

BOEM determines the delay was caused by events beyond the provisionally winning bidder's control.

If the provisionally winning bidder does not meet these requirements or otherwise fails to comply with applicable regulations or the terms of the FSN, BOEM reserves the right not to issue the lease to that bidder. In such a case, the provisionally winning bidder will forfeit its bid deposit. In such an event, BOEM reserves the right to identify the next highest bid submitted during the lease sale and offer the lease pursuant to that bid.

Within 45 calendar days of the date that the provisionally winning bidder receives copies of the lease, it must pay the first year's rent using the *pay.gov* Renewable Energy Initial Rental Payment form available at: <https://www.pay.gov/public/form/start/27797604/>. Subsequent annual rent payments must be made following the detailed instructions contained in the "Instructions for Making Electronic Payments," available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>.

Non-Procurement Debarment and Suspension Regulations: Pursuant to regulations at 43 CFR part 42, subpart C, an OCS renewable energy lessee must comply with the Department of the Interior's non-procurement debarment and suspension regulations at 2 CFR 180 and 1400. The lessee must also communicate this requirement to persons with whom the lessee does business relating to this lease, by including this term as a condition in their contracts and other transactions.

Force Majeure: The Program Manager of BOEM's Office of Renewable Energy Programs has the discretion to change any auction details specified in the FSN, including the date and time, in case of a *force majeure* event that the Program Manager deems may interfere with a fair and proper lease sale process. Such events may include, but are not limited to: natural disasters (e.g., earthquakes, hurricanes, floods, blizzards), wars, riots, acts of terrorism, fire, strikes, civil disorder or other events of a similar nature. In case of such events, BOEM will notify all qualified bidders via email or phone, or through the BOEM Web site at: <http://www.boem.gov/Renewable-Energy-Program/index.aspx>. Bidders should call 703-787-1320 if they have concerns.

Appeals: The appeals procedures are provided in BOEM's regulations at 30 CFR 585.225 and 585.118(c). Pursuant to 30 CFR 585.225:

(a) If BOEM rejects your bid, BOEM will provide a written statement of the reasons and refund any money

deposited with your bid, without interest.

(b) You will then be able to ask the BOEM Director for reconsideration, in writing, within 15 business days of bid rejection, under 30 CFR 585.118(c)(1). We will send you a written response either affirming or reversing the rejection.

The procedures for appealing final decisions with respect to lease sales are described in 30 CFR 585.118(c).

Protection of Privileged or Confidential Information: BOEM will protect privileged or confidential information that you submit, as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to "trade secrets and commercial or financial information that you submit that is privileged or confidential." 5 U.S.C. 552(b)(4). If you wish to protect the confidentiality of such information, clearly mark it "Contains Privileged or Confidential Information" and consider submitting such information as a separate attachment. BOEM will not disclose such information, except as required by FOIA. Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release. Further, BOEM will not treat as confidential aggregate summaries of otherwise confidential information.

SUPPLEMENTARY INFORMATION:

I. Abstract

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Bureau of Reclamation (Reclamation) has obtained the services of an outside entity to survey water utilities and collect data on water pipeline performance. The information being collected is required to comply with a request from Congress for Reclamation to assemble data on pipeline reliability for specific types of pipes.

From 2013 through 2015, Reclamation worked with Water Research Foundation and Battelle Memorial Institute (Battelle) on a draft information collection request (ICR) to collect high-quality field performance data on pipeline reliability for water pipelines of different material and vintage. A **Federal Register** notice announcing the availability of this draft collection of this information was initiated on February 26, 2014 (79 FR 10842), offering the public a 60-day public comment period. A summary of comments received during the 60-day comment period, disposition of comments, and revised draft information collection were published in the **Federal Register** on October 1, 2014 (79 FR 59291) and the public comment period was reopened for another 30 days. In response to the public's request for additional time to comment, a third notice was published in the **Federal Register** on October 30, 2014 (79 FR 64622), extending the comment period another 30 days. In total, the public was provided 120 days to comment on the draft ICR. Also at the

public's request, all draft supporting documents were made available to the public for consideration. The contract between Reclamation and its partners was terminated in July 2015 before the ICR could be finalized.

Reclamation signed an agreement in November 2015 with Virginia Polytechnic Institute and State University (Virginia Tech) to develop a new ICR to collect buried water pipe performance data. The notice announcing the new draft ICR was published in the **Federal Register** on July 14, 2016 (81 FR 45533) to start the 60-day public comment period. The public comment period for this ICR ended on September 12, 2016. Information gathered from Reclamation's earlier attempt to develop an ICR to collect pipeline reliability data was incorporated into this current ICR.

II. Summary of Proposed Changes, Comments and Responses

Comments on this ICR were received from two entities. Responses to the public comments are addressed in Supporting Statement A of this ICR and are available for public review at www.reginfo.gov. Copies of the comments have also been uploaded at this same web address.
