

FEDERAL REGISTER

Vol. 82

Thursday,

No. 12

January 19, 2017

Book 1 of 3 Books

Pages 6167–6730

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—

Proclamation 9567 of January 12, 2017

The President

Establishment of the Reconstruction Era National Monument

By the President of the United States of America

A Proclamation

The Reconstruction Era, a period spanning the early Civil War years until the start of Jim Crow racial segregation in the 1890s, was a time of significant transformation in the United States, as the Nation grappled with the challenge of integrating millions of newly freed African Americans into its social, political, and economic life. It was in many ways the Nation's Second Founding, as Americans abolished slavery and struggled earnestly, if not always successfully, to build a nation of free and equal citizens. During Reconstruction, Congress passed the Thirteenth, Fourteenth, and Fifteenth constitutional amendments that abolished slavery, guaranteed due process and equal protection under the law, and gave all males the ability to vote by prohibiting voter discrimination based on race, color, or previous condition of servitude. Ultimately, the unmet promises of Reconstruction led to the modern civil rights movement a century later.

The Reconstruction Era began when the first United States soldiers arrived in slaveholding territories, and enslaved people on plantations and farms and in cities escaped from their owners and sought refuge with Union forces or in free states. This happened in November 1861 in the Sea Islands or "Lowcountry" of southeastern South Carolina, and Beaufort County in particular. Just seven months after the start of the Civil War, Admiral Samuel F. DuPont led a successful attack on Port Royal Sound and brought a swath of this South Carolina coast under Union control. The white residents (less than twenty percent of the population), including the wealthy owners of rice and cotton plantations, quickly abandoned their country plantations and their homes in the town of Beaufort as Union forces came ashore. More than 10,000 African Americans—about one-third of the enslaved population of the Sea Islands at the time—refused to flee the area with their owners.

Beaufort County became one of the first places in the United States where formerly enslaved people could begin integrating themselves into free society. While the Civil War raged in the background, Beaufort County became the birthplace of Reconstruction, or what historian Willie Lee Rose called a "rehearsal for Reconstruction." With Federal forces in charge of the Sea Islands, the Department of the Treasury, with the support of President Lincoln and the War Department, decided to turn the military occupation into a novel social experiment, known as the Port Royal Experiment, to help former slaves become self-sufficient. They enlisted antislavery and religious societies in the North to raise resources and recruit volunteers for the effort. Missionary organizations headquartered in the Northeast established outposts in Beaufort County.

In and around Beaufort County during Reconstruction, the first African Americans enlisted as soldiers, the first African American schools were founded, early efforts to distribute land to former slaves took place, and many of the Reconstruction Era's most significant African American politicians, including Robert Smalls, came to prominence. African American political influence and land ownership endured there long after setbacks in other regions. In short, events and people from Beaufort County illustrate

the most important challenges of Reconstruction—crucial questions related to land, labor, education, and politics after the destruction of slavery—and some early hopeful efforts to address them. The significant historical events that transpired in Beaufort County make it an ideal place to tell stories of experimentation, potential transformation, hope, accomplishment, and disappointment. In Beaufort County, including St. Helena Island, the town of Port Royal, and the city of Beaufort, many existing historic objects demonstrate the transformative effect of emancipation and Reconstruction.

Freed people hungered for education, as South Carolina had long forbidden teaching slaves to read and write. In 1862, Laura M. Towne and Ellen Murray from Pennsylvania were among the first northern teachers to arrive as part of the Port Royal Experiment. They established a partnership as educators at the Penn School on St. Helena Island that lasted for four decades. Charlotte Forten, a well-educated African American woman from a prominent abolitionist family in Philadelphia, joined the faculty later that year. The first classes for the former slaves were held at The Oaks plantation house, headquarters of the occupying U.S. military forces in the region. In 1863, Murray and Towne moved their school into Brick Church, a Baptist church near the center of the island. In the spring of 1864, supporters in Philadelphia purchased school buildings for Towne and Murray, and construction of Penn School began across the field from Brick Church on 50 acres of property donated by Hastings Gantt, an African American landowner.

Penn School helped many African Americans gain self-respect and self-reliance and integrate into free society. Towne and Murray strove to provide an education comparable to that offered in the best northern schools. The faculty also provided other support, including medical care, social services, and employment assistance. Penn School would evolve into the Penn Center in the 20th century, and remain a crucial place for education, community, and political organizing for decades to come. As a meeting place in the 1950s and 60s for civil rights leaders, including Dr. Martin Luther King, Jr., and the staff of the Southern Christian Leadership Conference, this historic place links the democratic aspirations of Reconstruction to those of the modern civil rights movement. Darrah Hall is the oldest standing structure on the site of the Penn School grounds. Students and community members built it around 1903, during the transition in the South from the Reconstruction Era to an era of racial segregation and political disenfranchisement.

The Brick Church where Towne and Murray held classes in 1863–64 is today the oldest church on St. Helena Island. Once freed from their owners, African Americans in Beaufort County wanted to worship in churches and join organizations they controlled. The Brick Church—also known as the Brick Baptist Church—was built by slaves in 1855 for the white planters on St. Helena Island. When the white population fled from the Sea Islands in 1861, the suddenly freed African Americans made the church their own. The Brick Church has been a place of worship and gathering ever since, and continues to serve the spiritual needs of the community to this day.

Camp Saxton in Port Royal—formerly the site of a plantation owned by John Joyner Smith—is where the First South Carolina Regiment Volunteers mustered into the U.S. Army and trained from November 1862 to January 1863. In August 1862, U.S. Brigadier General Rufus Saxton, the military governor of the abandoned plantations in the Department of the South, received permission to recruit five thousand African Americans, mostly former slaves, into the Union Army. The former slaves assumed that military service would lead to rights of citizenship. Saxton selected Captain Thomas Wentworth Higginson of the 51st Massachusetts, a former Unitarian minister, abolitionist, and human rights activist, to command the regiment. An important ally of Higginson and the African American troops was Harriet Tubman, the famed conductor on the Underground Railroad, who in May of 1862

arrived in Beaufort as part of the Port Royal Experiment and who served skillfully as a nurse at Camp Saxton.

Camp Saxton was also the location of elaborate and historic ceremonies on January 1, 1863, to announce and celebrate the issuance of the Emancipation Proclamation, which freed all slaves in states then “in rebellion” against the United States. General Saxton himself had attended church services at the Brick Church in the fall of 1862 to recruit troops and to invite everyone, African American and white, “to come to the camp . . . on New Year’s Day, and join in the grand celebration.” This Emancipation Proclamation celebration was particularly significant because it occurred in Union-occupied territory in the South where the provisions of the Proclamation would actually take effect before the end of the war.

Over five thousand people, including freed men, women, and children, Union military officials, guest speakers, and missionary teachers, gathered around the speakers’ platform built in a grove of live oaks near the Smith plantation house. One of the majestic witness trees has become known as the Emancipation Oak. Of all the prayers, hymns, and speeches during the three-hour ceremony, one of the most moving was the spontaneous singing of “My country, tis of thee; Sweet land of liberty” when the American flag was presented to Higginson. As part of the celebration, the military had prepared a feast of roasted oxen for all to enjoy.

The town of Beaufort was the center of the County’s social, political, cultural, and economic life during the Reconstruction Era. Before the Battle of Port Royal Sound in November 1861, Beaufort was where the planters spent the summer months in their grand homes. Beaufort served as the depot for plantation supplies transported there by steamship. The Old Beaufort Firehouse, built around 1912, stands near the heart of Reconstruction Era Beaufort, across the street from the Beaufort Arsenal, and within walking distance of over fifty historic places. The Beaufort Arsenal, the location today of the Beaufort History Museum, was built in 1799, rebuilt in 1852, and renovated by the Works Progress Administration in 1934, and served historically as the home of the Beaufort Volunteer Artillery Company that fought in the Revolutionary and Civil Wars.

Several historic Beaufort properties within walking distance of the Firehouse are associated with Robert Smalls, the most influential African American politician in South Carolina during the Reconstruction Era. Robert Smalls was born in Beaufort in 1839, the son of slaves of the Henry McKee family. When Smalls was twelve years old, his owner hired him out to work in Charleston, where he learned to sail, rig, and pilot ships. In May 1862, Smalls navigated the *CSS Planter*, a Confederate ship, through Charleston harbor, past the guns of Fort Sumter, and turned it over to Union forces. This courageous escape made him an instant hero for the Union, and he soon began working as a pilot for the U.S. Navy. Smalls and his family used prize money awarded for the *Planter* to purchase the house in Beaufort once owned by the family that had owned him.

In 1864, Smalls was named to a delegation of African American South Carolinians to the Republican National Convention in Baltimore, where the delegation unsuccessfully petitioned the party to make African American enfranchisement part of its platform. Elected to the Beaufort County School Board in 1867, Smalls began his advocacy for education as the key to African American success in the new political and economic order.

In the years immediately following the end of the Civil War, the United States fiercely debated issues critical to Reconstruction. Southern Democrats tried to regain the power they held before the Civil War. The Republican majorities in the U.S. Congress rebuffed them, and proceeded to pass legislation and constitutional amendments to implement the principles of the Union victory. In 1867, Congress passed the Military Reconstruction Acts that called for military administration of southern states and new state constitutions. Voters elected Robert Smalls as a delegate to the South Carolina Constitutional Convention that met in Charleston in January 1868, where

he successfully advocated for public education with compulsory attendance. The resulting constitution also provided for universal male suffrage and racial, political, and legal equality. In this new political order, Robert Smalls was elected to the South Carolina General Assembly from 1868 to 1874, first as a representative and then as a senator. In 1874, Smalls was elected to the U.S. House of Representatives, where he served five terms.

The success of Smalls and other African American lawmakers who had been enslaved only a handful of years before infuriated South Carolina's Democrats. Some of them turned to violence, carried out by the Ku Klux Klan and others. On more than one occasion, a homegrown vigilante group known as the Red Shirts terrorized Robert Smalls.

As a result of the contested Presidential and South Carolina gubernatorial elections of 1876, deals were made that effectively ended political and military Reconstruction in 1877. Smalls, however, continued to serve in Congress until 1886. He then returned to Beaufort, and served for many years as the Presidentially appointed customs collector for the Port of Beaufort.

In 1895, Smalls was elected a delegate to his second South Carolina Constitutional Convention. Twenty years after Democrats had regained control of the State government, they had figured out how to take back African Americans' rights as citizens. Smalls spoke eloquently at the Convention against this blow to democracy and representative government, but ultimately rights hard won three decades before were struck down. South Carolina voters ratified a new constitution that effectively eliminated African Americans from electoral politics and codified racial segregation in law for decades to come.

Even as Jim Crow laws and customs limited political participation and access to public accommodations, African Americans maintained visions of freedom and built strong community institutions. Ownership of land, access to education, and churches and civic organizations that took root during the Reconstruction Era laid the foundation for the modern civil rights movement.

The many objects of historic interest described above stand testament to the formative role of the Reconstruction Era—and the enormous contributions of those who made it possible—in our shared history.

WHEREAS, section 320301 of title 54, United States Code (known as the "Antiquities Act"), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Federal Government to be national monuments, and to reserve as a part thereof parcels of land, the limits of which shall be confined to the smallest area compatible with the proper care and management of the objects to be protected;

WHEREAS, the Beaufort National Historic Landmark District, which contains many objects of historic interest including the Old Beaufort Firehouse, was designated in 1973; and the Penn School National Historic Landmark District, which also contains many objects of historic interest including Darrah Hall and the Brick Baptist Church, was designated in 1974;

WHEREAS, the Camp Saxton Site was listed in the National Register of Historic Places in 1995;

WHEREAS, portions of the former Camp Saxton Site are located today on lands administered by the U.S. Department of the Navy at Naval Support Facility Beaufort, South Carolina;

WHEREAS, Penn Center, Inc., has donated to the United States fee title to Darrah Hall at Penn Center, St. Helena Island, South Carolina, with appurtenant easements, totaling approximately 3.78 acres of land and interests in land;

WHEREAS, Brick Baptist Church has donated to the United States a historic preservation easement in the Brick Baptist Church and associated cemetery located on St. Helena Island, South Carolina, an interest in land of approximately 0.84 acres;

WHEREAS, the Paul H. Keyserling Revocable Trust and Beaufort Works, LLC, have donated to the United States fee title to the Old Beaufort Firehouse at 706 Craven Street, Beaufort, South Carolina, approximately 0.08 acres of land;

WHEREAS, the designation of a national monument to be administered by the National Park Service would recognize the historic significance of Brick Baptist Church, Darrah Hall, Camp Saxton, and the Old Beaufort Firehouse, and provide a national platform for telling the story of Reconstruction;

WHEREAS, it is in the public interest to preserve and protect these sites;

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be the Reconstruction Era National Monument (monument) and, for the purpose of protecting those objects, reserve as a part thereof all lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is attached to and forms a part of this proclamation. The reserved Federal lands and interests in lands encompass approximately 15.56 acres. The boundaries described on the accompanying map are confined to the smallest area compatible with the proper care and management of the objects to be protected.

All Federal lands and interests in lands within the boundaries described on the accompanying map are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, or other disposition under the public land laws, from location, entry, and patent under the mining laws, and from disposition under all laws relating to mineral and geothermal leasing.

The establishment of the monument is subject to valid existing rights. If the Federal Government acquires any lands or interests in lands not owned or controlled by the Federal Government within the boundaries described on the accompanying map, such lands and interests in lands shall be reserved as a part of the monument, and objects identified above that are situated upon those lands and interests in lands shall be part of the monument, upon acquisition of ownership or control by the Federal Government.

The Secretary of the Interior shall manage the monument through the National Park Service, pursuant to applicable legal authorities, consistent with the purposes and provisions of this proclamation. The Secretary of the Interior shall prepare a management plan within 3 years of the date of this proclamation, with full public involvement, and to include coordination with Penn Center, Inc., Brick Baptist Church, the Department of the Navy, Atlantic Marine Corps Communities, LLC, the City of Beaufort, and the Town of Port Royal. The management plan shall ensure that the monument fulfills the following purposes for the benefit of present and future generations: (1) to preserve and protect the objects of historic interest associated with the monument, and (2) to interpret the objects, resources, and values related to the Reconstruction Era. The management plan shall, among other things, set forth the desired relationship of the monument to other related resources, programs, and organizations, both within and outside the National Park System.

The Secretary of the Navy, or the Secretary of the Navy's designee, shall continue to have management authority over Department of the Navy lands within the monument boundary at the Camp Saxton site, including the authority to control access to these lands. The Secretaries of the Navy

and the Interior shall enter into a memorandum of agreement that identifies and assigns the responsibilities of each agency related to such lands, the implementing actions required of each agency, and the processes for resolving interagency disputes.

The National Park Service is directed to use applicable authorities to seek to enter into agreements with others to address common interests and promote management efficiencies, including provision of visitor services, interpretation and education, establishment and care of museum collections, and preservation of historic objects.

Given the location of portions of the monument on an operating military facility, the following provisions concern U.S. Armed Forces actions by a Military Department, including those carried out by the United States Coast Guard:

1. Nothing in this Proclamation precludes the activities and training of the Armed Forces; however, they shall be carried out in a manner consistent with the care and management of the objects to the extent practicable.

2. In the event of threatened or actual destruction of, loss of, or injury to a monument resource or quality resulting from an incident caused by a component of the Department of Defense or any other Federal agency, the appropriate Secretary or agency head shall promptly coordinate with the Secretary of the Interior for the purpose of taking appropriate action to respond to and mitigate the harm and, if possible, restore or replace the monument resource or quality.

3. Nothing in this proclamation or any regulation implementing it shall limit or otherwise affect the U.S. Armed Forces' discretion to use, maintain, improve, or manage any real property under the administrative control of a Military Department or otherwise limit the availability of such real property for military mission purposes.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the monument shall be the dominant reservation.

Nothing in this proclamation shall be construed to alter the authority or responsibility of any party with respect to emergency response activities within the monument.

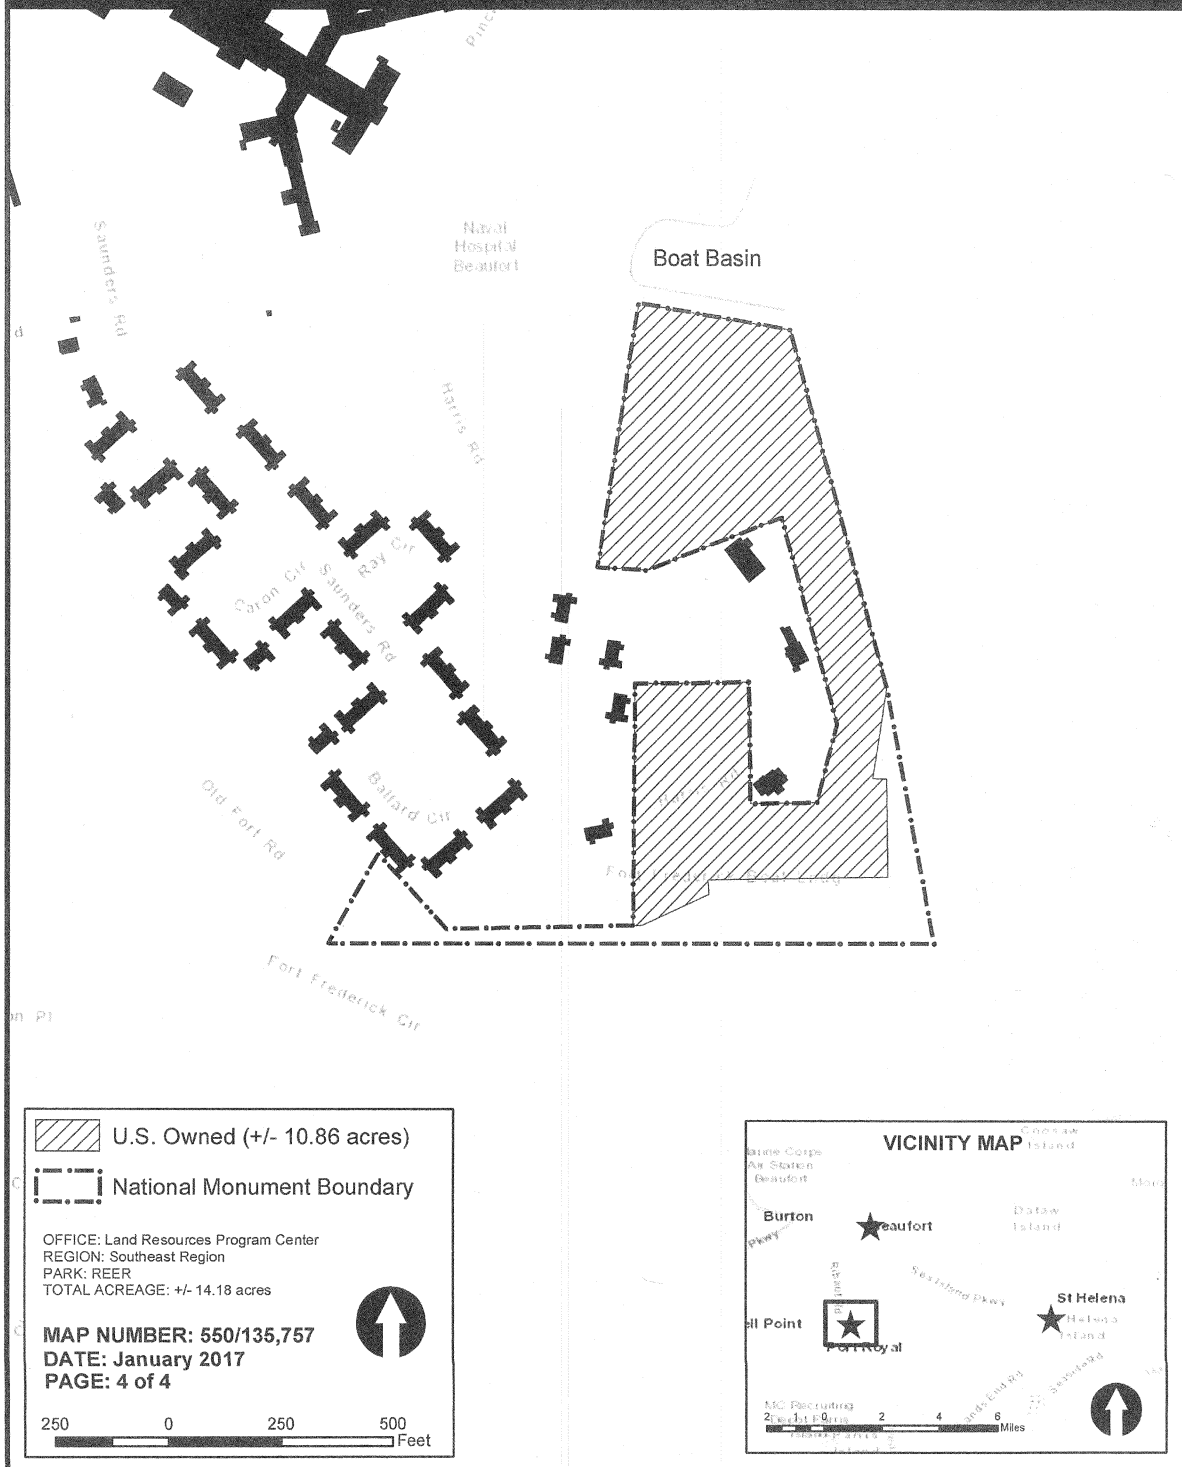

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of January, in the year of our Lord two thousand seventeen, and of the Independence of the United States of America the two hundred and forty-first.

A handwritten signature in black ink, appearing to be "Donald Trump", with a large circular flourish and a vertical line through it.

Memorandum of January 12, 2017

Promoting Diversity and Inclusion in Our National Parks, National Forests, and Other Public Lands and Waters

Memorandum for the Heads of Executive Departments and Agencies

Our Federal lands and waters are among our Nation's greatest treasures—from our National Parks and National Forests, to our wild and scenic rivers, recreation areas, and other public lands and waters. These natural and historic sites give us fresh air and clean water, places for recreation and inspiration, and support for our local communities and economies. As a powerful sign of our democratic ideals, these lands belong to all Americans—rich and poor, urban and rural, young and old, from all backgrounds, genders, cultures, religious viewpoints, and walks of life.

Our public lands and waters are treasured in part because they tell the story of our Nation. They preserve the history from our Nation's wars, protect cultural sites considered sacred to countless Americans, and honor the accomplishments of distinctly American leaders ranging from Harriet Tubman to Abraham Lincoln to Cesar Chavez. I am proud that my Administration has greatly expanded the stories that our protected public lands and waters tell about our Nation through designating a diverse collection of cultural and historic sites as new parks and monuments and by restoring the Koyukon Athabascan name of Denali to the tallest mountain in North America. I am proud, too, that my Administration has sought to expand access to our public lands and waters and to make them more welcoming to all Americans, especially those who have not regularly visited our Nation's great outdoors or had the means to do so easily. Initiatives like "Every Kid in a Park" complement additional, ongoing efforts by Federal agencies to improve accessibility, but more work must be done to honor the promise and opportunity of the idea that our public lands belong to every American. Over the last 8 years, Federal land and water management agencies have also shown a renewed commitment to promoting equal opportunity for all employees and in creating work environments where everyone is empowered to reach their full potential.

The purpose of this memorandum is to ensure that all Americans have the opportunity to experience and enjoy our public lands and waters, that all segments of the population have the chance to engage in decisions about how our lands and waters are managed, and that our Federal workforce—not just the sites it manages—is drawn from the rich range of the diversity in our Nation. In this memorandum, "diversity" refers to a range of characteristics including national origin, language, race, color, disability, ethnicity, age, religion, sexual orientation, gender (including gender identity), socioeconomic status, veteran status, and family structure. The term "inclusion" refers to a culture that connects each employee to the organization; encourages collaboration, flexibility, and fairness; and promotes diversity throughout the organization so that all individuals have opportunities to participate and contribute to their full potential.

This memorandum is directed at the Department of the Interior, the U.S. Forest Service, the Office of the Assistant Secretary of the Army for Civil Works, and the National Oceanic and Atmospheric Administration (covered agencies).

Promoting diversity and inclusion is not the sole responsibility of one office within a Federal agency but a joint effort that requires engagement by senior leadership and the entire workforce. In implementing the guidance in this memorandum, each covered agency shall ensure its diversity and inclusion practices are fully integrated into broader planning efforts and supported by sufficient resource allocations and effective programs that promote a wide range of investments in personnel development, public engagement, and opportunities for inclusive access.

Therefore, by the authority vested in me as President by the Constitution and the laws of the United States of America, I hereby direct the following:

Section 1. *Diversity and Inclusion in the Federal Workforce.* The quality and integrity of our National Parks, National Forests, and other public lands and waters depend on the public servants who steward them for the benefit of current and future generations. To ensure we are managing these resources responsibly, we must have a diverse and inclusive Federal workforce practicing public land management that recognizes the challenges facing communities across the Nation. A more diverse and inclusive Federal workforce also creates a more welcoming experience for all Americans, no matter their background or where they live, and encourages engagement with Federal agencies on the management and future of our public lands and waters. Consistent with existing authorities, each covered agency shall prioritize building a more diverse and inclusive Federal workforce reflective of our Nation and its citizens.

Federal agencies are subject to existing authorities aimed at addressing the leadership role and obligations of the Federal Government as an employer. For example, Executive Order 13583 of August 18, 2011 (Establishing a Coordinated Government-wide Initiative to Promote Diversity and Inclusion in the Federal Workforce), requires Federal agencies to take action to promote equal opportunity, diversity, and inclusion in the Federal workforce. Federal agencies also are required by section 717 of title VII of the Civil Rights Act of 1964 to take proactive steps to ensure equal opportunity for all Federal employees and applicants for Federal employment. This memorandum directs each of the covered agencies to pursue additional actions that create and maintain a diverse and inclusive Federal workforce. Toward that end, each covered agency shall integrate the following activities in its efforts to comply with related statutory mandates, Executive Orders, regulatory requirements, and individual agency policies:

(a) Provide professional development opportunities and tools. A diverse and inclusive work environment enhances the ability of each covered agency to create, retain, and sustain a strong workforce by allowing all employees to perform to their full potential and talent. Professional development opportunities and tools are key to fostering that potential, and ensuring that all employees have access to them should be a priority for all agencies, consistent with merit system principles. Accordingly, each covered agency shall:

- (i) Develop a mechanism to conduct periodic interviews with a voluntary representative cross-section of its workforce to gain a more complete understanding of the reasons that employees choose to stay with their organizations, as well as to receive feedback on workplace policies, professional development opportunities, and other issues;
- (ii) Provide optional exit interviews or surveys for all departing personnel;
- (iii) Collect information as needed to identify methods for attracting applicants to Federal employment and retaining diverse workplace talent through existing workforce programs and initiatives;
- (iv) Prioritize resources, as appropriate, to expand professional development opportunities that support mission needs, such as academic and fellowship programs, private-public exchanges, and detail assignments to private or international organizations, State, local and tribal governments, or other branches of the Federal Government;

(v) Offer, or sponsor employees to participate in, a Senior Executive Service Candidate Development Program or other program that trains employees to gain the skills required for senior-level appointments. Each covered agency shall consider the number of expected senior-level vacancies as one factor in determining the number of candidates to select for such programs. In the selection process for these programs, each covered agency shall consider redacting personal information, including applicant names, from all materials provided for review to reduce the potential for unconscious bias. Each covered agency also shall evaluate on a retroactive basis the placement rate of program graduates into senior-level positions, including available demographic data, on an annual basis to look for ways to improve outreach and recruitment for these programs consistent with merit system principles. Each covered agency shall consult with the Office of Personnel Management (OPM) on the development or enhancement of data-collection tools to conduct these evaluations; and

(vi) Seek additional opportunities for the development and implementation of upward mobility programs.

(b) Strengthen leadership engagement and accountability. Senior leadership and supervisors play an important role in fostering diversity and inclusion in the workforce they lead and setting an example for cultivating this and future generations of talent. Toward that end, each covered agency shall:

(i) Reward and recognize efforts to promote diversity and inclusion in the workforce. Consistent with merit system principles, each covered agency is strongly encouraged to consider implementing performance and advancement requirements that reward and recognize senior leaders' and supervisors' success in fostering diverse and inclusive workplace environments and in cultivating talent, such as through participation in mentoring programs or sponsorship initiatives, recruitment events, and other opportunities. Each covered agency also is encouraged to identify opportunities for senior leadership and supervisors to participate in outreach events and discuss issues related to promoting diversity and inclusion in its workforce on a regular basis with support from any existing employee resource group, as appropriate; and

(ii) Expand training on unconscious bias, diversity and inclusion, and flexible work policies. Each covered agency shall expand its provision of training on unconscious bias, diversity and inclusion, and flexible work policies and make unconscious bias training mandatory for senior leadership and management positions, including for employees responsible for outreach, recruitment, hiring, career development, promotion, and law enforcement. The provision of training may be implemented in a phased approach commensurate with agency resources. Each covered agency shall also make available training on a 2-year cycle for bureaus, directorates, or divisions for which inclusion scores, such as those measured by the New IQ index, demonstrate no improvement since the previous training cycle. Special attention should be given to ensure the continuous incorporation of research-based best practices, including those to address the relationship between certain demographics and job positions.

(c) Analyze existing data and identify opportunities for improvement. Each covered agency shall continue to evaluate and eliminate existing barriers to the successful growth of diversity and inclusion in the Federal workplace. The following actions shall be taken to ensure continued progress on this issue:

(i) Each covered agency shall integrate the activities described under subsections (a) and (b) of this section in the priorities and actions outlined in Executive Order 13583 and the periodic agency self-assessments and barrier analyses required by Equal Employment Opportunity Commission Management Directive 715, and shall make such assessments and analyses publicly available;

(ii) Human resources and any appropriate diversity and leadership staff from each of the covered agencies shall meet at least twice each year

with agency leadership to discuss actions pursued under sections 1(a) and 1(b) of this memorandum, including working to identify and eliminate barriers to promoting diversity and inclusion in agency workforces and to discuss potential actions to improve hiring programs, recruitment, and workforce training and development. Where data gaps are identified, each covered agency is encouraged to collect additional information as needed in order to identify methods for attracting and retaining talent from diverse populations, with particular attention to senior and management positions. Each covered agency shall consult with OPM on the development or enhancement of data-collection tools to collect this information; and

(iii) OPM shall continue to review covered agency-specific diversity and inclusion plans and provide recommended modifications for agency consideration, including recommendations on strategies to promote diversity and inclusion in agency workforces and potential improvements to the use of existing agency hiring authorities.

Sec. 2. *Enhancing Opportunities for all Americans to Experience Public Lands and Waters.* (a) Recognizing that our public lands belong to all Americans, it is critical that all Americans can experience Federal lands and waters and the benefits they provide, and that diverse populations are able to provide input to inform the management and stewardship of these important resources. In order to achieve this goal, each covered agency shall:

(i) Identify site-specific opportunities. As each covered agency periodically updates or develops new management plans for its lands and waters, it shall evaluate specific barriers and opportunities, as appropriate, to improve visitation, access, and recreational opportunities for diverse populations;

(ii) Update policies to ensure engagement with diverse constituencies. As policy manuals and handbooks are updated, each covered agency shall ensure that these materials reflect the importance of engaging with diverse populations in resource protection, land and water management, and program planning and decisionmaking, as appropriate;

(iii) Establish internal policies for recipients of Federal funding. Each covered agency shall ensure that State, local, tribal, and private sector recipients of Federal funding are taking action to improve visitation, access, and recreational opportunities for diverse populations;

(iv) Identify public liaisons. Within 90 days of the issuance of this memorandum, each covered agency shall identify multiple public liaisons with a diversity of backgrounds and perspectives to be charged with facilitating input from and engaging with diverse populations in land and water management processes;

(v) Identify opportunities on advisory councils and stakeholder committees. Within 120 days of the issuance of this memorandum, each covered agency shall identify opportunities to promote participation by diverse populations in advisory councils and stakeholder committees established to support public land or water management; environmental, public health, or energy development planning; and other relevant decisionmaking; and

(vi) Develop an action plan. Within 1 year of the issuance of this memorandum, each covered agency shall provide a publicly available action plan to the Chair of the White House Council on Environmental Quality identifying specific actions the agency will take to 1) improve access for diverse populations—particularly for minority, low-income, and disabled populations and tribal communities—to experience and enjoy our Federal lands and waters, and 2) address barriers to their participation in the protection and management of important historic, cultural, or natural areas. Each covered agency shall identify in its action plan any critical barriers to achieving both of these goals. This barrier evaluation should draw on internal staff input as well as external perspectives, including interviews, surveys, and engagement with non-governmental entities, as

appropriate and as resources allow. Each action plan should include specific steps that the covered agency will take to address identified barriers, including national as well as regional strategies, and, where appropriate, site-specific initiatives. Each covered agency should work through the Federal Recreation Council (FRC) to assist with the development of this action plan and use the FRC to share best practices and recommendations regarding specific programs and initiatives.

(b) In identifying actions to improve opportunities for all Americans to experience our Federal lands and waters, each covered agency should consider a range of actions including the following:

(i) Conducting active outreach to diverse populations—particularly minority, low-income, and disabled populations and tribal communities—to increase awareness about specific programs and opportunities;

(ii) Focusing on the mentoring of new environmental, outdoor recreation, and preservation leaders to increase diverse representation in these areas and on our public lands;

(iii) Forging new partnerships with State, local, tribal, private, and non-profit partners to expand access for diverse populations, particularly those in the immediate vicinity of a protected area;

(iv) Identifying and making improvements to existing programs to increase visitation and access by diverse populations—particularly minority, low-income, and disabled populations and tribal communities;

(v) Creating new programs, especially those that could address certain gaps that are identified;

(vi) Expanding the use of multilingual and culturally appropriate materials, including American Sign Language, in public communications and educational strategies, including through social media strategies, as appropriate, that target diverse populations;

(vii) Continuing coordinated, interagency efforts to promote youth engagement and empowerment, including fostering new partnerships with diversity- and youth-serving organizations and new partnerships with urban areas and programs; and

(viii) Identifying possible staff liaisons to diverse populations, particularly those in the immediate vicinity of a given protected area.

(c) In identifying actions to improve opportunities for all Americans to participate in the protection and management of important historic, cultural, and natural areas, each covered agency shall consider a range of actions including the following:

(i) Considering recommendations and proposals from diverse populations to protect at-risk historic, cultural, and natural sites;

(ii) Improving the availability and distribution of relevant information about ongoing land and water management planning and policy revisions;

(iii) Identifying agency staff charged with outreach to diverse populations;

(iv) Identifying opportunities to facilitate public participation from interested diverse populations facing financial barriers, including through partnerships, where appropriate, with philanthropic organizations and tribal, State, and local governments; and

(v) Taking other actions to increase opportunities for diverse populations to provide input and recommendations on protecting, improving access to, or otherwise managing important historic, cultural, or natural areas, with an emphasis on stakeholders facing significant barriers to participation.

Sec. 3. General Provisions. (a) Nothing in this memorandum shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof, or the status of that department or agency within the Federal Government; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This memorandum shall be implemented consistent with applicable law, and subject to the availability of appropriations.

(c) The Secretary of the Interior is hereby authorized and directed to publish this memorandum in the *Federal Register*.

Notice of January 13, 2017

Continuation of the National Emergency With Respect to Cuba and of the Emergency Authority Relating to the Regulation of the Anchorage and Movement of Vessels

On February 25, 2016, by Proclamation 9398, the national emergency with respect to Cuba was modified and continued to reflect the re-establishment of diplomatic relations between the United States and Cuba. The unauthorized entry of any U.S.-registered vessel into Cuban territorial waters continues to be detrimental to the foreign policy of the United States. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Cuba and the emergency authority relating to the regulation of the anchorage and movement of vessels set out in Proclamation 6867 as amended by Proclamation 7757 and as further modified by Proclamation 9398.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Presidential Documents

Notice of January 13, 2017

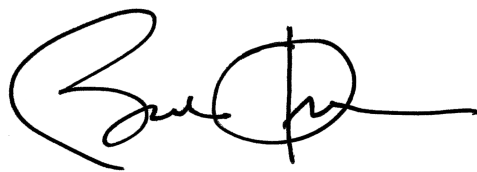

Continuation of the National Emergency With Respect to Iran

On March 15, 1995, by Executive Order 12957, the President declared a national emergency with respect to Iran to deal with the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States constituted by the actions and policies of the Government of Iran. On May 6, 1995, the President issued Executive Order (E.O.) 12959, imposing more comprehensive sanctions on Iran to further respond to this threat. On August 19, 1997, the President issued E.O. 13059, consolidating and clarifying the previous orders. I took additional steps pursuant to this national emergency in E.O. 13553 of September 28, 2010, E.O. 13574 of May 23, 2011, E.O. 13590 of November 20, 2011, E.O. 13599 of February 5, 2012, E.O. 13606 of April 22, 2012, E.O. 13608 of May 1, 2012, E.O. 13622 of July 30, 2012, E.O. 13628 of October 9, 2012, and E.O. 13645 of June 3, 2013.

On July 14, 2015, the P5+1 (China, France, Germany, Russia, the United Kingdom, and the United States), the European Union, and Iran reached a Joint Comprehensive Plan of Action (JCPOA) to ensure that Iran's nuclear program is and will remain exclusively peaceful. January 16, 2016, marked Implementation Day under the JCPOA, when the International Atomic Energy Agency (IAEA) issued a report verifying that Iran had completed key nuclear-related steps as specified in the JCPOA, and the Secretary of State confirmed the report's findings. As a result, the United States lifted nuclear-related sanctions on Iran consistent with its commitments under the JCPOA, including the termination of a number of Executive Orders that were issued pursuant to this national emergency. While nuclear-related sanctions were lifted pursuant to our JCPOA commitments, a number of non-nuclear sanctions remain in place.

Since Implementation Day, the IAEA has repeatedly verified, and the Secretary of State has confirmed, that Iran continues to meet its nuclear commitments pursuant to the JCPOA. However, irrespective of the JCPOA, which continues to ensure that Iran's nuclear program is and remains exclusively peaceful, certain actions and policies of the Government of Iran continue to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States. For this reason, the national emergency declared on March 15, 1995, must continue in effect beyond March 15, 2017. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency with respect to Iran declared in E.O. 12957. The emergency declared by E.O. 12957 constitutes an emergency separate from that declared on November 14, 1979, by E.O. 12170. This renewal, therefore, is distinct from the emergency renewal of November 2016.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Notice of January 13, 2017

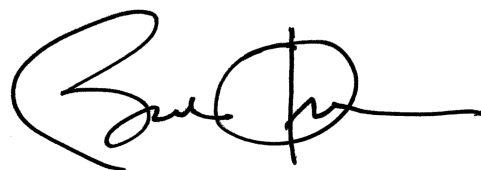

Continuation of the National Emergency With Respect to Libya

On February 25, 2011, by Executive Order 13566, I declared a national emergency pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the actions of Colonel Muammar Qadhafi, his government, and close associates, who took extreme measures against the people of Libya, including by using weapons of war, mercenaries, and wanton violence against unarmed civilians. In addition, there was a serious risk that Libyan state assets would be misappropriated by Qadhafi, members of his government, members of his family, or his close associates if those assets were not protected. The foregoing circumstances, the prolonged attacks, and the increased numbers of Libyans seeking refuge in other countries caused a deterioration in the security of Libya and posed a serious risk to its stability.

The situation in Libya continues to pose an unusual and extraordinary threat to the national security and foreign policy of the United States, and we need to protect against the diversion of assets or other abuse by certain members of Qadhafi's family and other former regime officials.

For this reason, the national emergency declared on February 25, 2011, must continue in effect beyond February 25, 2017. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 13566.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

THE WHITE HOUSE,
January 13, 2017.

Notice of January 13, 2017

Continuation of the National Emergency With Respect to Ukraine

On March 6, 2014, by Executive Order 13660, I declared a national emergency pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the actions and policies of persons that undermine democratic processes and institutions in Ukraine; threaten its peace, security, stability, sovereignty, and territorial integrity; and contribute to the misappropriation of its assets.

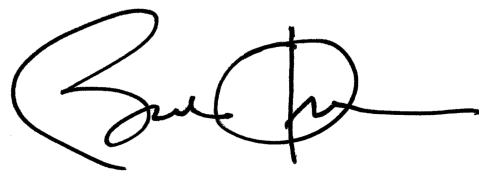

On March 16, 2014, I issued Executive Order 13661, which expanded the scope of the national emergency declared in Executive Order 13660, and found that the actions and policies of the Government of the Russian Federation with respect to Ukraine undermine democratic processes and institutions in Ukraine; threaten its peace, security, stability, sovereignty, and territorial integrity; and contribute to the misappropriation of its assets.

On March 20, 2014, I issued Executive Order 13662, which further expanded the scope of the national emergency declared in Executive Order 13660, as expanded in scope in Executive Order 13661, and found that the actions and policies of the Government of the Russian Federation, including its purported annexation of Crimea and its use of force in Ukraine, continue to undermine democratic processes and institutions in Ukraine; threaten its peace, security, stability, sovereignty, and territorial integrity; and contribute to the misappropriation of its assets.

On December 19, 2014, I issued Executive Order 13685, to take additional steps to address the Russian occupation of the Crimea region of Ukraine.

The actions and policies addressed in these Executive Orders continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. For this reason, the national emergency declared on March 6, 2014, and the measures adopted on that date, on March 16, 2014, on March 20, 2014, and on December 19, 2014, to deal with that emergency, must continue in effect beyond March 6, 2017. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 13660.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Notice of January 13, 2017

Continuation of the National Emergency With Respect to Venezuela

On March 8, 2015, I issued Executive Order 13692, declaring a national emergency with respect to the situation in Venezuela, including the Government of Venezuela's erosion of human rights guarantees, persecution of political opponents, curtailment of press freedoms, use of violence and human rights violations and abuses in response to antigovernment protests, and arbitrary arrest and detention of antigovernment protestors, as well as the exacerbating presence of significant government corruption. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 13692.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Notice of January 13, 2017

Continuation of the National Emergency With Respect to Zimbabwe

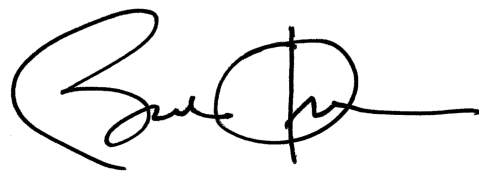

On March 6, 2003, by Executive Order 13288, the President declared a national emergency and blocked the property of certain persons, pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706), to deal with the unusual and extraordinary threat to the foreign policy of the United States constituted by the actions and policies of certain members of the Government of Zimbabwe and other persons to undermine Zimbabwe's democratic processes or institutions. These actions and policies had contributed to the deliberate breakdown in the rule of law in Zimbabwe, to politically motivated violence and intimidation in that country, and to political and economic instability in the southern African region.

On November 22, 2005, the President issued Executive Order 13391 to take additional steps with respect to the national emergency declared in Executive Order 13288 by ordering the blocking of the property of additional persons undermining democratic processes or institutions in Zimbabwe.

On July 25, 2008, the President issued Executive Order 13469, which expanded the scope of the national emergency declared in Executive Order 13288 and authorized the blocking of the property of additional persons undermining democratic processes or institutions in Zimbabwe.

The actions and policies of these persons continue to pose an unusual and extraordinary threat to the foreign policy of the United States. For this reason, the national emergency declared on March 6, 2003, and the measures adopted on that date, on November 22, 2005, and on July 25, 2008, to deal with that emergency, must continue in effect beyond March 6, 2017. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 13288.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Rules and Regulations

Federal Register

Vol. 82, No. 12

Thursday, January 19, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206-AN40

Prevailing Rate Systems; Definition of Kent County, Michigan, and Cameron County, Texas, to Nonappropriated Fund Federal Wage System Wage Areas

AGENCY: U.S. Office of Personnel Management.

ACTION: Final rule.

SUMMARY: This rule amends the geographic boundaries of two nonappropriated fund (NAF) Federal Wage System (FWS) wage areas. Based on recommendations of the Federal Prevailing Rate Advisory Committee (FPRAC), the U.S. Office of Personnel Management (OPM) is defining Kent County, Michigan, as an area of application county to the Macomb, MI, NAF FWS wage area and Cameron County, Texas, as an area of application county to the Nueces, TX, NAF FWS wage area. These changes are necessary due to NAF FWS employees working in Kent and Cameron Counties, and the counties are not currently defined to NAF wage areas.

DATES: *Effective date:* This regulation is effective on January 19, 2017.

Applicability date: This change applies on the first day of the first applicable pay period beginning on or after February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Madeline Gonzalez, by telephone at (202) 606-2858 or by email at pay-leave-policy@opm.gov.

SUPPLEMENTARY INFORMATION: On August 24, 2016, OPM issued a proposed rule (81 FR 57809) to define Kent County, Michigan, as an area of application county to the Macomb, MI, NAF FWS wage area and Cameron County, Texas,

as an area of application county to the Nueces, TX, NAF FWS wage area.

FPRAC, the national labor-management committee responsible for advising OPM on matters concerning the pay of FWS employees, reviewed and recommended this change by consensus.

The proposed rule had a 30-day comment period, during which OPM received no comments.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

7 CFR Part 331

9 CFR Part 121

[Docket No. APHIS-2014-0095]

RIN 0579-AE08

Agricultural Bioterrorism Protection Act of 2002; Biennial Review and Republication of the Select Agent and Toxin List; Amendments to the Select Agent and Toxin Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: In accordance with the Agricultural Bioterrorism Protection Act of 2002, we are amending and republishing the list of select agents and toxins that have the potential to pose a severe threat to animal or plant health, or to animal or plant products. The Act

requires the biennial review and republication of the list of select agents and toxins and the revision of the list as necessary. This action will amend the regulations in several ways, including the addition of provisions to address the inactivation of select agents, provisions addressing biocontainment and biosafety, and clarification of regulatory language concerning security, training, incident response, and records. These changes will increase the usability of the select agent regulations as well as providing for enhanced program oversight. After carefully considering the technical input of subject matter experts and recommendations from Federal advisory groups, we have decided not to finalize the proposed changes to the contents of the list of select agents and toxins at this time. In a companion document published in this issue of the **Federal Register**, the Centers for Disease Control and Prevention has made parallel regulatory changes.

DATES: Effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Freeda Isaac, National Director, Agriculture Select Agent Services, APHIS, 4700 River Road, Unit 2, Riverdale, MD 20737–1231; (301) 851–3300, Option 3.

SUPPLEMENTARY INFORMATION:

Background

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (referred to below as the Bioterrorism Response Act) provides for the regulation of certain biological agents that have the potential to pose a severe threat to both human and animal health, to animal health, to plant health, or to animal plant health, or to animal and plant products. The Animal and Plant Health Inspection Service (APHIS) has the primary responsibility for implementing the provisions of the Act within the United States Department of Agriculture (USDA). Veterinary Services (VS) select agents and toxins are those that have been determined to have the potential to pose a severe threat to animal health or animal products. Plant Protection and Quarantine (PPQ) select agents and toxins are those that have the potential to pose a severe threat to plant health or plant products. Overlap select agents and toxins are those that have been determined to pose a severe threat to both human and animal health or to human health and animal products. Overlap select agents are subject to regulation by both APHIS and the Centers for Disease Control and Prevention (CDC), which has the

primary responsibility for implementing the provisions of the Bioterrorism Response Act for the Department of Health and Human Services (HHS).

Subtitle B (which is cited as the “Agricultural Bioterrorism Protection Act of 2002” and referred to below as the Act), section 212(a), provides, in part, that the Secretary of Agriculture (the Secretary) must establish by regulation a list of each biological agent and each toxin that the Secretary determines has the potential to pose a severe threat to animal or plant health, or to animal or plant products. Paragraph (a)(2) of section 212 requires the Secretary to review and republish the list every 2 years and to revise the list as necessary. In this document, we are amending and republishing the list of select agents and toxins based on the findings of our fourth biennial review of the list.

In determining whether to include an agent or toxin on the list, the Act requires that the following criteria be considered:

- The effect of exposure to the agent or the toxin on animal and plant health, and on the production and marketability of animal or plant products;
- The pathogenicity of the agent or the toxin and the methods by which the agent or toxin is transferred to animals or plants;
- The availability and effectiveness of pharmacotherapies and prophylaxis to treat and prevent any illness caused by the agent or toxin; and
- Any other criteria that the Secretary considers appropriate to protect animal or plant health, or animal or plant products.

We use the term “select agents and toxins” throughout the preamble of this rule. Unless otherwise specified, the term “select agents and toxins” will refer to all agents or toxins listed by APHIS. When it is necessary to specify the type of select agent or toxin, we will use the following terms: “PPQ select agents and toxins” (for the plant agents and toxins listed in 7 CFR 331.3), “VS select agents and toxins” (for the animal agents and toxins listed in 9 CFR 121.3), or “overlap select agents and toxins” (for the overlap agents and toxins listed in both 9 CFR 121.4 and 42 CFR 73.4).

On January 19, 2016, we published in the **Federal Register** (81 FR 2762–2774, Docket No. APHIS–2014–0095) a proposal¹ to amend and republish the list of select agents and toxins that have the potential to pose a severe threat to animal or plant health, or to animal or

plant products, and amend the regulations in order to add definitions and clarify language concerning security, training, biosafety, biocontainment, and incident response.

We solicited comments concerning our proposal for 60 days ending March 21, 2016. We received 24 comments by that date. They were from researchers, scientific organizations, industry groups, laboratories, and universities. Eighteen were supportive of the proposed action. The remaining six comments are discussed below by topic.

Removal of Select Agents and Toxins

We proposed to amend the list of PPQ select agents and toxins listed in 7 CFR 331.3 by removing three PPQ select agents and toxins from the list: *Peronosclerospora philippinensis* (*Peronosclerospora sacchari*), *Sclerophthora rayssiae*, and *Phoma glycinicola* (formerly *Pyrenochaeta glycines*).

We also proposed to remove three overlap select agents and toxins from the list set out in 9 CFR 121.4(b): *Bacillus anthracis* (Pasteur strain), *Brucella abortus* and *Brucella suis*.

After carefully considering the technical input of subject matter experts and recommendations from Federal advisory groups, we have decided not to finalize the proposed changes to the list of select agents and toxins at this time.

Definitions

In 7 CFR 331.1 and 9 CFR 121.1, we proposed to add definitions for *inactivation* and *kill curve* to clarify terms contained within the proposed inactivation provisions. As detailed later in this final rule, we have removed the requirement for generation of a kill curve. We are therefore not including the definition in the regulations.

One commenter suggested that we specify that a “validated method” was used for inactivation. The commenter said that the addition of the word “validated” would ensure that tested and appropriate methods of inactivation would be utilized.

We are eliminating the definition for *inactivation* and instead adding a definition of *validated inactivation procedure* to the regulations. This definition encompasses the prior definition of inactivation as well as providing further detail which we believe will be useful for regulated entities. *Validated inactivation procedure* is defined as a procedure, whose efficacy is confirmed by data generated from a viability testing protocol, to render a select agent non-viable but allows the select agent to retain characteristics of interest for

¹ To view the proposed rule and the comments we received, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0095>.

future use; or to render any nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use. While the commenter suggested we use the term “method,” we have decided to use the term “procedure” in response to comments received on the CDC docket.

The same commenter suggested that we add definitions of *validated sterility test* and *safety margin* as these terms were both proposed for use in the biocontainment and biosafety sections and could prove confusing or be subject to misinterpretation.

Given that we are adding a definition of *validated inactivation procedure* as described previously, we are not adding a definition of *validated sterility test*. We are not adding a definition of *safety margin* since that term will not be in the regulations.

While we did not receive any further comments regarding definitions, in response to comments received by CDC and in the interests of maintaining parity between the APHIS and CDC regulations, we are adding a definition for *viability testing protocol*. That term, which is now used in §§ 331.3, 121.3, and 121.4, is defined as, “a protocol to confirm the validated inactivation procedure by demonstrating the inability of a select agent to replicate.”

Exclusions and Inactivation

We proposed to amend 7 CFR 331.3(d)(2), 9 CFR 121.3(d)(2), and 9 CFR 121.4(d)(2), which exclude nonviable select agents or nonfunctional toxins from the requirements of the regulations, in order to clarify our policy that an entity must use a validated procedure to render a select agent nonviable or regulated nucleic acids non-infectious for future use. This means that the method must be scientifically sound and that it will produce consistent results each time it is used.

One commenter stated that we need to consistently address toxins throughout the regulations and suggested adding language specifying that required methods would also render a select toxin as nonfunctional.

We did not include language concerning toxins because, unlike select agents, toxins do not replicate. An inactivation failure with a toxin therefore represents a lower level of risk and thus does not justify the potential additional recordkeeping and reporting burden for registered entities at this time. We may revisit this issue in the future.

We proposed that inactivation include the use of one of the following: The exact conditions of a commonly

accepted method that has been validated as applied (e.g., autoclaving), a published method with adherence to the exact published conditions (i.e., extrapolations or deductions are to be avoided), or in-house methods, only if validation testing includes the specific conditions used and appropriate controls.

The same commenter also suggested that we require that the inactivation process be repeatable.

We agree with the commenter that the inactivation process has to be validated so that the results are repeatable. The definition of *validated inactivation procedure* states that the procedure must be supported by data generated from viability testing. A process that is not repeatable would never be validated.

We also proposed that the entity develop a site-specific kill curve in order to define the conditions of inactivation for each select agent or regulated nucleic acid. If there are strain-to-strain variations in the resistance of a select agent to the inactivation procedure, then a specific kill curve would have to be developed for each strain that undergoes the inactivation procedure. A new kill curve would have to be created upon any change in procedure or inactivation equipment. In addition, a validated sterility testing protocol would have to be conducted in order to ensure that the inactivation method has rendered a select agent nonviable or regulated nucleic acids non-infectious.

Several commenters raised objections regarding development and use of the kill curve. We have considered these comments and determined that the kill curve and safety margin requirements are not applicable to all inactivation procedures and should therefore not be included in the regulations. We are instead requiring that registered entities develop a validated inactivation procedure by establishing parameters for quantities of starting material and measures of uncertainty for repeated successful inactivation. This is a broad performance standard that will allow for flexibility given the variety of select agents and toxins under regulation.² In addition, for the sake of clarity and efficiency, we have removed the requirements specific to extracts of select agents, instead including them within the overall performance standard for select agents and toxins as a whole.

One commenter said that, without more specific direction, the subjectivity

of individual inspectors would be the principal factor in determining acceptable inactivation verification.

We will not review or approve inactivation protocols. We believe this activity should be approved at the entity, which will allow for researchers to continue to develop new inactivation procedures. However, inspectors will verify that the entity has developed a validated inactivation procedure and will review viability testing results during the entity's inspection.

Another commenter asked that we provide minimum requirements for the sterility testing protocol and specify whether or not this must be site-specific or if validated methods of sterility testing given in published journal articles may be followed.

We recognize that the limits of detection of the viability testing procedures and expected variation from run to run, even when following an inactivation procedure precisely precludes demonstrating full sterility of an inactivated sample. These sources of error must be considered when the entity establishes performance parameters for inactivation procedures. While complete sterility is not a feasible goal for material that is intended for further use, we expect that the risk of live agent in materials that are removed from containment and are thus no longer subject to select agent requirements will be as low as realistically possible from both a safety and security perspective. We will be addressing the need for onsite validation of both inactivation protocols and viability testing in guidance.

The same commenter cited the guidance document entitled “Non-viable Select Agents and Nonfunctional Select Toxins and Rendering Samples Free of Select Agents and Toxins,”³ which states that, “this guidance does not apply to inactivation for waste disposal.” The commenter urged us to clearly and accurately describe what is intended regarding verification of non-viability in the regulations, stating that they had received comments from some inspectors indicating confusion between inactivation validation requirements for moving materials to a lower containment level and inactivation validation requirements for waste disposal.

We have modified the reporting requirements to require the responsible official to investigate any viability of material that was subjected to a validated inactivation protocol to

² Additional guidance regarding this performance standard has been developed and is available on the Internet at www.selectagents.gov.

³ You may view this guidance document on the Internet at <http://www.selectagents.gov/guidance-nonviable.html>.

determine the reason of the inactivation failure. If the responsible official is unable to determine the reason for this failure, he or she must report the inactivation failure to CDC or APHIS. Our intention is to require registered entities to create an environment where inactivation failures are investigated to determine the root source of the errors instead of re-subjecting the material to an inactivation method that may be flawed or faulty. The revised language only requires reporting of inactivation failures to CDC or APHIS when the responsible official cannot determine the reason for the inactivation failure. We are also clarifying that these provisions apply only to those select agents inactivated for future use as non-select agents and not those intended for waste disposal.

Two commenters asked about the minimum percentage of samples required to be tested to constitute a "representative sample." Another commenter suggested that inactivated lots be stored with documentation that demonstrates that the lot has met the established standard, but added that it is impractical to conduct validated sterility testing on every sample that is inactivated. The commenter claimed that implementing such a requirement would waste specimens where limited volumes are available, be costly in terms of technical time and resources, and is scientifically unjustified.

Successful implementation of the required validated inactivation procedure and the subsequent data derived from viability testing using that procedure will determine the extent of sampling required. We have removed the sterility testing requirement to allow entities flexibility in establishing and utilizing individualized, validated inactivation procedures.

We also proposed to require that an entity conduct an annual review of their site-specific standard operating procedures to ensure that select agents or regulated nucleic acids that can produce infectious forms of any select agent virus are inactivated by a safety margin and revise as necessary.

Two commenters questioned our use of the term "safety margin." The commenters requested that we remove or define the term, as its meaning is unclear. The commenters further stated that the need for including a safety margin is unclear and appears superfluous if the intent of the requirement is to define the conditions that achieve conditions that render 100 percent of the select agent non-viable or noninfectious.

We are not defining "safety margin" as the proposed regulatory text using

this term will not be incorporated into the final rule.

Finally, we proposed that written records be kept for any select agent that has been rendered nonviable or regulated nucleic acids that have been rendered non-infectious.

Two commenters asked for clarification of the actions constituting review, including description of any documentation that will be expected to demonstrate compliance with the requirement. The commenters wanted to know if it was our expectation that the kill curve and sterility testing be repeated and verified annually, or if this is a review of data and written procedures.

In response, we have modified the language regarding review of site-specific standard operating inactivation procedures to clarify that the entity should review these procedures to determine if they are being adhered to by staff. The annual review requirement does not necessarily involve revalidating inactivation procedures. This review may simply take the form of an evaluation of the site-specific standard operating inactivation procedures to ensure the inactivation conditions used and upper agent limits found in validation data are consistent and that the entity staff are following the site-specific standard operating inactivation procedures. At times an entity may need to revalidate inactivation procedures during the annual review. For example, review may be needed if the entity finds that staff are not adhering to standard operating procedures or if the entity wants to deviate from the established, validated inactivation procedure.

While we did not receive any further comments on this issue, in response to comments received by CDC and in the interests of maintaining parity between the APHIS and CDC regulations, we have made the following changes:

- Establishing that surrogate strains that are known to possess properties equivalent to select agents may be used to validate the required inactivation procedures under certain conditions;
- Replacing the term "extract" with "material containing a select agent" to clarify that the inactivation requirements apply to such materials as serums or liquid cultures from which select agents are typically removed via filtration without first undergoing inactivation. This is intended to more accurately describe an element of a two-step process: An inactivation step to destroy the select agent and a second step intended to remove any remaining, viable select agent; and

- Clarification of when an entity may submit a waiver request to the Administrator as well as the procedure for such determinations.

Finally, in 7 CFR 331.3(d)(2), 9 CFR 121.3(d)(2), and 9 CFR 121.4(d)(2), we are replacing the term "nonfunctional toxin" with "nontoxic toxin." We have determined that the term "nonfunctional" is overbroad and has caused confusion. Our intent was to exclude toxins that can no longer exert their toxic effect and cause disease. For example, Botulinum neurotoxin has three functional domains: Binding domain, translocation domain, and catalytic domain. Each functional domain may be solely manipulated such that the toxin is no longer toxic and does not cause disease even though the other two domains may remain functional. Note that the example provided is for a CDC toxin due to the fact that APHIS does not currently regulate any select toxins.

Exemptions for Select Agents and Toxins

The provisions of 7 CFR 331.5, 9 CFR 121.5, and 9 CFR 121.6 concern conditions under which entities may be exempted from the requirements of the regulations. We proposed to add language to paragraph (a) in 7 CFR 331.5, 9 CFR 121.5, and 9 CFR 121.6 that specifies that entities may be required to report identification of agents or toxins to other appropriate authorities when required by Federal, State, or local law. Specifically, we proposed to add provisions that state that we do not regulate material containing select agents or toxins when it is in a patient care setting and is not being collected or otherwise tested or retained, nor do we regulate waste generated during delivery of patient care. However, once delivery of patient care for the select agent or toxin infection has concluded, waste would become subject to the requirements of the regulations. If an entity cannot meet these requirements, then the material may be transferred to another entity according to the select agent regulations or destroyed using an approved method. The decision to retain, transfer, or destroy any specimens must be made within 7 calendar days of the conclusion of patient care.

One commenter disagreed with adding such a provision to 9 CFR 121.5. The commenter said that VS should have authority to regulate waste and carcasses from animals (*i.e.*, veterinary patients) naturally infected with select agents to ensure that infection does not spread to other livestock or poultry. The commenter asked that we alter the

wording of the proposed section in order to specify that the requirement refers to human patients only.

The provisions the commenter refers to relate to the care of human patients only. However, it should be noted that any waste or carcasses from animals infected with a select agent, provided the select agent or toxin has not been intentionally introduced, cultivated, collected, or otherwise extracted from its natural source, are already listed as excluded in §§ 121.3(d)(1) and 121.4(d)(1) of the regulations.

While we did not receive any further comments on this issue, in response to comments received by CDC and in the interests of maintaining parity between the APHIS and CDC regulations, we are amending the text to clarify the following:

- That patient care refers to actions by health care professionals;
- To clarify that destruction and transfer requirements apply solely to waste generated in the course of patient care and not specimens or samples taken from the patient; and
- That specimens taken from a patient are not subject to the regulations during the period in which they are directly associated with the diagnosis, but all specimens taken and kept more than 7 days after the conclusion of patient care are subject to the regulations.

Security, Biocontainment/Biosafety, and Incident Response Plans

The regulations require registered entities to develop and implement a number of plans in order to ensure the safety and security of the select agents they handle. These are:

- A security plan, as described by the regulations in 7 CFR 331.11 and 9 CFR 121.11, that provides for measures sufficient to safeguard the select agent or toxin against unauthorized access, theft, loss, or release;
- A biocontainment plan, in the case of PPQ select agents, or a biosafety plan, in the case of VS and overlap select agents, as described in the regulations in 7 CFR 331.12 and 9 CFR 121.12, that provides for measures sufficient to contain the select agent or toxin (e.g., physical structure and features of the entity, and operational and procedural safeguards); and
- An incident response plan, as described in the regulations in 7 CFR 331.14 and 9 CFR 121.14, that provides for measures that the registered entity will implement in the event of theft, loss, or release of a select agent or toxin; inventory discrepancies; security breaches (including information systems); severe weather and other

natural disasters; workplace violence; bomb threats and suspicious packages; and emergencies such as fire, gas leak, explosion, power outage, etc. The response procedures must account for hazards associated with the select agent or toxin and appropriate actions to contain such agent or toxin.

All of these plans require annual review and revision as necessary. Drills or exercises must also be conducted at least annually to test and evaluate the effectiveness of the plans. The plans must be reviewed and revised, as necessary, after any drill or exercise and after any incident. We proposed to require that these drills or exercises be documented to include how the drill or exercise tested and evaluated the plan, any problems identified, any corrective action taken, and the names of the individuals who participated in the drill or exercise. This will provide a more thorough accounting of required activities as well as increasing the efficacy of the plans via testing and entity-directed improvements. We proposed to add these requirements to 7 CFR 331.11(h), 331.12(e), 331.14(f), 9 CFR 121.11(h), 121.12(e), and 121.14(f).

One commenter stated that the requirement to record the names of the individuals who participated in a given drill or exercise should be limited to registered entity personnel and not include first responders or others who participate. The commenter suggested that a list of the participating external agencies (e.g., emergency management, emergency medical services, fire department, etc.) could be included.

We agree with the commenter's suggestion and have updated the regulations in order to clarify that only the names of individuals at the registered entity are required to be listed. The entity may choose to list the names of external agencies (e.g., fire department, police department, etc.) that participated in the drill or exercise.

Comments on more specific proposed changes to these plans may be found below.

Biocontainment/Biosafety Plan

Paragraph (a) of 7 CFR 331.12 and 9 CFR 121.12 requires that the biocontainment or biosafety plan contain sufficient information and documentation to describe the biosafety and containment procedures for each select agent or toxin that the registered entity will possess. The plan must also include a description of the biosafety and containment procedures for any animals (including arthropods) or plants intentionally or accidentally exposed to or infected with a select agent. We proposed to additionally require that

laboratory-specific biocontainment and/or biosafety manuals must be accessible to individuals working in those laboratories. This change will help to foster an enhanced culture of responsibility by ensuring that appropriate biocontainment and/or biosafety resources are available to all staff with access to select agents and toxins within a select agent laboratory.

One commenter suggested that the specific practice of making manuals accessible is already employed by registered entities. The commenter therefore questioned the need for a separate requirement.

We agree with the commenter and have removed the requirement.

Two commenters urged that, "a description of the biosafety and containment procedures for any animals (including arthropods) or plants intentionally or accidentally exposed to or infected with a select agent" should clearly refer not only to animals within the laboratory but also wildlife, domestic, and stray animals outside of the buildings if they are potentially exposed via accidental release. The commenter added that there should be a system in place to detect such incidents if they occur.

The term "any animals" includes both laboratory animals as well as the wild, domestic, and stray animals described by the commenters. We will, however, add specific clarification to the guidance documents associated with the biocontainment and biosafety plans.

One commenter requested clarification regarding the term "laboratory." The commenter wanted to know whether the term refers to a single room, a building, or to a group of rooms (e.g., laboratory, animal room, and necropsy) used by a principal investigator for a research project. The commenter also requested clarification regarding the phrase, "must be available to each individual working in the laboratory," asking if this would require creation of a specific biocontainment or biosafety manual for each room.

We have clarified the language to state that "biosafety and containment procedures specific to use of the select agent or toxin by the principal investigator must be available to each individual involved with that project." This more appropriately ties the creation and distribution of biocontainment and biosafety manuals to specific projects, select agents, and people.

We also proposed to add specific provisions to the biocontainment and biosafety plans that would require completion of a written risk assessment for each procedure.

Two commenters stated that these requirements are unnecessary and would prove excessively burdensome to researchers and the responsible official and should be removed. The commenters said that the new requirements regarding validation of inactivation procedures would serve the same security function. The commenters added that APHIS already has opportunity to review and require amendment of an entity's biocontainment or biosafety plan as a condition of registration or as a result of inspection.

We agree with the commenter that this level of detail would prove unnecessarily burdensome. We have instead added language to 7 CFR 331.12(a)(1) and 9 CFR 331.12(a)(1) to explicitly require that the biocontainment and biosafety plans include a description of the hazardous characteristics of each agent or toxin listed on the entity's registration and the biosecurity or biosafety risk associated with laboratory procedures related to the select agent or toxin.

One commenter asked that we define "risk assessment," given that it is a very broad term and therefore open to interpretation. This commenter and another requested that we provide basic templates for these new required sections and indicate where registered entities and entities seeking registration may find these templates.

We have revised and condensed the proposed language as a result of this and other comments. It no longer includes the term "risk assessment."

Training

We proposed to amend the regulations in 7 CFR 331.15 and 9 CFR 121.15, which concern provision of mandatory training for staff and visitors who work in or visit areas where select agents or toxins are handled or stored. We proposed to require that all individuals who have received approval to have access to select agents and toxins must undergo training regardless of whether they have access to those select agents or toxins. The training would have to be completed within a year of that individual's approval or prior to entry into an area where select agents and toxins are used or stored, whichever occurs first.

Two commenters objected to the proposed addition, stating that we should include a description of the level of training necessary for personnel in varying positions with highly disparate job duties and responsibilities. The commenters requested that we clarify that required training will be conducted at a level appropriate to the registered

person's role and level of access to select agents.

We agree with the commenters' point and have altered the required training language to clearly delineate the types of training required for individuals with varying access levels.

One commenter asked that we clearly specify the requirements for both initial and annual training. The commenter also asked that we consider making training a prerequisite for access to select agents and toxins.

While we made no changes to our regulatory language based on this comment, the document entitled, "Guidance for Meeting the Training Requirements of the Select Agent Regulations"⁴ will be updated to provide further detail and assistance regarding the content of initial and annual training. The regulations in 7 CFR 331.15(a)(1) and 9 CFR 121.15(a)(1) already require that each approved individual receive information and training on biosecurity/biosafety, security (including security awareness), and incident response before that individual has access to any select agents and toxins.

Records

The regulations in 7 CFR 331.17 and 9 CFR 121.17 concern required recordkeeping procedures for regulated entities as those records relate to select agents and toxins. Paragraph (a)(3)(x) requires that registered entities record the destruction of any toxins by specifically noting the quantity of toxin destroyed, the date of such action, and by whom. However, there is not an equivalent requirement regarding the destruction of select agents. We proposed to add this requirement in order to ensure consistency with the toxin provisions and ensure proper tracking of select agents from acquisition to destruction.

While we did not receive any comments on this issue, in response to comments received by CDC and in the interests of maintaining parity between the APHIS and CDC regulations, we are amending the text to stipulate that registered entities must maintain a record of the select agent used, purpose of use, and, when applicable, final disposition (including destruction) for each select agent held in long-term storage.

We also proposed to state that any records created that contain information related to an entity's registration or its select agents and toxins must be

provided promptly upon request. We proposed to specify that such records may include, but are not limited to, biocontainment certifications, laboratory notebooks, institutional biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs.

One commenter expressed concern regarding the requirement to keep laboratory notebooks for inspection purposes. The commenter stated that items may include proprietary intellectual property and requested clarification regarding the information needed from the notebooks. The commenter asked that we amend the regulatory language in order to protect intellectual property interests and specify if any information would be required from laboratory notebooks apart from that collected for inventory purposes.

We agree with the commenter and we have clarified that only information related to the requirements of the regulations must be produced upon request. Such information may be found in biocontainment certifications, laboratory notebooks, institutional biosecurity/biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs. Accordingly, we will only be reviewing relevant portions of any laboratory notebooks or documents and only if they contain information related to any requirements of the regulations.

To ensure the accuracy of handwritten records, we also proposed to specify that such records must be legible.

Another commenter suggested that we require that records be written in ink and not pencil and should be signed and dated when appropriate.

We acknowledge this suggestion as good practice. However, in the interests of not being overly prescriptive, we are leaving the interpretation of "legible" up to individual registered entities.

Records for Select Agents in Long-Term Storage

Paragraph (a)(1) in both 7 CFR 331.17 and 9 CFR 121.17 requires entities to maintain an accurate, current inventory for each select agent (including viral genetic elements, recombinant and/or synthetic nucleic acids, and organisms containing recombinant and/or synthetic nucleic acids) held in long-term storage. We continue to receive comments critical of that portion of the regulations. Criticism is typically focused on the belief that a container-based inventory requirement is not a

⁴ You may view this document on the Internet at <http://www.selectagents.gov/guidance-training.html>.

useful mechanism to track inventory of biological agents, since small amounts could be stolen without detection and used to grow larger quantities.

However, the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 obliges APHIS and CDC to include a requirement for “the prompt notification of the Secretary, and appropriate Federal, State, and local law enforcement agencies, of the theft or loss of listed agents and toxins” in the regulations. We therefore solicited comment regarding what regulatory requirement or requirements should be implemented such that a registered entity could quickly determine whether a select agent had been lost or stolen from long-term storage without that registered entity first having an accurate, current inventory for each select agent held in long-term storage. Additionally, we solicited ideas concerning ways in which the current regulations could be amended to address the possibility of theft of a select agent from a container held in long-term storage.

One commenter stated that, while they understand the need for such inventory and notification requirements, an enormous amount of time and effort is spent during inspections validating that inventories are accurate. The commenter said that this has resulted in the loss of valuable virus isolates due to unintentional thawing, failure of ultralow temperature freezers due to repeated opening and the resulting loss of ultralow temperature, and inefficient use of employee time. The commenter said that measuring the volumes of stored vials of bacteria and viruses in the manner that toxins or other non-replicative select agents are inventoried is illogical. The commenter acknowledged that it is important to indicate the nature of the pathogens stored and the numbers of vials in freezer stocks, but even the most fastidious recordkeeping could not demonstrate that vials of replicative organisms had not been accessed. The commenter stated that current select agent practices allow for these stocks to be maintained in tamper-evident stocks (e.g., security ties on freezer boxes) so that vials are not individually removed, thawed, and measured. The commenter concluded that requiring the use of tools of this nature in the case of replicative organisms is a logical step that would not eliminate the need to inventory, but which also would not degrade samples and allow for detection of samples that may have disappeared.

We appreciate this comment and will continue to consider how the recognition of theft and loss might be

addressed through alternative approaches.

Miscellaneous Changes

We are also adding a definition of *principal investigator* to the regulations in 7 CFR 331.1 and 9 CFR 121.1 as it is used but not defined in the APHIS regulations. The addition also serves to maintain parity with the CDC regulations. Our definition is identical to that used by CDC.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule with the changes discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been determined to be significant for the purposes of Executive Order 12866 and, therefore, has been reviewed by the Office of Management and Budget.

In accordance with 5 U.S.C. 604, we have performed a final regulatory flexibility analysis, which is summarized below, regarding the economic effects of this rule on small entities. Copies of the full analysis are available on the *Regulations.gov* Web site (see footnote 1 in this document for a link to *Regulations.gov*) or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

Sections 201 and 212(a)(2) of the Act require a biennial review and republication of the select agent and toxin list, with revisions as appropriate in accordance with this law. This final rule will implement the recommendations of the fourth biennial review of select agent regulations and has finalized changes that will increase their usability as well as provide for enhanced program oversight. These amendments include new provisions regarding the inactivation of select agents, specific biosafety and toxin requirements and clarification of regulatory language concerning security, training, and records. The final rule will require that entities develop a validated inactivation procedure by establishing parameters for quantities of starting material and measures of uncertainty for repeated successful inactivation. This is a broad performance standard that will allow for flexibility given the variety of select agents and toxins under regulation to define conditions of inactivation for each select agent or regulated infectious nucleic acid and maintain written records of having done so. Costs of complying with this amendment are expected to be modest.

Currently, there are 291 entities registered with APHIS and CDC. Of

these entities, there are 240 registered to possess Tier 1 select agents and toxins, including 78 academic, 29 commercial, 80 State government, 37 Federal government, and 16 private (non-profit) institutions, most of which are considered to be small entities. Based on current recordkeeping and reporting requirements, an additional 10 to 20 hours per year may be required for maintaining records associated with select agents or material containing select agents or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a validated inactivation procedure or a procedure for removal of viable select agents. At an imputed cost of \$33.40 per hour (GS–12, step 2), this additional time requirement per entity will cost between \$334 and \$668 per year, or in total for all registered entities between \$80,000 and \$160,000. Assuming that costs of the rule could be considered to be significant if they exceeded 1 percent of revenue earned by the affected entities, revenues would need to average less than \$33,400 to \$66,800 for this to be the case. While the vast majority of the entities in industries potentially affected by this rule, other than post-secondary institutions, can be considered small, average annual revenues are well above this range.

Due to the reasons summarized here and explained in the analysis accompanying this rule, the Administrator certifies that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. Executive Order 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and

Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

The Animal and Plant Health Inspection Service has assessed the impact of this rule on Indian tribes and determined that this rule does not, to our knowledge, have tribal implications that require tribal consultation under E.O. 13175. If a Tribe requests consultation, the Animal and Plant Health Inspection Service will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified herein are not expressly mandated by Congress.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the reporting, recordkeeping, and third-party disclosure requirements included this rule are in the process of being reinstated by the Office of Management and Budget under 0579–0213.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at 301–851–2483.

List of Subjects

7 CFR Part 331

Agricultural research, Laboratories, Plant diseases and pests, Reporting and recordkeeping requirements.

9 CFR Part 121

Agricultural research, Animal diseases, Laboratories, Medical research, Reporting and recordkeeping requirements.

Accordingly, 7 CFR part 331 and 9 CFR part 121 are amended as follows:

Title 7—Agriculture

PART 331—POSSESSION, USE, AND TRANSFER OF SELECT AGENTS AND TOXINS

■ 1. The authority citation for part 331 continues to read as follows:

Authority: 7 U.S.C. 8401; 7 CFR 2.22, 2.80, and 371.3.

■ 2. Section 331.1 is amended by adding, in alphabetical order,

definitions of *principal investigator*, *validated inactivation procedure*, and *viability testing protocol* to read as follows:

§ 331.1 Definitions.

* * * * *

Principal investigator. The one individual who is designated by the entity to direct a project or program and who is responsible to the entity for the scientific and technical direction of that project or program.

* * * * *

Validated inactivation procedure. A procedure, whose efficacy is confirmed by data generated from a viability testing protocol, to render a select agent non-viable but allows the select agent to retain characteristics of interest for future use; or to render any nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use.

* * * * *

Viability testing protocol. A protocol to confirm the validated inactivation procedure by demonstrating the material is free of all viable select agent.

■ 3. Section 331.3 is amended as follows:

■ a. By revising paragraph (d)(2).

■ b. By redesignating paragraph (d)(3) as paragraph (d)(9)

■ c. By adding paragraphs (d)(3) through (8) and (e)(3).

The additions and revision read as follows:

§ 331.3 PPQ select agents and toxins.

* * * * *

(d) * * *

(2) Nonviable select agents or nontoxic toxins.

(3) A select agent or toxin that has been subjected to decontamination or a destruction procedure when intended for waste disposal.

(4) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus that has been subjected to a validated inactivation procedure that is confirmed through a viability testing protocol. Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure; however, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains.

(5) Material containing a select agent that is subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material

is subjected to a viability testing protocol to ensure that the removal method has rendered the material free of all viable select agent.

(6) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus not subjected to a validated inactivation procedure or material containing a select agent not subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is determined by the Administrator to be effectively inactivated or effectively removed. To apply for a determination an individual or entity must submit a written request and supporting scientific information to APHIS. A written decision granting or denying the request will be issued.

(7) A PPQ select toxin identified in an original food sample or clinical sample.

(8) Waste generated during the delivery of patient care by health care professionals from a patient diagnosed with an illness or condition associated with a select agent, where that waste is decontaminated or transferred for destruction by complying with State and Federal regulations within 7 calendar days of the conclusion of patient care.

* * * * *

(e) * * *

(3) An individual or entity may make a written request to the Administrator for reconsideration of a decision denying an application for the exclusion of an attenuated strain of a select agent or a select toxin modified to be less potent or toxic. The written request for reconsideration must state the facts and reasoning upon which the individual or entity relies to show the decision was incorrect. The Administrator will grant or deny the request for reconsideration as promptly as circumstances allow and will state, in writing, the reasons for the decision.

* * * * *

■ 4. Section 331.5 is amended as follows:

■ a. By revising paragraph (a)(1).

■ b. In paragraph (a)(2), by removing “; and” and adding a period in its place.

■ c. By revising paragraph (a)(3).

The revisions read as follows:

§ 331.5 Exemptions.

(a) * * *

(1) Unless directed otherwise by the Administrator, within 7 calendar days after identification of the select agent or toxin, the select agent or toxin is transferred in accordance with § 331.16 or destroyed on-site by a recognized sterilization or inactivation process.

* * * * *

(3) The identification of the agent or toxin is reported to APHIS or CDC, the specimen provider, and to other appropriate authorities when required by Federal, State, or local law by telephone, facsimile, or email. This report must be followed by submission of APHIS/CDC Form 4 to APHIS or CDC within 7 calendar days after identification.

* * * * *

■ 5. Section 331.7 is amended as follows:

■ a. By redesignating paragraphs (b) through (k) as paragraphs (c) through (l), respectively.

■ b. By adding a new paragraph (b).

The addition reads as follows:

§ 331.7 Registration and related security risk assessments.

* * * * *

(b) As a condition of registration, each entity is required to be in compliance with the requirements of this part for select agents and toxins listed on the registration regardless of whether the entity is in actual possession of the select agent or toxin. With regard to toxins, the entity registered for possession, use, or transfer of a toxin must be in compliance with the requirements of this part regardless of the amount of toxins currently in its possession.

* * * * *

■ 6. Section 331.9 is amended as follows:

■ a. By removing the semicolons at the ends of paragraphs (a)(1) through (4) and “; and” at the end of paragraph (a)(5) and adding periods in their place.

■ b. In paragraph (a)(6), by removing the word “laboratory” and adding the words “registered space” in its place and by adding the words “and the corrections documented” at the end of the second sentence after the words “must be corrected”.

■ c. By adding paragraphs (a)(7), (8), and (9).

The additions read as follows:

§ 331.9 Responsible official.

(a) * * *

(7) Ensure that individuals are provided the contact information for the USDA Office of Inspector General Hotline and the HHS Office of Inspector General Hotline so that they may anonymously report any biosafety/biocontainment or security concerns related to select agents and toxins.

(8) Investigate to determine the reason for any failure of a validated inactivation procedure or any failure to remove viable select agent from material. If the responsible official is

unable to determine the cause of a deviation from a validated inactivation procedure or a viable select agent removal method; or receives any report of any inactivation failure after the movement of material to another location, the responsible official must report immediately by telephone or email the inactivation or viable agent removal method failure to APHIS or CDC.

(9) Review, and revise as necessary, each of the entity's validated inactivation procedures or viable select agent removal methods. The review must be conducted annually or after any change in principal investigator, change in the validated inactivation procedure or viable select agent removal method, or failure of the validated inactivation procedure or viable select agent removal method. The review must be documented and training must be conducted if there are any changes to the validated inactivation procedure, viable select agent removal method, or viability testing protocol.

* * * * *

■ 7. In § 331.10, paragraph (e) is amended by adding a sentence at the end of the paragraph to read as follows:

§ 331.10 Restricting access to select agents and toxins; security risk assessments.

* * * * *

(e) * * * A responsible official must immediately notify the responsible official of the visiting entity if the person's access to select agents or toxins has been terminated.

* * * * *

■ 8. Section 331.11 is amended as follows:

■ a. In paragraph (c)(5), by adding the word “keycards,” after the word “keys,” and by removing the word “numbers” and adding the word “permissions” in its place.

■ b. In paragraph (d)(7)(iv), by removing the word “and”.

■ c. By adding paragraph (d)(7)(vi).

■ d. By adding a sentence at the end of paragraph (h).

The additions read as follows:

§ 331.11 Security.

* * * * *

(d) * * *

(7) * * *

(vi) Any loss of computer, hard drive or other data storage device containing information that can be used to gain access to select agents or toxins; and

* * * * *

(h) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan,

any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 9. Section 331.12 is amended as follows:

■ a. By revising paragraph (a).

■ b. By adding a sentence at the end of paragraph (e).

The addition and revision read as follows:

§ 331.12 Biocontainment.

(a) An individual or entity required to register under this part must develop and implement a written biocontainment plan that is commensurate with the risk of the select agent or toxin, given its intended use.⁴ The biocontainment plan must contain sufficient information and documentation to describe the biocontainment procedures for the select agent or toxin, including any animals (including arthropods) or plants intentionally or accidentally exposed to or infected with a select agent. The current biocontainment plan must be submitted for initial registration, renewal of registration, or when requested. The biocontainment plan must include the following provisions:

(1) The hazardous characteristics of each agent or toxin listed on the entity's registration and the biocontainment risk associated with laboratory procedures related to the select agent or toxin;

(2) Safeguards in place with associated work practices to protect entity personnel, the public, and the environment from exposure to the select agent or toxin including, but not limited to: Personal protective equipment and other safety equipment; containment equipment including, but not limited to, biological safety cabinets, animal caging systems, and centrifuge safety containers; and engineering controls and other facility safeguards;

(3) Written procedures for each validated method used for disinfection, decontamination, or destruction, as appropriate, of all contaminated or presumptively contaminated materials including, but not limited to: Cultures and other materials related to the propagation of select agents or toxins, items related to the analysis of select agents and toxins, personal protective equipment, arthropod containment systems, extracted plant and/or arthropod tissues, laboratory surfaces and equipment, and effluent material; and

(4) Procedures for the handling of select agents and toxins in the same

⁴ Technical assistance and guidance may be obtained by contacting APHIS.

spaces with non-select agents and toxins to prevent unintentional contamination.

* * * * *

(e) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 10. Section 331.14 is amended as follows:

■ a. By adding a sentence at the end of paragraph (a).

■ b. By adding a sentence at the end of paragraph (f).

The additions read as follows:

§ 331.14 Incident response.⁵

(a) * * * The current incident response plan must be submitted for initial registration, renewal of registration, or when requested.

* * * * *

(f) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 11. Section 331.15 is amended as follows:

■ a. By revising paragraph (a).

■ b. By adding paragraph (e).

The addition and revision read as follows:

§ 331.15 Training.

(a) An individual or entity required to register under this part must provide information and training on biocontainment, biosafety, security (including security awareness), and incident response to:

(1) Each individual with access approval from the Administrator or HHS Secretary. The training must address the particular needs of the individual, the work they will do, and the risks posed by the select agents or toxins. The training must be accomplished prior to the individual's entry into an area where a select agent is handled or stored, or within 12 months of the date the individual was approved by the Administrator or the HHS Secretary for access, whichever is earlier.

(2) Each individual not approved for access to select agents and toxins by the Administrator or HHS Secretary before that individual enters areas under escort where select agents or toxins are handled or stored (e.g., laboratories, growth chambers, animal rooms,

greenhouses, storage areas, shipping/receiving areas, production facilities, etc.). Training for escorted personnel must be based on the risk associated with accessing areas where select agents and toxins are used and/or stored. The training must be accomplished prior to the individual's entry into where select agents or toxins are handled or stored (e.g., laboratories, growth chambers, animal rooms, greenhouses, storage areas, shipping/receiving areas, production facilities, etc.).

* * * * *

(e) The responsible official must ensure and document that individuals are provided the contact information of the USDA Office of Inspector General Hotline and the HHS Office of Inspector General Hotline so that they may anonymously report any safety or security concerns related to select agents and toxins.

■ 12. In § 331.16, paragraph (b) introductory text is revised to read as follows:

§ 331.16 Transfers.

* * * * *

(b) A transfer may be authorized if:

* * * * *

■ 13. Section 331.17 is amended as follows:

■ a. In paragraph (a)(1)(iii), by adding the words "or other storage container" after the word "freezer".

■ b. By revising paragraph (a)(1)(v).

■ c. In paragraph (a)(3)(v), by adding the words "or other storage container" after the word "freezer".

■ d. By removing the word "and" at the end of paragraph (a)(6) and removing the period at the end of paragraph (a)(7) and adding "; and" in its place.

■ e. By adding paragraph (a)(8).

■ f. By revising paragraphs (b) and (c).

The addition and revisions read as follows:

§ 331.17 Records.

(a) * * *

(1) * * *

(v) The select agent used, purpose of use, and, when applicable, final disposition;

* * * * *

(8) For select agents or material containing select agents or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a validated inactivation procedure or a procedure for removal of viable select agent:

(i) A written description of the validated inactivation procedure or viable select agent removal method used, including validation data;

(ii) A written description of the viability testing protocol used;

(iii) A written description of the investigation conducted by the entity responsible official involving an inactivation or viable select agent removal failure and the corrective actions taken;

(iv) The name of each individual performing the validated inactivation or viable select agent removal method;

(v) The date(s) the validated inactivation or viable select agent removal method was completed;

(vi) The location where the validated inactivation or viable select agent removal method was performed; and

(vii) A certificate, signed by the principal investigator, that includes the date of inactivation or viable select agent removal, the validated inactivation or viable select agent removal method used, and the name of the principal investigator. A copy of the certificate must accompany any transfer of inactivated or select agent removed material.

(b) The individual or entity must implement a system to ensure that all records and databases created under this part are accurate and legible, have controlled access, and that their authenticity may be verified.

(c) The individual or entity must promptly produce upon request any information that is related to the requirements of this part but is not otherwise contained in a record required to be kept by this section. The location of such information may include, but is not limited to, biocontainment certifications, laboratory notebooks, institutional biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs. All records created under this part must be maintained for 3 years.

Title 9—Animals and Animal Products

PART 121—POSSESSION, USE, AND TRANSFER OF SELECT AGENTS AND TOXINS

■ 14. The authority citation for part 121 continues to read as follows:

Authority: 7 U.S.C. 8401; 7 CFR 2.22, 2.80, and 371.4.

■ 15. Section 121.1 is amended by adding, in alphabetical order, definitions of *principal investigator*, *validated inactivation procedure*, and *viability testing protocol* to read as follows:

§ 121.1 Definitions.

* * * * *

⁵ Nothing in this section is meant to supersede or preempt incident response requirements imposed by other statutes or regulations.

Principal investigator. The one individual who is designated by the entity to direct a project or program and who is responsible to the entity for the scientific and technical direction of that project or program.

* * * * *

Validated inactivation procedure. A procedure, whose efficacy is confirmed by data generated from a viability testing protocol, to render a select agent non-viable but allows the select agent to retain characteristics of interest for future use; or to render any nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use.

* * * * *

Viability testing protocol. A protocol to confirm the validated inactivation procedure by demonstrating the material is free of all viable select agent.

* * * * *

■ 16. Section 121.3 is amended as follows:

- a. By revising paragraph (d)(2).
- b. By redesignating paragraph (d)(3) as paragraph (d)(4).
- c. By adding a new paragraph (d)(3).
- d. By revising newly redesignated paragraph (d)(4).
- e. By adding paragraphs (d)(5) through (9) and (e)(3).

The additions and revisions read as follows:

§ 121.3 VS select agents and toxins.

* * * * *

(d) * * *

(2) Nonviable VS select agents or nontoxic VS toxins.³

(3) A select agent or toxin that has been subjected to decontamination or a destruction procedure when intended for waste disposal.

(4) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus that has been subjected to a validated inactivation procedure that is confirmed through a viability testing protocol. Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure; however, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains.

(5) Material containing a select agent that is subjected to a procedure that removes all viable select agent cells,

spores, or virus particles if the material is subjected to a viability testing protocol to ensure that the removal method has rendered the material free of all viable select agent.

(6) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus not subjected to a validated inactivation procedure or material containing a select agent not subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is determined by the Administrator to be effectively inactivated or effectively removed. To apply for a determination an individual or entity must submit a written request and supporting scientific information to APHIS. A written decision granting or denying the request will be issued.

(7) A VS select toxin identified in an original food sample or clinical sample.

(8) Waste generated during the delivery of patient care by health care professionals from a patient diagnosed with an illness or condition associated with a select agent, where that waste is decontaminated or transferred for destruction by complying with State and Federal regulations within 7 calendar days of the conclusion of patient care.

(9) Any low pathogenic strains of avian influenza virus, avian paramyxovirus serotype-1 (APMV-1) viruses which do not meet the criteria for Newcastle disease virus,⁴ including those identified as pigeon paramyxovirus-12⁵ isolated from a non-poultry species, all subspecies *Mycoplasma capricolum* except subspecies *capripneumoniae* (contagious caprine pleuropneumonia), and all subspecies *Mycoplasma mycoides* except subspecies *mycoides* small colony (*Mmm* SC) (contagious bovine pleuropneumonia), provided that the individual or entity can identify that the agent is within the exclusion category.

(e) * * *

(3) An individual or entity may make a written request to the Administrator for reconsideration of a decision denying an application for the exclusion

⁴ An APMV-1 virus isolated from poultry which has an intracerebral pathogenicity index in day-old chicks (*Gallus gallus*) of 0.7 or greater or has an amino acid sequence at the fusion (F) protein cleavage site that is consistent with virulent strains of Newcastle disease virus. A failure to detect a cleavage site that is consistent with virulent strains does not confirm the absence of a virulent virus.

⁵ Pigeon paramyxovirus (PPMV-1) is a species-adapted APMV-1 virus which is endemic in pigeons and doves in the United States and can be identified through monoclonal antibody testing and demonstration of their characteristic amino acid signature at the fusion gene cleavage site.

of an attenuated strain of a select agent or a select toxin modified to be less potent or toxic. The written request for reconsideration must state the facts and reasoning upon which the individual or entity relies to show the decision was incorrect. The Administrator will grant or deny the request for reconsideration as promptly as circumstances allow and will state, in writing, the reasons for the decision.

* * * * *

■ 17. Section 121.4 is amended as follows:

■ a. In paragraph (c)(1), by redesignating footnote 4 as footnote 6.

■ b. In paragraph (c)(2) introductory text, by removing the word “functional” and adding in its place the word “toxic”.

■ c. By revising paragraph (d)(2).

■ d. By redesignating paragraph (d)(3) as paragraph (d)(9).

■ e. By adding paragraphs (d)(3) through (8) and (e)(3).

The additions and revision read as follows:

§ 121.4 Overlap select agents and toxins.

* * * * *

(d) * * *

(2) Nonviable overlap select agents or nontoxic overlap toxins.⁷

(3) A select agent or toxin that has been subjected to decontamination or a destruction procedure when intended for waste disposal.

(4) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus that has been subjected to a validated inactivation procedure that is confirmed through a viability testing protocol. Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure; however, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains.

(5) Material containing a select agent that is subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is subjected to a viability testing protocol to ensure that the removal method has rendered the material free of all viable select agent.

(6) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus not subjected

³ However, the importation and interstate movement of these nonviable select agents may be subject to the permit requirements under part 122 of this subchapter.

⁷ However, the importation and interstate movement of these nonviable overlap select agents may be subject to the permit requirements under part 122 of this subchapter.

to a validated inactivation procedure or material containing a select agent not subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is determined by the Administrator or HHS Secretary to be effectively inactivated or effectively removed. To apply for a determination an individual or entity must submit a written request and supporting scientific information to APHIS or CDC. A written decision granting or denying the request will be issued.

(7) An overlap select toxin identified in an original food sample or clinical sample.

(8) Waste generated during the delivery of patient care by health care professionals from a patient diagnosed with an illness or condition associated with a select agent, where that waste is decontaminated or transferred for destruction by complying with State and Federal regulations within 7 calendar days of the conclusion of patient care.

* * * * *

(e) * * *

(3) An individual or entity may make a written request to the Administrator or HHS Secretary for reconsideration of a decision denying an application for the exclusion of an attenuated strain of a select agent or a select toxin modified to be less potent or toxic. The written request for reconsideration must state the facts and reasoning upon which the individual or entity relies to show the decision was incorrect. The Administrator or HHS Secretary will grant or deny the request for reconsideration as promptly as circumstances allow and will state, in writing, the reasons for the decision.

* * * * *

■ 18. In § 121.5, paragraph (a) is revised as follows:

§ 121.5 Exemptions for VS select agents and toxins.

(a) Diagnostic laboratories and other entities that possess, use, or transfer a VS select agent or toxin that is contained in a specimen presented for diagnosis or verification will be exempt from the requirements of this part for such agent or toxin contained in the specimen, provided that:

(1) Unless directed otherwise by the Administrator, within 7 calendar days after identification of the select agent or toxin, the select agent or toxin is transferred in accordance with § 121.16 or destroyed on-site by a recognized sterilization or inactivation process;

(2) The agent or toxin is secured against theft, loss, or release during the

period between identification of the agent or toxin and transfer or destruction of such agent or toxin, and any theft, loss, or release of such agent or toxin is reported;

(3) Unless otherwise directed by the Administrator, the clinical or diagnostic specimens collected from a patient infected with a select agent are transferred in accordance with § 121.16 or destroyed on-site by a recognized sterilization or inactivation process within 7 calendar days after delivery of patient care by health care professionals has concluded; and

(4) The identification of the agent or toxin is reported to APHIS or CDC, the specimen provider, and to other appropriate authorities when required by Federal, State, or local law by telephone, facsimile, or email. This report must be followed by submission of APHIS/CDC Form 4 to APHIS or CDC within 7 calendar days after identification.

* * * * *

■ 19. Section 121.6 is amended as follows:

■ a. By revising paragraph (a)(1).

■ b. In paragraph (a)(2), by removing the word “and” at the end of the paragraph.

■ c. By redesignating paragraph (a)(3) as paragraph (a)(4).

■ d. By adding new paragraph (a)(3).

■ e. By revising newly redesignated paragraph (a)(4).

The addition and revisions read as follows:

§ 121.6 Exemptions for overlap select agents and toxins.

(a) * * *

(1) Unless directed otherwise by the Administrator, within 7 calendar days after identification of the select agent or toxin, the select agent or toxin is transferred in accordance with § 121.16 or destroyed on-site by a recognized sterilization or inactivation process;

* * * * *

(3) Unless otherwise directed by the Administrator or HHS Secretary, the clinical or diagnostic specimens collected from a patient infected with a select agent are transferred in accordance with § 121.16 or destroyed on-site by a recognized sterilization or inactivation process within 7 calendar days after delivery of patient care by health care professionals has concluded; and

(4) The identification of the agent or toxin is reported to APHIS or CDC, the specimen provider, and to other appropriate authorities when required by Federal, State, or local law by telephone, facsimile, or email. This report must be followed by submission

of APHIS/CDC Form 4 to APHIS or CDC within 7 calendar days after identification.

* * * * *

■ 20. Section 121.7 is amended as follows:

■ a. By redesignating paragraphs (b) through (k) as paragraphs (c) through (l), respectively.

■ b. By adding a new paragraph (b).

■ c. In newly redesignated paragraph (d)(3) introductory text, by redesignating footnote 6 as footnote 8.

■ d. In newly redesignated paragraph (i)(1), by redesignating footnote 7 as footnote 9.

The addition reads as follows:

§ 121.7 Registration and related security risk assessments.

* * * * *

(b) As a condition of registration, each entity is required to be in compliance with the requirements of this part for select agents and toxins listed on the registration regardless of whether the entity is in actual possession of the select agent or toxin. With regard to toxins, the entity registered for possession, use, or transfer of a toxin must be in compliance with the requirements of this part regardless of the amount of toxins currently in its possession.

* * * * *

§ 121.8 [Amended]

■ 21. In § 121.8, footnote 8 is redesignated as footnote 10.

■ 22. Section 121.9 is amended as follows:

■ a. By removing the semicolons at the ends of paragraphs (a)(1) through (4) and “; and” at the end of paragraph (a)(5) and adding periods in their place.

■ b. In paragraph (a)(6), by removing the word “laboratory” and adding the words “registered space” in its place and by adding the words “and the corrections documented” at the end of the second sentence after the words “must be corrected”.

■ c. By adding paragraphs (a)(7), (8), and (9).

The additions read as follows:

§ 121.9 Responsible official.

(a) * * *

(7) Ensure that individuals are provided the contact information for the USDA Office of Inspector General Hotline and the HHS Office of Inspector General Hotline so that they may anonymously report any biosafety/biocontainment or security concerns related to select agents and toxins.

(8) Investigate to determine the reason for any failure of a validated

inactivation procedure or any failure to remove viable select agent from material. If the responsible official is unable to determine the cause of a deviation from a validated inactivation procedure or a viable select agent removal method; or receives any report of any inactivation failure after the movement of material to another location, the responsible official must report immediately by telephone or email the inactivation or viable agent removal method failure to APHIS or CDC.

(9) Review, and revise as necessary, each of the entity's validated inactivation procedures or viable select agent removal methods. The review must be conducted annually or after any change in principal investigator, change in the validated inactivation procedure or viable select agent removal method, or failure of the validated inactivation procedure or viable select agent removal method. The review must be documented and training must be conducted if there are any changes to the validated inactivation procedure, viable select agent removal method, or viability testing protocol.

* * * * *

■ 23. In § 121.10, paragraph (e) is amended by adding a sentence at the end of the paragraph to read as follows:

§ 121.10 Restricting access to select agents and toxins; security risk assessments.

* * * * *

(e) * * * A responsible official must immediately notify the responsible official of the visited entity if the person's access to select agents and toxins has been terminated.

* * * * *

■ 24. Section 121.11 is amended as follows:

■ a. In paragraph (c)(5), by adding the word "keycards," after the word "keys," and by removing the word "numbers" and adding the word "permissions" in its place.

■ b. In paragraph (d)(7)(iv), by removing the word "and".

■ c. By adding paragraph (d)(7)(vi).

■ d. By adding a sentence at the end of paragraph (h).

The additions read as follows:

§ 121.11 Security.

* * * * *

(d) * * *

(7) * * *

(vi) Any loss of computer, hard drive or other data storage device containing information that could be used to gain access to select agents or toxins; and

* * * * *

(h) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 25. Section 121.12 is amended as follows:

■ a. By revising paragraph (a).

■ b. By removing paragraph (c)(2).

■ c. By redesignating paragraph (c)(3) as paragraph (c)(2), and in newly redesignated paragraph (c)(2), removing the words "NIH Guidelines for Research Involving Recombinant DNA Molecules" and adding in their place the words "NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules".

■ d. By adding a sentence at the end of paragraph (e).

The addition and revision read as follows:

§ 121.12 Biosafety.

(a) An individual or entity required to register under this part must develop and implement a written biosafety plan that is commensurate with the risk of the select agent or toxin, given its intended use.¹¹ The biosafety plan must contain sufficient information and documentation to describe the biosafety and containment procedures for the select agent or toxin, including any animals (including arthropods) or plants intentionally or accidentally exposed to or infected with a select agent. The current biosafety plan must be submitted for initial registration, renewal of registration, or when requested. The biosafety plan must include the following provisions:

(1) The hazardous characteristics of each agent or toxin listed on the entity's registration and the biosafety risk associated with laboratory procedures related to the select agent or toxin;

(2) Safeguards in place with associated work practices to protect entity personnel, the public, and the environment from exposure to the select agent or toxin including, but not limited to: Personal protective equipment and other safety equipment; containment equipment including, but not limited to, biological safety cabinets, animal caging systems, and centrifuge safety containers; and engineering controls and other facility safeguards;

(3) Written procedures for each validated method used for disinfection, decontamination, or destruction, as appropriate, of all contaminated or presumptively contaminated materials

including, but not limited to: Cultures and other materials related to the propagation of select agents or toxins, items related to the analysis of select agents and toxins, personal protective equipment, animal caging systems and bedding (if applicable), animal carcasses or extracted tissues and fluids (if applicable), laboratory surfaces and equipment, and effluent material; and

(4) Procedures for the handling of select agents and toxins in the same spaces with non-select agents and toxins to prevent unintentional contamination.

* * * * *

(e) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 26. Section 121.14 is amended as follows:

■ a. In the section heading, by redesignating footnote 10 as footnote 12.

■ b. In paragraph (a), by redesignating footnote 11 as footnote 13, and by adding a sentence at the end of the paragraph.

■ c. In paragraph (f), by adding a sentence at the end of the paragraph.

The additions read as follows:

§ 121.14 Incident response.¹²

(a) * * * The current incident response plan must be submitted for initial registration, renewal of registration, or when requested.

* * * * *

(f) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 27. Section 121.15 is amended as follows:

■ a. By revising paragraph (a).

■ e. By adding paragraph (e).

The addition and revision read as follows:

§ 121.15 Training.

(a) An individual or entity required to register under this part must provide information and training on biocontainment, biosafety, security (including security awareness), and incident response to:

(1) Each individual with access approval from the Administrator or HHS Secretary. The training must address the particular needs of the individual, the

¹¹ Technical assistance and guidance may be obtained by contacting APHIS.

¹² Nothing in this section is meant to supersede or preempt incident response requirements imposed by other statutes or regulations.

work they will do, and the risks posed by the select agents or toxins. The training must be accomplished prior to the individual's entry into an area where a select agent is handled or stored, or within 12 months of the date the individual was approved by the Administrator or the HHS Secretary for access, whichever is earlier.

(2) Each individual not approved for access to select agents and toxins by the Administrator or HHS Secretary before that individual enters areas under escort where select agents or toxins are handled or stored (*e.g.*, laboratories, growth chambers, animal rooms, greenhouses, storage areas, shipping/receiving areas, production facilities, etc.). Training for escorted personnel must be based on the risk associated with accessing areas where select agents and toxins are used and/or stored. The training must be accomplished prior to the individual's entry into where select agents or toxins are handled or stored (*e.g.*, laboratories, growth chambers, animal rooms, greenhouses, storage areas, shipping/receiving areas, production facilities, etc.).

* * * * *

(e) The responsible official must ensure and document that individuals are provided the contact information of the USDA Office of Inspector General Hotline and the HHS Office of Inspector General Hotline so that they may anonymously report any safety or security concerns related to select agents and toxins.

■ 28. Section § 121.16 is amended as follows:

■ a. In paragraph (a), by redesignating footnote 12 as footnote 14.

■ b. By revising paragraph (b) introductory text.

■ c. By adding paragraph (l).

The addition and revision read as follows:

§ 121.16 Transfers.

* * * * *

(b) A transfer may be authorized if:

* * * * *

(l) Transfer the amounts only after the transferor uses due diligence and documents that the recipient has a legitimate need (*e.g.*, prophylactic, protective, bona fide research, or other peaceful purpose) to handle or use such toxins. Information to be documented includes, but is not limited, to the recipient information, toxin and amount transferred, and declaration that the recipient has legitimate purpose to store and use such toxins.

■ 29. Section 121.17 is amended as follows:

■ a. In paragraph (a)(1)(iii), by adding the words "or other storage container" after the word "freezer".

■ b. By revising paragraph (a)(1)(v).

■ c. In paragraph (a)(3)(v), by adding the words "or other storage container" after the word "freezer".

■ d. By removing the word "and" at the end of paragraph (a)(6) and removing the period at the end of paragraph (a)(7) and adding the word "; and" in its place.

■ e. By adding paragraph (a)(8).

■ f. By revising paragraphs (b) and (c).
The addition and revisions read as follows:

§ 121.17 Records.

(a) * * *

(1) * * *

(v) The select agent used, purpose of use, and, when applicable, final disposition;

* * * * *

(8) For select agents or material containing select agents or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a validated inactivation procedure or a procedure for removal of viable select agent:

(i) A written description of the validated inactivation procedure or viable select agent removal method used, including validation data;

(ii) A written description of the viability testing protocol used;

(iii) A written description of the investigation conducted by the entity responsible official involving an inactivation or viable select agent removal failure and the corrective actions taken;

(iv) The name of each individual performing the validated inactivation or viable select agent removal method;

(v) The date(s) the validated inactivation or viable select agent removal method was completed;

(vi) The location where the validated inactivation or viable select agent removal method was performed; and

(vii) A certificate, signed by the principal investigator, that includes the date of inactivation or viable select agent removal, the validated inactivation or viable select agent removal method used, and the name of the principal investigator. A copy of the certificate must accompany any transfer of inactivated or select agent removed material.

(b) The individual or entity must implement a system to ensure that all records and databases created under this part are accurate and legible, have controlled access, and that their authenticity may be verified.

(c) The individual or entity must promptly produce upon request any information that is related to the requirements of this part but is not otherwise contained in a record required to be kept by this section. The location of such information may include, but is not limited to, biocontainment certifications, laboratory notebooks, institutional biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs. All records created under this part must be maintained for 3 years.

Done in Washington, DC, this 10th day of January 2017.

Elvis S. Cordova,

Acting Under Secretary for Marketing and Regulatory Programs.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

[Doc. No. AMS-SC-16-0047; SC16-981-3 FIR]

Almonds Grown in California; Change in Quality Control Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Affirmation of interim rule as final rule.

SUMMARY: The Department of Agriculture (USDA) is adopting, as a final rule, without change, an interim rule implementing a recommendation from the Almond Board of California (Board) that relaxed the quality control requirements prescribed under the California almond marketing order (order). The Board locally administers the order and is comprised of growers and handlers operating within California. The interim rule relaxed incoming quality requirements by increasing the inedible kernel tolerance from 0.50 percent to 2 percent. This relaxation decreases California almond handlers' disposition obligation. This change also allows handlers more flexibility in their operations while continuing to maintain quality control and ensuring compliance with the order's requirements.

DATES: Effective January 20, 2017.

FOR FURTHER INFORMATION CONTACT: Andrea Ricci, Marketing Specialist or Jeffrey Smutny, Regional Director, California Marketing Field Office,

Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (559) 487-5901, Fax: (559) 487-5906, or Email: Andrea.Ricci@ams.usda.gov or Jeffrey.Smutny@ams.usda.gov.

Small businesses may obtain information on complying with this and other marketing order regulations by viewing a guide at the following Web site: <http://www.ams.usda.gov/rules-regulations/moa/small-businesses>; or by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250-0237; Telephone: (202) 720-2491, Fax: (202) 720-8938, or Email: Richard.Lower@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Order No. 981, as amended (7 CFR part 981), regulating the handling of almonds grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Orders 12866, 13563, and 13175.

Section 981.442 of the order regulates almond quality, including the percentage of inedible (low quality) kernels required to be disposed of by handlers. Previously, the weight of inedible kernels in excess of 0.50 percent of kernel weight of almonds received by each handler constituted the handler's disposition obligation. Handlers must satisfy their obligation by disposing of the inedible kernels in Board-accepted, non-human outlets such as animal feed or oil.

In the past several years, total inedible kernel percentages have been trending lower. This is partially due to good agricultural practices used by growers and better technologies in handler facilities. At the same time, the market value of almonds has increased significantly. As a result, some of the Board-accepted outlets have started to clean and repurpose almonds disposed under the obligation causing concern that product is being sold for human consumption without following the order's outgoing quality requirements. Increasing the inedible kernel tolerance to 2 percent provides handlers more control over low quality product, helping ensure any product destined for human consumption is compliant with the order's outgoing quality requirements. In an interim rule

published in the **Federal Register** on August 17, 2016, and effective on August 18, 2016, (81 FR 54719, Doc. No. AMS-SC-16-0047, SC16-981-3 IR), § 981.442(a)(4)(i) was amended by changing the disposition obligation from 0.5 percent to 2 percent. This rule continues in effect that action.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601-612), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 6,800 almond growers in the production area and approximately 100 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts of less than \$750,000, and small agricultural service firms are defined as those whose annual receipts are less than \$7,500,000 (13 CFR 121.201).

The National Agricultural Statistics Service (NASS) reported in its 2012 Agricultural Census that there were 6,841 almond farms in the production area (California), of which 6,204 had bearing acres. The following computation provides an estimate of the proportion of producers (farms) and agricultural service firms (handlers) that would be considered small under the SBA definitions.

The NASS Census data indicates that out of the 6,204 California farms with bearing acres of almonds, 4,471 (72 percent) have fewer than 100 bearing acres.

For the almond industry's most recently reported crop year (2015), NASS reported an average yield of 2,130 pounds per acre, and a season average grower price of \$2.84 per pound. A 100-acre farm with an average yield of 2,130 pounds per acre would produce about 213,000 pounds of almonds. At \$2.84 per pound, that farm's production would be valued at \$604,920. Since Census of Agriculture indicates that the majority of California's almond farms are smaller than 100 acres, it could be

concluded that the majority of growers had annual receipts from the sale of almonds in 2015 of less than \$604,920, which is below the SBA threshold of \$750,000. Thus, over 70 percent of California's almond growers would be considered small growers according to SBA's definition.

According to information supplied by the Board, approximately 30 percent of California's almond handlers shipped almonds valued under \$7,500,000 during the 2014-15 crop year, and would, therefore, be considered small handlers according to the SBA definition.

This rule continues in effect the revision of § 981.442(a)(4)(i), which relaxed incoming quality requirements by increasing the inedible kernel tolerance from 0.50 percent to 2 percent. This relaxation decreases California almond handlers' disposition obligation, and also allows handlers more flexibility in their operations while continuing to maintain quality control and ensuring compliance with the order's requirements. Authority for this action is provided in § 981.42(a) of the order.

Regarding the impact of this action on affected entities, increasing the inedible kernel tolerance reduces disposition obligation on handlers and provides handlers with more flexibility and control over the low quality product. This rule is not expected to change handler inspection costs, as handlers currently are required to have all lots inspected to determine the percentage of inedible kernels.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the order's information collection requirements have been previously approved by the Office of Management and Budget (OMB) and assigned OMB No. 0581-0178 (Vegetable and Specialty Crops.) No changes are necessary in those requirements as a result of this action. Should any changes become necessary, they would be submitted to OMB for approval.

This rule will not impose any additional reporting or recordkeeping requirements on either small or large almond handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

Further, the Board's meeting was widely publicized throughout the almond industry and all interested

persons were invited to attend the meeting and participate in Board deliberations. Like all Board meetings, the April 12, 2016, meeting was a public meeting and all entities, both large and small, were able to express their views on this issue.

Comments on the interim rule were required to be received on or before October 17, 2016. Two comments were received. One commenter stated that this change will allow almond handlers to have more flexibility with their operations. The other commenter stated the increase in tolerance should lead to a decrease in price. Marketing orders do not regulate price. Therefore, for the reasons given in the interim rule, we are adopting the interim rule as a final rule, without change.

To view the interim rule, go to: <https://www.regulations.gov/docket?D=AMS-SC-16-0047>.

This action also affirms information contained in the interim rule concerning Executive Orders 12866, 12988, 13175, and 13563; the Paperwork Reduction Act (44 U.S.C. Chapter 35); and the E-Gov Act (44 U.S.C. 101).

After consideration of all relevant material presented, it is found that finalizing the interim rule, without change, as published in the **Federal Register** (81 FR 54719) will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 981

Almonds, Marketing agreements, Nuts, Reporting and recordkeeping requirements.

PART 981—ALMONDS GROWN IN CALIFORNIA

■ Accordingly, the interim rule that amended 7 CFR part 981 and that was published 81 FR 54719 on August 17, 2016, is adopted as a final rule, without change.

Dated: January 9, 2017.

Bruce Summers,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE 3410-02-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. APHIS-2014-0032]

RIN 0579-AD92

Importation of Beef From a Region in Argentina

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; technical amendment.

SUMMARY: In a final rule published in the **Federal Register** on July 2, 2015, and effective on September 1, 2015, we amended the regulations governing the importation of certain animals, meat, and other animal products to allow, under certain conditions, the importation of fresh (chilled or frozen) beef from a region in Argentina located north of Patagonia South and Patagonia North B, referred to as Northern Argentina. However, we inadvertently limited the requirement for the maturation of carcasses to meat derived from bovines. Therefore, we are amending the paragraph to remove the limitation.

DATES: Effective January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Roberta Morales, Import Risk Analyst, Regional Evaluation Services, National Import Export Services, VS, APHIS, 920 Main Campus Drive, Suite 200, Raleigh, NC; (919) 855-7735; Roberta.A.Morales@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: In a final rule¹ that was published in the **Federal Register** on July 2, 2015 (80 FR 37935-37953, Docket No. APHIS-2014-0032), and effective on September 1, 2015, we amended the regulations governing the importation of certain animals, meat, and other animal products to allow, under certain conditions, the importation of fresh (chilled or frozen) beef from a region in Argentina located north of Patagonia South and Patagonia North B, referred to as Northern Argentina. These requirements appear in 9 CFR 94.29, which provides for the importation of fresh beef and ovine meat from certain regions. However, when we added the requirements, we inadvertently limited the requirements in paragraph (i), which provides the requirements for the maturation of carcasses, to meat derived from bovines.

¹ To view the final rule and supporting documents, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0032>.

Therefore, we are amending the paragraph to remove the limitation.

Lists of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, we are amending 9 CFR part 94 as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, NEWCASTLE DISEASE, HIGHLY PATHOGENIC AVIAN INFLUENZA, AFRICAN SWINE FEVER, CLASSICAL SWINE FEVER, SWINE VESICULAR DISEASE, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

■ 1. The authority citation for part 94 continues to read as follows:

Authority: 7 U.S.C. 450, 7701-7772, 7781-7786, and 8301-8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

§ 94.29 [Amended]

■ 2. In § 94.29, paragraph (i) is amended by removing the word “bovine”.

Done in Washington, DC, this 12th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2016-9319; Airspace Docket No. 16-AGL-24]

RIN 2120-AA66

Amendment of Multiple Air Traffic Service (ATS) Routes; North Central United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, technical amendment.

SUMMARY: The FAA is amending seven high altitude Area Navigation (RNAV) Q-routes (Q-140, Q-816, Q-818, Q-822, Q-824, Q-917, and Q-935) that cross the United States (U.S.)/Canada border in the north central U.S. to update the geographic latitude/longitude coordinates for five Canadian waypoints listed in the Q-route descriptions contained in the FAA and Canadian aeronautical databases.

DATES: Effective date 0901 UTC, April 27, 2017. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call (202) 741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the route structure as required to preserve the safe and efficient flow of air traffic.

History

On September 26, 2014, the FAA published in the **Federal Register** a final rule (79 FR 57758), Docket No. FAA-2014-0295, that amended, removed, and established multiple ATS routes in the north central U.S. to reflect and

accommodate route changes being made in Canadian airspace as part of a Canadian airspace redesign project. On December 5, 2014, the FAA published in the **Federal Register** a final rule, technical amendment (79 FR 72135), Docket No. FAA-2014-0986, that further amended a number of the routes to reflect changes made by NAV CANADA as part of their airspace redesign effort after publication of the original final rule. During a recent aeronautical review, the FAA identified waypoint coordinate updates for the Canadian waypoints OMRAC, PEPLA, TAGUM, TANKO, and VIGLO.

This rule makes the corrections to be in concert with FAA and Canadian aeronautical databases.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

The FAA is amending Title 14, Code of Federal Regulations (14 CFR) part 71 by modifying RNAV routes Q-140, Q-816, Q-818, Q-822, Q-824, Q-917, and Q-935. The route modifications correct the OMRAC, PEPLA, TAGUM, TANKO, and VIGLO waypoint geographic coordinates used in the routes to match the FAA and Canadian aeronautical database information. The amendments ensure safe and efficient across border connectivity.

The RNAV route modifications accomplished by this action are outlined below.

Q-140: Change the PEPLA waypoint geographic coordinates from "lat. 43°47'51.00" N., long. 080°01'02.00" W." to read "lat. 43°47'50.98" N., long. 080°00'53.56" W."

Q-816: Change the OMRAC waypoint geographic coordinates from "lat. 43°16'06.00" N., long. 082°16'25.00" W." to read "lat. 43°16'15.45" N., long. 082°15'52.31" W."

Q-818: Change the TANKO waypoint geographic coordinates from "lat. 43°01'32.00" N., long. 082°22'43.00" W." to read "lat. 43°01'32.48" N., long. 082°23'02.38" W."

Q-822: Change the TANKO waypoint geographic coordinates from "lat. 43°01'32.00" N., long. 082°22'43.00" W."

to read "lat. 43°01'32.48" N., long. 082°23'02.38" W."

Q-824: Change the TAGUM waypoint geographic coordinates from "lat. 43°28'47.00" N., long. 082°10'37.00" W." to read "lat. 43°28'54.05" N., long. 082°09'46.39" W."

Q-917: Change the VIGLO waypoint geographic coordinates from "lat. 45°23'28.00" N., long. 082°25'11.00" W." to read "lat. 45°23'48.00" N., long. 082°25'11.00" W.", and the PEPLA waypoint geographic coordinates from "lat. 43°47'51.00" N., long.

080°01'02.00" W." to read "lat. 43°47'50.98" N., long. 080°00'53.56" W." Q-935: Change the OMRAC waypoint geographic coordinates from "lat. 43°16'06.00" N., long. 082°16'25.00" W." to read "lat. 43°16'15.45" N., long. 082°15'52.31" W."

High altitude United States RNAV Q-routes are published in paragraph 2006 and high altitude Canadian RNAV Q-routes are published in paragraph 2007 of FAA Order 7400.11A dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The high altitude United States and Canadian RNAV Q-routes listed in this rule will be subsequently published in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action of modifying seven high altitude RNAV Q-routes qualifies for categorical exclusion under the National Environmental Policy Act and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures*, Paragraph 5-6.5a, which categorically excludes from further environmental impact review

rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points). This action is not expected to cause any potentially significant environmental impacts. In accordance with FAAO 1050.1F, paragraph 5–2 regarding Extraordinary Circumstances, this action has been reviewed for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis, and it is determined that no extraordinary circumstances exist that

warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016, is amended as follows:

Paragraph 2006 United States Area Navigation Routes.

BILLING CODE 4910-13-P

DEPARTMENT OF COMMERCE**Bureau of Industry and Security****15 CFR Parts 740, 748, and 762**

[Docket No. 161230999–7013–01]

RIN 0694–AH11

Support Document Requirements With Respect to Hong Kong**AGENCY:** Bureau of Industry and Security, Commerce.**ACTION:** Final rule.

SUMMARY: This rule requires persons intending to export or reexport *to* Hong Kong any item subject to the Export Administration Regulations (EAR) and controlled on the Commerce Control List (CCL) for national security (NS), missile technology (MT), nuclear nonproliferation (NP column 1), or chemical and biological weapons (CB) reasons to obtain, prior to such export or reexport, a copy of a Hong Kong import license or a written statement from the Hong Kong government that such a license is not required.

This rule also requires persons intending to reexport *from* Hong Kong any item subject to the EAR and controlled for NS, MT, NP column 1, or CB reasons to obtain a Hong Kong export license or a statement from the Hong Kong government that such a license is not required.

DATES: The rule is effective April 19, 2017.

FOR FURTHER INFORMATION CONTACT: Tracey Patts, Foreign Policy Division, Bureau of Industry and Security, Phone: (202) 482–4252.

SUPPLEMENTARY INFORMATION:**Background**

The government of the Hong Kong Special Administrative Region maintains an import and export control system. The “Import and Export (Strategic Commodities) Regulations” are an integral part of that system. Schedules in those regulations identify articles that may not be imported or exported without a license from Hong Kong’s Director-General of Trade and Industry. Those schedules and much of the CCL are based on the control lists published by four multilateral export control regimes. Export control classification number (ECCN) entries on the CCL identify one or more reason(s) for which listed items are controlled. Four of these reasons for control are based on the four multilateral export control regimes, as follows: The Wassenaar Arrangement on Export Controls for Conventional Arms and

Dual-Use Goods and Technologies (NS on the CCL), the Missile Technology Control Regime (MT on the CCL), the Nuclear Suppliers Group (NP column 1 on the CCL), and the Australia Group (CB on the CCL). Because the Hong Kong schedules and most of the CCL are developed from these same four sources, large portions of both sets of documents cover the same items.

The government of the Hong Kong Special Administrative Region uses information from the import licenses that it issues to identify articles that require an export license. This rule imposes new support documentation requirements affecting items subject to the EAR that are exported or reexported to Hong Kong or are reexported from Hong Kong. BIS is taking this action to provide greater assurance that U.S. origin items that are subject to the multilateral control regimes noted above will be properly authorized by the United States to their final destination, even when those items first pass through Hong Kong. This rule does not impose any new license requirements.

Exports and Reexports to Hong Kong

This rule requires exporters and reexporters using a BIS license or a license exception to export or reexport to Hong Kong items controlled for NS, MT, NP column 1, or CB reasons to obtain certain documents that verify the items’ status under the Hong Kong Import and Export (Strategic Commodities) Regulations. The exporter or reexporter must obtain from its client or consignee a copy of a valid import license issued to the Hong Kong importer by the Hong Kong government authorizing import of the item(s) to be shipped to Hong Kong, or a copy of a written statement issued by the Hong Kong government stating that no import license is required to import the item(s) into Hong Kong. The exporter or reexporter must have the copies in its possession, and any Hong Kong import license must not have expired at the time of the export or reexport to Hong Kong. For purposes of this requirement, a written statement issued by the Hong Kong government includes either a written communication to a license applicant informing the applicant that the item does not require a license or a statement available to the general public (including a statement on a Web site by the Hong Kong government) that a license is not required for the item.

Reexports From Hong Kong

This rule also requires reexporters in Hong Kong intending to reexport from Hong Kong items subject to the EAR that are controlled for NS, MT, NP column

1, or CB reasons to obtain from the Hong Kong government a license authorizing export from Hong Kong of the items, or a copy of a written statement issued by the Hong Kong government stating that no export license is required from Hong Kong to export the items. If a Hong Kong license is issued, the reexport must be in accordance with the terms of that license and must be completed during the validity period of the Hong Kong-issued export license. For purposes of this requirement, a written statement issued by the Hong Kong government includes a written communication to a license applicant informing the applicant that the item does not require a license or a statement available to the general public (including a statement on a Web site by the Hong Kong government) that a license is not required for the item.

Export Administration Act

Since August 21, 2001, the Export Administration Act of 1979, as amended, has been in lapse. However, the President, through Executive Order 13222 of August 17, 2001, 3 CFR, 2001 Comp., p. 783 (2002), as amended by Executive Order 13637 of March 8, 2013, 78 FR 16129 (March 13, 2013), and as extended by the Notice of August 4, 2016, 81 FR 52587 (August 8, 2016), has continued the EAR in effect under the International Emergency Economic Powers Act. BIS continues to carry out the provisions of the Export Administration Act, as appropriate and to the extent permitted by law, pursuant to Executive Order 13222 as amended by Executive Order 13637.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This rule includes an expansion of an existing collection of information approved

under OMB control number 0694–0093—Import Certificate and End-User Certificate, for which the current burden estimates are 5,872 responses and 1,618 hours annually. BIS expects that this rule will increase the number of transactions for which exporters and reexporters will have to acquire support documentation by about 12,000 transactions annually, with a corresponding increase in the number of burden hours. Send comments regarding this burden estimate or any other aspect of this collections of information, including suggestions for reducing the burden, to Jasmeet K. Seehra, Office of Management and Budget, by email at jseehra@omb.eop.gov or by fax to (202) 395–7285 and to Hillary Hess, BIS, at hillary.hess@bis.doc.gov.

3. This rule does not contain policies with Federalism implications as that term is defined under Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public participation, and a 30-day delay in effective date, are inapplicable because this regulation involves a military and foreign affairs function of the United States (5 U.S.C. 553(a)(1)). Therefore, we are issuing this action as a final rule. This action will foster effective administration of and compliance with the export control regulations of the Hong Kong Special Administrative Region with respect to U.S.-origin items. Those regulations apply to items that are listed on the control lists of multilateral export control regimes of which the United States is a member. Effective control over such items imported into Hong Kong by the government of the Hong Kong Special Administrative Region serves the United States' national security and foreign policy interests directly, because many of these items are controlled due to their national security significance or their potential to be used in activities that would promote proliferation of weapons of mass destruction or in regional destabilizing activities.

This rule also enhances the effectiveness of the multilateral control regimes, which serves United States interests in two ways. First, widespread consistent implementation of those regime-based export controls promotes peace and stability throughout the world generally. Second, this rule signals to other nations, regime member states and non-members alike, the United States' determination that distribution of U.S. origin items throughout the world will be in

accordance with its regime commitments.

Moreover, BIS expects that in nearly all instances, this rule requires only that a party in Hong Kong obtain a license that is already required under Hong Kong law. In those instances, no new action is required by persons reexporting from Hong Kong and the only new action with respect to exports and reexports to Hong Kong is for the person in Hong Kong to send a copy of the license to its supplier. In the limited instances where the CCL covers items with one or more of the reasons for control noted above that are not listed on the Hong Kong control, such as when the Hong Kong Government and the United States Government update their control lists in response the changes in the multilateral export control regime lists at different times, the party in Hong Kong will have to obtain a written statement from the Hong Kong Government that a Hong Kong license is not required. However, the rule gives the party in Hong Kong several options for providing the required information. Various documents, including the Hong Kong government's specific response to a license application informing the applicant that a license is not required and more general statements downloaded from a Hong Kong Government Web site, will be adequate to fulfill this requirement. One document may be used for multiple shipments as long as the document remains accurate.

Despite the importance of prompt publication and effectiveness to our foreign policy goals as noted above, BIS recognizes that some exporters and reexporters will need time to obtain the required documentation from their customers for all transactions subject to this rule. Therefore, the effective date of this final rule is ninety days after publication.

List of Subjects

15 CFR Parts 740 and 748

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 762

Administrative practice and procedure, Business and industry, Confidential business information, Exports, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, parts 740, 742, and 762 of the Export Administration Regulations (15 CFR parts 730 through 774) are amended as follows:

PART 740—LICENSE EXCEPTIONS

■ 1. The authority citation for part 740 is revised to read as follows:

Authority: 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 7201 *et seq.*; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

■ 2. In § 740.2, add paragraphs (a)(19) and (20) to read as follows:

§ 740.2 Restrictions on all License Exceptions.

(a) * * *

(19) The exporter or reexporter to Hong Kong of any item subject to the EAR and controlled on the CCL for NS, MT, NP Column 1, or CB reasons has not received one of the following with respect to the item:

(i) A copy of an import license issued to the Hong Kong importer by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers all items to be exported or reexported pursuant to that license exception for which a Hong Kong import license is required and that is valid on the date of the export or reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no import license is required to import into Hong Kong the item(s) to be exported or reexported. The statement may have been issued directly to the Hong Kong importer or it may be a written statement available to the general public. The statement may be used for more than one export or reexport to Hong Kong so long as it remains an accurate statement of Hong Kong law.

(20) The reexporter from Hong Kong of any item subject to the EAR controlled on the CCL for NS, MT, NP column 1, or CB reasons has not received one of the following with respect to the item:

(i) An export license issued by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers all items to be reexported pursuant to that license exception for which a Hong Kong export license is required and that is valid on the date of the reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no Hong Kong export license is required for the item(s) to be reexported.

The statement may have been issued directly to the Hong Kong reexporter or it may be a written statement available to the general public. The statement may be used for more than one reexport from Hong Kong so long as it remains an accurate statement of Hong Kong law.

PART 748—APPLICATIONS (CLASSIFICATION, ADVISORY, AND LICENSE) AND DOCUMENTATION

■ 3. The authority citation for part 748 is revised to read as follows:

Authority: 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

■ 4. 748.9(b) is amended by revising the section heading, revising paragraph (b) and all notes to paragraph (b), and adding two sentences to the end paragraph of (e)(1), to read as follows:

§ 748.9 Support documents for evaluation of foreign parties in license applications and/or for promoting compliance with license requirements.

* * * * *

(b) *Requirements to obtain support documents for license applications.* Unless an exception in paragraph (c) of this section applies, a support document is required for certain license applications for:

(1) The People's Republic of China (PRC) other than the Hong Kong Special Administrative Region (see §§ 748.10 and 748.11(a)(2));

(2) "600 Series Major Defense Equipment" (see § 748.11);

(3) Firearms and related commodities to member countries of the Organization of American States (see § 748.12); and

(4) The Hong Kong Special Administrative Region of the People's Republic of China (see § 748.13).

Note 1 to Paragraph (b): On a case-by-case basis, BIS may require license applicants to obtain a support document for any license application.

Note 2 to Paragraph (b): For End-Use Certificate requirements under the Chemical Weapons Convention, see § 745.2 of the EAR.

* * * * *

(e) * * *

(1) * * * The documents issued by the Government of the Hong Kong Special Administrative region that are required pursuant to § 748.13 are not used to evaluate license applications. They must be obtained before shipment and need not be obtained before submitting a license application.

* * * * *

■ 5. Redesignate § 748.13 as § 748.14 and add new § 748.13 to read as follows:

§ 748.13 Hong Kong import and export licenses.

(a) *Requirement to obtain the document—*(1) *Exports and reexports to Hong Kong.* An exporter or reexporter must obtain the documents described in paragraph (a)(1)(i) or (a)(1)(ii) of this section before using a license issued by BIS to export or reexport to Hong Kong any item subject to the EAR and controlled on the CCL for NS, MT, NP column 1, or CB reasons. Collectively, the documents issued by Hong Kong must cover all of the items to be exported or reexported pursuant to a license.

(i) A copy of an import license issued to the Hong Kong importer by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers the items to be exported or reexported pursuant to that BIS license for which a Hong Kong import license is required and that is valid on the date of the export or reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no import license is required to import into Hong Kong the item(s) to be exported or reexported to Hong Kong. The statement may have been issued directly to the Hong Kong importer or it may be a written statement available to the general public. The statement may be used for more than one export or reexport to Hong Kong so long as it remains an accurate statement of Hong Kong law.

(2) *Reexports from Hong Kong.* No license issued by BIS may be used to reexport from Hong Kong any item subject to the EAR controlled on the CCL for NS, MT, NP column 1, and/or CB reasons unless the reexporter has received either:

(i) An export license issued by the Government of the Hong Kong Special Administrative Region, pursuant to the Hong Kong Import and Export (Strategic Commodities) Regulations, that covers all items to be reexported pursuant to that BIS license for which a Hong Kong export license is required and that is valid on the date of the reexport that is subject to the EAR; or

(ii) A copy of a written statement issued by the Government of the Hong Kong Special Administrative Region that no export license is required from Hong Kong for the item(s) to be reexported. The statement may have been issued directly to the Hong Kong

reexporter or it may be a written statement available to the general public. The statement may be used for more than one reexport from Hong Kong so long as it remains an accurate statement of Hong Kong law.

(b) *Recordkeeping.* The documents required to be obtained by paragraph (a) of this section must be retained and made available to the U.S. Government upon request in accordance with part 762 of the EAR.

PART 762—RECORDKEEPING

■ 6. The authority citation for part 762 continues to read as follows:

Authority: 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

■ 7. In § 762.2 remove the word "and" from the end of paragraph (b)(52); remove the period from the end of paragraph (b)(53) and add in its place a semicolon followed by the word "and"; add paragraph (b)(54) to read as follows:

§ 762.2 Records to be retained.

* * * * *

(b) * * *

(54) § 748.13, Certain Hong Kong import and export licenses.

* * * * *

Dated: January 6, 2017.

Kevin J. Wolf,

Assistant Secretary for Export Admiration.

[Docket No. 170104015–7015–01]

RIN 0694–AH26

Amendments to the Export Administration Regulations Implementing an Additional Phase of India-U.S. Export Control Cooperation

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: In this final rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) to implement the India-U.S. Joint Statement of June 7, 2016 (June Statement), which recognized the United States and India as Major Defense Partners. This rule amends the EAR by establishing a licensing policy of general approval for exports or

reexports to or transfers within India of items subject to the EAR and controlled only for National Security or Regional Stability reasons. In addition, BIS amends the end use and end user provisions of the Validated End User (VEU) authorization to state that items obtained under authorization VEU in India may be used for either civil or military end uses *other* than those that are for use in nuclear, “missile,” or chemical or biological weapons activities.

DATES: This rule is effective January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Alexander Lopes, Director, Office of Nonproliferation Controls and Treaty Compliance, Bureau of Industry and Security, Phone: (202) 482–3825.

SUPPLEMENTARY INFORMATION:

Background

As announced by President Obama and India’s Prime Minister Singh in a U.S.-India Joint Statement on November 8, 2010, the United States and India formally committed to work together to strengthen the global nonproliferation and export control framework and further transform bilateral export control cooperation to realize the full potential of the global strategic partnership between the two countries. The leaders agreed to take mutual steps to expand cooperation in civil space, defense, and other high-technology sectors. The steps agreed to by the United States included the removal of Indian defense and space-related entities from the Entity List (Supplement No. 4 to part 744 of the EAR) and the realignment of India in U.S. export control regulations. Additionally, the 2010 Joint Statement announced that the United States “intend[ed] to support India’s full membership in the four multilateral export control regimes (Nuclear Suppliers Group, Missile Technology Control Regime, Australia Group, and Wassenaar Arrangement) in a phased manner, and to consult with regime members to encourage the evolution of regime membership criteria,” while maintaining these regimes’ core principles, “as the Government of India took steps towards the full adoption of the regimes’ export control requirements to reflect its prospective membership, with both processes moving forward together.”

To date, BIS has published two rules implementing the President’s and Prime Minister’s commitments. The first rule, published on January 25, 2011 (76 FR 4228), revised certain export and reexport controls for India, including

the removal of nine Indian entities from the Entity List. In addition, BIS amended the EAR to remove India from Country Groups D:2, D:3 and D:4, and added India to Country Group A:2.

In the second rule, published January 23, 2015 (80 FR 3463), BIS amended the EAR, in furtherance of the United States’ commitment to the bilateral understanding, by removing India from Crime Control (CC) columns 1 and 3 and from Regional Stability (RS) column 2 on the Commerce Country Chart in Supplement No. 1 to Part 738 of the EAR, because the Government of India had taken appropriate steps to ensure that U.S.-origin items controlled for CC and RS reasons are not reexported from India without a license. Although the second rule removed the license requirement for the majority of items controlled for CC or RS reasons and destined for India, a license requirement remained for items controlled under export control classification numbers (ECCNs) 6A003.b.4.b and 9A515.e for RS column 2 reasons when destined to India.

In addition, BIS published on August 17, 2016, a third rule (81 FR 54721) that was not specific to the bilateral understanding but nonetheless removed a related requirement to include a destination control statement on shipping documents for items controlled for CC columns 1 and 3, and RS column 2 reasons when the items are exported to India.

New Amendments

In this rule, BIS implements an additional step in furtherance of the U.S.-India bilateral understanding and global strategic partnership. On June 7, 2016, the United States and India issued a Joint Statement entitled, “The United States and India: Enduring Global Partners in the 21st Century.” Specifically, in this rule, BIS implements the understanding between the United States and India expressed in the June Statement regarding U.S. export control policy toward India by establishing a new paragraph (b)(8) in § 742.4 (National Security) and a new paragraph (b)(5) in § 742.6 (Regional Stability). These new provisions establish licensing policies of general approval for exports or reexports to or transfers within India of items subject to the EAR, including “600 series” military items, for civil or military end uses in India or for the ultimate end use by the Government of India, for reexport to a Country Group A:5 country, or for return to the United States, so long as such items are not for use in nuclear, “missile,” or chemical or biological weapons activities. This rule does not

amend any other licensing policies in part 742 such as those with respect to Missile Technology items. The rule also does not amend any licensing policies pertaining to naval nuclear propulsion. The Country Group A:5 countries are listed in Supplement Number 1 to part 740 and are often informally referred to as the “STA–36” countries because they are the list of countries to which exports under License Exception Strategic Trade Authorization are authorized pursuant to the conditions and limitations of section 740.20(b)(3).

In addition, BIS amends the end user and end use provisions of the Validated End User (VEU) authorization in § 748.15 (Authorization Validated End-User (VEU)), paragraphs (a) (eligible end user provision) and (d) (end-use restrictions), to allow that items obtained under authorization VEU in India may be used for civil or military end uses other than those that involve items controlled for MT reasons, or if for use in nuclear, “missile,” or chemical or biological weapons activities. Section 748.15(c) does not change the January 23, 2015 (80 FR 3463), amendment to the EAR regarding the export and reexport of Crime Control (CC) columns 1 and 3 items to India. Conforming changes are made to paragraph (7)(ii) in Supplement No. 8 to Part 748 (Information Required in Requests for Validated End-User (VEU) Authorization). No other material changes are made in this rule to the VEU program, such as the process for approving a VEU, VEU compliance obligations, the rules pertaining to VEUs in China, or the process of identifying approved VEUs and eligible items and facilities in Supplement No. 7 to Part 748.

Export Administration Act

Although the Export Administration Act expired on August 20, 2001, the President, through Executive Order 13222 of August 17, 2001, 3 CFR, 2001 Comp., p. 783 (2002), as amended by Executive Order 13637 of March 8, 2013, 78 FR 16129 (March 13, 2013), and as extended most recently by the Notice of August 4, 2016, 81 FR 52587 (August 8, 2016), has continued the EAR in effect under the International Emergency Economic Powers Act. BIS continues to carry out the provisions of the Export Administration Act, as appropriate and to the extent permitted by law, pursuant to Executive Order 13222 as amended by Executive Order 13637.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and

benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) control number. This rule involves a collection of information approved under OMB control number 0694-0088—Simplified Network Application Process—Redesign System (SNAP-R) and the Multipurpose Export License Application, which carries an annual estimated burden of 31,833 hours. BIS believes that this rule will not have a material impact on that burden because this rule does not increase or decrease BIS's existing licensing requirements. To the extent that it has any impact, BIS believes that the benefits of this rule justify any additional (and likely minimal) additional burden it might create. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Jasmeet K. Seehra, Office of Management and Budget, by email at jseehra@omb.eop.gov or by fax to (202) 395-7285.

3. This rule does not contain policies with Federalism implications as that term is defined under Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking and the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military or foreign affairs function of the United States (*see* 5 U.S.C. 553(a)(1)). This rule advances essential foreign policy, national security, and nonproliferation goals of the United States and a critical strategic partner, India. Subsequent agency deliberations following the June Statement culminated in this framework

for regulatory implementation of the Statement. Delay in implementing this rule to obtain public comment or for any other reason would undermine the good faith timeliness in which the United States signed, and now implements, the Statement and, therefore, would undermine the foreign policy objectives that the rule is intended to serve. Further, no other law requires that a notice of proposed rulemaking or an opportunity for public comment be given for this rule. Because a notice of proposed rulemaking and an opportunity for public comment are not required for this rule under 5 U.S.C. 553, or by any other law, the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable.

List of Subjects

15 CFR Part 742

Exports, Terrorism.

15 CFR Part 748

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

Accordingly, 15 CFR parts 742 and 748 of the EAR (15 CFR parts 730 through 774) are amended as follows:

PART 742—CONTROL POLICY—CCL BASED CONTROLS

■ 1. The authority citation for 15 CFR part 742 continues to read as follows:

Authority: 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 12, 2015, 80 FR 70667 (November 13, 2015); Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

■ 2. Section 742.4 is amended by adding paragraph (b)(8) to read as follows:

§ 742.4 National security.

* * * * *

(b) * * *

(8) For India, there is a general policy of approval for license applications to export, reexport, or transfer items, including “600 series” items, for civil or military end uses in India, for ultimate end use by the Government of India, for reexport to countries in Country Group A:5, or for return to the United States, so long as such items are not for use in

nuclear, “missile,” or chemical or biological weapons activities.

* * * * *

■ 3. Section 742.6 is amended by adding paragraph (b)(7) to read as follows:

§ 742.6 Regional Stability.

* * * * *

(b) * * *

(7) For India, there is a general policy of approval for license applications to export, reexport, or transfer items, including “600 series” items, for civil or military end uses in India, for ultimate end use by the Government of India, for reexport to countries in Country Group A:5, or for return to the United States, so long as such items are not for use in nuclear, “missile,” or chemical or biological weapons activities.

* * * * *

PART 748—APPLICATIONS (CLASSIFICATION, ADVISORY, AND LICENSE) AND DOCUMENTATION

■ 4. The authority citation for 15 CFR part 748 continues to read as follows:

Authority: 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 12, 2015, 80 FR 70667 (November 13, 2015); Notice of August 4, 2016, 81 FR 52587 (August 8, 2016).

■ 5. Section 748.15 is amended by revising paragraphs (a)(2) and (d) introductory text to read as follows:

§ 748.15 Authorization Validated End-User (VEU).

* * * * *

(a) * * *

(2) In evaluating an end user for eligibility under authorization VEU, the ERC will consider a range of information, including such factors as: The entity's record of exclusive engagement in appropriate end-use activities; the entity's compliance with U.S. export controls; the need for an on-site review prior to approval; the entity's capability of complying with the requirements of authorization VEU; the entity's agreement to on-site reviews by representatives of the U.S. Government to ensure adherence to the conditions of the VEU authorization; and the entity's relationships with U.S. and foreign companies. In addition, when evaluating the eligibility of an end user, the ERC will consider the status of

export controls and the support and adherence to multilateral export control regimes of the government of the eligible destination.

* * * * *

(d) *End-use restrictions.* Items obtained under authorization VEU in China may be used only for civil end uses and may not be used for any activities described in part 744 of the EAR. Items obtained under authorization VEU in India may be used for either civil or military end uses and may not be used for any activities described in part 744 of the EAR. Exports, reexports, or transfers made under authorization VEU may be made to an end user listed in Supplement No. 7 to this part only if the items will be consigned to and for use by the validated end user. Eligible end-users who obtain items under VEU may only:

* * * * *

■ 6. Paragraph (7)(ii) of the section titled *Required Information for Validated End-User Authorization Requests* in Supplement No. 8 to part 748 is revised to read as follows:

**Supplement No. 8 to Part 748—
Information Required in Requests for
Validated End-User (VEU)
Authorization**

* * * * *

*Required Information for Validated End-User
Authorization Requests*

* * * * *

(7) * * *

(ii) Understands and will abide by all authorization VEU end-use restrictions, including the requirement that items received under authorization VEU will only be used for authorized end-uses and may not be used for any activities described in part 744 of the EAR;

* * * * *

Dated: January 6, 2017.

International Affairs; Antarctic Marine Living Resources Convention Act

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule sets forth changes to the regulations that implement conservation measures adopted by the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR or Commission). This final rule streamlines and clarifies the regulations for Antarctic marine living resources, shifts deadlines for advance notice of intended fishing activities, distinguishes between first receivers and dealers of Antarctic marine living resources (AMLR), reduces the time for advance notice of imports of *Dissostichus* species, and adds transshipment notification requirements. The sections of these regulations are reorganized to group requirements related to the trade of Antarctic marine living resources and those that apply to fishing activities. Additionally, this action updates the regulations to reflect Commission-adopted revisions to existing conservation measures and changes made to the Antarctic Marine Living Resources Convention Act through the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015.

DATES: This rule is effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Mi Ae Kim, Office of International Affairs and Seafood Inspection, NMFS (phone 301-427-8365, or email mi.ae.kim@noaa.gov).

SUPPLEMENTARY INFORMATION:

Background

The United States is a Contracting Party to the Convention on the Conservation of Antarctic Marine Living Resources (Convention). Under Article VII of the Convention, contracting parties established and agreed to maintain the Commission to give effect to the Convention's objective—conservation of AMLR. The United

States, along with 23 other countries and the European Union, are members of the Commission and meet annually to formulate, adopt and revise conservation measures. Article IX(6) of the Convention requires the Commission to notify conservation measures to all members and, 180 days thereafter, such measures become binding. If a member objects to a measure within 90 days of notification, the measure is not binding on that member and, should that occur, Article IX(6)(d) of the Convention includes a procedure that allows other members to notify that they can no longer accept that measure.

The Antarctic Marine Living Resources Convention Act of 1984 (AMLRCA), codified at 16 U.S.C. 2431, *et seq.*, provides the statutory authority for the United States to carry out its obligations under the Convention, including implementation of Commission-adopted conservation measures. AMLRCA section 305(a)(1) authorizes the Secretary of State, with the concurrence of the Secretary of Commerce and the Director of the National Science Foundation, to decide whether the United States is unable to accept or can no longer accept a Commission-adopted conservation measure (16 U.S.C. 2434(a)(1)). AMLRCA also gives the Secretary of Commerce authority to promulgate regulations as necessary and appropriate to implement the Act. This authority has been delegated to the Assistant Administrator for Fisheries (Assistant Administrator), who has implemented Commission-adopted conservation measures that are binding on the United States under Article IX of the Convention through regulations at 50 CFR part 300, subpart G (AMLR regulations).

Through the “Illegal, Unreported, and Unregulated Fishing Enforcement Act” (IUU Fishing Enforcement Act), Public Law 114–81 (2015), Congress amended AMLRCA section 306, 16 U.S.C. 2435, which specifies unlawful activities; section 307, 16 U.S.C. 2436, which provides the Secretary of Commerce authority to promulgate regulations that are necessary and appropriate to implement AMLRCA; and section 308(a), 16 U.S.C. 2437(a), which specifies the penalties available for violations of the Act. Public Law 114–81 (2015), Title I, 106(1)–(2).

At each annual meeting, the Commission may adopt new conservation measures or revise existing measures. While all conservation measures are subject to revision at the annual meeting, some (particularly those in the fishery regulation category)

expire after one or two fishing seasons and so must be revised annually or biennially, to reflect management or monitoring needs identified during Commission deliberations, changes in catch limits or bycatch limits, or other considerations.

Through this action, NMFS reorganizes, streamlines, and updates the regulations that implement AMLRCA and Commission-adopted conservation measures. These revisions incorporate regulatory changes that were finalized on August 3, 2016 (80 FR 51126) regarding the collection of trade documentation within the government-wide International Trade Data System and required electronic information collection. Certain sections are rearranged so that regulations applicable to the trade of AMLR are grouped together while other sections that are obsolete are removed. This action removes sections that implement annual measures which will be implemented through vessel permits if applicable to the permitted fishing activities.

On July 21, 2016, NMFS published a notice of proposed rulemaking for this action (81 FR 47325) to reorganize and update the regulations implementing U.S. obligations under the Convention. The preamble of the proposed rule (81 FR 47325) provides a detailed description of the changes to these regulations as well as NMFS's implementation of annual or biennial measures as conditions to vessel permits instead of through regulations. Responses to public comments received on the proposed rule are set forth below.

Changes From the Proposed Rule

With the exception of minor, non-substantive editorial corrections, this final rule includes no changes to the regulatory text that was published in the proposed rule.

Responses to Public Comments

NMFS received two public comments on the proposed rule which are addressed below.

CCAMLR Ecosystem Monitoring Program Sites

Comment 1: A commenter expressed concern over the removal of the list of CCAMLR Ecosystem Monitoring Program (CEMP) sites from the regulations.

Response: This final rule removes the list of CEMP sites because these sites (Seal Islands, South Shetland Islands and Cape Shirreff and the San Telmo Islands) are no longer protected under CCAMLR conservation measures. The Scientific Committee advised during the 2007 meeting of the Commission that:

“because research on the Seal Island CEMP site was no longer undertaken, Conservation Measure 91–03 should be discontinued.” As a result, the Commission discontinued Conservation Measure 91–03 (Report of the Twenty-Sixth Meeting of the Commission: Paragraphs 7.1 and 7.2). Similarly, during the 2009 meeting of the Commission, upon advice from the Scientific Committee, the Commission rescinded Conservation Measure 91–02 (Protection of the Cape Shirreff CEMP site) to avoid duplication of effort on the part of researchers, national governments and the secretariats of CCAMLR and Antarctic Treaty System and noting that the site would continue to be protected under the management plan of an Antarctic Specially Protected Area (ASPA) (Report of the Twenty-Eighth Meeting of the Commission: Paragraph 12.5). ASPAs, as well as Antarctic Specially Managed Areas (ASMAs) are designated and managed under the Antarctic Treaty, and CCAMLR cooperates in implementing these designations and management plans by having Contracting Parties ensure that their fishing vessels are aware of the location and relevant management plan of all designated ASPAs and ASMAs.

Regulatory Structure

Comment 2: NMFS received a comment from United States Seafoods, LLC suggesting that NMFS consider its experience on managing fisheries under the Magnuson-Stevens Fishery Conservation and Management Act (MSA) to establish a stable regulatory environment for U.S. vessels that intend to fish in the CCAMLR Convention Area.

Response: U.S. fishing vessels have not operated within the Convention Area for over a decade. For U.S. vessels interested in fishing in the Convention Area, NMFS established procedures and requirements under the AMLR regulations and, through this rulemaking, makes improvements to that regulatory framework. One improvement is that, under this rule, NMFS may implement annual and biennial measures adopted by CCAMLR as conditions to vessel permits instead of through regulations. Given the short time period between the adoption of new measures by CCAMLR in the fall and the start of the fishing season on December 1, this approach will make the regulatory process more efficient for U.S. vessels and NMFS.

Section 300.101 of the rule defines “annual or biennial measure” as a conservation measure that: (1) Applies to the operation of the Convention’s

commercial or exploratory fisheries such as gear, catch, and effort restrictions and time and area closures; (2) generally expires after one or two fishing season(s); and (3) does not require the development of policy options or a regulatory framework. This approach will apply only to conservation measures that do not require the development of policy options or a regulatory framework. NMFS will provide for notice-and-comment rulemaking when implementation of a conservation measure implicates other requirements of domestic law or when NMFS needs to interpret or expand upon a conservation measure.

Under this final rule, an application for a vessel permit must be submitted by April 1 for the fishing season that will commence on or after December 1 of that year. Therefore, as part of the vessel permit application process and through the permit itself once issued by NMFS, the applicant would have notice of applicable measures in advance of the start of the fishing season. Moreover, annual and biennial measures, along with all CCAMLR conservation measures currently in force are updated every year following the Commission’s annual meeting and made available on the Commission’s Web site, www.ccamlr.org and are, therefore, available to all interested members of the public, including prospective participants in CCAMLR fisheries. NMFS may reconsider its approach to implementation of annual and biennial measures if participation by U.S. fishing vessels in CCAMLR fisheries increases.

Classification

This rule is published under the authority of Antarctic Marine Living Resources Convention Act, codified at 16 U.S.C. 2431 *et seq.*

Regulatory Flexibility Act (RFA)

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) at the proposed rule stage that this rule is not expected to have a significant economic impact on a substantial number of small entities (81 FR 47330, July 21, 2016). The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis is not required and none has been prepared.

Paperwork Reduction Act

This rule contains a Paperwork Reduction Act (PRA) collection-of-

information approved by the Office of Management and Budget (OMB) under control number 0648–0194. The table appearing at 15 CFR part 902 is updated to reflect the reorganization of regulations under this final rule. The current, approved collection of information includes permit applications (CEMP, vessel permit, dealer permit, and pre-approval of toothfish imports), vessel and gear marking requirements, installation of and reporting through a vessel monitoring unit, import tickets, and other items.

This rule also contains a new PRA collection-of-information that requires advance notification of transshipments of AMLRs, bait, fuel, or other goods and materials to the CCAMLR Secretariat and submission of a confirmation of the notification to NMFS Headquarters, including information on the vessels involved in the transshipment and the details of the materials being transshipped. The new information collection requirements have been approved by OMB under control number 0648–0742.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

List of Subjects

15 CFR Part 902

Reporting and recordkeeping requirements.

50 CFR Part 300

Antarctica, Antarctic marine living resources, Catch documentation scheme, Fisheries, Fishing, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: January 5, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 15 CFR part 902 and 50 CFR part 300 as follows:

TITLE 15: COMMERCE AND FOREIGN TRADE

PART 902—NOAA INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL NUMBERS

■ 1. The authority citation for part 902 continues to read as follows:

Authority: 44 U.S.C. 3501 *et seq.*

■ 2. In § 902.1, the table in paragraph (b) under “50 CFR” is amended by removing the entries for 300.103(a), 300.104(d), 300.104(e), 300.105(c), 300.106(e), 300.107, 300.108(a), 300.108(c), 300.112, and 300.113 and adding entries in numeric order to read as follows:

§ 902.1 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

CFR part or section where the information collection requirement is located	Current OMB control number (all numbers begin with 0648–)
50 CFR:	
300.103(b) and (c)	–0194
300.104	–0194
300.105	–0194
300.106	–0194
300.107(c) and (l)	–0194
300.107(k)	–0724
300.108	–0194
300.109(c)	–0194
300.110(e)	–0194
300.111	–0194
300.112	–0194
300.113(a)	–0194

Title 50: Wildlife and Fisheries

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 3. The authority citation for part 300 continues to read as follows:

Authority: 16 U.S.C. 951 *et seq.*, 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 5501 *et seq.*, 16 U.S.C. 2431 *et seq.*, 31 U.S.C. 9701 *et seq.*

■ 4. Revise subpart G to read as follows:

Subpart G—Antarctic Marine Living Resources

Sec.	
300.100	Purpose and scope.
300.101	Definitions.
300.102	Relationship to other treaties, conventions, laws, and regulations.
300.103	Scientific research.
300.104	International Fisheries Trade Permits and AMLR first receiver permits.
300.105	Preapproval for importation of frozen <i>Dissostichus</i> species.
300.106	Catch Documentation Scheme (CDS) documentation and other requirements.
300.107	Vessel permits and requirements.
300.108	Vessel and gear identification.
300.109	Initiating a new fishery.

300.110	Exploratory fisheries.
300.111	Scientific observers.
300.112	Vessel monitoring system.
300.113	CCAMLR Ecosystem Monitoring Program sites.
300.114	Prohibitions.
300.115	Facilitation of enforcement and inspection.
300.116	Penalties.

Subpart G—Antarctic Marine Living Resources

Authority: 16 U.S.C. 2431 *et seq.*, 31 U.S.C. 9701 *et seq.*

§ 300.100 Purpose and scope.

(a) This subpart implements the Antarctic Marine Living Resources Convention Act of 1984 (AMLRCA or Act), 16 U.S.C. 2431 *et seq.*

(b) This subpart regulates—

(1) The harvesting of Antarctic marine living resources and other associated activities by any person subject to the jurisdiction of the United States or by any vessel of the United States.

(2) The import, export, and re-export into the United States of any Antarctic marine living resource.

§ 300.101 Definitions.

In addition to the terms defined in § 300.2, in the Act, and in the Convention on the Conservation of Antarctic Marine Living Resources, done at Canberra, Australia, May 7, 1980 (Convention) the terms used in this subpart have the following meanings for purposes of this subpart. If a term is defined differently in § 300.2, than in the Act, or Convention, the definition in this section shall apply.

ACA means the Antarctic Conservation Act of 1978 (16 U.S.C. 2401, *et seq.*).

Annual or biennial measure means a conservation measure that:

(1) Applies to the operation of the Convention's commercial or exploratory fisheries such as gear, catch, and effort restrictions and time and area closures;

(2) Generally expires after one or two fishing season(s); and

(3) Does not require the development of policy options or a regulatory framework.

Antarctic convergence means a line joining the following points along the parallels of latitude and meridians of longitude:

Lat.	Long.
50° S	0.
50° S	30° E.
45° S	30° E.
45° S	80° E.
55° S	80° E.
55° S	150° E.
60° S	150° E.

Lat.	Long.
60° S	50° W.
50° S	50° W.
50° S	0.

Antarctic marine living resources or AMLR(s) means:

(1) The populations of finfish, mollusks, crustaceans, and all other species of living organisms, including birds, found south of the Antarctic Convergence;

(2) All parts or products of those populations and species set forth in paragraph (1) of this definition.

Centralized Vessel Monitoring System (C-VMS) means the system operated by the Secretariat of CCAMLR that receives reports of positional and other information from satellite-linked mobile transceiver units located on vessels that are submitted to the CCAMLR Secretariat, either directly from the vessel or through the relevant flag State.

Commission or CCAMLR means the Commission for the Conservation of Antarctic Marine Living Resources established under Article VII of the Convention.

Convention Area means all waters south of the Antarctic Convergence.

Dealer means a person who imports AMLRs into, or exports or re-exports AMLRs from, the United States.

Dissostichus catch document (DCD) is a document generated through CCAMLR's electronic catch documentation scheme (CDS), containing information relating to the harvest, landing, and transshipment of *Dissostichus* species.

Dissostichus export document (DED) is a document generated through the CCAMLR's electronic CDS, containing information relating to the export of *Dissostichus* spp.

Dissostichus re-export document (DRED) is a document generated through CCAMLR's electronic CDS, containing information relating to the re-export of *Dissostichus* spp.

Dissostichus species or *Dissostichus* spp. means Patagonian toothfish and Antarctic toothfish, and any parts or products therefrom.

Enhanced mobile transceiver unit or EMTU means a transceiver or communication device, including all hardware and software, carried and operated on a vessel as part of a vessel monitoring system.

Export means any movement of fish or fish product from a territory under the control of the State or free trade zone of landing, or where that State or free trade zone forms part of a customs union, any other Member State of that customs union.

First receiver means the person who first receives AMLRs landed from a vessel licensed under 50 CFR 300.107 at a U.S. port.

Fish means finfish, mollusks, and crustaceans.

Fishery means:

(1) One or more stocks of fish that are treated as a unit for purposes of conservation and management and that are identified on the basis of geographical, scientific, technical, recreational, and economic characteristics.

(2) Any fishing for such stocks.

Harvesting vessel means any vessel of the United States (including any boat, ship, or other craft), that is used for, equipped to be used for, or of a type that is normally used for harvesting.

Import means the physical entering or bringing of a fish or fish product into any part of the geographical territory under the control of a State, except where the catch is landed or transshipped within the definitions of landing or transshipment.

Individual permit means a National Science Foundation (NSF) permit issued under 45 CFR part 670; or an NSF award letter (demonstrating that the individual has received an award from NSF to do research in the Antarctic); or a marine mammal permit issued under § 216.31 of this chapter; or an endangered species permit issued under § 222.21 of this chapter.

Inspection vessel means a vessel carrying a CCAMLR inspector and displaying the pennant approved by CCAMLR to identify such vessel.

International observer means a scientific observer operating in accordance with the CCAMLR Scheme of International Scientific Observation and the terms of a bilateral arrangement concluded between the United States and another member of CCAMLR for the placement of a U.S. national onboard a vessel flagged by another member of CCAMLR or for the placement of the national of another member of CCAMLR onboard a vessel of the United States.

Land or Landing means to begin offloading any fish, to arrive in port with the intention of offloading any fish, or to cause any fish to be offloaded. However, for purposes of catch documentation as provided for in § 300.106, land or landing means the initial unloading or transfer of *Dissostichus* spp. in any form from a vessel to dockside even if such fish are subsequently transferred to a container or to another vessel in a port or free trade zone.

National observer means a U.S. national placed and operating onboard a

vessel of the United States as a scientific observer in accordance with § 300.111.

National Seafood Inspection Laboratory means the NMFS laboratory located at 3209 Frederic Street, Pascagoula, MS 39567, telephone (228) 769-8964, email PTFReporting@noaa.gov.

Office of Law Enforcement (OLE) refers to the NOAA Office of Law Enforcement.

Port-to-port means from the time the vessel leaves port to the time that the vessel returns to port and at all points in between.

Real-time means as soon as possible, but at least every hour with no more than a 1-hour delay.

Recreational fishing means fishing with hook and line for personal use and not for sale.

Re-export means any movement of a fish or fish product from a territory under the control of a State, free trade zone, or Member State of a customs union of import unless that State, free trade zone, or any Member State of that customs union is the first place of landing, in which case the movement is an export within the definition of export.

Seal excluder device means a barrier within the body of a trawl comprised of a metal frame, nylon mesh, or any material that results in an obstruction to seals between the mouth opening and the cod end of the trawl. The body of the trawl net forward of the barrier must include an escape opening through which seals entering the trawl can escape.

Specially Validated Dissostichus Catch Document (SVDCD) means a *Dissostichus* catch document that has been specially issued by a State to accompany seized or confiscated *Dissostichus* spp. offered for sale or otherwise disposed of by the State.

Transship or transshipment means the transfer of fish or fish products, other AMLRs, or any other goods or materials directly from one vessel to another. However, for purposes of catch documentation as provided for in § 300.106, transship or transshipment means the transfer of *Dissostichus* spp. that has not been previously landed, from one vessel directly to another, either at sea or in port.

Vessel Monitoring System (VMS) means a system that uses satellite-linked EMTUs installed on vessels to allow a flag State or other entity to receive automatic transmission of positional and other information related to vessel activity.

§ 300.102 Relationship to other treaties, conventions, laws, and regulations.

(a) Other conventions and treaties to which the United States is a party and other Federal statutes and implementing regulations may impose additional restrictions on the harvesting and importation into the United States of AMLRs.

(b) The ACA implements the Antarctic Treaty Agreed Measures for the Conservation of Antarctic Fauna and Flora (12 U.S.T. 794). The ACA and its implementing regulations (45 CFR part 670) apply to certain defined activities of U.S. citizens south of 60° S. lat.

(c) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 *et seq.*), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Migratory Bird Treaty Act (16 U.S.C. 701 *et seq.*), and their implementing regulations also apply to the harvesting and importation of AMLRs.

(d) Rule making exceptions. When implementing conservation measures adopted and notified by CCAMLR, NMFS may apply the following exceptions to Administrative Procedure

Act (APA) rulemaking requirements at 5 U.S.C. 553(b)–(d):

(1) The foreign affairs function exception of the APA, 5 U.S.C. 553(a)(1); or

(2) The exception under subsection 307(b) of AMLRCA, 16 U.S.C. 2436(b), that provides that, notwithstanding 5 U.S.C. 553(b)–(d), NMFS may publish in the **Federal Register** a final regulation to implement any CCAMLR-adopted conservation measure—

(i) That has been in effect for 12 months or less, beginning on the date that the Commission notifies the United States of the conservation measure under Article IX of the Convention; and

(ii) With respect to which the Secretary of State does not notify the Commission in accordance with section 305(a)(1) of AMLRCA within the time period allotted for objections under Article IX of the Convention.

(e) Annual or biennial measures. NMFS may implement annual or biennial measures adopted by CCAMLR as conditions to vessel permits issued under section 300.107, instead of through rulemaking.

§ 300.103 Scientific research.

(a) This section applies to any person, using a vessel for research purposes, who intends to catch more than 1 tonne of finfish or krill or use gear other than longline, trawl, or pot to catch *Dissostichus* spp.

(b) Any person planning to use a vessel for research purposes, when the estimated research catch is expected to be less than 50 tonnes of finfish in a season, and no more than the amounts specified in Table 1, must notify the Assistant Administrator at least 2 months in advance of the planned research using the CCAMLR Format for Notification of Research Vessel Activity, Format 1. A copy of the format is available from NMFS Headquarters. The format requires:

- (1) Name and registration number of vessel;
- (2) Division and subarea in which research is to be carried out;
- (3) Estimated dates of entering and leaving the Convention Area;
- (4) Purposes of research; and
- (5) Fishing equipment to be used (bottom trawl, midwater trawl, longline, crab pots, other).

TABLE 1—TAXA-SPECIFIC THRESHOLDS FOR NOTIFICATION OF RESEARCH VESSEL ACTIVITY

Taxon	Gear type	Expected catch
Thresholds for finfish taxa:		
<i>Dissostichus</i> spp	Longline	5 tonnes.
	Trawl	5 tonnes.
	Pot	5 tonnes.
	Other	0 tonnes.
<i>Champscephalus gunnari</i>	All	10 tonnes.
Thresholds for non-fish taxa:		
Krill	All	0.1 percent of the catch limit for a given area.
Squid.		
Crabs.		

(c) Any person planning to use any vessel for research purposes, when the estimated research catch is expected to be more than 50 tonnes or greater than the amounts specified in Table 1 must report the details of the research plan to NMFS using CCAMLR Format 2 for Notification of Research Vessel Activity. The format must be submitted to Assistant Administrator at least 7 months in advance of the planned start date for the research. A copy of the format is available from NMFS Headquarters. The format requires:

- (1) Description of the main objective of the research;
- (2) Description of the fishery operations;
- (3) Description of the survey design, data collection, and analysis;
- (4) Proposed catch limit;

(5) Description of the research capability; and

(6) Description of the reporting for evaluation and review.

(d) Where the expected catch is more than 50 tonnes of fish or greater than the amounts specified in Table 1, the planned fishing for research purposes shall not proceed until the Assistant Administrator authorizes the person in writing that he or she may proceed. Such authorization may be provided after completion of review of the scientific research plan by the CCAMLR Scientific Committee and Commission.

(e) A summary of the results of any research subject to these provisions must be provided to the Assistant Administrator within 150 days of the completion of the research and a full report must be provided within 11 months.

(f) Catch, effort, and biological data resulting from the research must be reported using the reporting format for research vessels in accordance with relevant conservation measures, with a copy to NMFS Headquarters.

§ 300.104 International Fisheries Trade Permits and AMLR first receiver permits.

(a) *General.* (1) A person may import, export, or re-export AMLR into the United States only under a NMFS-issued International Fisheries Trade Permit (IFTP). For AMLRs to be released for entry into the United States, the product must be accompanied by a vessel permit, individual permit, AMLR first receiver permit, or IFTP.

(2) All shipments of *Dissostichus* spp. must also be accompanied by accurate, complete and valid CDS documentation (including all required validations and

DEds/DREds) as described in § 300.106, and, in the case of shipments of frozen *Dissostichus* species, a preapproval certificate issued under § 300.105, as well as verifiable information that the harvesting vessel was reporting to C-VMS from port-to-port, regardless of where the fish were harvested. For purposes of entry of *Dissostichus* spp. into the United States, NMFS will only accept electronic CDS documents described in § 300.106.

(3) Imports of fresh or frozen *Dissostichus* spp. accompanied by an SVDCD are prohibited.

