any phases taking place after the effective date of any such change. By entering, you agree to the terms set forth herein and to all decisions of NIST and/or all of their respective agents, which are final and binding in all respects.

NIST is not responsible for: (1) Any incorrect or inaccurate information, whether caused by a Participant, printing errors, or by any of the equipment or programming associated with or used in the RAMP Challenge; (2) unauthorized human intervention in any part of the Entry Process for the RAMP Challenge; (3) technical or human error that may occur in the administration of the RAMP Challenge or the processing of Entries; or (4) any injury or damage to persons or property that may be caused, directly or indirectly, in whole or in part, from a Participant's participation in the RAMP Challenge or receipt or use or misuse of an Award. If for any reason an Entry is confirmed to have been deleted erroneously, lost, or otherwise destroyed or corrupted, the Participant's sole remedy is to submit another Entry in the RAMP Challenge.

Termination and Disqualification

NIST reserves the authority to cancel, suspend, and/or modify the RAMP Challenge, or any part of it, if any fraud, technical failures, or any other factor beyond NIST's reasonable control impairs the integrity or proper functioning of the RAMP Challenge, as determined by NIST in its sole discretion.

NIST reserves the right to disqualify any Participant or Participant team it believes to be tampering with the Entry process or the operation of the RAMP Challenge or to be acting in violation of any applicable rule or condition.

Any attempt by any person to undermine the legitimate operation of the RAMP Challenge may be a violation of criminal and civil law, and, should such an attempt be made, NIST reserves the authority to seek damages from any such person to the fullest extent permitted by law.

Verification of Potential Winner(s)

All potential winners are subject to verification by NIST, whose decisions are final and binding in all matters related to the RAMP Challenge.

Potential winner(s) must continue to comply with all terms and conditions of the RAMP Challenge Rules described in this notice, and winning is contingent upon fulfilling all requirements. In the event that a potential winner, or an announced winner, is found to be ineligible or is disqualified for any reason, NIST may make an award, instead, to another Participant.

Privacy and Disclosure under FOIA

Except as provided herein, information submitted throughout the RAMP Challenge will be used only to communicate with Participants regarding Entries and/or the RAMP Challenge. Participant Entries and submissions to the RAMP Challenge may be subject to disclosure under the Freedom of Information Act ("FOIA").

Authority: 15 U.S.C. 3719.

Kevin Kimball,

NIST Chief of Staff.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket No.: 161116999-6999-01]

National Cybersecurity Center of Excellence (NCCoE) Multifactor Authentication for e-Commerce Project for the Retail Sector

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology (NIST) invites organizations to provide products and technical expertise to

support and demonstrate security platforms for the Multifactor Authentication for e-Commerce Project for the retail sector. This notice is the initial step for the National Cybersecurity Center of Excellence (NCCoE) in collaborating with technology companies to address cybersecurity challenges identified under the retail sector program. Participation in the Multifactor Authentication for e-Commerce Project is open to all interested organizations.

DATES: Interested parties must contact NIST to request a letter of interest template to be completed and submitted to NIST. Letters of interest will be accepted on a first come, first served basis. Collaborative activities will commence as soon as enough completed and signed letters of interest have been returned to address all the necessary components and capabilities, but no earlier than January 18, 2017. When the Multifactor Authentication for e-Commerce Project search for collaborators has been completed, NIST will post a notice on the NCCoE retail sector program Web site at https://nccoe.nist.gov/projects/use_cases/multifactor-authentication-ecommerce announcing the completion of the search for collaborators and informing the public that it will no longer accept letters of interest for this Multifactor Authentication for e-Commerce Project.

ADDRESSES: The NCCoE is located at 9700 Great Seneca Highway, Rockville, MD 20850. Letters of interest must be submitted to consumer-nccoe@nist.gov or via hardcopy to National Institute of Standards and Technology, NCCoE; 9700 Great Seneca Highway, Rockville, MD 20850. Organizations whose letters of interest are accepted in accordance with the process set forth in the **SUPPLEMENTARY INFORMATION** section of this notice will be asked to sign a Cooperative Research and Development Agreement (CRADA) with NIST. A CRADA template can be found at: <https://nccoe.nist.gov/library/nccoe-consortium-crada-example>.

FOR FURTHER INFORMATION CONTACT:

William Newhouse via email to william.newhouse@nist.gov; by telephone 301-975-0232; or by mail to National Institute of Standards and Technology, NCCoE; 9700 Great Seneca Highway, Rockville, MD 20850. Additional details about the Multifactor Authentication for e-Commerce Project are available at https://nccoe.nist.gov/projects/use_cases/multifactor-authentication-ecommerce.

