SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a

diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2016-008-M.

Petitioner: Martin Marietta Materials, Inc., 11405 N. Pennsylvania St., Suite 250, Carmel, Indiana 46032.

Mine: Kokomo Mine, MSHA I.D. No. 12-02105, located in Howard County, Indiana.

Regulation Affected: 30 CFR 49.2(c) (Availability of mine rescue teams).

Modification Request: The petitioner requests a modification of the existing standard for the Martin Marietta, Indiana District Mine Rescue Team stationed at the Kokomo Mine, to use two additional firefighters from the Kokomo Fire Department located in Howard County, Indiana. The two firefighters are in addition to the proposed team of five experienced miners from the Kokomo mine, North Indianapolis mine, Noblesville Stone mine and Kentucky Avenue mine.

The petitioner states that:

(1) The firefighters are in close proximity to the mine, and will receive the required MSHA training.

(2) The members of the fire department have had extensive training in firefighting, evacuation and rescue.

(3) The additional firefighters will receive underground training and become familiar with the mines where they will be providing mine rescue service. The team will have more rescue training than existing 30 CFR 49.8 requires and will train underground with apparatus at each mine where they provide a service.

The petitioner asserts that the alternative method will at all times provide the same measure of protection as the existing standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes the Mine Safety and Health Administration (MSHA) to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, Section 101(a) of the Mine Act, 30 U.S.C. 811 authorizes the Secretary to develop, promulgate, and

revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

MSHA issues certifications, qualifications and approvals to the nation's miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an "MSHA Individual Identification Number" (MIIN). MSHA uses this unique number in place of individual Social Security numbers (SSNs) for all MSHA collections. The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Qualification/Certification Program Request for MSHA Individual Identification Number (MIIN). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at USDOL–Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.
