SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Coal Mine Rescue Teams: Arrangements for Emergency Medical Assistance and Transportation for Injured Persons-Agreements, Reporting Requirements, and Posting Requirements information collection. More specifically, this ICR covers the following requirements for a coal mine: reporting to the MSHA how the mine will comply with mine rescue team requirements; reporting to the MSHA alternative mine rescue capability for a small and remote mine; providing an annual certification to the MSHA that each mine rescue team designated to provide mine rescue coverage meets applicable requirements; maintaining a record of mine rescue equipment testing, medical physical examinations of mine rescue team members, and mine rescue team training; posting a copy of the mine rescue notification plan and providing a written copy to a designated mine worker representative; and posting at appropriate places of an underground or surface mine the names, titles, addresses, and telephone numbers of all persons or services currently available under medical assistance and transportation arrangements. Coal mine operators, supervisors, and employees, as well as State and Federal mine inspectors use the records to provide assurance that each mine operator and mine rescue team is prepared for a mine emergency. Records also show that mine rescue team equipment has been examined and tested and is in good working order. Training records show that mine rescue team members and the responsible persons at the mine are competent to respond to a mine emergency involving a fire, an explosion, or a gas or water inundation. Federal Mine Safety and Health Act of 1977, as Amended sections 101(a) and 103(h) authorize this information

In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0144.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2016. The DOL seeks to extend PRA authorization for this information collection through May 31, 2019, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on July 31, 2016 (81 FR 50023).
