Information Collection Request Title: Surgeon General's Pledge to End the Opioid Crisis.

OMB No.: 0990-0448.

Abstract: This information collection is a critical component of a campaign to encourage health care prescribers (the user) to take action in their clinical practice to reduce the number of prescription drug overdoses and reduce the likelihood of prescription opioid drugs ending up in the possession of those who may abuse them. This information collection involves obtaining user contact information, medical profession category, medical specialty, and responses to short questions specifically designed to provide anecdotal information and contextualize the impact of the prescription opioid epidemic.

Need and Proposed Use of the Information: This information collection serves to gather contact information from clinical prescribers and responses to two short answer questions describing how prescription opioid addiction has impacted their patients and/or their practice. Zip code, profession, and specialty will be collected and analyzed to present aggregate pledge data. Each element will also be utilized to send personalized campaign communication. Understanding the demographics of the medical practitioners will improve the efficacy of the campaign to end opioid

abuse by allowing for targeted communication.

Likely Respondents: Medical Prescribers.

The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Opioid Pledge Form	5,000	1	5/60	416.67

Information Collection Request Title: National Tissue Recovery through Utilization Survey (NTRUS).

Abstract: The Office of the Assistant Secretary for Health, Department of Health and Human Services, is requesting OMB approval on a new ICR. This survey is being conducted to generate national estimates of recovery through utilization activity; of donated human tissue for calendar years 2012 and 2015, and to compare metrics across three data collection periods that includes results from a 2007 survey, the most recent year these data were

collected. The survey and data collection and analysis methods will be similar to the 2007 survey. The general categories of information to be collected are listed under the Survey Section of the Annualized Burden Hour table below.

Need and Proposed Use of the Information: Policy advice provided by the HHS Advisory Committee on Blood and Tissue Safety and Availability to the HHS Secretary and Assistant Secretary for Health is used to direct departmental efforts to address transfusion and transplantation issues, such as emergency preparedness and infectious disease transmission related to donated human tissue. The advice provided is partly dependent on analysis of relevant information, such as tissue collection through utilizations data.

Likely Respondents: Respondents for this survey would be U.S. tissue banks that screen and recover tissue from living and deceased donors, and process, store, and/or distribute tissues grafts for transplantation from these donors.

The total annual burden hours estimated for this ICR are summarized in the table below.