SUPPLEMENTARY INFORMATION:

Background: The NCCoE, part of NIST, is a public-private collaboration

for accelerating the widespread adoption of integrated cybersecurity tools and technologies. The NCCoE brings together experts from industry, government, and academia under one roof to develop practical, interoperable cybersecurity approaches that address the real-world needs of complex Information Technology (IT) systems. By accelerating dissemination and use of these integrated tools and technologies for protecting IT assets, the NCCoE will enhance trust in U.S. IT communications, data, and storage systems; reduce risk for companies and individuals using IT systems; and encourage development of innovative, job-creating cybersecurity products and services.

Process: NIST is soliciting responses from all sources of relevant security capabilities (see below) to enter into a Cooperative Research and Development Agreement (CRADA) to provide products and technical expertise to support and demonstrate security platforms for the Multifactor Authentication for e-Commerce Project for the retail sector. The full Multifactor Authentication for e-Commerce Project Description can be viewed at: https://nccoe.nist.gov/projects/use_cases/multifactor-authentication-ecommerce.

Interested parties should contact NIST using the information provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice. NIST will then provide each interested party with a letter of interest template, which the party must complete, certify that it is accurate, and submit to NIST. NIST will contact interested parties if there are questions regarding the responsiveness of the letters of interest to the Multifactor Authentication for e-Commerce Project objective or requirements identified below. NIST will select participants who have submitted complete letters of interest on a first come, first served basis within each category of product components or capabilities listed below up to the number of participants in each category necessary to carry out this Multifactor Authentication for e-Commerce Project. However, there may be continuing opportunity to participate even after initial activity commences. Selected participants will be required to enter into a consortium CRADA with NIST (for reference, see **ADDRESSES** section above). NIST published a notice in the **Federal Register** on October 19, 2012 (77 FR 64314) inviting U.S. companies to enter into National Cybersecurity Excellence Partnerships (NCEPs) in furtherance of the NCCoE. For this demonstration project, NCEP partners

will not be given priority for participation.

Multifactor Authentication for e-Commerce Project Objective: The goal of this project is to increase the confidence of user identity and reduce the risk of fraud in the online, Card-Not-Present (CNP) space by implementing multifactor authentication for e-commerce transactions along with other security controls. The solution will provide guidance for implementing multifactor authentication mechanisms, risk calculation, web analytics, and potentially identity federation, in retail IT architecture segments that support or interface with e-commerce transactions such as online shopping or loyalty points programs. It will produce an architecture that includes components that will integrate multifactor authentication mechanisms (certificate-based, biometric, or others), risk calculation engines (risk score calculation and decisions), web analytics (pertaining to known user behavior and/or web threat detection), potentially identity federation (which can include authentication and risk information sent from a third-party business partner and Identity Provider), and automated logging within and between each component.

A detailed description of the Multifactor Authentication for e-Commerce Project is available at: https://nccoe.nist.gov/projects/use_cases/multifactor-authentication-ecommerce.

Requirements: Each responding organization's letter of interest should identify which security platform component(s) or capability(ies) it is offering. Letters of interest should not include company proprietary information, and all components and capabilities must be commercially available. Components are listed in the High-Level Architecture section of the Multifactor Authentication for e-Commerce Project Description (for reference, please see the link in the Process section above) and include, but are not limited to:

- Online/e-commerce shopping cart and payment system (in-house or outsourced)
- Multifactor authentication mechanisms (types of which to be determined)
- Risk calculation platform/engine
- Web analytics engine
- Logging of risk calculation and web analytics data
- Data storage for risk calculation and web analytics data
- Identity federation mechanism (optional)

Each responding organization's letter of interest should identify how their products address one or more of the following desired solution characteristics in the High-Level Architecture section of the Multifactor Authentication for e-Commerce Project Description for the retail use case (for reference, please see the link in the Process section above):

- Authentication mechanisms that meet business security and regulatory requirements
 - Automated web analytics including monitoring of user behavior and contextual details
 - Automated logging of web analytics and risk calculation data
 - Automated data storage of web analytics and risk calculation data
 - Ability to establish and enforce risk decisions including performing risk calculations
 - Automated alerting of suspected fraudulent activity
 - Ease of use for the consumer, no substantial increase in friction during the e-commerce transaction
 - Identity federation (optional)
- Responding organizations need to understand and, in their letters of interest, commit to provide:

