POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:
Computerized database stored behind several layers of firewalls configured with the firm policy of denying all and allow only by exception, electronic storage media, and paper records. All three mediums are retained in accordance with NOAA Records Disposition Handbook, Chapter 1404–02.

RETRIEVABILITY:
Records may be retrieved by unique beacon identification number, the name of beacon owner, date of submittal, vessel name, aircraft name, or aircraft tail number; however, records can be accessed by any file element or any combination thereof.

SAFEGUARDS:
Due to the sensitive information stored in the registration database, access has been granted only to a limited number of personnel in accordance with this system of records routine uses provision. This access comes in four different categories; beacon owners, system administrators, SAR users, and vessel/aircraft inspectors.

The beacon owner is granted access to his/her own registration information through the use of a user ID and an online password. Information can be accessed and updated by the beacon owner at any time.

The system administrator consists of personnel at the USMCC who maintains and operates the registration database. Access to records is through the use of a user ID and an online password.

The SAR user is limited to rescue coordination personnel responsible for SAR operations within internationally recognized SAR regions. Each SAR controller is issued a user ID and an online password. SAR controllers are given a view-only capability.

The vessel or aircraft inspector is an approved representative of a federal agency charged with inspecting vessels or aircraft which includes verifying that the emergency beacons carried onboard the vessel or aircraft are properly registered. Each inspector is issued a user ID and an online password. Inspectors are given a view-only capability.

Exceptions to the above categories can only be approved by the SARSAT Program Steering Group. Consideration for access to the database by a requesting individual/agency will be based in light of their overall contribution to the SAR mission versus balancing the individual beacon owner’s right to privacy.

RETENTION AND DISPOSAL:
NESDIS shall maintain its records in accordance with NOAA’s Records Management Guide and Records Disposition Handbook, Departmental directives, and comprehensive records schedules.

SYSTEM MANAGER(S) AND ADDRESS:
NOAA/SARSAT, NSOF E/SPO53, 1315 East West Highway, Silver Spring, MD 20910.

NOTIFICATION PROCEDURE:

In accordance with the Department of Commerce regulations implementing the Privacy Act, at Title 15 of the Code of Federal Regulations, part 4, subpart B—Privacy Act, individuals interested in determining if the system contains their name should direct their Privacy Act request to the National Oceanic and Atmospheric Administration, Public Reference Facility, OFA56, 1315 East West Highway (SSMC3), Room 10730, Silver Spring, Maryland 20910.

RECORD ACCESS PROCEDURES:
Individuals with information in the database have the ability to review and update their own individual information on the internet at http://www.beaconregistration.noaa.gov. User ID and user password are set-up with initial Web registration or with a first visit to the Web site.

CONTESTING RECORD PROCEDURES:
Individual beacon owners have access to their database file and have the ability to update or correct information. Other issues are addressed by the system manager who can be contacted at NOAA/SARSAT, NSOF E/SPO53, 1315 East West Highway, Silver Spring, MD 20910.

RECORD SOURCE CATEGORIES:
The individual on whom the record is maintained provides information to NOAA by either the Web site or mail. Existing registrations can be updated according to the above processes, by a phone call from the beacon owner, or by rescue coordination center controllers when updated information is collected while processing a case.

EXEMPTIONS CLAIMED FOR THE SYSTEM:
None.