(b) *International Fisheries Trade Permit*. A person intending to import, export, or re-export AMLR must possess a valid IFTP issued under § 300.322 and file required data sets electronically with Customs and Border Protection (CBP) at the time, or in advance, of importation, exportation or re-exportation. "Required data set" has the same meaning as § 300.321 (see definition of "Documentation and data sets required"). See § 300.322 for IFTP application procedures and permit regulations. The IFTP holder may only conduct those specific activities stipulated by the IFTP.

(c) *AMLR First Receiver Permits*. (1) *General*. First receivers of AMLR catch landed from a vessel permitted under § 300.107 at a U.S. port of landing must possess an AMLR first receiver permit and may only conduct those activities described in the permit. A person issued, or required to have been issued a first receiver permit under this subpart may only receive fish from a U.S. vessel that has a valid vessel permit issued under § 300.107 as well as a valid High Seas Fishing Permit issued under 50 CFR part 300, subpart R.

(2) *Application*. Applications for the AMLR first receiver permit are available from NMFS Headquarters.

(3) *Issuance*. NMFS may issue an AMLR first receiver permit if the permit application is complete and NMFS determines that the activity proposed by the first receiver meets the requirements of the Act. First receivers of AMLR required to have a first receiver permit may only receive AMLR that were harvested in a manner consistent with CCAMLR conservation measures and this subpart.

(4) *Duration*. Unless revoked or suspended, an AMLR first receiver permit is valid from its date of issuance to its date of expiration.

(5) *Prohibition on transfer or assignment*. AMLR first receiver permits are valid only for the person to whom NMFS issued the permit and may not be transferred or assigned.

(6) *Changes in information submitted by permit applicants or permit holders*:

(i) *Changes in pending applications*.

Applicants for an AMLR first receiver permit must report any change in the information contained in the application to the Assistant Administrator in writing as soon as possible.

(ii) *Changes occurring after permit issuance*. An AMLR first receiver permit holder must report any change to information previously submitted to the Assistant Administrator in writing within 15 days of the change. Based on such information, the Assistant Administrator may revise the permit effective upon notification to the permit holder.

(7) *Fees*. NMFS may charge a fee to recover the administrative expenses of permit issuance. NMFS will determine the fee in accordance with the procedures in the NOAA finance handbook, available from NMFS, for calculating administrative costs of special products and services.

(8) *Reporting and recordkeeping requirements*. First receivers of AMLRs who have been issued, or are required to have, a first receiver permit under this subpart must:

(i) Accurately maintain all reports and records required by their first receiver permit and this subpart at their place of business;

(ii) Maintain the original permit at their place of business;

(iii) Make their permit, and all required reports and records, available for inspection upon the request of an authorized officer; and

(iv) Within the time specified in the permit, submit a copy of such reports and records to NMFS at an address designated by NMFS.

(d) *Revision, suspension, or revocation*. NMFS may revise, suspend, or revoke an IFTP, or first receiver permit, issued under this section based upon a violation of the permit, the Act, or this subpart.

(e) A person may not import a marine mammal into the United States unless authorized and accompanied by an import permit issued under the Marine Mammal Protection Act and/or the Endangered Species Act.

§ 300.105 Preapproval for importation of frozen *Dissostichus* species

(a) A NMFS-issued preapproval certificate is required to import each shipment of frozen *Dissostichus* species.

(b) *Application*. Application forms for a preapproval certificate are available from NMFS Headquarters and the National Seafood Inspection Laboratory. With the exception of the U.S. Customs

7501 entry number, a complete and accurate application must be received by NMFS for each preapproval certificate at least 10 working days before the anticipated date of the importation. Dealers must supply the U.S. Customs 7501 entry number at least three working days prior to the expected arrival of a shipment of frozen *Dissostichus* species at a U.S. port.

(c) *Fees*. A person must include the processing fee with each preapproval certificate application. NMFS will determine the fee under the NOAA finance handbook procedures for calculating administrative costs of special products and services and user fees collected for administrative expenses associated with processing applications for preapproval certificates.

(d) *Issuance*. NMFS may issue a preapproval certificate for importation of a shipment of frozen *Dissostichus* species if the preapproval application form is complete and NMFS determines that the activity proposed by the applicant meets the requirements of the Act and that the resources were not harvested in violation of any CCAMLR conservation measure or in violation of any regulation in this subpart. No preapproval will be issued for *Dissostichus* species without verifiable documentation that the harvesting vessel reported to C-VMS continuously and in real-time from port-to-port, regardless of where such *Dissostichus* species were harvested.

(e) *Duration*. A preapproval certificate is valid until the *Dissostichus* product specified in the preapproval application is imported.

(f) *Transfer*. A person may not transfer or assign a preapproval certificate.

(g) *Changes in information*—(1) For pending preapproval certificates, applicants must report in writing to NMFS any changes in the information submitted in their preapproval certificate applications. NMFS may extend the processing period for the application as necessary to review and consider any changes.

(2) *Issued preapprovals*. For issued preapproval certificates, the certificate holder must report in writing to NMFS any changes to information included in the preapproval certificate application. Any changes related to fish being imported, such as harvesting vessel or country of origin, type and quantity of the fish to be imported or Convention statistical subarea from which the resource was harvested, will void the preapproval certificate and the shipment may not be imported unless authorized by NMFS through issuance of a revised or new preapproval certificate.

(3) The provision of false information in a preapproval application, or the failure to report a change in the information contained in a preapproval application, voids the application or preapproval as applicable.

(h) NMFS will not issue a preapproval certificate for any shipment of *Dissostichus* species:

(1) Identified as originating from a high seas area designated by the Food and Agriculture Organization of the United Nations as Statistical Area 51 or Statistical Area 57 in the eastern and western Indian Ocean outside and north of the Convention Area;

(2) Determined to have been harvested or transshipped in contravention of any CCAMLR Conservation Measure in force at the time of harvest or transshipment;

(3) Determined to have been harvested or transshipped by a vessel identified by CCAMLR as having engaged in illegal, unreported and unregulated (IUU) fishing; or

(3) Accompanied by inaccurate, incomplete, invalid, or improperly validated CDS documentation or by a SVDCD.

§ 300.106 Catch Documentation Scheme (CDS): Documentation and other requirements.

(a) *General.* (1) CCAMLR CDS document(s) must accompany all shipments of *Dissostichus* species as required in this section.

(2) No shipment of *Dissostichus* species shall be released for entry into the United States unless accompanied by an accurate, complete, valid and validated CCAMLR CDS document.

(3) *Dissostichus* species shall not be released for entry into the United States unless all of the applicable requirements of the CCAMLR Conservation Measures and U.S. regulations have been met.

(b) *Harvesting vessels.* (1) A U.S. vessel harvesting or attempting to harvest *Dissostichus* species, whether within or outside of the Convention Area, must possess a valid vessel permit issued under § 300.107, a valid High Seas Fishing Permit issued under 50 CFR part 300, subpart R, as well as DCD issued by NMFS, which is non-transferable. The master of the harvesting vessel must ensure that catch and other information specified on the DCD are accurately recorded.

(2) Prior to offloading *Dissostichus* species, the master of the harvesting vessel must:

(i) Electronically convey, by the most rapid means possible, catch and other information to NMFS and record on the DCD a confirmation number received from NMFS;

(ii) Obtain on the DCD (or copies thereof) the signature(s) of the following

persons: If catch is offloaded for transshipment, the master of the vessel(s) to which the catch is transferred; or if catch is offloaded for landing, the signature of both the responsible official(s) designated by NMFS in the vessel permit and the recipient of the catch at the port(s) of landing; and

(iii) Sign the DCD (or copies thereof), electronically convey by the most rapid means possible each copy to NMFS and provide a copy to each recipient of the catch.

(3) The master of the harvesting vessel must submit the original DCD (and all copies thereof with original signatures) to NMFS no later than 30 days after the end of the fishing season for which the vessel permit was issued and retain copies of the DCD for a period of 2 years.

(c) *Transshipment vessels.* (1) A U.S. vessel transshipping or attempting to transship *Dissostichus* species, whether within or outside of the Convention Area, must possess a valid vessel permit issued under § 300.107 and a valid High Seas Fishing Permit issued under subpart R of this part. The master of a U.S. vessel receiving *Dissostichus* species by transshipment must, upon receipt of *Dissostichus* species, sign each DCD provided by the master of the vessel that offloads *Dissostichus* species.

(2) Prior to landing *Dissostichus* species, the master of the transshipping vessel must:

(i) Obtain on each DCD (or copies thereof) the signature(s) of both the responsible official(s) designated by NMFS in the vessel permit and the recipient of the catch at the port(s) of landing; and

(ii) Sign each DCD (or copies thereof), and electronically convey by the most rapid means possible each copy to NMFS and to the flag state(s) of the offloading vessel(s) and provide a copy to each recipient of *Dissostichus* species.

(3) The master of the transshipping vessel must submit all DCDs with original signatures to NMFS no later than 30 days after offloading and retain copies for a period of 2 years.

(d) *First receivers.* Any person who receives *Dissostichus* species landed by a vessel at a U.S. port must hold an AMLR first receiver permit issued under § 300.104 and must sign the DCD(s) provided by the master of the vessel and retain copies at their place of business for a period of 2 years. A person issued, or required to have been issued, a first receiver permit under this subpart may only receive fish from a U.S. vessel that has a valid vessel permit issued under § 300.107 as well as a valid High Seas

Fishing Permit issued under 50 CFR part 300, subpart R.

(e) *Import.* (1) A person who imports fresh *Dissostichus* species must hold an IFTP issued under § 300.322. To import frozen *Dissostichus* species into the United States, a person must:

(i) Obtain a preapproval certificate issued under § 300.105 for each shipment. Among the information required on the application, applicants must provide the document number and export reference number on the DED or DRED corresponding to the intended import shipment and, if requested by NMFS, additional information for NMFS to verify that the harvesting vessel reported to the C-VMS continuously and in real-time, from port-to-port, regardless of where the fish were harvested;

(ii) Ensure that the quantity of toothfish listed on the DED (or the *Dissostichus* re-export document if product is a re-export) matches the quantity listed on the preapproval application within a variance of 10 percent; and

(iii) Provide copies of the DED or DRED as needed to persons who re-export *Dissostichus* species.

(2) Imports of fresh *Dissostichus* species do not require a preapproval certificate. If the amount or value of the fresh *Dissostichus* species to be imported is below thresholds that trigger the requirement to file entry documentation with U.S. Customs and Border Protection via the Automated Commercial Environment (see definition in § 300.321), the importer must complete a report of each shipment and submit the report to NMFS within 24 hours following importation. Verification of the harvesting vessel's reporting to C-VMS from port-to-port is not required for imports of fresh *Dissostichus* species.

(f) *Re-export.* (1) To re-export *Dissostichus* species, a person must hold an IFTP issued under § 300.322 and:

(i) Submit to NMFS a complete and accurate application for a NMFS *Dissostichus* re-export document, and

(ii) Obtain validation by a responsible official(s) designated by NMFS and receive an electronically-generated DRED.

(2) When applying for a re-export approval, a person must reference or include the approval number issued by NOAA, for the original validated *Dissostichus* import document.

(g) *Export.* (1) To export U.S.-harvested *Dissostichus* species, the person must possess an IFTP issued under § 300.322 and:

(i) Submit to NMFS a complete and accurate NMFS application for a DED; and

(ii) Obtain validation by a responsible official(s) designated by NMFS and receive an electronically-generated DED.

(2) Any person who exports *Dissostichus* species must include the original validated DED with the export shipment.

(h) *Recordkeeping.* Any person who imports, exports or re-exports *Dissostichus* spp. must:

(1) Retain a copy of all CDS documents at the person's place of business for a period of 2 years from the date on the documents and provide copies as needed to NMFS; and

(2) Make the IFTP and all CDS documents and other records and reports required by this subpart available for inspection upon request of an authorized officer.

§ 300.107 Vessel permits and requirements.

(a) *General.* In addition to the High Seas Fishing Permit requirements at 50 CFR part 300, subpart R:

(1) Every vessel of the United States that attempts to harvest or harvests any AMLR must have a vessel permit authorizing the harvest issued under this subpart, unless the attempt or harvest occurs during recreational fishing or is covered by an individual permit. Boats launched from a vessel issued a vessel permit do not require a separate permit, but are covered by the permit issued to the launching vessel. Any enforcement action that results from the activities of a launched boat will be taken against the owner and operator of the launching vessel.

(2) Any vessel of the United States that receives or attempts to receive any harvested AMLR from another vessel at sea, regardless of whether such transshipment occurs in the Convention Area or that receives, or attempts to receive any other goods or materials from another vessel in the Convention Area, must have a vessel permit authorizing transshipment issued under this subpart. Transshipment vessels must comply with the permitting provisions of this section. This requirement does not apply to scientific research vessels or to transshipments covered under an individual permit.

(3) Permits issued under this section do not authorize vessels or persons subject to the jurisdiction of the United States to harass, capture, harm, kill, harvest, or import marine mammals. No marine mammals may be taken in the course of commercial fishing operations unless the taking is authorized under the Marine Mammal Protection Act and/

or the Endangered Species Act pursuant to an exemption or permit granted by the appropriate agency.

(b) *Responsibility of owners and operators.* (1) The owners and operators of vessels permitted, or required to be permitted, under this subpart are jointly and severally responsible for compliance with the Act, this subpart, and any permit issued under the Act and this subpart.

(2) The owners and operators of each such vessel are responsible for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or forbidden by the owners or operators, and regardless of knowledge concerning their occurrence.

(3) The owner of a vessel issued a vessel permit under this subpart must report any sale, change in ownership, or other disposition of the vessel to the Assistant Administrator as soon as possible but no later than 15 days after the change.

(4) The owner and operator of a harvesting vessel issued a permit to fish for krill in the Convention Area using trawl gear must install a seal excluder device and may not possess onboard or deploy trawl gear without a seal excluder device installed.

(c) *Application.* Application forms for vessel permits are available from NMFS Headquarters.

(1) A separate, fully completed and accurate application is required for each vessel for which a permit is requested.

(2) NMFS must receive applications for vessel permits no later than April 1 for the fishing season that will commence on or after December 1 of that year.

(3) Applications for a permit to harvest krill must, to the extent possible, identify the products to be derived from the anticipated krill catch.

(4) NMFS will only accept permit applications for vessels that have been issued an International Maritime Organization (IMO) number.

(5) NMFS may charge a fee to recover the administrative expense of permit issuance. NMFS will determine the fee in accordance with procedures in the NOAA finance handbook, available from NMFS, for calculating administrative costs of special products and services and user fees.

(d) *Issuance.* The Assistant Administrator may issue a vessel permit if the Assistant Administrator determines that the harvesting or transshipment activities described in the application will meet the requirements of the Act and will not:

(1) Decrease the size of any harvested population to levels below those that

ensure its stable recruitment. For this purpose, the Convention provides that its size should not be allowed to fall below a level close to that which ensures the greatest net annual increment.

(2) Upset the ecological relationships between harvested, dependent, and related populations of AMLRs and the restoration of depleted populations to levels that will ensure stable recruitment.

(3) Cause changes or increase the risk of changes in the marine ecosystem that are not potentially reversible over 2 or 3 decades, taking into account the state of available knowledge of the direct and indirect impact of harvesting, the effects of the introduction of alien species, the effects of associated activities on the marine ecosystem and the effects of environmental changes, with the aim of making possible the sustained conservation of AMLRs.

(4) Violate the Convention or any conservation measures in force with respect to the United States under the Convention. The Convention and the schedule of conservation measures in force can be found on the CCAMLR Web site: www.ccamlr.org.

(e) *Duration.* A vessel permit is valid from its date of issuance to its date of expiration unless it is revoked or suspended.

(f) *Transfer.* Permits are not transferable or assignable. A permit is valid only for the vessel to which it is issued.

(g) *Display.* Each vessel must have on board, at all times, a valid vessel permit and the vessel operator must produce it for inspection upon the request of an authorized officer or CCAMLR inspector.

(h) *Changes in information submitted by permit applicants or holders—*(1) *Changes in pending applications.*

Applicants for a vessel permit must report to the Assistant Administrator in writing any change in the information contained in the application. The processing period for the application will be extended as necessary to review the change.

(2) *Changes occurring after permit issuance—*(i) *Requested changes in the location, manner, or amount of harvesting.* Any changes in the location, manner or amount of harvesting must be proposed in writing to the Assistant Administrator and may not be undertaken unless authorized by the Assistant Administrator through a permit revision or issuance of a new permit. If the Assistant Administrator determines that the requested change in the location, manner, or amount of harvesting could significantly affect the

status of any Antarctic marine living resource, the Assistant Administrator will treat the requested change as an application for a new permit and so notify the holder.

(ii) *Changes other than in the location, manner or amount of harvesting.* For changes other than those addressed in paragraph (h)(2)(i) of this section, the owner or operator of a vessel that has been issued a vessel permit must report to the Assistant Administrator in writing any change in previously submitted information as soon as possible but no later than within 15 days after the change. Based on such reported information, the Assistant Administrator may revise the permit and any revised permit would be effective upon notification to the permit holder.

(i) *Conditions and restrictions.* The vessel permit will contain conditions and restrictions that the Assistant Administrator deems necessary for implementation of conservation measures that apply to the harvesting or transshipment activities. The Assistant Administrator may revise the vessel permit to include additional conditions and restrictions on the harvesting vessel as necessary to implement conservation measures in force with respect to the United States or to achieve the purposes of the Convention or the Act. Any additional conditions or restrictions will be effective upon notification to the permit holder.

(j) *Revision, suspension, or revocation for violations.* A vessel permit may be revised, suspended, or revoked if the harvesting vessel is involved in the commission of any violation of its permit, the Act, or this subpart. The Assistant Administrator may deny a vessel permit if the applicant or harvesting vessel was previously involved in the commission of any violation of its permit, the Act, or this subpart. Failure to report a change in the information contained in an application within 15 days of the change is a violation of this subpart and voids the application or permit, as applicable. If a change in vessel ownership is not reported, the violation is chargeable to the previous owner.

(k) *Transshipment notification.* The vessel operator must notify the CCAMLR Secretariat of transshipments of AMLRs, bait, or fuel, and submit a confirmation of the notification to NMFS Headquarters, no later than 72 hours before the transshipment will take place. The vessel operator must notify the CCAMLR Secretariat of transfers of all other goods, and submit a confirmation of the notification to NMFS Headquarters, no later than 2

hours before the transshipment will take place. Notifications of intended transshipments shall include the following information, for all vessels involved:

- (1) Names, registration numbers, and IMO numbers;
- (2) International radio call signs;
- (3) Flag State;
- (4) Type of vessels, length, gross registered tonnage and carrying capacity;
- (5) Proposed time and position, in latitude and longitude, of transshipment; and
- (6) Details of the type and amount of catches and/or other goods, such as food stores and fuel, involved in the transshipment.

(l) *Reporting and recordkeeping requirements.* The operator of any vessel required to have a vessel permit under this subpart must:

- (1) Accurately maintain on board the vessel all CCAMLR reports and records required by its permit.
- (2) Make such reports and records available for inspection upon the request of an authorized officer or CCAMLR inspector.
- (3) Within the time specified in the vessel permit, submit a copy of such reports and records to NMFS.
- (4) Install a NMFS-approved EMTU on board U.S. flagged vessels harvesting AMLR for use in real-time C-VMS port-to-port reporting to a NMFS-designated land-based fisheries monitoring center or centers. The requirements for the installation and operation of the VMS are set forth in § 300.112.
- (5) Provide advance notice of the vessel's entry into port using the CCAMLR Port Inspection Report, including the written declaration that the vessel has not engaged in or supported illegal, unreported and unregulated (IUU) fishing in the Convention Area and has complied with relevant CCAMLR requirements. The CCAMLR Port Inspection Report, and instructions for its submission, is available from NMFS Headquarters.

§ 300.108 Vessel and gear identification.

(a) *Vessel identification.* (1) A vessel issued a permit under this subpart must be marked with the vessel's name and its International Radio Call Sign (IRCS) amidships on both the port and starboard sides of the superstructure or hull, so that it is visible at all times from an enforcement or inspection vessel. Fixtures inclined at an angle to the vessel's side or superstructure would be considered as suitable provided that the angle of inclination would not prevent sighting of the IRCS from another vessel or from the air. The vessel's IRCS shall

also be marked on the deck. Should an awning or other temporary cover be placed so as to obscure the mark on the deck, the awning or cover shall also be marked with the IRCS. The marks should be placed athwartship with the top of the numbers or letters towards the bow.

(2) Boats, skiffs and craft carried by the vessel for fishing operations shall bear the same mark as the vessel, except that a numerical suffix specific for the boat, skiff, or craft must follow the IRCS.

(3) The vessel identification must be in a color in contrast to the background and must be permanently affixed to the vessel in block Roman alphabet letters and Arabic numerals using good quality marine paints. The letters and numbers shall be: At least 1 meter in height (h) for the IRCS placed on the hull, superstructure and/or inclined surfaces and at least 0.3 meter for marks placed on deck. The length of the hyphen shall be half the height of the letters and numbers. The width of the stroke for all letters, numbers and the hyphen shall be h/6. The space between letters and/or numbers shall not exceed h/4 nor be less than h/6. The space between adjacent letters having sloping sides (e.g., A and V) shall not exceed h/8 nor be less than h/10. If a contrasting color is used for the background of the marks, it shall extend to provide a border around the mark of at least h/6.

(4) The marks and the background shall be maintained in good condition at all times.

(b) *Navigational lights and shapes.* Each vessel issued a vessel permit must display the lights and shapes prescribed by the International Regulations for Preventing Collisions at Sea, 1972 (TIAS 8587, and 1981 amendment TIAS 10672), for the activity in which the harvesting vessel is engaged (as described at 33 CFR part 81).

(c) *Gear identification.* (1) The operator of each fishing vessel must ensure that all deployed fishing gear is clearly marked at all times at the surface with a buoy displaying the vessel identification of the harvesting vessel (see paragraph (a) of this section) to which the gear belongs, a light visible for 2 miles at night in good visibility, and a radio buoy.

(2) The operator of each harvesting vessel must ensure that deployed longlines and strings of traps or pots, and gillnets are clearly marked at all times at the surface at each terminal end with a buoy displaying the vessel identification of the harvesting vessel to which the gear belongs (see paragraph (a) of this section), a light visible for 2 miles at night in good visibility, and a radio buoy.

(3) Unmarked or incorrectly identified fishing gear may be considered abandoned and may be disposed of in accordance with applicable CCAMLR Conservation Measures in force with respect to the United States by any authorized officer or CCAMLR inspector.

(d) *Maintenance.* The operator of each vessel issued a vessel permit must:

(1) Keep the vessel and gear identification clearly legible and in good condition at all times;

(2) Ensure that nothing on the vessel obstructs the view of the markings from an enforcement or inspection vessel or aircraft; and

(3) Ensure that the proper navigational lights and shapes are displayed for the vessel's activity and are properly functioning.

§ 300.109 Initiating a new fishery.

(a) A new fishery, for purposes of this section, is a fishery that uses bottom trawls on the high seas of the Convention Area or a fishery for a species, using a particular method, in a statistical subarea or division for which:

(1) Information on distribution, abundance, demography, potential yield and stock identity from comprehensive research/surveys or exploratory fishing has not been submitted to CCAMLR;

(2) Catch and effort data have never been submitted to CCAMLR; or

(3) Catch and effort data from the two most recent seasons in which fishing occurred have not been submitted to CCAMLR.

(b) Persons intending to develop a new fishery shall notify the Assistant Administrator no later than April 1 for the fishing season that will commence on or after December 1 and shall not initiate the fishery pending NMFS and CCAMLR review or until a vessel permit has been used under this subpart.

(c) The notification shall be accompanied by a complete vessel permit application required under § 300.107 and information on:

(1) The nature of the proposed fishery, including target species, methods of fishing, proposed region and maximum catch levels proposed for the forthcoming season;

(2) Biological information on the target species from comprehensive research/survey cruises, such as distribution, abundance, demographic data and information on stock identity;

(3) Details of dependent and related species and the likelihood of them being affected by the proposed fishery;

(4) Information from other fisheries in the region or similar fisheries elsewhere that may assist in the evaluation of potential yield; and

(5) If the proposed fishery will be undertaken using bottom trawl gear, the known and anticipated impacts of this gear on vulnerable marine ecosystems, including benthos and benthic communities.

§ 300.110 Exploratory fisheries.

(a) An exploratory fishery, for purposes of this section, is a fishery that was previously defined as a new fishery under § 300.109.

(b) A fishery continues to be classified by CCAMLR as an exploratory fishery until sufficient information is available to:

(1) Evaluate the distribution, abundance, and demography of the target species, leading to an estimate of the fishery's potential yield;

(2) Review the fishery's potential impacts on dependent and related species; and

(3) Allow the CCAMLR Scientific Committee to formulate and provide advice to the Commission on appropriate harvest catch levels and fishing gear.

(c) The operator of any vessel engaging in an exploratory fishery must submit, by the date specified in the vessel permit issued under § 300.107, catch, effort, and related biological, ecological, and environmental data as required by a data collection plan for the fishery formulated by the CCAMLR Scientific Committee.

(d) In addition to the requirements in § 300.107, any person planning to enter an exploratory fishery must notify the Assistant Administrator no later than April 1 for the fishing season that will commence on or after December 1 and shall not enter the fishery pending NMFS and CCAMLR review or until a vessel permit has been used under this subpart. The Assistant Administrator will not issue a permit to enter an exploratory fishery until after the requirements of § 300.107 have been met and CCAMLR has considered the notification.

(e) The notification shall be accompanied by a complete vessel permit application required under § 300.107 and information on:

(1) The nature of the exploratory fishery, including target species, methods of fishing, proposed region and maximum catch levels proposed for the forthcoming season;

(2) Specification and full description of the types of fishing gear to be used;

(3) Biological information on the target species from comprehensive research/survey cruises, such as distribution, abundance, demographic data and information on stock identity; details of dependent and related species

and the likelihood of their being affected by the proposed fishery;

(4) Information from other fisheries in the region or similar fisheries elsewhere that may assist in the evaluation of potential yield;

(5) If the proposed fishery will be undertaken using bottom trawl gear, information on the known and anticipated impacts of this gear on vulnerable marine ecosystems, including benthos and benthic communities; and

(6) Any other information the Assistant Administrator requires to fully implement the relevant conservation measures.

§ 300.111 Scientific observers.

(a) Except as otherwise specified, this section applies to both national observers and international observers, as well as to vessels of the United States carrying, or required to carry, such observers.

(b) All vessels of the United States fishing in the Convention Area must carry one or more scientific observers as required by CCAMLR conservation measures or as specified in a vessel permit issued under this subpart.

(c) All vessels of the United States conducting longline sink rate testing outside the Convention Area and pursuant to CCAMLR protocols must carry one or more scientific observers as specified in the vessel permit issued under this subpart.

(d) *Procurement of observers by vessel.* Owners of vessels required to carry scientific observers under this section must arrange for observer services in coordination with the NMFS Southwest Fisheries Science Center Antarctic Ecosystem Research Division. The vessel owner is required to pay for observer services through an observer service provider who has provided observer services to the Federal government within the past year. In situations where no qualified observer is available through a qualified observer provider, the Secretary may authorize a vessel owner to arrange for an observer by alternative methods. An observer may not be paid directly by the vessel owner.

(e) *Vessel responsibilities.* An operator of a vessel required to carry one or more scientific observers must:

(1) *Accommodations and food.* Provide, at no cost to the observers or the United States, accommodations and food on the vessel for the observer or observers that are equivalent to those provided for officers of the vessel; and

(2) *Safe conditions.* Maintain safe conditions on the vessel for the protection of observers including

adherence to all U.S. Coast Guard and other applicable rules, regulations, or statutes pertaining to safe operation of the vessel and have on board:

(i) A valid Commercial Fishing Vessel Safety Decal issued within the past 2 years that certifies compliance with regulations found in 33 CFR chapter I and 46 CFR chapter I;

(ii) A certificate of compliance issued pursuant to 46 CFR 28.710; or

(iii) A valid certificate of inspection pursuant to 46 U.S.C. 3311.

(3) *Health and safety regulations.* Comply with the observer health and safety regulations at part 600 of this title.

(4) *Transmission of data.* Facilitate transmission of observer data by allowing observers, on request, to use the vessel's communications equipment and personnel for the confidential entry, transmission, and receipt of work-related messages.

(5) *Vessel position.* Allow observers access to, and the use of, the vessel's navigation equipment and personnel, on request, to determine the vessel's position, course and speed.

(6) *Access.* Allow observers free and unobstructed access to the vessel's bridge, trawl or working decks, holding bins, processing areas, freezer spaces, weight scales, cargo holds, and any other space that may be used to hold, process, weigh, or store fish or fish products at any time.

(7) *Prior notification.* Notify observers at least 15 minutes before fish are brought on board, or fish and fish products are transferred from the vessel, to allow sampling the catch or observing the transfer, unless the observers specifically request not to be notified.

(8) *Records.* Allow observers to inspect and copy the vessel's DCD, product transfer forms, any other logbook or document required by regulations or CCAMLR conservation measures, printouts or tallies of scale weights, scale calibration records, bin sensor readouts, and production records.

(9) *Assistance.* Provide all other reasonable assistance to enable observers to carry out their duties, including, but not limited to:

(i) Measuring decks, codends, and holding bins;

(ii) Providing the observers with a safe work area adjacent to the sample collection site;

(iii) Collecting bycatch when requested by the observers;

(iv) Collecting and carrying baskets of fish when requested by observers; and

(v) Allowing observers to determine the sex of fish when this procedure will

not decrease the value of a significant portion of the catch.

(10) *Transfer at sea.* (i) Ensure that transfers of observers at sea via small boat or raft are carried out during daylight hours, under safe conditions, and with the agreement of observers involved.

(ii) Notify observers at least 3 hours before observers are transferred, such that the observers can collect personal belongings, equipment, and scientific samples.

(iii) Provide a safe pilot ladder and conduct the transfer to ensure the safety of observers during transfers.

(iv) Provide an experienced crew member to assist observers in the small boat or raft in which any transfer is made.

(f) *Insurance.* The observer service provider or vessel owner must provide insurance for national observers that provides compensation in the event of an injury or death during the entire deployment, from the point of hire location to return, equivalent to the standards of the North Pacific Groundfish Observer Program set forth in § 679.50 of this title.

(g) *Educational requirements.*

National observer candidates must:

(1) Have a Bachelor's degree or higher from an accredited college or university with a major in one of the natural sciences; or

(2) Have successfully completed a minimum of 30 semester hours or equivalent in applicable biological sciences with extensive use of dichotomous keys in at least one course.

(h) *Health requirements.* National observers, and U.S. observers deployed as international observers, must have a signed and dated statement from a licensed physician that he or she has physically examined the observer. The statement must confirm that, based upon the physical examination, the observer does not have any health problems or conditions that would jeopardize that individual's safety or the safety of others while deployed, or prevent the observer from performing his or her duties satisfactorily. The statement must declare that, prior to the examination, the physician was made aware of the duties of an observer and the dangerous, remote and rigorous nature of the work. The physician's statement must be submitted to the NMFS Southwest Fisheries Science Center Antarctic Ecosystem Research Division program office prior to approval of an observer. The physical exam must have occurred during the 12 months prior to the observer's deployment. The physician's statement will expire 12 months after the physical

exam occurred. A new physical exam must be performed, and accompanying statement submitted, prior to any deployment occurring after the expiration of the statement.

(i) *Standards of observer conduct.* (1) Observers: (i) Must not have a direct financial interest in the fishery being observed, including but not limited to:

(A) Any ownership, mortgage holder, or other secured interest in a vessel, shoreside or floating stationary processor facility involved in the catching, taking, harvesting or processing of fish;

(B) Any business involved with selling supplies or services to any vessel, shoreside or floating stationary processing facility; or

(C) Any business involved with purchasing raw or processed products from any vessel, shoreside or floating stationary processing facilities.

(ii) Must not solicit or accept, directly or indirectly, any gratuity, gift, favor, entertainment, loan, or anything of monetary value from anyone who either conducts activities that are regulated by NMFS or has interests that may be substantially affected by the performance or nonperformance of the observers' official duties.

(iii) Must not serve as observers on any vessel or at any shoreside or floating stationary processing facility owned or operated by a person who previously employed the observers.

(iv) Must not solicit or accept employment as a crew member or an employee of a vessel, shoreside processor, or stationary floating processor while employed by an observer provider.

(2) Provisions for remuneration of observers under this section do not constitute a conflict of interest.

(j) *Standards of observer behavior.* Observers must: (1) Avoid any behavior that could adversely affect the confidence of the public in the integrity of the CCAMLR Scheme of International Scientific Observation or of the government, including but not limited to the following:

(2) Perform their assigned duties as described in the CCAMLR Scientific Observers Manual and must complete the CCAMLR Scientific Observer Logbooks and submit them to the CCAMLR Data Manager at the intervals specified by the Data Manager.

(3) Accurately record their sampling data, write complete reports, and report accurately any observations of suspected violations of regulations relevant to conservation of marine resources or their environment.

(4) Not disclose collected data and observations made on board the vessel

or in the processing facility to any person, except the owner or operator of the observed vessel or processing facility or NMFS.

(5) Refrain from engaging in any illegal actions or any other activities that would reflect negatively on their image as professional scientists, on other observers, or on the CCAMLR Scheme of International Scientific Observation as a whole. This includes, but is not limited to:

(i) Refrain from engaging in the use, possession, or distribution of illegal drugs; or

(ii) Refrain from engaging in physical sexual contact with personnel of the vessel or processing facility to which the observer is assigned, or with any vessel or processing plant personnel who may be substantially affected by the performance or non-performance of the observer's official duties.

(k) *Sampling station*—(1) *Minimum work space aboard at sea processing vessels.* The observer must have a working area of 4.5 square meters, including the observer's sampling table, for sampling and storage of fish to be sampled. The observer must be able to stand upright and have a work area at least 0.9 meter (m) deep in the area in front of the table and scale.

(2) *Table aboard at-sea processing vessels.* The observer sampling station must include a table at least 0.6 m deep, 1.2 m wide and 0.9 m high and no more than 1.1 m high. The entire surface area of the table must be available for use by the observer. Any area for the observer sampling scale is in addition to the minimum space requirements for the table. The observer's sampling table must be secured to the floor or wall.

(3) *Other requirement for at-sea processing vessels.* The sampling station must be in a well-drained area that includes floor grating (or other material that prevents slipping), lighting adequate for day or night sampling, and a hose that supplies fresh or sea water to the observer.

§ 300.112 Vessel monitoring system.

(a) *Requirement for use.* Within 30 days after NMFS publishes in the **Federal Register** a list of approved EMTUs and associated communications service providers for the AMLR fishery, an owner or operator of a vessel that has been issued a vessel permit under § 300.107 must ensure that such vessel has a NMFS-type-approved, operating EMTU installed and continuously operating for the duration of any fishing trip involving the harvesting of AMLR.

(b) *Installing and activating the EMTU.* Only EMTUs that have been approved by NMFS for use in the AMLR

fishery may be used. The vessel owner or operator shall obtain and have installed on the fishing vessel, by a qualified marine electrician and in accordance with any instructions provided by the VMS Helpdesk or OLE, a NMFS type-approved EMTU.

(c) *Interference with the EMTU.* No person may interfere with, tamper with, alter, damage, disable, or impede the operation of the EMTU, or attempt any of the same.

(d) *Interruption of operation of the VMS.* When a vessel's EMTU is not operating properly, the owner or operator must immediately contact OLE, and follow instructions from that office. If notified by NMFS that a vessel's EMTU is not operating properly, the owner and operator must follow instructions from that office. In either event, such instructions may include, but are not limited to, manually communicating to a location designated by NMFS the vessel's positions or returning to port until the EMTU is operable.

(e) *Access to data.* OLE is authorized to receive and relay transmissions from the EMTU. OLE will share a vessel's position data obtained from the EMTU, if requested, with other NMFS offices, the USCG, and their authorized officers and designees.

(f) *Installation and operation of the VMS.* NMFS has authority over the installation and operation of the EMTU. NMFS may authorize the connection or order the disconnection of additional equipment, including a computer, to any EMTU when deemed appropriate by NMFS.

§ 300.113 CCAMLR Ecosystem Monitoring Program sites.

(a) *General.* (1) Any person subject to the jurisdiction of the United States must apply for and be granted an entry permit authorizing specific activities prior to entering a CCAMLR Ecosystem Monitoring Program (CEMP) site designated in accordance with the CCAMLR conservation measure describing the procedure for according protection for CEMP sites.

(2) If a CEMP site is also a site specially protected under the Antarctic Treaty (or the Protocol on Environmental Protection to the Antarctic Treaty and its Annexes, such as the sites listed in 45 CFR 670.29), an applicant seeking to enter such site must apply to the Director of the NSF for a permit under applicable provisions of the ACA or any superseding legislation. The permit granted by NSF shall constitute a joint CEMP/ACA Protected Site permit and any person holding such a permit must comply

with the appropriate CEMP site management plan. In all other cases, an applicant seeking a permit to enter a CEMP site must apply to the Assistant Administrator for a CEMP permit in accordance with the provisions of this section.

(b) *Responsibility of CEMP permit holders and persons designated as agents under a CEMP permit.* (1) The CEMP permit holder and person designated as agents under a CEMP permit are jointly and severally responsible for compliance with the Act, this subpart, and any permit issued under this subpart.

(2) The CEMP permit holder and agents designated under a CEMP permit are responsible for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or forbidden by the CEMP permit holder or agents, and regardless of knowledge concerning their occurrence.

(c) *Prohibitions regarding the Antarctic Treaty System and other applicable treaties and statutes.* Holders of permits to enter CEMP Protected Sites are not authorized to undertake any activities within a CEMP Protected Site that are not in compliance with the conditions of the CEMP permit and the provisions of:

(1) The Antarctic Treaty, including the Agreed Measures for the Conservation of Antarctic Fauna and Flora (including the Protocol on the Environmental Protection to the Antarctic Treaty and its Annexes), as implemented by the ACA and any superseding legislation. (Persons interested in conducting activities subject to the Antarctic Treaty or the Protocol should contact the Office of Polar Programs, NSF).

(2) The Convention for the Conservation of Antarctic Seals.

(3) The Convention and its Conservation Measures in force, implemented under the Act.

(d) *Prohibitions on takings.* Permits issued under this section do not authorize any takings as defined in the applicable statutes and implementing regulations governing the activities of persons in Antarctica.

(e) *Issuance criteria.* Permits designated in this section may be issued by the Assistant Administrator upon a determination that:

(1) The specific activities meet the requirements of the Act;

(2) There is sufficient reason, established in the CEMP permit application, that the scientific purpose for the intended entry cannot be served elsewhere; and

(3) The actions permitted will not violate any provisions or prohibitions of the site's management plan submitted in compliance with the CCAMLR Conservation Measure describing the procedure for according protection to CEMP sites.

(f) *Application process.* An applicant seeking a CEMP permit from the Assistant Administrator to enter a CEMP site shall include the following in the application.

(1) A detailed justification that the scientific objectives of the applicant cannot be accomplished elsewhere and a description of how said objectives will be accomplished within the terms of the site's management plan.

(2) A statement signed by the applicant that the applicant has read and fully understands the provisions and prohibitions of the site's management plan. Prospective applicants may obtain copies of the relevant management plans and the CCAMLR Conservation Measure describing the procedure for according protection to CEMP sites by requesting them from NMFS Headquarters.

(g) *Conditions.* CEMP permits issued under this section will contain special and general conditions including a condition that the permit holder shall submit a report describing the activities conducted under the permit within 30 days of the expiration of the CEMP permit.

(h) *Transfer.* CEMP permits are not transferable or assignable. A CEMP permit is valid only for the person to whom it is issued.

(i) *Additional conditions and restrictions.* The Assistant Administrator may revise the CEMP permit effective upon notification of the permit holder, to impose additional conditions and restrictions as necessary to achieve the purposes of the Convention, the Act and the CEMP Management Plan. The CEMP permit holder must, as soon as possible, notify any and all agents operating under the permit of any and all revisions or modifications to the permit.

(j) *Revocation or suspension.* CEMP permits may be revoked or suspended based upon information received by the Assistant Administrator and such revocation or suspension shall be effective upon notification to the permit holder.

(1) A CEMP permit may be revoked or suspended based on a violation of the permit, the Act, or this subpart.

(2) Failure to report a change in the information submitted in a CEMP permit application within 10 days of the change is a violation of this subpart and voids the application or permit, as

applicable. Title 15 CFR part 904 governs permit sanctions under this subpart.

(k) *Exceptions.* Entry into a CEMP site is lawful if committed under emergency conditions to prevent the loss of human life, avoid compromising human safety, prevent the loss of vessels or aircraft, or to prevent environmental damage.

(l) *Protected sites.* Sites protected by the Antarctic Treaty and regulated under the ACA are listed at 45 CFR part 670 subpart F.

§ 300.114 Prohibitions.

In addition to the prohibitions in § 300.4, it is unlawful for any person to:

(a) Harvest any AMLR without a permit for such activity as required by § 300.107.

(b) Import into, or export or re-export from, the United States any AMLR: Taken by a vessel of the United States without a permit issued under this subpart or by a foreign-flagged vessel without valid authorization from the applicable flag state to harvest those resources; without accurate, complete, valid and properly validated CDS documentation as required by § 300.106; without an IFTP as required by § 300.104; or in violation of the terms and conditions for such import, export or re-export as specified on the IFTP.

(c) Engage in or benefit from harvesting or other associated activities in violation of the provisions of the Convention or in violation of a conservation measure in force with respect to the United States under Article IX of the Convention.

(d) Ship, transport, offer for sale, sell, purchase, import, export, re-export or have custody, control or possession of, any AMLR that was harvested in violation of a conservation measure in force with respect to the United States under Article IX of the Convention or in violation of any regulation promulgated under the Act, without regard to the citizenship of the person that harvested, or vessel that was used in the harvesting of, the AMLR.

(e) Refuse to allow any CCAMLR inspector or authorized officer to board a vessel of the United States or a vessel subject to the jurisdiction of the United States for the purpose of conducting any search, investigation, or inspection authorized by the Act, this subpart, or any permit issued under the Act.

(f) Refuse to provide appropriate assistance, including access as necessary to communications equipment, to any CCAMLR inspector or authorized officer.

(g) Refuse to sign a written notification of alleged violations of

CCAMLR conservation measures in force prepared by a CCAMLR inspector.

(h) Assault, resist, oppose, impede, intimidate, or interfere with a CCAMLR inspector or authorized officer in the conduct of any boarding, search, investigation, or inspection authorized by the Act, this subpart, or any permit issued under the Act.

(i) Use any vessel to engage in harvesting, or receive, import, export or re-export, AMLRs after the revocation, or during the period of suspension, of an applicable permit issued under the Act.

(j) Fail to identify, falsely identify, fail to properly maintain, or obscure the identification of a harvesting vessel or its gear as required by this subpart.

(k) Fish in an area where fishing is prohibited by the Commission, other than for scientific research purposes in accordance with § 300.103.

(l) Violate or attempt to violate any provision of this subpart, the Act, any other regulation promulgated under the Act or the conditions of any permit issued under the Act.

(m) Provide incomplete or inaccurate information about the harvest, transshipment, landing, import, export, or re-export of applicable species on any document required under this subpart.

(n) Receive AMLR from a vessel, without holding an AMLR first receiver permit as required under § 300.104, or receive AMLR from a fishing vessel that does not hold a valid vessel permit issued under § 300.107.

(o) Import, export or re-export *Dissostichus* spp. harvested or transshipped by a vessel identified by CCAMLR as having engaged in illegal, unreported and unregulated (IUU) fishing, originating from a high seas area designated by the Food and Agriculture Organization of the United Nations as Statistical Area 51 or Statistical Area 57 or accompanied by inaccurate, incomplete, invalid, or improperly validated CDS documentation or import or re-export *Dissostichus* spp. accompanied by a SVDCD.

(p) Import shipments of frozen *Dissostichus* spp. without a preapproval issued under § 300.105.

(q) *Observers.* (1) Assault, resist, oppose, impede, intimidate, harass, bribe, or interfere with an observer.

(2) Interfere with or bias the sampling procedure employed by an observer, including physical, mechanical, or other sorting or discarding of catch before sampling.

(3) Tamper with, destroy, or discard an observer's collected samples, equipment, records, photographic film, papers, or personal effects without the express consent of the observer.

(4) Prohibit or bar by command, impediment, threat, coercion, or by refusal of reasonable assistance, an observer from collecting samples, conducting product recovery rate determinations, making observations, or otherwise performing the observer's duties.

(5) Harass an observer by conduct that has sexual connotations, has the purpose or effect of interfering with the observer's work performance, or otherwise creates an intimidating, hostile, or offensive environment.

(6) Fish for or process fish without observer coverage required under § 300.111.

(7) Require, pressure, coerce, or threaten an observer to perform duties normally performed by crew members, including, but not limited to, cooking, washing dishes, standing watch, vessel maintenance, assisting with the setting or retrieval of gear, or any duties associated with the processing of fish, from sorting the catch to the storage of the finished product.

(8) Refuse to provide appropriate assistance, including access as necessary to communications equipment, to an observer.

(r) *Vessel monitoring systems.* (1) Use any vessel of the United States issued, or required to be issued, an AMLR vessel permit to conduct fishing operations unless that vessel carries a NMFS-type-approved EMTU and complies with the requirements described in this subpart.

(2) Fail to install, activate, repair or replace an EMTU prior to leaving port as specified in this subpart.

(3) Fail to operate and maintain an EMTU on board the vessel at all times as specified in this subpart.

(4) Tamper with, damage, destroy, alter, or in any way distort, render useless, inoperative, ineffective, or inaccurate the EMTU required to be installed on a vessel or the EMTU position reports transmitted by a vessel as specified in this subpart.

(5) Fail to contact OLE or follow OLE instructions when automatic position reporting has been interrupted as specified in this subpart.

(6) Register an EMTU to more than one vessel at the same time.

(7) Connect, or leave connected, additional equipment to an EMTU without the prior approval of the OLE.

(8) Make a false statement, oral or written, to an authorized officer regarding the installation, use, operation, or maintenance of an EMTU or communication service provider.

(9) Fail to report to NMFS and to CCAMLR's C-VMS from port-to-port on any trip during which AMLR are, or are

expected to be, harvested regardless of whether the vessel operates, or is expected to operate, inside the Convention Area.

(s) Trawl for krill in Convention Area fisheries without a seal excluder device or possess trawl gear without a seal excluder device installed onboard a vessel permitted, or required to be permitted, under this subpart to harvest krill with trawl gear.

(t) Harvest any AMLR in the Convention Area without a vessel permit required by this subpart.

(u) Ship, transport, offer for sale, sell, purchase, import, export, re-export or have custody, control, or possession of, any frozen *Dissostichus* species without verifiable documentation that the harvesting vessel reported to CCAMLR's C-VMS continuously and in real-time, from port-to-port, regardless of where such *Dissostichus* species were harvested.

§ 300.115 Facilitation of enforcement and inspection.

In addition to the facilitation of enforcement provisions of § 300.5, the following requirements apply to this subpart.

(a) *Access and records.* (1) The owners and operator of each harvesting vessel must provide authorized officers and CCAMLR inspectors access to all spaces where work is conducted or business papers and records are prepared or stored, including but not limited to personal quarters and areas within personal quarters. If inspection of a particular area would interfere with specific on-going scientific research, and if the operator of the harvesting vessel makes such assertion and produces an individual permit that covers that specific research, the authorized officer or CCAMLR inspector will not disturb the area, but will record the information pertaining to the denial of access.

(2) The owner and operator of each harvesting vessel must provide to authorized officers and CCAMLR inspectors all records and documents pertaining to the harvesting activities of the vessel, including but not limited to production records, fishing logs, navigation logs, transfer records, product receipts, cargo stowage plans or records, draft or displacement calculations, customs documents or records, and an accurate hold plan reflecting the current structure of the vessel's storage and factory spaces.

(3) Before leaving vessels that have been inspected, the CCAMLR inspector will give the master of the vessel a Certificate of Inspection and a written notification of any alleged violations of

CCAMLR conservation measures in effect and will afford the master the opportunity to comment on it. The ship's master must sign the notification to acknowledge receipt and the opportunity to comment on it.

(4) Any person issued a first receiver permit under this subpart, or an IFTP under § 300.322, must as a condition of that permit, allow an authorized officer access to any facility from which they engage in the first receipt, import, export or re-export of AMLR for the purpose of inspecting the facility and any fish, equipment or records therein.

(b) *Reports by non-inspectors.* All scientists, fishermen, and other non-inspectors present in the Convention Area and subject to the jurisdiction of the United States are encouraged to report any violation of CCAMLR conservation measures observed in the Convention Area to the Office of Ocean and Polar Affairs (CCAMLR Violations), Department of State, Room 5801, Washington, DC 20520.

(c) *Storage of AMLR.* The operator of each harvesting vessel storing AMLR in a storage space on board a vessel must ensure that non-resource items are neither stowed beneath nor covered by resource items, unless required to maintain the stability and safety of the vessel. Non-resource items include, but are not limited to, portable conveyors, exhaust fans, ladders, nets, fuel bladders, extra bin boards, or other moveable non-resource items. These non-resource items may be in a resource storage space when necessary for the safety of the vessel or crew or for the storage of the items. Lumber, bin boards, or other dunnage may be used for shoring or bracing of product to ensure the safety of crew and to prevent shifting of cargo within the space.

§ 300.116 Penalties.

Any person or harvesting vessel found to be in violation of the Act, this subpart, or any permit issued under this subpart will be subject to the civil and criminal penalty provisions and forfeiture provisions prescribed in the Act, 15 CFR part 904, and other applicable laws.

BILLING CODE 3510-22-P

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Part 1**

[TD 9811]

RIN 1545-BK09

Application of Modified Carryover Basis to General Basis Rules**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final regulations.

SUMMARY: This document contains final regulations regarding the application of the modified carryover basis rules of section 1022 of the Internal Revenue Code (Code). Specifically, the final regulations modify provisions of the Treasury Regulations involving basis rules by including a reference to section 1022 where appropriate. The regulations will affect property transferred from certain decedents who died in 2010. The regulations reflect changes to the law made by the Economic Growth and Tax Relief Reconciliation Act of 2001 and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010.

DATES: *Effective Date:* The regulations are effective on January 19, 2017.

Applicability Date: The regulations are applicable on January 19, 2017.

FOR FURTHER INFORMATION CONTACT:

Mayer R. Samuels at (202) 317-6859 (not a toll-free number).

SUPPLEMENTARY INFORMATION:**Background**

This document contains amendments to 26 CFR part 1 under various provisions of the Code in response to statutory changes made by the Economic Growth and Tax Relief Reconciliation Act of 2001, Public Law 107-16 (EGTRRA) and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, Public Law 111-312 (TRUIRJA).

Section 501(a) of EGTRRA enacted section 2210 of the Code, which made chapter 11 (the estate tax) inapplicable to the estate of any decedent who died after 2009. Section 542 of EGTRRA also enacted section 1022. While section 1014 generally provides that the recipient's basis in property passing from a decedent is the fair market value of the property on the decedent's date of death, section 1022 sets forth a modified carryover basis system applicable after 2009 generally providing that the recipient's basis in property acquired from a decedent is the lesser of the decedent's adjusted basis in

the property or the fair market value of the property on the decedent's date of death. Section 901(a) of EGTRRA, known as the "sunset clause", provided that all provisions of and amendments made by EGTRRA do not apply to estates of decedents dying, gifts made, or generation-skipping transfers after December 31, 2010. The sunset clause effectively limited the application of sections 501(a) and 542 of EGTRRA to 2010.

Section 301(a) of TRUIRJA, which became law on December 17, 2010, retroactively reinstated the estate tax and repealed section 1022 with respect to the estates of decedents who died in 2010. However, section 301(c) of TRUIRJA allowed the executor of the estate of a decedent who died in 2010 to elect to apply the Code and regulations thereunder as though section 301(a) of TRUIRJA did not apply with respect to chapter 11 and with respect to property acquired or passing from the decedent (within the meaning of section 1014(b) of the Code). Thus, section 301(c) of TRUIRJA allowed the executor of the estate of a decedent who died in 2010 to elect not to have the provisions of chapter 11 apply to the decedent's estate, but rather to have the provisions of section 1022 apply (a Section 1022 Election).

To provide executors with guidance regarding the making of a Section 1022 Election and certain other collateral issues arising from the determination of basis under section 1022, on August 29, 2011, the Treasury Department and the IRS issued Notice 2011-66 (2011-35 IRB 184) and Revenue Procedure 2011-41 (2011-35 IRB 188). Although section 1022 was applicable only to decedents dying in calendar year 2010, basis determined pursuant to that section will continue to be relevant until all of the property whose basis is determined under that section has been sold or otherwise disposed of in a transaction in which gain or loss is recognized. Accordingly, on May 11, 2015, the Treasury Department and the IRS published in the **Federal Register** (80 FR 26873) a notice of proposed rulemaking (REG-107595-11, 2015-21 IRB 986) proposing amendments to existing regulations under various sections of the Code to take into account the application of the modified carryover basis rules of section 1022. The IRS received written comments responding to the notice of proposed rulemaking. No public hearing was requested or held.

After consideration of the comments received on the proposed regulations, this Treasury decision adopts the proposed regulations without

modification as final regulations. However, the final regulations adopt certain nonsubstantive, clarifying changes. The comments received on the proposed regulations are discussed in the remainder of this preamble.

Summary of Comments

One commenter noted that the proposed regulations proposed to amend § 1.742-1 to provide that the basis of a partnership interest acquired from a decedent is determined under section 1022 if the decedent died in 2010 and the decedent's executor made a Section 1022 Election with respect to the decedent's estate. The commenter noted that there was no similar amendment proposed to be made to § 1.1367-1(j), relating to the basis of stock of an S corporation where a portion of the value of the stock is attributable to items constituting income in respect of a decedent (IRD). The commenter recommended that the final regulations amend § 1.1367-1(j) with language referencing section 1022.

After considering this comment, the Treasury Department and the IRS have determined that no change is necessary. Section 1.1367-1(j) states, "[t]he basis determined under section 1014 of any stock in an S corporation is reduced by the portion of the value of the stock that is attributable to items constituting income in respect of a decedent." This regulation section, with its required basis adjustment for IRD, is limited to situations in which section 1014 applies. Section 1.1367-1(j) does not apply when a Section 1022 Election is made because there is no basis adjustment under section 1022 to the date of death value of S corporation stock. Without an adjustment to date of death value, no further adjustment to the basis of S corporation stock is required to account for IRD. Therefore, the final regulations do not adopt this comment.

A commenter noted that the proposed regulations only propose amendments to finalized regulations, and not to proposed regulations or temporary regulations. That commenter specifically requested guidance with respect to proposed regulation § 1.465-69(a) (which provides that a successor to a decedent's amount at risk in an activity is increased by the amount by which the successor's basis in the activity is increased under section 1014) and temporary regulation § 16A.1255-2(b)(2) (which provides that if, as of the date a person acquires section 126 property from a decedent, the basis of the property is determined under section 1014, then on that date the aggregate of excludable portions under

section 126 in the hands of such transferee is zero). This Treasury decision cannot modify provisions of the proposed or temporary regulations referenced by the commenter without adopting those provisions as final or temporary regulations. The Treasury Department and the IRS continue to study these areas, and therefore are not prepared to adopt modifications to the proposed or temporary regulations referenced by the commenter at this time. Accordingly, the final regulations do not adopt this comment. However, the Treasury Department and the IRS expect that, if those proposed or temporary regulations are adopted as final or temporary regulations in the future, such regulations will be updated as appropriate to account for the existence of section 1022.

Another commenter asked why the preamble to the proposed regulations omitted any discussion of the revisions made to regulations under six particular sections of the Code, and requested an explanation as to why changes to those regulatory provisions were considered less significant than the changes for which an explanation was given. Generally, the Treasury Department and the IRS included descriptions of the proposed changes in that preamble that involved more than a mere insertion of a reference to section 1022 in addition to an existing reference to section 1014. In such cases, it was determined that an explanation or clarification of the substance or effect of the proposed revision would be helpful. In the case of the proposed amendments to regulations under the six Code sections mentioned by the commenter, the only change proposed was the mere insertion of references to section 1022 in addition to existing references to section 1014. Accordingly, the Treasury Department and the IRS determined that no further explanation of those changes was necessary.

A commenter also asked why the proposed regulations did not incorporate the treatment of items under the various Code sections addressed in Revenue Procedure 2011-41, 2011-35 IRB 188. That revenue procedure provides a safe harbor that determines the effect on the application of various Code sections of a Section 1022 Election. The provisions relating to that safe harbor are available only if the executor of the estate makes a Section 1022 Election and takes no position contrary to a provision in that revenue procedure. Nothing in these final regulations changes or invalidates the provisions of Revenue Procedure 2011-41, so the safe harbor will remain available to qualifying taxpayers.

Consequently, it is unnecessary to incorporate the revenue procedure into these regulations.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. The Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply to these final regulations because the final regulations do not impose a collection of information requirement on small entities. Therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business, and no comments were received.

Drafting Information

The principal author of these final regulations is Mayer R. Samuels, Office of the Associate Chief Counsel (Passthroughs and Special Industries). Other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.48-12 is amended by revising the last sentence of paragraph (b)(2)(vii)(B) and adding paragraph (g) to read as follows:

§ 1.48-12 Qualified rehabilitated building; expenditures incurred after December 31, 1981.

* * * * *

(b) * * *

(2) * * *

(vii) * * *

(B) * * * If a transferee's basis is determined under section 1014 or section 1022, any expenditures incurred by the decedent within the measuring period that are treated as having been incurred by the transferee under

paragraph (c)(3)(ii) of this section shall decrease the transferee's basis for purposes of the substantial rehabilitation test.

* * * * *

(g) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.48-12 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 3.** Section 1.83-4 is amended by revising the last sentence of paragraph (b)(1) and adding paragraph (d) to read as follows:

§ 1.83-4 Special rules.

* * * * *

(b) * * *

(1) * * * Such basis shall also reflect any adjustments to basis provided under sections 1015, 1016, and 1022.

* * * * *

(d) *Effective/applicability date.* The provisions in this section are applicable for taxable years beginning on or after July 21, 1978. The provisions of paragraph (b)(1) of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 4.** Section 1.179-4 is amended by revising the first sentence of paragraph (c)(1)(iv) to read as follows:

§ 1.179-4 Definitions.

* * * * *

(c) * * *

(1) * * *

(iv) The property is not acquired by purchase if the basis of the property in the hands of the person acquiring it is determined in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired, is determined under section 1014(a), relating to property acquired from a decedent, or is determined under section 1022, relating to property acquired from certain decedents who died in 2010. * * *

* * * * *

■ **Par. 5.** Section 1.179-6 is amended by:

- 1. Revising the section heading and the first sentence of paragraph (a).
- 2. Adding paragraph (d).

The revision and addition read as follows:

§ 1.179-6 Effective/applicability dates.

(a) * * * Except as provided in paragraphs (b), (c), and (d) of this section, the provisions of §§ 1.179-1 through 1.179-5 apply for property placed in service by the taxpayer in taxable years ending after January 25, 1993. * * *

* * * * *

(d) *Application of § 1.179-4(c)(1)(iv).* The provisions of § 1.179-4(c)(1)(iv)

relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 6.** Section 1.197–2 is amended by revising paragraphs (h)(5)(i) and (h)(12)(viii) and adding paragraph (l)(5) to read as follows:

§ 1.197–2 Amortization of goodwill and certain other intangibles.

* * * * *

(h) * * *

(5) * * *

(i) The acquisition of a section 197(f)(9) intangible if the acquiring taxpayer's basis in the intangible is determined under section 1014(a) or 1022; or

* * * * *

(12) * * *

(viii) *Operating rule for transfers upon death.* For purposes of this paragraph (h)(12), if the basis of a partner's interest in a partnership is determined under section 1014(a) or 1022, such partner is treated as acquiring such interest from a person who is not related to such partner, and such interest is treated as having previously been held by a person who is not related to such partner.

* * * * *

(l) * * *

(5) *Application of section 1022.* The provisions of § 1.197–2(h)(5)(i) and (h)(12)(viii) relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 7.** Section 1.267(d)–1 is amended by revising paragraph (a)(3) to read as follows:

§ 1.267(d)–1 Amount of gain where loss previously disallowed.

(a) * * *

(3) The benefit of the general rule is available only to the original transferee but does not apply to any original transferee (for example, a donee or a person acquiring property from a decedent where the basis of property is determined under section 1014 or 1022) who acquired the property in any manner other than by purchase or exchange.

* * * * *

■ **Par. 8.** Section 1.267(d)–2 is amended by revising the section heading and adding a sentence to the end of the paragraph to read as follows:

§ 1.267(d)–2 Effective/applicability dates.

* * * The provisions of § 1.267(d)–1(a)(3) relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 9.** Section 1.273–1 is revised to read as follows:

§ 1.273–1 Life or terminable interests.

(a) *In general.* Amounts paid as income to the holder of a life or a

terminable interest acquired by gift, bequest, or inheritance shall not be subject to any deduction for shrinkage (whether called by depreciation or any other name) in the value of such interest due to the lapse of time. In other words, the holder of such an interest so acquired may not set up the value of the expected future payments as corpus or principal and claim deduction for shrinkage or exhaustion thereof due to the passage of time. For the treatment generally of distributions to beneficiaries of an estate or trust, see Subparts A, B, C, and D (section 641 and following), Subchapter J, Chapter 1 of the Code, and the regulations thereunder. For basis of property acquired from a decedent and by gifts and transfers in trust, see sections 1014, 1015, and 1022, and the regulations thereunder.

(b) *Effective/applicability date.* The provisions in this section are applicable for taxable years beginning on or after September 16, 1958. The provisions of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 10.** Section 1.306–3 is amended by removing the last sentence of paragraph (e) and adding two sentences in its place to read as follows:

§ 1.306–3 Section 306 stock defined.

* * * * *

(e) * * * Section 306 stock ceases to be so classified if the basis of such stock is determined by reference to its fair market value on the date of the decedent-stockholder's death under section 1014 or the optional valuation date under section 2032. Section 306 stock continues to be so classified if the basis of such stock is determined under section 1022.

* * * * *

■ **Par. 11.** Section 1.306–4 is added to read as follows:

§ 1.306–4 Effective/applicability date.

The provisions of §§ 1.306–1 through 1.306–3 are applicable on or after June 22, 1954. The provisions of § 1.306–3 relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 12.** Section 1.336–1 is amended by revising paragraph (b)(5)(i)(A) to read as follows:

§ 1.336–1 General principles, nomenclature, and definitions for a section 336(e) election.

* * * * *

(b) * * *

(5) * * *

(i) * * *

(A) The basis of the stock in the hands of the purchaser is not determined in whole or in part by reference to the

adjusted basis of such stock in the hands of the person from whom the stock is acquired, is not determined under section 1014(a) (relating to property acquired from a decedent), or is not determined under section 1022 (relating to the basis of property acquired from certain decedents who died in 2010);

* * * * *

■ **Par. 13.** Section 1.336–5 is amended by revising the section heading and adding a sentence to the end of the paragraph to read as follows:

§ 1.336–5 Effective/applicability dates.

* * * The provisions of § 1.336–1(b)(5)(i)(A) relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 14.** Section 1.355–6 is amended by revising paragraphs (d)(1)(i)(A)(2) and (g) to read as follows:

§ 1.355–6 Recognition of gain on certain distributions of stock or securities in controlled corporation.

* * * * *

(d) * * *

(1) * * *

(i) * * *

(A) * * *

(2) Under section 1014(a) or 1022; and

* * * * *

(g) *Effective/applicability dates.* This section applies to distributions occurring after December 20, 2000, except that they do not apply to any distributions occurring pursuant to a written agreement that is (subject to customary conditions) binding on December 20, 2000, and at all later times. The provisions of paragraph (d)(1)(i)(A)(2) of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 15.** Section 1.382–1 is amended by revising the entry for § 1.382–9(d)(6) to read as follows:

§ 1.382–9 Special rules under section 382 for corporations under the jurisdiction of a court in a title 11 or similar case.

* * * * *

(d) * * *

(6) Effective/applicability date.

* * * * *

■ **Par. 16.** Section 1.382–9 is amended by revising paragraphs (d)(5)(ii)(D) and (d)(6)(i) to read as follows:

§ 1.382–9 Special rules under section 382 for corporations under the jurisdiction of a court in a title 11 or similar case.

* * * * *

(d) * * *

(5) * * *

(ii) * * *

(D) The transferee's basis in the indebtedness is determined under

section 1014, 1015, or 1022 or with reference to the transferor's basis in the indebtedness;

* * * * *

(6) *Effective/applicability date*—(i) *In general.* This paragraph (d) applies to ownership changes occurring on or after March 17, 1994. The provisions of paragraph (d)(5)(ii)(D) of this section relating to section 1022 are effective on and after January 19, 2017.

* * * * *

■ **Par. 17.** Section 1.421–2 is amended by:

■ 1. Revising paragraphs (c)(4)(i)(a) and (c)(4)(ii).

■ 2. Revising the heading of paragraph (f) and adding paragraph (f)(3).

The revisions and addition read as follows:

§ 1.421–2 General rules.

* * * * *

(c) * * *

(4)(i)(a) In the case of the death of an optionee, the basis of any share of stock acquired by the exercise of an option under this paragraph (c), determined under section 1011, shall be increased by an amount equal to the portion of the basis of the option attributable to such share. For example, if a statutory option to acquire 10 shares of stock has a basis of \$100, the basis of one share acquired by a partial exercise of the option, determined under section 1011, would be increased by 1/10th of \$100, or \$10. The option acquires a basis, determined under section 1014(a) or under section 1022, if applicable, only if the transfer of the share pursuant to the exercise of such option qualifies for the special tax treatment provided by section 421(a). To the extent the option is so exercised, in whole or in part, it will acquire a basis equal to its fair market value (or the basis as determined under section 1022, if applicable) at the date of the employee's death or, if an election is made under section 2032, its value at its applicable valuation date. In certain cases, the basis of the share is subject to the adjustments provided by paragraphs (c)(4)(i)(b) and (c) of this section, but such adjustments are only applicable in the case of an option that is subject to section 423(c).

* * * * *

(ii) If a statutory option is not exercised by the estate of the individual to whom the option was granted, or by the person who acquired such option by bequest or inheritance or by reason of the death of such individual, the option shall be considered to be property that constitutes a right to receive an item of income in respect of a decedent to which the rules of sections 691 and

1014(c) (or section 1022(f), if applicable) apply.

* * * * *

(f) *Effective/applicability date.* * * *

* * * * *

(3) *Application of section 1022.* The provisions of paragraph (c) of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 18.** Section 1.423–2 is amended by:

■ 1. Revising the third sentence of paragraph (k)(2).

■ 2. Adding a sentence to the end of paragraph (l).

The revision and addition read as follows:

§ 1.423–2 Employee stock purchase plan defined.

* * * * *

(k) * * *

(2) * * * If the special rules provided in this paragraph (k) are applicable to a share of stock upon the death of an employee, then the basis of the share in the hands of the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014 or under section 1022, if applicable, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in the decedent's gross income under this paragraph (k). * * *

* * * * *

(l) * * * The provisions of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 19.** Section 1.424–1 is amended by revising the last sentence of paragraph (c)(2) and adding paragraph (g)(3) to read as follows:

§ 1.424–1 Definitions and special rules applicable to statutory options.

* * * * *

(c) * * *

(2) * * * For determination of basis in the hands of the survivor where joint ownership is terminated by the death of one of the owners, see section 1014 or section 1022, if applicable.

* * * * *

(g) * * *

(3) *Application of section 1022.* The provisions of paragraph (c)(2) of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 20.** Section 1.467–7 is amended by revising paragraph (c)(2) and revising the first sentence of paragraph (c)(4) to read as follows:

§ 1.467–7 Section 467 recapture and other rules relating to dispositions and modifications.

* * * * *

(c) * * *

(2) *Dispositions at death.* Paragraph (a) of this section does not apply to a disposition if the basis of the property in the hands of the transferee is determined under section 1014(a) or section 1022. However, see paragraph (c)(4) of this section for dispositions of property subject to section 1022 by transferees. This paragraph (c)(2) does not apply to property that constitutes a right to receive an item of income in respect of a decedent. See sections 691, 1014(c), and 1022(f).

* * * * *

(4) * * * If the recapture amount with respect to a disposition of property (the first disposition) is limited under paragraph (c)(1) or (c)(3) of this section, or under paragraph (c)(2) of this section because the basis of the property in the hands of the transferee is determined under section 1022, and the transferee subsequently disposes of the property in a transaction to which paragraph (a) of this section applies, the prior understated inclusion determined under paragraph (b)(2) of this section is computed by taking into account the amounts attributable to the period of the transferor's ownership of the property prior to the first disposition. * * *

* * * * *

■ **Par. 21.** Section 1.467–9 is amended by revising the section heading and adding paragraph (f) to read as follows:

§ 1.467–9 Effective/applicability dates and automatic method changes for certain agreements.

* * * * *

(f) *Application of section 1022.* The provisions of § 1.467–7(c)(2) and (4) relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 22.** Section 1.617–3 is amended by revising paragraph (d)(5)(ii)(b) to read as follows:

§ 1.617–3 Recapture of exploration expenditures.

* * * * *

(d) * * *

(5) * * *

(ii) * * *

(b) The transactions referred to in paragraph (d)(5)(ii)(a) of this section are:

(1) A disposition that is in part a sale or exchange and in part a gift;

(2) A disposition that is described in section 617(d) through the incorporation by reference of the provisions of section 1245(b)(3) (relating to certain tax free transactions); or

(3) A transfer at death where basis of property in the hands of the transferee is determined under section 1022.

* * * * *

■ **Par. 23.** Section 1.617–4 is amended by revising the second sentence of paragraph (c)(1)(i) to read as follows:

§ 1.617–4 Treatment of gain from disposition of certain mining property.

* * * * *

(c) * * *

(1)(i) * * * For purposes of this paragraph (c), the term *gift* means, except to the extent that paragraph (c)(1)(ii) of this section applies, a transfer of mining property that, in the hands of the transferee, has a basis determined under the provisions of section 1015(a) or 1015(d) (relating to basis of property acquired by gift) or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010). * * *

* * * * *

■ **Par. 24.** Section 1.617–5 is added to read as follows:

§ 1.617–5 Effective/applicability date.

Sections 1.617–3 and 1.617–4 apply on and after January 19, 2017. For rules before January 19, 2017, see §§ 1.617–3 and 1.617–4 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 25.** Section 1.684–3 is amended by revising paragraph (c) to read as follows:

§ 1.684–3 Exceptions to general rule of gain recognition.

* * * * *

(c) *Certain transfers at death—(1) Section 1014 basis.* The general rule of gain recognition under § 1.684–1 shall not apply to any transfer of property to a foreign trust or foreign estate or, in the case of a transfer of property by a U.S. transferor decedent dying in 2010, to a foreign trust, foreign estate, or a nonresident alien, by reason of death of the U.S. transferor, if the basis of the property in the hands of the transferee is determined under section 1014(a).

(2) *Section 1022 basis election.* For U.S. transferor decedents dying in 2010, the general rule of gain recognition under § 1.684–1 shall apply to any transfer of property by reason of death of the U.S. transferor if the basis of the property in the hands of the foreign trust, foreign estate, or the nonresident alien individual is determined under section 1022. The gain on the transfer shall be calculated as set out under § 1.684–1(a), except that adjusted basis will reflect any increases allocated to such property under section 1022.

* * * * *

■ **Par. 26.** Section 1.684–5 is revised to read as follows:

§ 1.684–5 Effective/applicability dates.

(a) Sections 1.684–1 through 1.684–4 apply to transfers of property to foreign trusts and foreign estates after August 7, 2000, except as provided in paragraph (b) of this section.

(b) In the case a U.S. transferor decedent dying in 2010, § 1.684–3(c) applies to transfers of property to foreign trusts, foreign estates, and nonresident aliens after December 31, 2009, and before January 1, 2011.

■ **Par. 27.** Section 1.691(a)–3 is amended by revising the last two sentences of paragraph (a) and adding paragraph (c) to read as follows:

§ 1.691(a)–3 Character of gross income.

(a) * * * The provisions of section 1014(a), relating to the basis of property acquired from a decedent, and section 1022, relating to the basis of property acquired from certain decedents who died in 2010, do not apply to these amounts in the hands of the estate and such persons. See sections 1014(c) and 1022(f).

* * * * *

(c) *Effective/applicability dates.* The last two sentences of paragraph (a) of this section apply on and after January 19, 2017. For rules before January 19, 2017, see § 1.691(a)–3 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 28.** Section 1.742–1 is revised to read as follows:

§ 1.742–1 Basis of transferee partner's interest.

(a) *In general.* The basis to a transferee partner of an interest in a partnership shall be determined under the general basis rules for property provided by part II (section 1011 and following), Subchapter O, Chapter 1 of the Internal Revenue Code. Thus, the basis of a purchased interest will be its cost. Generally, the basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of his death or at the alternate valuation date, increased by his estate's or other successor's share of partnership liabilities, if any, on that date, and reduced to the extent that such value is attributable to items constituting income in respect of a decedent (see section 753 and §§ 1.706–1(c)(3)(v) and 1.753–1(b)) under section 691. See section 1014(c). However, the basis of a partnership interest acquired from a decedent is determined under section 1022 if the decedent died in 2010 and the decedent's executor elected to have section 1022 apply to the decedent's estate. For basis of contributing partner's interest, see section 722. The basis so determined is then subject to

the adjustments provided in section 705.

(b) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.742–1 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 29.** Section 1.743–1 is amended by revising paragraphs (k)(2)(ii) and (l) to read as follows:

§ 1.743–1 Optional adjustment to basis of partnership property.

* * * * *

(k) * * *

(2) * * *

(ii) *Special rule.* A transferee that acquires, on the death of a partner, an interest in a partnership with an election under section 754 in effect for the taxable year of the transfer, must notify the partnership, in writing, within one year of the death of the deceased partner. The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the deceased partner and the transferee, the relationship (if any) between the transferee and the transferor, the deceased partner's date of death, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014 or section 1022, the manner in which the fair market value of the partnership interest was determined, and the carryover basis as adjusted under section 1022 (if applicable).

* * * * *

(l) *Effective/applicability date.* The provisions in this section apply to transfers of partnership interests that occur on or after December 15, 1999. The provisions of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 30.** Section 1.755–1 is amended by:

■ 1. Revising paragraphs (a)(4)(i)(C) and the first sentence of (b)(4)(i).

■ 2. Revising the heading of paragraph (e) and paragraph (e)(2).

The revisions read as follows:

§ 1.755–1 Rules for allocation of basis.

(a) * * *

(4) * * *

(i) * * *

(C) *Income in respect of a decedent.* Solely for the purpose of determining partnership gross value under this paragraph (a)(4)(i), where a partnership interest is transferred as a result of the death of a partner, the transferee's basis

in its partnership interest is determined without regard to section 1014(c) or section 1022(f), and is deemed to be adjusted for that portion of the interest, if any, that is attributable to items representing income in respect of a decedent under section 691.

* * * * *

(b) * * *

(4) * * *

(i) * * * Where a partnership interest is transferred as a result of the death of a partner, under section 1014(c) or section 1022(f), the transferee's basis in its partnership interest is not adjusted for that portion of the interest, if any, that is attributable to items representing income in respect of a decedent under section 691. * * *

* * * * *

(e) *Effective/applicability dates.* * * *

(2) *Special rules.* Paragraphs (a) and (b)(3)(iii) of this section apply to transfers of partnership interests and distributions of property from a partnership that occur on or after June 9, 2003. The provisions of paragraphs (a)(4)(i)(C) and (b)(4)(i) of this section relating to section 1022 are effective on and after the date January 19, 2017.

■ **Par. 31.** Section 1.995-4 is amended by revising the first sentence of paragraph (d)(2) and adding paragraph (f) to read as follows:

§ 1.995-4 Gain on disposition of stock in a DISC.

* * * * *

(d) * * *

(2) * * * For purposes of this section, the period during which a shareholder has held stock includes the period he is considered to have held it by reason of the application of section 1223 and, if his basis is determined in whole or in part under the provisions of section 1014(d) (relating to special rule for DISC stock acquired from decedent) or section 1022 (relating to property acquired from certain decedents who died in 2010), the holding period of the decedent.

* * *

* * * * *

(f) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.995-4 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 32.** Section 1.1001-1 is amended by revising the last sentence of paragraph (a), revising paragraph (f)(1), and adding paragraph (i) to read as follows:

§ 1.1001-1 Computation of gain or loss.

(a) * * * Section 1001(e) and paragraph (f) of this section prescribe the method of computing gain or loss

upon the sale or other disposition of a term interest in property the adjusted basis (or a portion) of which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010).

* * * * *

(f) * * *

(1) *General rule.* Except as otherwise provided in paragraph (f)(3) of this section, for purposes of determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in paragraph (f)(2) of this section), a taxpayer shall not take into account that portion of the adjusted basis of such interest that is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010) to the extent that such adjusted basis is a portion of the adjusted uniform basis of the entire property (as defined in § 1.1014-5). Where a term interest in property is transferred to a corporation in connection with a transaction to which section 351 applies and the adjusted basis of the term interest:

(i) Is determined pursuant to sections 1014, 1015, or 1022; and

(ii) Is also a portion of the adjusted uniform basis of the entire property, a subsequent sale or other disposition of such term interest by the corporation will be subject to the provisions of section 1001(e) and this paragraph (f) to the extent that the basis of the term interest so sold or otherwise disposed of is determined by reference to its basis in the hands of the transferor as provided by section 362(a). See paragraph (f)(2) of this section for rules relating to the characterization of stock received by the transferor of a term interest in property in connection with a transaction to which section 351 applies. That portion of the adjusted uniform basis of the entire property that is assignable to such interest at the time of its sale or other disposition shall be determined under the rules provided in § 1.1014-5. Thus, gain or loss realized from a sale or other disposition of a term interest in property shall be determined by comparing the amount of the proceeds of such sale with that part of the adjusted basis of such interest that is not a portion of the

adjusted uniform basis of the entire property.

* * * * *

(i) *Effective/applicability date.* Except as provided in paragraphs (g) and (h) of this section, this section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1001-1 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 33.** Section 1.1014-1 is amended by revising paragraph (a) and adding paragraph (d) to read as follows:

§ 1.1014-1 Basis of property acquired from a decedent.

(a) *General rule.* The purpose of section 1014 is, in general, to provide a basis for property acquired from a decedent that is equal to the value placed upon such property for purposes of the federal estate tax. Accordingly, the general rule is that the basis of property acquired from a decedent is the fair market value of such property at the date of the decedent's death, or, if the decedent's executor so elects, at the alternate valuation date prescribed in section 2032, or in section 811(j) of the Internal Revenue Code (Code) of 1939. However, the basis of property acquired from certain decedents who died in 2010 is determined under section 1022, if the decedent's executor made an election under section 301(c) of the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, Public Law 111-312 (124 Stat. 3296, 3300 (2010)). See section 1022. Property acquired from a decedent includes, principally, property acquired by bequest, devise, or inheritance, and, in the case of decedents dying after December 31, 1953, property required to be included in determining the value of the decedent's gross estate under any provision of the Code of 1954 or the Code of 1939. The general rule governing basis of property acquired from a decedent, as well as other rules prescribed elsewhere in this section, shall have no application if the property is sold, exchanged, or otherwise disposed of before the decedent's death by the person who acquired the property from the decedent. For general rules on the applicable valuation date where the executor of a decedent's estate elects under section 2032, or under section 811(j) of the Code of 1939, to value the decedent's gross estate at the alternate valuation date prescribed in such sections, see § 1.1014-3(e).

* * * * *

(d) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017,

see § 1.1014–1 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 34.** Section 1.1014–4 is amended by revising the first sentence of paragraph (a)(1), revising the second sentence of paragraph (a)(2), and adding paragraph (d) to read as follows:

§ 1.1014–4 Uniformity of basis; adjustment to basis.

(a) * * *

(1) The basis of property acquired from a decedent, as determined under section 1014(a) or section 1022, is uniform in the hands of every person having possession or enjoyment of the property at any time under the will or other instrument or under the laws of descent and distribution. * * *

(2) * * * Accordingly, there is a common acquisition date for all titles to property acquired from a decedent within the meaning of section 1014 or section 1022, and, for this reason, a common or uniform basis for all such interests. * * *

* * * * *

(d) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1014–4 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 35.** Section 1.1014–5 is amended by revising paragraph (b) to read as follows:

§ 1.1014–5 Gain or loss.

* * * * *

(b) *Sale or other disposition of certain term interests—(1) In general.* In determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in § 1.1001–1(f)(2)) the adjusted basis of which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010), that part of the adjusted uniform basis assignable under the rules of paragraph (a) of this section to the interest sold or otherwise disposed of shall be disregarded to the extent and in the manner provided by section 1001(e) and § 1.1001–1(f).

(2) *Effective/applicability date.* The provisions of paragraph (b)(1) of this section relating to section 1022 are effective on and after January 19, 2017. For rules before January 19, 2017, see § 1.1014–5 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 36.** Section 1.1223–1 is amended by adding a sentence to the end of

paragraph (b) and adding paragraph (l) to read as follows:

§ 1.1223–1 Determination of period for which capital assets are held.

* * * * *

(b) * * * Similarly, the period for which property acquired from a decedent who died in 2010 was held by the decedent must be included in determining the period during which the property was held by the recipient, if the recipient's basis in the property is determined under section 1022.

* * * * *

(l) *Effective/applicability date.* This section applies January 19, 2017. For rules before January 19, 2017, see § 1.1223–1 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 37.** Section 1.1245–2 is amended by revising paragraph (c)(2)(ii) and adding paragraph (d) to read as follows:

§ 1.1245–2 Definition of recomputed basis.

* * * * *

(c) * * *

(2) * * *

(ii) The transactions referred to in paragraph (c)(2)(i) of this section are:

(A) A disposition that is in part a sale or exchange and in part a gift (see § 1.1245–4(a)(3));

(B) A disposition (other than a disposition to which section 1245(b)(6)(A) applies) that is described in section 1245(b)(3) (relating to certain tax-free transactions);

(C) An exchange described in § 1.1245–4(e)(2) (relating to transfers described in section 1081(d)(1)(A)); or

(D) A transfer at death where the basis of property in the hands of the transferee is determined under section 1022.

* * * * *

(d) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1245–2 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 38.** Section 1.1245–3 is amended by revising paragraph (a)(3) and adding paragraph (d) to read as follows:

§ 1.1245–3 Definition of section 1245 property.

(a) * * *

(3) Even though property may not be of a character subject to the allowance for depreciation in the hands of the taxpayer, such property may nevertheless be section 1245 property if the taxpayer's basis for the property is determined by reference to its basis in the hands of a prior owner of the property and such property was of a character subject to the allowance for depreciation in the hands of such prior

owner, or if the taxpayer's basis for the property is determined by reference to the basis of other property that in the hands of the taxpayer was property of a character subject to the allowance for depreciation, or if the taxpayer's basis for the property is determined under section 1022 and such property was of a character subject to the allowance for depreciation in the hands of the decedent. Thus, for example, if a father uses an automobile in his trade or business during a period after December 31, 1961, and then gives the automobile to his son as a gift for the son's personal use, the automobile is section 1245 property in the hands of the son.

* * * * *

(d) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1245–3 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 39.** Section 1.1245–4 is amended by revising the second sentence of paragraph (a)(1) and adding paragraph (i) to read as follows:

§ 1.1245–4 Exceptions and Limitations.

(a) * * *

(1) * * * For purposes of this paragraph (a), the term *gift* means, except to the extent that paragraph (a)(3) of this section applies, a transfer of property that, in the hands of the transferee, has a basis determined under the provisions of section 1015(a) or 1015(d) (relating to basis of property acquired by gifts) or section 1022 (relating to basis of property acquired from certain decedents who died in 2010). * * *

* * * * *

(i) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1245–4 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 40.** Section 1.1250–4 is amended by adding paragraphs (c)(5) and (h) to read as follows:

§ 1.1250–4 Holding period.

* * * * *

(c) * * *

(5) A transfer at death where the basis of the property in the hands of the transferee is determined under section 1022.

* * * * *

(h) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.1250–4 as contained in 26 CFR part 1 revised as of April 1, 2016.

■ **Par. 41.** Section 1.1254–2 is amended by revising the second sentence of paragraph (a)(1) to read as follows:

§ 1.1254-2 Exceptions and limitations.

(a) * * *

(1) * * * For purposes of this paragraph (a), the term *gift* means, except to the extent that paragraph (a)(2) of this section applies, a transfer of natural resource recapture property that, in the hands of the transferee, has a basis determined under the provisions of section 1015(a) or 1015(d) (relating to basis of property acquired by gift) or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010). * * *

* * * * *

■ **Par. 42.** Section 1.1254-3 is amended by revising paragraphs (b)(2)(ii) and (iii) and adding paragraph (b)(2)(iv) to read as follows:

§ 1.1254-3 Section 1254 costs immediately after certain acquisitions.

* * * * *

(b) * * *

(2) * * *

(ii) A transaction described in section 1041(a);

(iii) A disposition described in § 1.1254-2(c)(3) (relating to certain tax-free transactions); or

(iv) A transfer at death where basis of property in the hands of the transferee is determined under section 1022.

* * * * *

■ **Par. 43.** Section 1.1254-4 is amended by revising paragraph (e)(4) introductory text to read as follows:

§ 1.1254-4 Special rules for S corporations and their shareholders.

* * * * *

(e) * * *

(4) * * * If stock is acquired in a transfer that is a gift, in a transfer that is a part sale or exchange and part gift, in a transfer that is described in section 1041(a), or in a transfer at death where the basis of property in the hands of the transferee is determined under section 1022, the amount of section 1254 costs with respect to the property held by the corporation in the acquiring shareholder's hands immediately after the transfer is an amount equal to—

* * * * *

■ **Par. 44.** Section 1.1254-5 is amended by revising paragraph (c)(2)(iv) introductory text to read as follows:

§ 1.1254-5 Special rules for partnerships and their partners.

* * * * *

(c) * * *

(2) * * *

(iv) * * * If an interest in a partnership is transferred in a transfer that is a gift, in a transfer that is a part sale or exchange and part gift, in a

transfer that is described in section 1041(a), or in a transfer at death where the basis of property in the hands of the transferee is determined under section 1022, the amount of the transferee partner's section 1254 costs with respect to property held by the partnership immediately after the transfer is an amount equal to—

* * * * *

■ **Par. 45.** Section 1.1254-6 is revised to read as follows:

§ 1.1254-6 Effective/applicability date.

(a) Sections 1.1254-1 through 1.1254-3 and 1.1254-5 are effective with respect to any disposition of natural resource recapture property occurring after March 13, 1995. The rule in § 1.1254-1(b)(2)(iv)(A)(2), relating to a nonoperating mineral interest carved out of an operating mineral interest with respect to which an expenditure has been deducted, is effective with respect to any disposition occurring after March 13, 1995, of property (within the meaning of section 614) that is placed in service by the taxpayer after December 31, 1986. Section 1.1254-4 applies to dispositions of natural resource recapture property by an S corporation (and a corporation that was formerly an S corporation) and dispositions of S corporation stock occurring on or after October 10, 1996. Sections 1.1254-2(d)(1)(ii) and 1.1254-3(b)(1)(i), (b)(1)(ii), (d)(1)(i), and (d)(1)(ii) are effective for dispositions of property occurring on or after October 10, 1996.

(b) The provisions of §§ 1.1254-2(a)(1), 1.1254-3(b)(2), 1.1254-4(e)(4), and 1.1254-5(c)(2)(iv) that relate to section 1022 are effective on and after January 19, 2017.

■ **Par. 46.** Section 1.1296-1 is amended by revising paragraphs (d)(4) and (j) to read as follows:

§ 1.1296-1 Mark to market election for marketable stock.

* * * * *

(d) * * *

(4) *Stock acquired from a decedent.* In the case of stock of a PFIC that is acquired by bequest, devise, or inheritance (or by the decedent's estate) and with respect to which a section 1296 election was in effect as of the date of the decedent's death, notwithstanding section 1014 or section 1022, the basis of such stock in the hands of the person so acquiring it shall be the adjusted basis of such stock in the hands of the decedent immediately before his death (or, if lesser, the basis that would have been determined under

section 1014 or section 1022 without regard to this paragraph (d)).

* * * * *

(j) *Effective/applicability date.* The provisions in this section are applicable for taxable years beginning on or after May 3, 2004. The provisions of paragraph (d)(4) of this section relating to section 1022 are effective on and after January 19, 2017.

■ **Par. 47.** Section 1.1312-7 is amended by revising paragraph (b) and adding paragraph (d) to read as follows:

§ 1.1312-7 Basis of property after erroneous treatment of a prior transaction.

* * * * *

(b)(1) For this section to apply, the taxpayer with respect to whom the erroneous treatment occurred must be:

(i) The taxpayer with respect to whom the determination is made; or

(ii) A taxpayer who acquired title to the property in the erroneously treated transaction and from whom, mediately or immediately, the taxpayer with respect to whom the determination is made derived title in such a manner that he will have a basis ascertained by reference to the basis in the hands of the taxpayer who acquired title to the property in the erroneously treated transaction; or

(iii) A taxpayer who had title to the property at the time of the erroneously treated transaction and from whom, mediately or immediately, the taxpayer with respect to whom the determination is made derived title, if the basis of the property in the hands of the taxpayer with respect to whom the determination is made is determined under section 1015(a) (relating to the basis of property acquired by gift) or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010).

(2) No adjustment is authorized with respect to the transferor of the property in a transaction upon which the basis of the property depends, when the determination is with respect to the original transferee or a subsequent transferee of the original transferee.

* * * * *

(d) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017,

see § 1.1312–7 as contained in 26 CFR part 1 revised as of April 1, 2016.

John Dalrymple,
Deputy Commissioner for Services and Enforcement.

Approved: November 11, 2016.

Mark J. Mazur,
Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–P

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 4022

Benefits Payable in Terminated Single-Employer Plans; Interest Assumptions for Paying Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This final rule amends the Pension Benefit Guaranty Corporation's regulation on Benefits Payable in Terminated Single-Employer Plans to prescribe interest assumptions under the regulation for valuation dates in February 2017. The interest assumptions are used for paying benefits under terminating single-employer plans covered by the pension insurance system administered by PBGC.

DATES: Effective February 1, 2017.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy (*Murphy.Deborah@pbgc.gov*), Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005, 202–326–4400 ext. 3451. (TTY/TDD users may call the Federal relay service toll-free at

1–800–877–8339 and ask to be connected to 202–326–4400 ext. 3451.)

SUPPLEMENTARY INFORMATION: PBGC's regulation on Benefits Payable in Terminated Single-Employer Plans (29 CFR part 4022) prescribes actuarial assumptions—including interest assumptions—for paying plan benefits under terminating single-employer plans covered by title IV of the Employee Retirement Income Security Act of 1974. The interest assumptions in the regulation are also published on PBGC's Web site (*http://www.pbgc.gov*).

PBGC uses the interest assumptions in Appendix B to Part 4022 to determine whether a benefit is payable as a lump sum and to determine the amount to pay. Appendix C to Part 4022 contains interest assumptions for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using PBGC's historical methodology. Currently, the rates in Appendices B and C of the benefit payment regulation are the same.

The interest assumptions are intended to reflect current conditions in the financial and annuity markets. Assumptions under the benefit payments regulation are updated monthly. This final rule updates the benefit payments interest assumptions for February 2017.¹

The February 2017 interest assumptions under the benefit payments regulation will be 1.25 percent for the period during which a benefit is in pay status and 4.00 percent during any years preceding the benefit's placement in pay status. In comparison with the interest assumptions in effect for January 2017, these interest assumptions are unchanged.

PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public

interest. This finding is based on the need to determine and issue new interest assumptions promptly so that the assumptions can reflect current market conditions as accurately as possible.

Because of the need to provide immediate guidance for the payment of benefits under plans with valuation dates during February 2017, PBGC finds that good cause exists for making the assumptions set forth in this amendment effective less than 30 days after publication.

PBGC has determined that this action is not a “significant regulatory action” under the criteria set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects in 29 CFR Part 4022

Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements.

In consideration of the foregoing, 29 CFR part 4022 is amended as follows:

PART 4022—BENEFITS PAYABLE IN TERMINATED SINGLE-EMPLOYER PLANS

■ 1. The authority citation for part 4022 continues to read as follows:

Authority: 29 U.S.C. 1302, 1322, 1322b, 1341(c)(3)(D), and 1344.

■ 2. In appendix B to part 4022, Rate Set 280, as set forth below, is added to the table.

Appendix B to Part 4022—Lump Sum Interest Rates For PBGC Payments

BILLING CODE 7709-02-P

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 347

RIN 1530-AA13

Regulations Governing Retirement Savings Bonds

AGENCY: Bureau of the Fiscal Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: Currently, the Bureau of the Fiscal Service (Fiscal Service) of the United States Department of the Treasury (Treasury), issues nonmarketable, electronic retirement savings bonds to an individual retirement account (IRA) custodian designated by Fiscal Service to act as a custodian for Roth IRAs under Treasury's myRA[®] program. In this Final Rule, Treasury offers nonmarketable, electronic retirement savings bonds for certain retirement savings programs established by states or certain of their political subdivisions (states). The bonds will be issued to a trustee or custodian (custodian) of a Roth IRA or traditional IRA designated by a state under its retirement savings program (whether or not the program provides for automatic enrollment). Interest will be earned at a rate available to federal employees invested in the Government Securities Investment Fund (G Fund) of the federal Thrift Savings Plan.

This offering does not affect the terms of retirement savings bonds issued to the custodian of Treasury's retirement savings program, myRA[®], which are held in participants' Roth IRAs. More information on myRA[®] is available at www.myra.gov.

DATES: This Final Rule is effective January 19, 2017.

FOR FURTHER INFORMATION CONTACT:

Technical information: Gregory Till, myRA Bureau Director, at (202) 622-6970 or Gregory.Till@treasury.gov.

Legal information: Elizabeth Spears, Senior Counsel, at (304) 480-8647 or Lisa.Spears@fiscal.treasury.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Approximately one third of private-sector employees in the United States lack access to a retirement savings plan through their employers.¹ To fill this gap, several states are establishing or considering establishing programs that will encourage employees to save for their retirement, including through individual retirement accounts into which employees are automatically enrolled and through other approaches (collectively referred to here as Auto-IRAs, whether or not they use automatic enrollment).² Under an Auto-IRA program, employee contributions are deposited into an IRA and invested in accordance with the design of the Auto-IRA program and the wishes of the participant. Generally, it is expected that an Auto-IRA program will offer a safe and low-cost investment option as an alternative to a risk-bearing diversified investment, such as a target date fund. In order to assist states in offering savers the option of a principal-protected investment, Fiscal Service will offer retirement savings bonds to state Auto-IRA programs. Fiscal Service reserves the right, however, to decline to issue retirement savings bonds to state Auto-IRA programs on a case-by-case basis, based on considerations such as the structure and reasonableness of associated fees, plans to control fees and expenses, whether participants have reasonable access to their funds, and oversight of providers designated to operate state Auto-IRA programs.

¹ National Compensation Survey, Bureau of Labor Statistics (July 2016), *Employee Benefits in the United States*—March 2016 (<http://www.bls.gov/news.release/pdf/ebs2.pdf>). These data show that 66 percent of 114 million private-sector workers have access to a retirement plan through their employers. By extension, approximately 34 percent of the 114 million private-sector workers (39 million) do not have access to a retirement plan through work.

² The Department of Labor has published regulations relating to state payroll deduction savings programs. 81 FR 59464 (Aug. 30, 2016) and 81 FR 92639 (Dec. 20, 2016).

II. Section-by-Section Analysis

Subpart A—General Information

Section 347.0 Offering of securities. This section is amended to offer retirement savings bonds to Auto-IRA custodians for certain state retirement savings programs.

Section 347.1 Applicability. This section is amended to include the Auto-IRA custodians for state retirement savings programs under this part.

Section 347.2 Official agencies. This section clarifies that Fiscal Service is responsible for issuing retirement savings bonds to the Auto-IRA custodians and that states are responsible for administering their own Auto-IRA retirement savings programs.

Section 347.3 Definitions. Several new definitions, including “Auto-IRA,” “state Auto-IRA program,” “IRA,” “Custodian,” “State,” and “Auto-IRA custodian” have been added for ease of reference in Subpart C—Auto-IRA Programs and minor changes have been made to some existing definitions.

Subpart B—Treasury's Retirement Savings Program

Miscellaneous changes have been made to the sections pertaining to retirement savings bonds issued to the custodian of Treasury's retirement savings program, myRA[®], which are held in participants' Roth IRAs. These changes, which were made to accommodate revised definitions and other minor or technical revisions, do not affect the terms of these bonds. See, e.g., §§ 347.10 through 347.16.

Subpart C—Auto-IRA Programs

Section 347.30 Plan requirements for State Auto-IRA programs.

Subsection (a) of this new section specifies that retirement savings bonds will be issued to Auto-IRA custodians for certain state Auto-IRA programs, and that no other registrations under Subpart C are permitted. As defined in § 347.3, an Auto-IRA custodian is “an entity designated by a state (including, for the purpose of these regulations, certain political subdivisions of states) to act as the trustee or custodian for Auto-IRAs, in the form of Roth IRAs or traditional IRAs, for or opened on behalf of participants in a state Auto-IRA program.” Subsection (b) lists topics

that must be addressed by documentation that programs are required to provide and certify to Fiscal Service annually. The documentation must address: (1) Administration of retirement savings bonds, (2) account monitoring, (3) ability to transfer proceeds, (4) IRA withdrawals, (5) consumer protection, (6) state Auto-IRA program costs of administration, (7) oversight of Auto-IRA custodian, (8) pooling prohibitions, (9) default investments, and (10) consumer education. The Commissioner of the Fiscal Service may use the documentation, among other purposes, in exercising any of the rights reserved under § 347.37, which includes the right to require information addressing additional topics. Subsection (c) provides for a successor Auto-IRA custodian, if needed.

Section 347.31 Crediting of retirement savings bond. This new section requires each bond issued to an Auto-IRA custodian to be credited to an individual's IRA under a state Auto-IRA program.

Section 347.32 Annual additions to retirement savings bond. This new section provides that the initial contribution and additions to a bond on behalf of a participant are subject to the annual contribution limits provided under the Internal Revenue Code and regulations, and that the total value of a retirement savings bond held by an Auto-IRA custodian in an IRA on behalf of any participant cannot exceed \$15,000.00.

Section 347.33 Individual additions to retirement savings bond. This new section authorizes Fiscal Service to establish minimum amounts for initial and additional contributions to a retirement savings bond.

Section 347.34 Payment (redemption). Under this new section, an Auto-IRA custodian is responsible for making certain certifications as a condition of the issuance and redemption of a retirement savings bond. Subsection (a) explains how the Auto-IRA custodian will request that Fiscal Service make payment on matured retirement savings bonds as well as those that have been fully or partially redeemed. Under subsection (b), Fiscal Service will make payment on any bonds that it calls for redemption without the Auto-IRA custodian having to make a request. Under § 347.37(4), the Commissioner of the Fiscal Service may exercise discretion to call the bonds for redemption. This might occur for a variety of reasons, including, for example, in the event that a state Auto-IRA program changed significantly such

that ongoing use of retirement savings bonds is no longer consistent with these regulations, or in the event that a state Auto-IRA program might have failed to comply with program instructions identified by Fiscal Service or might have failed to provide or comply with documentation required pursuant to § 347.30. Subsection (b) clarifies how bonds called for redemption will be paid, which is in the same manner as bonds submitted for redemption under subsection (a).

Section 347.35 Computation of interest. This new section provides that the interest rate on the retirement savings bonds will track the annual percentage rate on securities in the Government Securities Investment Fund (G Fund) in the Thrift Savings Plan for federal employees and that interest will cease at maturity or call.

Section 347.36 Maturity. This new section provides that the maturity dates for the retirement savings bonds may differ for each bond. The longest possible maturity is 30 years (an original maturity period of 20 years and an extended maturity period of 10 years). A bond will mature at the earlier of 30 years from the date the bond is first issued to the Auto-IRA custodian on behalf of the participant or when its value reaches \$15,000.00.

Section 347.37 Reservation of rights. Under this new section, the Commissioner of the Fiscal Service reserves certain rights, including: (1) The right to require a senior official to certify program information to Fiscal Service before the retirement savings bonds are issued to an Auto-IRA custodian; (2) the right to refuse to issue retirement savings bonds to an Auto-IRA custodian in any particular case or class of cases; (3) the right to suspend or cease offering retirement savings bonds to an Auto-IRA custodian; (4) the right to call for redemption of any outstanding retirement savings bond (this might occur for a variety of reasons, including, for example, if a state Auto-IRA program has changed significantly such that ongoing use of retirement savings bonds is no longer consistent with these regulations, or if a state has failed to provide or comply with documentation required pursuant to § 347.30); or (5) the right to determine any appropriate remedy under this subpart.

Subpart D—Miscellaneous Provisions for Retirement Savings Bonds

Subpart D contains miscellaneous provisions (§§ 347.40 through 347.42) that apply to retirement savings bonds issued to the custodians, on behalf of

participants, in Treasury's and the states' programs.

III. Procedural Requirements

A. Administrative Procedure Act

Because this rule relates to United States securities, which are contracts between Treasury and the owners of the securities, this rule falls within the contract exception to the Administrative Procedures Act (APA) at 5 U.S.C. 553(a)(2). As a result, the notice, public comment, and delayed effective date provisions of the APA are inapplicable to this rule.

B. Congressional Review Act

This rule is not a major rule pursuant to the Congressional Review Act (CRA), 5 U.S.C. 801 *et seq.*

C. Paperwork Reduction Act

This final rule contains a new collection of information that is subject to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.* Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The collection of information contained in this final rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)).

D. Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, do not apply to this rule because, pursuant to 5 U.S.C. 553(a)(2), it is not required to be issued with notice and opportunity for public comment.

E. Executive Order 12866

This rule is not a significant regulatory action pursuant to Executive Order 12866.

List of Subjects in 31 CFR Part 347

Government securities, Savings bonds.

For the reasons set forth in the preamble, we amend 31 CFR part 347 as follows:

PART 347—REGULATIONS GOVERNING RETIREMENT SAVINGS BONDS

■ 1. The authority citation for part 347 continues to read as follows:

Authority: 5 U.S.C. 301; 12 U.S.C. 90; 31 U.S.C. 3105.

■ 2. Revise § 347.0 to read as follows:

§ 347.0 Offering of securities.

The Secretary of the Treasury (the Secretary), under the authority of Title 31, Chapter 31, offers retirement savings bonds to the IRA custodian for Treasury's retirement savings program and to the Auto-IRA custodians for certain state Auto-IRA programs. The nonmarketable bonds are issued to and held by the custodians, on behalf of participants, in Treasury's program and state programs. This offering will continue until terminated by the Secretary or the Secretary's designee. Treasury's Fiscal Assistant Secretary is authorized to act on behalf of the Secretary on all matters contained in these regulations. The Commissioner of the Fiscal Service, as designee of the Secretary, is delegated the responsibility to administer this part through the Bureau of the Fiscal Service (Fiscal Service).

■ 3. Revise § 347.1 to read as follows:

§ 347.1 Applicability.

The regulations in this part apply to retirement savings bonds issued, on behalf of participants, to the IRA custodian for Treasury's retirement savings program and to the Auto-IRA custodians for state Auto-IRA programs.

■ 4. Revise § 347.2 to read as follows:

§ 347.2 Official agencies.

(a) Fiscal Service is responsible for administering Treasury's retirement savings program and for issuing the retirement savings bonds to the IRA custodian for Treasury's retirement savings program and to the Auto-IRA custodians for certain state Auto-IRA programs. The states are responsible for administering their Auto-IRA retirement savings programs, including the designation of Auto-IRA custodians to perform all operational responsibilities associated with the retirement savings bonds issued by Fiscal Service.

(b) Communications concerning transactions relating to an individual's IRA should be addressed to the appropriate custodian.

■ 5. In § 347.3:

■ a. Redesignate paragraphs (a) through (g) as paragraphs (g) through (m);

■ b. Add new paragraphs (a) through (f); and

■ c. Revise newly redesignated paragraphs (g) through (j).

The additions and revisions read as follows:

§ 347.3 Definitions.

(a) *Auto-IRA* means an individual retirement account for or opened on behalf of a participant in a state retirement savings program (whether or

not the program provides for automatic enrollment).

(b) *State Auto-IRA program* means a state Auto-IRA retirement savings program.

(c) *IRA* means an individual retirement account.

(d) *Custodian* means a trustee or custodian of a Roth IRA or traditional IRA.

(e) *State* means any of the 50 states, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Commonwealth of the Northern Mariana Islands, or certain of their political subdivisions.

(f) *Auto-IRA custodian* means an entity designated by a state (including, for the purpose of these regulations, political subdivisions of states) to act as the trustee or custodian for Auto-IRAs, in the form of Roth IRAs or traditional IRAs, for or opened on behalf of participants in a state Auto-IRA program.

(g) *Retirement savings bond*, as used in this part, means an interest-bearing electronic United States savings bond issued to an Auto-IRA or IRA custodian.

(h) *IRA custodian* means an entity designated by Fiscal Service to act as a custodian for Roth IRAs opened by or on behalf of participants in Treasury's retirement savings program.

(i) *Individual* means a person eligible to have an IRA in Treasury's retirement savings program or in a state Auto-IRA program.

(j) *Participant* means an individual who has an IRA in Treasury's retirement savings program or in a state Auto-IRA program.

* * * * *

■ 6. Revise the heading of subpart B to read as follows:

Subpart B—Treasury's Retirement Savings Program

■ 7. Revise §§ 347.10 and 347.11 to read as follows:

§ 347.10 Authorized form of registration.

(a) Retirement savings bonds are issued to the IRA custodian for Treasury's retirement savings program. No other registrations under this subpart are permitted.

(b) In the event Fiscal Service designates a successor IRA custodian, Fiscal Service may reissue retirement savings bonds held by the predecessor custodian to the successor custodian.

§ 347.11 Crediting of retirement savings bond.

Each retirement savings bond issued to the IRA custodian must be credited

to a single Roth IRA established through Treasury's retirement savings program with the custodian.

■ 8. Remove the headings for subparts C, D, and E and transfer §§ 347.20, 347.21, 347.30, 347.40, and 347.41 to subpart B, and redesignate them as §§ 347.12 through 347.16, respectively.

■ 9. Revise newly redesignated §§ 347.12 through 347.16 to read as follows:

§ 347.12 Annual additions to retirement savings bond.

The amount that initially may be contributed or added to a retirement savings bond in a calendar year by the IRA custodian on behalf of any participant is limited by the applicable annual contribution limits provided under the Internal Revenue Code and regulations. The total value of a retirement savings bond that may be held by the IRA custodian in an IRA on behalf of any participant shall not exceed \$15,000.

§ 347.13 Individual additions to retirement savings bond.

Fiscal Service is authorized to establish minimum amounts for initial and additional contributions to a retirement savings bond under this subpart.

§ 347.14 Payment (redemption).

Payment of retirement savings bonds will be made to the IRA custodian upon the custodian's submission of a request for redemption to Fiscal Service. The custodian shall request the redemption of all retirement savings bonds at their respective maturity. The custodian shall request the full or partial redemption of a bond held on behalf of a participant upon the request of the participant or other authorized person entitled to amounts in the IRA. Retirement savings bond redemptions will be rounded to the nearest one cent.

§ 347.15 Computation of interest.

Retirement savings bonds under this subpart earn interest at the same annual percentage rate as securities issued to the Government Securities Investment Fund (G Fund) in the Thrift Savings Plan for federal employees. The Secretary calculates the G Fund interest rate pursuant to 5 U.S.C. 8438(e)(2). The retirement savings bond interest rate compounds daily at 1/360 of the annual percentage rate. Retirement savings bonds will cease to accrue interest on the date of their maturity.

§ 347.16 Maturity.

The maturity date for retirement savings bonds is indeterminate and may

be different for each bond issued, but shall not exceed the sum of an original maturity period of 20 years and an extended maturity period of 10 years. A retirement savings bond purchased by the IRA custodian on behalf of a participant will mature at the earlier of 30 years from the date the bond is first issued to the custodian on behalf of the participant or when its value reaches \$15,000.

■ 10. Add a new subpart C to read as follows:

Subpart C—Auto-IRA Programs

Sec.

347.30 Plan requirements for State Auto-IRA programs.

347.31 Crediting of retirement savings bond.

347.32 Annual additions to retirement savings bond.

347.33 Individual additions to retirement savings bond.

347.34 Payment (redemption).

347.35 Computation of interest.

347.36 Maturity.

347.37 Reservation of rights.

Subpart C—Auto-IRA Programs

§ 347.30 Plan requirements for State Auto-IRA programs.

(a) *Authorized form of registration.* Retirement savings bonds are issued to Auto-IRA custodians for state Auto-IRA programs. No other registrations under this subpart are permitted.

(b) *Documentation.* A state Auto-IRA program must provide documentation to Fiscal Service annually, in a form and manner acceptable to Fiscal Service, addressing the following topics:

(1) *Administration*—servicing of the retirement savings bonds, such as account maintenance, recordkeeping, and establishment of procedures for automatic payroll direct deposit contributions (or other funding means permitted under state Auto-IRA programs);

(2) *Account monitoring*—tracking and, when applicable, redeeming and reallocating retirement savings bond holdings (which may include investment diversification strategies) no later than when a retirement savings bond that may be held by the Auto-IRA custodian on behalf of a participant in a state Auto-IRA program reaches the \$15,000 maximum dollar threshold or 30 years, whichever occurs first;

(3) *Ability to transfer*—addressing how the state Auto-IRA program enables participants, at their discretion, to redeem their retirement savings bonds prior to maturity and transfer their retirement savings bond proceeds to another investment available in the State Auto-IRA program or to another provider, without imposing

unreasonable restrictions on voluntary investment diversification (which might occur through a transfer within or outside of a state Auto-IRA program);

(4) *Withdrawals*—addressing how the state Auto-IRA program enables participants, at their discretion, to make reasonable withdrawals from their Auto-IRAs;

(5) *Consumer protection*—addressing consumer protections in the program, including disclosures provided to participants;

(6) *Costs of administration*—describing any fees or other costs or expenses passed on to or otherwise borne by participants under the state Auto-IRA program (e.g., no more than reasonable administrative, custodial, asset management, or other fees, costs, or expenses);

(7) *Oversight*—addressing state Auto-IRA program oversight of Auto-IRA custodians and describing any protections in place for participants' funds invested in retirement savings bonds, including information relating to the protection of participants' funds in the event that the Auto-IRA custodian files for bankruptcy or otherwise experiences financial stress;

(8) *Pooling*—prohibiting the inclusion of retirement savings bonds as a component of another investment or asset category (such as a mutual fund or target-date fund);

(9) *Default investment*—obtaining, if applicable, Fiscal Service's further consent before any use of retirement savings bonds as a default, sole, or mandatory investment, even if temporary;

(10) *Consumer education*—describing plans to provide financial education to participants; and

(11) *Certification*—requiring a statement signed by an authorized senior official certifying that the documentation provided to Fiscal Service is accurate and complete, and that procedures are in place to timely notify Fiscal Service of any material changes in the future.

(c) *Successor custodian.* In the event a state Auto-IRA program designates a successor Auto-IRA custodian, that program may request that Fiscal Service reissue the retirement savings bonds held by the predecessor custodian to the successor custodian.

§ 347.31 Crediting of retirement savings bond.

Each retirement savings bond issued to an Auto-IRA custodian must be credited to an IRA under the state Auto-IRA program with the custodian.

§ 347.32 Annual additions to retirement savings bond.

The amount that initially may be contributed or added to a retirement savings bond in a calendar year by an Auto-IRA custodian on behalf of any participant is limited by the applicable annual contribution limits provided under the Internal Revenue Code and regulations. The total value of a retirement savings bond that may be held by an Auto-IRA custodian in an IRA on behalf of any participant shall not exceed \$15,000 for each state Auto-IRA program.

§ 347.33 Individual additions to retirement savings bond.

Fiscal Service is authorized to establish minimum amounts for initial and additional contributions to a retirement savings bond under this subpart.

§ 347.34 Payment (redemption).

The issuance and redemption of a retirement savings bond is conditioned on an Auto-IRA custodian certifying compliance with these regulations and with any additional program instructions identified by Fiscal Service that pertain to that bond.

(a) *Payment upon maturity.* Payment of retirement savings bonds will be made to an Auto-IRA custodian upon the custodian's submission of a request for redemption to Fiscal Service. The custodian shall request the redemption of all retirement savings bonds at their respective maturity. The custodian shall request the full or partial redemption of a bond held on behalf of a participant upon the request of the participant or other authorized person entitled to amounts in the IRA. Retirement savings bond redemptions will be rounded to the nearest one cent.

(b) *Payment upon call.* Final interest on any called bonds will be paid with the principal (amount contributed minus withdrawals taken) at redemption and rounded to the nearest one cent.

§ 347.35 Computation of interest.

Retirement savings bonds under this subpart earn interest at the same annual percentage rate as securities issued to the Government Securities Investment Fund (G Fund) in the Thrift Savings Plan for federal employees. The Secretary calculates the G Fund interest rate pursuant to 5 U.S.C. 8438(e)(2). The retirement savings bond interest rate compounds daily at 1/360 of the annual percentage rate. Retirement savings bonds will cease to accrue interest on the date of their maturity or call.

§ 347.36 Maturity.

The maturity date for retirement savings bonds is indeterminate and may be different for each bond issued, but shall not exceed the sum of an original maturity period of 20 years and an extended maturity period of 10 years. A retirement savings bond purchased by the Auto-IRA custodian on behalf of a participant will mature at the earlier of 30 years from the date the bond is first issued to the custodian on behalf of the participant or when its value reaches \$15,000.

§ 347.37 Reservation of rights.

The Commissioner of the Fiscal Service may decide, in his or her sole discretion, to take any of the following actions with respect to the retirement savings bonds offered under this subpart. Such actions are final. Specifically, the Commissioner reserves the right under this subpart:

(a) As a condition of Fiscal Service's issuance of retirement savings bonds to an Auto-IRA custodian under a state Auto-IRA program, to require a state Auto-IRA program to provide information to Fiscal Service concerning the state Auto-IRA program and retirement savings bonds offered under this subpart, including a certification by a senior official to the completeness and accuracy of the information requested;

(b) To refuse to issue retirement savings bonds to an Auto-IRA custodian in any particular case or class of cases;

(c) To suspend or cease offering retirement savings bonds to an Auto-IRA custodian;

(d) To call for redemption of any outstanding retirement savings bond; or

(e) To determine any appropriate remedy under this subpart.

■ 11. Redesignate subpart F (consisting of §§ 347.50, 347.51, and 347.52) as subpart D (consisting of §§ 347.40 through 347.42) and revise newly redesignated subpart D to read as follows:

Subpart D—Miscellaneous Provisions for Retirement Savings Bonds

Sec.

347.40 Waiver of regulations.

347.41 Additional requirements; bond of indemnity.

347.42 Supplements, amendments, or revisions.

Subpart D—Miscellaneous Provisions for Retirement Savings Bonds**§ 347.40 Waiver of regulations.**

The Commissioner of the Fiscal Service may waive or modify any provision or provisions of the regulations in this part. He or she may do so in any particular case or class of

cases for the convenience of the United States or in order to relieve any person or persons of unnecessary hardship:

(a) If such action would not be inconsistent with law or equity;

(b) If it does not impair any material existing rights; and

(c) If he or she is satisfied that such action would not subject the United States to any substantial expense or liability.

§ 347.41 Additional requirements; bond of indemnity.

The Commissioner of the Fiscal Service may require:

(a) Such additional evidence to support a requested action as he or she may consider necessary or advisable; or

(b) A bond of indemnity, with or without surety, in any case in which he or she may consider such a bond necessary for the protection of the interests of the United States.

§ 347.42 Supplements, amendments, or revisions.

The Secretary may at any time, or from time to time, prescribe additional, supplemental, amendatory, or revised rules and regulations governing retirement savings bonds.

David A. Lebryk,

Fiscal Assistant Secretary.

BILLING CODE 4810-AS-P

DEPARTMENT OF DEFENSE**Office of the Secretary****32 CFR Part 269**

[Docket ID: DOD-2016-OS-0045]

RIN 0790-ZA12

Civil Monetary Penalty Inflation Adjustment

AGENCY: Under Secretary of Defense (Comptroller), Department of Defense.

ACTION: Final rule.

SUMMARY: This final rule is being issued to adjust for inflation each civil monetary penalty (CMP) provided by law within the jurisdiction of the United States Department of Defense (Department of Defense). The Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996 and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act), requires the head of each agency to adjust for inflation its CMP levels in effect as of November 2, 2015, under a revised methodology that

was effective for 2016 and for each year thereafter.

DATES: This rule is effective January 19, 2017 and is applicable beginning on January 13, 2017.

FOR FURTHER INFORMATION CONTACT:

Brian Banal, 703-571-1652.

SUPPLEMENTARY INFORMATION:**Background Information**

The Federal Civil Penalties Inflation Adjustment Act of 1990, Public Law 101-410, 104 Stat. 890 (28 U.S.C. 2461, note), as amended by the Debt Collection Improvement Act of 1996, Public Law 104-134, April 26, 1996, and further amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act), Public Law 114-74, November 2, 2015, required agencies to annually adjust the level of CMPs for inflation to improve their effectiveness and maintain their deterrent effect. The 2015 Act required that not later than July 1, 2016, and not later than January 15 of every year thereafter, the head of each agency must adjust each CMP within its jurisdiction by the inflation adjustment described in the 2015 Act. The inflation adjustment is determined by increasing the maximum CMP or the range of minimum and maximum CMPs, as applicable, for each CMP by the cost-of-living adjustment, rounded to the nearest multiple of \$1. The cost-of-living adjustment is the percentage (if any) for each CMP by which the Consumer Price Index (CPI) for the month of October preceding the date of the adjustment (January 15), exceeds the CPI for the month of October in the previous calendar year.

The initial catch up adjustments for inflation to the Department of Defense's CMPs were published as an interim final rule in the **Federal Register** on May 26, 2016 (81 FR 33389-33391) and became effective on that date. The interim final rule was published as a final rule without change on September 12, 2016 (81 FR 62629-62631), effective that date. The revised methodology for agencies for 2017 and each year thereafter provides for the improvement of the effectiveness of CMPs and to maintain their deterrent effect. Effective 2017, agencies' annual adjustments for inflation to CMPs shall take effect not later than January 15. The Department of Defense is adjusting the level of all civil monetary penalties under its jurisdiction by the Office of Management and Budget (OMB) directed cost-of-living adjustment multiplier for 2017 of 1.01636 prescribed in OMB Memorandum M-17-11, "Implementation of the 2017

annual adjustment pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015,” dated December 16, 2016. The Department of Defense’s 2017 adjustments for inflation to CMPs apply only to those CMPs, including those whose associated violation predated such adjustment, which are assessed by the Department of Defense after the effective date of the new CMP level.

Statement of Authority and Costs and Benefits

Pursuant to 5 U.S.C. 553(b)B, there is good cause to issue this rule without prior public notice or opportunity for public comment because it would be impracticable and unnecessary. The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Section 701(b)) requires agencies, effective 2017, to make annual adjustments for inflation to CMPs notwithstanding section 553 of title 5, United States Code. Additionally, the methodology used, effective 2017, for adjusting CMPs for inflation is established in statute, with no discretion provided to agencies regarding the substance of the adjustments for inflation to CMPs. The Department of Defense is charged only with performing ministerial computations to determine the dollar amount of adjustments for inflation to CMPs.

Further, there are no significant costs associated with the regulatory revisions that would impose any mandates on the Department of Defense, Federal, State or local governments, or the private sector. Accordingly, prior public notice and an opportunity for public comment are not required for this rule. The benefit of this rule is the Department of Defense anticipates that civil monetary penalty collections may increase in the future due to new penalty authorities and other changes in this rule. However, it is difficult to accurately predict the extent of any increase, if any, due to a variety of factors, such as budget and staff resources, the number and quality of civil penalty referrals or leads, and the length of time needed to investigate and resolve a case.

Regulatory Procedures

Executive Order 12866, “Regulatory Planning and Review” and Executive Order 13563, “Improving Regulation and Regulatory Review”

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a “significant regulatory action,” because it does not: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy; a section of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in these Executive Orders.

Unfunded Mandates Reform Act (2 U.S.C. Chapter 25)

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1532) requires agencies to assess anticipated costs and benefits before issuing any rule the mandates of which require spending in any year of \$100 million in 1995 dollars, updated annually for inflation. In 2016, that threshold is approximately \$146 million. This rule will not mandate any requirements for State, local, or tribal governments, nor will it affect private sector costs.

Public Law 96–354, “Regulatory Flexibility Act” (5 U.S.C. Chapter 6)

Because notice of proposed rulemaking and opportunity for comment are not required pursuant to 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) are inapplicable. Therefore, a regulatory flexibility analysis is not required and has not been prepared.

Public Law 96–511, “Paperwork Reduction Act” (44 U.S.C. Chapter 35)

The Department of Defense determined that provisions of the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this rule because there are no new or revised recordkeeping or reporting requirements.

Executive Order 13132, “Federalism”

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This final rule will not have a substantial effect on State and local governments.

List of Subjects in 32 CFR Part 269

Administrative practice and procedure, Penalties.

Accordingly, 32 CFR part 269 is amended as follows.

PART 269—[AMENDED]

■ 1. The authority citation for 32 CFR part 269 continues to read as follows:

Authority: 28 U.S.C. 2461 note.

■ 2. Revise § 269.4(d) to read as follows:

§ 269.4 Cost of living adjustments of civil monetary penalties.

* * * * *

(d) Inflation adjustment. Maximum civil monetary penalties within the jurisdiction of the Department are adjusted for inflation as follows:

United States Code	Civil Monetary Penalty Description	Maximum Penalty Amount as of 05/26/16	New Adjusted Maximum Penalty Amount
National Defense Authorization Act for FY 2005, 10 U.S.C 113, note.	Unauthorized Activities Directed at or Possession of Sunken Military Craft.	\$124,588	126,626
10 U.S.C. 1094(c)(1)	Unlawful Provision of Health Care	10,940	11,119
10 U.S.C. 1102(k)	Wrongful Disclosure—Medical Records		
	First Offense	6,469	6,575
	Subsequent Offense	43,126	43,832

United States Code	Civil Monetary Penalty Description	Maximum Penalty Amount as of 05/26/16	New Adjusted Maximum Penalty Amount
10 U.S.C. 2674(c)(2)	Violation of the Pentagon Reservation Operation and Parking of Motor Vehicles Rules and Regulations.	1,782	1,811
31 U.S.C. 3802(a)(1)	Violation Involving False Claim	10,781	10,957
31 U.S.C. 3802(a)(2)	Violation Involving False Statement	10,781	10,957

Dated: January 9, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison
Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG-2015-1088]

RIN 1625-AA00

Safety Zone; Pleasure Beach Bridge, Bridgeport, CT

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the navigable waters of Pleasure Beach, Bridgeport, CT for Pleasure Beach Bridge. This temporary final rule is necessary to provide for the safety of life on navigable waters. Entry into, transit through, mooring, or anchoring within the safety zone is prohibited unless authorized by Captain of the Port (COTP), Sector Long Island Sound.

DATES: This rule is effective without actual notice from January 19, 2017 until June 30, 2017. For the purposes of enforcement, actual notice will be used from January 1, 2017 until January 19, 2017.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type USCG-2015-1088 and USCG-2015-1123 in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, contact Petty Officer Jay TerVeen, Prevention Department, U.S. Coast Guard Sector Long Island Sound, telephone (203) 468-4446, email Jay.C.TerVeen@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
LIS Long Island Sound
NPRM Notice of Proposed Rulemaking
NAD 83 North American Datum 1983

II. Background Information and Regulatory History

This rulemaking establishes a safety zone for the waters around Pleasure Beach Bridge, Bridgeport, CT. Corresponding regulatory history is discussed below.

The Coast Guard was made aware on December 9, 2015, of damage to Pleasure Beach Bridge, the result of which created a hazard to navigation. On December 22, 2015, the Coast Guard published a temporary final rule entitled, "Safety Zone; Pleasure Beach Bridge, Bridgeport, CT" in the **Federal Register** (80 FR 79480). On June 23, 2016, the Coast Guard published a second temporary final rule entitled, "Safety Zone; Pleasure Beach Bridge, Bridgeport, CT" in the **Federal Register** (81 FR 40814). On July 25, 2016, the Coast Guard published a third temporary final rule entitled, "Safety Zone; Pleasure Beach Bridge, Bridgeport, CT" in the **Federal Register** (81 FR 48329). The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM with respect to this rule because doing so would be impracticable and contrary to the public interest. A solution to remedy the safety hazards associated with this bridge was initially projected to be completed prior to the expiration of the current safety zone, but has been delayed. It would be impracticable and contrary to the public interest to delay

promulgating this rule, as it is necessary to protect the safety of waterway users.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), and for the same reasons stated in the preceding paragraph, the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

III. Legal Authority and Need for Rule

The legal basis for this temporary rule is 33 U.S.C. 1231.

On December 09, 2015, the Coast Guard was made aware of damage sustained to Pleasure Beach Bridge, Bridgeport, CT that has created a hazard to navigation. After further analysis of the bridge structure, the Coast Guard concluded that the overall condition of the structure created a continued hazard to navigation. The COTP Sector LIS has determined that the safety zone established by this temporary final rule is necessary to provide for the safety of life on navigable waterways.

IV. Discussion of the Rule

The safety zone established by this rule will cover all navigable waters of the entrance channel to Johnsons Creek in the vicinity of Pleasure Beach Bridge, Bridgeport, CT. This safety zone will be bound inside an area that starts at a point on land at position 41-10.2 N., 073-10.7 W. and then east along the shoreline to a point on land at position 41-9.57 N., 073-9.54 W. and then south across the channel to a point on land at position 41-9.52 N., 073-9.58 W. and then west along the shoreline to a point on land at position 41-9.52 N., 073-10.5 W. and then north across the channel back to the point of origin.

This rule prohibits vessels from entering, transiting, mooring, or anchoring within the area specifically designated as a safety zone during the period of enforcement unless authorized by the COTP or designated representative.

The Coast Guard will notify the public and local mariners of this safety zone through appropriate means, which may include, but are not limited to, publication in the **Federal Register**, the Local Notice to Mariners, and Broadcast Notice to Mariners.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget. The Coast Guard determined that this rulemaking is not a significant regulatory action for the following reasons: (1) Persons or vessels desiring to enter the safety zone may do so with permission from the COTP Sector LIS or a designated representative; and (2) the Coast Guard will notify the public of the enforcement of this rule via appropriate means, such as via Local Notice to Mariners and Broadcast Notice to Mariners to increase public awareness of this safety zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business,

organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions

that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This temporary rule involves the establishment of a safety zone. It is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination, a Categorical Exclusion Determination, and EA Checklist, will be in the docket for review. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protestors. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T01–1088 to read as follows:

§ 165.T01–1088 Safety Zone; Pleasure Beach Bridge, Bridgeport, CT.

(a) *Location.* The following area is a safety zone: All navigable waters of the entrance channel to Johnsons Creek in the vicinity of Pleasure Beach Bridge, Bridgeport, CT bound inside an area that starts at a point on land at position 41°10'02.964" N., 073°10'08.148" W. and then east along the shoreline to a point on land at position 41°09'57.996" N., 073°09'54.324" W. and then south across the channel to a point on land at position 41°09'52.524" N., 073°09'58.861" W. and then west along the shoreline to a point on land at position 41°09'52.776" N., 073°10'04.944" W. and then north across the channel back to the point of origin.

(b) *Enforcement Period.* This section will be enforced from 12:00 a.m. on January 1, 2017 to 12:00 a.m. June 30, 2017.

(c) *Definitions.* The following definitions apply to this section: A “designated representative” is any commissioned, warrant, or petty officer of the U.S. Coast Guard who has been designated by the Captain of the Port (COTP), Sector Long Island Sound, to act on his or her behalf. The designated representative may be on an official patrol vessel or may be on shore and will communicate with vessels via VHF-FM radio or loudhailer. “Official patrol vessels” may consist of any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP Sector Long Island Sound. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation.

(d) *Regulations.* (1) The general regulations contained in 33 CFR 165.23 apply.

(2) In accordance with the general regulations in 33 CFR 165.23, entry into or movement within this zone is prohibited unless authorized by the COTP, Long Island Sound.

(3) Operators desiring to enter or operate within the safety zone should contact the COTP Sector Long Island Sound at 203-468-4401 (Sector Sector Long Island Sound Command Center) or the designated representative via VHF channel 16 to obtain permission to do so.

(4) Any vessel given permission to enter or operate in the safety zone must comply with all directions given to them by the COTP Sector Long Island Sound, or the designated on-scene representative.

(5) Upon being hailed by a U.S. Coast Guard vessel by siren, radio, flashing light or other means, the operator of the vessel shall proceed as directed.

Dated: December 29, 2016.

A.E. Tucci,

Captain, U.S. Coast Guard, Captain of the Port Sector Long Island Sound.

[FR Doc. 2017-01068 Filed 1-18-17; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF EDUCATION**34 CFR Part 99****Family Educational Rights and Privacy Act**

AGENCY: Office of the Chief Privacy Officer, Office of Management, Department of Education.

ACTION: Final rule.

SUMMARY: The Secretary amends the Family Educational Rights and Privacy Act (FERPA) regulations to change the name of the office designated enforcement functions by the Secretary from the Family Policy Compliance Office to the Office of the Chief Privacy Officer. The purpose of this amendment is to reflect additional resources committed to protecting student privacy and to increase internal efficiency.

DATES: These regulations are effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Kathleen Styles, U.S. Department of Education, 400 Maryland Avenue SW., Room 2E315, Washington, DC 20202. Telephone: (855) 249-3072 or via email: privacyTA@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION: FERPA, 20 U.S.C. 1232g(g), requires the Secretary to establish or designate an office within the Department of Education (Department) for the purpose of investigating, processing, reviewing, and adjudicating violations and complaints. As part of an expansion of student privacy operations at the Department, the designated office will change from the Family Policy Compliance Office to the Office of the Chief Privacy Officer. This change will not directly impact the public. This change is being made:

1. To allow the Department to more effectively make use of new resources dedicated to student privacy;
2. To permit efficiencies relating to specialization of work; and
3. To clarify responsibilities within the Department.

Executive Orders 12866 and 13563*Regulatory Impact Analysis*

Under Executive Order 12866, the Secretary must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only on a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing these final regulations only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that these final regulations are consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs associated with this regulatory action are those resulting from statutory requirements and those we have determined as necessary for administering the Department’s programs and activities.

Upon review of the cost, we have determined there is no financial or resource burden associated with these changes.

Waiver of Proposed Rulemaking

Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed regulations. However, these amendments merely reflect changes in internal organization and procedure. The changes do not establish or affect substantive policy. Therefore, under 5 U.S.C. 553(b)(B), the Secretary has determined that proposed regulations are unnecessary and contrary to the public interest.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial

number of small entities. These regulations contain technical changes to current regulations. The changes will not have a significant economic impact on any of the entities affected because the regulations do not impose excessive burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

These regulations do not contain any information collection requirements.

Intergovernmental Review

This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

Accessible Format: Individuals with disabilities may obtain this document in an alternative format (e.g., braille, large print, audiotope, or compact disc) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

List of Subjects in 34 CFR Part 99

Administrative practice and procedure, Privacy, Reporting and recordkeeping requirements, Students.

Denise L. Carter,

Acting Assistant Secretary for Management.

For the reasons discussed in the preamble, the Secretary amends title 34 of the Code of Federal Regulations as follows:

PART 99—FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

■ 1. The authority citation for part 99 continues to read as follows:

Authority: 20 U.S.C. 1232g, unless otherwise noted.

■ 2. Amend § 99.60 paragraph (a) by removing “Family Policy Compliance

Office” and adding, in its place, “Office of the Chief Privacy Officer”.

[FR Doc. 2017–00958 Filed 1–18–17; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

34 CFR Part 668

RIN 1840–AD22

[Docket ID ED–2015–OPE–0103]

Student Assistance General Provisions

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Final rule with request for comments.

SUMMARY: The Secretary amends the Student Assistance General Provisions regulations governing participation in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965, as amended (title IV, HEA programs). The amended regulations update the Department’s hearing procedures for actions to establish liability against an institution of higher education, and establish procedural rules governing recovery proceedings under the Department’s borrower defense regulations.

DATES: *Effective date:* These regulations are effective January 19, 2017.

Comment due date: We will accept comments on or before March 20, 2017. We may consider the comments received and may conduct additional rulemaking based on the comments.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

If you are submitting comments electronically, we strongly encourage you to submit any comments or attachments in Microsoft Word format. If you must submit a comment in Portable Document Format (PDF), we strongly encourage you to convert the PDF to print-to-PDF format or to use some other commonly used searchable text format. *Please do not submit the PDF in a scanned format.* Using a print-to-PDF format allows the U.S. Department of Education (the Department) to electronically search and copy certain portions of your submissions.

- *Federal eRulemaking Portal*: Go to www.regulations.gov to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under “Help.”

- *Postal Mail, Commercial Delivery, or Hand Delivery*: The Department strongly encourages commenters to submit their comments electronically. However, if you mail or deliver your comments about these regulations, address them to Jean-Didier Gaina, U.S. Department of Education, 400 Maryland Ave. SW., Room 6W232B, Washington, DC 20202.

Privacy Note: The Department’s policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at www.regulations.gov. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT:

Annmarie Weisman, U.S. Department of Education, 400 Maryland Avenue SW., Room 6W425, Washington, DC 20202–6244. Telephone: (202) 453–6712 or by email: annmarie.weisman@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Invitation To Comment

As discussed below, these regulations do not establish substantive policy, but instead establish procedures that must be followed. As procedural regulations, there is no requirement for a comment period. Although these regulations are final regulations, we are interested in whether you think we should make any changes in these regulations and thus we are inviting your comments. We will consider these comments in determining whether to revise the regulations. To ensure that your comments have maximum effect, we urge you to identify clearly the specific section or sections of the regulations that each of your comments addresses and to arrange your comments in the same order as the regulations. See **ADDRESSES** for instructions on how to submit comments.

We invite you to assist us in complying with the specific requirements of Executive Orders 12866 and 13563 and their overall requirements of reducing regulatory burden that might result from these regulations. Please let us know of any

further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the Department’s programs and activities.

During and after the comment period, you may inspect all public comments about these regulations by accessing *Regulations.gov*. You may also inspect the comments in person in room 6W245, 400 Maryland Avenue SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Eastern time, Monday through Friday of each week except Federal holidays. If you want to schedule time to inspect comments, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record

On request, we will supply an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for these regulations. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Background

On November 1, 2016, the Department of Education promulgated new regulations governing the William D. Ford Federal Direct Loan Program to establish a new Federal standard and a process for determining whether a borrower has a defense to repayment on a loan based on an act or omission of a school (the borrower defense regulations). If the Department determines that a borrower is eligible for relief under the borrower defense regulations, it has the authority to recover losses stemming from such borrower relief from the institution whose conduct gave rise to the borrower defense. These regulations establish the procedural rules that would govern such borrower defense and institutional recovery proceedings, and are designed to ensure that institutions are afforded a full and fair opportunity to defend themselves in such proceedings.

These regulations amend the Department’s existing regulations governing proceedings to assess a fine, limitation, suspension, or termination against an institution by adding procedures for a recovery proceeding under the borrower defense regulations. Such a proceeding may be used when pursuing an action under either the Department’s new borrower defense regulation at 34 CFR 685.222 or its

precursor at 34 CFR 685.206. These regulations are designed to balance important interests by ensuring that institutions are protected by due process of law prior to the imposition of any monetary liability under the borrower defense regulations, while also ensuring that determinations of the validity of borrower defense claims asserted against institutions are resolved fairly, efficiently, and expeditiously for all parties. In addition, these regulations clarify and update the procedural provisions more broadly applicable to fine, limitation, suspension, and termination proceedings.

Under the borrower defense regulations at 34 CFR 685.222, effective July 1, 2017, the applicable process for filing and reviewing claims will depend on whether a borrower’s application is considered by the Department as an individual claim or if the Department identifies the application as factually similar to other applications such that the Department identifies a group of borrowers (potentially including borrowers who have not submitted applications) with similar claims. The process will also depend on whether the relevant institution is “open” or “closed”, as those terms are described in the regulations. See 34 CFR 685.222(g)through(h).

The Department has the authority to pursue claims for recovery for losses that the Department has already incurred in granting individual borrower relief, either as stand-alone actions or in combination with group proceedings where those individual claims presented the same facts and circumstances as the group claims. In those instances, the determination of the validity of the individual’s discharge claim does not depend on the hearing official’s decision, and the Department does not rescind a discharge already granted to an individual if the Department does not succeed in proving the validity of that claim in this proceeding.

Beginning July 1, 2017, the Department will use these procedural regulations both to determine the validity of borrower claims the Department asserts on behalf of borrowers in group claims against “open” institutions, and to hold the institutions liable for losses on those claims in accordance with 34 CFR 685.222(h). In these instances, the hearing official determines the validity of the borrower claims and, correspondingly, whether relief will be granted to these group borrowers. Borrowers may opt out of the group process. When the Department seeks to recover for losses for claims approved

under current authority and before July 1, 2017, the Department will use the procedures in these regulations to pursue recovery from the institution. As with any other proceedings to recover on claims already approved, the outcome of a proceeding brought to recover for claims already approved prior to July 1, 2017 will not affect relief already granted to borrowers, but only the accountability of the institution. At its discretion, the Department may also use these regulations to bring actions against “closed” institutions, as defined in 34 CFR 685.222(g), in order to establish an institution’s liability for damages due to the Department as a result of individual or group borrower defense relief.

The Department bears the burden of proof in any recovery action against an institution for all claims the Department asserts. The Department must therefore prove the merit of the claims it asserts for members of the group. A hearing official will determine the merit of the claims, the relief for members of the group, and the liability of the institution. The Department must also prove in the hearing process the merit of claims it asserts for losses on discharges it has already approved as individual claims, although, as previously indicated, individual discharges already granted by the Department will not be affected if the Department is not successful in proving the claim in this proceeding against the institution.

These regulations are only applicable to actions initiated by the Department to fine an institution, to limit, suspend, or terminate the eligibility of an institution or servicer, or to recover from an institution for losses from borrower defense claims, and do not encompass the process by which the Department evaluates individual borrower claims or claims for which the Department does not seek to obtain a recovery. That process is set forth in the borrower defense regulations at 34 CFR 685.222(e). In addition, the Department plans to issue a borrower guide before the borrower defense regulations go into effect to ensure borrowers understand the application process and criteria for seeking debt relief.

Waiver of Proposed Rulemaking, Negotiated Rulemaking, and Delayed Effective Date

Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed regulations. These regulations only govern the procedures for initiating an action against an institution and the

hearing rules applicable to such a proceeding. As such, these regulations make procedural changes only and do not establish substantive policy. The regulations are therefore rules of agency practice and procedure, and exempt from notice and comment rulemaking under 5 U.S.C. 553(b)(A). However, the Department is providing a 60-day comment period and invites interested persons to participate in this rulemaking by submitting written comments. The Department may consider the comments received and may conduct additional rulemaking based on the comments.

The APA also generally requires that regulations be published at least 30 days before their effective date, unless the agency has good cause to implement its regulations sooner (5 U.S.C. 553(d)(3)). Again, because these final regulations are merely rules of agency practice and procedure, there is good cause to make them effective on the day they are published. For the same reasons, the Secretary has determined, under section 492(b)(2) of the HEA, 20 U.S.C. 1098a(b)(2), that these regulations should not be subject to negotiated rulemaking.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed these regulations under Executive Order

13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only on a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing these final regulations only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that these final regulations are consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs associated with this regulatory action

are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities. There are no costs additional to those described under *Regulatory Impact Analysis* in the notice of final regulations for the borrower defense regulations published in the **Federal Register** on November 1, 2016 (81 FR 75926). These regulations will benefit institutions by ensuring that, in any action to fine an institution, to limit, suspend, or terminate the eligibility of an institution to participate in the title IV, HEA programs, or to determine the validity of claims against the institution, there are established procedures that provide both due process as well as an efficient process for the timely resolution of claims.

Clarity of the Regulations

Executive Order 12866 and the Presidential memorandum "Plain Language in Government Writing" require each agency to write regulations that are easy to understand.

The Secretary invites comments on how to make these regulations easier to understand, including answers to questions such as the following:

- Are the requirements in the regulations clearly stated?
- Do the regulations contain technical terms or other wording that interferes with their clarity?
- Does the format of the regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity?
- Would the regulations be easier to understand if we divided them into more (but shorter) sections? (A "section" is preceded by the symbol "\$" and a numbered heading; for example, § 668.81.)
- Could the description of the regulations in the **SUPPLEMENTARY INFORMATION** section of this preamble be more helpful in making the regulations easier to understand? If so, how?
- What else could we do to make the regulations easier to understand?

To send any comments that concern how the Department could make these regulations easier to understand, see the instructions in the **ADDRESSES** section.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The small entities that are affected by these regulations are small postsecondary institutions. These regulations do not have a significant economic impact on these entities because all substantive

rules that govern determinations of liability have already been established in the Department's borrower defense regulations promulgated November 1, 2016.

Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 does not require you to respond to a collection of information unless it displays a valid OMB control number. We display the valid OMB control number assigned to a collection of information in final regulations at the end of the affected section of the regulations.

Intergovernmental Review

This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

Assessment of Educational Impact

The Secretary particularly requests comments on whether these regulations require transmission of information that any other agency or authority of the United States gathers or makes available.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. List of Subjects in 34 CFR Part 668

Administrative practice and procedure, Aliens, Colleges and universities, Consumer protection, Grant programs—education, Loan programs—education, Reporting and recordkeeping requirements, Selective

Service System, Student aid, Vocational education.

Dated: January 11, 2017.

John B. King, Jr.,

Secretary of Education.

For the reasons discussed, the Secretary amends part 668 of title 34 of the Code of Federal Regulations as follows:

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

■ 1. The authority citation for part 668 continues to read as follows:

Authority: 20 U.S.C. 1001–1003, 1070a, 1070g, 1085, 1087b, 1087d, 1087e, 1088, 1091, 1092, 1094, 1099c, 1099c–1, 1221e–3, and 3474, unless otherwise noted.

■ 2. Section 668.81 is amended by:

- A. Adding paragraph (a)(5).
- B. Adding paragraphs (e) through (g).
- C. Revising the authority citation.

The additions and revision read as follows:

§ 668.81 Scope and special definitions.

- (a) * * *
- (5) The determination of—
- (i) Borrower defense to repayment claims that are brought by the Department against an institution under § 685.206 or § 685.222; and
- (ii) Liability of an institution to the Secretary for losses to the Secretary arising from these claims.

* * * * *

(e) The proceedings described in this subpart provide the institution's sole opportunity for a hearing on the existence and amount of the debt that is required by applicable law prior to the Department collecting the debt from any available funds, including but not limited to offsetting the debt or any liability against funds to be provided to an institution pursuant to any Title IV, HEA program in which that institution participates.

(f) Nothing contained in this subpart limits the right of the Department to gather information, including by subpoena, or conduct any examination, audit, program review, investigation, or other review authorized by other applicable law.

(g) Unless directed by a court of competent jurisdiction, the hearing official, or the Secretary for good cause, if a collateral attack is brought in any court concerning all or any part of any proceeding under this subpart, the challenged proceeding shall continue without regard to the pendency of that court proceeding. No default or other failure to timely act as directed in a proceeding authorized by this subpart shall be excused based on the pendency of such court proceeding.

(Authority: 20 U.S.C. 1094)

§ 668.83 [Amended]

- 3. In § 668.83(f)(1), remove “§ 668.90(c)” and add, in its place, “§ 668.91(c)”.
- 4. In § 668.84 revise paragraphs (b)(3) and (b)(4) to read as follows:

§ 668.84 Fine proceedings.

* * * * *

(b) * * *

(3) If the institution or servicer requests a hearing by the time specified in paragraph (b)(1)(iii) of this section, the designated department official transmits the request for hearing and response to the Office of Hearings and Appeals, which sets the date and the place. The date is at least 15 days after the designated department official receives the request.

(4) A hearing official conducts a hearing in accordance with § 668.89.

* * * * *

- 5. Section 668.85 is amended by:

- A. In paragraph (b)(1)(iii), removing “§ 668.90(b)(2)” and adding, in its place, “§ 668.91(b)(2)”.

- B. Revising paragraph (b)(3).

- C. In paragraph (b)(4), removing “§ 668.88” and adding, in its place, “§ 668.89”.

The revision reads as follows:

§ 668.85 Suspension proceedings.

* * * * *

(b) * * *

(3) If the institution or servicer requests a hearing by the time specified in paragraph (b)(1)(iii) of this section, the designated department official transmits the request for hearing and response to the Office of Hearings and Appeals, which sets the date and the place. The date is at least 15 days after the designated department official receives the request. The suspension does not take place until the requested hearing is held.

* * * * *

- 6. Section 668.86 is amended by:

- A. In paragraph (a)(3), removing “§§ 668.93 and 668.94” and adding, in its place, “§§ 668.94 and 668.95”.

- B. Revising paragraphs (b)(3) and (b)(4).

The revisions read as follows:

§ 668.86 Limitation or termination proceedings.

* * * * *

(b) * * *

(3) If the institution or servicer requests a hearing by the time specified in paragraph (b)(1)(iii) of this section, the designated department official transmits the request for hearing and

response to the Office of Hearings and Appeals, which sets the date and place. The date is at least 15 days after the designated department official receives the request. The limitation or termination does not take place until after the requested hearing is held.

(4) A hearing official conducts a hearing in accordance with § 668.89.

* * * * *

§§ 668.87 through 668.98 [Redesignated as §§ 668.88 through 668.99]

- 7. Redesignate §§ 668.87 through 668.98 as §§ 668.88 through 668.99.

- 8. Add § 668.87 to read as follows:

§ 668.87 Borrower defense and recovery proceedings.

(a) *Procedures.* (1) A designated department official begins a borrower defense and recovery proceeding against an institution by sending the institution a notice by certified mail, return receipt requested. This notice—

(i) Informs the institution of the Secretary’s intent—

(A) To determine the validity of borrower defense claims on behalf of a group under § 685.222(h), to demonstrate the validity of borrower defense claims already approved, or both, as applicable; and

(B) To recover from the institution by offset, by claim on a letter of credit or other protection provided by the institution, or otherwise, for losses on account of borrower defense claims asserted on behalf of the group and borrower defense claims already approved, as applicable;

(ii) Includes a statement of facts and law sufficient to show that the Department is entitled to grant any borrower defense relief asserted within the statement, and recover for the amount of losses to the Secretary caused by the granting of such relief;

(iii) Specifies the date on which the Secretary intends to take action to recover the amount of losses arising from the granting of such relief, which date will be at least 20 days from mailing of the notice of intent and informs the institution that the Secretary will not take action to recover the amount of such loss on the date specified if the designated department official receives, by that date, a written response from the institution indicating why the Secretary should not recover. The notice shall also inform the institution that if it wishes to request a hearing pursuant to this subpart, the institution must include such a request with its written response; and

(iv) Informs the institution whether the designated Department official intends to proceed with—

(A) A single action; or

(B) An action in two phases—

(1) The determination whether the institution’s act or omission gave rise to valid borrower defense claims; and

(2) The determination of the amount of borrower defense relief.

(2) Although the hearing official shall have the discretion to bifurcate proceedings with, or without, a motion of either party, any decision by the designated department official to bifurcate the proceeding in accordance with paragraph (a)(1)(iv)(B) of this section may only be modified on motion with good cause shown.

(3) A hearing official conducts a hearing in accordance with § 668.89.

(b) *Effect of a response by the institution.* (1) If the institution submits a written response, but does not therein request a hearing, the designated department official, after considering that material, notifies the institution whether the Secretary will take the proposed recovery action for borrower defense claims and, if so, the date of such action and the amount of losses.

(2) If the institution submits a response and requests a hearing by the time specified in the notice under paragraph (a)(1)(iii) of this section, the designated department official may, in that official’s sole discretion, withdraw the notice or transmit the response and request for hearing to the Office of Hearings and Appeals, which sets the date and the place for the hearing. The date of the hearing is at least 15 days after the designated department official receives the request. No liability shall be imposed on the institution prior to the hearing.

(c) *Limitations on participation.* The parties in any borrower defense and recovery proceeding are the Department and the institution(s) against which the Department seeks to recover losses caused to the Department as a result of borrower defense relief. Borrowers are not permitted to intervene or appear in this proceeding, either on their own behalf or on behalf of any purported group, except as witnesses put forth by either party. However, nothing in this section limits the rights available to borrowers under other regulations, including 34 CFR 685.206 and 685.222.

(d) *Effect on the borrower.* No proceeding under this subpart imposes liability on any borrower who has already obtained a discharge in an individual proceeding under 34 CFR 685.206(c) or 34 CFR 685.222(e). A borrower defense and recovery proceeding may determine whether and how much relief is due to, and whether and how much of a loan remains owing by, a borrower participating in a group

process proceeding as defined in 34 CFR 685.222(f) through (h).

(Authority: 20 U.S.C. 1087a *et seq.*, 1094)

■ 9. Revise newly redesignated § 668.88 to read as follows:

§ 668.88 Prehearing conference and motion practice.

(a) A hearing official may convene a prehearing conference if he or she thinks that the conference would be useful, or if the conference is requested by—

(1) The designated department official who brought a proceeding against an institution or third-party servicer under this subpart; or

(2) The institution or servicer, as applicable.

(b) The purpose of a prehearing conference is to allow the parties to settle or narrow the dispute.

(c) If the hearing official, the designated department official, and the institution, or servicer, as applicable, agree, a prehearing conference may consist of—

(1) A conference telephone call;

(2) An informal meeting; or

(3) The submission and exchange of written material.

(d) A non-dispositive motion shall be made, if at all, consistent with any procedures set forth by the hearing official. In the absence of such procedures, non-dispositive motions shall be permitted, and responses to such motions shall be permitted though not required.

(e)(1) A party may make a motion for summary disposition asserting that the undisputed facts, admissions, affidavits, stipulations, documentary evidence, matters as to which official notice may be taken, and any other evidentiary materials properly submitted in connection with a motion for summary disposition establish that—

(i) There is no genuine issue as to any material fact; and

(ii) The moving party is entitled to a decision in its favor as a matter of law.

(2) A motion for summary disposition must be accompanied by a statement of the material facts as to which the moving party contends there is no genuine issue. Such motion must be supported by evidence that the moving party contends support his or her position. The motion must be accompanied by a brief containing the points and authorities supporting the motion.

Any party may oppose such a motion by filing a response setting forth those material facts as to which he or she contends a genuine dispute exists. Such response must be supported by evidence

of the same type as may be submitted in support of a motion for summary disposition and a brief containing the points and authorities in support of the contention that summary disposition would be inappropriate.

(f) A motion under consideration by the Secretary or the hearing official shall not stay proceedings before the hearing official unless the Secretary or the hearing official, as appropriate, so orders.

(Authority: 20 U.S.C. 1094)

■ 10. Revise newly redesignated § 668.89 to read as follows:

§ 668.89 Hearing.

(a) A hearing is an orderly presentation of arguments and evidence conducted by a hearing official. At the discretion of the hearing official, any right to a hearing may be satisfied by one or more of the following: Summary disposition pursuant to § 668.88(e), with or without oral argument; an oral evidentiary hearing conducted in person, by telephone, by video conference, or any combination thereof; or a review limited to written evidence.

(b)(1) Notwithstanding any provision to the contrary, the hearing official sets the procedures to be used in the hearing, and may take steps to expedite the proceeding as appropriate.

(2) The formal rules of evidence and procedures applicable to proceedings in a court of law are not applicable.

However, discussions of settlement between the parties or the terms of settlement offers are not admissible to prove the validity or invalidity of any claim or defense.

(3)(i) The proponent of any factual proposition has the burden of proof with respect thereto.

(ii) The designated department official has the burden of persuasion in any fine, suspension, limitation, or termination proceeding under this subpart.

(iii) The designated department official has the burden of persuasion in a borrower defense and recovery action; however, for a borrower defense claim based on a substantial misrepresentation under § 682.222(d), the designated department official has the burden of persuasion regarding the substantial misrepresentation, and the institution has the burden of persuasion in establishing any offsetting value of the education under § 685.222(i)(2)(i).

(4) Discovery, as provided for under the Federal Rules of Civil Procedure, is not permitted.

(5) The hearing official accepts only evidence that is relevant and material to the proceeding and is not unduly repetitious.

(6) The hearing official may restrict the number of witnesses or exclude witnesses to avoid undue delay or presentation of cumulative evidence. Any witness permitted to appear may do so via telephonic, video, or other means, with the approval of the hearing official.

(7) Either party may call qualified expert witnesses. Each party will be limited to calling three expert witnesses, as a matter of right, including any rebuttal or surrebuttal witnesses. Additional expert witnesses shall be allowed only by order of the hearing official, granted only upon a showing of good cause.

(i) At a date set by the hearing official, each party shall serve the other with any report prepared by each of its expert witnesses. Each party shall serve the other party with a list of any rebuttal expert witnesses and a rebuttal report prepared by each such witness not later than 60 days after the deadline for service of expert reports, unless another date is set by the hearing official. A rebuttal report shall be limited to rebuttal of matters set forth in the expert report for which it is offered in rebuttal. If material outside the scope of fair rebuttal is presented, a party may file a motion not later than five days after the deadline for service of rebuttal reports, seeking appropriate relief with the hearing official, including striking all or part of the report, leave to submit a surrebuttal report by the party's own experts, or leave to call a surrebuttal witness and to submit a surrebuttal report by that witness.

(ii) No party may call an expert witness at the hearing unless the party has listed the expert and has provided reports as required by this section.

(iii) Each report shall be signed by the expert and contain a complete statement of all opinions to be expressed and the basis and reasons therefor; the data, materials, or other information considered by the witness in forming the opinions; any exhibits to be used as a summary of or support for the opinions; the qualifications of the witness, including a list of all publications authored or co-authored by the witness within the preceding ten years; the compensation to be paid for the study and testimony; and a listing of any other cases in which the witness has testified or sought to testify as an expert at trial or hearing, or by deposition, within the preceding four years. A rebuttal or surrebuttal report need not include any information already included in the initial report of the witness.

(8)(i) Except as provided in paragraph (b)(8)(ii) of this section, if an institution

has been required through compulsory process under section 490A of the HEA or other applicable law to submit to the United States or to the Department material regarding an express or an implied representation, the institution cannot thereafter, in any proceeding under this subpart in which it is alleged that the representation was false, erroneous, or misleading, and for any purpose relating to the defense of such allegation, introduce into the record, either directly or indirectly through references contained in documents or oral testimony, any material of any type that was required to be but was not timely submitted in response to that compulsory process.

(ii) The hearing official shall, upon motion at any stage, exclude all material that was required to be but was not timely submitted in response to a compulsory process described in paragraph (b)(8)(i) of this section, or any reference to such material, unless the institution demonstrates, and the hearing official finds, that by the exercise of due diligence the material could not have been timely submitted in response to the compulsory process, and the institution notified the Department or such other party that issued the order to produce, of the existence of the material immediately upon its discovery. The hearing official shall specify with particularity the evidence relied upon.

(9) When issues not raised in the notice of proposed action are tried without objection at the hearing, they will be treated in all respects as if they had been raised in the notice of proposed action, and no formal amendments are required.

(c) The hearing official makes a transcribed record of the proceeding and makes a copy of the record available to the designated Department official and to the institution or servicer.

(Authority: 20 U.S.C. 1094)

■ 11. Newly redesignated § 668.91 is amended by:

■ A. Redesignating paragraph (a)(2) as paragraph (a)(2)(i).

■ B. In newly redesignated paragraph (a)(2)(i) adding “or recovery” after “fine, limitation, suspension, or termination”.

■ C. Adding paragraph (a)(2)(ii).

■ D. Removing the second sentence in paragraph (a)(4).

■ E. Adding paragraph (c)(2)(x).

The additions read as follows:

§ 668.91 Initial and final decisions.

(a) * * *

(2)(i) * * *

(ii) In a borrower defense and recovery proceeding conducted in two

phases under § 668.87(a)(1)(iv)(B), the hearing official’s initial decision determines whether the institution is liable for the act or omission described in the notice of intent to recover, and the hearing official issues an initial decision on liability only.

* * * * *

(c) * * *

(2) * * *

(x) In a borrower defense and recovery proceeding conducted in two phases under § 668.87(a)(1)(iv)(B), if a party appeals an initial decision of the hearing official in the first phase, the Secretary may affirm, modify, or reverse the initial decision, or may remand the case to the hearing official for further proceedings consistent with the Secretary’s decision.

* * * * *

§ 668.96 [Amended]

■ 12. Newly redesignated § 668.96 is amended by:

■ A. In paragraph (a) removing the word “The” and adding, in its place, the words “In an action to fine an institution or servicer, or to limit, suspend, or terminate the participation of an institution or the eligibility of a servicer, the”.

■ B. In paragraph (b), after the words “The corrective action”, adding the words “under paragraph (a) of this section”.

■ C. In paragraph (c), after the word “decision”, adding the words “in any action under this subpart”.

§ 668.99 [Amended]

■ 13. In newly redesignated paragraph (c) of § 668.99, remove “§ 668.91(a)(4)” and add, in its place, “§ 668.92(a)(4)”.

[Docket No. PTO–T–2016–0002]

RIN 0651–AD07

Changes in Requirements for Affidavits or Declarations of Use, Continued Use, or Excusable Nonuse in Trademark Cases

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: In order to assess and promote the accuracy and integrity of

the trademark register, the United States Patent and Trademark Office (USPTO or Office) amends its rules concerning the examination of affidavits or declarations of continued use or excusable nonuse filed pursuant to section 8 of the Trademark Act, or affidavits or declarations of use in commerce or excusable nonuse filed pursuant to section 71 of the Act. Specifically, under the regulations enacted herein, the USPTO may require the submission of information, exhibits, affidavits or declarations, and such additional specimens of use as may be reasonably necessary for the USPTO to ensure that the register accurately reflects marks that are in use in commerce in the United States for all the goods/services identified in the registrations, unless excusable nonuse is claimed in whole or in part. A register that does not accurately reflect marks in use in commerce in the United States for the goods/services identified in registrations imposes costs and burdens on the public. The amended rules will allow the USPTO to require additional proof of use to verify the accuracy of claims that a trademark is in use in commerce in connection with particular goods/services identified in the registration.

DATES: This rule is effective on February 17, 2017.

FOR FURTHER INFORMATION CONTACT:

Catherine Cain, Office of the Deputy Commissioner for Trademark Examination Policy, by email at TMFRNotices@uspto.gov, or by telephone at (571) 272–8946.

SUPPLEMENTARY INFORMATION:

Purpose: The USPTO revises the rules in parts 2 and 7 of title 37 of the Code of Federal Regulations to allow the USPTO, during the examination of affidavits or declarations of continued use or excusable nonuse filed pursuant to section 8 of the Trademark Act, 15 U.S.C. 1058, or affidavits or declarations of use in commerce or excusable nonuse filed pursuant to section 71 of the Trademark Act, 15 U.S.C. 1141k (section 8 or section 71 affidavits), to require the submission of such information, exhibits, affidavits or declarations, and such additional specimens of use as may be reasonably necessary for the USPTO to verify the accuracy of claims that a trademark is in use in commerce in connection with the goods/services listed in the registration.

This will benefit the public because it will facilitate the USPTO’s ability to assess and promote the integrity of the trademark register by encouraging accuracy in the identification of goods/services for which use in commerce or continued use is claimed. The accuracy

of the trademark register as a reflection of marks that are actually in use in commerce in the United States for the goods/services identified in the registrations listed therein serves an important purpose for the public. The public relies on the register to determine whether a chosen mark is available for use or registration. Where a party's search of the register discloses a potentially confusingly similar mark, that party may incur a variety of resulting costs and burdens, such as those associated with investigating the actual use of the disclosed mark to assess any conflict, proceedings to cancel the registration or oppose the application of the disclosed mark, civil litigation to resolve a dispute over the mark, or changing plans to avoid use of the party's chosen mark. If a registered mark is not actually in use in commerce in the United States, or is not in use in commerce in connection with all the goods/services identified in the registration, these costs and burdens may be incurred unnecessarily. An accurate and reliable trademark register helps avoid such needless costs and burdens.

The amended rules also facilitate the cancellation of registrations for marks that were never in use in commerce or are no longer in use, and for which acceptable claims of excusable nonuse were not submitted, in connection with the identified goods/services. The statutory requirements in sections 8 and 71 exist to enable the USPTO to clear the register of deadwood by cancelling, in whole or in part, registrations for marks that are not in use in commerce for all or some of the goods/services identified in the registration. The rules enacted herein further this statutory purpose.

Background

Post Registration Proof-of-Use Pilot Program: A final rule was published in the **Federal Register** on May 22, 2012 (77 FR 30197), in which the USPTO announced a two-year pilot program to assess and promote the accuracy and integrity of the trademark register. The USPTO randomly selected 500 registrations for which section 8 and section 71 affidavits were filed to participate in the pilot program to determine the actual use in commerce of the marks in connection with the goods/services identified in the registrations. As part of the pilot program, the selected trademark owners were required to submit proof of use of their marks for additional goods/services per class, in addition to the one specimen per class submitted with their affidavits, and to verify use of the additional

goods/services during the statutory filing period.

In 51% of the registrations selected for the pilot, the trademark owners failed to supply additional verified proof of use on specific goods/services for which use in commerce was initially claimed. Of this 51%, in 35% of the registrations, the owner requested that some goods/services that were initially claimed to be in use in commerce be deleted, and the remaining 16% of the registrations were cancelled because the trademark owners failed to respond to the requirements for additional proof or to other issues raised during examination of the section 8 or section 71 affidavit. Ultimately, the section 8 and section 71 affidavits were accepted for 84.4%, or 422 registrations, which included acceptances issued after goods/services queried under the pilot were deleted.

The status reports issued throughout the course of the pilot all supported the need for ongoing efforts aimed at ensuring the accuracy and integrity of the trademark register as to the actual use in commerce of marks in connection with the goods/services identified in the registrations. To that end, the USPTO held a roundtable discussion on December 12, 2014, for various stakeholder groups, requested written comments from interested parties to further explore the topic, and discussed the topic at several other outreach sessions. During the roundtable discussion and outreach sessions, one suggestion that received widespread support was to establish a permanent program similar to the proof-of-use pilot. The USPTO considered this recommendation in proposing the permanent program set forth in the notice of proposed rulemaking published in the **Federal Register** on June 22, 2016, at 81 FR 40589. As discussed below, the Office considered all public comments received during the comment period in the development of this final rule.

Proposed Rule: Comments and Responses

The USPTO published a proposed rule on June 22, 2016, soliciting comments on the proposed amendments. In response, the USPTO received comments from six organizations and eight individual commenters representing law firms, corporations, and individuals. The Office received comments both generally supporting and objecting to the proposed requirements. The commenters who supported the goal of promoting the integrity of the register by encouraging accuracy in the listing of

goods/services for which use in commerce is claimed agreed that the rules will facilitate the cancellation of registrations of marks that were never in use in commerce or are no longer in use. In addition, several of those commenters expressed suggestions or concerns regarding the audit program. Similar comments have been grouped together and summarized below, followed by the USPTO's responses. All comments are posted on the USPTO's Web site at <https://www.uspto.gov/trademark/trademark-updates-and-announcements/comments-changes-requirements-affidavits-or>.

Comment 1: One commenter suggested that costs imposed on trademark owners will likely be minimal because owners will only be randomly selected and not routinely or repeatedly subject to audits and another commenter noted that the information sought is within the knowledge of the trademark owner and should be simple to produce if there is indeed use. Another commenter stated that the proposed procedure would add an additional cost in terms of time and legal expense, but that the cost is generally offset by the public-policy benefit.

Response: The USPTO appreciates the commenters' support of the rule changes and concurs that the rule changes create minimal burdens on trademark owners. The USPTO also notes that as trademark owners are already required to ascertain whether a mark is currently in use in commerce with all the goods/services in connection with the filing of a section 8 or section 71 affidavit, any additional requirement to provide proof of such use with select goods/services should not be unduly burdensome or costly. Although approximately one-third of section 8 and section 71 affidavits are filed pro se, the USPTO assumes that an attorney is representing the registrant, and estimates it will take approximately one hour to comply.

Comment 2: One commenter noted that the proposed rule did not address the issue of the "abuse" encouraged by the Madrid Protocol system where there is no pre-registration use requirement for Madrid Protocol applications. Another commenter suggested that the proposed changes could be a model for changes to the process for affidavits or declarations of incontestability under section 15 of the Trademark Act, 15 U.S.C. 1065, by expanding the audit procedure to a percentage of section 15 affidavits. The commenter expressed concern that the cost of a faulty section 15 affidavit is high, given the ability of a registrant to use incontestability as leverage in disputes.

Response: The USPTO appreciates the commenters' concerns, but notes that the Madrid Protocol is an international treaty that became effective in the United States on November 2, 2003. Addressing any concerns related to the Madrid Protocol or its regulations is beyond the scope of this rulemaking, as is any expansion in the audit procedure to a percentage of section 15 affidavits.

Comment 3: One commenter requested that the USPTO consider some form of concession for registrants who are audited and successfully comply with audit requirements, such as an immediate fee reduction in the cost of a section 8 or section 71 affidavit or a future fee offset. Another commenter suggested that the USPTO offer registrants the option to elect out of the random audit by checking a box on the electronic form and voluntarily providing evidence of use for each good/service in a class. A third commenter recommended that the USPTO address abusive practices by: requiring specimens for all goods/services; requiring automatic audits of lengthy identifications of goods and services; allowing applicants whose mark is the subject of a likelihood-of-confusion refusal to petition the Office to audit a registration; providing an item-by-item checklist of all goods/services claimed and requiring registrants to specifically declare use for each good/service; shortening the initial period for filing a section 8 or section 71 affidavit; implementing a penalty system to incentivize renewal only for goods/services that are actually being used; and making more data available to the public concerning the marks on the register, the number of applications and renewals filed, and the number of refusals and amendments filed.

Response: The USPTO notes that although registrants are required to submit only one specimen of use in commerce per class with a section 8 or section 71 affidavit, they are not prevented from voluntarily providing evidence of use in commerce for each good/service listed in the registration. If a registrant does so, it would diminish the likelihood that additional proof of use would be required if the registration is selected for audit. However, any proposal to reduce the fees for section 8 or section 71 affidavits, to create a tiered fee structure, to implement a monetary penalty, to require specimens for all goods/services, or to allow a third party to petition the Office to audit a registration would require separate rulemakings. Moreover, shortening the initial filing period for a section 8 or section 71 affidavit would require Congressional action to amend the

Trademark Act. Even if the statute was amended, such proposals would also require substantial changes to the Trademark electronic filing system, as would modifying the forms to require, or allow the owner to elect to provide, proof of use for each good/service listed on the registration. Regarding the request to make data available to the public, the USPTO notes that information about application filings, active registrations, and new registrations by fiscal year is available on the USPTO Web site at <https://www.uspto.gov/dashboards/trademarks/main.dashxml>. The USPTO will consider making the other requested data available at a future date.

Comment 4: One commenter stated that cancelling the entire registration for failure to respond to an Office action is overly harsh if the specimen(s) originally submitted with the section 8 or section 71 affidavit are acceptable. In such cases, the commenter recommends that the USPTO cancel only those goods/services that are not supported by the specimen(s) submitted with the relevant affidavit.

