Application Details

1. *Applicant*, Permit Application: 2017-037, Daniel McGrath, Resident Scientist, Earth Vision Institute, 2334 Broadway St, Suite D, Boulder, CO 80304

Activity for Which Permit Is Requested

Waste management. The applicant requests a permit for waste management activities associated with the continued operation of a network of time-lapse cameras installed in the Antarctic Peninsula region. The applicant will continue to maintain up to 12 cameras (nine currently installed at five visitor sites) with no more than two cameras installed at any one site. Cameras are placed in such a way so as to not disrupt wildlife. Cameras are secured using 6-8 rock bolts drilled into rock outcrops. Each camera is powered by a 10w solar panel and a sealed 12 volt 55 AH gel battery. The batteries are housed in a leak proof plastic case. The cameras will remain deployed for an additional 4 years and will be completely removed (including bolts and power sources) at before the permit expires. Each camera is visited every 1-2 years to retrieve data, make necessary repairs, and remove non-functioning equipment. The Earth Vision Institute has an established collaboration with Lindblad Expeditions for installation and maintenance of the cameras. The cameras are used to

measure ice velocity and monitor the calving front of numerous outlet glaciers. The data will help advance scientific knowledge on the mechanics and pace of glacial retreat. Images gained from the cameras will also be used in global outreach campaigns to educate the public about the speed of climate change's impact on the earth.