1. Access for all participants' project teams to component interfaces and the organization's experts necessary to make functional connections among security platform components
2. Support for development and demonstration of the Multifactor Authentication for e-Commerce Project for the retail use case in NCCoE facilities which will be conducted in a manner consistent with Federal requirements (e.g., FIPS 200, FIPS 201, SP 800-53, and SP 800-63)

Additional details about the Multifactor Authentication for e-Commerce Project for the retail sector use case are available at: https://nccoe.nist.gov/projects/use_cases/multifactor-authentication-ecommerce. NIST cannot guarantee that all of the products proposed by respondents will be used in the demonstration. Each prospective participant will be expected to work collaboratively with NIST staff and other project participants under the terms of the consortium CRADA in the development of the Multifactor Authentication for e-Commerce Project for the retail sector capability. Prospective participant's contribution to the collaborative effort will include assistance in establishing the necessary interface functionality, connection and set-up capabilities and procedures, demonstration harnesses, environmental and safety conditions for use, integrated platform user instructions, and

demonstration plans and scripts necessary to demonstrate the desired capabilities. Each participant will train NIST personnel, as necessary, to operate its product in capability demonstrations to the retail community. Following successful demonstrations, NIST will publish a description of the security platform and its performance characteristics sufficient to permit other organizations to develop and deploy security platforms that meet the security objectives of the Multifactor Authentication for e-Commerce Project for the retail sector use case. These descriptions will be public information.

Under the terms of the consortium CRADA, NIST will support development of interfaces among participants' products by providing IT infrastructure, laboratory facilities, office facilities, collaboration facilities, and staff support to component composition, security platform documentation, and demonstration activities.

The dates of the demonstration of the Multifactor Authentication for e-Commerce Project for the retail sector capability will be announced on the NCCoE Web site at least two weeks in advance at <http://nccoe.nist.gov/>. The expected outcome of the demonstration is added security and reduced fraud stemming from an increased use of multifactor authentication for e-commerce transactions across an entire retail sector enterprise. Participating organizations will gain from the knowledge that their products are interoperable with other participants' offerings.

For additional information on the NCCoE governance, business processes, and NCCoE operational structure, visit the NCCoE Web site <http://nccoe.nist.gov/>.

Kevin Kimball,
NIST Chief of Staff.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF040

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Ad Hoc Ecosystem Workgroup (EWG) will hold a webinar, which is open to the public.

DATES: The webinar will be held on January 10, 2017, from 1:30 to 4:30 p.m., or when business for the day is completed.

ADDRESSES: To join the webinar visit this link: <http://www.gotomeeting.com/online/webinar/join-webinar>. Enter the Webinar ID: 917-479-603. Enter your name and email address (required). Once you have joined the webinar, choose either your computer's audio or select "Use Telephone." If you do not select "Use Telephone" you will be connected to audio using your computer's microphone and speakers (VoIP). To use your telephone for the audio portion of the meeting dial this TOLL number +1 (914) 614-3221 (not a toll-free number); then enter the Attendee phone audio access code 462-275-391, then enter your audio phone pin (shown after joining the webinar). Participants are encouraged to use their telephone, as this is the best practice to avoid technical issues and excessive feedback. You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2425 for technical assistance. A public listening station will also be provided at the Pacific Council office.

Council address: Pacific Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Dr. Kit Dahl, Pacific Council Staff Officer; phone: (503) 820-2422; email: kit.dahl@noaa.gov.

SUPPLEMENTARY INFORMATION: The purpose of the webinar is for the EWG to discuss (1) preparation of the Annual State of the California Current Ecosystem Report and (2) future ecosystem initiatives under the Council's Fishery Ecosystem Plan (FEP).

Each March, the National Marine Fisheries Service's Northwest and Southwest Fisheries Science Centers deliver a State of the California Current Ecosystem Report to the Council. The Report assesses current status through a series of indicators covering physical, biological, and socioeconomic components of the ecosystem. The Council has provided advice to the Science Centers on how to make the report more relevant to Council decision-making including comments on the suite of indicators it uses. The webinar will provide an opportunity for the EWG to discuss preparation of the current Report with Science Center

representatives and the contents of future reports.