Response: As in the pilot program, owners of the registrations selected will be afforded the usual post-registration response period to the Office action requiring additional information and are subject to the same consequences for failure to respond. In general, Office actions issued in relation to section 8 and section 71 affidavits are governed by the Trademark Act and rules. 15 U.S.C. 1058(c), (e), 1141k(c), (e); 37 CFR 2.163, 7.39. A response to a post-registration Office action must be filed within six months of the date of issuance of the Office action, or before the end of the filing period set forth in section 8(a) or section 71(a) of the Act, whichever is later. 37 CFR 2.163(b), 7.39(a). Failure to respond within the prescribed time periods results in cancellation of the registration, unless time remains in the grace period for filing a new affidavit. 37 CFR 2.163(c), 7.39(b). If no time remains in the grace period, trademark owners may file a petition to the Director under 37 CFR 2.146(a)(5) and 2.148 to waive 37 CFR 2.163(b) so that a late response to the Office action may be accepted. However, the Director will waive a rule only in an extraordinary situation, where justice requires, and no other party is injured. 37 CFR 2.146(a)(5), 2.148.

Comment 5: One commenter expressed concern that the proposed amendments were vague, unnecessarily open ended, and insufficiently described to properly assess the likely impact and effectiveness of the audit

program. Another commenter requested that the USPTO have further discussions with stakeholder groups prior to implementation of the program.

Response: The USPTO appreciates the commenters' concerns and notes that the expected impact and effectiveness of the audit program can be initially assessed in relation to the results of the pilot program, which supported the need for ongoing efforts aimed at ensuring the accuracy and integrity of the trademark register as to the actual use in commerce of marks in connection with the goods/services identified in the registrations. In addition, the widespread support among stakeholders to establish a permanent program is attributable to the results of the pilot program. An overview of the audit program enacted herein, which is similar to the pilot, is described in the section entitled Overview of the Audit Program of this final rule. As noted in that section, section 8 and section 71 affidavits in which the mark is registered for more than one good or service per class are subject to audit. The additional information or specimens required will be reviewed according to the generally accepted standards for use in commerce. The USPTO notes that there is a uniform standard for determining what constitutes an acceptable specimen both prior to and post registration and finds no basis to establish a different standard for use of the mark in commerce in the context of the audit program. The USPTO believes such a distinction would be a disservice to the public. Not only would a new standard for determining what constitutes acceptable use in commerce increase public confusion, but it would also call into question whether a mark is actually used with particular goods or services. The USPTO also intends to discuss with stakeholder groups the procedures that it will employ to carry out the program to obtain feedback regarding the procedures. These procedures will ultimately be available to the public and internal and external customers in the *Trademark Manual of Examining Procedure*.

Comment 6: Two commenters objected to any changes, as they believed the current rule is clear and the present practice is appropriate. One suggested that the existing rule is less susceptible to discriminatory application and that the proposed rule is not capable of being applied equally to all "applicants." The other commenter stated that it is not the role of the Office to police registrations and if a registrant is not using a mark in connection with all goods/services in

the registration, the registration may be challenged in a cancellation proceeding before the Trademark Trial and Appeal Board (TTAB).

Response: The USPTO appreciates the commenters' concerns regarding equal application of the rules, and notes that registrants, rather than applicants, would be subject to any requirements under the rules. The USPTO does not anticipate that the final rule will have a disproportionate impact upon any particular class of registrant and has determined that its objective of ensuring the accuracy and integrity of the register can be fairly reached by randomly selecting the registrations subject to audit based on the procedures discussed below. Any entity that has a registered trademark in which the mark is registered for more than one good or service per class could potentially be impacted by the rules.

The USPTO agrees that cancellation proceedings before the TTAB provide an avenue for third parties to seek removal of registrations for marks that are not in use in commerce for some or all of the goods/services identified in the registration. However, as discussed above, the accuracy of the trademark register as a reflection of marks that are actually in use in commerce in the United States for the goods/services identified in the registrations listed therein serves an important purpose for the public, which relies on the register to determine whether a chosen mark is available for use or registration. For example, when a party's search of the register discloses a potentially confusingly similar mark, that party may incur a variety of resulting costs and burdens, such as those associated with proceedings to cancel the registration. If a registered mark is not actually in use in commerce in the United States, or is not in use in commerce in connection with all the goods/services identified in the registration, the cost of undertaking a cancellation proceeding may be incurred unnecessarily. In addition, the results of the pilot audit program supported the need for ongoing efforts aimed at ensuring the accuracy and integrity of the trademark register as to the actual use in commerce of marks in connection with the goods/services identified in live registrations. Further, outreach to stakeholder groups and interested parties in the aftermath of the pilot yielded widespread support for establishing a permanent proof-of-use program similar to the pilot. Therefore, the USPTO believes that establishing a permanent program for auditing registrations that include multiple goods/services furthers the public

policy of ensuring the accuracy of the trademark register.

Overview of the Audit Program

The USPTO herein enacts a permanent audit program whereby it will conduct random audits of the combined total of section 8 and section 71 affidavits filed each year in which the mark is registered for more than one good or service per class. The USPTO anticipates that upon initial implementation it would conduct random audits of up to approximately 10% of such affidavits and may increase the percentage going forward, depending on results and as resources allow. As part of the review of the selected affidavits, in addition to the one specimen of use per class currently required, owners will be required to provide additional proof of use in the nature of information, exhibits, affidavits or declarations, and specimens showing use in commerce.

In a selected case, the USPTO will issue an Office action specifying the goods/services for which additional proof of use is required. Upon implementation, the USPTO anticipates requesting proof of use for two additional goods/services per class in the initial Office action. Thereafter, the owner may be required to submit proof of use in commerce for additional goods/services. If there is only one good/service in a class, additional proof of use will be required if the specimen submitted with the section 8 or section 71 affidavit would not also be acceptable to show actual use in commerce. The Office action will also advise trademark owners to delete those goods/services for which they are unable to provide the requested proof of use. It will further advise owners to delete all goods/services not in use in commerce because the Office may issue subsequent actions requiring proof of use on some, or all, remaining goods/services.

As in the pilot program, trademark owners will be afforded the usual response period to the Office action, that is, a response would be due within six months of the issuance date of the Office action, or before the end of the statutory filing period for the section 8 or section 71 affidavit, whichever is later. 37 CFR 2.163(b), 7.39(a). If the trademark owner responds, but is ultimately unable to provide the requested information, exhibits, affidavits or declarations, and specimens, the USPTO would deem the section 8 or section 71 affidavit unacceptable as to the goods/services to which the requirement pertained and will cancel such goods/services from the

registration. If no response to the Office action is filed within six months of the issuance date of the Office action, or before the end of the statutory filing period for the section 8 or section 71 affidavit, whichever is later, the USPTO will cancel the entire registration, unless time remains in the grace period under section 8(a)(3) or section 71(a)(3) of the Act. 15 U.S.C. 1058(a)(3), 1141k(a)(3); 37 CFR 2.163, 7.39. If time remains in the grace period, the owner may file a complete new section 8 or section 71 affidavit, with a new fee and grace-period surcharge. 37 CFR 2.161(d)(2), 7.36(b)(3). The USPTO further clarifies that trademark owners may also file a petition to the Director under 37 CFR 2.146(a)(5) and 2.148 to waive 37 CFR 2.163(b) so that a late response to an Office action may be accepted. However, the Director will waive a rule only in an extraordinary situation, where justice requires, and no other party is injured. 37 CFR 2.146(a)(5), 2.148.

Costs and Benefits: This rulemaking is not considered to be economically significant under Executive Order 12866 (Sept. 30, 1993).

Discussion of Proposed Regulatory Changes

The USPTO amends 37 CFR 2.161 and 7.37 to provide that the USPTO may require such information, exhibits, affidavits or declarations, and such additional specimens of use as may be reasonably necessary for the USPTO to assess and promote the accuracy and integrity of the register. The current rules mandate the submission of only one specimen per class in connection with a section 8 or section 71 affidavit unless additional information, exhibits, affidavits or declarations, or specimens are necessary for proper examination of the affidavit itself. 37 CFR 2.161(g), (h), 7.37(g), (h). This final rule will allow the USPTO to require additional proof of use of a mark not only to facilitate proper examination of a section 8 or section 71 affidavit, but also to verify the accuracy of claims that a trademark is in use on or in connection with the goods/services identified in the registration.

The USPTO revises § 2.161(h) to add the phrase "or for the Office to assess and promote the accuracy and integrity of the register" at the end of the paragraph.

The USPTO revises § 7.37(h) to add the phrase "or for the Office to assess and promote the accuracy and integrity of the register" at the end of the paragraph.

Rulemaking Requirements

Administrative Procedure Act: The changes in this rulemaking involve rules of agency practice and procedure, and/or interpretive rules. *See Perez v. Mortg. Bankers Ass'n*, 135 S. Ct. 1199, 1204 (2015) (interpretive rules “advise the public of the agency’s construction of the statutes and rules which it administers”) (citation and internal quotation marks omitted); *Nat’l Org. of Veterans’ Advocates v. Sec’y of Veterans Affairs*, 260 F.3d 1365, 1375 (Fed. Cir. 2001) (rule that clarifies interpretation of a statute is interpretive); *Bachow Commc’ns Inc. v. FCC*, 237 F.3d 683, 690 (D.C. Cir. 2001) (rules governing an application process are procedural under the Administrative Procedure Act); *Inova Alexandria Hosp. v. Shalala*, 244 F.3d 342, 350 (4th Cir. 2001) (rules for handling appeals were procedural where they did not change the substantive standard for reviewing claims).

Accordingly, prior notice and opportunity for public comment for the changes in this rulemaking are not required pursuant to 5 U.S.C. 553(b) or (c), or any other law. *See Perez*, 135 S. Ct. at 1206 (notice-and-comment procedures are required neither when an agency “issue[s] an initial interpretive rule” nor “when it amends or repeals that interpretive rule”); *Cooper Techs. Co. v. Dudas*, 536 F.3d 1330, 1336–37 (Fed. Cir. 2008) (stating that 5 U.S.C. 553, and thus 35 U.S.C. 2(b)(2)(B), does not require notice and comment rulemaking for “interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice,” quoting 5 U.S.C. 553(b)(A)). However, the USPTO has chosen to seek public comment before implementing the rule.

Final Regulatory Flexibility Analysis

The USPTO publishes this Final Regulatory Flexibility Analysis (FRFA) as required by the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) to examine the impact of the Office’s post-registration audit program on small entities. Under the RFA, whenever an agency is required by 5 U.S.C. 553 (or any other law) to publish a notice of proposed rulemaking (NPRM), the agency must prepare and make available for public comment a FRFA, unless the agency certifies under 5 U.S.C. 605(b) that the proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 603, 605. The USPTO published an Initial Flexibility Analysis (IRFA), along with the NPRM, on June 22, 2016 (81 FR 40589). The USPTO

received no comments from the public directly applicable to the IFRA, as stated below in Item 2.

Items 1–6 below discuss the six items specified in 5 U.S.C. 604(a)(1)–(6) to be addressed in a FRFA. Item 6 below discusses alternatives considered by the Office.

1. Succinct Statement of the Need for, and Objectives of, the Rule

The USPTO amends its rules to require any information, exhibits, affidavits or declarations, and such additional specimens deemed reasonably necessary to assess and promote the accuracy and integrity of the trademark register in connection with the examination of a section 8 or section 71 affidavit. Post registration affidavits under section 8 or section 71, and their accompanying specimens of use, demonstrate a registration owner’s continued use of its mark in commerce for the goods/services identified in the registration. The revisions enacted herein will facilitate the USPTO’s ability to ensure that the register accurately reflects marks that are in use in commerce that may be regulated by the U.S. Congress for the goods/services identified therein.

The objective of the rulemaking is to allow the USPTO to assess and promote the integrity of the trademark register. The Trademark Act gives the Director discretion regarding the number of specimens to require. 15 U.S.C. 1051(a)(1), (d)(1), 1058(b)(1)(C), 1141k(b)(1)(C). The current rules mandate the submission of only one specimen per class in connection with a section 8 or section 71 affidavit unless additional information, exhibits, affidavits or declarations, or specimens are necessary for proper examination of the affidavit itself. 37 CFR 2.161(g), (h), 7.37(g), (h). However, these rules do not currently allow the Office to require additional specimens or other information or exhibits in order to verify that the mark is in use on additional goods/services listed in the registration. The final rule will allow the USPTO to properly examine the nature and veracity of allegations of use made in connection with the submission of a section 8 or section 71 affidavit, and thereby assess and promote the integrity of the register by verifying that the register accurately reflects the goods/services for which use is claimed for a given registered mark.

2. A Statement of the Significant Issues Raised by the Public Comments in Response to the Initial Regulatory Flexibility Analysis, a Statement of the Assessment of the Agency of Such Issues, and a Statement of any Changes Made in the Proposed Rule as a Result of Such Comments

The USPTO did not receive any public comments in response to the IRFA. However, the Office received comments about the audit program in general, which are further discussed in the preamble.

3. The Response of the Agency to any Comments Filed by the Chief Counsel for Advocacy of the Small Business Administration in Response to the Proposed Rule, and a Detailed Statement of any Change Made to the Proposed Rule in the Final Rule as a Result of the Comments

The USPTO did not receive any comments filed by the Chief Counsel for Advocacy of the Small Business Administration in response to the proposed rule.

4. Description of and an Estimate of the Number of Small Entities to Which the Rule Will Apply or an Explanation of Why No Such Estimate Is Available

The USPTO does not collect or maintain statistics in trademark cases on small- versus large-entity registrants, and this information would be required in order to estimate the number of small entities that would be affected by the final rule. However, the USPTO believes that the overall impact of the regulations enacted herein on registrants will be relatively minimal.

After registration, trademark owners must make periodic filings with the USPTO to maintain their registrations. A section 8 or section 71 affidavit is a sworn statement in which the registrant specifies the goods/services/collective membership organization for which the mark is in use in commerce and/or the goods/services/collective membership organization for which excusable nonuse is claimed. 15 U.S.C. 1058, 1141k. The purpose of the section 8 and section 71 affidavits is to facilitate the cancellation, by the Director, of registrations of marks no longer in use in connection with the goods/services/collective membership organization identified in the registrations. The final rule applies to any entity filing a section 8 or section 71 affidavit, but only a subset of trademark owners would be required to provide more than one specimen or additional information, exhibits, or specimens in connection with the audit. The USPTO is unable to

estimate the subset of trademark owners who are small entities that are impacted by the proposed rules. In Fiscal Year 2016, approximately 150,000 section 8 affidavits and 9,100 section 71 affidavits were filed.

5. Description of the Reporting, Recordkeeping, and Other Compliance Requirements of the Final Rule, Including an Estimate of the Classes of Small Entities Which Will Be Subject to the Requirement and the Type of Professional Skills Necessary for Preparation of the Report or Record

The final rule imposes no new recordkeeping requirements on trademark registrants.

Regarding compliance with this final rule, as an initial matter, the USPTO does not anticipate the rules to have a disproportionate impact upon any particular class of small or large entities. Any entity that has a registered trademark in which the mark is registered for more than one good or service per class could potentially be impacted by the final rule.

The USPTO enacts herein a permanent program where it would conduct random audits of section 8 and section 71 affidavits that are filed in which the mark is registered for more than one good or service per class. The USPTO anticipates that upon initial implementation it would conduct random audits of up to approximately 10% of such affidavits and may increase the percentage going forward, depending on results and as resources allow. In those post registration cases where an initial requirement for additional information, exhibits, affidavits or declarations, and specimens is issued in an Office action, although approximately one-third of section 8 and section 71 affidavits are filed pro se, the USPTO assumes that an attorney is representing the registrant, and estimates it will take approximately one hour to comply. To that end, the USPTO provides an online electronic form for responding to Office actions.

Similar to the submission necessary for the statutorily required section 8 and section 71 affidavits, a response to an Office action issued in connection with these affidavits will generally necessitate gathering and submitting one or more specimens of use and an accompanying declaration. Therefore, under the final rule, the type of fact gathering and review of the nature and extent of the use of the mark that underlies a section 8 or section 71 affidavit will already have occurred. Compliance with the requirements enacted herein will only necessitate gathering and submitting the additional

evidence to demonstrate and support what has previously been assessed.

Assuming the mark is in use as claimed, the compliance time involves the length of time to secure additional information, exhibits, affidavits or declarations, or specimens and accompanying declaration, plus any time it takes an attorney to communicate with the client in order to obtain what is required and make the necessary filing with the USPTO. As noted above, approximately one-third of section 8 and section 71 affidavits are filed pro se. Trademark owners selected for review are likely to have a shorter compliance time than what the USPTO has estimated, which assumes the involvement of an attorney. The final rule does not mandate the use of legal counsel.

6. Description of the Steps the Agency Has Taken To Minimize the Significant Economic Impact on Small Entities Consistent With the Stated Objectives of Applicable Statutes, Including a Statement of the Factual, Policy, and Legal Reasons for Selecting the Alternative Adopted in the Final Rule and Why Each One of the Other Significant Alternatives to the Rule Considered by the Agency Which Affect the Impact on Small Entities Was Rejected

The USPTO has considered whether and how it is appropriate to reduce any burden on small businesses through increased flexibility. The following alternatives were considered, but rejected, by the USPTO.

The USPTO considered an alternative where it would not require additional information, exhibits, affidavits or declarations, and specimens in connection with section 8 or section 71 affidavits, or where it would exempt small entities from such requirements. This alternative would have a lesser economic impact on small entities, but was rejected because it would not accomplish the stated objective of assessing and promoting the integrity of the trademark register by verifying that marks are in use for the goods/services identified in the registration. As noted above, the results of the post registration proof-of-use pilot supported the need for ongoing efforts aimed at assessing and promoting the accuracy and integrity of the register as to the actual use of marks in connection with the goods/services identified in the registrations. Subsequent outreach efforts revealed widespread support for continuing the pilot program on a permanent basis. Exempting small entities would prevent consideration of all section 8 and section 71 affidavits

and not achieve the stated objective of assessing and promoting the accuracy and integrity of the register.

The stated objective of the final rule also facilitates the cancellation of registrations for marks that are no longer in use or that were never used, and for which acceptable claims of excusable nonuse were not submitted, in connection with the identified goods/services. The statutory requirements in sections 8 and 71 exist to enable the USPTO to clear the register of deadwood by cancelling, in whole or in part, registrations for marks that are not in use for all or some of the goods/services identified in the registration. The final rule furthers this statutory purpose. Exempting small entities from possible scrutiny regarding use allegations would fail to address marks not used by them, thereby not achieving the objective.

The USPTO considered a second alternative that would extend the time period for compliance by small entities. However, this was rejected because there appears to be no reason that meeting the requirements of the final rule would be more time consuming for small entities. The USPTO's standard six-month time period for responding to Office actions allows sufficient time regardless of small-entity status.

Finally, the USPTO considered an alternative that would streamline or simplify the compliance mechanism for small entities, but it was deemed unnecessary given the ease of responding electronically to Office actions using the Trademark Electronic Application System Response to Post Registration Office Action form. Thus, under the final rule, compliance will be as streamlined and simplified as possible for all affected entities. Moreover, where the objective is to verify the accuracy of a claim of use in a section 8 or section 71 affidavit, the requirements for additional information, exhibits, affidavits or declarations, and specimens demonstrating the manner of use of the mark in connection with the specified goods/services are the least burdensome and most efficient means of achieving the objective of assessing and promoting the accuracy and integrity of the register by verifying allegations of use.

Use of performance rather than design standards is not applicable to the final rulemaking because the USPTO is not issuing any sort of standard. This final rule will require registrants to furnish evidence of use, rather than comply with a performance or design standard.

Executive Order 12866 (Regulatory Planning and Review): This rulemaking has been determined to be not

significant for purposes of Executive Order 12866 (Sept. 30, 1993).

Executive Order 13563 (Improving Regulation and Regulatory Review): The USPTO has complied with Executive Order 13563 (Jan. 18, 2011). Specifically, the USPTO has, to the extent feasible and applicable: (1) Made a reasoned determination that the benefits justify the costs of the rule changes; (2) tailored the rules to impose the least burden on society consistent with obtaining the regulatory objectives; (3) selected a regulatory approach that maximizes net benefits; (4) specified performance objectives; (5) identified and assessed available alternatives; (6) provided the public with a meaningful opportunity to participate in the regulatory process, including soliciting the views of those likely affected prior to issuing a notice of proposed rulemaking, and provided on-line access to the rulemaking docket; (7) attempted to promote coordination, simplification, and harmonization across government agencies and identified goals designed to promote innovation; (8) considered approaches that reduce burdens and maintain flexibility and freedom of choice for the public; and (9) ensured the objectivity of scientific and technological information and processes, to the extent applicable.

Executive Order 13132 (Federalism): This rulemaking does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (Aug. 4, 1999).

Congressional Review Act: Under the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), prior to issuing any final rule, the USPTO will submit a report containing the final rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the Government Accountability Office. The changes in this notice are not expected to result in an annual effect on the economy of 100 million dollars or more, a major increase in costs or prices, or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. Therefore, this notice is not expected to result in a “major rule” as defined in 5 U.S.C. 804(2).

Unfunded Mandates Reform Act of 1995: The changes set forth in this rulemaking do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local,

and tribal governments, in the aggregate, of 100 million dollars (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of 100 million dollars (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. *See* 2 U.S.C. 1501 *et seq.*

Paperwork Reduction Act: This rulemaking involves information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The collection of information involved in this rulemaking has been reviewed and previously approved by OMB under control numbers 0651–0051 and 0651–0055.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

List of Subjects

37 CFR Part 2

Administrative practice and procedure, Trademarks.

37 CFR Part 7

Administrative practice and procedure, Trademarks, International registration.

For the reasons stated in the preamble and under the authority contained in 15 U.S.C. 1123 and 35 U.S.C. 2, as amended, the USPTO amends parts 2 and 7 of title 37 as follows:

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

- 1. The authority citation for 37 CFR part 2 continues to read as follows:

Authority: 15 U.S.C. 1113, 15 U.S.C. 1123, 35 U.S.C. 2, Section 10 of Pub. L. 112–29, unless otherwise noted.

- 2. Amend § 2.161 by revising paragraph (h) to read as follows:

§ 2.161 Requirements for a complete affidavit or declaration of continued use or excusable nonuse.

* * * * *

(h) The Office may require the owner to furnish such information, exhibits, affidavits or declarations, and such additional specimens as may be reasonably necessary to the proper

examination of the affidavit or declaration under section 8 of the Act or for the Office to assess and promote the accuracy and integrity of the register.

* * * * *

PART 7—RULES OF PRACTICE IN FILINGS PURSUANT TO THE PROTOCOL RELATING TO THE MADRID AGREEMENT CONCERNING THE INTERNATIONAL REGISTRATION OF MARKS

- 3. The authority citation for 37 CFR part 7 continues to read as follows:

Authority: 15 U.S.C. 1123, 35 U.S.C. 2, unless otherwise noted.

- 4. Amend § 7.37 by revising paragraph (h) to read as follows:

§ 7.37 Requirements for a complete affidavit or declaration of use in commerce or excusable nonuse.

* * * * *

(h) The Office may require the holder to furnish such information, exhibits, affidavits or declarations, and such additional specimens as may be reasonably necessary to the proper examination of the affidavit or declaration under section 71 of the Act or for the Office to assess and promote the accuracy and integrity of the register.

Dated: January 5, 2017.

Russell Slifer,

Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office.

[FR Doc. 2017–00317 Filed 1–18–17; 8:45 am]

BILLING CODE 3510–16–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 14

RIN 2900–AP51

Recognition of Tribal Organizations for Representation of VA Claimants

AGENCY: Department of Veterans Affairs.
ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) is amending its regulations concerning recognition of certain national, State, and regional or local organizations for purposes of VA claims representation. Specifically, this rulemaking allows the Secretary to recognize tribal organizations in a similar manner as the Secretary recognizes State organizations. The final rule allows a tribal organization that is

established and funded by one or more tribal governments to be recognized for the purpose of providing assistance on VA benefit claims. In addition, the final rule allows an employee of a tribal government to become accredited through a recognized State organization in a similar manner as a County Veterans' Service Officer (CVSO) may become accredited through a recognized State organization. The effect of this action is to address the needs of Native American populations who are geographically isolated from existing recognized Veterans Service Organizations (VSOs) or who may not be utilizing other recognized VSOs due to cultural barriers or lack of familiarity with those organizations.

DATES: *Effective Date:* This rule is effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Dana Raffaelli, Staff Attorney, Benefits Law Group, Office of the General Counsel (022D), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461-7699. (This is not a toll free number.)

SUPPLEMENTARY INFORMATION: On July 20, 2016, VA issued a proposed rule to amend part 14 of title 38, Code of Federal Regulations, to provide for the recognition of tribal organizations that are established and funded by tribal governments so that representatives of the organizations may assist Native American veterans and their families in the preparation, presentation, and prosecution of their VA benefit claims. 81 FR 47087-47094. VA proposed to allow a tribal organization that is established and funded by one or more tribal governments to be recognized for the purpose of providing assistance on VA benefit claims. *Id.* In addition, VA proposed to allow an employee of a tribal government to become accredited through a recognized State organization in a similar manner as a CVSO may become accredited through a recognized State organization and to extend office space opportunities already granted to certain employees of State organizations to employees of tribal organizations. *Id.*

VA received 17 comments on the proposed rule. Overall, the comments were supportive of the proposed rule. A couple of commenters stated that they currently meet or will be able to meet the accreditation requirements for recognition as a tribal organization. The actual requests for recognition of specific tribal organizations are outside the scope of this rulemaking. However, VA invites all interested organizations or applicants to consider requesting recognition after this rulemaking takes effect. Please see VA's accreditation

Web site for more information on how to request recognition of an organization and how to apply to become accredited as a representative through a recognized organization or as an attorney or agent, <http://www.va.gov/ogc/accreditation.asp>. No change is warranted to this rulemaking based on these comments.

A few commenters misinterpreted the proposed rule as meaning that VA intended to propose that VA's recognition of a tribal organization would be tied to VA's recognition of the corresponding State organization. VA is not tying VA recognition of a tribal organization to a State. Recognition of a tribal organization will stand on its own. After a tribal organization becomes recognized by VA, that organization will be able to request to have its own representatives accredited under 38 CFR 14.629. Therefore, VA declines to make any changes based on these comments.

One commenter stated that there is no need to restrict a tribal government employee to being accredited by either a tribal organization or State organization. Although in the proposed rule, we focused much of our discussion on how a tribal government employee may be accredited through a tribal organization or a State organization, we do not intend for this rulemaking to limit the availability of other avenues to achieve VA accreditation. There are several ways that individuals, including tribal members, tribal government employees, and others who work within and serve tribal or Native American communities, may be accredited by VA to represent claimants. If an individual does not wish to be accredited through a tribal or State organization, the individual may seek accreditation through a National or Regional or Local organization or seek accreditation in his or her individual capacity as either an agent or an attorney under the standards set forth in § 14.629(b). Therefore, VA declines to make any changes based on this comment.

One commenter asked whether a tribal veterans' service representative who worked in multiple states would be required to get approval from all of the States in which they work. If the representative is accredited through the tribal organization and representing claimants on behalf of that organization, then the representative would not need to seek any additional accreditation through a State organization. If the representative is a tribal veterans service officer (TVSO) and the representative's sole accreditation status is through a State organization, the representative should confer with that State organization to see if the State has

placed any geographical limits on its accredited representatives. VA does not place any geographical or residency restrictions or limitations on State or tribal organizations as to who may be served by the organization. Therefore, no change is warranted to this rulemaking based on this comment.

A couple of commenters recommended that a tribal organization should have the ability to accredit representatives of State organizations through the tribal organization as well. A VA-recognized tribal organization is welcome to put forth any representatives of its choosing for VA accreditation so long as the organization is able to certify that the potential representative is of good character and reputation, has demonstrated an ability to represent claimants, and is a paid employee working no less than 1,000 hours annually. A recognized tribal organization may also recommend a potential representative for accreditation through the tribal organization by certifying that the individual is accredited and functioning as a representative of another recognized organization, this is commonly referred to as "cross-accreditation." See 38 CFR 14.627(j) and 14.629(a). Because we do not view this rulemaking as prohibiting State organization representatives from being accredited through a tribal organization as well, we do not believe that a change is warranted to this rulemaking based on these comments.

One commenter asked if it would be possible for a tribal government to have their employees accredited by a tribal organization and State organization concurrently. VA does not limit an accredited representative to one method of accreditation. Therefore, no change is warranted to this rulemaking based on this comment.

Several commenters appeared to interpret the proposed rule as limiting tribal organizations to representation of only veterans who are Native American and not their dependents or survivors who may not be Native American. It is not VA's intention to limit the type of claimants for VA benefits that any accredited organization, attorney, or agent may represent. The requirements for accreditation require an applying organization to state the number of veterans, survivors, and dependents that will be served by the organization. 38 CFR 14.628(d)(1)(ii)(D). VA makes no changes based on these comments.

Several commenters also expressed concern over the requirements for recognition in § 14.628(d). Specifically, the commenters expressed concern that many tribal organizations may not be

able to satisfy the requirement of having a primary purpose of serving veterans, the requirement of a substantial service commitment to veterans as shown either by a sizable organizational membership or by performance of veterans' services to a sizable number of veterans, or requirements concerning funding and training, to include providing the required supporting documentation. As stated in the proposed rule, VA must ensure that VA accredited organizations can provide long-term, competent representation and has found that the § 14.628(d) requirements further that objective. These requirements apply to all organizations seeking VA recognition. Exempting tribal organizations from meeting the § 14.628(d) requirements would not be consistent with the purpose of VA recognition to ensure that veterans are receiving qualified, competent representation on their VA benefit claims. VA has provided additional means to achieve VA recognition or accreditation for those tribal governments that may have difficulty establishing a tribal organization capable of meeting the § 14.628(d) requirements, to include the ability for one or more tribal governments to establish and fund a tribal organization and the ability of an employee of a tribal government to become accredited as a tribal veterans' service officer through a recognized State organization. Therefore, VA makes no changes based on these comments.

Several commenters requested that VA further define or quantify what would constitute adequate funding and a substantial service commitment to veterans either by showing a sizeable organizational membership or by showing performance of veterans' services to a sizeable number of veterans. VA's purpose is to ensure that VA claimants have responsible, qualified representation and the above noted requirements serve as an indicator that the organization is stable. VA makes these determinations on a case-by-case basis taking into consideration all of the evidence of record. VA's goal is to ensure that VA claimants have access to the representation that they may need, and in order to provide such access, VA needs flexibility to make accreditation determinations based on the totality of the circumstances. Therefore, VA declines to make any changes based on these comments.

Several commenters requested that funding be made available to establish tribal organizations. Section 5902, of title 38, United State Code, which is the law that authorizes VA to recognize organizations for the purpose of

providing assistance on VA benefit claims, does not provide for the funding of such organizations to train and maintain representatives. Pursuant to § 14.628(d)(iii)(B), organizations are not precluded from seeking and receiving other sources of State and Federal grant funding so long as the organization's funding is not subject to limitations imposed under any Federal grant or law which would prevent it from representing claimants before VA. Therefore, VA declines to make any changes based on these comments.

Several commenters suggested further outreach and collaboration. On March 3 and 10, 2016, respectively, VA issued letters to tribal leaders and a **Federal Register** notice, 81 FR 12626, seeking comment on VA's consideration of issuing a proposed rule that would amend part 14 of title 38, Code of Federal Regulations, to expressly provide for the recognition of tribal organizations so that representatives of the organizations may assist Native American claimants in the preparation, presentation, and prosecution of their VA benefit claims. Those interested in providing comment were given 30 days to respond. Based on requests from commenters, VA expanded the comment period an additional 15 days to April 26, 2016. VA received comments from 36 commenters. In the proposed rule, VA addressed the comments received from the tribal consultation and provided an additional 60-day comment period. 81 FR 47091–47093, July 20, 2016. Therefore, VA finds that it has complied with the notice and consultation requirements of the governing Executive Orders. *See* Exec. Order No. 13175, 65 FR 67249–67252, Nov. 9, 2000; Exec. Order 12866 sec. 6(a), 58 FR 51735, Sept. 30, 1993; Exec. Order 13563 sec. 2(b), 76 FR 3821, 3821–22, Jan. 18, 2011.

One commenter asked VA to include the veterans departments within the tribal governments as eligible for VA recognition. A Veterans Affairs office or department that is established and funded by a tribal government is included in the definition of tribal organization and may apply for recognition under the rule. Another commenter requested that tribal government be included in the definition of tribal organization. A tribal government would not fit the definition of a tribal organization because the primary purpose of a tribal government is generally much broader than serving the needs of Native American veterans. However, the definition of tribal organization allows for a tribal government to establish such an organization that will be for that specific

purpose. In this same way, VA recognizes State organizations rather than the State governments themselves. Therefore, no change to this rulemaking is warranted based on these comments.

Another commenter stated that, due to the geographic size of their tribal government, it would make sense for it to become its own regional council. If the commenter is asserting its intention to apply to become a VA accredited organization, VA welcomes all organizations to apply once this rulemaking becomes effective. No change is warranted to this rulemaking based on this comment.

One commenter recommended that, regarding tribal government approval for tribal organization representation, the approval be recognized with a single resolution or other document on behalf of member tribal nations. The commenter stated that obtaining resolutions from each nation would be administratively burdensome. Pursuant to § 14.628, the organization requesting VA accreditation must certify to VA that the organization meets the § 14.628(d) requirements for recognition. As long as VA receives certification from each tribal government approving the tribal organization, VA has no objection to the format of the certification being contained in a single resolution or document. An example may be that the establishment of the tribal organization is contained in one resolution and that resolution is signed, or certified, by all of the appropriate officials. VA makes no changes based on this comment.

One commenter asked that VA provide recognition for urban Indian organizations or urban Indian health programs. The comment is unclear on whether such an organization would be able to apply for VA recognition as a tribal organization. VA declines to add an additional organization category at this time. In addition to the amendments discussed in this rulemaking, an organization may still utilize other avenues to apply for VA recognition such as requesting VA recognition as a regional or local organization. To be recognized as a regional or local organization, an organization must meet the requirements of § 14.628(c) and (d).

The same commenter asked that employees of urban Indian organizations or urban Indian health programs be recognized as accredited representatives. An individual may apply for accreditation as a representative through a VA-recognized organization under standards set forth in § 14.629(a). Alternatively, an individual may also seek accreditation in an individual capacity as either an

agent or an attorney under the standards set forth in § 14.629(b). The commenter also asked that the requirement for tribal veterans' service officers to work 1,000 hours annually be eliminated or lowered. The same hour requirements apply to county veterans' service officers being recommended for accreditation by a State and will, under this rule, apply to tribal veterans' service officers being accredited by a State. As explained in the proposed rule, VA prescribed these criteria in order to ensure adequate training and fitness to serve as a VA accredited representative. VA declines to make any changes based on these comments.

One commenter asked VA to require culturally sensitive training for TVSOs. Section 14.628(d)(1)(v)(B) requires that a request for recognition of an organization include a plan for recruiting and training the organization's representatives. In addition, with regard to TVSOs, the organization's certifying official must certify that the TVSO is a paid employee of the tribal government working no less than 1,000 hours annually, has successfully completed a course of training and examination approved by VA, and that the TVSO will receive regular supervision or annual training to assure the TVSO continues to be qualified to represent claimants. 38 CFR 14.629(a)(2)(i)–(iii). The testing or training for TVSOs may include topics such as cultural sensitivity training at the discretion of the organization. VA declines to add a cultural sensitivity training requirement as we believe each organization would be the best judge of the need for cultural sensitivity training for its own representatives. In addition, such an addition would not be a logical outgrowth of the proposed rule. Therefore, VA makes no changes based on this comment.

One commenter stated that, with regard to the Paperwork Reduction Act (PRA) requirements, VA had underestimated the number of applicants/respondents that would apply to become an accredited tribal organization. However, the commenter did not provide a number of how many applicants/respondents they thought VA would receive. VA notified the Office of Management and Budget (OMB) of the commenter's concern and amended its PRA submission to double the number of applicants/respondents from 5 to 10 per year.

One commenter asked to what extent OMB was involved in the formulation of this rule. Executive Order 12866, 58 FR 51735, requires that OMB, specifically the Office of Information and Regulatory Affairs, review regulations before they

are submitted for publication in the **Federal Register**. VA submitted the proposed rule and required supporting documents prior to the publication of the proposed rule and will comply with the requirements of the Executive Order in issuing this final rule. No change to this rulemaking is warranted based on this comment.

One commenter asked to what extent VA believes that all States would support this rulemaking. VA has not received any adverse comments from States on this rulemaking. As previously stated, recognition of a tribal organization is not tied to a State organization. No change to this rulemaking is warranted based on this comment.

One commenter asked what support VA could provide to tribes that do not have enough veterans per capita to participate in the process outlined to coordinate their activities with States or county veterans' service organizations while respecting a tribe's sovereign authority. It is unclear whether the commenter is requesting that VA waive certain accreditation requirements. As previously discussed, VA cannot waive the requirements for accreditation for any organization. A tribe that is unable to establish an organization that is capable of meeting the requirements to be recognized as a tribal organization may be able to have its members apply to become accredited in their individual capacity as claims agents or attorneys or as representatives through another VA-recognized organization. VA makes no changes based on this comment.

One commenter said that educational benefits should be allowed to be used at tribal colleges and universities. This comment is outside the scope of this rulemaking. Therefore, no change is warranted based on this comment.

Finally, VA is correcting a grammatical error in proposed § 14.628(b)(2). In the third sentence, VA mistakenly referred to "tgovernment" when the correct reference should have been to "tribal government." VA is correcting this error in this rulemaking.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (at 44 U.S.C. 3507) requires that VA consider the impact of paperwork and other information collection burdens imposed on the public. Under 44 U.S.C. 3507(a), an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid OMB control number. *See also* 5 CFR 1320.8(b)(3)(vi).

This final rule will impose the following new information collection

requirements. The collection of information in 38 CFR 14.628 requires organizations seeking VA accreditation under § 14.628 to submit certain documentation to certify that the organization meets the requirements for VA accreditation. Pursuant to § 14.628(d), an organization requesting recognition must have as a primary purpose serving veterans. In establishing that it meets this requirement, an organization requesting recognition shall submit a statement establishing the purpose of the organization and that veterans would benefit by recognition of the organization.

The organization must also demonstrate a substantial service commitment to veterans either by showing a sizable organizational membership or by showing performance of veterans' services to a sizable number of veterans. In establishing that it meets this requirement, an organization requesting recognition shall submit: The number of members and number of posts, chapters, or offices and their addresses; a copy of the articles of incorporation, constitution, charter, and bylaws of the organization, as appropriate; a description of the services performed or to be performed in connection with programs administered by VA, with an approximation of the number of veterans, survivors, and dependents served or to be served by the organization in each type of service designated; and a description of the type of services, if any, performed in connection with other Federal and State programs which are designed to assist former Armed Forces personnel and their dependents, with an approximation of the number of veterans, survivors, and dependents served by the organization under each program designated.

An organization requesting recognition must commit a significant portion of its assets to veterans' services and have adequate funding to properly perform those services. In establishing that it meets this requirement, an organization requesting recognition shall submit: A copy of the last financial statement of the organization indicating the amount of funds allocated for conducting particular veterans' services (VA may, in cases where it deems necessary, require an audited financial statement); and a statement indicating that use of the organization's funding is not subject to limitations imposed under any Federal grant or law which would prevent it from representing claimants before VA.

An organization requesting recognition must maintain a policy and capability of providing complete claims service to each claimant requesting representation or give written notice of any limitation in its claims service with advice concerning the availability of alternative sources of claims service. In establishing that it meets this requirement, an organization requesting recognition shall submit evidence of its capability to represent claimants before VA regional offices and before the Board of Veterans' Appeals. If an organization does not intend to represent claimants before the Board of Veterans' Appeals, the organization shall submit evidence of an association or agreement with a recognized service organization for the purpose of representation before the Board of Veterans' Appeals, or the proposed method of informing claimants of the limitations in service that can be provided, with advice concerning the availability of alternative sources of claims service. If an organization does not intend to represent each claimant requesting assistance, the organization shall submit a statement of its policy concerning the selection of claimants and the proposed method of informing claimants of this policy, with advice concerning the availability of alternative sources of claims service.

An organization requesting recognition must take affirmative action, including training and monitoring of accredited representatives, to ensure proper handling of claims. In establishing that it meets this requirement, an organization requesting recognition shall submit: A statement of the skills, training, and other qualifications of current paid or volunteer staff personnel for handling veterans' claims; and a plan for recruiting and training qualified claim representatives, including the number of hours of formal classroom instruction, the subjects to be taught, the period of on-the-job training, a schedule or timetable for training, the projected number of trainees for the first year, and the name(s) and qualifications of the individual(s) primarily responsible for the training.

In addition, the organization requesting recognition shall supply: A statement that neither the organization nor its accredited representatives will charge or accept a fee or gratuity for service to a claimant and that the organization will not represent to the public that VA recognition of the organization is for any purpose other than claimant representation; and the names, titles, and addresses of officers

and the official(s) authorized to certify representatives.

As required by the Paperwork Reduction Act of 1995 (at 44 U.S.C. 3507(d)), VA has submitted this information collection to OMB for its review. OMB approved these new information collection requirements associated with the final rule and assigned OMB control number 2900–0850.

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. It does not require any action on the part of any entity but merely provides a new opportunity for tribal organizations to become recognized by VA for the purpose of assisting VA claimants in the preparation, presentation, and prosecution of claims for VA benefits. Therefore, pursuant to 5 U.S.C. 605(b), this rulemaking is exempt from the final regulatory flexibility analysis requirements of section 604.

Executive Order 13175

Executive Order 13175 provides that Federal agencies may not issue a regulation that has tribal implications, that imposes substantial direct compliance costs on tribal governments, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments or the Federal agency consults with tribal officials early in the process of developing the proposed regulation, develops and publishes in the **Federal Register** a tribal summary impact statement, and provides to the Director of OMB any written communications submitted to the agency by the tribal officials.

On March 3 and 10, 2016, respectively, VA issued letters to tribal leaders and a **Federal Register** notice, 81 FR 12626, seeking comment on VA's consideration of issuing a proposed rule that would amend part 14 of title 38, Code of Federal Regulations, to expressly provide for the recognition of tribal organizations so that representatives of the organizations may assist Native American claimants in the preparation, presentation, and prosecution of their VA benefit claims. Those interested in providing comment were given 30-days to respond. Based on requests from commenters, VA expanded the comment period an additional 15 days to April 26, 2016. VA received comments from a total of 37

commenters. VA addressed 36 of those comments in the proposed rule. 81 FR 47087, 47091–47093. During the drafting of the final rule, VA discovered one additional comment submitted in response to the tribal consultation. Therefore, VA is addressing the additional comment and republishing VA's responses to the other comments in this final rule.

One commenter asked if tribal organizations, since they are sovereign nations, would work with their local VA regional offices to include submitting claims through their respective regional offices. VA-recognized tribal organizations will be responsible for providing representation on behalf of their clients in the same manner as all other VA-recognized organizations, which often includes filing claims and evidence in support of their client's claims with the appropriate regional office. For TVSO's whose sole accreditation is through a State organization, VA defers to the State organization on their procedures for submitting claims and evidence to VA. No change is warranted to this rulemaking based on this comment.

The same commenter asked if tribal organizations will “commit to annual/routine training [for their] veterans service officers.” Part of the § 14.628(d) requirements is that an organization seeking accreditation must “[t]ake affirmative action, including training and monitoring of accredited representatives, to ensure proper handling of claims.” 38 CFR 14.628(d)(1)(v). When an organization applies for VA accreditation, the organization must include a plan for recruiting and training the organization's representatives. 38 CFR 14.628(d)(1)(v)(B). No change is warranted to this rulemaking based on this comment.

One commenter wrote that, currently, their tribal representatives are being accredited through their State as well as other national organizations and was curious as to the “road blocks” other tribal organizations were facing. This commenter did not provide any suggestions, and therefore, no change to this rulemaking is warranted.

Several commenters noted that currently Native American veterans face many roadblocks to obtaining representation. One commenter noted that geography, economic, and culture barriers prevent Native American veterans from utilizing currently available representation. These comments were offered in support of the rulemaking, and therefore, no change is warranted.

A few commenters misinterpreted the language provided in the consultation and notice as meaning that VA intended that VA's recognition of a tribal organization would be tied to VA's recognition of the corresponding State organization. One commenter stated that VA should recognize a tribal organization as "equal to" a State organization. VA is not tying VA recognition of a tribal organization to a State and is choosing not to make value judgements as to the importance of the recognition granted to State organizations and Tribal organizations. Recognition of a tribal organization will stand on its own. VA has chosen to use the term *similar* rather than the term *equal* in this rule because there are some differences in the requirements for VA recognition of a tribal organization and the requirements for State organizations. Specifically, the rule will allow a single tribal government, or multiple tribal governments to join together to establish and fund a tribal organization, but such allowance is not permitted for State governments.

A few commenters misinterpreted the language provided in the consultation and notice as limiting recognition of a tribal veterans' service officer through a State. One commenter asked for clarification on what type of employees would be eligible to become accredited by VA. The commenter stated that employees of a tribal nation as well as a tribal organization should be eligible. We agree, and the final rule allows for both avenues to attain VA accreditation depending on the tribal government's size, relationships with other tribal governments, relationships with States, and the needs of Native American veterans in their area. After a tribal organization becomes recognized by VA, that organization will be able to request to have its own representatives accredited under 38 CFR 14.629. In addition to recognizing tribal organizations and accredit their representatives, VA provides an additional means by which VA may recognize an employee of a tribal government as a tribal veterans' service officer through a State organization. This accreditation is akin to accreditation given to county veterans' service officers through State organizations and is only meant to provide an additional path to VA accreditation. The requirements for a tribal veterans' service officer to become accredited as a representative through a State organization be the same as the requirements for a county veterans' service officer. Therefore, VA makes no changes based on these comments.

One commenter asked what happens to the accreditation of a tribal organization if the Director is relinquished. It seems this comment stems from the misinterpretation previously discussed regarding the accreditation of a tribal organization and the corresponding State organization. The commenter also asked what happens if the State refuses to sponsor the replacement officer. As discussed above, once a tribal organization becomes recognized by VA, that organization can request to have its own representatives accredited under § 14.629. The tribal organization can file with VA to have a replacement officer accredited. Therefore, VA makes no changes based on this comment.

Several commenters also expressed concern over the requirements for recognition in § 14.628(d). Specifically, the commenters expressed concern that many tribal organizations may not be able to satisfy the primary purpose, size, funding, and training requirements, to include providing the required, supporting documentation. One commenter suggested that VA provide the funding for tribes "to engage in this work." Another commenter suggested including Indian Health Services for funding assistance. A few commenters expressed concern about the requirement that the organization must maintain a policy of either providing complete claims representation or provide "written notice of any limitation in its claims service with advice concerning the availability of alternative sources of claims service." 38 CFR 14.628(d)(1)(iv). One commenter seemed to believe VA was questioning the level of competence of tribal representatives. VA must ensure that VA accredited organizations can provide long-term, competent representation and has found that the § 14.628(d) requirements are protective of that mission. These requirements apply to all organizations seeking VA recognition. Exempting tribal organizations from meeting the § 14.628(d) requirements is not consistent with the purpose of VA recognition to ensure that veterans are receiving qualified, competent representation on their VA benefit claims. As previously discussed, VA has provided additional means to achieve VA recognition or accreditation for those tribal governments that may have difficulty establishing a tribal organization capable of meeting the § 14.628(d) requirements, to include the ability for one or more tribal governments to establish and fund a tribal organization and the ability of an

employee of a tribal government to become accredited as a tribal veterans' service officer through a recognized State organization. Therefore, VA makes no changes based on these comments.

One commenter suggested that VA grant accreditation to tribes through a Memorandum of Understanding and included their tribe's Memorandum of Understanding with their State. The commenter also questioned the role of VA in the accreditation and monitoring process. The laws governing VA accreditation are set out at 38 U.S.C. 5902 and 5904 and 38 CFR 14.626–14.637. These laws apply to all organizations, agents, and attorneys seeking VA accreditation. Pursuant to § 14.628, the organization requesting VA accreditation must certify to VA that the organization meets the § 14.628(d) requirements for recognition. Therefore, a Memorandum of Understanding between VA and a tribe is not sufficient for applying for VA accreditation. Furthermore, VA does monitor its accredited organizations, agents, and attorneys and handles disciplinary matters as they arise. Therefore, VA makes no changes based on this comment.

One commenter suggested that VA engage in additional consultation with Tribes that would be "interested in becoming recognized veterans[]" service organizations, but are unable to meet the requirements." In this rule, VA offers alternative avenues for VA recognition and accreditation for tribal governments that may not be capable of establishing an organization that can meet the VA recognition requirements in the rule on their own. VA declines to make any changes based on this comment.

One commenter also recommended that "VA enter into Memorandums of Understanding with [F]ederally-recognized tribes and tribal organizations for [v]eterans' [s]ervice [o]fficer training and service reimbursement, on individual bases." Another commenter objected to the fact that there was "no mention of funding to train and maintain such a position." Section 5902, of title 38, United States Code, which is the law that authorizes VA to recognize organizations for the purpose of providing assistance on VA benefit claims, does not provide for the funding of such organizations to train and maintain representatives. Pursuant to § 14.628(d)(iii)(B), organizations are not precluded from seeking and receiving other sources of State and Federal grant funding so long as the organization's funding is not subject to limitations imposed under any Federal grant or law which would prevent it from representing claimants before VA.

Therefore, VA declines to make any changes based on these comments.

One commenter wrote that VA “. . . should include [F]ederally-recognized tribes, not just tribal organizations funded by tribal governments, as an entity from which applications will be considered to be recognized for . . .” VA accreditation. Another commenter suggested adding “[F]ederally recognized tribes” or “[F]ederally recognized tribal governments” as part of the definition for tribal organizations. Another commenter suggested adding tribal communities. For the purposes of the regulations pertaining to the representation of VA claimants, VA defines a tribal government to mean “the Federally recognized governing body of any Indian tribe, band, nation, or other organized group or community. . . .” VA finds this definition to be inclusive of the comments, and therefore, no change is warranted.

One commenter suggested a legislative amendment to the definition of State in 38 U.S.C. 101(20) to include “[F]ederally recognized tribal governments.” Amending the statutory language is something that only Congress can accomplish. Since VA is defining the term “tribal government” in regulation and providing an avenue for VA recognition of a tribal organization separate from a State organization, VA does not find such a legislative amendment necessary. Therefore, no change is warranted based on this comment.

Several commenters wrote that “[s]pecial attention must be paid to what specifically is meant by a ‘[t]ribal [o]rganization’” and that VA should offer a clear definition of the term. The commenters did not offer any suggestions for such definition. As previously discussed, VA is defining this term for the purposes of this rulemaking. Therefore, VA does not make any changes based on this comment.

Several commenters asked VA to clarify whether tribal governments, including veterans departments within these governments, would be eligible for VA recognition. A Department of Veterans Affairs or a Veterans Affairs office that is established and funded by a tribal government is included in the definition of tribal organization. Therefore, no change to this rulemaking is warranted based on these comments.

One commenter asked that VA provide recognition for urban Indian organizations. The comment is unclear on whether such an organization would be able to apply for VA recognition as a tribal organization. VA declines to add

an additional organization category at this time. In addition to the amendments discussed in this rulemaking, an organization may still utilize other avenues to apply for VA recognition such as requesting VA recognition as a regional or local organization. To be recognized as a regional or local organization, an organization must meet the requirements of § 14.628(c) and (d).

Further, there are several ways that individuals, including tribal members, tribal government employees, and others who work within and serve tribal or Native American communities, may be accredited by VA to represent claimants. An individual may apply for accreditation as a representative through an existing VA-recognized organization under standards set forth in § 14.629(a). Alternatively, an individual may also seek accreditation in an individual capacity as either an agent or an attorney under the standards set forth in § 14.629(b). Therefore, VA declines to make any changes based on this comment.

A couple of commenters submitted statements certifying that their organization would meet the requirements for accreditation for a tribal organization. Applications for accreditation are outside the scope of this rulemaking. Therefore, no change is warranted based on these comments.

One commenter asked whether accredited tribal representatives would be granted access to software programs containing a veteran’s claims file information and whether that access would be on tribal grounds. This issue is outside the scope of this rulemaking. Therefore, no change is warranted based on this comment.

One commenter expressed support for VA recognizing tribal organizations in an equal manner as VA recognizes State organizations but suggested that VA authorize a field office close to tribal administration locations and fund one or two veterans service officer positions. The tribal consultation and this rulemaking are limited in scope to recognition for purposes of VA claims representation. The commenter’s suggestion of adding a field office is beyond the scope, and therefore, VA declines to make any changes based on this comment. VA also declines to make any changes to the commenter’s suggestion of funding job positions for veterans service officers. Part of the § 14.628(d) requirements is that an organization seeking accreditation must commit a significant portion of its assets to veterans’ services and have adequate funding to properly perform those services. 38 CFR 14.628(d)(1)(iii).

A few commenters expressed concern that the rulemaking is limiting VA recognition for the preparation, presentation, and prosecution of claims for VA benefits. One commenter seemed to think VA is depriving veterans from other title 38 benefits. The commenters did not specify what other accreditation they are seeking. As previously discussed, the relevant regulations in 38 CFR part 14 are to recognizing organizations and accrediting individuals to assist in the preparation, presentation, and prosecution of VA benefit claims. Pursuant to section 5902, VA accreditation may not be granted for any other purpose. This rulemaking in no way deprives any veteran of any title 38 benefits. Therefore, no change is warranted based on these comments.

One commenter suggested that office space opportunities should be available to tribal governments and organizations in the same manner as they are available to State organizations. As previously discussed, this rule will, under § 14.635, allow the Secretary to furnish office space and facilities, when available, to both State and tribal organization employees who are also accredited to national organizations for the purpose of assisting claimants in the preparation, presentation, and prosecution of claims for benefits. VA will be furnishing office space to tribal organizations in the same manner as it furnishes such space to State organizations. Therefore, no change is warranted based on this comment.

One commenter noted that VA should allow a tribal government employee to become accredited through an accredited body of their choice. VA in no way is limiting how a particular individual may apply to become an accredited VA representative. As previously discussed, VA is merely providing additional paths to VA accreditation than currently exist. Therefore, VA declines to make any changes to this rulemaking based on this comment.

Several commenters suggested further outreach and collaboration. One commenter suggested that VA form a tribal workgroup to allow representatives from tribal organizations to collaborate on implementing the new program. One commenter provided VA with their tribal consultation policy. Other commenters suggested that VA engage in additional consultation with experts in Indian law and hold an all-tribes call to gather additional input for this rulemaking. VA appreciates this information. As previously noted, VA extended the comment period for an additional 15 days to ensure that all interested parties had an appropriate

time to provide input. Therefore, VA finds that it has complied with the requirements of Executive Order 13175. VA also provided an additional 60-day comment period for the proposed rule.

One commenter asked for the projected implementation date of this rulemaking. The dates section of this final rule contains the effective date of the rulemaking.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a “significant regulatory action” requiring review by OMB, unless OMB waives such review, as “any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations or recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in this Executive Order.”

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined not to be a significant regulatory action under Executive Order 12866. VA’s impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of this rulemaking and its impact analysis are available on VA’s Web site at <http://www.va.gov/orpm/>, by following the link for “VA Regulations Published From FY 2004 Through Fiscal Year to Date.”

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Catalog of Federal Domestic Assistance

There are no Catalog of Federal Domestic Assistance programs numbers and titles associated with this final rule.

List of Subjects in 38 CFR Part 14

Administrative practice and procedure, Claims, Courts, Foreign relations, Government employees, Lawyers, Legal services, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Surety bonds, Trusts and trustees, Veterans.

For the reasons set out in the preamble, the Department of Veterans Affairs amends 38 CFR part 14 as follows:

PART 14—LEGAL SERVICES, GENERAL COUNSEL, AND MISCELLANEOUS CLAIMS

- 1. The authority citation for part 14 continues to read as follows:

Authority: 5 U.S.C. 301; 28 U.S.C. 2671–2680; 38 U.S.C. 501(a), 512, 515, 5502, 5901–5905; 28 CFR part 14, appendix to part 14, unless otherwise noted.

- 2. Amend § 14.627 by adding paragraph (r) to read as follows:

§ 14.627 Definitions.

* * * * *

(r) *Tribal government* means the Federally recognized governing body of any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or Regional or Village Corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act, which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

* * * * *

- 3. Amend § 14.628 by:

- a. Designating paragraph (b) as paragraph (b)(1) and adding paragraph (b)(2); and
- b. In the OMB approval parenthetical at the end of the section, removing “2900–0439” and adding, in its place, “2900–0850”.

The addition reads as follows:

§ 14.628 Recognition of organizations.

* * * * *

(b) * * *

(2) *Tribal organization*. For the purposes of 38 CFR 14.626 through 14.637, an organization that is a legally established organization that is primarily funded and controlled, sanctioned, or chartered by one or more tribal governments and that has a primary purpose of serving the needs of Native American veterans. Only one tribal organization may be recognized for each tribal government. If a tribal organization is created and funded by more than one tribal government, the approval of each tribal government must be obtained prior to applying for VA recognition. If one of the supporting tribal governments withdraws from the tribal organization, the tribal organization must notify VA of the withdrawal and certify that the tribal organization continues to meet the recognition requirements in paragraph (d) of this section.

* * * * *

§ 14.629 [Amended]

- 4. Amend § 14.629 by:

- a. In paragraph (a)(2) introductory text, removing “county veteran’s service officer” and adding in its place “county veterans’ service officer”;
- b. In paragraph (a)(2) introductory text, adding “or tribal veterans’ service officer” immediately following “county veterans’ service officer”; and
- c. In paragraph (a)(2)(i), adding “or tribal government” immediately following “county”.

§ 14.635 [Amended]

- 5. Amend § 14.635 by adding, in the introductory paragraph, “or tribal” immediately following “State”.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on January 11, 2017, for publication.

Dated: January 11, 2017.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320–01–P

**DEPARTMENT OF VETERANS
AFFAIRS****38 CFR Part 17****RIN 2900-AP94****Fertility Counseling and Treatment for
Certain Veterans and Spouses****AGENCY:** Department of Veterans Affairs.**ACTION:** Interim final rule.

SUMMARY: The Department of Veterans Affairs (VA) amends its regulation regarding fertility counseling and treatment available to certain veterans and spouses. VA currently provides certain infertility services other than in vitro fertilization (IVF) to veterans as part of the medical benefits package. IVF is the process of fertilization by manually fertilizing an egg, and then transferring the embryo to the uterus. This interim final rulemaking adds a new section authorizing IVF for a veteran with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment. In addition, we add a new section stating that VA may provide fertility counseling and treatment using assisted reproductive technologies (ART), including IVF, to a spouse of a veteran with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment. VA will provide ART treatment, including IVF, to these veterans and spouses as specified in the Continuing Appropriations and Military Construction, Veterans Affairs, and Related Agencies Appropriations Act, 2017, and Zika Response and Preparedness Act to the extent such services are consistent with the services available to enrolled veterans under the medical benefits package.

DATES: *Effective Date:* This rule is effective on January 19, 2017.

Comment date: Comments must be received on or before March 20, 2017.

ADDRESSES: Written comments may be submitted by email through <http://www.regulations.gov>; by mail or hand-delivery to Director, Regulation Policy and Management (00REG), Department of Veterans Affairs, 810 Vermont Avenue NW., Room 1068, Washington, DC 20420; or by fax to (202) 273-9026. (This is not a toll-free number.) Comments should indicate that they are submitted in response to “RIN 2900AP94—Fertility Counseling and Treatment for Certain Veterans and Spouses.” Copies of comments received will be available for public inspection in the Office of Regulation Policy and

Management, Room 1068, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays). Please call (202) 461-4902 for an appointment. (This is not a toll-free number.) In addition, during the comment period, comments may be viewed online through the Federal Docket Management System (FDMS) at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Patricia M. Hayes, Ph.D., Chief Consultant, Women's Health Services, Patient Care Services, Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Ave. NW., Washington, DC 20420. (202) 461-0373. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 260 of the Continuing Appropriations and Military Construction, Veterans Affairs, and Related Agencies Appropriations Act, 2017, and Zika Response and Preparedness Act (Public Law 114-223) states that VA may use appropriated funds available to VA for the Medical Services account to provide fertility counseling and treatment using assisted reproductive technology (ART) to a covered veteran or the spouse of a covered veteran, or adoption reimbursement to a covered veteran. This rulemaking expands the types of ART treatment available to certain veterans and makes fertility counseling and treatment including ART treatment available to spouses of those veterans, consistent with this statutory authority. Reimbursement of adoption expenses will be the subject of a separate rulemaking.

According to this law, Veterans who will receive this benefit are those with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment. The ART treatments referred to in this law are those relating to reproductive assistance provided to a member of the Armed Forces who incurs a serious injury or illness on active duty pursuant to title 10 of the United States Code (U.S.C.) section 1074(c)(4)(A), as described in a policy memorandum issued by the Assistant Secretary of Defense for Health Affairs on April 3, 2012, titled “Policy for Assisted Reproductive Services for the Benefit of Seriously or Severely Ill/Injured (Category II or III) Active Duty Service Members,” and the guidance issued to implement such policy, including any limitations on the amount of such benefits available to such a member. See Public Law 114-223, section 260(b)(2) and (3). The implementing guidance is contained in a document attached to the policy

memorandum. We will refer to the April 3, 2012, policy memorandum and guidance issued by the Department of Defense (DoD) to implement that policy collectively as DoD policy guidance. DoD has established a system for categorizing injured servicemembers for purposes of coordinating care. Those in Category II have a serious injury or illness, are unlikely to return to duty within a time specified by their Military Department, and may be medically separated from the military.

Servicemembers in Category III have a severe or catastrophic injury or illness, are highly unlikely to return to duty, and will most likely be medically separated from the military.

ART is defined at Public Law 114-223, section 260(b)(3) to mean the benefits relating to reproductive assistance in DoD policy guidance, including any limitations on the amount of such benefits in that policy. DoD policy guidance addresses assisted reproductive services available to servicemembers, providing specific guidance on the availability of IVF, as well as a wide range of services that VA considers as fertility treatment. Under this statute, VA is authorized to provide ART benefits, consistent with DoD policy guidance, to a veteran with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment, as well as the spouse of that veteran. The conference report accompanying this legislation makes clear that the implementing guidance developed by the Secretary shall not be materially different from, and in no way more expansive than, DoD's policy. Joint Explanatory Statement. 162 Congressional Record at S6011 (2016).

The Veterans' Health Care Eligibility Reform Act of 1996, Public Law 104-262, mandated that VA implement a national enrollment system to manage the delivery of healthcare services. A key component of managing delivery of healthcare services to eligible veterans is identifying the medical services provided by VA. The medical benefits package, defining the medical services provided to all enrolled veterans by VA, is found at 38 CFR 17.38. VA may provide services under the medical benefits package that are determined by appropriate healthcare professionals to be needed to promote, preserve, or restore the health of the individual and to be in accord with generally accepted standards of medical practice.

As part of the medical benefits package, VA provides many different types of fertility treatments and procedures to veterans. These include infertility counseling, laboratory blood

testing, surgical correction of structural pathology, reversal of a vasectomy or tubal ligation, medication, and various other diagnostic studies or treatments and procedures. This list is not all-inclusive. Most of the ART evaluation and treatment modalities offered by VA are consistent with DoD policy guidance. The exception is IVF. DoD offers IVF to servicemembers who have sustained serious or severe illness/injury while on active duty that led to the loss of their natural procreative ability, while IVF is excluded from VA's medical benefits package under § 17.38(c)(2). IVF is the process of fertilization by manually fertilizing an egg, and then transferring the embryo to the uterus. IVF is a common and medically accepted procedure for addressing infertility that cannot be overcome with other types of infertility treatment. Although we are not revising the medical benefits package itself, we are revising paragraph (c)(2) to add a note referencing the benefit available in § 17.380, as discussed below. We believe that this clarification will help veterans better understand the benefits available from VA.

Pursuant to Public Law 114–223 section 260, VA is adding new § 17.380 which states that IVF may be provided when clinically appropriate to a veteran who has a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment, as well as a spouse of such veteran. Per 38 U.S.C. 101(2), the term veteran means a person who served in the active military, naval, or air service, and who was discharged or released therefrom under conditions other than dishonorable. Under this provision, IVF services available to such veterans are the same as those provided by DoD to a member of the Armed Forces who incurs a serious injury or illness on active duty pursuant to 10 U.S.C. 1074(c)(4)(A), as described in DoD policy guidance, including any limitations on the amount of such benefits available to such a member. For the purposes of this section, “a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment” means, for a male veteran, a service-connected injury or illness that prevents the successful delivery of sperm to an egg; and, for a female veteran with ovarian function and a patent uterine cavity, a service-connected injury or illness that prevents the egg from being successfully fertilized by a sperm. This definition parallels requirements in DoD policy guidance for an active duty service member who is seriously or

severely ill/injured (Category II or III) to receive fertility counseling and treatment using ART. Public Law 114–223 provides appropriations for FY 2017. The benefits authorized under section 260 are thereby limited to FY2017. Paragraph (b) of § 17.380 states that the authority to provide IVF to covered veterans under this section expires September 30, 2017. If the authority is extended, we will amend this section accordingly.

In addition, VA adds a new § 17.412. This new section states that VA may provide fertility counseling and treatment using ART to a spouse of a veteran with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment to the extent such services are available to enrolled veterans under the medical benefits package. It also states that VA may provide IVF to a spouse of a veteran with a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment. Such health care services may be provided when clinically appropriate and consistent with the benefits relating to reproductive assistance provided to a member of the Armed Forces who incurs a serious injury or illness on active duty as described in DoD policy guidance.

Paragraph (b) states that authority to provide fertility counseling and treatment including IVF to spouses of covered veterans under this section expires September 30, 2017. If the authority is extended we will amend this section accordingly.

DoD policy guidance addresses various issues including eligibility for ART, testing to predict fertility potential, infertility testing and treatment (including correction of the physical cause of infertility), provisions on the total number of IVF cycles that may be provided, and required processes and procedures. VA intends to issue policy and develop clinical guidelines consistent with DoD policy guidance.

Finally, we also revise the center heading immediately preceding § 17.410 to read “Hospital Care and Medical Services for Spouses and Families.” VA provides medical care to certain families of Camp Lejeune veterans under § 17.410, and the center heading referred to those services. The current rulemaking adds a new section immediately following § 17.410, and VA believes the center heading should be revised to avoid any confusion.

Administrative Procedure Act

In accordance with U.S.C. 553(b)(B) and (d)(3), the Secretary of Veterans Affairs has concluded that there is good cause to publish this rule as an interim final rule without prior opportunity for public comment and to publish this rule with an immediate effective date. As stated above, this rule makes IVF treatment available to certain veterans, and fertility counseling and treatment using ART to the spouses of those veterans. The Secretary finds that it is impracticable and contrary to the public interest to delay this rule for the purpose of soliciting advance public comment or to have a delayed effective date. This rulemaking will benefit those veterans and spouses most in need of ART services including IVF, and delay might cause a significant hardship for affected veterans and spouses. The Joint Theater Trauma Registry (JTTR) reflects the most common single cause of battle injuries is explosive devices (36.3%). Such trauma frequently results in genitourinary injury. For example, 1 in 5 warriors were evacuated from Operation Enduring Freedom (OEF) combat in October 2011 with a genitourinary injury. This increasingly common trauma can have catastrophic reproductive results. While the JTTR tracks combat trauma only for OEF and Operation Iraqi Freedom, genitourinary or spinal cord injury, or pelvic trauma related to combat injuries was also common in previous combat operations, and these injuries may make it impossible for affected veterans to procreate without the use of fertility treatment. In many cases ART, including IVF, is the only viable option for procreation. Further, since age is a factor in successful fertilization and completion of a pregnancy, rulemaking delay may result in some veterans or spouses losing fertility potential prior to a later effective date. In addition, this rulemaking will ensure that covered veterans leaving service at this time, and their spouses, will experience continuity of care when transferring from health care provided by DoD to that provided by VA, with no difference in the level or types of available ART. For the above reason, the Secretary issues this rule as an interim final rule. VA will consider and address comments that are received within 60 days of the date this interim final rule is published in the **Federal Register**.

Effect of Rulemaking

Title 38 of the Code of Federal Regulations, as revised by this final rulemaking, represents VA's implementation of its legal authority on

this subject. Other than future amendments to this regulation or governing statutes, no contrary guidance or procedures are authorized. All existing or subsequent VA guidance must be read to conform with this rulemaking if possible or, if not possible, such guidance is superseded by this rulemaking.

Paperwork Reduction Act

This interim final rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Regulatory Flexibility Act

The Secretary hereby certifies that this interim final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This interim final rule will directly affect only individuals and will not directly affect small entities. Therefore, pursuant to 5 U.S.C. 605(b), this rulemaking is exempt from the initial and final regulatory flexibility analysis requirements of 5 U.S.C. 603 and 604.

Executive Order 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a “significant regulatory action,” requiring review by the Office of Management and Budget (OMB), unless OMB waives such review, as “any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of

recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in this Executive Order.”

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined not to be a significant regulatory action under Executive Order 12866. VA’s impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA’s Web site at <http://www.va.gov/orpm/>, by following the link for “VA Regulations Published From FY 2004 Through Fiscal Year to Date.”

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This interim final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers and titles for the programs affected by this document are 64.007, Blind Rehabilitation Centers; 64.008, Veterans Domiciliary Care; 64.009, Veterans Medical Care Benefits; 64.010, Veterans Nursing Home Care; 64.011, Veterans Dental Care; 64.012, Veterans Prescription Service; 64.013, Veterans Prosthetic Appliances; 64.014, Veterans State Domiciliary Care; 64.015, Veterans State Nursing Home Care; 64.018, Sharing Specialized Medical Resources; 64.019, Veterans Rehabilitation Alcohol and Drug Dependence; 64.022, Veterans Home Based Primary Care; and 64.024, VA Homeless Providers Grant and Per Diem Program.

List of Subjects in 38 CFR Part 17

Administrative practice and procedure, Alcohol abuse, Alcoholism, Claims, Day care, Dental health, Drug abuse, Government contracts, Grant programs—health, Grant programs—veterans, Health care, Health facilities, Health professions, Health records, Homeless, Medical and Dental schools, Medical devices, Medical research,

Mental health programs, Nursing homes, Reporting and recordkeeping requirements, Travel and transportation expenses, Veterans.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on December 23, 2016, for publication.

Janet Coleman,

*Chief, Regulation Policy & Management,
Office of the Secretary, Department of
Veterans Affairs.*

For the reasons set out in the preamble, VA amends 38 CFR part 17 as follows:

PART 17—MEDICAL

■ 1. The authority citation for part 17 is revised to read as follows:

Authority: 38 U.S.C. 501, and as noted in specific sections.

Section 17.38 also issued under 38 U.S.C. 101, 501, 1701, 1705, 1710, 1710A, 1721, 1722, 1782, and 1786.

Sections 17.380 and 17.412 are also issued under sec. 260, Pub. L. 114–223, 130 Stat. 857.

Section 17.415 is also issued under 38 U.S.C. 7301, 7304, 7402, and 7403.

Sections 17.640 and 17.647 are also issued under sec. 4, Pub. L. 114–2, 129 Stat. 30.

Sections 17.641 through 17.646 are also issued under 38 U.S.C. 501(a) and sec. 4, Pub. L. 114–2, 129 Stat. 30.

■ 2. Amend § 17.38 by:

■ a. Revising paragraph (c)(2).

■ b. Removing the sectional authority citation.

The revision reads as follows:

§ 17.38 Medical benefits package.

* * * * *

(c) * * *

(2) In vitro fertilization. Note: See § 17.380.

* * * * *

■ 3. Add an undesignated center heading and § 17.380 to read as follows:

In Vitro Fertilization Treatment

§ 17.380 In vitro fertilization treatment.

(a)(1) In vitro fertilization may be provided when clinically appropriate to—

(i) A veteran who has a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment; and,

(ii) The spouse of such veteran, as provided in § 17.412.

(2) For the purposes of this section, “a service-connected disability that results in the inability of the veteran to procreate without the use of fertility treatment” means, for a male veteran, a service-connected injury or illness that prevents the successful delivery of sperm to an egg; and, for a female veteran with ovarian function and a patent uterine cavity, a service-connected injury or illness that prevents the egg from being successfully fertilized by sperm.

(3) In vitro fertilization treatment will be provided under this section when clinically appropriate and to the same extent such treatment is provided to a member of the Armed Forces who incurs a serious injury or illness on active duty pursuant to 10 U.S.C. 1074(c)(4)(A), as described in the April 3, 2012, memorandum issued by the Assistant Secretary of Defense for Health Affairs on the subject of “Policy for Assisted Reproductive Services for the Benefit of Seriously or Severely Ill/Injured (Category II or III) Active Duty Service Members,” and the guidance issued by the Department of Defense to implement such policy, including any limitations on the amount of such benefits available to such a member.

(b) Authority to provide in vitro fertilization treatment to covered veterans under this section expires September 30, 2017.

■ 4. Revise the undesignated center heading immediately preceding § 17.410 to read as follows:

Hospital Care and Medical Services for Spouses and Families

■ 5. Add § 17.412 to read as follows:

§ 17.412 Fertility counseling and treatment for certain spouses.

(a)(1) VA may provide fertility counseling and treatment to a spouse of a veteran described in § 17.380 to the extent such services are available to a veteran under § 17.38, and consistent with the benefits relating to reproductive assistance provided to a member of the Armed Forces who incurs a serious injury or illness on active duty pursuant to 10 U.S.C. 1074(c)(4)(A), as described in the April 3, 2012, memorandum issued by the Assistant Secretary of Defense for Health Affairs on the subject of “Policy for Assisted Reproductive Services for the Benefit of Seriously or Severely Ill/Injured (Category II or III) Active Duty Service Members,” and the guidance issued by the Department of Defense to implement such policy, including any

limitations on the amount of such benefits available to such a member.

(2) VA may provide in vitro fertilization to a spouse of a veteran described in § 17.380 when clinically appropriate and consistent with the benefits relating to reproductive assistance provided to a member of the Armed Forces who incurs a serious injury or illness on active duty pursuant to 10 U.S.C. 1074(c)(4)(A), as described in the April 3, 2012, memorandum issued by the Assistant Secretary of Defense for Health Affairs on the subject of “Policy for Assisted Reproductive Services for the Benefit of Seriously or Severely Ill/Injured (Category II or III) Active Duty Service Members,” and the guidance issued by the Department of Defense to implement such policy, including any limitations on the amount of such benefits available to such a member.

(b) Authority to provide fertility counseling and treatment, including in vitro fertilization under this section, expires September 30, 2017.

[FR Doc. 2017–00280 Filed 1–18–17; 8:45 am]

BILLING CODE 8320–01–P

POSTAL SERVICE

39 CFR Part 233

Inspection Service Authority; Civil Monetary Penalty Inflation Adjustment

AGENCY: Postal Service.

ACTION: Interim final rule.

SUMMARY: This rule updates postal regulations to implement the annual inflation adjustments to civil monetary penalties that may be imposed under consumer protection and mailability provisions enforced by the Postal Service pursuant to the Deceptive Mail Prevention and Enforcement Act and the Postal Accountability and Enhancement Act. These adjustments are required under the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. This notice also includes the statutory civil monetary penalties subject to the 2015 Act.

DATES: *Effective date:* January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Steven Sultan, (202) 268–7385.

SUPPLEMENTARY INFORMATION: The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (2015 Act), Public Law 114–74, 129 Stat. 584, amended the Federal Civil Penalties Inflation Adjustment Act of

1990 (1990 Act), Public Law 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. Section 3 of the 1990 Act specifically includes the Postal Service in the definition of “agency” subject to its provisions.

Beginning in 2017, the 2015 Act requires the Postal Service to make an annual adjustment for inflation to civil penalties that meet the definition of “civil monetary penalty” under the 1990 Act. The Postal Service must make the annual adjustment for inflation and publish the adjustment in the **Federal Register** by January 15. Each penalty will be adjusted as instructed by the Office of Management and Budget (OMB) based on the Consumer Price Index (CPI-U) from the most recent October. OMB has furnished detailed instructions regarding the annual adjustment for 2017 in memorandum M–17–11, *Implementation of the 2017 Annual Adjustment Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (December 16, 2016), https://www.whitehouse.gov/sites/default/files/omb/memoranda/2017/m-17-11_0.pdf. This year, OMB has advised that an adjustment multiplier of 1.01636 will be used. The new penalty amount must be rounded to the nearest dollar.

The 2015 Act allows the interim final rule and annual inflation adjustments to be published without prior public notice or opportunity for public comment.

Adjustments to Postal Service Civil Monetary Penalties

Civil monetary penalties may be assessed for postal offenses under sections 106 and 108 of the Deceptive Mail Prevention and Enforcement Act, Public Law 106–168, 113 Stat. 1811, 1814 (*see*, 39 U.S.C. 3012(a), (c)(1), (d), and 3017(g)(2), (h)(1)(A)); and section 1008 of the Postal Accountability and Enhancement Act, Public Law 109–435, 120 Stat. 3259–3261 (*see*, 39 U.S.C. 3018 (c)(1)(A)). The statutory civil monetary penalties subject to the 2015 Act and the amount of each penalty the annual adjustment for inflation are as follows:

39 U.S.C. 3012(a)—False Representations and Lottery Orders

Under 39 U.S.C. 3005(a)(1)–(3), the Postal Service may issue administrative orders prohibiting persons from using the mail to obtain money through false representations or lotteries. Persons who evade, attempt to evade, or fail to comply with an order to stop such prohibited practices may be liable to the United States for a civil penalty under

39 U.S.C. 3012(a). This section currently imposes a \$68,345 penalty for each mailing less than 50,000 pieces, \$136,689 for each mailing of 50,000 to 100,000 pieces, and \$13,669 for each additional 10,000 pieces above 100,000 not to exceed \$2,733,780. The new penalties will be as follows: \$69,463 for each mailing less than 50,000 pieces, \$138,925 for each mailing of 50,000 to 100,000 pieces, and \$13,893 for each additional 10,000 pieces above 100,000 not to exceed \$2,778,505.

39 U.S.C. 3012(c)(1)—False Representation and Lottery Penalties in Lieu of or as Part of an Order

In lieu of or as part of an order issued under 39 U.S.C. 3005(a)(1)–(3), the Postal Service may assess a civil penalty. Currently, the amount of this penalty, set in 39 U.S.C. 3012(c)(1), is \$34,172 for each mailing that is less than 50,000 pieces, \$68,345 for each mailing of 50,000 to 100,000 pieces, and an additional \$6,834 for each additional 10,000 pieces above 100,000 not to exceed \$1,366,890. The new penalties will be: \$34,731 for each mailing that is less than 50,000 pieces, \$69,463 for each mailing of 50,000 to 100,000 pieces, and an additional \$6,946 for each additional 10,000 pieces above 100,000 not to exceed \$1,389,252.

39 U.S.C. 3012(d)—Misleading References to the United States Government; Sweepstakes and Deceptive Mailings

Persons sending certain deceptive mail matter described in 39 U.S.C. 3001(h)–(k), including:

- Solicitations making false claims of Federal Government connection or approval;
- Certain solicitations for the purchase of a product or service that may be obtained without cost from the Federal Government;
- Solicitations containing improperly prepared “facsimile checks”; and
- Certain solicitations for “skill contests” and “sweepstakes” sent to individuals who, in accordance with 39 U.S.C. 3017(d), have requested that such materials not be mailed to them); may be liable to the United States for a civil penalty under 39 U.S.C. 3012(d). Currently, this penalty is not to exceed \$13,669 for each mailing. The new penalty will be \$13,893.

39 U.S.C. 3017(g)(2)—Commercial Use of Lists of Persons Electing Not To Receive Skill Contest or Sweepstakes Mailings

Under 39 U.S.C. 3017(g)(2), the Postal Service may impose a civil penalty against a person who provides

information for commercial use about individuals who, in accordance with 39 U.S.C. 3017(d), have elected not to receive certain sweepstakes and contest information. Currently, this civil penalty may not exceed \$2,733,780 per violation. The new penalty may not exceed \$2,778,505 per violation.

39 U.S.C. 3017(h)(1)(A)—Reckless Mailing of Skill Contest or Sweepstakes Matter

Currently, under 39 U.S.C. 3017(h)(1)(A), any promoter who recklessly mails nonmailable skill contest or sweepstakes matter may be liable to the United States in the amount of \$13,669 per violation for each mailing to an individual. The new penalty is \$13,893 per violation.

39 U.S.C. 3018(c)(1)(A)—Hazardous Material

Under 39 U.S.C. 3018(c)(1)(A), the Postal Service may impose a civil penalty payable into the Treasury of the United States on a person who knowingly mails nonmailable hazardous materials or fails to follow postal laws on mailing hazardous materials. Currently, this civil penalty is at least \$295, but not more than \$117,858 for each violation. The new penalty is at least \$300, but not more than \$119,786 for each violation.

List of Subjects in 39 CFR Part 233

Administrative practice and procedure, Banks, Banking, Credit, Crime, Infants and children, Law enforcement, Penalties, Privacy, Seizures and forfeitures.

For the reasons set out in this document, the Postal Service amends 39 CFR part 233 as follows:

PART 233—INSPECTION SERVICE AUTHORITY

- 1. The authority citation for 39 CFR part 233 continues to read as follows:

Authority: 39 U.S.C. 101, 102, 202, 204, 401, 402, 403, 404, 406, 410, 411, 1003, 3005, 3012, 3017, 3018; 12 U.S.C. 3401–3422; 18 U.S.C. 981, 983, 1956, 1957, 2254, 3061; 21 U.S.C. 881; Pub. L. 101–410, 104 Stat. 890; Omnibus Budget Reconciliation Act of 1996, sec. 662 (Pub. L. 104–208, 110 Stat. 3009–378); Pub. L. 106–168, 113 Stat. 1806; Pub. L. 114–74, 129 Stat. 584.

- 2. In § 233.12(a), remove “\$68,345” and add in its place “\$69,463”; remove “\$136,689” and add in its place “\$138,925”; remove “\$13,669” and add in its place “\$13,893”; remove “each piece above 100,000” and add in its place “each additional 10,000 pieces above 100,000”; remove “\$2,733,780” and add in its place “\$2,778,505”.

- 3. In § 233.12(b), remove “\$34,172” and add in its place “\$34,731”; remove “\$68,345” and add in its place “\$69,463”; remove “\$6,834” and add in its place “\$6,946”; remove “every” and add in its place “each”; remove “\$1,366,890” and add in its place “\$1,389,252”.

- 4. In § 233.12(c)(4), remove “\$13,669” and add in its place “\$13,893”.

- 5. In § 233.12(d), remove “\$2,733,780” and add in its place “\$2,778,505”.

- 6. In § 233.12(e), remove “\$13,669” and add in its place “\$13,893”.

- 7. In § 233.12(f), remove “\$295” and add in its place “\$300”; remove “\$117,858” and add in its place “\$119,786”.

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 721

[EPA–HQ–OPPT–2016–0207; FRL–9958–20]

RIN 2070–AB27

Significant New Use Rules on Certain Chemical Substances; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Partial withdrawal of direct final rule.

SUMMARY: EPA is withdrawing significant new use rules (SNURs) promulgated under the Toxic Substances Control Act (TSCA) for two chemical substances, which were the subject of premanufacture notices (PMNs). EPA published these SNURs using direct final rulemaking procedures, which requires EPA to take certain actions if a notice of intent to submit an adverse comment is received. EPA received notices of intent to submit adverse comments regarding the SNURs identified in this document. Therefore, the Agency is withdrawing the direct final rule SNURs identified in this document, as required under the direct final rulemaking procedures.

DATES: This document is effective January 19, 2017.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPPT–2016–0207, is available at <http://www.regulations.gov> or at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency

Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OPPT Docket is (202) 566-0280. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: For technical information contact: Kenneth Moss, Chemical Control Division (7405M) Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 564-9232; email address: moss.kenneth@epa.gov.

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave. Rochester, NY 14620; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

A list of potentially affected entities is provided in the **Federal Register** of November 17, 2015 (81 FR 1250) (FRL-9953-41). If you have questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

II. What direct final SNURs are being withdrawn?

In the **Federal Register** of November 17, 2015 (81 FR 1250), EPA issued direct final SNURs for the chemical substances that are identified in this document. These direct final SNURs were issued under the procedures in 40 CFR part 721, subpart D. Because the Agency received notices of intent to submit adverse comments, in accordance with § 721.160(c)(3)(ii), EPA is withdrawing the direct final SNURs issued for the following chemical substances, which were the subject of PMNs: bimodal mixture consisting of multi-walled carbon nanotubes and other classes of carbon nanotubes (generic), (PMN No. P-11-482); and carbon nanotubes (generic), (PMN No. P-15-54). EPA intends to publish proposed SNURs for the chemical substances identified in this document.

For further information regarding EPA's direct final rulemaking procedures for issuing SNURs, see 40 CFR part 721, subpart D, and the

Federal Register of July 27, 1989 (54 FR 31314).

III. Statutory and Executive Order Reviews

This action withdraws regulatory requirements that have not gone into effect and which contain no new or amended requirements. As such, the Agency has determined that this action will not have any adverse impacts, economic or otherwise. The statutory and Executive Order review requirements applicable to the direct final rule were discussed in the **Federal Register** of November 17, 2015 (81 FR 1250) (FRL-9953-41). Those review requirements do not apply to this action because it is a withdrawal and does not contain any new or amended requirements.

IV. Congressional Review Act (CRA)

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 9

Environmental protection, Reporting and recordkeeping requirements.

40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: January 9, 2017.

Maria J. Doa,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR chapter I is amended as follows:

PART 9—[AMENDED]

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.*, 136-136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601-2671; 21 U.S.C. 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.*, 1311, 1313d, 1314, 1318, 1321, 1326, 1330, 1342, 1344, 1345 (d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp. p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g-1, 300g-2, 300j-2, 300j-3, 300j-4, 300j-9, 1857 *et seq.*, 6901-6992k, 7401-7671q, 7542, 9601-9657, 11023, 11048.

§ 9.1 [Amended]

■ 2. In the table in § 9.1, under the undesignated center heading

"Significant New Uses of Chemical Substances," remove the entries for §§ 721.10927 and 721.10942.

PART 721—[AMENDED]

■ 3. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§ 721.10927 [Removed]

■ 4. Remove § 721.10927.

§ 721.10942 [Removed]

■ 5. Remove § 721.10942.

BILLING CODE 6560-50-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Docket No. CDC-2015-0006]

42 CFR Part 73

RIN 0920-AA59

Possession, Use, and Transfer of Select Agents and Toxins; Biennial Review of the List of Select Agents and Toxins and Enhanced Biosafety Requirements

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: In accordance with the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (the Bioterrorism Response Act), the Centers for Disease Control and Prevention (CDC) in the Department of Health and Human Services (HHS) has reviewed the list of biological agents and toxins that have the potential to pose a severe threat to public health and safety. Following the review, HHS has decided: Not to finalize the proposed changes to the list of select agents and toxins at this time; to finalize provisions to address toxin permissible limits and the inactivation of select agents; to finalize specific provisions to the section of the regulations addressing biosafety; and to clarify regulatory language concerning security, training, incident response, and records. In a companion document published in this issue of the **Federal Register**, the U.S. Department of Agriculture (USDA) has made parallel regulatory changes.

DATES: Effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Samuel S. Edwin, Director, Division of Select Agents and Toxins, Centers for Disease Control and Prevention, 1600

Clifton Road NE., MS-A46, Atlanta, Georgia 30329. Telephone: (404) 718-2000.

SUPPLEMENTARY INFORMATION: The preamble to this final rule is organized as follows:

- I. Executive Summary
- II. Changes to 42 CFR Part 73
 - A. Modifications to the List of HHS and Overlap Select Agents and Toxins
 - B. Responses to Other Proposed Changes
 - i. Definitions
 - ii. Inactivation of a Select Agent
 - iii. Toxins
 - iv. Exclusion Involving Patient Care
 - v. Exemptions for Select Agents and Toxins
 - vi. Registration
 - vii. Responsible Official
 - viii. Visitor Access to Select Agents and Toxins
 - ix. Security, Biosafety, and Incident Response Plans
 - x. Training
 - xi. Records
- III. Alternatives Considered
- IV. Required Regulatory Analyses
 - A. Executive Orders 12866 and 13563
 - B. The Regulatory Flexibility Act
 - C. Paperwork Reduction Act of 1995
 - D. E.O. 12988: Civil Justice Reform
 - E. E.O. 13132: Federalism
 - F. Plain Language Act of 2010
- V. References

I. Executive Summary

On February 27, 2015 we published an Advance Notice of Proposed Rulemaking (ANPRM) (80 FR 10656) that initiated the required biennial review and republication of the HHS list of select agents and toxins. The ANPRM solicited public comments regarding whether any biological agents and toxins should be added or removed from the HHS list of select agents and toxins based on the following criteria:

- (1) The effect on human health of exposure to the agent or toxin;
- (2) The degree of contagiousness of the agent or toxin, and the methods by which the agent or toxin is transferred to humans;
- (3) The availability and effectiveness of pharmacotherapies and immunizations to treat and prevent any illness resulting from infection by the agent or exposure to the toxin; and
- (4) Any other criteria, including the needs of children and other vulnerable populations that the commenter considered appropriate.

This notice also asked for public comment on whether HHS should remove the following agents from the HHS list of select agents and toxins: *Coxiella burnetii*, *Rickettsia prowazekii*, *Bacillus anthracis* Pasteur, *Brucella abortus*, *B. melitensis*, and *B. suis*.

On January 19, 2016, we published a Notice of Proposed Rulemaking (NPRM)

(81 FR 2805). The NPRM solicited public comments regarding whether any biological agents and toxins should be added or removed from the HHS list of select agents and toxins based on the same criteria used in ANPRM:

We also invited comments on the following:

(1) Methods that should be required to validate the rendering of a select agent non-viable or regulated nucleic acids that can produce infectious forms of any select agent virus as non-infectious;

(2) Proposed changes to the aggregate amount of toxin excluded from the requirements of the select agent regulations;

(3) Removal of Diacetoxyscirpenol (DAS) and T-2 from the list;

(4) Whether seven calendar days provides a sufficient amount of time for the entity to destroy or transfer a select agent or toxin after identification;

(5) Specific biosafety measures that should be required to prevent laboratory acquired infections (LAIs) or accidental release of the select agents and toxins from an entity into the community; and

(6) Alternative regulatory requirements that could be constructed such that a registered entity would know whether it had a theft or loss of a select agent or toxin without that registered entity first having “an accurate, current inventory for each select agent . . . held in long term storage.”

(7) Whether short, paralytic alpha-conotoxins containing the following amino acid sequence (X₁CCX₂PACGX₃X₄X₅X₆CX₇), *C. burnetii*, *R. prowazekii*, *B. anthracis* Pasteur, *B. abortus*, *B. melitensis*, and *B. suis* should be removed from the HHS list of select agents and toxins.

We received 22 public comments to the ANPRM and 35 public comments to the NPRM that addressed the composition of the HHS list of select agents and toxins. After carefully considering the technical input of subject matter experts, both within the Federal government and from public comments, and recommendations from Federal advisory groups, we have decided not to finalize the proposed changes to the list of select agents and toxins at this time. Upon further consideration, we may decide to finalize changes to the list at a future time.

This final rule makes the following changes to current regulations:

1. New provisions regarding the inactivation of select agents, specific biosafety requirements, and toxin requirements;

2. Other revisions to the regulations to clarify regulatory language concerning security, training, and records.

3. In addition, when HHS added *B. cereus* Biovar *anthracis* to the list of HHS select agents and toxins on September 14, 2016 by an interim final rule (81 FR 63138), we neglected to add the name of the agent to the immediate notification list for Tier 1 agents in sections 5 and 9 of the regulations. We are correcting that error in this final rule.

Costs of the Rule: The entities affected by this final rule include research and diagnostic facilities; Federal, State, and university laboratories; and private commercial and non-profit enterprises. The current regulations require registering for the possession, use, and transfer of select agents or toxins. In addition, the entity is currently required to ensure that the facility where the agent or toxin is housed has adequate biosafety and containment measures; that the physical security of the premises is adequate to prevent unauthorized access; that all individuals with approved access to select agents or toxins have the appropriate education, training, and/or experience to handle such agents or toxins; and that complete records concerning activities related to the select agents or toxins are maintained.

The HHS final rule will further reduce or minimize the risk of misuse of select agents and toxins that have the potential to pose a severe threat to human health. HHS recognizes that several of the required measures of the regulations may impose certain operational costs upon affected entities. Specifically, the rule will clarify that an entity must use a validated method to render a select agent non-viable or a regulated infectious nucleic acid sample non-infectious for future use. This means the method must be scientifically sound and produce consistent results each time it is used. Appropriate reporting and record keeping is required in order to mitigate threats to human health. In many cases, however, the affected entities already employ some or all of the required measures. Compliance costs actually incurred will therefore vary from one entity to the next.

While information on the specific changes that would need to occur at individual sites and the associated costs was not readily available during proposed rulemaking, some general observations regarding the potential costs were presented. These general cost observations can be found in the Regulatory Impact Analysis. Based on the current recordkeeping and reporting requirements, an additional 10 to 20 hours per year may be required by entities. At an imputed cost of \$33.40 per hour, this additional time

requirement per entity will total between \$334 and \$668 per year, or in total for all registered entities between \$80,000 and \$160,000.

Benefits: The objectives of the HHS final rule are to create a means of ensuring enhanced oversight in the transfer, storage, and use of select agents and toxins; clarify that an entity must use a validated method to render a select agent non-viable or a regulated

infectious nucleic acid sample non-infectious for future use; and require that entities in possession of such agents and toxins develop and implement effective means of biosafety, information security, and physical security. The overall benefit of the amended regulatory provisions will be a reduced likelihood of the accidental or intentional release of a select agent or

toxin; and the avoidance of human morbidity, mortality and the economic loss associated with such a release. The goal of the amended regulations is to enhance the protection of human health and safety.

II. Changes to 42 CFR Part 73

The table below describes the changes to the current regulation.

Section No.	Section title	Change
73.0	Applicability and related requirements	No changes.
73.1	Definitions	Adds definitions: Validated inactivation procedure and viability testing protocol.
73.2	Purpose and scope	No changes.
73.3	HHS select agents and toxins	Clarifies language to include addition of <i>B. cereus</i> Biovar <i>anthracis</i> and adds new paragraphs.
73.4	Overlap select agents and toxins	Clarifies language to include addition of <i>B. cereus</i> Biovar <i>anthracis</i> and adds new paragraphs.
73.5	Exemptions for HHS select agents and toxins	Clarifies language; redesignates paragraph; and adds new paragraph.
73.6	Exemptions for overlap select agents and toxins	Clarifies language; redesignates paragraph; and adds new paragraph.
73.7	Registration and related security risk assessments	Redesignates paragraphs; adds new paragraph.
73.8	Denial, revocation, or suspension of registration	No changes.
73.9	Responsible Official	Clarifies language to include addition of <i>B. cereus</i> Biovar <i>anthracis</i> and adds new paragraphs.
73.10	Restricting access to select agents and toxins; security risk assessments.	Clarifies language.
73.11	Security	Clarifies language and adds new paragraph.
73.12	Biosafety	Clarifies language.
73.13	Restricted experiments	No changes.
73.14	Incident response	Clarifies language.
73.15	Training	Clarifies language and adds new paragraph.
73.16	Transfers	Clarifies language.
73.17	Records	Clarifies language and adds new paragraph.
73.18	Inspections	No changes.
73.19	Notification of theft, loss, or release	No changes.
73.20	Administrative review	No changes.
73.21	Civil money penalties	No changes.

A. Modifications to the List of HHS and Overlap Select Agents and Toxins

We received 22 public comments to the ANPRM and 35 public comments to the NPRM that addressed the composition of the HHS list of select agents and toxins. After carefully considering the technical input of subject matter experts, both within the Federal government and from public comments, and recommendations from Federal advisory groups, we have decided not to finalize the proposed changes to the list of select agents and toxins at this time.

B. Responses to Other Proposed Changes

i. Definitions

It recently became clear that some inactivation protocols have failed to inactivate *B. anthracis* spores completely, as evidenced by inactivation failures that led to the inadvertent transfer of potentially live

B. anthracis samples by the Department of Defense in 2015. In response to this incident, new requirements were proposed to address the inactivation of select agents. We proposed adding definitions for the terms “inactivation” and “kill curve” to clarify the new inactivation provisions. As discussed below, we have removed the proposed requirement for a “kill curve,” and accordingly, we have also removed the proposed definition of “kill curve.”

To exclude a select agent or regulated nucleic acids that can produce infectious forms of any select agent virus from the requirements of the select agent regulations, an entity will need to subject the select agent or the nucleic acids to a validated inactivation procedure whose efficacy is confirmed through a viability testing protocol.

Commenters stated that additional definitions should be provided for “validated inactivation procedure,” “sterility testing protocol,” and “safety margin.” We agree with the commenters

and are defining the terms as described below. “Validated inactivation procedure” means “a procedure, whose efficacy is confirmed by data generated from a viability testing protocol, to render a select agent non-viable but allows the select agent to retain characteristics of interest for future use; or to render any nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use.”

Further, we have not included a separate definition for “inactivation” as it is now captured in the definition of “validated inactivation procedure.”

We have changed the proposed phrase “sterility testing protocol” to “viability testing protocol” and defined the latter as “a protocol to confirm the validated inactivation procedure by demonstrating the material is free of all viable select agent.” This change reflects the intent that the validated inactivation procedure, or the procedure for removal of viable select agents from material

containing select agents, must render the material non-viable (*i.e.*, unable to replicate). In addition, any nucleic acids that can produce infectious forms of any select agent virus must be rendered non-infectious for future use.

We are choosing to not define the term “safety margin” and have incorporated the concept of a performance standard instead.

The new definitions will help clarify the regulatory language found in 42 CFR 73.3, 73.4.

ii. Inactivation of a Select Agent

Historical inactivation failures by registered entities required us to focus on ways to increase the certainty that inactivated select agents intended for further use do not contain live agent. This is particularly important when the inactivation methods are tempered in order to avoid disrupting some of the physical characteristics of the agent. We proposed adding specific requirements to the exclusion sections of the regulations (42 CFR 73.3(d), 73.4(d)) to address the requirements for rendering select agents, nucleic acids that can produce infectious forms of any select agent virus, or extracts from select agents non-viable.

Sections 73.3(d)(2) (HHS select agents and toxins) and 73.4(d)(2) (Overlap select agents and toxins) both provide that a non-viable select agent is excluded from the requirements of the select agent regulations. We proposed that for a select agent to be non-viable or to render nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use, an entity must use a validated inactivation procedure. Commenters stated there is some confusion between inactivation validation requirements for moving materials to a lower containment level and inactivation validation requirements for waste disposal. We are clarifying that these provisions apply to a select agent that is inactivated for future use as a non-select agent and is not intended for material for waste disposal.

Many commenters stated that the focus on strengthening inactivation requirements was being driven by an incorrect public perception of recent procedural errors that occurred at federally run research laboratories. Without commenting on what is or might be the public's perception with regard to inactivation problems, we disagree with these comments because the focus on inactivation failures with select agents is based on the realization that past inactivation activities have proved to be inadequate.

We proposed that an entity would be required to develop a site-specific kill curve to identify conditions of inactivation for each select agent. Commenters stated that although the generation of kill curves is appropriate for inactivation procedures using heat, irradiation and filtration, it is not generally applicable to determining infectivity of nucleic acids. Commenters stated that for inactivation procedures where a “kill curve is not applicable, inactivation conditions are selected and then replicated to obtain 100% inactivation within a statistical certainty.”

We agree with the commenters and are withdrawing the proposal to require a kill curve and safety margin because these would not be applicable to all inactivation procedures. Further, the variety of agents and inactivation procedures makes it likely that prescriptive requirements would have unintended negative consequences on research. We are, nonetheless, finalizing requirements for a validated inactivation procedure and viability testing. We are requiring that for a select agent or regulated nucleic acid that can produce infectious forms of any select agent virus to be excluded from the requirements of the select agent regulations, an entity will be responsible for achieving a certain performance standard that is confirmed through a viability testing protocol. Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure. However, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains. Additional guidance regarding this performance standard has been developed and is available at www.selectagents.gov.

Many commenters asked HHS to state clearly if the standard for select agent inactivation is complete sterility (*i.e.*, not a single viable pathogen in the entire volume of an inactivated sample), a log reduction in viable pathogen titer, or the limit of detection of the assay. We agree that it is important to specify the intent of the performance standard. HHS recognizes the limits of detection of the viability testing procedures (related to the detection assay and the sampling of inactivated material) and expected run-to-run variation when following an inactivation procedure precisely precludes demonstrating full sterility of inactivated material. These sources of error must be considered when

establishing performance parameters for inactivation procedures. While complete sterility is not a feasible goal for material that is intended for further use, HHS expects that the risk of live agent in inactivated materials will be as low as realistically possible from both a safety and security perspective.

We proposed that entities subject representative samples of an inactivated select agent to a validated sterility testing protocol to ensure that the inactivation procedure has rendered the select agent non-viable. Commenters stated that it is not always practical to conduct validation on each sample that is inactivated. Often samples are in limited quantities and validation studies will leave very little or no sample for the experimental purpose. Commenters also stated that the requirement to subject representative samples to sterility testing using a validated protocol requires further clarification. Commenters stated that it is reasonable to require this type of testing when the inactivation procedure is first established and if any changes to the inactivation protocol are made. However, commenters stated that it cannot be reasonably done on each sample in laboratory research if the inactivation protocol has not changed. They stated that implementing such a requirement would waste specimens where limited volumes are available, would be costly in terms of technical time and resources, and is scientifically unjustified.

We agree with the commenters that the varied needs and conditions for inactivation preclude setting a specific standard for viability testing at this time. We have removed the proposed sterility testing requirement for select agents and nucleic acids that can produce infectious forms of any select agent virus and have incorporated this concept into the performance standard. The requirement to develop a validated inactivation procedure and subsequent validation data derived from viability testing will determine the extent of sampling required. This activity will provide the associated measures of uncertainty with the sampling protocol chosen.

We proposed adding exclusion requirements that extracts from a select agent could not be excluded from the requirements of the select agent regulations until an individual or entity met the following requirements: (1) Any extract is subjected to a process that removes all viable cells, spores, or virus particles; (2) any extract is subjected to a validated sterility testing protocol; (3) any viability of an extract that was subjected to a validated inactivation

protocol is reported to the Responsible Official (RO); and (4) any viability of a select agent or infectivity of regulated nucleic acids that can produce infectious forms of any select agent virus, previously assessed as inactive by their validated sterility testing protocol, is reported to APHIS or CDC.

Some commenters expressed concern with having to subject every extract from a select agent, such as nucleic acids, to sterility testing. We agree with the commenters and are replacing the term “extract” with “material containing a select agent” to clarify that the requirements apply to material containing a select agent such as serum or liquid culture where select agents are typically removed via filtration without a previous inactivation step. The term “extract” is commonly used in conjunction with nucleic acids extracted from a select agent. We are using the term “extract” in the final rule to reflect the application of two processing steps: An inactivation step to destroy the select agent (e.g., lysis of select agent) and then another step (such as filtration), to remove any remaining viable select agents. Extracts from a select agent (nucleic acids, antigens, lysates) would be subject to the performance standard for select agents in the new sections 3(d)(3) and 4(d)(3) of the select agent regulations that includes viability testing but does not necessarily require viability testing on every sample. The requirement to develop a validated inactivation procedure and subsequent validation data derived from viability testing will determine the extent of sampling required. However, material containing select agents, as opposed to extracts (e.g., nucleic acids, antigens, lysates), that is subjected to a process to remove all viable cells, spores, or virus particles would require viability testing on every sample prior to treating it as a non-select agent. The distinguishing feature between “material containing a select agent” and an extract from a select agent is that in the former the select agent will only be removed and in the latter the select agent will be destroyed before removal. The more stringent requirement for viability testing of all material containing a select agent where the select agent was removed is warranted because of the lack of select agent destruction which increases the risk of viable select agent remaining in the material.

We proposed that if there are strain-to-strain variations in resistance of a select agent to the inactivation procedure, then a specific kill curve must be developed for each strain that undergoes the inactivation procedure.

We received comments asking us to clarify language to specify under what circumstances strain-to-strain differences must be validated. Commenters also stated that this is an unnecessary use of resources especially when agents, based on their morphological characteristics, are susceptible to similar inactivating agents. Commenters suggested at a minimum the language should state that this requirement only applies when there are known strain-to-strain variations in resistance of a select agent to the inactivation procedure.

We agree with the commenters and added in the term “known” strain-to-strain variation and, as stated previously, have removed the kill curve requirement.

Commenters also inquired whether surrogate strains can be used to develop inactivation procedures. We agree with the commenters that surrogate strains known to possess equivalent properties with respect to inactivation as a select agent can be used to develop inactivation procedures. We have revised the requirement to include the provision that “Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure; however, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains.”

Commenters were concerned about performing viability testing on materials such as a single diagnostic sample that is determined to contain a select agent and where there is a limited amount of material with which to work. For example, consider an entity using a commercially available RNA extraction kit on a diagnostic sample to obtain RNA for sequencing, and the sample is identified to contain highly pathogenic avian influenza (HPAI). In this situation, the entire single sample would be used when trying to demonstrate that the inactivation procedure was effective. We agree with the commenters. As noted above, surrogate select agent strains that are known to possess equivalent properties with respect to inactivation as the select agent can be used to develop validated inactivation procedures. In this example, low pathogenic avian influenza (LPAI) could be used to validate the inactivation procedure for diagnostic samples that are identified as containing HPAI, if LPAI possesses equivalent properties with respect to inactivation as HPAI. In addition, we are clarifying that these

provisions do not apply to diagnostic samples until they are identified to contain a select agent and are inactivated for future use as a non-select agent.

Many commenters asked who would determine the validity of an inactivation protocol. The responsibility for this activity remains with the entity, which will allow for researchers to continue to develop new inactivation procedures. Entities retain the responsibility to evaluate their inactivation procedures, to include consideration of the biosafety and security risks posed by the inactivated material. The Federal Select Agent Program (FSAP) inspectors will verify that the entity has developed a validated inactivation procedure and may review validation data during an entity's inspection. We made no changes based on these comments.

Many commenters stated that the intent behind the annual review provisions was not clear. We agree with the commenters and modified the provisions to state that an entity “Review, and revise as necessary, each of the entity's validated inactivation procedures or viable agent removal method. The review must be conducted annually or after any change in Principal Investigator, change in the validated inactivation procedure or viable agent removal method, or failure of the validated inactivation procedure or viable agent removal method. The review must be documented and training must be conducted if there are any changes to the validated inactivation procedure, viable agent removal method, or viability testing protocol.” We made these changes because the annual review of an entity's validated inactivation procedures or viable agent removal method is key to a successful inactivation program. The annual review requirement does not necessarily involve revalidating inactivation procedures. This review could simply be the evaluation of the site-specific standard operating procedures for validated inactivation of select agents to ensure the inactivating conditions used and upper agent concentration limits found in validation data are consistent, and that entity staff are following the site-specific standard operating procedures for validated inactivation of select agents.

However, sometimes an entity will need to revalidate inactivation procedures during the annual review. For example, if the entity identifies that staff are not adhering to standard operating procedures for validated inactivation of select agents, or if the entity wants to deviate from the validated inactivation procedure, the

entity will need to revalidate the inactivation procedures during the annual review. Further, in this final rule, we have consolidated the review provisions into one provision, clarified that the reviews must be documented, and moved this provision into the requirements for the RO as they will be the individual responsible for these review activities.

Many commenters stated that the intent of the inactivation failure reporting requirements was not clear and reporting every inactivation failure to CDC or APHIS was burdensome. We agree with the commenters and have modified reporting requirements to require the RO to “Investigate to determine the reason for any failure of a validated inactivation procedure or any failure to remove viable agent from material. If the Responsible Official is unable to determine the cause of a deviation from a validated inactivation procedure or a viable agent removal method; or receives a report of any inactivation failure after the movement of material to another location, the Responsible Official must report immediately by telephone or email the inactivation failure or viable agent removal method failure to CDC or APHIS.” The intent of this modification is to create an environment at the entity where inactivation or select agent removal failures are investigated to determine the reason for the failure as opposed to merely re-subjecting the material to the inactivation or select agent removal method. It is the position of the FSAP that each failure represents either human error in conducting the validated procedure or an inadequate inactivation method or an inadequate select agent removal method if no human error can be discovered. Both situations demand careful attention by the entity to ensure training and/or reevaluation of the inactivation procedure in order to minimize the likelihood that the situation would reoccur in the future. The revised regulatory language only requires reporting of inactivation or select agent removal failures to FSAP when the RO cannot establish that the failure resulted from human error or when an entity receives a report of any inactivation failure after the movement of material to another location.

We also proposed that written records be kept for select agents that have been subjected to a procedure to render them non-viable, or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a procedure to render them incapable of producing infectious forms of any select agent virus. Some

commenters stated that the proposal was not clear how long these records must be kept and who is responsible for keeping these records. We made no changes based on these comments as these records are subject to the records retention requirement in section 17 of the select agent regulations and must be kept for three years by a registered individual or entity.

Some commenters asked about the conditions of submitting a waiver to the inactivation provisions of the select agent regulations. An entity may submit a request to FSAP to apply an alternative inactivation procedure. The entity is to provide justification regarding the alternative procedure including a description of what material is to be waived, the inactivation protocol and viability test to be used, validation data, and any other supporting information/references, such as scientific references. Accordingly, we revised the provision found in sections 3(d)(6) and 4(d)(6) to include information on how to apply for a waiver that reads “. . . To apply for such a determination a registered individual or entity must submit a written request and supporting scientific information to FSAP. A written decision granting or denying the request will be issued.” Additional guidance has been developed and is available at: www.selectagents.gov.

iii. Toxins

To ensure the language is consistent with the exclusion language found in 73.3(e) which describes the exclusion of toxins that have been modified to be *less* potent or toxic, we are making a technical change to the regulation and revising the terms “nonfunctional” toxin to “nontoxic” toxin and “functional form(s) of any of the toxins” to “toxic form(s) of any of the toxins.” This change is being made to clarify the intent of the regulations as the terms “nonfunctional” and “functional” are broad and have led to confusion. The intention behind the original provisions was to exclude toxins that can no longer exert their toxic effect and cause disease and regulate those that can. For example, Botulinum neurotoxin has three functional domains—binding domain, translocation domain and catalytic domain. Each functional domain solely can be manipulated such that the toxin is no longer toxic and does not cause diseases even though the other two domains may be functional.

Due Diligence

We are adding a more specific documentation requirement to the toxin exclusion provision found in section

73.3(d)(3)(i) of the select agent regulations to require the transferor of an unregulated amount of a select toxin to document the identity of the recipient and the legitimate need (*i.e.*, prophylactic, protective, bona fide research, or other peaceful purpose) claimed by the recipient. The name of the toxin and the total amount transferred must also be documented. Identity information of the person requesting and using the toxins must include the individual’s name, institution name, address, telephone number, and email address. We received one comment requesting to include language for transfers of toxins within an institution. We made no changes based on this comment because intra-entity transfers, where the sender and the recipient are covered by the same certificate of registration, are already addressed in section 17(3)(viii) of the regulations.

Toxin Permissible Limits

As proposed, we are increasing the toxin exclusion aggregate amounts. We received 10 comments supporting the increase in the toxin exclusion aggregate amounts. We received three general comments opposing the increase of the exclusion aggregate amounts and two additional comments opposing the increase of the ricin exclusion aggregate amount. One commenter stated that no changes were necessary. Another commenter had concerns regarding whether the risk assessment scenarios were relevant to the goal of reducing any significant harm able to be caused by illegitimate use of any lethal amounts of toxin. We are making no changes based on these comments.

DHS developed toxin parameters and attack scenarios for potential inhalation and ingestion exposures to select toxins to protect the homeland against the potential release of weaponized biological toxins. The DHS group analyzed a range of release sizes (in mg) for each select toxin in order to estimate the number of people that would be exposed to each toxin amount by ingestion of milk (using published TD[50] or LD[50]) and/or indoor inhalation (using published LD[50]). Revised toxin exclusion aggregate amounts were proposed based on the data generated by the models to expose <10 or <100 people by inhalation or ingestion to the LD[50] or TD[50] levels of toxin. A commenter stated that (1) the scenarios proposed appear to consider a high-consequence event or exposure to a given toxin and that the interpretation of what constitutes a high-consequence event or exposure is impacted not only in the number of people affected but in

the attention afforded by news media and the public and (2) a revision of these exclusion limits should also consider amounts that would be sufficient for research purposes. We are making no changes based on these comments because we do not believe the impact the news media may have if an exposure occurs is an appropriate consideration for the listing of a biological agent or toxin. Further, the consideration of amounts sufficient for research purposes is a subjective assessment as smaller academic laboratories have differing needs than an entity that is developing detection assays. The comments specific to ricin raised concerns that the increased exclusion aggregate amounts would increase the risk of (1) exposure to laboratory workers and (2) that individuals would have access to greater amounts of material to use for nefarious purposes. We are making no changes based on these comments. We do not agree that the increased permissible limits will increase the risk of laboratory worker exposure. The new proposed exclusion amount is less than an oral lethal dose for a single person weighing more than 50 kg, based on 20 mg/kg-body weight (Ref. 1), thus a single fatality would require consuming more than all of the ricin in the laboratory. Ricin does display a higher toxicity when administered intravenously or by inhalation, but these two routes of exposure require either injection or manipulation to generate particles capable of reaching the lower respiratory tract, respectively, two processes not likely to occur accidentally. Also, entities that produce ricin typically do so in liquid, as opposed to lyophilized powder formulations, thus decreasing the risk of ingestion or aerosol exposure. Additionally, the increased exclusion aggregate amounts would allow entities to more efficiently produce and store ricin preparations which are typically frozen in aliquots until the need to use the material arises. Finally, while increasing the permissible limits allows individuals with nefarious purposes access to greater amounts of toxin, we do not believe access to the revised amounts poses a severe threat to public health and safety based on the reasons stated above.

Toxins: Exclusion of an HHS Select Toxin Identified in an Original Food Samples and Clinical Samples

As proposed, we are excluding from the requirements of the regulations a select toxin identified in an original food sample and clinical samples. Original food samples and clinical

samples are those specimens that are submitted to laboratories for diagnosis or verification purposes to identify or verify a biological agent or toxin. For example, an original food sample could be a container of potato salad or juice. An original clinical sample could be serum or stool from a patient. Laboratories that test food and clinical samples for the presence of toxins generally do not know the level of toxin in a sample and do not extract and purify a toxin as part of their studies. Therefore, our proposal to exclude select toxin identified in an original food sample or clinical sample identified is consistent with the rationale for the current exclusion for animals exposed to toxins (42 CFR 73.3(d)(4)). This exclusion was based on recommendations by toxin subject matter experts. We received one comment that supported this exclusion.

Exclusion of Botulinum Neurotoxin Produced as a Byproduct

In the NPRM, we proposed to exclude all toxins that are only produced as a byproduct of a study of the toxin producing host organism so long as the toxin had not been intentionally collected, purified, or otherwise extracted, and the material containing the toxin was inactivated and properly disposed of within 30 days of the initiation of the culture. Based on the input from subject matter experts, the final regulatory language narrows the exception to only Botulinum neurotoxin produced as a byproduct in the study of Botulinum neurotoxin producing species of *Clostridium*. Work with that organism is already regulated, thus providing regulatory oversight of the material during the 30 day time frame, as opposed to an agent like *Staphylococcus aureus*, the organism that produces *Staphylococcal* enterotoxins, which is not regulated. One commenter stated that clarification was needed in the “exclusion of toxin produced as a by-product” and inquired whether this provision applies to material held in long term storage or cell lysates or culture supernatants kept for diagnostic or research purposes other than toxin work. Since the situations described by the commenter referred to material held in long term storage (longer than 30 days) this exclusion would not apply.

iv. Exclusion Involving Patient Care

To clarify how the select agent regulations apply to activities associated with the diagnosis and care for individuals infected with a select agent, we proposed that waste generated during the delivery of patient care is not

considered regulated under the select agent regulations. One commenter recommended that we define patient care as part of the diagnosis definition. Specifically, the commenter suggested we define diagnosis as “the analysis of specimens for the purpose of identifying or confirming the presence or characteristics of a select agent or toxin provided that such analysis is associated with the determination or provision of patient treatment in a patient care setting, or directly related to protecting the public health or safety, animal health or animal products, or plant health or plant products. Clinical or diagnostic specimen retention times as required for patient treatment are included within the determination of the point in time when patient care has concluded.” Another commenter stated “the challenges of differentiating between patient care and experimental research when treating infectious diseases are complex and nuanced and any effort to introduce regulation of medical care involving select agents and toxins has the potential to introduce inconsistencies and confusion.” The proposed exclusion language in the NPRM was “Waste generated during the delivery of patient care from a patient infected with a select agent that is decontaminated with a validated method within seven calendar days of the conclusion of patient care.” We revised the proposed language based on the two comments to state: “Waste generated during the delivery of patient care by health care professionals from a patient diagnosed with an illness or condition associated with a select agent, where such waste is, within seven days of the conclusion of patient care, decontaminated, or transferred for destruction in compliance with state and Federal regulations.”

We revised the proposed exemption language in 42 CFR 73.5(a)(3), and 42 CFR 73.6(a)(3) to provide that, unless otherwise directed by the HHS Secretary or APHIS Administrator, as appropriate, “the clinical or diagnostic specimens collected from a patient infected with a select agent are transferred in accordance with § 73.16 or destroyed on-site by a recognized sterilization or inactivation process within seven days after delivery of patient care by health care professionals has concluded.”

For specimens generated from the patient, the specimens are not subject to the select agent regulations for only the period that they are directly associated with the diagnosis. In accordance with sections five and six of the select agent regulations, within seven calendar days after identification, a specimen is subject to the select agent regulations

and must be transferred in accordance with section 73.16 or destroyed on-site by a recognized sterilization or inactivation process. Since the material would be excluded from the regulations, there would be no requirement to document the transfer or destructions. A specimen must be secured against theft, loss, or release during the period between identification and transfer or destruction, and any theft, loss, or release of the specimen must be reported. All specimens generated from the patient and kept more than seven days after acute patient care concludes would be subject to the select agent regulations.

v. Exemptions for Select Agents and Toxins

Informing Specimen Provider

Since a registered or reference laboratory typically confirms the identification of a select agent or toxin for public health and agriculture, we proposed to require that a registered or reference laboratory inform the specimen provider of the identification as a condition for a clinical or diagnostic laboratory to maintain their exemption under 42 CFR 73.5(a), and 42 CFR 73.6(a). Two commenters stated they did not believe basic good practices require regulations. We made no changes based on these comments because this provision will ensure that the reference laboratory notifies the specimen provider of the identification of the select agent or toxin. It is important that the specimen provider is aware that they are in possession of the agent or toxin and must meet the requirements outlined in 42 CFR 73.5, 73.6 (e.g., cannot maintain possession of the select agent or toxin, must destroy or get approval for a transfer, and report a theft, loss, or release).

Identification of Toxin

In the current select agent regulations, in order for clinical or diagnostic laboratories to maintain their exemption under 42 CFR 73.5(a), and 42 CFR 73.6(a), the clinical or diagnostic laboratory must, either immediately or within seven calendar days, report the identification of a select agent or toxin to APHIS or CDC unless directed otherwise by HHS Secretary or APHIS Administrator. In the NPRM, we proposed to amend the language in 42 CFR 73.5(a), and 42 CFR 73.6(a) to state: "Unless directed otherwise by the Secretary, within seven calendar days after identification of the select agent or toxin (except for Botulinum neurotoxin (BoNT) and/or Staphylococcal enterotoxins (Subtypes A–E)), or within

30 calendar days after identification of Botulinum neurotoxin and/or Staphylococcal enterotoxin (Subtypes A–E), the select agent or toxin is transferred in accordance with § 73.16 or destroyed on-site by a recognized sterilization or inactivation process." We sought comments concerning (1) the extension of the exemption time period to 30 days for BoNT and Staphylococcal enterotoxin (Subtypes A–E) to allow clinical and diagnostic laboratories sufficient time to complete their investigations without having to transfer or destroy the sample, and (2) whether seven calendar days provided sufficient amount of time for the entity to destroy or transfer other select agents or toxins after identification. We received one comment to extend the amount of time for other select agents or toxins to 10 calendar days since destruction may not occur on-site, therefore allowing the secure transport to the ultimate site of disposition. We made no changes to adjust the seven calendar day requirement for agents or toxins other than BoNT and Staphylococcal enterotoxin (Subtypes A–E) because the other agents or toxins do not involve the identification of both agent and toxin as part of diagnosis. Therefore, these situations are not as complicated and do not warrant additional time for reporting identification.

vi. Registration

We are codifying in regulation the current FSAP policy that an entity is required to meet all of the regulatory requirements for those select agents and toxins listed on an entity's registration regardless of whether the select agent or toxin is in the actual possession of an entity, and without regard to the actual amounts of toxins in the possession of an entity. We received no comments regarding this proposal and have made no changes to the language in the proposed rule.

vii. Responsible Official

Section 73.9(a)(6) of the select agent regulations currently states that the RO must ensure that an annual inspection is conducted for each laboratory where select agents and toxins are stored or used. This requirement also provides that the results of each inspection must be documented, and any deficiencies identified during an inspection must be corrected. We proposed adding a requirement that the RO must also document the corrective actions taken by the entity to address any identified deficiencies. We received one comment that supported this proposed requirement and are finalizing the requirement as proposed.

HHS or USDA Office of the Inspector General Hotline

In its December 2014 report, the Federal Experts Security Advisory Panel (FESAP) recommended adding a specific regulatory requirement addressing how individuals are informed of the availability of procedures for accessing the HHS or USDA Office of Inspector General Hotlines to anonymously report a safety or security concern. In response to that recommendation, we proposed adding a requirement that the RO must ensure that individuals at their entity are provided the contact information of the HHS Office of Inspector General Hotline and USDA Office of Inspector General Hotline so that an individual is able to anonymously report a biosafety or security concern related to select agents and toxins. We received no comments regarding this proposed addition and are finalizing the requirement as proposed.

viii. Visitor Access to Select Agents and Toxins

Section 73.10(e) of the select agent regulations currently provides that a person with a valid approval from the HHS Secretary or APHIS Administrator to have access to select agents and toxins may request, through his or her RO, that the HHS Secretary or APHIS Administrator provide their approved access status to another registered individual or entity for a specified period of time. This allows a person with approved access at a registered entity to have approved access to a select agent at another registered entity. To ensure that the RO of the entity hosting such a visitor is aware if a visiting individual loses access approval to select agents and toxins, we added a requirement that the RO at the home entity must immediately notify the RO of the visiting entity if a person's access to select agents or toxins has been terminated. We received one comment that supported this addition to the regulations and are finalizing the requirement as proposed.

ix. Security, Biosafety, and Incident Response Plans

The select agent regulations require a registered entity to develop and implement a number of plans in order to ensure the safety and security of the select agents and toxins they handle. These are:

- A security plan that provides for measures sufficient to safeguard a select agent or toxin against unauthorized access, theft, loss, or release (42 CFR 73.11);

- A biosafety plan that provides for measures sufficient to contain a select agent or toxin (42 CFR 73.12); and
- An incident response plan that provides for measures that the registered entity will implement in the event of theft, loss, or release of a select agent or toxin; inventory discrepancies; security breaches (including information systems); severe weather and other natural disasters; workplace violence; bomb threats and suspicious packages; and emergencies such as fire, gas leak, explosion, power outage, or others. (42 CFR 73.14).

The select agent regulations require that drills or exercises must be conducted at least annually to test and evaluate the effectiveness of the plans, and that the plans must be reviewed and revised, as necessary, after any drill or exercise, and after any incident. We proposed to require that these drills or exercises be documented to include how the drill or exercise tested and evaluated the plan, any problems identified and corrective actions that were taken, and the names of the individuals who participated in the drill or exercise. Three commenters stated that there was no need to codify the documentation of how a drill or exercise evaluated a plan and corrective actions in regulations because they believed this requirement is already being documented. We are making no changes based on the comments because this requirement will provide a more thorough accounting of required activities via testing and entity-directed improvements.

Another commenter requested clarification regarding the recording of the names of individuals who participate in drills or exercises. The commenter believed the requirement should be limited to registered entity personnel and not include first responders or other non-entity participants, but list only the participating external agencies (e.g., emergency management, emergency medical services, or fire department). We agreed with the commenter and have amended the proposed regulatory language to clarify that an entity only needs to document the names of individuals at the registered entity. An entity may choose to list the external agencies who participated in the drill or exercise.

Similar to the existing requirement for the security plan, we proposed to add a requirement that the biosafety and incident response plans be submitted for initial registration, renewal of registration, or when requested by FSAP. We received two comments regarding these proposals which

supported this requirement. However, one commenter questioned the need for additional requirements as this is already done routinely. While we agreed with the commenter that some, or even most, entities already provide the plans routinely, we are making no changes to the proposed language so that all entities will be required to submit their biosafety and incidence response plans, consistent with the existing requirement for the security plan.

Security

We proposed amending the requirement that a security plan contain a description of how the entity authorizes the means of entry into areas where select agents or toxins are stored or used, to add a requirement that the security plan must include a description of centralized access control management systems (e.g., keycards) and/or key management (e.g., mechanical keys). We proposed this requirement because during our inspections of registered entities we have observed that the central access control management system in some instances is controlled, either on- or off-site, by individuals who (1) have not received access approval from HHS Secretary or APHIS Administrator, and (2) have the ability to assign people access or override access controls without the knowledge of the entity's RO. Three commenters suggested that access management processes are sensitive and a greater security risk may result from having too detailed information available in a single document. One commenter recommended we include a definition of what an access control system is and what components need to be included in the security plan. After considering the comments and reconsidering the purpose of the proposed language, we are not finalizing the proposed revision. Our concerns about unauthorized persons either having access or granting access without the knowledge of the entity RO can be addressed by the current provisions found in subsections (c)(1) and (c)(2) of section 11 (security) of the select agent regulations, which make the RO responsible to ensure access controls, irrespective of the type of security system in place.

Paragraphs (d)(7)(i) through (d)(7)(v) of section 11 (security) of the select agent regulations encompass a list of events that individuals with access approval from the HHS Secretary or the APHIS Administrator must immediately report to the RO. We proposed to add a new requirement that the RO must be notified of any loss of computer, hard drive, or other data storage device

containing information that could be used to gain access to select agents or toxins. We received one comment requesting clarification on the time frame for notification. We made no changes based on the comment since the regulations under subsection (d) already provide that notification must be immediate. The notification will facilitate notification of the Federal Bureau of Investigation (FBI) if deemed necessary by the RO as the loss of such equipment may be criminal in nature.

Biosafety

We proposed amending the regulatory language in section 73.12 of the select agent regulations to update the name change of the National Institutes of Health (NIH) "Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules" (Ref. 2). We received no comments and are finalizing this change as proposed.

The biosafety section of the select agent regulations contains a reference to the Occupational Safety and Health Administration (OSHA) regulations found in 29 CFR 1910.1200 and 1910.1450. These sections provide specific requirements for handling hazardous chemicals in the laboratories. These regulations also provide recommendations for safely working with chemicals including toxins and give non-mandatory recommendations for prudent practices in laboratories handling chemical hazards. Since the current edition of the CDC/NIH "Biosafety in Microbiological and Biomedical Laboratories" Appendix I (Ref. 3) now provides guidelines for work with toxins of biological origin, we proposed removal of the reference to these OSHA regulations. We note, however, that regulated entities are still required to meet the OSHA regulatory requirements where applicable. We received no comments and are finalizing this change as proposed.

In the NPRM, we proposed adding the requirement that "biosafety and containment procedures specific to each registered laboratory must be available to each individual working in that laboratory." We proposed adding this language to ensure that laboratory personnel working with select agents and toxins have access to relevant biosafety information and are therefore aware of the risks associated with these agents. One commenter requested clarification regarding the term "laboratory" and whether the term referred to a single room or a building or to a group of rooms (e.g., laboratory, animal room, necropsy) used by a Principal Investigator for a research project. The commenter also requested

clarification on the language “must be available to each individual working in the laboratory” and whether this implied that there must be a specific biosafety manual for each room. We also received three comments that questioned the need for a new requirement since the commenters believe a laboratory-specific biosafety manual was already accessible to individuals. We are not adding the proposed provision to the regulations because upon further reflection we agree with the commenters that individuals already have access to their biosafety plan.

In the NPRM, we proposed adding specific provisions to the biosafety section that would require (1) a written risk assessment for each registered select agent or toxin; (2) written safety procedures to protect entity personnel, the public, and the environment from exposure to the select agent or toxin; (3) written decontamination procedures; and (4) written waste management procedures. We received 13 comments that stated that “risk assessments” should be defined and the proposed requirement of having these for each procedure involving a select agent or toxin that addresses the hazards associated with the agent or toxin must be clarified because risk assessments are completed through institutional review committees by collaborative processes with Principal Investigators and biosafety professionals. One commenter stated that a risk assessment was always a requirement. We agree with the commenters that “risk assessment for each procedure” should not be required and agreed that having a risk assessment was already addressed in the regulations as outlined in Section 12(a) that “An individual or entity required to register under this part must develop and implement a written biosafety plan that is commensurate with the risk of the select agent or toxin, given its intended use.” However, we have clarified in the final regulatory language found in section 12(a)(1) of the select agent regulations that the biosafety plan include “the hazardous characteristics of each agent or toxin listed on the entity’s registration and the biosafety risk associated with laboratory procedures related to the select agent or toxin.”

The majority of the commenters stated that the approach outlined in the NPRM discussion of section 12(a) would lead to decreased compliance and an increase in paperwork burden. One commenter stated that many biosafety plans are already upwards of 50 pages, and increasing the length further may greatly decrease the likelihood that

researchers will continue to read these plans and use them as a resource. Another commenter stated that regulatory language should be omitted to prevent creating a redundant process such as those provisions already covered under training and incident response. We agree with commenters and have removed the training and incident response language that was noted in the NPRM because these provisions are already covered by other sections in the regulations (*i.e.*, incident response and training sections). We combined other provisions to reduce the seven provisions listed in the NPRM to four provisions in the final rule.

One commenter stated we should consider requiring the adoption of shared algorithms developed by the American Society for Microbiology (ASM) for use by clinical laboratories. These algorithms are presented as frequently asked questions (FAQs) from ASM to assist laboratories. We made no changes based on this comment because FSAP already provides FAQs to assist entities with meeting the biosafety requirements of the regulations.

Another commenter recommended that we also offer the suggestion that entities consider implementing programs whereby personnel are required to work with another trained person (*i.e.*, a “buddy” system or dual authentication) as an appropriate and effective proactive method for the prevention of laboratory acquired infections and accidental releases of select agents. We made no changes based on this comment as it is essential for entities to develop their own biosafety initiatives to meet their own needs. The commenter continued that many of these issues come down to the culture of safety in an entity, and adherence to established protocols and training. The commenters wanted the regulatory provisions to reflect an improved safety culture. Two commenters requested that we consider leaving the current provisions in place and develop guidance to assist entities that would include risk assessment, use of safety equipment, personal protective equipment, containment devices, and occupational health consideration.

Another commenter stated that the new section appears redundant with the risk assessment(s) performed during review of work registrations by an Institutional Biosafety Committee. We agree with the commenters that the provisions focus on the hazards and risks associated with the select agents and toxins and the safety practices put in place by the entity to protect entity personnel, the public, and the environment. We have revised the proposed language to state

that the biosafety plan must include the provisions found in section 12(a) of the select agent regulations (see § 73.12(a)(1)–(4)). To address the commenters’ suggestion that FSAP develop a guidance document regarding biosafety, additional guidance has been developed and is available at: <http://www.selectagents.gov>.

x. Training

We proposed to amend section 15 of the select agent regulations to require that training be completed within 12 months of that individual’s anniversary of receiving access approval from the HHS Secretary or the APHIS Administrator, or prior to his or her entry into an area where any select agents and toxins are used or stored, whichever occurs first. This change is necessary in order to ensure that individuals at registered entities receive timely training. We received no specific comments regarding this proposed change. However, seven commenters stated that we should include a description of the level of training necessary for personnel in varying positions with highly disparate job duties and responsibilities. The commenters requested that we clarify that the required training will be conducted at a level appropriate to the registered person’s role and level of access to select agents. We made no changes based on this comment because the current regulatory language is clear that “the training must address the particular needs of the individual, the work they will do, and the risks posed by the select agents or toxins.” The training for the individuals should be determined by the entity based on at the level of which the individual will have access to select agents or toxins. The training that each person receives should be designed to ensure that they can carry out their responsibilities without causing harm to themselves, or to their fellow co-workers, or to the public. We did clarify the regulatory language regarding training for an individual who must be escorted to specify that their training must be accomplished prior to the individual’s entry into a registered area.

One commenter also asked that we consider making “training a pre-requisite for access to select agents and toxins, and not a requirement for just being FSAP approved.” The regulations in 42 CFR 73.15(a)(1) already requires that each approved individual receive information and training on biosafety, security (including security awareness), and incident response before that individual has access to any select agents and toxins. The same commenter

asked that we clearly specify the requirements for both initial and annual training. While we made no changes to our regulatory language based on this comment, the document, “Guidance for Meeting the Training Requirements of the Select Agent Regulations,” found at <http://www.selectagents.gov/guidance-training.html>, has been amended to provide further detail and assistance regarding the content of initial and annual training. The same commenter stated that in two instances an employee’s annual training deadline occurred in the middle of an extended medical leave during which it was not possible to complete the training, and the entity had to choose to either let the training become overdue, or to remove the individual from the registration and completely start over with the security risk assessment (SRA) approval process once the individual was back to work. The commenter stated that “SRA approved personnel could commonly be on other types of extended leave such as maternity leave, or on sabbatical doing research at another institution but still employed and SRA approved at their home institution.” While we made no changes to our regulatory language based on this comment, we have updated our guidance, “Guidance for Meeting the Training Requirements of the Select Agent Regulations,” which is available at www.selectagents.gov, to include information on how to deal with situations regarding individuals that have extended absences from the laboratory.

xi. Records

Based on our inspections of registered entities, we observed that not all entities maintain records of the final disposition of select agents when consumed or destroyed, and this impedes validation of inventory holdings. Section 73.17 of the select agent regulations currently does not include a requirement for documenting the final disposition of a select agent. To ensure the proper tracking of a select agent from acquisition to final disposition, we are adding a requirement for entity records to include the final disposition (including destruction) for each select agent that has been held in long-term storage. One commenter expressed concern that a requirement for a record of destruction of select agents would place an undue burden on investigators and recommended that this requirement be excluded from the final rule. However, the commenter did agree that an entity should be required to maintain a current and accurate inventory of all select agents in their possession and document when an agent is no longer in

their possession. We agree with the commenter that final disposition needs to be part of the entity’s recordkeeping requirement. We disagree with the commenter that this will place undue burden on investigators because this information can be included with an entity’s existing recordkeeping system (e.g., inventory spreadsheet). Therefore, to clarify the regulatory language, we have revised the proposed regulatory language to provide that the record will need to include “the select agent used, purpose of use, and, when applicable, final disposition.”

Section 73.17 of the select agent regulations currently states that records and databases need to be accurate. To ensure that the accuracy of handwritten records can be verified, we proposed to clarify that a handwritten record must be legible (*i.e.*, capable of being read). We received one comment requesting that we define the term “legible handwritten records.” We made no changes based on this comment because we are using the term “legible” in its ordinary meaning.

We proposed to expand the scope of records required to be maintained to include any records that contain information related to the requirements of the regulations. We received five comments that expressed concerns about the information being kept in laboratory notes. The commenters stated that the information is “proprietary in nature,” contains intellectual property information and should not be required to be provided to FSAP inspectors. We understand the concerns of the commenters and clarified the language to indicate that it is only information related to requirements of the select agent regulations that must be produced on request. Such information may be found in the biocontainment certifications, laboratory notebooks, institutional biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs. Accordingly, we will only review relevant portions of any laboratory notebooks or documents, and only if they contain information related to any requirements of the regulations under sections 73.5, 73.7, 73.9, 73.11, 73.12, 73.14, 73.15, 73.16, 73.17, and 73.19 of the select agent regulations. Two commenters stated that certain records are “protected under the HIPAA Privacy Rule.” FSAP would expect any information provided to FSAP regarding an individual’s health would be provided in accord with the HIPAA Privacy Rule, including the use and disclosure of protected health information to public health authorities

authorized by law to collect or receive such information for preventing or controlling disease, injury, or disability.

Records for Long-Term Storage

In the NPRM we also solicited information and ideas as to how a regulatory requirement could be constructed such that a registered entity would know whether a select agent or toxin had been lost or stolen, without that registered entity first having “an accurate, current inventory for each select agent . . . held in long-term storage.” In addition, we requested ideas as to how the current regulations could be amended to address the threat of the theft of a select agent from a container held in long-term storage. We received three comments that addressed this request. One commenter suggested that FSAP inspectors review the record of select agents held in long-term storage and accept the attestation of the responsible investigators of their accuracy. Another commenter stated we should continue with FSAP’s current select agent practices to allow for these stocks to be maintained in tamper-evident containers (e.g., security ties on freezer boxes) so that vials are not individually removed, thawed, and measured. The third commenter recommended dual authentication coupled with required entity inventory reviews. We appreciate the comments and will continue to consider how the recognition of theft and loss might be addressed through alternative approaches.

III. Alternatives Considered

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 requires HHS and USDA to review and republish the list of select agents and toxins every two years. In drafting this final rule, we considered the action proposed in the NPRM of removing the six select agents and one toxin where its costs and benefits were discussed. If those policies were adopted, it would result in savings ranging from approximately \$15,300 for a small commercial BSL–3 laboratory to approximately \$165,000 for a larger university with BSL–2/3 laboratories for laboratories no longer regulated. Based on the review of FSAP database, approximately eleven small entities would no longer be regulated and would not be required to register with FSAP. If the entities withdrew their registration, it would result in an estimated saving of \$168,300 annually. On the other hand, this policy could increase the likelihood of entities working with these removed select agents and toxin not having the

appropriate biosafety and security provisions in place to prevent an accidental or intentional release of a select agent or toxin. The intentional release could adversely affect the public health and safety. Recent events concerning the accidental transfer of select agents that had not been fully inactivated, leading to the inadvertent release of select agents, caused us to also look at provisions in this regulation. After carefully considering the technical input of subject matter experts, both within the Federal government and from public comments, and recommendations from Federal advisory groups, we have decided not to finalize the proposed changes to the list of select agents and toxins at this time.

IV. Required Regulatory Analyses

A. Executive Orders 12866 and 13563

Under Executive Order (E.O.) 12866, Regulatory Planning and Review (58 FR 51735, October 4, 1993), CDC is required to determine whether this regulatory action would be “significant” and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Orders (E.O.). E.O. 12866 defines “significant regulatory action” as any regulatory action that is likely to result in a rule that may:

- Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;
- Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients; or,
- Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in E.O. 12866.

E.O. 13563, Improving Regulation and Regulatory Review, (76 FR 3821, January 21, 2011), updates some of the provisions of E.O. 12866 in order to promote more streamlined regulatory actions. This E.O. charges, in part, that, while protecting “public health, welfare, safety, and our environment” that regulations must also “promote predictability and reduce uncertainty” in order to promote economic growth. Further, regulations must be written in plain language and be easy to understand.

We have prepared an economic analysis for this rule. The economic analysis provides a cost-benefit analysis, as required by E.O. 12866, and a final regulatory flexibility analysis (See Section III.B. of this Preamble) that examines the potential economic effects of this rule on small entities, as required by the Regulatory Flexibility Act. The economic analysis is summarized below. Copies of the full analysis are available in the docket at www.regulations.gov or at www.selectagents.gov.

We have determined that this final rule is significant for the purposes of Executive Order 12866 and, therefore, this final rule has been reviewed by OMB.

Summary of the Regulatory Impact Analysis

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Pub. L. 107–188) provides for the regulation of certain biological agents and toxins that have the potential to pose a severe threat to human, animal, or plant health, or to animal or plant products. APHIS and CDC have primary responsibility for implementing the provisions of the Act within the Department of Agriculture and the Department of Health and Human Services, respectively. Within APHIS, Veterinary Services (VS) select agents and toxins are those that have been determined to have the potential to pose a severe threat to animal health or animal products, and Plant Protection and Quarantine (PPQ) select agents and toxins are those that have been determined to have the potential to pose a severe threat to plant health or plant products. HHS select agents and toxins are those that have been determined to have the potential to pose a severe threat to human health. APHIS and CDC coordinate regulatory activities for overlap select agents and toxins that have been determined to pose a severe threat to human and animal health or products.

Sections 201 and 212(a)(2) of the Act require a biennial review and republication of the select agent and toxin list, with revisions as appropriate in accordance with this law. These final rules will implement the recommendations of the fourth biennial review of select agent regulations and have finalized changes that will increase their usability as well as provide for enhanced program oversight. These amendments include new provisions regarding the inactivation of select agents, specific biosafety and toxin requirements and clarification of

regulatory language concerning security, training, and records.

The final rule will require that entities develop validated inactivation procedures for select agents or regulated infectious nucleic acid and maintain written records of having done so. Costs of complying with this amendment are expected to be modest.

Currently, there are 286 entities registered with APHIS and CDC including 91 academic, 53 commercial, 81 State government, 45 Federal government, and 16 private (non-profit) institutions, most of which are considered to be small entities. Based on current record keeping and reporting requirements, an additional 10 to 20 hours per year may be required for maintaining records associated with select agents or material containing select agents or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a validated inactivation procedure or a procedure for removal of viable select agents. At an imputed cost of \$33.40 per hour (GS–12, step 2), this additional time requirement per entity will cost between \$334 and \$668 per year, or in total for all registered entities between \$80,000 and \$160,000. The final rule will not have a significant economic impact on a substantial number of small entities. Costs associated with this rule do not include costs related to training, overhead, updates to facilities, etc. We assume in this rule that all costs associated with such factors for entities performing inactivation procedures have already been incurred prior to rulemaking.

The benefits of strengthened safeguards against the unintentional or deliberate release of a select agent or toxin greatly exceed compliance costs of the rules. As an example of losses that can occur, the October 2001 anthrax attacks caused five fatalities and 17 illnesses, disrupted business and government activities (including \$2 billion in lost revenues for the Postal Service), and required more than \$23 million to decontaminate one Senate office building and \$3 billion to decontaminate postal facilities and procure mail-sanitizing equipment. Deliberate introduction greatly increases the probability of a select agent becoming established and causing wide-ranging and devastating impacts to the economy, other disruptions to society, and diminished confidence in public and private institutions.

The amended regulations will enhance the protection of human, animal, and plant health and safety. The final rules will reduce likelihood of the accidental or intentional release of a

select agent or toxin. Benefits of the rules will derive from the greater probability that a release will be prevented from occurring.

B. The Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA)

We have examined the impacts of the proposed rule under RFA (5 U.S.C. 601–612). Unless we certify that the proposed rule is not expected to have a significant economic impact on a substantial number of small entities, RFA, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA), requires agencies to analyze regulatory options that would minimize any significant economic impact of a rule on small entities. We certify that this proposed rule will not have a significant economic impact on a substantial number of small entities within the meaning of the RFA because these registered entities are already required to comply with the select agent regulations. The small entities would only incur some costs if they are performing inactivation procedures and are not maintaining records. The additional costs that may be incurred are small in comparison to the long-term benefits of additional protection against the release of select agents and toxins that would result in devastating effects to the economy.

This regulatory action is not a major rule as defined by Sec. 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This proposed rule will not result in an annual effect on the economy of \$100,000,000 or more; a major increase in cost or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

C. Paperwork Reduction Act of 1995

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), CDC has determined that the Paperwork Reduction Act does apply to information collection and recordkeeping requirements included in this rule. We note that the information collection and recordkeeping requirements are already approved by the Office of Management and Budget (OMB) under OMB Control Number 0920–0576 (Possession, Use, and Transfer of Select Agents and Toxins (42 CFR 73), Expiration 12/31/2018).

D. E.O. 12988: Civil Justice Reform

This rule has been reviewed under E.O. 12988, Civil Justice Reform. Once the final rule is in effect, CDC notes that: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) No retroactive effect will be given to this rule; and (3) Administrative proceedings will not be required before parties may file suit in court challenging this rule.

E. E.O. 13132: Federalism

HHS/CDC has reviewed this final rule in accordance with E.O. 13132 regarding Federalism, and has determined that it does not have “federalism implications.” The rule does not “have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.”

F. Plain Language Act of 2010

Under the Plain Language Act of 2010 (Pub. L. 111–274, October 13, 2010), executive Departments and Agencies are required to use plain language in documents that explain to the public how to comply with a requirement the Federal Government administers or enforces. HHS/CDC has attempted to use plain language in promulgating this rule consistent with the Federal Plain Writing Act guidelines.

List of Subjects in 42 CFR Part 73

Biologics, Packaging and containers, Penalties, Reporting and recordkeeping requirements, and Transportation.

For the reasons discussed in the preamble, we amend 42 CFR part 73 as follows:

PART 73—SELECT AGENTS AND TOXINS

- 1. The authority citation for part 73 continues to read as follows:

Authority: 42 U.S.C. 262a; sections 201–204, 221 and 231 of Title II of Public Law 107–188, 116 Stat 637 (42 U.S.C. 262a).

- 2. Section 73.1 is amended by adding in alphabetical order, definitions of *validated inactivation procedure* and *viability testing protocol* to read as set forth below.

§ 73.1 Definitions.

* * * * *

Validated inactivation procedure means a procedure, whose efficacy is confirmed by data generated from a viability testing protocol, to render a select agent non-viable but allows the select agent to retain characteristics of interest for future use; or to render any nucleic acids that can produce infectious forms of any select agent virus non-infectious for future use.

* * * * *

Viability testing protocol means a protocol to confirm the validated inactivation procedure by demonstrating the material is free of all viable select agent.

* * * * *

- 3. Section 73.3 is amended as follows:
- a. By revising paragraph (b).
- b. By removing “functional” and adding in its place “toxic” in paragraph (c)(2).
- c. By revising paragraph (d)(2).
- d. By redesignating paragraph (d)(3) as (d)(7) and revising redesignated paragraphs (d)(7) introductory text and (d)(7)(i).
- e. By redesignating paragraph (d)(4) as paragraph (d)(8).
- f. By redesignating paragraph (d)(5) as paragraph (d)(12).
- g. By adding new paragraphs (d)(3), (d)(4), (d)(5), (d)(6), (d)(9), (d)(10) and (d)(11).
- h. By adding paragraph (e)(3).
- i. By adding “*Bacillus cereus* Biovar *anthracis*,” before “*Botulinum neurotoxins*” in paragraph (f)(3)(i).

The additions and revisions read as follows:

§ 73.3 HHS select agents and toxins.

* * * * *

- (b) HHS select agents and toxins:

Abrin

Bacillus cereus Biovar *anthracis**

*Botulinum neurotoxins**

Botulinum neurotoxin producing species of *Clostridium**

Conotoxins (Short, paralytic alpha conotoxins containing the following

amino acid sequence
 $X_1CCX_2PACGX_3X_4X_5X_6CX_7$)¹
Coxiella burnetii
 Crimean-Congo hemorrhagic fever virus
 Diacetoxyscirpenol
 Eastern equine encephalitis virus
 Ebola virus*
*Francisella tularensis**
 Lassa fever virus
 Lujo virus
 Marburg virus*
 Monkeypox virus
 Reconstructed replication competent
 forms of the 1918 pandemic influenza
 virus containing any portion of the
 coding regions of all eight gene
 segments (Reconstructed 1918
 influenza virus)
 Ricin
Rickettsia prowazekii
 SARS coronavirus (SARS-CoV)
 Saxitoxin
 South American hemorrhagic fever
 viruses:
 Chapare
 Guanarito
 Junin
 Machupo
 Sabia
 Staphylococcal enterotoxins (subtypes
 A–E)
 T–2 toxin
 Tetrodotoxin
 Tick-borne encephalitis virus
 Far Eastern subtype
 Siberian subtype
 Kyasanur Forest disease virus
 Omsk haemorrhagic fever virus
 Variola major virus (Smallpox virus)*
 Variola minor virus (Alastrim)*
*Yersinia pestis**

* * * * *

(d) * * *

(2) Non-viable HHS select agents or
 nontoxic HHS toxins.

(3) A select agent or toxin that has
 been subjected to decontamination or a
 destruction procedure when intended
 for waste disposal.

(4) A select agent or regulated nucleic
 acids that can produce infectious forms
 of any select agent virus that has been
 subjected to a validated inactivation

procedure that is confirmed through a
 viability testing protocol. Surrogate
 strains that are known to possess
 equivalent properties with respect to
 inactivation can be used to validate an
 inactivation procedure; however, if
 there are known strain-to-strain
 variations in the resistance of a select
 agent to an inactivation procedure, then
 an inactivation procedure validated on
 a lesser resistant strain must also be
 validated on the more resistant strains.

(5) Material containing a select agent
 that is subjected to a procedure that
 removes all viable select agent cells,
 spores, or virus particles if the material
 is subjected to a viability testing
 protocol to ensure that the removal
 method has rendered the material free of
 all viable select agent.

(6) A select agent or regulated nucleic
 acids that can produce infectious forms
 of any select agent virus not subjected
 to a validated inactivation procedure or
 material containing a select agent not
 subjected to a procedure that removes
 all viable select agent cells, spores, or
 virus particles if the material is
 determined by the HHS Secretary to be
 effectively inactivated or effectively
 removed. To apply for a determination
 an individual or entity must submit a
 written request and supporting
 scientific information to CDC. A written
 decision granting or denying the request
 will be issued.

(7) Except as required in § 73.16(l),
 the aggregate amount of the toxin under
 the control of a principal investigator,
 treating physician or veterinarian, or
 commercial manufacturer or distributor
 does not, at any time, exceed the
 following amounts: 1000 mg of Abrin; 1
 mg of Botulinum neurotoxins; 100 mg of
 Conotoxins (Short, paralytic alpha
 conotoxins containing the following
 amino acid sequence
 $X_1CCX_2PACGX_3X_4X_5X_6CX_7$); 10,000 mg
 of Diacetoxyscirpenol; 1000 mg of Ricin;
 500 mg of Saxitoxin; 100 mg of
 Staphylococcal enterotoxins (subtypes
 A–E); 10,000 mg of T–2 toxin; or 500 mg
 of Tetrodotoxin. Provided that,

(i) The toxin is transferred only after
 the transferor uses due diligence and
 documents the identification of the
 recipient and the legitimate need (e.g.,
 prophylactic, protective, bona fide
 research, or other peaceful purpose)
 claimed by the recipient to use such
 toxin. Information to be documented
 includes, but is not limited to, the
 recipient identity information,
 including the recipient's name,
 institution name, address, telephone
 number and email address; name of the
 toxin and the total amount transferred;
 and the legitimate need claimed by the
 recipient. Notwithstanding the

provisions of paragraph (d) of this
 section, the HHS Secretary retains the
 authority to, without prior notification,
 inspect and copy or request the
 submission of the due diligence
 documentation to the CDC.

* * * * *

(9) An HHS select toxin identified in
 an original food sample or clinical
 sample.

(10) For those laboratories that are not
 exempt under § 73.5(a) and § 73.6(a),
 Botulinum neurotoxin that is produced
 as a byproduct in the study of
 Botulinum neurotoxin producing
 species of *Clostridium* so long as the
 toxin has not been intentionally
 cultivated, collected, purified, or
 otherwise extracted, and the material
 containing the toxin is rendered non-
 toxic and disposed of within 30 days of
 the initiation of the culture.

(11) Waste generated during the
 delivery of patient care by health care
 professionals from a patient diagnosed
 with an illness or condition associated
 with a select agent, where that waste is
 decontaminated or transferred for
 destruction by complying with state and
 Federal regulations within seven
 calendar days of the conclusion of
 patient care.

(e) * * *

(3) An individual or entity may make
 a written request to the HHS Secretary
 for reconsideration of a decision
 denying an application for the exclusion
 of an attenuated strain of a select agent
 or a select toxin modified to be less
 potent or toxic. The written request for
 reconsideration must state the facts and
 reasoning upon which the individual or
 entity relies to show the decision was
 incorrect. The HHS Secretary will grant
 or deny the request for reconsideration
 as promptly as circumstances allow and
 will state, in writing, the reasons for the
 decision.

* * * * *

■ 4. Section 73.4 is amended as follows:

■ a. By revising paragraph (b).

■ b. By removing “functional” and
 adding in its place “toxic” in paragraph
 (c)(2).

■ c. By revising paragraph (d)(2).

■ d. By redesignating paragraph (d)(3) as
 (d)(9).

■ e. By adding new paragraphs (d)(3),
 (d)(4), (d)(5), (d)(6), (d)(7) and (d)(8).

■ f. By adding paragraph (e)(3).

The revision and additions read as
 follows:

§ 73.4 Overlap select agents and toxins.

* * * * *

(b) Overlap select agents and toxins:

Bacillus anthracis *

Bacillus anthracis Pasteur strain

¹ C = Cysteine residues are all present as
 disulfides, with the 1st and 3rd Cysteine, and the
 2nd and 4th Cysteine forming specific disulfide
 bridges; The consensus sequence includes known
 toxins α -MI and α -GI (shown above) as well as α -
 GIA, Ac1.1a, α -CnIA, α -CnIB; X1 = any amino
 acid(s) or Des-X; X2 = Asparagine or Histidine; P
 = Proline; A = Alanine; G = Glycine; X3 = Arginine
 or Lysine; X4 = Asparagine, Histidine, Lysine,
 Arginine, Tyrosine, Phenylalanine or Tryptophan;
 X5 = Tyrosine, Phenylalanine, or Tryptophan; X6
 = Serine, Threonine, Glutamate, Aspartate,
 Glutamine, or Asparagine; X7 = Any amino acid(s)
 or Des X and; “Des X” = “an amino acid does not
 have to be present at this position.” For example
 if a peptide sequence were XCCHPA then the
 related peptide CCHPA would be designated as Des-
 X.

Brucella abortus
Brucella melitensis
Brucella suis
Burkholderia mallei *
Burkholderia pseudomallei *
Hendra virus
Nipah virus
Rift Valley fever virus
Venezuelan equine encephalitis virus
* * * * *

(d) * * *

(2) Non-viable overlap select agents or nontoxic overlap toxins.

(3) A select agent or toxin that has been subjected to decontamination or a destruction procedure when intended for waste disposal.

(4) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus that has been subjected to a validated inactivation procedure that is confirmed through a viability testing protocol. Surrogate strains that are known to possess equivalent properties with respect to inactivation can be used to validate an inactivation procedure; however, if there are known strain-to-strain variations in the resistance of a select agent to an inactivation procedure, then an inactivation procedure validated on a lesser resistant strain must also be validated on the more resistant strains.

(5) Material containing a select agent that is subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is subjected to a viability testing protocol to ensure that the removal method has rendered the material free of all viable select agent.

(6) A select agent or regulated nucleic acids that can produce infectious forms of any select agent virus not subjected to a validated inactivation procedure or material containing a select agent not subjected to a procedure that removes all viable select agent cells, spores, or virus particles if the material is determined by the HHS Secretary or Administrator to be effectively inactivated or effectively removed. To apply for a determination an individual or entity must submit a written request and supporting scientific information to CDC or APHIS. A written decision granting or denying the request will be issued.

(7) An overlap select toxin identified in an original food sample or clinical sample.

(8) Waste generated during the delivery of patient care by health care professionals from a patient diagnosed with an illness or condition associated with a select agent, where that waste is decontaminated or transferred for destruction by complying with state and

Federal regulations within seven calendar days of the conclusion of patient care.

* * * * *

(e) * * *

(3) An individual or entity may make a written request to the HHS Secretary or Administrator for reconsideration of a decision denying an application for the exclusion of an attenuated strain of a select agent or a select toxin modified to be less potent or toxic. The written request for reconsideration must state the facts and reasoning upon which the individual or entity relies to show the decision was incorrect. The HHS Secretary or Administrator will grant or deny the request for reconsideration as promptly as circumstances allow and will state, in writing, the reasons for the decision.

* * * * *

■ 5. Section 73.5 is amended as follows:

■ a. By revising paragraph (a)(1).

■ b. By redesignating paragraph (a)(3) as paragraph (a)(4) and revising newly redesignated paragraph (a)(4).

■ c. By adding new paragraph (a)(3).

■ d. By adding “*Bacillus cereus* Biovar *anthracis*,” before “*Botulinum neurotoxins*” in paragraph (a)(3)(i).

The revisions and addition read as follows:

§ 73.5 Exemptions for HHS select agents and toxins.

(a) * * *

(1) Unless directed otherwise by the HHS Secretary, within seven calendar days after identification of the select agent or toxin (except for *Botulinum neurotoxin* and/or *Staphylococcal enterotoxin* (Subtypes A–E)), or within 30 calendar days after identification of *Botulinum neurotoxin* and/or *Staphylococcal enterotoxin* (Subtypes A–E), the select agent or toxin is transferred in accordance with § 73.16 or destroyed on-site by a recognized sterilization or inactivation process,

* * * * *

(3) Unless otherwise directed by the HHS Secretary, the clinical or diagnostic specimens collected from a patient infected with a select agent are transferred in accordance with § 73.16 or destroyed on-site by a recognized sterilization or inactivation process within seven calendar days after delivery of patient care by health care professionals has concluded, and

(4) The identification of the agent or toxin is reported to CDC or APHIS, the specimen provider, and to other appropriate authorities when required by Federal, State, or local law by telephone, facsimile, or email. This report must be followed by submission

of APHIS/CDC Form 4 to APHIS or CDC within seven calendar days after identification.

* * * * *

■ 6. Section 73.6 is amended as follows:

■ a. By redesignating paragraph (a)(3) as paragraph (a)(4) and revising newly redesignated paragraph (a)(4).

■ b. By adding new paragraph (a)(3).

The revision and addition read as follows:

§ 73.6 Exemptions for overlap select agents and toxins.

(a) * * *

(3) Unless otherwise directed by the HHS Secretary or Administrator, the clinical or diagnostic specimens collected from a patient infected with a select agent are transferred in accordance with § 73.16 or destroyed on-site by a recognized sterilization or inactivation process within seven calendar days after delivery of patient care by health care professionals has concluded, and

(4) The identification of the agent or toxin is reported to CDC or APHIS, the specimen provider, and to other appropriate authorities when required by Federal, State, or local law by telephone, facsimile, or email. This report must be followed by submission of APHIS/CDC Form 4 to APHIS or CDC within seven calendar days after identification.

* * * * *

■ 7. Section 73.7 is amended as follows:

■ a. By redesignating paragraphs (b) through (k) as paragraphs (c) through (l), respectively.

■ b. By adding a new paragraph (b) to read as follows:

§ 73.7 Registration and related security risk assessments.

* * * * *

(b) As a condition of registration, each entity is required to be in compliance with the requirements of this part for select agents and toxins listed on the registration regardless of whether the entity is in actual possession of the select agent or toxin. With regard to toxins, the entity registered for possession, use or transfer of a toxin must be in compliance with the requirements of this part regardless of the amount of toxin currently in its possession.

* * * * *

■ 8. Section 73.9 is amended as follows:

■ a. In paragraph (a)(6) by removing “laboratory” and adding in its place “registered space” and adding “and the corrections documented” after “corrected” at the end of the sentence.

■ b. By adding paragraphs (a)(7), (a)(8) and (a)(9) to read as set forth below.

■ c. By adding “*Bacillus cereus* Biovar *anthracis*,” after “*Bacillus anthracis*,” in paragraph (c)(1).

§ 73.9 Responsible Official.

(a) * * *

(7) Ensure that individuals are provided the contact information for the HHS Office of Inspector General Hotline and the USDA Office of Inspector General Hotline so that they may anonymously report any biosafety or security concerns related to select agents and toxins.

(8) Investigate to determine the reason for any failure of a validated inactivation procedure or any failure to remove viable select agent from material. If the Responsible Official is unable to determine the cause of a deviation from a validated inactivation procedure or a viable select agent removal method; or receives a report of any inactivation failure after the movement of material to another location, the Responsible Official must report immediately by telephone or email the inactivation or viable agent removal method failure to CDC or APHIS.

(9) Review, and revise as necessary, each of the entity's validated inactivation procedures or viable select agent removal methods. The review must be conducted annually or after any change in Principal Investigator, change in the validated inactivation procedure or viable select agent removal method, or failure of the validated inactivation procedure or viable select agent removal method. The review must be documented and training must be conducted if there are any changes to the validated inactivation procedure, viable select agent removal method, or viability testing protocol.

* * * * *

■ 9. Section 73.10 is amended as follows:

■ a. By a sentence to the end of paragraph (e) to read as follows:

§ 73.10 Restricting access to select agents and toxins; security risk assessments.

* * * * *

(e) * * * A Responsible Official must immediately notify the Responsible Official of the visited entity if the person's access to select agents and toxins has been terminated.

* * * * *

■ 10. Section 73.11 is amended as follows:

■ a. In paragraph (c)(5) by adding “keycards,” between “keys,” and “passwords” and removing “numbers” and adding in its place “permissions”.

■ b. By adding paragraph (d)(7)(vi).

■ c. By adding a sentence to the end of paragraph (h).

The additions read as follows:

§ 73.11 Security.

* * * * *

(d) * * *

(7) * * *

(vi) Any loss of computer, hard drive or other data storage device containing information that could be used to gain access to select agents or toxins.

* * * * *

(h) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 11. Section 73.12 is amended as follows:

■ a. By revising paragraph (a).

■ b. By removing paragraph (c)(2), redesignating paragraph (c)(3) as (c)(2), and in newly redesignated paragraph (c)(2), removing “NIH Guidelines for Research Involving Recombinant DNA Molecules” and adding in its place “NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules”.

■ c. By adding a new sentence to the end of paragraph (e).

The revision and addition read as follows:

§ 73.12 Biosafety.

(a) An individual or entity required to register under this part must develop and implement a written biosafety plan that is commensurate with the risk of the select agent or toxin, given its intended use. The biosafety plan must contain sufficient information and documentation to describe the biosafety and containment procedures for the select agent or toxin, including any animals (including arthropods) or plants intentionally or accidentally exposed to or infected with a select agent. The current biosafety plan must be submitted for initial registration, renewal of registration, or when requested. The biosafety plan must include the following provisions:

(1) The hazardous characteristics of each agent or toxin listed on the entity's registration and the biosafety risk associated with laboratory procedures related to the select agent or toxin;

(2) Safeguards in place with associated work practices to protect entity personnel, the public, and the environment from exposure to the select agent or toxin including, but not limited to: Personal protective equipment and other safety equipment; containment equipment including, but not limited to,

biological safety cabinets, animal caging systems, and centrifuge safety containers; and engineering controls and other facility safeguards;

(3) Written procedures for each validated method used for disinfection, decontamination or destruction, as appropriate, of all contaminated or presumptively contaminated materials including, but not limited to: Cultures and other materials related to the propagation of select agents or toxins, items related to the analysis of select agents and toxins, personal protective equipment, animal caging systems and bedding (if applicable), animal carcasses or extracted tissues and fluids (if applicable), laboratory surfaces and equipment, and effluent material; and

(4) Procedures for the handling of select agents and toxins in the same spaces with non-select agents and toxins to prevent unintentional contamination.

* * * * *

(e) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 12. Section 73.14 is amended as follows:

■ a. By adding a new sentence to the end of paragraph (a).

■ b. By adding a new sentence to the end of paragraph (f).

The additions read as follows:

§ 73.14 Incident response.

(a) * * * The current incident response plan must be submitted for initial registration, renewal of registration, or when requested.

* * * * *

(f) * * * Drills or exercises must be documented to include how the drill or exercise tested and evaluated the plan, any problems that were identified and corrective action(s) taken, and the names of registered entity personnel participants.

■ 13. Section 73.15 is amended as follows:

■ a. Revising paragraph (a) to read as set forth below.

■ b. By adding paragraph (e) to read as set forth below.

§ 73.15 Training.

(a) An individual or entity required to register under this part must provide information and training on biocontainment, biosafety, security (including security awareness), and incident response to:

(1) Each individual with access approval from the HHS Secretary or

Administrator. The training must address the particular needs of the individual, the work they will do, and the risks posed by the select agents or toxins. The training must be accomplished prior to the individual's entry into an area where a select agent is handled or stored, or within 12 months of the date the individual was approved by the HHS Secretary or the Administrator for access, whichever is earlier.

(2) Each individual not approved for access to select agents and toxins by the HHS Secretary or Administrator before that individual enters areas under escort where select agents or toxins are handled or stored (*e.g.*, laboratories, growth chambers, animal rooms, greenhouses, storage areas, shipping/receiving areas, production facilities, etc.). Training for escorted personnel must be based on the risk associated with accessing areas where select agents and toxins are used and/or stored. The training must be accomplished prior to the individual's entry into where select agents or toxins are handled or stored (*e.g.*, laboratories, growth chambers, animal rooms, greenhouses, storage areas, shipping/receiving areas, production facilities, etc.).

(e) The Responsible Official must ensure and document that individuals are provided the contact information of the HHS Office of Inspector General Hotline and the USDA Office of Inspector General Hotline so that they may anonymously report any safety or security concerns related to select agents and toxins.

■ 14. Section 73.16 is amended by revising paragraph (l)(1) to read as follows:

§ 73.16 Transfers.

(l) * * *

(1) Transfer the amounts only after the transferor uses due diligence and documents that the recipient has a legitimate need (*e.g.*, prophylactic, protective, bona fide research, or other peaceful purpose) to handle or use such toxins. Information to be documented includes, but is not limited, to the recipient information, toxin and amount transferred, and declaration that the recipient has legitimate purpose to store and use such toxins.

* * *

■ 15. Section 73.17 is amended as follows:

■ a. In paragraphs (a)(1)(iii) and (a)(3)(v) by adding "or other storage container" after "freezer".

■ b. By revising paragraph (a)(1)(v).

■ c. By adding paragraph (a)(8).

■ d. By revising paragraph (b).

■ e. By revising paragraph (c).

The revision and additions read as follows:

§ 73.17 Records.

(a) * * *

(1) * * *

(v) The select agent used, purpose of use, and, when applicable, final disposition,

* * *

(8) For select agents or material containing select agents or regulated nucleic acids that can produce infectious forms of any select agent virus that have been subjected to a validated inactivation procedure or a procedure for removal of viable select agent:

(i) A written description of the validated inactivation procedure or viable select agent removal method used, including validation data;

(ii) A written description of the viability testing protocol used;

(iii) A written description of the investigation conducted by the entity Responsible Official involving an inactivation or viable select agent removal failure and the corrective actions taken;

(iv) The name of each individual performing the validated inactivation or viable select agent removal method;

(v) The date(s) the validated inactivation or viable select agent removal method was completed;

(vi) The location where the validated inactivation or viable select agent removal method was performed; and

(vii) A certificate, signed by the Principal Investigator, that includes the date of inactivation or viable select agent removal, the validated inactivation or viable select agent removal method used, and the name of the Principal Investigator. A copy of the certificate must accompany any transfer of inactivated or select agent removed material.

* * *

(b) The individual or entity must implement a system to ensure that all records and data bases created under this part are accurate and legible, have controlled access, and authenticity may be verified.

(c) The individual or entity must promptly produce upon request any information that is related to the requirements of this part but is not otherwise contained in a record required to be kept by this section. The location of such information may include, but is not limited to, biocontainment certifications,

laboratory notebooks, institutional biosafety and/or animal use committee minutes and approved protocols, and records associated with occupational health and suitability programs. All records created under this part must be maintained for 3 years.

Dated: January 9, 2017.

Sylvia M. Burwell,
Secretary.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 100

RIN 0906-AB01

National Vaccine Injury Compensation Program: Revisions to the Vaccine Injury Table

AGENCY: Health Resources and Services Administration (HRSA), HHS.

ACTION: Final rule.

