SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection from employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

A number of standards issued by OSHA contain requirements that specify employers use only equipment, products, or material tested or approved by a Nationally Recognized Testing Laboratory (NRTL). These requirements ensure that employers use safe and efficacious equipment, products, or materials in complying with the standards. Accordingly, OSHA promulgated its Program Regulation for Nationally Recognized Testing Laboratories, 29 CFR 1910.7 (the Regulation). The Regulation specifies procedures that organizations must follow to apply for, and to maintain,

OSHA's recognition to test and certify equipment, products, or material for safe use in the workplace.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

1. Whether the proposed information collection requirements are necessary and useful for the proper performance of the Agency's functions;

2. The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;

3. The quality, utility, and clarity of the information collected; and

4. Ways to minimize the burden on organizations that must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA proposes to revise the Office of Management and Budget's (OMB) approval of the collection of information requirements specified by the Regulation. In addition to extending its current approval by OMB, the Agency plans to implement a proposed fee schedule, see 80 FR 57222, Sept. 22, 2015. This proposed fee schedule would be based in part on proposed streamlined procedures for accepting and reviewing applications for NRTL recognition, expansion and renewal, and would contain revisions to the cost burden to respondents resulting from the collections of information required by the Regulation. The Agency also plans to obtain OMB approval for optional standardized forms to facilitate and simplify the information collection process as part of its information collection process. The optional forms correspond to the applications for initial, expansion of, and renewal of recognition procedures prescribed by the Regulation. Where practicable, the forms would provide for automations such as drop down lists to increase ease of use and reduce the information collection burden. The Agency expects the use of the optional standardized forms to marginally reduce the burden hours associated with these information collection requirements. The forms are included in a draft copy of the updated Directive on NRTL Program Policies, Procedures, and Guidelines, which has been attached to a Supporting Statement for the Information Collection Requirements of the Regulation. The Agency developed the Supporting Statement to outline the particulars of the collection of information proposed for approval by OMB. The Agency

requests a \$718,836 increase, resulting from a determination that the costs should be considered a cost to respondents rather than a cost to the Federal government, since respondents reimburse the Government for expenses related to this program. The Supporting Statement will be added to the docket (OSHA–2010–0007), and available at regulations.gov, once this Notice is published. The Agency will summarize the comments submitted in response to this Notice, and will include this summary in its request to OMB to revise the approval of these information collection requirements.

Type of Review: Revision of a currently approved information collection.
