SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Heart of Recovery—Military Caregiver Needs Assessment; OMB Control Number 0702-XXXX.

Needs and Uses: The information collection requirement is necessary to support the formation of the United States Army Office of the Surgeon General Military Caregivers Program: Heart of Recovery.

Affected Public: Individuals or Households.

Annual Burden Hours: 2,500.

Number of Respondents: 5,000.

Responses per Respondent: 1.

Annual Responses: 5,000.

Average Burden per Response: 30 minutes.

Frequency: On occasion.

This needs assessment seeks to identify the type(s) of support provided by caregivers; determine the level of burden experience by providing caregiver support; identify the health status of the caregiver population; determine services needed to provide caregiver support; and assess the need for caregiver support training. Respondents are military and/or civilian caregivers who provide unpaid care and assistance for, or manage the care of, someone who is an active-duty military member, Army National Guard, Army Reserve, or veteran that has been diagnosed with a service connected illness, injury, or impairment for which they require outside support. Data will be collected initially through an electronic questionnaire, followed by individual interviews conducted either in-person or telephonically. "Outside support" may include help with tasks such as personal care, bathing, dressing, feeding, giving medicines or treatments,

help with memory tasks for those identified with brain trauma, assistance in coping with symptoms of post-traumatic stress disorder (PTSD), transportation to doctors' appointments, or arranging for services. Caregivers are not required to be domiciled with the patient receiving care to be eligible for this study. Care and assistance are considered unpaid if they provide care or assistance without the receipt (or expectation of) financial compensation. Compiling, analyzing, and understanding the responses of the various perspectives of patient care is necessary to set a baseline of care and identify core competencies, services, and support required for providers, patients and family members providing, accepting, or supporting injured Army members.