SUMMARY: On July 29, 2015, the Secretary of Health and Human Services (the Secretary) published in the **Federal Register** a Notice of Proposed Rulemaking (NPRM) to amend the regulations governing the National Vaccine Injury Compensation Program (VICP or program) by proposing revisions to the Vaccine Injury Table (Table). The Secretary based the Table revisions primarily on the 2012 Institute of Medicine (IOM) report, "Adverse Effects of Vaccines: Evidence and Causality," the work of nine HHS workgroups who reviewed the IOM findings, and consideration of the Advisory Commission on Childhood Vaccines' (ACCV) recommendations. The Secretary amends the Table through the changes in this final rule. These changes will apply only to petitions for compensation under the VICP filed after this final rule becomes effective.

DATE: This rule is effective February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Narayan Nair, Acting Director, Division of Injury Compensation Programs, Healthcare Systems Bureau, HRSA, 5600 Fishers Lane, Room 8N146B, Rockville, MD 20857, or by telephone (855) 266-2427. This is a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Background

The National Childhood Vaccine Injury Act of 1986, title III of Public Law 99-660 (42 U.S.C. 300aa-10 *et seq.*), established the VICP, a Federal

compensation program for persons thought to be injured by vaccines. The statute governing the VICP has been amended several times since 1986 and is hereinafter referred to as “the Act.” Petitions for compensation under the VICP are filed in the United States Court of Federal Claims (Court), with a copy served on the Secretary, who is designated as the “Respondent.” The Court, acting through judicial officers called Special Masters, makes decisions as to eligibility for, and the amount of, compensation.

To gain entitlement to compensation under this program, a petitioner must establish that a vaccine-related injury or death has occurred, either by proving that a vaccine actually caused or significantly aggravated an injury (causation-in-fact) or by demonstrating the occurrence of what is referred to as a “Table Injury.” That is, a petitioner may show that the vaccine recipient suffered an injury of the type enumerated in the regulations at 42 CFR 100.3—the “Vaccine Injury Table”—corresponding to the vaccination in question and that the onset of such injury took place within a time period also specified in the Table. If so, the injury is presumed to have been caused by the vaccination and the petitioner is entitled to compensation (assuming that other requirements are satisfied) unless the Respondent affirmatively shows that the injury was caused by some factor other than the vaccination (*see* 42 U.S.C. 300aa–11(c)(1)(C)(i), 300aa–13(a)(1)(B)), and 300aa–14(a)).

In prior Table revisions, the Secretary determined that the appropriate framework for making changes to the Table is to make specific findings as to the illnesses or conditions that can reasonably be determined, in some circumstances, to be caused or significantly aggravated by the vaccines under review and the circumstances under which such causation or aggravation can reasonably be determined to occur. The Secretary continues this approach through the use of the 2012 IOM report, the work of the nine workgroups who reviewed the IOM findings, and consideration of the ACCV’s recommendations. After consultation with the ACCV, the Secretary may modify the Table by promulgating regulations, with notice and opportunity for a public hearing and at least 180 days of public comment. *See* 42 U.S.C. 300aa–14(c) and (d).

II. Summary of the Final Rule

After the IOM released its 2012 report, 9 HHS workgroups comprising HRSA and Centers for Disease Control and

Prevention (CDC) medical staff reviewed IOM’s conclusions for 158 vaccine-adverse events, as well as any newly published scientific literature not contained in the report, and developed a set of proposed changes to the Table and its definitional counterpart, the Qualifications and Aids to Interpretation (QAI). For the vast majority of the vaccine-adverse event pairs reviewed (135), the IOM determined that the evidence was inadequate to accept or reject a causal relationship. Considering the remaining IOM conclusions and the ACCV Guiding Principles, the Secretary in this final rule is adopting certain additions or changes to the Table where the scientific evidence either convincingly supports or favors acceptance of a causal relationship between certain conditions and covered vaccines, which are unchanged from the proposed rule. As required by the Act, the changes in the proposed rule were presented to the ACCV, which reviewed and concurred with the Table changes set forth in this final rule.

Additionally, the Secretary, following the recommendation of the ACCV, is finalizing the Table change, as proposed, to add the injury of Guillain-Barré Syndrome (GBS) for seasonal influenza vaccinations, which is consistent with the approach taken in the Countermeasures Injury Compensation Program (CICP). Studies have demonstrated a causal association between the monovalent 2009 H1N1 vaccine and the 1976 swine flu vaccine and GBS. These causal associations were the basis of the 2015 decision by the Secretary in the CICP Pandemic Influenza A Countermeasures Injury Table Final Rule (80 FR 47411) to include GBS as an injury associated with the 2009 H1N1 influenza. With respect to that vaccine, the Secretary found that there was compelling, reliable, and valid medical and scientific evidence of an association between the 2009 H1N1 vaccine and GBS, which is required to add an injury to the CICP’s Injury Table. To date, the H1N1 antigen has been included in all seasonal influenza vaccines beginning with the 2010–2011 flu season. HHS notes that seasonal influenza vaccine formulations, unlike other vaccines, include multiple antigens that change from year-to-year, and enhanced surveillance activities to detect the incidence of GBS that occurred during the 2009 H1N1 pandemic may not occur with each virus strain change. In light of this information and other information as discussed in the proposed rule, the ACCV recommended

that the Secretary add GBS consistent with one of its Guiding Principles: That where there is credible evidence to both support and reject a change to the Table, the change should, whenever possible, be made to the benefit of petitioners.

In addition, in the final rule, the Secretary adopts the proposed rule’s new paragraph (b), *Provision that applies to all vaccines listed*. To streamline the Table, this paragraph includes any acute complication or sequela, including death, of the illness, disability, injury, or condition listed, as a Table injury (absent an exclusion as set forth under the QAI) rather than adding the provision to every line of the Table. To further streamline the Table, the Secretary deleted redundant wording in the various definitions, particularly with regard to any references to the presumption of causation, and the importance of the entire medical record. These elements have been included in paragraph (b) and are unchanged from the proposed rule. Finally, in this final rule, the Secretary adopts changes in the proposed rule that simplify and expand applicability of a provision that previously applied only to an encephalopathy. This provision, which indicates that idiopathic conditions do not rebut the Table presumption, now applies (through inclusion in paragraph (b)), to all injuries, while continuing to apply to an encephalopathy.

In this final rule, in addition to the changes described in the proposed rule, the Secretary has made the following non-substantive changes to the proposed rule for purposes of clarity:

- a. Added headings to (c)(2)(ii) and (c)(3)(ii).
- b. Moved text from the end of paragraph (c)(3)(ii)(C) to create a new (c)(3)(ii)(D).
- c. Changed paragraphs (c)(11) and (12) by revising the sentence regarding organs other than the skin by adding “the” before “disease”, inserting “and” after “organ”, and moving “, not just mildly abnormal laboratory values” to the end of the sentence.
- d. Revised paragraph (c)(15)(i) by changing “nine weeks” to “9 weeks”.
- e. Changed paragraph (e)(1) (“Coverage Provisions”) for purpose of clarity and consistency with 42 U.S.C. 300aa–14(c)(4) by adding “only” before “to petitions for compensation.”

The modified Table applies only to petitions filed under the VICP after the effective date of this final rule. Also, petitions must be filed within the applicable statute of limitations. The general statute of limitations applicable to petitions filed under the VICP, set forth in 42 U.S.C. 300aa–16(a),

continues to apply. However, the statute identifies a specific exception to this statute of limitations that applies when the effect of a revision to the Table makes a previously ineligible person eligible to receive compensation or when an eligible person's likelihood of obtaining compensation significantly increases. Under this exception, an individual who may be eligible to file a petition based on the revised Table may file the petition for compensation not later than 2 years after the effective date of the revision if the alleged injury or death occurred not more than 8 years before the effective date of the revision of the Table (42 U.S.C. 300aa-16(b)). This is true even if such individual previously filed a petition for compensation, and is thus an exception to the "one petition per injury" limitation of 42 U.S.C. 300aa-11(b)(2).

For any vaccine-adverse event pairs for which future scientific evidence develops to support a finding of a causal relationship, the Secretary will consider future rulemaking to revise the Table accordingly.

III. Comments and Responses

The NPRM provided a 180-day comment period that resulted in the receipt of 14 written comments—13 from individuals and one from a national organization. In addition, a public hearing on the proposed rule was held on January 14, 2016, during which a representative from the above mentioned national organization presented comments. The organization's oral comments were an expansion of the organization's previously submitted written comments. The Secretary carefully considered all received comments in the development of this final rule. Below is a summary of the comments and the Secretary's responses:

Comment: One commenter suggested that vaccines are unsafe, disagreed with the process for predicting vaccine harm to humans, and disagreed with the makeup of the "group assembled to force changes in this Table," calling it a biased group.

Response: The United States has a long-standing vaccine safety program that closely monitors the safety of vaccines on an ongoing basis. Before vaccines are approved by the Food and Drug Administration (FDA), they are tested and studied extensively by scientists to help ensure they are safe and effective. After vaccines are approved, a critical part of the vaccine safety program is that the Centers for Disease Control and Prevention (CDC)'s Immunization Safety Office (ISO) and FDA monitor for possible vaccine side

effects and conduct studies to determine whether health problems are caused by vaccines. CDC's ISO data show that the current U.S. vaccine supply is the safest in history.¹ Also, regulating clinical research and reviewing the safety of vaccines are responsibilities of the FDA, not the VICP, and changes in vaccine research and how vaccines are studied and tested are beyond the scope of this final rule.

As previously indicated, the Table revisions were based primarily on the 2012 IOM report which was developed after the IOM committee conducted a comprehensive review of the scientific literature on vaccines and adverse events. The committee charged with undertaking this review consisted of 16 members with expertise in the following fields: Pediatrics, internal medicine, neurology, immunology, immunotoxicology, neurobiology, rheumatology, epidemiology, biostatistics, and law. The members of the review committee were subject to stringent conflict of interest criteria by the IOM. In addition, the proposed Table changes were developed by HHS workgroups and reviewed by the ACCV, the membership of which, by statute, reflects a variety of stakeholders with different perspectives.

Comment: A commenter suggested that shoulder injury related to vaccine administration (SIRVA) as defined in the QAI is too restrictive because the recipient's pain and reduced range of motion must be limited to the shoulder in which the intramuscular vaccine was administered. The commenter stated that such language was an artificial and unnecessary qualification, and expressed concern that recipients who have other symptoms, such as shoulder pain radiating to the neck or upper back, will not have the benefits of a Table injury. The commenter suggested that the QAI be expanded to include the shoulder and parts of the body attributed to that injury.

Response: SIRVA is a musculoskeletal condition caused by injection of a vaccine intended for intramuscular administration into the shoulder, and, as its name suggests, the condition is localized to the shoulder in which the vaccine was administered. In other words, pain in the neck or back without an injury to the shoulder in which an individual received a vaccine would not be considered SIRVA. Shoulder injuries that are not caused by injection occur frequently in the population. Thus, it is important to have a definition of SIRVA that is clearly associated with vaccine

injection. The portion of the QAI limiting the pain and reduced range of motion to the shoulder in which the vaccine was administered is necessary to accurately reflect the vaccine-associated condition.

Comment: A commenter recommends revising the statute of limitations for filing complex cases, with additional consideration given to the aggravation of preexisting conditions not active until post vaccine(s).

Response: Revision of the statute of limitations would require a statutory amendment and thus is not within the scope of this final rule.

Comment: A commenter stated that there is a problem with the VICP's 3-year statute of limitations for filing a claim and the military's 5-year program titled, Temporary Disabled Retirement Listing (TDRL), where active duty military personnel injured by vaccines are placed. The commenter stated that the rules need to be amended and/or waivers granted to military personnel who are severely injured by vaccines so they can seek compensation for damages.

Response: Amending the Act's statute of limitations is not within the scope of this final rule.

Comment: A commenter recommended the addition of SIRVA to the vaccine court [sic]. The commenter also indicated a belief that SIRVA is due to lack of education on proper injection technique. The commenter further stated that the CDC should make SIRVA, which the commenter believes is 100 percent preventable, a priority.

Response: This final rule will add SIRVA as an injury associated with certain vaccines on the Table. In the VICP, claims are adjudicated by special masters in the Court. SIRVA prevention activities are not within the scope of this final rule.

Comment: A commenter recommended that the VICP transfer a fraction of its compensation responsibilities to pharmaceutical companies, which would incentivize these companies to develop safer vaccines to avoid claim compensation.

Response: The source of funding for the VICP is the Vaccine Injury Compensation Trust Fund (Trust Fund). The Trust Fund is funded by an excise tax on each dose of vaccines recommended by the CDC for routine administration to children. To the extent that the commenter is proposing a change to the funding mechanism for the VICP, effectuating such a change is beyond the scope of this final rule.

Comment: A commenter agreed with the Secretary's proposal that SIRVA injuries be added to the Table for the

¹ <http://www.cdc.gov/vaccinesafety/ensuringsafety/history/index.html>

measles, mumps, and rubella (MMR) and varicella vaccines that are currently administered only by percutaneous injection in case an intramuscular injection is available in the future. The commenter suggested that the Table make clear that SIRVA only pertains to intramuscular injection so there is no confusion with respect to vaccines administered using a different method. The commenter also suggested that syncope be added as an injury for vaccines that are administered by jet injectors. The commenter expressed support for the revision of the Table based on new medical findings and for the organizational changes to paragraph (b) of the Table.

Response: The Secretary agrees that SIRVA should be an injury listed on the Table for potential future formulations of MMR and varicella vaccines that are administered by intramuscular injection, and, therefore, has added SIRVA to the Table for those vaccines despite the fact that currently there are no MMR or varicella vaccines that are administered by intramuscular injection. As such, if an intramuscular formulation of those vaccines is developed in the future, the Table will not need to be amended to allow petitioners to potentially meet the definition for SIRVA in the QAI with respect to those vaccines. The QAI specifically states that SIRVA is a condition related to “administration of a vaccine intended for intramuscular administration in the upper arm.” Thus, the Secretary believes it is clear that to meet the definition of SIRVA in the QAI, the vaccine administered must be one intended for intramuscular injection in the upper arm.

The Secretary is not aware of any reliable and persuasive evidence demonstrating that syncope occurs following administration of a vaccine via a needleless jet device. While it may be plausible for syncope to occur with this route of administration, given the lack of evidence of syncope following administration of a vaccine via a needleless jet device, the Secretary will not include syncope as a Table injury for vaccines that are administered by a needleless jet device at this time. However, this does not preclude a claim alleging syncope after the administration of a vaccine via needleless jet device from being filed with the program as a non-Table injury.

Comment: One commenter opposed the revision of the Vaccine Injury Table’s QAI for encephalopathy, stating that it is not based on sound science and that it creates a restrictive and exclusionary guideline that unfairly discriminates against children and

adults born with certain genes or pre-existing conditions (which may be triggered or significantly aggravated following vaccination). The commenter further contends that due to lack of knowledge about biological mechanisms and high risk factors for vaccine injury, the proposed changes are without ethical, scientific, or legal justification.

Response: The Secretary respectfully disagrees with the comment that the revised definition for encephalopathy and the new definition for encephalitis in the QAI are not based on firm science. The previous definition of encephalopathy in the QAI was imprecise and did not include the comprehensive criteria used by medical providers, particularly specialists, to diagnose encephalopathy or encephalitis. In addition, the previous QAI did not include any definition for encephalitis, and, therefore, new and more accurate criteria and definitions were necessary. To develop precise definitions for the QAI, an extensive literature search was conducted for reliable, reputable, evidence-based criteria consistently used by medical specialists in the fields of infectious disease and neurology. The Secretary also evaluated information from organizations and publications to formulate definitions, including those responsible for publishing case definitions for the Vaccine Adverse Event Reporting System (2002) and other significant guidelines.

The commenter also stated that the proposed revisions create a restrictive and exclusionary guideline, unfairly discriminating against children and adults born with certain genes or pre-existing conditions which may be triggered or significantly aggravated following vaccination. The Secretary understands these concerns and agrees that individuals should not be disqualified from potentially receiving VICP compensation due to biodiversity and individual susceptibilities. Certain individuals may not meet the QAI definition, as it is impossible to develop a scientifically sound definition that allows for inclusion of every circumstance, particularly those that may arise when unique and sometimes complex pre-vaccination medical conditions exist.² However, individuals who do not meet the Table criteria are not precluded from filing a petition, and may be found entitled to receive compensation if they demonstrate that their condition was caused or significantly aggravated by a covered vaccine.

Comment: One commenter also noted that, historically, acute and chronic encephalopathy have been acknowledged as a serious complication of pertussis, measles and measles containing vaccines, and have been reported following receipt of other vaccines.

Response: With regard to this comment, it is important to note that the initial Table and QAI set forth in the 1986 Act reflected Congress’s initial determination of vaccine-related injuries for whole cell diphtheria, tetanus, and pertussis (DTwP) vaccine, which is no longer used. Additionally, modifications to the Table and QAI by the Secretary in 1995 were based on scientific findings—the National Childhood Encephalopathy Study and its 10-year follow-up study—related to DTaP vaccine. The IOM committee’s conclusions in both 1991 and 1994 were mixed regarding the statistically significant findings of encephalopathy in these studies. After reviewing the evidence, the National Vaccine Advisory Committee (NVAC) voted to remove encephalopathy from the Table. However, in the end, the Secretary, for both scientific and policy reasons, and with support of the ACCV, retained the condition on the Table, but clarified the definition of encephalopathy to make it more clinically precise.

While the initial Table and QAI were based on studies using DTwP vaccine, the acellular (aP) diphtheria, tetanus, and pertussis (DTaP) vaccine has been the primary formulation used in the United States since 1997 when it was recommended for routine use in children younger than 7 years of age. Current DTaP vaccines were developed because of concerns of reactogenicity with whole cell pertussis.

To date, no adequate scientific study has been published that demonstrates a causal relationship between either acellular pertussis vaccines or MMR vaccines and encephalopathy or encephalitis. As a result, in its most recent evaluation of adverse events after vaccines (2012), the IOM found that the evidence was inadequate to accept or reject a causal association between either acellular pertussis containing vaccines or MMR vaccines and encephalopathy or encephalitis. Of the large scale studies that have been conducted on DTaP, none have shown an increased risk of encephalopathy or encephalitis after receiving the DTaP vaccine. Furthermore, these studies have demonstrated a significant reduction in the number of common adverse events with acellular pertussis, such as crying and fevers, and less common ones, such as febrile seizures.

² 2012 IOM Report, pp. 52, and 82–84.

With regard to the MMR vaccine, because natural infection of measles, mumps and/or rubella virus is thought to lead to neurologic illness by damaging neurons through direct viral infection and/or reactivation, it is theorized that the same mechanisms may be responsible for vaccine-associated encephalopathy and encephalitis. However, of the studies examined and described by the IOM in its 2012 report, none identified causality between the MMR vaccine and encephalopathy or encephalitis. Similarly, the IOM concluded that the mechanistic evidence for an association is weak, based on knowledge about natural infection and only a few case reports. Accordingly, the Secretary does not agree that brain inflammation or acute and chronic encephalopathy have been acknowledged as a serious complication of either the DTaP or MMR vaccines. However, for the reasons discussed in the NPRM, the Secretary chose to retain these conditions in the revisions to the Table and QAI.

Comment: One commenter, when conveying views on acute encephalopathy as “one of the most serious complications of vaccination . . .” also referenced both encephalitis and encephalomyelitis in the discussion.

Response: The Secretary would like to clarify that encephalitis and encephalomyelitis (which is referred to as acute disseminated encephalomyelitis or ADEM) are distinct conditions. While they share some clinical characteristics, ADEM is a demyelinating condition with distinct differences from other types of encephalitis, as demonstrated on brain magnetic resonance imaging (MRI). The type of encephalitis that was initially attributed to DTWP was not described as demyelinating. Although early ADEM may have laboratory and clinical characteristics similar to acute encephalitis, findings on an MRI are distinct, with only ADEM displaying evidence of acute demyelination. For scientific accuracy, we have excluded ADEM from the Table definition of encephalitis.

Comment: One commenter, while applauding the expansion of the Vaccine Injury Table and agreeing with the IOM’s recommendations, stated that the Table remains wholly inadequate to properly address “the widespread epidemic of vaccine adverse events.” The commenter stated that the reason for this is that science has been corrupted by commercial interests, by financial ties between industry, regulators, and academic institutions

and that health care delivery has been compromised by financial ties between industry, physicians, and their trade publications.

Response: The Secretary believes that the revisions to the Table and QAI increase clarity and scientific accuracy regarding those injuries that will be afforded the Table’s presumption of vaccine causation. As previously indicated, the revisions to the Table and QAI were based primarily on the 2012 IOM report which was developed after the IOM committee conducted a comprehensive review of the scientific literature on vaccines and adverse events. The committee charged with undertaking this review consisted of 16 members with expertise in the following fields: pediatrics, internal medicine, neurology, immunology, immunotoxicology, neurobiology, rheumatology, epidemiology, biostatistics, and law. The members of the review committee were subject to stringent conflict of interest criteria by the IOM. In addition, the proposed Table changes were developed by HHS workgroups and reviewed by the ACCV, the membership of which, by statute, reflects a variety of stakeholders with different perspectives.

Comment: One commenter stated that the Secretary should not make changes to the Vaccine Injury Table that would make it more difficult for “victims” to be compensated.

Response: The Secretary believes that the revisions to the Table and QAI set forth in this final rule, such as the addition of injuries, will make it easier for petitioners alleging injuries that meet the criteria in the Table and QAI to receive the Table’s presumption of causation (which relieves them of having to prove that the vaccine actually caused or significantly aggravated the injury). This will make it easier for such petitioners to receive compensation under the VICP.

Comment: One commenter asked that additional consideration be given to the human papillomavirus (HPV) vaccination as a cause of postural orthostatic tachycardia syndrome (POTS), a condition where individuals can experience fainting and lightheadedness. The commenter also stated that the “review period” should be indefinite for the HPV vaccine.

Response: Like all vaccines used in the United States, HPV vaccines are required to go through years of safety testing before they are approved by the FDA. After they are approved and made available to the public, CDC and FDA continue to evaluate vaccines to ensure their safety. To date, there is no medical or scientific evidence that the HPV

vaccine causes POTS and safety monitoring has not shown any other problems. Extending the review period for alleged injuries due to the HPV vaccine would require a statutory amendment to the Act’s statute of limitations which is not within the scope of the final rule.

Comment: A commenter requested that food allergies be added to the Table asserting that food proteins that are present in vaccines cause the development of food allergies. The commenter also requested removal of the time limit that compensation is not provided for injuries or death that occurred more than “8 years before the effective date of the revision of the Table” because the commenter believes that “food proteins in vaccines have been causing injury for decades.”

Response: The Secretary does not agree that food allergies should be added to the Table as injuries. HHS conducted a literature search of the major medical databases for any articles linking the development of food allergies to vaccinations (81 FR 17423, March 29, 2016). Despite an extensive search, HHS found no published research addressing any linkages or potential causality between vaccinations covered by VICP and the development of food allergies in any population. In addition, revision of the Act’s statute of limitations would require a statutory amendment and thus is not within the scope of this final rule.

Comment: One commenter suggested that autism spectrum disorders be added to the Vaccine Injury Table. The commenter also requested removal of the time limit that compensation not be provided for injuries or death that occurred more than “8 years before the effective date of the revision of the Table” because the commenter believes that “bovine milk contaminated vaccines have been causing injury for decades.”

Response: The Secretary does not agree that autism spectrum disorders should be added as an injury to the Table. The 2012 IOM report found that the epidemiologic and mechanistic evidence favored rejection of a causal relationship between the MMR vaccine and autism. Moreover, in opinions that were upheld on appeal to the U.S. Court of Appeals for the Federal Circuit, special masters of the U.S. Court of Federal Claims held that the MMR, whether administered alone or in conjunction with thimerosal-containing vaccines, is not a causal factor in the development of autism or autism spectrum disorders. In addition, revision of the Act’s statute of limitations would require a statutory

amendment and thus is not within the purview of this final rule.

Comment: One commenter stated that thimerosal (a preservative added to vaccines) causes nerve damage.

Response: The Secretary disagrees with the comment that thimerosal in vaccines causes nerve damage to immunized individuals. Currently, no childhood vaccines used in the U.S. include thimerosal as a preservative, except for some formulations of influenza vaccine in multi-dose vials. When exposure to thimerosal occurs through vaccination, it is at a very low dose, which is readily eliminated from the body. Thimerosal has been used safely in vaccines since the 1930s. According to the CDC, scientists have been studying the use of thimerosal in vaccines for many years. They have not found any evidence that thimerosal causes any harm. Thimerosal use in medical products has a record of being very safe. Data from many studies show no evidence of harm caused by low doses of thimerosal in vaccines.³

Economic and Regulatory Impact

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when rulemaking is necessary, to select regulatory approaches that provide the

greatest net benefits (including potential economic, environmental, public health, safety, distributive, and equity effects). In addition, under the Regulatory Flexibility Act, if a rule has a significant economic effect on a substantial number of small entities the Secretary must specifically consider the economic effect of a rule on small entities and analyze regulatory options that could lessen the impact of the rule.

Executive Order 12866 requires that all regulations reflect consideration of alternatives, costs, benefits, incentives, equity, and available information. Regulations must meet certain standards, such as avoiding an unnecessary burden. Regulations that are “significant” because of cost, adverse effects on the economy, inconsistency with other agency actions, effects on the budget, or novel legal or policy issues require special analysis.

The Secretary has determined that no resources are required to implement the requirements in this rule. Compensation will be made in the same manner. This final rule only lessens the burden of proof for potential petitioners. Therefore, in accordance with the Regulatory Flexibility Act of 1980 (RFA), and the Small Business Regulatory Enforcement Act of 1996, which amended the RFA, the Secretary certifies that this rule will not have a significant impact on a substantial number of small entities.

The Secretary has also determined that this final rule does not meet the criteria for a major rule as defined by Executive Order 12866 and would have no major effect on the economy or Federal expenditures. We have determined that the final rule is not a “major rule” within the meaning of the statute providing for Congressional Review of Agency Rulemaking, 5 U.S.C. 801. Similarly, it will not have effects on State, local, and tribal governments and on the private sector such as to require consultation under the Unfunded Mandates Reform Act of 1995.

The provisions of this rule do not, on the basis of family well-being, affect the following family elements: Family safety; family stability; marital commitment; parental rights in the education, nurture and supervision of their children; family functioning; disposable income or poverty; or the behavior and personal responsibility of youth, as determined under section 654(c) of the Treasury and General Government Appropriations Act of 1999.

This rule is not being treated as a “significant regulatory action” as defined under section 3(f) of Executive

Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

As stated above, this final rule will modify the Vaccine Injury Table and its Qualifications and Aids to Interpretation based on legal authority.

Impact of the New Rule

This final rule will have the effect of making it easier for future petitioners alleging injuries that meet the criteria in the Vaccine Injury Table to receive the Table’s presumption of causation (which relieves them of having to prove that the vaccine actually caused or significantly aggravated the injury).

Paperwork Reduction Act of 1995

This final rule has no information collection requirements.

Dated: January 6, 2017.

James Macrae,

Acting Administrator, Health Resources and Services Administration.

Approved: January 9, 2017.

Sylvia M. Burwell,

Secretary, Department of Health and Human Services.

List of Subjects in 42 CFR Part 100

Biologics, Health insurance, Immunization.

National Vaccine Injury Compensation Program: Revisions to the Vaccine Injury Table

Therefore, for the reasons stated in the preamble, the Department of Health and Human Services amends 42 CFR part 100 as follows:

PART 100—VACCINE INJURY COMPENSATION

■ 1. The authority citation for 42 CFR part 100 continues to read as follows:

Authority: Secs. 312 and 313 of Public Law 99–660 (42 U.S.C. 300aa–1 note); 42 U.S.C. 300aa–10 to 300aa–34; 26 U.S.C. 4132(a); and sec. 13632(a)(3) of Public Law 103–66.

■ 2. Revise § 100.3 to read as follows:

§ 100.3 Vaccine injury table.

(a) In accordance with section 312(b) of the National Childhood Vaccine Injury Act of 1986, title III of Public Law 99–660, 100 Stat. 3779 (42 U.S.C. 300aa–1 note) and section 2114(c) of the Public Health Service Act, as amended (PHS Act) (42 U.S.C. 300aa–14(c)), the following is a table of vaccines, the injuries, disabilities, illnesses, conditions, and deaths resulting from the administration of such vaccines, and the time period in which the first symptom or manifestation of onset or of the significant aggravation of such

³ Following are referenced thimerosal studies:

injuries, disabilities, illnesses, conditions, and deaths is to occur after vaccine administration for purposes of receiving compensation under the Program. Paragraph (b) of this section sets forth additional provisions that are

not separately listed in this Table but that constitute part of it. Paragraph (c) of this section sets forth the qualifications and aids to interpretation for the terms used in the Table. Conditions and injuries that do not meet

the terms of the qualifications and aids to interpretation are not within the Table. Paragraph (d) of this section sets forth a glossary of terms used in paragraph (c).

VACCINE INJURY TABLE

Vaccine	Illness, disability, injury or condition covered	Time period for first symptom or manifestation of onset or of significant aggravation after vaccine administration
I. Vaccines containing tetanus toxoid (<i>e.g.</i> , DTaP, DTP, DT, Td, or TT).	A. Anaphylaxis	≤4 hours.
	B. Brachial Neuritis	2–28 days (not less than 2 days and not more than 28 days).
	C. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	D. Vasovagal syncope	≤1 hour.
II. Vaccines containing whole cell pertussis bacteria, extracted or partial cell pertussis bacteria, or specific pertussis antigen(s) (<i>e.g.</i> , DTP, DTaP, P, DTP-Hib).	A. Anaphylaxis	≤4 hours.
	B. Encephalopathy or encephalitis	≤72 hours.
	C. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	D. Vasovagal syncope	≤1 hour.
III. Vaccines containing measles, mumps, and rubella virus or any of its components (<i>e.g.</i> , MMR, MM, MMRV).	A. Anaphylaxis	≤4 hours.
	B. Encephalopathy or encephalitis	5–15 days (not less than 5 days and not more than 15 days).
	C. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	D. Vasovagal syncope	≤1 hour.
IV. Vaccines containing rubella virus (<i>e.g.</i> , MMR, MMRV).	A. Chronic arthritis	7–42 days (not less than 7 days and not more than 42 days).
V. Vaccines containing measles virus (<i>e.g.</i> , MMR, MM, MMRV).	A. Thrombocytopenic purpura	7–30 days (not less than 7 days and not more than 30 days).
	B. Vaccine-Strain Measles Viral Disease in an immunodeficient recipient. —Vaccine-strain virus identified	Not applicable.
	—If strain determination is not done or if laboratory testing is inconclusive.	≤12 months.
VI. Vaccines containing polio live virus (OPV) ..	A. Paralytic Polio. —in a non-immunodeficient recipient	≤30 days.
	—in an immunodeficient recipient	≤6 months.
	—in a vaccine associated community case	Not applicable.
	B. Vaccine-Strain Polio Viral Infection. —in a non-immunodeficient recipient	≤30 days.
	—in an immunodeficient recipient	≤6 months.
	—in a vaccine associated community case	Not applicable.
VII. Vaccines containing polio inactivated virus (<i>e.g.</i> , IPV).	A. Anaphylaxis	≤4 hours.
	B. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	C. Vasovagal syncope	≤1 hour.
VIII. Hepatitis B vaccines	A. Anaphylaxis	≤4 hours.
	B. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	C. Vasovagal syncope	≤1 hour.
IX. Haemophilus influenzae type b (Hib) vaccines.	A. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	B. Vasovagal syncope	≤1 hour.
X. Varicella vaccines	A. Anaphylaxis	≤4 hours.
	B. Disseminated varicella vaccine-strain viral disease. —Vaccine-strain virus identified	Not applicable.
	—If strain determination is not done or if laboratory testing is inconclusive.	7–42 days (not less than 7 days and not more than 42 days).
	C. Varicella vaccine-strain viral reactivation	Not applicable.
	D. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	E. Vasovagal syncope	≤1 hour.
XI. Rotavirus vaccines	A. Intussusception	1–21 days (not less than 1 day and not more than 21 days).
XII. Pneumococcal conjugate vaccines	A. Shoulder Injury Related to Vaccine Administration.	≤48 hours.

VACCINE INJURY TABLE—Continued

Vaccine	Illness, disability, injury or condition covered	Time period for first symptom or manifestation of onset or of significant aggravation after vaccine administration
XIII. Hepatitis A vaccines	B. Vasovagal syncope	≤1 hour.
	A. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
XIV. Seasonal influenza vaccines	B. Vasovagal syncope	≤1 hour.
	A. Anaphylaxis	≤4 hours.
	B. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	C. Vasovagal syncope	≤1 hour.
	D. Guillain-Barré Syndrome	3–42 days (not less than 3 days and not more than 42 days).
XV. Meningococcal vaccines	A. Anaphylaxis	≤4 hours.
	B. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	C. Vasovagal syncope	≤1 hour.
XVI. Human papillomavirus (HPV) vaccines	A. Anaphylaxis	≤4 hours.
	B. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	C. Vasovagal syncope	≤1 hour.
XVII. Any new vaccine recommended by the Centers for Disease Control and Prevention for routine administration to children, after publication by the Secretary of a notice of coverage.	A. Shoulder Injury Related to Vaccine Administration.	≤48 hours.
	B. Vasovagal syncope	≤1 hour.

(b) *Provisions that apply to all conditions listed.* (1) Any acute complication or sequela, including death, of the illness, disability, injury, or condition listed in paragraph (a) of this section (and defined in paragraphs (c) and (d) of this section) qualifies as a Table injury under paragraph (a) except when the definition in paragraph (c) requires exclusion.

(2) In determining whether or not an injury is a condition set forth in paragraph (a) of this section, the Court shall consider the entire medical record.

(3) An idiopathic condition that meets the definition of an illness, disability, injury, or condition set forth in paragraph (c) of this section shall be considered to be a condition set forth in paragraph (a) of this section.

(c) *Qualifications and aids to interpretation.* The following qualifications and aids to interpretation shall apply to, define and describe the scope of, and be read in conjunction with paragraphs (a), (b), and (d) of this section:

(1) *Anaphylaxis.* Anaphylaxis is an acute, severe, and potentially lethal systemic reaction that occurs as a single discrete event with simultaneous involvement of two or more organ systems. Most cases resolve without sequela. Signs and symptoms begin minutes to a few hours after exposure. Death, if it occurs, usually results from airway obstruction caused by laryngeal edema or bronchospasm and may be associated with cardiovascular collapse.

Other significant clinical signs and symptoms may include the following: Cyanosis, hypotension, bradycardia, tachycardia, arrhythmia, edema of the pharynx and/or trachea and/or larynx with stridor and dyspnea. There are no specific pathological findings to confirm a diagnosis of anaphylaxis.

(2) *Encephalopathy.* A vaccine recipient shall be considered to have suffered an encephalopathy if an injury meeting the description below of an acute encephalopathy occurs within the applicable time period and results in a chronic encephalopathy, as described in paragraph (d) of this section.

(i) *Acute encephalopathy.* (A) For children less than 18 months of age who present:

(1) Without a seizure, an acute encephalopathy is indicated by a significantly decreased level of consciousness that lasts at least 24 hours.

(2) Following a seizure, an acute encephalopathy is demonstrated by a significantly decreased level of consciousness that lasts at least 24 hours and cannot be attributed to a postictal state—from a seizure or a medication.

(B) For adults and children 18 months of age or older, an acute encephalopathy is one that persists at least 24 hours and is characterized by at least two of the following:

(1) A significant change in mental status that is not medication related

(such as a confusional state, delirium, or psychosis);

(2) A significantly decreased level of consciousness which is independent of a seizure and cannot be attributed to the effects of medication; and

(3) A seizure associated with loss of consciousness.

(C) The following clinical features in themselves do not demonstrate an acute encephalopathy or a significant change in either mental status or level of consciousness: Sleepiness, irritability (fussiness), high-pitched and unusual screaming, poor feeding, persistent inconsolable crying, bulging fontanelle, or symptoms of dementia.

(D) Seizures in themselves are not sufficient to constitute a diagnosis of encephalopathy and in the absence of other evidence of an acute encephalopathy seizures shall not be viewed as the first symptom or manifestation of an acute encephalopathy.

(ii) *Exclusionary criteria for encephalopathy.* Regardless of whether or not the specific cause of the underlying condition, systemic disease, or acute event (including an infectious organism) is known, an encephalopathy shall not be considered to be a condition set forth in the Table if it is shown that the encephalopathy was caused by:

(A) An underlying condition or systemic disease shown to be unrelated to the vaccine (such as malignancy, structural lesion, psychiatric illness, dementia, genetic disorder, prenatal or

perinatal central nervous system (CNS) injury); or

(B) An acute event shown to be unrelated to the vaccine such as a head trauma, stroke, transient ischemic attack, complicated migraine, drug use (illicit or prescribed) or an infectious disease.

(3) *Encephalitis*. A vaccine recipient shall be considered to have suffered encephalitis if an injury meeting the description below of acute encephalitis occurs within the applicable time period and results in a chronic encephalopathy, as described in paragraph (d) of this section.

(i) *Acute encephalitis*. Encephalitis is indicated by evidence of neurologic dysfunction, as described in paragraph (c)(3)(i)(A) of this section, plus evidence of an inflammatory process in the brain, as described in paragraph (c)(3)(i)(B) of this section.

(A) Evidence of neurologic dysfunction consists of either:

(1) One of the following neurologic findings referable to the CNS: Focal cortical signs (such as aphasia, alexia, agraphia, cortical blindness); cranial nerve abnormalities; visual field defects; abnormal presence of primitive reflexes (such as Babinski's sign or sucking reflex); or cerebellar dysfunction (such as ataxia, dysmetria, or nystagmus); or

(2) An acute encephalopathy as set forth in paragraph (c)(2)(i) of this section.

(B) Evidence of an inflammatory process in the brain (central nervous system or CNS inflammation) must include cerebrospinal fluid (CSF) pleocytosis (>5 white blood cells (WBC)/mm³ in children >2 months of age and adults; >15 WBC/mm³ in children <2 months of age); or at least two of the following:

(1) Fever (temperature \geq 100.4 degrees Fahrenheit);

(2) Electroencephalogram findings consistent with encephalitis, such as diffuse or multifocal nonspecific background slowing and periodic discharges; or

(3) Neuroimaging findings consistent with encephalitis, which include, but are not limited to brain/spine magnetic resonance imaging (MRI) displaying diffuse or multifocal areas of hyperintense signal on T2-weighted, diffusion-weighted image, or fluid-attenuation inversion recovery sequences.

(ii) *Exclusionary criteria for encephalitis*. Regardless of whether or not the specific cause of the underlying condition, systemic disease, or acute event (including an infectious organism) is known, encephalitis shall not be considered to be a condition set forth in

the Table if it is shown that the encephalitis was caused by:

(A) An underlying malignancy that led to a paraneoplastic encephalitis;

(B) An infectious disease associated with encephalitis, including a bacterial, parasitic, fungal or viral illness (such as herpes viruses, adenovirus, enterovirus, West Nile Virus, or human immunodeficiency virus), which may be demonstrated by clinical signs and symptoms and need not be confirmed by culture or serologic testing; or

(C) Acute disseminated encephalomyelitis (ADEM). Although early ADEM may have laboratory and clinical characteristics similar to acute encephalitis, findings on MRI are distinct with ADEM displaying evidence of acute demyelination (scattered, focal, or multifocal areas of inflammation and demyelination within cerebral subcortical and deep cortical white matter; gray matter involvement may also be seen but is a minor component); or

(D) Other conditions or abnormalities that would explain the vaccine recipient's symptoms.

(4) *Intussusception*. (i) For purposes of paragraph (a) of this section, intussusception means the invagination of a segment of intestine into the next segment of intestine, resulting in bowel obstruction, diminished arterial blood supply, and blockage of the venous blood flow. This is characterized by a sudden onset of abdominal pain that may be manifested by anguished crying, irritability, vomiting, abdominal swelling, and/or passing of stools mixed with blood and mucus.

(ii) For purposes of paragraph (a) of this section, the following shall not be considered to be a Table intussusception:

(A) Onset that occurs with or after the third dose of a vaccine containing rotavirus;

(B) Onset within 14 days after an infectious disease associated with intussusception, including viral disease (such as those secondary to non-enteric or enteric adenovirus, or other enteric viruses such as Enterovirus), enteric bacteria (such as *Campylobacter jejuni*), or enteric parasites (such as *Ascaris lumbricoides*), which may be demonstrated by clinical signs and symptoms and need not be confirmed by culture or serologic testing;

(C) Onset in a person with a preexisting condition identified as the lead point for intussusception such as intestinal masses and cystic structures (such as polyps, tumors, Meckel's diverticulum, lymphoma, or duplication cysts);

(D) Onset in a person with abnormalities of the bowel, including congenital anatomic abnormalities, anatomic changes after abdominal surgery, and other anatomic bowel abnormalities caused by mucosal hemorrhage, trauma, or abnormal intestinal blood vessels (such as Henoch Schölein purpura, hematoma, or hemangioma); or

(E) Onset in a person with underlying conditions or systemic diseases associated with intussusception (such as cystic fibrosis, celiac disease, or Kawasaki disease).

(5) *Chronic arthritis*. Chronic arthritis is defined as persistent joint swelling with at least two additional manifestations of warmth, tenderness, pain with movement, or limited range of motion, lasting for at least 6 months.

(i) Chronic arthritis may be found in a person with no history in the 3 years prior to vaccination of arthropathy (joint disease) on the basis of:

(A) Medical documentation recorded within 30 days after the onset of objective signs of acute arthritis (joint swelling) that occurred between 7 and 42 days after a rubella vaccination; and

(B) Medical documentation (recorded within 3 years after the onset of acute arthritis) of the persistence of objective signs of intermittent or continuous arthritis for more than 6 months following vaccination; and

(C) Medical documentation of an antibody response to the rubella virus.

(ii) The following shall not be considered as chronic arthritis:

Musculoskeletal disorders such as diffuse connective tissue diseases (including but not limited to rheumatoid arthritis, juvenile idiopathic arthritis, systemic lupus erythematosus, systemic sclerosis, mixed connective tissue disease, polymyositis/dermatomyositis, fibromyalgia, necrotizing vasculitis and vasculopathies and Sjögren's Syndrome), degenerative joint disease, infectious agents other than rubella (whether by direct invasion or as an immune reaction), metabolic and endocrine diseases, trauma, neoplasms, neuropathic disorders, bone and cartilage disorders, and arthritis associated with ankylosing spondylitis, psoriasis, inflammatory bowel disease, Reiter's Syndrome, blood disorders, or arthralgia (joint pain), or joint stiffness without swelling.

(6) *Brachial neuritis*. This term is defined as dysfunction limited to the upper extremity nerve plexus (*i.e.*, its trunks, divisions, or cords). A deep, steady, often severe aching pain in the shoulder and upper arm usually heralds onset of the condition. The pain is

typically followed in days or weeks by weakness in the affected upper extremity muscle groups. Sensory loss may accompany the motor deficits, but is generally a less notable clinical feature. Atrophy of the affected muscles may occur. The neuritis, or plexopathy, may be present on the same side or on the side opposite the injection. It is sometimes bilateral, affecting both upper extremities. A vaccine recipient shall be considered to have suffered brachial neuritis as a Table injury if such recipient manifests all of the following:

- (i) Pain in the affected arm and shoulder is a presenting symptom and occurs within the specified time-frame;
- (ii) Weakness;

(A) Clinical diagnosis in the absence of nerve conduction and electromyographic studies requires weakness in muscles supplied by more than one peripheral nerve.

(B) Nerve conduction studies (NCS) and electromyographic (EMG) studies localizing the injury to the brachial plexus are required before the diagnosis can be made if weakness is limited to muscles supplied by a single peripheral nerve.

(iii) Motor, sensory, and reflex findings on physical examination and the results of NCS and EMG studies, if performed, must be consistent in confirming that dysfunction is attributable to the brachial plexus; and

(iv) No other condition or abnormality is present that would explain the vaccine recipient's symptoms.

(7) *Thrombocytopenic purpura*. This term is defined by the presence of clinical manifestations, such as petechiae, significant bruising, or spontaneous bleeding, and by a serum platelet count less than 50,000/mm³ with normal red and white blood cell indices. Thrombocytopenic purpura does not include cases of thrombocytopenia associated with other causes such as hypersplenism, autoimmune disorders (including alloantibodies from previous transfusions) myelodysplasias, lymphoproliferative disorders, congenital thrombocytopenia or hemolytic uremic syndrome. Thrombocytopenic purpura does not include cases of immune (formerly called idiopathic) thrombocytopenic purpura that are mediated, for example, by viral or fungal infections, toxins or drugs. Thrombocytopenic purpura does not include cases of thrombocytopenia associated with disseminated intravascular coagulation, as observed with bacterial and viral infections. Viral infections include, for example, those infections secondary to Epstein Barr

virus, cytomegalovirus, hepatitis A and B, human immunodeficiency virus, adenovirus, and dengue virus. An antecedent viral infection may be demonstrated by clinical signs and symptoms and need not be confirmed by culture or serologic testing. However, if culture or serologic testing is performed, and the viral illness is attributed to the vaccine-strain measles virus, the presumption of causation will remain in effect. Bone marrow examination, if performed, must reveal a normal or an increased number of megakaryocytes in an otherwise normal marrow.

(8) *Vaccine-strain measles viral disease*. This term is defined as a measles illness that involves the skin and/or another organ (such as the brain or lungs). Measles virus must be isolated from the affected organ or histopathologic findings characteristic for the disease must be present. Measles viral strain determination may be performed by methods such as polymerase chain reaction test and vaccine-specific monoclonal antibody. If strain determination reveals wild-type measles virus or another, non-vaccine-strain virus, the disease shall not be considered to be a condition set forth in the Table. If strain determination is not done or if the strain cannot be identified, onset of illness in any organ must occur within 12 months after vaccination.

(9) *Vaccine-strain polio viral infection*. This term is defined as a disease caused by poliovirus that is isolated from the affected tissue and should be determined to be the vaccine-strain by oligonucleotide or polymerase chain reaction. Isolation of poliovirus from the stool is not sufficient to establish a tissue specific infection or disease caused by vaccine-strain poliovirus.

(10) *Shoulder injury related to vaccine administration (SIRVA)*. SIRVA manifests as shoulder pain and limited range of motion occurring after the administration of a vaccine intended for intramuscular administration in the upper arm. These symptoms are thought to occur as a result of unintended injection of vaccine antigen or trauma from the needle into and around the underlying bursa of the shoulder resulting in an inflammatory reaction. SIRVA is caused by an injury to the musculoskeletal structures of the shoulder (e.g. tendons, ligaments, bursae, etc.). SIRVA is not a neurological injury and abnormalities on neurological examination or nerve conduction studies (NCS) and/or electromyographic (EMG) studies would not support SIRVA as a diagnosis (even

if the condition causing the neurological abnormality is not known). A vaccine recipient shall be considered to have suffered SIRVA if such recipient manifests all of the following:

(i) No history of pain, inflammation or dysfunction of the affected shoulder prior to intramuscular vaccine administration that would explain the alleged signs, symptoms, examination findings, and/or diagnostic studies occurring after vaccine injection;

(ii) Pain occurs within the specified time-frame;

(iii) Pain and reduced range of motion are limited to the shoulder in which the intramuscular vaccine was administered; and

(iv) No other condition or abnormality is present that would explain the patient's symptoms (e.g. NCS/EMG or clinical evidence of radiculopathy, brachial neuritis, mononeuropathies, or any other neuropathy).

(11) *Disseminated varicella vaccine-strain viral disease*. Disseminated varicella vaccine-strain viral disease is defined as a varicella illness that involves the skin beyond the dermatome in which the vaccination was given and/or disease caused by vaccine-strain varicella in another organ. For organs other than the skin, the disease must be demonstrated in the involved organ and not just through mildly abnormal laboratory values. If there is involvement of an organ beyond the skin, and no virus was identified in that organ, the involvement of all organs must occur as part of the same, discrete illness. If strain determination reveals wild-type varicella virus or another, non-vaccine-strain virus, the viral disease shall not be considered to be a condition set forth in the Table. If strain determination is not done or if the strain cannot be identified, onset of illness in any organ must occur 7–42 days after vaccination.

(12) *Varicella vaccine-strain viral reactivation disease*. Varicella vaccine-strain viral reactivation disease is defined as the presence of the rash of herpes zoster with or without concurrent disease in an organ other than the skin. Zoster, or shingles, is a painful, unilateral, pruritic rash appearing in one or more sensory dermatomes. For organs other than the skin, the disease must be demonstrated in the involved organ and not just through mildly abnormal laboratory values. There must be laboratory confirmation that the vaccine-strain of the varicella virus is present in the skin or in any other involved organ, for example by oligonucleotide or polymerase chain reaction. If strain determination reveals wild-type

varicella virus or another, non-vaccine-strain virus, the viral disease shall not be considered to be a condition set forth in the Table.

(13) *Vasovagal syncope*. Vasovagal syncope (also sometimes called neurocardiogenic syncope) means loss of consciousness (fainting) and postural tone caused by a transient decrease in blood flow to the brain occurring after the administration of an injected vaccine. Vasovagal syncope is usually a benign condition but may result in falling and injury with significant sequela. Vasovagal syncope may be preceded by symptoms such as nausea, lightheadedness, diaphoresis, and/or pallor. Vasovagal syncope may be associated with transient seizure-like activity, but recovery of orientation and consciousness generally occurs simultaneously with vasovagal syncope. Loss of consciousness resulting from the following conditions will not be considered vasovagal syncope: organic heart disease, cardiac arrhythmias, transient ischemic attacks, hyperventilation, metabolic conditions, neurological conditions, and seizures. Episodes of recurrent syncope occurring after the applicable time period are not considered to be sequela of an episode of syncope meeting the Table requirements.

(14) *Immunodeficient recipient*. Immunodeficient recipient is defined as an individual with an identified defect in the immunological system which impairs the body's ability to fight infections. The identified defect may be due to an inherited disorder (such as severe combined immunodeficiency resulting in absent T lymphocytes), or an acquired disorder (such as acquired immunodeficiency syndrome resulting from decreased CD4 cell counts). The identified defect must be demonstrated in the medical records, either preceding or postdating vaccination.

(15) *Guillain-Barré Syndrome (GBS)*. (i) GBS is an acute monophasic peripheral neuropathy that encompasses a spectrum of four clinicopathological subtypes described below. For each subtype of GBS, the interval between the first appearance of symptoms and the nadir of weakness is between 12 hours and 28 days. This is followed in all subtypes by a clinical plateau with stabilization at the nadir of symptoms, or subsequent improvement without significant relapse. Death may occur without a clinical plateau. Treatment related fluctuations in all subtypes of GBS can occur within 9 weeks of GBS symptom onset and recurrence of symptoms after this time-frame would not be consistent with GBS.

(ii) The most common subtype in North America and Europe, comprising more than 90 percent of cases, is acute inflammatory demyelinating polyneuropathy (AIDP), which has the pathologic and electrodiagnostic features of focal demyelination of motor and sensory peripheral nerves and nerve roots. Another subtype called acute motor axonal neuropathy (AMAN) is generally seen in other parts of the world and is predominated by axonal damage that primarily affects motor nerves. AMAN lacks features of demyelination. Another less common subtype of GBS includes acute motor and sensory neuropathy (AMSAN), which is an axonal form of GBS that is similar to AMAN, but also affects the sensory nerves and roots. AIDP, AMAN, and AMSAN are typically characterized by symmetric motor flaccid weakness, sensory abnormalities, and/or autonomic dysfunction caused by autoimmune damage to peripheral nerves and nerve roots. The diagnosis of AIDP, AMAN, and AMSAN requires:

- (A) Bilateral flaccid limb weakness and decreased or absent deep tendon reflexes in weak limbs;
- (B) A monophasic illness pattern;
- (C) An interval between onset and nadir of weakness between 12 hours and 28 days;
- (D) Subsequent clinical plateau (the clinical plateau leads to either stabilization at the nadir of symptoms, or subsequent improvement without significant relapse; however, death may occur without a clinical plateau); and,
- (E) The absence of an identified more likely alternative diagnosis.

(iii) Fisher Syndrome (FS), also known as Miller Fisher Syndrome, is a subtype of GBS characterized by ataxia, areflexia, and ophthalmoplegia, and overlap between FS and AIDP may be seen with limb weakness. The diagnosis of FS requires:

- (A) Bilateral ophthalmoparesis;
- (B) Bilateral reduced or absent tendon reflexes;
- (C) Ataxia;
- (D) The absence of limb weakness (the presence of limb weakness suggests a diagnosis of AIDP, AMAN, or AMSAN);
- (E) A monophasic illness pattern;
- (F) An interval between onset and nadir of weakness between 12 hours and 28 days;
- (G) Subsequent clinical plateau (the clinical plateau leads to either stabilization at the nadir of symptoms, or subsequent improvement without significant relapse; however, death may occur without a clinical plateau);
- (H) No alteration in consciousness;
- (I) No corticospinal tract signs; and
- (J) The absence of an identified more likely alternative diagnosis.

(iv) Evidence that is supportive, but not required, of a diagnosis of all subtypes of GBS includes electrophysiologic findings consistent with GBS or an elevation of cerebral spinal fluid (CSF) protein with a total CSF white blood cell count below 50 cells per microliter. Both CSF and electrophysiologic studies are frequently normal in the first week of illness in otherwise typical cases of GBS.

(v) To qualify as any subtype of GBS, there must not be a more likely alternative diagnosis for the weakness.

(vi) Exclusionary criteria for the diagnosis of all subtypes of GBS include the ultimate diagnosis of any of the following conditions: chronic immune demyelinating polyradiculopathy (CIDP), carcinomatous meningitis, brain stem encephalitis (other than Bickerstaff brainstem encephalitis), myelitis, spinal cord infarct, spinal cord compression, anterior horn cell diseases such as polio or West Nile virus infection, subacute inflammatory demyelinating polyradiculoneuropathy, multiple sclerosis, cauda equina compression, metabolic conditions such as hypermagnesemia or hypophosphatemia, tick paralysis, heavy metal toxicity (such as arsenic, gold, or thallium), drug-induced neuropathy (such as vincristine, platinum compounds, or nitrofurantoin), porphyria, critical illness neuropathy, vasculitis, diphtheria, myasthenia gravis, organophosphate poisoning, botulism, critical illness myopathy, polymyositis, dermatomyositis, hypokalemia, or hyperkalemia. The above list is not exhaustive.

(d) *Glossary for purposes of paragraph (c) of this section—*(1) *Chronic encephalopathy*. (i) A chronic encephalopathy occurs when a change in mental or neurologic status, first manifested during the applicable Table time period as an acute encephalopathy or encephalitis, persists for at least 6 months from the first symptom or manifestation of onset or of significant aggravation of an acute encephalopathy or encephalitis.

(ii) Individuals who return to their baseline neurologic state, as confirmed by clinical findings, within less than 6 months from the first symptom or manifestation of onset or of significant aggravation of an acute encephalopathy or encephalitis shall not be presumed to have suffered residual neurologic damage from that event; any subsequent chronic encephalopathy shall not be presumed to be a sequela of the acute encephalopathy or encephalitis.

(2) *Injected* refers to the intramuscular, intradermal, or

subcutaneous needle administration of a vaccine.

(3) *Sequela* means a condition or event which was actually caused by a condition listed in the Vaccine Injury Table.

(4) *Significantly decreased level of consciousness* is indicated by the presence of one or more of the following clinical signs:

(i) Decreased or absent response to environment (responds, if at all, only to loud voice or painful stimuli);

(ii) Decreased or absent eye contact (does not fix gaze upon family members or other individuals); or

(iii) Inconsistent or absent responses to external stimuli (does not recognize familiar people or things).

(5) *Seizure* includes myoclonic, generalized tonic-clonic (grand mal), and simple and complex partial seizures, but not absence (petit mal), or pseudo seizures. Jerking movements or staring episodes alone are not necessarily an indication of seizure activity.

(e) *Coverage provisions.* (1) Except as provided in paragraph (e)(2), (3), (4), (5), (6), (7), or (8) of this section, this section applies only to petitions for compensation under the program filed with the United States Court of Federal Claims on or after February 21, 2017.

(2) Hepatitis B, Hib, and varicella vaccines (Items VIII, IX, and X of the Table) are included in the Table as of August 6, 1997.

(3) Rotavirus vaccines (Item XI of the Table) are included in the Table as of October 22, 1998.

(4) Pneumococcal conjugate vaccines (Item XII of the Table) are included in the Table as of December 18, 1999.

(5) Hepatitis A vaccines (Item XIII of the Table) are included on the Table as of December 1, 2004.

(6) Trivalent influenza vaccines (Included in item XIV of the Table) are included on the Table as of July 1, 2005. All other seasonal influenza vaccines (Item XIV of the Table) are included on the Table as of November 12, 2013.

(7) Meningococcal vaccines and human papillomavirus vaccines (Items XV and XVI of the Table) are included on the Table as of February 1, 2007.

(8) Other new vaccines (Item XVII of the Table) will be included in the Table

as of the effective date of a tax enacted to provide funds for compensation paid with respect to such vaccines. An amendment to this section will be published in the **Federal Register** to announce the effective date of such a tax.

BILLING CODE 4160-15-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 3160

[17X.LLWO310000.L13100000.PP0000]

RIN 1004-AE49

Onshore Oil and Gas Operations—Annual Civil Penalties Inflation Adjustments

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule.

SUMMARY: This rule adjusts the level of civil monetary penalties contained in the Bureau of Land Management's regulations governing onshore oil and gas operations as required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the "Act"). The adjustments made by this final rule constitute the annual inflation adjustments contemplated by the Act, and are consistent with applicable Office of Management and Budget (OMB) guidance.

DATES: This rule is effective on January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Steven Wells, Division Chief, Fluid Minerals Division, 202-912-7143, for information regarding the BLM's Fluid Minerals Program. For questions relating to regulatory process issues, please contact Jennifer Noe, Division of Regulatory Affairs, at 202-912-7442. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, 24 hours a day, 7 days a week to contact the above individuals.

SUPPLEMENTARY INFORMATION:

I. Background

II. Calculation of Adjustment

III. Procedural Requirements

- A. Regulatory Planning and Review (E.O. 12866 and 13563)
- B. Regulatory Flexibility Act
- C. Small Business Regulatory Enforcement Fairness Act
- D. Unfunded Mandates Reform Act
- E. Takings (E.O. 12630)
- F. Federalism (E.O. 13132)
- G. Civil Justice Reform (E.O. 12988)
- H. Consultation with Indian Tribes (E.O. 13175 and Departmental Policy)
- I. Paperwork Reduction Act
- J. National Environmental Policy Act
- K. Effects on the Energy Supply (E.O. 13211)
- L. Administrative Procedure Act

I. Background

On November 2, 2015, the President signed the Act into law (Sec. 701 of Pub. L. 114-74). The Act requires agencies to:

1. Adjust the level of civil monetary penalties with an initial "catch-up" adjustment through an interim final rulemaking in 2016;

2. Make subsequent annual adjustments for inflation beginning in 2017; and

3. Report annually in Agency Financial Reports on these inflation adjustments.

In July 2016, the BLM issued an interim final rule that adjusted the level of civil monetary penalties with the initial "catch-up" adjustment, which is reflected in the table below in the "Previous Penalty" column.

With this final rule, the BLM is adjusting civil monetary penalties for inflation. The adjustments made by this rule are consistent with the requirements of the Act and OMB guidance.

The purpose of these adjustments is to maintain the deterrent effect of civil penalties found in existing regulations, in order to further the policy goals of the underlying statutes. The BLM has reviewed its existing regulations and determined that only the civil monetary penalties found at 43 CFR 3163.2 are subject to the Act's requirements.

The adjustments made by this final rule constitute the first annual adjustment contemplated by the Act, and include the following changes to the penalties:

CFR Citation	Description of the penalty	Previous penalty	Adjusted penalty
43 CFR 3163.2(a)	Failure to comply	\$1,031	\$1,048
43 CFR 3163.2(b)	If corrective action is not taken	10,314	10,483
43 CFR 3163.2(d)	If transporter fails to permit inspection for documentation	1,031	1,048
43 CFR 3163.2(e)	Failure to permit inspection, failure to notify	20,628	20,965
43 CFR 3163.2(f)	False or inaccurate documents; unlawful transfer or purchase	51,570	52,414
43 CFR 3163.2(g)(1)	Initial penalty under 43 CFR 3163.2(a) for a major violation	1,031	1,048
43 CFR 3163.2(g)(1)	Maximum penalty under 43 CFR 3163.2(a) for a major violation	2,063	2,097

CFR Citation	Description of the penalty	Previous penalty	Adjusted penalty
43 CFR 3163.2(g)(1)	Initial penalty under 43 CFR 3163.2(b) for a major violation	10,314	10,483
43 CFR 3163.2(g)(1)	Maximum penalty under 43 CFR 3163.2(b) for a major violation	20,628	20,965
43 CFR 3163.2(g)(1)	Penalty under 43 CFR 3163.2(d) for a major violation	1,031	1,048
43 CFR 3163.2(g)(1)	Penalty under 43 CFR 3163.2(e) for a major violation	20,628	20,965
43 CFR 3163.2(g)(1)	Penalty under 43 CFR 3163.2(f) for a major violation	51,570	52,414
43 CFR 3163.2(g)(2)(iii)	Initial penalty under 43 CFR 3163.2(a) for a minor violation	103	105
43 CFR 3163.2(g)(2)(iii)	Initial penalty under 43 CFR 3163.2(b) for a minor violation	1,031	1,048
43 CFR 3163.2(g)(2)(iii)	Maximum penalty under 43 CFR 3163.2(a) for a minor violation	206	209
43 CFR 3163.2(g)(2)(iii)	Maximum penalty under 43 CFR 3163.2(b) for a minor violation	2,063	2,097

II. Calculation of Adjustment

OMB issued guidance on calculating the annual adjustment for 2017 in accordance with the Act. See December 16, 2016, Memorandum for the Heads of Executive Departments and Agencies, from Shaun Donovan, Director, Office of Management and Budget, re:

Implementation of the 2017 annual adjustment pursuant to the Federal Civil Penalties Inflation Adjustment Act

Improvements Act of 2015. Under this guidance, the Department of the Interior has identified applicable civil monetary penalties and calculated the annual adjustment. A civil monetary penalty is any assessment with a dollar amount that is levied for a violation of a Federal civil statute or regulation, and is assessed or enforceable through a civil action in Federal court or an administrative proceeding. A civil monetary penalty does not include a penalty levied for violation of a criminal statute, or fees for services, licenses, permits, or other regulatory review. The calculated annual inflation adjustments are based on the percent change between the October CPI-U preceding the date of the adjustment, and the prior year's October CPI-U. In this case, October 2016 CPI-U (241.729)/October 2015 CPI-U (237.838) = 1.01636.

III. Procedural Requirements

A. Regulatory Planning and Review (E.O. 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs in the Office of Management and Budget will review all significant rules. The Office of Information and Regulatory Affairs has determined that this rule is not significant. Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility

and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science, and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) requires an agency to prepare a regulatory flexibility analysis for rules unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The RFA applies only to rules for which an agency is required to first publish a proposed rule. See 5 U.S.C. 603(a) and 604(a). The Act requires agencies to adjust civil penalties annually for inflation through a final rule (see § 4(b)(2) of the Act). Because the final rule in this case does not include publication of a proposed rule, the RFA does not apply to this final rule.

C. Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(a) Does not have an annual effect on the economy of \$100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

This rule will potentially affect individuals and companies who hold leases on Federal or Indian lands. The BLM believes that the vast majority of potentially affected entities will be small businesses as defined by the Small Business Administration.

However, the BLM does not believe the rule will pose a significant economic impact on the industry, including any small entities, for two reasons. First, any lessee can avoid being assessed civil penalties by operating in compliance with BLM rules and regulations.

Second, payments for penalties adjusted as a result of this rule will be negligible compared with the \$23 billion worth of crude oil and natural gas produced from Federal and Indian leases in FY 2015.

D. Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments, or the private sector of more than \$100 million per year. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

E. Takings (E.O. 12630)

This rule does not effect a taking of private property or otherwise have takings implications under Executive Order 12630. A takings implication assessment is not required.

F. Federalism (E.O. 13132)

Under the criteria in section 1 of Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. A federalism summary impact statement is not required.

G. Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of Executive Order 12988. Specifically, this rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

H. Consultation With Indian Tribes (E.O. 13175 and Departmental policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian tribes through a commitment to consultation with Indian tribes and recognition of their right to self-governance and tribal sovereignty. We have evaluated this rule under the Department's consultation policy and under the criteria in Executive Order 13175 and have determined that it has no substantial direct effects on federally recognized Indian tribes and that consultation under the Department's tribal consultation policy is not required.

I. Paperwork Reduction Act

This rule does not contain information collection requirements, and a submission to OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

J. National Environmental Policy Act

A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rule is covered by a categorical exclusion. This rule is excluded from the requirement to prepare a detailed statement because it is a regulation of an administrative nature. (For further information see 43 CFR 46.210(i).) We have also determined that the rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA.

K. Effects on the Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in Executive Order 13211. Therefore, a Statement of Energy Effects is not required.

L. Administrative Procedure Act

The BLM is promulgating this rule as a final rule because the Act expressly directs us to do so. In accordance with the Act, agencies must adjust civil monetary penalties notwithstanding Section 553 of the Administrative Procedure Act (APA) (see § 4(b)(2) of the Act). This means that the notice and opportunity to comment procedures of the APA do not apply and are not required for agencies to issue regulations implementing the annual adjustment. In addition, since the Act does not give the BLM any discretion to vary the amount of the annual inflation

adjustment for any given penalty to reflect any views or suggestions provided by commenters, it would serve no purpose to provide an opportunity for public comment on this rule.

List of Subjects 43 CFR Part 3160

Administrative practice and procedure; Government contracts; Indians-lands; Mineral royalties; Oil and gas exploration; Penalties; Public lands-mineral resources; Reporting and recordkeeping requirements.

For the reasons given in the preamble, the BLM amends Chapter II of Title 43 of the Code of Federal Regulations as follows:

PART 3160—ONSHORE OIL AND GAS OPERATIONS

■ 1. The authority citation for part 3160 is revised to read as follows:

Authority: 25 U.S.C. 396d and 2107; 30 U.S.C. 189, 306, 359, and 1751; 43 U.S.C. 1732(b), 1733, 1740; and Sec. 107, Pub. L. 114–74, 129 Stat. 599, unless otherwise noted.

Subpart 3163—Noncompliance, Assessments, and Penalties

§ 3163.2 [Amended]

■ 2. In § 3163.2:

■ a. In paragraph (a), remove “\$1,031” and add in its place “\$1,048”.

■ b. In paragraph (b), remove “\$10,314” and add in its place “\$10,483”.

■ c. In paragraph (d), remove “\$1,031” and add in its place “\$1,048”.

■ d. In paragraph (e) introductory text, remove “\$20,628” and add in its place “\$20,965”.

■ e. In paragraph (f) introductory text, remove “\$51,570” and add in its place “\$52,414”.

■ f. In paragraph (g)(1), remove “\$1,031” each place that it occurs and add in its place “\$1,048”; remove “\$10,314” and add in its place “\$10,483”; remove “\$2,063” and add in its place “\$2,097”; remove “\$20,628” each place that it occurs and add in its place “\$20,965”; remove “\$51,570” and add in its place “\$52,414”.

■ g. In paragraph (g)(2)(iii), remove “\$103” and add in its place “\$105”; remove “\$1,031” and add in its place “\$1,048”; remove “\$206” and add in its place “\$209”; remove “\$2,063” and add in its place “\$2,097”.

Dated: January 10, 2017.

Amanda C. Leiter,

Acting Assistant Secretary, Land and Minerals Management.

RIN 1018–BB97

Civil Penalties; 2017 Inflation Adjustments for Civil Monetary Penalties

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service or we) is issuing this final rule, in accordance with the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Inflation Adjustment Act) and Office of Management and Budget (OMB) guidance, to adjust for inflation the statutory civil monetary penalties that may be assessed for violations of Service-administered statutes and their implementing regulations. We are required to adjust civil monetary penalties annually for inflation according to a formula specified in the Inflation Adjustment Act. This rule replaces the previously issued amounts with the updated amounts after using the 2017 inflation adjustment multiplier provided in the OMB guidance.

DATES: This rule is effective January 19, 2017.

ADDRESSES: This rule may be found on the internet at www.regulations.gov in Docket No. FWS–HQ–LE–2017–0001. The previous rulemaking action related to this rule and described below in **SUPPLEMENTARY INFORMATION** may be found at www.regulations.gov in Docket No. FWS–HQ–LE–2016–0045.

FOR FURTHER INFORMATION CONTACT: Paul Beiriger, Special Agent in Charge, Branch of Investigations, U.S. Fish and Wildlife Service, Office of Law Enforcement, (703) 358–1949.

SUPPLEMENTARY INFORMATION:

Background

The regulations in title 50 of the Code of Federal Regulations at 50 CFR part 11 provide uniform rules and procedures for the assessment of civil penalties resulting from violations of certain laws and regulations enforced by the Service.

On November 2, 2015, the President signed into law the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (sec. 701 of Pub. L. 114–74) (Inflation Adjustment Act). The Inflation Adjustment Act requires Federal agencies to adjust the

level of civil monetary penalties with an initial “catch up” adjustment through rulemaking and then make subsequent annual adjustments for inflation. The purpose of these adjustments is to maintain the deterrent effect of civil penalties and to further the policy goals of the underlying statutes.

Under section 4 of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the Inflation Adjustment Act, Pub. L. 114–74, 129 Stat. 584 (2015), each Federal agency is required to issue regulations adjusting for inflation the statutory civil monetary penalties (civil penalties) that can be imposed under the laws administered by that agency. The Inflation Adjustment Act provided for an initial “catch up adjustment” to take effect no later than August 1, 2016, followed by subsequent adjustments to be made no later than January 15 every year thereafter. This final rule adjusts the civil penalty amounts that may be imposed pursuant to each statutory provision beginning on the date specified above in DATES.

On June 28, 2016, the Service published in the **Federal Register** an interim rule that revised 50 CFR part 11 (81 FR 41862). We did not receive any comments on the interim rule during the public comment period provided. Therefore, the interim rule became effective on July 28, 2016, as specified in that rule. The Service subsequently published a final rule on December 23, 2016, adopting the interim rule as final (81 FR 94274). The current rule adjusts the civil monetary penalty amounts that were listed in the June 28, 2016, interim rule and subsequently codified in 50 CFR 11.33 by using the inflation multiplier provided to all Federal agencies by OMB (see below).

OMB issued a memorandum, M–17–11, entitled “Implementation of the 2017 annual adjustment pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015,” which provides the cost-of-living adjustment multiplier for 2017: 1.01636. Therefore, we multiplied each penalty in the table published in the interim rule on June 28, 2016 (81 FR 41862), by

1.01636 to obtain the 2017 annual adjustment. The new amounts are reflected in the table in the rule portion of this document and replace the current amounts in 50 CFR 11.33.

Required Determinations

In this final rule, we are affirming our required determinations made in the June 28, 2016, interim rule (81 FR 41862); for descriptions of our actions to ensure compliance with the following statutes and Executive Orders, see that rule:

National Environmental Policy Act (42 U.S.C. 4321 *et seq.*);
Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
Small Business Regulatory Enforcement Fairness Act (5 U.S.C. 804(2));
Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*);
Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*); and
Executive Orders 12630, 12866, 12988, 13132, 13175, 13211, and 13563.

Administrative Procedure Act

As stated above, under section 4 of the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, as amended by the Inflation Adjustment Act, Pub. L. 114–74, 129 Stat. 584 (2015), each Federal agency is required to issue regulations adjusting for inflation the statutory civil monetary penalties that can be imposed under the laws administered by that agency. The Inflation Adjustment Act provided for an initial “catch up adjustment” to take effect no later than August 1, 2016, followed by subsequent adjustments to be made no later than January 15 every year thereafter. This final rule adjusts the civil penalty amounts that may be imposed pursuant to each statutory provision beginning on the effective date of this rule. To comply with the Inflation Adjustment Act, we are issuing these regulations as a final rule.

Section 553(b) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, the agency may issue a rule

without providing notice and an opportunity for prior public comment. The Service finds that providing for public comment before issuing this rule is unnecessary as this rulemaking is a nondiscretionary action. The Service is required to publish this rule in order to update the civil penalty amounts by the specified formula described above. The Service has no discretion to vary the amount of the adjustment to reflect any views or suggestions provided by commenters. Accordingly, it would serve no purpose to provide an opportunity for public comment prior to publication of this rule. Since this update to the June 28, 2016, interim rule (81 FR 41862) is merely ministerial, we find that pre-publication notice and public comment with respect to the revisions set forth in this rule is unnecessary. We also believe that we have good cause under 5 U.S.C. 553(d) to make this rule effective upon publication to meet the statutory deadline imposed by the Inflation Adjustment Act.

List of Subjects in 50 CFR Part 11

Administrative practice and procedure, Exports, Fish, Imports, Penalties, Plants, Transportation, Wildlife.

Regulation Promulgation

For the reasons described above, we amend part 11, subchapter B of chapter I, title 50 of the Code of Federal Regulations as set forth below.

PART 11—CIVIL PROCEDURES

■ 1. The authority citation for part 11 continues to read as follows:

Authority: 16 U.S.C. 470aa–470mm, 470aaa–470aaa-11, 668–668d, 1361–1384, 1401–1407, 1531–1544, 3371–3378, 4201–4245, 4901–4916, 5201–5207, 5301–5306; 18 U.S.C. 42–43; 25 U.S.C. 3001–3013; and Sec. 107, Pub. L. 114–74, 129 Stat. 599, unless otherwise noted.

■ 2. Revise the table in § 11.33 to read as follows:

§ 11.33 Adjustments to penalties.

* * * * *

Law	Citation	Type of violation	Maximum civil monetary penalty
(a) African Elephant Conservation Act ..	16 U.S.C. 4224(b)	Any violation	\$10,055
(b) Bald and Golden Eagle Protection Act.	16 U.S.C. 668(b)	Any violation	12,705
(c) Endangered Species Act of 1973	16 U.S.C. 1540(a)(1)	(1) Knowing violation of section 1538 ... (2) Other knowing violation	50,276 24,132
		(3) Any other violation	1,270
(d) Lacey Act Amendments of 1981	16 U.S.C. 3373(a)	(1) Violations referred to in 16 U.S.C. 3373(a)(1).	25,409

RIN 0648-XD771

Endangered and Threatened Wildlife and Plants; Final Rule To List Two Guitarfishes as Threatened Under the Endangered Species Act

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: We, NMFS, issue a final rule to list two foreign marine guitarfish species under the Endangered Species Act (ESA). We considered comments submitted on the proposed listing rule and have determined that the blackchin guitarfish (*Rhinobatos cemiculus*) and common guitarfish (*Rhinobatos rhinobatos*) warrant listing as threatened species. We will not designate critical habitat for either of these species because the geographical areas occupied by these species are entirely outside U.S. jurisdiction, and we have not identified any unoccupied areas within U.S. jurisdiction that are currently essential to the conservation of either of these species.

DATES: This final rule is effective February 21, 2017.

ADDRESSES: Chief, Endangered Species Division, NMFS Office of Protected Resources (F/PR3), 1315 East West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Brendan Newell or Marta Nammack NMFS, Office of Protected Resources (OPR), (301) 427-8403.

SUPPLEMENTARY INFORMATION:

Background

On July 15, 2013, we received a petition from WildEarth Guardians to list 81 marine species or subpopulations as threatened or endangered under the ESA. This petition included species from many different taxonomic groups, and we prepared our 90-day findings in batches by taxonomic group. We found that the petitioned actions may be warranted for 24 of the species and 3 of the subpopulations and announced the initiation of status reviews for each of the 24 species and 3 subpopulations (78 FR 63941, October 25, 2013; 78 FR 66675, November 6, 2013; 78 FR 69376, November 19, 2013; 79 FR 9880, February 21, 2014; and 79 FR 10104, February 24, 2014). On September 19, 2016, we published a proposed rule to list the blackchin guitarfish (*Rhinobatos cemiculus*) and the common guitarfish (*Rhinobatos rhinobatos*) as threatened species (81 FR 64094). We requested public comment on information in the draft status review and proposed rule, and the comment period was open through November 18, 2016. This final rule provides a discussion of the information we received during the public comment period and our final determination on the petition to list the blackchin guitarfish and the common guitarfish under the ESA. The status of the findings and relevant **Federal Register** notices for the other 22 species and 3 subpopulations can be found on our Web site at www.nmfs.noaa.gov/pr/species/petition81.htm.

Listing Species Under the Endangered Species Act

We are responsible for determining whether species are threatened or endangered under the ESA (16 U.S.C. 1531 *et seq.*). To make this determination, we consider first whether a group of organisms constitutes a “species” under the ESA, then whether the status of the species qualifies it for listing as either threatened or endangered. Section 3 of the ESA defines a “species” to include “any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature.”

Section 3 of the ESA defines an endangered species as “any species which is in danger of extinction throughout all or a significant portion of its range” and a threatened species as one “which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.” We interpret an “endangered species” to be one that is presently in danger of extinction. A “threatened species,” on the other hand, is not presently in danger of extinction, but is likely to become so in the foreseeable future (that is, at a later time). In other words, the primary statutory difference between a threatened and endangered species is the timing of when a species may be in danger of extinction, either presently (endangered) or in the foreseeable future (threatened).

When we consider whether a species might qualify as threatened under the ESA, we must consider the meaning of the term “foreseeable future.” It is appropriate to interpret “foreseeable future” as the horizon over which predictions about the conservation status of the species can be reasonably relied upon. The foreseeable future

considers the life history of the species, habitat characteristics, availability of data, particular threats, ability to predict threats, and the reliability to forecast the effects of these threats and future events on the status of the species under consideration. Because a species may be susceptible to a variety of threats for which different data are available, or which operate across different time scales, the foreseeable future is not necessarily reducible to a particular number of years.

Section 4(a)(1) of the ESA requires us to determine whether any species is endangered or threatened due to any of the following factors: The present or threatened destruction, modification, or curtailment of its habitat or range; overutilization for commercial, recreational, scientific, or educational purposes; disease or predation; the inadequacy of existing regulatory mechanisms; or other natural or manmade factors affecting its continued existence. Under section 4(b)(1)(A), we are also required to make listing determinations based solely on the best scientific and commercial data available, after conducting a review of the species' status and after taking into account efforts being made by any state or foreign nation to protect the species.

In making a listing determination, we first determine whether a petitioned species meets the ESA definition of a "species." Next, using the best available information gathered during the status review for the species, we complete a status and extinction risk assessment. In assessing extinction risk for these two guitarfishes, we considered the demographic viability factors developed by McElhany *et al.* (2000). The approach of considering demographic risk factors to help frame the consideration of extinction risk has been used in many of our status reviews, including for Pacific salmonids, Pacific hake, walleye pollock, Pacific cod, Puget Sound rockfishes, Pacific herring, scalloped hammerhead sharks, and black abalone (see www.nmfs.noaa.gov/pr/species/ for links to these reviews). In this approach, the collective condition of individual populations is considered at the species level according to four viable population descriptors: abundance, growth rate/productivity, spatial structure/connectivity, and diversity. These viable population descriptors reflect concepts that are well-founded in conservation biology and that individually and collectively provide strong indicators of extinction risk (NMFS 2015).

We then assess efforts being made to protect the species to determine if these conservation efforts are adequate to

mitigate the existing threats. Section 4(b)(1)(A) of the ESA requires the Secretary, when making a listing determination for a species, to take into consideration those efforts, if any, being made by any State or foreign nation to protect the species.

Summary of Comments

In response to our request for comments on the proposed rule, we received five comment letters. Two comment letters were from foreign governments and clarified information about their relevant regulations. One comment letter was from an environmental nonprofit organization supporting our proposed listing decision. Two comment letters were submitted anonymously, each challenging a number of our statements or conclusions in the status review or proposed rule, generally without providing references or evidence that would allow us to investigate further. One commenter also provided some editorial comments, which were incorporated in the status review as appropriate. Summaries of issues raised by the public comments received and our responses are provided below, with references where appropriate.

Comment 1: One commenter pointed out that *R. cemiculus* is also referred to in some of the literature by the taxonomic synonym *Glaucostegus cemiculus*.

Response: The fact that *Glaucostegus cemiculus* is a synonym for *R. cemiculus* has been added to the *Taxonomy and Distinctive Characteristics* section of the status review. Although we did not include this synonym in the draft status review this did not impact the development of the status review or proposed rule. We were aware of this synonym and searched for publications related to this species using both *Rhinobatos cemiculus* and *Glaucostegus cemiculus* while gathering information for the status review.

Comment 2: One commenter disagreed with our description of the smallest reported length for a fish in a study as the "minimum total length (TL)," stating that minimum TL is always 0 mm for all animals.

Response: The word *minimum* was used while discussing the smallest lengths ever reported for juveniles of each species. We did not intend to imply that the reported lengths were the smallest possible lengths that the animals could be. We have revised the status review to clarify this point.

Comment 3: One commenter noted that we did not include the *k* value for *R. rhinobatos* reported in Ismen *et al.*

(2007) in the discussion about growth rates.

Response: The *k* value from Ismen *et al.* (2007) has been added to the discussion in the *Reproduction and Growth* section of the status review.

Comment 4: One commenter claimed our analysis is biased because we discuss "conflict" in the literature regarding conclusions researchers have reached about the two guitarfish species' reproductive potential and growth rates. This commenter stated that these different conclusions reached by researchers are not conflicting conclusions but are evidence of intraspecific variation, which could be evidence of population structure. The same party made multiple other comments about regional variations in morphology and biology indicating population structure. An additional commenter also claimed that there is more evidence for population structuring in these guitarfishes than three ESA-listed species of angelshark, *Squatina aculeata*, *S. oculata*, and *S. squatina*. These three *Squatina* species were listed as endangered on August 1, 2016 (81 FR 50394). This commenter provided no references to validate this claim.

Response: We disagree with the commenter's implication that noting conflicting conclusions from different authors about a species' life history implies bias. We acknowledge that variations in biology in different portions of a species' range could imply population structure. However, Lteif (2015) attributed these variations to environmental differences throughout each species' range (e.g., food availability and water temperatures) or the relatively small amount of data on the species and differences in sampling approach. ICES (2010) stated that the relationships between the Mediterranean and Atlantic stocks of *R. cemiculus* and *R. rhinobatos* are unclear. We found no other discussions of population structure in the available information. Given the lack of information, we could not reach conclusions about population structure. Our status review presents the best available information and notes where authors have reached different conclusions to accurately represent the available information.

Comment 5: One commenter asserted that the discussion in the status review of both species' preference for warmer waters is moot because the only temperature data provided in the document is sea surface temperature data, and as both species are demersal, they live below the thermocline. This commenter also asserted that, in our

discussion about the threat of climate change in the status review, we failed to address specifically how changing bottom temperatures will affect the species.

Response: According to the best available scientific information, both of the guitarfishes are demersal species that typically occur up to a maximum depth of 100m and spend at least a portion of their lives in shallow waters. The only information we found regarding how these species interact with water temperature is that both species prefer warmer, subtropical waters (Capape and Zaouali 1994; Corsini-Foka 2009; Edelist 2014). The discussion in the status review is about the role that temperature likely plays in restricting many Mediterranean species to biogeographic ranges. While we consider this information relevant to understanding both guitarfish species' habitat and distribution, we explicitly acknowledged in the draft status review that we found no information on how any particular isotherm affects the distribution and abundance of these guitarfish species. We found no discussion in the scientific literature regarding how these species interact with thermoclines, the depths of which likely vary seasonally and regionally given the wide distribution of these species (Coll *et al.*, 2010). Specifically regarding climate change, Akyol and Capapé (2014) and Rafrafi-Nouira *et al.* (2015) both attributed shifts in *R. cemiculus* distribution to warming waters but did not discuss bottom temperatures or thermoclines. No references were provided by the commenter to explain how both species interact with thermoclines or invalidate our interpretation that sea surface and mixed layer temperature is likely relevant to the distribution of these subtropical species.

Comment 6: One commenter asserted that our assumption that both guitarfish species are likely mirroring the trend of decreasing elasmobranch and batoid (rays, skates, guitarfishes, etc.) landings in southern Tunisia, where the best available information shows that both guitarfish species made up a high proportion of the total elasmobranch catch in the longline and gillnet fisheries over a 2-year period, is flawed, because, "A high percentage of one species in a catch at one time says nothing about the trend of that species over time as different species can be targeted or caught with different methods or have different population structures and sources and sinks."

Response: We agree that a high percentage of one species in a catch at one time does not indicate a trend.

However, the data in question were collected across two different fisheries (longline and gillnet) and in each case the data were collected over multiple months in both 2007 and 2008 years (Echwiki *et al.*, 2013; Echwiki *et al.*, 2012). Echwiki *et al.* (2013) and Echwiki *et al.* (2012) discuss their results in the context of the trends in elasmobranch abundance declines in the region. An additional citation (Bradaï *et al.*, 2006) has been added to the status review and provides further indication that both species have been and are commonly targeted and landed in southern Tunisia. Given the high proportion of these guitarfish species in the studied artisanal fisheries catches, and the fact that these species are known to be commonly targeted and landed in southern Tunisia, it is likely that the abundance trends for these species are similar to the overall trend of declining elasmobranch catches in southern Tunisia.

Comment 7: One commenter made several comments that there is no evidence that *R. rhinobatos* and *R. cemiculus* were likely historically rare throughout most of the northwestern Mediterranean relative to other portions of its range (e.g., the southern and eastern Mediterranean). The same commenter challenged our conclusion that both species have likely always been rare in all parts of their Atlantic ranges north of the Strait of Gibraltar. This commenter asserted that we failed to include museum records and anthropological literature, but the commenter did not provide any references.

Response: Our interpretation of the best available information is that *R. rhinobatos* and *R. cemiculus* were present, but likely uncommon or rare throughout most of the northwestern Mediterranean (including the waters off Spain, the seas around Italy, and, in the case of *R. rhinobatos*, the waters of France), with the exception of the waters around Sicily and the Balearic Islands. This interpretation is consistent with the conclusions reached in the best available scientific literature (Akyol and Capapé 2014; Capapé *et al.*, 2006; Capapé *et al.*, 1975; Dulpiu *et al.*, 2005; Psomadakis *et al.*, 2009). In the parts of their Atlantic ranges north of the Strait of Gibraltar, as stated in the status review, we found information that indicates both species have been rare for at least the last 45 years (ICES 2016), and no information that indicates either species was common at any time in what is known to be the northern extent of their ranges.

To reach these conclusions we searched for data and publications

related to both species, and guitarfishes in general, in all of the countries and seas that are considered part of either species' historical range. In the status review, we considered and incorporated the best available information, which included peer reviewed scientific articles, regional checklists of ichthyofauna, studies of fishers' knowledge, reports from conservation organizations (e.g., IUCN), and museum records. We also used relevant data from long term datasets such as trawl surveys and regional fisheries databases, including the MEDITS survey program (International bottom trawl survey in the Mediterranean) and the International Council for the Exploration of the Sea (ICES) DATRAS (Baino *et al.*, 2001; Bertrand *et al.*, 2000, ICES 2016). The only publications that we found that concluded that both species were common throughout the northwestern Mediterranean were the IUCN assessments of both species (Notarbartolo di Sciara *et al.*, 2007a; Notarbartolo di Sciara *et al.*, 2007b) and ICES (2010). All three of these reports specifically discuss and provide references for both species once being common off the Balearic Islands and Sicily, which make up a small amount of the overall area of the northwestern Mediterranean. No references were cited in these three reports to provide evidence that *R. rhinobatos* or *R. cemiculus* were common in the remaining area of the northwestern Mediterranean.

Comment 8: One commenter noted the lack of explanation about what we mean by "available literature."

Response: A summary of how we compiled the information used in the status review was added to the second paragraph of the *Scope and Intent of Present Document* section of the status review.

Comment 9: Regarding the *Overutilization for Commercial, Recreational, Scientific, or Educational Purposes* section of the status review, one commenter stated: "Generally in this section you misunderstand the difference between science and fisheries data. Scientifically gathered data is preferable and you are required to use the best available SCIENCE. Fisheries catch and landing data are not the best possible type of data, are not scientifically gathered and have serious flaws which you ignore entirely."

Response: The commenter incorrectly restricts the information we are required to use. ESA Section 4(b)(1)(A) states: "The Secretary shall make determinations required by [Section 4](a)(1) solely on the basis of the best scientific and commercial data available

to him . . .” There is a paucity of scientific studies on both species range wide, including the almost complete lack of fisheries independent population data, a fact that is well documented in the status review and proposed rule. We agree that additional scientifically gathered data would greatly enhance our ability to accurately understand the status of both species. However, when analyzing the threat of commercial fisheries to these guitarfishes, fisheries data are relevant and valuable. Therefore, this information must be considered as a source of “best scientific and commercial data available,” regardless of flaws with these data, which are acknowledged and discussed throughout the status review.

Comment 10: Also regarding the discussion of commercial overutilization in the *Overutilization for Commercial, Recreational, Scientific, or Educational Purposes* section of the status review, one commenter asks: “why is only bycatch considered?”

Response: All types of interactions with commercial and artisanal fisheries are considered and described in the status review, including bycatch from industrial and artisanal fishing and targeted fishing of both guitarfish species by artisanal fishers using gillnets, longlines, and beach based lines. The commenter may have missed the information by focusing on only one part of the discussion within the section.

Comment 11: Regarding the passage in the status review: “At the time of the 2007 publication of the IUCN report *Overview of the Conservation Status of Cartilaginous Fishes (Chondrichthyans) in the Mediterranean Sea*,” by Cavanagh and Gibson (2007) there were six Mediterranean elasmobranchs affected by target fisheries . . . It is unclear if *R. rhinobatos* and *R. cemiculus* were two of the six targeted species referenced in this report”, one commenter asked how it can be unclear if the two *Rhinobatos* species were not part of the six species referred to in Cavanagh and Gibson (2007).

Response: Cavanagh and Gibson (2007) did not discuss which elasmobranch species or groups were part of past or present targeted fisheries, except for using angelsharks (*Squatina spp.*) as an example of species that had become so rare they were no longer targeted. Therefore, it was not possible to determine which six Mediterranean elasmobranch species were considered to be affected by targeted fisheries by Cavanagh and Gibson (2007).

Comment 12: One commenter stated that the discussion of elasmobranch landing trends in Egyptian fisheries in

the status review is contradictory because it claims both increased and decreased landings in Egyptian fisheries.

Response: In Egypt, an increase in effort across fisheries led to a decrease in overall fisheries landings, but an increase in the landings of, and demand for, elasmobranchs, which had previously been discarded. The commenter appears to have misunderstood the discussion in the status review. Elasmobranch landings increased because the landings of preferred, non-elasmobranch targets were decreasing. Thus, elasmobranchs, which were always caught but previously discarded, have been landed at a higher rate by fishers to offset the decreasing availability of other species.

Comment 13: Regarding the discussion in the status review of the development of the shark (and other shark-like elasmobranchs) fin industry in the Atlantic, one commenter stated, “you claim a need for increased effort CAUSES a need to maximize profits. This is quite [a] twist on economic theory which usually has causation go from the desire for profit as the starting point causing need for more effort . . .”

Response: This conclusion was reached by Diop and Dossa (2011) who provide the most comprehensive report on shark fishing in West Africa available. As explained in the status review, as fisheries in easily accessible areas became overexploited, fishers had to travel farther to find fish. This increased effort raised their cost of doing business (e.g., fuel costs). Because storage capacity is limited on fishing vessels, and shark fins are more valuable than other products that would take up more space, shrinking profit margins that resulted from the need to increase effort contributed to the unsustainable shift to retaining a larger percentage of the highest value products (i.e., shark fins from many sharks) rather than utilizing the entire shark or less valuable species.

Comment 14: One commenter stated that while we noted in the status review that large sharks, such as dusky sharks, are predators of *Rhinobatos* spp., we failed to discuss how the decline of dusky sharks would impact *R. cemiculus* and *R. rhinobatos*.

Response: Based on our analysis, predation is not posing a threat to either guitarfish species and, with the exception of one sentence in Camhi *et al.* (2005), we found no additional information regarding predation on guitarfishes by any shark species. Additionally, dusky sharks were an example of a large shark that preys on

these species, but not the only shark species to do so.

Comment 15: One commenter stated that in the *Commercial Overutilization in the Atlantic* section of the status review “you claim *Rhinobatos* is found in the highest numbers but you fail to say compared to what or part of what grouping.”

Response: The sentence the commenter is referring to is a quote provided in a series of quotes of the qualitative descriptions of elasmobranch fisheries in West African nations by Diop and Dossa (2011). In all cases, Diop and Dossa (2011) were discussing landing of guitarfishes relative to other elasmobranchs. Additional text has been added to the *Commercial Overutilization in the Atlantic* section to clarify this point.

Comment 16: One commenter pointed out the recent evidence suggesting a decline in the demand for shark fins.

Response: A paragraph further discussing trends in demand for shark fins and meat, as well as the uncertainty related to how these shifts in demand are impacting both guitarfish species, has been added to the *Commercial Overutilization in the Atlantic* section of the status review.

Comment 17: One commenter stated that we are required to consider the interaction of the ESA Section 4 (a)(1) factors but failed to do so.

Response: The commenter is correct that we are required to consider the interaction between the ESA 4(a)(1) factors, and we did so. We present a discussion of the interactions among the threats and each species’ demographic risks in the *Extinction Risk Analysis* sections of the status review for each species. However, because data on both species and their threats are generally lacking, a more detailed analysis of the interactions among the threat factors was not possible.

Comment 18: One commenter stated that we incorrectly limited our analysis to present and future threats only and that we should have also considered past threats.

Response: The ESA and the section 4 regulations require that we list a species if the species is endangered or threatened because of any of the five factors in ESA section 4 (a)(1). Included in our risk analysis is an assessment of the manifestation of past threats that have contributed to the species’ current status.

Comment 19: One commenter stated, “Foreseeable future discussion is confounded and you just assert your timeline, you provide no evidence it is the best available. Assertions really aren’t [sic] facts.”

Response: As discussed in *Box 2: Defining Foreseeable Future* in the status review, the foreseeable future for both guitarfish species (15–20 years) is based on these species' life histories and the main threats each species faces. Given the relatively low productivity of these species, it will likely take more than one generation for these species to recover. 15–20 years corresponds to approximately three generations of *R. cemiculus*, which likely reproduces at a slower rate than *R. rhinobatos*. 15–20 years is also a reasonable period of time to project the continued threats of overutilization and inadequacy of existing regulations. Many of the regulations that protect these species have recently been adopted and are inadequately enforced. Given both species' reproductive life history traits, 15–20 years is a reasonable amount of time to foresee continued decline of both species should these regulations continue to be inadequate, which seems likely at this time. The commenter provided no information to invalidate any or all of the justification for our definition.

Comment 20: One commenter pointed out that in our discussion of the increase in abundance of *R. rhinobatos* in the Tunis Northern and Southern Lagoon after restoration, we did not discuss the possibility that individuals could be migrating into the area without an increase in the overall population.

Response: A sentence acknowledging that it is unknown if the increase of *R. rhinobatos* in the Tunis Lagoons is the result of an increasing population or simply individuals migrating into what has become suitable habitat has been added to the *Demographic Risk Analysis* section of the status review.

Comment 21: One commenter stated that we missed the following references: Ali *et al.* (2008), Ambrose (2004), Bauchot (1987), Faruggia, Feretti, Lloris, and Rucabado (1998), McEachran and Capape (1984), Seck *et al.* (2004), Valadou (2003), and Whitehead *et al.* (1984).

Response: In response to this comment, we conducted a search for the references listed that we were unaware of, which were Ambrose (2004), Valadou (2003), and Faruggia *et al.* (1998). Only an abstract for Ambrose. (2004) was available online, which contained no information about guitarfishes. Because we were not able to review this publication we have not included it in this analysis. We requested but have not received a copy of Valadou (2003), which is a master's dissertation that we cannot access online. We were also unable to find

Faruggia *et al.* (1998) based on the information provided.

We were already aware of Seck *et al.* (2004), Ali *et al.* (2008), Bauchot (1987), McEachran and Capape (1984), and Whitehead *et al.* (1984). Seck *et al.* (2004) was used and cited in our draft status review and proposed rule. Ali *et al.* (2008) was not available online or through interlibrary loan during the development of the status review, proposed rule, and final rule, and we reached out to one of the authors regarding this and another publication but have not received a response. Because this comment was submitted anonymously, we also could not contact the commenter with a request for a copy of this or other references. Bauchot (1987), McEachran and Capape (1984), and Whitehead *et al.* (1984) are identification guides that provide basic taxonomic and life history information consistent with information already included in the status review. Thus, these references provided no additional information that would affect our status review.

Comment 22: One comment letter asserted that our decision to list *R. rhinobatos* and *R. cemiculus* as threatened is arbitrary and capricious because the commenter believes that both guitarfish species are "in at least as bad a condition" as three species of angelshark, *Squatina aculeata*, *S. oculata*, and *S. squatina*, which are listed as endangered under the ESA (81 FR 50394). This commenter provided the following reasons for this opinion: (1) These five species are all demersal elasmobranchs that share similar ranges, thus they face similar spatial threats; (2) The maximum depth that the guitarfishes occur in (100m) is shallower than the angelsharks' maximum depth (550m), thus the guitarfishes must be easier for humans to catch, increasing their vulnerability; (3) Guitarfishes have a faster reproductive cycle, smaller litter size, later age at maturity, and likely longer life span than the angelsharks, which makes the guitarfishes less resilient to overexploitation; (4) The guitarfishes, but not the angelsharks, are known to have an inshore migration for reproduction, putting the guitarfishes at a greater risk from human threats; (5) There is more evidence of population structuring for the guitarfishes than the angelsharks, resulting in smaller, isolated, less resilient populations; (6) There is higher commercial demand and fewer conservation efforts for the guitarfishes than the angelsharks; (7) Abundance data, including data from the Canary Islands and the northwest Mediterranean, support a worse status

for the guitarfishes than the angelsharks, and; (8) The guitarfishes were likely in demand and serially exploited even earlier than the angelsharks.

Response: While we acknowledge that all five species share some similarities in biology, ecology, and threats, we do not base decisions on whether or not one species should be listed as threatened or endangered solely on similarities in life history traits or circumstances with other listed species. We assess each species individually based on the best scientific and commercial information available, considering both the demographic risks facing the species as well as current and future threats that may affect the species' status. Data on all five species are lacking, but the best available information shows that all three angelsharks are extremely rare throughout most of their ranges, with evidence of declines in abundance and subsequent extirpations and range curtailment, while both guitarfishes are likely still somewhat abundant in relatively larger portions of their ranges, such as within portions of the southern and eastern Mediterranean and West Africa (Echwiki *et al.*, 2012; Golani 2006; Ismen *et al.*, 2007, Lteif 2015, M. Ducrocq, Parcs Gabon, pers. comm. to J. Shultz, NMFS, 21 June, 2016; Miller 2016, Saad *et al.*, 2006).

To specifically address some of the commenter's points about guitarfish, regarding point (6), while both the guitarfish and the angelsharks face threats from commercial fishing, it is not appropriate to directly compare the fishing related threats these species face. For example, the fin trade has contributed to the decline of the guitarfishes but is not a direct threat to the angelsharks, while historical commercial fishing pressure on angelsharks has already made these species so rare that they can no longer support fisheries in most areas. Regarding points (5) and (7), the commenter provided no references to verify the assertions about the two guitarfishes' population structures or abundance throughout their respective ranges or the presence of guitarfish in the Canary Islands, so we are unable to determine the validity of any data upon which the commenter based these assertions. As such, without any new information to consider, we maintain our previous conclusion in the proposed rule that the two guitarfish species are likely to be in danger of extinction in the foreseeable future throughout their ranges and, thus, are threatened species under the ESA.

Additionally, we also wish to clarify some of the information presented for

angelsharks, particularly in response to the commenter's points in (2) and (4). We note that while *S. aculeata* and *S. oculata* have maximum depths of up to 500 m and 560 m, respectively, *S. aculeata* can be found in depths as shallow as 30 m and *S. oculata* is more commonly found in depths between 50 m and 100 m. *Squatina squatina* is generally found in shallower water, from inshore areas out to the continental shelf in depths of 5 m to 150 m. This species is also thought to conduct inshore migrations in the summer, with reports of beachgoers being bitten by small (likely juvenile) angelsharks (suggesting inshore migration for reproduction). This information on these species, as well as additional information on the threats and status of the three angelsharks, can be found in the proposed (80 FR 40969; July 14, 2015) and final rules (81 FR 50394; August 1, 2016) listing these species under the ESA, as well as the status review for these three species (Miller 2016), available on our Web site at www.nmfs.noaa.gov/pr/species/petition81.htm.

Comment 23: The Embassy of Greece, through the Hellenic Ministry of Rural Development and Food, commented that Greece meets its obligations arising from international conventions, such as the Barcelona Convention, and is a party to the General Fisheries Commission of the Mediterranean (GFCM), the regional fisheries management organization whose convention area includes Mediterranean waters and the Black Sea. The measures adopted by the GFCM are incorporated into European Law. The Ministry specifically highlighted GFCM recommendation GFCM/36/3012/3, which prohibits those elasmobranchs on Annex II of the Specially Protected Areas and Biological Diversity (SPA/BD) Protocol to the Barcelona Convention (which includes both guitarfish species) from being retained on board, transhipped, landed, transferred, stored, sold or displayed, or offered for sale. The Ministry noted that the species must be released, as far as possible, unharmed and alive, and that there is an obligation for owners of fishing vessels to record information related to fishing activities, including capture data, incidental catch, and releases and/or discards of species. The Ministry recently adopted and released Circular No. 4531/83795/20-07-2016 to inform all stakeholders of the provisions of the above protection measures.

Response: We thank the Hellenic Ministry of Rural Development and Food for the comments and have updated the status review accordingly. We note that while these regulations

will likely, to some extent, reduce the fishing related mortality to both guitarfish species, it does not appear that either species is common in Greek waters. Therefore we conclude that these regulatory mechanisms are unlikely to significantly decrease both *Rhinobatos* species' risks of extinction.

Comment 24: The Lebanese Ministry of Agriculture, through the Embassy of Lebanon, commented that fishing both *Rhinobatos* species is prohibited in Lebanon by decision number 1045/1 issued on November 25, 2014, based on GFCM recommendation GFCM/36/3012/3. Based on this decision, they welcomed our proposal to list both guitarfishes species as threatened under the ESA.

Response: We thank the Lebanese Ministry of Agriculture for the comments and have updated the status review accordingly. We note that the information available to us (Lteif 2015) indicates that regulations related to these guitarfish species are not adequately enforced. However, we note that these conclusions were reached based on data that were collected up until approximately the time that decision number 1045/1 was issued, so the enforcement of relevant regulations may now be effective. Given the uncertainty regarding the enforcement of these regulations, and the relatively small portion of both species' ranges that occur in Lebanese waters, we conclude that these regulatory mechanisms are unlikely to significantly decrease both *Rhinobatos* species' risks of extinction range wide.

Comment 25: One commenter noted that in the *Inadequacy of Existing Regulations* section of the status review we did not mention relevant Turkish laws, species specific laws for *Rhinobatos* species in Banc d'Arguin National Park (Mauritania), and a ban on finning in Nigeria.

Response: The commenter provided no references regarding any of these regulations. We found no information about Turkish laws relevant to guitarfishes or sharks and rays in general and the General Fisheries Commission for the Mediterranean National Legislation Database (available at: <http://nationallegislation.gfcmsecretariat.org>) lists no such relevant law. However, some additional information about general fisheries management efforts in Turkey, including vessel registrations, gear restrictions, and seasonal area closures has been added to the *Regulatory Mechanisms in the Mediterranean* section of the status review. Because these management efforts are not specific to guitarfish, and we have no

information on how these efforts affect guitarfish in Turkey, this new information does not change our conclusion that current regulations are inadequate to protect either species.

As discussed in the status review, fishing for all shark species, including guitarfishes, has been banned since 2003 in Banc d'Arguin National Park. Additional information on regulatory efforts from 1998 to 2003 has been added to the *Regulatory Mechanisms in the Atlantic* section of the status review. This information provides context for how the current protective regulations were developed in Banc d'Arguin, which are currently adequately protecting both species in this small portion of their ranges, a fact that was acknowledged in the draft status review.

The fact that Nigeria prohibits the dumping of shark carcasses at sea has also been added to the *Regulatory Mechanisms in the Atlantic* section. While this information augments our knowledge of regulations that may affect these species, we found no information on how this regulation is enforced and very little information on guitarfish in Nigeria in general. Thus, it does not change our conclusion that current regulations are inadequate to protect either species.

Comment 26: One commenter strongly supported our proposed rule and encouraged us to finalize the our listing decision in a timely manner, incorporate comments and suggestions submitted during the comment period, and incorporate a full analysis of all the factors under section 4(a)(1) of the ESA.

Response: We appreciate this comment. We have incorporated all substantive comments received into the status review and this final rule and fully analyzed the ESA section 4(a)(1) factors using the best available scientific and commercial information.

Summary of Changes From the Proposed Listing Rule

We reviewed, and incorporated as appropriate, scientific data from references that were not previously included in the draft status review (Newell 2016) and proposed rule (81 FR 64094; September 19, 2016). We included the following references and communications, which, together with previously cited references, represent the best available scientific and commercial data on *R. cemiculus* and *R. rhinobatos*: Ambrose *et al.* (2005), Ateweberhan *et al.* (2012), Carla Jazzar, Embassy of Lebanon, pers. comm. to D. Wieting, NMFS (7 December, 2016), Caverivière and Andriamirado (1997), Coll (2010), D. Berces, University of Florida, pers. comm. to B. Newell,

NMFS, (14 November, 2016), Farrugio *et al.* (1993), Hellenic Ministry of Rural Development pers. comm. (2016), HSI (2016), ICES (2010), and OECD (undated). However, the information not previously included in the draft status review or proposed rule does not present significant new findings that change either of our proposed listing determinations. The updated status review (Newell 2016) is available at: www.nmfs.noaa.gov/pr/species/petition81.htm.

Status Review

The status review for both guitarfish species was conducted by a NMFS biologist in the Office of Protected Resources. In order to complete the status review, we compiled information on the species' biology, ecology, life history, threats, and conservation status from information contained in the petition, our files, a comprehensive literature search, and consultation with experts. Prior to publication of the proposed rule, the status review was subjected to peer review. Peer reviewer comments are available at www.cio.noaa.gov/services_programs/prplans/PRsummaries.html. This status review provides a thorough discussion of the life history, demographic risks, and threats to the two guitarfish species. We considered all identified threats, both individually and cumulatively, to determine whether these guitarfish species respond in a way that causes actual impacts at the species level. The collective condition of individual populations was also considered at the species level, according to the four viable population descriptors discussed above.

Summary of Factors Affecting the Two Guitarfish Species

We considered whether any one or a combination of the five threat factors specified in section 4(a)(1) of the ESA contribute to the extinction risk of these species. The comments that we received on the proposed rule and the additional information that became available since the publication of the proposed rule did not change our conclusions regarding any of the section 4(a)(1) factors or their interactions for these species. Therefore, we incorporate herein all information, discussion, and conclusions on the summary of factors affecting the two guitarfish species in the status review (Newell 2016) and proposed rule (81 FR 64094; September 19, 2016).

Extinction Risk

None of the information we received from public comment on the proposed rule affected our extinction risk

evaluations of these two guitarfish species. Therefore, we incorporate herein all information, discussion, and conclusions, with the minor updates noted above, on the extinction risk of the two guitarfish species in the status review (Newell 2016) and proposed rule (81 FR 64094; September 19, 2016).

Protective Efforts

As part of our evaluation of the status of the guitarfishes, we considered conservation efforts to protect each species and evaluated whether these conservation efforts are adequate to mitigate the existing threats to the point where extinction risk is significantly lowered and the species' status is improved. None of the information we received from public comment on the proposed rule affected our conclusions regarding conservation efforts to protect the two guitarfish species. We incorporate herein all information, discussion, and conclusions on the protective efforts for both guitarfish species in the status review (Newell 2016) and proposed rule (81 FR 64094; September 19, 2016).

Final Determination

There is significant uncertainty regarding the status of the current populations of both *R. rhinobatos* and *R. cemiculus*, but both species may still be relatively common, although very likely below their historical population levels, in Tunisia, Israel, Lebanon, Syria, and southeastern Turkey. Based on this information, and the best available scientific and commercial information, as summarized here, in the proposed rule (81 FR 64094; September 19, 2016), and in Newell (2016), we find that neither *Rhinobatos* species is currently at high risk of extinction throughout their ranges. However, both species are at moderate risk of extinction. We assessed the ESA section 4(a)(1) factors and conclude that *R. rhinobatos* and *R. cemiculus* face ongoing threats of overutilization by fisheries and inadequate existing regulatory mechanisms throughout their ranges. Both species have also suffered a curtailment of a large portion of their historical ranges. These species' natural biological vulnerability to overexploitation and present demographic risks (declining abundance, decreasing size of reproductive individuals, and low productivity) are currently exacerbating the negative effects of these threats. Further, ongoing conservation efforts are not adequate to improve the status of these species. Thus, both species likely to become endangered throughout their ranges in the foreseeable future (15–20

years). Therefore, we are listing both species as threatened under the ESA.

Effects of Listing

Conservation measures provided for species listed as threatened under the ESA include recovery actions (16 U.S.C. 1533(f)); Federal agency requirements to consult with NMFS under section 7 of the ESA to ensure their actions do not jeopardize the species or result in adverse modification or destruction of critical habitat should it be designated (16 U.S.C. 1536); designation of critical habitat if prudent and determinable (16 U.S.C. 1533(a)(3)(A)); and prohibitions on taking (16 U.S.C. 1538) through a rule promulgated under section 4(d). In addition, recognition of the species' plight through listing promotes conservation actions by Federal and State agencies, foreign entities, private groups, and individuals.

Identifying Section 7 Consultation Requirements

Section 7(a)(2) (16 U.S.C. 1536(a)(2)) of the ESA and NMFS/USFWS regulations require Federal agencies to consult with us to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of listed species or destroy or adversely modify critical habitat. It is unlikely that the listing of these species under the ESA will increase the number of section 7 consultations, because these species occur entirely outside of the United States and are unlikely to be affected by Federal actions.

Critical Habitat

Critical habitat is defined in section 3 of the ESA (16 U.S.C. 1532(5)) as: (1) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the ESA, on which are found those physical or biological features (a) essential to the conservation of the species and (b) that may require special management considerations or protection; and (2) specific areas outside the geographical area occupied by a species at the time it is listed upon a determination that such areas are essential for the conservation of the species. Section 4(a)(3)(A) of the ESA (16 U.S.C. 1533(a)(3)(A)) requires that, to the extent prudent and determinable, critical habitat be designated concurrently with the listing of a species. However, critical habitat shall not be designated in foreign countries or other areas outside U.S. jurisdiction (50 CFR 424.12 (g)).

The best available scientific and commercial data as discussed above identify the geographical areas occupied

by *R. rhinobatos* and *R. cemiculus* as being entirely outside U.S. jurisdiction, so we cannot designate occupied critical habitat for these species. We can designate critical habitat in areas in the United States currently unoccupied by the species if the area(s) are determined by the Secretary to be essential for the conservation of the species. The best available scientific and commercial information on these species does not indicate that U.S. waters provide any specific essential biological function for either of the *Rhinobatos* species. Therefore, based on the available information, we are not designating critical habitat for *R. cemiculus* or *R. rhinobatos*.

Identification of Those Activities That Would Constitute a Violation of Section 9 of the ESA

On July 1, 1994, NMFS and FWS published a policy (59 FR 34272) that requires NMFS to identify, to the maximum extent practicable at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the ESA. Because we are listing *R. rhinobatos* and *R. cemiculus* as threatened, no prohibitions of section 9(a)(1) of the ESA will apply to these species.

Protective Regulations Under Section 4(d) of the ESA

We are listing *R. rhinobatos* and *R. cemiculus* as threatened under the ESA. In the case of threatened species, ESA section 4(d) leaves it to the Secretary's discretion whether, and to what extent, to extend the section 9(a) "take" prohibitions to the species, and authorizes us to issue regulations necessary and advisable for the conservation of the species. Thus, we have flexibility under section 4(d) to tailor protective regulations, taking into

account the effectiveness of available conservation measures. The section 4(d) protective regulations may prohibit, with respect to threatened species, some or all of the acts which section 9(a) of the ESA prohibits with respect to endangered species. These section 9(a) prohibitions apply to all individuals, organizations, and agencies subject to U.S. jurisdiction. Because neither species has ever occupied U.S. waters, and the United States has no known commercial or management interest in either species, we are not applying any section 9(a) prohibitions to either species at this time.

References

A complete list of references used in this final rule is available upon request (see **ADDRESSES**).

Classification

National Environmental Policy Act

The 1982 amendments to the ESA, in section 4(b)(1)(A), restrict the information that may be considered when assessing species for listing. Based on this limitation of criteria for a listing decision and the opinion in *Pacific Legal Foundation v. Andrus*, 675 F. 2d 825 (6th Cir. 1981), we have concluded that ESA listing actions are not subject to the environmental assessment requirements of the National Environmental Policy Act (NEPA).

Executive Order 12866, Regulatory Flexibility Act, and Paperwork Reduction Act

As noted in the Conference Report on the 1982 amendments to the ESA, economic impacts cannot be considered when assessing the status of a species. Therefore, the economic analysis requirements of the Regulatory Flexibility Act are not applicable to the

listing process. In addition, this final rule is exempt from review under Executive Order 12866. This final rule does not contain a collection-of-information requirement for the purposes of the Paperwork Reduction Act.

Executive Order 13132, Federalism

In accordance with E.O. 13132, we determined that this final rule does not have significant federalism effects and that a federalism assessment is not required.

List of Subjects in 50 CFR Part 223

Endangered and threatened species, Exports, Imports, Transportation.

Dated: January 10, 2017.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 223 is amended as follows:

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES

■ 1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531–1543; subpart B, § 223.201–202 also issued under 16 U.S.C. 1361 *et seq.*; 16 U.S.C. 5503(d) for § 223.206(d)(9).

■ 2. In § 223.102, paragraph (e) add new entries for "Guitarfish, blackchin" and "Guitarfish, common", in alphabetical order by common name under the "Fishes" table subheading to read as follows:

§ 223.102 Enumeration of threatened marine and anadromous species.

Standardized Bycatch Reporting Methodology

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule interprets and provides guidance on the requirement of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) that all fishery management plans (FMPs), with respect to any fishery, establish a standardized reporting methodology to assess the amount and type of bycatch occurring in a fishery. The final rule establishes requirements and provides guidance to regional fishery management councils and the Secretary of Commerce regarding the development, documentation, and review of such methodologies, commonly referred to as Standardized Bycatch Reporting Methodologies (SBRMs).

DATES: Effective February 21, 2017.

ADDRESSES: Copies of the Categorical Exclusion/Regulatory Impact Review (RIR)/Final Regulatory Flexibility Act Analysis (FRFAA) prepared for this action can be obtained from: Karen Abrams, National Marine Fisheries Service, 1315 East West Highway, Room 13461, Silver Spring, MD 20910. An electronic copy of the CE/RIR/RFAA documents as well as copies of public comments received can be viewed at the Federal e-rulemaking portal: <http://www.regulations.gov/> (Docket ID: NOAA-NMFS-2012-0092).

FOR FURTHER INFORMATION CONTACT: Karen Abrams, 301-427-8508, or by email: karen.abrams@noaa.gov.

SUPPLEMENTARY INFORMATION:**Background**

Section 303(a)(11) of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) requires that any fishery management plan (FMP) prepared by a regional fishery management council (Council) or the

Secretary of Commerce with respect to any fishery establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery, and include conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality (16 U.S.C. 1853(a)(11)). *See also* 16 U.S.C. 1854(c) and (g) (authorizing Secretarial FMPs). Hereafter, “Council” includes the Secretary of Commerce as applicable when preparing FMPs or amendments under 16 U.S.C. 1854(c) and (g). *See* 50 CFR 600.305(d). This standardized reporting methodology is commonly referred to as a “Standardized Bycatch Reporting Methodology” (SBRM). This final rule, which is promulgated pursuant to 16 U.S.C. 1855(d), sets forth NMFS’ interpretation of section 303(a)(11) and establishes national requirements and guidance for developing, documenting, and reviewing SBRMs. A proposed rule for this action was published on February 25, 2016 (81 FR 9413), with public comments accepted through April 25, 2016.

Section 303(a)(11) was added to the MSA by the Sustainable Fisheries Act of 1996 (SFA). The MSA does not define “standardized reporting methodology” or any of the words contained within the phrase. Similar to section 303(a)(11), National Standard 9 (NS9) (16 U.S.C. 1851(a)(9)) requires that conservation and management measures “shall, to the extent practicable, (A) minimize bycatch and (B) to the extent bycatch cannot be avoided, minimize the mortality of such bycatch.” However, NS9 does not address SBRM.

Prior to this rulemaking, NMFS never issued regulations that set forth the basic requirements of the SBRM provision. To implement the 1996 SFA Amendments, NMFS developed NS9 guidelines in 1998, and amended these guidelines in 2008. *See* 50 CFR 600.350. The guidelines provide several clarifications about bycatch requirements under the MSA, but do not interpret the SBRM requirement. In 2004, NMFS published *Evaluating Bycatch: A National Approach to Standardized Bycatch Monitoring Programs* (NOAA Technical Memorandum NMFS-F/SPO-66, October 2004, hereafter referred to as *Evaluating Bycatch*), a report that was prepared by the agency’s National Working Group on Bycatch (available at http://www.nmfs.noaa.gov/by_catch/SPO_final_rev_12204.pdf). The report did not provide, or purport to provide, the agency’s interpretation of the basic requirements of complying with MSA section 303(a)(11). *See Evaluating*

Bycatch at Chapters 3, 4, and 5 and Appendix 5 (discussing regional bycatch and fisheries issues, reporting/monitoring measures, and precision goals for bycatch estimates, but noting that goals “may in some instances exceed minimum statutory requirements”).

Additional background information—including NMFS’ rationale for developing this rule, statutory and historical background, and the purpose and scope of the rule—can be found in the proposed rule that published on February 25, 2016 (81 FR 9413). Copies are available from NMFS (*see ADDRESSES*), or can be viewed electronically at the Federal E-Rulemaking portal for this action: <http://www.regulations.gov>.

Separate from this rulemaking, which solely addresses reporting methodologies for bycatch as defined under the MSA, NMFS has engaged in a broad range of activities since the 1970s to address its bycatch-related responsibilities under the MSA, the Marine Mammal Protection Act (MMPA), the Endangered Species Act (ESA), and other relevant statutes and international agreements. More specifically, NMFS, the Councils, and multiple partners have implemented management measures to minimize bycatch and bycatch mortality in fisheries (e.g., time and area closures); developed and/or researched bycatch reduction technologies for fishing gear (e.g., turtle excluder devices and circle hooks); convened multi-stakeholder take reduction teams to address marine mammal bycatch; supported national research programs, such as the Bycatch Reduction Engineering Program; promoted the adoption of bycatch reduction measures in international regional fishery management organizations; and published a series of biennial National Bycatch Reports and Updates since 2011 that provide a historical summary of fishery- and species-specific bycatch estimates on an annual basis for major U.S. fisheries around the country, to cite a few examples. NMFS also has a database from which members of the public can query bycatch estimates from the National Bycatch Reports and Updates. *See* <http://www.st.nmfs.noaa.gov/observer-home/first-edition-update-1>. To build on its bycatch efforts, this year in February 2016, NMFS issued for public comment a draft *National Bycatch Reduction Strategy* that aims to coordinate NMFS’ efforts to address bycatch under the various mandates it is charged with carrying out to further advance its work in addressing bycatch both domestically and internationally.

NMFS received numerous public comments on the draft strategy and is working to address those comments and finalize the strategy. For more information on NMFS' 40 year commitment to addressing bycatch, *see* <http://noaa.maps.arcgis.com/apps/MapSeries/index.html?appid=e5d4037090054fa2843a6ab522c9b73b>.

I. Overview of the Major Aspects of the Final Rule

Section 600.1600 explains the purpose and scope of an SBRM and § 600.1610 clarifies the requirements for establishing and reviewing SBRMs. The rule requires that an FMP identify the required procedure or procedures that constitute the SBRM for the fishery. The rule also requires that the FMP, or fisheries research plan authorized under 16 U.S.C. 1862, explain how the SBRM meets the purpose described under § 600.1600, based on an analysis of (1) the characteristics of the bycatch occurring in the fishery, (2) the feasibility of the methodology from cost, technical and operational perspectives, (3) the uncertainty of the data resulting from the methodology, and (4) how the data resulting from the methodology are used to assess the amount and type of bycatch occurring in the fishery. Finally, the rule provides that a Council should give guidance to NMFS on how to adjust the implementation of the SBRM consistent with the FMP, and requires periodic reviews of SBRMs.

Below is further explanation of the major aspects of the final rule. In addition to streamlining the final rule to improve clarity and organization, NMFS has made several changes in the final rule to respond to public comments. The changes are discussed below and in sections II (Response to Comments) and III (Changes from Proposed Action) of this preamble.

A. Scope of Rule

Establishing an SBRM is a requirement of the MSA. Therefore, this rule is based on the MSA's definition of "bycatch," which includes fish which are harvested in a fishery, but which are not sold or kept for personal use, and includes economic discards and regulatory discards. Such term does not include fish released alive under a recreational catch and release fishery management program. 16 U.S.C. 1802(2). NMFS' NS9 guidelines clarify that "[a] catch-and-release fishery management program is one in which the retention of a particular species is prohibited. In such a program, those fish released alive would not be considered bycatch." 50 CFR 600.350(c)(2). NMFS received several comments on the rule's

definition of "bycatch." To clarify its intent to rely on the MSA's definition of "bycatch," NMFS has revised the final rule at § 600.1605(b) to add reference to the MSA definition. Summaries of the comments received on the definition of bycatch and NMFS' responses may be found in section II (Response to Comments) of this preamble.

B. Purpose of an SBRM

Based on the statutory language of section 303(a)(11) of the MSA, the final rule clarifies in § 600.1600 that the purpose of an SBRM is to collect, record, and report bycatch data in a fishery that, in conjunction with other information, are used to assess the amount and type of bycatch occurring in the fishery and inform the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality. Consistent with this purpose, § 600.1605(a) defines "standardized reporting methodology" with reference to procedures used to collect, record, and report bycatch data in a fishery. Section 600.1605(a) clarifies that bycatch assessment procedures are not part of an SBRM, and thus do not need to be described as part of the methodology in an FMP. A Council may include such a description if it so chooses and could provide this description by incorporating by reference information from a Stock Assessment and Fishery Evaluation (SAFE) report or other documents.

As explained in the proposed rule (*see* 81 FR 9413 at 9414–9415), activities to collect, record, and report bycatch data in a fishery are connected to, but distinct from, the methods used to assess bycatch and the development of measures to minimize bycatch or bycatch mortality. NMFS received numerous comments on the linkage between bycatch data collection and bycatch assessment. Having carefully considered public comment on this issue, NMFS has decided to maintain the distinction between data collection and bycatch assessment in the final rule. NMFS continues to believe that it is important to be clear about the key policy choices and objectives associated with establishing an SBRM, and not confuse those choices with statistical and technical approaches for estimating bycatch that are inherently scientific and data dependent, or with the policy choices associated with developing measures to minimize bycatch or bycatch mortality. *See* "Activities Associated with an SBRM" in the proposed rule and "Distinction Between Data Collection and Data Assessment" in section II of this preamble for further

information and explanation of this issue.

While recognizing the distinction between data collection and bycatch assessment, NMFS affirms the important linkage between these activities. To reinforce this link, NMFS has revised § 600.1610(a)(2)(iv) to require a Council to address how the data resulting from an SBRM are used to assess the amount and type of bycatch in the fishery and to consult with its Science and Statistical Committee (SSC) and/or regional NMFS science centers on SBRM design considerations (*e.g.*, data elements, sampling designs, sample sizes, and reporting frequency). NMFS also cross-references this requirement in § 600.1600. *See* section I. E. 4. *Data Use* of this preamble for further explanation.

C. Meaning of "Standardized"

Section 303(a)(11) requires that "Any fishery management plan . . . with respect to any fishery, shall . . . establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery." 16 U.S.C. 1853(a)(11). Section 303(a)(11) does not require regional or national standardization; rather, the requirement to establish a standardized reporting methodology applies to each FMP with respect to any fishery managed under it. Consistent with the statutory language, this rule defines "standardized reporting methodology" as an established, consistent procedure or procedures used to collect, record, and report bycatch data in a fishery, which may vary from one fishery to another. *See* 600.1605(a) (emphasis added).

A Council establishes the SBRM based on the requirements outlined in this rule and the purpose of an SBRM (*see* § 600.1600). The definition of "standardized reporting methodology" envisions that a Council may include more than one data collection, recording, and reporting procedure in its SBRM. As acknowledged in § 600.1610(a)(2)(i), the amount and type of bycatch occurring in a fishery may vary based on different fishing activities and operations (*e.g.*, gear types used, how gear is deployed, gear selectivity, fishing effort, fishing locations). In light of the above, a Council could decide that a combination of procedures is appropriate for a fishery. In such a case, the FMP must still identify what the established, consistent procedures are for the fishery. For example, in a fishery in which vessels use trawl nets and gill nets, a Council could determine that different procedures are appropriate for the different gear types. The Council would then be required to identify the

required, consistent procedures for both gear types in the FMP. *See* section I. E. 1. and the response to comment 9 in section II of this preamble for further explanation.

D. FMP Contents

Section 600.1610(a)(1) requires every FMP to identify the required procedure or procedures that constitute the SBRM for the fishery. Such procedures may include, but are not limited to, observer programs, electronic monitoring and reporting technologies, and self-reported mechanisms. This rule does not prescribe the use of particular procedures.

Section 600.1610(a)(1) also requires Councils to explain in an FMP, or a fishery research plan authorized under 16 U.S.C. 1862, how the SBRM meets the purpose described in § 600.1600, based on an analysis of requirements (set forth in § 600.1610(a)(2) and described below). The FMP, or fishery research plan under 16 U.S.C. 1862, may reference analyses and information in other FMPs, FMP amendments, SAFE reports, or other documents. Consistent with current practices, the rule encourages Councils to work together and collaborate on SBRMs for fisheries that operate across multiple jurisdictions, as appropriate.

NMFS amended the final rule to refer to 16 U.S.C. 1862, a provision that authorizes the North Pacific Fishery Management Council to prepare a fisheries research plan for any fishery under its jurisdiction (except salmon) that requires observers and establishes a system of fees to pay for the costs of implementing the plan. The North Pacific Council has established a fisheries research plan that requires an observer program as authorized under 16 U.S.C. 1862, and the program constitutes the SBRM for the fisheries covered thereunder. Given that, this rule allows the North Pacific Council to explain in its fisheries research plan how the SBRM for those fisheries meets the statutory purpose of an SBRM.

Finally, § 600.1610(a)(1) explains that, in addition to proposing regulations necessary to implement the standardized reporting methodology, a Council should provide in an FMP, or a fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of the methodology consistent with the FMP. That section cites to the National Standard 6 guidelines (50 CFR 600.335), which provide guidance on taking variations and contingencies into account. NMFS notes that, to the extent that adjustments are needed to an SBRM beyond what is established in an FMP,

an FMP amendment would be required. This text in § 600.1610(a)(1) replaces § 600.1610(c) (adaptable implementation) because public comments expressed confusion over that proposed provision. NMFS reiterates that every FMP must establish an SBRM. NMFS did not intend to imply otherwise in the proposed § 600.1610(c) (at 81 FR 9413, February 25, 2016). Rather, NMFS' intent in the proposed § 600.1610(c) (at 81 FR 9413, February 25, 2016), and now in § 600.1610(a)(1), is to recognize that fisheries management occurs in a highly variable environment and there are numerous biological, social, and economic variables that may affect the operational aspects of implementing data collection and reporting programs that constitute an SBRM. In light of this, NMFS strongly recommends that Councils provide direction, as needed, to NMFS about how to adjust the implementation of an SBRM consistent with the FMP. NMFS believes that its approach in § 600.1610(a) will promote efficiency and transparency by encouraging a Council to consider implementation and operational issues up-front during the development of an SBRM. *See* response to comment 29 and 48 for further explanation.

E. Fishery-Specific Analysis

MSA section 303(a)(11) requires that FMPs establish SBRMs, but beyond the fact that an SBRM must meet its statutory purpose, section 303(a)(11) provides no other guidance on the considerations that should go into developing an SBRM. Therefore, NMFS has discretion to interpret section 303(a)(11) and establish reasonable considerations and requirements. Based on NMFS' experience with implementing section 303(a)(11), and taking into consideration public comment on the proposed rule, this final rule requires that all Councils conduct a fishery-specific analysis that addresses the following when establishing or reviewing an SBRM: (1) The characteristics of the bycatch occurring in the fishery, (2) the feasibility of the methodology from cost, technical and operational perspectives, (3) the uncertainty of the data resulting from the methodology, and (4) how the data resulting from the methodology are used to assess the amount and type of bycatch occurring in the fishery. The first and second requirements were included in the proposed rule and have been revised minimally in response to comments. With respect to the third and fourth requirements, NMFS has, in response to public comments, clarified and elaborated upon the proposed

requirement that a Council address "the quality of the data associated with the methodology" (*see* proposed § 600.1610(a)(2)(i) at 81 FR 9413, February 25, 2016). Below is further explanation of these four requirements.

In response to comments, NMFS has removed text that required consideration of the conservation and management objectives regarding bycatch in the fishery (*see* proposed § 600.1610(a)(2)(i) at 81 FR 9413, February 25, 2016), and text stating that a Council may consider the overall magnitude and/or economic impact of the fishery (*see* proposed § 600.1610(a)(2)(i) at 81 FR 9413, February 25, 2016). The reasons for these changes are provided in the responses to comments 44 and 46.

1. Characteristics of Bycatch in the Fishery

Section 600.1610(a)(2)(i) provides that a Council must address information about the characteristics of bycatch in the fishery when available, including, but not limited to, the amount of bycatch occurring in the fishery, the importance of bycatch in estimating the fishing mortality of fish stocks, and the effect of bycatch on ecosystems. Section 600.1610(a)(2)(i) recognizes that the amount and type of bycatch occurring in the fishery may vary based on different fishing activities and operations. Bycatch can be affected by several aspects of a fishery, including gear types used, how gear is deployed, gear selectivity, fishing effort, fishing locations, and existing management measures. A Council may consider these operational aspects when selecting the collection, monitoring, and reporting procedures that constitute the SBRM for a fishery.

2. Feasibility

Section 600.1610(a)(2)(ii) requires that the implementation of an SBRM be feasible from cost, technical, and operational perspectives. Data collection, reporting, and recording procedures can be expensive, logistically challenging to design and implement, involve new and cutting-edge technologies, and necessitate the consideration of the safety of human life at sea. Having carefully considered public comments, NMFS continues to believe that it is reasonable and appropriate for a Council to analyze issues of feasibility when establishing or reviewing an SBRM and to ultimately choose a methodology that is in fact feasible (*i.e.*, capable of being implemented) from cost, technical, and operational perspectives. If a Council proposes an FMP or FMP amendment

with an SBRM that is not feasible, NMFS may disapprove or partially disapprove the FMP amendment. In response to public comments, NMFS clarifies in the final rule that feasibility concerns do not exempt an FMP from the requirement to establish an SBRM. NMFS reiterates that the requirement to establish an SBRM is a statutory requirement applicable to all FMPs.

Proposed § 600.1610(a)(2)(i) at 81 FR 9413, February 25, 2016, would have required SBRMs to be designed to be implemented with available funding. In response to comments, NMFS has deleted this provision. *See* section II (the responses to comments on “Consideration of Feasibility, Costs, and Funding”) of this preamble. Instead, NMFS explicitly acknowledges in § 600.1610(a)(2)(ii) that costs and funding may vary from year to year, and requires a Council to address how implementation of the SBRM may be adjusted while continuing to meet the purpose described under § 600.1600. If a Council chooses to establish an SBRM that may be adjusted in response to changes in costs or funding, the Council should provide guidance to NMFS on how to adjust the implementation of the SBRM consistent with the FMP, as provided in § 600.1610(a)(1) (*see* section I. D. of this preamble).

As an example, NMFS notes that the resources available for observer programs may vary from year to year. To address this variability in resources, the North Pacific Council uses an Annual Deployment Plan, a component of its fisheries research plan authorized under 16 U.S.C. 1862, to describe how NMFS and the Council will annually deploy observers given changes in funding, costs, and effort consistent with the FMP. As another example, in New England and the Mid Atlantic, if the available funding is insufficient to meet the SBRM performance standard, the SBRM Omnibus Amendment for New England and Mid-Atlantic fisheries (80 FR 37182, June 30, 2015) (currently the subject of litigation) establishes a non-discretionary formulaic process for prioritizing how the available observer sea-days would be allocated to maximize the effectiveness of the SBRM. NMFS reiterates that, regardless of resource constraints, all FMPs must establish an SBRM that meets the purpose described in § 600.1600.

3. Data Uncertainty

Section 600.1610(a)(2)(iii) requires Councils to address the uncertainty of the data resulting from the SBRM. This section also requires that an SBRM be designed so that the uncertainty associated with the resulting bycatch

data can be described, quantitatively or qualitatively. Eliminating data uncertainty is not an end in itself, but the rule recognizes that Councils should seek to minimize uncertainty in the resulting data, recognizing that different degrees of uncertainty may be appropriate for different fisheries.

4. NMFS received numerous public comments requesting that the final rule include specific standards for accuracy, precision, or statistical reliability of bycatch estimates and data. *See* section II for comments and responses related to “Consideration of Quality and Use of Data.” After considering public comments and consulting with agency scientists, NMFS does not believe it is appropriate to establish accuracy, precision, or reliability standards for bycatch data or estimates to be applied across all fisheries. As explained in “Purpose of an SBRM” above, bycatch assessment or estimation is not considered part of an SBRM under this rule. Moreover, as explained in the responses to comments, the specific characteristics of each fishery and its bycatch vary widely from region to region and from fishery to fishery. For example, during development of this rule, agency scientists noted that bycatch estimates for species with low encounter rates will have lower precision than commonly encountered bycatch species. Establishing bycatch data or estimation standards across all fisheries could result in an overly intensive sampling effort that may not be needed for bycatch assessment or management purposes, would not be feasible, and would be an inefficient use of agency resources. Instead, this rule requires that Councils address the uncertainty of the data resulting from an SBRM and design an SBRM so that the uncertainty associated with the resulting bycatch data can be described, quantitatively or qualitatively. As reflected in § 600.1600, there may be other relevant sources of data beyond the data provided by an SBRM that are used to develop bycatch estimates for the fishery (*e.g.*, fishing effort, fishery independent data, commercial landings data). Understanding the quality of data resulting from an SBRM and other sources is important in the assessment of bycatch and will assist Councils in developing conservation and management measures that, to the extent practicable, minimize bycatch, and minimize the mortality of bycatch. For example, a Council may choose to adopt measures that are more conservative in instances where bycatch data is a large component of fishing

mortality and is highly uncertain. *Data Use*

Section 600.1610(a)(2)(iv) requires a Council to address how the data resulting from an SBRM are used to assess the amount and type of bycatch occurring in the fishery. As explained in the “Purpose of the SBRM” section above, this provision was added in part to clarify and reinforce the link between an SBRM and the assessment of bycatch data. Section 600.1605(a) clarifies that, although bycatch assessment is not part of the SBRM, bycatch assessment must be considered as described in this provision. *See* responses to comments 16 and 25 (explaining the role of NMFS science centers in providing scientific information and analyses and how catch and landings information is made available).

Section 600.1610(a)(2)(iv) also incorporates the consultation provision of the proposed rule’s § 600.1610(b) (81 FR 9413, February 25, 2016). NMFS received comments during the public comment period asking the agency to clarify the consultation process. In response to comments (*see* “Consideration of Quality and Use of Data” in section II of this preamble), NMFS clarifies in the final rule that, related to its consideration of data use, a Council must consult with its SSC and/or the regional NMFS science center on reporting methodology design considerations such as data elements, sampling designs, sample sizes, and reporting frequency. Information provided through the consultation process will enable a Council to develop an SBRM that incorporates scientific input and that will provide data that can be used, in conjunction with other relevant sources of data, to assess the amount and type of bycatch occurring in the fishery.

Finally, § 600.1610(a)(2)(iv) requires Councils to consider the scientific methods and techniques available to collect, record, and report bycatch data that could improve the quality of bycatch estimates. As bycatch data collection technologies improve, NMFS anticipates that a Council will consider those technological advances when establishing and reviewing SBRMs in accordance with the review timeline specified in § 600.1610(b). *See* response to comment 47.

F. Review of FMPs

Section 600.1610(b) states that all FMPs must be consistent with this rule within 5 years of its effective date. To verify consistency with this rule, Councils, in coordination with NMFS, must conduct a review of their existing SBRMs. The review should provide

information sufficient for NMFS to determine whether an FMP needs to be amended. The review should be documented, but does not need to be contained in an FMP.

There are several potential outcomes of the review. NMFS could determine that there are FMPs with existing SBRMs that are consistent with this rule, in which case no FMP amendments would be necessary. Other FMPs may describe SBRMs more expansively than the definition in this final rule. For example, they may contain components that are consistent with this rule, along with additional components that are not precluded by this rule, but are not minimally required. Those FMPs also may not require further amendments if NMFS determines they are consistent with this rule. Still other FMPs may describe procedures or activities that comprise an SBRM, but do not explain them in a manner consistent with this rule. In such cases, changes to an FMP, or a fisheries research plan, may be warranted. Consistent with current practices, NMFS encourages Councils to work together and collaborate on SBRM reviews and potential FMP amendments for fisheries that operate across multiple jurisdictions, as appropriate.

After the initial review, Councils, in coordination with NMFS, should periodically review SBRMs to verify continued compliance with the MSA and this rule. Such a review should be conducted at least once every 5 years. Section 600.1610(b) is consistent with the review and improvement of data collection methods, data sources, and applications described under the NS9 guidelines at 50 CFR 600.350(d)(1).

II. Response to Comments

NMFS solicited public comments on the proposed rule for 60 days (February 25 through April 25, 2016), and during that time made presentations to four of the eight Councils and the Highly Migratory Species Advisory Panel. NMFS received 25 substantive comment letters on the proposed rule during the public comment period. Of those, six were form letters that had 65,961 signatures, and 1,382 of those signatories provided individualized add-on comments. The other 19 substantive comment letters were from non-governmental organizations, industry groups/commissions, Councils, and individuals. Summaries of the substantive comments that we received concerning the proposed rule, and our responses to all of the significant issues they raise, are provided below. Comments of a similar nature were grouped together where appropriate.

Need and Effect

Comment 1: Several commenters noted a need for clarification as to whether the proposed rule establishes national requirements or guidance. Some commenters stated that the preamble to the proposed rule stated that the rule is intended to “establish national requirements and guidance,” but in fact it provides broad guidelines and few mandatory requirements. Another commenter requested clarification as to whether the proposed rule constitutes guidance to the Councils versus regulatory requirements upon the Councils.

Response: This rule sets forth NMFS’ interpretation of the SBRM provision under MSA section 303(a)(11) (16 U.S.C. 1853(a)(11)) and requirements for establishing and reviewing SBRMs consistent with that interpretation. Many provisions of the rule are mandatory. The rule does not, however, prescribe specific details on the types of data collection and reporting procedures needed for each fishery. Instead, the rule requires Councils to undertake a fishery-specific analysis of the SBRM appropriate for the fishery and establish an SBRM that meets the purpose described in § 600.1600.

Comment 2: One commenter suggested that, in order to allow for the most flexible and effective SBRM process, the agency should issue these SBRM provisions as guidance, rather than a rule.

Response: As explained in the preamble to the proposed rule, NMFS has never issued regulations that set forth the basic requirements of MSA section 303(a)(11). In the absence of a national SBRM regulation, Councils have taken varying approaches to interpreting the provision, with some adopting the recommendations in *Evaluating Bycatch* and others interpreting the requirement in a different way. Litigation has also influenced the development of SBRMs in some regions. In light of the varying existing approaches, NMFS believes that an analysis and articulation of the basic requirements of section 303(a)(11) through a rulemaking is necessary in order to achieve greater consistency in establishing, documenting, and reviewing SBRMs. Public comment received on the proposed rule has greatly assisted NMFS in evaluating different approaches to interpreting the SBRM provision and developing this final rule. With regard to flexibility, this rule recognizes the diversity of fisheries across the country by allowing for a fishery-specific evaluation of the type of SBRM that is appropriate for a fishery,

consistent with the requirements of the MSA and this rule.

Comment 3: One commenter stated that the preamble to the proposed rule did not cite a recent North Pacific case that affirmed that the Alaska Region’s catch accounting system (CAS) is an SBRM. In light of that case, the commenter requested that the agency consider excluding fisheries under the jurisdiction of the North Pacific Fishery Management Council (NPFMC) from requirements of this rule.

Response: NMFS has prevailed in several SBRM lawsuits, including *The Boat Co. v. Pritzker*, No. 3:12-cv-0250-HRH, (D. Alaska Aug. 6, 2014), the North Pacific case mentioned by the commenter. However, as explained in response to comment 2, NMFS believes that it is important to have a national rulemaking applicable to all FMPs. NMFS recognizes that there is a North Pacific-specific observer provision under section 313 of the MSA, 16 U.S.C. 1862, that provides for use of a fisheries research plan. NMFS has revised this final rule in § 600.1610 to account for this provision.

Definition of Bycatch

Comment 4: A commenter requested clarification on the distinction between bycatch and discards.

Response: The distinction between bycatch and discards is clearly laid out in MSA’s definitions section and in NMFS’ NS9 guidelines. The MSA defines bycatch as fish which are harvested in a fishery, but which are not sold or kept for personal use, and includes economic discards and regulatory discards. Such term does not include fish released alive under a recreational catch and release fishery management program. 16 U.S.C. 1802(2). The MSA defines “economic discards” as fish which are the target of a fishery, but which are not retained because of an undesirable size, sex, or quality, or other economic reasons (16 U.S.C. 1802(9)), and the term “regulatory discards” as fish harvested in a fishery which fishermen are required by regulation to discard whenever caught, or are required by regulation to retain but not sell (16 U.S.C. 1802(38)). As explained in NMFS’ NS9 guidelines, “[b]ycatch includes the discard of whole fish at sea or elsewhere, including economic discards and regulatory discards. . . .” 50 CFR 600.350(c)(1).

Comment 5: One commenter recommended that the regulatory text be revised to more clearly indicate that bycatch does not include incidental catch of seabirds or marine mammals. Other commenters recommended

expanding the scope of the rule to provide guidance on the reporting of all types of bycatch, including marine mammals and seabirds. With regard to marine mammal bycatch, one commenter noted that a lack of guidance could lead to ineffective monitoring if Council actions are not integrated with efforts by the relevant take reduction teams.

Response: The requirement to establish an SBRM is a requirement of the MSA. Thus, this rule—which interprets the SBRM provision—is based on the MSA’s definitions of “bycatch” and “fish.” These definitions exclude marine mammals and birds. See 16 U.S.C. 1802(2) and (12). In response to comment, NMFS has revised the final rule at § 600.1605(b) to add references to the MSA definitions.

This rule does not preclude Councils from developing programs to collect, record, and report information about marine mammal mortality and injury and seabird interactions or unintentional mortality; however, the MSA does not require Councils to do so to be in compliance with the requirements of section 303(a)(11). Marine mammals are protected under the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, which NMFS administers. NMFS is committed to working with the Councils and Take Reduction Teams (TRTs) to reduce bycatch of marine mammals. TRTs provide recommendations to NMFS on measures to reduce marine mammal mortalities and serious injuries in commercial fisheries. NMFS uses these recommendations to develop and implement take reduction plans. TRTs also provide input to NMFS on evaluating the effectiveness of these take reduction plans; such input often includes discussion and recommendations for observer coverage levels to monitor marine mammal bycatch. In previous years, NMFS has augmented observer coverage in specific fisheries to monitor marine mammal bycatch. As such, any marine mammal monitoring will be closely coordinated with monitoring required by an SBRM.

Comment 6: A commenter noted that NMFS’ U.S. National Bycatch Report, which reports on all bycatch, defines bycatch broadly as “discarded catch of any living marine resource plus unobserved mortality due to a direct encounter with fishing gear.” The commenter stated that NMFS needs better data for the report, so the rule should define bycatch in a similar way.

Response: NMFS is not changing the definition of bycatch in the final rule for the reasons explained in the response to comment 5. NMFS notes that the

National Bycatch Report is not a requirement under the MSA or other law. Since 2011, NMFS has issued the National Bycatch Report and its Updates to inform the public about bycatch and provide a cross-program perspective to inform agency priorities and planning related to bycatch mandates under the MMPA, ESA, MSA, and other statutes and international agreements. Given the varying definitions of bycatch under these authorities, the National Bycatch Report and its Updates use a broader definition of bycatch than the MSA; they include information about fish, as well as marine mammal and seabird interactions. Therefore, in preparing the National Bycatch Report and its Updates, NMFS compiles information from numerous sources, including, but not limited to, observer data, logbooks, vessel trip reports, dealer reports, landing receipts, surveys, and stock assessments; these documents do not rely solely on data provided by SBRMs. The more narrow definition of bycatch in the MSA, and the resulting scope of this final rule, will not hinder future versions of the National Bycatch Report.

NMFS also notes that the National Bycatch Report and its Updates provide a compilation of bycatch information and national and regional overviews to document bycatch in fisheries over time. They are not, however, used for day-to-day management of fisheries. The 2011 First Edition of the Report used data available in 2005, Update 1 (2013) used 2010 data, and Update 2 (2016) used 2011–2013 data. U.S. National Bycatch Report, First Edition Update 2 (February 2016) at p. 9 (*see* http://www.st.nmfs.noaa.gov/Assets/Observer-Program/bycatch-report-update-2/NBR%20First%20Edition%20Update%202_Final.pdf). NMFS has created a custom database that allows members of the public to query bycatch estimates that have been published in the National Bycatch Report Updates. Members of the public can access the database at <http://www.st.nmfs.noaa.gov/observer-home/first-edition-update-1>.

Comment 7: Several commenters submitted comments on the definition of bycatch with respect to recreational fishing. One commenter suggested that fish released alive under recreational fishing be included as bycatch to be monitored as part of an SBRM. The commenter stated that recreational fishing can be a large component of the total catch. Further, recreational bycatch can be a significant source of mortality, and in some cases, exceeds the amount of fish caught and kept. Another commenter requested that the rule include an exemption for “catch and

release” fishing and asked whether “no possession” implies that encounters are “catch and release.”

Response: NMFS does not agree with the suggestion to broaden the definition of bycatch in this rule to cover all fish released alive under recreational fishing. “[F]ish released alive under a recreational catch and release fishery management program” are excluded from the MSA definition of bycatch. 16 U.S.C. 1802(2). NMFS’ NS9 guidelines clarify that “[a] catch-and-release fishery management program is one in which the retention of a particular species is prohibited. In such a program, those fish released alive would not be considered bycatch.” 50 CFR 600.350(c)(2).

NMFS agrees that release mortality is an important issue, and the agency has taken steps to understand and address this issue. In August 2014, NMFS published a Technical Memorandum entitled *Fisheries Release Mortality*, which summarized NMFS-funded fish release mortality research over the past 15 years, identified release mortality data gaps, compiled mortality estimates used by NMFS, and identified criteria to help scientists and managers focus release mortality resources (NOAA Technical Memorandum NMFS–F/SPO–142, July 2014). In February 2016, NMFS released an Action Plan for Fish Release Mortality Science, which identifies national goals and objectives for estimating and reducing discard and release mortality for fish in commercial and recreational fisheries (<https://www.st.nmfs.noaa.gov/ecosystems/bycatch/discard-and-release-mortality>). NMFS directs commenters to these documents for further information regarding the agency’s efforts to address and evaluate release mortality in both commercial and recreational fisheries.

Interpretation of “Standardized”

Comment 8: Several commenters stated that NMFS’ proposed definition of “standardized reporting methodology” in § 600.1605(a) is contrary to Congress’ intent and the ordinary meaning of the word “standardized.” Commenters asserted that the MSA requires that SBRMs be standardized at the national, regional, or ecosystem level. In general, many of these commenters expressed concern that without regional, ecosystem, or national standardization, it will be difficult or impossible to assess the bycatch of species between fisheries or within multispecies fisheries; compare or combine data across fisheries or regions; understand ecosystem, regional, or national bycatch trends; or minimize bycatch. One commenter recommended

standardization according to gear type, specifically, reporting of bycatch by gear as a ratio of bycatch per unit effort to catch per unit effort (BPUE: CPUE). One commenter agreed that the proposed definition reflects the statutory language, but urged NMFS to direct managers to consider monitoring fish caught as bycatch that are managed in separate FMPs and by different management entities. One commenter also noted that the rule should be revised in light of NMFS' acknowledgment in the 2011 U.S. National Bycatch Report that it is difficult to compare or combine bycatch data across fisheries or regions due to differences in bycatch data, including the quantity and quality of data and reporting in pounds vs. individuals.

Response: NMFS is not changing its fishery-level approach to standardization in the final rule. The rule at § 600.1605(a) defines "standardized reporting methodology" with reference to a fishery, consistent with MSA section 303(a)(11). That section requires that "Any fishery management plan . . . with respect to any fishery, shall . . . establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery." 16 U.S.C. 1853(a)(11). The characteristics of bycatch in a fishery vary based on the fishing activity and operations. Therefore, requiring that SBRMs be standardized at the regional or national level would constrain the ability to tailor bycatch data programs to the needs of specific fisheries. However, consistent with current practices, the final rule encourages Councils to work together and collaborate on SBRMs for fisheries that operate across multiple jurisdictions, as appropriate.

NMFS does not agree that this rule will make it more difficult to assess the bycatch of species between fisheries or within multispecies fisheries; compare or combine data across fisheries or regions; understand ecosystem, regional, or national bycatch trends; or minimize bycatch. Unit conversion is a standard approach to dealing with data disparities. The agency routinely compiles data from varied sources and uses mathematical conversions and analytical tools to understand the data at the necessary scale.

With regard to gear type, as discussed in the preamble (*see* section I. C.), a Council may determine that different collection, recording, and reporting procedures are appropriate within a fishery for different gear types. However, because different fishing activities and operations (including but not limited to gear type) may affect the

amount and type of bycatch that occurs in a fishery and thus the types of reporting procedures that may be needed in a fishery, NMFS does not agree that SBRMs across a region or the country must be standardized by gear type. Furthermore, NMFS is not making changes to the rule in response to the suggestion to report bycatch by gear as a ratio of bycatch per unit effort to catch per unit effort (BPUE: CPUE). This suggestion pertains to how data might be displayed or synthesized when assessing the amount and type of bycatch. As explained previously, this rule pertains to the requirements for the collection, recording and reporting of bycatch data.

With respect to the National Bycatch Report, NMFS reiterates that the Report is not required under the MSA. Nevertheless, since 2011, NMFS has issued a National Bycatch Report and its Updates that provide a national- and regional-level look at bycatch. *See* response to comments 6 and 26 for further information on the National Bycatch Report. For the Second Edition of the National Bycatch Report (to be published in late 2017), NMFS is working to develop length-weight conversion factors for use in the Report. The use of conversion factors is not new; for example, NMFS has used such conversion factors in the pelagic longline fisheries based in Hawaii and American Samoa (<https://pifsc-www.irc.noaa.gov/library/pubs/DR-16-004.pdf>). Unit conversion and mathematical analysis is a standard approach to dealing with data disparities.

Comment 9: One commenter asserted that the inclusion of "subset of a fishery" in § 600.1605(a) is inconsistent with the MSA. Another commenter asked what a sub-"set" is, noting that it might be difficult in some fisheries to define a "set" and that, for many fisheries, collecting data at the "set" level would be extremely burdensome. The commenter expressed concern that fine-scale data collection might encourage inaccuracies and non-compliance with reporting requirements.

Response: The intent of the proposed rule's § 600.1605(a) (81 FR 9413, February 25, 2016) was to acknowledge that different fishing activities and operations can affect the amount and type of bycatch that occurs, and thus the types of reporting procedures that may be needed. Bycatch can be affected by, among other things, the gear types used, how gear is deployed, gear selectivity, fishing effort, fishing locations, and existing management measures. In response to this comment, NMFS has

amended § 600.1610(a)(2)(ii) to recognize that the amount and type of bycatch occurring in a fishery may vary based on different fishing operations. NMFS has also removed "subset" and refers simply to "fishery" in § 600.1605(a), to reflect the language of MSA section 303(a)(11). NMFS notes that the MSA's definitions of "fishery" and "stock of fish" are broad. *See* 16 U.S.C. 1802(13) (defining "fishery" as one or more stocks of fish which can be treated as a unit for purposes of conservation and management and which are identified on the basis of geographical, scientific, technical, recreational, and economic characteristics; and . . . any fishing for such stocks), and 16 U.S.C. 1802(42) (defining a "stock of fish" as a species, subspecies, geographical grouping, or other category of fish capable of management as a unit). Given the broad definition of "fishery" and the purpose of an SBRM, NMFS continues to believe that a Council, when developing an SBRM, may take into consideration different fishing activities and operations. For example, if there is fishing for a stock using trawl nets and gill nets, a Council may determine that different data collection, recording, and reporting procedures are appropriate for the two gear types. In such case, the FMP must identify what the established, consistent procedures are for both gear types. *See also* section I. C.

Comment 10: One commenter noted that in the Greater Atlantic Region, the current SBRM is designed by "fishing modes," which, in some cases, may not meet the statute's definition of a "fishery." The commenter recommended that it be made clear that this approach meets the requirements of the statute.

Response: NMFS is not making revisions to the final rule in response to this comment. NMFS approved the SBRM Omnibus Amendment for New England and Mid-Atlantic fisheries in June 2015, after reviewing the amendment for consistency with the MSA and other applicable law. Moreover, the SBRM Omnibus Amendment is currently the subject of litigation.

Comment 11: NMFS received comments that the lack of standardization in the proposed rule conflicts with the requirements of National Standard 3 (NS3).

Response: This rule is consistent with NS3, which requires, to the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination. 16 U.S.C. 1851(a)(3). The

NS3 guidelines provide guidance for interpreting a “management unit” in the context of a “fishery.” See 50 CFR 600.320(d) (defining management unit as “a fishery or that portion of a fishery identified in an FMP as relevant to the FMP’s management objectives”) and (d)(1) (explaining that “choice of a management unit depends on the focus of the FMP’s objectives, and may be organized around biological, geographic, economic, technical, social, or ecological perspectives”). As explained in response to comment 8, this final rule defines standardized reporting methodology with regard to a “fishery.” Thus, NMFS does not see any conflict between the two provisions. To the extent there is any conflict, NMFS notes that NS3 contains the qualifier, “to the extent practicable.”

Comment 12: One commenter recommended establishing minimum standards for federal bycatch reporting and offered to work with NMFS to define these standards and identify what can be done to help those Councils whose fisheries do not meet the minimum standards.

Response: This final rule establishes minimum standards for the collection, recording, and reporting of bycatch data under MSA section 303(a)(11). NMFS looks forward to working with all Councils as they review their FMPs under this final rule.

Purpose of a Standardized Reporting Methodology

Comment 13: Many commenters stated that the proposed rule’s § 600.1605(a) (81 FR 9413, February 25, 2016) is flawed because it defines standardized reporting methodology only with regard to collection, recording, and reporting of bycatch data, and not the assessment or analysis of that data. Several commenters asserted that this approach is contrary to the plain language of the MSA and Congressional intent, and that courts have found that bycatch assessment is a required component of SBRM.

Response: NMFS disagrees that an assessment methodology is a required part of SBRM, but agrees that an SBRM needs to meet its intended purpose, which includes collecting data that can be used to assess the amount and type of bycatch in a fishery. The proposed rule acknowledged this nexus between the SBRM and the assessment of bycatch. To reinforce this link, NMFS has added to § 600.1600 explanatory language from the proposed rule preamble stating that the purpose of an SBRM is to collect, record, and report bycatch data in a fishery that, in conjunction with other relevant sources

of information, are used to assess the amount and type of bycatch occurring in a fishery and to inform the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality. In addition, NMFS has added a new paragraph (iv) to § 600.1610(a)(2) that requires a Council to address how the data resulting from an SBRM are used to assess the amount and type of bycatch in the fishery, and requires the Council to consult with its SSC and/or regional NMFS science centers on SBRM design considerations (e.g., data elements, sampling designs, sample sizes, and reporting frequency). NMFS believes this approach is consistent with the plain language of section 303(a)(11) of the MSA, which requires that an FMP establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery, and include conservation and management measures that minimize bycatch and bycatch mortality to the extent practicable. 16 U.S.C. 1853(a)(11). Section 303(a)(11) requires a reporting methodology, not an *assessment* methodology. Other section 303(a) provisions explicitly require that assessments be included in an FMP, but this is not the case for section 303(a)(11). See e.g., 16 U.S.C. 1853(a)(3) (requiring FMP to assess and specify the present and probable future condition of, and the maximum sustainable yield and optimum yield from, the fishery), and 16 U.S.C. 1853(a)(4) (requiring that FMPs assess and specify . . . the capacity and extent to which fishing vessels of the United States, on an annual basis, will harvest the optimum yield . . .). NMFS disagrees that its interpretation is contrary to Congressional intent. In support of their comments, commenters cited Senate Report 104–276, which states that the Sustainable Fisheries Act (S. 39) “would mandate the assessment of bycatch level in each fishery” (S. Rep. No. 104–276, at 99 (1996)). This report discussed a version of a Senate bill that was reported out of committee on May 23, 1996, which would have required that FMPs “assess the amount and type of bycatch occurring in the fishery.” That text was not enacted.

NMFS recognizes that some district courts have described the SBRM requirement as a bycatch assessment methodology or have asserted that section 303(a)(11) requires the assessment of bycatch in the fishery. See, e.g., *Oceana v. Locke*, 831 F.Supp.2d 95 (D.D.C. 2011); *Pac. Marine Conservation Council v. Evans*, 200 F. Supp.2d 1194 (N.D. Cal. 2002). NMFS

considered this case law in developing the proposed rule. After taking public comment into consideration, and reconsidering relevant case law, NMFS continues to believe that the approach taken in this final rule is appropriate and consistent with the MSA, for the reasons explained above. To the extent that courts have described the SBRM provision as an “assessment methodology,” NMFS notes that the cases did not engage in a comprehensive review of the statutory construction of the SBRM provision. Reading section 303(a)(11) in context with other provisions of the MSA, NMFS believes that the final rule’s definition of “standardized reporting methodology,” which does not include assessment methods, is consistent with the MSA.

Comment 14: Several commenters asserted that data collection and assessment are inextricably linked. Where, how, how much, and what type of data is collected determines how those data may be analyzed and used to come up with bycatch estimates. If the design of an SBRM is disconnected from the needs of the bycatch assessment process, there will be a waste of resources and effort, and scientists and managers will not have reliable data they need to get an accurate accounting of bycatch, reduce uncertainty in the assessment of species, and better manage the fishery to minimize bycatch. Other commenters agreed that fishery managers must consider data methodologies in tandem with assessment methodologies to make sure that data will actually be usable to “assess the amount and type of bycatch occurring in a fishery.”

Response: NMFS affirms that an SBRM must meet its statutory purpose, which includes collecting data that can be used to assess the amount and type of bycatch occurring in a fishery. The final rule does not delink data collection and assessment. Rather, as explained in response to comment 13, NMFS has revised the final rule to reinforce this nexus.

Estimating or assessing bycatch often requires a variety of highly technical data that can vary based on fishery, region of the country, and type of bycatch involved. Relevant data may come from observer program databases, logbooks, commercial landings databases, the NMFS Marine Recreational Information Program database, or other sources. As explained in the preamble of the proposed rule (81 FR 9413, February 25, 2016), a variety of different models or approaches may be used to synthesize these data to assess, evaluate, or estimate bycatch. Given that the assessment/estimating of

bycatch is a scientific matter, and science is a dynamic process with new findings constantly advancing the state of knowledge (see National Standard 2 guidelines, 50 CFR 600.315(a)(5)), NMFS does not believe that an FMP—which is a management and policy document that can take a long time to amend—must specify the approaches and methods that scientists must use to make such assessments or estimations. If a Council wants to include such methods in its SBRM, the Council may do so, but is not required to.

Uncertainty in data is a reality of fisheries management. See NS9 guidelines, 50 CFR 600.350(d)(2) (stating that due to limitations in available information, fishery managers “may not be able to generate precise estimates of bycatch and bycatch mortality of other effects” for management alternatives). NMFS’ National Standard 2 guidelines provide that mandatory measures not be delayed due to incomplete data, but management decisions should recognize the risks associated with the sources of uncertainty and gaps in the scientific information. *Id.* § 600.315(a)(2), (a)(6)(v). Consistent with these guidelines, and in response to comments, NMFS has revised the proposed rule regulatory text by adding language to § 600.1610(a)(2) in a new paragraph (iii) to require a Council to address uncertainty and design an SBRM so that uncertainty associated with the resulting bycatch data reported to the Secretary can be described, quantitatively or qualitatively. NMFS clarifies in that subsection that Councils should seek to minimize uncertainty in the resulting data, recognizing that different degrees of data uncertainty may be appropriate for different fisheries. See comment and response 31, *infra*, discussing data quality issues.

Comment 15: Several commenters asserted that NMFS must not step away from prior guidance in *Evaluating Bycatch* that “the combination of data collection and analyses that is used to estimate bycatch in a fishery constitutes the SBRM for that fishery.”

Response: NMFS acknowledged in the notice of proposed rulemaking that Appendix 5 of *Evaluating Bycatch* describes SBRM as the combination of data collection and analyses that is used to estimate bycatch in a fishery. However, as previously noted, *Evaluating Bycatch* is a technical memorandum; neither the memorandum nor its appendices established binding policy or agency interpretation of MSA section 303(a)(11). NMFS is issuing this rule to set forth its interpretation of section

303(a)(11). In developing this rule, NMFS undertook a comprehensive evaluation of section 303(a)(11), including the language of the provision and its context in the overall statutory scheme for fisheries management established by Congress in the MSA. See “Purpose of an SBRM” above, responses to comments 13 through 17, and “Activities Associated with an SBRM” in the proposed rule (discussing distinction between data collection/reporting and assessment) (81 FR 9413, February 25, 2016). NMFS believes that it is important to be clear about the key policy choices and objectives associated with establishing a reporting methodology, and not confuse those choices with statistical and technical approaches for estimating bycatch that are inherently scientific and data dependent, or with the policy choices associated with developing measures to minimize bycatch or bycatch mortality. After careful analysis and consideration of public comments, NMFS has decided not to retain the approach from *Evaluating Bycatch*.

Comment 16: One commenter states that, assuming the agency’s proposed rule for SBRM was in place, Councils and scientists would now have no guidance for how to actually assess bycatch. There is no guidance provided, and none promised, on how to model the amount, type, and scope of bycatch with the (likely) piecemeal and uneven data provided by SBRMs.

Response: NMFS relies on expertise from six regional science centers to provide scientific information and analyses for fishery management. Providing guidance in this rule on how to assess bycatch is inappropriate and unnecessary given the dynamic nature of science and existing guidance and scientific processes. Notably, National Standard 2 (NS2), 16 U.S.C. 1851(a)(2), requires that conservation and management measures be based on the best scientific information available, and NMFS has provided guidance on NS2 at 50 CFR 600.315.

Best scientific information available includes, but is not limited to, models, data, analyses, and scientific assessments, and new scientific findings constantly advance the state of knowledge. *Id.* § 600.315(a)(4)–(5). As explained in the NS2 guidelines, scientific information is not conducted in a vacuum, but is subject to peer review, consistent with the guidelines and the Office of Management and Budget Final Information Quality Bulletin for Peer Review. *Id.* § 600.315(a)(6)(vii). Moreover, each Council has a Scientific and Statistical Committee that is responsible for

providing the Council with ongoing scientific advice. *Id.* § 600.315(c) and 16 U.S.C. 1852(g)(1).

Comment 17: One commenter supports the clarification that the SBRM consists of the data collection and reporting programs, and is distinct from the methods used to assess bycatch and the measures to minimize bycatch. The proposed rule preamble indicated that a Council may include other elements (such as the analytic approach used to assess bycatch), and the commenter suggested adding this point to the regulatory text.

Response: NMFS thanks the commenter for expressing support for its approach. However, NMFS does not believe that changes to the regulatory text are necessary. As explained in the proposed rule preamble (81 FR 9413, February 25, 2016), this rule describes the basic requirements of the SBRM provision of section 303(a)(11) of the MSA. A Council may, but is not required to, add other relevant information to its FMP beyond the basic requirements of this rule.

Comment 18: One commenter stated that the underlying purpose of an SBRM might affect its design, as data provided by these programs can be used a number of different ways, and the design needs to be appropriate for these uses. For example, the design of an SBRM may be very different if it is primarily used to support stock assessments rather than fishery management decisions. In the former case, an argument could be made that the responsible science center should have extensive input in its development. On the other hand, if intended primarily to address the requirements placed on managers to minimize bycatch to the extent practicable, the Council’s needs should have more weight. The proposed rule should suggest a clear discussion in the SBRM about how its design addresses the needs of scientists and managers.

Response: The rule requires that an FMP, or a fishery research plan authorized under 16 U.S.C. 1862, explain how an SBRM meets the purpose described in § 600.1600, based on an analysis of requirements in § 600.1610(a)(2). The purpose of SBRM is two-fold: Provide data that, in conjunction with other relevant sources of information, are used to assess the amount and type of bycatch occurring in a fishery and for informing the development of conservation and management measures to minimize bycatch. Given this purpose, § 600.1610(a)(2) requires a Council to address the characteristics of bycatch in the fishery, the feasibility of the SBRM, data uncertainty, and data use. NMFS

acknowledges in the final rule that different SBRMs may be appropriate for different fisheries due to the inherent variability among fisheries. Scientific input is an important aspect of developing an SBRM, thus § 600.1610(a)(2)(iv) requires a Council to consult with its SSC and/or regional NMFS science center on SBRM design considerations.

Comment 19: One commenter asserted that the SBRM rule should follow a precautionary, ecosystem-based approach that can be applied uniformly to all fisheries to count, cap and control bycatch.

Response: For the reasons explained in responses to comments 1, 2, 8 and other comments, this final rule takes a fishery-specific approach to establishing SBRMs. NMFS believes that this rule will ensure the standardized collection, recording, and reporting of bycatch data for each fishery. A uniform approach to count, cap, and control bycatch across all fisheries is not required under the MSA, and is not practical or cost effective, given the variability in fishery characteristics. *See* response to comment 8 for further explanation. NMFS believes that this rule is consistent with and complementary to the agency's policy for ecosystem-based fisheries management. NMFS strongly supports implementation of Ecosystem-Based Fisheries Management (EBFM) to better inform and enable decisions regarding trade-offs among and between fisheries (commercial, recreational, and subsistence), aquaculture, protected species, biodiversity, and habitats. Recognizing the interconnectedness of these ecosystem components will help maintain resilient and productive ecosystems (including human communities), even as they respond to climate, habitat, ecological, and other environmental changes. *See* <http://www.st.nmfs.noaa.gov/Assets/ecosystems/ebfm/Final-EBFM-Policy-PDS-Review-5.20.2016-final-for-PDS.pdf>. This rule is consistent with the EBFM policy statement because it provides for a national approach to establishing and reviewing SBRMs and will improve NMFS' understanding of the impacts of a fishery on non-target stocks. Such information will help NMFS and the Councils consider the ecosystem-level trade-offs that are a key component of EBFM.