At its March 2017 meeting, the Council will also consider taking up a new ecosystem-based fishery management initiative. Appendix A to the FEP contains a list of these initiatives, which are intended to address ecosystem gaps in ecosystem knowledge and FMP policies, particularly with respect to the cumulative effects of fisheries management on marine ecosystems and fishing communities. The FEP establishes a schedule by which each March the Council reviews progress to date on any ecosystem initiatives the Council already has underway and determines whether to take up a new initiative. In odd-numbered years the Council may also consider identifying new initiatives that are not already in Appendix A. The EWG will discuss current and potential new initiatives in preparation for the March 2017 Council meeting.

Although nonemergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2425 at least 10 business days prior to the meeting date.

Dated: December 14, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2016-30416 Filed 12-16-16; 8:45 am]

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF082

Marine Mammals; File No. 20527

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Ann Pabst, Ph.D., University of North Carolina Wilmington, Biology and Marine Biology, 601 S. College Road, Wilmington, NC 28403, has applied in due form for a permit to conduct research on marine mammals.

DATES: Written, telefaxed, or email comments must be received on or before January 18, 2017.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 20527 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Shasta McClenahan or Carrie Hubard, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The applicant proposes to take marine mammals to: (1) Document the presence of North Atlantic right (*Eubalaena glacialis*) and humpback (*Megaptera novaeangliae*) whales in the mid-Atlantic, and (2) describe the distribution and abundance of cetaceans within specific regions used for U.S.

Navy training or other activities. Research activities may occur year-round in the Atlantic Ocean from Delaware Bay to Cape Canaveral, FL, and will include aerial and vessel surveys to conduct counts, photo-identification, photogrammetry, and behavioral observations. ESA-listed species include up to 40 blue (*Balaenoptera musculus*), 100 fin (*B. physalus*), 200 North Atlantic right, 40 sei (*B. borealis*), and 150 sperm (*Physeter macrocephalus*) whales. Non-listed species include 100 Cuvier's beaked (*Ziphius cavirostris*), 100 false killer (*Pseudorca crassidens*), 100 Gervais' beaked (*Mesoplodon europaeus*), 200 humpback, 50 killer (*Orcinus orca*), 100 melon-headed (*Peponocephala electra*), 100 minke (*B. acutorostrata*), 5,000 pilot (*Globicephala spp.*), 100 pygmy and dwarf sperm (*Kogia spp.*), 100 pygmy killer (*Feresa attenuata*), 100 True's beaked (*M. mirus*), and 100 unidentified beaked whales; 5,000 Atlantic spotted (*Stenella frontalis*), 8,000 bottlenose (*Tursiops truncatus*), 1,000 Clymene (*S. clymene*), 1,000 common (*Delphinus delphis*), 100 Fraser's (*Lagenodelphis hosei*), 100 pantropical spotted (*S. attenuata*), 2,500 Risso's (*Grampus griseus*), 500 rough-toothed (*Steno bredanensis*), 200 spinner (*S. longirostris*), and 1,000 striped (*S. coeruleoalba*) dolphins; and 100 harbor porpoise (*Phocoena phocoena*). The permit would be valid for 5 years from the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: December 13, 2016.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals and Endangered Species; File Nos. 19225, 19257, 19315, 19674, and 20599

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permits.

SUMMARY: Notice is hereby given that permits have been issued to the following entities:

Permit No. 19225: James D. Darling, Ph.D., Whale Trust, P.O. Box 384, Tofino, BC V0R2Z0 Canada;

Permit No. 19257: Ann M. Zoidis, Director, Cetos Research Organization, 11 Des Isle Avenue, Bar Harbor, ME 04609;

Permit No. 19315: Center for Coastal Studies, Right Whale Ecology Program, 5 Holway Avenue, P.O. Box 1036, Provincetown, MA 02657 [Responsible Party: Richard Delaney];

Permit No. 19674: Scott Kraus, Ph.D., New England Aquarium, Edgerton Research Lab, Central Wharf, Boston MA 02110; and

Permit No. 20599: NMFS Southwest Fisheries Science Center, Antarctic Ecosystem Research Division, La Jolla, California [Responsible Party: George Watters, Ph.D.].

ADDRESSES: The permits and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Rosa González (File Nos. 19225 and 19257), Carrie Hubard (File Nos. 19225 and 19257), Amy Hapeman (File Nos. 19315 and 19674), and Sara Young (File Nos. 19315, 19674, 20599).

SUPPLEMENTARY INFORMATION: Notices were published in the **Federal Register** that requests for a permit had been submitted by the above-named applicants. The requested permits have been issued under the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the

taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226), as applicable.

