

Rock Permit Renewal form does include other clarifying revisions. NMFS does not anticipate these revisions to both forms will materially change the time burden to the applicants.

The proposed revisions to the specified application forms are administrative and generally divide existing data fields into smaller parts to gather information that is more specific. NMFS intends the revisions to make the requested information clearer and easier to understand, and therefore, applications may require less time to complete in some cases. Additionally, NMFS removed some data fields that were collecting less meaningful data. NMFS estimates that the proposed revisions would not change the annual number of respondents or responses, or annual costs to affected permit applicants from estimates in the currently approved collection. Across the application forms, NMFS estimates these revisions would increase the overall time burden.

In addition to the proposed revisions above, NMFS also increases its estimated time burden for the Vessel Permit Transfers and Notarizations form and the Annual Landings Report for Gulf of Mexico Shrimp form to more accurately account for the time required to complete these forms.