Comment 20: One commenter stated that in order for data to be "useful" (*see* proposed § 600.1610(a)(1)(i) at 81 FR 9413, February 25, 2016), clear criteria must be set so that standardized bycatch data can be fed into the calculation of annual catch limits (ACL) and fully considered in the implementation of

accountability measures (AM). Bycatch must be accurately assessed because it counts against a stock's catch limit. Bycatch must be monitored to comply with both the SBRM provision in MSA section 303(a)(11) and ACL/AM requirements in MSA section 303(a)(15).

Response: NMFS has deleted the term "useful" and revised the final rule to require that Councils address data use and data uncertainty when establishing or reviewing an SBRM. *See e.g.*, responses to comments 13 and 31 through 33. Data resulting from SBRMs may be used to inform management decisions beyond bycatch-related ones, and NS2 provides the standard for data used to inform such decisions: Conservation and management measures shall be based on the "best scientific information available." 16 U.S.C. 1851(a)(2). For the reasons explained in responses to comments 31 through 33, NMFS is not establishing national standards for accuracy of data or estimates in this final rule.

NMFS notes that SBRMs (16 U.S.C. 1853(a)(11)) and ACLs/AMs (16 U.S.C. 1853(a)(15)) are separate statutory requirements, which should not be conflated. *See Oceana v. Locke*, 831 F.Supp.2d 95 (D.D.C. 2011). Detailed guidance on establishing ACL/AM mechanisms is provided in the National Standard 1 (NS1) guidelines (50 CFR 600.310). To the extent that data from an SBRM are used in specifying ACLs, this final rule complements the NS1 guidelines. The NS1 guidelines state that the "acceptable biological catch" accounts for scientific uncertainty in the estimate of the overfishing limit for a stock or stock complex. 50 CFR 600.310(f)(2)(ii). Section 600.1610(a)(2)(iii) also addresses uncertainty, requiring that an SBRM be designed so that uncertainty associated with the resulting data can be described quantitatively or qualitatively. This is consistent with the NS2 guidelines (50 CFR 600.315), which provide guidance on uncertainty and issues related to use of the best scientific information available. Moreover, the NS1 guidelines refer to mortality of fish that are discarded (50 CFR 600.310(f)(2)(i)), and § 600.1610(a)(2)(i) of this final rule requires that, when developing an SBRM, a Council must address, among other things, "the importance of bycatch in estimating the fishing mortality of fish stocks."

Types of Data Collection, Recording, and Reporting Procedures

Comment 21: One commenter recommended eliminating the "self-reported mechanisms" option provided for in the proposed rule's § 600.1610(a)

(81 FR 9413, February 25, 2016) to help eliminate bias in data collection.

Response: NMFS does not agree with this comment; self-reported mechanisms are important to include as a potential reporting procedure because they are cost effective, feasible, and already available and appropriate for use in various fisheries to report bycatch data. Self-reported mechanisms (such as logbooks that include bycatch reporting) usually are required of all fishery participants, and therefore represent a near-census of the fishery. The costs of logbook programs are typically low, and, concerns regarding safety are limited to concerns that already exist with fishing operations, which are substantial for fishermen but basically nonexistent for those processing logbooks. However, NMFS recognizes that an SBRM based solely on logbooks will not be appropriate for all fisheries. That is why the rule requires Councils to undertake a fishery-specific analysis of SBRMs. Further, the rule requires that an SBRM be designed so that the uncertainty associated with the data resulting from the SBRM can be described. Management decisions should recognize the risks associated with that uncertainty. *See* National Standard 2 guidelines, 50 CFR 600.315.

Comment 22: Many commenters recommended reporting bycatch data and estimates in a manner that is useful for stakeholders, managers, and scientists.

Response: NMFS agrees with this comment. The final rule states that the purpose of an SBRM is to collect, record, and report bycatch data that, in conjunction with other relevant sources of information, can be used to assess bycatch and inform the development of conservation and management measures. Any SBRM established by a Council must achieve this purpose, thereby ensuring that bycatch data resulting from an SBRM will be useful for stakeholders, managers, and scientists.

Comment 23: Several commenters recommended requiring observer programs and/or electronic monitoring to promote the collection of accurate data and mitigate against data collection bias. One commenter stated other agency documents have recognized the benefits of observers for quantifying and estimating bycatch. However, the proposed rule does not require trained observers.

Response: NMFS disagrees that the rule should require the implementation of observer or electronic monitoring programs. Observer and electronic monitoring programs are not the only ways to collect, record, and report

bycatch, and the MSA does not require their inclusion in every SBRM. *See* 16 U.S.C. 1853(a)(11), (b)(8). NMFS recognizes that observer programs are used in many fisheries for collecting bycatch data. However, observer programs are costly and logistically challenging, and such programs may not be needed in all fisheries. Requiring every SBRM to include an observer program would not be an efficient use of resources. Further, it is NMFS' policy to encourage the consideration of electronic technologies to complement and/or improve existing fishery-dependent data collection programs to achieve the most cost-effective and sustainable approach that ensures alignment of management goals, data needs, funding sources and regulations. *See* NMFS Policy Directive 30–133, Policy on Electronic Technologies and Fishery-Dependent Data Collection (May 3, 2013). However, the adoption of new technologies raises numerous fishery-specific technical, legal, and policy issues, and, as with observer programs, electronic monitoring programs may not be needed or feasible in a particular fishery. Recognizing the diversity of fisheries across the country, this rule requires Councils to undertake a fishery-specific evaluation to determine the SBRM appropriate to a fishery, while still achieving the purpose of an SBRM as described in § 600.1600.

Comment 24: A commenter requested that intercept surveys be explicitly mentioned in § 600.1610(a) as an example of a self-reported mechanism.

Response: The types of self-reported mechanisms identified in § 600.1610(a)(1) are examples; this list is not exhaustive or limiting. NMFS agrees that intercept surveys are a type of self-reported mechanism, along with others, that could be included in an SBRM.

Comment 25: A commenter requested written reports for the Councils (and the public) from NMFS each year that minimally report by species and sector how many fish were landed and how many were released. To track Council progress towards minimizing bycatch, the commenter suggested a report in December on the first 6 months of the year and a final report in June showing landings and released fish by sector by species for the previous year. The commenter also requested that preliminary bycatch information by sector be provided at each Council meeting when landings information is presented.

Response: Catch and landings data and estimates/assessments are available through a variety of means, including, but not limited to, stock assessments

and other scientific documents and reports, SAFE reports, annual Fisheries of the United States reports, the National Bycatch Reports and national reports to international committees. Landings data can be accessed online using NMFS' species information system at <https://www.st.nmfs.noaa.gov/sisPortal/sisPortalMain.jsp>.

Comment 26: One commenter stated that locating specific data and metadata about bycatch is an ongoing issue because various data are reported in disparate reports. The commenter suggested including a provision to require the movement to housing of data in a single source (such as a data warehouse) to improve standardizing, documenting, and accessing data.

Response: Since 2011, NMFS has published a series of National Bycatch Reports and Updates that provide information on fishery- and species-specific bycatch estimates for major U.S. fisheries around the country. Some of the estimates contained in the National Bycatch Reports and Updates are also published in other NMFS documents such as its marine mammal stock assessment reports. Additionally as stated in response to comment 6 and 25, NMFS has created a custom database that allows members of the public to query bycatch estimates that were published in the National Bycatch Report Updates. (Members of the public can access the database here: <http://www.st.nmfs.noaa.gov/observer-home/first-edition-update-1>). *See* responses to comments 8 and 9 for an explanation as to why section 303(a)(11) and this rule do not require data collection to be standardized at the national level.

FMP Contents

Comment 27: One commenter stated that the required factors for SBRMs (proposed § 600.1610(a)(2)(i), (ii) at 81 FR 9413, February 25, 2016) are minimal and lack specificity. Details of establishing and reviewing SBRMs are left to Councils, and NMFS has no enforcement mechanism to ensure SBRMs are established and no option to take over if a Council fails to establish an SBRM. NMFS should revise the rule to make SBRMs mandatory. In addition, the rule should prescribe and detail each aspect of bycatch data collection and assessment to allow uniformity of information that can be aggregated and compared, ideally not only nationally but also internationally.

Response: The requirement to establish an SBRM is mandatory under MSA section 303(a)(11). Section 600.1600 and the proposed rule preamble (81 FR 9413, February 25, 2016) explicitly state that this is an

MSA requirement. In response to public comments, NMFS has included in the final rule revisions that clarify the requirements (initially referred to as "factors" in the proposed rule) for establishing and reviewing an SBRM. Section 600.1610(a)(1) provides that an FMP, or a fishery research plan as authorized under 16 U.S.C. 1862, must explain how the methodology meets the purpose described in § 600.1600, based on an analysis of the requirements set forth in § 600.1610(a)(2): Characteristics of bycatch, feasibility, data uncertainty, and data use. NMFS disagrees that methodology needs to be standardized at a national or international level. *See* comments and responses 1, 2, 8, and 9. With regard to data assessment, this rule requires a Council to address data use and data uncertainty and to consult with its SSC and/or NMFS science centers. *See* comments and responses 16, and 31 through 33. NMFS does not believe more prescriptive text is needed regarding data collection and assessment.

Under the MSA, Councils are in the first instance responsible for developing FMPs and addressing mandatory FMP requirements, including SBRMs. NMFS has a seat on each Council. NMFS will use its regular procedures for approval of FMPs and FMP amendments to ensure that FMPs and their implementing regulations are consistent with the MSA and other applicable laws. NMFS notes that MSA section 304(c) specifically addresses when NMFS may prepare an FMP.

Comment 28: NMFS received comments stating that its proposed regulations regarding the contents of FMPs and the factors that a Council must consider in establishing or reviewing an SBRM are too prescriptive. One commenter recommended revising the regulatory text of § 600.1610 in several places to clearly reflect that the objective of this proposed rule is to provide guidance to the Councils on the implementation of SBRMs. The commenter recommended changes to the regulatory text to provide greater flexibility.

Response: As explained previously, the purpose of this rule is to set forth the basic requirements of MSA section 303(a)(11). *See* comments and responses 1 and 2 (explaining the effect and need for rule). NMFS does not believe the rule is overly prescriptive, as it takes a fishery-specific approach, and does not prescribe specific details on the methodology needed for each fishery.

Comment 29: A commenter stated that § 600.1610(a)(1) should be revised to allow Councils to include a more detailed description of the SBRM in

other documents than the FMP. For example, the North Pacific Fishery Management Council and NMFS use an Annual Deployment Plan (ADP) process to determine the scientific sampling plan and method for assigning observers to vessels and processing plants. This can change from year to year. Under proposed § 600.1610(a)(1) at 81 FR 9413, February 25, 2016, it appears that an FMP would need to include a specific reference to the ADP process (which it already does), or to provisions for a specific annual ADP, which would be outdated almost immediately upon approval of the FMP amendment. This is not necessary and is directly counter to the overall objective of this proposed rule, which is to provide the public with greater clarity about the provisions of an SBRM.

Response: Each FMP must identify the required procedure or procedures that constitute the SBRM for a fishery. See § 600.1610(a)(1). In addition, an FMP, or fishery research plan as authorized under 16 U.S.C. 1862, must explain how an SBRM meets the purpose described in § 600.1600, based on an analysis of four requirements under § 600.1610(a)(2). The rule provides that the FMP or fisheries research plan may reference analyses and information in other documents. NMFS has also revised § 600.1610(a)(1) to state that, in addition to any proposed implementing regulations, a Council should also provide in its FMP, or fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of an SBRM consistent with the FMP. In the North Pacific, the ADP referenced by the commenter is a component of the fishery research plan, thus NMFS and the Council may continue to use the ADP to determine annually the scientific sampling plan and method for assigning observers to vessels and processing plants, consistent with the fisheries research plan and FMP. See comment and response 48 for additional explanation.

Consideration of Quality and Use of Data

Comment 30: One commenter expressed support for the requirement for Councils to consider data quality.

Response: NMFS appreciates the support regarding the consideration of data quality. In the final rule, NMFS has elaborated on the concept of data quality by requiring Councils to address both the uncertainty of the data and the use of the data resulting from the SBRM. See comments and responses on “Purpose of a Standardized Reporting

Methodology” and comments and responses 31 through 36.

Comment 31: Several commenters asserted that the rule must incorporate standards for precision and accuracy, or should provide guidance that SBRMs produce statistically accurate, precise, and/or reliable estimates of bycatch. Another commenter stated that while the MSA does not specify a specific level of accuracy or precision, it does require that SBRMs produce data that are accurate and reliable enough to satisfy the statutory requirement to develop measures to minimize bycatch and bycatch mortality. Commenters cited several court decisions regarding SBRMs and accuracy or reliability of data. Some commenters also asserted that the proposed rule would result in data that is contrary to the agency’s guidelines for National Standard 2 (NS2).

Response: NMFS agrees that an SBRM must meet its statutory purpose. See response to comment 13 for further explanation. To that end, the final rule requires Councils to explain how a chosen SBRM meets its statutory purpose, based on an analysis of the characteristics of bycatch in the fishery, the feasibility of the SBRM, the uncertainty of the data associated with an SBRM, and the use of the data resulting from an SBRM. See comments and responses 32 through 36 for further discussion related to data use and uncertainty considerations.

In this final rule, however, NMFS is not establishing national standards for precision, accuracy, or reliability of bycatch estimates or data. NMFS clarifies in this rule that Councils should seek to minimize uncertainty in the resulting data, recognizing that different degrees of data uncertainty may be appropriate for different fisheries. However, the specific characteristics of each fishery and its bycatch vary widely from region to region and from fishery to fishery. NMFS believes that it is important for Councils to address the characteristics of bycatch in a particular fishery and also address data use, data uncertainty, and feasibility considerations in the context of that fishery. To ensure robust scientific advice in establishing or reviewing SBRMs, § 600.1610(a)(2)(iv) requires a Council to consult with its SSC and/or regional NMFS science centers on reporting methodology design considerations, such as data elements, sampling designs, sample sizes and reporting frequency, all of which contribute to the level of data quality.

The SBRM provision in section 303(a)(11) of the MSA does not specify

reliability, accuracy, precision, or other qualifiers regarding bycatch data or estimates. NMFS recognizes that some courts have addressed bycatch estimates or the quality of data in the context of particular FMPs or amendments. See, e.g., *NRDC v. Evans*, 168 F.Supp.2d 1149, 1154 (N.D. Cal. 2001) (finding that NMFS failed to address the SBRM requirement and its “duty to obtain accurate bycatch data”); and *Oceana v. Evans*, 384 F.Supp.2d 203, 234–235 (D.D.C. 2005) (finding that NMFS failed to analyze what type of program would “succeed in producing the statistically reliable estimates of bycatch needed to better manage the fishery” and to address an accuracy concern in a scientific study). However, these opinions were based on the specific FMPs before the courts, and did not engage in comprehensive analysis of the statutory construction of the SBRM provision. NMFS believes that the approach in the final rule is consistent with MSA section 303(a)(11) and will ensure that SBRMs achieve the statutory purpose for SBRMs (§ 600.1600), while allowing Councils to address the unique circumstances of particular fisheries.

NMFS disagrees that the rule would result in data that is contrary to the NS2 guidelines. NS2 requires that conservation and management measures be based on the best scientific information available. 16 U.S.C. 1851(a)(2). It does not require NMFS to produce statistically reliable data or data that achieves a particular level of precision for the bycatch estimates. In fact, the NS2 guidelines recognize that there may be data limitations in different fisheries. See 50 CFR 600.315(a)(3) (noting that “data-poor” fisheries may require use of simpler assessment methods and greater use of proxies for quantities that cannot be directly estimated). Consistent with the NS2 guidelines at § 600.315(a)(2) and § 600.315(a)(6)(v), and in response to comments, NMFS has revised § 600.1610(a)(2) by adding a new paragraph (iii) that requires a Council to address uncertainty and to design SBRMs so that uncertainty associated with the resulting bycatch data reported to the Secretary can be described quantitatively or qualitatively.

Comment 32: Many commenters stated that the SBRM rule will result in poor data and, as a result, managers will not be able to sustainably manage fisheries. Commenters asserted that an accurate accounting of bycatch in fisheries is critical to fulfilling the requirements of the MSA to account for all sources of mortality in fisheries management, prevent overfishing, rebuild overfished stocks, and minimize

the amount of bycatch and mortality of unavoidable bycatch.

Response: NMFS disagrees that the rule will adversely affect data collection and fishery management efforts. The rule reinforces that an SBRM must meet its statutory purpose and sets forth requirements for establishing and reviewing SBRMs. For example, the rule includes a requirement that Councils address the uncertainty of the data resulting from an SBRM and that Councils design an SBRM so that the uncertainty of the data can be described. The rule clarifies that Councils should seek to minimize uncertainty in the resulting data, recognizing that different degrees of data uncertainty may be appropriate for different fisheries. The rule also includes a requirement that Councils address how the data resulting from the SBRM are used and consult with their SSCs and/or the regional science centers on SBRM design considerations. NMFS believes that the rule's requirements, along with periodic review of SBRMs, will ensure that SBRMs produce bycatch data that, along with other sources of data, can be used to assess and estimate bycatch and inform the development of conservation and management measures.

The NS2 and NS9 guidelines acknowledge that all scientific data come with a level of uncertainty. *See* response to comment 31 (discussing 50 CFR 600.350(d)(2), § 600.315(a)(2), and § 600.315(a)(6)(v)). As the NS2 guidelines note, science is a dynamic process and new scientific findings constantly advance the state of knowledge. *Id.* § 600.315(a)(5) (stating that best scientific information is, therefore, not static and ideally entails developing and following a research plan). The key thing is to account for uncertainty when considering fishery management decisions. *See e.g.*, 50 CFR 600.315(a)(2) and § 600.315(a)(6)(v) (providing for acknowledgment of uncertainties in scientific information used to inform decision making); and § 600.310(f)(1)(vi) and § 600.310(f)(2)(i) (describing under NS1 guidelines sources of scientific uncertainty and requiring that acceptable biological catch control rule account for scientific uncertainty and the Council's risk policy). NMFS notes that the requirement to establish an SBRM (16 U.S.C. 1853(a)(11)) is a separate statutory requirement from annual catch limits and other overfishing provisions (16 U.S.C. 1853(a)(15) and 1851(a)(1)) and from rebuilding provisions (16 U.S.C. 1854(e)). These various provisions should not be conflated.

Comment 33: One commenter stated that without any guidance on the level

of accuracy and precision of the data, it is unclear to what extent the data will be "useful" in assessing bycatch to inform management decisions. The commenter stated that the rule itself does not need to specify what constitutes "useful," but it should recommend a clear process, like SSC consultation, that will define "useful." Another commenter stated that NMFS should clarify the language in § 600.1610(b) requiring consultation with a council's SSC, advisory panels, and the NOAA science centers to ensure that bycatch estimation can be appropriately considered with respect to establishing a reporting methodology. Another commenter stated that SBRMs should be designed based on the best scientific statistical and sampling methods available to collect and analyze that data.

Response: In response to comments, NMFS has deleted reference to "data that are useful" in the final rule. Instead, NMFS specifies that an SBRM must meet its statutory purpose set forth in § 600.1600, and requires under § 600.1610(a)(2)(iv) consultation with the SSC and NOAA science centers. Specifically, NMFS has revised the final rule to require in § 600.1610(a)(2)(iv) that a Council consult with its SSC and the NOAA science centers on methodology design considerations such as data elements, sampling designs, sample sizes, reporting frequency, and the scientific methods and techniques available to collect, record, and report bycatch data that could improve the quality of the bycatch estimates. Information provided through the consultation process will enable a Council to develop an SBRM that incorporates scientific input and that will provide data that can be used to assess the amount and type of bycatch occurring in the fishery.

Comment 34: Some commenters expressed support for *Evaluating Bycatch*, which recommended the use of at-sea observers and observational technologies, a statistically valid sampling design, a goal to achieve levels of precision of 20 to 30 percent coefficient of variation (CV), models for combining data to assess bycatch, and adherence to data collection and estimation standards. One commenter asserted that, without further study, NMFS cannot step away from the recommendations in *Evaluating Bycatch*. The commenter stated that the memorandum may represent the "best available science" and, if so, NMFS must rely upon it and incorporate it in this rule.

Response: NMFS disagrees that *Evaluating Bycatch* should be

incorporated into this rule: It was not developed as the agency's interpretation of MSA section 303(a)(11), and it conflates the establishment of a reporting methodology with methods to assess/estimate bycatch. However, NMFS closely reviewed *Evaluating Bycatch* when developing this rule and drew upon concepts and approaches from that report. For example, the report noted that the choice of which monitoring methods are used in a particular fishery is based on consideration of a range of factors, *e.g.*, quality of data, credibility, timeliness, cost, safety. *See Evaluating Bycatch* at 23. With regard to estimates of bycatch from observer data, the report provides CV recommendations, but lists numerous caveats for using precision goals in the context of bycatch reporting/monitoring programs. *See id.* at 103 (noting that there may be circumstances where meeting precision goals for bycatch estimates would not be an efficient use of public resources, funding and logistical constraints may prevent attainment of goals, etc.). NMFS also notes that this rule takes a fishery-specific approach and requires Councils to address bycatch characteristics, data quality, data use, and feasibility, which are considerations reflected in *Evaluating Bycatch*.

Evaluating Bycatch continues to be available as a resource; it contains information that may be helpful when developing SBRMs, such as discussion of regional bycatch and fisheries issues, the advantages and disadvantages of different reporting/monitoring measures, and precision goals for bycatch estimates. However, the report is from 2004, so it would be important for a Council to consider whether more updated information is available when establishing or reviewing an SBRM.

Comment 35: Adequate monitoring of bycatch of fish as well as other living marine resources should be required in the proposed rule. The 2005 report entitled, "How Much Observer Coverage is Enough to Adequately Estimate Bycatch?" should be reviewed carefully to assist the Fisheries Service in developing standardized criteria for bycatch monitoring.

Response: In developing this final rule, NMFS considered the Babcock and Pikitch report, "How Much Observer Coverage is Enough to Adequately Estimate Bycatch?" NMFS is very familiar with this report, as NMFS has addressed the report in past litigation over SBRMs. As explained in the response to comment 13, assessing and estimating bycatch is not included in the definition of an SBRM. However, the rule requires, among other things,

consideration of data uncertainty and data use in developing and reviewing SBRMs. The Babcock and Pikitch report is one source among many sources of information available to Councils and NMFS when developing and reviewing SBRMs.

NMFS notes that the report focuses on the use of observers for collecting, recording, and reporting bycatch data. The MSA provides that observers may be used, but are not required to be used, for data collection. See 16 U.S.C. 1853(b)(8) (providing for observers as a discretionary FMP measure). The report acknowledges that there is a range of observer coverages that may be more or less appropriate for a fishery. The report also notes that determining the appropriate level of sampling effort is an iterative process. This final rule similarly acknowledges that different SBRMs will be appropriate for different fisheries, and provides for scientific input into development of SBRMs and periodic review of SBRMs.

Comment 36: One commenter stated that NMFS should conduct scientific studies on accuracy/bias, precision, management uncertainty, and electronic monitoring advances to determine how to set standardized criteria for bycatch monitoring and reporting.

Response: NMFS strives to continually improve the science underlying its fishery management programs. Pursuant to 16 U.S.C. 1881c, NMFS prepares, in cooperation with the Councils and states, a strategic plan for fisheries research. The NMFS Office of Science and Technology's 2013 Strategic Plan identifies a variety of activities to improve data collection and data assessments for a variety of purposes, including bycatch analyses. See <https://www.st.nmfs.noaa.gov/Assets/Strategic-Plans/ST%20Strategic%20Science%20Plan%20%202013.pdf>. NMFS recently initiated a review and update of this plan. Furthermore, in February 2016, NMFS released a draft *National Bycatch Reduction Strategy* (draft Strategy). See http://www.nmfs.noaa.gov/sfa/fisheries_eco/bycatch/docs/national-bycatch-strategy-2-23-16-web.pdf. The first objective of the draft Strategy is to strengthen monitoring and data collection programs through cost-effective use of new and existing tools (e.g., observers, logbooks, and electronic technologies) to collect bycatch data that inform agency bycatch priorities. NMFS received multiple public comments on the draft Strategy and is now working to finalize it and develop action plans. Once the strategy is finalized, NMFS plans to develop regional and national action plans in coordination with

stakeholders to identify specific actions that reflect regionally specific bycatch priorities, including research and monitoring priorities. Another example of NMFS' commitment to continually improving our data collection programs is NMFS' Policy on electronic technologies and fishery-dependent data collection programs. See NMFS Policy Directive 30–133, Policy on Electronic Technologies and Fishery-Dependent Data Collection (<http://www.nmfs.noaa.gov/op/pds/documents/30/30-133.pdf>). This policy provides guidance on the adoption of electronic technology solutions in fishery dependent data collection programs. Electronic technologies include the use of vessel monitoring systems, electronic logbooks, video cameras for electronic monitoring, and other technologies.

To the extent the commenter is recommending studies to support development of national, uniform bycatch reporting requirements, NMFS disagrees with the recommendation, as this rule takes a fishery-specific approach to the SBRM requirement. See the responses to comments 8 through 12.

Consideration of Feasibility, Costs, and Funding

Comment 37: Several commenters stated that the SBRM provision of section 303(a)(11) does not say that an FMP must include SBRM if it is “feasible” or “practicable”; the statute requires FMPs to establish SBRM without any qualifying condition. Commenters assert that the provisions of the proposed rule relating to feasibility, including consideration of costs and funding, are contrary to the plain language of the statute. Commenters also cite *Oceana v. Locke*, 670 F. 3d 1238 (D.C. Cir. 2011), for the proposition that the MSA requires NMFS to establish SBRM without regard to any consideration of practicability (i.e., costs or funding). Commenters also argue that NMFS may not import a “practicable” standard from National Standard 7 (NS7), and may not use reducing costs as an excuse to implement weakened management measures that will not achieve the MSA's primary conservation requirements.

Response: NMFS agrees that the requirement to establish a standardized reporting methodology is mandatory for all FMPs. However, NMFS disagrees that the MSA precludes consideration of feasibility from cost, technical, and operational perspectives when establishing such a methodology. Beyond the fact that an SBRM must

meet its statutory purpose, section 303(a)(11) does not specify *any* considerations for establishing a standardized reporting methodology; therefore, NMFS has discretion to interpret the MSA and establish reasonable considerations and requirements. Data collection, reporting, and recording programs can be expensive, logistically challenging to design and implement, involve new and cutting-edge technologies, and necessitate the consideration of the safety of human life at sea. Therefore, it is reasonable and appropriate for a Council to analyze issues of feasibility when establishing or reviewing an SBRM and to ultimately choose a methodology that is in fact feasible (i.e., capable of being implemented) from cost, technical, and operational perspectives. See response to comment 38 (describing budget and funding challenges).

Contrary to commenters' assertion, *Oceana v. Locke*, 670 F. 3d 1238 (D.C. Cir. 2011), does not preclude consideration of costs. In that case, the court noted that the second clause of section 303(a)(11) (regarding bycatch minimization measures) includes the phrase “to the extent practicable,” but that phrase does not appear in the first clause that requires establishing SBRMs. *Oceana v. Locke* held that costs and funding are not an excuse to forego establishing SBRMs. Consistent with the opinion, NMFS has revised § 600.1610(a)(2)(ii) in this rule to state explicitly that feasibility concerns do not exempt an FMP from the requirement to establish SBRM. NMFS disagrees that the opinion prohibits *any* consideration of costs or funding.

Commenters assert that NMFS cannot consider NS7 (conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication) in interpreting section 303(a)(11) because they are separate statutory provisions. MSA sections 301 (National Standards) and 303 (FMP Contents) are separate provisions, but NMFS disagrees that the agency may not consider them both in developing this rule. FMPs must comply with mandatory FMP requirements under section 303(a)—such as the SBRM provision—and also the National Standards under section 301. See 16 U.S.C. 1853(a) and 16 U.S.C. 1851(a). In addition, it is important to consider the SBRM provision in the context of the statute as a whole.

Commenters further argue that even if it is permissible to consider NS7, NS7 requires that costs be minimized “where practicable, not absolutely,” citing *Connecticut v. Daley*, 53 F.Supp.2d 147,

172–73 (D. Conn. 1999). This rule requires that an SBRM be feasible from cost and other perspectives, not that costs be minimized absolutely. Commenters also cite *N. Carolina Fisheries Ass'n, Inc. v. Gutierrez*, 518 F.Supp.2d 62, 91–92 (D.D.C. 2007), for the proposition that Congress intended that “a focus on the economic consequences of regulations not subordinate th[e] principal [conservation] goal of the MSA.” NMFS notes that the cited language did not address NS7, as commenters assert, but NS8. NS8 requires, in relevant part, that FMP measures “shall, consistent with the conservation requirements of this Act (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities” and “to the extent practicable, minimize adverse economic impacts on such communities” 16 U.S.C. 1851(a)(8). Whether an SBRM can be implemented from cost and other perspectives is different than an analysis of economic impacts on communities. Moreover, NS8 makes explicit reference to MSA conservation requirements, whereas NS7 does not. In any event, as explained above, this rule does not allow a Council to forego establishing an SBRM based on high costs or low funding.

Comment 38: NMFS received several comments on the requirement in the proposed rule that all SBRMs must be designed to be implemented within available funding. Some commenters supported the requirement, some asked for clarification, and some opposed the requirement. One commenter requested that NMFS clarify that if funds are not available from current funding sources, then there is no requirement to implement the SBRM. One commenter noted that future funding for monitoring programs is unknown, so it is not clear how a Council can be expected to address “feasibility” when designing an SBRM or how it can design an SBRM to be implemented within available funding. The commenter suggested a more thorough discussion of how a Council is supposed to design a program for an uncertain funding amount. Other commenters asserted that NMFS controls the availability for funding for SBRMs. These commenters stated that the proposed rule therefore would allow the agency to disapprove the establishment of an SBRM based on a self-imposed funding problem.

Response: SBRMs are mandated by statute, and NMFS has revised § 600.1610(a)(2)(ii) to state explicitly that feasibility concerns do not exempt an FMP from this statutory mandate. In

response to public comment, NMFS has deleted reference to designing an SBRM to be “implemented with available funding,” but has retained the requirement that an SBRM must be feasible from cost, technical, and operational perspectives. For example, although an increase in observer coverage levels in a certain fishery may reduce the uncertainty of the data resulting from the SBRM, such an increase may not be feasible from a cost or safety standpoint or may result in only an incremental improvement in data quality. Under this rule, Councils would evaluate whether such an increase is justified in light of the purpose of the methodology and feasibility and other requirements under § 600.1610(a)(2).

NMFS is charged with fulfilling a wide range of requirements under the MSA, MMPA, ESA, and other statutes. These mandates include, but are not limited to, ending overfishing and rebuilding fish stocks, protecting and recovering threatened and endangered species, reducing bycatch, enforcing laws and regulations, and combating illegal, unreported, and unregulated fishing internationally. Addressing all of these mandates and requirements is a challenging undertaking for NMFS, particularly in light of increasing legal mandates and budget constraints.

When Congress establishes a program or activity, it must decide how to finance it. Typically programs and activities are financed by appropriating funds from the U.S. Treasury. NMFS requests Congressional appropriations through the President’s budget request to support statutory and regulatory requirements. Through this annual appropriations process, funding is provided for NMFS’ many mandates. In addition to providing the necessary funds, a congressional appropriation establishes a maximum authorized program level, meaning that an agency cannot, absent specific statutory authorization, operate beyond the level that can be paid for by its appropriations. 72 Comp. Gen. 164, 165 (1993). In light of these considerations, and given that procedures to collect, report, and record bycatch data can be extremely costly, NMFS believes that it is important to require that SBRMs be feasible from cost as well as other perspectives.

NMFS acknowledges that Congressional appropriations may change over time, and appropriated funds may, consistent with federal appropriations law, be allocated to implement various statutory mandates and to respond to changes in conditions and priorities across the country.

However, even though it may not be possible to anticipate future funding levels for procedures to collect, record, and report bycatch with complete certainty, the Councils would not be developing SBRMs in a vacuum. NMFS has a seat on each Council, and meets regularly with the Council Coordination Committee. The Councils and NMFS are able to consider the trends in costs and in appropriations levels in recent years. For example, NMFS notes that funding for observer programs has been relatively stable over the past two years, with approximately \$43.7 million appropriated by Congress for observer programs in FY 2015 and FY 2016.

Comment 39: One commenter stated that SBRMs should be functional at a variety of funding levels. If funding is insufficient for monitoring a particular management regime, then the regime should be made more precautionary (e.g., bigger buffers), rather than foregoing SBRMs or moving forward with inadequate funding. The commenter states that ACLs, AMs, and SBRMs are all key, interconnected components of a sustainable fishery. If the FMP design is demanding, then the SBRM must be too. If there is insufficient funding, the FMP design and the SBRM both need to be scaled back. NMFS should give guidance about how to revise FMP components to balance the level of an SBRM that is feasible.

Response: NMFS agrees that an SBRM should be functional at varying funding levels. Section 600.1610(a)(2)(ii) explicitly acknowledges that funding may vary from year to year, and requires a Council to address how implementation of the methodology may be adjusted while continuing to meet the purpose described under § 600.1600. NMFS believes this consideration is important, given the potential variability in funding levels, the desire for timely and efficient SBRM implementation, and the fact that FMP amendments can take a long time to develop and implement. This consideration is particularly important when developing SBRMs that have data collection procedures that may be more susceptible to changes in funding (e.g., observer programs). NMFS notes that the SBRM provision under MSA section 303(a)(11) is not couched in terms of an annual requirement as is the case with ACLs. Even if a funding shortfall in a particular year affects the implementation of an SBRM that does not necessarily mean that the SBRM is failing to meet its purpose or that it needs to be amended.

Data resulting from SBRMs may be used to inform management decisions

beyond bycatch-related ones, but, as explained in response to comment 20, SBRMs and ACLs/AMs are separate statutory requirements that should not be conflated. NMFS does not believe that further guidance is needed regarding buffers, given existing guidance related to scientific and other uncertainties. The NS1 guidelines, 50 CFR 600.310, describe how the Councils should consider uncertainty when specifying ACLs and AMs. The NS2 guidelines, 50 CFR 600.315, provide guidance on using data that is uncertain in management decisions. In addition, the NS6 guidelines, 50 CFR 600.335, address how to take into account variations in fisheries (e.g., biological and economic uncertainties and uncertainties from changes in fishing practices).

Comment 40: One commenter requested that NMFS clarify in the proposed rule's § 600.1610(a)(2)(ii) (81 FR 9413, February 25, 2016) who would be doing the assessment that a methodology is feasible from cost, technical, and operational perspectives.

Response: NMFS has clarified § 600.1610(a)(2) to state that the Councils are required to address feasibility and comply with other requirements of the section. Section 600.1605(b) defines "Council" in the same manner as in 50 CFR 600.305. Therefore, the word "Council" includes the Regional Fishery Management Councils and the Secretary of Commerce, as applicable. Per MSA section 304(a), NMFS approves, disapproves, or partially approves Council-developed FMPs and FMP amendments for consistency with the MSA and other applicable law. 16 U.S.C. 1854(a).

Comment 41: Two comments were related to the costs, including industry costs, associated with observer programs and electronic monitoring. One commenter stated that industry should not be required to pay for observer coverage. One commenter asked about the costs to monitor groundfish, and noted that there are some legal questions to address before electronic monitoring can be implemented.

Response: NMFS recognizes that electronic monitoring and observer programs can be costly and logistically challenging to implement. However, a discussion of the particular costs and challenges associated with monitoring programs in specific fisheries is beyond the scope of this rule.

Comment 42: One commenter stated that NMFS cannot justify to Congress the need for more funds related to bycatch data collection if the agency prevents Councils from designing good

SBRMs, and, therefore, from assessing data needs and identifying capacity shortfalls.

Response: With respect to the quality and use of the data resulting from SBRMs, please see responses to comments 30 through 36. With respect to budget requests, NMFS works with the Department of Commerce and the Office of Management and Budget (OMB) to request Congressional appropriations through the President's budget to Congress each fiscal year in accordance with relevant laws, regulations, and administrative procedures. NMFS uses information about bycatch research and data collection needs contained in a variety of reports and strategic planning processes to inform this budget planning and formulation process (e.g., the strategic plan for fisheries research required by 16 U.S.C. 1881c of the MSA, National Observer Program strategic reviews and annual reports, SAFE reports, and numerous other documents). However, the development of NMFS-related funding requests contained in the President's yearly budget submission to Congress is beyond the scope of this rule.

Characteristics of Bycatch and Other Considerations

Comment 43: Several commenters expressed support for the requirement for Councils to consider characteristics of bycatch in the fishery. One commenter noted that this requirement is more useful and important when establishing conservation and management measures. The commenter recommends that this sentence be moved to 50 CFR 600.1610(a)(2)(ii) as additional factors that the Councils may consider. Another commenter asserted that SBRMs should be designed to provide more certain bycatch data in fisheries where discard mortality is identified as an important source of fishing mortality.

Response: This rule requires Councils to undertake a fishery-specific analysis to establish an SBRM that meets the purpose described in § 600.1600 of this final rule. To perform such an analysis, NMFS believes that the specific characteristics of bycatch in that fishery need to be addressed. See response to comment 9 and section I.C. (discussing consideration of different fishing activities and operations).

NMFS agrees that considering the importance of bycatch as part of fishing mortality is an important consideration when establishing or reviewing SBRMs. More specifically, § 600.1610(a)(2)(i) provides that a Council must address information about the characteristics of

bycatch in the fishery when available, including, but not limited to, the amount of bycatch occurring in the fishery, the importance of bycatch in estimating the fishing mortality of fish stocks, and the effect of bycatch on ecosystems. NMFS believes that a fishery-specific evaluation of bycatch as stated above, in conjunction with considerations of feasibility, data use, and data uncertainty will result in an SBRM that meets the purpose as described in § 600.1600.

Comment 44: Some commenters stated that NMFS does not have discretion to decide not to require or establish an adequate SBRM, due to financial constraints or any other factors, such as the "overall magnitude and/or economic impact of the fishery."

Response: As explained in response to comment 38, section 303(a)(11) of the MSA requires all FMPs to establish an SBRM, and NMFS has revised § 600.1610(a)(2)(ii) to state that feasibility concerns (which include costs and funding) do not exempt an FMP from this mandate. NMFS has removed the text about considering the overall magnitude and/or economic impact of the fishery from the final rule, because NMFS believes that it is not necessary given existing guidance for NS7 and National Standard 8.

Comment 45: One commenter suggested the incorporation of guidance to ensure the proper identification of bycatch species to reduce misidentification errors. The commenter also suggested including consideration of the status of bycatch species.

Response: Incorporating guidance for proper identification of bycatch species is beyond the scope of this rule. NMFS has created numerous species identification guides, some of which include information about the bycatch species' management status. For example, a NMFS shark identification guide for the recreational fishery of the U.S. Atlantic and Gulf of Mexico specifies which shark species are prohibited and must be released (see http://www.nmfs.noaa.gov/sfa/hms/species/sharks/rec_shark_id_placard.pdf). NMFS also has created a guide to help Alaska fishery observers identify coral species that may occur as bycatch (see http://www.afsc.noaa.gov/FMA/PDF_DOCS/Coral_Tutorial_2014.pdf). NMFS believes this guidance is more appropriately accomplished through these identification guides.

Comment 46: Several commenters commented on the proposed rule's § 600.1610(a)(2)(i) (81 FR 9413, February 25, 2016), which would require Councils to consider the conservation and management

objectives regarding bycatch in the fishery. One commenter asked whether this was intended to address something different than the bycatch provisions in MSA section 303(a). One commenter suggested clarifying that this does not establish a requirement that each FMP identify specific bycatch objectives beyond those required in section 303(a)(11).

Response: The intent of proposed § 600.1610(a)(2)(i) (81 FR 9413, February 25, 2016) was to provide for a fishery-specific analysis when establishing an SBRM. To clarify that this rule is not requiring Councils to identify specific bycatch objectives beyond those required by section 303(a)(11) and NS9, NMFS has removed reference to “conservation and management objectives regarding bycatch.” Further, NMFS believes that it is not necessary to state this as a requirement in § 600.1610(a)(2), because all SBRMs must meet the purpose described in § 600.1600, which includes reference to “inform[ing] the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality.”

Comment 47: One commenter stated that SBRMs can and should describe the methodology by which bycatch data will be incrementally improved with new efficiencies, techniques, and funding.

Response: NMFS disagrees with this comment as this rule, existing National Standard guidelines, and NMFS strategic plans already provide sufficient direction on improving bycatch data. This rule includes a provision for Councils to review SBRMs at least every 5 years, and in § 600.1610(a)(2)(iv), requires Councils to consider scientific methods and techniques available to collect, record and report bycatch data that could improve the quality of bycatch estimates. In addition, the NS 9 guidelines provide guidance on improving data collection methods, data sources, and applications of data for each fishery to determine the amount, type, disposition, and other characteristics of bycatch and bycatch mortality in each fishery for purposes of NS9 and MSA sections 303(a)(11) and 303(a)(12). 50 CFR 600.350(d)(1). NMFS notes that it also has ongoing initiatives to address bycatch and to strengthen monitoring programs. See response to comment 36 for further explanation of these initiatives.

Adaptable Implementation

Comment 48: NMFS received mixed comments on the adaptable

implementation provision (proposed § 600.1610(c) at 81 FR 9413, February 25, 2016). Some expressed support for it as it provides flexibility during implementation and others recommended changes to or elimination of the provision. One commenter indicated that the provision would support a Council's efforts to look at ways to increase and improve methodologies for data collection practices. One commenter stated that, before operational adjustments are made, managers should ensure that they can effectively collect and report data consistently across jurisdictions to inform the management of bycatch species. Another commenter stated that this provision frustrates congressional intent to have national-level standardization, and also allows for non-transparent processes to adjust SBRMs. The commenter asserted that changes to an SBRM must be made through an FMP amendment to safeguard public participation and ensure that impacts will be more fully considered. One commenter requested deleting § 600.1610(c), as it would severely limit a Council's ability to develop effective SBRMs and change SBRMs based on fishery characteristics in the future.

Response: Fisheries management occurs in a highly variable environment, and from year to year, there can be changes in available funding, equipment, methods for recording and transmitting data, fishing activity, and other changes. NMFS' intent in proposing § 600.1610(c) was to emphasize that, when developing an SBRM, it is important to consider implementation and operational issues that might arise. See 50 CFR 600.335(b) (noting in National Standard 6 guidelines that a regime “must be flexible enough to allow timely response to resource, industry, and other national and regional needs”). NMFS, Councils, and stakeholders all have an interest in smooth implementation of SBRMs, and FMPs can take a long time to amend. In response to public comments and to clarify its intent, NMFS has deleted proposed § 600.1610(c) at 81 FR 9413, February 25, 2016. Instead, § 600.1610(a)(1) clarifies that in addition to proposing regulations necessary to implement the SBRM, a Council should also provide in its FMP, or in a fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of an SBRM, consistent with the FMP. See National Standard 6 guidelines, 50 CFR 600.335. This text refers to adjustments “consistent with the FMP.” To the

extent that changes would be needed to an SBRM beyond what the FMP established, an FMP amendment would be needed. NMFS believes that this approach will encourage transparency. The rule requires a Council to address implementation and operational issues up-front during the development of an SBRM and encourages a Council to provide guidance to NMFS on SBRM implementation.

Consistent with the SBRM established in an FMP, a Council could provide for adjustments in how an SBRM is implemented through regulations (*see, e.g.,* SBRM Omnibus Amendment (80 FR 37182, June 30, 2015)). Councils may also provide other guidance to NMFS via non-regulatory mechanisms. As an example, the North Pacific Groundfish FMP uses an Annual Deployment Plan (ADP) to address practical and operational implementation issues. See comment and response 29 for further explanation of the ADP. When a Council is considering whether to provide for regulations and/or other guidance to implement an SBRM, some questions that may be helpful include: What are the implementation and operational issues that might arise (*see e.g.,* variations and uncertainties described in NS6 guidelines); what type of adjustments or guidance might be helpful to address these issues; would certain adjustments result in an SBRM not meeting its purpose (*see* § 600.1600); and what would happen if there is an unexpected funding shortfall. NMFS disagrees that SBRMs need to be standardized at a national level in order to have data to inform management decisions. See comments and responses 13 (explaining purpose of SBRMs and consideration of data use and quality) and 8 (explaining interpretation of “standardized”).

Comment 49: One commenter stated that allowing adjustments to the bycatch methodology to be based on factors such as funding, management contingencies, or scientific priorities could be interpreted to authorize the type of budgetary exemption from SBRM requirements that has been found contrary to the MSA, citing *Oceana v. Locke*, 670 F.3d 1238 (D.C. Cir. 2011).

Response: As explained in responses to comments 37 and 38, MSA section 303(a)(11) requires that all FMPs establish an SBRM, and NMFS has clarified in § 600.1610(a)(2)(ii) that “feasibility concerns do not exempt an FMP from the requirement to establish a standardized reporting methodology.” NMFS disagrees that *Oceana v. Locke* precludes a Council from considering implementation and operational issues and trying to plan for them. See

response to comment 37 for further discussion of the court case. Section 600.1610(a)(1) provides that a Council must explain how an SBRM, which may include an implementation adjustment mechanism, meets the statutory purpose of an SBRM (*see* § 600.1600), based on an analysis of the requirements in § 600.1610(a)(2) (characteristics of bycatch, feasibility, data quality and data use).

Review of FMPs

Comment 50: Some commenters stated that the Sustainable Fisheries Act of 1996 (SFA) required the agency to establish SBRM regulations by 1998, thus the 5 year review period would unreasonably delay SBRM implementation to 21 years after it was required by Congress.

Response: NMFS disagrees with these comments. Section 108(a) of the SFA added several provisions to section 303(a) of the MSA, including section 303(a)(11). (*See* Pub. L. 104–297, 110 Stat. 3559, sec. 108 (Oct. 11, 1996)). Section 108(b) of the SFA required that each Council submit to the Secretary of Commerce amendments to each FMP to comply with the amendments made in section 108(a) not later than 24 months after the date of enactment. *Id.* The Act did not require NMFS to promulgate a national SBRM rulemaking. As explained in the preamble to the proposed rule, NMFS is promulgating this rule pursuant to section 305(d) of the MSA (16 U.S.C. 1855(d)) to clarify NMFS' interpretation of the SBRM provision and provide for periodic review of SBRMs.

Comment 51: NMFS received several comments on the 5-year timeline for reviewing FMPs for consistency with the rule. One commenter supported the timeline, but given concerns about workload for the Councils, recommended extending subsequent SBRM reviews to 10 years or on an as needed basis. Another commenter noted that if a Council is provided with updated estimates of bycatch at each Council meeting along with the estimates of recreational and commercial landings, the ability to monitor bycatch on an ongoing basis will also reduce the need for a comprehensive review from 5 to 10 years. Another commenter recommended that a review be conducted after 5 years of data are available, rather than 5 years after implementation.

Response: Data collection and reporting methods, conservation and management issues, and bycatch characteristics may change considerably in a 5-year timeframe. Therefore, NMFS

believes that review in 5 years (and not a longer period) is appropriate. NMFS notes that there are several other FMP review processes that are on 3 to 5 year review timeframes. These include catch share programs, essential fish habitat, scientific research and other reviews. From an efficiency and resource standpoint, Councils may want to consider conducting SBRM reviews in conjunction with other ongoing FMP reviews as much as possible. Further, this provision is consistent with the NS9 guidelines, which refer to the review and improvement of data collection methods, data sources, and applications. 50 CFR 600.350(d)(1).

Comment 52: One commenter urged NMFS to seriously consider the potential negative implications, including unnecessary workload, of the rule on regions which are already in compliance with MSA requirements. Section 600.1610(a)(1) should be modified so that it makes clear that the first step would be for the Councils to review their FMPs to determine if their FMPs provide a clear description of the SBRM, and only if the Council determines it does not, should additional modifications be made in either the FMP or through other reference documents. The provision requiring that all FMPs must be consistent with the rule within 5 years is not necessary if Councils have reviewed their FMPs and determined that their FMPs do not need to be modified.

Response: The proposed rule provided Councils with a 5-year time frame to review and, if necessary, amend their existing FMPs for consistency with the rule. NMFS continues to believe that there is a need for this review. However, the final rule clarifies that a Council does not need to amend an FMP if NMFS determines that it is consistent with this rule.

Other Comments

Comment 53: Some commenters requested that NMFS extend the comment period for the proposed rule an additional 60 days.

Response: NMFS believes that the 60-day comment period provided the public with a meaningful opportunity to comment on the proposed rule, and therefore, declined to extend this period. Considering the nature and scope of the proposed rule, NMFS believes that 60 days was an adequate timeframe for interested persons to understand the issues raised and submit to the agency written comments with information and arguments relevant to those issues. Furthermore, several Councils are actively working on SBRM-

related issues and would benefit from the guidance and interpretation that this rule would provide. If, as a result of reviewing their FMPs for consistency with the MSA and this rule, Councils amend their FMPs, the public will have another opportunity to comment on any specific actions proposed by a Council.

Comment 54: Given the critical nature of bycatch data collection, one commenter urged the agency to provide resources to improve collection, recording, and reporting of bycatch as soon as possible.

Response: NMFS has made SBRM data collection programs a priority. NMFS continually seeks to improve data collection, recording, and reporting through a variety of mechanisms. *See* response to Comment 47 for more information.

Comment 55: Commenters stated that the proposed rule would undermine the following agency and Council efforts to improve fisheries data, modernize data collection programs, and integrate ecosystem considerations into fisheries management: Ecosystem-Based Fishery Management Policy, National Bycatch Reduction Strategy, Action Plan for Fish Release Mortality Science, Regional Electronic Monitoring and Reporting Implementation Plans, and MRIP Implementation Plan. Commenters also asserted that the proposed rule would prevent the agency from implementing hard caps and performance objectives in the West Coast drift gillnet fishery and would facilitate the further collapse of the New England groundfish fishery.

Response: NMFS disagrees that this rule would negatively affect ongoing efforts to improve fisheries data, modernize data collection, and implement ecosystem based fisheries management. This rule interprets basic requirements of the SBRM provision and does not prescribe or otherwise change ongoing policy and science initiatives. Because the rule interprets the basic requirements for establishing SBRMs, NMFS also disagrees with the comment that suggests the rule would prevent the establishment of hard caps in the West Coast drift gillnet fishery or undermine the New England groundfish fishery. The commenter presumes that this rule will diminish the quality of bycatch data and thus the assessment of bycatch and the Council's ability to adopt management measures to address bycatch. NMFS addresses this concern in responses to comments regarding the "need and effect" and "distinction between data collection and assessment".

Comment 56: One commenter stated that bycatch is a significant issue in recreational and commercial fisheries in

the Southeast, citing red snapper and red grouper as examples. The commenter stated that sufficient SBRMs in the fishermen logbooks and observer coverage would provide much more certain data leading to a more robust assessment used for management.

Response: NMFS notes that an SBRM is a requirement of an FMP and that Councils do not establish SBRMs “in the fishermen logbooks and observer coverage.” To the extent that this commenter is recommending specific changes to the SBRMs in particular fisheries (e.g., red snapper and red grouper), this comment is beyond the scope of this rulemaking. The purpose of this rule is to describe the minimum requirements for establishing an SBRM. The specific SBRMs for each fishery are established through individual FMPs and the Council process as guided by the MSA and this rule. This rule requires that all FMPs be consistent with this rule within 5 years of the effective date of this rule. As individual FMPs are reviewed by the Councils, stakeholders will have additional opportunities to provide input on fishery and regional-specific issues associated with particular SBRMs.

Comment 57: One commenter stated that it is unclear if the Pacific Islands, the Southeast and Southwest have implemented SBRM. The Caribbean Fishery Management Council does not appear to have established SBRMs at all. For example, there is no mention of SBRM in FMPs for Queen Conch, Reef Fish, Spiny Lobster, or Corals and Reef Associated Plants and Invertebrates.

Response: All FMPs have established SBRMs consistent with the MSA and implement them through different mechanisms. NMFS acknowledges that the documentation and explanation in FMPs for SBRMs varies considerably. This rule, by clarifying the basic requirements for establishing SBRMs, will strengthen existing SBRMs and ensure greater transparency as Councils review and potentially update their FMPs for consistency with this rule.

Comment 58: NMFS received comments disagreeing with the agency’s decision to not prepare an environmental impact assessment (EIS) or environmental assessment (EA). The commenters stated that a categorical exclusion under the National Environmental Policy Act (NEPA) is not appropriate.

Response: NMFS believes a categorical exclusion is appropriate for this action. Under sections 5.05 and 6.03c.3(i) of NOAA’s Administrative Order (NAO) 216–6, as preserved by NAO 216–6A, “Compliance with the National Environmental Policy Act,

Executive Orders 12114, Environmental Effects Abroad of Major Federal Actions; 11988 and 13690, Floodplain Management; and 11990, Protection of Wetlands,” the following types of actions may be categorically excluded from the requirement to prepare an EA or EIS: “. . . policy directives, regulations and guidelines of an administrative, financial, legal, technical or procedural nature, or the environmental effects of which are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or case-by-case . . .” In this instance, a categorical exclusion is appropriate for this action because NMFS cannot meaningfully analyze potential environmental, economic, and social impacts at this stage. This rule provides guidance on establishing and reviewing SBRMs. While the rule explains how the development, documentation, and review of SBRMs should be addressed, the rule does not mandate specific conservation or management measures for any fishery. There is considerable diversity in federally managed fisheries and FMPs, and the Councils and NMFS have discretion to develop different conservation and management alternatives consistent with the MSA and other law. It is not clear what Councils will or will not do in response to this rule. Thus, it is not possible to predict any concrete impacts on the human environment without the necessary intervening actions of the Councils (e.g., consideration of SBRMs for specific fisheries). Any analysis of potential impacts would be speculative at best.

None of the exceptions for Categorical Exclusions provided by section 5.05c of NAO 216–6 apply. While there is controversy concerning the SBRM rule, the controversy is primarily related to different views on how section 303(a)(11) of the MSA should be interpreted. The rule would not, in itself, have uncertain environmental impacts, unique or unknown risks, or result in cumulatively significant impacts on a fishery, protected species, or habitat, as it does not prescribe specific outcomes for FMPs. When a given Council or the Secretary prepares and submits a new FMP or FMP amendment or other regulatory action, at that time, biological, economic, and social impacts of the amendment/action would be subject to NEPA analysis.

Comment 59: NMFS received one comment stating that the agency should not proceed unless a Regulatory Impact Review as required by E.O. 12866 has been conducted and the public has an

opportunity to review and comment on that analysis. The commenter noted that the rule will require significant agency and Council resources.

Response: NMFS conducted a draft Regulatory Impact Review and determined the rule is not significant for the purposes of Executive Order 12866. Additionally, the Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that the proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. These conclusions were stated in the “Classification” section of the proposed rule proposed at 81 FR 9413, February 25, 2016. NMFS prepared a final Regulatory Impact Review before issuing this rule. That review analyzed the impact of this rule on the agency, the Councils, and small entities, and is summarized in the “Classification” section of this preamble.

III. Changes From Proposed Rule

In the first sentence of § 600.1600, “with respect to any fishery” was added after “fishery management plan” to reflect the text of section 303(a) of the MSA. The second sentence of § 600.1600 was revised in response to public comment to clarify the purpose of a standardized reporting methodology.

In § 600.1605(a), NMFS made minor changes to the definition of “standardized reporting methodology.” First, in response to public comment, NMFS removed “subset of a fishery” from the definition. Second, NMFS combined the first and second sentences of the proposed definition. Third, NMFS added a sentence to the end of the definition to clarify the link between an SBRM and the assessment of bycatch.

Section 600.1605(b) was revised to add reference to the MSA’s definitions of “bycatch” and “fishery” in 16 U.S.C. 1802. Other minor revisions were made to the citations in § 600.1605(b).

In § 600.1610(a)(1), the first sentence was revised to clarify the information that must be identified in an FMP. The first part of the second sentence of the paragraph was modified for clarity. Instead of “The description must state the required bycatch data collection, recording, and reporting procedures for each fishery, which may include . . .”, the second sentence of § 600.1610(a)(1) now begins: “The required procedures may include . . .”

In response to comments and to make clear that an SBRM must achieve its statutory purpose, the third sentence of § 600.1610(a)(1) now requires a Council

to explain “how an SBRM meets the purpose described in 50 CFR 600.1600, based on an analysis of the requirements under § 600.1610(a)(2),” in place of the proposed rule’s requirement that a Council explain “why the methodology is appropriate for the fishery.” The third sentence requires that this explanation be contained in an FMP or a fishery research plan authorized under 16 U.S.C. 1862, a North Pacific-specific provision of the MSA.

Consistent with current practices, § 600.1610(a)(1) states that Councils should work together and collaborate on standardized reporting methodologies for fisheries that operate across multiple jurisdictions, as appropriate.

Also in § 600.1610(a)(1), NMFS clarifies that in addition to proposing regulations necessary to implement the standardized reporting methodology, a Council should also provide in its FMP, or a fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of a standardized reporting methodology, consistent with the FMP. See National Standard 6 guidelines, 50 CFR 600.335. This text replaces § 600.1610(c) of the proposed rule, which described an adaptable implementation process for SBRMs. NMFS removed § 600.1610(c) and added the new sentence in § 600.1610(a)(1) in response to public comments expressing confusion over the process described in proposed rule’s § 600.1610(c) (81 FR 9413, February 25, 2016).

In § 600.1610(a)(2), NMFS clarified what a Council is required to address when establishing or reviewing an SBRM. Also in § 600.1610(a)(2), NMFS broke out the “required factors” and “additional factors” of the proposed rule’s paragraphs (a)(2)(i) and (a)(2)(ii) into four subparagraphs to improve the organization and clarity of the paragraph.

In § 600.1610(a)(2)(i), NMFS deleted the requirement that “[d]ata resulting from the methodology must be useful, in conjunction with other sources of data, in meeting the purpose described in § 600.1600 and fishery-specific bycatch objectives.” This requirement is no longer necessary because, as detailed above, § 600.1610(a)(1) requires that all SBRMs meet the purpose described in § 600.1600. NMFS also deleted the requirement that Councils “consider the conservation and management objectives regarding bycatch in the fishery” proposed in § 600.1610(a)(2) in response to public comment expressing confusion about this provision. NMFS believes that it is not necessary to state this as a requirement in § 600.1610(a)(2) because all SBRMs must meet the

purpose described in § 600.1600, which includes reference to “inform[ing] the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality.”

In § 600.1610(a)(2)(i), NMFS created a distinct subparagraph for the requirement that all Councils address information about the characteristics of bycatch in the fishery. The proposed rule required Councils to “consider information about the characteristics of bycatch in the fishery, when available, such as the amount of bycatch occurring in the fishery, the importance of bycatch in estimating the total mortality of fish stocks, and the importance of bycatch to related ecosystems.” In the final rule, NMFS changed “such as” to “including but not limited to” to clarify that Councils must address all three types of information, where such information is available. In the same sentence, NMFS replaced “total mortality” with “fishing mortality” because bycatch mortality is part of fishing mortality (*i.e.*, fish dying due to fishing activity) and not a component of natural mortality which is part of total mortality. For purposes of clarity, NMFS also changed “the importance of bycatch to related ecosystems” to “the effect of bycatch on ecosystems.” NMFS also added text in § 600.1610(a)(2)(i) to acknowledge that the amount and type of bycatch occurring in a fishery “may vary based on the operations of the fishery.”

In response to public comment, NMFS removed text from § 600.1610(a)(2)(ii) stating that “a Council may also consider the overall magnitude and/or economic impact of the fishery.” NMFS believes that this information is already addressed in NMFS’ National Standards 7 and 8 guidelines.

In § 600.1610(a)(2)(ii), NMFS created a distinct subparagraph regarding feasibility. NMFS added “The implementation of a standardized reporting” to the beginning of the sentence requiring that the “methodology must be feasible from cost, technical, and operational perspectives” for purposes of clarity. In response to public comment, NMFS deleted the requirement that a methodology “be designed to be implemented with available funding.” In place of this text, NMFS added a sentence to the end of § 600.1610(a)(2)(ii) that explains in recognition that costs and funding may vary from year to year, a Council must also address how implementation of the standardized reporting methodology may be adjusted while continuing to

meet the purpose described under § 600.1600.

In § 600.1610(a)(2)(iii), NMFS created a distinct subparagraph regarding data uncertainty. This subparagraph expands on the requirement in proposed § 600.1610(a)(2)(i) at 81 FR 9413, February 25, 2016, that a Council consider the quality of the data associated with the methodology when establishing or reviewing an SBRM. In place of this requirement, § 600.1610(a)(2)(iii) clarifies that a Council must address the uncertainty of the data resulting from the standardized reporting methodology. The standardized reporting methodology must be designed so that the uncertainty associated with the resulting bycatch data can be described, quantitatively or qualitatively. The Council should seek to minimize uncertainty in the resulting data, recognizing that different degrees of data uncertainty may be appropriate for different fisheries. NMFS made these changes in response to public comment and for purposes of clarity.

In § 600.1610(a)(2)(iv), NMFS created a distinct subparagraph regarding data use. To clarify the link between an SBRM and the assessment of bycatch, this first sentence of this subparagraph states: “A Council must address how data resulting from the standardized reporting methodology are used to assess the amount and type of bycatch occurring in the fishery.” NMFS also moved the proposed consultation provision (in § 600.1610(b) at 81 FR 9413, February 25, 2016) to this subparagraph, in response to public comment and to clarify the consultation process. Therefore, the second sentence of § 600.1610(a)(2)(iv) states: “A Council must consult with its scientific and statistical committee and/or the regional National Marine Fisheries Service science center on reporting methodology design considerations such as data elements, sampling designs, sample sizes, and reporting frequency.” NMFS made the consultation mandatory in the final rule. NMFS also removed reference to “advisory panels,” which was included in the consultation provision of the proposed rule, because the consultation is scientific in nature and is outside the scope of the advisory panel’s role.

NMFS moved the text stating that “a Council may also consider...the scientific methods and techniques available to collect and report bycatch data that could improve the quality of bycatch estimates” from proposed § 600.1610(a)(2)(ii) (at 81 FR 9413, February 25, 2016) to § 600.1610(a)(2)(iv), because NMFS believes this provision relates to data

use. In this sentence, NMFS changed “may” to “must” in the final rule, and added “record” between “collect” and “report” to mirror NMFS’ definition of a standardized reporting methodology.

Also in § 600.1610(a)(2)(iv), NMFS added a sentence at the end of the paragraph clarifying that different standardized reporting methodology designs may be appropriate for different fisheries.

To comport with the organizational changes in the final rule, NMFS changed § 600.1610(d) to paragraph (b). To clarify that a Council must undertake a review of their FMPs for consistency with the rule, NMFS added that a Council, in coordination with NMFS, must conduct a review of its FMPs for consistency with this rule. To clarify that a Council does not have to amend an FMP within 5 years of the effective date of the rule if the FMP is in compliance with the rule, NMFS also added that a Council does not need to amend an FMP if NMFS, in consultation with the Council, determines that the FMP is consistent with this rule. Although the Council initiates a review of SBRMs, that review should be done in coordination with NMFS; therefore NMFS added “in coordination with NMFS” to the second and last sentences of § 600.1610(b).

Minor, non-substantive grammatical changes were also made in the final regulatory text to improve clarity.

IV. National Environmental Policy Act

NMFS has made a determination to apply a Categorical Exclusion to this action under the National Environmental Policy Act. This action qualifies for a Categorical Exclusion because it is a regulation “of an administrative, financial, legal, technical or procedural nature, or the environmental effects of which are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or case-by-case. . . .” See NOAA’s Administrative Orders 216–6 and 216–6A. If and when, as a result of reviewing an FMP for consistency with the MSA and this rule, a Council amends a specific FMP and/or fishery research plans, the Council and/or NMFS would prepare a NEPA analysis, as appropriate.

V. Classification

Pursuant to section 301(b) of the MSA, the NMFS Assistant Administrator has determined that this final rule is consistent with the Magnuson-Stevens Act and other applicable law.

This rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Council for Regulation of the Department of Commerce certified to the Chief Council for Advocacy of the Small Business Administration during the proposed rule stage that this rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule (see page 9417 at 81 FR 9413, February 25, 2016). In summary, this action interprets and provides guidance on section 303(a)(11) of the Magnuson-Stevens Fishery Conservation and Management Act (MSA), which requires that all Fishery Management Plans (FMPs) “establish a standardized reporting methodology to assess the amount and type of bycatch occurring in a fishery” (16 U.S.C. 1853(a)(11)). Because the action does not directly regulate any small entities, it will not directly alter the behavior of any entities operating in federally managed fisheries, and thus no direct economic effects on small entities (as described within the proposed action) are expected to result from this action. Therefore, no small entities will be directly affected by this action, and a reduction in profits for a substantial number of small entities is not expected. See 81 FR 9413, February 25, 2016. No public comments were received regarding this certification.

NMFS notes that on January 26, 2016, the Small Business Administration (SBA) issued a final rule revising the small business size standards for several industries, effective February 26, 2016 (81 FR 4469). The rule increased the size standard for Seafood Product Preparation and Packaging (NAICS code 311710) from 500 to 750 employees. Furthermore, on December 29, 2015, NMFS issued a final rule establishing a small business size standard of \$11 million in annual gross receipts for all businesses primarily engaged in the commercial fishing industry (NAICS 11411) for Regulatory Flexibility Act (RFA) compliance purposes only. See 80 FR 81194, December 29, 2015. The \$11 million standard became effective on July 1, 2016, and is to be used in place of the U.S. Small Business Administration’s (SBA) current standards of \$20.5 million, \$5.5 million, and \$7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine fishing (NAICS 114119) sectors of the U.S. commercial fishing industry in all NMFS rules subject to the RFA after July 1, 2016. See 80 FR 81194, December 29, 2015. Pursuant to the RFA, and prior to July 1, 2016, the

certification was developed for this regulatory action using SBA’s size standards prior to February 26, 2016. NMFS has reviewed the analyses prepared for this regulatory action in light of the new size standards discussed above and has determined that the new size standards do not affect analyses prepared for this regulatory action. Further, because the action does not directly regulate any entities, any new size standard will not directly alter the behavior of any entities operating in federally managed fisheries, and thus no direct economic effects on commercial harvesting businesses, marinas, seafood dealers/wholesalers, or seafood processors are expected to result from this action. Thus, no small entities will be directly affected by this action and a reduction in profits for a substantial number of small entities is not expected, and NMFS has determined that the certification established during the proposed rule stage is still appropriate for this final action.

List of Subjects in 50 CFR Part 600

Administrative practice and procedure, Bycatch, Fisheries, Standardized Reporting Methodology.

Dated: January 6, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 600 as follows:

PART 600—MAGNUSON-STEVENS ACT PROVISIONS

■ 1. The authority citation for 50 CFR part 600 continues to read as follows:

Authority: 5 U.S.C. 561 and 16 U.S.C. 1801 *et seq.*

■ 2. Add subpart R to read as follows:

Subpart R—Standardized Bycatch Reporting Methodology

Sec.

600.1600 Purpose and scope.

600.1605 Definitions and word usage.

600.1610 Establishing and reviewing standardized bycatch reporting methodologies in fishery management plans.

§ 600.1600 Purpose and scope.

Section 303(a)(11) of the Magnuson-Stevens Act requires that any fishery management plan (FMP) with respect to any fishery shall establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery. 16 U.S.C. 1853(a)(11). The purpose of a

standardized reporting methodology is to collect, record, and report bycatch data in a fishery that, in conjunction with other relevant sources of information, are used to assess the amount and type of bycatch occurring in the fishery and inform the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality. This subpart sets forth requirements for and guidance on establishing and reviewing a standardized reporting methodology.

§ 600.1605 Definitions and word usage.

(a) *Definitions.* In addition to the definitions in the Magnuson-Stevens Act and § 600.10, *standardized reporting methodology* means an established, consistent procedure or procedures used to collect, record, and report bycatch data in a fishery, which may vary from one fishery to another. Bycatch assessment is not part of the standardized reporting methodology, but must be considered as described in § 600.1610(a)(2)(iv).

(b) *Word usage.* The terms “bycatch” and “fishery” are used in the same manner as in 16 U.S.C. 1802. The terms “must”, “should”, “may”, “will”, “could”, and “can” are used in the same manner as in § 600.305(c). The term “Council” is used in the same manner as in § 600.305(d)(10), and includes the regional fishery management Councils and the Secretary of Commerce, as appropriate (16 U.S.C. 1854(c) and (g)).

§ 600.1610 Establishing and reviewing standardized bycatch reporting methodologies in fishery management plans.

(a) *Establishing a standardized reporting methodology—(1) Fishery management plan contents.* An FMP must identify the required procedure or procedures that constitute the standardized reporting methodology for the fishery. The required procedures may include, but are not limited to, one or more of the following: Observer programs, electronic monitoring and reporting technologies, and self-reported mechanisms (e.g., recreational sampling, industry-reported catch and discard data). The FMP, or a fishery research plan authorized under 16 U.S.C. 1862,

must explain how the standardized reporting methodology meets the purpose described in § 600.1600, based on an analysis of the requirements under § 600.1610(a)(2). The FMP, or fishery research plan authorized under 16 U.S.C. 1862, may reference analyses and information in other FMPs, FMP amendments, Stock Assessment and Fishery Evaluation (SAFE) reports, or other documents. Councils should work together and collaborate on standardized reporting methodologies for fisheries that operate across multiple jurisdictions, as appropriate. In addition to proposing regulations necessary to implement the standardized reporting methodology, a Council should also provide in its FMP, or a fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of a standardized reporting methodology consistent with the FMP. See National Standard 6 guidelines, § 600.335.

(2) *Requirements for standardized reporting methodology.* The FMP must establish a standardized reporting methodology as provided under § 600.1610(a)(1) that meets the specific purpose described in § 600.1600. Due to the inherent diversity of fisheries, different standardized reporting methodologies may be appropriate for different fisheries. However, when establishing or reviewing a standardized reporting methodology, a Council must address the following:

(i) *Information about the characteristics of bycatch in the fishery.* A Council must address information about the characteristics of bycatch in the fishery, when available, including, but not limited to: The amount and type of bycatch occurring in the fishery, which may vary based on different fishing activities and operations; the importance of bycatch in estimating the fishing mortality of fish stocks; and the effect of bycatch on ecosystems.

(ii) *Feasibility.* The implementation of a standardized reporting methodology must be feasible from cost, technical, and operational perspectives. However, feasibility concerns do not exempt an FMP from the requirement to establish a standardized reporting methodology. Recognizing that costs and funding may

vary from year to year, a Council must also address how implementation of the standardized reporting methodology may be adjusted while continuing to meet the purpose described under § 600.1600.

(iii) *Data uncertainty.* A Council must address the uncertainty of the data resulting from the standardized reporting methodology. The standardized reporting methodology must be designed so that the uncertainty associated with the resulting bycatch data can be described, quantitatively or qualitatively. The Council should seek to minimize uncertainty in the resulting data, recognizing that different degrees of data uncertainty may be appropriate for different fisheries.

(iv) *Data use.* A Council must address how data resulting from the standardized reporting methodology are used to assess the amount and type of bycatch occurring in the fishery. A Council must consult with its scientific and statistical committee and/or the regional National Marine Fisheries Service science center on reporting methodology design considerations such as data elements, sampling designs, sample sizes, and reporting frequency. The Council must also consider the scientific methods and techniques available to collect, record, and report bycatch data that could improve the quality of bycatch estimates. Different standardized reporting methodology designs may be appropriate for different fisheries.

(b) *Review of FMPs.* All FMPs must be consistent with this subpart by February 21, 2022. Therefore, a Council, in coordination with NMFS, must conduct a review of its FMPs for consistency with this subpart. A Council does not need to amend an FMP if NMFS determines that it is consistent with this subpart. Thereafter, Councils, in coordination with NMFS, should conduct a review of standardized reporting methodologies at least once every 5 years in order to verify continued compliance with the MSA and this subpart.

BILLING CODE 3510–22–P

Proposed Rules

Federal Register

Vol. 82, No. 12

Thursday, January 19, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

Office of Personnel Management

5 CFR Parts 317, 430, and 534

Office of Management and Budget

5 CFR Part 1330

RIN 3206–AL20

Performance Appraisal System Certification

AGENCY: Office of Personnel Management and Office of Management and Budget.

ACTION: Proposed rule with request for comments.

SUMMARY: The U.S. Office of Personnel Management (OPM) and the U.S. Office of Management and Budget (OMB) jointly propose to implement certain requirements contained in the Senior Professional Performance Act of 2008, incorporate OPM policies and to reorganize information for ease of reading. OPM additionally proposes to make conforming changes and technical corrections, and to update and simplify the processes used based on over a decade of experience with the certification process and recommendations from an interagency workgroup.

DATES: OPM must receive comments on or before February 21, 2017.

ADDRESSES: You may submit comments, identified by “RIN 3206–AL20,” using any of the following methods:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments. All submissions received through the Portal must include the agency name and docket number or Regulation Identifier Number (RIN) for this rulemaking.

Email: sespolicy@opm.gov. Include “RIN 3206–AL20” in the subject line of the message.

Fax: (202) 606–4264.

Mail, Hand Deliver/Courier comments: Address comments to Mr. Stephen T. Shih, Deputy Associate

Director for Senior Executive Services and Performance Management, Suite 7412, 1900 E Street NW., Washington, DC 20415–9700.

FOR FURTHER INFORMATION CONTACT: Myriam Mayobre by telephone at (202) 606–8046, by FAX at (202) 606–4264, or by email at myriam.mayobre@opm.gov.

SUPPLEMENTARY INFORMATION: This proposal updates current regulations to account for changes in statute, policies, and processes that have occurred since the current regulation became effective in 2004. This proposal also streamlines the existing process to decrease burden on agencies while ensuring OPM and OMB have information needed for certification.

On October 8, 2008, the President signed into law the Senior Professional Performance Act of 2008 (the Act), Public Law 110–372. The Act made significant changes in the law governing certification of senior employee performance appraisal systems. This rulemaking would revise subpart D of parts 430 and 1330 of title 5, Code of Federal Regulations to reflect the changes resulting from the Act. Other changes to the regulations not related to the Act have been included in this revision to update and simplify the processes used based on over a decade of experience with the certification process and recommendations from an interagency workgroup. OPM convened the workgroup in December 2014 as a result of a President’s Management Agenda recommendation made in 2011 by a separate workgroup, to follow up on recommendations made by a Chief Human Capital Officers workgroup held in February 2014, and as part of the current Presidential Management Agenda initiatives to improve the Senior Executive Service (SES). The workgroup was comprised of agency subject matter experts who were tasked to review the certification process and provide recommendations regarding the certification criteria and streamlining the process.

While OPM and OMB jointly propose to amend parts 430 and 1330 of title 5, Code of Federal Regulations, OPM additionally proposes to make the following changes to parts 317, 430 Subpart C, and 534 of title 5, Code of Federal Regulations, for which OPM alone is responsible. OPM proposes changes in 5 CFR 317.501(b)(2) and 317.503(g)(3) to fix erroneous internal

cross-references to certain regulations affecting those sections. OPM also proposes certain changes to final regulations on 5 CFR 430 subpart C—Managing Senior Executive Performance published September 25, 2015, 80 FR 57693 to update citations to the proposed regulation. Revisions to 5 CFR 430.309(e)(2) would further clarify higher level review.

OPM is proposing conforming changes to pay regulations at 5 CFR 534 subparts D and E. For the most part, these changes update citations from the current regulations with citations to the same or similar material in the proposed regulations or change the existing references in current regulation to “suspension” of an appraisal system certification with the term “termination” of certification. In 5 CFR 534 subpart D, OPM also proposes to revise 5 CFR 534.404(e)(1) to clarify that certification of an appraisal system does not provide an immediate opportunity to adjust the pay of current senior executives. Rather, pay adjustments for current senior executives must be based on an annual summary rating and, therefore, occur only after the completion of a rating cycle under the newly certified appraisal system. This should occur on the normal appraisal cycle and include a period of performance under the certified system that is at least equal to the agency’s minimum appraisal period. OPM also proposes to add new paragraph 534.404(c)(6) to address a technical issue associated with the 12-month rule and enable authorized agency officials to grant a pay adjustment up to 2 days before the expiration date of the 12-month restriction on pay adjustments that applies to a senior executive. This will allow agencies to make a pay adjustment consistent with an otherwise applicable annual performance and pay adjustment cycle. OPM finds this appropriate to support agencies in maintaining a cycle that provides for granting pay adjustments based upon performance on the first day of the same bi-weekly pay period each year (e.g., at the time of the statutory annual adjustment to General Schedule rates, which may occur 1 or 2 days short of a full 12-month period). OPM does not propose to require annual approval and documentation of the basis for this exception prior to its use. In 5 CFR 534 subpart E, OPM proposes to revise 5

CFR 534.505(a)(5) to add the review of proposed performance awards for senior professionals as a responsibility of the centralized review panel. This creates consistency with the duties of the performance review boards (PRB) for senior executives. OPM also proposes to revise 5 CFR 534.507(a)(2) to include a 14-day time period from the date specified in paragraph (a)(1) of that section in which an authorized agency official must provide notice to a senior professional concerning the reasons for a zero adjustment in pay, as required by paragraph (h) of that section. Specifying a 14-day time period will ensure that senior professionals receive such notices in a timely manner.

Key Changes to 5 CFR Parts 430 and 1330

The proposed regulations implement the provision in the Act that authorizes agencies to apply higher maximum rates of basic pay for employees in senior-level (SL) and scientific or professional (ST) positions (*i.e.*, senior professionals) paid under 5 U.S.C. 5376. An agency without an applicable certified appraisal system must use a maximum rate of basic pay for senior professionals that does not exceed the rate for level III of the Executive Schedule (EX–III). An agency with an applicable certified appraisal system may use a maximum rate of basic pay for senior professionals covered by the certified system that does not exceed the rate for level II of the Executive Schedule (EX–II).

The proposed regulation implements a section of the Act providing that certification may be granted beginning at any point in the year for a period not to exceed 24 months. Under rare and exceptional circumstances, the Director of OPM may extend certification for up to 6 additional months. Full certification will be granted for a period of 24 months. Provisional certification will be granted for a period of 12 months.

Since certification no longer expires at the end of a calendar year, there is no need for OPM to extend provisional certification into the following calendar year. That extension enabled agencies to maintain certification long enough to make pay adjustments using the higher maximum rate of the newly adjusted pay range and continued their access to the higher pay rate of EX–II.

OPM proposes to remove sections of the regulation that governed the renewal of an already fully certified system and described a process for automatic renewal based on an OPM/OMB review of the required agency annual report. OPM determined that this information alone is insufficient to assess whether

an agency's system continues to meet the certification criteria. An agency that intends to maintain its certification must submit a request for certification in accordance with proposed sections 430.407 and 1330.407.

OPM proposes to change the requirement of current sections 430.404(a)(6) and 1330.404(a)(6) that only the agency head or the official designated under paragraph (a)(5) of those sections may provide oversight of the agency's appraisal system and its results. The proposed regulations also add Communication of Results (*i.e.*, overall rating distributions, average adjustment in the rate of basic pay for each rating level, and average performance award for each rating level, as applicable) as a certification criterion. This change is consistent with OPM's current guidance that each agency must describe the communication of ratings and payouts to senior employees and other involved officials in its certification request. Additionally, the proposed regulations combine the criteria for *Alignment* and *Results* into a single criterion, *Aligned Results*.

OPM proposes to remove the references that distinguish requests for full certification from requests for provisional certification. As the certification process has evolved, OPM has found that submission of the same information is needed for all agency requests for certification. Based on review of an agency request, OPM, with OMB concurrence, may then grant full or provisional certification as appropriate. Reasons for which an agency would receive provisional rather than full certification are specified in the proposed regulations. OPM also proposes to remove the requirement for agencies to submit, as part of their certification requests, the process they use for ensuring ratings are not distributed arbitrarily or on a rotational basis. OPM believes this falls within the responsibilities of the oversight official to ensure the appraisal system is administered appropriately. OPM continues to require, as part of the oversight criterion, that an agency identify the official responsible for certifying that the senior employee appraisal process makes meaningful distinctions based on relative performance. OPM recognizes the ability to make meaningful distinctions in performance starts with the development of performance standards and requirements that clearly describe the different expectations at various performance levels. Agencies should consult their strategic plans and objectives when developing performance requirements to ensure

alignment with mission outcomes and organizational results. This first critical step falls to the rating official, in consultation with the senior employee, followed by the accurate application of these standards/requirements when assessing performance. The proper development of performance standards/requirements and the accurate assessment of performance compared to these standards/requirements should lead to meaningful distinctions in ratings. OPM has found that the role of the oversight official provides the appropriate level for ensuring ratings make meaningful distinctions on the basis of actual differences in levels of performance. Furthermore, OPM proposes to remove the requirement for an agency to submit, as part of its certification request, the process for reviewing performance standards, requirements, expectations, or ratings of employees supervised by senior employees, because OPM believes this too is a review that should be included in the responsibilities of the Oversight Official.

The proposed regulations introduce a new procedural framework that provides for shared responsibilities in assessing certification criteria. Instead of OPM assessing all criteria, OPM will assess *Aligned Results*, *Performance Distinctions*, and *Pay Differentiation*. OPM will seek OMB concurrence on its findings. Agencies will verify *Organizational Assessment* and *Guidelines, Oversight, and Communication*. The criteria verified by the agency will, however, be subject to periodic spot checks by OPM to ensure continued compliance. Spot checks will not be announced in advance and when they occur, agencies will submit to OPM the documentation they used as the basis of their verification of the applicable criteria. In addition, the proposed regulations allow for an agency to demonstrate compliance with the *Aligned Results* criterion through a peer review process. This peer review process will provide the option for an agency with full certification to either have its performance plans reviewed by another agency with a fully certified appraisal system or submit the performance plans to OPM. Agencies that maintain full certification may continuously use this peer review method to demonstrate compliance with the *Aligned Results* criterion subject to spot checks by OPM. To maintain the integrity of the peer review process, agencies will not be allowed to conduct reciprocal reviews.

OPM proposes to remove *Consultation*, *Balance*, and *Accountability* criteria from the

Certification Criteria and move them to a new section, Additional Appraisal Program Requirements and add the Training requirement to this same section. Based on over a decade of experience and careful deliberation by a cross-agency working group of subject matter experts, we have determined these important aspects of a successful and effective performance management system no longer need to be reviewed by OPM for the purpose of supporting a certification determination. Since they are vital to the success of a performance management system, are included in the design and application of the Basic SES appraisal system, and agencies already have incorporated them into their performance cultures, each agency will now be responsible for ensuring they continue to be properly applied within their organizations.

OPM proposes to modify the definition of Relative Performance to clarify that a senior employee's performance is compared to the performance expectations established for his or her position, including their contribution to agency performance as appropriate. The definition of Relative Performance also specifies that it does not permit peer ranking or peer comparison for rating purposes. OPM also proposes to remove Outstanding Performance from the definitions to avoid confusion with the commonly used Level 5 rating label—Outstanding. As used in the certification regulations, Outstanding Performance originally was intended to allow for separately identifying the highest performers even within the highest performance level, usually Level 5, which often uses the label Outstanding. Some additional terms have been defined, as noted in the table of changes. OPM also proposes to revise the title of this subpart from Performance Appraisal Certification for Pay Purposes to Performance Appraisal System Certification for accuracy.

Agencies will also be required to submit, as part of the certification request, the applicable agency SES or SL/ST pay setting and adjustment policy required under 5 CFR part 534 and the policy and procedures for granting performance awards under § 534.405 for SES or §§ 451.101(e) and 451.104(a)(3) for SL/ST. In order to

assess whether an agency is meeting the pay differentiation criterion for certification, OPM often finds it necessary to examine the pay policy to understand the context within which the reported pay adjustments have been authorized and performance awards have been granted. OPM also proposes that agencies make pay adjustments and performance awards for senior employees in a timely manner. These pay adjustments and awards for SES must have an effective date no later than 5 months after the end of the applicable appraisal period. For senior professionals, agencies must make pay adjustments, in compliance with requirements in § 534.505(b), at the same time as the adjustment to the General Schedule. This is the only time during the year annual increases in basic pay for senior professionals are permissible. Performance awards must be paid as soon as practicable after the end of the appraisal period. These timeliness requirements support the principles of performance-based compensation by ensuring the pay and awards are as close as practicable to the ratings upon which they are based.

OPM proposes to remove paragraphs addressing the limits on basic pay and aggregate total compensation because they are contained in 5 CFR part 534, subparts D and E and § 530.203(b) respectively.

Summary of Major Changes

These proposed regulations make the following major changes:

1. Proposed revisions make conforming changes as a result of Public Law 110–372, Senior Professional Performance Act of 2008.
 - Adds that an agency with an applicable certified appraisal system may apply the higher maximum rate of basic pay for senior professionals covered by the certified system.
 - Implements the provision of the Act where certification may be granted beginning at any point in the year for a period not to exceed 24 months as opposed to a calendar-year basis.
2. Proposed revisions address recommendations stemming from over a decade of experience with certification as well as from an interagency work group tasked to design an improved

certification process to support the President's Management Agenda recommendation to improve the SES.

- Provides for shared responsibilities in assessing certification criteria in which OPM assesses Aligned Results, Performance Distinctions, and Pay Differentiation and agencies will verify all other criteria.

- Adds new option for Peer Review—this would allow fully certified agencies to engage in a review of other fully certified agencies' performance plans to determine whether they meet the criterion for "Aligned Results," while prohibiting concurrent reciprocal reviews.

- Requires timely pay adjustments and performance awards for senior employees; for SES, not later than 5 months after the end of the appraisal period.

Request for Comments

In addition to the general request for comments on the proposed regulation, we would appreciate feedback focused specifically on the following questions:

- How could agencies best assess and highlight their organizational performance—strengthening alignment to individual SES performance requirements—to distinguish between SES performance levels and/or to objectively set high performance expectations for individual SES?
- Are there additional ways, or alternatives, OMB and OPM should consider to make the SES and SL/ST performance appraisal system certification process less resource-intensive, while still achieving the goal of tying performance to agency outcomes, and making meaningful distinctions amongst individuals' performance levels?

Complete Table of Changes

The following table lists all the proposed changes to the current regulations. The "current rule" column lists the regulations in the current subpart D. The "proposed rule" column indicates where matters addressed in the current regulation are addressed in the proposed regulation and where new material is being added. The third column explains each change.

Current rule	Proposed rule	Explanation of change
Part 430, subpart D		
430.401(a)	430.401(a) and (b)	Divides paragraph into multiple sections to increase clarity.
430.401(b)	Removed	Removes paragraphs addressing the limits on basic pay and aggregate compensation because they are contained in 5 CFR part 534, subparts D and E and § 530.203(b) respectively.

Current rule	Proposed rule	Explanation of change
430.402	430.402	Adds definitions for <i>Agency</i> , <i>Agency Head</i> , <i>Annual Summary Rating</i> , <i>Appraisal</i> , <i>Certification Criteria</i> , <i>Peer Review</i> , <i>Rating of Record</i> , <i>Senior Professional Review Panel (SPRP)</i> , updates <i>GPRA</i> to <i>GPRAMA</i> , clarifies the definitions of <i>Performance Expectations</i> , <i>Relative Performance</i> , and <i>Senior Executive</i> . Removes the definition for <i>Outstanding Performance</i> .
430.403(a)	430.403(a)	Edits made to increase clarity.
430.403(b)	430.403(b)	Adds provision that certifications are not renewable.
430.403(c)	430.403(c)	Moves requirement that agencies seeking certification must submit systems that have been approved by OPM.
430.403(c)	Removed	Removes option for agencies to submit a new appraisal system(s) for certification that has not yet been approved by OPM.
430.403(d)	430.403(e)	Moves requirement that agencies submit for certification, separate systems for their senior professionals and SES members. Adds new requirement for a centralized review panel for agencies with 10 or more senior professionals. Also moves the option to include features in the senior professional appraisal system that are similar to the SES system.
430.403(e)	430.403(c) and (d)	Splits paragraph into two sections.
430.404(a)	430.404	Edits made to increase clarity.
430.404(a)(1)	430.404(a)(1)	Moves certification criterion and changes name from <i>Alignment</i> to <i>Aligned Results</i> .
430.404(a)(2)	430.406(a)	Moves to Additional Appraisal System Requirements and clarifies.
430.404(a)(3)	430.404(a)(2)	Moves certification criterion and changes name from <i>Results</i> to <i>Aligned Results</i> .
430.404(a)(4)	430.404(a)(3)	New provision allowing for peer review of aligned results.
430.404(a)(5)	430.406(b)	Moves to Additional Appraisal System Requirements and clarifies.
430.404(a)(6)	430.405(a)	Moves certification criterion and simplifies.
430.404(a)(7)	430.405(b)	Moves certification criterion and clarifies.
430.404(a)(8)	430.406(c)	Moves to Additional Appraisal System Requirements, changes name from <i>Accountability</i> to <i>Accountability for the Performance Management of Subordinates</i> , and clarifies.
430.404(a)(9)	430.404(b)(2)	Moves the certification criterion, changes the name from <i>Performance Differentiation</i> to <i>Performance Distinctions</i> , and simplifies.
430.404(a)(9)	430.404(c)(1) and (2)	Moves certification criterion and clarifies.
430.404(a)(9)	430.404(c)(3)	Adds specific timeframe for making pay adjustments and awards in a timely manner.
430.404(a)(9)	430.404(c)(4)	Moves certification criterion and clarifies transparency in the process for making pay and awards decisions.
430.404(b)	Removed	Addressed by defining agency head to mean an Inspector General when applying these provisions to Offices of the Inspector General.
430.405(a)	430.405(c)	Adds <i>Communication of Results</i> as a certification criterion.
430.405(b)	430.406(d)	Adds <i>Training</i> to Additional Appraisal System Requirements.
430.405(b)(1)	430.405	Adds new section titled <i>Certification Criteria Verified by the Agency</i> .
430.405(b)(1)(i)	430.407	Moves and clarifies.
430.405(b)(1)(ii)	430.407(a)	Moves and removes the requirement to identify whether the request is for full or provisional certification. Removes requests covering an agencywide system or a system that applies to one or more agency organizations or components. Specifies who must submit certification requests.
430.405(b)(1)(iii)	430.407(a)(1)	Moves and remains unchanged.
430.405(b)(1)(iii)(A) and (B)	430.407(a)(2)	Adds new paragraph explicitly requiring separate certification requests for Offices of Inspectors General.
430.405(b)(1)(iii)(C)	430.407(a)(3)(i)	Moves and remains unchanged.
430.405(b)(2)	Removed	Removes applicable administrative instructions and implementing guidance from written requests for certification.
430.405(b)(3)	430.407(a)(3)(ii)	Moves and edits made to increase clarity.
430.405(b)(3)(i) and (ii)	430.404(b)(1)	Moves and clarifies.
430.405(b)(3)(i) and (ii)	430.404(b)(3)	Adds provision requiring agencies to appropriately assign the highest ratings to the best performers.
430.405(b)(3)(i) and (ii)	430.404(b)(4)	Moves and replaces <i>Outstanding Performance</i> with the highest level of performance.
430.405(b)(3)(i) and (ii)	Removed	Removes requirement to submit a clearly defined process for reviewing initial ratings as well as the requirement to submit a review of supervised employees' performance standards, requirements, and ratings.
430.405(b)(3)(i) and (ii)	430.407	Moves and simplifies.
430.405(b)(3)(i) and (ii)	Removed	Removes distinction between requirements associated with full and provisional certification requests.
430.405(b)(3)(i) and (ii)	430.407(a)(4)	New requirement to include a sample of performance plans.
430.405(b)(3)(i) and (ii)	430.407(a)(5)	New requirement to include documentation of organizational performance results and relationship with ratings distribution.

Current rule	Proposed rule	Explanation of change
430.405(b)(4)	430.407(a)(6) and (7)	Moves and references the annual reporting requirement. Moves references to full certification and the two appraisal periods, by requiring data reported in the annual data call.
	430.407(a)(7)	New requirement to submit documentation of the pay policy and procedures as well as policies established for awards programs.
430.405(b)(5)	430.407(a)(8)	Moves and remains unchanged.
	430.407(b)	Requires agencies participating in peer review to submit such documentation as OPM requires.
430.405(c)	430.408(a)	Moves and simplifies.
430.405(c)(1)	430.408(a)(1)	Moves, redefines the certification period from 2 calendar years to 24 months, and clarifies the requirements for full certification.
430.405(c)(2)	430.408(a)(2)	Moves, deletes the option for OPM to extend provisional certification into the following calendar year, redefines the certification period from 1 calendar year to 12 months, and specifies reasons an agency would receive provisional rather than full certification.
430.405(c)(3)	430.410(a)	Moves and changes the word suspend to terminate.
	430.408(b)(1)	Implements statutory authority of OPM Director to provide certification extensions.
	430.408(b)(2)	New provision providing requirements for requesting a certification extension.
430.405(d)	Removed	Removes paragraphs addressing the limits on basic pay and aggregate compensation because they are contained in 5 CFR part 534, subparts D and E and § 530.203(b), respectively.
430.405(e)(2)		
430.405(f)(2)		
430.405(e)(1)	430.408(a)(1)(i)–(iii)	Moves and restructures for clarity. Adds as a requirement for full certification, demonstration of appropriate system application based on data reports for the two most recent completed performance cycles.
430.405(e)(3)	Removed	Removes automatic renewal of full certification.
430.405(f)(1)	430.408(a)(2)(i) and (ii)	Moves and restructures for clarity.
	430.408(a)(2)(iii)	Adds as a reason for receiving provisional rather than full certification, the demonstration of appropriate system application based on data reports for only the most recent completed performance cycle.
430.405(f)(3)	Removed	Removes requirement to resubmit application requesting provisional certification.
430.405(g)	430.409	Moves and edits for increased clarity. Also removes the requirement to report aggregate total compensation.
430.405(h)(1)	430.410(a)	Combines redundant provisions previously at 430.405(c)(3) and 430.405(h)(1).
430.405(h)(2)	430.410(b)	Moves and changes the word suspension to termination.
430.405(h)(3)	430.410(c)–(e)	Moves and restructures for increased clarity. Changes the word suspension to termination.
430.405(h)(4)	430.410(f)	Moves, changes the word suspension to termination, and clarifies that a restored certification will terminate on the same date as the original certification.
430.405(h)(5)	430.410(g)	Moves and changes the word suspension to termination.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities, because they will apply only to Federal agencies and employees.

E.O. 12866, Regulatory Review

This rule has been reviewed by the U.S. Office of Management and Budget in accordance with E.O. 12866.

List of Subjects

5 CFR Parts 317 and 1330

Government employees.

List of Subjects in 5 CFR Parts 430

Decorations, Government employees.

List of Subjects in 5 CFR Part 534

Government employees, Hospitals, Students, and Wages.

U.S. Office of Management and Budget.

Shaun Donovan,

Director.

U.S. Office of Personnel Management.

Beth F. Cobert,

Acting Director.

Accordingly, OPM and OMB are proposing jointly to amend parts 430 and 1330 of title 5 of the Code of Federal Regulations, and OPM proposes to amend parts 317, 430, and 534 of title 5, Code of Federal Regulations as follows:

5 CFR Chapter I—Office of Personnel Management

PART 317—EMPLOYMENT IN THE SENIOR EXECUTIVE SERVICE

■ 1. The authority citation for part 317 continues to read as follows:

Authority: 5 U.S.C. 3392, 3393, 3395, 3397, 3592, 3593, 3595, 3596, 8414, and 8421.

Subpart E—Career Appointments

■ 2. In § 317.501, revise paragraph (b)(2) to read as follows:

§ 317.501 Recruitment and selection for initial SES career appointment be achieved from the brightest and most diverse pool possible.

* * * * *

(b) * * *

(2) Before an agency may fill an SES vacancy by an initial career appointment, it must post a vacancy announcement in USAJOBS for at least 14 calendar days, including the date of publication. Each agency's SES vacancy announcement must comply with criteria in § 330.104 of subpart A of this chapter, except for criteria pertaining to

veterans' preference, the Career Transition Assistance Program, and the Interagency Career Transition Assistance Program.

* * * * *

■ 3. In § 317.503, revise paragraph (g)(3) to read as follows:

§ 317.503 Probationary period.

* * * * *

(g) * * *

(3) The break in SES service was the result of military duty or compensable injury, and the time credited under paragraph (d)(3) of this section was not sufficient to complete the probationary period.

PART 430—MANAGING SENIOR EXECUTIVE PERFORMANCE

■ 4. The authority citation for Part 430 continues to read as follows:

Authority: 5 U.S.C. chapter 43 and 5307(d).

■ 5. In § 430.309, revise the last sentence of the introductory text in paragraph (e)(2), paragraph (e)(2)(ii), and the first sentence in paragraph (e)(2)(iii) to read as follows:

§ 430.309. Rating Performance

* * * * *

(e) * * *

(2) * * * The agency must provide each senior executive an opportunity for review of the initial summary rating by an employee, or (with the consent of the senior executive) a commissioned officer in the uniformed services on active duty in the agency, in a higher level in the agency than the official who prepared the initial rating.

* * * * *

(ii) When an agency cannot provide review by a higher-level official for a senior executive who receives an initial summary rating from the agency head because no such official exists in the agency, the agency must offer an alternative review as it determines appropriate; however, neither HLR nor alternative review may be provided by a member of the PRB that will make a recommendation under § 430.311(b)(2) concerning the senior executive or by an official who participated in determining the initial summary rating.

(iii) If a senior executive declines review by agency-designated higher-level officials, the agency may offer an alternative review but is not obligated to do so unless the only official in a higher level than the initial rater is the head of the agency. * * *

* * * * *

PART 430—PERFORMANCE MANAGEMENT

■ 6. The authority citation for part 430 continues to read as follows:

Authority: 5 U.S.C. chapter 43 and 5307(d).

■ 7. Revise subpart D to read as follows.

Subpart D—Performance Appraisal System Certification

Sec.

430.401 Purpose.

430.402 Definitions.

430.403 System certification.

430.404 Certification criteria verified by OPM/OMB.

430.405 Certification criteria verified by the agency.

430.406 Additional appraisal system requirements.

430.407 Agency certification requests.

430.408 OPM certification actions.

430.409 Annual reporting requirement.

430.410 Termination of certification.

Subpart D—Performance Appraisal System Certification

§ 403.401 Purpose.

(a) This subpart implements 5 U.S.C. 5307(d), which provides for certification of performance appraisal systems that as designed and applied make meaningful distinctions based on relative performance with respect to—

(1) Members of the Senior Executive Service (SES) paid under 5 U.S.C. 5382 and 5383; and

(2) Employees in senior-level (SL) and scientific or professional (ST) positions paid under 5 U.S.C. 5376.

(b) The regulations in this subpart strengthen the application of performance-based-pay principles to senior employees. Specifically, the statutory provisions that these regulations implement authorize an agency to apply a higher maximum rate of basic pay in setting and adjusting rates of basic pay for senior employees (consistent with 5 CFR part 534, subparts D and E) and apply a higher annual aggregate limitation on pay (consistent with 5 CFR part 530, subpart B) to its senior employees, when OPM, with OMB concurrence, has certified that the design and application of the agency's appraisal systems for these employees make meaningful distinctions based on relative performance. This subpart establishes the certification criteria and procedures that OPM will apply in considering agency requests for such certification.

403.402 Definitions.

In this subpart—

Agency means an agency as that term is defined in 5 U.S.C. 105 and an Office of Inspector General, which is considered a separate agency for

purposes of applying all provisions relating to the Senior Executive Service under the Inspector General Act of 1978 (5 U.S.C. App 6(d)).

Agency head means the head of an agency and includes the Inspector General when applying the provisions of this subpart to Offices of the Inspector General.

Annual summary rating means the overall rating level that an appointing authority assigns at the end of the appraisal period as defined in § 430.303.

Appraisal system means the policies, practices, and procedures an agency establishes under 5 U.S.C. chapter 43 and 5 CFR part 430, subparts B and C, or other applicable legal authority, for planning, monitoring, developing, evaluating, and rewarding employee performance. This includes appraisal systems and appraisal programs as defined in § 430.203 and performance management systems as defined in § 430.303.

Certification criteria means the factors used to determine whether an agency appraisal system as designed and applied makes meaningful distinctions based on relative performance.

GPRAMA means the Government Performance and Results Modernization Act of 2010.

OMB means the Office of Management and Budget.

OPM means the Office of Personnel Management.

Peer review means the review under § 430.404(a) of performance plans by one agency for another agency, both having fully certified performance appraisal systems, to determine whether they meet the certification criterion for Aligned Results.

Performance expectations means—

(1) the critical elements, performance requirements, and performance standards that constitute the senior executive performance plans, as defined in § 430.303, established for senior executives;

(2) the performance elements and standards that constitute the performance plans, as defined in § 430.203, established for senior professionals; or

(3) other appropriate means authorized under performance appraisal systems not covered by 5 U.S.C. chapter 43 for communicating what a senior employee is expected to do and the measures that demonstrate success, including contribution to agency performance where appropriate.

Program performance measures means results-oriented measures of performance, whether at the agency, component, or function level, which

include, for example, measures under GPRAMA.

PRB means Performance Review Board, as described in § 430.311.

Rating of record means the performance rating prepared at the end of an appraisal period for performance of agency-assigned duties over the entire period as defined in § 430.203.

Relative performance means the performance of a senior employee compared to the performance expectations established for his or her position (including contribution to agency performance) and those expectations must be set at a level that is sufficiently high to be commensurate with the authorities and responsibilities of a senior employee in the Federal Government. This does not permit peer ranking or peer comparison for rating purposes.

Senior employee means a senior executive or a senior professional.

Senior executive means a member of the Senior Executive Service (SES) paid under 5 U.S.C. 5382 and 5383.

Senior professional means an employee in a senior-level (SL) or scientific or professional position (ST) paid under 5 U.S.C. 5376.

SPRP means *Senior Professional Review Panel* as described in § 534.505(a)(5).

§ 430.403 System certification.

(a) OPM, with OMB concurrence, will certify an agency appraisal system under § 430.408 when a review of that system's design (*i.e.*, system documentation), implementation (*i.e.*, performance plans), and application (*i.e.*, pay, performance awards, and ratings upon which they are based) reveals that the agency meets the certification criteria established in §§ 430.404 and 430.405 and has followed the procedural requirements set forth in § 430.407, and results in a finding that the system as designed and applied makes meaningful distinctions based on relative performance and otherwise conforms to statutory and regulatory requirements relating to performance appraisal, pay, and awards.

(b) Each certification granted shall cover a specific period of time and is not renewable.

(c) Agencies subject to 5 U.S.C. chapter 43 and 5 CFR part 430 seeking certification of their appraisal systems must submit systems that have been approved by OPM under § 430.210 or § 430.314, as applicable.

(d) Agencies not subject to the appraisal provisions of 5 U.S.C. chapter 43 and 5 CFR part 430 seeking certification of their appraisal system(s) under this subpart must submit

appropriate documentation to demonstrate that each system complies with the appropriate legal authority that governs the establishment, implementation, and application of that system.

(e) For senior professionals, an agency must establish an appraisal system(s), as defined in § 430.402, that meets the requirements of 5 CFR part 430, subpart B, and is separate from the system(s) established to cover its SES members under 5 CFR part 430, subpart C. At its discretion, an agency may include system features in its senior professional appraisal system(s) that are the same as, or similar to, the features of its SES appraisal system(s), as appropriate. For the purpose of certification under this subpart, such senior professional appraisal system(s) with 10 or more senior professionals covered by the system(s), must include a requirement for centralized review of senior professionals' ratings of record and proposed pay and performance awards actions.

§ 430.404 Certification criteria verified by OPM/OMB.

To be certified, an agency's applicable appraisal system(s) for senior executives or senior professionals must meet the following certification criteria, as verified by OPM, with OMB concurrence:

(a) *Aligned results.* (1) Performance expectations for individual senior employees must derive from, and clearly align with, the agency's mission and organizational goals, such as those communicated through GPRAMA strategic goals, program and policy objectives, and/or annual performance plans and budget priorities.

(2) Performance plans must contain performance expectations, including at least one critical element focusing on business results, that—

(i) Apply to their respective areas of responsibility and control;

(ii) Reflect expected agency and/or organizational outcomes and outputs, performance targets or metrics, policy/program objectives, and/or milestones;

(iii) Identify specific programmatic crosscutting, external, and partnership-oriented goals or objectives, as applicable; and

(iv) Are stated in terms of observable, measurable, and/or demonstrable performance (*e.g.*, quality, quantity, timeliness, or cost effectiveness, as applicable).

(3) OPM may establish additional procedures to allow agencies to conduct peer reviews of the performance plans to determine whether the plans meet this criterion. When conducting peer

review, agencies may not conduct concurrent reciprocal reviews.

(b) *Performance distinctions.* (1) Appraisal systems must include summary levels of performance as described in 5 CFR 430.305(a)(6) for senior executives, and for senior professionals at least one summary level of performance above fully successful.

(2) Agency application of performance appraisal systems must—

(i) Result in meaningful distinctions based on relative performance; and

(ii) Take into account the assessment of the agency's performance against relevant program performance measures, as described in § 430.405(a), employee performance expectations, and such other relevant factors as may be appropriate.

(3) Authorized agency officials, as designated through agency delegated authority, must appraise senior employee performance accurately and realistically so that senior employees who have demonstrated the highest performance and/or exceptional contribution to the agency's performance receive the highest annual summary ratings or ratings of record, as applicable.

(4) Agencies with equivalent appraisal systems not otherwise subject to this part must provide for clearly distinguishing and identifying the rating that reflects the highest level of performance.

(5) Agencies may not equate the requirement to make distinctions based on relative performance to permitting a forced distribution of annual summary ratings or ratings of record, which is prohibited under §§ 430.208(c) and 430.305(a)(5). However, methods used to make distinctions among employees or groups of employees such as comparing, categorizing, and ranking employees or groups on the basis of their performance may be used for purposes other than assigning a summary level including, but not limited to, award determinations.

(c) *Pay differentiation.* (1) Agencies must ensure senior employees who have demonstrated the highest performance receive the highest annual summary ratings or ratings of record, as applicable, and the largest corresponding performance awards, pay adjustments, and rates of pay, in accordance with applicable limitations;

(2) Agencies must ensure differentiation is evident separately in the pay adjustments, performance awards, and rates of pay;

(3) Agencies must ensure they make pay adjustments and performance awards for senior employees in a timely manner.

(i) For senior executives, the pay adjustments authorized under 5 CFR 534.404(b)(3) and the performance awards authorized under 5 U.S.C. 5384 must have effective dates not later than 5 months after the end of the applicable appraisal period;

(ii) For senior professionals, agencies must make pay adjustments in accordance with the requirements in § 534.505(b) and pay performance awards as soon as practicable after the end of the appraisal period; and

(4) Agencies must develop processes for making pay decisions and granting awards affecting senior employees that comply with Governmentwide law, regulation, and guidance. To make these processes transparent agencies must provide access to the appraisal and pay policies that govern the decisions and communicate the results as required in § 430.405(c).

§ 430.405 Certification criteria verified by the agency.

To be certified, an agency's applicable appraisal system(s) for senior executives or senior professionals must meet the following certification criteria, as verified by the agency in accordance with instructions provided by OPM:

(a) *Organizational assessment and guidelines.* Agencies must comply with all applicable OMB requirements for assessing organizational performance and may use those assessments to inform the individual ratings of its senior employees. The results of these assessments are shared with individuals involved in the rating process through the issuance of guidelines based at least in part upon those assessments. The guidelines must—

(1) Address agency performance overall and with respect to each of its particular missions, components, programs, policy areas, and support functions—such as reports of the agency's GPRAMA goals, annual performance plans and targets, program performance measures, and other appropriate indicators;

(2) Be communicated by the agency head, or an individual specifically designated by the agency head for such purpose, to affected senior employees, their rating and reviewing officials, and PRB and SPRP members;

(3) Be provided at the conclusion of the appraisal period but before individual senior employee performance ratings are recommended, so that they inform individual performance appraisals; and

(4) Not take the form of quantitative limitations on the number of ratings at any given rating level.

(b) *Oversight.* The agency head or the individual specifically designated under paragraph (a)(2) of this section must certify for a particular senior employee appraisal system that—

(1) The senior employee rating process makes meaningful distinctions based on relative performance;

(2) The results of the senior employee appraisal process take into account the agency's assessment of its performance against program performance measures, as well as other relevant considerations, as appropriate;

(3) Performance awards, pay adjustments, and levels of pay based on the results of the rating process accurately reflect and recognize distinctions in individual performance and/or contribution to the agency's performance; and

(4) Final decisions include PRB or SPRP recommendations regarding senior employee ratings and must—

(i) Be consistent with 5 CFR part 430, subparts B and C; and

(ii) Appropriately reflect the employee's performance expectations, relevant program performance measures, and such other relevant factors as the PRB or SPRP may find appropriate.

(c) *Communication of results.* Agencies must communicate annually to senior employees, rating and reviewing officials, and PRB or SPRP members the results of the application of the appraisal process (*i.e.*, overall ratings distributions, average adjustment in the rate of basic pay for each rating level, and average performance award for each rating level, as applicable) while assuring confidentiality of protected information.

§ 430.406 Additional appraisal system requirements.

To be certified, an agency's appraisal system must meet the requirements of 5 CFR part 430, subparts B or C, as applicable, or other applicable legal authority. Agencies are responsible for ensuring their senior employee appraisal systems provide for—

(a) *Consultation.* Performance expectations for senior employees must be developed with the input and involvement of the senior employees who are covered thereby;

(b) *Balance.* Performance expectations established in the individual senior employee appraisal plan must include two parts:

(1) Expected results; and

(2) Those technical, leadership and/or managerial competencies or behaviors that contribute to, and are necessary to distinguish, levels of performance. In addition, for senior employees in

supervisory positions, their performance expectations also must address appropriate measures or indicators of stakeholder and/or employee perspective when applicable, such that stakeholder/employee feedback is sought and used to inform decisions.

(c) *Accountability for the performance management of subordinates.* The performance expectations for individual senior employees in supervisory positions must clearly communicate their responsibility for ensuring—

(1) The performance expectations for individual subordinate employees clearly link to organizational mission, GPRAMA strategic goals, or other program or policy objectives; and

(2) The appraisal of their subordinate employees is based on established performance expectations that differentiate among the various levels of performance. An appraisal must be a realistic assessment of the employees' actual performance, including their contribution to organizational goals as measured in GPRAMA and other organizational plans.

(d) *Training.* Agencies must provide senior employees, rating and reviewing officials (including those in other services/appointments such as political appointments, Foreign Service, military, etc.), and PRB or SPRP members initial training, periodic refresher training, and annual reminders on the operation of the applicable agency performance management and pay and awards policies.

§ 430.407 Agency certification requests.

To receive system certification, an agency must provide documentation demonstrating that its appraisal system(s), in design, implementation, and application, meet the certification criteria in §§ 430.404 and 430.405 as well as the procedural requirements set forth in this section.

(a) In order for an agency's appraisal system to be certified, the agency head or designee must submit documentation in accordance with OPM instructions, including—

(1) A written request, which may include signed electronic formats, for certification of its appraisal system(s) to the Director of OPM, or an OPM official assigned to accept certification requests;

(2) Separate certification requests for systems applying to senior executives, senior professionals, and Offices of the Inspector General;

(3) A full description of the appraisal system(s) to be certified, including—

(i) Organizational and employee coverage information; and

(ii) Rating levels as described in § 430.404(b)(1) and (4) that establish

clear distinctions between levels of performance so senior employees receive ratings based on assessments of their actual performance relative to their established performance expectations in any given appraisal period;

(4) A sample of senior employee performance plans as specified by OPM, except as provided in paragraph (b) of this section;

(5) Documentation of organizational performance results and an explanation of how these results support the rating distribution in accordance with OPM instructions;

(6) Data required by the annual reporting requirement in § 430.409;

(7) Documentation of the pay policy and procedures for setting and adjusting pay and granting performance awards that includes—

(i) For the agency's senior executives covered by 5 CFR part 534, subpart D, the plan for setting and adjusting the rate of basic pay described in § 534.404(g);

(ii) For the agency's senior professionals covered by 5 CFR part 534, subpart E, the written procedures for setting and adjusting the rate of basic pay described in § 534.505; and

(iii) Policies established for award programs authorized under § 534.405 or responsibilities identified in § 451.106, as appropriate; and

(8) Any additional information that OPM and OMB may require to make a determination regarding certification.

(b) Agencies that participate in a peer review under § 430.404(a) must submit such documentation as OPM requires.

§ 430.408 OPM certification actions.

OPM will certify performance appraisal systems, with OMB concurrence, only for those agencies that comply with all related laws and regulations.

(a) *Granting certification.* At the request of an agency head or designee, the Director of OPM, at his or her discretion and in accordance with the requirements of this subpart and with OMB concurrence, may—

(1) Grant full certification, which covers a period of 24 months, of an agency's senior employee appraisal system(s) when the agency has—

(i) Demonstrated in the initial submission of its documentation, and without making any revisions directed by OPM, that it has designed and fully operationalized the certification criteria defined in §§ 430.404 and 430.405;

(ii) Met the documentation requirements in § 430.407; and

(iii) Demonstrated appropriate system application through the data reports required in § 430.409 based on the 2

most recently completed performance cycles (2 years of data).

(2) Grant provisional certification, which covers a period of 12 months, of an agency's senior employee appraisal system(s) when the agency has—

(i) Designed a senior employee appraisal system(s) that meets the certification criteria in §§ 430.404 and 430.405; and

(ii) Revised one or more senior employee performance plans in accordance with instructions from OPM in order to meet the certification requirements in § 430.404(a); or

(iii) Demonstrated appropriate system application through the data reports required in § 430.409 based on only the most recently completed performance cycle (1 year of data).

(3) Grant provisional certification to an agency more than once.

(b) *Extending certification.* (1) Consistent with the requirements of this subpart, the Director of OPM, at his or her discretion or upon the request of an agency head or designee, may grant a single extension of up to six additional months for an agency's appraisal system certification. The discretionary use of the Director's extension authority will be reserved for rare, exceptional circumstances.

(2) When requesting an extension, the agency head or designee must submit a written request, which may include signed electronic formats, to OPM outlining why the agency needs the extension and how the extension will support effective performance management. OPM will consider requests for extensions on a case-by-case basis.

§ 430.409 Annual reporting requirement.

Agencies must provide OPM with the annual summary ratings or ratings of record, as applicable, and rates of basic pay, pay adjustments, and performance and cash awards for their senior employees in accordance with instructions for OPM's annual data call and at any other time as needed to support a certification request.

§ 430.410 Termination of certification.

(a) Any time OPM determines that an agency's certified appraisal system is no longer in compliance with certification criteria, OPM, with OMB concurrence, may terminate such certification.

(b) An agency's system certification is terminated automatically when OPM withdraws performance appraisal system approval or mandates corrective action because of misapplication of the system as authorized under § 430.210(c) or § 430.314(c).

(c) OPM will notify the agency head at least 30 calendar days in advance of

the termination and the reason(s) for the termination, as well as any expected corrective action.

(d) Upon such termination, and until its system certification is reinstated, the agency must—

(1) Set a senior employee's rate of basic pay under 5 CFR part 534, subparts D or E as applicable, at a rate that does not exceed the rate for level III of the Executive Schedule.

(2) Limit aggregate compensation received in a calendar year by a senior employee to the rate for level I of the Executive Schedule.

(e) Performance awards, pay adjustments, and levels of pay in effect prior to such termination will remain in effect unless OPM finds that any such decision and subsequent action was in violation of law, rule, or regulation.

(f) OPM, with OMB concurrence, may reinstate certification to an agency whose certification has been terminated only after the agency demonstrates it has taken appropriate corrective action. A restored certification will terminate on the same date as the original certification. An agency with a terminated certification may choose to submit a new certification request once it has corrected the issue(s) that led to the termination.

(g) OPM may reinstate the certification of an appraisal system that has been terminated automatically under paragraph (b) of this section upon the agency's compliance with the applicable OPM-mandated corrective action(s).

PART 534—PAY UNDER OTHER SYSTEMS

■ 8. Revise the authority citation for part 534 to read as follows:

Authority: 5 U.S.C. 1104, 3161(d), 5307, 5351, 5352, 5353, 5376, 5382, 5383, 5384, 5385, 5541, 5550a, sec. 1125 of the National Defense Authorization Act for FY 2004, Pub. L. 108–136, 117 Stat. 1638 (5 U.S.C. 5304, 5382, 5383, 7302; 18 U.S.C. 207); and Pub. L. 110–372, 122 Stat. 4043 (5 U.S.C. 5304, 5307, 5376).

Subpart D—Pay and Performance Awards Under the Senior Executive Service.

■ 9. In § 534.403, revise the first sentence of paragraph (b) to read as follows:

§ 534.403 SES rate range.

* * * * *

(b) *Termination of certification of performance appraisal system.* A senior executive whose rate of basic pay is higher than the rate for level III of the Executive Schedule may not suffer a

reduction in pay because his or her agency's applicable performance appraisal system certification is terminated under 5 CFR 430.410. * * *

■ 10. In § 534.404—

- a. Revise paragraphs (b)(4)(ii) and (b)(4)(iii);
- b. Revise paragraphs (c)(1) and (c)(4) and add new paragraph (c)(6);
- c. Revise paragraph (e)(1);
- d. Revise paragraph (g)(3);
- e. Revise paragraph (i)(1).

The revisions and additions to read as follows:

§ 534.404 Setting and adjusting pay for senior executives.

* * * * *

(b) * * *

(4) * * *

(ii) A pay increase under paragraph (b)(4)(i) of this section may not be provided to a senior executive whose rate of basic pay is at or below the rate for level III of the Executive Schedule if such an increase would cause the senior executive's rate of basic pay to exceed the rate for level III of the Executive Schedule unless the senior executive has received an annual summary rating of outstanding for the most recently completed appraisal period and the agency head or designee who performs the functions described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) has approved the increase in pay.

(iii) A pay increase under paragraph (b)(4)(i) of this section may not be provided to a senior executive whose rate of basic pay is above the rate for level III of the Executive Schedule unless the senior executive has received an annual summary rating of outstanding for the most recently completed appraisal period and the agency head or designee who performs the functions described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) has approved the increase in pay. However, in the case of a senior executive whose rate of basic pay is above the rate for level III of the Executive Schedule and who has been rated below outstanding, but above fully successful, for the most recently completed appraisal period, the agency head or designee who performs the functions described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) may approve such a pay increase in limited circumstances, such as for an exceptionally meritorious accomplishment.

* * * * *

(c) *12-month rule.* (1) An authorized agency official may adjust (*i.e.*, increase

or reduce) the rate of basic pay of a senior executive not more than once during any 12-month period. However, an agency may make a determination to provide an additional pay increase under certain conditions as prescribed in paragraphs (c)(3), (c)(4), and (c)(6) of this section without regard to whether the senior executive has received a pay adjustment during the previous 12-month period.

* * * * *

(4) An authorized agency official may approve increases in a senior executive's rate of basic pay more than once during a 12-month period if the agency head or designee who performs the functions described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) determines that—

* * * * *

(6) When necessary to maintain an annual executive appraisal and pay adjustment cycle that permits pay adjustments on the first day of the 27th full bi-weekly pay period following the effective date of pay adjustments for the previous cycle, an authorized agency official may provide a pay adjustment to a senior executive not more than 2 days before an applicable 12-month period expires. The pay adjustment begins a new 12-month period for the purpose of paragraph (c)(1).

* * * * *

(e) *Adjustments in pay after certification of applicable performance appraisal system.* (1) In the case of an agency that obtains certification of a performance appraisal system for senior executives under 5 CFR part 430, subpart D, an authorized agency official may subsequently increase a covered senior executive's rate of basic pay based upon a performance appraisal under the certified system up to the rate for level II of the Executive Schedule, consistent with the limitations in § 534.403(a)(3), under the conditions prescribed in paragraph (b) of this section, if the senior executive is otherwise eligible for such an increase (*i.e.*, he or she did not receive a pay adjustment under § 534.404(c) during the previous 12-month period). An adjustment in pay made under this paragraph is considered a pay adjustment for the purpose of applying § 534.404(c).

* * * * *

(g) * * *

(3) The designation of the authorized agency official who has authority to set and adjust SES rates of pay for individual senior executives, subject to the requirement that the agency head or designee who performs the functions

described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) must approve any determination to set a senior executive's rate of basic pay higher than the rate for level III of the Executive Schedule and must approve any determination to increase a senior executive's rate of basic pay more than once in any 12-month period; and

* * * * *

(i) *Setting pay following a break in SES service—*(1) *General.* Upon reappointment to the SES, an authorized agency official may set the rate of basic pay of a former senior executive at any rate within the SES rate range, subject to the limitations in § 534.403(a), if there has been a break in SES service of more than 30 days. If there has been a break in SES service of 30 days or less, the senior executive's rate of basic pay may be set at any rate within the SES rate range (without regard to whether the employee received a pay adjustment during the previous 12-month period), but not higher than the senior executive's former SES rate of basic pay. Where there has been a break in service of 30 days or less, the agency head or designee who performs the functions described in 5 CFR 430.405(a)(2) and (b) (including the Inspector General, where applicable) may approve a higher rate than the senior executive's former rate of basic pay, if warranted. Setting a rate of basic pay upon reappointment to the SES is considered a pay adjustment under § 534.404(c).

* * * * *

§ 534.503 [Amended].

■ 11. Amend § 534.503 as follows:

- a. Remove the reference “§ 430.405(h)” from the definition “Certified” and add in its place “§ 430.410”, and remove from that definition the term “suspension” and add in its place “termination”;
 - b. Remove the reference “§ 430.405(h)” from the definition “Not certified” and add in its place “§ 430.410”, and remove from that definition the term “suspended” and add in its place “terminated”; and
 - c. Remove the reference “§ 430.404(a)(1) through (9)” and add in its place “§§ 430.404 and 430.405”.
- 12. Amend § 534.505 as follows:
- a. Remove the reference “§ 430.404(a)(6)(i), (ii) and (iii)” and add in its place “§ 430.405(b)(1), (2) and (3)”; and
 - b. Remove the reference “§ 430.403(d)” and add in its place “§ 430.403(e)”.
 - c. Revise paragraph (a)(5) to read as follows:

§ 534.505 Written procedures.

(a) * * *

(5) The administrative and management controls that will be applied to assure compliance with applicable statutes, OPM regulations, the agency's written procedures established under this section, the applicable maximum rate of basic pay in § 534.504(a), and, where applicable, the certification requirements set forth in part 430, subpart D of this chapter. In an agency that employs ten or more senior professionals, these controls must include centralized review of ratings proposed under § 430.208 of this chapter, pay actions proposed under § 534.507, and performance awards under § 451.104(a)(3) by a panel of individuals designated by the agency head to provide advice from an agency-wide perspective for authorized agency officials to consider before approving pay adjustments and performance awards on whether—

(i) Ratings of record and performance ratings proposed for senior professionals accurately reflect their individual performance, contributions to agency performance, or both, and take into account, as appropriate, assessment of the agency's performance against program performance measures and other relevant considerations; and

(ii) Proposed pay adjustments and performance awards for senior professionals conform to the requirements of §§ 534.507 and 451.104(a)(3) respectively and appropriately correspond to proposed ratings of record and performance ratings.

* * * *

§ 534.506 [Amended].

■ 13. Amend § 534.506 to remove the reference “§ 430.404(a)(6)(i), (ii) and (iii)” and add in its place “§ 430.405(b)(1), (2) and (3)”.

■ 14. In § 534.507, revise paragraph (a)(2) to read as follows:

§ 534.507 Annual increases in basic pay.

(a) * * *

(2) A determination by an authorized agency official to make a zero adjustment in pay after reviewing a senior professional's current rating of record or performance rating meets the requirement of paragraph (a)(1) of this section only if the notice required by paragraph (h) of this section is provided to the senior professional no later than 14 days after the date specified in paragraph (a)(1) of this section.

* * * *

■ 15. In § 534.509, revise paragraph (b) to read as follows:

§ 534.509 Preservation of an established rate of basic pay.

* * * *

(b) An SL or ST employee whose rate of basic pay is higher than the rate for level III of the Executive Schedule may not suffer a reduction in pay because his or her agency's applicable performance appraisal system certification expires or is terminated under § 430.410 of this chapter. See § 530.203(g) and (h) of this chapter for treatment of the aggregate pay limit when certification status changes during the calendar year.

* * * *

§ 534.510 [Amended].

■ 16. Amend § 534.510 to remove the references “§ 430.404(a)(6)(i), (ii) and (iii)” and add in their place “§ 430.405(b)(1), (2) and (3)” wherever they occur.

5 CFR Chapter III—Office of Management and Budget**Subchapter C—Joint Regulations With the Office of Personnel Management****PART 1330—HUMAN RESOURCES MANAGEMENT**

■ 17. The authority citation for part 1330 continues to read as follows:

Authority: 5 U.S.C. chapter 43 and 5307(d).

■ 18. Revise Subpart D of part 1330 to read as follows:

Subparts A—C [Reserved]**Subpart D—Performance Appraisal System Certification**

Sec.

1330.401 Purpose.

1330.402 Definitions.

1330.403 System certification.

1330.404 Certification criteria verified by OPM/OMB.

1330.405 Certification criteria verified by the agency.

1330.406 Additional appraisal system requirements.

1330.407 Agency certification requests.

1330.408 OPM certification actions.

1330.409 Annual reporting requirement.

1330.410 Termination of certification.

Authority: 5 U.S.C. 5307(d).

Subpart D—Performance Appraisal System Certification**§ 1330.401 Purpose.**

(a) This subpart implements 5 U.S.C. 5307(d), which provides for certification of performance appraisal systems that as designed and applied make meaningful distinctions based on relative performance with respect to—

(1) Members of the Senior Executive Service (SES) paid under 5 U.S.C. 5382 and 5383; and

(2) Employees in senior-level (SL) and scientific or professional (ST) positions paid under 5 U.S.C. 5376.

(b) The regulations in this subpart strengthen the application of performance-based-pay principles to senior employees. Specifically, the statutory provisions that these regulations implement authorize an agency to apply a higher maximum rate of basic pay in setting and adjusting rates of basic pay for senior employees (consistent with 5 CFR part 534, subparts D and E) and apply a higher annual aggregate limitation on pay (consistent with 5 CFR part 530, subpart B) to its senior employees, when OPM, with OMB concurrence, has certified that the design and application of the agency's appraisal systems for these employees make meaningful distinctions based on relative performance. This subpart establishes the certification criteria and procedures that OPM will apply in considering agency requests for such certification.

§ 1330.402 Definitions.

In this subpart—

Agency means an agency as that term is defined in 5 U.S.C. 105 and an Office of Inspector General, which is considered a separate agency for purposes of applying all provisions relating to the Senior Executive Service under the Inspector General Act of 1978 (5 U.S.C. App 6(d)).

Agency head means the head of an agency and includes the Inspector General when applying the provisions of this subpart to Offices of the Inspector General.

Annual summary rating means the overall rating level that an appointing authority assigns at the end of the appraisal period as defined in § 430.303.

Appraisal system means the policies, practices, and procedures an agency establishes under 5 U.S.C. chapter 43 and 5 CFR part 430, subparts B and C, or other applicable legal authority, for planning, monitoring, developing, evaluating, and rewarding employee performance. This includes appraisal systems and appraisal programs as defined in § 430.203 and performance management systems as defined in § 430.303.

Certification criteria means the factors used to determine whether an agency appraisal system as designed and applied makes meaningful distinctions based on relative performance.

GPRAMA means the Government Performance and Results Modernization Act of 2010.

OMB means the Office of Management and Budget.

OPM means the Office of Personnel Management.

Peer review means the review under § 1330.404(a) of performance plans by one agency for another agency, both having fully certified performance appraisal systems, to determine whether they meet the certification criterion for Aligned Results.

Performance expectations means—

(1) the critical elements, performance requirements, and performance standards that constitute the senior executive performance plans, as defined in § 430.303, established for senior executives;

(2) the performance elements and standards that constitute the performance plans, as defined in § 430.203, established for senior professionals; or

(3) other appropriate means authorized under performance appraisal systems not covered by 5 U.S.C. chapter 43 for communicating what a senior employee is expected to do and the measures that demonstrate success, including contribution to agency performance where appropriate.

Program performance measures means results-oriented measures of performance, whether at the agency, component, or function level, which include, for example, measures under GPRAMA.

PRB means Performance Review Board, as described in § 430.311.

Rating of record means the performance rating prepared at the end of an appraisal period for performance of agency-assigned duties over the entire period as defined in § 430.203.

Relative performance means the performance of a senior employee compared to the performance expectations established for his or her position (including contribution to agency performance) and those expectations must be set at a level that is sufficiently high to be commensurate with the authorities and responsibilities of a senior employee in the Federal Government. This does not permit peer ranking or peer comparison for rating purposes.

Senior employee means a senior executive or a senior professional.

Senior executive means a member of the Senior Executive Service (SES) paid under 5 U.S.C. 5382 and 5383.

Senior professional means an employee in a senior-level (SL) or scientific or professional position (ST) paid under 5 U.S.C. 5376.

SPRP means *Senior Professional Review Panel* as described in § 534.505(a)(5).

§ 1330.403 System certification.

(a) OPM, with OMB concurrence, will certify an agency appraisal system under § 1330.408 when a review of that system's design (*i.e.*, system documentation), implementation (*i.e.*, performance plans), and application (*i.e.*, pay, performance awards, and ratings upon which they are based) reveals that the agency meets the certification criteria established in §§ 1330.404 and 1330.405 and has followed the procedural requirements set forth in § 1330.407, and results in a finding that the system as designed and applied makes meaningful distinctions based on relative performance and otherwise conforms to statutory and regulatory requirements relating to performance appraisal, pay, and awards.

(b) Each certification granted shall cover a specific period of time and is not renewable.

(c) Agencies subject to 5 U.S.C. chapter 43 and 5 CFR part 430 seeking certification of their appraisal systems must submit systems that have been approved by OPM under § 430.210 or § 430.314, as applicable.

(d) Agencies not subject to the appraisal provisions of 5 U.S.C. chapter 43 and 5 CFR part 430 seeking certification of their appraisal system(s) under this subpart must submit appropriate documentation to demonstrate that each system complies with the appropriate legal authority that governs the establishment, implementation, and application of that system.

(e) For senior professionals, an agency must establish an appraisal system(s), as defined in § 1330.402, that meets the requirements of 5 CFR part 430, subpart B, and is separate from the system(s) established to cover its SES members under 5 CFR part 430, subpart C. At its discretion, an agency may include system features in its senior professional appraisal system(s) that are the same as, or similar to, the features of its SES appraisal system(s), as appropriate. For the purpose of certification under this subpart, such senior professional appraisal system(s) with 10 or more senior professionals covered by the system(s), must include a requirement for centralized review of senior professionals' ratings of record and proposed pay and performance awards actions.

§ 1330.404 Certification criteria verified by OPM/OMB.

To be certified, an agency's applicable appraisal system(s) for senior executives or senior professionals must meet the following certification criteria, as

verified by OPM, with OMB concurrence:

(a) *Aligned results.* (1) Performance expectations for individual senior employees must derive from, and clearly align with, the agency's mission and organizational goals, such as those communicated through GPRAMA strategic goals, program and policy objectives, and/or annual performance plans and budget priorities.

(2) Performance plans must contain performance expectations, including at least one critical element focusing on business results, that—

(i) Apply to their respective areas of responsibility and control;

(ii) Reflect expected agency and/or organizational outcomes and outputs, performance targets or metrics, policy/program objectives, and/or milestones;

(iii) Identify specific programmatic crosscutting, external, and partnership-oriented goals or objectives, as applicable; and

(iv) Are stated in terms of observable, measurable, and/or demonstrable performance (*e.g.*, quality, quantity, timeliness, or cost effectiveness, as applicable).

(3) OPM may establish additional procedures to allow agencies to conduct peer reviews of the performance plans to determine whether the plans meet this criterion. When conducting peer review, agencies may not conduct concurrent reciprocal reviews.

(b) *Performance distinctions.* (1) Appraisal systems must include summary levels of performance as described in 5 CFR 430.305(a)(6) for senior executives, and for senior professionals at least one summary level of performance above fully successful.

(2) Agency application of performance appraisal systems must—

(i) Result in meaningful distinctions based on relative performance; and

(ii) Take into account the assessment of the agency's performance against relevant program performance measures, as described in § 1330.405(a), employee performance expectations, and such other relevant factors as may be appropriate.

(3) Authorized agency officials, as designated through agency delegated authority, must appraise senior employee performance accurately and realistically so that senior employees who have demonstrated the highest performance and/or exceptional contribution to the agency's performance receive the highest annual summary ratings or ratings of record, as applicable.

(4) Agencies with equivalent appraisal systems not otherwise subject to this part must provide for clearly

distinguishing and identifying the rating that reflects the highest level of performance.

(5) Agencies may not equate the requirement to make distinctions based on relative performance to permitting a forced distribution of annual summary ratings or ratings of record, which is prohibited under §§ 430.208(c) and 430.305(a)(5). However, methods used to make distinctions among employees or groups of employees such as comparing, categorizing, and ranking employees or groups on the basis of their performance may be used for purposes other than assigning a summary level including, but not limited to, award determinations.

(c) *Pay differentiation.* (1) Agencies must ensure senior employees who have demonstrated the highest performance receive the highest annual summary ratings or ratings of record, as applicable, and the largest corresponding performance awards, pay adjustments, and rates of pay, in accordance with applicable limitations;

(2) Agencies must ensure differentiation is evident separately in the pay adjustments, performance awards, and rates of pay;

(3) Agencies must ensure they make pay adjustments and performance awards for senior employees in a timely manner.

(i) For senior executives, the pay adjustments authorized under 5 CFR 534.404(b)(3) and the performance awards authorized under 5 U.S.C. 5384 must have effective dates not later than 5 months after the end of the applicable appraisal period;

(ii) For senior professionals, agencies must make pay adjustments in accordance with the requirements in § 534.505(b) and pay performance awards as soon as practicable after the end of the appraisal period; and

(4) Agencies must develop processes for making pay decisions and granting awards affecting senior employees that comply with Governmentwide law, regulation, and guidance. To make these processes transparent agencies must provide access to the appraisal and pay policies that govern the decisions and communicate the results as required in § 1330.405(c).

§ 1330.405 Certification criteria verified by the agency.

To be certified, an agency's applicable appraisal system(s) for senior executives or senior professionals must meet the following certification criteria, as verified by the agency in accordance with instructions provided by OPM:

(a) *Organizational assessment and guidelines.* Agencies must comply with

all applicable OMB requirements for assessing organizational performance and may use those assessments to inform the individual ratings of its senior employees. The results of these assessments are shared with individuals involved in the rating process through the issuance of guidelines based at least in part upon those assessments. The guidelines must—

(1) Address agency performance overall and with respect to each of its particular missions, components, programs, policy areas, and support functions—such as reports of the agency's GPRAMA goals, annual performance plans and targets, program performance measures, and other appropriate indicators;

(2) Be communicated by the agency head, or an individual specifically designated by the agency head for such purpose, to affected senior employees, their rating and reviewing officials, and PRB and SPRP members;

(3) Be provided at the conclusion of the appraisal period but before individual senior employee performance ratings are recommended, so that they inform individual performance appraisals; and

(4) Not take the form of quantitative limitations on the number of ratings at any given rating level.

(b) *Oversight.* The agency head or the individual specifically designated under paragraph (a)(2) of this section must certify for a particular senior employee appraisal system that—

(1) The senior employee rating process makes meaningful distinctions based on relative performance;

(2) The results of the senior employee appraisal process take into account the agency's assessment of its performance against program performance measures, as well as other relevant considerations, as appropriate;

(3) Performance awards, pay adjustments, and levels of pay based on the results of the rating process accurately reflect and recognize distinctions in individual performance and/or contribution to the agency's performance; and

(4) Final decisions include PRB or SPRP recommendations regarding senior employee ratings and must—

(i) Be consistent with 5 CFR part 430, subparts B and C; and

(ii) Appropriately reflect the employee's performance expectations, relevant program performance measures, and such other relevant factors as the PRB or SPRP may find appropriate.

(c) *Communication of results.*

Agencies must communicate annually to senior employees, rating and

reviewing officials, and PRB or SPRP members the results of the application of the appraisal process (*i.e.*, overall ratings distributions, average adjustment in the rate of basic pay for each rating level, and average performance award for each rating level, as applicable) while assuring confidentiality of protected information.

§ 1330.406 Additional appraisal system requirements.

To be certified, an agency's appraisal system must meet the requirements of 5 CFR part 430, subparts B or C, as applicable, or other applicable legal authority. Agencies are responsible for ensuring their senior employee appraisal systems provide for—

(a) *Consultation.* Performance expectations for senior employees must be developed with the input and involvement of the senior employees who are covered thereby;

(b) *Balance.* Performance expectations established in the individual senior employee appraisal plan must include two parts:

(1) Expected results; and

(2) Those technical, leadership and/or managerial competencies or behaviors that contribute to, and are necessary to distinguish, levels of performance. In addition, for senior employees in supervisory positions, their performance expectations also must address appropriate measures or indicators of stakeholder and/or employee perspective when applicable, such that stakeholder/employee feedback is sought and used to inform decisions.

(c) *Accountability for the performance management of subordinates.* The performance expectations for individual senior employees in supervisory positions must clearly communicate their responsibility for ensuring—

(1) The performance expectations for individual subordinate employees clearly link to organizational mission, GPRAMA strategic goals, or other program or policy objectives; and

(2) The appraisal of their subordinate employees is based on established performance expectations that differentiate among the various levels of performance. An appraisal must be a realistic assessment of the employees' actual performance, including their contribution to organizational goals as measured in GPRAMA and other organizational plans.

(d) *Training.* Agencies must provide senior employees, rating and reviewing officials (including those in other services/appointments such as political appointments, Foreign Service, military, etc.), and PRB or SPRP members initial training, periodic refresher training, and

annual reminders on the operation of the applicable agency performance management and pay and awards policies.

§ 1330.407 Agency certification requests.

To receive system certification, an agency must provide documentation demonstrating that its appraisal system(s), in design, implementation, and application, meet the certification criteria in §§ 1330.404 and 1330.405 as well as the procedural requirements set forth in this section.

(a) In order for an agency's appraisal system to be certified, the agency head or designee must submit documentation in accordance with OPM instructions, including—

(1) A written request, which may include signed electronic formats, for certification of its appraisal system(s) to the Director of OPM, or an OPM official assigned to accept certification requests;

(2) Separate certification requests for systems applying to senior executives, senior professionals, and Offices of the Inspector General;

(3) A full description of the appraisal system(s) to be certified, including—

(i) Organizational and employee coverage information; and

(ii) Rating levels as described in § 1330.404(b)(1) and (4) that establish clear distinctions between levels of performance so senior employees receive ratings based on assessments of their actual performance relative to their established performance expectations in any given appraisal period;

(4) A sample of senior employee performance plans as specified by OPM, except as provided in paragraph (b) of this section;

(5) Documentation of organizational performance results and an explanation of how these results support the rating distribution in accordance with OPM instructions;

(6) Data required by the annual reporting requirement in § 1330.409;

(7) Documentation of the pay policy and procedures for setting and adjusting pay and granting performance awards that includes—

(i) For the agency's senior executives covered by 5 CFR part 534, subpart D, the plan for setting and adjusting the rate of basic pay described in § 534.404(g);

(ii) For the agency's senior professionals covered by 5 CFR part 534, subpart E, the written procedures for setting and adjusting the rate of basic pay described in § 534.505; and

(iii) Policies established for award programs authorized under § 534.405 or responsibilities identified in § 451.106, as appropriate; and

(8) Any additional information that OPM and OMB may require to make a determination regarding certification.

(b) Agencies that participate in a peer review under § 1330.404(a) must submit such documentation as OPM requires.

§ 1330.408 OPM certification actions.

OPM will certify performance appraisal systems, with OMB concurrence, only for those agencies that comply with all related laws and regulations.

(a) *Granting certification.* At the request of an agency head or designee, the Director of OPM, at his or her discretion and in accordance with the requirements of this subpart and with OMB concurrence, may—

(1) Grant full certification, which covers a period of 24 months, of an agency's senior employee appraisal system(s) when the agency has—

(i) Demonstrated in the initial submission of its documentation, and without making any revisions directed by OPM, that it has designed and fully operationalized the certification criteria defined in §§ 1330.404 and 1330.405;

(ii) Met the documentation requirements in § 1330.407; and

(iii) Demonstrated appropriate system application through the data reports required in § 1330.409 based on the 2 most recently completed performance cycles (2 years of data).

(2) Grant provisional certification, which covers a period of 12 months, of an agency's senior employee appraisal system(s) when the agency has—

(i) Designed a senior employee appraisal system(s) that meets the certification criteria in §§ 1330.404 and 1330.405; and

(ii) Revised one or more senior employee performance plans in accordance with instructions from OPM in order to meet the certification requirements in § 1330.404(a); or

(iii) Demonstrated appropriate system application through the data reports required in § 1330.409 based on only the most recently completed performance cycle (1 year of data).

(3) Grant provisional certification to an agency more than once.

(b) *Extending certification.* (1) Consistent with the requirements of this subpart, the Director of OPM, at his or her discretion or upon the request of an agency head or designee, may grant a single extension of up to six additional months for an agency's appraisal system certification. The discretionary use of the Director's extension authority will be reserved for rare, exceptional circumstances.

(2) When requesting an extension, the agency head or designee must submit a

written request, which may include signed electronic formats, to OPM outlining why the agency needs the extension and how the extension will support effective performance management. OPM will consider requests for extensions on a case-by-case basis.

§ 1330.409 Annual reporting requirement.

Agencies must provide OPM with the annual summary ratings or ratings of record, as applicable, and rates of basic pay, pay adjustments, and performance and cash awards for their senior employees in accordance with instructions for OPM's annual data call and at any other time as needed to support a certification request.

§ 1330.410 Termination of certification.

(a) Any time OPM determines that an agency's certified appraisal system is no longer in compliance with certification criteria, OPM, with OMB concurrence, may terminate such certification.

(b) An agency's system certification is terminated automatically when OPM withdraws performance appraisal system approval or mandates corrective action because of misapplication of the system as authorized under § 430.210(c) or § 430.314(c).

(c) OPM will notify the agency head at least 30 calendar days in advance of the termination and the reason(s) for the termination, as well as any expected corrective action.

(d) Upon such termination, and until its system certification is reinstated, the agency must—

(1) Set a senior employee's rate of basic pay under 5 CFR part 534, subparts D or E as applicable, at a rate that does not exceed the rate for level III of the Executive Schedule.

(2) Limit aggregate compensation received in a calendar year by a senior employee to the rate for level I of the Executive Schedule.

(e) Performance awards, pay adjustments, and levels of pay in effect prior to such termination will remain in effect unless OPM finds that any such decision and subsequent action was in violation of law, rule, or regulation.

(f) OPM, with OMB concurrence, may reinstate certification to an agency whose certification has been terminated only after the agency demonstrates it has taken appropriate corrective action. A restored certification will terminate on the same date as the original certification. An agency with a terminated certification may choose to submit a new certification request once it has corrected the issue(s) that led to the termination.

(g) OPM may reinstate the certification of an appraisal system that has been terminated automatically under paragraph (b) of this section upon the agency's compliance with the applicable OPM-mandated corrective action(s).

BILLING CODE 6325-39-P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 946

[Doc. No. AMS-SC-16-0110; SC17-946-1 CR]

Irish Potatoes Grown in Washington; Continuance Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This document directs that a referendum be conducted among eligible Washington potato producers to determine whether they favor continuance of the marketing order regulating the handling of Irish potatoes grown in Washington.

DATES: The referendum will be conducted from June 9 through June 23, 2017. Only current producers that were engaged in the production of fresh potatoes in Washington during the period of July 1, 2015, through June 30, 2016, are eligible to vote in this referendum.

ADDRESSES: Copies of the marketing order may be obtained from the Northwest Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1220 SW 3rd Avenue, Suite 305, Portland, OR 97204; Telephone: (503) 326-2724; from the Office of the Docket Clerk, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250-0237; or on the Internet: <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Teresa Hutchinson or Gary D. Olson, Northwest Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (503) 326-2724, Fax: (503) 326-7440, or Email: Teresa.Hutchinson@ams.usda.gov or GaryD.Olson@ams.usda.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Marketing Order No. 946 (7 CFR part

946), hereinafter referred to as the "order," and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act," it is hereby directed that a referendum be conducted to ascertain whether continuance of the order is favored by producers. The referendum shall be conducted from June 9 through June 23, 2017, among eligible Washington potato producers. Only current producers that were also engaged in the production of fresh potatoes in Washington during the period of July 1, 2015, through June 30, 2016, may participate in the continuance referendum.

USDA has determined that continuance referenda are an effective means for determining whether producers favor the continuation of marketing order programs. USDA would consider termination of the order if less than two-thirds of the producers voting in the referendum and producers of less than two-thirds of the volume of Washington potatoes represented in the referendum favor continuance of their program. In evaluating the merits of continuance versus termination, USDA will not exclusively consider the results of the continuance referendum. USDA will also consider all other relevant information regarding operation of the order and relative benefits and disadvantages to producers, handlers, and consumers to determine whether continuing the order would tend to effectuate the declared policy of the Act.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the ballot materials used in the referendum herein ordered have been submitted to and approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581-0178, Vegetable and Specialty Crops. It has been estimated that it will take an average of 20 minutes for each of the approximately 270 Washington potato producers to cast a ballot. Participation is voluntary. Ballots postmarked after June 23, 2017, will not be included in the vote tabulation.

Teresa Hutchinson and Gary D. Olson of the Northwest Marketing Field Office, Specialty Crops Program, AMS, USDA, are hereby designated as the referendum agents of the Secretary of Agriculture to conduct this referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR part 900.400 *et seq.*).

Ballots will be mailed to all producers of record and may also be obtained from the referendum agents or from their appointees.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2016-8944; Airspace Docket No. 16-AGL-21]

RIN 2120-AA66

Proposed Modification and Establishment of Air Traffic Service (ATS) Routes; Northcentral United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify one jet route and five VHF Omnidirectional Range (VOR) Federal airways, and establish three Area Navigation (RNAV) T-routes in the northcentral United States. The FAA is proposing this action due to the planned decommissioning of the Brainerd, MN (BRD), VHF Omnidirectional Range/Tactical Air Navigation (VORTAC) navigation aid (NAVAID), which provides navigation guidance for portions of the ATS routes proposed to be amended by this action. The T-routes proposed to be established by this action would mitigate potential issues to the National Airspace System (NAS) route structure that may be caused by the proposed ATS route amendments. Overall, this action would enhance the safety and efficient management of aircraft within the NAS.

DATES: Comments must be received on or before March 6, 2017.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590; telephone:

1(800) 647-5527, or (202) 366-9826. You must identify FAA Docket No. FAA-2016-9319 and Airspace Docket No. 16-AGL-21 at the beginning of your comments. You may also submit comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1 (800) 647-5527), is on the ground floor of the building at the above address.

FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call (202) 741-6030, or go to http://www.archives.gov/federal_register/code_offederal-regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the NAS route structure as necessary to

preserve the safe and efficient flow of air traffic within the NAS.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2016-9319 and Airspace Docket No. 16-AGL-21) and be submitted in triplicate to the Docket Management Facility (see "ADDRESSES" section for address and phone number). You may also submit comments through the internet at <http://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2016-9319 and Airspace Docket No. 16-AGL-21." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see "ADDRESSES" section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during

normal business hours at the office of the Operations Support Group, Central Service Center, Federal Aviation Administration, 10101 Hillwood Blvd., Fort Worth, TX, 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

The FAA originally considered decommissioning activities for the Brainerd, MN (BRD), VOR would take place in 2019 as one of the candidate VORs identified for discontinuance by the VOR Minimum Operating Network (VOR MON) program and listed in the Final policy statement notice, "Provision of Navigation Services for the Next Generation Air Transportation System (NextGen) Transition to Performance-Based Navigation (PBN) (Plan for Establishing a VOR Minimum Operational Network)," published in the **Federal Register** of July 26, 2016 (81 FR 48694), Docket No. FAA-2011-1082. However, the lease for the property that the VOR is sited on is expiring in September 2017, and the FAA does not expect the lease to be renewed. As a result, the ATS routes that use the Brainerd, MN, VORTAC must be amended prior to the lease expiring. The affected ATS routes are Jet route J-25 and VOR Federal airways V-55, V-82, V-161, V-218, and V-413.

With the planned decommissioning of the Brainerd, MN, VORTAC, the remaining ground-based NAVAID coverage in the area is insufficient to enable the continuity of the affected airways. As such, proposed modifications to Jet route J-25 and VOR Federal airways V-55, V-82, V-161, V-218, and V-413 will result in gaps in the route structures. To overcome these gaps, the FAA is proposing to establish three new RNAV T-routes: T-330, T-354, and T-383.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to amend Jet route J-25 and VOR Federal airways V-55, V-82, V-161, V-218, and V-413. Additionally, the FAA is also proposing

to establish RNAV T-Routes T-330, T-354, and T-383. The planned decommissioning of the Brainerd VORTAC has made these actions necessary.

The proposed Jet route and VOR Federal airways changes are outlined below.

J-25: J-25 currently extends between the intersection of the United States/Mexico border and the Brownsville, TX (BRO), VORTAC 221° radial and the Winnipeg, MB, Canada (YWG), VORTAC. The FAA proposes to remove the route segment between the Gopher, MN (GEP), VORTAC and the Winnipeg, MB, Canada (YWG), VORTAC. The unaffected portion of the existing route would remain as charted.

V-55: V-55 currently extends between the Dayton, OH (DQN), VOR and the Bismarck, ND (BIS) VOR. The FAA proposes to remove the airway segment between the Siren, WI (RZN), VOR and the Park Rapids, MN (PKD), VOR. The unaffected portions of the existing airway would remain as charted in the two remaining segments.

V-82: V-82 currently extends between the Baudette, MN (BDE), VOR and the Dells, WI (DLL), VORTAC. The FAA proposes to remove the airway segment between the intersection of the Baudette, MN (BDE), VOR 194° and Brainerd, MN (BRD), VORTAC 331° radials (the BLUOX fix) and the Gopher, MN (GEP), VORTAC. Additionally, the BLUOX fix would be redefined in its existing location using radials from the Baudette, MN (BDE), VOR and the Park Rapids, MN (PKD) VOR. The unaffected portions of the existing airway would remain as charted in the two remaining segments.

V-161: V-161 currently extends between the Three Rivers, TX (ECA), VOR and the Winnipeg, MB, Canada (YWG), VORTAC. The FAA proposes to remove the airway segment between the Gopher, MN (GEP), VORTAC and the Grand Rapids, MN (GPZ), VOR. Additionally, the airway segment between the Grand Rapids, MN (GPZ), VOR and the International Falls, MN (INL), VORTAC would be re-designated as part of V-218. The unaffected portions of the existing airway would remain as charted in the two remaining segments.

V-218: V-218 currently extends between the Grand Rapids, MN (GPZ), VOR and the Lansing, MI (LAN), VORTAC. The FAA proposes to add the V-161 airway segment between the Grand Rapids, MN (GPZ), VOR and the International Falls, MN (INL), VORTAC to V-218. The existing V-218 airway will remain as charted with the addition of the airway segment from the

International Falls, MN (INL), VORTAC to the Grand Rapids, MN (GPZ), VOR included so the airway segments remain listed in a west to east order.

V-413: V-413 currently extends between the Ironwood, MI (IWD), VORTAC and Brainerd, MN (BRD), VORTAC. The FAA proposes to remove the airway segment between the Gopher, MN (GEP), VORTAC and the Brainerd, MN (BRD), VORTAC. The unaffected portion of the existing airway will remain as charted. Additionally, the airway description for the amended airway would be reversed to reflect from the Gopher, MN (GEP), VORTAC to the Ironwood, MI (IWD), VORTAC to list the airway segments in a south to north order consistent with odd numbered ATS route criteria.

The proposed RNAV T-routes to be established are outlined below.

T-330: T-330 would be established from the Grand Forks, MN (GFK), VOR to the Gopher, MN (GEP), VORTAC. This new RNAV T-route would extend over two existing fixes (WATAM, MN, and DAYLE, MN) and three new waypoints (BYZIN, ND; TAMMR, MN; and MAFLN, MN) being established. This T-route would mitigate the loss of portions of V-55 and V-413 airway segments as proposed and would provide RNAV T-route capability and connectivity with a more direct routing between the Grand Forks, ND, and Minneapolis, MN, terminal areas.

T-354: T-354 would be established from the Park Rapids, MN (PKD), VOR to the Siren, WI (RZN), VOR. This new RNAV T-route would extend over a new waypoint (named BRNRD) that is being established over the existing location of the Brainerd, MN (BRD), VORTAC. This T-route would mitigate the loss of the V-55 airway segment proposed to be removed.

T-383: T-383 would be established from the Gopher, MN (GEP), VORTAC to the BLUOX, MN, fix that would be redefined in its existing location using radials from the Baudette, MN (BDE), VOR and the Park Rapids, MN (PKD), VOR. This new RNAV T-route would also extend over the new waypoint (BRNRD) that is being established over the existing location of the Brainerd, MN (BRD), VORTAC. This T-route would mitigate the loss of the V-82 and V-413 airway segments proposed to be removed.

All radials in the route descriptions below that do not reflect True (T)/Magnetic (M) degree radial information are unchanged and stated in True degrees.

Jet routes are published in paragraph 2004, VOR Federal airways are published in paragraph 6010(a), and

United States Area Navigation Routes (low altitude T-routes) are published in paragraph 6011, of FAA Order 7400.11A dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Jet routes, VOR Federal airways, and RNAV T-routes listed in this document would be subsequently published in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016 and

effective September 15, 2016, is amended as follows:

Paragraph 2004 Jet Routes.

BILLING CODE 4910-13-P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 1 and 23

RIN 3038-AE36

Recordkeeping

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commodity Futures Trading Commission (the "Commission") is proposing to amend the recordkeeping obligations set forth in certain provisions of the Commission's regulations. The proposed amendments would permit recordkeepers to leverage advances in information technology as a means to reduce costs associated with the retention and production of paper and electronic records and to decrease the risks of cybersecurity threats, while maintaining necessary safeguards to ensure the integrity, availability, and accessibility of records required to be kept pursuant to the Commodity Exchange Act (the "CEA") or Commission regulations. In addition to providing recordkeepers with greater flexibility regarding the retention and

production of regulatory records, the proposed amendments would remove the requirements for electronic records to be kept in their native file format and for recordkeepers to enter into an arrangement with a third-party technical consultant with respect to electronically stored information.

DATES: Comments must be received on or before March 20, 2017.

ADDRESSES: You may submit comments, identified by RIN 3038-AE36, by any of the following methods:

- *CFTC Web site:* <https://comments.cftc.gov>. Follow the instructions for submitting comments through the Comments Online process on the Web site.

- *Mail:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading

Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

- *Hand Delivery/Courier*: Same as Mail, above.
- *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the instructions for submitting comments. Please submit your comments using only one method.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to www.cftc.gov. You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act ("FOIA"), a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission's regulations.¹

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from www.cftc.gov that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the rulemaking will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the FOIA.

FOR FURTHER INFORMATION CONTACT:

Flaherty, Director, (202) 418-5326, eflaherty@cftc.gov; Frank Fisanich, Chief Counsel, (202) 418-5949, ffisanich@cftc.gov; Andrew Chapin, Associate Chief Counsel, (202) 418-5465, achapin@cftc.gov; Katherine Driscoll, Associate Chief Counsel, (202) 418-5544, kdriscoll@cftc.gov; C. Barry McCarty, Special Counsel, (202) 418-6627, cmccarty@cftc.gov; or Jacob Chachkin, Special Counsel, (202) 418-5496, jchachkin@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

A. Regulation 1.31 Recordkeeping Requirements

Commission regulation 1.31 sets forth recordkeeping requirements for all books and records required to be kept by the CEA and Commission regulations,

and implements the Commission's inspection and examination authority over such records.² Examination of books and records is one of the Commission's principal means of determining compliance with the CEA and Commission regulations.³

Paragraph (a) of § 1.31 describes the general requirement that books and records must be kept for five years and be readily accessible during the first two years. Different retention periods apply to certain oral communications and records of any swap or related cash or forward transaction. Paragraph (a) also provides that paper records shall be kept in their original form and electronic records in the format in which they were originally created (referred to as "native file format"), and defines the inspection and production rights of representatives of the Commission and the Department of Justice. In particular, § 1.31(a)(2) requires that production shall be made in a form specified by any representative of the Commission upon the representative's request.

Paragraph (b) of § 1.31 allows books and records to be stored on electronic storage or micrographic media, such as microfiche, provided that the recordkeeper complies with various technical requirements designed to ensure the integrity, availability, and accessibility of the electronically stored information. For example, this paragraph provides that any digital storage or medium or system must preserve the records exclusively in a non-rewritable, non-erasable format, known more commonly as the "write once, read-many," or "WORM" requirement. In addition, paragraph (b) requires a recordkeeper utilizing electronic storage media to develop and maintain an audit system to provide accountability over both the initial entry and the entry of each change to any original or duplicate record. Further, any person who uses only electronic storage media to preserve some or all of its required records shall enter into an arrangement with a third-party technical consultant ("Technical Consultant") capable of furnishing to the Commission or its representative any information stored electronically promptly upon request.

Paragraph (c) of § 1.31 requires recordkeepers to provide notice and a representation to the Commission prior to the initial use of an electronic storage

system that the electronic storage system satisfies the requirements set forth in § 1.31(b). Lastly, paragraph (d) of § 1.31 requires certain paper records, such as trading cards and documents with written trading information, to be maintained in hard-copy for the applicable retention period.

The Commission recognizes that the most recent substantive amendments to § 1.31 were made in 2012⁴ and, prior to that, in 1999.⁵ The 2012 Amendment clarified the retention period for records of oral communications leading to the execution of any swap or related cash or forward transaction for swap dealers and major swap participants, and to require that electronic records be retained in their native file format. The 1999 Amendment implemented all of the technical provisions regarding the use of electronic storage media in § 1.31(b) and (c), including the requirement to retain a Technical Consultant.

B. Petitions for Rulemaking

The Commission has received petitions for rulemaking from various industry groups requesting that the Commission amend § 1.31.⁶ Generally, the Petitioners state that certain requirements set forth in § 1.31 that were reasonable and prudent when adopted have become outdated and irrelevant. Absent any change, the Petitioners stated that recordkeepers must choose between accepted electronic distributed storage systems, which are essential for disaster recovery and privacy protection, and compliance with the letter of the law.

Specifically, the Petitioners have requested the following changes to § 1.31:

1. Amend § 1.31(a) to no longer require electronic records to be kept in their native file format;
2. Amend § 1.31(b) to eliminate the WORM requirement for electronic records; and

⁴ Adaptation of Regulations to Incorporate Swaps, 77 FR 66288 (Nov. 2, 2012) (the "2012 Amendment").

⁵ Recordkeeping, 64 FR 28735 (May 27, 1999) (the "1999 Amendment").

⁶ Petition for Rulemaking to Amend 1.31, 4.7(b) and (c), 4.23 and 4.33, Managed Funds Association, Investment Adviser Association, and Alternative Investment Management Association, dated July 21, 2014, and Petition for Rulemaking to Amend CFTC Regulations 4.12(c)(3), 4.23 and 4.33 Investment Company Institute, dated March 11, 2014 (collectively, the "Petitioners"). Regulations 4.23 and 4.33 set forth the recordkeeping requirements for commodity pool operators ("CPOs") and commodity trading advisors ("CTAs"), respectively. These regulations require CPOs and CTAs to keep certain books and records in accordance with § 1.31.

¹ 17 CFR 145.9. Commission regulations referred to herein are found at 17 CFR chapter I.

² Proposed Rule Requiring that Records Subject to Inspection, and Copies Thereof, Be Provided to the Commission, 43 FR 50699 (Oct. 31, 1978).

³ General Regulations; Inspection of Books and Records, 46 FR 21-01 (Jan. 2, 1981).

3. Amend § 1.31(b) to eliminate the requirement to enter into an agreement with a Technical Consultant.

With respect to native file format, the Petitioners note that programs used to store records electronically routinely become outdated and obsolete, and/or are no longer supported by information technology manufacturers. As a result, as represented by the Petitioners, recordkeepers must bear the burden of retaining these electronic records while updating to other, advanced systems for newly created records. Accordingly, the Petitioners request that the Commission amend § 1.31 in a manner that does not specify the format of any particular electronic record, so long as there is demonstrable and auditable integrity and fidelity in the preservation of the underlying data and contents.

With respect to the WORM requirement, the Petitioners assert that it is based on a concept that was state of the art nearly twenty years ago. Records are no longer stored electronically on optical disks or CD-ROMs. Currently, state of the art information technology relies on storage subject to restricted access and includes storage logs that reflect every single change to a file, in addition to archived copies. Absent any change, the Petitioners state that recordkeepers will be required to maintain dual systems that preserve the WORM requirement but also permit them to more properly secure and manage electronic records. Accordingly, the Petitioners request that the Commission amend § 1.31 to remove the WORM requirement.

With respect to the Technical Consultant, the Petitioners state that the need to retain and train a third-party to serve as a surrogate for access and production to electronic records is no longer necessary given the in-house technical expertise regarding information technology throughout the industry. In addition to the increased costs associated with retaining a Technical Consultant, the Petitioners also note that providing additional third parties with access to sensitive, confidential, and proprietary information greatly increases the risk of cybersecurity intrusions. Accordingly, the Petitioners request that the Commission amend § 1.31 to remove the requirement to retain a Technical Consultant.

In support of their request, Petitioners note that the Securities and Exchange Commission (“SEC”) adopted a recordkeeping rule for investment companies and investment advisers consistent with the changes they

propose.⁷ Rule 204–2(g) under the Investment Advisers Act of 1940 sets forth general principles that investment advisers must follow when arranging, accessing and reproducing their records. Similar provisions apply to the operators of investment companies pursuant to Rule 31a–2. In particular, Rule 204–2(g) does not tether advisers to any particular format, *i.e.*, native file format, nor does it require the use of Technical Consultants. The Petitioners note that in the 1999 Amendment the Commission expressly stated its intent to track existing recordkeeping provisions similar to those adopted by the SEC,⁸ and that, more recently in 2013, the Commission acknowledged that there are certain advantages to crafting regulations that “allow the Commission to fulfill its regulatory mandate while, at the same time, avoiding unnecessary regulatory burdens on dually-regulated [entities] with respect to . . . Commission recordkeeping requirements.”⁹ Accordingly, the Petitioners request that the Commission amend § 1.31 in a manner consistent with SEC Rule 204–2(g).

II. The Proposal

The Commission noted in the 1999 Amendment the importance of conducting an ongoing review of the standards articulated in the recordkeeping regulation to ensure that the requirements reflect to the extent possible the reality of established technological innovation.¹⁰ At the same time, the Commission recognized the value of consultation with the derivatives industry and its participants to determine how to best use available information technology that also is responsive to the Commission’s legitimate need to have access to complete and accurate records when necessary.¹¹

As the Petitioners highlighted, the Commission recognizes that recordkeeping has evolved significantly in the time since the last major revision to § 1.31 in 1999 from a paper-based system to electronically stored

information systems that leverage computers, databases, and even cloud computing. Back then, most records were created and maintained on paper, but recordkeepers began to explore better ways to store information electronically. Now the paradigm has shifted, and most information is produced and stored electronically on complex systems tailored to the needs of a given recordkeeper. These advances in information technology may have rendered certain technical elements of § 1.31 obsolete or outdated.

Accordingly, the Commission proposes to amend § 1.31 to reorganize and update the existing recordkeeping regulation, eliminating certain outdated provisions while still maintaining the ability of the Commission to examine and inspect required records. The Proposal is intended to be technology neutral so as technology develops the regulation should withstand such changes. The updates include new definitions, deletion of outdated terms, and revision of certain provisions to reflect advances in information technology. The Commission notes that many of the existing provisions and principles in § 1.31 have been retained, albeit in a revised format. The proposed regulation is divided into five subsections: (a) Definitions; (b) regulatory records policies and procedures; (c) duration of retention; (d) form and manner of retention; and (e) inspection and production of regulatory records.

A. Regulation 1.31(a): Definitions

The Commission proposes to reorganize § 1.31 by revising paragraph (a) to define certain terms to be referenced elsewhere within the revised regulation. Specifically, the Commission proposes to define the terms “electronic regulatory records”, “records entity”, and “regulatory records”. The Commission believes that defining these terms will provide greater clarity regarding the recordkeeping obligations applicable to all persons subject to § 1.31, particularly for those obligations related to electronic records.

For the ease of understanding and applying the proposed amendments to § 1.31, the Commission proposes to define “records entity” to mean “any person required by the Act or Commission regulations to keep regulatory records.” The Commission notes that numerous Commission regulations set forth particular requirements for CEA Section 1a(40) “registered entities”—such as derivatives clearing organizations, designated contract markets, swap execution facilities, and swap data

⁷ See Electronic Recordkeeping by Investment Companies and Investment Advisers, 66 FR 29224 (May 30, 2001). Given that intermediaries may engage in both securities and derivatives transactions, operators of investment companies may be required to register with the Commission as CPOs, and investment advisers similarly may be required to register as CTAs.

⁸ 64 FR at 28735.

⁹ See Harmonization of Compliance Obligations for Registered Investment Companies Required to Register as Commodity Pool Operators, 78 FR 52308 at 52309 (Aug. 22, 2013).

¹⁰ 64 FR at 28736.

¹¹ *Id.*

repositories—and for registrants—such as futures commission merchants, introducing brokers, CPOs, CTAs, floor brokers, floor traders, retail foreign exchange dealers, swap dealers, and major swap participants—to keep certain books and records in accordance with § 1.31. The Commission notes, however, that certain persons that are neither a registered entity nor a registrant may be required to keep certain books and records in accordance with § 1.31, as well.¹²

The Commission also proposes to replace existing references to “books and records” within § 1.31 with the term “regulatory records” and to differentiate between electronic and paper regulatory records. The Commission proposes to define “regulatory records” to mean “all books and records required to be kept by the Act or Commission regulations.” As a subset, the Commission proposes to define within § 1.31(a) “electronic regulatory records” to mean “all regulatory records other than paper regulatory records exclusively created and maintained by a records entity on paper.” The Commission has separately proposed Regulation Automated Trading and certain requirements regarding source code and manner of production of source code.¹³ This proposal does not address source code or the production of source code.

The Commission recognizes that certain regulatory records are not created electronically and that certain records entities may elect not to convert any paper regulatory records into an electronic format. By differentiating between paper and electronic regulatory records, the Commission can better preserve existing recordkeeping obligations applicable solely to records entities that do not create anything other than paper regulatory records.¹⁴

The Commission also believes that the term “books and records” in the traditional sense may no longer adequately convey that § 1.31 recordkeeping obligations extend to all associated electronic data. However, contrary to prior revisions to § 1.31

where the Commission specifically delineated the types of allowable media for electronic records storage,¹⁵ the Commission believes it is now appropriate to focus the recordkeeping obligations on the scope of required records, rather than a specific storage medium. Accordingly, the Commission proposes to further define the term “regulatory records” by adding the following descriptive language to include: Any record of any correction or other amendment to such books and records, provided that, with respect to such books and records stored electronically, regulatory records shall also include: (i) All data produced and stored electronically that describes, directly or indirectly, the characteristics of such books and records, including, without limitation, data that describes how, when, and, if relevant, by whom such electronically stored information was collected, created, accessed, modified, or formatted; and (ii) any data necessary to access, search, or display any such books and records.

