SUPPLEMENTARY INFORMATION:

A. Purpose

Section 1334 of the Small Business Jobs and Credit Act of 2010 (Pub. L. 111-240) and the Small Business Administration's Final Rule at 78 FR 42391, Small Business Subcontracting, published on July 16, 2013, and effective August 15, 2013, requires the prime contractor to self-report to the contracting officer when the prime contractor makes late or reduced payments to small business subcontractors. In addition, the contracting officer is required to record the identity of contractors with a history of late or reduced payments to small business subcontractors in the Federal Awardee Performance and Integrity Information System (FAPIIS). FAR Part 42 is revised to include in the past performance evaluation reduced or untimely payments reported to the contracting officer by the prime contractor in accordance with the clause at 52.242-XX, Payments to Small Business Subcontractors, that are determined by the contracting officer to be unjustified.

A notice was published in the **Federal Register** at 81 FR 3087, on January 20, 2016, as part of a proposed rule under FAR Case 2014-004. Two comments were received on the information collection.

B. Discussion and Analysis

Comment: Two respondents stated that the Councils had underestimated the public burden in regards to the proposed rule. One respondent commented that the FAR Council has greatly underestimated the implementation burden on commercial item and COTS item contractors, especially considering the broad definition of "subcontractor" that

applies to the proposed rule. The other respondent believed that the estimate of reporting time of only two hours per respondent is grossly underestimated. This negligible amount of time assumes that all contractors can easily identify from their payment systems which subcontractors are small businesses. The respondent believed that this is often not the case, and that the small business size status of a subcontractor may be unknown to the contractor's other accounting systems. The other respondent commented that since the Small Business Jobs Act of 2010 does not specifically require that the subcontractor payment clause apply to commercial contracts, the respondent recommended that the FAR Council seek additional information about the burden on contractors before a determination is made to apply the payment of subcontractor requirements to commercial item acquisitions. The respondent did not find that the availability of limited information indicated that the burden may not be significant, as described in the proposed rule. Rather, initial feedback from contractors suggested that the burdens associated with reporting under the rule will have a significant impact.

Response: The respondents do not offer data with which to support changing the current estimated public burden hours. However, since this is a new rule without an empirical frame of reference, the public reporting burden is reviewed every three years and can be adjusted as necessary.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Food and Drug Administration

[Docket No. FDA-2016-D-1495]

Factors to Consider Regarding Benefit-Risk in Medical Device Product Availability, Compliance, and Enforcement Decisions; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the guidance entitled "Factors to Consider Regarding Benefit-Risk in Medical Device Product Availability, Compliance, and Enforcement Decisions." This guidance is intended to provide clarity for FDA staff and industry regarding the benefit and risk factors FDA may consider in prioritizing resources for compliance and enforcement efforts to maximize medical device quality and patient safety. Although product availability and other medical device compliance and enforcement decisions are generally fact-specific, FDA believes that explaining how we consider the factors listed in the guidance will improve the consistency and transparency of these kinds of decisions. A common understanding of how FDA considers benefit and risk may better align industry's and FDA's focus on actions that maximize benefit to patients, improve medical device quality, and reduce risk to patients. This guidance is in effect at this time.