Permit No. 19225: The requested permit (81 FR 5990, November 1, 2016) authorizes Dr. Darling to use passive acoustic monitoring, active playbacks, suction cup and dart tagging, biopsy sampling, underwater photography/videography, photo ID and photogrammetry during aerial and vessel surveys to address a variety of questions regarding social organization, behavior, and communication of humpback whales (*Megaptera novaeangliae*). Research may occur off Hawaii (primarily off west Maui), and Alaska. Incidental harassment is authorized for the following non-target species: North Pacific right whales (*Eubalaena japonica*); false killer whales (*Pseudorca crassidens*); Dall's porpoises (*Phocoenoides dalli*); spinner (*Stenella longirostris*), pantropical spotted (*S. attenuata*), and bottlenose dolphins (*Tursiops truncatus*); killer whales (*Orcinus orca*); Hawaiian monk seals (*Neomonachus schauinslandi*); harbor seals (*Phoca vitulina*); and Steller sea lions (*Eumetopias jubatus*). The permit is valid until October 31, 2021.

Permit No. 19257: The requested permit (80 FR 59736, November 1, 2016) authorizes Ms. Zoidis to use passive acoustic monitoring, suction cup tagging, biopsy sampling, underwater photography/videography, and photo ID during vessel surveys in Hawaii and the Mariana Islands (Guam and the Commonwealth of the Northern Mariana Islands) to address a variety of questions regarding population size, habitat use, and behavior of baleen and odontocete species. The research would target humpback whales and 25 other species of whales and dolphins. Species may undergo all methodologies (except right whales, which will not be tagged). Incidental harassment for all species is also authorized. Research would take place throughout the year. The permit is valid until October 31, 2021.

Permit No. 19315: The requested permit (81 FR 59192, August 29, 2016) authorizes researchers to conduct vessel and aerial surveys of North Atlantic right whales (*Eubalaena glacialis*) and bowhead whales (*Balaena mysticetus*) opportunistically in Atlantic waters from Maine to New Jersey to gain a better understanding of right whale population status, relationship to habitat conditions, distribution and abundance, movement patterns, and interactions with human activities. Surveys may involve approach for observation, photo-identification, and prey mapping. Up to 16 other species of cetaceans and four species of pinnipeds

may be incidentally harassed during surveys. The request to suction cup tag a subset of right whales was denied. The permit is valid for five years from the date of issuance.

Permit No. 19674: The requested permit (81 FR 59192, August 29, 2016) authorizes Dr. Kraus to conduct vessel and aerial surveys of North Atlantic right whales in U.S. and international waters of the North Atlantic from Florida to Iceland to assess, quantify, and track trends in the demographic characteristics of right whales; and to identify, quantify and monitor the long term trends in anthropogenic impacts on the species. Surveys may involve approach for observation, photo-identification, and biopsy and blow sampling, thermal imaging, passive acoustic recording, collection of sloughed skin and feces, photogrammetry, and/or incidental harassment of right whales. Right whale parts may be received, imported or exported. Humpback whales, harbor porpoises (*Phocoena phocoena*), and Atlantic white-sided dolphins (*Lagenorhynchus acutus*) may be incidentally harassed during vessel surveys. The permit is valid for five years from the date of issuance.

Permit No. 20599: The requested permit (81 FR 66928, September 29, 2016) authorizes researchers to take Antarctic fur seals (*Arctocephalus gazella*), southern elephant seals (*Mirotunga leonina*), crabeater seals (*Lobodon carcinophagus*), leopard seals (*Hydrurga leptonyx*), Ross seals (*Ommatophoca rossii*), and Weddell seals (*Leptonychotes weddellii*) for life history studies and census surveys for abundance and distribution of pinnipeds in the South Shetland Islands, Antarctica, as part of a long-term ecosystem monitoring program established in 1986. The applicant also requests permission to import tissue samples collected from any animals captured and from salvaged carcasses of any species of pinniped or cetacean found in the study area. The permit is valid for five years from the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, as applicable, issuance of these permit was based on a finding that such permits: (1) Were applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) are

consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: December 13, 2016.

Julia Harrison,

AGENCY: National Ocean Service (NOS), NOAA, Department of Commerce.

ACTION: Notice of intent to prepare a programmatic environmental assessment; request for Comments.