The proposed language would more clearly state the existing requirement to maintain all prior versions of any regulatory record, no matter how modified. This is not a new recordkeeping obligation. Since 1993 the Commission has required electronic records to be created and maintained in a non-erasable, non-rewritable format for the retention period.¹⁶ Because the existing regulation requires electronic records be preserved exclusively in a non-rewritable, non-erasable format, it follows that each version of an electronic record must be created and maintained in a non-erasable, non-rewritable format. Therefore, the Commission is confirming that both the initial record and all subsequent versions are records within the definition and must be created, maintained, accessible, and produced consistent with the regulation.¹⁷

The proposed language also would clarify that electronically stored regulatory records are not limited to the data within a particular database or application, for example, but includes

the electronic information that identifies the manner in which any regulatory record is altered. The Commission understands that this information is more commonly known as “metadata,” and, at its core, is data about data. Regardless of the label, the Commission understands that metadata generally refers to any hidden text, formatting codes, formulae, history, tracking, and other information associated with an electronic file or data. Metadata is integral to the Commission’s ability to carry out both the inspection and investigation functions it is charged with under the CEA. To fully understand the data within a database, for example, requires knowledge of data relationships, what the information represents, and how it was generated. Once properly assembled and formatted in the form of a report, data within a database is readily understandable.

The Commission does not find it necessary at this time to define specific, technical terms related to information technology and electronically stored information, such as metadata or databases, as these technical terms may change over time. The Commission believes these are terms generally understood by practitioners notwithstanding a lack of a universal agreement on exact definitions.

The Commission notes that the requirement to provide data about data is not new. As set forth in current § 1.31(a)(2), production of any books and records shall be made “in a form specified by any representative of the Commission.” For the purpose of facilitating production requests pursuant § 1.31(a)(2), the Commission’s Division of Enforcement has developed and continually updates a document entitled “CFTC Data Delivery Standards.”¹⁸ Such standards describe the technical requirements for electronic document production to the Commission and specifically provides for the production of metadata associated with electronic records.

Finally, the Commission further proposes not to retain within the definition section certain definitions in the existing regulation, such as “native

¹² For example, Part 18 of the Commission’s regulations requires every trader who owns, holds or controls a reportable futures or option to “keep books and records showing all details concerning all positions and transactions in the commodity swap. . . .” 17 CFR 18.05. Traders are not limited to any Commission registrant or registered entity.

¹³ See Supplemental notice of proposed rulemaking, Regulation Automated Trading, 81 FR 85334 (Nov. 25, 2016).

¹⁴ Records entities who are currently in compliance with current § 1.31 will continue to be in compliance with proposed § 1.31, provided that they have written policies and procedures that meet the requirements of the Proposal.

¹⁵ See 36 FR 22286 (Nov. 24, 1971) (permitted the use of microfilm as a medium for maintaining certain records); 58 FR 27458 (May 10, 1993) (permitted the use of optical disk and CD-ROM); 64 FR 28735 (May 27, 1999) (permitted the use of other micrographic and electronic storage media).

¹⁶ See § 1.31(b)(1)(iii)(A).

¹⁷ Each version of a record must be retained for the applicable retention period which is based off the most recent version. For example, the initial record is created on Day 1 and the amended record is created on Year 4, Day 359. The amended record resets the retention period clock to Day 1 for both the initial record and amended record to ensure a comprehensive audit trail.

¹⁸ The Commission publishes the CFTC Data Delivery Standards on its Web site at: <http://www.cftc.gov/idc/groups/public/@lrenforcementactions/documents/file/enfdatadeliverystandards052716.pdf>. The Commission notes that other federal agencies, such as the SEC (<https://www.sec.gov/divisions/enforce/datadeliverystandards.pdf>), the Department of Justice (<https://www.justice.gov/atr/case-document/file/494686/download>) and the Department of Treasury Office of Foreign Asset Control (https://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/Documents/ofac_data_delivery.pdf) have similar data delivery standards.

file format”, “micrographic media” and “electronic storage media.” The Commission believes that the proposed revisions to § 1.31, described in greater detail below, obviate the need to retain these defined terms.

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed definitions in § 1.31(a). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses. Regarding the proposed definitions, the Commission specifically requests comment on the following questions:

- Should any of the proposed definitions be revised? If yes, please provide alternative suggestions.
- Should any of the proposed definitions be deleted?
- Should any previous definitions proposed for deletion, *e.g.*, “micrographic media,” be included in the revised regulation?
- Should other definitions be added, such as “metadata”, or “database”, or “paper regulatory records”?

B. Regulation 1.31(b): Regulatory Records Policies and Procedures

The Commission proposes to revise and re-state in new § 1.31(b) ongoing compliance obligations regarding written regulatory records policies and procedures currently set forth in § 1.31(b)(3). Specifically, the Commission proposes in revised § 1.31(b) to require all records entities to establish, maintain, and implement written policies and procedures reasonably designed to ensure that the records entity complies with its obligations under § 1.31, including without limitation, appropriate training of officers and personnel of the records entity regarding their responsibility for ensuring compliance with the obligations of the records entity under this section, and regular monitoring for such compliance.¹⁹

The Commission believes that the proposed obligations regarding written policies and procedures are generally consistent with the existing regulation and accepted industry practices. Currently, § 1.31(b)(3) requires anyone using electronic storage media to develop and maintain written operational procedures and controls (an “audit system”) designed to provide

accountability over both the initial entry of required records to the electronic storage media and the entry of each change made to any original or duplicate record maintained on the electronic storage media. Moreover, the written operational procedures and controls must be made available for examination at all times by any representative of the Commission.

With respect to training, the Commission does not find it necessary to prescribe specific requirements regarding the frequency and format of any training. Consistent with its approach towards mandatory ethics training for registrants, the Commission views the training on written policies and procedures as an ongoing responsibility rather than an episodic one.²⁰ The obligation to remain current on the legal requirements regarding compliance with § 1.31 is one that a records entity ignores at its peril. The Commission takes a similar view towards the proposed obligation for each records entity to monitor compliance with the entity’s policies and procedures on a “regular” basis.

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed obligations regarding regulatory records policies and procedures in proposed § 1.31(b). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses. Regarding the written policies and procedures requirements, the Commission specifically requests comment on the following questions:

- Should the training requirement be scaled down, phased-in, or eliminated depending on the number of employees, or depending on the nature of the entity’s business?

C. Regulation 1.31(c): Duration of Retention

The Commission proposes to re-state and clarify in revised § 1.31(c) the existing retention period requirements for categories of regulatory records currently set forth in § 1.31(a). Specifically, proposed § 1.31(c)(1) would state that a records entity shall keep regulatory records of any swap or related cash or forward transaction (as defined in § 23.200(i)), other than regulatory records of oral

communications, from the date the regulatory record was created until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction and for a period of not less than five years after such date. The Commission proposes to incorporate by reference the definition of the term “related cash or forward transaction” in § 23.200(i).

Similarly, proposed § 1.31(c)(2) would state that a records entity that is required to retain oral communications shall keep regulatory records of such oral communications for a period of not less than one year from the date of such communication. This is consistent with the existing standard. The Commission proposes, however, to eliminate references to §§ 1.35(a) and 23.202(a)(1) and (b)(1) with respect to “oral communications” as future changes to those regulations, or the promulgation of new types of oral communications requirements, would require the Commission to contemporaneously amend § 1.31. Based on the foregoing proposed amendments, the Commission believes that the existing provision in § 23.203(b)(2) regarding the retention period of swaps-related information for swap dealers and major swap participants is redundant and therefore should be repealed. For all other regulatory records not addressed in proposed § 1.31(c)(1) and (2), proposed § 1.31(c)(3) would require a records entity to keep such records for a period of not less than five years from the date on which such record was created. However, proposed § 1.31(c)(4) would retain the existing retention period for regulatory records exclusively created and maintained on paper, *i.e.*, records must be readily accessible for no less than two years. This standard is consistent with the SEC’s standard applicable to investment advisers and operators of investment companies.²¹ Consistent with this change, the Commission proposes to remove the duplicative language from § 23.203(b)(1).

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed retention periods in § 1.31(c). The Commission encourages all comments including background information, actual market

¹⁹ SEC Rule 204–2(a)(17) requires each investment adviser to maintain as part of its recordkeeping obligations, among other things, a copy of the adviser’s policies and procedures, and any records documenting the adviser’s annual review of those policies and procedures.

²⁰ 66 FR 53510 (Oct. 23, 2001) (“Rules Relating to Intermediaries of Commodity Interest Transactions”). With respect to mandatory ethics training, the Commission replaced prescriptive requirements set forth in § 3.34 with a Statement of Acceptable Practices.

²¹ SEC Rule 204–2(e) states that all books and records shall be maintained and preserved in an easily accessible place for a period of not less than five years from the end of the fiscal year during which the last entry was made on such record, the first two years in an appropriate office of the investment adviser. SEC Rule 31a–2 similarly requires the operator of an investment company to retain records for a minimum of six years the first two years in an easily accessible place.

examples, best practice principles, and estimates of any asserted costs and expenses. Regarding the proposed retention periods, the Commission specifically requests comment on the following questions:

- Are the proposed recordkeeping retention periods appropriate? If not, what modifications to the retention periods should be made?
- Given the advances in information technology, such as cloud storage, should the Commission extend the standard five year retention period?
- Is there a longer or shorter period of retention that would be appropriate for some records, and if so please specify which records and such time-frames?

D. Regulation 1.31(d): Form and Manner of Retention

The Commission proposes to revise § 1.31(d) to describe recordkeeping requirements regarding the form and manner in which regulatory records are retained by records entities. These proposed revisions are designed to ensure the integrity and availability of all regulatory records. The Commission is cognizant that other provisions of the Act and Commission regulations distinguish between different classes of records entities. In particular, the Commission recognizes that records entities that are not registered or required to be registered with the Commission in any capacity, nor are one of the enumerated “registered entities” defined in Section 1a(40) of the CEA or so required to be registered or designated,²² currently are not required to comply with the full panoply of recordkeeping requirements.²³ It is the Commission’s goal to preserve this distinction, especially in those cases

where a records entity exclusively maintains paper regulatory records.

The Commission proposes to re-state and revise in new § 1.31(d) certain requirements for regulatory records currently set forth in § 1.31(b)(1) through (3). In doing so, the Commission proposes to adopt a general standard in § 1.31(d)(1) to require each records entity to retain all regulatory records in a form and manner necessary to ensure the records’ and recordkeeping systems’ authenticity and reliability. This general requirement would not distinguish between paper and non-paper regulatory records.

With respect to electronic regulatory records, the Commission proposes to set forth in new § 1.31(d)(2)(i) through (iii) additional controls for records entities retaining electronic regulatory records. In particular, each records entity would be required to:

- (A) Have systems that maintain security, signature, chain of custody elements, and data as necessary to ensure the authenticity of the information contained in regulatory records and to monitor compliance with the Act and Commission regulations;
- (B) Have systems that ensure the records entity is able to produce regulatory records in accordance with this section, and ensure the availability of regulatory records in the event of an emergency or other disruption of the records entity’s record retention systems; and
- (C) Create and maintain an up-to-date inventory that identifies and describes each system that maintains information necessary for accessing or producing regulatory records.

The Commission believes that these requirements are not new and are consistent with certain SEC requirements.²⁴ Currently, § 1.31(b)(1)(ii)(B) mandates that electronic storage media verifies automatically the quality and accuracy of the storage media recording process. Existing rules require any records entity that utilizes electronic storage media to organize and maintain an accurate index of all information such that the location of any record may be immediately ascertained. Among other requirements, existing § 1.31(b)(3) requires any records

entity that utilizes electronic storage media to keep current a copy of the physical and logical format of the electronic storage media, the file format of all different information types maintained, documentation and information necessary to access records and indexes maintained on the electronic media.

Finally, based on the foregoing proposed amendments, the Commission believes that the existing provision in § 1.35(a)(5)(i) regarding the form and manner in which records of commodity interest and cash forward transactions should be maintained is redundant and therefore should be repealed.

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed standards for form and manner of retention of regulatory records in § 1.31(d). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses. With respect to the authenticity and reliability of regulatory records and recordkeeping systems, the Commission specifically requests comment on the following questions:

- Should the Commission routinely publish guidelines regarding the technical standards for electronic regulatory records?

With respect to potential impacts of the Proposal, the Commission specifically requests comment on the following questions:

- Would the Proposal require market participants to change their existing recordkeeping procedures under the Proposal? What, if any, transition or ongoing costs would result from such changes? Please provide details and estimates regarding any asserted costs.
- For entities who maintain digitized copies of paper records, what costs or other impacts would result under the Proposal?

E. Regulation 1.31(e): Inspection and Production of Regulatory Records

1. Inspection

The Commission proposes to re-state in revised § 1.31(e)(1) the right of inspection of the Commission and the United States Department of Justice (“DOJ”) in existing § 1.31(a)(1). Specifically, the Commission proposes § 1.31(e)(1) to state that all regulatory records shall be open to inspection by any representative of the Commission or the DOJ. The Commission previously determined that production of records is part of the Commission’s inspection

²² Section 1a(40) of the Act defines a “registered entity” to mean: (a) A board of trade designated as a contract market under section 5; (b) a derivatives clearing organization registered under section 5b; (c) a board of trade designated as a contract market under section 5f; (d) a swap execution facility registered under section 5h; (e) a swap data repository registered under section 21; and (f) with respect to a contract that the Commission determines is a significant price discovery contract, any electronic trading facility on which the contract is executed or traded.

²³ For example, part 20 of the Commission’s regulations sets forth requirements regarding large trader reporting for physical commodity swaps. Regulation 20.1 defines a “reporting entity” to mean a clearing member of a clearing organization or a swap dealer in one or more paired swaps or swaptions. Pursuant to § 20.6, only clearing organizations and reporting entities must keep all books and records in accordance with § 1.31. Any other person who exceeds the reportable level in any contract “shall keep books and records . . . in the record retention format that such person has developed in the normal course of its business operations.” All books and records kept pursuant to § 20.6, however, shall be furnished upon request to any Commission representative.

²⁴ With respect to electronic storage media, SEC Rule 204–2(g)(3) requires investment advisers to establish written procedures that: (1) Maintain and preserve the records, so as to reasonably safeguard them from loss, alteration, or destruction; (2) limit access to the records to properly authorized personnel and the SEC; and (3) reasonably ensure that any reproduction of a non-electronic original record on electronic storage media is complete, true, and legible when retrieved. SEC Rule 31a–2(f) sets forth similar requirements for the operators of investment companies.

powers.²⁵ Accordingly, the Commission has determined to limit reference to the DOJ in § 1.31 to a single reference in this paragraph. Any requirement for a records entity to produce regulatory records extends to DOJ as is currently the requirement.

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed regulations set forth in § 1.31(e)(1). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses.

2. Production

The Commission proposes to revise and re-state in new § 1.31(e)(2) the existing production requirement currently set forth in § 1.31(a)(2) and (b). Currently, a records entity is required to produce regulatory records in a form specified by any representative of the Commission, including the DOJ, upon the representative's request. If the requested book or record is stored either on micrographic media or electronic storage media, production shall be immediate.²⁶ Otherwise, all copies or originals shall be provided promptly.²⁷ The Commission proposes to amend this requirement in new § 1.31(e)(i) and (ii) to differentiate between the production of paper and electronic regulatory records, particularly with respect to the form and medium of requested electronic regulatory records.

With respect to the production of regulatory records exclusively created and maintained on paper, proposed § 1.31(e)(2) would require a records entity to produce such regulatory records promptly upon request. With respect to regulatory records other than paper regulatory records, proposed § 1.31(e)(3) would set forth the process by which a records entity must respond to a request from a Commission representative. In particular, § 1.31(e)(3)(i) would require a Commission representative to specify a reasonable form and medium in which a records entity must produce such regulatory records. Proposed

§ 1.31(e)(3)(ii) would require a records entity, at its own expense, to produce such regulatory records in the form and medium requested promptly, upon request, unless otherwise directed by the Commission representative.

The Commission recognizes that production, depending on the records, may require the records entity to engage multiple employees, officers, or directors in order to satisfy the production request, depending upon its size and scope. Historically, Commission staff has exercised broad discretion regarding production schedules and "typically exhibits flexibility. . . ." ²⁸ However, timely production is a Commission priority and the proposed "prompt" standard should not be interpreted as sanctioning any unnecessary delay. It is the Commission's understanding that most registrants maintain records electronically and therefore would be required under existing § 1.31 to produce said records immediately, subject to the discretion of Commission staff. The prompt production standard is therefore consistent with the existing standard. The Commission notes that the standard "promptly upon request" is also consistent with SEC Rule 17a-4 applicable to broker-dealers thereby maintaining a harmonized standard for entities that may be dually registered with the SEC and the CFTC.²⁹

In adopting this revised regulation, the Commission is cognizant of the need to balance the opportunities for recordkeepers to reduce costs and improve efficiencies regarding recordkeeping systems with the Commission's need for prompt access to complete and accurate records in a format that the Commission can process, *i.e.*, a useable format.³⁰ For the purposes of production, the Commission continues to believe that it is not sufficient to simply reduce electronic records to a paper format, *i.e.*, printing out data from a database and saving into a portable document file, or PDF. This type of production detracts from the Commission's ability to properly evaluate the integrity of the electronic records by accessing the associated metadata, for example. Based upon these principles, the Commission proposes to revise § 1.31 to permit a records entity that cannot promptly produce electronic regulatory records in

the form and medium requested by the Commission the opportunity to produce records in an alternative manner sufficient for the Commission to adequately inspect the records. The ultimate goal is not necessarily to obtain records in their "native file format," but rather in the most useable form and medium.

Finally, the Commission further proposes to adopt new § 1.31(e)(4) to preserve the existing right of a records entity to provide a representative of the Commission with an original regulatory record for reproduction by the representative in lieu of a copy currently set forth in § 1.31(a)(2). As with the existing provision, the Commission proposes to require the Commission representative to issue a receipt for the original regulatory record to the records entity upon request.

Request for comment: The Commission requests comment from all interested parties and the general public regarding the proposed inspection and production of regulatory records in § 1.31(e). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses. Regarding the production of regulatory records, the Commission specifically requests comment on the following questions:

- Should the Commission impose a different standard with respect to the production of paper regulatory records or other regulatory records?
- Are there records entities that retain only paper regulatory records?

F. Other Matters

1. § 1.31(b)(4)—Technical Consultant

Consistent with the foregoing amendments and in response to the Petitioners' request, the Commission proposes to amend § 1.31(b)(4)(i) to remove the requirement for a records entity to enter into an arrangement with a Technical Consultant and provide the Technical Consultant with access to and the ability to download information from the records entity's electronic storage media to any acceptable medium. Further, the Commission proposes to remove the requirement set forth in § 1.31(b)(4)(ii) which requires the Technical Consultant to file with the Commission an acceptable undertaking regarding its ability and willingness to provide the Commission and DOJ with access to the information contained on the record entity's electronic storage media. The Commission concurs with the position taken by Petitioners that the information technology expertise within

²⁵ See 46 FR 21 (Jan. 3, 1981); *see also*, CFTC Letter 77-4 (Apr. 14, 1977).

²⁶ See § 1.31(b)(2)(i) and (ii). In addition, persons using electronic storage media must be ready at all times to provide, and immediately provide at the expense of the person required to keep such records, copies of such records on such compatible data processing media as defined in Commission regulation 15.00(d) which any representative of the Commission or the Department of Justice may request. Records must use a format and coding structure specified in the request. *See* § 1.31(b)(3)(i).

²⁷ See § 1.31(a)(2).

²⁸ FIA comment regarding proposed amendments to § 1.31. 64 FR 28735 at 28739 (May 27, 1999).

²⁹ SEC Rule 17a-1 similarly requires national securities exchanges and registered clearing agencies to "promptly furnish" records to any representative of the SEC upon request.

³⁰ See 77 FR at 66298 (referring to the 1999 Amendment).

the derivatives industry obviates the need for the Commission to require those records entities electing to store information electronically to engage a third party to ensure compliance with all applicable electronic recordkeeping obligations. However, to the extent that a records entity chose to use a third party or Technical Consultant, the records entity would remain responsible for compliance with the CEA and Commission regulations thereunder.

2. § 1.31(c)—Representation to the Commission

Consistent with the foregoing amendments and in response to the Petitioners' request, the Commission proposes to amend § 1.31 by removing existing § 1.31(c). This provision requires any person utilizing electronic storage media to provide a written representation to the Commission prior to the use of the system certifying that the system satisfies the requirements in existing paragraph (b)(1)(ii) and, where applicable, if the system will be using storage media other than optical disk or CD-ROM. Further, the written representation must include an affirmation from an individual consistent with § 1.10(d)(4), *i.e.*, the information provided is true and correct to the best knowledge and belief of the affirming individual. The Commission believes that the requirement set forth in proposed § 1.31(c)(2) regarding written policies and procedures for regulatory records obviates the need for any records entity to provide notice to the Commission regarding its compliance with § 1.31. Moreover, the Commission recognizes that references to optical disks and CD-ROM are outdated.

3. § 1.31(d)—Other Paper Regulatory Records

Consistent with the foregoing amendments, the Commission proposes to amend § 1.31 by removing current § 1.31(d). This provision states that certain paper records, such as trading cards and paper copies of electronically filed certified forms, must be retained in hard-copy for the required time period. The Commission believes that revised § 1.31 provides records entities with sufficient flexibility on how to retain regulatory records while maintaining the Commission's ability to access reliable regulatory information. Having eliminated the requirement for a records entity to retain regulatory records in a specific form and manner, the Commission believes that § 1.31(d) no longer serves any regulatory purpose.

Request for comment: The Commission requests comment from all interested parties and the general public

regarding the proposed deletion of existing provisions in § 1.31(b)(4), (c) and (d); and § 1.35(a)(5)(i). The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses.

4. Potential Technical Amendments

In conjunction with the Proposal, the Commission is reviewing its regulations for potential technical amendments related to § 1.31, including those part 4 regulations cited by Petitioners. This review may or may not result in a new proposed rulemaking.

Request for comment: The Commission requests comment from all interested parties and the general public regarding potential technical amendments to Commission regulations related to § 1.31. The Commission specifically requests comment whether the proposed changes to § 1.31 will resolve all outstanding issues regarding compliance with part 4 of the Commission's regulations identified by Petitioners. The Commission encourages all comments including background information, actual market examples, best practice principles, and estimates of any asserted costs and expenses.

III. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA")³¹ requires Federal agencies, in promulgating regulations, to consider whether the rules they propose will have a significant economic impact on a substantial number of small entities and, if so, to provide a regulatory flexibility analysis regarding the economic impact on those entities.

As discussed above, because the Proposal relates to most recordkeeping obligations under the CEA and the Commission's regulations, it may affect the full spectrum of Commission registrants, all persons required to register but not registered with the Commission, and certain persons that are neither registered nor required to register with the Commission. The Commission has previously determined that certain registrants are not small entities for purposes of the RFA and, therefore, the requirements of the RFA do not apply to those entities.³² For

other registrants, however, the Commission has found it appropriate to consider whether such registrants should be deemed small entities for purposes of the RFA on a case-by-case basis, in the context of the particular Commission regulation at issue.³³ As certain persons affected by the Proposal, including Commission registrants, may be small entities for purposes of the RFA, the Commission considered whether this rulemaking would have a significant economic impact on any such persons.

As discussed above, the Proposal generally updates and simplifies existing Commission regulation 1.31 with new provisions that safeguard the same statutory-based principles previously identified by the Commission. It accomplishes this by deleting outdated terms and revising provisions to reflect advances in information technology, allowing records entities to benefit from evolving technological developments while maintaining necessary safeguards to ensure the reliability of the recordkeeping process.

The Commission believes that the proposed rules would impose only limited additional costs on small entities related to the requirement that they establish written recordkeeping policies and procedures. However, this new requirement is replacing existing requirements applicable to such persons in many cases, including the existing similar requirements discussed above to (i) Maintain an audit system and (ii) under certain circumstances, retain a Technical Consultant. Further, as part of the Proposal, the Commission is proposing to remove existing requirements that are expected to lower costs for all records entities, including small entities, by removing requirements that certain records be kept in paper form.

In light of the limited scope of the proposed changes and the added flexibility and expected cost-savings provided to small entities thereby, the Commission does not expect small entities that are records entities to incur

³¹ 5 U.S.C. 601 *et seq.*
³² See, e.g., Policy Statement and Establishment of Definitions of "Small Entities" for Purposes of the Regulatory Flexibility Act, 47 FR 18618 (Apr. 30, 1982) (futures commission merchants and commodity pool operators); Leverage Transactions, 54 FR 41068 (Oct. 5, 1989) (leverage transaction merchants); Regulation of Off-Exchange Retail Foreign Exchange Transactions and Intermediaries, 75 FR 55410, 55416 (Sept. 10, 2010) (retail foreign exchange dealers); and Registration of Swap Dealers and Major Swap Participants, 77 FR 2613, 2620 (Jan. 19, 2012) (swap dealers and major swap participants).

³³ See 47 FR at 18620 (commodity trading advisors and floor brokers); Registration of Floor Traders; Mandatory Ethics Training for Registrants; Suspension of Registrants Charged With Felonies, 58 FR 19575, 19588 (Apr. 15, 1993) (floor traders); and Introducing Brokers and Associated Persons of Introducing Brokers, Commodity Trading Advisors and Commodity Pool Operators; Registration and Other Regulatory Requirements, 48 FR 35248, 35276 (Aug. 3, 1983) (introducing brokers).

new costs, on a net basis, as a result of the Proposal. Consequently, the Commission finds that no significant economic impact on small entities will result from the Proposal.

Accordingly, the Chairman, on behalf of the Commission, hereby certifies pursuant to 5 U.S.C. 605(b) that the Proposal will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

1. Background

The Paperwork Reduction Act of 1995 ("PRA")³⁴ imposes certain requirements on Federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. The Proposal would result in a collection of information within the meaning of the PRA, as discussed below. The Commission therefore is submitting the Proposal to the Office of Management and Budget ("OMB") for review.

The Proposal contains a collection of information for which the Commission has previously received a control number from OMB. The title for this collection of information is "Adaptation of Regulations to Incorporate Swaps-Records of Transactions, OMB control number 3038-0090".³⁵ Collection 3038-0090 is currently in force with its control number having been provided by OMB.

The responses to the Proposal's collection of information are mandatory. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number issued by OMB.

As discussed above, in respect of collections of information, the Proposal would replace the existing audit system requirements with a requirement that records entities establish written recordkeeping policies and procedures. Such changes would result in revisions to collection 3038-0090. Therefore, the Commission proposes to revise collection 3038-0090 as described below.

2. Modification of Collection 3038-0090—Recordkeeping Policies and Procedures

The Commission estimates that the Proposal will require approximately 15,000 persons to develop and maintain

recordkeeping policies and procedures. This estimate includes approximately 8,792 registrants, 15 designated contract markets, 23 swap execution facilities, 4 swap data repositories, 15 designated clearing organizations, and 3,200 unregistered members of designated contract markets or swap execution facilities, with the balance reflecting the Commission's estimate of those persons that are required to register with the Commission, but have not so registered, and other persons neither registered nor required to register with the Commission.³⁶

Based on the above, the estimated additional hour burden for recordkeeping policies and procedures of 150,000 hours is calculated as follows:

Number of affected persons: 15,000.
Frequency of collection: Annually.
Estimated annual responses per registrant: 1.

Estimated aggregate number of annual responses: 15,000.

Estimated annual hour burden per registrant: 10.³⁷

Estimated aggregate annual hour burden: 150,000 (15,000 registrants × 10 hours per registrant).³⁸

3. Information Collection Comments

The Commission invites the public and other Federal agencies to comment on any aspect of the proposed information collection requirements discussed above. Pursuant to 44 U.S.C. 3506(c)(2)(B), the Commission solicits comments in order to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) evaluate the accuracy of the Commission's estimate of the burden of the proposed collection of information; (3) determine whether there are ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Comments may be submitted directly to the Office of Information and Regulatory Affairs, by fax at (202) 395-6566, or by email at OIRASubmissions@omb.eop.gov. Please provide the Commission with a copy of submitted comments so that all comments can be summarized and addressed in the final rule preamble. Refer to the **ADDRESSES** section of this notice of proposed rulemaking for comment submission instructions to the Commission. A copy of the supporting statements for the collection of information discussed above may be obtained by visiting www.RegInfo.gov. OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

C. Cost-Benefit Considerations

Section 15(a) of the CEA³⁹ requires the Commission to consider the costs and benefits of its actions before issuing a regulation under the CEA. Section 15(a) further specifies that the costs and benefits shall be evaluated in light of the following five broad areas of market and public concern: (i) Protection of market participants and the public; (ii) efficiency, competitiveness and financial integrity of futures markets; (iii) price discovery; (iv) sound risk management practices; and (v) other public interest considerations. The Commission considers the costs and benefits resulting from its discretionary determinations with respect to the Section 15(a) considerations.

1. Costs

As discussed above in relation to the RFA, the Proposal generally updates and simplifies existing Commission regulation 1.31 by deleting outdated terms and revising provisions to reflect advances in information technology while safeguarding the statutory-based principles previously identified by the Commission. The Commission preliminarily believes that the Proposal would impose certain costs on records entities. These costs are those necessary to establish and maintain required written recordkeeping policies and procedures. The Commission believes that these costs will be quite limited. At

³⁶ With respect to registrants and registered entities, these numbers are based on the number of such persons so registered with the Commission as of November 2, 2016. With respect to the number of unregistered members of designated contract markets or swap execution facilities, see Agency Information Collection Activities: Proposed Collection Revision, Comment Request: Final Rule for Records of Commodity Interest and Related Cash or Forward Transactions, 80 FR 80327 (Dec. 24, 2015).

³⁷ This burden hour estimate reflects the Commission's assumption that many records entities already have policies and procedures that, in whole or in part, satisfy the proposed recordkeeping policies and procedures requirement.

³⁸ The Commission will also submit to OMB revisions to Collection 3038-0090 to reflect the Proposal's replacement of the audit system requirements in current Commission regulation 1.31.

³⁹ 7 U.S.C. 19(a).

³⁴ 44 U.S.C. 3501 *et seq.*

³⁵ See OMB Control No. 3038-0090, <http://www.reginfo.gov/public/do/PRAOMBHistory?ombControlNumber=3038-0090#> (last visited Sep. 20, 2016).

the same time, the Commission preliminarily believes that the Proposal would also reduce current recordkeeping costs under Commission regulation 1.31, because the Proposal would increase flexibility provided to records entities and also eliminate certain requirements as described above (e.g., removing the requirements to have an audit system, to maintain electronic records in limited specified formats, and to retain a Technical Consultant).

2. Benefits

The Commission is committed to reviewing its regulations to ensure they keep pace with technological developments and industry trends, and reduce regulatory burden. The Commission believes that the Proposal will allow records entities to benefit from evolving technology while maintaining necessary safeguards to ensure the reliability of the recordkeeping process. By deleting outdated terms and revising provisions to reflect advances in information technology, the Proposal will allow records entities to utilize a wider range of currently available technology than previously allowed and remove requirements that the Commission believes are now obsolete, allowing records entities to reduce their costs. In addition, the Commission believes that the flexibility provided by the Proposal will, without further Commission rulemaking, allow records entities to adopt new technologies as such technologies evolve, allowing such persons to reduce their future costs.

Moreover, the Commission expects that the added flexibility provided by the Proposal will encourage records entities to utilize electronic storage rather than maintain paper regulatory records. The Commission expects that this conversion will benefit the Commission, the DOJ, and the commodity interest industry, generally, by making the universe of regulatory records more accessible and searchable.

In addition, as a result of the Proposal codifying industry practices to require recordkeeping policies and procedures and, in doing so, providing records entities with an opportunity to examine their own recordkeeping practices, the Commission expects that records entities may improve the quality of such practices and, thus, the accuracy and integrity of their regulatory records.

3. Section 15(a) Factors

Section 15(a) of the CEA requires the Commission to consider the costs and benefits of its actions before promulgating a regulation under the CEA or issuing certain orders. CEA

Section 15(a) further specifies that the costs and benefits shall be evaluated in light of five broad areas of market and public concern: (i) Protection of market participants and the public; (ii) efficiency, competitiveness, and financial integrity of futures markets; (iii) price discovery; (iv) sound risk management practices; and (v) other public interest considerations.

i. Protection of Market Participants and the Public

The Proposal will continue to protect the public by maintaining necessary safeguards to ensure the reliability of the recordkeeping process while allowing records entities to benefit from evolving technology.

ii. Efficiency, Competitiveness, and Financial Integrity of Markets

As discussed above, the Proposal may increase resource allocation efficiency by improving the way in which records are maintained. Otherwise, the Commission anticipates minimal change to the efficiency, competitiveness, and financial integrity of the markets.

iii. Price Discovery

The Commission believes that the Proposal may increase confidence and participation in the markets for the reasons discussed above. Nevertheless, the Commission does not anticipate a significant increase in liquidity or a significant improvement in price discovery as a result of this rulemaking.

iv. Sound Risk Management Practices

By improving recordkeeping policies and procedures, the Proposal may encourage records entities to analyze their recordkeeping practices and create or update policies and procedures related thereto.

v. Other Public Interest Considerations

The Commission has not identified any additional public interest considerations.

4. Request for Comments

The Commission invites public comment on its cost-benefit considerations, including the Section 15(a) factors described above. Commenters are also invited to submit any data or other information that they may have quantifying or qualifying the costs and benefits of the Proposal with their comment letters.

The Commission specifically seeks comment on the following:

- For those market participants with written operational procedures and controls that comply with current Commission regulation 1.31, what

transition costs, if any, will the Proposal's requirement for written policies and procedures entail?

- Are there any costs or benefits associated with the Proposal that the Commission has not considered in the Proposal? Please provide details and estimates regarding any asserted costs or benefits.

List of Subjects

17 CFR Part 1

Commodity futures, Reporting and recordkeeping requirements.

17 CFR Part 23

Authority delegations (Government agencies), Commodity futures, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Commodity Futures Trading Commission proposes to amend 17 CFR chapter I as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

- 1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 5, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6k, 6l, 6m, 6n, 6o, 6p, 6r, 6s, 7, 7a–1, 7a–2, 7b, 7b–3, 8, 9, 10a, 12, 12a, 12c, 13a, 13a–1, 16, 16a, 19, 21, 23, and 24 (2012).

- 2. Revise § 1.31 to read as follows:

§ 1.31 Regulatory records; retention and production.

(a) *Definitions.* For purposes of this section:

Electronic regulatory records means all regulatory records other than regulatory records exclusively created and maintained by a records entity on paper.

Records entity means any person required by the Act or Commission regulations in this chapter to keep regulatory records.

Regulatory records means all books and records required to be kept by the Act or Commission regulations in this chapter, including any record of any correction or other amendment to such books and records, provided that, with respect to such books and records stored electronically, regulatory records shall also include:

- (i) All data produced and stored electronically that describes, directly or indirectly, the characteristics of such books and records, including, without limitation, data that describes how, when, and, if relevant, by whom such electronically stored information was collected, created, accessed, modified, or formatted; and

(ii) Any data necessary to access, search, or display any such books and records.

(b) *Regulatory records policies and procedures.* Each records entity shall establish, maintain, and implement written policies and procedures reasonably designed to ensure that the records entity complies with its obligations under this section. Such policies and procedures shall provide for, without limitation, appropriate training of officers and personnel of the records entity regarding their responsibility for ensuring compliance with the obligations of the records entity under this section, and regular monitoring for such compliance.

(c) *Duration of retention.* Unless specified elsewhere in the Act or Commission regulations in this chapter:

(1) A records entity shall keep regulatory records of any swap or related cash or forward transaction (as defined in § 23.200(i) of this chapter), other than regulatory records of oral communications, from the date the regulatory record was created until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction and for a period of not less than five years after such date.

(2) A records entity that is required to retain oral communications, shall keep regulatory records of oral communications for a period of not less than one year from the date of such communication.

(3) A records entity shall keep each regulatory record other than the records described in paragraph (c)(1) or (2) of this section for a period of not less than five years from the date on which the record was created.

(4) A records entity shall keep regulatory records exclusively created and maintained on paper readily accessible for no less than two years. A records entity shall keep electronic regulatory records readily accessible for the duration of the required record keeping period.

(d) *Form and manner of retention.* Unless specified elsewhere in the Act or Commission regulations in this chapter, all regulatory records must be created and retained by a records entity in accordance with the following requirements:

(1) *Generally.* Each records entity shall retain regulatory records in a form and manner that ensures the authenticity and reliability of such regulatory records in accordance with the Act and Commission regulations in this chapter.

(2) *Electronic regulatory records.* Each records entity maintaining electronic regulatory records shall establish

appropriate systems and controls that ensure the authenticity and reliability of electronic regulatory records, including, without limitation:

(i) Systems that maintain the security, signature, chain of custody elements, and data as necessary to ensure the authenticity of the information contained in electronic regulatory records and to monitor compliance with the Act and Commission regulations in this chapter;

(ii) Systems that ensure the records entity is able to produce electronic regulatory records in accordance with this section, and ensure the availability of such regulatory records in the event of an emergency or other disruption of the records entity's electronic record retention systems; and

(iii) The creation and maintenance of an up-to-date inventory that identifies and describes each system that maintains information necessary for accessing or producing electronic regulatory records.

(e) *Inspection and production of regulatory records.* Unless specified elsewhere in the Act or Commission regulations in this chapter, a records entity, at its own expense, must produce or make accessible for inspection all regulatory records in accordance with the following requirements:

(1) *Inspection.* All regulatory records shall be open to inspection by any representative of the Commission or the United States Department of Justice.

(2) *Production of paper regulatory records.* A records entity must produce regulatory records exclusively created and maintained on paper promptly upon request of a Commission representative.

(3) *Production of electronic regulatory records.* (i) A request from a Commission representative for electronic regulatory records will specify a reasonable form and medium in which a records entity must produce such regulatory records.

(ii) A records entity must produce such regulatory records in the form and medium requested promptly, upon request, unless otherwise directed by the Commission representative.

(4) *Production of original regulatory records.* A records entity may provide an original regulatory record for reproduction, which a Commission representative may temporarily remove from such entity's premises for this purpose. Upon request of the records entity, the Commission representative shall issue a receipt for any original regulatory record received. At the request of a Commission representative, a records entity shall, upon the return thereof, issue a receipt for the original

regulatory record returned by such representative.

■ 3. In § 1.35, revise paragraph (a)(5) to read as follows:

§ 1.35 Records of commodity interest and related cash or forward transactions.

(a) * * *

(5) *Form and manner.* All records required to be kept pursuant to paragraphs (a)(1), (2), (3), and (4) of this section, other than pre-trade communications, shall be kept in a form and manner that allows for the identification of a particular transaction.

* * * * *

PART 23—SWAP DEALERS AND MAJOR SWAP PARTICIPANTS

■ 4. The authority citation for part 23 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 6, 6a, 6b, 6b–1, 6c, 6p, 6r, 6s, 6t, 9, 9a, 12, 12a, 13b, 13c, 16a, 18, 19, 21.

Section 23.160 also issued under 7 U.S.C. 2(i); Sec. 721(b), Pub. L. 111–203, 124 Stat. 1641 (2010).

■ 5. In § 23.203, amend paragraph (b) as follows:

■ a. Revise paragraph (b)(1); and

■ b. Remove and reserve paragraph (b)(2).

The revisions to read as follows:

§ 23.203 Records; retention and inspection.

* * * * *

(b) * * * (1) The records required to be maintained by this chapter shall be maintained in accordance with the provisions of § 1.31 of this chapter, except as provided in paragraph (b)(3) of this section. All such records shall be open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable prudential regulator. Records relating to swaps defined in section 1a(47)(A)(v) shall be open to inspection by any representative of the Commission, the United States Department of Justice, the Securities and Exchange Commission, or any applicable prudential regulator.

* * * * *

Issued in Washington, DC, on January 12, 2017, by the Commission.

Christopher J. Kirkpatrick,
Secretary of the Commission.

NOTE: The following appendices will not appear in the Code of Federal Regulations.

Appendices to Recordkeeping— Commission Voting Summary and Chairman's Statement

Appendix 1—Commission Voting Summary

On this matter, Chairman Massad and Commissioners Bowen and Giancarlo voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Statement of Chairman Timothy G. Massad

I have said many times that it is important for the CFTC to ensure its rules are up-to-date in light of technological changes, as outdated rules can create unnecessary burdens. That is why I'm pleased we are unanimously issuing this proposed rulemaking, which is in keeping with that goal.

Today's proposal will modernize recordkeeping and storage obligations set forth in CFTC rules, and make them technology neutral. By doing so, it will reduce costs for businesses and improve the quality of record preservation and production. Among other things, the proposal will provide greater flexibility when it comes to how records must be retained and produced. In this age where terabytes of storage easily fit in one's pocket, our rules should not refer to microfiche or require paper records.

Today's proposal is also an example of how the Commission is focusing on issues related to technological change generally in our markets. In this regard, there is much talk today about innovations that may come from financial technology. While it is the role of the private sector to develop innovations, I believe it is our role to ensure that the Commission's rules do not stand in the way of their potential. Today's proposal is a way to do just that.

I thank the CFTC staff for their work on this proposal and my fellow Commissioners for their support.

BILLING CODE 6351-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 15

[Docket No. FDA-2016-N-1149]

Manufacturer Communications Regarding Unapproved Uses of Approved or Cleared Medical Products; Availability of Memorandum; Reopening of the Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Reopening of comment period related to public hearing; availability of memorandum.

SUMMARY: The Food and Drug Administration (FDA) is reopening the comment period for the notification of public hearing, published in the **Federal Register** of September 1, 2016 (81 FR 60299) concerning our comprehensive review of our regulations and policies governing manufacturer communications regarding unapproved uses of approved or cleared medical products. FDA is also announcing that it has added a document to the docket for the public hearing entitled "Memorandum: Public Health Interests and First Amendment Considerations Related to Manufacturer Communications Regarding Unapproved Uses of Approved or Cleared Medical Products" (Memorandum). The Memorandum provides additional background on the issues FDA is considering as part of its comprehensive review, including a discussion of First Amendment considerations. In addition, elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of two draft guidance for industry that address manufacturer communications, one entitled "Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers," and the other entitled "Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers." FDA is reopening the comment period to provide the public an opportunity to review the Memorandum as it relates to the specific questions and issues identified in the notification of public hearing as well as review the two draft guidances and provide additional or new comments.

DATES: Submit either electronic or written comments by April 19, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2016-N-1149 for "Manufacturer Communications Regarding Unapproved Uses of Approved or Cleared Medical Products; Public Hearing; Requests for Comments." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper

submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Kristin Davis, Office of Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 4252, Silver Spring, MD 20993, 301–796–0418.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 1, 2016 (81 FR 60299), FDA published a notification of public hearing on firm communications regarding unapproved uses of approved or cleared medical products. FDA is currently engaged in a comprehensive review of its regulations and policies governing firms’ communications about unapproved uses of approved or cleared medical products, and the comments on the notification of public hearing will inform FDA’s policy development in this area.

Interested persons were originally given until January 9, 2017, to comment on the topics discussed in the notification of public hearing.

At the public hearing on November 9 and 10, 2016, a number of speakers presented legal views regarding the application of First Amendment principles to firm communications regarding unapproved uses of approved or cleared medical products. Some expressed the view that FDA had not sufficiently discussed the First Amendment in the notification of public hearing. In response to these comments, FDA is now placing the Memorandum in the docket for the public hearing to provide additional background on the issues it is considering as part of its review of its rules and policies relating to firm communications regarding unapproved uses of approved or cleared medical products, including a discussion of First Amendment considerations. In the notification of public hearing, FDA requested comments on a number of specific issues and questions identified throughout the document. The Memorandum is intended to help advance the discussion of these topics, and FDA is seeking input on the information in the Memorandum as it relates to these issues and questions in the notification of public hearing.

Furthermore, elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of a draft guidance for industry entitled “Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers,” which provides answers to common questions regarding the communication of health care economic information about approved prescription drugs by medical product firms to payors, formulary committees, or other similar entities. The draft guidance also provides answers to common questions related to firms’ communications about investigational drugs and devices (investigational products) to payors before FDA approval or clearance of such products.

Additionally, in this issue of the **Federal Register**, FDA is announcing the availability of a draft guidance for industry entitled “Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers.” The guidance provides information for medical product firms about how FDA evaluates their medical product communications, including their promotional materials, that present information that is not contained in the FDA-required labeling for the product but that may be consistent with the FDA-required labeling for the product.

FDA is harmonizing the comment periods for the notification of public hearing and the two draft guidances, as all three documents relate to the overarching topic of firm communications regarding medical products, and interested persons may wish to review all the documents before submitting comments to any of the relevant dockets. FDA is requesting comments on both draft guidances by April 19, 2017.

To allow interested parties an opportunity to review the Memorandum and the two draft guidances, FDA is reopening the comment period for the notification of public hearing for an additional 90 days, until April 19, 2017. The Agency believes reopening the comment period for an additional 90 days for the notification of public hearing will allow adequate time for interested persons to submit comments without significantly delaying Agency decision making and policy development on these important issues.

Dated: January 6, 2017.

Jeremy Sharp,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

[REG–127203–15]

RIN 1545–BN81

Transfers of Certain Property by U.S. Persons to Partnerships With Related Foreign Partners

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulation.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, temporary regulations are being issued under sections 197, 704, 721(c), and 6038B of the Internal Revenue Code (Code) that address transfers of appreciated property by U.S. persons to partnerships with foreign partners related to the transferor. The temporary regulations affect U.S. partners in domestic or foreign partnerships. The text of the temporary regulations also serves as the text of these proposed regulations.

DATES: Written or electronic comments and requests for a public hearing must be received by April 19, 2017.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG-127203-15), Internal Revenue Service, Room 5203, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG-127203-15), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, or sent electronically via the Federal eRulemaking Portal at <http://www.regulations.gov> (IRS REG-127203-15).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Ryan A. Bowen, (202) 317-6937; concerning submissions of comments or requests for a public hearing, Regina Johnson, (202) 317-6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** contain regulations under sections 197, 704, 721(c), and 6038B of the Code. The temporary regulations contain rules described in Notice 2015-54, 2015-34 I.R.B. 210, and override nonrecognition of gain under section 721(a) for transfers of property to a partnership with related foreign partners and with substantial related-party ownership unless certain requirements are satisfied. The text of the temporary regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the temporary regulations and the corresponding proposed regulations.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It is hereby certified that the collection of information contained in this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. This conclusion is based on the fact that the proposed regulations include a \$1,000,000 de minimis exception for certain transfers, and tangible property with built-in gain that does not exceed \$20,000 is excluded from the application of the

regulations. In addition, the regulations only apply when a U.S. transferor contributes property to a partnership with a related foreign partner, and persons related to the U.S. transferor own 80 percent or more of the interests in the partnership. Accordingly, the Treasury Department and the IRS expect that these regulations primarily will affect large domestic corporations. Pursuant to section 7805(f), this notice of proposed rulemaking has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Ryan A. Bowen, Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding entries to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.721(c)-1 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-2 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-3 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-4 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-5 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-6 also issued under 26 U.S.C. 721(c).

Section 1.721(c)-7 also issued under 26 U.S.C. 721(c).

* * * * *

■ **Par. 2.** Section 1.197-2 is amended by adding paragraphs (h)(12)(vii)(C) and (l)(5) to read as follows:

§ 1.197-2 Amortization of goodwill and certain other intangibles.

* * * * *

(h) * * *

(12) * * *

(vii) * * *

(C) [The text of proposed § 1.197-2(h)(12)(vii)(C) is the same as the text of § 1.197-2T(h)(12)(vii)(C) published elsewhere in this issue of the **Federal Register**.]

* * * * *

(l) * * *

(5) [The text of proposed § 1.197-2(l)(5) is the same as the text of § 1.197-2T(l)(5) published elsewhere in this issue of the **Federal Register**.]

* * * * *

■ **Par. 3.** Section 1.704-1 is amended by adding paragraph (b)(2)(iv)(f)(6) following the undesignated paragraph at the end of paragraph (b)(2)(iv)(f)(5) and adding paragraph (f) to read as follows:

§ 1.704-1 Partner's distributive share.

* * * * *

(b) * * *

(2) * * *

(iv) * * *

(f) * * *

(6) [The text of proposed § 1.704-1(b)(2)(iv)(f)(6) is the same as the text of § 1.704-1T(b)(2)(iv)(f)(6) published elsewhere in this issue of the **Federal Register**.]

* * * * *

(f) [The text of proposed § 1.704-1(f) is the same as the text of § 1.704-1T(f) published elsewhere in this issue of the **Federal Register**.]

* * * * *

■ **Par. 4.** Section 1.704-3 is amended by adding paragraphs (a)(13), (d)(5)(iii), and (g) to read as follows:

§ 1.704-3 Contributed property.

(a) * * *

(13) [The text of proposed § 1.704-3(a)(13) is the same as the text of § 1.704-3T(a)(13) published elsewhere in this issue of the **Federal Register**.]

* * * * *

(d) * * *

(5) * * *

(iii) [The text of proposed § 1.704-3(d)(5)(iii) is the same as the text of § 1.704-3T(d)(5)(iii) published

elsewhere in this issue of the **Federal Register**].

* * * * *

(g) [The text of proposed § 1.704–3(g) is the same as the text of § 1.704–3T(g) published elsewhere in this issue of the **Federal Register**].

■ **Par. 5.** Section 1.721(c)–1 is added to read as follows:

§ 1.721(c)–1 Overview, definitions, and rules of general application.

[The text of proposed § 1.721(c)–1 is the same as the text of § 1.721(c)–1T published elsewhere in this issue of the **Federal Register**].

■ **Par. 6.** Section 1.721(c)–2 is added to read as follows:

§ 1.721(c)–2 Recognition of gain on certain contributions of property to partnerships with related foreign partners.

[The text of proposed § 1.721(c)–2 is the same as the text of § 1.721(c)–2T published elsewhere in this issue of the **Federal Register**].

■ **Par. 7.** Section 1.721(c)–3 is added to read as follows:

§ 1.721(c)–3 Gain deferral method.

[The text of proposed § 1.721(c)–3 is the same as the text of § 1.721(c)–3T published elsewhere in this issue of the **Federal Register**].

■ **Par. 8.** Section 1.721(c)–4 is added to read as follows:

§ 1.721(c)–4 Acceleration events.

[The text of proposed § 1.721(c)–4 is the same as the text of § 1.721(c)–4T published elsewhere in this issue of the **Federal Register**].

■ **Par. 9.** Section 1.721(c)–5 is added to read as follows:

§ 1.721(c)–5 Acceleration event exceptions.

[The text of proposed § 1.721(c)–5 is the same as the text of § 1.721(c)–5T published elsewhere in this issue of the **Federal Register**].

■ **Par. 10.** Section 1.721(c)–6 is added to read as follows:

§ 1.721(c)–6 Procedural and reporting requirements.

[The text of proposed § 1.721(c)–6 is the same as the text of § 1.721(c)–6T published elsewhere in this issue of the **Federal Register**].

■ **Par. 11.** Section 1.721(c)–7 is added to read as follows:

§ 1.721(c)–7 Examples.

[The text of proposed § 1.721(c)–7 is the same as the text of § 1.721(c)–7T published elsewhere in this issue of the **Federal Register**].

■ **Par. 12.** Section 1.6038B–2 is amended by:

- 1. Revising paragraph (a)(3).
- 2. Adding paragraphs (a)(1)(iii), (c)(8), and (c)(9).
- 3. Revising paragraph (h)(3).
- 4. Adding paragraphs (j)(4) and (j)(5).

§ 1.6038B–2 Reporting of certain transfers to foreign partnerships.

(a) * * *

(1) * * *

(iii) [The text of proposed § 1.6038B–2(a)(1)(iii) is the same as the text of § 1.6038B–2T(a)(1)(iii) published elsewhere in this issue of the **Federal Register**].

* * * * *

(3) [The text of proposed § 1.6038B–2(a)(3) is the same as the text of § 1.6038B–2T(a)(3) published elsewhere in this issue of the **Federal Register**].

* * * * *

(c) * * *

(8) [The text of proposed § 1.6038B–2(c)(8) is the same as the text of § 1.6038B–2T(c)(8) published elsewhere in this issue of the **Federal Register**].

(9) [The text of proposed § 1.6038B–2(c)(9) is the same as the text of § 1.6038B–2T(c)(9) published elsewhere in this issue of the **Federal Register**].

* * * * *

(h) * * *

(3) [The text of proposed § 1.6038B–2(h)(3) is the same as the text of § 1.6038B–2T(h)(3) published elsewhere in this issue of the **Federal Register**].

* * * * *

(j) * * *

(4) [The text of proposed § 1.6038B–2(j)(4) is the same as the text of § 1.6038B–2T(j)(4) published elsewhere in this issue of the **Federal Register**].

(5) [The text of proposed § 1.6038B–2(j)(5) is the same as the text of § 1.6038B–2T(j)(5) published elsewhere in this issue of the **Federal Register**].

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 301

[REG–137604–07]

RIN 1545–BI35

Definition of Dependent

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking and notice of proposed rulemaking.

SUMMARY: This document withdraws proposed regulations relating to the definition of an authorized placement agency for purposes of a dependency exemption for a child placed for adoption that were issued prior to the changes made to the law by the Working Families Tax Relief Act of 2004 (WFTRA). This document contains proposed regulations that reflect changes made by WFTRA and by the Fostering Connections to Success and Increasing Adoptions Act of 2008 (FCSIAA) relating to the dependency exemption. This document also contains proposed regulations that, to reflect current law, amend the regulations relating to the surviving spouse and head of household filing statuses, the tax tables for individuals, the child and dependent care credit, the earned income credit, the standard deduction, joint tax returns, and taxpayer identification numbers for children placed for adoption. These proposed regulations change the IRS's position regarding the category of taxpayers permitted to claim the childless earned income credit. In determining a taxpayer's eligibility to claim a dependency exemption, these proposed regulations change the IRS's position regarding the adjusted gross income of a taxpayer filing a joint return for purposes of the tiebreaker rules and the source of support of certain payments that originated as governmental payments. These regulations provide guidance to individuals who may claim certain child-related tax benefits.

DATES: Written or electronic comments and requests for a public hearing must be received by April 19, 2017.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–137604–07), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–137604–07), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, or sent electronically via the Federal eRulemaking Portal at www.regulations.gov (IRS REG–137604–07).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Victoria J. Driscoll, (202) 317–4718; concerning the submission of comments and requests for a public hearing, Regina Johnson, (202) 317–6901 (not toll-free calls).

SUPPLEMENTARY INFORMATION:

Background

This document withdraws a notice of proposed rulemaking (REG-107279-00) amending § 1.152-2(c)(2) of the Income Tax Regulations that was published in the **Federal Register** (65 FR 71277) on November 30, 2000 (2000 proposed regulations) relating to the definition of an authorized placement agency for purposes of a dependency exemption for a child placed for adoption under prior law. Prior law required that a child be placed with the taxpayer for adoption by an authorized placement agency. Section 152 of the Internal Revenue Code was amended by section 201 of WFTRA (Pub. L. 108-311, 118 Stat. 1166, 1169) to provide that a qualifying child eligible to be the dependent of a taxpayer may include a child lawfully placed with the taxpayer for adoption. Accordingly, the proposed regulations in § 1.152-2(c)(2) under prior law are withdrawn.

This document also contains proposed amendments to 26 CFR part 1 under sections 2, 3, 21, 32, 63, 151, 152, 6013, and to Part 301 under section 6109 to reflect the changes made by WFTRA and FCSIAA (Pub. L. 110-351, 122 Stat. 3949) relating to the dependency exemption, as well as changes to these sections by other acts. WFTRA amended section 152, in part, to provide a uniform definition of a qualifying child; FCSIAA added to the definition of a qualifying child the requirements that the child must be younger than the taxpayer and that the child must not file a joint return (other than as a claim for refund). FCSIAA also amended the rules that apply if two or more taxpayers are eligible to claim an individual as a qualifying child.

1. Dependency Rules

Under section 151, a taxpayer may deduct an exemption amount for a dependent as defined in section 152. Prior to WFTRA, section 151 contained many of the rules related to the definition of a dependent. WFTRA moved those rules to section 152. As amended, section 152(a) defines a *dependent* as a qualifying child or a qualifying relative. Taxpayers should note that a taxpayer's treatment of the dependency exemption under section 151 for a particular qualifying child or qualifying relative might have tax consequences under other Code provisions, such as the education tax credits under section 25A, the premium tax credit under section 36B, and the penalty for failure to maintain minimum essential coverage under section 5000A.

a. Individual Not a Dependent

Section 152(b) provides that an individual who is a qualifying child or a qualifying relative of a taxpayer is not a taxpayer's dependent in certain circumstances. Section 152(b)(2) provides that, to be a dependent of a taxpayer, an individual must not have filed a joint return with his or her spouse. However, the WFTRA conference report provides that the "restriction does not apply if the return was filed solely to obtain a refund and no tax liability would exist for either spouse if they filed separate returns." See H.R. Rep. No. 108-696, at 55 n.38 (2004) (Conf. Rep.).

b. Qualifying Child

WFTRA established under section 152(c) a uniform definition of a qualifying child. The legislative history identifies five child-related benefits to which the uniform definition applies: The filing status of head of household under section 2(b), the child and dependent care credit under section 21, the child tax credit under section 24, the earned income credit under section 32, and the dependency exemption under section 151. See H.R. Rep. No. 108-696, at 55-65.

Section 152(c) defines a qualifying child as an individual who bears a certain relationship to the taxpayer (qualifying child relationship test), has the same principal place of abode as the taxpayer for more than one-half of the taxable year (residency test), is younger than the taxpayer and is under the age of 19 (or age 24 if a full-time student or any age if permanently and totally disabled) (age test), does not provide more than one-half of his or her own support (qualifying child support test), and does not file a joint return with a spouse except to claim a refund of estimated or withheld taxes (joint return test).

c. Temporary Absence

A child is considered to reside in the same principal place of abode as a taxpayer during a temporary absence. Under the existing section 152 regulations, a nonpermanent failure to occupy a common abode by reason of illness, education, business, vacation, military service, or a custody agreement may be a temporary absence due to special circumstances. The existing regulations under section 2 defining surviving spouse and head of household include a similar rule relating to the effect of a temporary absence on the requirement to maintain a household, but add the requirement that it is reasonable to assume that the absent

person will return to the household. Under case law, a factor to consider in determining whether an absence is temporary is whether the individual intends to establish a new principal place of abode. In *Rowe v. Commissioner*, 128 T.C. 13 (2007), the court concluded that it was reasonable to assume that a taxpayer would return to her home after pretrial confinement and that the taxpayer's absence was temporary. See also *Hein v. Commissioner*, 28 T.C. 826 (1957) (*acq.*, 1958-2 CB 6), and Rev. Rul. 66-28 (1966-1 CB 31).

d. Two or More Taxpayers Eligible To Claim Individual as Qualifying Child

Section 152(c)(4) provides tiebreaker rules that apply if an individual meets the definition of a qualifying child for two or more taxpayers (eligible taxpayers). In general, the eligible taxpayer who is a parent (eligible parent) of the individual may claim the individual as a qualifying child or, if there is no eligible parent, then the individual may be claimed by the eligible taxpayer with the highest adjusted gross income.

If more than one of the eligible taxpayers is a parent of the individual, more than one eligible parent claims the individual as a qualifying child, and the eligible parents claiming the individual do not file a joint return with each other, the individual is treated as the qualifying child of the eligible parent claiming the individual with whom the individual resided for the longest period of time during the taxable year. If the individual resided with each eligible parent claiming the individual for the same amount of time during the taxable year, the individual is treated as the qualifying child of the eligible parent claiming the individual with the highest adjusted gross income.

If at least one, but not all, of two or more eligible taxpayers is a parent of the individual, but no eligible parent claims the individual as a qualifying child, another eligible taxpayer may claim the individual, but only if the eligible taxpayer's adjusted gross income is higher than the adjusted gross income of each eligible parent. Since 2009, IRS Publication 501, *Exemptions, Standard Deduction, and Filing Information*, has stated that "[i]f a child's parents file a joint return with each other, this rule may be applied by dividing the parents' combined AGI equally between the parents."

Notice 2006-86 (2006-2 CB 680) provides interim guidance on these rules prior to the amendments by FCSIAA. The notice provides that, except to the extent that a noncustodial

parent may claim the child as a qualifying child under the special rule for divorced or separated parents in section 152(e), discussed in the next paragraph, if more than one taxpayer claims a child as a qualifying child, the child is treated as the qualifying child of only one taxpayer (as determined under the tiebreaker rules of section 152(c)(4)) for purposes of the five provisions subject to the uniform definition of a qualifying child (the filing status of head of household under section 2(b), the child and dependent care credit under section 21, the child tax credit under section 24, the earned income credit under section 32, and the dependency exemption under section 151, as well as for purposes of the exclusion for dependent care assistance under section 129 (which may apply to the care of a dependent qualifying child under age 13)). Thus, in general, the tiebreaker rules for determining which taxpayer may claim a child as a qualifying child apply to these provisions as a group, rather than on a section-by-section basis.

Notice 2006–86 contains an exception to the rule that only one taxpayer may claim a child as a qualifying child for all purposes. Section 152(e) has a special rule for divorced or separated parents that determines who, as between the custodial and noncustodial parent, may claim a child as a qualifying child or qualifying relative if certain tests (different from the general tests under sections 152(c) and (d)) regarding residency and support are met and the custodial parent releases a claim to exemption for the child. The notice provides that, if this special rule applies, a noncustodial parent may claim a child as a qualifying child for purposes of the dependency exemption and the child tax credit (the only two of the provisions addressed in the notice to which section 152(e) applies in determining who is a qualifying child), and another taxpayer may claim the child for one or more of the other benefits to which section 152(e) does not apply.

Although FCSIAA affects other aspects of section 152(c)(4) and Notice 2006–86, there is nothing in FCSIAA that would compel a change in the rule described in Notice 2006–86 that an individual is treated as the qualifying child of only one taxpayer for the listed child-related tax benefits, except if the special rule in section 152(e) applies.

e. Qualifying Relative

Under section 152(d), a qualifying relative is an individual who bears a certain relationship to the taxpayer, including an individual who has the

same principal place of abode as the taxpayer and is a member of the taxpayer's household for the taxable year (qualifying relative relationship test), has gross income less than the exemption amount for the taxable year (gross income test), receives more than one-half of his or her support from the taxpayer (qualifying relative support test), and is not a qualifying child of any taxpayer (not a qualifying child test).

Notice 2008–5 (2008–1 CB 256) addresses whether a taxpayer meets the test under section 152(d)(1)(D) to claim an individual as a qualifying relative. That provision requires that the individual not be a qualifying child of either the taxpayer or any other taxpayer during a taxable year beginning in the calendar year in which the taxpayer's taxable year begins. The notice provides that, for purposes of section 152(d)(1)(D), an individual is not a qualifying child of "any other taxpayer" if the individual's parent (or other person for whom the individual is defined as a qualifying child) is not required by section 6012 to file an income tax return and (1) does not file an income tax return, or (2) files an income tax return solely to obtain a refund of withheld income taxes.

f. Support Tests

Under section 152(c)(1)(D), to be a taxpayer's qualifying child, an individual must not have provided over one-half of the individual's own support for the calendar year. Under section 152(d)(1)(C), to be a taxpayer's qualifying relative, a taxpayer must have provided over one-half of an individual's support for the calendar year.

Regarding governmental payments to a person with a qualifying need, the WFTRA conference report, H.R. Rep. No. 108–696, at 57, states that "[g]overnmental payments and subsidies (e.g., Temporary Assistance [for] Needy Families, food stamps, and housing) generally are treated as support provided by a third party." The IRS has successfully asserted in litigation that governmental payments provided to a parent to aid a family with dependent children and used by the parent for support of her children was support of the children provided by the government, and not support provided by the parent. See *Lutter v. Commissioner*, 61 T.C. 685 (1974), *affd. per curiam*, 514 F.2d 1095 (7th Cir. 1975).

2. Surviving Spouse and Head of Household, and Conforming Changes

Prior to amendment by section 803(b) of the Tax Reform Act of 1969 (Pub. L.

91–172, 83 Stat. 487), section 2(a) provided that the return of a surviving spouse is treated as a joint return for purposes of the tax rates, the tax tables for individuals, and the standard deduction. Following the 1969 amendments, section 2(a) defines the term *surviving spouse* for purposes of section 1. The return of a taxpayer filing as a surviving spouse is no longer treated as a joint return under sections 2, 3, or 63. Section 3 provides tax tables for certain individuals in lieu of the tax imposed by section 1. Section 63(c) provides the same basic standard deduction for a taxpayer filing as a surviving spouse as a taxpayer filing a joint return. Accordingly, a taxpayer filing as a surviving spouse is no longer treated as filing a joint return for any tax purpose, but rather, a taxpayer filing as a surviving spouse simply uses the same tax rates under section 1, the same amounts in the tax tables under section 3, and the same standard deduction under section 63 as a taxpayer filing a joint return.

Generally, under section 2(b), to qualify as a head of household, a taxpayer must maintain a household that is the principal place of abode of a qualifying child or other dependent for more than one-half of the taxable year. If the dependent is a parent of the taxpayer and the parent does not share a principal place of abode with the taxpayer, the household maintained by the taxpayer must be the parent's principal place of abode for the entire taxable year.

Prior to WFTRA, section 21 required that a taxpayer maintain a household to claim the credit for dependent care expenses, and regulations on maintaining a household were published under that section. WFTRA removed that requirement from the dependent care credit.

3. Earned Income Credit

Section 32 provides a tax credit to eligible taxpayers who work and have earned income below a certain dollar amount. Before the amendment of section 32 by the Omnibus Reconciliation Act of 1993 (Pub. L. 103–66, 107 Stat. 312), the earned income credit (EIC) was allowable only to a taxpayer with one or more qualifying children. If an individual met the definition of a qualifying child for more than one taxpayer, a tiebreaker rule in section 32 determined which taxpayer was allowed to claim the individual as a qualifying child for the EIC. For taxable years beginning after 1993, section 32(c)(1)(A)(ii) allows a taxpayer without a qualifying child to claim the EIC (childless EIC) if certain

requirements are met. Although there is no regulatory guidance on this issue, since 1995, the IRS has taken the position in IRS Publication 596, *Earned Income Credit*, that if an individual meets the definition of a qualifying child for more than one taxpayer and the individual is not treated as the qualifying child of a taxpayer under the tiebreaker rules, then that taxpayer is precluded from claiming the childless EIC. WFTRA moved the tiebreaker rules from section 32 to section 152(c)(4).

Before repeal in 2010, section 3507 allowed advance payment of the EIC. Section 3507 was repealed by the FAA Air Transportation Modernization and Safety Improvement Act (Pub. L. 111–226, 124 Stat. 2389).

4. Additional Standard Deduction for the Aged and Blind

Before the amendments to sections 63 and 151 made by the Tax Reform Act of 1986 (Pub. L. 99–514, 100 Stat. 2085), a taxpayer was entitled to an additional personal exemption under section 151 for the taxpayer or the taxpayer's spouse (or both), if either was age 65 or older or was blind at the close of the taxable year. As amended, section 63 provides an additional standard deduction for age or blindness instead of an additional personal exemption under section 151.

Explanation of Provisions

The proposed regulations reflect statutory amendments to sections 2, 3, 21, 32, 63, 151, 152, 6013, and 6109. In addition, the regulations address certain significant issues arising under these sections and modify certain IRS positions, as explained below.

1. Dependency Exemption

Consistent with the amendments made to sections 151 and 152 by WFTRA, the proposed regulations move rules related to the definition of a dependent from the regulations under section 151 to the regulations under section 152.

a. Relationship Test

i. General Rules

Section 152(c)(2) provides that a qualifying child must be a child or a descendant of a child of the taxpayer, or a brother, sister, stepbrother, or stepsister of the taxpayer, or a descendant of any of these relatives. Section 152(d)(2) provides that a qualifying relative must bear a certain relationship to the taxpayer, which includes a child or a descendant of a child, a brother, sister, stepbrother, stepsister, parent or ancestor of a parent, or an aunt or uncle of the taxpayer. An individual (other than the taxpayer's

spouse) who is not related to the taxpayer in one of the named relationships nevertheless may satisfy the relationship test for a qualifying relative if the individual has the same principal place of abode as the taxpayer and is a member of the taxpayer's household for the taxpayer's taxable year.

The proposed regulations adopt the rule in Notice 2008–5 regarding whether an individual is a qualifying child of a taxpayer for purposes of determining whether that individual may be a qualifying relative. That is, the proposed regulations provide that an individual is not a qualifying child of a person if that person is not required to file an income tax return under section 6012, and either does not file an income tax return or files an income tax return solely to claim a refund of estimated or withheld taxes.

ii. Adopted Child—Adoption by Individual Other Than the Taxpayer

Prior to 2005, for purposes of the relationship test, a person's legally adopted child was treated as that person's child by blood. Specifically, section 152(b)(2) provided that "a legally adopted child of an individual (and a child who is a member of an individual's household, if placed with such individual by an authorized placement agency for legal adoption by such individual), . . . shall be treated as a child of such individual by blood." Therefore, a taxpayer other than the adopting "individual" could be eligible to claim an exemption for an adopted child. For example, the parent of the adopting parent could claim a dependency exemption for the legally adopted child of the taxpayer's son or daughter (just as biological grandparents may claim an exemption for a grandchild) if all other requirements were met.

WFTRA amended section 152 to change the reference from a child placed by an authorized placement agency for adoption to a child who is "lawfully placed" for legal adoption. In making that change, however, WFTRA also changed the reference to the adopting person from "an individual" to "the taxpayer," so that section 152(f)(1)(B) currently provides that a legally adopted individual of the taxpayer is treated as a child by blood of the taxpayer. The use of the word "taxpayer" rather than "individual" arguably limits the recognition of a relationship through adoption only to those situations in which the taxpayer claiming a dependency exemption for the child is the person who adopts the child. This interpretation of the amended statutory

language would diverge from the results of a legal adoption under property, inheritance, and other nontax law, and from the prior tax treatment of adoptions—a significant change in the applicable law. However, there is nothing in the legislative history indicating that Congress intended to limit the treatment of an adopted child as a child by blood in this manner or that otherwise suggests this change in language was intended to effect a change in existing law.

To fill this apparent gap in the statute, the proposed regulations provide that any child legally adopted by a "person," or any child who is placed with a "person" for legal adoption by that "person," is treated as a child by blood of that person for purposes of the relationship tests under sections 152(c)(2) and 152(d)(2). Similarly, the proposed regulations provide that an eligible foster child is a child who is placed with a "person" rather than with a taxpayer.

iii. Adopted Child and Foster Child—Child Placement

Although WFTRA removed the reference to an authorized placement agency from the provisions relating to an adopted child in section 152(f)(1)(B), the reference to an authorized placement agency continues to appear in section 152(f)(1)(C), relating to an eligible foster child. Prior to amendment by WFTRA, section 152 treated a child who was a member of an individual's household pending adoption as a child by blood of the individual for purposes of the relationship test only if the child was a foster child living with the individual or if the child was placed with the individual by an authorized placement agency for adoption by the individual. Similarly, § 301.6109–3(a) currently provides that a taxpayer may obtain an adoption taxpayer identification number (ATIN) only for a child who was placed for adoption by an authorized placement agency.

As amended by WFTRA, section 152 treats a child placed for adoption as a child by blood of the taxpayer if the child "is lawfully placed with the taxpayer for legal adoption by the taxpayer." A child may be lawfully placed for legal adoption by an authorized placement agency, the child's parents, or other persons authorized by State law to place children for legal adoption. These proposed regulations reflect the changes made by WFTRA and amend the regulations under section 6109 to provide that the IRS will assign an ATIN to a child who has been lawfully placed with a person for legal adoption.

Under section 152(f)(1)(A)(ii) and § 1.152-1(b)(1)(iii) of these proposed regulations, the term *child* also includes an eligible foster child of the taxpayer as defined in 152(f)(1)(C), that is, a child who is placed with the taxpayer by an authorized placement agency or by the judgment, decree, or other order of a court of competent jurisdiction.

iv. Definition of Authorized Placement Agency

The 2000 proposed regulations under § 1.152-2(c)(2) defined an authorized placement agency for purposes of the prior law regarding a child placed for legal adoption. These proposed regulations define an authorized placement agency for purposes of the definition of an eligible foster child and withdraw the 2000 proposed regulations, which defined that term without reference to an Indian Tribal Government (ITG).

These proposed regulations provide that an *authorized placement agency* may be a State, the District of Columbia, a possession of the United States, a foreign country, an agency or organization authorized by, or a political subdivision of, any of these entities to place children in foster care or for adoption. Under the Indian Child Welfare Act of 1978 (25 U.S.C. chapter 21), ITGs and states perform similar functions for foster care and adoption programs. Thus, the proposed regulations provide that an authorized placement agency also may be an ITG (as defined in section 7701(a)(40)), or an agency or organization authorized by, or a political subdivision of, an ITG that places children in foster care or for adoption.

b. Residency Test—Principal Place of Abode

For purposes of determining whether an individual has the same principal place of abode as the taxpayer in applying the residency test for a qualifying child and the relationship test for a qualifying relative who does not have one of the listed relationships to the taxpayer, the proposed regulations provide that the term *principal place of abode* means a person's main home or dwelling where the person resides. A person's principal place of abode need not be the same physical location throughout the taxable year and may be temporary lodging such as a homeless shelter or relief housing resulting from displacement caused by a natural disaster.

The proposed regulations further provide that a taxpayer and an individual have the same principal place of abode despite a temporary

absence by either person. A person is temporarily absent if, based on the facts and circumstances, the person would have resided with the taxpayer but for the temporary absence and it is reasonable to assume the person will return to reside at the place of abode. Thus, the proposed regulations adopt the "reasonable to assume" language from the existing regulations under section 2. The proposed regulations indicate that a nonpermanent failure to occupy the abode by reason of illness, education, business, vacation, military service, institutionalized care for a child who is permanently and totally disabled (as defined in section 22(e)(3)), or incarceration may be treated as a temporary absence due to special circumstances. This definition of temporary absence applies to the residency test for a qualifying child, to the relationship test for a qualifying relative who does not have a listed relationship to the taxpayer, and to the requirements to maintain a household for surviving spouse and head of household.

For purposes of the residency test for a qualifying child, the proposed regulations provide that an individual is treated as having the same principal place of abode as the taxpayer for more than one-half of the taxable year if the individual resides with the taxpayer for at least 183 nights during the taxpayer's taxable year or for at least 184 nights during the taxpayer's taxable year that includes a leap day (residing for more than one-half of the taxable year). The proposed regulations further provide that an individual resides with the taxpayer for a night if the individual sleeps (1) at the taxpayer's residence, or (2) in the company of the taxpayer when the individual does not sleep at the taxpayer's residence (for example, when the parent and the child are on vacation). The regulations provide additional rules for counting nights if a night extends over two taxable years and for taxpayers who work at night.

The proposed regulations provide special rules for determining whether an individual satisfies a residency test if the individual is born or dies during the taxable year, is adopted or placed for adoption, is an eligible foster child, or is a missing child.

c. Age Test

The age test for a qualifying child requires that an individual be younger than the taxpayer claiming the individual as a qualifying child, and the individual must not have attained the age of 19 (or age 24 if the individual is a student). The age requirement is

treated as satisfied if the individual is permanently and totally disabled.

For purposes of this age test, the proposed regulations substantially adopt the existing definition of a student. Accordingly, the proposed regulations provide that the term *student* means an individual who, during some part of each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins, is a full-time student at an educational organization described in section 170(b)(1)(A)(ii) or is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational institution or of a State or political subdivision of a State. An *educational organization*, as defined in section 170(b)(1)(A)(ii), is a school normally maintaining a regular faculty and curriculum and having a regularly enrolled body of students in attendance at the place where its educational activities are regularly carried on.

d. Support Tests

In determining whether an individual provided more than one-half of the individual's own support (qualifying child support test), or whether a taxpayer provided more than one-half of an individual's support (qualifying relative support test), the proposed regulations compare the amount of support provided by the individual or the taxpayer to the total amount of the individual's support from all sources. In general, the amount of an individual's support from all sources includes support the individual provides and income that is excludable from gross income. The proposed regulations further provide that the amount of an item of support is the amount of expenses paid or incurred to furnish the item of support. If support is furnished in the form of property or a benefit (such as lodging), the amount of that support is the fair market value of the item furnished (Rev. Rul. 58-302 (1958-1 CB 62)).

The proposed regulations provide that the term *support* includes food, shelter, clothing, medical and dental care, education, and similar items for the benefit of the supported individual. Support does not include Federal, State, and local income taxes, or Social Security and Medicare taxes, of an individual paid from the individual's own income (Rev. Rul. 58-67 (1958-1 CB 62)), funeral expenses (Rev. Rul. 65-307 (1965-2 CB 40)), life insurance premiums, or scholarships received by a taxpayer's child who is a student as defined in section 152(f)(2).

The proposed regulations provide that medical insurance premiums are treated as support. These premiums include Part A Basic Medicare premiums, if any, under Title XVIII of the Social Security Act (42 U.S.C. 1395c to 1395i-5), Part B Supplemental Medicare premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395j to 1395w-6), Part C Medicare + Choice Program premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395w-21 to 1395w-29), and Part D Voluntary Prescription Drug Benefit Medicare premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395w-101 to 1395w-154). However, medical insurance proceeds, including benefits received under Medicare Part A, Part B, Part C, and Part D, are not treated as support and are disregarded in determining the amount of the individual's support. Thus, only the premiums paid and the unreimbursed portion of the expenses for the individual's medical care are support. See Rev. Rul. 64-223 (1964-2 CB 50); and Rev. Rul. 70-341 (1970-2 CB 31), revoked in part by Rev. Rul. 79-173 (1979-1 CB 86) to the extent that it held that Part A Medicare benefits are included as a recipient's contribution to support. In addition, services provided to individuals under the medical and dental care provisions of the Armed Forces Act (10 U.S.C. chapter 55) are not treated as support and are disregarded in determining the amount of the individual's support. Finally, payments from a third party (including a third party's insurance company) for the medical care of an injured individual in satisfaction of a legal claim for the personal injury of the individual are not items of support and are disregarded in determining the amount of the individual's support. See Rev. Rul. 64-223.

The proposed regulations provide that, in general, governmental payments and subsidies are treated as support provided by a third party. Consistent with previously issued rulings and case law, these payments and subsidies include, for example, Temporary Assistance for Needy Families (TANF) (42 U.S.C. 601-619), low-income housing assistance (42 U.S.C. 1437f), benefits under the Supplemental Nutrition Assistance Program (7 U.S.C. chapter 51), Supplemental Security Income payments (42 U.S.C. 1381-1383f), foster care maintenance payments, and adoption assistance payments. See H.R. Rep. No. 108-696, at 57 (2004) (Conf. Rep.); *Gulvin v. Commissioner*, 644 F.2d 2 (5th Cir. 1981); and Rev. Rul. 74-153 (1974-1 CB 20).

However, unlike the subsidies described in the previous paragraph that generally are based solely on need, old age benefits under section 202(b) of Title II of the Social Security Act (SSA) (42 U.S.C. 402) are based on an individual's earnings and contributions into the Social Security system and thus are treated as support provided by the recipient to the extent the recipient uses the payments for support. See Rev. Rul. 58-419 (1958-2 CB 57), as modified by Rev. Rul. 64-222 (1964-2 CB 47). Similarly, Social Security survivor and disability insurance benefit payments made under section 202(d) of the SSA to the child of a deceased or disabled parent are treated as support provided by the child to the extent those payments are used for the child's support. See Rev. Rul. 57-344 (1957-2 CB 112) and Rev. Rul. 74-543 (1974-2 CB 39).

The proposed regulations provide a special rule for governmental payments used by the recipient or other intended beneficiary to support another individual. The proposed regulations draw a distinction between: (1) Governmental payments (such as Social Security old age benefits, or survivor and disability insurance benefits for a child) made to a recipient that are intended to benefit a particular named individual (whether the recipient, or another intended beneficiary for whom the recipient merely acts as the payee on behalf of that other intended beneficiary); and (2) governmental payments made to a recipient that are intended to support the recipient and other individuals (such as TANF). Although the governmental payments of the former variety are intended to benefit a particular named individual, because money is fungible, the intended beneficiary might use the governmental payments to support another individual. In this situation, the proposed regulations provide that, if the intended beneficiary (whether the recipient or another individual) uses the governmental payments to support another individual, that amount would constitute support of that other individual provided by the intended beneficiary. Similarly, the proposed regulations provide that the use of governmental payments of the latter variety by the recipient to support another individual would constitute support of that other individual provided by the recipient, whereas any part of such a payment used for the support of the recipient would constitute support of the recipient by a third party. For example, if a mother receives TANF and uses the TANF

payments to support her children, the proposed regulations treat the mother as having provided that support. Thus, the IRS will no longer assert the position that it took in *Lutter*, which concerned payments received by a mother under a program that was the predecessor of TANF. The Treasury Department and the IRS are proposing this rule for the administrative convenience of both the IRS and taxpayers to avoid the need to trace the use of such governmental payments, as opposed to the use of other funds of the recipient, for the support of another individual.

The Treasury Department and IRS request comments on whether various payments made pursuant to the Patient Protection And Affordable Care Act (Public Law 111-148, 124 Stat. 119) in the form of a cost-sharing reduction, an advanced payment of the premium tax credit, or as a reimbursement of health insurance premiums in the form of a premium tax credit, when used for the benefit of another individual, are support provided by the recipient of those benefits or support provided by a third party.

e. Citizenship

Under section 152(b)(3)(A), an individual who is not a citizen or national of the United States is not a dependent unless the individual is a resident of the United States, Canada, or Mexico. Nevertheless, consistent with the exception for certain adopted children in section 152(b)(3)(B), the proposed regulations provide that an adopted child of a taxpayer who is a U.S. citizen or national may qualify as a dependent if, for the taxpayer's taxable year, the child has the same principal place of abode as the taxpayer and is a member of the taxpayer's household, and otherwise qualifies as the taxpayer's dependent.

f. Tiebreaker Rules

The proposed regulations change the interpretation in Publication 501 regarding a taxpayer's adjusted gross income on a joint return and provide that, in applying the tiebreaker rules that treat an individual as the qualifying child of the eligible taxpayer with the higher or highest adjusted gross income, the adjusted gross income of a taxpayer who files a joint tax return is the total adjusted gross income shown on the return. The prior interpretation is changed to be consistent with other Code sections that require the filing of a joint return to claim a benefit and therefore calculate income based on the entire amount shown on the joint return. For example, the earned income credit under section 32 calculates the

earned income amount based on the entire amount shown on the joint return. This joint return rule also is relevant for determining whether section 152(c)(4)(C) applies. Under that provision, if an eligible parent does not claim an individual as a qualifying child, another eligible taxpayer may claim the individual as a qualifying child only if that taxpayer's adjusted gross income is higher than the adjusted gross income of any eligible parent.

The proposed regulations also expand the tiebreaker rule in section 152(c)(4)(C) to address the situation in which an eligible parent does not claim an individual as a qualifying child and two or more taxpayers, none of whom is a parent, are eligible to claim the individual as a qualifying child and each has adjusted gross income higher than any eligible parent. In this situation, the proposed regulations provide that the individual is treated as the qualifying child of the eligible taxpayer with the highest adjusted gross income.

g. Child of Parents Who Are Divorced, Separated, or Living Apart

Section 152(e) provides, in general, that a child is treated as the qualifying child or qualifying relative of a noncustodial parent for a calendar year if, among other things, the custodial parent provides to the noncustodial parent a written declaration that the custodial parent will not claim the child as a dependent for any taxable year beginning in that calendar year. Under section 152(e)(2)(B), the noncustodial parent must attach the written declaration to his or her return.

The proposed regulations provide that the noncustodial parent must attach a copy of the written declaration to an original or amended return. A taxpayer may submit a copy of the written declaration to the IRS during an examination of that parent's return. However, to provide certainty for both taxpayers and the IRS, the proposed regulations provide that a copy of a written declaration attached to an amended return or provided during an examination will not meet the requirements of section 152(e) and § 1.152-5(e) if the custodial parent signed the written declaration after the custodial parent filed a return claiming a dependency exemption for the child for the year at issue, and the custodial parent has not filed an amended return to remove that claim to a dependency exemption. The proposed regulations provide similar rules for a parent revoking a written declaration.

h. Filing a Return Solely To Obtain a Refund of Taxes

Individuals who file an income tax return solely to obtain a refund of estimated or withheld taxes are subject to special rules under various provisions of section 152. Section 152(c)(1)(E) provides that, for an individual to be a qualifying child of a taxpayer, the individual cannot have filed a joint return "other than only for a claim of refund." Section 152(b)(2) provides that, for an individual to be a dependent of a taxpayer, the individual cannot have filed a joint return with the individual's spouse. However, the WFTRA conference report states that "[t]his restriction does not apply if the return was filed solely to obtain a refund and no tax liability would exist for either spouse if they filed separate returns." Section 152(d)(1)(D) provides that, to be a qualifying relative, an individual may not be the qualifying child of the taxpayer or of any other taxpayer. Notice 2008-5 concludes that an individual is not the qualifying child of "any other taxpayer," within the meaning of section 152(d)(1)(D), if the person who could have claimed the individual as a qualifying child does not have a filing obligation and either does not file a return or files a return solely to obtain a refund of withheld taxes.

The proposed regulations provide a similar exception to the rule in section 152(b)(1) that a taxpayer cannot have a dependent if the taxpayer himself or herself is a dependent of another taxpayer. Specifically, the proposed regulations provide that an individual is not a dependent of a person if that person is not required to file an income tax return under section 6012 and either does not file an income tax return or files an income tax return solely to claim a refund of estimated or withheld taxes.

2. Surviving Spouse, Head of Household, and Conforming Changes

The proposed regulations amend the regulations under section 2 regarding the definition of surviving spouse and the definition of head of household to conform to the amendments made by WFTRA. To reflect the amendments made by the Tax Reform Act of 1969, the proposed regulations remove from the regulations under sections 2, 3, and 6013 references to the return of a surviving spouse being treated as a joint return. The proposed regulations also revise and move from the regulations under section 21 to the regulations under section 2 the definition of maintaining a household, in part, to conform to the amendments to section

21 made by WFTRA, which removed the requirement that a taxpayer maintain a household to claim the credit under section 21.

a. Surviving Spouse

From the time of the 1969 amendment until the enactment of WFTRA, section 2(a)(1)(B) provided that a taxpayer who is a surviving spouse described in section 2(a)(1)(A) may file as a surviving spouse (and thus may use the tax rates of joint filers) only if the taxpayer "maintains as his home a household which constitutes for the taxable year the principal place of abode (as a member of such household) of a dependent (i) who (within the meaning of section 152) is a son, stepson, daughter, or stepdaughter of the taxpayer, and (ii) with respect to whom the taxpayer is entitled to a deduction for the taxable year under section 151." Thus, the member of the taxpayer's household had to be a son or daughter or stepson or stepdaughter for whom the taxpayer was entitled to a dependency deduction.

WFTRA amended section 2(a), as well as certain other sections such as section 42 relating to the low-income housing credit and section 125 relating to cafeteria plans, to provide that the reference to section 152 applies "without regard to subsections (b)(1), (b)(2), and (d)(1)(B)." These three subsections, respectively: (1) Deny a dependency exemption to a dependent, (2) deny a dependency exemption for a person filing a joint return with his or her spouse, and (3) require the gross income of a qualifying relative to be less than the amount of the dependency exemption. Thus, the language inserted by the WFTRA technical amendment to section 2(a) was intended to broaden the class of individuals whose members could qualify a taxpayer as a surviving spouse for purposes of section 2. See also Staff of Joint Comm. on Taxation, 108th Cong., *General Explanation of Tax Legislation Enacted in the 108th Congress* 130 (Comm. Print 2005) ("technical and conforming amendments . . . provide that an individual may qualify as a dependent for certain purposes . . . without regard to whether the individual has gross income . . . or is married and files a joint return.")

However, in amending section 2(a) for this purpose, WFTRA inserted the direction to exclude the three referenced provisions after the reference to section 152 in section 2(a)(1)(B)(i). Thus, this section currently provides, "(i) who (within the meaning of section 152, determined without regard to subsections (b)(1), (b)(2), and (d)(1)(B)

thereof) is a son, stepson, daughter, or stepdaughter of the taxpayer.” Because section 2(a)(1)(B)(ii) continues to require that the taxpayer be entitled to a deduction under section 151 for the dependent (a requirement that could not be met if any of these three sections applied), read literally, section 2(a)(1)(B)(ii) would override the intent of the statutory change in section 2(a)(1)(B)(i), thus preventing the WFTRA amendment from effecting any change in the statute. Therefore, to give effect to the statutory amendment, the proposed regulations construe the language added by WFTRA instead to modify the section 152 requirements that apply in determining whether the taxpayer is entitled to the dependency exemption under section 151 for purposes of section 2(a)(1)(B)(ii). Accordingly, the proposed regulations provide that an individual is a dependent for purposes of section 2(a) if the taxpayer may claim a deduction under section 151 for the individual without applying sections 152(b)(1), (b)(2), and (d)(1)(B).

b. Head of Household

The proposed regulations under section 2(b) update and simplify the existing regulations defining head of household. Consistent with the statutory amendments to the definition of a dependent, the proposed regulations provide rules on qualifying as a head of household by maintaining a household that is the principal place of abode of a qualifying child or a dependent. The proposed regulations on head of household apply the rules in the proposed regulations under section 152 for determining principal place of abode, including whether an absence is temporary.

c. Maintaining a Household

The proposed regulations provide that a taxpayer maintains a household only if the taxpayer pays more than one-half of the cost related to operating the household for the relevant period. Expenses related to operating the household include property taxes, mortgage interest, rent, utility charges, upkeep and repairs, property insurance, and food consumed on the premises. A taxpayer may treat a home’s fair market rental value as a cost of maintaining a household (instead of the sum of payments for mortgage interest, property taxes, and insurance). The proposed regulations provide rules that, in certain circumstances, prorate on a monthly basis the annual cost of maintaining a household when a qualifying child or dependent resides in the household for less than the entire taxable year. The

proposed regulations also, in certain circumstances, recognize the creation of a new household during a year and treat shared living quarters as separate households.

3. Tax Tables for Individuals

The proposed regulations remove from the regulations under section 3 references to the return of a surviving spouse being treated as a joint return to conform to the amendments made by the Tax Reform Act of 1969. The proposed regulations also update the regulations under section 3 to reflect current law.

4. Earned Income Credit

The proposed regulations conform the regulations under section 32 to amendments made to section 32 by WFTRA. Consistent with the 2010 repeal of section 3507 by the FAA Air Transportation Modernization and Safety Improvement Act, the proposed regulations delete the paragraphs of the regulations under section 32 discussing advance payment of the earned income credit.

In addition, the proposed regulations reflect a change in the IRS’s position on the interaction of sections 152(c)(4) and 32. Specifically, the proposed regulations provide that, if an individual meets the definition of a qualifying child under section 152(c)(1) for more than one taxpayer and the individual is not treated as the qualifying child of one such taxpayer under the tiebreaker rules of section 152(c)(4), then the individual also is not treated as a qualifying child of that taxpayer for purposes of section 32(c)(1)(A). Thus, that taxpayer may be an eligible individual under section 32(c)(1)(A)(ii) and may claim the childless EIC if he or she meets the other requirements of that section. The Treasury Department and the IRS have concluded that this change in position is consistent with the language and purpose of section 32 and will be less confusing to taxpayers and easier for the IRS to administer.

The problems with the current rule may be illustrated by the following example. Two sisters (B and C) live together and each of them is a low-income taxpayer. Neither has a child and each may claim the childless EIC under section 32(c)(1)(A)(ii). Later, B has a child, and B’s child meets the definition of a qualifying child under section 152(c)(1) for both B and C. The child is treated as the qualifying child of B under the tiebreaker rules of section 152(c)(4), and B may claim the EIC as an eligible individual with a qualifying child under section 32(c)(1)(A)(i). Under

the current rule, C would not be allowed to claim the childless EIC under section 32(c)(1)(A)(ii). The Treasury Department and the IRS have determined that allowing C to continue to claim the childless EIC after the child is born is equitable and consistent with the purpose of section 32 to assist working, low-income taxpayers. Accordingly, the proposed regulations provide that, if an individual is not treated as a qualifying child of a taxpayer after applying the tiebreaker rules of section 152(c)(4), then the individual will not prevent that taxpayer from qualifying for the childless EIC.

5. Additional Standard Deduction for the Aged and Blind

The proposed regulations remove the provisions on additional exemptions for age and blindness from the regulations under section 151 and add regulations under section 63 on the additional standard deduction for the aged and the blind to reflect the changes made by the Tax Reform Act of 1986. The proposed regulations amend the regulations under section 63 to remove a cross reference to now-repealed statutory provisions relating to a charitable deduction for taxpayers who do not itemize. To limit impediments to electronic filing, the proposed regulations also delete the requirement that a taxpayer claiming a tax benefit for blindness must attach a certificate or statement to the taxpayer’s tax return. Instead, a taxpayer must maintain the certificate or statement in the taxpayer’s records.

Applicability Date

These regulations are proposed to apply to taxable years beginning after the date the regulations are published as final regulations in the **Federal Register**. Pending the issuance of the final regulations, taxpayers may choose to apply these proposed regulations in any open taxable years.

Effect on Other Documents

When finalized, the proposed regulations will obsolete Rev. Rul. 57–344, Rev. Rul. 58–67, Rev. Rul. 58–302, Rev. Rul. 64–223, Rev. Rul. 65–307, Rev. Rul. 70–341, Rev. Rul. 74–153, Rev. Rul. 74–543, Rev. Rul. 79–173, Rev. Rul. 84–89, Notice 2006–86, and Notice 2008–5.

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. The regulations affect individuals and do not impose a

collection of information on small entities, therefore the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Statement of Availability of IRS Documents

IRS revenue procedures, revenue rulings, notices and other guidance cited in this preamble are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS Web site at <http://www.irs.gov>.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS, as prescribed in this preamble under the "Addresses" heading. The IRS and Treasury Department request comments on all aspects of the proposed rules. All comments will be available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal authors of these proposed regulations are Christina M. Glendening and Victoria J. Driscoll of the Office of Associate Chief Counsel (Income Tax and Accounting). However, other personnel from the Treasury Department and the IRS participated in the development of the regulations.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Withdrawal of Notice of Proposed Rulemaking

Accordingly, under authority of 26 U.S.C. 7805, the notice of proposed rulemaking (REG-107279-00) that was published in the **Federal Register** on

November 30, 2000 (65 FR 71277), is withdrawn.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 301 are proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.2–1 is revised to read as follows:

§ 1.2–1 Returns of surviving spouse and head of household.

(a) *In general.* Tax is determined under section 1(a) for a return of a surviving spouse, as defined in section 2(a) and § 1.2–2(a). Tax is determined under section 1(b) for a return of a head of household, as defined in section 2(b) and § 1.2–2(b).

(b) *Death of a spouse.* If married taxpayers have different taxable years solely because of the death of either spouse, the taxable year of the deceased spouse is deemed to end on the last day of the surviving spouse's taxable year for purposes of determining their eligibility to file a joint return for that year. For rules relating to filing a joint return in the year a spouse dies, see section 6013 and the related regulations.

(c) *Tax tables.* For rules on the use of the tax tables that apply to individuals, see section 3 and the related regulations.

(d) *Change in rates.* For the treatment of taxable years during which a change in the tax rates occurs, see section 15.

(e) *Applicability date.* This section applies to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 3.** Section 1.2–2 is revised to read as follows:

§ 1.2–2 Definitions and special rules.

(a) *Surviving spouse*—(1) *In general.* If a taxpayer is eligible to file a joint return under section 6013 (without applying section 6013(a)(3)) for the taxable year in which the taxpayer's spouse dies, the taxpayer qualifies as a surviving spouse for each of the two taxable years immediately following the year of the spouse's death if the taxpayer—

(i) Has not remarried before the close of the taxable year; and

(ii) Maintains as the taxpayer's home a household that is for the taxable year the principal place of abode of a son or daughter (including by adoption), stepson, or stepdaughter who is a member of the taxpayer's household and

who is a dependent of the taxpayer within the meaning of paragraph (a)(2) of this section.

(2) *Dependent.* An individual is a dependent of a taxpayer for purposes of this paragraph (a) if the taxpayer may claim a deduction under section 151 for the individual, without applying sections 152(b)(1), (b)(2), and (d)(1)(B).

(b) *Head of household*—(1) *In general.* A taxpayer qualifies as a head of household if the taxpayer is not married at the end of the taxable year, is not a surviving spouse, as defined in paragraph (a) of this section, and either—

(i) Maintains as the taxpayer's home a household that is for more than one-half of the taxable year the principal place of abode of a qualifying child or dependent of the taxpayer, within the meaning of paragraph (b)(2) of this section, who is a member of the taxpayer's household during that period; or

(ii) Maintains a household, whether or not the taxpayer's home, that is for the taxable year the principal place of abode of a parent of the taxpayer, within the meaning of paragraph (b)(3) of this section.

(2) *Qualifying child or dependent*—(i) *Qualifying child.* An individual is a qualifying child for purposes of this paragraph (b) if the individual is a qualifying child of the taxpayer as defined in section 152(c) and the related regulations, determined without applying section 152(e). However, if the individual is married at the end of the taxpayer's taxable year, the individual is not a qualifying child for purposes of this section if the individual is not the taxpayer's dependent because of the limitations of section 152(b)(2) (relating to an individual filing a joint return with his or her spouse) or 152(b)(3) (relating to individuals who are citizens or nationals of other countries).

(ii) *Dependent.* An individual is a dependent for purposes of this paragraph (b) if the individual is the taxpayer's dependent, within the meaning of section 152 without applying sections 152(d)(2)(H) (relating to an individual qualifying as a member of the household) and 152(d)(3) (relating to the special rule for multiple support agreements) for whom the taxpayer may claim a deduction under section 151.

(3) *Parent.* An individual is a parent of the taxpayer for purposes of this paragraph (b) if the individual is the taxpayer's father or mother, including a father or mother who legally adopted the taxpayer, and is the taxpayer's dependent within the meaning of section 152 without applying section 152(d)(3), relating to the special rule for

multiple support agreements, for whom the taxpayer may claim a deduction under section 151.

(4) *Limitation.* An individual may qualify only one taxpayer as a head of household for taxable years beginning in the same calendar year.

(5) *Marital status.* For purposes of this paragraph (b), the marital status of a taxpayer is determined at the end of the taxpayer's taxable year. A taxpayer is considered not married if the taxpayer is legally separated from the taxpayer's spouse under a decree of divorce or separate maintenance, if at any time during the taxable year the taxpayer's spouse is a nonresident alien, or if the provisions of section 7703(b) are satisfied. A taxpayer is considered married if the taxpayer's spouse, other than a spouse who is a nonresident alien, dies during the taxable year.

(6) *Nonresident alien.* A taxpayer does not qualify as a head of household if the taxpayer is a nonresident alien, as defined in section 7701(b)(1)(B), at any time during the taxable year.

(c) *Member of the household.* An individual is a member of a taxpayer's household if the individual and the taxpayer reside in the same living quarters and the taxpayer maintains the household, in part, for the benefit of the individual. An individual is a member of a taxpayer's household despite a temporary absence due to special circumstances. An individual is not treated as a member of the taxpayer's household if, at any time during the taxable year of the taxpayer, the relationship between the individual and the taxpayer violates local law. See § 1.152-4(c)(2) for rules relating to temporary absences.

(d) *Maintaining a household*—(1) *In general.* A taxpayer maintains a household only if during the taxable year the taxpayer pays more than one-half of the cost of operating the household for the mutual benefit of the residents. These expenses include property taxes, mortgage interest, rent, utility charges, upkeep and repairs, property insurance, and food consumed on the premises. A taxpayer may treat a home's fair market rental value as a cost of maintaining a household, instead of the sum of payments for property taxes, mortgage interest, and property insurance. Expenses of maintaining a household do not include—

(i) The cost of clothing, education, medical treatment, vacations, life insurance, and transportation;

(ii) The value of services performed in the household by the taxpayer or any other person qualifying the taxpayer as a head of household or as a surviving spouse; or

(iii) An expense paid or reimbursed by any other person.

(2) *Proration of costs.* In determining whether a taxpayer pays more than one-half of the cost of maintaining a household that is the principal place of abode of a qualifying child or dependent for less than a taxable year, the cost for the entire taxable year is prorated on the basis of the number of calendar months the qualifying child or dependent resides in the household. A period of less than a calendar month is treated as a full calendar month. Thus, for example, if the cost of maintaining a household for a taxable year is \$30,000, and a taxpayer shares a principal place of abode with a qualifying child or dependent from May 20 to December 31, the taxpayer must furnish more than \$10,000 ($8/12$ of $\$30,000 \times 50$ percent) in maintaining the household from May 1 to December 31 to satisfy the requirements of this paragraph (d).

(3) *New household.* If a new household is established during the taxpayer's taxable year (for example, if spouses separate and one moves out of the family home with the child), the cost of maintaining the new household for the year is the cost of maintaining that household beginning with the date the new household is established. If one spouse and the child remain in the family home and the other parent moves out of the home, the cost of maintaining the household for the year is the cost of maintaining the household beginning with the date the other spouse moves out.

(4) *Birth, death, adoption, or placement.* If an individual is a member of a household for less than a taxable year as a result of the individual's birth, death, adoption, or placement with a taxpayer for adoption or in foster care during that year, the requirement that the individual be a member of the household for more than one-half of the taxable year is satisfied if the individual is a member of the household for more than one-half of the period after the individual's birth, adoption, or placement for adoption or in foster care or before the individual's death.

(5) *Shared residence*—(i) *In general.* If two or more taxpayers not filing a joint return reside in the same living quarters, each taxpayer may be treated as maintaining a separate household if each provides more than one-half of the cost of maintaining the separate household. For this purpose, two households in the same living quarters are not considered separate households if any individual in one household is the spouse of any individual in the other household, or if any individual in one household may claim, or would

have priority under the tiebreaker rules in section 152(c)(4) to claim, any individual in the other household as a dependent.

(ii) *Examples.* The following examples illustrate the rules in this paragraph (d)(5). In each example, assume that if a taxpayer may be treated as residing in a separate household, that taxpayer provides more than one-half of the cost of maintaining that household.

Example 1. Two sisters and their respective children reside in the same living quarters. Neither sister may claim the other sister as a dependent. Each sister pays more than one-half of the expenses for herself and her children, and each sister claims each of her own children as a dependent. Because neither sister may claim the other sister as a dependent, and because neither sister would have priority to claim any of the other sister's children as a qualifying child under the tiebreaker rules of section 152(c)(4), each sister is treated as maintaining a separate household.

Example 2. A and B, an unmarried couple, have two children together (C1 and C2) and all four individuals live in the same living quarters for the entire tax year. Both A and B contribute to paying the expenses of the couple and the two children. A has higher adjusted gross income than B. Each parent files a tax return. Under the tiebreaker rules in section 152(c)(4), the parent with the higher adjusted gross income (in this case, A) would have priority to claim each child as a qualifying child if both claimed the child. As a result, B may not be treated as maintaining a separate household with either child or both children. Therefore, if B may be claimed as A's dependent, then all four individuals are members of the same household. However, if B may not be claimed as A's dependent, B may be treated as maintaining a separate household consisting solely of B, even if B claims one of the children as a dependent on B's return.

Example 3. The facts are the same as in *Example 2* of this paragraph (d)(5)(ii) except that A and B do not have any children together; C1 is the child of A and C2 is the child of B. Neither A nor B may claim the other as a dependent, and each parent pays more than one-half of the expenses for himself or herself and his or her child. Because neither A nor B may claim the other adult or the other adult's child as a dependent, each adult is treated as maintaining a separate household.

Example 4. Grandparent, Parent, and Child live together and Child meets the definition of a qualifying child for both Parent and Grandparent. Both Parent and Grandparent pay their respective expenses, and both contribute to paying Child's expenses. Neither Parent nor Grandparent may claim the other as a dependent. Under the tiebreaker rules of section 152(c)(4), Parent would have priority over Grandparent to claim Child as a qualifying child. Therefore, Grandparent may not be treated as maintaining a household for Grandparent and Child separate from the household of Parent. However, Parent may be treated as maintaining a household for Parent and

Child separate from the household of Grandparent.

(e) *Special rules for maintaining a household*—(1) *Principal place of abode*. For purposes of this section, the term *principal place of abode* has the same meaning as in section 152 and § 1.152-4(c).

(2) *Part-year residence*. If, during the taxable year, an individual who may qualify a taxpayer as head of household is born or dies, is adopted or lawfully placed for adoption with the taxpayer, is an eligible foster child, or is a missing child, whether the taxpayer maintained a household that is the principal place of abode of the individual for the required period is determined under § 1.152-4(d) and (e).

(3) *Change of location*. A taxpayer may maintain a household even though the physical location of the household changes.

(f) *Certain married individuals living apart*. An individual who is considered not married under section 7703(b) also is considered not married for all purposes of part I of subchapter A of chapter 1 of the Code.

(g) *Applicability date*. This section applies to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 4.** Section 1.3-1 is revised to read as follows:

§ 1.3-1 Tax tables for individuals.

(a) *In general*. Except as otherwise provided in paragraph (b) of this section, in lieu of the tax imposed by section 1, an individual who does not itemize deductions for the taxable year and whose taxable income for the taxable year does not exceed the ceiling amount as defined in paragraph (c) of this section, must determine his or her tax liability under the prescribed tax tables in tax forms and publications of the Internal Revenue Service. The individual must use the appropriate tax rate category under the tax tables. The tax imposed under section 3 and this section shall be treated as tax imposed by section 1.

(b) *Exceptions*. Section 3 and this section do not apply to (1) an individual making a return for a period of fewer than 12 months as a result of a change in annual accounting period, or (2) an estate or trust.

(c) *Ceiling amount defined*. The ceiling amount means the highest amount of taxable income for which a tax amount is determined in the tax tables for the tax rate category in which the taxpayer falls.

(d) *Special rule for surviving spouse*. A taxpayer filing as a surviving spouse

uses the same tax rate category as a taxpayer filing a joint return.

(e) *Applicability date*. This section applies to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 5.** Section 1.21-1 is amended by revising paragraph (a)(1), removing paragraph (h), redesignating paragraphs (j), (k), and (l) as paragraphs (h), (j), and (k), and revising newly redesignated paragraph (k) to read as follows:

§ 1.21-1 Expenses for household and dependent care services necessary for gainful employment.

(a) *In general*. (1) Section 21 allows a credit to a taxpayer against the tax imposed by chapter 1 for employment-related expenses for household services and care (as defined in paragraph (d) of this section) of a qualifying individual (as defined in paragraph (b) of this section). The purpose of the expenses must be to enable the taxpayer to be gainfully employed (as defined in paragraph (c) of this section). For taxable years beginning after December 31, 2004, a qualifying individual must have the same principal place of abode (as defined by paragraph (g) of this section) as the taxpayer for more than one-half of the taxable year.

* * * * *

(k) *Applicability date*—(1) *In general*. Except as provide in paragraph (k)(2) of this section, this section and §§ 1.21-2 through 1.21-4 apply to taxable years ending after August 14, 2007.

(2) *Exception*. Paragraph (a)(1) of this section applies to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 6.** Section 1.32-2 is amended by revising the section heading, adding paragraph (c)(3), and revising paragraph (e) to read as follows:

§ 1.32-2 Earned income credit.

* * * * *

(c) * * *

(3) *Qualifying child*—(i) *In general*. For purposes of this section, a qualifying child of the taxpayer is a qualifying child as defined in section 152(c), determined without applying sections 152(c)(1)(D) and 152(e).

(ii) *Application of tie-breaker rules*. For purposes of determining whether a taxpayer is an eligible individual under section 32(c)(1)(A), if an individual meets the definition of a qualifying child under paragraph (c)(3)(i) of this section for more than one taxpayer and the individual is treated as the qualifying child of a taxpayer under the tiebreaker rules of section 152(c)(4) and

the related regulations, then that taxpayer may be an eligible individual under section 32(c)(1)(A)(i) and may claim the earned income credit for a taxpayer with a qualifying child if all other requirements of section 32 are satisfied. If an individual meets the definition of a qualifying child under paragraph (c)(3)(i) of this section for more than one taxpayer and the individual is not treated as the qualifying child of a taxpayer under the tiebreaker rules of section 152(c)(4) and the related regulations, then the individual also is not treated as a qualifying child of that taxpayer in the taxable year for purposes of section 32(c)(1)(A). Thus, that taxpayer may be an eligible individual under section 32(c)(1)(A)(ii) and may claim the earned income credit for a taxpayer without a qualifying child if all other requirements are satisfied.

(iii) *Examples*. The following examples illustrate the rules of this paragraph (c). In each example, the taxpayer uses the calendar year as the taxpayer's taxable year and, except to the extent indicated, each taxpayer meets the requirements to claim the benefit(s) described in the example.

Example 1. Child, Parent, and Grandparent share the same principal place of abode for the taxable year. Child meets the definition of a qualifying child under paragraph (c)(3)(i) of this section for both Parent and Grandparent (and for no other person) for the taxable year. Parent claims the earned income credit with Child as Parent's qualifying child. Under the tiebreaker rules of section 152(c)(4)(A) and the related regulations, Child is treated as the qualifying child of Parent and is not treated as the qualifying child of Grandparent. Under section 32(c)(1) and paragraph (c)(3)(ii) of this section, Parent is an eligible individual under section 32(c)(1)(A)(i) who may claim the earned income credit for a taxpayer with a qualifying child, and Grandparent is an eligible individual under section 32(c)(1)(A)(ii) who may claim the earned income credit for a taxpayer without a qualifying child.

Example 2. The facts are the same as in *Example 1* of this paragraph (c)(3)(iii), except that Grandparent, rather than Parent, claims Child as a qualifying child, and Grandparent's adjusted gross income is higher than Parent's adjusted gross income. Under the tiebreaker rules of section 152(c)(4)(C) and the related regulations, Child is treated as the qualifying child of Grandparent and is not treated as the qualifying child of Parent. Under section 32(c)(1) and paragraph (c)(3)(ii) of this section, Grandparent is an eligible individual under section 32(c)(1)(A)(i) who may claim the earned income credit for a taxpayer with a qualifying child, and Parent is an eligible individual under section 32(c)(1)(A)(ii) who

may claim the earned income credit for a taxpayer without a qualifying child.

* * * * *

(e) *Applicability date*—(1) *In general.* Except as provided in paragraph (e)(2) of this section, this section applies to taxable years beginning after March 5, 2003.

(2) *Exception.* Paragraph (c)(3) of this section applies to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

§ 1.63–1 [Amended]

■ **Par. 7.** Section 1.63–1 is amended by:

■ 1. Removing the language “the zero bracket amount and” from the section heading.

■ 2. Removing the language “section 63(g)” and replacing it with the language “section 63(e)” in paragraph (a).

■ **Par. 8.** Section 1.63–2 is revised to read as follows:

§ 1.63–2 Standard deduction.

The standard deduction means the sum of the basic standard deduction and the additional standard deduction.

■ **Par. 9.** Section 1.63–3 is added to read as follows:

§ 1.63–3 Additional standard deduction for the aged and blind.

(a) *In general.* A taxpayer who, at the end of the taxable year, has attained age 65 or is blind is entitled to an additional standard deduction amount. The additional standard deduction amount is the sum of the amounts to which the taxpayer is entitled under paragraphs (b) and (c) of this section. If an individual meets the requirements for both the additional amount for the aged and the additional amount for the blind, the taxpayer is entitled to both additional amounts.

(b) *Additional amount for the aged*—(1) *Aged taxpayer or spouse.* A taxpayer is entitled to an additional amount under section 63(f)(1) if the taxpayer has attained age 65 before the end of the taxable year. If spouses file a joint return, each spouse who has attained age 65 before the end of the taxable year for which the spouses file the joint return is entitled to an additional amount. A married taxpayer who files a separate return is entitled to an additional amount for the taxpayer's spouse if the spouse has attained age 65 before the end of the taxable year and, for the calendar year in which the taxable year of the taxpayer begins, the spouse has no gross income and is not the dependent of another taxpayer. The taxpayer is not entitled to an additional amount if the spouse dies before

attaining age 65, even though the spouse would have attained age 65 before the end of the taxpayer's taxable year.

(2) *Age determined.* For purposes of section 63(f) and this paragraph (b), a taxpayer's age is determined as of the last day of the taxpayer's taxable year. A person attains the age of 65 on the first moment of the day preceding his or her sixty-fifth birthday.

(c) *Additional amount for the blind*—(1) *Blind taxpayer or spouse.* A taxpayer is entitled to an additional amount under section 63(f)(2) if the taxpayer is blind at the end of the taxable year. If spouses file a joint return, each spouse who is blind at the end of the taxable year for which the spouses file the joint return is entitled to an additional amount. A married taxpayer who files a separate return is entitled to an additional amount for the taxpayer's spouse if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, the spouse has no gross income and is not the dependent of another taxpayer. If the spouse dies during the taxable year, the date of death is the time for determining the spouse's blindness.

(2) *Blindness determined.* A taxpayer who claims an additional amount allowed by section 63(f)(2) for the blind must maintain in the taxpayer's records a statement from a physician skilled in the diseases of the eye or a registered optometrist stating that the physician or optometrist has examined the person for whom the additional amount is claimed and, in the opinion of the physician or optometrist, the person's central visual acuity did not exceed 20/200 in the better eye with correcting lenses, or the person's visual acuity was accompanied by a limitation in the field of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees. The statement must provide that the physician or optometrist examined the person in the taxpayer's taxable year for which the amount is claimed, or that the physician or optometrist examined the person in an earlier year and that the visual impairment is irreversible.

(d) *Applicability date.* This section and §§ 1.63–1(a) and 1.63–2 apply to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 10.** Section 1.151–1 is amended by revising paragraphs (a)(1), (c), and (d) to read as follows:

§ 1.151–1 Deductions for personal exemptions.

(a) * * * (1) In computing taxable income, an individual is allowed a deduction for the exemptions for an

individual taxpayer and spouse (the personal exemptions) and the exemption for a dependent of the taxpayer.

* * * * *

(c) *Additional exemption for dependent.* Section 151(c) allows a taxpayer an exemption for each individual who is a dependent (as defined in section 152) of the taxpayer for the taxable year. See §§ 1.152–1 through 1.152–5 for rules relating to dependents.

(d) *Applicability date.* Paragraphs (a)(1) and (c) of this section apply to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

§§ 1.151–2, 1.151–3, and 1.151–4 [Removed]

■ **Par. 11.** Sections 1.151–2, 1.151–3, and 1.151–4 are removed.

■ **Par. 12.** Section 1.152–0 is added under the undesignated center heading Deductions for Personal Exemptions to read as follows:

§ 1.152–0 Table of contents.

This section lists the captions contained in § 1.152–1 through § 1.152–5.

§ 1.152–1 General rules for dependents.

(a) In general.

(1) Dependent defined.

(2) Exceptions.

(i) Dependents ineligible.

(ii) Married dependents.

(iii) Citizens or nationals of other countries.

(b) Definitions.

(1) Child.

(i) In general.

(ii) Adopted child.

(iii) Eligible foster child.

(iv) Authorized placement agency.

(2) Student.

(3) Brother and sister.

(4) Parent.

(c) Applicability date.

§ 1.152–2 Qualifying child.

(a) In general.

(b) Qualifying child relationship test.

(c) Residency test.

(d) Age test.

(1) In general.

(2) Disabled individual.

(e) Qualifying child support test.

(f) Joint return test.

(g) Child who is eligible to be claimed as a qualifying child by more than one taxpayer.

(1) In general.

(i) More than one eligible parent.

(ii) Eligible parent not claiming.

(iii) One eligible parent and other eligible taxpayer(s).

(iv) No eligible parent.

(2) Determination of adjusted gross income of a person who files a joint return.

(3) Coordination with other provisions.

(4) Examples.

§ 1.152–3 Qualifying relative.

(a) In general.

- (b) Qualifying relative relationship test.
- (c) Gross income test.
 - (1) In general.
 - (2) Income of disabled or handicapped individuals.
 - (d) Qualifying relative support test.
 - (1) In general.
 - (2) Certain income of taxpayer's spouse.
 - (3) Support from stepparent.
 - (4) Multiple support agreements.
 - (e) Not a qualifying child test.
 - (1) In general.
 - (2) Examples.
- § 1.152-4 Rules for a qualifying child and a qualifying relative.
 - (a) Support.
 - (1) In general.
 - (2) Payments made during the year for unpaid or future support.
 - (3) Governmental payments.
 - (i) Governmental payments as support.
 - (A) In general.
 - (B) Examples.
 - (ii) Governmental payments based on a taxpayer's contributions.
 - (A) In general.
 - (B) Examples.
 - (iii) Payments used for support of another individual.
 - (4) Medical insurance.
 - (5) Medical care payments from personal injury claim.
 - (6) Scholarships.
 - (b) Relationship test.
 - (1) Joint return.
 - (2) Divorce or death of spouse.
 - (c) Principal place of abode.
 - (1) In general.
 - (2) Temporary absence.
 - (3) Residing with taxpayer for more than one-half of the taxable year.
 - (i) In general.
 - (ii) Nights of residence.
 - (A) Nights counted.
 - (B) Night straddling two taxable years.
 - (C) Exception for a parent who works at night.
 - (D) Absences.
 - (4) Examples.
 - (d) Residence for a portion of a taxable year because of special circumstances.
 - (1) Individual who is born or dies during the year.
 - (2) Adopted child or foster child.
 - (e) Missing child.
 - (1) Qualifying child.
 - (2) Qualifying relative.
 - (3) Age limitation.
 - (4) Application.
 - § 1.152-5 Special rule for a child of divorced or separated parents or parents who live apart.
 - (a) In general.
 - (b) Release of claim by custodial parent.
 - (1) In general.
 - (2) Support, custody, and parental status.
 - (i) In general.
 - (ii) Multiple support agreement.
 - (3) Release of claim to child.
 - (c) Custody.
 - (d) Custodial parent.
 - (1) In general.
 - (2) Night straddling taxable years.
 - (3) Absences.
 - (4) Special rule for equal number of nights.
 - (5) Exception for a parent who works at night.

- (e) Written declaration.
 - (1) Form of declaration.
 - (i) In general.
 - (ii) Form designated by IRS.
 - (2) Attachment to return.
 - (i) In general.
 - (ii) Examples.
 - (3) Revocation of written declaration.
 - (i) In general.
 - (ii) Form of revocation.
 - (iii) Attachment to return.
 - (4) Ineffective declaration or revocation.
 - (5) Written declaration executed in a taxable year beginning on or before July 2, 2008.
 - (f) Coordination with other sections.
 - (g) Examples.
 - (h) Applicability date.
 - (1) In general.
 - (2) Exception.

■ **Par. 13.** Section 1.152-1 is revised to read as follows:

§ 1.152-1 General rules for dependents.

(a) *In general*—(1) *Dependent defined*. Except as provided in section 152(b) and paragraph (a)(2) of this section, the term *dependent* means a qualifying child as described in § 1.152-2 or a qualifying relative as described in § 1.152-3. In general, an individual may be treated as the dependent of only one taxpayer for taxable years beginning in the same calendar year.

(2) *Exceptions*—(i) *Dependents ineligible*. If an individual is a dependent of a taxpayer for a taxable year of the taxpayer, the individual is treated as having no dependents for purposes of section 152 and the related regulations in the individual's taxable year beginning in the calendar year in which that taxable year of the taxpayer begins. For purposes of this paragraph (a)(2)(i), an individual is not a dependent of a person if that person is not required to file an income tax return under section 6012 and either does not file an income tax return or files an income tax return solely to claim a refund of estimated or withheld taxes.

(ii) *Married dependents*. An individual is not treated as a dependent of a taxpayer for a taxable year of the taxpayer if the individual files a joint return, other than solely to claim a refund of estimated or withheld taxes, with the individual's spouse under section 6013 for the taxable year beginning in the calendar year in which that taxable year of the taxpayer begins.

(iii) *Citizens or nationals of other countries*. An individual who is not a citizen or national of the United States is not treated as a dependent of a taxpayer unless the individual is a resident, as defined in section 7701(b), of the United States or of a country contiguous to the United States (Canada or Mexico). This limitation, however,

does not apply to an adopted child, as defined in section 152(f)(1)(B) and paragraph (b)(1)(ii) of this section, if the taxpayer is a citizen or national of the United States and the child has the same principal place of abode as the taxpayer and is a member of the taxpayer's household, within the meaning of §§ 1.152-4(c) and 1.2-2(c), respectively, for the taxpayer's taxable year. See § 1.152-4(d)(2) for rules relating to residence for a portion of a taxable year. A taxpayer and the child have the same principal place of abode for the taxpayer's taxable year if the taxpayer and child have the same principal place of abode for the entire portion of the taxable year following the placement of the child with the taxpayer.

(b) *Definitions*. The following definitions apply for purposes of section 152 and the related regulations.

(1) *Child*—(i) *In general*. The term *child* means a son, daughter, stepson, or stepdaughter, or an eligible foster child, within the meaning of paragraph (b)(1)(iii) of this section, of the taxpayer.

(ii) *Adopted child*. In determining whether an individual bears any of the relationships described in paragraph (b)(1)(i) of this section, § 1.152-2(b), or § 1.152-3(b), a legally adopted child of a person, or a child who is lawfully placed with a person for legal adoption by that person, is treated as a child by blood of that person. A child lawfully placed with a person for legal adoption by that person includes a child placed for legal adoption by a parent, an authorized placement agency, or any other person(s) authorized by law to place a child for legal adoption.

(iii) *Eligible foster child*. The term *eligible foster child* means a child who is placed with a person by an authorized placement agency or by judgment, decree, or other order of any court of competent jurisdiction.

(iv) *Authorized placement agency*. The term *authorized placement agency* means a State, the District of Columbia, a possession of the United States, a foreign country, an Indian Tribal Government (ITG) (as defined in section 7701(a)(40)), or an agency or organization that is authorized by a State, the District of Columbia, a possession of the United States, a foreign country, an ITG, or a political subdivision of any of the foregoing, to place children for legal adoption or in foster care.

(2) *Student*. The term *student* means an individual who, for some part of each of five calendar months, whether or not consecutive, during the calendar year in which the taxable year of the taxpayer begins, either is a full-time student at an

educational organization, as defined in section 170(b)(1)(A)(ii), or is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational organization or of a State or political subdivision of a State. A full-time student is one who is enrolled for the number of hours or courses that the educational organization considers full-time attendance.

(3) *Brother and sister.* The terms *brother* and *sister* include a brother or sister by half blood.

(4) *Parent.* The term *parent* refers to a biological or adoptive parent of an individual. It does not include a stepparent who has not adopted the individual.

(c) *Applicability date.* This section, and §§ 1.152–2, 1.152–3, and 1.152–4 apply to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

■ **Par. 14.** Section 1.152–2 is revised to read as follows:

§ 1.152–2 Qualifying child.

(a) *In general.* The term *qualifying child* of a taxpayer for a taxable year means an individual who satisfies the tests described in paragraphs (b), (c), (d), (e), and (f) of this section. If an individual satisfies the definition of a qualifying child for more than one taxpayer, then the tiebreaker rules in paragraph (g) of this section apply. See, however, section 152(e) and § 1.152–5 for a special rule for a child of divorced or separated parents or parents who live apart.

(b) *Qualifying child relationship test.* The individual must bear one of the following relationships to the taxpayer—

(1) A child of the taxpayer or descendant of such a child; or
(2) A brother, sister, stepbrother, or stepsister of the taxpayer, or a descendant of any of these relatives.

(c) *Residency test.* The individual must have the same principal place of abode as the taxpayer for more than one-half of the taxable year. Generally, an individual has the same principal place of abode as the taxpayer for more than one-half of the taxable year if the individual resides with the taxpayer for more than one-half of the taxable year. See § 1.152–4(c) for rules relating to principal place of abode and temporary absence and for determining whether an individual resides with the taxpayer for more than one-half of the taxable year.

(d) *Age test—(1) In general.* The individual must be younger than the taxpayer claiming the individual as a qualifying child and must not have

attained the age of 19, or age 24 if the individual is a student within the meaning of § 1.152–1(b)(2), as of the end of the calendar year in which the taxpayer's taxable year begins. For purposes of this section, an individual attains an age on the anniversary of the individual's birth.

(2) *Disabled individual.* This age requirement is treated as satisfied if the individual is permanently and totally disabled, as defined in section 22(e)(3), at any time during the calendar year.

(e) *Qualifying child support test.* The individual must not provide more than one-half of the individual's own support for the calendar year in which the taxpayer's taxable year begins. See § 1.152–4(a) for rules relating to the definition and sources of an individual's support.

(f) *Joint return test.* The individual must not file a joint return, other than solely to claim a refund of estimated or withheld taxes, under section 6013 with the individual's spouse for the taxable year beginning in the calendar year in which the taxpayer's taxable year begins.

(g) *Child who is eligible to be claimed as a qualifying child by more than one taxpayer—(1) In general.* Under section 152(c)(4), if an individual satisfies the definition of a qualifying child for two or more taxpayers (eligible taxpayers) for a taxable year beginning in the same calendar year, the following rules apply.

(i) *More than one eligible parent.* If more than one eligible taxpayer is a parent of the individual (eligible parent), any one of the eligible parents may claim the individual as a qualifying child. However, if more than one eligible parent claims the individual as a qualifying child, and those eligible parents do not file a joint return with each other, the individual is treated as the qualifying child of the eligible parent claiming the individual with whom the individual resides for the longest period of time during the taxable year as determined under § 1.152–4(c)(3). If the individual resides for the same amount of time during the taxable year with each eligible parent claiming the child, the individual is treated as the qualifying child of the eligible parent with the highest adjusted gross income who claims the individual.

(ii) *Eligible parent not claiming.* If at least one eligible taxpayer is a parent of the individual, but no eligible parent claims the individual as a qualifying child, the individual may be treated as the qualifying child of another eligible taxpayer only if that taxpayer's adjusted gross income exceeds both the adjusted gross income of each eligible parent of the individual and the adjusted gross

income of each other eligible taxpayer, if any.

(iii) *One eligible parent and other eligible taxpayer(s).* Except as provided in paragraph (g)(1)(i) or (ii) of this section, if there are two or more eligible taxpayers, only one of whom is the parent of the individual, the individual is treated as the qualifying child of the eligible parent.

(iv) *No eligible parent.* If no eligible taxpayer is a parent of the individual, the individual is treated as the qualifying child of the eligible taxpayer with the highest adjusted gross income for the taxable year.

(2) *Determination of adjusted gross income of a person who files a joint return.* For purposes of section 152 and the related regulations, the adjusted gross income of each person who files a joint return is the total adjusted gross income shown on the joint return.

(3) *Coordination with other provisions.* Except to the extent that section 152(e) and § 1.152–5 apply, if more than one taxpayer may claim a child as a qualifying child, the child is treated as the qualifying child of only one taxpayer for purposes of head of household filing status under section 2(b), the child and dependent care credit under section 21, the child tax credit under section 24, the earned income credit under section 32, the exclusion from income for dependent care assistance under section 129, and the dependency exemption under section 151. Thus, the taxpayer claiming the individual as a qualifying child under any one of these sections is the only taxpayer who may claim any credit or exemption under these other sections for that same individual for a taxable year beginning in the same calendar year as the taxpayer's taxable year. If section 152(e) applies, however, the noncustodial parent may claim the child as a qualifying child for purposes of the dependency exemption and the child tax credit, and another person may claim the child for purposes of one or more of these other provisions. See § 1.152–5 for rules under section 152(e).

(4) *Examples.* The following examples illustrate the rules in this paragraph (g). In the examples, each taxpayer uses the calendar year as the taxpayer's taxable year, the child is a qualifying child (as described in section 152(c) and this section) of each taxpayer, and, except to the extent indicated, each taxpayer meets the requirements to claim the benefit(s) described in the example.

Example 1. (i) A and B, parents of Child, are married to each other. A, B, and Child share the same principal place of abode for the first 8 months of the year. Thus, both parents satisfy the qualifying child residency

test of paragraph (c) of this section. For the last 4 months of the year, the parents live apart from each other, and B and Child share the same principal place of abode. Section 152(e), relating to divorced or separated parents, does not apply. The parents file as married filing separately for the taxable year, and both parents claim Child as a qualifying child.

(ii) Under paragraph (g)(1)(i) of this section, Child is treated as a qualifying child of B for all purposes, because Child resided with B for the longer period of time during the taxable year. Because section 152(e) does not apply, Child may not be treated as a qualifying child of A for any purpose.

Example 2. (i) The facts are the same as in *Example 1* of this paragraph (g)(4), except that B does not claim Child as a qualifying child.

(ii) Because A and B are not both claiming the same child as a qualifying child, under paragraph (g)(1)(i) of this section, Child is treated as a qualifying child of A.

Example 3. (i) Child, Child's parent (D), and Grandparent share the same principal place of abode. D is not married and is not a qualifying child or dependent of Grandparent, and Grandparent is not D's dependent. Section 152(e), relating to divorced or separated parents, does not apply. Under paragraph (a) of this section, Child meets the definition of a qualifying child of both D and Grandparent. D claims Child as a qualifying child for purposes of the child and dependent care credit under section 21, the earned income credit under section 32, and the dependency exemption under section 151. Grandparent claims Child as a qualifying child for purposes of head of household filing status under section 2(b).

(ii) Under paragraph (g)(1)(iii) of this section, Child is treated as the qualifying child of D for all purposes, because D is eligible to claim and claims Child as D's qualifying child. Because D is eligible to claim and claims Child as D's qualifying child, under paragraph (g)(3) of this section, Child may not be treated as a qualifying child of Grandparent for any purpose. Grandparent erroneously claimed Child as Grandparent's qualifying child for purposes of head of household filing status under section 2(b). If D had not claimed Child as D's qualifying child for any purpose, under paragraph (g)(1)(ii) of this section, Grandparent could have claimed Child as Grandparent's qualifying child if Grandparent's adjusted gross income (AGI) exceeded D's AGI. In that situation, under paragraph (g)(3) of this section, Grandparent could have claimed Child as Grandparent's qualifying child for purposes of any of the child-related tax benefits, provided that Grandparent had met the requirements of those sections.

Example 4. (i) The facts are the same as in *Example 3* of this paragraph (g)(4), except that Child's parents, D and E, are married to each other and share the same principal place of abode with Child and Grandparent for the entire taxable year. Under paragraph (a) of this section, Child meets the definition of a qualifying child of both parents and Grandparent. D and E file a joint return for the taxable year and do not claim Child as a qualifying child for any purpose.

(ii) Because D or E may claim Child as a qualifying child but neither claims Child as a qualifying child for any purpose, under paragraph (g)(1)(ii) of this section, Grandparent may claim Child as a qualifying child if Grandparent's AGI exceeds the total AGI reported on the joint return of D and E.

Example 5. (i) The facts are the same as in *Example 4* of this paragraph (g)(4), except that D and E are divorced from each other, E moved into a separate residence during that year and is the noncustodial parent, and section 152(e), relating to divorced or separated parents, applies. E attaches to E's return a Form 8332 on which D agrees to release D's claim to a dependency exemption for Child and E claims Child as a qualifying child for purposes of the dependency exemption and the child tax credit.

(ii) Under paragraph (g)(3) of this section, Child is treated as a qualifying child of E for purposes of the dependency exemption and the child tax credit. Child may be treated as a qualifying child of D for purposes of the earned income credit. If D claims Child as a qualifying child for purposes of the earned income credit, under paragraph (g)(1)(iii) of this section, Child may not be treated as a qualifying child of Grandparent for any purpose.

Example 6. (i) F and G, parents of two children, are married to each other. F, G, and both children share the same principal place of abode for the entire taxable year. F and G file as married filing separately for the taxable year. F claims the older child as a qualifying child for purposes of the child tax credit, dependency exemption, and the child and dependent care credit. G claims the younger child as a qualifying child for purposes of the same three tax benefits.

(ii) The older child is treated as a qualifying child of F and the younger child is treated as a qualifying child of G. The tiebreaker rule of paragraph (g)(1)(i) of this section does not apply because F and G are not claiming the same child as a qualifying child.

■ **Par. 15.** Section 1.152-3 is revised to read as follows:

§ 1.152-3 Qualifying relative.

(a) *In general.* The term *qualifying relative* of a taxpayer for a taxable year means an individual who satisfies the tests described in paragraphs (b), (c), (d), and (e) of this section. See, however, section 152(e) and § 1.152-5 for a special rule for a child of divorced or separated parents or parents who live apart.

(b) *Qualifying relative relationship test.* The individual must bear one of the following relationships to the taxpayer:

- (1) A child or descendant of a child;
- (2) A brother, sister, stepbrother, or stepsister;
- (3) A father or mother, or an ancestor of either;
- (4) A stepfather or stepmother;
- (5) A niece or nephew;
- (6) An aunt or uncle;

(7) A son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law; or

(8) An individual (other than one who at any time during the taxable year was the taxpayer's spouse, determined without regard to section 7703) who for the taxable year of the taxpayer has the same principal place of abode as the taxpayer and is a member of the taxpayer's household. See § 1.2-2(c) for the definition of a member of the household, and § 1.152-4(c) for rules relating to the meaning of principal place of abode and the meaning of temporary absence.

(c) *Gross income test*—(1) *In general.* The individual's gross income for the calendar year in which the taxable year begins must be less than the exemption amount as defined in section 151(d).

(2) *Income of disabled or handicapped individuals.* For purposes of paragraph (c)(1) of this section, the gross income of an individual who is permanently and totally disabled, as defined in section 22(e)(3), at any time during the taxable year does not include income for services performed by the individual at a sheltered workshop, as defined in section 152(d)(4)(B), if—

(i) The principal reason for the individual's presence at the workshop is the availability of medical care there; and

(ii) The individual's income arises solely from activities at the workshop that are incident to the medical care.

(d) *Qualifying relative support test*—(1) *In general.* The individual must receive over one-half of the individual's support from the taxpayer for the calendar year in which the taxpayer's taxable year begins. See § 1.152-4(a) for rules relating to support.

(2) *Certain income of taxpayer's spouse.* A payment to a spouse that is includible in the payee spouse's gross income under section 71 (relating to alimony and separate maintenance payments) or section 682 (relating to income of an estate or trust in the case of divorce) is not treated as a payment by the payor spouse for the support of any dependent.

(3) *Support from stepparent.* Any support provided to or for the benefit of an individual by a stepparent of the individual is treated as support provided by the individual's parent who is married to the stepparent.

(4) *Multiple support agreements.* If more than one-half of an individual's support is provided by two or more persons together, a taxpayer is treated as having contributed over one-half of the support of that individual for the calendar year if—

(i) No one person contributes more than one-half of the individual's support;

(ii) Each member of the group that collectively contributes more than one-half of the support of the individual would have been entitled to claim the individual as a dependent for a taxable year beginning in that calendar year but for the fact that the group member alone did not contribute more than one-half of the individual's support;

(iii) The taxpayer claiming the individual as a qualifying relative contributes more than 10 percent of the individual's support; and

(iv) Each other group member who contributes more than 10 percent of the support of the individual furnishes to the taxpayer claiming the individual as a dependent a written declaration that the other person will not claim the individual as a dependent for any taxable year beginning in that calendar year.

(e) *Not a qualifying child test*—(1) *In general.* The individual must not be a qualifying child of the taxpayer or of any other taxpayer for any taxable year beginning in the calendar year in which the taxpayer's taxable year begins. An individual is not a qualifying child of a person, however, if that person is not required to file an income tax return under section 6012, and either does not file an income tax return or files an income tax return solely to claim a refund of estimated or withheld taxes.

(2) *Examples.* The following examples illustrate the rules in this paragraph (e). In each example, each taxpayer uses the calendar year as the taxpayer's taxable year, and except to the extent otherwise indicated, each taxpayer meets the requirements to claim the benefits described in the example.

Example 1. For the taxable year, B provides more than one-half of the support of an unrelated friend, C, and C's 3-year-old child, D, who are members of B's household. No taxpayer other than C is eligible to claim D as a qualifying child. C has no gross income, is not required by section 6012 to file a Federal income tax return, and does not file a Federal income tax return for the taxable year. Under paragraph (e)(1) of this section, because C does not have a filing requirement and does not file an income tax return, D is not treated as a qualifying child of C, and B may claim both C and D as B's qualifying relatives.

Example 2. The facts are the same as in *Example 1* of this paragraph (e)(2) except that C has earned income of \$1,500 during the taxable year, had income tax withheld from C's wages, and is not required by section 6012 to file an income tax return. C files an income tax return solely to obtain a refund of withheld taxes and does not claim the earned income credit under section 32. Under paragraph (e)(1) of this section,

because C does not have a filing requirement and files only to obtain a refund of withheld taxes, D is not treated as a qualifying child of C, and B may claim both C and D as B's qualifying relatives.

Example 3. The facts are the same as in *Example 2* of this paragraph (e)(2) except that C's earned income is more than the amount of the dependency exemption for that year. C files an income tax return for the taxable year to obtain a refund of withheld taxes and claims the earned income credit. Because C filed an income tax return to obtain the earned income credit and not solely to obtain a refund of withheld taxes, D is a qualifying child of a taxpayer (C), and B may not claim D as a qualifying relative. B also may not claim C as a qualifying relative because C fails the gross income test under paragraph (c) of this section.

■ **Par. 16.** Redesignate § 1.152–4 as § 1.152–5, and add a new § 1.152–4 to read as follows:

§ 1.152–4 Rules for a qualifying child and a qualifying relative.

(a) *Support*—(1) *In general.* The term *support* includes food, shelter, clothing, medical and dental care, education, and similar items. Support does not include an individual's Federal, State, and local income taxes paid from the individual's own income or assets, Social Security and Medicare taxes under section 3101 paid from the individual's own income, life insurance premiums, or funeral expenses. In determining whether an individual provided more than one-half of the individual's own support for purposes of § 1.152–2(e), or whether a taxpayer provided more than one-half of an individual's support for purposes of § 1.152–3(d), the amount of support provided by the individual, or the taxpayer, is compared to the total amount of the individual's support from all sources. For these purposes, except as otherwise provided in this paragraph (a), the amount of an individual's total support is the amount of support from all sources, and includes support the individual provides and amounts that are excludable from gross income. Generally, the amount of an item of support is the amount of expense paid or incurred to furnish the item of support. If the item of support furnished is property or a benefit, such as lodging, however, the amount of the item of support is the fair market value of the item.

(2) *Payments made during the year for unpaid or future support.* For purposes of determining the amount of support provided in a calendar year, an amount paid in a calendar year after the calendar year in which the liability is incurred is treated as paid in the year of payment. An amount paid in a calendar year before due, whether or not made in the form of a lump sum payment in

settlement of a person's liability for support, is treated as support paid during the calendar year of payment rather than the calendar year when payment is due. A payment of a liability from amounts set aside in trust in a prior year is treated as made in the year in which the liability is paid.

(3) *Governmental payments*—(i) *Governmental payments as support*—(A) *In general.* Except as provided in paragraph (a)(3)(iii) of this section, governmental payments and subsidies for an item of support are support provided by a third party, the government.

(B) *Examples.* Payments of Temporary Assistance for Needy Families (42 U.S.C. 601–619), low-income housing assistance (42 U.S.C. 1437f), Supplemental Nutrition Assistance Program benefits (7 U.S.C. chapter 51), Supplemental Security Income payments (42 U.S.C. 1381–1383f), foster care maintenance payments, and adoption assistance payments are governmental payments and subsidies for an item of support as described in paragraph (a)(3)(i)(A) of this section.

(ii) *Governmental payments based on a taxpayer's contributions*—(A) *In general.* Except as provided in paragraph (a)(3)(iii) of this section, governmental payments based on a taxpayer's earnings and contributions into the Social Security system are support provided by the individual for whose benefit the payments are made to the extent those payments are used for that individual's support.

(B) *Examples.* Social Security old age benefits under section 202(b) of Title II of the Social Security Act (SSA) (42 U.S.C. 402) are governmental payments based on a taxpayer's earnings and contributions into the Social Security system as described in paragraph (a)(3)(ii)(A) of this section. Similarly, Social Security survivor and disability insurance benefits paid under section 202(d) of the SSA to, or for the benefit of, the child of a deceased or disabled parent are treated as support provided by the child to the extent those payments are used for the child's support.

(iii) *Payments used for support of another individual.* Governmental payments and subsidies described in paragraph (a)(3)(i) of this section and governmental payments described in paragraph (a)(3)(ii) of this section that are used by the recipient or other intended beneficiary to support another person are support of that person provided by the recipient or other intended beneficiary, rather than support provided by a third party, the government.

(4) *Medical insurance.* Medical insurance premiums, including Part A Basic Medicare premiums, if any, under Title XVIII of the Social Security Act (42 U.S.C. 1395c to 1395i-5), Part B Supplemental Medicare premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395j to 1395w-6), Part C Medicare + Choice Program premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395w-21 to 1395w-29), and Part D Voluntary Prescription Drug Benefit Medicare premiums under Title XVIII of the Social Security Act (42 U.S.C. 1395w-101 to 1395w-154), are treated as support. Medical insurance proceeds, including benefits received under Medicare Part A, Part B, Part C, and Part D, are not treated as items of support and are disregarded in determining the amount of the individual's support. Services provided to an individual under the medical and dental care provisions of the Armed Forces Act (10 U.S.C. chapter 55) are not treated as support and are disregarded in determining the amount of the individual's support.

(5) *Medical care payments from personal injury claim.* Payments for the medical care of an injured individual from a third party, including a third party's insurance company, in satisfaction of a legal claim for the personal injury of the individual are not treated as items of support and are disregarded in determining the amount of the individual's support.

(6) *Scholarships.* Amounts a student who is the child of the taxpayer receives as a scholarship for study at an educational organization described in section 170(b)(1)(A)(ii) are not treated as an item of support and are disregarded in determining the amount of the student's support.

(b) *Relationship test*—(1) *Joint return.* A taxpayer may satisfy the relationship test described in § 1.152-2(b) (relating to a qualifying child) or in § 1.152-3(b) (relating to a qualifying relative) if a described relationship exists between an individual and the taxpayer claiming that individual as a qualifying child or qualifying relative, even though the taxpayer files a joint return with his or her spouse who does not have a described relationship with the individual.

(2) *Divorce or death of spouse.* If the relationship between the taxpayer and an individual claimed by that taxpayer as a dependent results from a marriage, the taxpayer's qualifying relationship with the individual continues after the termination of the marriage by divorce or death.

(c) *Principal place of abode*—(1) *In general.* The term *principal place of*

abode of a person means the primary or main home or dwelling where the person resides. A person's principal place of abode need not be the same physical location throughout the taxable year and may be temporary lodging such as a homeless shelter or relief housing resulting from displacement caused by a natural disaster.

(2) *Temporary absence.* The taxpayer and an individual have the same principal place of abode despite a temporary absence by either person because of special circumstances. An absence is temporary if the person would have resided at the place of abode but for the absence and, under the facts and circumstances, it is reasonable to assume that the person will return to reside at the place of abode. An individual who does not reside with the taxpayer because of a temporary absence is treated as residing with the taxpayer. For example, a nonpermanent failure to occupy the abode by reason of illness, education, business, vacation, military service, institutionalized care for a child who is totally and permanently disabled (as defined in section 22(e)(3)), or incarceration may be treated as a temporary absence because of special circumstances. If an infant must remain in a hospital for a period of time after birth and would have resided with the taxpayer during that period but for the hospitalization, the infant is treated as having the same principal place of abode as the taxpayer during the period of hospitalization.

(3) *Residing with taxpayer for more than one-half of the taxable year*—(i) *In general.* An individual has the same principal place of abode as the taxpayer for more than one-half of the taxable year if the individual resides with the taxpayer for at least 183 nights during the taxpayer's taxable year, or 184 nights if the taxable year includes a leap day.

(ii) *Nights of residence*—(A) *Nights counted.* For purposes of determining whether an individual resides with the taxpayer for more than one-half of the taxable year, an individual resides with a taxpayer for a night if the individual sleeps—

(1) At the taxpayer's principal place of abode, whether or not the taxpayer is present; or

(2) In the company of the taxpayer when the individual does not sleep at the taxpayer's principal place of abode (for example, when the taxpayer and the individual are on vacation).

(B) *Night straddling two taxable years.* If an individual resides with a taxpayer for a night that extends over two taxable years, that night is allocated to the taxable year in which the night begins.

(C) *Exception for a parent who works at night.* If, in a calendar year, because of a taxpayer's nighttime work schedule, an individual resides for at least 183 days, or 184 days if the taxable year includes a leap day, but not nights with the taxpayer, the individual is treated as residing with the taxpayer for more than one-half of the taxable year.

(D) *Absences.* An individual who does not reside with a taxpayer for a night because of a temporary absence as described in paragraph (c)(2) of this section is treated as residing with the taxpayer for that night if the individual would have resided with the taxpayer for that night but for the absence.

(4) *Examples.* The following examples illustrate the rules of this paragraph (c). In each example, each taxpayer uses the calendar taxable year, and section 152(e) does not apply.

Example 1. B and C are the divorced parents of Child. In 2015, Child sleeps at B's principal place of abode for 210 nights and at C's principal place of abode for 155 nights. Under paragraph (c)(3) of this section, Child resides with B for at least 183 nights during 2015 and has the same principal place of abode as B for more than one-half of 2015.

Example 2. D and E are the divorced parents of Child, and Grandparent is E's parent. In 2015, Child resides with D for 140 nights, with E for 135 nights, and with Grandparent for the last 90 nights of the year. None of these periods is a temporary absence. Under paragraph (c)(3) of this section, Child does not have the same principal place of abode as D, E, or Grandparent for more than one-half of 2015.

Example 3. The facts are the same as in *Example 2* of this paragraph (c)(4), except that, for the 90-day period that Child lives with Grandparent, E is temporarily absent on military service. Child would have lived with E if E had not been absent during that period. Under paragraphs (c)(2) and (c)(3)(ii)(D) of this section, Child is treated as residing with E for 225 nights in 2015 and, therefore, Child has the same principal place of abode as E for more than one-half of 2015.

Example 4. The facts are the same as in *Example 2* of this paragraph (c)(4), except that, for the last 90 days of the year Child, who is 18, moves into Child's own apartment and begins full-time employment. Because Child's absence is not temporary, under paragraph (c)(2) of this section, Child is not treated as residing with D or E for the 90 nights. Under paragraph (c) of this section, Child does not have the same principal place of abode as D or E for more than one-half of 2015.

Example 5. F and G are the divorced parents of Child. In 2015, Child sleeps at F's principal place of abode for 170 nights and at G's principal place of abode for 170 nights. Child spends 25 nights of the year away from F and G at a summer camp. Child would have spent those nights with F if Child had not gone to summer camp. Under paragraphs (c)(2) and (c)(3)(ii)(D) of this section, Child is treated as residing with F for 195 nights and,

therefore, Child has the same principal place of abode as F for more than one-half of 2015.

Example 6. H and J are the divorced parents of Child. In 2015, Child sleeps at H's principal place of abode for 180 nights and at J's principal place of abode for 180 nights. For 5 nights during that year, Child sleeps at Grandparent's abode or at the house of a friend. Child would have spent all 5 nights at H's house if Child had not slept at Grandparent's or a friend's house. Under paragraphs (c)(2) and (c)(3)(ii)(D) of this section, Child is treated as residing with H for 185 nights and, therefore, Child has the same principal place of abode as H for more than one-half of 2015.

(d) *Residence for a portion of a taxable year because of special circumstances*—(1) *Individual who is born or dies during the year.* If an individual is born or dies during a taxpayer's taxable year, the residency test for a qualifying child is treated as met if the taxpayer and the individual have the same principal place of abode for more than one-half of the portion of the taxable year during which the individual is alive. If an individual is born or dies during a taxpayer's taxable year, the relationship test for a qualifying relative who is a member of the taxpayer's household is treated as met if the taxpayer and the individual have the same principal place of abode for the entire portion of the taxable year during which the individual is alive.

(2) *Adopted child or foster child.* If, during a taxpayer's taxable year, the taxpayer adopts a child, a child is lawfully placed with a taxpayer for legal adoption by that taxpayer, or an eligible foster child is placed with a taxpayer, the residency test for a qualifying child and the residency requirement under § 1.152–1(a)(2)(iii) for a child who is not a citizen or national of the United States are treated as met if the taxpayer and the child have the same principal place of abode for more than one-half of the portion of the taxable year as required for a qualifying child, or for the entire taxable year as required for a noncitizen, following the placement of the child with the taxpayer.

(e) *Missing child*—(1) *Qualifying child.* A child of the taxpayer who is presumed by law enforcement authorities to have been kidnapped by someone who is not a member of the family of either the child or the taxpayer, and who had for the taxable year in which the kidnapping occurred the same principal place of abode as the taxpayer for more than one-half of the portion of the taxable year before the date of the kidnapping, is treated as meeting the residency test for a qualifying child, as described in § 1.152–2(c), of the taxpayer for all taxable years ending during the period

that the child is missing. Also, the child is treated as meeting the residency test in the year of the child's return if the child has the same principal place of abode as the taxpayer for more than one-half of the portion of the taxable year following the date of the child's return.

(2) *Qualifying relative.* A child of the taxpayer who is presumed by law enforcement authorities to have been kidnapped by someone who is not a member of the family of either the child or the taxpayer, and who was a qualifying relative of the taxpayer for the portion of the taxable year before the date of the kidnapping, is treated as a qualifying relative, as described in section 152(d) and § 1.152–3, of the taxpayer for all taxable years ending during the period that the child is missing. Also, the child is treated as a qualifying relative of the taxpayer in the year of the child's return if the child is a qualifying relative of the taxpayer for the portion of the taxable year following the date of the child's return.

(3) *Age limitation.* The special rules provided in this paragraph (e) cease to apply as of the first taxable year of the taxpayer beginning after the calendar year in which there is a determination that the child is dead or, if earlier, in which the child would have attained age 18.

(4) *Application.* This paragraph (e) applies solely for purposes of determining surviving spouse or head of household filing status under section 2, the child tax credit under section 24, the earned income credit under section 32, and the dependency exemption under section 151.

■ **Par. 17** In newly redesignated § 1.152–5, paragraphs (e)(2), (e)(3)(iii), and (h) are revised to read as follows:

§ 1.152–5 Special rule for a child of divorced or separated parents or parents who live apart.

* * * * *

(e) * * *

(2) *Attachment to return*—(i) *In general.* A noncustodial parent must attach a copy of the written declaration to the parent's original or amended return for each taxable year for which the noncustodial parent claims an exemption for the child. A noncustodial parent may submit a copy of the written declaration to the IRS during an examination to substantiate a claim to a dependency exemption for a child. A copy of a written declaration attached to an amended return, or provided during an examination, will not meet the requirement of this paragraph (e) if the custodial parent signed the written declaration after the custodial parent filed a return claiming a dependency

exemption for the child for the year at issue, and the custodial parent has not filed an amended return to remove that claim to a dependency exemption for the child.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (e).

Example 1. Custodial parent (CP) files her 2015 return on March 1, 2016, and claims a dependency exemption for Child. At noncustodial parent's (NCP) request, CP signs a Form 8332 for the 2015 tax year on April 15, 2016. On April 15, NCP files his return claiming a dependency exemption for Child and attaches the signed Form 8332 to his return. Under section 152(e) and paragraph (b) of this section, NCP is allowed a dependency exemption for Child for 2015, and CP is not allowed a dependency exemption for Child for that year.

Example 2. The facts are the same as in **Example 1** of this paragraph (e)(2)(ii), except NCP files on April 15, 2016, a request for an extension to file his tax return because he does not have a signed Form 8332. CP signs the Form 8332 for the 2015 tax year in August of 2016, and NCP files his return a week later. NCP claims a dependency exemption for Child and attaches the signed Form 8332 to his return. Under section 152(e) and paragraph (b) of this section, NCP is allowed a dependency exemption for Child for 2015, and CP is not allowed a dependency exemption for Child for that year.

Example 3. CP files his 2015 return on March 1, 2016, and claims a dependency exemption for Child. NCP files her return on April 15, 2016, and does not claim a dependency exemption for Child, even though her divorce decree allocates the dependency exemption for Child to her. CP signs a Form 8332 for the 2015 tax year in August of 2016, and NCP files an amended return a week later and attaches the signed Form 8332 to her amended return claiming a dependency exemption for Child. Under paragraph (e)(2) of this section, NCP is not allowed a dependency exemption for Child for 2015 if CP has not amended his return to remove a claim to the dependency exemption for Child for that year.

(3) * * *

(iii) *Attachment to return.* The parent revoking the written declaration must attach a copy of the revocation to the parent's original or amended return for each taxable year for which the parent claims a child as a dependent as a result of the revocation. The parent revoking the written declaration must keep a copy of the revocation and evidence of delivery of the notice to the other parent, or of the reasonable efforts to provide actual notice. A parent may submit a copy of a revocation to the IRS during an examination to substantiate a claim to a dependency exemption for the child.

* * * * *

(h) *Applicability date*—(1) *In general.* Except as provided in paragraph (h)(2)

of this section, this section applies to taxable years beginning after July 2, 2008.

(2) *Exception.* Paragraphs (e)(2) and (e)(3)(iii) of this section apply to taxable years beginning after the date these regulations are published as final regulations in the **Federal Register**.

§ 1.6013-1 [Amended]

■ **Par. 18.** Section 1.6013-1 is amended by removing paragraph (e).

PART 301—PROCEDURE AND ADMINISTRATION

■ **Par. 19.** The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 20.** Section 301.6109-3 is amended by:

■ 1. Revising the first sentence and adding a sentence to the end of the paragraph in paragraph (a)(1).

■ 2. Revising paragraphs (b), (c)(1)(ii), the fourth and fifth sentences of (c)(2) introductory text, and paragraph (d).

The revisions and addition read as follows:

§ 301.6109-3 IRS adoption taxpayer identification numbers.

(a) *In general*—(1) *Definition.* An IRS adoption taxpayer identification number (ATIN) is a temporary taxpayer identifying number assigned by the Internal Revenue Service (IRS) to a child (other than an alien individual as defined in § 301.6109-1(d)(3)(i)) who has been placed lawfully with a prospective adoptive parent for legal adoption by that person. * * * A child lawfully placed with a prospective adoptive parent for legal adoption includes a child placed for legal adoption by the child's parent or parents by blood, an authorized placement agency, or any other person authorized by State law to place a child for legal adoption.

* * * * *

(b) *Definitions*—(1) Authorized placement agency has the same meaning as in § 1.152-1(b)(1)(iv).

(2) *Child* means a child who has not been adopted but has been placed lawfully with a prospective adoptive parent for legal adoption by that person.

(3) *Prospective adoptive parent* means a person in whose household a child has been placed lawfully for legal adoption by that person.

(c) * * *

(1) * * *

(ii) The child has been placed lawfully with the prospective adoptive parent for legal adoption by that person;

* * * * *

(2) * * * In addition, the application must include documentary evidence the IRS prescribes to establish that a child has been placed lawfully with the prospective adoptive parent for legal adoption by that person. Examples of acceptable documentary evidence establishing lawful placement for a legal adoption may include—

* * * * *

(d) *Applicability date*—(1) *In general.* Except as otherwise provided in paragraph (d)(2) of this section, the provisions of this section apply to income tax returns due (without regard to extension) on or after April 15, 1998.

(2) *Exception.* Paragraphs (a)(1), (b), (c)(1)(ii), and (c)(2) of this section apply to income tax returns due (without regard to extension) on or after the date these regulations are published as final regulations in the **Federal Register**.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830-01-P

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 42

[Docket No. OAG 154; AG Order No. 3818-2017]

RIN 1105-AB50

Amendment of Regulations Implementing Section 504 of the Rehabilitation Act of 1973—Nondiscrimination Based on Disability in Federally Assisted Programs or Activities

AGENCY: Department of Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Justice is issuing this notice of proposed rulemaking to revise its regulation implementing section 504 of the Rehabilitation Act of 1973, as applicable to programs and activities receiving financial assistance from the Department, in order to incorporate amendments to the statute, including the changes in the meaning and interpretation of the applicable definition of disability required by the ADA Amendments Act of 2008; incorporate requirements stemming from judicial decisions; update accessibility standards applicable to new construction and alteration of buildings and facilities; update certain provisions to promote consistency with

comparable provisions implementing title II of the Americans with Disabilities Act; and make other non-substantive clarifying edits, including updating outdated terminology and references that currently exist in 28 CFR part 42, such as changing the word “handicapped” and similar variations of that word to language referencing “individuals with disabilities,” modifying the order of the regulatory provisions to group like provisions together, and adding some headings to make the regulation more user-friendly.

DATES: All comments must be submitted on or before March 20, 2017.

ADDRESSES: You may submit comments, identified by RIN 1105-AB50, by any one of the following methods:

• *Federal eRulemaking portal:* <http://www.regulations.gov>. Follow the Web site's instructions for submitting comments.

• *Regular U.S. mail:* Disability Rights Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 2885, Fairfax, VA 22031-0885.

• *Overnight, courier, or hand delivery:* Disability Rights Section, Civil Rights Division, U.S. Department of Justice, 1425 New York Avenue NW., Suite 4055, Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT:

Rebecca Bond, Chief, Disability Rights Section, Civil Rights Division, U.S. Department of Justice, at (202) 307-0663 (voice or TTY) (not a toll-free number); or Michael Alston, Director, Office for Civil Rights, Office of Justice Programs, U.S. Department of Justice, at (202) 307-0690 (not a toll-free number). Information may also be obtained from the Department's toll-free ADA Information Line at (800) 514-0301 (voice), or (800) 514-0383 (TTY).

You may obtain copies of this notice of proposed rulemaking (NPRM) in an alternative format by calling the ADA Information Line at (800) 514-0301 (voice), or (800) 514-0383 (TTY). This NPRM is also available on the ADA Home Page at <http://www.ada.gov>.

SUPPLEMENTARY INFORMATION:

Electronic Submission of Comments and Posting of Public Comments

You may submit electronic comments to <http://www.regulations.gov>. When submitting comments electronically, you must include “RIN 1105-AB50” in the subject field, and you must include your full name and address. Electronic files should avoid the use of special characters or any form of encryption and should be free of any defects or viruses.

Please note that all comments received are considered part of the

public record and made available for public inspection online at <http://www.regulations.gov>. Submission postings will include any personal identifying information (such as your name, address, etc.) included in the text of your comment. If you include personal identifying information (such as your name, address, etc.) in the text of your comment but do not want it to be posted online, you must include the phrase “PERSONAL IDENTIFYING INFORMATION” in the first paragraph of your comment. You must also include all the personal identifying information you want redacted along with this phrase. Similarly, if you submit confidential business information as part of your comment but do not want it to be posted online, you must include the phrase “CONFIDENTIAL BUSINESS INFORMATION” in the first paragraph of your comment. You must also prominently identify confidential business information to be redacted within the comment. If a comment has so much confidential business information that it cannot be effectively redacted, all or part of that comment may not be posted on <http://www.regulations.gov>.

I. Executive Summary

Purpose

The Department of Justice (Department) is issuing this rule in order to revise and update its regulation implementing section 504 of the Rehabilitation Act of 1973 (section 504) as applicable to programs and activities receiving financial assistance from the Department. Section 504 prohibits discrimination on the basis of disability in federally conducted and assisted programs or activities. The Department implements the requirements of section 504 for federally assisted programs through its regulation at 28 CFR part 42, subpart G (federally assisted regulation).

Major Provisions

The major provisions of this proposed rule can be summarized as follows.

First, the NPRM proposes to revise the regulatory text to incorporate a range of statutory amendments to the Rehabilitation Act, including the following: (1) Changes in the meaning and interpretation of the definition of “disability” required by the ADA Amendments Act of 2008, which also amended section 504’s definition of “disability;” (2) the addition of definitions of “drugs” and “illegal use of drugs” and the exclusion from coverage of an individual who is currently engaging in the illegal use of

drugs, all of which are definitions used in the ADA; (3) the adoption of “person first” language, such as changing the term “handicapped person” to “individual with a disability”; and (4) the application of the ADA title I standards to determinations of employment discrimination under section 504.

Second, the proposed regulation incorporates into the regulatory text existing requirements, which stem from longstanding Supreme Court decisions interpreting section 504, by adding provisions setting forth the “direct threat” defense and the obligation to provide reasonable accommodations.

Third, the proposed rule updates the section 504 accessibility standards applicable to new construction and alteration of buildings and facilities from the Uniform Federal Accessibility Standards to the 2010 ADA Standards for Accessible Design.

Fourth, the proposed rule revises the language of certain provisions, including the general nondiscrimination prohibitions and the requirement to provide auxiliary aids and services, in order to promote consistency with comparable provisions implementing title II of the ADA. The rule also eliminates the exception for provision of auxiliary aids and services for recipients that have fewer than fifteen employees.

Fifth, the proposed rule revises the regulation’s compliance procedures: (1) To provide alternative remedies for the Department in cases where a recipient of Federal assistance fails to provide compliance information, such as compliance reports or information sought by beneficiaries; (2) to provide for the protection of confidential information without barring the responsible Department official or designee from accessing information necessary for evaluating or seeking to enforce compliance with the federally assisted regulation; and (3) to direct the filing of complaints alleging violations of section 504 by recipients of financial assistance from the Department with the Office of Justice Programs.

Summary of Benefits and Costs

This rulemaking is not considered economically significant under Executive Order 12866. Additionally, the Department is certifying that the rule will not have a significant economic impact on a substantial number of small entities in accordance with the Regulatory Flexibility Act, as amended.

II. Background

A. Section 504 Legislative and Regulatory History

The Department of Justice (Department) implements the requirements of section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794 (section 504), which prohibits discrimination on the basis of disability in federally conducted and assisted programs or activities, through its regulations at 28 CFR part 39, applicable to programs and activities conducted by the Department (federally conducted regulation), and 28 CFR part 42, subpart G, applicable to recipients to whom the Department extends Federal financial assistance (federally assisted regulation).

On June 3, 1980, the Department published its section 504 federally assisted regulation. See 28 CFR part 42, subpart G, 45 FR 37620. Since then, Congress has amended certain provisions of the Rehabilitation Act of 1973, Public Law 93–112 (Sept. 26, 1973) (Rehabilitation Act), necessitating revisions to the Department’s section 504 federally assisted regulation.¹ The Americans with Disabilities Act of 1990, Public Law 101–336 (July 26, 1990) (ADA), revised the Rehabilitation Act to include definitions of the terms “drugs” and “illegal use of drugs,” explaining that these terms were to be interpreted consistent with the principles of the Controlled Substances Act, 21 U.S.C. 801 *et seq.* See 29 U.S.C. 705(10). The ADA also amended the Rehabilitation Act to expressly exclude from coverage an individual who is currently engaging in the illegal use of drugs. See 29 U.S.C. 705(10), (20)(C). The Rehabilitation Act Amendments of 1992, Public Law 102–569 (Oct. 29, 1992) (the 1992 Amendments), adopted the use of “person first” language by changing the term “handicapped person” to “individual with a disability” and provided that the standards applied under title I of the ADA shall apply to determinations of employment discrimination under section 504. More recently, the ADA Amendments Act of 2008 (ADA Amendments Act), Public Law 110–325 (Sept. 25, 2008), revised the meaning and interpretation of the definition of “disability” under section 504 to align them with the ADA. In addition, there have been significant

¹ See, e.g., Public Law 99–506 (Oct. 21, 1986); Public Law 100–259 (Mar. 22, 1988); Public Law 100–630 (Nov. 7, 1988); Public Law 101–336 (July 26, 1990); Public Law 102–569 (Oct. 29, 1992); Public Law 103–382 (Oct. 20, 1994); Public Law 105–220 (Aug. 7, 1998); Public Law 107–110 (Jan. 8, 2002); Public Law 110–325 (Sept. 25, 2008); Public Law 113–128 (July 22, 2014).

Supreme Court decisions interpreting section 504 requirements relating to the principles of “direct threat” and reasonable accommodation. *See, e.g., Sch. Bd. of Nassau Cty. v. Arline*, 480 U.S. 273 (1987); *Alexander v. Choate*, 469 U.S. 287 (1985); *Se. Cmty. Coll. v. Davis*, 442 U.S. 397 (1979). Although *Arline*, *Choate*, and *Davis* have been applied by lower courts since their issuance, the Department’s existing section 504 federally assisted regulation does not clearly enunciate the Court’s holdings. The Department has not amended its section 504 federally assisted regulation since its original publication other than through the adoption in 2003 of certain amendments to implement the provisions of the Civil Rights Restoration Act of 1987. *See* 68 FR 51334 (Aug. 26, 2003); Public Law 100–259 (Mar. 22, 1988). The revisions to this regulation are part of the Department’s retrospective plan under Executive Order 13563, completed in 2011.

B. Relationship Between Section 504 and the ADA

Title II of the ADA prohibits discrimination on the basis of disability by public entities (*i.e.*, State and local governments and their agencies) and is modeled on section 504. 42 U.S.C. 12132 (“[N]o qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.”). A significant amount of financial assistance from the Department goes to entities that are also covered by title II of the ADA. In addition, the Department provides financial assistance to some entities covered by title III of the ADA.² Title II and section 504 are generally understood to impose similar requirements, given the similar language employed in the ADA and the Rehabilitation Act and the congressional directive that the ADA be construed to grant at least as much protection as provided by the regulations implementing the Rehabilitation Act. *See, e.g.*, 42 U.S.C. 12201(a).³ Many of

the changes that the Department is proposing are intended to conform the language of specific provisions in the section 504 regulation to corresponding provisions in the title II regulation, many of which were updated in 2010. The Department believes it is in the interest of the recipients who have to apply the requirements of both section 504 and title II that, where appropriate, the comparable requirements in the corresponding regulations for both statutes are expressed in comparable language.

II. Section-by-Section Analysis

This section provides a detailed description of the Department’s proposed changes to the section 504 federally assisted regulation and the reasoning behind the proposals. If the Department is not proposing a change to a regulation section, the unchanged section is not discussed. The Department is proposing to modify the order and names of some of the regulatory provisions to group like provisions together and make the regulation more user-friendly. This section-by-section analysis follows the revised order of the regulatory text.

General

Section 42.502—Application, Broad Coverage, and Relationship to Other Laws

The Department proposes to revise existing § 42.502 to add clarifying language to the discussion of the application of this subpart, to add a new paragraph (b), which addresses the broad scope of coverage required by the ADA Amendments Act and the section 504 federally assisted regulation, and to move and revise the discussion of the relationship to other laws from existing § 42.505(h) to a new paragraph (c) in this section.

Section 42.502(a)—Application

The Department proposes to add a sentence clarifying that this subpart does not apply to programs or activities

conducted by the Department. The Department’s section 504 federally assisted regulation is found at 28 CFR part 39.

Section 42.502(b)—Broad Scope of Coverage

The ADA Amendments Act was signed into law on September 25, 2008, and became effective on January 1, 2009. Congress enacted the ADA Amendments Act in order to ensure that the definition of disability is broadly construed and applied without extensive analysis, and to supersede Supreme Court decisions that had too narrowly interpreted the ADA’s definition of disability.⁴ The ADA Amendments Act not only amended the meaning and interpretation of the definition of disability applicable to the ADA, it also amended the Rehabilitation Act of 1973 to require similar changes to the meaning and interpretation of section 504’s definition of disability at 29 U.S.C. 705(20)(B).

The ADA Amendments Act does not alter the basic elements of the definition of disability in the ADA and section 504, but it significantly clarifies how the term “disability” is to be interpreted and adds important rules of construction to inform that interpretation. Specifically, Congress directed that the definition of disability shall be construed broadly and that the determination of whether an individual has a disability should not demand extensive analysis. ADA Amendments Act, sec. 2(b)(5), 4(a).

Congress also authorized the Equal Employment Opportunity Commission (EEOC) and the Department to issue regulations implementing the ADA Amendments Act changes, including rules of construction. *See id.*, sec. 6(a)(2); 42 U.S.C. 12205a. The Department’s ADA Amendments Act regulation, along with the EEOC’s title I ADA Amendments Act regulation, include introductory sections describing the requirement to construe the definition of disability broadly and sets forth rules of construction consistent with that goal. *See* 28 CFR 35.101(b) and 29 CFR 1630.1(c)(4).⁵ The Department’s

² Title III prohibits discrimination on the basis of disability by: (1) Public accommodations (*i.e.*, private entities that own, operate, lease, or lease to places of public accommodation); (2) newly constructed and altered commercial facilities; and (3) private entities that offer certain examinations and courses related to educational and occupational certification. Recipients of Federal assistance that are also title III entities must comply with both the section 504 and the title III regulations.

³ The 1992 Amendments revised the Rehabilitation Act’s findings, purpose, and policy

provisions to incorporate language acknowledging the discriminatory barriers faced by persons with disabilities, and recognizing that persons with disabilities have the right to “enjoy full inclusion and integration in the economic, political, social, cultural and educational mainstream of American society.” 29 U.S.C. 701(a)(3) as amended. The legislative history to the 1992 Amendments states “[t]he statement of purpose and policy is a reaffirmation of the precepts of the Americans with Disabilities Act, which has been referred to as the 20th century emancipation proclamation for individuals with disabilities. It is the Committee’s intent that these principles guide the policies, practices, and procedures developed under all titles of the [Rehabilitation] Act.” S. Rep. 102–357 at 14 (Aug. 3, 1992); H.R. Rep. 102–822 at 81 (Aug. 10, 1992).

⁴ Congress specifically found that the holdings of the Supreme Court in *Toyota Motor Manufacturing, Kentucky, Inc. v. Williams*, 534 U.S. 184 (2002), and *Sutton v. United Air Lines, Inc.*, 527 U.S. 471 (1999), narrowed the broad scope of protection intended to be afforded by the ADA. ADA Amendments Act, sec. 2. Congress also stated that one of the purposes of the ADA Amendments Act is “to convey that it is the intent of Congress that the primary object of attention in cases brought under the ADA should be whether entities covered under the ADA have complied with their obligations * * *.” *Id.*, sec. 2(b)(5).

⁵ The Department’s ADA Amendments Act regulation followed the EEOC approach in

proposed “scope of coverage” provision at § 42.502(b) is modeled on the ADA’s broad construction provision and provides that, consistent with the ADA Amendments Act’s purpose of reinstating a broad scope of protection under both the ADA and section 504, the definition of “disability” in the pertinent subpart “shall be construed broadly in favor of expansive coverage to the maximum extent permitted by the terms of section 504.” The new provision further provides that the primary object of attention in cases brought under that subpart “should be whether entities covered under section 504 have complied with their obligations and whether discrimination has occurred, not whether the individual meets the definition of ‘disability.’” The question of whether an individual meets the definition of “disability” under this subpart should not demand extensive analysis.

Section 42.502(c)—Relationship to Other Law

The Department is proposing to move its provision addressing the relationship of section 504 to State and local laws that provide lesser protections for persons with disabilities from its location in the current regulation at § 42.505(h) to § 42.502(c)(1) in the revised regulation. The Department is proposing a minor edit to this provision by adding “obviated by or otherwise” before “affected” so that the provision would read: “The obligation to comply with this subpart is not obviated by or otherwise affected by the existence of any State or local law or other requirement that, on the basis of disability, imposes prohibitions or limits upon the eligibility of qualified individuals with disabilities to receive services or to practice any occupation or profession.”

In addition, the Department is proposing to add a new provision at § 42.502(c)(2) that addresses the relationship between section 504 and other Federal, State, and local laws that provide greater protections to persons with disabilities. In the ADA, Congress expressly provided that nothing in the ADA invalidated or limited the remedies, rights, and procedures of any Federal law, or State or local law that provides greater or equal protection for the rights of individuals with disabilities. *See* 42 U.S.C. 12201(b). The Department incorporated this principle into its ADA title II and title III

regulations at 28 CFR 35.103(b) and 28 CFR 36.103(c), respectively. The Department believes that these principles are equally applicable to section 504. Proposed § 42.502(c)(2) incorporates these principles and provides that “[t]his subpart does not invalidate or limit the remedies, rights, and procedures of any other Federal law, or State or local law (including State common law), that provide greater or equal protection for the rights of individuals with disabilities or individuals associated with them.”

Section 42.503—Definitions

The Department proposes revising certain definitions to make them consistent with the language used to define corresponding terms in the Department’s ADA regulations; deleting terminology that is no longer necessary or has become obsolete; revising or adding certain terms to incorporate statutory changes to the Rehabilitation Act; adding other definitions for clarity; and making minor technical edits to existing definitions. Also, for ease of reference, the Department proposes moving the “definitions” section, currently codified at § 42.540, to the beginning of the subpart at § 42.503.

First, in order to ensure consistency of terminology between section 504 and the ADA, the Department is proposing to add definitions of the following terms from the Department’s ADA title II regulation at 28 CFR 35.104: “2004 ADAAG,” “2010 Standards,” “Auxiliary aids and services,” “Current illegal use of drugs,” “Historic preservation programs,” “Qualified interpreter,” “Qualified reader,” and “Video remote interpreting (VRI) service.”

The Department also proposes to delete several terms from the regulation, including “Alcohol abuse,” “Benefit,” and “Handicap,” as well as obsolete references to Departmental components that no longer exist within the Department. First, with respect to “alcohol abuse,” the Department believes the term is no longer necessary given that the definition was only applicable to the regulation’s employment provisions, and those provisions are being revised to reference the requirements in title I of the ADA, in accordance with section 503(b) of the 1992 Amendments (codified at 29 U.S.C. 791(f)). Second, the Department also proposes to delete the definition of “benefit” as unnecessary given that the meaning of “benefit” is commonly understood. Third, the Department proposes to delete the definition of “handicap,” as it is neither necessary nor appropriate following the “people first” language changes from the 1992

Amendments, which use the term “disability.” And fourth, the Department proposes to delete the definitions of “LEAA,” “NIJ,” “BJS,” “OJARS,” and “OJJDP.” Some of these offices no longer exist, and to account for future changes in organization, the regulation, where appropriate, will refer generally to “grant-making components of the Department.”

Finally, the Department proposes the following revisions and additions to the “definitions” section to incorporate statutory changes to the Rehabilitation Act and to provide greater clarity and consistency of terminology.

“Applicant”

The Department proposes to add the definition of “applicant” to the proposed regulation using language consistent with the definition in the Department’s regulation implementing title VI of the Civil Rights Act, at 28 CFR 42.102(h).

“Component”

The Department proposes to add a definition of “component” to the proposed regulation. Given the various names for the Department’s subagencies (*e.g.*, bureaus, agencies, boards, etc.), the Department believes that the term “component” would provide a simpler and less confusing reference.

“Department”

The Department proposes to revise the definition of “department” to clarify that the term includes all of the Department’s components.

“Direct Threat”

The Department proposes to add, with respect to non-employment services, programs, and activities, a definition of “direct threat” that is based upon the definition provided in the Department’s title II regulation at 28 CFR 35.104. The Department also proposes to include, for the employment context, an additional paragraph that adopts the definition of “direct threat” in the EEOC’s regulation at 29 CFR 1630.2(r).

“Disability”

As previously discussed, the ADA Amendments Act not only amended the meaning and interpretation of the definition of “disability” applicable to the ADA, it also amended the Rehabilitation Act of 1973 to require similar changes to the meaning and interpretation of the definition of “disability” at 29 U.S.C. 705(20)(B), applicable to section 504. The Department has decided that rather than spelling out the meaning and interpretation of the definition of

incorporating a broad construction provision and rules of construction to embody the requirements of the ADA Amendments Act. *See* 81 FR 53203 (Aug. 11, 2016).

disability in this regulation, it will incorporate by reference the Department's title II definition of disability found at 28 CFR part 35, which has recently undergone revisions to reflect the requirements of the ADA Amendments Act. Due to the changes that the ADA Amendments Act made to the meaning and interpretation of the definition of disability, participants in recipients' programs and activities who, before, may not have been determined to have a disability under section 504, may now be found to have a disability.

The Rehabilitation Act and the ADA define "disability" as including: (1) A physical or mental impairment that substantially limits a major life activity; (2) a record of such an impairment; or (3) being regarded as having such an impairment. 29 U.S.C. 705(9)(B); 42 U.S.C. 12102(1). The ADA Amendments Act does not alter these three basic elements of the definition of disability, but it does significantly clarify how the term "disability" is to be interpreted and adds important rules of construction to inform that interpretation. Congress directed that the definition of disability shall be construed broadly and that the determination of whether an individual has a disability should not demand extensive analysis. 42 U.S.C. 12102. The Department proposes to update its section 504 federally assisted regulation to reflect these changes.

"Drug"

The ADA amended the Rehabilitation Act to include a definition of "drug." See ADA sec. 512(b) (codified at 29 U.S.C. 705(10)). The Department proposes to add that definition to its regulation.

"Facility"

The Department proposes to revise the existing definition of "facility" to conform more closely to the definition of "facility" in the Department's title II regulation by including within the definition's scope sites, complexes, rolling stock or other conveyances.

"Historic Properties"

The Department proposes to include a definition of "historic properties" that is substantially similar to that provided in the Department's title II regulation, 28 CFR 35.104.

"Illegal Use of Drugs"

The Department proposes to replace the existing definition of "drug abuse" with a definition that is substantially similar to the definition of "illegal use of drugs" that was added to the Rehabilitation Act by the ADA in 1990.

See ADA § 512(b) (codified at 29 U.S.C. 705(10)).

"Individual With a Disability"

The Department proposes to replace the definition of "handicapped person" with "individual with a disability," consistent with the 1992 Amendments, which provide "people first" language (e.g., "individuals with disabilities") and which define "individual with a disability" as "any person who has a disability as defined in [section 3 of the ADA]." See 29 U.S.C. 705(20)(B). Consistent with the definition in the Department's ADA title II regulation, the proposed definition also clarifies that the term "individual with a disability" does not include an individual who is currently engaging in the illegal use of drugs, when a recipient acts on the basis of such use. The proposed definition eliminates references to individuals who would not be considered to have a disability for purposes of employment, as such references are no longer necessary because the regulation now references the EEOC regulation at 29 CFR part 1630 with respect to discrimination on the basis of disability in employment.

"Primary Recipient"

The Department proposes to add a definition of "primary recipient" to the regulation. The Department proposes to adopt a definition that is substantially similar to the definition of "primary recipient" provided in the Department's regulation implementing title VI of the Civil Rights Act, at 28 CFR 42.102(g). The revised regulation defines "primary recipient" as "any recipient that is authorized or required to extend Federal financial assistance to another recipient."

"Qualified Individual With a Disability"

The Department proposes to replace the definition of "qualified handicapped person" with "qualified individual with a disability." With respect to employment, the proposed definition incorporates the definition of "qualified" as provided in the EEOC regulation at 29 CFR 1630.2(m), which implements the employment standards of title I of the ADA, in accordance with section 503(b) of the 1992 Amendments (codified at 29 U.S.C. 791(f)). With respect to programs or activities, the proposed definition is substantially similar to the definition of "qualified individual with a disability" from the Department's ADA title II regulation, 28 CFR 35.104.

"Subrecipient"

The Department proposes to add a definition of "subrecipient" to the proposed regulation. Entities receiving Federal financial assistance through a primary recipient also must comply with the Department's section 504 federally assisted regulation.

General Nondiscrimination Requirements

Section 42.510—General Prohibitions Against Discrimination

Section 42.510(b)–(f)—Prohibited Discriminatory Actions

The Department proposes to update and clarify the discriminatory actions prohibited under § 42.503 of the Department's current regulation. With the exception of the revisions addressed below, the Department proposes retaining the same prohibited discriminatory actions as in the current regulation but, where applicable, adopting the language that is provided in the Department's ADA title II regulation for consistency, and reorganizing and re-titling some of the provisions, as appropriate. For instance, the provision relating to the prohibition on retaliation and intimidation at § 42.503(b)(1)(vii) in the current regulation has been moved to a new section at proposed § 42.510(k). The Department also proposes to add several regulatory provisions that are consistent with provisions in the Department's ADA title II regulation and that further illustrate the types of actions that are prohibited discrimination under section 504. The Department notes that current § 42.503(g) (renumbered as § 42.510(l)) states that "[t]he enumeration of specific forms of prohibited discrimination in this subpart is not exhaustive but only illustrative."

The Department's current regulation at § 42.503(b)(iv) prohibits a recipient from denying "a qualified [person with a disability] an equal opportunity to participate in the program or activity by providing services to the program." This prohibition does not clearly explain how a qualified individual with a disability would be denied an equal opportunity to participate in a program or activity "by providing services" to the program. The Department is proposing to revise this paragraph for clarity but is not changing the meaning. The revised paragraph (renumbered as § 42.510(b)(1)(v)) states that a recipient may not "[d]eny a qualified individual with a disability an equal opportunity to provide services to the program or activity." Under this provision, for example, a recipient that uses

volunteers to provide services may not refuse to allow individuals with disabilities to work as volunteers.

The Department proposes to delete the provision in the Department's current regulation at § 42.503(b)(5), which provides that "[a] recipient is prohibited from discriminating on the basis of handicap in aid, benefits, or services operating without Federal financial assistance where such action would discriminate against the handicapped beneficiaries or participants in any program or activity of the recipient receiving Federal financial assistance." This provision no longer appears to be necessary given the expanded definition of "program or activity" provided under the Civil Rights Restoration Act, 42 U.S.C. 2000d-4a, which, in the case of assistance to a State or local government, includes all the operations of the department or agency to which funding is extended.

The Department proposes to move the requirements in existing § 42.503(e) and (f), which currently address the recipient's obligation to ensure effective communication to applicants, employees and beneficiaries, to new § 42.511, which specifically addresses the recipient's communication requirements in greater detail, consistent with the Department's title II regulation at 28 CFR 35.160, 35.161, and 35.164. The Department has also conformed the language of these provisions to the language of the title II regulation. It notes that the definition of "auxiliary aids" that is in § 42.503(f) of the existing regulation is replaced by the revised definition of "auxiliary aids and services" provided in the renumbered definitional section at proposed § 42.503.

Section 42.510(g)—Reasonable Accommodations

The Department proposes to add a new provision at § 42.510(g)(1) that affirmatively states the longstanding section 504 obligation to provide reasonable accommodations by making changes to policies, practices, and procedures unless those changes can be shown to pose a fundamental alteration to the program or activity or an undue financial and administrative burden.⁶

The obligation to modify policies, practices, or procedures was first enunciated by the Supreme Court in *Southeastern Community College v. Davis*, 442 U.S. 397 (1979), which held that while section 504 prohibits the exclusion of an otherwise qualified individual with a disability from participation in a federally funded program solely by reason of the individual's disability, that person is not protected by section 504 if, in order to meet reasonable eligibility standards, the person needs program or policy modifications that would fundamentally alter the nature of the provider's program. Because the *Davis* Court analyzed the case in terms of the proper interpretation of the statutory term "otherwise qualified," agency section 504 regulations promulgated immediately after *Davis* addressed the obligation to provide reasonable accommodations outside of the employment arena by defining "qualified handicapped person," as one who meets the essential eligibility requirements of the program and who can achieve the purpose of the program or activity without modifications in the program or activity that the agency can demonstrate would result in a fundamental alteration in its nature. *See, e.g.*, 28 CFR 39.103 (the Department's section 504 federally conducted regulation).

Subsequently, in *Alexander v. Choate*, 469 U.S. 287 (1985), which addressed a section 504 challenge to a State policy reducing the annual number of days of inpatient hospital care covered by the State's Medicaid program, the Court implicitly acknowledged that the obligation to provide reasonable accommodations could be considered as an affirmative obligation, noting, "the question of who is 'otherwise qualified' and what actions constitute 'discrimination' under the section would seem to be two sides of a single coin; the ultimate question is the extent to which a grantee is required to make reasonable modifications [accommodations] in its programs for the needs of the handicapped." *Id.* at 299 n.19.

Alexander also introduced the concept of undue financial and administrative burden as a limitation on the reasonable accommodation obligation. In responding to the petitioners' contention that *any* durational limitation on inpatient coverage in a State Medicaid plan is a

violation of section 504, the court stated: "It should be obvious that the administrative costs of implementing such a regime would be well beyond the accommodations that are required under *Davis*." *Id.* at 308.

Over the past decades, in keeping with these Supreme Court decisions, Federal courts and Federal agencies have regularly acknowledged Federal agencies' affirmative obligation to ensure that recipients provide qualified individuals with disabilities reasonable accommodations in programs and activities unless the recipient can demonstrate that making these accommodations would fundamentally alter the program or activity or result in an undue financial and administrative burden. However, traditionally, agencies' section 504 regulations have lacked a specific provision implementing this requirement outside of the employment arena.⁷

The Department notes that title I of the ADA also uses the term "reasonable accommodation" to apply to the job application process, work environment, or manner or circumstances under which the position held or desired is customarily performed, and the ability to enjoy equal benefits and privileges of employment. However, the specific ADA title I regulatory requirements related to this term should not be applied to non-employment related requests for reasonable accommodations under section 504, and the Department proposes to clarify at proposed § 42.510(g)(3) that with respect to employment, the definitions and standards that apply to "reasonable accommodation" and "undue hardship" in the EEOC's regulation implementing title I of the ADA apply to this subpart.

In addition, when Congress enacted the ADA Amendments Act, it expressly provided that a covered entity need not provide a reasonable modification [or accommodation] to policies, practices, or procedures to an individual who meets the definition of disability under the "regarded as" prong. ADA Amendments Act, sec. 6(a)(1). While Congress did not specifically apply this provision of the ADA Amendments Act to section 504, the Department believes that it is equally appropriate to apply this limitation to reasonable accommodations under section 504 and proposes to adopt this limitation at § 42.510(g)(2) of this regulation.

⁷ The principle of "reasonable accommodation" is addressed in agency section 504 regulations with respect to employment. *See, e.g.*, the Department's current section 504 federally assisted regulation at 28 CFR 42.511 and U.S. Department of Health and Human Services' section 504 federally assisted regulation at 45 CFR 84.12.

⁶ Courts generally have interpreted the obligation to provide reasonable accommodations under section 504 consistently with the obligation to provide reasonable modifications under title II. *See, e.g., Forest City Daly Hous., Inc. v. Town of N. Hempstead*, 175 F.3d 144, 151 (2d Cir. 1999) (analyzing reasonable accommodations in the same way under the FHA, ADA, and Section 504); *Super v. J. D'Amelia & Associates, LLC*, No. 3:09CV831 SRU, 2010 WL 3926887, at *3 (D. Conn. Sept. 30, 2010) ("The relevant portions of the FHA, ADA,

and Section 504 offer the same guarantee that a covered entity . . . must provide reasonable accommodations in order to make the entity's benefits and programs accessible to people with disabilities.").

Lastly, the Department notes that the necessary reasonable accommodations will vary based on the need of the individual and the impact of the accommodation on the recipient. Where the recipient receives funding from multiple Federal agencies, each Federal agency's particular requirements will also impact the types of reasonable accommodations that a recipient must provide.

Section 42.510(h)—Prohibition on Surcharges

It has been a longstanding principle under both section 504 and the ADA that recipients or covered entities may not charge affected individuals or groups for the cost of measures required to provide an individual or group with nondiscriminatory treatment. This principle is already set forth in the Department's title II regulation at 28 CFR 35.130(f), and the Department is proposing to add it to § 42.510(h) of the Department's section 504 federally assisted regulation as well.

Section 42.510(i)—Prohibition on Associational Discrimination

The Department's ADA regulations provide protection for individuals associated with individuals with disabilities.⁸ While the Rehabilitation Act does not expressly refer to individuals associated with individuals with disabilities, it does permit “any person aggrieved by any act or failure to act by any recipient of Federal assistance or Federal provider of such assistance” to bring suit under the Rehabilitation Act. 29 U.S.C. 794a(a)(2) (emphasis added). Courts have recognized this provision as providing the basis for associational standing

under the Rehabilitation Act and noted that despite the differences in authorizing language under the Rehabilitation Act and the ADA, “[i]t is widely accepted that under both the [Rehabilitation Act] and the ADA, non-disabled individuals have standing to bring claims when they are injured because of their association with a disabled person.” *McCullum v. Orlando Reg'l Healthcare Sys., Inc.*, 768 F.3d 1135, 1142 (11th Cir. 2014) (citing cases). Accordingly, the Department is proposing to add § 42.510(i), which specifically prohibits a recipient from excluding or otherwise denying aid, benefits, or services of its programs or activities to an individual because of that individual's relationship or association with an individual with a known disability.

Section 42.510(j)—Eligibility Criteria

The Department proposes to add a new provision at § 42.510(j) that prohibits a recipient from imposing or applying eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any aid, benefit, or service, unless such criteria can be shown to be necessary for the provision of the aid, benefit, or service being offered. This principle is already set forth in the Department's title II regulation at 28 CFR 35.130(b)(8). The prohibition of the imposition of “criteria that ‘tend to’ screen out an individual with a disability” actually had its origins in the Department of Health and Human Services' section 504 regulation at 45 CFR 84.13 (1991), which was cited by the Department in its 1991 title II rulemaking. *See* 28 CFR part 35, app. B, 56 FR 35694, 35705 (July 26, 1991). Accordingly, the Department believes that it is appropriate to add this provision to the general prohibitions against discrimination section.

Section 42.511—Communications

The Department is proposing to reorganize and revise its articulation of recipients' longstanding obligation to ensure that communications are effectively conveyed to individuals with disabilities and to provide appropriate auxiliary aids and services, using language that generally conforms with the effective communication provisions in the Department's title II regulation at 28 CFR 35.160, 35.161, and 35.164. Specifically, the Department is proposing to move the provisions addressing communication in the section 504 regulation from the general nondiscrimination obligations in current § 42.503(e) and (f), place these

revised provisions in a new § 42.511, and generally conform the language to the title II provisions. As mentioned earlier, the Department has revised the definitions section of the regulation at proposed § 42.503 to include definitions of the terms “auxiliary aids and services,” “qualified interpreter,” “qualified reader,” and “video remote interpreting (VRI) service.” Finally, the Department is proposing to remove the limitation on the obligation to provide auxiliary aids for recipients with fewer than 15 employees, currently found in § 42.503(f).

Section 42.511(a)—General Obligation

Proposed § 42.511(a) sets forth the general obligation (formerly set forth in § 42.503(e)) that a recipient take “appropriate steps to ensure that communications with applicants, participants, beneficiaries, members of the public, and companions with disabilities are as effective as communications with others.” This general obligation parallels the general communications requirement in the ADA title II regulation, at 28 CFR 35.160(a)(1). The Department recognizes that since the Department's section 504 federally assisted regulation was first issued in 1980, electronic and information technology has changed the way that recipients communicate with interested persons. Individuals with disabilities—like other members of the public—should be able to equally engage with a recipient's services, programs, and activities using electronic and information technology. Opportunities for such engagement require that electronic and information technology be accessible to ensure that communication with individuals with disabilities is as effective as communication with others.

Section 42.511(b)—Auxiliary Aids and Services

Proposed § 42.511(b)(1), which tracks language in existing § 42.503(f), provides that “[a] recipient shall furnish appropriate auxiliary aids and services where necessary to afford qualified individuals with disabilities, including applicants, participants, beneficiaries, companions, and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity of a recipient.” Proposed § 42.511(b)(2) provides that “[t]he type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the

⁸ Titles I and III of the ADA explicitly forbid discrimination because of the known disability of an individual with whom the individual is known to have a “relationship or association.” 42 U.S.C. 12112(b)(4), 12182(b)(1)(E). Although title II does not have corresponding language, the legislative history of the ADA demonstrates Congress's intent to include association within the scope of discrimination prohibited by title II. The House Committee on Education and Labor indicated that title II's prohibitions should be “identical to those set out in the applicable provisions of titles I and III.” H.R. Rep. No. 101–485(II), at 84 (1990), *reprinted in* 1990 U.S.C.C.A.N. 303, 367. The House Report went on to indicate that: “Unlike the other titles in this Act, title II does not list all of the forms of discrimination that the title is intended to prohibit. * * * [T]he Attorney General [is directed] to issue regulations setting forth the forms of discrimination prohibited. The Committee intends that the regulations under title II incorporate interpretations of the term discrimination set forth in titles I and III of the ADA to the extent that they do not conflict with the Section 504 regulations.” H.R. Rep. No. 101–485(III), at 52 (1990), *reprinted in* 1990 U.S.C.C.A.N. 445, 475. Thus, the Department's regulations under both titles II and III prohibit associational discrimination. *See* 28 CFR 35.130(g) and 28 CFR 36.205.

context in which the communication is taking place. In determining what types of auxiliary aids and services are necessary, a recipient entity shall give primary consideration to the requests of individuals with disabilities. In order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way as to protect the privacy and independence of the individual with a disability.”

An example of an auxiliary aid, which would apply in the corrections setting, would be the provision of videophones or other video-based telecommunication services to ensure that incarcerated individuals with disabilities can communicate as effectively as others who use public telephones made available by the facility.

Section 42.511(c)—Limitations on Use of Accompanying Adults or Children as Interpreters

Proposed § 42.511(c) includes the express limitations on the use of accompanying adults or children as interpreters that are specified in the ADA title II rule at 28 CFR 35.160. Under section 504, responsibility for providing effective communication, including the use of interpreters, falls directly on recipients, and they may not require an individual to bring someone to serve as an interpreter. Consistent with the ADA provisions, proposed § 42.511(c) provides that a recipient may rely on an adult or minor child companion to interpret only in very limited emergency circumstances when no qualified interpreters are available. Specifically, proposed § 42.511(c)(2)–(3) only apply to emergencies involving an “imminent threat to the safety or welfare of an individual or the public.” The imminent threat exception is not intended to apply to the typical and foreseeable emergency situations that are part of the normal operations of institutions, such as visits to the emergency room or responses by law enforcement to situations involving a threat to the safety or welfare of an individual or the public. As such, a recipient may rely on an accompanying individual to interpret or facilitate communication under the proposed § 42.511(c)(2)–(3) imminent threat exception only in truly exigent circumstances, *i.e.*, where any delay in providing immediate services to the individual could have life-altering or life-ending consequences.

In nonemergency circumstances, a recipient may rely on an adult companion (but not a minor child) to interpret only when, (1) the individual requests this, (2) the accompanying

adult agrees, and (3) reliance on the accompanying adult is appropriate under the circumstances. Under no circumstances may a recipient rely on an accompanying adult to interpret when there is reason to doubt the individual’s impartiality or effectiveness.

Section 42.511(d)—Video Remote Interpreting (VRI) Services

When the Department updated its title II effective communication provisions to include performance requirements for VRI, at 28 CFR 35.160(d), the intent was to ensure that if VRI is used, it would be used in a manner that makes it as effective as when sign language interpreters are provided on site. The Department certainly has recognized that VRI can be an effective method of providing interpreting services in certain circumstances, but not in others. *See* 75 FR 56164, 56196 (Sept. 15, 2010). For example, VRI should be effective in many situations involving routine medical care, as well as in the emergency room where urgent care is important, but no in-person interpreter is available; however, VRI may not be effective in situations involving surgery or other medical procedures where the patient is limited in his or her ability to see the video screen. Similarly, VRI may not be effective in situations where there are multiple people in a room and the information exchanged is highly complex and fast-paced. The Department recognizes that in these and other situations, such as where communication is needed for persons who are deaf-blind, it may be necessary to summon an in-person interpreter to assist certain individuals.

Since the Department added this language to its title II regulation, it has become aware that some entities subject to title II, particularly in the medical environment, have not properly evaluated whether VRI is effective in particular situations, nor have they understood that these standards require that the VRI image is actually positioned so that it can be seen by the individual with a hearing disability. For example, in some circumstances, a patient who is lying prone while receiving medical treatment may have difficulty seeing the image on the screen and thus may be unable to communicate effectively using the remote sign language interpreter. Similarly, a pregnant woman who is deaf and who needs to regularly change positions while receiving medical assistance during labor and delivery may not always be able to see the image on the screen. Accordingly, the Department is adding language in its proposed VRI provision to expressly

clarify that the VRI image must be positioned so that the individual with a hearing disability can easily see the interpreter on the screen.

Proposed § 42.511(d) states that a recipient that provides qualified interpreters via VRI services shall ensure that it provides “[a] sharply delineated image that is large enough to display the interpreter’s face, arms, hands, and fingers, and the participating individual’s face, arms, hands, and fingers, and can be seen by the participating individual regardless of the individual’s body position.”

Section 42.511(e)—Telecommunications

Proposed § 42.511(e) incorporates the ADA title II regulatory requirement, at 28 CFR 35.161, that where a public entity communicates by telephone with applicants and beneficiaries, text telephones (TTY) or equally effective telecommunications systems must be used to communicate with individuals with disabilities. Unlike the corresponding ADA requirement at 28 CFR 35.161(a), however, § 42.511(e)(1) eliminates a specific reference to TTYS. The Department has become aware that individuals with hearing and speech disabilities are increasingly using other forms of telecommunication systems, including cellular phones, videophones, video relays, and internet-based communication systems, in lieu of TTYS. Thus, § 42.511(e)(1) provides that “[w]here a recipient communicates by telephone with applicants, participants, beneficiaries, members of the public, and companions with disabilities, the recipient shall communicate with individuals who are deaf or hard of hearing or have speech disabilities using telecommunication systems that provide equally effective communication.”

Additionally, the Department is aware that individuals with disabilities are concerned that, in some cases, emergency response services lack the ability to communicate with individuals who use methods of communication other than TTYS, such as text messaging or videophones, to communicate effectively. In July 2010, the Department issued an Advance Notice of Proposed Rulemaking on the Accessibility of Next Generation 9–1–1 Services, in which the Department made clear its intention to modify title II’s telephone emergency services provision, at 28 CFR 35.162, to address these and other changes, and included a specific reference to video relay service as an example of a type of relay service. 75 FR 43446 (July 26, 2010). Although that regulation has not yet been released, the Department maintains that, under title II’s general requirement at 28 CFR 35.161(a),

emergency response public safety answering points always have been covered by the general obligation to ensure effective communication. Similarly, under section 504, recipients' provision of emergency response services, like other aid, benefits, or services provided by recipients in their programs or activities, is covered by the overarching obligation to provide effective communication.

Proposed § 42.511(e)(2) addresses the use of automated-attendant systems and specifies that "[w]hen a recipient uses an automated-attendant system, including, but not limited to, voice mail and messaging, or an interactive voice response system, for receiving and directing incoming telephone calls, that system must provide effective real-time communication with individuals using auxiliary aids and services, including, but not limited to TTYs and all forms of FCC-approved telecommunications relay systems, including Internet-based relay systems." In proposed § 42.511(e)(3), the Department proposes a requirement that recipients must respond to all types of relay services, including video relay services, in the same manner that they respond to other telephone calls. This provision tracks title II, at 28 CFR 35.161(c), but includes an updated reference to the U.S. Code citation establishing the types of FCC-approved relay services, which include telephone relay, video relay, and IP relay.

Section 42.511(f)—Limitations

Finally, the Department is proposing to remove a limitation that currently appears in § 42.503(f). This provision directs that the obligation to provide auxiliary aids is mandatory for recipients with 15 or more employees, but indicates that Departmental officials may require recipients employing fewer than 15 persons to comply with this requirement "when [compliance] would not significantly impair the ability of the recipient to provide its benefits or services." The Department is proposing to remove this limitation for several reasons. First, this limitation is of minimal consequence because the vast majority of recipients of Federal financial assistance from the Department are already required by either title II or title III of the ADA to provide auxiliary aids or services in order to ensure effective communication. Second, all recipients, regardless of size, are not required, in providing effective communication, to take any action that the recipient can demonstrate would result in a fundamental alteration to the program or activity or pose undue financial and

administrative burdens. Third, the Department already has the discretion whether to impose these obligations on recipients with fewer than 15 employees. Finally, given that Congress specifically intended that the principles of the ADA guide the policies, practices, and procedures developed under the Rehabilitation Act,⁹ the Department believes the removal of this limitation better serves the purpose shared by both the ADA and Rehabilitation Act to enable individuals with disabilities to "enjoy full inclusion and integration into the economic, political, social, cultural, and educational mainstream of American society." 29 U.S.C. 701(a)(3). The Department is interested in public comment about its proposal to eliminate the fifteen employee threshold for provision of auxiliary aids and services.

Section 42.512—Employment

The Department maintains the prohibition of discrimination in employment against any qualified individual with a disability and proposes to revise § 42.512 to conform to the 1992 Amendments, which amended title V of the Rehabilitation Act to apply the same employment standards set forth in title I of the ADA to employment discrimination claims under section 504. Accordingly, the proposed rule deletes the existing requirements related to discriminatory employment practices and references the standards applied under title I of the ADA, 42 U.S.C. 12111 *et seq.*, the EEOC's title I regulation at 29 CFR part 1630, and, to the extent such sections relate to employment, the provisions of sections 501 through 504 and 511 of the ADA, as amended. Note that the Department's regulation at 28 CFR part 37 continues to govern the procedures to be followed by the Federal agencies responsible for processing and resolving complaints or charges of employment discrimination filed against recipients when jurisdiction exists under both section 504 and title I of the ADA.

Section 42.513—Direct Threat

The Department proposes to add a new provision at § 42.513 addressing direct threat to others as a limitation on the requirement to comply with this subpart, in accordance with the ADA. The applicability of the "direct threat" concept to section 504 of the Rehabilitation Act was first set forth in the Supreme Court decision *School Board of Nassau County, Florida v. Arline*, 480 U.S. 273 (1987). In *Arline*, the Supreme Court directed that under

section 504 of the Rehabilitation Act, the determination of whether a person with a contagious disease is otherwise qualified must be made on an individualized basis, taking into account the: nature of the risk to others (how the disease is transmitted); duration of the risk to others (how long the carrier is infectious); severity of the risk to others (what the potential harm is to third parties); and probability the disease will be transmitted and will cause varying degrees of harm to others. The Court made it clear that the individualized inquiry required appropriate findings of fact about these factors, based on reasonable medical judgments given the current state of medical knowledge. While *Arline* arose out of allegations that an individual was not "otherwise qualified" under section 504 because she had a "contagious disease" that arguably posed a danger to the health and safety of others, the individualized inquiry and the specific analysis required by *Arline* apply to any exclusion on the basis of an allegation that a person with a disability poses a "direct threat" to the health or safety of others, including outside the communicable disease context. *See, e.g., EEOC v. Amego, Inc.*, 110 F.3d 135, n.6 (1st Cir. 1997) ("While the language of the 'direct threat' provision is not limited to instances where the threat comes from communicable diseases, the provision originated in the communicable disease context." (citing H.R. Rep. No. 101-485 (II), at 76, 1990 U.S.C.C.A.N. at 358-59)).

Congress turned to *Arline* as the foundation for incorporating the "direct threat" concept into the ADA. *See* H.R. Rep. No. 101-485 (III), at 45; 42 U.S.C. 12111(3). The House Report stated: "While the *Arline* case involved a contagious disease, * * * the reasoning in that case is applicable to other circumstances. A person with a disability must not be excluded, or found to be unqualified, based on stereotypes or fear." *Id.* Congress conceived of the "direct threat" concept arising in the context of a challenge to an individual's qualifications, or standing alone as a basis for exclusion. The Department's 1991 section-by-section analysis for the title II regulation indicated that the incorporation of the *Arline* "direct threat" concept and analysis was essential, "if the law is to achieve its goal of protecting disabled individuals from discrimination based on prejudice, stereotypes, or unfounded fear, while giving appropriate weight to legitimate concerns, such as the need to avoid exposing others to significant health and safety risks." 28 CFR part 35,

⁹ *See* S. Rep. 102-357 at 14 (Aug. 3, 1992); H.R. Rep. 102-822 at 82 (Aug. 10, 1992).

app. B. The ADA regulatory language for titles II and III addresses determinations of “direct threat[s]” at 28 CFR 35.104, 36.104 (definitions) and at 28 CFR 35.139, 36.208 in a substantially similar manner. The title II and III regulations define “direct threat” as “a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services * * *.” 28 CFR 35.104, 36.104. Consistent with *Arline*, the regulations set forth evaluative criteria directing that determinations as to whether an individual’s disability constitutes a direct threat to others must be based on individualized findings of fact that take into account the nature, duration, and severity of the risk to others, the likelihood that injury might occur, and whether reasonable accommodations could mitigate the risk to others. Accordingly, the Department is proposing to revise its section 504 regulation to include language addressing a “direct threat” that will be consistent with the standards articulated in *Arline* and the language in the Department’s ADA title II and III regulations.

Additionally, the Department proposes to include a new paragraph at proposed § 42.513(c) that addresses “direct threat” in the employment discrimination context. As provided in the definitions section, the applicable definition of “direct threat” in the employment discrimination context includes significant risk of substantial harm to self. The Department is therefore proposing to include a paragraph that provides that an employer does not have to employ an individual who would pose a “direct threat” as that term is defined in the EEOC’s regulation implementing title I of the ADA at 29 CFR 1630.2(r) and 1630.15(b).

Section 42.514—Illegal Use of Drugs

The ADA amended the Rehabilitation Act to exclude individuals engaging in illegal drug use from coverage of section 504. *See* ADA, sec. 512 (codified at 29 U.S.C. 705(10)). The Department proposes to include a new provision at § 42.514 that reflects this requirement and uses the same language that is set forth in the comparable provision in the regulation implementing title II of the ADA at 28 CFR 35.131.

Section 42.515—Claims of No Disability

In § 42.515, the Department proposes to add a new provision stating that “[n]othing in this subpart shall provide the basis for a claim that an individual without a disability was subject to

discrimination because of a lack of disability, including a claim that an individual with a disability was granted a reasonable accommodation that was denied to an individual without a disability.” This provision is consistent with a recent amendment to title V of the ADA by section 6 of the ADA Amendments Act. *See* ADA Amendments Act, sec. 6 (codified at 42 U.S.C. 12201(g)). While Congress did not expressly apply this provision to section 504 at that time, the Department believes that in order to maintain appropriate consistency between title II of the ADA and section 504, this principle should be equally applicable to the Department’s regulatory provisions for federally assisted programs and activities.

Program Accessibility

Section 42.521—Existing Facilities

Section 42.521 addresses the obligations of recipients to operate each program or activity subject to this subpart so that when viewed in its entirety, the program or activity is readily accessible to and usable by individuals with disabilities. This obligation, which applies to existing facilities, is generally known as “program accessibility.” The comparable obligation is found in the ADA title II regulation at 28 CFR 35.150. The Department is proposing to make non-substantive changes to certain provisions in § 42.521 in order to conform them to the corresponding language in the title II regulation, including adding a specific provision at § 42.521(b)(3) to address how a historic preservation program shall achieve program accessibility where structural changes would threaten or destroy the historically significant features of a historic property. Aligning the section 504 provision addressing historic preservation programs with the title II provision will ensure that recipients subject to both the ADA and section 504 may follow the same rules with respect to historic preservation.

In conforming the language of § 42.521 to the corresponding title II provision, the Department is also proposing to add an affirmative statement to the regulation at § 42.521(a)(2) making it clear that the longstanding limitations of undue financial and administrative burden and fundamental alteration apply to the obligation to provide program accessibility. *See Alexander v. Choate*, 469 U.S. 287 (1985); *Se. Cmty. Coll. v. Davis*, 442 U.S. 397 (1979).

The Department is also proposing several other revisions to § 42.521. In

§ 42.521(b)(1), the Department is proposing to update the references to the accessibility standards that apply to structural changes to buildings and facilities made for the purposes of providing program accessibility so that the section references the 2010 ADA Standards for Accessible Design (2010 Standards), which the Department is proposing to adopt in § 42.522 below.

The Department’s proposed adoption of the 2010 Standards as the standard under section 504 for new construction and alterations raises the question of whether recipients will have to update elements in buildings or facilities currently compliant with the Uniform Federal Accessibility Standards (UFAS) that are not otherwise being altered, in order to comply with the 2010 Standards. In order to provide certainty to recipients and individuals with disabilities alike, the Department is proposing to add a safe harbor provision at § 42.521(b)(2), which specifies that “elements that have not been altered in existing facilities on or after [INSERT EFFECTIVE DATE OF THE RULE], and that comply with the corresponding technical and scoping specifications for those elements in the Uniform Federal Accessibility Standards (UFAS), * * * are not required to be modified to be brought into compliance with the requirements set forth in the 2010 Standards.” This provision is similar to the safe harbor provision in the Department’s ADA title II regulation at 28 CFR 35.150(b)(2)(i).

Section 42.521(c)—Small Providers

The Department’s current regulation at § 42.521(c) provides that “[i]f a recipient with fewer than fifteen employees finds, after consultation with [an individual with a disability] seeking its services, that there is no method of complying with § 42.521(a) other than making a significant alteration in its existing facilities, the recipient may, as an alternative, refer the [individual with a disability] to other available providers of those services that are accessible.” When the Civil Rights Restoration Act (CRRA) took effect in 1988, it amended section 504 to provide that small providers are not required “to make significant structural alterations to their existing facilities for the purpose of assuring program accessibility, if alternative means of providing the services are available. The terms used in this subsection shall be construed with reference to the regulations existing on the date of the enactment of this subsection.” *See* Public Law 100–259, sec. 4 (Mar. 22, 1988), codified at 29 U.S.C. 794(c). The legislative history of the CRRA referenced, and explicitly

affirmed, provisions similar to the proposed § 42.521(c) that existed in certain Federal agency section 504 regulations on March 22, 1988, including those from the U.S. Department of Agriculture (USDA) and the U.S. Department of Veterans Affairs (VA). *See* S. Rep. No. 100–64(I) at 23–24 (June 5, 1987). The USDA’s section 504 regulation provided (and continue to provide) that a recipient who is a small provider may, as an alternative, refer an individual with a disability “to other providers of those services that are accessible at no additional cost” to the individual with a disability. 7 CFR 15b.18(c). The VA’s section 504 regulation provided (and continue to provide) that “[w]here referrals [by small providers] are necessary, transportation costs shall not exceed costs to and from recipients’ programs or activities.” 38 CFR 18.422(c). The legislative history also set forth expectations about small providers’ obligations to individuals with disabilities when making their facilities accessible would involve a significant structural alteration. The legislative history cited to the Department of Health and Human Services’ (HHS) regulation, noting that under the regulation, small providers may exercise the exception only after determining “that the other provider’s program is, in fact, accessible and that the other provider is willing to provide the services.” S. Rep. No. 100–64 (I), at 23–24 (citing to HHS rule at 45 CFR 84.22(c)); *see* 42 FR 22676, 22689 (May 4, 1977). The legislative history further observed that under the regulation, prior to making any referral, the small providers must ensure that there are “no resulting additional obligations to the [individual with a disability].” S. Rep. No. 100–64 (I), at 23; *see* 42 FR 22676, 22689 (May 4, 1977). Referencing the HHS, VA, and USDA regulations, the legislative history affirmed that the new statutory “subsection makes it clear that the special rules now contained in the above described regulations are now specifically statutorily authorized.” S. Rep. No. 100–64 (I), at 24.

The Department is proposing to revise its small provider provision to reflect Congress’s intent when it revised section 504. Accordingly, the Department proposes to revise § 42.521(c) to provide that a recipient with fewer than 15 employees who finds, after consultation with an individual with a disability seeking its services, that there is no method of complying with § 42.521(a) other than making a significant alteration to its existing facilities, may, as an alternative,

refer the individual with a disability to alternative providers of available accessible services. The proposed revision further provides that for these purposes, in order to ensure that the services are available, the small provider “must first determine that the alternative provider’s services are accessible, the alternative provider is willing to provide the services, the services are available at no additional cost to the individual with a disability, and transportation costs to and from the alternative provider do not exceed costs to and from the small provider.” As with all providers subject to section 504, if the cost of making structural changes as a means of providing program accessibility in existing facilities is an undue financial and administrative burden, then the small provider is not obligated to make those changes. The Department notes that in the vast majority of cases, small providers are also subject either to the program accessibility requirements of title II of the ADA or the barrier removal obligation of title III of the ADA.

Section 42.521(d)—Written Plan Required for Certain Recipients To Achieve Program Accessibility

The Department is proposing to revise § 42.521(d) to clarify that this provision only refers to those circumstances where a written plan was originally required for recipients subject to the rule when it first took effect. The Department is proposing to replace all references in this section that set compliance dates for specific requirements in relation to the “effective date of this subpart” with references to the actual dates when compliance was required. These changes will maintain continuity of regulatory requirements by clarifying that the original effective date of the subpart (and other deadlines based on this original effective date), and not the date these proposed amendments take effect, is the operative date for compliance with this section of the regulation.

Section 42.521(e)—Notice of Location of Accessible Facilities

Under § 42.521(e) of the Department’s current regulation, the recipient is required to adopt and implement procedures to ensure that interested persons, including persons with various types of disabilities, can obtain information as to the existence and location of accessible services, activities, and facilities. The Department proposes to make a non-substantive revision to the provision on notice of location of accessible facilities

(renumbered as § 42.521(e)(1)) to reflect updated terminology describing certain disabilities.

Proposed § 42.521(e)(2) clarifies the obligation to provide notice by adding language consistent with the existing title II obligation at 28 CFR 35.163(b) requiring signs at a primary entrance to each of the recipient’s inaccessible facilities, if any, directing users to an accessible facility or a location where they can obtain information about accessible facilities.

Section 42.522—Program Accessibility in Jails, Detention and Correctional Facilities, and Community Correctional Facilities

The Department is proposing to add a new section entitled “Program accessibility in jails, detention and correctional facilities, and community correctional facilities.” This section, which is modeled after the Department’s title II regulation at 28 CFR 35.152, provides additional guidance about the specific application of section 504’s general requirements to these facilities operated by or on behalf of recipients of Federal financial assistance from the Department. While all of the jails, detention and correctional facilities, and community correctional facilities funded by the Department are also public entities subject to the title II requirements, because the Department provides assistance to so many of the agencies that operate these facilities, it believes it will be helpful to recipients to understand that the same requirements apply under both statutes. The Department has added some language that clarifies that the requirements in this section are in addition to the general requirements of this subpart and intends that this section be interpreted consistent with 28 CFR 35.152.

Section 42.523—New Construction and Alterations

Section 42.523(a) and (b)—Design and Construction; Alteration

Section 42.522(a) of the Department’s current regulation requires that, if construction of a recipient’s facility commenced after the effective date of the regulation, the facility must be designed and constructed so that it is readily accessible to and usable by individuals with disabilities. In proposed § 42.523(a), the Department proposes to replace the reference to the “effective date of this subpart” with “July 3, 1980,” which was the date the Department’s original section 504 regulation took effect. This will maintain continuity of regulatory

requirements by clarifying that the original effective date of the subpart, and not the date these proposed amendments take effect, is the operative date for compliance with this section of the regulation.

Section 42.522(a) of the Department's existing regulation also requires that facility alterations commenced after the effective date of the regulation that affect or may affect the facility's usability must be carried out so that, to the maximum extent feasible, the altered portion of the facility is readily accessible to and usable by individuals with disabilities. The Department proposes to separate this requirement into its own paragraph at proposed § 42.523(b) and to update its phrasing for clarity. For the same purposes as the new construction paragraph above, the Department proposes to replace the reference to the "effective date of this subpart" with "July 3, 1980."

Section 42.523(c)(1)—Adoption of Updated Accessibility Standards

The Department proposes to revise § 42.523 to adopt the 2010 Standards for new construction and alterations in lieu of the Uniform Federal Accessibility Standards (UFAS).¹⁰ Section 42.522 of the Department's current regulation provides that any new construction or structural alterations made by recipients must be made in compliance with UFAS, 49 FR 31528, app. A (Aug. 7, 1984). UFAS was adopted in 1991 as the applicable accessibility standard for section 504 as part of a joint rulemaking with several other agencies, moderated by the Department pursuant to its coordinating authority for section 504 under Executive Order 12250. The Department and participating agencies adopted UFAS to diminish the possibility that some recipients of Federal financial assistance would face conflicting enforcement standards either between section 504 and the Architectural Barriers Act of 1968 (which applies to all buildings and facilities built, altered, or leased with Federal dollars), or among the section 504 regulations of different Federal agencies. 55 FR 52136, 52136–37 (1990). The Department adopted the 2010

Standards for all new construction and alterations commenced on or after March 15, 2012, for entities subject to titles II or III of the ADA. 75 FR 56164, 56182 (Sept. 15, 2010). Until that time, both UFAS and the 1991 ADA Standards for Accessible Design were options for compliance with title II.

The Department's proposed § 42.523(c)(1) would require that recipients comply with the 2010 Standards beginning one year from the publication date of the final rule. In addition, the Department recognizes that many but not all of its recipients are also subject to the ADA and are already required to comply with the 2010 Standards. In order to minimize the timeframe during which recipients subject to section 504 and the ADA must comply with two separate accessibility standards, the Department proposes that beginning with the publication of the final rule in the **Federal Register** and until the 2010 Standards take effect under section 504, recipients will have the choice of complying with either UFAS or the 2010 Standards.¹¹ Regardless of which accessibility standard recipients choose to use during this time period, recipients must consistently rely on one accessibility standard and may not designate one accessibility standard for one part of a facility and the other for the remainder.

While in some circumstances the ADA imposes different obligations on public entities as compared to private entities, section 504 does not differentiate between public and private recipients of Federal financial assistance. Accordingly, neither the Department's section 504 regulation nor UFAS imposes different scoping and technical accessibility requirements on recipients based upon their status as public or private entities.

Although in nearly all circumstances the requirements in the 2010 Standards for buildings and facilities subject to either title II or title III of the ADA are the same, there are several instances where the requirements differ. Most significantly, Exception 1 of section 206.2.3 of the 2010 Standards exempts

certain multistory buildings owned by private entities from the requirement to provide an elevator to facilitate an accessible route throughout the building. This exemption does not apply to buildings owned by public entities.¹² Section 217.4.3 of the 2010 Standards also specifies TTY requirements for public buildings that are different than those required for private buildings. In order to maintain the required consistency in the accessibility requirements applicable to all its recipients, regardless of whether they are public or private entities, the Department proposes to require all buildings and facilities subject to its section 504 federally assisted regulation to comply with the 2010 Standards' scoping and technical requirements for a "public building or facility," which are the requirements for buildings subject to title II of the ADA.

UFAS and the 2010 Standards also have differing requirements for employee work areas.¹³ Sections 4.1.2(17) and 4.1.4(4–13) of UFAS require that most employee work areas be accessible where those areas would result in the employment of individuals with disabilities, and that 5% of all work stations in an employee work area be accessible. Sections 203.9 and 207.1 of the 2010 Standards require only that work areas be designed for approach, entry, and exit by individuals with disabilities. Subject to certain exceptions, section 206.2.8 of the 2010 Standards requires common use circulation paths in employee work areas to be accessible to allow individuals with disabilities to move within the space. As the Department previously noted in its "Analysis and Commentary on the 2010 Standards for Accessible Design," the 2010 Standards' approach to work areas provides access for individuals with disabilities to approach, enter, and exit work areas such that reasonable accommodations to those work areas can then be made as required by the ADA and section 42.511 of the Department's current regulation. 28 CFR part 36, app. B, https://www.ada.gov/regs2010/titleIII_2010/reg3_2010_appendix_b.htm. The

¹⁰ In the preamble to the revised final title II regulation that adopted the 2010 Standards as new ADA accessibility standards, the Department stated that Federal agencies that extend Federal financial assistance should revise their section 504 regulations to adopt the 2010 Standards as updated standards for new construction and alterations that supersede UFAS. 75 FR 56164, 56213 (Sept. 15, 2010). The Department also stated its intent to work with Federal agencies to revise their section 504 regulations in the near future to adopt the 2010 Standards as the appropriate accessibility standard for their recipients.

¹¹ This choice is in keeping with the Department's March 2011 memorandum advising Federal agencies that until such time as they update their agency's regulation implementing the federally assisted provisions of section 504, they may notify covered entities that they may use the 2010 Standards as an acceptable alternative to UFAS. Memorandum from Thomas E. Perez on Permitting Entities Covered by the Federally Assisted Provisions of Section 504 of the Rehabilitation Act to Use the 2010 ADA Standards for Accessible Design as an Alternative Accessibility Standard for New Construction and Alterations (Mar. 29, 2011), www.ada.gov/504_memo_standards.htm (last visited Mar. 10, 2016).

¹² The Department also notes that the current accessibility standard, UFAS, has no elevator exemption for private entities. Therefore, requiring private entities that are subject to both title III of the ADA and section 504 to comply with the requirements for public buildings and facilities in the 2010 Standards imposes no new burdens on those entities.

¹³ In addition, section 4.1.2(13) of UFAS requires visual alarms where warning systems are provided. Section 215.3 of the 2010 Standards require that audible alarms in employee work areas have wiring such that visual alarms can be integrated into the alarm system.

Department expects that maintaining consistent application of the 2010 Standards will streamline compliance for many recipients, particularly those that are subject to titles II or III of the ADA.

In addition, the Department's current section 504 federally assisted regulation at § 42.522(b) allows departures from the requirements of UFAS if the other methods used provide "substantially equivalent or greater access to and usability of the building." This concept of departure from the accessibility standards is retained in this regulation (renumbered as § 42.523(c)(1)(v)), but the phrasing is adjusted for consistency with the title II regulation.

Lastly, the Department notes that a recipient that receives funding from multiple Federal agencies must ensure that it is compliant with the accessibility standards of each agency from which it receives Federal funding.

Section 42.523(c)(2) and (3)—Triggering Events for Compliance With the Applicable Accessibility Standards

As discussed above, the Department is proposing that all recipients must comply with the 2010 Standards in lieu of UFAS one year from the publication date of the final rule in the **Federal Register**. In recognition of the fact that buildings and facilities may be in the planning, design, or construction phases for a number of years, the Department is proposing to specify "triggering events" that would determine which buildings and facilities must comply as of the compliance date. The Department is proposing, however, to use different "triggering events" for application of the 2010 Standards to new construction and alterations for "public entities" that receive financial assistance from the Department as compared to "private entities" that receive such assistance. These two different categories of "triggering events" are based upon the "triggering events" specified in the Department's title II and title III rules at 28 CFR 35.151(c) and 28 CFR 36.406(a), respectively. The Department expects that maintaining consistency with the ADA requirements in this regard will simplify application of the 2010 Standards for recipients already subject to either title II or title III.

Thus, the Department is proposing that recipients that are private entities may choose either UFAS or the 2010 Standards when one of the following events has occurred on or after the date of publication of the final rule in the **Federal Register** but before the compliance date for the 2010 Standards: (1) The last application for a building permit or permit extension is certified to

be complete by a State, county, or local government; (2) in those jurisdictions where the government does not certify completion of applications, the last application for a building permit or permit extension is received by the State, county, or local government; or (3) if no permit is required, the commencement of physical construction or alterations.

Similarly, the Department is proposing that recipients that are private entities must comply with the 2010 Standards as of one year from publication of this rule in the **Federal Register** when one of the following events has occurred on or after one year from the date of publication of the final rule in the **Federal Register**: (1) The last application for a building permit or permit extension is certified to be complete by a State, county, or local government; (2) in those jurisdictions where the government does not certify completion of applications, the last application for a building permit or permit extension is received by the State, county, or local government; or (3) if no permit is required, the commencement of physical construction or alterations.

For public entities receiving Federal financial assistance from the Department, the Department is proposing to use the commencement of physical construction or alterations on or after the publication date of the final rule but before the required compliance date of the 2010 Standards as the "triggering event" for the choice of standards permitted by § 42.523(c)(1). Similarly, the Department is proposing to use the commencement of physical construction or alterations on or after one year from publication of the final rule in the **Federal Register** as the "triggering event" for the requirement to comply with the 2010 Standards. This is consistent with the approach the Department took for compliance with the 2010 Standards under title II of the ADA.

The Department is proposing at § 42.523(c)(3) to add a provision similar to the language in the ADA regulations at 28 CFR 35.151(c)(4) in title II and 28 CFR 36.406(a)(4) in title III that states that "ceremonial groundbreaking or razing of structures prior to site preparation will not be considered to commence or start physical construction or alterations."

42.523(c)(4)—Compliance With the Architectural Barriers Act of 1968

Facilities designed, built, altered, or leased with Federal funds are subject to the requirements of the Architectural Barriers Act of 1968, as amended, 42

U.S.C. 4151–57 (ABA). Facilities that receive Federal financial assistance from the Department are required to comply with the ABA accessibility standards adopted by the General Services Administration (GSA), which is the Federal agency responsible for adopting ABA standards for all buildings subject to the ABA except for residential structures; buildings, structures, and facilities of the Department of Defense (DOD); and buildings, structures and facilities of the U.S. Postal Service (USPS).¹⁴ The U.S. Access Board is the enforcing authority with respect to complaints under the ABA.

Many, but not all, buildings and facilities used by recipients for their programs or activities are also covered by the ABA. Until recently, UFAS served as the applicable accessibility standard under both section 504 federally assisted regulations and the ABA, and, therefore, facilities that complied with UFAS were also in compliance with the ABA. While there is significant overlap between the current ABA standards and the 2010 Standards, there are a number of differences. Recipients subject to both statutes need to be aware of the requirements of both accessibility standards and need to comply with both. Thus, the Department is proposing at § 42.523(c)(4) to add a provision reminding recipients that "[n]othing in this section relieves recipients whose facilities are covered by the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151–4157), from their responsibility of complying with the requirements of that Act and any implementing regulations."

Procedures

Section 42.530—Administrative Procedures for Recipients

Certain provisions of § 42.505 of the existing regulation (renumbered as § 42.530) impose administrative requirements related to the designation of a responsible employee for compliance with this subpart (§ 42.505(d) of the current regulation), adoption of grievance procedures (§ 42.505(e) of the current regulation), and provision of notice of nondiscrimination (§ 42.505(f) of the

¹⁴ The U.S. Access Board is charged with promulgating accessibility guidelines that form the basis of the ABA standards adopted by GSA, Department of Housing and Urban Development (HUD), DOD, and USPS. See 42 U.S.C. 4151 *et seq.* On July 23, 2004, the Access Board published its final revised ABA Accessibility Guidelines (2004 ABAAS). See 69 FR 44084. In 2005, GSA adopted the 2004 ABAAS as the enforceable standard for Federal facilities under its jurisdiction. See 41 CFR 102–76.65.

current regulation). The existing regulatory provisions apply these specific requirements automatically to all recipients: Employing 50 or more persons; and receiving Federal financial assistance from the Department of \$25,000 or more (in the case of the designated employee and grievance procedures) or more than \$25,000 (in the case of the provision of notice). However, the existing regulatory provisions also give the Department discretion whether to apply these requirements to “any recipient with fewer than fifty employees and receiving less than \$25,000” in financial assistance from the Department. *See* § 42.505(g).

The Department is seeking public comment on whether it should revise paragraphs 42.505(d), (e) and (f) of the existing regulation (renumbered as 42.530(c), (d) and (e)), to delete any references to size of grant award, so that the number of employees (50 or more) is the only criteria triggering the application of the administrative requirements in these three paragraphs. State and local governments already are subject to comparable requirements under title II of the ADA. *See* 28 CFR 35.104, 35.105. The Department is interested in public comment on how many recipients with 50 or more employees receive grants from the Department of less than \$25,000 and thus, would be affected if the Department were to revise the rule in this manner. The Department is also interested in public comment on whether it should change or eliminate the number of employees or the grant amount that triggers these requirements, what the new threshold number of employees or grant amount should be to trigger the obligation to meet these requirements, the number of affected recipients if the Department makes this change, and the costs related to making this change.

Section 42.530(b)—Self-Evaluation

The Department is maintaining the provision requiring recipients to conduct a self-evaluation as a historical requirement but is revising it to refer to the requirements in the past tense. The Department’s current regulation at § 42.505(c) requires in part that a recipient, “within one year of the effective date of this subpart, evaluate and modify its policies and practices that do not meet the requirements of this subpart.” The Department is proposing to make a non-substantive revision to § 42.530(b) of this paragraph by replacing the phrase “within one year of the effective date of this subpart,” with the actual date that was

a year from when the subpart originally took effect, which is “July 3, 1981.” While this provision does not require recipients to conduct a self-evaluation beyond the original deadline of July 3, 1981, the Department is retaining this provision because the self-evaluation requirement under section 504 is cross-referenced in the Department’s ADA title II regulation at 28 CFR 35.105(d).

Section 42.530(d)—Adoption of Grievance Procedures

Section 42.505(e) of the current regulation requires recipients to adopt grievance procedures. The Department proposes to make a non-substantive change to this provision (renumbered as § 42.530(d)) to clarify that the procedures adopted by the recipient must incorporate appropriate due process standards. The Department also proposes to revise this paragraph to clarify that any individual may file a complaint with the Department without having first used the recipient’s grievance procedures.

Section 42.530(e)—Notice

Section 42.505(f) of the current regulation requires a recipient that employs 50 or more persons and that receives Federal financial assistance from the Department of more than \$25,000 to take appropriate initial and continuing steps to notify participants, beneficiaries, applicants, employees, and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of disability in violation of section 504 and this subpart. This provision also delineates the methods of initial and continuing notification to include “the posting of notices, publication in newspapers and magazines, placement of notices in recipients’ publication, and distribution of memoranda or other written communications.”

The proposed regulation maintains the requirement that the notice shall state that the recipient does not discriminate in its programs or activities with respect to access, treatment, or employment and shall include the identification of the person responsible for coordinating compliance with this subpart and where to file section 504 complaints with the Department and, where applicable, with the recipient. The Department encourages recipients to consider including in their notice information relating to the availability of auxiliary aids and services, procedures for obtaining such aids and services, contact information for the

responsible employee, and the availability of grievance procedures.

The Department recognizes that the methods by which a recipient communicates with interested persons have changed significantly since this regulation was promulgated and that this regulation, as currently written, does not reflect the current and future state of information dissemination. With the growth of the Internet and the World Wide Web, the Department has determined that the regulation should also reference postings on a recipient’s Web site as a permissible method of communication and is proposing to include “publications on the recipient’s internet Web site” as a method of initial and continuing notification in the regulation (renumbered as § 42.530(e)(1)). Many of the publications that previously were available in print such as pamphlets, brochures, maps, course catalogs, policies, and procedures are now posted on recipients’ Web sites and can be printed or downloaded by an interested person viewing the Web site.

The Department has deleted the reference in this section to the initial notification deadline because the requirement to provide notice is a continuing obligation and the initial notification deadline has long passed.

Section 42.530(f)

The Department is proposing to remove the reference to paragraph (c)(2) in the current § 42.505(g) (renumbered as § 42.530(f)), which addresses self-evaluation as a potential requirement for recipients with fewer than 50 employees. The self-evaluation provision at paragraph (c)(2) (renumbered as paragraph (b)(2) in this section) is a historical requirement and does not apply to current or future recipients.

Section 42.531—Assurances Required

Section 42.531(a)—Assurances Required

The Department is proposing to revise its provisions on assurances from government agencies at current § 42.504(b) and assurances from institutions at current § 42.504(c) to align these provisions with the definition of “program or activity” that was adopted by the Department in 2003 as a result of the Civil Rights Restoration Act and *Cureton v. NCAA*, 198 F.3d 107 (3d Cir. 1999). *See* 68 FR 51334, 51364 (Aug. 26, 2003). Before the CRRA, the definition of “program” was limited to “the operations of the agency or organizational unit of government receiving or substantially benefiting from the Federal assistance awarded,

e.g., a police department or department of corrections.” 45 FR 37620, 37626 (June 3, 1980). Therefore, it was necessary, for instance, to clarify that the assurance applied to the entire agency or agency of the same governmental unit if the policies of the other agency would affect the “program” (as defined at that time) for which Federal financial assistance was requested. However, it is no longer necessary to include that clarification, given that the definition of “program or activity” that was adopted in 2003 encompasses “all of the operations of the entity of a State or local governmental agency or department that distributes the federal assistance to another State or local governmental agency or department and all of the operations of the State or local governmental entity to which the financial assistance is extended.” See 68 FR 51334, 51336, 51364 (Aug. 26, 2003).

Additionally, the definition of “program or activity” adopted in 2003 also includes educational institutions, corporations and other private organization, and plants. The Department is proposing to revise current § 42.504(c) to ensure that the applicability of the nondiscrimination requirements is also addressed with respect to these entities consistent with the definition of “program or activity.”

Section 42.531(b)—Duration of Obligation

The Department’s current section 504 federally assisted regulation at § 42.504(d) provides that “[w]here the Federal financial assistance is to provide or is in the form of real or personal property, the assurance will obligate the recipient and any transferee for the period during which the property is being used for the purpose for which the Federal financial assistance is extended or for another purpose involving the provisions of similar benefits, or for as long as the recipient retains ownership or possession of the property, whichever is longer. In all other cases the assurance will obligate the recipient for the period during which Federal financial assistance is extended.” The Department proposes several clarifications to the duration of obligation requirement. First, the Department proposes to have the assurance apply to improvements provided by Federal financial aid and assistance, in addition to real or personal property. Second, the Department proposes to reference the provision of federally assisted services, in addition to benefits, as a determinant of the duration of assurance obligations.

Finally, the Department proposes to replace the reference “[i]n all other cases” with “[w]hen the Federal financial assistance is not in the form of real or personal property or improvements” to clarify the particular circumstances under which the assurance continues to apply to the recipient during the period for which Federal financial assistance is extended.

Section 42.532—Compliance and Enforcement Procedures

The Department is maintaining the compliance and enforcement procedures provision from § 42.530 of its current regulation and has renumbered it as § 42.532. In an effort to account for future changes in organization and to eliminate obsolete references to some components that no longer exist within the Department, the Department proposes to replace the references to “LEAA, NIJ, BJS, OJARS, and OJDDP” with the phrase “a grant-making component of the Department.” In addition, the Department is proposing to revise § 42.530(c) which currently provides that “[i]n the case of programs or activities funded by LEAA, NIJ, BJS, OJARS, and OJDDP, the refusal to provide requested information under paragraph (a) of this section and [28 CFR] 42.106 *will be enforced* pursuant to the provisions of section 803(a) of title I of the Omnibus Crime Control and Safe Streets Act” as amended (emphasis added). The Department believes that, in addition to the termination of funds as a remedy under section 803(a) and its successor statute, 42 U.S.C. 3783, the Department should also have the discretion to consider, where appropriate, a more measured response to a recipient’s refusal to provide requested information and therefore, should be able to avail itself of “the remedies, procedures and rights set forth in title VI of the Civil Rights Act of 1964 * * * available to any person aggrieved by any act or failure to act by any recipient of Federal assistance,” consistent with the Rehabilitation Act. See 29 U.S.C. 794a(a)(2). Accordingly, the Department proposes to revise § 42.530(c) of the existing regulation (renumbered as § 42.532(a)(2)) to read “[i]n the case of programs or activities funded by a grant-making component of the Department, the refusal to provide access to sources of information pursuant to 28 CFR 42.106(c) *may be enforced* using the procedures cited in paragraph (a)(i) of this section or using the provisions of section 803(a) of title I of the Omnibus Crime Control and Safe Streets Act” as amended (emphasis added). The Department proposes to delete paragraphs (d) and (e) of existing

§ 42.530. Paragraph (d) established a 180-day limitation period from July 3, 1980, to file complaints of acts of discrimination that occurred prior to July 3, 1980. This provision is no longer necessary. Similarly, the Department proposes deleting paragraph (e) because it establishes a procedure for which the statute of limitations has long passed and is thus no longer necessary.

The Department also proposes to move its existing provision addressing remedial action from existing § 42.505(a) to proposed § 42.532(c) because the requirement for remedial action arises after a finding of discrimination has been made in accordance with the procedures set forth in this section. The Department believes that the placement of the remedial action provision in the compliance procedures section is a more logical placement than its current location in the administrative requirements section. The Department also proposes making non-substantive edits to the existing language.

Lastly, the Department proposes to add a new paragraph at proposed § 42.532(d) that directs complaints alleging violations of section 504 by recipients of financial assistance from the Department to be filed with the Office of Justice Programs. The Office of Justice Programs is the entity within the Department that enforces section 504.

III. Regulatory Analysis

A. Executive Order 13563 and 12866—Regulatory Planning and Review

This NPRM has been drafted in accordance with Executive Order 13563 of January 18, 2011, 76 FR 3821, Improving Regulation and Regulatory Review, and Executive Order 12866 of September 30, 1993, 58 FR 51735, Regulatory Planning and Review. Executive Order 13563 directs agencies, to the extent permitted by law, to propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; tailor the regulation to impose the least burden on society, consistent with obtaining the regulatory objectives; and, in choosing among alternative regulatory approaches, select those approaches that maximize net benefits. Executive Order 13563 recognizes that some benefits and costs are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss qualitatively values that are difficult or impossible to quantify, including equity, human dignity, fairness, and distributive impacts.

The Department has determined that this proposed rule is a “significant regulatory action” as defined by Executive Order 12866, sec. 3(f). The Department has determined, however, that this proposed rule is not an economically significant regulatory action, as it will not have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. This NPRM has been reviewed by the Office of Management and Budget (OMB) pursuant to Executive Orders 12866 and 13563.

This rule provides necessary revisions to the Department’s current section 504 federally assisted regulation to: (1) Incorporate amendments to the statute including the changes in the meaning and interpretation of the applicable definition of disability required by the ADA Amendments Act; (2) incorporate requirements stemming from judicial decisions; (3) update accessibility standards applicable to new construction and alteration of buildings and facilities; (4) update certain provisions to promote consistency with comparable provisions implementing title II of the ADA; and (5) make other non-substantive clarifying edits. The proposed regulation is intended to promote consistency of judicial interpretations and predictability of executive enforcement of section 504 of the Rehabilitation Act, as it pertains to federally assisted programs.

This rule does not significantly change any existing substantive obligations of recipients subject to the Department’s federally assisted regulation because, with the exception of the updated accessibility standard, the Department is incorporating into its section 504 regulation definitions and requirements arising out of statutory amendments to the Rehabilitation Act and longstanding Supreme Court decisions. Moreover, the Department’s adoption of the 2010 Standards as the updated accessibility standard under section 504 will have the effect of simplifying the obligations of its recipients. It should not result in any substantial costs since the vast majority of its recipients are already required to comply with the 2010 Standards because they are either State or local governments covered by title II of the ADA or public accommodations subject to title III of the ADA. The harmonization of the section 504 accessibility requirements with the ADA’s requirements will result in

recipients being subject to only one accessibility standard (the 2010 Standards) instead of two and could have the effect of reducing costs since recipients will no longer have to be familiar with and apply up to two sets of requirements. Lastly, the conformance of section 504’s regulatory provisions with the existing comparable regulatory provisions implementing title II of the ADA will not result in any substantial costs because the requirements under section 504 will remain substantially the same. Title II of the ADA is modeled on section 504 of the Rehabilitation Act of 1973, and Congress intended, through its 1992 Amendments to the Rehabilitation Act, that the principles underlying the ADA also apply to all sections of the Rehabilitation Act, including section 504. As a result, courts have generally treated claims under title II and section 504 the same.

Title III of the ADA applies to the activities of all public accommodations (including nonprofit organizations) funded by the Department with the exception of those recipients that fall within the ADA’s exemption for “religious organizations or entities controlled by religious organizations.” See 42 U.S.C. 12187. Based on the following data from the Department’s grant-making components, the Department estimates that:

- Of the approximately 6395 recipients¹⁵ directly funded by the Office of Justice Programs (OJP), approximately 34 have self-identified as faith-based organizations and may well qualify for the ADA exemption.
- Of the approximately 1478 recipients¹⁶ funded by the Community Oriented Policing Services (COPS) Office, 0 have self-identified faith-based organizations.
- Of the approximately 1739 discretionary grantees and 2934 discretionary subgrantees¹⁷ funded by the Office on Violence Against Women

¹⁵ This number is based upon OJP’s data on active awards as of June 7, 2016. While it is possible that multiple awards may be provided to a single recipient, the Department is assuming a one to one correspondence between award and recipient for purposes of this analysis. The Department has no data on the number of subrecipients funded by OJP, or the number of those subrecipients that may qualify for the ADA religious exemption.

¹⁶ This number is based upon COPS’ data on active awards as of June 6, 2016. While it is possible that multiple awards may be provided to a single recipient, the Department is assuming a one to one correspondence between award and recipient for purposes of this analysis.

¹⁷ This data reflects information that OVW collects from its discretionary grantees in their July–December 2014 semi-annual progress reports and from its subgrantees in their annual 2014 progress reports.

(OVW), approximately 84 have self-identified as faith-based organizations and may well qualify for the ADA exemption.

This data suggests a total of approximately 118 grantees and subgrantees collectively that are self-identified as faith-based organizations. However, because the Department has no data on the number of subrecipients funded by OJP or whether any of them are in fact religious entities, this number may be higher. OJP has previously estimated that there are approximately 100 total faith-based grantees and subgrantees funded by OVW and 50 total faith-based grantees and subgrantees funded by OJP, for a total estimate of 150 grantees and subgrantees from OJP and OVW collectively that are faith-based organizations.¹⁸ Therefore, we estimate between 118 and 150 total faith-based grantees and subgrantees.

The recipients falling under the ADA’s religious exemption could be affected by any incremental changes in the accessibility requirements that result from the change in the applicable standard from UFAS to the 2010 Standards if they engage in new construction or alterations of the facilities serving the program or activity funded by the Department. As discussed in the preamble, however, because of the safe harbor set forth in proposed § 42.521(b)(2), these recipients will not have any obligation to modify any elements in their existing facilities that are compliant with UFAS unless they alter those elements after the compliance date for the Standards takes effect.

A subset of these recipients falling under the ADA religious exemption—those with fewer than 15 employees that were previously exempt from the automatic obligation to provide auxiliary aids and services—may be affected by the proposed elimination of the 15 employee threshold for that obligation. Some of these entities may have fewer than 15 employees.

Given the small subset of recipients who could potentially be affected and the infinite variations of the type of new construction or alteration that could occur along with the type of auxiliary aid or service that could be provided, it would not be feasible to quantify the impact of these changes on an individual basis. However, the Department believes that generally costs for individual recipients would not likely be significant.

¹⁸ This number comes from the Department’s proposed rule to amend 28 CFR part 38, titled “Partnerships with Faith-Based and Other Neighborhood Organizations; Proposed Rule,” 80 FR 47316, 47322 (Aug. 6, 2015).

The Department is interested in public comment on whether its assumptions are correct as to the following: (1) The number of recipients that fall within the ADA exemption for religious organizations or organizations controlled by religious organizations; (2) how many subrecipients funded by OJP may fall within the ADA religious exemption; (3) how many of these recipients also have fewer than 15 employees and whether this particular provision should have a compliance date later than the general effective date of the rule; and (4) the costs to individual recipients not being significant. The Department believes that the costs of this rule will be significantly less than \$100 million in any given year. The Department is interested in public comment on its assumptions that the costs of this rule will be significantly less than \$100 million in any given year.

B. Regulatory Flexibility Act

The Attorney General, in accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), has reviewed this regulation, and by approving it certifies that it will not have a significant economic impact on a substantial number of small entities. With the exception of the updated accessibility standard, the substantive changes to the section 504 regulation reflect the Department's incorporation of definitions and requirements arising out of statutory amendments to the Rehabilitation Act and longstanding Supreme Court decisions. Moreover, the Department's adoption of the 2010 Standards as the updated accessibility standard under section 504 will have the effect of simplifying the obligations of its recipients and should not result in any additional costs since the vast majority of its recipients are already required to comply with the 2010 Standards because they are either State or local governments covered by title II of the ADA or public accommodations subject to title III of the ADA. The harmonization of the section 504 accessibility requirements with the ADA requirements will result in recipients being subject to only one accessibility standard (the 2010 Standards) instead of two. Additionally, the conformance of section 504's regulatory provisions with existing comparable provisions implementing title II of the ADA will not result in any additional costs for the vast majority of recipients funded by the Department. Lastly, the rule does not include reporting requirements and imposes no new recordkeeping requirements. Even if the Department assumed that all of the recipients that

may be subject to the ADA's religious exemption qualify as "small organizations" and would be affected by the incremental changes in the accessibility standards and the elimination of the 15-employee threshold for the requirement to provide auxiliary aids and services, the Department believes that the number of small entities affected by this rule, compared to the thousands of recipients funded by the Department's grant-making components does not constitute a "significant number of small entities" affected by this rule. The Department is interested in public comment on its assumptions about the impact of the revisions to its section 504 regulation on small entities that receive Federal financial assistance from the Department.

C. Executive Order 13132: Federalism

Executive Order 13132 directs that, to the extent practicable and permitted by law, an agency shall not promulgate any regulation that has federalism implications, that imposes substantial direct compliance costs on State and local governments, that is not required by statute, or that preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. Because each change proposed by this rule does not have federalism implications as defined in the Executive Order, does not impose direct compliance costs on State and local governments, is required by statute, or does not preempt State law within the meaning of the Executive Order, the Department has concluded that compliance with the requirements of section 6 is not necessary.

D. Plain Language Instructions

The Department makes every effort to promote clarity and transparency in its rulemaking. In any regulation, there is a tension between drafting language that is simple and straightforward and drafting language that gives full effect to issues of legal interpretation. The Department is proposing a number of changes to this regulation to enhance its clarity and satisfy the plain language requirements, including revising the organizational scheme and adding headings to make it more user-friendly. The Department operates a toll-free ADA Information Line (800) 514-0301 (voice) and (800) 514-0383 (TTY) that the public is welcome to call to obtain assistance in understanding anything in this proposed rule. If any commenter has suggestions for how the regulation could be written more clearly, please provide comments using the contact

information provided in the introductory section of this proposed rule entitled, **FOR FURTHER INFORMATION CONTACT**.

E. Paperwork Reduction Act

This proposed rule does not contain any new or revised "collection[s] of information" as defined by the Paperwork Reduction Act of 1995. 44 U.S.C. 3501 *et seq.*

F. Unfunded Mandates Reform Act

Section 4(2) of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1503(2), excludes from coverage under that Act any proposed or final Federal regulation that "establishes or enforces any statutory rights that prohibit discrimination on the basis of race, color, religion, sex, national origin, age, handicap, or disability." Accordingly, this rulemaking is not subject to the provisions of the Unfunded Mandates Reform Act.

List of Subjects for 28 CFR Part 42

Administrative practice and procedure, Buildings and facilities, Civil rights, Communications, Grant programs, Individuals with disabilities, Reporting and recordkeeping requirements.

By the authority vested in me as Attorney General by law, including 5 U.S.C. 301, 28 U.S.C. 509, 510, 29 U.S.C. 794, Executive Order 12250, part 42 of title 28 of the Code of Federal Regulations is proposed to be amended as follows:

PART 42—NONDISCRIMINATION; EQUAL EMPLOYMENT OPPORTUNITY; POLICIES AND PROCEDURES

■ 1. Revise Subpart G to read as follows:

Subpart G—Nondiscrimination Based on Disability in Federally Assisted Programs or Activities—Implementation of Section 504 of the Rehabilitation Act of 1973

Sec.

General

- § 42.501 Purpose.
- § 42.502 Application, broad coverage, and relationship to other laws.
- § 42.503 Definitions.
- §§ 42.504–42.509 [Reserved]

General Nondiscrimination Requirements

- § 42.510 General prohibitions against discrimination.
- § 42.511 Communications. SECTNO≤
- § 42.512 Employment.
- § 42.513 Direct threat.
- § 42.514 Illegal use of drugs.
- § 42.515 Claims of no disability.
- § 42.516–42.519 [Reserved]

Program Accessibility

- § 42.520 Discrimination prohibited.
- § 42.521 Existing facilities.
- § 42.522 Program accessibility in jails, detention and correctional facilities, and community correctional facilities.
- § 42.523 New construction and alterations.
- §§ 42.524–42.529 [Reserved]

Procedures

- § 42.530 Administrative procedures for recipients.
- § 42.531 Assurances required.
- § 42.532 Compliance and enforcement procedures.
- § 42.533–42.539 [Reserved]
- Appendix—Appendix A to Subpart G of Part 42—Federal Financial Assistance Administered by the Department of Justice to Which This Subpart Applies.
- Appendix—Appendix B to Subpart G of Part 42 [Reserved].
- Appendix—Appendix C to Subpart G of Part 42—Department Regulations Under Title VI of the Civil Rights Act of 1964 (28 CFR 42.106–42.110) Which Apply to This Subpart
- Appendix—Appendix C to Subpart G of Part 42—OJARS' Regulations Under the Omnibus Crime Control and Safe Streets Act, as Amended, Which Apply to This Subpart (28 CFR 42.205 and 42.206)

Authority: 5 U.S.C. 301; 28 U.S.C. 509, 510; 29 U.S.C. 794; E.O. 12250.

General**§ 42.501 Purpose.**

The purpose of this subpart is to implement section 504 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of disability in any program or activity receiving Federal financial assistance.

§ 42.502 Application, broad coverage, and relationship to other laws.

(a) *Application.* This subpart applies to each recipient of Federal financial assistance from the Department of Justice and to each program or activity receiving such assistance. The requirements of this subpart do not apply to the ultimate beneficiaries of Federal financial assistance in the program or activity receiving Federal financial assistance. This subpart does not apply to programs or activities conducted by the Department of Justice.

(b) *Broad scope of coverage.* Consistent with the ADA Amendments Act's purpose of reinstating a broad scope of protection under both the Americans with Disabilities Act and section 504, the definition of "disability" in this subpart shall be construed broadly in favor of expansive coverage to the maximum extent permitted by the terms of section 504. The primary object of attention in cases brought under this subpart should be

whether entities covered under section 504 have complied with their obligations and whether discrimination has occurred, not whether the individual meets the definition of "disability." The question of whether an individual meets the definition of "disability" should not demand extensive analysis.

(c) *Relationship to other laws.*

(1) The obligation to comply with this subpart is not obviated by or otherwise affected by the existence of any State or local law or other requirement that, on the basis of disability, imposes prohibitions or limits upon the eligibility of qualified individuals with disabilities to receive aid, benefits, or services or to practice any occupation or profession.

(2) This subpart does not invalidate or limit the remedies, rights, and procedures of any other Federal law, or State or local law (including State common law), that provide greater or equal protection for the rights of individuals with disabilities or individuals associated with them.

§ 42.503 Definitions.

As used in this subpart the term—
2004 ADAAG means the requirements set forth in appendices B and D to 36 CFR part 1191 (2009).

2010 Standards means the 2010 ADA Standards for Accessible Design, which consist of the 2004 ADAAG and the requirements contained in 28 CFR 35.151.

The Act means the Rehabilitation Act of 1973, Public Law 93–112, as amended, 29 U.S.C. 701 *et seq.*

Applicant means one who submits an application, request, or plan required to be approved by the designated Department official or by a primary recipient, as a condition to eligibility for Federal financial assistance.

Auxiliary aids and services include—

(1) Qualified interpreters on-site or through video remote interpreting (VRI) services; note takers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally

delivered information available to individuals who are deaf or hard of hearing.

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

Component means any specific division, operating bureau, or other organizational unit of the Department of Justice.

Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

Department means the Department of Justice, including each of its specific divisions, operating bureaus, and other organizational units.

Direct threat means

(1) With respect to any aid, benefit, or service provided under a program or activity subject to this subpart, a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services.

(2) With respect to employment, the term as defined by the Equal Employment Opportunity Commission's regulation implementing title I of the Americans with Disabilities Act of 1990, at 29 CFR 1630.2(r).

Disability has the same meaning as given in 28 CFR part 35.

Drug means a controlled substance as defined in schedules I through V of section 202 of the Controlled Substances Act, 21 U.S.C. 812.

Facility means all or any portion of buildings, structures, sites, complexes, equipment, roads, walks, passageways, parking lots, rolling stock, or other conveyances, including the site where the building, property, structure, or equipment is located, or other real or personal property or interest in such property.

Federal financial assistance means any grant, cooperative agreement, loan, contract (other than a direct Federal procurement contract or a contract of insurance or guaranty), subgrant, contract under a grant, or any other arrangement by which the Department

provides or otherwise makes available assistance in the form of—

- (1) Funds;
- (2) Services of Federal personnel;
- (3) Real and personal property or any interest in or use of such property, including—

- (i) Transfers or leases of such property for less than fair market value or for reduced consideration; and

- (ii) Proceeds from a subsequent transfer or lease of such property if the Federal share of its fair market value is not returned to the Federal Government; and

- (4) Any other thing of value by way of grant, loan, contract or cooperative agreement.

Historic preservation programs means programs conducted by recipients of Federal financial assistance that have preservation of historic properties as a primary purpose.

Historic Properties means those buildings or facilities that are eligible for listing in the National Register of Historic Places, or such properties designated as historic under a statute of the appropriate State or local government body.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act, 21 U.S.C. 812. The term *illegal use of drugs* does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with a disability means any person who has a disability. The term *individual with a disability* does not include an individual who is currently engaging in the illegal use of drugs, when the recipient acts on the basis of such use.

Primary recipient means any recipient that is authorized or required to extend Federal financial assistance to another recipient.

Program or activity means all of the operations of any entity described in paragraphs (1) through (4) of this section, any part of which is extended Federal financial assistance—

- (1)(i) A department, agency, special purpose district, or other instrumentality of a State or of a local government; or

- (ii) The entity of such State or local government that distributes such assistance and each such department or agency (and each other State or local government entity) to which the assistance is extended, in the case of assistance to a State or local government;

- (2)(i) A college, university, or other postsecondary institution, or a public system of higher education; or

- (ii) A local educational agency, as defined in 20 U.S.C. 7801, system of vocational education, or other school system;

- (3)(i) An entire corporation, partnership, or other private organization, or an entire sole proprietorship if—

- (A) Assistance is extended to such corporation, partnership, private organization, or sole proprietorship as a whole; or

- (B) The corporation, partnership, private organization, or sole proprietorship is principally engaged in the business of providing education, health care, housing, social services, or parks and recreation; or

- (ii) The entire plant or other comparable, geographically separate facility to which Federal financial assistance is extended, in the case of any other corporation, partnership, private organization, or sole proprietorship; or

- (4) Any other entity which is established by two or more of the entities described in paragraph (s)(1), (2), or (3) of this section.

Qualified individual with a disability means—

- (1) With respect to any aid, benefit, or service provided under a program or activity subject to this subpart, an individual with a disability who, with or without reasonable accommodations in rules, policies, or procedures, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids or services, meets the essential eligibility requirements for receipt of services or the participation in programs or activities provided by a recipient; and

- (2) With respect to employment, the definition of “qualified” in the Equal Employment Opportunity Commission’s regulation implementing title I of the Americans with Disabilities Act of 1990, at 29 CFR 1630.2(m), applies to this subpart.

Qualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. *Qualified interpreters* include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.

Qualified reader means a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.

Recipient means any State or unit of local government, any instrumentality of a State or unit of local government, any public or private agency, institution, organization, or other public or private entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a *recipient*, but excluding the ultimate beneficiary of the assistance.

Section 504 means section 504 of the Rehabilitation Act of 1973, Public Law 93–112, 87 Stat. 394, 29 U.S.C. 794, as amended.

Subrecipient means an entity to which a primary recipient extends Federal financial assistance.

Ultimate beneficiary is one among a class of persons who are entitled to benefit from, or otherwise participate in, a program or activity receiving Federal financial assistance and to whom the protections of this subpart extend. The *ultimate beneficiary* class may be the general public or some narrower group of persons.

Video remote interpreting (VRI) service means an interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide-bandwidth video connection that delivers high-quality video images as provided in § 42.511.

General Nondiscrimination Requirements

§ 42.510 General prohibitions against discrimination.

(a) *General.* No qualified individual with a disability shall, solely on the basis of disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity subject to this subpart.

(b) *Discriminatory actions prohibited.*
(1) A recipient may not, in providing any program or activity subject to this subpart directly, or through contractual, licensing, or other arrangements, on the basis of disability—

- (i) Deny a qualified individual with a disability the opportunity accorded others to participate in, or benefit from, the aid, benefit, or service;

- (ii) Afford a qualified individual with a disability an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

- (iii) Provide a qualified individual with a disability with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit,

or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aid, benefits, or services to individuals with disabilities or to any class of individuals with disabilities than are provided to others unless such action is necessary to provide qualified individuals with disabilities or any class of individuals with disabilities with aid, benefits, or services that are as effective as that provided to others;

(v) Deny a qualified individual with a disability an equal opportunity to provide services to the program or activity;

(vi) Deny a qualified individual with a disability an opportunity to participate as a member of a planning or advisory board;

(vii) Aid or perpetuate discrimination against a qualified individual with a disability by providing assistance to an agency, organization, or person that discriminates on the basis of disability in providing any aid, benefit, or service to beneficiaries of the recipient's program or activity;

(viii) Permit the participation in the program or activity of agencies, organizations, or persons which discriminate against individuals with disabilities who participate in or benefit from the recipient's program; or

(ix) Otherwise limit a qualified individual with a disability in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the aid, benefit, or service.

(2) A recipient may not deny a qualified individual with a disability the opportunity to participate in any aid, benefits, or services that are not separate or different, despite the existence of permissibly separate or different aid, benefits, or services.

(3) A recipient may not, directly or through contractual, licensing, or other arrangements, utilize criteria or methods of administration—

(i) That have the effect of subjecting qualified individuals with disabilities to discrimination on the basis of disability;

(ii) That have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the recipient's program or activity with respect to individuals with disabilities; or

(iii) That perpetuate the discrimination of another recipient if both recipients are subject to common administrative control or are departments or agencies, special purpose districts, or other instrumentalities of the same State or local government unit.

(4) A recipient may not, in determining the site, or a location of a facility, make selections—

(i) That have the effect of excluding individuals with disabilities from, denying them the benefits of, or otherwise subjecting them to discrimination on the basis of disability; or

(ii) That have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the program or activity with respect to individuals with disabilities.

(5) An entity not otherwise receiving Federal financial assistance but using a facility provided with the aid of Federal financial assistance after the effective date of this subpart is prohibited from discriminating on the basis of disability.

(6) A recipient, in the selection of procurement contractors, may not use criteria that subject qualified individuals with disabilities to discrimination on the basis of disability.

(7) A recipient may not administer a licensing or certification program in a manner that subjects qualified individuals with disabilities to discrimination on the basis of disability, nor may a recipient establish requirements for any of the programs or activities of entities that are licensed or certified that subject qualified individuals with disabilities to discrimination on the basis of disability. The programs or activities of entities that are licensed or certified by a recipient are not, themselves, covered by this subpart unless those entities are also recipients of Federal financial assistance from the Department.

(c) This subpart does not prohibit the exclusion of individuals without disabilities or specified classes of individuals with disabilities from aid, benefits, or services limited by Federal statute or executive order to individuals with disabilities or a different class of individuals with disabilities.

(d) Nothing in this subpart prohibits a recipient from providing aid, benefits, or services to individuals with disabilities or to a particular class of individuals with disabilities beyond those required by this part.

(e) *Integrated setting.* A recipient shall administer programs and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities.

(f) Nothing in this subpart shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit provided under section 504 or this subpart which such individual chooses not to accept.

(g) *Reasonable accommodations.* (1) A recipient shall make reasonable accommodations in policies, practices, or procedures when such accommodations are necessary to avoid discrimination on the basis of disability, unless the recipient can demonstrate that making the accommodations would fundamentally alter the nature of the program or activity or result in undue financial and administrative burdens.

(2) A recipient is not required to provide a reasonable accommodation to an individual who meets the definition of disability solely under the "regarded as" prong of the definition of disability as defined in 28 CFR 35.104.

(3) With respect to employment, the definitions and standards applied to "reasonable accommodation" and "undue hardship" in the Equal Employment Opportunity Commission's regulation implementing title I of the Americans with Disabilities Act, at 29 CFR 1630.2(o) and (p), and 1630.9, apply to this subpart.

(h) *Prohibition on surcharges.* A recipient may not place a surcharge on a particular individual with a disability or any class of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids, reasonable accommodations, or program accessibility, that are required to provide that individual or class with the nondiscriminatory treatment required by the Act or this subpart.

(i) *Prohibition on associational discrimination.* A recipient shall not exclude or otherwise deny aid, benefits, or services of its program or activity to an individual because of that individual's relationship or association with an individual with a known disability.

(j) *Prohibition on discriminatory eligibility criteria.* A recipient shall not impose or apply eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any aid, benefit, or service unless such criteria can be shown to be necessary for the provision of the aid, benefit, or service being offered.

(k) *Prohibition on intimidation and retaliation.* A recipient shall not intimidate or retaliate against any individual, with or without a disability, for the purpose of interfering with any right secured by section 504 or this subpart.

(l) The enumeration of specific forms of prohibited discrimination in this subpart is not exhaustive but only illustrative.

§ 42.511 Communications.

(a) *General.* (1) A recipient shall take appropriate steps to ensure that communications with applicants, participants, beneficiaries, members of the public, and companions with disabilities are as effective as communications with others.

(2) For purposes of this section, “companion” means a family member, friend, or associate of an individual seeking access to a program, or activity of a recipient, who, along with such individual, is an appropriate person with whom the recipient should communicate.

(b) *Auxiliary aids and services.* (1) A recipient shall furnish appropriate auxiliary aids and services where necessary to afford qualified individuals with disabilities, including applicants, participants, beneficiaries, companions, and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity, of a recipient.

(2) The type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. In determining what types of auxiliary aids and services are necessary, a recipient entity shall give primary consideration to the requests of individuals with disabilities. In order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way as to protect the privacy and independence of the individual with a disability.

(c) *Limitations on use of accompanying adults or children as interpreters.*

(1) A recipient shall not require an individual with a disability to bring another individual to interpret for him or her.

(2) A recipient shall not rely on an adult accompanying an individual with a disability to interpret or facilitate communication except—

(i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available; or

(ii) When the individual with a disability specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.

(3) A recipient shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public when there is no interpreter available.

(d) *Video remote interpreting (VRI) services.* A recipient that provides qualified interpreters via VRI services shall ensure that it provides—

(1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high-quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication;

(2) A sharply delineated image that is large enough to display the interpreter’s face, arms, hands, and fingers, and the participating individual’s face, arms, hands, and fingers, and can be seen by the participating individual regardless of the individual’s body position;

(3) A clear, audible transmission of voices; and

(4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the VRI.

(e) *Telecommunications.* (1) Where a recipient communicates by telephone with applicants, participants, beneficiaries, members of the public, and companions with disabilities, the recipient shall communicate with individuals who are deaf or hard of hearing or have speech disabilities using telecommunication systems that provide equally effective communication.

(2) When a recipient uses an automated-attendant system, including, but not limited to, voice mail and messaging, or an interactive voice response system, for receiving and directing incoming telephone calls, that system must provide effective real-time communication with individuals using auxiliary aids and services, including, but not limited to TTYs and all forms of FCC-approved telecommunications relay systems, including Internet-based relay systems.

(3) A recipient shall respond to telephone calls from a relay service, established under 47 U.S.C. 225, including telephone relay, video relay, and Internet protocol (IP) relay in the same manner that it responds to other telephone calls.

(f) *Limitations.* This section does not require the recipient to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In

those circumstances where the recipient believes that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the recipient has the burden of proving that compliance with § 42.511 would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of the recipient or the head’s designee after considering all resources available for use in the funding and operation of the program or activity, and it must be accompanied by a written statement of the reasons for reaching that conclusion. If an action otherwise required by this section would result in such an alteration or such burdens, the recipient shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, persons with a disability receive the aid, benefits, and services of the program or activity.

§ 42.512 Employment.

(a) *Discrimination prohibited.* (1) *General.* No qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any program or activity to which this subpart applies.

(2) *Employment discrimination standards.* The standards used to determine whether paragraph (a)(1) of this section has been violated shall be the standards applied under title I of the Americans with Disabilities Act of 1990 (ADA), 42 U.S.C. 12111 *et seq.*, and, as such sections relate to employment, the provisions of sections 501 through 504 and 511 of the ADA of 1990, as amended (codified at 42 U.S.C. 12201–12204, 12210), as implemented in the Equal Employment Opportunity Commission’s regulation at 29 CFR part 1630. The procedures to be used to determine whether paragraph (a) of this section has been violated shall be the procedures set forth in § 42.532 of this subpart.

42.513 Direct threat.

(a) This subpart does not require a recipient to permit an individual to participate in or benefit from the program or activity of that recipient when that individual poses a direct threat to the health or safety of others.

(b) In determining whether an individual poses a direct threat to the health or safety of others, a recipient must make an individualized assessment, based on reasonable judgment that relies on current medical

knowledge or on the best available objective evidence, to ascertain—the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable accommodations in policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.

(c) An employer does not have to employ an individual who would pose a direct threat as that term is defined in the Equal Employment Opportunity Commission's regulation implementing title I of the Americans with Disabilities Act of 1990, at 29 CFR 1630.2(r) and 1630.15(b).

§ 42.514 Illegal use of drugs.

(a) *General.* Except as provided in paragraph (c) of this section, “Health and drug rehabilitation services,” this subpart does not prohibit discrimination against an individual based on that individual's current use of illegal drugs.

(b) *Non-discrimination requirement.* A recipient shall not discriminate on the basis of illegal use of drugs against an individual who is not engaging in current illegal use of drugs and who—

(1) Has successfully completed a supervised drug rehabilitation program or has otherwise been rehabilitated successfully;

(2) Is participating in a supervised rehabilitation program; or

(3) Is erroneously regarded as engaging in such use.

(c) *Health and drug rehabilitation services.* (1) A recipient shall not deny health services, or services provided in connection with drug rehabilitation, to an individual on the basis of that individual's current illegal use of drugs, if the individual is otherwise entitled to such services.

(2) A drug rehabilitation or treatment program may deny participation to individuals who engage in illegal use of drugs while they are in the program.

(d) *Drug testing.* (1) This subpart does not prohibit a recipient from adopting or administering reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual who formerly engaged in the illegal use of drugs is not now engaging in current illegal use of drugs.

(2) Nothing in paragraph (d)(1) of this section shall be construed to encourage, prohibit, restrict, or authorize the conducting of testing for the illegal use of drugs.

§ 42.515 Claims of no disability.

Nothing in this subpart shall provide the basis for a claim that an individual without a disability was subject to discrimination because of a lack of

disability, including a claim that an individual with a disability was granted a reasonable accommodation that was denied to an individual without a disability.

Program Accessibility

§ 42.520 Discrimination prohibited.

A recipient shall ensure that no qualified individual with a disability is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination under any program or activity receiving Federal financial assistance because the recipient's facilities are inaccessible to or unusable by individuals with a disability.

§ 42.521 Existing facilities.

(a) *Accessibility.* A recipient shall operate its program or activity so that when each part of the program or activity is viewed in its entirety, it is readily accessible to and usable by individuals with disabilities. This section does not—

(1) Necessarily require a recipient to make each of its existing facilities or every part of an existing facility accessible to and usable by individuals with disabilities;

(2) Require a recipient to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where the recipient believes that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the recipient has the burden of proving that compliance with § 42.521(a) of this subpart would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of the recipient or the head's designee after considering all resources available for use in the funding and operation of the program or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with this section would result in such an alteration or such burdens, a recipient shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure to the maximum extent possible, that individuals with disabilities receive the benefits or services of the program or activity; or

(3) Require a recipient to take any action that would threaten or destroy the historically significant features of a historic property.

(b) *Methods.* (1) *General.* A recipient may comply with the requirements of this section through such means as, reassignment of services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities in conformance with § 42.522, redesign or acquisition of equipment, use of accessible rolling stock or other conveyances, or any other methods that result in making its service, program, or activity readily accessible to and usable by individuals with disabilities. A recipient is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section. In choosing among available methods for meeting the requirements of this section, a recipient shall give priority to those methods that serve qualified individuals with disabilities in the most integrated setting appropriate.

(2) *Safe harbor.* For the purposes of complying with this section, elements that have not been altered in existing facilities on or after [INSERT EFFECTIVE DATE OF THE RULE], and that comply with the corresponding technical and scoping specifications for those elements in the Uniform Federal Accessibility Standards (UFAS), 49 FR 31528, app. A (Aug. 7, 1984), are not required to be modified to be brought into compliance with the requirements set forth in the 2010 Standards.

(3) *Historic preservation programs.* In meeting the requirements of this section in historic preservation programs, a recipient shall give priority to methods that provide physical access to individuals with disabilities. In cases where a physical alteration to a historic property is not required because of paragraph (a)(2) or (3) of this section, alternative methods of achieving program accessibility include—

(i) Using audio-visual materials and devices to depict those portions of an historic property that cannot otherwise be made accessible;

(ii) Assigning persons to guide individuals with disabilities into or through portions of historic properties that cannot otherwise be made accessible; or

(iii) Adopting other innovative methods.

(c) *Small providers.* If a recipient with fewer than fifteen employees finds, after consultation with an individual with a disability seeking its services, that there is no method of complying with § 42.521(a) other than making a significant alteration to its existing facilities, the recipient may, as an

alternative, refer the individual with a disability to alternative providers of available accessible services. For the purposes of this paragraph, in order to ensure that the services are available, the small provider must first determine that the alternative provider's services are accessible, the alternative provider is willing to provide the services, the services are available at no additional cost to the individual with a disability, and transportation costs to and from the alternative provider do not exceed costs to and from the small provider.

(d) *Written plan required for certain recipients to achieve program accessibility.* Recipients subject to this subpart as of October 1, 1980, and required to make structural changes in order to provide program accessibility, were required to develop, by January 3, 1981, a written plan setting forth the steps to be taken to complete the changes, together with a schedule for making the changes. The plan should have been developed with the assistance of interested persons, including individuals with disabilities or organizations representing individuals with disabilities and was to be made available for public inspection. The plan should have, at a minimum—

(1) Identified physical obstacles in the recipient's facilities that limit the accessibility of its program or activity to individuals with disabilities;

(2) Described in detail the methods that would be used to make the facilities accessible;

(3) Specified the schedule for taking the steps necessary to achieve full accessibility under § 42.521(a) and, if the time period of the transition plan was longer than one year, identified the steps that would be taken during each year of the transition period; and

(4) Indicated the person responsible for implementation of the plan.

(e) *Notice of location of accessible facilities.* (1) *General.* A recipient shall adopt and implement procedures to ensure that interested individuals with disabilities, including individuals with an intellectual disability, learning disability, vision or hearing disability, or other disability, can obtain information as to the existence and location of services, activities, and facilities that are accessible to and usable by individuals with disabilities.

(2) *Signs at primary entrances.* A recipient shall provide signs at a primary entrance to each of its inaccessible facilities directing users to an accessible facility or a location at which they can obtain information about accessible facilities. The international symbol for accessibility

shall be used at each accessible entrance of a facility.

§ 42.522 Program accessibility in jails, detention and correctional facilities, and community correctional facilities.

(a) *Applicability.* This section specifically applies to a recipient that is responsible for the operation or management of adult and juvenile justice jails, detention and correctional facilities, and community correctional facilities, either directly or through contractual, licensing, or other arrangements with public or private entities, in whole or in part, including private correctional facilities.

(b)(1) In addition to the other requirements of this subpart, a recipient shall ensure that qualified inmates or detainees with disabilities shall not, because a facility is inaccessible to or unusable by individuals with disabilities, be excluded from participation in, or be denied the benefits of, the services, programs, or activities of a recipient, or be subjected to discrimination by any recipient.

(2) A recipient shall ensure that inmates or detainees with disabilities are housed in the most integrated setting appropriate to the needs of the individuals. Unless it is appropriate to make an exception, a recipient—

(i) Shall not place inmates or detainees with disabilities in inappropriate security classifications because of their disabilities;

(ii) Shall not place inmates or detainees with disabilities in designated medical areas unless they are actually receiving medical care or treatment;

(iii) Shall not place inmates or detainees with disabilities in facilities that do not offer the same aid, benefits, and services as the facilities where they would otherwise be housed; and

(iv) Shall not deprive inmates or detainees with disabilities of visitation with family members by placing them in distant facilities where they would not otherwise be housed.

(3) A recipient shall implement reasonable policies, including physical modifications to additional cells in accordance with the 2010 Standards, so as to ensure that each inmate with a disability is housed in a cell with the accessible elements necessary to afford the inmate access to safe, appropriate housing.

§ 42.523 New construction and alterations.

(a) *Design and construction.* Each new facility constructed by, on behalf of, or for the use of a recipient shall be designed and constructed in such a manner that the facility is readily accessible to and usable by individuals

with disabilities, if the construction was commenced after July 3, 1980.

(b) *Alteration.* Each facility or part of a facility, which is altered by, on behalf of, or for the use of, a recipient after July 3, 1980, in a manner that affects or could affect the usability of the facility or part of the facility shall to the maximum extent feasible be altered in such manner that the altered portion of the facility is readily accessible to and usable by individuals with a disability.

(c) *Accessibility standards, compliance dates, and triggering events.*

(1) Applicable accessibility standards—

(i) New construction and alterations of buildings or facilities undertaken on or after March 7, 1988, but before [INSERT DATE OF PUBLICATION OF THE FINAL RULE IN THE **Federal Register**] shall comply with the Uniform Federal Accessibility Standards (UFAS).

(ii) New construction and alterations of buildings or facilities undertaken after [INSERT DATE OF PUBLICATION OF THE FINAL RULE IN THE **Federal Register**] but before [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**] must comply with either UFAS or the 2010 Standards.

(iii) New construction and alterations of buildings or facilities undertaken on or after [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**] must comply with the 2010 Standards.

(iv) New construction and alterations of buildings or facilities undertaken in compliance with the 2010 Standards shall comply with the scoping and technical requirements for a “public building or facility” regardless of whether the recipient is a public entity as defined in 28 CFR 35.104 or a private entity.

(v) Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(vi) For purposes of compliance with UFAS, section 4.1.6(1)(g) of UFAS shall be interpreted to exempt from the requirements of UFAS only mechanical rooms and other spaces that, because of their intended use, will not require accessibility to the public or beneficiaries or result in the employment or residence therein of persons with physical disabilities.

(2) *Triggering events for compliance with accessibility standards.* (i) *Private entities.* (A) Private entities may choose one of the Standards specified in paragraph (c)(1)(ii) of this section if: The last application for a building permit or

permit extension for such construction or alterations is certified to be complete by a State, county, or local government; or, in those jurisdictions where the government does not certify completion of applications, the last application for a building permit or permit extension is received by the State, county, or local government; or, where no permit is required, physical construction or alterations have commenced, on or after [INSERT PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**] and before [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**].

(B) Private entities must comply with paragraph (c)(1)(iii) of this section if: the last application for a building permit or

permit extension for such construction or alterations is certified to be complete by a State, county, or local government; or, in those jurisdictions where the government does not certify completion of applications, the last application for a building permit or permit extension is received by the State, county, or local government; or, in jurisdictions where no permit is required, physical construction or alteration has commenced, on or after [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**].

(ii) *Public entities.* (A) Public entities may choose one of the Standards specified in paragraph (c)(1)(ii) of this section if new physical construction or

alterations commence after [INSERT DATE OF PUBLICATION OF THE FINAL RULE IN THE **Federal Register**] but before [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**].

(B) Public entities must comply with paragraph (c)(1)(iii) of this section if new physical construction or alterations commence on or after [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE **Federal Register**].

(3) For the purposes of this section, ceremonial groundbreaking or razing of structures prior to site preparation will not be considered to commence or start physical construction or alterations.

TABLE OF APPLICABLE STANDARDS FOR COMPLYING WITH 28 CFR 42.522

Compliance dates for new construction and alterations	Applicable standards for complying with 28 CFR 42.522
After March 7, 1988 and before [INSERT DATE OF PUBLICATION OF THE FINAL RULE IN THE FEDERAL REGISTER].	UFAS.
After [INSERT DATE OF PUBLICATION OF THE FINAL RULE IN THE FEDERAL REGISTER] and before [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE FEDERAL REGISTER].	UFAS or the scoping and technical requirements for a “public building or facility” in the 2010 Standards.
On or after [INSERT DATE ONE YEAR FROM PUBLICATION DATE OF THE FINAL RULE IN THE FEDERAL REGISTER].	The scoping and technical requirements in the 2010 Standards for a “public building or facility”.

(4) *Compliance with the Architectural Barriers Act of 1968.* Nothing in this section relieves recipients whose facilities are covered by the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151–57), from the responsibility of complying with the requirements of that Act and any implementing regulations.

Procedures

§ 42.530 Administrative procedures for recipients.

(a) *Voluntary action.* A recipient may take steps, in addition to any action that is required by this subpart, to increase the participation of qualified individuals with disabilities in the recipient’s program or activity.

(b) *Self-evaluation.* (1) A recipient was required, by July 3, 1981, to evaluate and modify its policies and practices that did not meet the requirements of this subpart. During this process, the recipient was required to seek the advice and assistance of interested persons, including individuals with disabilities or organizations representing individuals with disabilities. During this period and thereafter, the recipient was required to take any necessary remedial steps to eliminate the effects of discrimination

that resulted from adherence to these policies and practices.

(2) A recipient employing 50 or more persons and receiving Federal financial assistance from the Department of \$25,000 or more was required, for at least three years following completion of the evaluation required under paragraph (c)(1) of this section, to maintain on file, make available for public inspection, and provide to the Department on request—

(i) A list of the interested persons consulted;

(ii) A description of areas examined and problems identified; and

(iii) A description of modifications made and remedial steps taken.

(c) *Designation of responsible employee.* A recipient employing 50 or more persons and receiving Federal financial assistance from the Department of \$25,000 or more shall designate at least one person to coordinate compliance with this subpart.

(d) *Adoption of grievance procedures.* A recipient employing 50 or more persons and receiving Federal financial assistance from the Department of \$25,000 or more and receiving Federal financial assistance from the Department of \$25,000 or more shall adopt grievance procedures that incorporate appropriate due process

standards (e.g., adequate notice, fair hearing) and provide for the prompt and equitable resolution of complaints alleging any action prohibited by this subpart except that such procedures need not be established with respect to complaints from applicants for employment. Any individual may file a complaint with the Department in accordance with the procedures at § 42.532 without having first used a recipient’s grievance procedures.

(e) *Notice.* (1) A recipient employing 50 or more persons and receiving Federal financial assistance from the Department of \$25,000 or more shall, on a continuing basis, notify participants, beneficiaries, applicants, employees and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of disability in violation of section 504 and this subpart. The notification shall state, where appropriate, that the recipient does not discriminate in its programs or activities with respect to access, treatment, or employment. The notification shall also include identification of the person responsible for coordinating compliance with this subpart and where to file section 504 complaints with the Department and, where applicable, with

the recipient. Methods of initial and continuing notification may include the posting of notices, publication in newspapers and magazines, publication on the recipient's internet Web site, placement of notices in the recipient's publications, and distribution of memoranda or other written communications.

(2) Recruitment materials or publications containing general information that a recipient makes available to participants, beneficiaries, applicants, or employees shall include a policy statement of nondiscrimination on the basis of disability.

(f) The Department may require any recipient with fewer than 50 employees and receiving Federal financial assistance from the Department of \$25,000 or more to comply with paragraphs (c) through (e) of this section.

§ 42.531 Assurances required.

(a) *Assurances.* (1) *General.* Every application for Federal financial assistance covered by this subpart shall contain an assurance that the program or activity will be conducted in compliance with the requirements of section 504 and this subpart. Each component within the Department that provides Federal financial assistance shall specify the form of the foregoing assurance and shall require applicants for Department financial assistance to obtain like assurances from subrecipients, contractors and subcontractors, transferees, successors in interest, and others connected with the program or activity. Each component shall specify the extent to which an applicant will be required to confirm that the assurances provided by secondary recipients are being honored. Each assurance shall include provisions giving notice that the United States has a right to seek judicial enforcement of section 504, this subpart, and the assurance.

(2) *Assurances from government departments or agencies.* Assurances from departments or agencies of State and local governments described in paragraph (1) of the definition of "program or activity" at § 42.503 shall extend to any other department or agency of the same governmental unit if the policies of the other department or agency will affect the aid, benefits, or services for which Federal financial assistance is requested.

(3) *Assurances from other entities.* The assurances required with respect to any entity described in paragraph (3)(ii) of the definition of "program or activity" at section 42.503 shall be applicable to the entire plant or other

comparable, geographically separate facility. The assurances required with respect any other entity described in paragraph (2) or (3) of the definition of "program or activity" at § 42.503 shall be applicable to the entire entity.

(b) *Duration of obligation.* Where the Federal financial assistance is to provide or is in the form of real or personal property or improvements, the assurance will obligate the recipient and any transferee for the period during which the property is being used for the purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits, or for as long as the recipient retains ownership or possession of the property, whichever is longer. When the Federal financial assistance is not in the form of real or personal property or improvements, the assurance will obligate the recipient for the period during which Federal financial assistance is extended.

(c) *Covenants.* With respect to any transfer of real property, the transfer document shall contain a covenant running with the land assuring nondiscrimination on the condition described in paragraph (b) of this section. Where the property is obtained from the Federal Government, the covenant may also include a condition coupled with a right to be reserved by the Department to revert title to the property in the event of a breach of the covenant.

(d) *Remedies.* The failure to secure either an assurance or a sufficient assurance from a recipient shall not impair the right of the Department to enforce the requirements of section 504 and this subpart.

§ 42.532 Compliance and enforcement procedures.

(a)(1) The procedural provisions applicable to title VI of the Civil Rights Act of 1964, 28 CFR 42.106–42.110, apply to this subpart, except that the provision contained in § 42.108(c)(3) and § 42.110(e) that requires the Attorney General's approval before the imposition of any sanction against a recipient, does not apply to programs or activities funded by a grant-making component of the Department. The applicable provisions contain requirements for compliance information (§ 42.106), conduct of investigations (§ 42.107), procedure for effecting compliance (§ 42.108), hearings (§ 42.109), and decisions and notices (§ 42.110). *See* appendix C.

(2) In the case of programs or activities funded by a grant-making component of the Department, the requirement to provide access to sources

of information pursuant to 28 CFR 42.106(c) may be enforced using the procedures cited in paragraph (a)(1) of this section or using the provisions of section 803(a) of title I of the Omnibus Crime Control and Safe Streets Act, as amended by the Justice System Improvement Act of 1979, Public Law 96–157, 93 Stat. 1167.

(b) In the case of programs or activities funded by a grant-making component of the Department, the timetables and standards for investigation of complaints and for the conduct of compliance reviews contained in § 42.205(c)(1) through (c)(3) and § 42.206(c) and (d) are applicable to this subpart except that any finding of noncompliance shall be enforced as provided in paragraph (a) of this section. *See* appendix D.

(c) *Remedial action.* (1) If the Department finds that a recipient has discriminated against an individual on the basis of disability in violation of section 504 or this subpart, the recipient shall take such remedial action the Department considers necessary to overcome the effects of the discrimination.

(2) The Department may, where necessary to overcome the effects of discrimination in violation of section 504, or this subpart, require a recipient to take remedial action—

(i) With respect to individuals with disabilities who are no longer participants in the recipient's program or activity but who were participants in the program when such discrimination occurred; and

(ii) With respect to individuals with disabilities who would have been participants in the program had the discrimination not occurred.

(d) Complaints of violations of section 504 by recipients of Federal financial assistance from the Department should be filed with the Office for Civil Rights at the Office of Justice Programs.

Appendix A to Subpart G of Part 42—Federal Financial Assistance Administered by the Department of Justice to Which This Subpart Applies

Note: Failure to list a type of Federal assistance in appendix A shall not mean, if section 504 is otherwise applicable, that a program or activity is not covered.

Editorial Note: For the text of appendix A to subpart G, see appendix A to subpart C of this part.

BILLING CODE 4410–13–P

**ENVIRONMENTAL PROTECTION
AGENCY****40 CFR Part 52**

**[EPA–R10–OAR–2016–0784; FRL–9958–41–
Region 10]**

**Air Plan Approval; Washington:
General Regulations for Air Pollution
Sources, Southwest Clean Air Agency
Jurisdiction**

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the Washington State Implementation Plan (SIP) that were submitted by the Washington Department of Ecology (Ecology) in coordination with Southwest Clean Air Agency (SWCAA) on December 20, 2016. In the fall of 2014 and spring of 2015, the EPA approved numerous revisions to Ecology's general air quality regulations. However, our approval of the updated Ecology regulations applied only to geographic areas where Ecology, and not a local air agency, has jurisdiction, and statewide to source categories over which Ecology has sole jurisdiction. Under the Washington Clean Air Act, local clean air agencies may adopt equally stringent or more stringent requirements in lieu of Ecology's general air quality regulations, if they so choose. Therefore, the EPA stated that we would evaluate the general air quality regulations as they

apply to local jurisdictions in separate, future actions. If finalized, this proposed action would approve the submitted SWCAA general air quality regulations to replace or supplement the corresponding Ecology regulations for sources in SWCAA's jurisdiction, including implementation of the minor new source review and nonattainment new source review permitting programs. This action would also approve a limited subset of Ecology regulations, for which there are no corresponding SWCAA corollaries, to apply in SWCAA's jurisdiction.

DATES: Written comments must be received on or before February 21, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R10–OAR–2016–0784 at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

I. Background for Proposed Action

On January 27, 2014, Ecology submitted revisions to update the general air quality regulations contained in Chapter 173–400 of the Washington Administrative Code (WAC), which the EPA approved in three phases on October 3, 2014 (79 FR 59653), November 7, 2014 (79 FR 66291), and April 29, 2015 (80 FR 23721). Because the Washington Clean Air Act allows local clean air agencies to adopt equally stringent or more stringent standards than the State regulations contained in Chapter 173–400 WAC, the EPA’s approval of Ecology’s January 2014 submittal applied only to geographic areas and source categories under Ecology’s direct jurisdiction. We stated that we would address the applicability of Chapter 173–400 WAC in local clean air agency jurisdictions on a case-by-case basis in separate, future actions.

II. Washington SIP Revisions

On December 20, 2016, the Director of Ecology, as the Governor’s designee for SIP revisions, submitted a request to update the general air quality regulations as they apply to the jurisdiction of SWCAA. SWCAA’s jurisdiction consists of Clark, Cowlitz, Lewis, Skamania and Wahkiakum counties, excluding facilities subject to Energy Facility Site Evaluation Council (EFSEC) jurisdiction, Indian reservations and any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and facilities subject to the applicability sections of 173–405–012, 173–410–012, and 173–415–012, as discussed in Section III.C. *Scope of Proposed Action*. Appendices A and B

of the SIP revision, included in the docket for this action, show the SWCAA 400 *General Regulations for Air Pollution Sources* submitted for approval to apply in lieu of Chapter 173–400 WAC for sources within SWCAA’s jurisdiction. The regulations contained in SWCAA 400 generally mirror the Ecology corollaries contained in WAC 173–400, with minor adaptations to address local priorities and local air pollution concerns. A summary of the provisions is provided below.

A. SWCAA 400–010 Policy and Purpose

Aside from the name change “Southwest Air Pollution Control Authority” to “Southwest Clean Air Agency” this section remains unmodified since the EPA’s last approval (62 FR 8624, February 26, 1997). The EPA reviewed SWCAA 400–010 and is proposing to approve this provision to apply in lieu of WAC 173–400–010 within SWCAA’s jurisdiction.

B. SWCAA 400–020 Applicability

The EPA’s October 3, 2014 approval of the Ecology regulations included a revised version of WAC 173–400–020 which clarified that local clean air agencies have the option to implement equally stringent or more stringent corollaries to apply in lieu of Chapter 173–400 WAC, or parts of Chapter 173–400 WAC, for sources within its jurisdiction. SWCAA added 400–020(2) to reflect this revision of WAC 173–400–020. Specifically, SWCAA 400–020(2) states, “The Agency implements and enforces the Washington Administrative Code as adopted by Ecology in Title 173 under Chapter 70.94 RCW, except where the Agency has adopted corresponding provisions. Agency adopted provisions apply in lieu of the corresponding WAC provisions.” SWCAA 400–020(2) also clarifies that SWCAA has chosen not to adopt WAC 173–400–930, which provides an optional, alternative means of satisfying new source review permitting requirements for emergency engines in jurisdictions that choose to adopt this provision. As discussed later in this preamble, SWCAA 400–072 *Small Unit Notification for Selected Source Categories* does contain alternative means of satisfying new source review requirements for some emergency service internal combustion engines. However, SWCAA 400–072 covers only a subset of the equipment addressed by WAC 173–400–930, and is not intended by SWCAA to be a corollary to apply in lieu of WAC 173–400–930. All other applicability provisions of SWCAA 400–020 remain

unchanged since the EPA’s last approval on February 26, 1997. The EPA reviewed SWCAA 400–020 and is proposing to approve this provision to apply in lieu of WAC 173–400–020 within SWCAA’s jurisdiction.

C. SWCAA 400–030 Definitions

The majority of definitions contained in SWCAA 400–030 are adapted or copied verbatim from the definitions contained in WAC 173–400–030, as approved by the EPA in October 3, 2014. A notable exception is SWCAA 400–030(4) “Air contaminant” or “air pollutant.” In SWCAA 400–030(4), the agency clarifies that for the purposes of regulation under the Washington SIP, air contaminant means only, “(a) Those air contaminants for which the EPA has established National Ambient Air Quality Standards (NAAQS) and precursors to such NAAQS pollutants as determined by EPA for the applicable geographic area; and (b) Any additional air contaminants that are required to be regulated under Part C of Title I of the Federal Clean Air Act (CAA), but only for the purpose of meeting the requirements of Part C or to the extent those additional air contaminants are regulated in order to avoid such requirements.” This clarification is consistent with the EPA’s interpretation of section 110 of the CAA, and the EPA’s response to comments in our approval of the Chapter 173–400 WAC general provisions (79 FR 59653, October 3, 2014, at page 59654). Similarly, SWCAA is not submitting and the EPA is not proposing to approve SWCAA 400–030(21) “Climate Change” and SWCAA 400–030(129) “Toxic Air Pollutant” because they are not related to the criteria pollutants regulated under title I of the CAA, not essential for meeting and maintaining the NAAQS, or not related to the requirements for SIPs under section 110 of the CAA. The remainder of the SWCAA definitions, not otherwise adapted from the WAC, generally copy or cite to Federal definitions or internal SWCAA definitions previously approved in other sections. With the exception of SWCAA 400–030(21) and (129), we are proposing to approve SWCAA 400–030 to apply in lieu of WAC 173–400–030 within SWCAA’s jurisdiction.

D. SWCAA 400–036 Portable Sources From Other Washington Jurisdictions

The EPA’s October 3, 2014 approval included Ecology’s regulations in WAC 173–400–036. WAC 173–400–036 allows portable sources to relocate and operate in any other clean air agency jurisdiction within the State, without obtaining a site-specific or permitting

agency-specific order of approval, if the permitting authority in the destination jurisdiction has adopted this provision. Under WAC 173-400-036, before a source can move it must: Already have an approved notice of construction order identifying the emission units as a portable source; submit a relocation notice and a copy of the applicable portable source order of approval to the permitting agency with jurisdiction over the intended operation location a minimum of fifteen calendar days before the portable source begins operation at the new location; submit the emissions inventory required under WAC 173-400-105 to each permitting agency in whose jurisdiction the portable source operated during the preceding year; and limit operations to one year or less. A source moving into a nonattainment area that emits a pollutant or precursor for which the area is classified as nonattainment must obtain a site-specific order of approval and may not rely on this provision. Major stationary sources must comply with all otherwise applicable Prevention of Significant Deterioration (PSD) requirements. SWCAA 400-036 generally follows the language of WAC 173-400-036 with minor revisions to reflect the SWCAA-specific permitting and emissions inventory regulations. The EPA also notes that portable sources that move within SWCAA's jurisdiction are regulated under the new source review requirements of SWCAA 400-110(6), which is a minor difference from the process used under the WAC. We believe these minor differences do not affect approvability. The EPA reviewed SWCAA 400-036 and we are proposing to approve this provision to apply in lieu of WAC 173-400-036 within SWCAA's jurisdiction.

E. SWCAA 400-040 General Standards for Maximum Emissions

SWCAA 400-040 generally follows the language of WAC 173-400-040, with minor changes to reflect SWCAA's regulatory structure or to improve clarity. SWCAA submitted revisions to the introductory paragraph of 400-040 and sections (1)(b), (1)(e), (3), (5), (6), (7), and (8) for approval into the SIP. Other regulatory provisions contained in SWCAA 400-040 were not submitted and SWCAA is not requesting revision of these provisions in the SIP at this time.

The revised regulations in sections (1)(b), (1)(e), (3), (5), (6), (7), and (8) set out general requirements for reasonably available control technology (RACT), visible emissions, fugitive emissions, sulfur dioxide concentrations, and dust control. These general requirements

apply to all sources and emission units, unless applicable emission unit-specific standards are contained in another section of the regulations. Because the submitted SWCAA 400-040 regulatory text is consistent with our October 2014 approval of the corresponding WAC 173-400-040 provisions, we are proposing to approve the introductory paragraph of SWCAA 400-040 and sections (1)(b), (1)(e), (3), (5), (6), (7), and (8) to apply in lieu of WAC 173-400-040 within SWCAA's jurisdiction.

F. SWCAA 400-050 Emission Standards for Combustion and Incineration Units

SWCAA 400-050 is similar in format and content to WAC 173-400-050 *Emission Standards for Combustion and Incineration Units*, with changes to reflect SWCAA's regulatory structure or local pollution concerns, or to improve clarity. SWCAA 400-050(1) provides particulate matter emission standards that are nearly identical to WAC 173-400-050(1), which the EPA approved in our October 3, 2014 action. SWCAA 400-050(2) adds a fuel oil sulfur content limit that is not present in WAC 173-400-050. The December 20, 2016 submittal explains that this sulfur content limit became effective January 1, 2013, and is consistent with Best Available Control Technology (BACT) limits that have routinely been incorporated into SWCAA air discharge permits for combustion sources in recent years. SWCAA 400-050(4) provides criteria for modifying the default oxygen correction factor when appropriate, such as where the source is also subject to a New Source Performance Standard (NSPS) and that standard has a different oxygen correction factor. This mirrors the corresponding EPA-approved provision in WAC 173-400-050(3). The EPA is therefore proposing approval of SWCAA 400-050(1), (2), and (4) to apply in lieu of the corresponding provisions of WAC 173-400-050 within SWCAA's jurisdiction.

Consistent with the EPA's October 2014 final action on WAC 173-400-050, SWCAA is not submitting and the EPA is not proposing to approve, certain provisions in SWCAA 400-050 which do not regulate criteria pollutants covered under title I of the CAA, are not essential for meeting and maintaining the NAAQS, and are not required for SIPs under section 110 of the CAA. Specifically, SWCAA requested that the EPA remove SWCAA 400-050(3) from the SIP. This subsection, which regulates total carbonyls from incineration units, corresponds to WAC 173-400-050(2). In the EPA's October

2014 final action we removed WAC 173-400-050(2) from the SIP, stating that total carbonyls are not a criteria air pollutant or an EPA designated precursor to criteria pollutants, and are not appropriate for inclusion in a SIP. Similarly, SWCAA is not submitting, and the EPA is not proposing to approve, SWCAA 400-050(5) and (6), which are emission guidelines for commercial, industrial, and small municipal waste combustion units regulated under section 111 of the CAA which are not related to section 110 of the CAA and not appropriate for approval into the SIP.

G. SWCAA 400-052 Stack Sampling of Major Combustion Sources

Ecology first submitted SWCAA 400-052 for incorporation into the SIP in 1994. The intent was to establish a regime of emission testing for large combustion sources that predated the establishment of SWCAA and had not undergone new source review. In the December 20, 2016 submittal, SWCAA explains that all major sources that would otherwise be subject to this provision already have periodic testing requirements established via new source review and/or compliance assurance monitoring imposed under the Air Operating Permit (AOP) program. For this reason, SWCAA requested that the EPA remove SWCAA 400-052 from the SIP. The EPA reviewed SWCAA's demonstration that removal of this provision would not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of section 110 of the CAA and is proposing to remove SWCAA 400-052 from the SIP. The demonstration can be found in the docket for this action.

H. SWCAA 400-060 Emission Standards for General Process Units

SWCAA 400-060 follows the SIP-approved requirements of WAC 173-400-060, which stipulate that no person shall cause or allow the emission of particulate material from any general process operation in excess of 0.23 grams per dry cubic meter at standard conditions of exhaust gas. SWCAA 400-060 and WAC 173-400-060 use slightly different methods to determine compliance. WAC 173-400-060 cites test methods found in 40 CFR parts 51, 60, 61 and 63 or contained in Ecology's "Source Test Manual—Procedures for Compliance Testing." SWCAA 400-060 cites test methods from 40 CFR parts 51, 60, 61 and 63 and any other appropriate test procedures approved in advance by both SWCAA and the EPA. The EPA has

reviewed this minor difference in rule language regarding test methods and is proposing to approve SWCAA 400–060 to apply in lieu of WAC 173–400–060 in SWCAA’s jurisdiction.

I. SWCAA 400–070 General Requirements for Certain Source Categories

SWCAA submitted revisions to SWCAA 400–070 sections (1), (2)(b), (3)(a), (4), (8)(a), (8)(b), (13), (15)(a), (15)(b), and (15)(d) for approval into the SIP. Other regulatory provisions contained in SWCAA 400–070 were not submitted and SWCAA is not requesting revision of these provisions in the SIP at this time.

SWCAA 400–070, which sets separate standards applicable to certain source categories, generally follows the language of the SIP-approved provisions of WAC 173–400–070, with some differences. For example, WAC 173–400–070(1) sets requirements for the use of wigwam burners designed to dispose of wood waste; whereas SWCAA 400–070(1) banned the use of wigwam or equivalent type burners effective January 1, 1994. SWCAA 400–070(2)(b) and (3)(a) regulate hog fuel boilers and orchard heaters, respectively, with regulatory text identical to WAC 173–400–070(2)(b) and (3)(a). SWCAA 400–070 contains no provisions that correspond to WAC 173–400–070(4) and (6), which regulate grain elevators and certain wood waste burners, respectively. This has the effect of making SWCAA 400–070 more stringent, subjecting these source categories to all general standards rather than providing source category exemptions from the general standards. SWCAA 400–070(4), which regulates catalytic cracking units, corresponds to WAC 173–400–070(5). In the December 20, 2016 submittal, SWCAA notes that its jurisdiction has no existing catalytic cracking units. Therefore SWCAA 400–070(4) focuses exclusively on the new source review and BACT requirements similar to WAC 173–400–070(5)(b). SWCAA 400–070(8), (13), and (15), which regulate abrasive blasting, natural gas fired water heaters, and outdoor wood-fired boilers, have no corresponding provisions in WAC 173–400–070. Unlike WAC 173–400–070, which provides exemptions from the general requirements of WAC 173–400–040, 173–400–050, and 173–400–060, the source category-specific requirements of SWCAA 400–070 are in addition to any general requirements that apply. This has the effect of making SWCAA 400–070 more stringent than WAC 173–400–070 for these source categories. Lastly, the version of

SWCAA 400–070(6) currently incorporated into the SIP requires “that all gasoline dispensing facilities shall meet all the provisions of SWAPCA 400–110(8) and SWAPCA 491 *Emission Standards and Controls for Sources Emitting Gasoline Vapors*.” Because SWCAA 400–070(6) merely points to other SIP-approved requirements for informational purposes, SWCAA requested that the EPA remove SWCAA 400–070(6) from the SIP.

The EPA is proposing to approve SWCAA 400–070 sections (1), (2)(b), (3)(a), (4), (8)(a), (8)(b), (13), (15)(a), (15)(b), and (15)(d) to apply in lieu of WAC 173–400–070 within SWCAA’s jurisdiction. The EPA is also proposing to grant SWCAA’s request to remove SWCAA 400–070(6) from the SIP because removal of this provision would not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of section 110 of the CAA. We are also proposing to remove SWCAA 400–070(8)(c) [formerly 400–070(7)(d)] from the SIP because this provision related to toxic air pollutants, regulated outside the scope of the SIP, was inadvertently included in our February 26, 1997 approval of SWCAA 400–070 (62 FR 8624).

J. SWCAA 400–072 Small Unit Notification for Selected Source Categories

SWCAA 400–072 has no corresponding provision in the WAC; however in many ways it is similar to the EPA-approved WAC 173–400–560 *General Orders of Approval*. In our proposed approval of WAC 173–400–560 we explained that this provision provides an alternative path to meeting minor new source review permit obligations for certain new sources where the permitting authority had considerable experience in issuing approvals, where the BACT emission controls have not been changing or anticipated to change in the near future, and the use of BACT emission controls will protect the NAAQS (79 FR 39351, July 10, 2014, at page 39354). To date, Ecology has issued general orders of approval under WAC 173–400–560 for dairy anaerobic digesters, concrete batch plants, gas-powered emergency electric generators, rock crushers, small water heaters and steam generating boilers, auto body shops, and asphalt plants. SWCAA 400–072 covers some of the same source categories, but takes a different approach. Rather than relying on issuance of general orders of approval, SWCAA 400–072 sets monitoring, emission limit, recordkeeping, testing, and reporting

requirements for certain small scale source categories via regulation. Included in the December 20, 2016 submittal, is a demonstration of how SWCAA 400–072 provides equivalent or better protection than facility-specific minor new source review permits. SWCAA asserts that certain source categories, such as coffee roasters, would likely be exempt under the new source review permitting thresholds of the WAC, making SWCAA 400–072 more stringent in some cases. The EPA reviewed the regulatory requirements of SWCAA 400–072 covering coffee roasters, small gas fired boilers and heaters, emergency service internal combustion engines, petroleum dry cleaners, and rock crushers. We are proposing to determine that SWCAA 400–072 meets the criteria for approval under section 110 of the CAA. We note that SWCAA did not submit, and the EPA is not proposing to approve the specific provisions of SWCAA 400–072(5)(a)(ii)(B), (5)(d)(ii)(B), (5)(d)(iii)(A), (5)(d)(iii)(B) and all reporting requirements related to toxic air pollutants, because they are not related to the criteria pollutants regulated under title I of the CAA, not essential for meeting and maintaining the NAAQS, not related to the requirements for SIPs under section 110 of the CAA, or contain unbounded director discretion provisions not appropriate for the SIP. With the exceptions noted above, we are proposing to approve SWCAA 400–072.

K. SWCAA 400–074 Gasoline Transport Tanker Registration

SWCAA 400–074, which regulates gasoline transport tankers, has no corresponding provision in Chapter 173–400 WAC. Aside from minor revisions to address the agency name change and readability, SWCAA 400–074 remains unchanged since the EPA’s last approval on February 26, 1997. As part of the December 20, 2016 submittal, SWCAA requested that the EPA remove SWCAA 400–074(2) from the SIP because this agency registration fee provision is not a required element for SIPs under section 110 of the CAA. The EPA is proposing to approve the updated text of SWCAA 400–074, except for SWCAA 400–074(2), which the EPA proposes to remove from the SIP.

L. SWCAA 400–081 Startup and Shutdown

SWCAA 400–081 generally follows the language of the EPA-approved WAC 173–400–081 *Startup and Shutdown*, with minor revisions for readability and clarity. These provisions require that the

respective agencies consider any physical and operational constraints on the ability of a stationary source or source category to comply with the applicable technology based standard during startup or shutdown. Under SWCAA 400–081(1) and the corresponding provision of WAC 173–400–081(4), no provision of SWCAA 400–081 shall be construed to authorize emissions in excess of SIP-approved emission standards unless previously approved by the EPA as a SIP amendment. We reviewed SWCAA 400–081 and are proposing to approve this provision to apply in lieu of WAC 173–400–081 within SWCAA’s jurisdiction.

M. SWCAA 400–091 Voluntary Limits on Emissions

SWCAA 400–091 generally follows the language of WAC 173–400–091, which the EPA approved in our October 3, 2014 final action. These provisions authorize the respective agencies to issue regulatory orders setting voluntary limits on the potential to emit of a source, allowing the source to avoid applicability of certain major source programs such as PSD. SWCAA 400–091 contains the same substantive requirements of WAC 173–400–091 with minor revisions to reflect the SWCAA regulatory structure and to improve clarity. We reviewed SWCAA 400–091 and are proposing to approve this provision to apply in lieu of WAC 173–400–091 in SWCAA’s jurisdiction. We also note that the current SIP includes a reference to SWCAA 400–090 which was renumbered to SWCAA 400–091 on September 21, 1995. We are proposing to correct this typographical error which was inadvertently not addressed as part of our prior February 26, 1997 action.

N. SWCAA 400–100 Registration Requirements and SWCAA 400–101 Emission Units Exempt From Registration Requirements

In the January 27, 2014 submittal of the general air quality regulations, Ecology explained that WAC 173–400–100 *Registration Program* was no longer a means of determining the applicability of Washington’s new source review permitting requirements and did not impose air pollution control requirements on sources or implement Federal standards. As described in the proposal for our October 3, 2014 final action, we removed WAC 173–400–100 from the SIP for sources under Ecology’s direct jurisdiction (79 FR 39351, July 10, 2014, at page 79 FR 39354). Similarly, the December 20, 2016 submittal explains that SWCAA revised its registration program under SWCAA

400–100 and 400–101 to disconnect it from new source review permitting program applicability. Removing it from the SIP would therefore be consistent with our removal of WAC 173–400–100 from the SIP. We have reviewed SWCAA 400–100 and 400–101 and are proposing to grant SWCAA’s request to remove these provisions from the SIP because removal would not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of CAA section 110.

O. SWCAA 400–10 Records, Monitoring and Reporting

SWCAA 400–105 generally follows WAC 173–400–105, which the EPA approved in October 3, 2014 final action. It contains the emissions inventory, monitoring, reporting, and recordkeeping requirements for sources under SWCAA’s jurisdiction. SWCAA 400–105 differs slightly from the WAC in applicability, deadlines for reporting, list of reportable pollutants, and monitoring requirements, but not in a substantive way. For example, SWCAA 400–105 applies to all registered sources and sources subject to operating permits under title V of the CAA; whereas WAC 173–400–105 applies to all sources receiving notification from the Director of Ecology. In practical terms, the scope is the same. Similarly, SWCAA’s submittal deadline for emissions inventory information is March 15th, as opposed to the 105th day of the calendar year under the WAC. SWCAA 400–105(1) contains additional reportable pollutants than the WAC, including toxic air pollutants. As previously discussed, SWCAA is not submitting and the EPA is not approving provisions related to toxic air pollutants that are inappropriate for SIP approval under section 110 of the CAA.

With respect to the difference in monitoring requirements, SWCAA 400–105(4)(e) requires compliance with the specifications and reporting requirements of 40 CFR part 60, Appendices B and F, in addition to the specifications and reporting requirements of 40 CFR 51, Appendix P, Sections 3–5 required under WAC 173–400–105(5)(e). SWCAA 400–105(4)(f) explicitly contemplates the use of continuous process parameter monitoring and/or frequent stack testing as potential surrogates to continuous emission monitoring; whereas WAC 173–400–105(5)(f) states that alternative monitoring and reporting procedures “will generally take the form of stack tests” but allows agency discretion in determining other alternatives. In practical terms, the requirements are the

same. We reviewed SWCAA 400–105 and are proposing to approve this provision to apply in lieu of WAC 173–400–105 within SWCAA’s jurisdiction, except for the reporting requirements related to toxic air pollutants which are inappropriate for SIP approval under section 110 of the CAA.

P. SWCAA 400–106 Emission Testing and Monitoring at Air Contaminant Sources

SWCAA 400–106(1)(a), (b), and (c) take the EPA-approved emission testing requirements of WAC 173–400–105(4) and incorporate them in another section with additional requirements not cited in the WAC and not submitted for the EPA’s approval. SWCAA 400–106(1)(a), (b), and (c), although different in structure, are nearly identical to WAC 173–400–105(4). The key difference is that SWCAA 400–106(1)(b) allows the use of selected Oregon Department of Environmental Quality test methods, due to the geographic proximity to Oregon; whereas the WAC does not. We reviewed SWCAA 400–106(1)(a), (b), and (c) and are proposing to approve these provisions to apply in lieu of WAC 173–400–105(4) within SWCAA’s jurisdiction.

Q. SWCAA 400–109 Air Discharge Permit Applications

SWCAA 400–109 contains the applicability and permit application procedures for new source review (NSR) that corresponds to the EPA-approved provisions of WAC 173–400–110. The most significant difference is that SWCAA 400–109 contains generally lower, more stringent NSR-applicability exemption thresholds than the corresponding WAC provisions for many of the criteria pollutants. For example, SWCAA 400–109(3)(d) sets exemption emission thresholds for nitrogen oxides, sulfur dioxide, and volatile organic compounds at one ton per year (tpy) compared to two tpy under the SIP-approved provisions of WAC 173–400–110(5). Any stationary source that is not otherwise exempt under SWCAA 400–109(3)(e), discussed below, must undergo preconstruction permitting review if uncontrolled potential emissions are above these threshold levels. Like the WAC, if the stationary source emissions are significant enough to be considered “major” for a given pollutant, SWCAA 400–109 directs the reader to the relevant portions of WAC 173–400–700 through 750 for the PSD program administered by Ecology, and SWCAA 400–800 through 860 for major source nonattainment NSR administered by SWCAA. All other stationary sources, or

certain pollutants at a stationary source, which fall between the minor NSR exemption emission thresholds and the thresholds for “major” stationary sources are subject to the minor NSR permitting program administered by SWCAA.

SWCAA 400–109(3)(e) also contains equipment and activity exemptions comparable to the EPA-approved provisions of WAC 173–400–110(4), with some differences in source categories to reflect local pollution concerns. The majority of equipment and activity exemptions contained in SWCAA 400–109(3)(e) remain the same since the EPA’s last approval in 1997. As part of the December 20, 2016 submittal, SWCAA provided a demonstration to show that the new exemptions added since the EPA’s last approval are unlikely to cause or contribute to an exceedance of the NAAQS. These new exemptions cover certain wastewater treatment plants, water heaters, and emergency internal combustion engines. SWCAA’s demonstration describes how these source categories are covered by other local or Federal standards, such as the Federal engine standards contained in 40 CFR 63, subpart ZZZZ, or have been found by SWCAA to have emissions below the thresholds contained in SWCAA 400–109(3)(d).

The EPA reviewed SWCAA 400–109 and is proposing to determine that it meets the criteria for approvability under CAA section 110. The EPA also notes that SWCAA did not submit, and the EPA does not propose to approve, the toxic air pollutant provisions contained in SWCAA 400–109(3)(d) and (3)(e)(ii) because they are outside the scope of this proposed action under section 110 of the CAA. Lastly, under section 110(a)(2)(L) of the CAA, the State, or local agencies acting in lieu of the State, must demonstrate the ability to collect adequate fees for permitting major sources. SWCAA is therefore submitting SWCAA 400–109(4) to demonstrate adequate fee authority to implement the major source nonattainment NSR program under SWCAA 400–800 through 860. While the EPA reviews these submissions to confirm adequate authority, the EPA generally does not include local or State agency fees as part of the Washington SIP incorporated by reference in 40 CFR 52.2470(c). The EPA is also proposing to correct an error from our previous approval in 1997 when the fee provisions of SWCAA 400–109(4) were inadvertently incorporated by reference. With the exceptions noted above, we are proposing to approve SWCAA 400–109

to apply in lieu of WAC 173–400–110 within SWCAA’s jurisdiction.

R. SWCAA 400–110 Application Review Process for Stationary Sources (New Source Review); SWCAA 400–111 Requirements for New Sources in a Maintenance Plan Area; SWCAA 400–112 Requirements for New Sources in Nonattainment Areas; and SWCAA 400–113 Requirements for New Sources in Attainment or Nonclassifiable Areas

As part of the December 20, 2016 submittal, SWCAA explains that an effort was made to align the SWCAA NSR program to be as consistent as possible with the EPA-approved Ecology regulations contained in the WAC. Differences are generally insubstantial, with slightly different numbering systems, procedures, and edits for readability. One key difference is that the SWCAA NSR program contains more stringent NSR provisions for “designated maintenance plan areas” to ensure continued compliance with the NAAQS under SWCAA 400–111. In these areas, if a violation of an ozone ambient air quality standard or a second violation of the carbon monoxide ambient air quality standard has occurred, SWCAA may require the application of lowest achievable emission rate (LAER) for the maintenance pollutant(s) and any pollutant for which the proposed new source or modification is major.

Other less substantive differences between the SWCAA NSR program and the Ecology program under the WAC are discussed below. SWCAA 400–110 *Application Review Process for Stationary Sources (New Source Review)* requires compliance with the State Environmental Policy Act as part of the completeness and final determination criteria. This requirement is not explicitly stated in the corresponding provisions of WAC 173–400–111 but nonetheless still applies, making the two program equivalent in effect. The SWCAA regulations also differ slightly from the WAC with respect to portable sources. SWCAA 400–110(6) applies to the relocation of portable sources permitted by SWCAA; whereas SWCAA 400–036 applies to relocation of portable sources permitted by other jurisdictions. The WAC does not make this distinction and regulates all portable sources under WAC 173–400–036. This minor distinction does not result in a substantive difference between the two respective NSR programs. WAC 173–400–111 also does not address reopening of approval orders for cause, so there is no corresponding section to SWCAA 400–

110(10). Lastly, for the convenience of the reader, SWCAA 400–112 *Requirements for New Sources in Nonattainment Areas* and SWCAA 400–113 *Requirements for New Sources in Attainment or Nonclassifiable Areas* contain pointers to the toxic air pollutant and visibility regulations that are not explicitly contained in the corresponding WAC provisions. As previously noted, SWCAA did not submit and the EPA is not proposing to approve the provisions related to toxic air pollutants in SWCAA 400–110(1)(d), 400–111(7), 400–112(6), and 400–113(5), because the regulation of toxic air pollutants is outside the scope of this action under section 110 of the CAA. With the exceptions noted above, we are proposing to approve SWCAA 400–110 through 113, including SWCAA’s additional requirements for designated maintenance areas, to apply in lieu of WAC 173–400–111 through 113 within SWCAA’s jurisdiction.

S. SWCAA 400–114 Requirements for Replacement or Substantial Alteration of Emission Control Technology at an Existing Stationary Source

SWCAA 400–114 is derived from the statutory provisions of the Washington Clean Air Act, in particular Revised Code of Washington (RCW) 70.94.153. Under SWCAA 400–114, any replacement or substantial alteration of emission control technology installed on an existing stationary source or emission unit, excluding routine maintenance, repair or parts replacement, shall require submission of an air discharge permit application for determining NSR applicability under SWCAA 400–110. If the stationary source or emission unit is subject to NSR, all requirements under SWCAA 400–111, 400–112, and/or 400–113 shall apply. If the replacement or substantial alteration is not subject to NSR, then reasonably available control technology (RACT) or other requirements shall apply as dictated by RCW 70.94. Aside from minor wording changes for clarity, SWCAA 400–114 remains substantially unchanged since the EPA’s last approval of this provision in 1997. We reviewed SWCAA 400–114 and are proposing to determine that it meets the criteria for approvability under CAA section 110. The corresponding Ecology provision of WAC 173–400–114 is currently not in the SIP. However, the EPA is also proposing to approve SWCAA 400–114 to apply in lieu of WAC 173–400–114 should this WAC provision be approved into the SIP at some future time.

T. SWCAA 400–116 Maintenance of Equipment

SWCAA 400–116 has no corresponding provision under the WAC. This regulation requires that all process and pollution control equipment be maintained and operated in good working order. SWCAA 400–116(3) gives the agency authority to require that an Operations and Maintenance (O&M) plan be developed and implemented for each emission unit or piece of control or capture equipment in order to assure continuous compliance with approval conditions. SWCAA 400–116 remains substantially unchanged since the EPA's last approval in 1997, aside from minor wording changes for readability. We reviewed the updated version of SWCAA 400–116 and we propose to approve the changes.

U. SWCAA 400–130 Use of Emission Reduction Credits; SWCAA 400–131 Deposit of Emission Reduction Credits Into Bank; and SWCAA 400–136 Maintenance of Emission Reduction Credits in Bank

SWCAA 400–130, 400–131, and 400–136 correspond to the Ecology provisions of WAC 173–400–131 and WAC 173–400–136, which the EPA approved on November 7, 2014 (79 FR 59653). These provisions implement a program to issue emission reduction credits (ERCs) useable for offsets required by the major nonattainment NSR permitting program and the attainment area offset provisions for sources under SWCAA 400–113(3) and its corollary, WAC 173–400–113(4). ERCs under this program may also be used as creditable emission reductions for netting purposes in the major nonattainment NSR and PSD permitting programs provided they meet the requirements set forth in the definitions of “major modification” in those programs. SWCAA's ERC program contains all of the functional requirements of the WAC, but does not contain provisions for discounting issued ERCs as provided in WAC 173–400–136(6). An approvable ERC program need not include provisions which spell out how banked ERC's would be discounted, but it cannot include provisions which would prevent the air authority from reducing or cancelling ERC's when necessary to attain and maintain the NAAQS. SWCAA's rules do not include any provisions which would prevent it from doing such as part of the development of an attainment or maintenance plan. SWCAA's ERC program also contains provisions for the establishment and maintenance of an ERC bank to

document and track outstanding ERCs, which does not exist in the WAC.

We reviewed SWCAA's ERC program and are proposing to determine that it meets the criteria for approvability under section 110 of the CAA. We are also proposing to approve SWCAA 400–130, 400–131, and 400–136 to apply in lieu of WAC 173–400–131 and 173–400–136 within SWCAA's jurisdiction.

V. SWCAA 400–151 Retrofit Requirements for Visibility Protection and SWCAA 400–161 Compliance Schedules

Aside from minor wording changes for clarity, SWCAA 400–151 and 400–161 remain substantially unchanged since the EPA's last approval of these provisions on February 26, 1997. Both provisions include the substantive requirements of the corresponding Ecology regulations contained in WAC 173–400–151 and 173–400–161. The most significant change is the modification of SWCAA 400–151 and 400–030 to more clearly define the term “existing stationary facility” to be consistent with the definition contained in 40 CFR 51.301, under the EPA's visibility protection program requirements. We reviewed SWCAA 400–151 and 400–161 and are proposing to approve these provision to apply in lieu of WAC 173–400–151 and 173–400–161 within SWCAA's jurisdiction.

W. SWCAA 400–171 Public Involvement

SWCAA 400–171 closely follows WAC 173–400–171 *Public Notice and Opportunity for Public Comment*, which the EPA approved on April 29, 2015 (80 FR 23721). The most significant change to SWCAA 400–171 since the EPA's last approval in 1997 regards the EPA's interpretation of “prominent advertisement.” Specifically, 40 CFR 51.161(b) establishes that the opportunity for public comment with respect to NSR permitting shall include, among other requirements, a notice by “prominent advertisement” in the affected area. Historically this information was shared using a public notice in a newspaper. However in an April 17, 2012 guidance for minor NSR programs, included in the docket for this action, the EPA acknowledged the public's increased use of web based sources of information and clarified that the “prominent advertisement” requirement at 40 CFR 51.161(b)(3) is media neutral.¹ As a result, SWCAA

modified the language of SWCAA 400–171 to mirror the EPA and Ecology's use of the term “prominent advertisement.” All other changes to SWCAA 400–171 were insignificant changes, such as updating reference dates or minor revisions to improve clarity for the reader. Lastly, SWCAA did not submit and the EPA is not proposing to approve SWCAA 400–171(2)(a)(xii) regarding public participation procedures for toxic air pollutants, because it is outside the scope of our approval under section 110 of the CAA. With the exception noted above, we are proposing to approve SWCAA 400–171 to apply in lieu of WAC 173–400–171 within SWCAA's jurisdiction.

X. SWCAA 400–190 Requirements for Nonattainment Areas; SWCAA 400–200 Vertical Dispersion Requirement, Creditable Stack Height and Dispersion Techniques; SWCAA 400–205 Adjustment for Atmospheric Conditions; and SWCAA 400–210 Emission Requirements of Prior Jurisdictions

Aside from minor updates to the citations, these long-standing provisions remain substantially unchanged since the EPA's last approval in 1997. They also closely match the corresponding EPA-approved Ecology provisions of WAC 173–400–190, 173–400–200, 173–400–205, and 173–400–210. Minor revisions include the updating of SWCAA 400–190 to reflect the major source specific nonattainment NSR requirements contained in SWCAA 800 through 860. SWCAA also revised SWCAA 400–200 to include vertical dispersion requirements that are not present in the corresponding WAC requirements. SWCAA is not submitting, and the EPA is not proposing to approve, these additional requirements contained in SWCAA 400–200(1). The remaining changes reflect the name change from “Southwest Air Pollution Control Authority” to “Southwest Clean Air Agency” that occurred after the EPA's 1997 approval. With the exception of SWCAA 400–200(1) noted above, we are proposing to approve SWCAA 400–190, 400–200, 400–205, and 400–210 to apply in lieu of the corresponding Ecology provisions in WAC 173–400–190, 173–400–200, 173–400–205, and 173–400–210.

¹ Janet McCabe, Principal Deputy Assistant Administrator, “Minor New Source Review Program Public Notice Requirements under 40 CFR 51.161(b)(3).” Memorandum to EPA Air Division Directors, Regions 1–10, April 17, 2012.

Y. SWCAA 400–220 Requirements for Board Members; SWCAA 400–230 Regulatory Actions and Civil Penalties; SWCAA 400–240 Criminal Penalties; SWCAA 400–250 Appeals; SWCAA 400–260 Conflict of Interest; SWCAA 400–270 Confidentiality of Records and Information; and SWCAA 400–280 Powers of Agency

The EPA reviews and approves state and local clean air agency submissions to ensure they provide adequate enforcement authority and other general authority to implement and enforce the SIP. However, regulations describing such agency enforcement and other general authority are generally not incorporated by reference so as to avoid potential conflict with the EPA's independent authorities. The EPA reviewed and is proposing to approve SWCAA 400–220, 400–230, 400–240, 400–250, 400–260, 400–270, and 400–280 as providing SWCAA adequate enforcement and other general authority for purposes of implementing and enforcing its SIP. However, we are not proposing to incorporate these provisions by reference into the SIP codified in 40 CFR 52.2470(c). Instead, the EPA is proposing to include these provisions in 40 CFR 52.2470(e), *EPA Approved Nonregulatory Provisions and Quasi-Regulatory Measures*, as approved but not incorporated by reference regulatory provisions. The EPA is also proposing to approve SWCAA 400–220, 400–230, 400–240, 400–250, and 400–260 to apply in lieu of the corresponding Ecology provisions of WAC 173–400–220, 173–400–230, 173–400–240, 173–400–250, and 173–400–260. SWCAA 400–270 and 400–280 have no corresponding provisions in the WAC.

Z. SWCAA 400–800 Major Stationary Source and Major Modification in a Nonattainment Area; SWCAA 400–810 Major Stationary Source and Major Modification Definitions; SWCAA 400–820 Determining If a New Stationary Source or Modification to a Stationary Source Is Subject to These Requirements; SWCAA 400–830 Permitting Requirements; SWCAA 400–840 Emission Offset Requirements; SWCAA 400–850 Actual Emissions—Plantwide Applicability Limitation (PAL); SWCAA 400–860 Public Involvement Procedures

Aside from minor edits to the citations to reflect the SWCAA regulatory structure, the SWCAA major nonattainment NSR program contained

in SWCAA 400–800 through 860 is nearly identical to the Ecology major nonattainment NSR program in WAC 173–400–800 through 860, which the EPA approved on November 7, 2014 (79 FR 59653). We note that Ecology's major nonattainment NSR program for PM_{2.5} under WAC 173–400–800 through 860 was reviewed pursuant to the EPA's 2008 PM_{2.5} New Source Review Rule (73 FR 28321, May 16, 2008). The EPA's 2008 rule was remanded to the EPA by the U.S. Court of Appeals for the District of Columbia Circuit and replaced by a revised implementation rule published August 24, 2016, which imposes additional requirements for PM_{2.5} nonattainment areas (81 FR 58010). Because SWCAA does not have nonattainment areas within its jurisdiction for any criteria pollutant, including PM_{2.5}, the EPA did not review SWCAA 400–800 through 860 for consistency with the newly revised PM_{2.5} implementation rule; nor does SWCAA have an obligation to submit rule revisions to address the 2016 PM_{2.5} implementation rule at this time. However, we note that the federal major nonattainment NSR requirements remain unchanged for all other criteria pollutants since our review and approval of WAC 173–400–800 through 860. We are therefore proposing approval of SWCAA 400–800 through 860 as meeting the current major nonattainment NSR requirements for all criteria pollutants except PM_{2.5} and proposing to approve these provisions to apply in lieu of the corresponding Ecology provisions of WAC 173–400–800 through 860.

AA. WAC 173–400–117 Special Protection Requirements for Federal Class I Areas; WAC 173–400–118 Designation of Class I, II, and III Areas; and WAC 173–400–560 General Order of Approval

As discussed above, WAC 173–400–020(1) states that, “The provisions of this chapter shall apply statewide, except for specific subsections where a local authority has adopted and implemented corresponding local rules that apply only to sources subject to local jurisdiction as provided under RCW 70.94.141 and 70.94.331.” SWCAA 400 does not contain any rules that correspond to the EPA-approved provisions of WAC 173–400–117, 173–400–118, or 173–400–560. In this action, the EPA therefore proposes to approve these WAC provisions within SWCAA's jurisdiction, which the EPA has previously approved into the

Washington SIP for areas under Ecology's jurisdiction.

BB. Appendix A—SWCAA Method 9, Visual Opacity Determination Method and Appendix B—Description of Vancouver Ozone and Carbon Monoxide Maintenance Area Boundary

SWCAA Appendix A corresponds to the EPA Test Method 9—*Visual Determination of the Opacity of Emissions from Stationary Sources* contained in 40 CFR part 60, Appendix A. SWCAA explains that, “The difference between the SWCAA Method 9 and EPA Method 9 is in the data reduction section. The SWCAA method establishes a three-minute period in any one-hour period where opacity cannot exceed an opacity limit. For the SWCAA method, 13 readings in a 1-hour period or less, above the established opacity limit, no matter how much, constitutes a violation. The EPA method is an arithmetic average of any 24 consecutive readings at 15-second intervals. These values are averaged and this average value cannot exceed the established opacity limit.” The different data reduction methods are needed to accommodate the differences in the forms of the opacity standards in 40 CFR part 60 and in SWCAA's rules. The EPA reviewed SWCAA Appendix A and we are proposing to determine that it meets the requirements for approval under section 110 of the CAA.

SWCAA Appendix B—*Description of Vancouver Ozone and Carbon Monoxide Maintenance Area Boundary* was previously submitted as part of the Vancouver Carbon Monoxide Maintenance Plan (61 FR 54560, October 21, 1996) and the Vancouver Portion of the AQMA Ozone Maintenance Plan (62 FR 27204, May 19, 1997). While it remains unchanged, the EPA is proposing to revise 40 CFR 52.2470(c)—*Table 8—Additional Regulations Approved for the Southwest Clean Air Agency (SWCAA) Jurisdiction* to more clearly include Appendix B.

III. The EPA's Proposed Action

A. Regulations To Approve and Incorporate by Reference Into the SIP

The EPA proposes to approve and incorporate by reference into the Washington SIP at 40 CFR 52.2470(c)—*Table 8—Additional Regulations Approved for the Southwest Clean Air Agency (SWCAA) Jurisdiction*, the SWCAA and Ecology regulations listed in Tables 1 and 2 below for sources within SWCAA's jurisdiction.

TABLE 1—SOUTHWEST CLEAN AIR AGENCY (SWCAA) REGULATIONS FOR PROPOSED APPROVAL AND INCORPORATION BY REFERENCE

State/local citation	Title/subject	State/local effective date	Explanation
SWCAA 400—General Regulations for Air Pollution Sources			
400–010	Policy and Purpose	03/18/01	Except: 400–030(21) and (129).
400–020	Applicability	10/09/16	
400–030	Definitions	10/09/16	
400–036	Portable Sources From Other Washington Jurisdictions.	10/09/16	
400–040	General Standards for Maximum Emissions	10/09/16	Except: 400–040(1)(a), (c) and (d); 400–040(2); and 400–040(4).
400–050	Emission Standards for Combustion and Incineration Units.	10/09/16	Except: 400–050(3); 400–050(5); and 400–050(6).
400–060	Emission Standards for General Process Units	10/09/16	Except: 400–070(2)(a); 400–070(3)(b); 400–070(5); 400–070(6); 400–070(7); 400–070(8)(c); 400–070(9); 400–070(10); 400–070(11); 400–070(12); 400–070(14); and 400–070(15)(c).
400–070	General Requirements for Certain Source Categories.	10/09/16	
400–072	Small Unit Notification for Selected Source Categories.	10/09/16	
400–074	Gasoline Transport Tanker Registration	11/15/09	
400–081	Startup and Shutdown	10/09/16	Except: 400–074(2).
400–091	Voluntary Limits on Emissions	10/09/16	Except: Reporting requirements related to toxic air pollutants.
400–105	Records, Monitoring and Reporting	10/09/16	
400–106	Emission Testing and Monitoring at Air Contaminant Sources.	10/09/16	Except: 400–106(1)(d) through (g); and 400–106(2).
400–109	Air Discharge Permit Applications	10/09/16	Except: The toxic air pollutant emissions thresholds contained in 400–109(3)(d); 400–109(3)(e)(ii); and 400–109(4).
400–110	Application Review Process for Stationary Sources (New Source Review).	10/09/16	Except: 400–110(1)(d).
400–111	Requirements for New Sources in a Maintenance Plan Area.	10/09/16	Except: 400–111(7).
400–112	Requirements for New Sources in Nonattainment Areas.	10/09/16	Except: 400–112(6).
400–113	Requirements for New Sources in Attainment or Nonclassifiable Areas.	10/09/16	Except: 400–113(5).
400–114	Requirements for Replacement or Substantial Alteration of Emission Control Technology at an Existing Stationary Source.	11/09/03	
400–116	Maintenance of Equipment	11/09/03	
400–130	Use of Emission Reduction Credits	10/09/16	
400–131	Deposit of Emission Reduction Credits Into Bank	10/09/16	
400–136	Maintenance of Emission Reduction Credits in Bank	10/09/16	
400–151	Retrofit Requirements for Visibility Protection	11/09/03	
400–161	Compliance Schedules	03/18/01	
400–171	Public Involvement	10/09/16	Except: 400–171(2)(a)(xii).
400–190	Requirements for Nonattainment Areas	10/09/16	
400–200	Vertical Dispersion Requirement, Creditable Stack Height and Dispersion Techniques.	10/09/16	Except: 400–200(1).
400–205	Adjustment for Atmospheric Conditions	03/18/01	
400–210	Emission Requirements of Prior Jurisdictions	03/18/01	
400–800	Major Stationary Source and Major Modification in a Nonattainment Area.	10/09/16	
400–810	Major Stationary Source and Major Modification Definitions.	10/09/16	
400–820	Determining If a New Stationary Source or Modification to a Stationary Source is Subject to These Requirements.	10/09/16	
400–830	Permitting Requirements	10/09/16	
400–840	Emission Offset Requirements	10/09/16	
400–850	Actual Emissions—Plantwide Applicability Limitation (PAL).	10/09/16

TABLE 2—WASHINGTON STATE DEPARTMENT OF ECOLOGY REGULATIONS FOR PROPOSED APPROVAL AND INCORPORATION BY REFERENCE

State/local citation	Title/subject	State/local effective date	Explanation
Chapter 173–400 WAC, General Regulations for Air Pollution Sources			
173–400–117	Special Protection Requirements for Federal Class I Areas.	12/29/12	For permits issued under the applicability provisions of WAC 173–400–800.
173–400–118	Designation of Class I, II, and III Areas	12/29/12	Except: The part of 173–400–560(1)(f) that says, “173–460 WAC”.
173–400–560	General Order of Approval	12/29/12	

B. Regulations To Approve But Not Incorporate by Reference

In addition to the regulations proposed for approval and incorporation by reference above, the EPA reviews and approves state and local clean air agency submissions to ensure they provide adequate enforcement authority and other general authority to implement and enforce the SIP. However, regulations describing such agency enforcement and other general authority are generally not incorporated by reference so as to avoid potential conflict with the EPA's independent authorities. As discussed above, the EPA has reviewed and is proposing to approve SWCAA 400–220 *Requirements for Board Members*, SWCAA 400–230 *Regulatory Actions and Civil Penalties*, SWCAA 400–240 *Criminal Penalties*, SWCAA 400–250 *Appeals*, SWCAA 400–260 *Conflict of Interest*, SWCAA 400–270 *Confidentiality of Records and Information*, and SWCAA 400–280 *Powers of Agency* as having adequate enforcement and other general authority for purposes of implementing and enforcing its SIP, but is not incorporating these sections by reference into the SIP codified in 40 CFR 52.2470(c). Instead, the EPA is proposing to include these sections in 40 CFR 52.2470(e), *EPA Approved Nonregulatory Provisions and Quasi-Regulatory Measures*, as approved but not incorporated by reference regulatory provisions.

C. Regulations to Remove From the SIP

The Ecology regulations contained in Washington's SIP at 40 CFR 52.2470(c)—Table 8—*Additional Regulations Approved for the Southwest Clean Air Agency (SWCAA) Jurisdiction* were last approved by the EPA on June 2, 1995 (60 FR 28726). As previously discussed, under the Washington Clean Air Act local clean air agencies have the option of adopting and implementing equally stringent or more stringent corresponding provisions to apply in lieu of Chapter 173–400 WAC, or parts

of Chapter 173–400 WAC. With the exception of updated versions of WAC 173–400–117, 173–400–118, and 173–400–560, SWCAA requested that the submitted SWCAA regulations replace the existing WAC provisions currently in the SIP for its jurisdiction. Also, as previously discussed, the EPA is proposing to remove from the SIP SWCAA 400–050(3) [formerly 400–050(2)], 400–052, 400–070(6), 400–070(8)(c) [formerly 400–070(7)(c) and (d)], 400–074(2), 400–100, 400–101, and 400–109(4) because removal of these provisions would not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of section 110 of the CAA. We also note that the SIP includes a reference to SWCAA 400–090 which was renumbered to SWCAA 400–091 on September 21, 1995. We are proposing to remove the reference to SWCAA 400–090 in the SIP which was inadvertently not addressed as part of our February 26, 1997 approval of SWCAA 400–091 (62 FR 8624).

D. Scope of Proposed Action

This proposed revision to the SIP applies specifically to the SWCAA jurisdiction incorporated into the SIP at 40 CFR 52.2470(c)—Table 8. As discussed in our October 3, 2014 action (79 FR 59653, at page 59654), local air agency jurisdiction in Washington is generally defined on a geographic basis; however there are exceptions. By statute, SWCAA does not have authority for sources under the jurisdiction of the Energy Facility Site Evaluation Council (EFSEC). See Revised Code of Washington Chapter 80.50. Under the applicability provisions of WAC 173–405–012, 173–410–012, and 173–415–012, SWCAA also does not have jurisdiction for kraft pulp mills, sulfite pulping mills, and primary aluminum plants. For these sources, Ecology retains statewide, direct jurisdiction. Ecology also retains statewide, direct jurisdiction for the PSD permitting program. Therefore, the EPA is not

approving into 40 CFR 52.2470(c)—Table 8 those provisions of Chapter 173–400 WAC related to the PSD program. Specifically, these provisions are WAC 173–400–116 and WAC 173–400–700 through 750, which the EPA has already approved as applying statewide.

As described in our April 29, 2015 action, jurisdiction to implement the visibility permitting program contained in WAC 173–400–117 varies depending on the situation. Ecology retains authority to implement WAC 173–400–117 as it relates to PSD permits. See 80 FR 23721. However, for facilities subject to major nonattainment NSR under the applicability provisions of SWCAA 400–800, we are proposing that SWCAA would be responsible for implementing those parts of WAC 173–400–117 as they relate to major nonattainment NSR permits. See 80 FR 23726. If finalized, the EPA is also proposing to modify the visibility protection Federal Implementation Plan contained in 40 CFR 52.2498 to reflect the approval of WAC 173–400–117 as it applies to implementation of the major nonattainment NSR program in SWCAA's jurisdiction.