SUMMARY: NOAA is issuing this notice to advise the public that NOS is preparing a programmatic environmental assessment (PEA) in accordance with the National Environmental Policy Act (NEPA) to evaluate the environmental impacts of NOS hydroacoustic surveys, mapping, and other related data gathering activities. NOS offices that conduct hydroacoustic surveys, mapping, and other related data-gathering activities which may be covered under this PEA include: Center for Operational Oceanographic Products and Services, National Centers for Coastal Ocean Science, Office of Coast Survey, Office for Coastal Management, Office of National Marine Sanctuaries, Office of Response and Restoration, Office of National Geodetic Survey, and the U.S. Integrated Ocean Observing System Program Office. The PEA will encompass the environment of all geographic areas where NOS conducts these activities, to include terrestrial areas, but primarily focusing on U.S. waters from the coastline to the limits of the U.S. Exclusive Economic Zone, which extends no more than 200 nautical miles from the territorial sea baseline.

NOAA provides this notice to advise other Federal and State agencies, Territories, Tribal Governments, local governments, private parties, and the public of our intent to prepare a PEA, to provide information on the nature of the analysis, and to invite input.

DATES: Comments must be received by January 18, 2017.

ADDRESSES: Comments may be submitted by mail, email, or FAX. Mail:

DOC/NOAA/NOS, Environmental Compliance Coordinator, SSMC4-Station 13612, 1305 East West Highway, Silver Spring, MD 20910. Email: nosaa.ec@noaa.gov. FAX: 301-713-4269. Comments may also be submitted through the NOS Environmental Compliance Web site: <http://oceanservice.noaa.gov/about/environmental-compliance.html>.

FOR FURTHER INFORMATION CONTACT: Giannina DiMaio, Environmental Compliance Coordinator for NOS, at nosaa.ec@noaa.gov or 240-533-0918.

SUPPLEMENTARY INFORMATION: NEPA requires that NOAA consider all reasonably foreseeable environmental effects of our proposed actions, and to involve and inform the public in our decision making process. The main goal of this scoping process is to help NOS focus the analysis of the PEA on the relevant environmental and socioeconomic issues.

NOS uses hydroacoustic surveys to map the ocean floor to provide reliable nautical charts, benthic habitat condition and distribution maps, fishery distribution maps, current and tide charts, and other products necessary for safe navigation, economic security, environmental sustainability, and sound marine resource decision-making in U.S. ocean and coastal waters. These charts and maps are needed to provide reliable navigation, ecosystem distribution and condition information to the public, private users, and decision makers. Up-to-date navigation charts are used to ensure safety, efficiency of transit, and economic well-being.

NOS will take other environmental compliance steps concurrently with the preparation of this PEA to include: application for a 5-year Letter of Authorization pursuant to Section 101 of the Marine Mammal Protection Act; completion of a section 7 consultation under the Endangered Species Act; consultation on the Essential Fish Habitat provisions of the Magnuson-Stevens Fishery Conservation and Management Act; consultations in compliance with Section 106 of the National Historic Preservation Act; and completion of federal consistency determinations for compliance with the Coastal Zone Management Act. Analysis conducted in support of consultations, including quantitative analysis for estimating acoustic impacts on marine species, will be included in the PEA as appropriate.

NOS has not yet identified action alternatives to be analyzed in the PEA. NOS recommends that programmatic NEPA documents examine at least three

alternatives, including the no-action alternative.

NOS will use input provided by Federal and State agencies, Territories, Tribal Governments, local governments, private parties, and the public during this scoping process in the preparation of the PEA. Publication of this notice initiates the public scoping process to solicit public and agency comment regarding the full spectrum of environmental issues and concerns relating to the scope and content of the PEA including:

- Analyses of the human and marine resources that could be affected;
- the nature and extent of the potential impacts on those resources;
- a reasonable range of alternatives to the proposed action; and
- mitigation and monitoring measures.

Comments and questions concerning this PEA should be directed to the NOS contact at the address provided above.

Authority: 42 U.S.C. 4321-4347; 40 CFR 1500 *et seq.*; NOAA Administrative Order 216-6A.

Dated: December 9, 2016.

W. Russell Callender,
Assistant Administrator for Ocean Services and Coastal Management.

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council will hold a one and a half day meeting of its Standing, Reef Fish, Coastal Migratory Pelagics (CMP) and Socioeconomics Scientific and Statistical Committees (SSC).

DATES: The meeting will convene on Tuesday, January 10, 2017, from 1 p.m. to 5 p.m. and Wednesday, January 11, 2017, from 8:30 a.m. to 5 p.m., EDT.