Lastly, this SIP revision is not approved to apply in Indian reservations in the State, or any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

IV. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the regulations shown in the tables in section III.A. *Regulations to Approve and Incorporate by Reference into the SIP* and the rules proposed for removal from the SIP in section III.C. *Regulations to Remove from the SIP*. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and/or at the EPA

Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves the state's law as meeting Federal requirements and does not impose additional requirements beyond those imposed by the state's law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
 - Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
 - Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
 - Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
 - Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
 - Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
 - Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
 - Is not subject to the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because this action does not involve technical standards; and
 - Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).
- In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because it will not

impose substantial direct costs on tribal governments or preempt tribal law. This SIP revision is not approved to apply in Indian reservations in the State, or any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: January 4, 2017.

BILLING CODE 6560-50-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

42 CFR Part 100

National Vaccine Injury Compensation Program: Statement of Reasons for Not Conducting a Rulemaking Proceeding

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Denial of petition for rulemaking.

SUMMARY: In accordance with section 2114(c)(2)(B) of the Public Health Service Act, 42 U.S.C. 300aa-14(c)(2)(B), notice is hereby given concerning the reasons for not conducting a rulemaking proceeding to add neurological disorders or conditions as injuries associated with seasonal influenza vaccines to the Vaccine Injury Table.

DATES: Written comments are not being solicited.

FOR FURTHER INFORMATION CONTACT:

Narayan Nair, MD, Director, Division of Injury Compensation Programs (DICP), Healthcare Systems Bureau, Health Resources and Services Administration, 5600 Fishers Lane, Room 8N146B, Rockville, Maryland 20857, or by telephone 301-443-6593.

SUPPLEMENTARY INFORMATION: The National Childhood Vaccine Injury Act of 1986, (Vaccine Act), Title III of Public Law 99-660, established the National

Vaccine Injury Compensation Program (VICP) for persons found to be injured by vaccines.¹ Under this federal program, petitions for compensation are filed with the United States Court of Federal Claims (Court). The Court, acting through special masters, makes findings as to eligibility for, and amount of, compensation. To gain entitlement to compensation under VICP for a covered vaccine, a petitioner must establish a vaccine-related injury or death in one of the following ways (unless another cause is found): (1) By proving that the first symptom of an injury or condition, as defined by the Qualifications and Aids to Interpretation, occurred within the time period listed on the Vaccine Injury Table (Table), and, therefore, is presumed to be caused by a vaccine; (2) by proving vaccine causation, if the injury or condition is not on the Table or did not occur within the time period specified on the Table; or (3) by proving that the vaccine significantly aggravated a pre-existing condition.

The statute authorizing VICP provides for the inclusion of additional vaccines in VICP when they are recommended by the Centers for Disease Control and Prevention for routine administration to children.² Consistent with section 13632(a)(3) of Public Law 103-66, the regulations governing VICP provide that such vaccines will be included in the Table as of the effective date of an excise tax to provide funds for the payment of compensation with respect to such vaccines.³ The statute authorizing VICP also authorizes the Secretary to create and modify a list of injuries, disabilities, illnesses, conditions, and deaths (and their associated time frames) associated with each category of vaccines included on the Table.⁴ Finally, the Vaccine Act provides that:

[a]ny person (including the Advisory Commission on Childhood Vaccines) [the Commission] may petition the Secretary to propose regulations to amend the Vaccine Injury Table. Unless clearly frivolous, or initiated by the Commission, any such petition shall be referred to the Commission for its recommendations. Following—

(A) Receipt of any recommendation of the Commission, or

(B) 180 days after the date of the referral to the Commission, whichever occurs first, the Secretary shall conduct a rule-making proceeding on the matters proposed in the petition or publish

³ 42 CFR 100.3(c)(8).

⁴ Sections 2114(c) and 2114(e)(2) of the PHS Act, 42 U.S.C. 300aa-14(c) and 300aa-14(e)(2).

in the **Federal Register** a statement or reasons for not conducting such proceeding.⁵

On January 28, 2016, a private citizen submitted a petition to the Department of Health and Human Services (HHS) requesting that: (1) Any adverse neurological disorder or condition be added to the Table for the seasonal influenza vaccines; and (2) if any adverse neurological disorder or condition was too broad in scope, then at least anaphylaxis, Shoulder Injury Related to Vaccine Administration (SIRVA), vasovagal syncope, multiple sclerosis (MS), Guillain-Barré Syndrome (GBS), transverse myelitis (TM), and myelitis be added to the Table for the seasonal influenza vaccine. The petitioner asserted that based on Vaccine Adverse Event Reporting System (VAERS) data and Department of Justice (DOJ) quarterly reports on vaccine settlements, which were presented at Commission meetings, there is sufficient evidence to add these conditions as injuries associated with the seasonal influenza vaccine to the Table. The petitioner did not provide any medical or scientific literature to accompany the request.

Pursuant to the Vaccine Act, the petition was referred to the Commission on June 3, 2016. The Commission voted unanimously to recommend that the Secretary not proceed with rulemaking to amend the Table to include “any adverse neurological disorder or condition,” MS, TM, or myelitis as injuries associated with seasonal influenza vaccines as requested in the petition.

The petitioner requested the addition of any adverse neurological disorder or condition to the Table for the seasonal influenza vaccine. The petitioner alleged that the DOJ quarterly reports on vaccine settlement cases and VAERS data support the inclusion of all of these conditions to the Table. However, neither of these sources of data is sufficient to modify the Table. The DOJ quarterly report is the report that DOJ provides and discusses at the quarterly Commission meetings and is made available to the public at <http://www.hrsa.gov/advisorycommittees/childhoodvaccines/meetings.html>. The report includes a list of adjudicated settlements for the applicable quarter by vaccine and alleged injury, and time frame from petition filing to settlement filing. In negotiated settlements between the parties, HHS has not concluded, based upon review of the evidence, that the alleged vaccine(s) caused the alleged injury. These settlements are not an

admission by the United States or the Secretary of Health and Human Services that the vaccine caused the petitioner’s alleged injury, and, in settled cases, the Court does not determine that the vaccine caused the injury. Therefore, a settlement cannot be characterized as a decision by HHS or by the Court that the vaccine caused an injury. Thus, information from negotiated settlements cannot be used to establish that vaccines cause certain injuries.

The purposes of VAERS data are to: Detect new, unusual, or rare vaccine adverse events; identify potential patient risk factors for particular types of adverse events; identify vaccine lots with increased numbers or types of reported adverse events; and assess the safety of newly licensed vaccines. The VAERS data are considered a useful tool in vaccine safety, but VAERS reports by themselves generally cannot demonstrate that vaccines cause injuries.

In 2008, the Secretary contracted with the Institute of Medicine (IOM) to review the epidemiologic, clinical, and biological evidence regarding adverse health events associated with specific vaccines covered by VICP. The results of this review were published in the 2012 IOM Report, “*Adverse Effects of Vaccines: Evidence and Causality*.” This report reviewed 8 of the 12 vaccines covered by the VICP and provided 158 causality conclusions. The 2012 IOM Report reviewed the medical and scientific literature regarding a causal relationship between seasonal influenza vaccines and the following conditions: Encephalopathy, encephalitis, seizures, acute disseminated encephalomyelitis, TM, optic neuritis, neuromyelitis optica, MS, MS relapse, GBS, chronic inflammatory demyelinating polyneuropathy, Bell’s palsy, brachial neuritis, and small fiber neuropathy. The IOM concluded that the evidence is inadequate to accept or reject a causal relationship between influenza vaccines and the above conditions. Therefore, “any adverse neurological disorder or condition,” as suggested by the petitioner will not be added as injuries caused by the seasonal influenza vaccine to the Table since the medical and scientific literature is not sufficient to support this change.

The petitioner also requested that certain conditions be added to the Table if “any adverse neurological disorder or condition” could not be added to the Table. These conditions include: Anaphylaxis, SIRVA, vasovagal syncope, MS, GBS, TM, and myelitis. The petitioner stated that VAERS and settlement data from quarterly reports support the inclusion of these

conditions for seasonal influenza vaccines to the Table. However, as explained above, the VAERS data and the DOJ quarterly report do not demonstrate that vaccines cause injuries and do not establish causality. As stated previously, the 2012 IOM Report reviewed the medical and scientific literature regarding causal relationships between seasonal influenza vaccines and MS, TM, and myelitis. The IOM concluded that the evidence is inadequate to accept or reject a causal relationship between influenza vaccines and these conditions.

More recent studies support the lack of an association between the seasonal influenza vaccine and neurologic conditions, such as MS. The Williamson, et al. study found no substantiation to reports suggesting a link between MS and vaccines and that most of the studies that purported an increased risk of MS or relapse of MS after vaccination were small case series, which are methodologically less robust than other epidemiologic studies.⁶ In addition, Langer-Gould, et al. conducted a nested case control study that found no long-term association between vaccines and MS or other central nervous system acquired demyelinating syndromes.⁷ Therefore, MS, TM, and myelitis will not be added to the Table as injuries associated with the seasonal influenza vaccine since the medical and scientific literature is not sufficient to support those changes.

HHS proposed certain changes to the Vaccine Injury Table in a Notice of Proposed Rulemaking (NPRM) published in the **Federal Register** on July 29, 2015 (80 Fed. Reg. 45132 (July 29, 2015)). Among other proposed changes, anaphylaxis, SIRVA, GBS, and vasovagal syncope were proposed to be added as injuries for seasonal influenza vaccines. HHS is adding these injuries with the final rule, titled “National Vaccine Injury Compensation Program: Revisions to the Vaccine Injury Table,” concurrently publishing in the **Federal Register**.

In conclusion, there is no reliable evidence to support the addition of “any adverse neurological disorder or condition,” MS, TM, or myelitis to the Table as injuries associated with the seasonal influenza vaccine. Therefore, the Table will not be amended at this time to include those injuries on the Table.

[Docket No. DHS-2017-0008]

RIN 1601-AA79

Homeland Security Acquisition Regulation (HSAR); Privacy Training (HSAR Case 2015-003)

AGENCY: Office of the Chief Procurement Officer, Department of Homeland Security (DHS).

ACTION: Proposed rule.

SUMMARY: DHS is proposing to amend the Homeland Security Acquisition Regulation (HSAR) to add a new subpart, update an existing clause, and add a new contract clause to require contractors to complete training that addresses the protection of privacy, in accordance with the Privacy Act of 1974, and the handling and safeguarding of Personally Identifiable Information and Sensitive Personally Identifiable Information.

DATES: Interested parties should submit written comments to one of the addresses shown below on or before March 20, 2017, to be considered in the formation of the final rule.

ADDRESSES: Submit comments identified by HSAR Case 2015-003, Privacy Training, using any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>.

Submit comments via the Federal eRulemaking portal by entering “HSAR Case 2015-003” under the heading “Enter Keyword or ID” and selecting “Search.” Select the link “Submit a Comment” that corresponds with “HSAR Case 2015-003.” Follow the instructions provided at the “Submit a Comment” screen. Please include your name, company name (if any), and “HSAR Case 2015-003” on your attached document.

- *Fax:* (202) 447-0520
- *Mail:* Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, ATTN: Ms. Candace Lightfoot, 245 Murray Drive, Bldg. 410 (RDS), Washington, DC 20528.

Comments received generally will be posted without change to <http://www.regulations.gov>, including any personal information provided. To confirm receipt of your comment(s), please check <http://www.regulations.gov>, approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Ms. Candace Lightfoot, Procurement Analyst, DHS, Office of the Chief Procurement Officer, Acquisition Policy and Legislation at (202) 447-0882 or email HSAR@hq.dhs.gov. When using email, include HSAR Case 2015-003 in the “Subject” line.

SUPPLEMENTARY INFORMATION:

I. Background

DHS contracts currently require contractor and subcontractor employees to complete privacy training before accessing a Government system of records; handling Personally Identifiable Information (PII) or Sensitive PII (SPII); or designing, developing, maintaining, or operating a Government system of records. This training is completed upon award of the procurement and at least annually thereafter.

DHS is proposing to (1) include Privacy training requirements in the HSAR and (2) make the training more easily accessible by hosting it on a public Web site. This approach ensures all applicable DHS contractors and subcontractors are subject to the same requirements while removing the need for Government intervention to provide access to the Privacy training.

This proposed rule standardizes the Privacy training requirement across all DHS contracts by amending the HSAR to:

(1) Add the terms “personally identifiable information” and “sensitive personally identifiable information” at HSAR 3002.1, Definitions. The definition of “personally identifiable information” is taken from OMB Circular A-130 Managing Information as a Strategic Resource,¹ published July 27, 2016. The definition of “sensitive personally identifiable information” is derived from the DHS lexicon, Privacy Incident Handling Guidance, and the Handbook for Safeguarding Sensitive Personally Identifiable Information. These definitions are necessary because these terms appear in proposed HSAR

3024.70, Privacy Training and HSAR 3052.224-7X, Privacy Training.

(2) Add a new subpart at HSAR 3024.70, Privacy Training addressing the requirements for privacy training. HSAR 3024.7001, Scope identifies the applicability of the subpart to contracts and subcontracts. HSAR 3024.7002, Definitions defines the term “handling.” The definition of “handling” was developed based upon a review of definitions for the term developed by other Federal agencies. HSAR 3024.7003, Policy identifies when contractors and subcontracts are required to complete the DHS privacy training. This subsection also requires the submission of training completion certificates for all contractor and subcontractor employees as a record of compliance. HSAR 3024.7004, Contract Clause, identifies when Contracting Officers must insert HSAR 3052.224-7X Privacy Training in solicitations and contracts. DHS welcomes respondents to offer their views on the following questions in particular:

A. What burden, if any, is associated with the requirement to complete DHS-developed privacy training?

B. What value, if any, is associated with providing industry the flexibility to develop its own privacy training given a unique set of Government requirements?

(3) Amend sub paragraph (b) of the HSAR 3052.212-70, Contract Terms and Conditions Applicable to DHS Acquisition of Commercial Items to add HSAR 3052.224-7X, Privacy Training. This change is necessary because HSAR 3052.224-7X is applicable to the acquisition of commercial items; and

(4) Add a new subsection at HSAR 3052.224-7X, Privacy Training to provide the text of the proposed clause. The proposed clause requires contractor and subcontractor employees to complete privacy training before accessing a Government system of records; handling Personally Identifiable Information (PII) or Sensitive PII (SPII); or designing, developing, maintaining, or operating a Government system of records. The training shall be completed within thirty (30) days of contract award and on an annual basis thereafter. The contractor shall maintain copies of training certificates for all contractor and subcontractor employees as a record of compliance and provide copies of the training certificates to the contracting officer. Subsequent training certificates to satisfy the annual privacy training requirement shall be submitted via email notification not later than October 31st of each year. The contractor shall attach training certificates to the email

¹ OMB Circular A-130 *Managing Information as a Strategic Resource* is accessible at <https://www.whitehouse.gov/sites/default/files/omb/assets/OMB/circulars/a130/a130revised.pdf>.

notification and the email notification shall state that the required training has been completed for all contractor and subcontractor employees.

These proposed revisions to the HSAR are necessary to ensure contractors and subcontractors properly handle PII and SPII. This includes PII and SPII contained in a system of records consistent with subsection (e) Agency requirements, and subsection (m) Government contractors, of the Privacy Act of 1974, Section 552a of title 5, United States Code (5 U.S.C. 552a).

Other applicable authorities that address the responsibility for Federal agencies to ensure appropriate handling and safeguarding of PII include the following Office of Management and Budget (OMB) memoranda and policies: OMB Memorandum M-07-16, "Safeguarding Against and Responding to the Breach of Personally Identifiable Information" issued May 22, 2007; OMB Memorandum M-10-23, "Guidance for Agency Use of Third-Party Web sites and Applications" issued June 25, 2010 (this memorandum contains the most current definition of PII, and clarifies the definition provided in M-07-16); OMB Circular No. A-130 "Managing Information as a Strategic Resource," which identifies significant requirements for safeguarding and handling PII and reporting any theft, loss, or compromise of such information. DHS has also developed internal guidance that addresses the handling and protection of PII, including the DHS Privacy Incident Handling Guidance and the DHS Handbook for Safeguarding Sensitive Personally Identifiable Information. The DHS Privacy Incident Handling Guidance informs DHS and its components, employees, senior officials, and contractors of their obligation to protect PII, and establishes policies and procedures defining how they must respond to the potential loss or compromise of PII. The DHS Handbook for Safeguarding Sensitive Personally Identifiable Information sets minimum standards for how DHS personnel and contractors should handle SPII in paper and electronic form during their work activities.

This proposed rule is part of a broader initiative within DHS to (1) ensure contractors understand their responsibilities with regard to safeguarding controlled unclassified information (CUI); (2) contractor and subcontractor employees complete information technology (IT) security awareness training before access is provided to DHS information systems and information resources or contractor-

owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; (3) contractor and subcontractor employees sign the DHS RoB before access is provided to DHS information systems, information resources, or contractor-owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; and (4) contractor and subcontractor employees complete privacy training before accessing a Government system of records; handling personally identifiable information (PII) and/or sensitive PII information; or designing, developing, maintaining, or operating a system of records on behalf of the Government.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804. DHS has included a discussion of the estimated costs and benefits of this rule in the Paperwork Reduction Act supporting statement, which can be found in the docket for this rulemaking.

III. Regulatory Flexibility Act

DHS expects this proposed rule may have an impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule requires contractor and subcontractor employees to be properly trained on the requirements, applicable laws, and appropriate safeguards designed to ensure the security and confidentiality of PII before access a Government system of records; handle PII or SPII; or design, develop, maintain, or operate a system of records on behalf of the Government. Although the Privacy Act of 1974 has been in place for over 40 years, the rapidly changing information security landscape requires the Federal government to strengthen its contracts to ensure that contractor and

subcontractor employees comply with the Act and are aware of their responsibilities for safeguarding PII and SPII. Therefore, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared consistent with 5 U.S.C. 603, and is summarized as follows:

1. Description of the Reasons Why Action by the Agency Is Being Taken

DHS is proposing to amend the HSAR to require all contractor and subcontractor employees that will have access to a Government system of records; handle PII or SPII; or design, develop, maintain, or operate a system of records on behalf of the Government, complete training that addresses the requirements for the protection of privacy and the handling and safeguarding of PII and SPII. The purpose of this proposed rule is to require contractors to identify its employees who require access, ensure that those employees complete privacy training before being granted access and annually thereafter, provide the Government evidence of the completed training, and maintain evidence of completed training in accordance with the records retention requirements of the contract.

2. Succinct Statement of the Objectives of, and Legal Basis for, the Rule

The objective of this rule is to require contractor and subcontractor employees to complete Privacy training before accessing a Government system of records; handling PII and/or SPII; or designing, developing, maintaining, or operating a Government system of records. This proposed rule requires contractors to identify who will be responsible for completing privacy training, and to emphasize and create awareness of the critical importance of privacy training in an effort to reduce the occurrences of privacy incidents.

The training imposed by this proposed rule is required by the provisions of the Privacy Act (5 U.S.C. 552a), Title III of the E-Government Act of 2002 and the Federal Information Security Modernization Act (FISMA) of 2014. This proposed rule requires contractors to identify its employees and subcontractor employees who require access to PII and SPII, ensure that those employees complete privacy training before being granted access to such information and annually thereafter, provide the Government evidence of the completed training, and maintain evidence of completed training.

3. Description of and, Where Feasible, Estimate of the Number of Small Entities To Which the Rule Will Apply

This proposed rule will apply to contractor and subcontractor employees who require access to a Government system of records; handle PII or Sensitive PII; or design, develop, maintain, or operate a system of records on behalf of the Government. The estimated number of small entities to which the rule will apply is 6,628 respondents of which 4,162 are projected to be small businesses.

This estimate is based on a review and analysis of internal DHS contract data and Fiscal Year (FY) 2014 data reported to the Federal Procurement Data System (FPDS). It is anticipated that this rule will be primarily applicable to procurement actions with a Product and Service Code (PSC) of "D" Automatic Data Processing and Telecommunication and "R" Professional, Administrative and Management Support. PSCs will be adjusted as additional data becomes available through HSAR clause implementation to validate future burden projections.

4. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Rule, Including an Estimate of the Classes of Small Entities Which Will Be Subject to the Requirement and the Type of Professional Skills Necessary

The projected reporting and recordkeeping associated with this proposed rule is kept to the minimum necessary to meet the overall objectives. DHS minimized the burden associated with this proposed rule by developing the training and making it publicly accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. DHS has also minimized burden by providing automatically generated certificates at the conclusion of the training. Training shall be completed within thirty (30) days of contract award and on an annual basis thereafter. Initial training certificates for each contractor and subcontractor employee shall be provided to the Government not later than thirty (30) days after contract award. Subsequent training certificates to satisfy the annual privacy training requirement shall be submitted via email notification not later than October 31st of each year. The contractor shall attach training certificates to the email notification and the email notification shall state that the required training has been completed for all contractor and subcontractor

employees and include copies of the training certificates.

5. Identification, to the Extent Practicable, of All Relevant Federal Rules Which May Duplicate, Overlap, or Conflict With the Rule

There are no rules that duplicate, overlap or conflict with this rule.

6. Description of Any Significant Alternatives to the Rule Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact of the Rule on Small Entities

There are no practical alternatives that will accomplish the objectives of the proposed rule.

DHS will be submitting a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the point of contact specified herein. DHS invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DHS will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (HSAR Case 2015-003), in correspondence.

IV. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies because this proposed rule contains information collection requirements. Accordingly, DHS will be submitting a request for approval of a new information collection requirement concerning this rule to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

A. Public reporting burden for this collection of information is estimated to be approximately 30 minutes (.50 hours) per response to comply with the requirements, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The total annual projected number of responses per respondent is estimated at four (4). The estimated annual total burden hours are as follows:

Title: Homeland Security Acquisition Regulation: Privacy Training.

Type of Request: New Collection.

Number of Respondents: 6,628.

Responses per Respondent: 4.

Annual Responses: 26,512.

Average Burden per Response: Approximately 0.50.

Annual Burden Hours: 13,256.

Needs and Uses: DHS needs the information required by 3052.224-7X, Privacy Training to properly track contractor compliance with the training requirements identified in the clause.

Affected Public: Businesses or other for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: Upon award of procurement and annually thereafter.

B. Request for Comments Regarding Paperwork Burden.

You may submit comments identified by DHS docket number [DHS-2017-0008], including suggestions for reducing this burden, not later than March 20, 2017 using any one of the following methods:

(1) Via the internet at Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

(2) Via email to the Department of Homeland Security, Office of the Chief Procurement Officer, at HSAR@hq.dhs.gov.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the HSAR, and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Requesters may obtain a copy of the supporting statement from the Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, via email to HSAR@hq.dhs.gov. Please cite OMB Control No. 1600-0022 Privacy Training and Information Security Training, in the "Subject" line.

List of Subjects in 48 CFR Parts 3001, 3002, 3024 and 3052

Government procurement.

Therefore, DHS proposes to amend 48 CFR parts 3001, 3002, 3024 and 3052 to read as follows:

■ 1. The authority citation for 48 CFR parts 3001, 3002, 3024, and 3052 is revised to read as follows:

Authority: 5 U.S.C. 301-302, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 1303(a)(2), 48 CFR part 1, subpart 1.3, and DHS Delegation Number 0702.

PART 3001—FEDERAL ACQUISITION REGULATIONS SYSTEM

Subpart 3001.1—Purpose, Authority, Issuance

■ 2. Amend section 3001.106 by revising paragraph (a) to add a new OMB Control Number as follows:

3001.106 OMB Approval under the Paperwork Reduction Act.

(a) * * *

OMB Control No. 1600–0022 (Privacy Training)

* * * * *

PART 3002—DEFINITIONS OF WORDS AND TERMS

■ 3. Amend section 3002.101 by adding, in alphabetical order, the definitions: for “Personally Identifiable Information (PII),” and “Sensitive Personally Identifiable Information (SPII)” to read as follows:

* * * * *

“Personally Identifiable Information (PII)” means information that can be used to distinguish or trace an individual’s identity, either alone or when combined with other information that is linked or linkable to a specific individual.

* * * * *

“Sensitive Personally Identifiable Information (SPII)” is a subset of PII, which if lost, compromised or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. Some forms of PII are sensitive as stand-alone elements.

(1) Examples of stand-alone SPII include: Social Security numbers (SSN), driver’s license or state identification number, Alien Registration Numbers (A-number), financial account number, and biometric identifiers such as fingerprint, voiceprint, or iris scan.

(2) Additional examples of SPII include any groupings of information that contain an individual’s name or other unique identifier plus one or more of the following elements:

- (i) Truncated SSN (such as last 4 digits)
- (ii) Date of birth (month, day, and year)
- (iii) Citizenship or immigration status
- (iv) Ethnic or religious affiliation
- (v) Sexual orientation
- (vi) Criminal history
- (vii) Medical information
- (viii) System authentication

information such as mother’s maiden name, account passwords or personal identification numbers (PIN)

(3) Other PII may be SPII depending on its context, such as a list of

employees and their performance ratings or an unlisted home address or phone number. In contrast, a business card or public telephone directory of agency employees contains PII but is not SPII.

PART 3024—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

■ 4. Amend part 3024 by adding subpart 3024.70:

Subpart 3024.70—Privacy Training

- 3024.7001 Scope.
- 3024.7002 Definitions.
- 3024.7003 Policy.
- 3024.7004 Contract Clause.

3024.7001 Scope.

This section applies to contracts and subcontracts where contractor and subcontractor employees require access to a Government system of records; handle Personally Identifiable Information (PII) or Sensitive PII (SPII); or design, develop, maintain, or operate a Government system of records.

3024.7002 Definitions.

As used in this subpart—

“Handling” means any use of Personally Identifiable Information (PII) or Sensitive PII (SPII), including but not limited to marking, safeguarding, transporting, disseminating, re-using, storing, capturing, and disposing of the information.

3024.7003 Policy.

(a) Contractors are responsible for ensuring that contractor and subcontractor employees complete DHS privacy training initially upon award of the procurement, and at least annually thereafter, before contractor and subcontractor employees—

(1) Access to a Government system of records;

(2) Handle PII or SPII; or

(3) Design, develop, maintain, or operate a system of records on behalf of the Government.

(b) The contractor shall ensure employees identified in paragraph (a) of this section complete the required training, maintain evidence that the training has been completed and provide copies of the training completion certificates to the Contracting Officer and/or Contracting Officer’s Representative for inclusion in the contract file.

(c) Each contractor and subcontractor employee who requires access to a Government system of records; handles PII or SPII; or designs, develops, maintains, or operates a Government system of records, shall be granted

access or allowed to retain such access only if the individual has completed Department of Homeland Security privacy training requirements.

3024.7004 Contract Clause.

Contracting officers shall insert the clause at (HSAR) 48 CFR 3052.224–7X, Privacy Training, in solicitations and contracts when contractor and subcontractor employees may have access to a Government system of records; handle PII or SPII; or design, develop, maintain, or operate a system of records on behalf of the Government.

PART 3052—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 5. Amend paragraph (b) of section 3052.212–70 to add 3052.224–7X Privacy Training as follows:

3052.212–70 Contract terms and conditions applicable to DHS acquisition of commercial items.

Contract Terms and Conditions Applicable to DHS Acquisition of Commercial Items (DATE)

* * * * *

(b) * * *

____ 3052.224–7X Privacy Training

■ 6. Amend part 3052 by adding section 3052.224–7X Privacy Training, to read as follows:

3052.224–7X Privacy training.

As prescribed in (HSAR) 48 CFR 3024.7004 contract clause, insert the following clause:

Privacy Training (DATE)

(a) The Contractor shall ensure that all Contractor and subcontractor employees complete the Department of Homeland Security (DHS) training titled, Privacy at DHS: Protecting Personally Identifiable Information accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>, before such employees—

(1) Access a Government system of records;

(2) Handle personally identifiable information or sensitive personally identifiable information; or

(3) Design, develop, maintain, or operate a system of records on behalf of the Government.

(b) Training shall be completed within thirty (30) days of contract award and be completed on an annual basis thereafter not later than October 31st of each year. Any new Contractor or subcontractor employees assigned to the contract shall complete the training before accessing the information identified in paragraph (a) of this clause. The Contractor shall maintain copies of the training certificates for all Contractor and subcontractor employees as a record of compliance. Initial training certificates for each Contractor and subcontractor employee

shall be provided to the Contracting Officer and/or Contracting Officer's Representative (COR) via email notification not later than thirty (30) days after contract award or assignment to the contract. Subsequent training certificates to satisfy the annual training requirement shall be submitted to the Contracting Officer and/or COR via email notification not later than October 31st of each year. The Contractor shall attach training certificates to the email notification and the email notification shall list all Contractor and subcontractor employees required to complete the training and state the required Privacy training has been completed for all Contractor and subcontractor employees.

(c) The Contractor shall insert the substance of this clause in all subcontracts and require subcontractors to include this clause in all lower-tier subcontracts.

(End of clause)

Soraya Correa,

Chief Procurement Officer, Department of Homeland Security.

[Docket No. DHS-2017-0006]

RIN 1601-AA76

Homeland Security Acquisition Regulation (HSAR); Safeguarding of Controlled Unclassified Information (HSAR Case 2015-001)

AGENCY: Office of the Chief Procurement Officer, Department of Homeland Security (DHS).

ACTION: Proposed rule.

SUMMARY: DHS is proposing to amend the Homeland Security Acquisition Regulation (HSAR) to modify a subpart, remove an existing clause and reserve the clause number, update an existing clause, and add a new contract clause to address requirements for the safeguarding of Controlled Unclassified Information (CUI).

DATES: Comments on the proposed rule should be submitted in writing to one of the addresses shown below on or before March 20, 2017, to be considered in the formation of the final rule.

ADDRESSES: Submit comments identified by HSAR Case 2015-001, Safeguarding of Controlled Unclassified Information, using any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>.

Submit comments via the Federal eRulemaking portal by entering "HSAR

Case 2015-001" under the heading "Enter Keyword or ID" and selecting "Search." Select the link "Submit a Comment" that corresponds with "HSAR Case 2015-001." Follow the instructions provided at the "Submit a Comment" screen. Please include your name, company name (if any), and "HSAR Case 2015-001" on your attached document.

- *Fax:* (202) 447-0520
- *Mail:* Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, ATTN: Ms. Shaundra Duggans, 245 Murray Drive, Bldg. 410 (RDS), Washington, DC 20528.

Comments received generally will be posted without change to <http://www.regulations.gov>, including any personal information provided. To confirm receipt of your comment(s), please check www.regulations.gov, approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Ms. Shaundra Duggans, Procurement Analyst, DHS, Office of the Chief Procurement Officer, Acquisition Policy and Legislation at (202) 447-0056 or email HSAR@hq.dhs.gov. When using email, include HSAR Case 2015-001 in the "Subject" line.

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this proposed rule is to implement adequate security and privacy measures to safeguard Controlled Unclassified Information (CUI) and facilitate improved incident reporting to DHS. This proposed rule does not apply to classified information. These measures are necessary because of the urgent need to protect CUI and respond appropriately when DHS contractors experience incidents with DHS information. Recent high-profile breaches of Federal information further demonstrate the need to ensure that information security protections are clearly, effectively, and consistently addressed in contracts. This proposed rule strengthens and expands existing HSAR language to ensure adequate security for CUI that is accessed by contractors; collected or maintained by contractors on behalf of an agency; and/or for Federal information systems that collect, process, store or transmit such information. The proposed rule identifies CUI handling requirements as well as incident reporting requirements, including timelines and required data elements. The proposed rule also includes inspection provisions and

post-incident activities and requires certification of sanitization of Government and Government-Activity related files and information. Additionally, the proposed rule requires that contractors have in place procedures and the capability to notify and provide credit monitoring services to any individual whose Personally Identifiable Information (PII) or Sensitive PII (SPII) was under the control of the contractor or resided in the information system at the time of the incident.

This rule addresses the safeguarding requirements specified in the Federal Information Security Modernization Act (FISMA) of 2014 (44 U.S.C. 3551, *et seq.*), Office of Management and Budget (OMB) Circular A-130, *Managing Information as a Strategic Resource*,¹ relevant National Institutes of Standards and Technology (NIST) guidance, Executive Order 13556, *Controlled Unclassified Information*² and its implementing regulation at 32 CFR part 2002,³ and the following OMB Memoranda: M-07-16, *Safeguarding Against and Responding to the Breach of Personally Identifiable Information*; M-14-03, *Enhancing the Security of Federal Information and Information Systems*; and Reporting Instructions for the Federal Information Security Management Act and Agency Privacy Management as identified in various OMB Memoranda.⁴ Ongoing efforts by OMB and DHS with regard to implementation of FISMA, such as the issuance of Binding Operational Directives, and DHS implementation of the CUI program, may require future HSAR revisions in this area. DHS intends to harmonize the HSAR to be consistent with the requirements of these ongoing efforts.

II. Discussion and Analysis

This proposed rule is part of a broader initiative within DHS to (1) ensure contractors understand their responsibilities with regard to safeguarding controlled unclassified information (CUI); (2) contractor and subcontractor employees complete

¹ OMB Circular A-130 *Managing Information as a Strategic Resource* is accessible at <https://www.whitehouse.gov/sites/default/files/omb/assets/OMB/circulars/a130/a130revised.pdf>.

³ 32 CFR part 2002 is accessible at <https://www.gpo.gov/fdsys/pkg/FR-2016-09-14/pdf/2016-21665.pdf>.

⁴ These memoranda include M-03-19, M-04-25, M-05-15, M-06-20, M-07-19, M-08-212, M-09-29, M-10-15, M-11-33, M-12-20, M-14-04, M-15-01, M-16-03, and M-16-04. These memoranda can be accessed at: https://www.whitehouse.gov/omb/memoranda_default.

information technology (IT) security awareness training before access is provided to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; (3) contractor and subcontractor employees sign the DHS RoB before access is provided to DHS information systems, information resources, or contractor-owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; and (4) contractor and subcontractor employees complete privacy training before accessing a Government system of records; handling personally identifiable information (PII) and/or sensitive PII information; or designing, developing, maintaining, or operating a system of records on behalf of the Government.

DHS is proposing to amend and expand an existing HSAR subpart. This proposed rule would (1) add new definitions; (2) clarify the applicability of the subpart; (3) remove an existing clause and reserve the clause number; (4) revise an existing clause; and (5) add a new clause to implement expanded safeguarding requirements and identify new policies for incident reporting, incident response, notification and credit monitoring. Each of these proposed changes are described in detail below.

(1) DHS is proposing to revise subpart 3002.101, Definitions, to define “adequate security,” “controlled unclassified information,” “Federal information,” “Federal information system,” “handling,” “information resources,” “information security,” and “information system,” and remove the definition of sensitive information. The definition of the terms “adequate security,” “Federal information,” and “Federal information system” is taken from OMB Circular A-130, *Managing Information as a Strategic Resource*. The definition of controlled unclassified information is taken from its implementing regulation at 32 CFR part 2002. The definition of “handling” was developed based upon a review of definitions for the term developed by other Federal agencies. The definition for the term “information security” is taken from FISMA 2014 (44 U.S.C. 3552(b)(3)) and the definitions for the terms “information resources” and “information system” are taken from 44 U.S.C. 3502(6) and 44 U.S.C. 3502(8) respectively. The definition of “sensitive information” is removed because it is being replaced with

“controlled unclassified information” consistent with Executive Order 13556 and its implementing regulation at 32 CFR part 2002. This rule also adds five (5) new categories/subcategories of CUI titled Homeland Security Agreement Information, Homeland Security Enforcement Information, Operations Security Information, Personnel Security Information, and Sensitive Personally Identifiable Information for consistency with NARA’s CUI regulation (32 CFR part 2002). The definitions of these terms are needed because these terms appear in the new proposed clause at 3052.204-7X, *Safeguarding of Controlled Unclassified Information*.

(2) DHS is proposing to revise subpart 3004.470, Security requirements for access to unclassified facilities, Information Technology resources, and sensitive information, to change the title of the subpart and to clarify the applicability of the subpart to the acquisition lifecycle. The title of the subpart would be changed to “Security requirements for access to unclassified facilities, information resources, and controlled unclassified information” and a new subsection for definitions would be added under the subpart. Accordingly, the subsections would be renumbered as follows: 3004.470-1 Scope, 3004.470-2 Definitions, 3004.470-3 Policy, and 3004.470-4 Contract Clauses. Originally, the title of this subpart contained the term “information technology resources;” however, this term is inconsistent with 44 U.S.C. 3502(6) which defines the term “information resources.” Subsection 3004.470-1, Scope, would be amended for consistency in terminology and to make clear the applicability of the subpart to the acquisition lifecycle. Subsection 3004.470-2, Definitions, would be added to define the term “incident.” The definition for “incident” is taken from FISMA 2014 (44 U.S.C. 3552(b)(2)). This term could not be defined at 3002.1, Definitions, because the meaning of the term “incident” in this subpart differs from the meaning it is given in other parts of the HSAR. Additionally, this definition is needed because this term appears in the clause at 3052.204-7X, *Safeguarding of Controlled Unclassified Information*. Subsection 3004.470-3, Policy, would be revised to (a) remove explicit references to Departmental policies and procedures to safeguard CUI that are subject to change and provide a public facing link for which these policies and procedures can be accessed and (b) make clear the requirements for

completion of security forms and background investigations for contractor employees that require recurring access to Government facilities or CUI. Subsection 3004.470-4, Contract Clauses, would be revised to remove reference to 3052.204-70, Security Requirements for Unclassified Information Technology Resources and identify the applicability of the clause at 3052.204-7X, *Safeguarding of Controlled Unclassified Information*, to solicitations, contracts, and subcontracts.

(3) Clause 3052.204-70, Security Requirements for Unclassified Information Technology Resources, would be removed and the clause number reserved. This change is necessary because the addition of the clause at 3052.204-7X *Safeguarding of Controlled Unclassified Information* eliminates the need for this clause.

(4) A new clause at 3052.204-7X, *Safeguarding of Controlled Unclassified Information*, would be added to ensure adequate protection of CUI. The new clause adds definitions and identifies CUI handling requirements, Authority to Operate requirements, incident reporting and response requirements, PII and SPII notification requirements, credit monitoring requirements, sanitization of Government and Government-Activity related files and information requirements, other reporting requirements, and subcontract requirements. Each of these requirements is described below.

(a) Definitions

This section would add definitions, which also appear in part at 3002.1 Definitions and 3004.470-2 Definitions, as follows: “adequate security,” “Controlled Unclassified Information,” “Federal information,” “Federal information system,” “handling,” “Homeland Security Agreement Information,” “Homeland Security Enforcement Information,” “incident,” “information resources,” “information security,” “information system,” “Operations Security Information,” “Personnel Security Information,” and “Sensitive Personally Identifiable Information.” The definitions of these terms are needed because these terms appear in 3052.204-7X, *Safeguarding of Controlled Unclassified Information*.

(b) Handling of Controlled Unclassified Information

This section sets forth specific requirements for contractors and subcontractors when handling CUI in order to better protect against the threat of persistent cyber-attacks and prevent the compromise of CUI, including PII.

These requirements include being in compliance with the DHS policies and procedures in effect at the time of contract award. These policies and procedures are located on a public Web site titled DHS Security and Training Requirements for Contractors which can be accessed via <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. This Web site identifies Departmental policies and procedures that contractors must comply with related to personnel security, information security, IT security, and privacy. The Web site also identifies and provides contractors with access to IT security awareness and privacy training. The policies and training requirements contained on this Web site are existing requirements that DHS routinely includes in the terms and conditions of its contracts, some of which are pre-existing through HSAR 3052.204–70 *Security Requirements for Unclassified Information Technology Resources* and 3052.204–71 *Contractor Employee Access*. Part of the intent of this proposed rulemaking is to increase transparency by consolidating these existing requirements in a single location that is easily accessible by the public. Changes to these policies and procedures will be reflected on the Web site and changes that impact contract performance will be communicated to the contractor by the Government.

Handling requirements also include not using or redistributing any CUI collected, processed, stored, or transmitted by the contractor, except as specified in the contract and not maintaining SPII in the contractor's invoicing, billing, and other recordkeeping systems maintained to support financial or other administrative functions. DHS believes that maintaining SPII in the contractor's invoicing, billing, and other recordkeeping systems creates unnecessary risk of compromise and is not otherwise needed to achieve contract administration functions. DHS welcomes comments regarding whether other categories of CUI should be similarly excluded from a contractor's invoicing, billing, and other recordkeeping systems. Through these and other requirements set forth in the proposed clause and discussed in detail in the following sections, the Department believes that contractors and subcontractors will provide adequate security from the unauthorized access and disclosure of CUI.

(c) Authority To Operate

FISMA defines a comprehensive framework for ensuring the protection of Government information, operations

and assets against natural or man-made threats. This section sets forth information security requirements contractors operating a Federal information system must meet prior to collecting, processing, storing, or transmitting CUI in that information system as required by FISMA and set forth in NIST Special Publication 800–53, *Recommended Security and Privacy Controls for Federal Information Systems and Organizations*. The requirements include completing the security authorization process, including the preparation of security authorization package and obtaining an independent assessment; renewal of the security authorization; security review; and Federal reporting and continuous monitoring.⁵

Security authorization involves comprehensive testing and evaluation of security features (also known as controls) of an information system. It addresses software and hardware security safeguards; considers procedural, physical, and personnel security measures; and establishes the extent to which a particular design (or architecture), configuration, and implementation meets a specified set of security requirements throughout the life cycle of the information system. It also considers procedural, physical, and personnel security measures employed to enforce information security policy. The security authorization package includes a Security Plan, Contingency Plan, Contingency Plan Test Results, Configuration Management Plan, Security Assessment Plan, and Security Assessment Report. These documents are used to record the results of the security authorization process and provide evidence that the process was followed correctly. A Federal information system, which includes a contractor information system operating on behalf of an agency, must be granted an Authority to Operate (ATO) before it is granted permission to collect, process, store, or transmit CUI. The ATO is the official management decision given by a senior organizational official to authorize operation of an information

⁵ DHS is aware that NIST Special Publication 800–171, *Protecting Controlled Unclassified Information in Nonfederal Information Systems and Organizations*, was released in June 2015 to provide federal agencies with recommended requirements for protecting the confidentiality of Controlled Unclassified Information on non-Federal information systems; however, the information system security requirements in this proposed rulemaking are focused on Federal information systems, which include contractor information systems operating on behalf of an agency. Consistent with 32 CFR part 2002, these information systems are not subject to the requirements of NIST Special Publication 800–171.

system based on the implementation of an agreed-upon set of security controls.

The independent assessment is used to validate the security and privacy controls in place for the information system prior to submission of the security authorization package to the Government for review and acceptance. Once an ATO is accepted and signed by the Government, it is valid for three (3) years and must be renewed at that time unless otherwise specified in the ATO letter. The Government uses random security reviews as an additional level of verification to ensure security controls are in place, enforced and operating effectively. The contractor shall afford access to DHS, the Office of the Inspector General, other Government organizations, and contractors working in support of the Government access to the Contractor's facilities, installations, operations, documentation, databases, networks, systems, and personnel used in the performance of this contract to conduct security reviews. In addition, contractors operating information systems on behalf of the Government shall comply with Federal reporting and information system continuous monitoring requirements. Reporting requirements are determined by OMB on an annual basis and are defined in the Fiscal Year 2015 DHS Information Security Performance Plan.⁶ The plan is updated annually to reflect any new or revised reporting requirements from OMB.

(d) Incident Reporting

This section sets forth incident reporting requirements for contractors and subcontractors when reporting known or suspected incidents, including known or suspected incidents that involve PII and/or SPII. The incident reporting requirements described in this section allow the Department to gather the information necessary to formulate an effective incident response plan for incident mitigation and resolution. These requirements include: Reporting all known or suspected incidents to the Component Security Operations Center and notifying the contracting officer and contracting officer's representative of the incident; reporting known or suspected incidents that involve PII or SPII within one hour of discovery and all other incidents within eight hours of discovery; encrypting CUI using FIPS 140–2 Security Requirements for

⁶ The Fiscal Year 2015 DHS Information Security Performance Plan can be found at: <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>.

Cryptographic Modules and refraining from including CUI in the subject or body of any email; providing additional data elements when reporting incidents involving PII or SPII; and making clear that an incident shall not, by itself, be interpreted as evidence that the contractor failed to provide adequate information security safeguards for CUI.

The timing for reporting incidents involving PII or SPII is consistent with OMB Memorandum M-07-16, *Safeguarding Against and Responding to the Breach of Personally Identifiable Information*. The timing for reporting incidents unrelated to PII or SPII was derived from existing Departmental policy for reporting incidents related to other categories of CUI such as CVI, Protected Critical Infrastructure Information (PCII), and Sensitive Security Information (SSI). Controlled unclassified information is required to be excluded from the subject or body of an email and encrypted to prevent further compromise of the information when reporting incidents. The additional data elements required when reporting incidents involving PII or SPII are needed to assist in the Department's understanding of the incident and aid in an effective response. DHS also wants to encourage industry to timely report incidents to the Department by making it clear that such reporting does not automatically mean the contractor has failed to provide adequate security or otherwise meet the requirements of the contract.

(e) Incident Response

This section identifies incident response requirements and activities. Incident response activities such as inspections, investigations, forensic reviews, etc. are used to quickly assess, remediate and protect CUI and are conducted whenever an incident is reported to DHS. The goal of these activities is to determine what data was or could have been accessed by an intruder, build a timeline of intruder activity, determine methods and techniques used by the intruder, find the initial attack vector, identify any features/aspects in the information security protections, and provide remediation recommendations to restore the protection of the data. Incident response activities may also include contract compliance analyses.

(f) PII and SPII Notification Requirements

This section sets forth the notification procedures and capability requirements for Contractors when notifying any individual whose PII and/or SPII was under the control of the Contractor or

resided in the information system at the time of the incident. The method and content of any notification by the Contractor shall be coordinated with, and subject to prior written approval by the Contracting Officer utilizing the DHS Privacy Incident Handling Guidance. When appropriate, notification of those affected and/or the public allows those individuals affected by the incident the opportunity to take steps to help protect themselves. Such notification is also consistent with the "openness principle" of the Privacy Act which calls for agencies to inform individuals about how their information is being accessed and used, and may help individuals mitigate the potential harms resulting from an incident.

The Department realizes that there are existing state notification laws that industry must also follow. Therefore, DHS welcomes comments regarding the impact, if any, that existing state notification laws will have on industry's ability to comply with this notification requirement.

(g) Credit Monitoring

This section sets forth the requirement that the contractor, when appropriate, is required to provide credit monitoring services, including call center services, if directed by the Contracting Officer, to any individual whose PII or SPII was under the control of the contractor, or resided in the information system, at the time of the incident for a period beginning the date of the incident and extending not less than 18 months from the date the individual is notified. Credit monitoring is a commercial service that can assist individuals in early detection of instances of identity theft. Credit monitoring services notify individuals of changes that appear in their credit report, such as creation of new accounts, changes to their existing accounts or personal information, or new inquiries for credit. Such notification affords individuals the opportunity to take steps to minimize any harm associated with unauthorized or fraudulent activity. The section is only applicable when an incident involves PII or SPII.

The Department deliberately made the provision of notification and credit monitoring services independent from an assessment of fault or lack of compliance with the contract terms and conditions. In accordance with OMB Memorandum M-07-16, *Safeguarding Against and Responding to the Breach of Personally Identifiable Information*, agencies have the responsibility to notify individuals whose PII or SPII may have been compromised without

unreasonable delay. This notification has often been delayed while detailed forensic analysis and contract compliance inspections are occurring. Under this new provision, notification and credit monitoring, when appropriate, will occur more rapidly as it is not dependent upon any determination of contractor fault or noncompliance. DHS is also aware that sophisticated cyber-attacks can occur despite compliance with contract requirements. In these instances, even though there is no contractor noncompliance, there may still be a need to notify individuals and provide credit monitoring services. Additionally, DHS wants to emphasize that the provisions for notification and credit monitoring services are only applicable when (1) contractor and/or subcontractor employees may have access to PII/SPII or (2) information systems are used to collect, process, store, or transmit PII/SPII on behalf of the agency. DHS is considering broadening the credit monitoring requirement to include identity protection, identity restoration, and related services. DHS welcomes comments regarding the impact, if any, of this change.

(h) Certificate of Sanitization of Government and Government-Activity Related Files and Information

Upon the conclusion of the contract by expiration, termination, cancellation, or as otherwise identified in the contract, the Contractor must return all CUI to DHS or destroy it physically or logically as identified in the contract. This destruction must conform to the guidelines for media sanitization contained in NIST SP-800-88, *Guidelines for Media Sanitization*. Further, the contractor must certify and confirm sanitization of media using the template provided in Appendix G of the publication.

(i) Other Reporting Requirements

The purpose of this section is to make clear that the requirements of this clause do not rescind the Contractor's responsibility for compliance with other applicable U.S. Government statutory or regulatory requirements that may apply to its contract(s).

(j) Subcontracts

This section requires that contractors insert the clause at 3052.204-7X *Safeguarding of Controlled Unclassified Information* in all subcontracts and require subcontractors to include this clause in all lower-tier subcontracts. The requirements of this clause are applicable to all contractors and

subcontractors that (1) will have access to CUI; (2) collect or maintain CUI on behalf of the agency; or (3) operate Federal information systems, including contractor information systems operated on behalf of the agency, to collect, process, store, or transmit CUI.

(5) Clause 3052.212–70, *Contract Terms and Conditions Applicable to DHS Acquisition of Commercial Items*, would be revised to remove 3052.204–70, *Security Requirements for Unclassified Information Technology Resources*; identify Alternate II as an option under subparagraph (b) of 3052.204–71 *Contractor Employee Access*; and add 3052.204–7X *Safeguarding of Controlled Unclassified Information* under subparagraph (b) of the clause. The addition of 3052.204–7X *Safeguarding of Controlled Unclassified Information* eliminates the need for 3052.204–70 *Security Requirements for Unclassified Information Technology Resources*. Because of this 3052.204–70 would be removed and the clause number reserved. Alternate II to 3052.204–71 was inadvertently omitted as an option under the listing of clauses and alternates available for selection under 3052.212–70. This addition corrects that omission. Subparagraph (b) of 3052.212–70 would also be amended to add 3052.204–7X *Safeguarding of Controlled Unclassified Information* because the requirements of these clauses are applicable to the acquisition of commercial items.

(6) Other considerations. DHS is considering making changes to subpart 3004.470–3, *Contract Clauses*, and the clause at 3052.204–71, *Contractor Employee Access*. These changes would harmonize the text of the clause with the requirements of the final version of 3052.204–7X *Safeguarding of Controlled Unclassified Information* by removing outdated and/or unnecessary definitions (i.e., sensitive information and information technology resources); renumbering the paragraphs of the clause as a result of the removal of the definitions for the terms “sensitive information” and “information technology resources”; and making clear in the prescription for the clause the need for information security regardless of the setting, including educational institutions and contractor facilities. DHS believes that the protection of CUI is paramount regardless of where the information resides. DHS is also seeking comment on making the clause at 3052.204–7X, *Safeguarding of Controlled Unclassified Information*, applicable to all services contracts. DHS believes this broader applicability would ensure that contractors are aware of the Government’s requirements

related to CUI. In addition, the Government believes that the requirements of the clause are written in such a way that they would be self-deleting when they are not applicable to a solicitation or contract. DHS welcomes comments regarding the impact, if any, on including 3052.204–7X, *Safeguarding of Controlled Unclassified Information*, in all services contracts. DHS also welcomes comments and feedback on industry’s understanding of the concept of self-deleting and if the use of alternates to 3052.204–7X, *Safeguarding of Controlled Unclassified Information*, is needed to ensure proper understanding and application of the clause.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under Section 6(b) of E.O. 12866, *Regulatory Planning and Review*, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

This proposed rule addresses the safeguarding requirements specified in the FISMA, OMB Circular A–130, *Managing Information as a Strategic Resource*, relevant NIST guidance, Executive Order 13556, *Controlled Unclassified Information* and its implementing regulation at 32 CFR part 2002, and multiple OMB Memoranda. DHS considered both the costs and benefits associated with the requirements of proposed clause *Safeguarding of Controlled Unclassified Information*, specifically those requirements believed to be of most import to industry such as the requirement to: Obtain an independent assessment, perform continuous monitoring, report all known and suspected incidents, provide notification and credit monitoring services in the event an incident impacts PII, document sanitization of Government and Government-activity-related files and information, as well as ensure overall compliance with the requirements of the proposed clause.

To determine the estimated costs of these requirements DHS requested cost

information from multiple vendors whose contracts with DHS include requirements similar to this proposed rule; obtained cost input from the Federal Risk and Authorization Management Program (FedRAMP), for which DHS is a participant; reviewed the Congressional Budget Office (CBO) Cost Estimate for the Personal Data Protection and Breach Accountability Act of 2011; reviewed pricing from the General Service Administration’s (GSA) recently awarded Identity Protection Services (IPS) blanket purchase agreements (BPAs); and reviewed internal price data from DHS’s Managed Compliance Services and notification and credit monitoring services contracts. These activities identified that: (1) The cost of an independent assessment can range from \$30,000 to \$150,000 with an average cost of \$112,872; (2) the equipment costs to perform continuous monitoring can range from \$76,340 to \$350,000 with an average cost of \$213,170 while the labor costs to perform continuous monitoring can range from \$47,000 to \$65,000 for an average cost of \$55,674; (3) the cost of reporting an incident to DHS ranges between \$500 and \$1,500 per incident; (4) the cost of notifying individuals that there has been an incident with their PII ranges from \$1.03 to \$4.60 per person; (5) the cost of credit monitoring services range between \$60 and \$260 per person; (6) a specific cost for the certificate of sanitization of Government and Government-Activity-Related files and information cannot be determined as the methods of sanitization vary widely depending on the categorization of the system and the media on which the data is stored; and (7) costs associated with Full-time Equivalent (FTE) oversight of the requirements of proposed clause *Safeguarding of Controlled Unclassified Information* ranges from \$65,000 to \$324,000. Detailed information on how DHS arrived at these costs and ranges is provided below.

There are a multitude of benefits associated with the requirements of proposed clause *Safeguarding of Controlled Unclassified Information*. These benefits impact both DHS and contractors with which it conducts business. Benefits related to specific provisions of the proposed clause are addressed below; however, it is important to note the overarching benefit of transparency. While several of the requirements of the proposed clause have been routinely included in DHS contracts (e.g., Authority to Operate, notification, and credit monitoring), this proposed rulemaking standardizes the applicability of these requirements and

makes clear to contractors considering doing business with DHS the standards and requirements to which they will be held as it relates to the (1) handling of the Department's CUI, (2) security requirements when such information will be collected or maintained on behalf of the agency or collected, processed, stored, or transmitted in a Federal information system, including contractor information systems operating on behalf of the agency, and (3) potential notification and credit monitoring requirements in the event of an incident that impacts personally identifiable information (PII) and/or sensitive PII (SPII). The current lack of standardization and transparency has been point of contention for industry and a common concern raised when DHS has requested feedback from industry.

Overview of Costs

Independent Assessment

DHS is proposing that vendors obtain an independent assessment to validate the security and privacy controls in place for an information system prior to submission of the security authorization package to the Government for review and acceptance. In general, when assessing compliance with a standard or set of requirements, there are three alternatives: (1) First party attestation or self-certification, (2) second party attestation (*i.e.*, internal independent), or (3) third party attestation. While the first two options may be considered the least economically burdensome, third party attestation is an accepted best practice in commercial industry as objectivity increases with independence. DHS is proposing to require that vendors obtain an independent assessment from a third party to ensure a truly objective measure of an entity's compliance with the requisite security and privacy controls. Recent high-profile breaches of Federal information further demonstrate the need for Departments, agencies, and industry to ensure that information security protections are clearly, effectively, and consistently addressed and appropriately implemented in contracts. Additionally, the benefits of using a third party to perform an independent assessment also extend to the contractor as the contractor can use the results of the independent assessment to demonstrate its cybersecurity excellence for customers other than DHS.

The cost of an independent assessment varies widely depending upon the complexity of the information system, the categorization of the

information system (low, moderate, or high impact), and the sophistication of the contractor. Additionally, DHS does not have a mechanism to track the costs of independent assessments performed under its contracts. Because of the multiple factors that influence the cost of an independent assessment and lack of a tracking mechanism for associated costs, DHS is unable to identify with specificity the costs of implementing this requirement. As such, we sought to identify a range of costs based on the actual data we were able to access. DHS performed the following activities to obtain this data:

- Requested cost information from multiple vendors whose contracts with DHS require an independent assessment as part of the security authorization process;
- Obtained cost input from FedRAMP, for which DHS is a participant, as the program requires cloud service providers to obtain an independent assessment from a Third Party Assessment Organization; and
- Reviewed internal data from DHS's Managed Compliance Services contract. DHS uses this contract to perform internal independent assessments.

The cost information received from DHS vendors ranged from \$30,000 to \$123,615. The vendors whose costs were on the higher end of this range included costs for the independent party as well as internal labor costs associated with performing the independent assessment whereas the vendor on the low end of the spectrum did not. FedRAMP data indicates the estimated costs on an independent assessment to be approximately \$150,000 while costs under DHS's internal contract for this service ranges between \$35,000 and \$45,000. When considering the data from DHS's internal contract for independent assessment services, it is important to note that these figures do not capture the labor costs of the Government employees involved in the process as the Government does not typically track the costs incurred for services performed by its own workforce. Because of this, it is both anticipated and expected that contractor costs for independent assessments will exceed the costs the Government incurs as contractor costs typically include not only the cost of the independent third party but also internal labor costs to facilitate the independent assessment and resolve any resultant findings.

Based on the above data points, the cost of an independent assessment can range from \$30,000 to \$150,000 or an average cost of \$112,872. Because it seems likely that most vendors will

have to account for necessary staff time, the average cost was developed by averaging only those cost estimates that included both internal and external labor costs. Neither the range nor the average cost identified is absolute as there are multiple factors that influence the cost of this service. Internal historical data indicates it takes approximately 162 labor hours to complete an independent assessment. This adds to the variance as the costs are dependent upon the labor categories and rates used to perform the assessment. Also, it is important to note that the assessment is required to be performed by an independent party. As such, the actual cost of the assessment is largely dependent upon agreements that the contractor is responsible for negotiating. Contractors with preexisting relationships with entities that perform independent assessments may be able to obtain more competitive pricing. Contractors new to this requirement may not. DHS welcomes comments from industry regarding the estimated costs associated with compliance with the requirement to obtain an independent assessment.

Continuous Monitoring

Proposed clause *Safeguarding of Controlled Unclassified Information* requires that contractors operating Federal information systems, which includes contractor information systems operating on behalf of the Government, or maintaining or collecting information on behalf of the Government, comply with information system continuous monitoring requirements. Continuous monitoring is not a new requirement for DHS contractors. Existing HSAR clause 3052.204-70, *Security Requirements for Unclassified Information Technology Resources*, requires contractors to comply with DHS Sensitive System Policy Publication 4300A. This publication and its implementing guidance addresses continuous monitoring requirements. DHS is seeking to be more clear and transparent with contractor requirements by expressly identifying this requirement in proposed clause *Safeguarding of Controlled Unclassified Information*.

The costs associated with continuous monitoring are not fixed and can vary widely. For example, a contractor that has previously gone through DHS's security authorization process is more likely to have in place the hardware, software, and personnel to perform continuous monitoring. In this instance, the costs associated with performing this requirement would be lower than a contractor who does not have preexisting hardware, software, and

personnel in place to satisfy these requirements.

Because of the multiple factors that influence the cost of continuous monitoring, DHS is unable to identify with specificity the costs of implementing this requirement. As such, we sought to identify a range of costs based on the actual data we were able to access. DHS performed the following activities to obtain this data:

- Requested cost information from multiple vendors whose contracts with DHS include similar continuous monitoring requirements; and
- Reviewed internal historical data.

The cost information received from DHS vendors ranged from \$65,000 to \$397,000. Vendors on the lower end of this range already had the hardware and software in place to perform continuous monitoring as the costs proposed only include labor. Alternatively, the vendors on the higher end of this range documented costs associated with hardware, software, and labor. For example, the cost breakdown from the vendor that reported costs of \$397,000 included a one-time equipment fee of \$350,000 and annual labor costs of \$47,000. Alternatively, the vendor that submitted costs of \$65,000 only proposed labor costs and is using preexisting hardware and software to perform continuous monitoring.

A review of internal historical data indicates the cost of continuous monitoring ranges from \$6,000 to \$18,000. It is important to note that the internal historical data assumes the vendor has the appropriate tools to perform continuous monitoring (e.g., the ability to scan their assets) and does not include costs for the labor required to support continuous monitoring activities. It is both anticipated and expected that in many instances contractor costs for continuous monitoring will exceed the costs the Government incurs for the same service as contractor costs include the costs of hardware/software to perform continuous monitoring as well as labor costs to support continuous monitoring activities.

Using the above data points, the equipment costs to perform continuous monitoring can range from \$76,340 to \$350,000 with an average cost of \$213,170. The average cost was developed by averaging the equipment costs received. Alternatively, labor costs to perform continuous monitoring can range from \$47,000 to \$65,000 for an average cost of \$55,674. The average cost was developed by averaging the labor costs received. Please note these ranges and average costs are not absolute as the costs associated with

continuous monitoring vary based on the tools (i.e., hardware or software) and methods (e.g., internal staff, contractor support, new hires) the contractor uses to implement the continuous monitoring requirements. The Government anticipates costs will decline over time as contractors become more sophisticated and build the necessary infrastructure to support this activity. DHS welcomes comments from industry regarding the estimated costs associated with compliance with the requirement to perform continuous monitoring.

Incident Reporting

This proposed rule requires contractors to report known or suspected incidents that involve PII or sensitive PII (SPII) within one hour of discovery and all other incidents (i.e., those incidents impacting any other category of CUI) within eight hours of discovery. DHS specifically included language in the regulatory text stating that an incident shall not, by itself, be interpreted as evidence that the contractor has failed to provide adequate information security safeguards for CUI, or has otherwise failed to meet the requirements of the contract. This language was added because DHS understands that sophisticated cyber-attacks can occur despite compliance with contract requirements.

The cost to prepare and report an incident to DHS varies based on the type(s) of information impacted by the incident and the complexity of the incident. Proposed clause *Safeguarding of Controlled Unclassified Information* requires incidents to be reported to the Component Security Operations Center (SOC), or the DHS Enterprise SOC if the Component SOC is unavailable, in accordance with 4300A Sensitive Systems Handbook Attachment F Incident Response. However, if PII is impacted by the incident, the contractor must provide additional information in its incident report. Also, for incidents that impact multiple systems or multiple components of a system, it may take the contractor more resources (e.g., time) to obtain some of the data points that are required to be provided when reporting an incident.

To determine the cost of preparing and reporting an incident, DHS performed the following activities:

- Requested cost information from multiple vendors whose contracts with DHS include similar incident reporting requirements; and
- Reviewed internal historical data.

It was difficult to use the information submitted by the vendors queried to

establish an estimated cost. The information provided either included both incident reporting and incident response (i.e., investigation and remediation activities) or annual training and testing requirements. Because of this we had to rely on internal historical data to establish an estimate solely responsive to the incident reporting requirements identified in the proposed clause. This data indicates the estimated cost of reporting an incident to DHS ranges between \$500 and \$1,500 per incident. DHS estimates that 822 vendors are subject to the requirements of this proposed rule and that each vendor may report up to one known or suspected incident per year for a total estimated cost range of \$411,000 to \$1,233,000. DHS welcomes comments from industry regarding the estimated costs associated with incident reporting.

Notification and Credit Monitoring

In the event of an incident that impacts PII/SPII, it may be necessary to perform certain incident response activities such as notification and credit monitoring. Contractors should not assume that all incident response activities will take place when a known or suspected incident is reported to DHS as the determination on the appropriate incident response activities is based upon investigation of the known or suspected incident. DHS uses a deliberative process to investigate and determine if an incident has occurred. This process begins with the contractor's submission of an Incident report to the Component or DHS SOC. The SOC staff use the incident report information to investigate and determine if an actual incident occurred. More often than not, an incident has not occurred and further incident response activities are not needed. If the SOC determines that incident has occurred, additional investigation and analyses happen to determine the nature and scope of the incident and US-CERT is engaged as necessary. If the incident involves PII/SPII, the Government will determine if notification and the provision of credit monitoring services is appropriate. DHS believes notification and credit monitoring, when appropriate, will occur more rapidly as the provision of these services is no longer dependent upon any determination of contractor fault or noncompliance.

To determine the cost of notifying individuals, DHS performed the following activities:

- Requested cost information from multiple vendors whose contracts with

DHS include similar notification requirements;

- Reviewed pricing from DHS's department-wide contract for credit monitoring services;
- Reviewed the CBO Cost Estimate for the Personal Data Protection and Breach Accountability Act of 2011;
- Reviewed pricing from the GSA's recently awarded IPS BPAs; and
- Reviewed GSA's Professional Services Schedule, Financial and Business Solutions, Category 520 19 Data Breach Analysis.

The cost information we received from DHS vendors indicates that vendors price these requirements using different methods. One vendor bundled the cost of notification in its continuous monitoring costs while another bundled these costs as with those associated with incident reporting. In these instances we are unable to determine which portion of the costs are associated with the notification requirements. The cost submitted by the one vendor that separately priced this requirement was \$4.06 per person. The pricing for notification in the Department's internal contract for credit monitoring services is significantly lower than the costs proposed by DHS's vendors, *i.e.*, \$1.57 per person.

While the CBO report referenced above did not provide a cost estimate for notification, the following information was provided: "According to industry sources, the sensitive, personally identifiable information of millions of individuals is illegally accessed or otherwise breached every year. However, according to those sources, 46 states already have laws requiring notification in the event of a security breach. In addition, it is the standard practice of most businesses to notify individuals if a security breach occurs. Therefore, CBO estimates that the notification requirements would not impose significant additional costs on businesses."

GSA's IPS BPAs contain bundled fixed unit pricing for services that not only exceed the requirements of proposed clause *Safeguarding of Controlled Unclassified Information* (*i.e.*, dedicated, branded Web site; identity restoration services; and identity theft insurance services) but also includes notification. As such, DHS is unable to determine which portion of the fixed unit price is applicable to notification services. A review of GSA's Professional Services Schedule indicates only two vendors with specific pricing for notification services. This includes the vendor for which DHS has a Department-wide contract for credit monitoring and notification services.

Pricing for the other vendor is \$0.54 per letter plus postage, *i.e.*, \$1.03. Based on this data, the cost of notifying individuals that there has been an incident with their PII ranges from \$1.03 to \$4.60 per person. DHS welcomes comments from industry regarding the estimated costs associated with compliance with the requirement to provide notification services.

Proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors to provide credit monitoring services, including call center services, if directed by the Contracting Officer, to any individual whose PII/SPII was under the control of the contractor, or resided in the information system, at the time of the incident for a period beginning the date of the incident and extending not less than 18 months from the date the individual is notified.

The costs associated with this requirement vary depending on the method the contractor uses to provide services. For example, some contractors choose to satisfy this requirement through cyber insurance while others choose to subcontract these services with credit monitoring service providers. To estimate a cost for credit monitoring services, DHS performed the following activities:

- Requested cost information from multiple vendors whose contracts with DHS include similar credit monitoring requirements;
- Reviewed pricing from DHS's department-wide contract for credit monitoring services;
- Reviewed the CBO Cost Estimate for the Personal Data Protection and Breach Accountability Act of 2011; and
- Reviewed pricing from the General Service Administration's (GSA) recently awarded Identity Protection Services (IPS) blanket purchase agreements (BPAs).

The cost information we received from DHS vendors indicates that vendors satisfy these requirements using different methods. One vendor used cyber insurance while others satisfied this requirements through subcontracts with credit monitoring service providers. In instances where subcontracts are used, the pricing ranged from \$61.71 to \$260 per person. We assume that this variance in cost stems from the vendor's ability to negotiate favorable pricing with its subcontractors. It is also important to note that credit monitoring service providers frequently offer volume discounts that can lower the costs of services. However, all vendors under contracts with DHS may not be able to capitalize on these discounts as the

amount of PII provided to a contractor is based upon the services being provided and can vary greatly from contract to contract.

The pricing in the Department's internal contract for credit monitoring services is significantly lower than the costs proposed by DHS's vendors, *i.e.*, \$1.89 per person. It is important to note that DHS was able to obtain such favorable pricing because the cost of credit monitoring services are paid for everyone that receives notification of the incident without regard to their actual acceptance/request for credit monitoring. According to the CBO report referenced above, "[t]he cost of bulk purchases of the credit-monitoring or reporting services is about \$60 per person according to credit industry professionals."

As it relates to GSA's IPS BPAs, the published price lists do not mirror the credit monitoring provisions of DHS's proposed clause *Safeguarding of Controlled Unclassified Information*. For example, the IPS BPAs contain bundled fixed unit pricing for services that exceed the requirements of the proposed clause (*i.e.*, dedicated, branded Web site; identity restoration services; and identity theft insurance services). Additionally, the pricing includes volume discounts based on the number of individuals receiving services. The prices ranged from \$12.21 (per person per year if 10,000–24,999) to \$38 (per person per year if more than 10,000).

Based on the aforementioned information, DHS believes the most likely costs for these services range between \$60 and \$260 per person. DHS welcomes comments from industry regarding the estimated costs associated with compliance with the requirement to provide credit monitoring. DHS also requests feedback from industry on how many individuals typically sign up for credit monitoring after being notified that an incident has occurred that impacts their PII/SPII?

Certificate of Sanitization

Proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors to return all CUI to DHS and certify and confirm the sanitization of all Government and Government-Activity related files and information. Destruction must conform to the guidelines for media sanitization contained in NIST SP-800-88, Guidelines for Media Sanitization. The contractor is also required to use the template provided in NIST Special Publication 800-88, Guidelines for Media Sanitization, Appendix G when

submitting the Certificate of Sanitization.

NIST SP 800–88 identifies the proper and applicable techniques and controls for sanitization and disposal decisions, considering the security categorization of the associated system's confidentiality. Applicable sanitization methods depend on the media in which the data is stored. Following sanitization, NIST SP 800–88 requires a certificate of media disposition to be completed for each piece of electronic media that has been sanitized. The proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors to certify that applicable media have been sanitized using the template provided in Appendix G of NIST SP 800–88. In short, this template states that a system or hardware has been sanitized of all information. The costs associated with media sanitization do not arise from completion of the template. The costs arise from the sanitization activities themselves. A specific cost cannot be provided as the methods of sanitization vary widely depending on the categorization of the system and the media on which the data is stored. DHS requests comments from industry regarding the estimated costs associated with compliance with the requirement to sanitize Government and Government-Activity-Related files and information.

Oversight and Compliance

As discussed above, the costs associated with oversight and compliance with the requirements contained in proposed clause *Safeguarding of Controlled Unclassified Information* are not easily quantifiable. Implementation costs stem directly from a vendor's pre-existing information security posture. Several vendors, particularly those operating in the IT space, have been complying with these requirements for years. In these instances, the vendors have the existing infrastructure (*i.e.*, hardware, software, and personnel) to implement these requirements and implementation costs are lower. The same is also true for many vendors that provide professional services to the Government and use IT to provide those services. Alternatively, vendors with less experience and capability in this area will incur costs associated with procuring the hardware and software necessary to implement these requirements, as well as the labor costs associated with any new personnel needed to implement and oversee these requirements. Costs will vary depending on the hardware and software selected and the skill set each contractor requires

in its employee(s) responsible for ensuring compliance with these requirements. It is anticipated that these costs will be passed on to the Department, and that over time these vendors will become more sophisticated in this area and costs will decline. It is also important to note that the information security measures proposed in this rulemaking are quite similar to those industry already employs internal to their business operations. However, based on the feedback we received from vendors, the costs associated with FTE oversight of these requirements ranges from \$65,000 to \$324,000. This range is not absolute as it is entirely dependent upon the vendor's approach to oversight, *i.e.*, a single individual, multiple personnel, and the seniority of the position, all of which directly impact costs. Also, it is important to note that requirements of this type are generally not priced as a separate line item and are typically captured in overhead estimates. As such, DHS does not have clear insight into the costs associated with this requirement. DHS welcomes comments from industry regarding the estimated costs associated with ensuring proper oversight and compliance with the requirements of proposed clause *Safeguarding of Controlled Unclassified Information*.

Overview of Benefits

Clear Notification of System Requirements

Feedback from industry has consistently indicated the need for transparency and clear and concise requirements as it relates to information security. The requirements of proposed clause *Safeguarding of Controlled Unclassified Information* is, in part, intended to satisfy this request. Previously information security requirements were either imbedded in a requirements document (*i.e.*, Statement of Work, Statement of Objectives, or Performance Work Statement) or identified through existing HSAR clause 3052.204–70, *Security Requirements for Unclassified Information Technology Requirements*. This approach (1) created inconsistencies in the identification of information security requirements for applicable contracts, (2) required the identification and communication of security controls for which compliance was necessary after contract award had been made, and (3) resulted in delays in contract performance.

Proposed clause *Safeguarding of Controlled Unclassified Information* substantially mitigates the concerns with DHS's previous approach. Through the Government provided Requirements

Traceability to Matrix (RTM) contractors will know at the solicitation level the security requirements for which they must comply. The RTM identifies the security controls that must be implemented on an information system that collects, processes, stores, or transmits CUI and is necessary for the contractor to prepare its security authorization package. Clear identification of these requirements at the solicitation level affords contractors the ability to (1) assess their qualifications and ability to fully meet the Government's requirements, (2) make informed business decisions when deciding to compete on Government requirements, and (3) engage subcontractors, if needed, early in the process to enable them the ability to be fully responsive to the Government's requirements. Similarly, the Government benefits from clear identification of its requirements. Presumably, proposals/quotations will be submitted by contractors fully qualified and able to meet the requirements of the effort. During the evaluation phase of a procurement, the Government will be able to assess a contractor's information security posture and ability to comply with the requirements of the RTM. Such an evaluation should reduce post-award delays in contractor performance and mitigate the need to reissue solicitations as a result of a contractor's inability to comply with mandatory security requirements.

Improved Notification to the Public Regarding Data Breaches

Proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors to have in place procedures and the capability to notify any individual whose PII) and/or SPII was under the control of the contractor or resided in the information system at the time of an incident no later than 5 business days after being directed to notify individuals, unless otherwise approved by the contracting officer. Such a requirement is consistent with OMB Memorandum M–07–16, *Safeguarding Against and Responding to the Breach of Personally Identifiable Information*, which states that agencies have the responsibility to notify individuals whose PII or SPII may have been compromised without unreasonable delay. In the past, this notification has often been delayed while detailed forensic analysis and contract compliance inspections are occurring. Under this new provision, notification and credit monitoring, when appropriate, will occur more rapidly as it is not dependent upon any

determination of contractor fault or noncompliance.

The content and method of any notification sent by a contractor must be coordinated with and approved by the contracting officer. At a minimum, this notification must include: A brief description of the incident; a description of the types of PII or SPII involved; a statement as to whether the PII or SPII was encrypted or protected by other means; steps individuals may take to protect themselves; what the contractor and/or the Government are doing to investigate the incident, to mitigate the incident, and to protect against any future incidents; and information identifying who individuals may contact for additional information. Such notification is consistent with the "openness principle" of the Privacy Act which calls for agencies to inform individuals about how their information is being accessed and used, and may help individuals mitigate the potential harms resulting from an incident.

Provision of Credit Protection to Impacted Individuals

Proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors to provide credit monitoring services, including call center services to any individual whose PII or SPII was under the control of the contractor, or resided in the information system, at the time of the incident for a period beginning on the date of the incident and extending not less than 18 months from the date the individual is notified when directed by the contracting officer. Credit monitoring services can be particularly beneficial to the affected public as they can assist individuals in the early detection of identity theft as well as notify individuals of changes that appear in their credit report, such as creation of new accounts, changes to their existing accounts or personal information, or new inquiries for credit. Such notification affords individuals the opportunity to take steps to minimize any harm associated with unauthorized or fraudulent activity.

Incident Reporting

Proposed clause *Safeguarding of Controlled Unclassified Information* requires contractors and subcontractors to report all known or suspected incidents to the Component SOC. If the Component SOC is not available, the report shall be made to the DHS Enterprise SOC. While such a requirement is not new for DHS, compliance with this requirement is critical. The mission of DHS is unique in that we, through the National

Protection and Programs Directorate's Office of Cybersecurity and Communications, are also responsible for the identification and sharing of cyber threat indicators. These cyber threat indicators and defensive measures are shared among federal and non-federal entities consistent with the need to protect information systems from cybersecurity threats, mitigate cybersecurity threats, and comply with any other applicable provisions of law authorized by the Cybersecurity Information Sharing Act of 2015. Because of this mission requirement, DHS is not only concerned with actors who are successful in breaching our defenses, we are also concerned with attempts to breach those defenses. Knowledge of these attempts enables us to perform any necessary investigations and determine/establish new procedures to strengthen our defenses and prevent them from becoming successful. This information is then in turn shared with the interagency and non-Federal entities to enable them to take the necessary measures to be able to defend against similar attacks.

Improved Incident Response Time

Previously contractors were not consistently provided with specific incident reporting timelines. As such, the timeliness of incident reporting was determined by the contractor. Standardizing incident reporting timelines through proposed clause *Safeguarding of Controlled Unclassified Information* ensures timely incident reporting. Timely reporting of incidents is critical to prevent the impact of the incident from expanding, ensure incident response and mitigation activities are undertaken quickly, and ensure individuals are timely notified of the possible or actual compromise of their personally identifiable information and offered credit monitoring services when applicable.

IV. Regulatory Flexibility Act

DHS expects this proposed rule may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* Therefore, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared consistent with 5 U.S.C. 603, and is summarized as follows:

1. Description of the Reasons Why Action by the Agency Is Being Considered

Cybersecurity has been identified as one of the most serious economic and national security challenges our nation faces. The frequency of cyber-attacks,

including attempts to gain unauthorized access to CUI collected or maintained by or on behalf of an agency and information systems that collect, process, store, or transmit such information, has prompted the Government to expand its cybersecurity efforts across the Federal landscape. Part of the DHS mission is to protect the nation's cybersecurity and to coordinate responses to cyber-attacks and security vulnerabilities. As part of that mission, DHS is proposing to amend the HSAR to expand its current security measures for safeguarding CUI to include additional requirements for the safeguarding of CUI that is accessed by contractors, collected or maintained by contractors on behalf of the agency, and Federal information systems, which includes contractor information systems operating on behalf of the Government, that collect, process, store or transmit CUI. These proposed revisions to the HSAR are necessary to ensure the integrity, confidentiality, and availability of CUI.

2. Succinct Statement of the Objectives of, and Legal Basis for, the Rule

The objective of this rule is to expand on existing Departmental IT security requirements. These existing IT security requirements are provided in the clause at HSAR 3052.204–70, Security Requirements for Unclassified Information Technology Resources, and applicable DHS policy and guidance. The existing clause is more narrowly focused on information systems connected to a DHS network or operated by a contractor for DHS. This rule proposes to remove the existing clause and provide a new expanded clause. Unlike the existing clause, this proposed rule extends the scope to require that CUI be safeguarded wherever such information resides, including government-owned and operated information systems, government-owned and contractor operated information systems, contractor-owned and/or operated information systems operating on behalf of the Government, and any situation where contractor and/or subcontractor employees may have access to CUI consistent with the requirements of FISMA. This proposed rule also establishes uniform incident reporting and response activities that contractors and subcontractors must comply with in the event of an incident. The proposed rule also requires contractors and subcontractors have in place procedures and the capability to notify and provide credit monitoring services to any individual whose Personally Identifiable Information (PII) or

Sensitive PII (SPII) was under the control of the contractor, or resided in the information system, at the time of the incident. Additionally, this proposed rule requires contractors and subcontractors to certify and confirm the sanitization of Government and Government-Activity related files and information. These collective measures will help DHS mitigate information security risks related to information as well as gather information for future improvements in information security policy.

The requirement to safeguard CUI is specified in the Federal Information Security Modernization Act of 2014 (44 U.S.C. 3551, *et seq.*), OMB Circular A–130, *Managing Information as a Strategic Resource*, relevant National Institutes of Standards and Technology (NIST) guidance, Executive Order 13556, *Controlled Unclassified Information* and its implementing regulation at 32 CFR part 2002, and various OMB Memoranda, to include: M–07–16, *Safeguarding Against and Responding to the Breach of Personally Identifiable Information*; M–14–03, *Enhancing the Security of Federal Information and Information Systems*; and Reporting Instructions for the Federal Information Security Management Act and Agency Privacy Management and Guidance on Federal Information Security and Privacy Management Requirements as identified in various OMB Memoranda.

3. Description of and, Where Feasible, Estimate of the Number of Small Entities To Which the Rule Will Apply

This rule will apply to DHS contractors that require access to CUI, collect or maintain CUI on behalf of the Government, or operate Federal information systems, which includes contractor information systems operating on behalf of the agency, that collect, process, store or transmit CUI.

For Fiscal Year (FY) 2014, DHS awarded nearly 13,000 new contract awards to large and small businesses, with over 35 percent of all contracts awarded to small businesses. The estimate of the number of small entities to which the proposed rule will apply was established by reviewing FPDS data for FY 2014, internal DHS contract data, experience with similar safeguarding requirements used in certain DHS contracts, and the most likely applicable Product and Service Codes (PSCs). The data review identified 2,525 unique vendors were awarded contracts under the most likely applicable PSCs in FY 2014, including small and large businesses. However, not all contractors awarded contracts under the most likely

applicable PSCs will be subject to proposed clause *Safeguarding of Controlled Unclassified Information*. A number of factors determine the applicability of the proposed clause and would require analysis on a case-by-case basis. Further, the proposed clause is separated by those entities that are granted access to CUI but information systems will not be operated on behalf of the agency to collect, process, store or transmit CUI, and those that are required to meet the Authority to Operate (ATO) requirements because information systems will be used to collect, process, store or transmit CUI on behalf of the agency. Based on the data reviewed, the estimated number of annual respondents subject to the *Safeguarding of Controlled Unclassified Information* clause is estimated at 822 respondents. The proposed revision to the HSAR includes a flow-down provision that applies to subcontractors. However, DHS does not believe this requirement will add to the estimated number of respondents when an ATO is required because it is anticipated that a single information system will be used to collect, process, store, or transmit CUI in most instances. A review of DHS historical data shows that at least 35 percent of new contracts are awarded to small businesses. Therefore, it is assumed that 35 percent of the projected annual number of respondents will also be small businesses, or approximately 288 respondents.

Although the proposed HSAR clause is new, DHS contractors are currently required to comply with Departmental IT security policy and guidance. It is assumed that the average DHS IT services contractor covered by this clause will have high operational security readiness posture. However, the requirements of the proposed clause have been expanded to include professional services contractors that have access to CUI, collect or maintain CUI on behalf of the Government, and/or operate Federal information systems, including contractor information systems operating on behalf of the agency, that collect, process, store or transmit CUI to perform the requirements of their contract(s). While these contractors may not have the same operational security readiness posture of the average DHS IT services contractor, the expansion and implementation of these safeguarding requirements is necessary to further reduce risks and potential vulnerabilities.

4. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Rule, Including an Estimate of the Classes of Small Entities Which Will be Subject to the Requirement and the Type of Professional Skills Necessary

Reporting and recordkeeping requirements include those requirements necessary to ensure adequate security controls are in place when contractor and/or subcontractor employees will have access to sensitive CUI, collect or maintain CUI on behalf of the Government, and/or operate Federal information systems, which includes contractor information systems operating on behalf of the agency, that are used to collect, process, store, or transmit CUI. The reporting and recordkeeping requirements vary depending on if an Authority to Operate (ATO) is required. If an ATO is not required, the reporting and recordkeeping requirements include: Incident Reporting, Notification (if the incident involves PII/SPII), Credit Monitoring (if the incident involves PII/SPII), and Certification of Sanitization. If an ATO is required, the reporting and recordkeeping requirements include: Incident Reporting, Notification (if the incident involves PII/SPII), Credit Monitoring (if the incident involves PII/SPII), Certification of Sanitization, Security Authorization Package, Independent Assessment, Renewal of ATO, and Federal Reporting and Continuous Monitoring.

Typical contract awards that may include the requirement for access to CUI include contracts awards with a PSC of “D” Automatic Data Processing and Telecommunication and “R” Professional, Administrative and Management Support. However, this is not an all-inclusive list. Additional PSCs will be added and projections will be adjusted as additional data becomes available through HSAR clause implementation. This continued process will assist in validating future projections. It is estimated that the average contractor will utilize a mid-level manager with IT expertise to ensure compliance with the requirements of this rule.

5. Identification, to the Extent Practicable, of All Relevant Federal Rules Which May Duplicate, Overlap, or Conflict With the Rule

There are no rules that duplicate, overlap or conflict with this rule.

6. Description of Any Significant Alternatives to the Rule Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize any Significant Economic Impact of the Rule on Small Entities

No significant alternatives were identified that would accomplish the stated objectives of the rule. The information security requirements associated with this rule are not geared towards a type of contractor; the requirements are based on the sensitivity of the information, the impact on the program, the Government and security in the event CUI is breached. That standard would not vary based on the size of the entity.

DHS will be submitting a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the point of contact specified herein. DHS invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DHS will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610, *et seq.* (HSAR Case 2015–001), in correspondence.

V. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies. The proposed rule contains information collection requirements. Accordingly, DHS will be submitting a request for approval of a new information collection requirement concerning this rule to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

The collection requirements for this rule are based on a new HSAR clause, 3052.204–7X *Safeguarding of Controlled Unclassified Information*.

A. The average public reporting burden for this collection of information is estimated to be approximately 50 hours per response to comply with the requirements, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. This average is based on an estimated 36 hours per response to comply with the requirements when an ATO *is not* required an estimated 120 hours to comply with the requirements when an ATO *is* required (*i.e.*, when a contractor is required to submit Security Authorization (SA) package). Security Authorization package consists of the

following: Security Plan, Security Assessment Report, Plan of Action and Milestones, Security Control Assessor Transmittal Letter (documents the Security Control Assessor's recommendation (*i.e.*, Authorization to Operate or Denial to Operate), and any supplemental information requested by the Government (*e.g.*, Contingency Plan, final Risk Assessment, Configuration Management Plan, Standard Operating Procedures, Concept of Operations). Additional requirements include an Independent Assessment, Security Review, Renewal of the ATO which is required every three years, and Federal Reporting and Continuous Monitoring Requirements.

The total annual projected number of responses per respondent is estimated at 1. Based on aforementioned information the annual total burden hours are estimated as follows:

Title: Homeland Security Acquisition Regulation: Safeguarding of Controlled Unclassified Information.

Type of Request: New Collection.

Total Number of Respondents: 822.

Responses per Respondent: 1.

Annual Responses: 822.

Average Burden per Response: Approximately 50.

Annual Burden Hours: Approximately 41,100.

Needs and Uses: DHS needs the information required by 3052.204–7X to implement the requirements for safeguarding against unauthorized contractor disclosure and inappropriate use of CUI that contractors and subcontractors may have access to during the course of contract performance.

Affected Public: Businesses or other for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On occasion.

B. Request for Comments Regarding Paperwork Burden.

You may submit comments identified by DHS docket number [DHS–2017–0006], including suggestions for reducing this burden, not later than [insert date 60 days after publication in the **Federal Register**] using any one of the following methods:

(1) Via the internet at Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

(2) Via email to the Department of Homeland Security, Office of the Chief Procurement Officer, at HSAR@hq.dhs.gov.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the HSAR,

and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Requesters may obtain a copy of the supporting statement from the Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, via email to HSAR@hq.dhs.gov. Please cite OMB Control No. 1600–0023, Safeguarding of Controlled Unclassified Information, in all correspondence.

List of Subjects in 48 CFR Parts 3001, 3002, 3004 and 3052

Government procurement.

Therefore, DHS proposes to amend 48 CFR parts 3001, 3002, 3004 and 3052 as follows:

■ 1. The authority citation for 48 CFR parts 3001, 3002, 3004 and 3052 is revised to read as follows:

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 1303(a)(2), 48 CFR part 1, subpart 1.3, and DHS Delegation Number 0702.

PART 3001—FEDERAL ACQUISITION REGULATIONS SYSTEM

■ 2. In section 3001.106 amend paragraph (a) by adding a new OMB Control Number as follows:

3001.106 OMB Approval under the Paperwork Reduction Act.

(a) * * *

OMB Control No. 1600–0023 (Safeguarding of Controlled Unclassified Information)

* * * * *

PART 3002—DEFINITIONS OF WORDS AND TERMS

3002.101 [Amended]

■ 3. Amend section 3002.101 by adding, in alphabetical order, the definitions of “Adequate Security,” “Controlled Unclassified Information (CUI),” “Federal Information,” “Federal Information System,” “Handling,” “Information Resources,” “Information Security,” and “Information System” to read as follows:

“Adequate Security” means security protections commensurate with the risk resulting from the unauthorized access, use, disclosure, disruption,

modification, or destruction of information. This includes ensuring that information hosted on behalf of an agency and information systems and applications used by the agency operate effectively and provide appropriate confidentiality, integrity, and availability protections through the application of cost-effective security controls.

* * * * *

“Controlled Unclassified Information (CUI)” is any information the Government creates or possesses, or an entity creates or possesses for or on behalf of the Government (other than classified information) that a law, regulation, or Government-wide policy requires or permits an agency to handle using safeguarding or dissemination controls. Within the context of DHS, this includes such information which, if lost, misused, disclosed, or, without authorization is accessed, or modified, could adversely affect the national or homeland security interest, the conduct of Federal programs, or the privacy of individuals. This definition includes the following CUI categories and subcategories of information:

(1) Chemical-terrorism Vulnerability Information (CVI) as defined in Title 6, Code of Federal Regulations, part 27 “Chemical Facility Anti-Terrorism Standards,” and as further described in supplementary guidance issued by an authorized official of the Department of Homeland Security (including the Revised Procedural Manual “Safeguarding Information Designated as Chemical-Terrorism Vulnerability Information” dated September 2008);

(2) Protected Critical Infrastructure Information (PCII) as set out in the Critical Infrastructure Information Act of 2002 (Title II, Subtitle B, of the Homeland Security Act, Public Law 107–296, 196 Stat. 2135), as amended, the implementing regulations thereto (Title 6, Code of Federal Regulations, part 29) as amended, the applicable PCII Procedures Manual, as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the PCII Program Manager or his/her designee);

(3) Sensitive Security Information (SSI) as defined in Title 49, Code of Federal Regulations, part 1520, “Protection of Sensitive Security Information,” as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the Assistant Secretary for the Transportation Security Administration or his/her designee) to

include DHS MD 11056.1, “Sensitive Security Information (SSI)” and, within the Transportation Security Administration, TSA MD 2010.1, “SSI Program”;

(4) Homeland Security Agreement Information means information DHS receives pursuant to an agreement with state, local, tribal, territorial, and private sector partners that is required to be protected by that agreement. DHS receives this information in furtherance of the missions of the Department, including, but not limited to, support of the Fusion Center Initiative and activities for cyber information sharing consistent with the Cybersecurity Information Security Act;

(5) Homeland Security Enforcement Information means unclassified information of a sensitive nature lawfully created, possessed, or transmitted by the Department of Homeland Security in furtherance of its immigration, customs, and other civil and criminal enforcement missions, the unauthorized disclosure of which could adversely impact the mission of the Department;

(6) International Agreement Information means information DHS receives pursuant to an information sharing agreement or arrangement, with a foreign government, an international organization of governments or any element thereof, an international or foreign public or judicial body, or an international or foreign private or non-governmental organization, that is required by that agreement or arrangement to be protected;

(7) Information Systems Vulnerability Information (ISVI) means:

(i) DHS information technology (IT) internal systems data revealing infrastructure used for servers, desktops, and networks; applications name, version and release; switching, router, and gateway information; interconnections and access methods; mission or business use/need. Examples of information are systems inventories and enterprise architecture models. Information pertaining to national security systems and eligible for classification under Executive Order 13526, will be classified as appropriate;

(ii) Information regarding developing or current technology, the release of which could hinder the objectives of DHS, compromise a technological advantage or countermeasure, cause a denial of service, or provide an adversary with sufficient information to clone, counterfeit, or circumvent a process or system;

(8) Operations Security Information means information that could constitute an indicator of U.S. Government

intentions, capabilities, operations, or activities or otherwise threaten operations security;

(9) Personnel Security Information means information that could result in physical risk to DHS personnel or other individuals that DHS is responsible for protecting;

(10) Physical Security Information means reviews or reports illustrating or disclosing facility infrastructure or security vulnerabilities related to the protection of Federal buildings, grounds, or property. For example, threat assessments, system security plans, contingency plans, risk management plans, business impact analysis studies, and certification and accreditation documentation;

(11) Privacy Information, which includes information referred to as Personally Identifiable Information. Personally Identifiable Information (PII) means information that can be used to distinguish or trace an individual's identity, either alone or when combined with other information that is linked or linkable to a specific individual; and

(12) Sensitive Personally Identifiable Information (SPII) is a subset of PII, which if lost, compromised or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. Some forms of PII are sensitive as stand-alone elements.

(i) Examples of stand-alone PII include: Social Security numbers (SSN), driver's license or state identification number, Alien Registration Numbers (A-number), financial account number, and biometric identifiers such as fingerprint, voiceprint, or iris scan.

(ii) Additional examples of SPII include any groupings of information that contain an individual's name or other unique identifier plus one or more of the following elements:

(A) Truncated SSN (such as last 4 digits)

(B) Date of birth (month, day, and year)

(C) Citizenship or immigration status

(D) Ethnic or religious affiliation

(E) Sexual orientation

(F) Criminal history

(G) Medical information

(H) System authentication

information such as mother's maiden name, account passwords or personal identification numbers (PIN)

(iii) Other PII may be “sensitive” depending on its context, such as a list of employees and their performance ratings or an unlisted home address or phone number. In contrast, a business card or public telephone directory of agency employees contains PII but is not sensitive.

“Federal Information” means information created, collected, processed, maintained, disseminated, disclosed, or disposed of by or for the Federal Government, in any medium or form.

“Federal Information System” means an information system used or operated by an agency or by a contractor of an agency or by another organization on behalf of an agency.

“Handling” means any use of controlled unclassified information, including but not limited to marking, safeguarding, transporting, disseminating, re-using, and disposing of the information.

* * * * *

“Information Resources” means information and related resources, such as personnel, equipment, funds, and information technology.

“Information Security” means protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction in order to provide—

(1) integrity, which means guarding against improper information modification or destruction, and includes ensuring information nonrepudiation and authenticity;

(2) confidentiality, which means preserving authorized restrictions on access and disclosure, including means for protecting personal privacy and proprietary information; and

(3) availability, which means ensuring timely and reliable access to and use of information.

“Information System” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information.

* * * * *

PART 3004—ADMINISTRATIVE MATTERS

■ 4. Revise subpart 3004.4 to read as follows:

Subpart 3004.4—Safeguarding Classified and Controlled Unclassified Information within Industry

3004.470 Security requirements for access to unclassified facilities, information resources, and controlled unclassified information.

- 3004.470–1 Scope.
- 3004.470–2 Definitions.
- 3004.470–3 Policy.
- 3004.470–4 Contract Clauses.

3004.470–1 Scope.

This section implements DHS policies for assuring adequate security of

unclassified facilities, information resources, and controlled unclassified information (CUI) during the acquisition lifecycle.

3004.470–2 Definitions.

As used in this subpart—
“Incident” means an occurrence that—

- (1) actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information or an information system; or
- (2) constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies.

3004.470–3 Policy.

(a) DHS requires that CUI be safeguarded wherever such information resides. This includes government-owned and operated information systems, government-owned and contractor operated information systems, contractor-owned and/or operated information systems operating on behalf of the agency, and any situation where contractor and/or subcontractor employees may have access to CUI. There are several Department policies and procedures (accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>) which also address the safeguarding of CUI. Compliance with these policies and procedures, as amended, is required.

(b) DHS requires contractor employees that require recurring access to Government facilities or access to CUI to complete such forms as may be necessary for security or other reasons, including the conduct of background investigations to determine fitness. Department policies and procedures that address contractor employee fitness are contained in Instruction Handbook Number 121–01–007, The Department of Homeland Security Personnel Suitability and Security Program. Compliance with these policies and procedures, as amended, is required.

3004.470–4 Contract Clauses.

(a) Contracting officers shall insert the basic clause at (HSAR) 48 CFR 3052.204–71, Contractor Employee Access, in solicitations and contracts when contractor and/or subcontractor employees require recurring access to Government facilities or access to CUI. Contracting officers shall insert the basic clause with its Alternate I for acquisitions requiring contractor access to Government information resources. For acquisitions in which contractor and/or subcontractor employees will not

have access to Government information resources, but the Department has determined contractor and/or subcontractor employee access to CUI or Government facilities must be limited to U.S. citizens and lawful permanent residents, the contracting officer shall insert the clause with its Alternate II. Neither the basic clause nor its alternates shall be used unless contractor and/or subcontractor employees will require recurring access to Government facilities or access to CUI. Neither the basic clause nor its alternates should ordinarily be used in contracts with educational institutions.

(b) Contracting officers shall insert the clause at (HSAR) 48 CFR 3052.204–7X, Safeguarding of Controlled Unclassified Information, in solicitations and contracts where:

- (1) Contractor and/or subcontractor employees will have access to CUI;
- (2) CUI will be collected or maintained on behalf of the agency; or
- (3) Federal information systems, which include contractor information systems operated on behalf of the agency, are used to collect, process, store, or transmit CUI.

(c) If the clauses prescribed in subsections (a) and/or (b) are included in a prime contract, the prime contractor shall include the clauses in subsections (a) and/or (b), in its contract(s) with subcontractors. If a subcontract includes the clauses prescribed in subsections (a) and/or (b) and the subcontractor has contracts with lower-tier subcontractors, the lower-tier subcontracts shall include the clauses in subsections (a) and/or (b).

PART 3052—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3052.204–70 [Removed and Reserved].

■ 5. Remove and reserve section 3052.204–70.

■ 6. Add section 3052.204–7X to read as follows:

3052.204–7X Safeguarding of Controlled Unclassified Information.

As prescribed in (HSAR) 48 CFR 3004.470–4(b), insert the following clause:

Safeguarding of Controlled Unclassified Information (DATE)

(a) *Definitions.* As used in this clause—
“Adequate Security” means security protections commensurate with the risk resulting from the unauthorized access, use, disclosure, disruption, modification, or destruction of information. This includes ensuring that information hosted on behalf of an agency and information systems and applications used by the agency operate effectively and provide appropriate

confidentiality, integrity, and availability protections through the application of cost-effective security controls.

“Controlled Unclassified Information (CUI)” is any information the Government creates or possesses, or an entity creates or possesses for or on behalf of the Government (other than classified information) that a law, regulation, or Government-wide policy requires or permits an agency to handle using safeguarding or dissemination controls. Within the context of DHS, this includes such information which, if lost, misused, disclosed, or, without authorization is accessed, or modified, could adversely affect the national or homeland security interest, the conduct of Federal programs, or the privacy of individuals. This definition includes the following CUI categories and subcategories of information:

(i) Chemical-terrorism Vulnerability Information (CVI) as defined in Title 6, Code of Federal Regulations, part 27 “Chemical Facility Anti-Terrorism Standards,” and as further described in supplementary guidance issued by an authorized official of the Department of Homeland Security (including the Revised Procedural Manual “Safeguarding Information Designated as Chemical-Terrorism Vulnerability Information” dated September 2008);

(ii) Protected Critical Infrastructure Information (PCII) as set out in the Critical Infrastructure Information Act of 2002 (Title II, Subtitle B, of the Homeland Security Act, Public Law 107–296, 196 Stat. 2135), as amended, the implementing regulations thereto (Title 6, Code of Federal Regulations, part 29) as amended, the applicable PCII Procedures Manual, as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the PCII Program Manager or his/her designee);

(iii) Sensitive Security Information (SSI) as defined in Title 49, Code of Federal Regulations, part 1520, “Protection of Sensitive Security Information,” as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the Assistant Secretary for the Transportation Security Administration or his/her designee) to include DHS MD 11056.1, “Sensitive Security Information (SSI)” and, within the Transportation Security Administration, TSA MD 2010.1, “SSI Program”;

(iv) Homeland Security Agreement Information means information DHS receives pursuant to an agreement with state, local, tribal, territorial, and private sector partners that is required to be protected by that agreement. DHS receives this information in furtherance of the missions of the Department, including, but not limited to, support of the Fusion Center Initiative and activities for cyber information sharing consistent with the Cybersecurity Information Security Act;

(v) Homeland Security Enforcement Information means unclassified information of a sensitive nature lawfully created, possessed, or transmitted by the Department of Homeland Security in furtherance of its

immigration, customs, and other civil and criminal enforcement missions, the unauthorized disclosure of which could adversely impact the mission of the Department;

(vi) International Agreement Information means information DHS receives pursuant to an information sharing agreement or arrangement with a foreign government, an international organization of governments or any element thereof, an international or foreign public or judicial body, or an international or foreign private or non-governmental organization, that is required by that agreement or arrangement to be protected;

(vii) Information Systems Vulnerability Information (ISVI) means:

(A) DHS information technology (IT) internal systems data revealing infrastructure used for servers, desktops, and networks; applications name, version and release; switching, router, and gateway information; interconnections and access methods; mission or business use/need. Examples of information are systems inventories and enterprise architecture models. Information pertaining to national security systems and eligible for classification under Executive Order 13526, will be classified as appropriate;

(B) Information regarding developing or current technology, the release of which could hinder the objectives of DHS, compromise a technological advantage or countermeasure, cause a denial of service, or provide an adversary with sufficient information to clone, counterfeit, or circumvent a process or system;

(viii) Operations Security Information means information that could constitute an indicator of U.S. Government intentions, capabilities, operations, or activities or otherwise threaten operations security;

(ix) Personnel Security Information means information that could result in physical risk to DHS personnel or other individuals that DHS is responsible for protecting;

(x) Physical Security Information means reviews or reports illustrating or disclosing facility infrastructure or security vulnerabilities related to the protection of Federal buildings, grounds, or property. For example, threat assessments, system security plans, contingency plans, risk management plans, business impact analysis studies, and certification and accreditation documentation;

(xi) Privacy Information, which includes information referred to as Personally Identifiable Information (PII). PII means information that can be used to distinguish or trace an individual's identity, either alone, or when combined with other information that is linked or linkable to a specific individual; and

(xii) Sensitive Personally Identifiable Information (SPII) is a subset of PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. Some forms of PII are sensitive as stand-alone elements.

(A) Examples of stand-alone SPII include: Social Security numbers (SSN), driver's license or state identification number, Alien

Registration Numbers (A-number), financial account number, and biometric identifiers such as fingerprint, voiceprint, or iris scan.

(B) Additional examples of SPII include any groupings of information that contain an individual's name or other unique identifier plus one or more of the following elements:

- (1) Truncated SSN (such as last 4 digits)
- (2) Date of birth (month, day, and year)
- (3) Citizenship or immigration status
- (4) Ethnic or religious affiliation
- (5) Sexual orientation
- (6) Criminal history
- (7) Medical information
- (8) System authentication information such as mother's maiden name, account passwords or personal identification numbers (PIN)

(C) Other PII may be SPII depending on its context, such as a list of employees and their performance ratings or an unlisted home address or phone number. In contrast, a business card or public telephone directory of agency employees contains PII but is not SPII.

“Federal information” means information created, collected, processed, maintained, disseminated, disclosed, or disposed of by or for the Federal Government, in any medium or form.

“Federal information system” means an information system used or operated by an agency or by a contractor of an agency or by another organization on behalf of an agency.

“Handling” means any use of controlled unclassified information, including but not limited to marking, safeguarding, transporting, disseminating, re-using, storing, capturing, and disposing of the information.

“Incident” means an occurrence that—

(i) actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information or an information system; or

(ii) constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies.

“Information Resources” means information and related resources, such as personnel, equipment, funds, and information technology.

“Information Security” means protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction in order to provide—

(i) integrity, which means guarding against improper information modification or destruction, and includes ensuring information nonrepudiation and authenticity;

(ii) confidentiality, which means preserving authorized restrictions on access and disclosure, including means for protecting personal privacy and proprietary information; and

(iii) availability, which means ensuring timely and reliable access to and use of information.

“Information System” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information.

(b) *Handling of Controlled Unclassified Information.*

(1) Contractors and subcontractors must provide adequate security to protect CUI

from unauthorized access and disclosure. Adequate security includes compliance with DHS policies and procedures in effect at the time of contract award. These policies and procedures are accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>.

(2) The Contractor shall not use or redistribute any CUI handled, collected, processed, stored, or transmitted by the Contractor except as specified in the contract.

(3) The Contractor shall not maintain SPII in its invoicing, billing, and other recordkeeping systems maintained to support financial or other administrative functions. It is acceptable to maintain in these systems the names, titles and contact information for the Contracting Officer's Representative (COR) or other Government personnel associated with the administration of the contract, as needed.

(4) Any Government data provided, developed, obtained under the contract, or otherwise under the control of the contractor, shall not become part of the bankruptcy estate in the event a contractor and/or subcontractor enters into bankruptcy proceedings.

(c) *Authority to Operate*. This subsection is applicable only to Federal information systems, which includes contractor information systems operating on behalf of the agency. The Contractor shall not collect, process, store or transmit CUI within a Federal information system until an Authority to Operate (ATO) has been accepted and signed by the Component or Headquarters CIO, or designee. Once the ATO has been accepted and signed by the Government, the Contracting Officer shall incorporate the ATO into the contract as a compliance document. Unless otherwise specified in the ATO letter, the ATO is valid for three (3) years. An ATO is granted at the sole discretion of the Government and can be revoked at any time. Contractor receipt of an ATO does not create any contractual right of access or entitlement. The Government's acceptance of the ATO does not alleviate the Contractor's responsibility to ensure the information system controls are implemented and operating effectively.

(1) *Complete the Security Authorization process*. The Security Authorization (SA) process shall proceed according to *DHS Sensitive Systems Policy Directive 4300A* (Version 12.0, September 25, 2015), or any successor publication; *DHS 4300A Sensitive Systems Handbook* (Version 12.0, November 15, 2015), or any successor publication; and the *Security Authorization Process Guide* including templates. These policies and templates are accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>.

(i) *Security Authorization Package*. SA package shall be developed using the Government provided Requirements Traceability Matrix and SA templates. SA package consists of the following: Security Plan, Contingency Plan, Contingency Plan Test Results, Configuration Management Plan, Security Assessment Plan, Security Assessment Report, and Authorization to Operate Letter. Additional documents that may be required include a Plan(s) of Action and Milestones and Interconnection Security

Agreement(s). The Contractor shall submit a signed copy of the SA package, validated by an independent third party, to the COR for acceptance by the Headquarters or Component CIO, or designee, at least thirty (30) days prior to the date of operation of the information system. The Government is the final authority on the compliance of the SA package and may limit the number of resubmissions of modified documents.

(ii) *Independent Assessment*. Contractors shall have an independent third party validate the security and privacy controls in place for the information system(s). The independent third party shall review and analyze the SA package, and report on technical, operational, and management level deficiencies as outlined in *NIST Special Publication 800-53 Security and Privacy Controls for Federal Information Systems and Organizations* accessible at <http://csrc.nist.gov/publications/PubsSPs.html>. The Contractor shall address all deficiencies before submitting the SA package to the COR for acceptance.

(2) *Renewal of ATO*. Unless otherwise specified in the ATO letter, the ATO shall be renewed every three (3) years. The Contractor is required to update its SA package as part of the ATO renewal process for review and verification of security controls. Review and verification of security controls is independent of the system production date and may include onsite visits that involve physical or logical inspection of the Contractor environment to ensure controls are in place. The updated SA package shall be submitted for acceptance by the Headquarters or Component CIO, or designee, at least 90 days before the ATO expiration date. The Contractor shall update its SA package by one of the following methods:

(i) Updating the SA package in the DHS Information Assurance Compliance System; or

(ii) Submitting the updated SA package directly to the COR.

(3) *Security Review*. The Government may elect to conduct random periodic reviews to ensure that the security requirements contained in this contract are being implemented and enforced. The Government, at its sole discretion, may obtain the assistance from other Federal agencies and/or third-party firms to aid in security review activities. The Contractor shall afford access to DHS, the Office of the Inspector General, other Government organizations, and contractors working in support of the Government access to the Contractor's facilities, installations, operations, documentation, databases, networks, systems, and personnel used in the performance of this contract. The Contractor shall, through the Contracting Officer and COR, contact the Headquarters or Component CIO, or designee, to coordinate and participate in review and inspection activity by Government organizations external to the DHS. Access shall be provided, to the extent necessary as determined by the Government (including providing all requested images), for the Government to carry out a program of inspection, investigation, and audit to safeguard against threats and hazards to the

integrity, availability and confidentiality of Government data or the function of computer systems used in performance of this contract and to preserve evidence of computer crime.

(4) *Federal Reporting and Continuous Monitoring Requirements*. Contractors operating information systems on behalf of the Government shall comply with Federal reporting and information system continuous monitoring requirements. Reporting requirements are determined by the Government and are defined in the Fiscal Year 2015 DHS Information Security Performance Plan, or successor publication, accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. The plan is updated on an annual basis. Annual, quarterly, and monthly data collection will be coordinated by the Government. The Contractor shall provide the Government with all information to fully satisfy Federal reporting requirements for information systems. The Contractor shall provide the COR with requested information within three (3) business days of receipt of the request. Unless otherwise specified in the contract, monthly continuous monitoring data shall be stored at the Contractor's location for a period not less than one year from the date the data is created. The Government may elect to perform information system continuous monitoring and IT security scanning of information systems from Government tools and infrastructure.

(d) *Incident Reporting Requirements*.

(1) All known or suspected incidents shall be reported to the Component Security Operations Center (SOC) in accordance with *4300A Sensitive Systems Handbook Attachment F Incident Response*. If the Component SOC is not available, the Contractor shall report to the DHS Enterprise SOC. Contact information for the DHS Enterprise SOC is accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. The Contractor shall also notify the Contracting Officer and COR using the contact information identified in the contract. If the report is made by phone, or the email address for the Contracting Officer or COR is not immediately available, the Contractor shall contact the Contracting Officer immediately after reporting to the Component or DHS Enterprise SOC. All known or suspected incidents involving PII or SPII shall be reported within one hour of discovery. All other incidents shall be reported within eight hours of discovery.

(2) The Contractor shall not include any CUI in the subject or body of any email. The Contractor shall transmit CUI using *FIPS 140-2 Security Requirements for Cryptographic Modules* compliant encryption methods, accessible at <http://csrc.nist.gov/groups/STM/cmvp/standards.html>, to protect CUI in attachments to email. Passwords shall not be communicated in the same email as the attachment.

(3) An incident shall not, by itself, be interpreted as evidence that the Contractor has failed to provide adequate information security safeguards for CUI, or has otherwise failed to meet the requirements of the contract.

(4) If an incident involves PII or SPII, in addition to the incident reporting guidelines in *4300A Sensitive Systems Handbook Attachment F Incident Response*, Contractors shall also provide as many of the following data elements that are available at the time the incident is reported, with any remaining data elements provided within 24 hours of submission of the initial incident report:

- (i) Data Universal Numbering System (DUNS);
- (ii) Contract numbers affected unless all contracts by the company are affected;
- (iii) Facility CAGE code if the location of the event is different than the prime contractor location;
- (iv) Point of contact (POC) if different than the POC recorded in the System for Award Management (address, position, telephone, email);
- (v) Contracting Officer POC (address, telephone, email);
- (vi) Contract clearance level;
- (vii) Name of subcontractor and CAGE code if this was an incident on a subcontractor network;
- (viii) Government programs, platforms or systems involved;
- (ix) Location(s) of incident;
- (x) Date and time the incident was discovered;
- (xi) Server names where CUI resided at the time of the incident, both at the Contractor and subcontractor level;
- (xii) Description of the Government PII or SPII contained within the system; and
- (xiii) Any additional information relevant to the incident.

(e) *Incident Response Requirements.*

(1) All determinations by the Department related to incidents, including response activities, notifications to affected individuals and/or Federal agencies, and related services (e.g., credit monitoring) will be made in writing by the Contracting Officer.

(2) The Contractor shall provide full access and cooperation for all activities determined by the Government to be required to ensure an effective incident response, including providing all requested images, log files, and event information to facilitate rapid resolution of incidents.

(3) Incident response activities determined to be required by the Government may include, but are not limited to, the following:

- (i) Inspections,
- (ii) Investigations,
- (iii) Forensic reviews,
- (iv) Data analyses and processing, and
- (v) Revocation of the Authority to Operate.

(4) The contractor shall preserve and protect images of known affected information systems identified in paragraph (b) of this section and all relevant monitoring/packet capture data for at least 90 days from submission of the incident report to allow DHS to request the media or decline interest.

(5) The Government, at its sole discretion, may obtain assistance from other Federal agencies and/or third-party firms to aid in incident response activities.

(f) *PII and SPII Notification Requirements.* This subsection is only applicable when an incident involves PII/SPII.

(1) The Contractor shall have in place procedures and the capability to notify any

individual whose PII and/or SPII was under the control of the Contractor or resided in the information system at the time of the incident not later than 5 business days after being directed to notify individuals, unless otherwise approved by the Contracting Officer. The method and content of any notification by the Contractor shall be coordinated with, and subject to prior written approval by the Contracting Officer utilizing the DHS Privacy Incident Handling Guidance accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. The Contractor shall not proceed with notification unless directed in writing by the Contracting Officer.

(2) Subject to Government analysis of the incident and the terms of its instructions to the Contractor regarding any resulting notification, the notification method may consist of letters to affected individuals sent by first class mail, electronic means, or general public notice, as approved by the Government. Notification may require the Contractor's use of address verification and/or address location services. At a minimum, the notification shall include:

- (i) A brief description of the incident;
- (ii) A description of the types of PII or SPII involved;
- (iii) A statement as to whether the PII or SPII was encrypted or protected by other means;
- (iv) Steps individuals may take to protect themselves;
- (v) What the Contractor and/or the Government are doing to investigate the incident, to mitigate the incident, and to protect against any future incidents; and
- (vi) Information identifying who individuals may contact for additional information.

(g) *Credit Monitoring Requirements.* This subsection is only applicable when an incident involves PII/SPII. In the event that an incident involves PII or SPII, the Contractor may be directed by the Contracting Officer to:

- (1) Provide notification to affected individuals as described in paragraph (f).
- (2) Provide credit monitoring services to individuals whose PII or SPII was under the control of the Contractor or resided in the information system at the time of the incident for a period beginning the date of the incident and extending not less than 18 months from the date the individual is notified. Credit monitoring services shall be provided from a company with which the Contractor has no affiliation. At a minimum, credit monitoring services shall include:

- (i) Triple credit bureau monitoring;
- (ii) Daily customer service;
- (iii) Alerts provided to the individual for changes and fraud; and
- (iv) Assistance to the individual with enrollment in the services and the use of fraud alerts.

(3) Establish a dedicated call center. Call center services shall include:

- (i) A dedicated telephone number to contact customer service within a fixed period;
- (ii) Information necessary for registrants/enrollees to access credit reports and credit scores;

(iii) Weekly reports on call center volume, issue escalation (i.e., those calls that cannot be handled by call center staff and must be resolved by call center management or DHS, as appropriate), and other key metrics;

(iv) Escalation of calls that cannot be handled by call center staff to call center management or DHS, as appropriate;

(v) Customized Frequently Asked Questions, approved in writing by the Contracting Officer in coordination with the Headquarters or Component Privacy Officer; and

(vi) Information for registrants to contact customer service representatives and fraud resolution representatives for credit monitoring assistance.

(h) *Certificate of Sanitization of Government and Government-Activity-Related Files and Information.* Upon the conclusion of the contract by expiration, termination, cancellation, or as otherwise indicated in the contract, the Contractor shall return all CUI to DHS and/or destroy it physically and/or logically as identified in the contract. Destruction shall conform to the guidelines for media sanitization contained in *NIST SP-800-88, Guidelines for Media Sanitization*. The Contractor shall certify and confirm the sanitization of all Government and Government-Activity related files and information. The Contractor shall submit the certification to the COR and Contracting Officer following the template provided in *NIST Special Publication 800-88, Guidelines for Media Sanitization, Appendix G*.

(i) *Other Reporting Requirements.* Incident reporting required by this clause in no way rescinds the Contractor's responsibility for other incident reporting pertaining to its unclassified information systems under other clauses that may apply to its contract(s), or as a result of other applicable U.S. Government statutory or regulatory requirements.

(j) *Subcontracts.* The Contractor shall insert this clause in all subcontracts and require subcontractors to include this clause in all lower-tier subcontracts.

(End of clause)

■ 7. Amend paragraph (b) of section 3052.212-70 to remove 3052.204-70 Security Requirements for Unclassified Information Technology Resources; add Alternate II of 3052.204-71, Contractor Employee Access; and add 3052.204-7X, Safeguarding of Controlled Unclassified Information, as follows:

3052.212-70 Contract terms and conditions applicable to DHS acquisition of commercial items.

[Docket No. DHS–2017–0007]

RIN 1601–AA78

Homeland Security Acquisition Regulation (HSAR); Information Technology Security Awareness Training (HSAR Case 2015–002)

AGENCY: Office of the Chief Procurement Officer, Department of Homeland Security (DHS).

ACTION: Proposed rule.

SUMMARY: DHS is proposing to amend the Homeland Security Acquisition Regulation (HSAR) to add a new subpart, update an existing clause, and add a new contract clause to standardize information technology security awareness training and DHS Rules of Behavior requirements for contractor and subcontractor employees who access DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting controlled unclassified information (CUI).

DATES: Interested parties should submit written comments to one of the addresses shown below on or before March 20, 2017, to be considered in the formation of the final rule.

ADDRESSES: Submit comments identified by HSAR Case 2015–002, Information Technology Security Awareness Training, using any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>.

Submit comments via the Federal eRulemaking portal by entering “HSAR Case 2015–002” under the heading “Enter Keyword or ID” and selecting “Search.” Select the link “Submit a Comment” that corresponds with “HSAR Case 2015–002.” Follow the instructions provided at the “Submit a Comment” screen. Please include your name, company name (if any), and “HSAR Case 2015–002” on your attached document.

- *Fax:* (202) 447–0520.

• *Mail:* Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, ATTN: Ms. Shaundra Duggans, 245 Murray Drive, Bldg. 410 (RDS), Washington, DC 20528.

Comments received generally will be posted without change to <http://www.regulations.gov>, including any personal information provided. To confirm receipt of your comment(s), please check www.regulations.gov, approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Ms. Shaundra Duggans, Procurement Analyst, DHS, Office of the Chief Procurement Officer, Acquisition Policy and Legislation at (202) 447–0056 or email HSAR@hq.dhs.gov. When using email, include HSAR Case 2015–002 in the “Subject” line.

SUPPLEMENTARY INFORMATION:

I. Background

DHS contracts currently require contractor and subcontractor employees to complete information technology (IT) security awareness training before accessing DHS information systems and information resources. This training is initially completed upon award of the procurement and at least annually thereafter. DHS contracts also require such employees to sign the DHS Rules of Behavior (RoB) before access is provided to DHS information systems and information resources. The DHS RoB is a document that defines the responsibilities and obligations imposed on all individuals with access to DHS information systems and information resources. The DHS RoB holds users accountable for actions taken while accessing DHS information systems and using DHS information resources capable of collecting, processing, storing or transmitting controlled unclassified information (CUI).

DHS is proposing to (1) include IT security awareness training and RoB requirements in the HSAR and (2) make the training and RoB more easily accessible by hosting them on a public Web site. This approach ensures all applicable DHS contractors and subcontractors are subject to the same IT security awareness training and RoB requirements while removing the need for Government intervention to provide access to the IT security awareness training and RoB.

This rule proposes to standardize the IT security awareness training and DHS RoB requirements across DHS contracts by amending the HSAR to:

(1) Add the terms “controlled unclassified information,” “information resources” and “information system” to HSAR 3002.1, Definitions and remove the definition of the term “sensitive information” at HSAR 3002.1, Definitions. The definition of “controlled unclassified information” is taken from its implementing regulation at 32 CFR part 2002. The definitions of “information resources” and “information system” are derived from 44 U.S.C. 3502(6) and 44 U.S.C. 3502(8) respectively. The definition of “sensitive information” is removed because it is being replaced with “controlled unclassified information” consistent with Executive Order 13556 and its implementing regulation at 32 CFR part 2002. These definitions are necessary because these terms appear in proposed HSAR 3039.70 Information Technology Security Awareness Training and HSAR 3052.239–7X, Information Technology Security Awareness Training.

(2) Add a new subpart at 3039.70, Information Technology Security Awareness Training. HSAR 3039.7001, Scope, identifies the applicability of the subpart to contracts and subcontracts where contractor and subcontractor employees may have access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI. HSAR 3039.7002, Policy, subparagraph (a) requires contractors and subcontractors that may have access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI to complete IT security awareness training initially upon award of the procurement and annually thereafter. This subsection requires the contractor to maintain evidence that the training has been completed and provide copies of the training completion certificates to the contracting officer. Subparagraph (b) requires contractor and subcontractor employees to sign the DHS RoB before receiving access to DHS information systems and/or information resources and before contractor-owned and/or operated information systems can be used to collect, process, store, or transmit CUI. This subsection requires the contractor to maintain signed copies of the DHS RoB and provide signed copies to the contracting officer. HSAR 3039.7003, Contract Clause, identifies when contracting officers must insert

HSAR 3052.239–7X, Information Technology Security Awareness Training, in solicitations and contracts.

(3) Amend subparagraph (b) of the clause at HSAR 3052.212–70, Contract Terms and Conditions Applicable to DHS Acquisition of Commercial Items, to add HSAR 3052.239–7X Information Technology Security Awareness Training. This change is necessary because HSAR 3052.239–7X is applicable to the acquisition of commercial items.

(4) Add a new subsection at HSAR 3052.239–7X, Information Technology Security Awareness Training, to provide the text of the proposed clause. The proposed clause requires contractor and subcontractor employees to complete IT security awareness training before accessing DHS information systems/information resources and before contractor-owned and/or operated information systems are used to collect, process, store, or transmit CUI. Training shall be completed within thirty (30) days of contract award and on an annual basis thereafter. The contractor shall maintain copies of training certificates for all contractor and subcontractor employees as a record of compliance and provide copies of the training certificates to the contracting officer. Subsequent training certificates to satisfy the annual IT security awareness training requirement shall be submitted via email notification not later than October 31st of each year. The contractor shall attach training certificates to the email notification and the email notification shall state the required training has been completed for all contractor and subcontractor employees. The proposed clause also requires the contractor to ensure all employees and subcontractor employees sign the DHS RoB before accessing DHS information systems and information resources. The DHS RoB shall also be signed before a contractor-owned and/or operated information system or information resource can be used to collect, process, store or transmit CUI and before contractor and/or subcontractor employees can access the information system or information resource. The contractor shall maintain signed copies of the DHS RoB for all contractor and subcontractor employees as a record of compliance and provide signed copies of the RoB to the contracting officer not later than thirty (30) days after contract award.

These proposed revisions to the HSAR are necessary to ensure contractors and subcontractors understand their roles and responsibilities in ensuring the security of systems and the confidentiality,

integrity, and availability of CUI. They are consistent with the provisions of (1) the Federal Information Security Modernization Act of 2014 (FIMSA) (44 U.S.C. 3551, *et seq.*) and (2) Title 5, Code of Federal Regulations, Part 930, Subpart C, (5 CFR 930.301). 44 U.S.C. 3554(b)(4) requires agencies to provide security awareness training to inform personnel, including contractors and other users of information systems that support the operations and assets of the agency, of information security risks associated with their activities; and their responsibilities in complying with agency policies and procedures designed to reduce these risks. 5 CFR 930.301 requires all users of Federal information systems be exposed to security awareness materials at least annually. Users of Federal information systems include employees, contractors, students, guest researchers, visitors, and others who may need access to Federal information systems and applications.

This proposed rule is part of a broader initiative within DHS to (1) ensure contractors understand their responsibilities with regard to safeguarding controlled unclassified information (CUI); (2) contractor and subcontractor employees complete information technology (IT) security awareness training before access is provided to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; (3) contractor and subcontractor employees sign the DHS RoB before access is provided to DHS information systems, information resources, or contractor-owned and/or operated information systems and information resources where CUI is collected, processed, stored or transmitted on behalf of the agency; and (4) contractor and subcontractor employees complete privacy training before accessing a Government system of records; handling personally identifiable information (PII) and/or sensitive PII information; or designing, developing, maintaining, or operating a system of records on behalf of the Government.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563

emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, is subject to review under Section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804. DHS has included a discussion of the estimated costs and benefits of this rule in the Paperwork Reduction Act supporting statement, which can be found in the docket for this rulemaking.

III. Regulatory Flexibility Act

DHS expects this proposed rule may have an impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule requires contractor and subcontractor employees who will need access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting controlled unclassified information (CUI) to be properly trained on the requirements, applicable laws, and appropriate safeguards designed to ensure the security and confidentiality of the information systems and information resources. Therefore, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared consistent with 5 U.S.C. 603, and is summarized as follows:

1. Description of the Reasons Why Action by the Agency Is Being Taken

DHS is proposing to amend the HSAR to require that all contractor and subcontractor employees who will need access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI complete IT security awareness training and sign the DHS RoB before access to such systems and resources is granted. The purpose of this action is to require contractors to identify its employees who require access, ensure that those employees complete IT security awareness training before being granted access and annually thereafter, provide the Government evidence of the completed training, and maintain evidence of completed training in accordance with the records retention requirements of the contract.

2. Succinct Statement of the Objectives of, and Legal Basis for, the Rule.

The objective of this proposed rule is to require contractor and subcontractor employees to complete IT security awareness training before access is granted to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI.

The training imposed by this rule is required by the provisions of FISMA (44 U.S.C. 3551, *et seq.*) and Title 5, Code of Federal Regulations, Part 930, Subpart C, (5 CFR 930.301). 44 U.S.C. 3554(b)(4) requires agencies to provide security awareness training to inform personnel, including contractors and other users of information systems that support the operations and assets of the agency, of information security risks associated with their activities; and their responsibilities in complying with agency policies and procedures designed to reduce these risks. 5 CFR 930.301 requires all users of Federal information systems be exposed to security awareness materials at least annually.

3. Description of and, Where Feasible, Estimate of the Number of Small Entities To Which the Rule Will Apply

This proposed rule will apply to contractor and subcontractor employees who require access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI. The estimated number of small entities to which the rule will apply is 2,185 respondents of which 1,212 are projected to be small businesses.

This estimate is based on a review and analysis of internal DHS contract data and Fiscal Year (FY) 2014 data reported to the Federal Procurement Data System (FPDS). It is anticipated that this rule will be primarily applicable to procurement actions with a Product and Service Code (PSC) of "D" Automatic Data Processing and Telecommunication. PSCs will be adjusted as additional data becomes available through HSAR clause implementation to validate future burden projections.

4. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Rule, Including an Estimate of the Classes of Small Entities Which Will Be Subject to the Requirement and the Type of Professional Skills Necessary

The projected reporting and recordkeeping associated with this proposed rule is kept to the minimum necessary to meet the overall objectives. For instance, DHS has minimized the burden by making the IT security awareness training and DHS RoB publicly accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. IT security awareness training shall be completed within thirty (30) days of contract award and on an annual basis thereafter. Training certificates are automatically generated at the conclusion of the training. The DHS RoB shall be signed before contractor and subcontractor employees can access DHS information systems and information. The DHS RoB shall also be signed before a contractor-owned and/or operated information system or information resource can be used to collect, process, store or transmit CUI and before contractor and/or subcontractor employees can access the information system. Initial training certificates for each contractor and subcontractor employee, and signed copies of the RoB, shall be provided to the Government not later than thirty (30) days after contract award. Subsequent training certificates to satisfy the annual IT security awareness training requirement shall be submitted via email notification not later than October 31st of each year. The contractor shall attach training certificates to the email notification and the email notification shall state the required training has been completed for all contractor and subcontractor employees.

5. Identification, to the Extent Practicable, of All Relevant Federal Rules Which May Duplicate, Overlap, or Conflict With the Rule

There are no rules that duplicate, overlap or conflict with this rule.

6. Description of Any Significant Alternatives to the Rule Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact of the Rule on Small Entities

There are no practical alternatives that will accomplish the objectives of the proposed rule. In an effort to reduce duplication and to address common IT security training requirements across

Government, DHS has partnered with the Defense Information Systems Agency (DISA) to provide its online IT security awareness training, CyberAwareness Challenge, for DHS contractor and subcontractor employees. Common IT security awareness training provides a streamlined, efficient, and cost-effective solution for DHS to provide IT security awareness training for contractor and subcontractor employees.

DHS will be submitting a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the point of contact specified herein. DHS invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DHS will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610, (HSAR Case 2015-002), in correspondence.

IV. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies because this proposed rule contains information collection requirements. Accordingly, DHS will be submitting a request for approval of a new information collection requirement concerning this rule to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

A. Public reporting burden for this collection of information is estimated to be approximately 30 minutes (.50 hours) per response to comply with the requirements, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The total annual projected number of responses per respondent is estimated to be four (4). The annual total burden hours are estimated as follows:

Title: Homeland Security Acquisition Regulation: Information Technology Security Awareness Training.

Type of Request: New Collection.

Number of Respondents: 2,185.

Responses per Respondent: 4.

Annual Responses: 8,740.

Average Burden per Response:

Approximately 0.50.

Annual Burden Hours: 4,370.

Needs and Uses: DHS needs the information required by 3052.239-7X, Information Technology Security Awareness Training, to properly track contractor compliance with the training

and DHS RoB requirements identified in the clause.

Affected Public: Businesses or other for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: Upon award of procurement and annually thereafter.

B. Request for Comments Regarding Paperwork Burden.

You may submit comments identified by DHS docket number [DHS–2017–0007], including suggestions for reducing this burden, not later than March 20, 2017 using any one of the following methods:

(1) Via the internet at Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

(2) Via email to the Department of Homeland Security, Office of the Chief Procurement Officer, at HSAR@hq.dhs.gov.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the HSAR, and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Requesters may obtain a copy of the supporting statement from the Department of Homeland Security, Office of the Chief Procurement Officer, Acquisition Policy and Legislation, via email to HSAR@hq.dhs.gov. Please cite OMB Control No. 1600–0022, Privacy Training and Information Technology Security Awareness Training, in the “Subject” line.

List of Subjects in 48 CFR Parts 3001, 3002, 3039 and 3052

Government procurement.

Therefore, DHS proposes to amend 48 CFR parts 3001, 3002, 3039 and 3052 as follows:

■ 1. The authority citation for parts 3001 and 3002 is revised to read as follows:

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 1303(a)(2), 48 CFR part 1, subpart 1.3, and DHS Delegation Number 0702.

PART 3001—FEDERAL ACQUISITION REGULATIONS SYSTEM

■ 2. In section 3001.106 amend paragraph (a) by adding a new OMB Control Number as follows:

3001.106 OMB Approval under the Paperwork Reduction Act.

(a) * * *

OMB Control No. 1600–0022

(Information Technology Security Awareness Training)

* * * * *

PART 3002—DEFINITIONS OF WORDS AND TERMS

■ 3. Amend section 3002.101 by adding, in alphabetical order, the definitions for Controlled Unclassified Information (CUI), “Information Resources,” and “Information System” to read as follows:

* * * * *

“Controlled Unclassified Information (CUI)” is any information the Government creates or possesses, or an entity creates or possesses for or on behalf of the Government (other than classified information) that a law, regulation, or Government-wide policy requires or permits an agency to handle using safeguarding or dissemination controls. Within the context of DHS, this includes such information which, if lost, misused, disclosed, or, without authorization is accessed, or modified, could adversely affect the national or homeland security interest, the conduct of Federal programs, or the privacy of individuals. This definition includes the following CUI categories and subcategories of information:

(1) Chemical-terrorism Vulnerability Information (CVI) as defined in Title 6, Code of Federal Regulations, part 27 “Chemical Facility Anti-Terrorism Standards,” and as further described in supplementary guidance issued by an authorized official of the Department of Homeland Security (including the Revised Procedural Manual “Safeguarding Information Designated as Chemical-Terrorism Vulnerability Information” dated September 2008);

(2) Protected Critical Infrastructure Information (PCII) as set out in the Critical Infrastructure Information Act of 2002 (Title II, Subtitle B, of the Homeland Security Act, Public Law 107–296, 196 Stat. 2135), as amended, the implementing regulations thereto (Title 6, Code of Federal Regulations, part 29) as amended, the applicable PCII Procedures Manual, as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security

(including the PCII Program Manager or his/her designee);

(3) Sensitive Security Information (SSI) as defined in Title 49, Code of Federal Regulations, part 1520, “Protection of Sensitive Security Information,” as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the Assistant Secretary for the Transportation Security Administration or his/her designee) to include DHS MD 11056.1, “Sensitive Security Information (SSI)” and, within the Transportation Security Administration, TSA MD 2010.1, “SSI Program”;

(4) Homeland Security Agreement Information means information DHS receives pursuant to an agreement with state, local, tribal, territorial, and private sector partners that is required to be protected by that agreement. DHS receives this information in furtherance of the missions of the Department, including, but not limited to, support of the Fusion Center Initiative and activities cyber information sharing consistent with the Cybersecurity Information Security Act;

(5) Homeland Security Enforcement Information means unclassified information of a sensitive nature lawfully created, possessed, or transmitted by the Department of Homeland Security in furtherance of its immigration, customs, and other civil and criminal enforcement missions, the unauthorized disclosure of which could adversely impact the mission of the Department;

(6) International Agreement Information means information DHS receives pursuant to an information sharing agreement or arrangement, with a foreign government, an international organization of governments or any element thereof, an international or foreign public or judicial body, or an international or foreign private or non-governmental organization, that is required by that agreement or arrangement to be protected;

(7) Information Systems Vulnerability Information (ISVI) means:

(i) DHS information technology (IT) internal systems data revealing infrastructure used for servers, desktops, and networks; applications name, version and release; switching, router, and gateway information; interconnections and access methods; mission or business use/need. Examples of information are systems inventories and enterprise architecture models. Information pertaining to national security systems and eligible for

classification under Executive Order 13526, will be classified as appropriate;

(ii) Information regarding developing or current technology, the release of which could hinder the objectives of DHS, compromise a technological advantage or countermeasure, cause a denial of service, or provide an adversary with sufficient information to clone, counterfeit, or circumvent a process or system;

(8) Operations Security Information means information that could constitute an indicator of U.S. Government intentions, capabilities, operations, or activities or otherwise threaten operations security;

(9) Personnel Security Information means information that could result in physical risk to DHS personnel or other individuals that DHS is responsible for protecting;

(10) Physical Security Information means reviews or reports illustrating or disclosing DHS facility infrastructure or security vulnerabilities related to the protection of Federal buildings, grounds, or property. For example, threat assessments, system security plans, contingency plans, risk management plans, business impact analysis studies, and certification and accreditation documentation;

(11) Privacy Information, which includes information referred to as Personally Identifiable Information (PII). PII means information that can be used to distinguish or trace an individual's identity, either alone or when combined with other information that is linked or linkable to a specific individual; and

(12) Sensitive Personally Identifiable Information (SPII) is a subset of PII, which if lost, compromised or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. Some forms of PII are sensitive as stand-alone elements.

(i) Examples of stand-alone PII include: Social Security numbers (SSN), driver's license or state identification number, Alien Registration Numbers (A-number), financial account number, and biometric identifiers such as fingerprint, voiceprint, or iris scan.

(ii) Additional examples of SPII include any groupings of information that contain an individual's name or other unique identifier plus one or more of the following elements:

- (A) Truncated SSN (such as last 4 digits)
- (B) Date of birth (month, day, and year)
- (C) Citizenship or immigration status
- (D) Ethnic or religious affiliation
- (E) Sexual orientation
- (F) Criminal history
- (G) Medical information

(H) System authentication information such as mother's maiden name, account passwords or personal identification numbers (PIN)

(iii) Other PII may be SPII depending on its context, such as a list of employees and their performance ratings or an unlisted home address or phone number. In contrast, a business card or public telephone directory of agency employees contains PII but is not SPII.

* * * * *

"Information Resources" means information and related resources, such as personnel, equipment, funds, and information technology.

"Information System" means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information.

* * * * *

■ 4. Revise part 3039 to read as follows:

PART 3039—ACQUISITION OF INFORMATION TECHNOLOGY

Subpart 3039.70—Information Technology Security Awareness Training

- 3039.7001 Scope.
- 3039.7002 Policy.
- 3039.7003 Contract Clause.

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 1303(a)(2), 48 CFR part 1, subpart 1.3, and DHS Delegation Number 0702.

3039.7001 Scope.

This section applies to contracts and subcontracts where contractor and subcontractor employees may have access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting controlled unclassified (CUI) information.

3039.7002 Policy.

(a) Contractors and subcontractors that may have access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI shall take IT security awareness training initially upon award of the procurement and annually thereafter. The contractor shall ensure such employees complete the required training, maintain evidence that the training has been completed and provide copies of the training

completion certificates to the Contracting Officer and/or Contracting Officer's Representative (COR) for inclusion in the contract file.

(b) The DHS Rules of Behavior (RoB) is a document that informs users of their responsibilities and obligations when accessing DHS information systems and/or information resources. The RoB also informs users that they will be held accountable for actions taken while accessing DHS information systems and/or using DHS information resources. Contractor and subcontractor employees shall sign the DHS RoB before receiving access to DHS information systems and/or information resources. In addition, contractor and subcontractor employees shall sign the DHS RoB before a contractor-owned and/or operated information system or information resource can be used to collect, process, store or transmit CUI. The contractor shall maintain signed copies of the DHS RoB for all contractor and subcontractor employees as a record of compliance, in accordance with the records retention requirements of the contract, and provide signed copies of the DHS RoB to the Contracting Officer and/or COR for inclusion in the contract file.

3039.7003 Contract Clause.

Contracting officers shall insert the clause at (HSAR) 48 CFR 3052.239–7X, Information Technology Security Awareness Training, in solicitations and contracts where contractor and subcontractor employees, during the course of performance, may gain access to DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI.

PART 3052—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 5. The authority citation for part 3052 is revised to read as follows:

Authority: 5 U.S.C. 301–302, 41 U.S.C. 1707, 41 U.S.C. 1702, 41 U.S.C. 1303(a)(2), 48 CFR part 1, subpart 1.3, and DHS Delegation Number 0702. Clause 3052.212–70 [Amended]

■ 6. Amend paragraph (b) of section 3052.212–70 to add 3052.239–7X Information Technology Security Awareness Training as follows:

3052.212–70 Contract terms and conditions applicable to DHS acquisition of commercial items.

Contract Terms And Conditions Applicable To Dhs Acquisition Of Commercial Items (Date)

* * * * *

(b) * * *

3052.239–7X Information Technology Security Awareness Training

■ 7. Amend part 3052 by adding section 3052.239–7X to read as follows:

3052.239–7X Information technology security awareness training.

As prescribed in (HSAR) 48 CFR 3039.7004 contract clause, insert the following clause:

Information Technology Security Awareness Training (Date)

(a) *Information Technology Security Awareness Training.* The Contractor shall ensure that all employees and subcontractor employees complete information technology (IT) security awareness training before access is provided to DHS information systems and information resources. The Contractor shall also ensure that employees and subcontractor employees complete IT security awareness training before a contractor-owned and/or operated information system or information resource can be used to collect, process, store or transmit controlled unclassified information (CUI). Training shall be completed within thirty (30) days of contract award and be completed on an annual basis thereafter not later than October 31st of each year. Any new Contractor employees and subcontractor employees assigned to the contract shall complete the training before accessing DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI under the contract. IT security awareness training is accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. The Contractor shall maintain copies of training certificates for all Contractor and subcontractor employees as a record of compliance. Initial training certificates for each Contractor and subcontractor employee shall be provided to the Contracting Officer and/or Contracting Officer's Representative (COR) not later than thirty (30) days after contract award or assignment to the contract. Subsequent training certificates to satisfy the annual IT security awareness training requirement shall be submitted to the Contracting Officer and/or COR via email notification not later than October 31st of each year. The Contractor shall attach training certificates to the email notification and the email notification shall list all Contractor and subcontractor employees required to take the training and state the required IT security awareness training has been completed for all Contractor and subcontractor employees.

(b) *Rules of Behavior.* The Contractor shall ensure that all employees and subcontractor

employees sign the DHS Rules of Behavior (RoB) before access is provided to DHS information systems and information resources. The Contractor shall also ensure that employees and subcontractor employees sign the DHS RoB before a contractor-owned and/or operated information system or information resource can be used to collect, process, store or transmit CUI and before access to the contractor-owned and/or operated information system or information resource is provided to the employee. The RoB shall be signed within thirty (30) days of contract award. Any new Contractor employees and subcontractor employees assigned to the contract shall also sign the DHS RoB before accessing DHS information systems and information resources or contractor-owned and/or operated information systems and information resources capable of collecting, processing, storing or transmitting CUI. The DHS RoB is accessible at <http://www.dhs.gov/dhs-security-and-training-requirements-contractors>. The Contractor shall maintain signed copies of the DHS RoB for all Contractor and subcontractor employees as a record of compliance. Signed copies of the RoB shall be provided to the Contracting Officer and/or COR not later than thirty (30) days after contract award or assignment to the contract. The DHS RoB will be reviewed annually and the COR will provide notification when a review is required.

(c) *Subcontracts.* The Contractor shall insert this clause in all subcontracts and require subcontractors to include this clause in all lower-tier subcontracts.

(End of clause)

Soraya Correa,

Chief Procurement Officer, Department of Homeland Security.

[FR Doc. 2017–00754 Filed 1–18–17; 8:45 am]

BILLING CODE 9110–9B–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 174

[Docket No. PHMSA–2016–0015 (HM–263)]

RIN 2137–AF21

Hazardous Materials: FAST Act Requirements for Real-Time Train Consist Information by Rail

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: PHMSA requests comment on certain provisions of the Fixing America's Surface Transportation (FAST) Act of 2015. The FAST Act directs the Secretary of Transportation to require Class I railroads that transport

hazardous materials to generate accurate, real-time, and electronic train consist information. Further, the FAST Act includes provisions for the railroads to provide fusion centers with electronic train consist information to share with State and local first responders, emergency response officials, and law enforcement personnel during an accident, incident, or emergency. In support of developing regulations to implement the FAST Act mandates, PHMSA specifically requests comments and information on baseline changes, affected entities, and costs and benefits related to fusion centers collecting train consist information from railroads and disseminating this information in the event of an emergency.

DATES: Comments must be received by April 19, 2017.

ADDRESSES: You may submit comments identified by Docket No. PHMSA–2016–0015 (HM–263) by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System; U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, Routing Symbol M–30, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* To the Docket Management System; Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the agency name and docket number for this ANPRM at the beginning of the comment. To avoid duplication, please use only one of these four methods. All comments received will be posted without change to the Federal Docket Management System (FDMS), including any personal information.

Docket: For access to the dockets to read background documents or comments received, go to <http://www.regulations.gov> or DOT's Docket Operations Office (see **ADDRESSES**).

Privacy Act: Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** (See 65 FR 19477, April 11, 2000), or you may visit <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Dirk Der Kinderen, (202) 366-4460, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

I. Background

A. FAST Act

On December 4, 2015, President Barack Obama signed legislation titled, "Fixing America's Surface Transportation Act of 2015," or the "FAST Act." (See Pub. L. 114-94.) The FAST Act includes the "Hazardous Materials Transportation Safety Improvement Act of 2015" (sections 7001 through 7311), which instructs the Secretary of Transportation ("Secretary") to make specific regulatory amendments to the Hazardous Materials Regulations (HMR; 49 CFR parts 171-180). The FAST Act requires Class I railroads to generate accurate, real-time, and electronic train consist information that can be provided "to State and local first responders,

emergency response officials, and law enforcement personnel that are involved in the response to or investigation of an accident, incident, or public health or safety emergency involving the rail transportation of hazardous materials" and request such electronic train consist information. Section 7302 of the FAST Act is structured as follows:

- Section 7302(a)(1), (2), (5), and (7) apply to the sharing of the accurate, real-time, and electronic train consist information covering all hazardous materials with fusion centers.
- Section 7302(a)(3) and (4) apply to sharing advance notification and information on high-hazard flammable trains (HHFTs) with State Emergency Response Commissions (SERCs) in accordance with Emergency Order DOT-OST-2014-0067.
- Section 7302(a)(6) establishes security and confidentiality protections to prevent the public release of security-sensitive electronic train consist information or the advance notification of HHFT movements to unauthorized persons.

PHMSA intends to publish a notice of proposed rulemaking (NPRM) that will propose regulations to address §§ 7302(a)(1), (2), (5), (6) and (7) of the FAST Act. PHMSA is addressing the SERC notification portion of the FAST Act (§§ 7302(a)(3), (4) and (6)) in a separate rulemaking titled "Hazardous Materials: Oil Spill Response Plans and Information Sharing for High-Hazard Flammable Trains" (RIN: 2137-AF08).¹ Sections 7302(a)(1), (2), (5), (6), and (7) of the FAST Act are discussed in greater detail as follows.

Section 7302(a)(1)(A) directs the Secretary to issue regulations requiring Class I railroads transporting hazardous materials to generate accurate, real-time, and electronic train consist information, including:

- The identity, quantity, and location of hazardous materials on a train;
- The point of origin and destination of the train;
- Any emergency response information or resources required by the Secretary; and
- An emergency response point of contact designated by the Class I railroad.

Subparagraph (a)(1)(B) further directs the Secretary to issue regulations requiring Class I railroads to enter into a memorandum of understanding (MOU) with each applicable fusion center to provide the fusion center with secure and confidential access to the

electronic train consist information for each train transporting hazardous materials in the jurisdiction of the fusion center.

Section 7302(a)(2) directs the Secretary to issue regulations requiring each applicable fusion center to provide the electronic train consist information to State and local first responders, emergency response officials, and law enforcement personnel who are involved in the response to or investigation of an accident, incident, or public health or safety emergency involving the rail transportation of hazardous materials and request such electronic train consist information.

Section 7302(a)(5) directs the Secretary to issue regulations prohibiting any Class I railroad, employee, or agent from withholding, or causing to be withheld, the train consist information from first responders, emergency response officials, and law enforcement personnel described in § 7302(a)(2) in the event of an incident, accident, or public health or safety emergency involving the rail transportation of hazardous materials.

Section 7302(a)(6) directs the Secretary to issue regulations establishing security and confidentiality protections, including protections from the public release of proprietary information or security-sensitive information, to prevent the release of real-time train consist information to unauthorized persons.

Section 7302(a)(7) instructs the Secretary to issue regulations allowing each Class I railroad to enter into an MOU with any Class II railroad or Class III railroad that operates trains over the Class I railroad's line to incorporate the Class II railroad or Class III railroad's (*i.e.*, regional and short line railroads) train consist information within the existing framework described in § 7302(a)(1).²

B. Fusion Centers

The FAST Act requires the Secretary to issue regulations requiring fusion centers to participate in the gathering and dissemination of electronic train consist information. Section 7302(b)(4) of the FAST Act indicates that the term "fusion center" means a collaborative effort of two or more Federal, State, local, or Tribal government agencies that combines resources, expertise, or information with the goal of maximizing the ability of such agencies to detect, prevent, investigate, apprehend, and

¹ On July 29, 2016, PHMSA published a Notice of Proposed Rulemaking, <https://www.regulations.gov/document?D=PHMSA-2014-0105-0240>.

² Classification of carriers (railroads) is based on annual operating revenues. A breakout of Class I, II and III railroads can be reviewed at 49 CFR part 1201—Railroad Companies under the General Instructions at 1-1(a).

respond to criminal or terrorist activity (6 U.S.C. 124(j)(1)). Since 2003, the U.S. Department of Homeland Security (DHS) and the U.S. Department of Justice (DOJ) have published guidance to support the development and implementation of fusion centers as centralized entities to improve the sharing of threat-related information related to criminal or terrorist activity. Located in states and major urban areas throughout the country, fusion centers are owned, operated, and staffed by State and local agencies with support from Federal partners. The federal support consists of deployed personnel, training, technical assistance, exercise support, security clearances, and connectivity to federal systems, technology, and grant funding to detect, prevent, investigate, apprehend, and respond to criminal or terrorist activity.³ Specifically, grants from Federal agencies, including DHS and DOJ, are leveraged by states to support fusion center operations in executing their respective missions.

Fusion centers (1) are owned and operated by State and local entities and designated by their respective governor;⁴ (2) serve as primary focal points within the state and local environment for the receipt, analysis, gathering, and sharing of criminal or terrorist threat-related information among Federal, State, local, Tribal,⁵ and territorial partners; and (3) contribute to the Information Sharing Environment through their role in receiving threat information from the Federal government; analyzing that information in the context of their local environment; disseminating that information to local agencies; and gathering tips, leads, and suspicious activity reporting (SAR) from local agencies and the public. Fusion centers receive information from a variety of sources, including SAR from stakeholders within their jurisdictions, as well as federal information and intelligence. They analyze the information, reports and threat to disseminate to their customers (e.g., law enforcement and homeland security officials), thereby assisting homeland security partners at all levels of government to identify and address immediate and emerging threats. The mission and scope of a fusion center's operation is guided by the State or local agency that oversees its operations.

Some fusion centers only process terrorism information, while others also address criminal-related information. This focus is directed by the respective State and/or local agency.

The intelligence and information collected, analyzed, and shared may be strategic, as well as tactical. Information gathering and dissemination occur on an ongoing basis. Fusion centers are in a unique position to empower front-line law enforcement, public safety, fire service,⁶ emergency response,⁷ public health,⁸ critical infrastructure protection,⁹ and private sector security personnel to gather lawfully and share threat-related information, in accordance with the fusion centers' missions and authorities. They provide interdisciplinary expertise and situational awareness to inform decision-making at all levels of government. Fusion centers conduct analyses and facilitate information sharing, assisting law enforcement and homeland security partners in preventing, protecting against, and responding to crime and terrorism.

A fusion center differs from an emergency operations center (EOC). Fusion centers and EOCs serve distinct, but complementary roles in supporting the country's homeland security efforts. Fusion centers empower homeland security partners through the lawful gathering, analysis, and sharing of threat-related information, while EOCs primarily provide information and support to incident management and response/recovery coordination activities.¹⁰

II. Request for Public Comment

With respect to the FAST Act mandate to develop regulations applicable to fusion centers, PHMSA is requesting comment and information specific to the impact on State and local government fusion center operations and first responders, emergency response officials, law enforcement personnel, railroads, and any other entity that is impacted by this mandate. The purpose of this ANPRM is to inform the Regulatory Impact Analysis (RIA) of this rulemaking.

The request for comment, including information and data are focused on the baseline changes, implementation, and

costs and benefits affecting entities—fusion centers, railroads, and first responders—that would be impacted by a rulemaking outlining regulations to prepare, gather, share, and acquire train consist information. While most of these questions are focused on fusion center operations, we welcome comments from all stakeholders on any of these questions.

A. Affected Entities Questions

1. How many fusion centers are located in your State, including those associated with major urban areas?

2. How many fusion centers in your State, including those associated with major urban areas, would be affected by the provisions of § 7302 of the FAST Act? How many would be required to collect and disseminate information? Would it be possible to designate one fusion center within your State to collect and disseminate train consist data?

3. How many Class II and III railroads would be affected by § 7302(a)(7) of the FAST Act? This section of the FAST Act allows Class I railroads to enter into an MOU with any Class II or Class III railroad that operates trains over the Class I railroad's line to incorporate the Class II or Class III railroads' train consist information within the existing framework described in § 7302(a)(1). How many Class I railroads would enter into an MOU?

B. Baseline Questions

4. Are fusion centers in your State 24/7 operations? If not, describe the coverage of operations on a daily/weekly basis?

5. Per the DHS Web site description of fusion center activities referenced in the subsection titles "Fusion Centers," how frequently do fusion centers in your State receive, analyze, gather, and share threat-related information? Do fusion centers in your State currently perform these activities for hazardous materials on trains? Does performance of the activities occur based on a shipment or is it more routine and constant (i.e., a 24/7 operation)?

6. Describe the current level of information technology (IT) and data collection and information management system capabilities of your State's fusion centers. Do they have the ability to receive and disseminate real-time train consist information?

7. How many employees work at your State's fusion centers? How many fusion center employees are employees of your State, employees of localities, and other types of employees?

8. How does your State fund fusion center operations? How are grants used?

³ See <https://www.dhs.gov/national-network-fusion-centers-fact-sheet>.

⁴ See <https://www.dhs.gov/fusion-center-locations-and-contact-information>.

⁵ See <http://www.it.ojp.gov/documents/TribalParticipationinFusionCenters.pdf>.

⁶ See <http://it.ojp.gov/docdownloader.aspx?ddid=1280>.

⁷ See <https://www.dhs.gov/fusion-centers-and-emergency-operations-centers>.

⁸ See <http://www.it.ojp.gov/docdownloader.aspx?ddid=1450>.

⁹ See <http://www.it.ojp.gov/docdownloader.aspx?ddid=1136>.

¹⁰ See <https://www.dhs.gov/fusion-centers-and-emergency-operations-centers>.

Please provide any data on the current cost and budget of your State's fusion center operations. What are the break-out costs by labor and IT?

9. How do first responders currently receive information, or train consist information, for hazardous materials in your State?

10. How do railroads transmit train consist information for hazardous materials incidents? Do railroads currently send information on hazardous materials train consists to fusion centers? If so, is this information sent electronically, such as by the AskRail app, or by some other means? ¹¹ Do railroads send this information to both state and large urban area fusion centers?

11. Do railroad employees use electronic devices to update train consist information? Are these devices proprietary rail-specific devices, or off-the-shelf tablets or smartphones with apps that enable train consists to be updated and that information relayed to Railinc or some other railroad database? ¹²

12. PHMSA is also aware of handheld readers.¹³ Are these readers capable of tracking changes to train consists and interfacing with rail databases such as Railinc to update train consist information in real-time by cellular or wifi connections? If such devices are not currently capable of performing this task, is development of this capability in process? How much do these devices cost, what is their read range, and what are the ongoing service costs for these devices?

13. Have all Class I railroads developed means by which changes to hazardous material train consists can be updated in real-time and relayed electronically to the railroads or other entities?

14. Are there electronic systems that operate on a 24/7 basis to relay changes to train consists in real-time at all hours and locations throughout the day?

C. Implementation Questions

The following questions relate to how stakeholders would implement § 7302 of the FAST Act.

15. Would your State identify a particular fusion center to collect and disseminate information for your entire State, including major urban areas? If not, what other implementation alternatives would your State consider?

16. What type of IT solutions would you consider or require for your State's

fusion center operations to receive, route, and disseminate real-time train consist information? Are there any IT or network solutions that would provide automated collection and routing to first responders on a 24/7 basis?

17. Would your State's fusion centers use the same employees to conduct criminal, terrorism, and hazardous material information collection and dissemination activities? Would employees require specialization in these areas?

18. How many and what types of additional employees would be required to implement the provisions of § 7302 of the FAST Act?

19. How many real-time train consist notifications would be received and disseminated by your State's fusion center operations? How long would it take to process, analyze, and disseminate notifications?

20. How would railroads transmit this information to fusion centers? If no system to relay this information to fusion centers exists, what resources and investments would be necessary to develop such a system (e.g., IT development, IT hardware to record changes to train consists in real-time, etc.)?

21. If further IT development or other implementation resources are required, what is a reasonable time frame for railroads to develop these resources? What barriers might prevent the timely development and deployment of these resources?

22. How would first responders receive real-time train consist information? Would first responders need any additional communication and technology equipment or enhancements?

D. Costs Questions

23. What is the additional cost to your State's fusion center operations to implement the provisions of § 7302 of the FAST Act? What are the initial startup planning and capital investment costs and how long would initial startup take in terms of months? What are the recurring operations and management (O&M) costs? What are the costs and frequencies of any upgrades beyond initial startup and O&M costs? What are the initial and recurring training costs? Please provide quantitative data if possible.

24. What is the cost to collect, maintain, and disseminate real-time train consist notification?

25. What are the costs associated with electronic devices to record and relay changes to train consists in real-time?

26. What are the costs to establish security and confidentiality protections,

including protections from the public release of proprietary information or security-sensitive information, to prevent the release of real-time train consist information to unauthorized persons?

27. What are the costs for Class I railroads to enter into an MOU with any Class II railroad or Class III railroad that operates trains over the Class I railroad's line to incorporate the Class II railroad's or Class III railroad's train consist information within the existing framework described in § 7302(a)(1)?

28. What are the costs for Class I railroads to enter into an MOU with each applicable fusion center to provide the fusion center with secure and confidential access to the electronic train consist information for each train transporting hazardous materials in the jurisdiction of the fusion center?

29. What are the costs to first responders to receive information disseminated from fusion centers?

30. How and where would State fusion centers recover costs to implement the provisions of § 7302 of the FAST Act? Would implementation require grant funding? If so, from where or whom?

E. Benefits Questions

31. As a result of implementing § 7302 of the FAST Act, would there be a reduction in the response time and incident-related costs and damages? Would there be a reduction in the duration of evacuations? Please provide quantitative data if possible.

32. What kind of avoided consequences and benefits to communities will be realized as a result of implementing the provisions of § 7302 of the FAST Act? Avoided consequences may include reduced risks of harm to the public and environment in terms of fatalities, injuries and hospitalizations, property loss, and damages associated with release of hazardous materials into the environment.

33. Would railroads experience any business benefits from having accurate electronic records of train consists in real-time (e.g., better ability to update customers on shipment location or delivery times/dates, more efficient utilization of railroad resources, etc.)? If so, please quantify to the extent possible.

III. Regulatory Analysis

A. Executive Order 12866, Executive Order 13563, and DOT Regulatory Policies and Procedures

This ANPRM has not been designated a "significant regulatory action" under

¹¹ For more information on the AskRail App, see <https://askrail.us/>.

¹² For more information on Railinc, see <https://www.railinc.com/rportal/web/guest/home>.

¹³ See <http://www.aettag.com/>.

section 3(f) of Executive Order 12866, "Regulatory Planning and Review." 58 FR 51735 (Oct. 4, 1993). Accordingly, this ANPRM has not been reviewed by the Office of Management and Budget (OMB) and is not considered to be a significant regulatory action under the DOT Regulatory Policies and Procedures of February 26, 1979. See 44 FR 11034.

Executive Order 13563, "Improving Regulation and Regulatory Review," 76 FR 3821 (Jan. 21, 2011), supplements and reaffirms the principles, structures, and definitions governing regulatory review that were established in Executive Order 12866. Together, Executive Orders 12866 and 13563 require agencies to regulate in the "most cost-effective manner," to make a "reasoned determination that the benefits of the intended regulation justify its costs," and to develop regulations that "impose the least burden on society."

Additionally, Executive Orders 12866 and 13563 require agencies to provide a meaningful opportunity for public participation. Therefore, PHMSA solicits comment on the questions raised in this ANPRM.

B. Executive Order 13132

Executive Order 13132, "Federalism," 64 FR 43255 (Aug. 10, 1999), requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." We invite State and local governments with an interest in this rulemaking to comment on any effect that revisions to the HMR relative to the FAST Act mandate may cause.

C. Executive Order 13175

Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments," 65 FR 67249 (Nov. 9, 2000), requires agencies to assure meaningful and timely input from Indian tribal government representatives in the development of rules that "significantly or uniquely affect" Indian communities and impose "substantial and direct compliance costs" on such communities. We invite Indian tribal governments to provide comment(s) on any potential impacts of a rulemaking to implement the FAST Act mandate.

D. Regulatory Flexibility Act, Executive Order 13272, and DOT Policies and Procedures

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires agencies to consider whether a rulemaking would have a "significant economic impact on a substantial number of small entities." Small entities include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations under 50,000.

As such, PHMSA solicits input from small entities on the questions presented in this ANPRM. If you believe the FAST Act mandate would have a significant economic impact on a substantial number of small entities, please submit a comment to PHMSA. In your comment, explain the extent of the impact, and whether there may be alternative approaches to consider that would minimize any significant impact on small business while still meeting the agency's statutory safety objectives.

Any future proposed rule would be developed in accordance with Executive Order 13272, "Proper Consideration of Small Entities in Agency Rulemaking," 67 FR 53461 (Aug. 16, 2002), as well as DOT's procedures and policies, so as to promote compliance with the Regulatory Flexibility Act to ensure that potential impacts on small entities of a regulatory action are properly considered.

E. Paperwork Reduction Act

Section 1320.8(d), title 5, Code of Federal Regulations requires that PHMSA provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests. It is possible that new or revised information collection requirements could occur as a result of any future rulemaking action. We invite comment on the need for any collection of information and paperwork burdens that may apply as result of a future rulemaking.

F. National Environmental Policy Act

The National Environmental Policy Act of 1969, 42 U.S.C. 4321–4375, requires Federal agencies to consider the consequences of major Federal actions and prepare a detailed statement on actions significantly affecting the quality of the human environment. The Council on Environmental Quality (CEQ) regulations require Federal agencies to conduct an environmental review considering (1) the need for the proposed action, (2) alternatives to the

proposed action, (3) probable environmental impacts of the proposed action and alternatives, and (4) the agencies and persons consulted during the consideration process. See 40 CFR 1508.9(b). PHMSA welcomes any data or information related to environmental impacts that may result from this rulemaking.

G. Privacy Act

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000), or you may visit <http://www.dot.gov/privacy.html>.

H. Executive Order 13609 and International Trade Analysis

Under Executive Order 13609, "Promoting International Regulatory Cooperation," 77 FR 26413 (May 4, 2012), agencies must consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary, or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are, or would be, adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979, Public Law 96–39, as amended by the Uruguay Round Agreements Act, Public Law 103–465, prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA participates in the establishment of international standards in order to protect the safety of the

American public, and we have assessed the effects of this ANPRM to ensure that it does not cause unnecessary obstacles to foreign trade. Accordingly, this rulemaking is consistent with Executive Order 13609 and PHMSA's obligations under the Trade Agreement Act, as amended.

I. Statutory/Legal Authority for This Rulemaking

Federal hazardous materials transportation law, 49 U.S.C. 5101 *et seq.*, authorizes the Secretary of Transportation to prescribe regulations for the safe transportation, including security, of hazardous materials in intrastate, interstate, and foreign commerce. The Secretary has delegated this authorization to the Administrator for PHMSA. See 49 CFR 1.97. PHMSA is issuing this ANPRM to gather necessary information in development of the regulatory impact analysis in support of this rulemaking.

J. Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Issued in Washington, DC, on January 13, 2017, under authority delegated in 49 CFR part 1.97.

William Schoonover,

Associate Administrator for Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration.

BILLING CODE 4910-60-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 217

[Docket No. 160809705-6705-01]

RIN 0648-BG25

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Space Vehicle and Missile Launch Operations at Pacific Spaceport Complex Alaska, Kodiak Island, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS has received an application, pursuant to the Marine Mammal Protection Act (MMPA), from the Alaska Aerospace Corporation (AAC) for authorization to take small numbers of marine mammals incidental to launching space launch vehicles and other smaller missile systems at the Pacific Spaceport Complex Alaska (PSCA) for the period of March 15, 2017, through March 14, 2022. NMFS is proposing regulations to govern that take, and requests comments on the proposed regulations.

DATES: Comments and information must be received no later than February 21, 2017.

ADDRESSES: You may submit comments on this document by any of the following methods:

- **Electronic submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov, enter 2017-0002 in the "Search" box, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- **Mail:** Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East West Highway, Silver Spring, MD 20910.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the end of the comment period. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. To help NMFS process and review comments more efficiently, please use only one method to submit comments. All comments received are a part of the public record and will generally be posted on www.regulations.gov without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Stephanie Egger, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Availability

A copy of AAC's application and any supporting documents, as well as a list of the references cited in this document, may be obtained online at: www.nmfs.noaa.gov/pr/permits/incidental/research.htm. In case of problems accessing these documents, please call the contact listed above (see **FOR FURTHER INFORMATION CONTACT**).

Purpose and Need for Regulatory Action

This proposed rule, to be issued under the authority of the MMPA, would establish a framework for authorizing the take of marine mammals incidental to launching space vehicles, target missiles, and other smaller missile systems at the PSCA. We received an application from AAC requesting 5-year regulations and authorization to take one species of marine mammals. Take would occur by Level B harassment only, incidental to the space vehicle launches (also referred to as rocket launches). The regulations would be valid from March 15, 2017, to March 14, 2022. Please see *Background* below for definitions of harassment.

Legal Authority for the Proposed Action

Section 101(a)(5)(A) of the MMPA directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region for up to five years if, after notice and public comment, the agency makes certain findings and issues regulations that set forth permissible methods of taking pursuant to that activity, as well as monitoring and reporting requirements. Section 101(a)(5)(A) of the MMPA and the implementing regulations at 50 CFR part 216, subpart I provide the legal basis for issuing this proposed rule containing 5-year regulations, and for any subsequent Letters of Authorization (LOA). As directed by this legal authority, this proposed rule contains mitigation, monitoring, and reporting requirements.

Summary of Major Provisions Within the Proposed Rule

The following provides a summary of some of the major provisions within the proposed rulemaking for AAC's rocket launch activities. We have preliminarily determined that AAC's adherence to the proposed mitigation, monitoring, and reporting measures listed below would achieve the least adverse impact practicable on the affected marine mammals. They include:

- Required monitoring of Ugak Island to detect the presence and abundance of marine mammals before and after deployment of rocket launch operations.
- Required monitoring of Ugak Island to survey the presence and abundance of marine mammals once per year (outside of rocket launch operations).
- Required mitigation of using time-lapsed photography to determine the immediate response impacts to marine mammals during rocket launches, particularly during the pupping season (should rocket launches occur during that time).

Background

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined “negligible impact” in 50 CFR 216.103 as “an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.”

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as: Any act of pursuit, torment, or annoyance, which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On April 25, 2016, NMFS received a request for regulations from AAC for the taking of small numbers of marine mammals incidental to launching space launch vehicles long-range and other smaller missile systems at the PSCA. We received revised drafts on June 20, 2016, and September 19, 2016. On September 27, 2016, we published a notice of receipt of AAC’s application in the **Federal Register** (81 FR 66264), requesting comments and information for thirty days related to AAC’s request. On November 10, 2016, we received an adequate and complete application. We received comments from the Marine Mammal Commission (MMC) which we

considered in the development of this proposed rule.

AAC proposes taking of small numbers of marine mammals incidental to rocket launch operations specifically noise from space vehicles and missile launches that may result in the Level B harassment of harbor seals (*Phoca vitulina richardii*). NMFS has previously issued regulations and subsequent LOAs to AAC authorizing the taking of marine mammals incidental to launches at PSCA (76 FR 16311, March 23, 2011; and 71 FR 4297, January 26, 2006). The current regulations recently expired on March 22, 2016; hence, AAC has applied for new regulations. The proposed regulations, if issued, would be effective from March 15, 2017, through March 14, 2022.

Description of the Specified Activity

Overview

PSCA is located on the Narrow Cape Peninsula, on Kodiak Island in the Gulf of Alaska. Kodiak Island is approximately 99 miles (mi) long and 10 to 60 mi wide. PSCA is approximately 22 air mi from the City of Kodiak, which is the largest settlement on the Kodiak Island. The land area occupied by PSCA is owned by the State of Alaska and is administered by AAC under terms of an Interagency Land Management Assignment (ILMA) issued by AAC’s sister agency, the Alaska Department of Natural Resources. AAC conducts space vehicle and missile launches from the PSCA. Launch operations are authorized under license from the Federal Aviation Administration (FAA), Office of the Associate Administrator for Space Transportation, in accordance with the facility’s Environmental Assessment (EA) and stipulations in the EA’s Finding of No Significant Impact (FONSI) (FAA 1996) and subsequent licenses (FAA 1998, 2003, 2005, and 2013). The area considered to be affected by PSCA launch operations was defined in a September 1996 meeting involving AAC and its environmental consultant (University of Alaska Anchorage’s Environment and Natural Resources Institute), and government agencies represented by the FAA, NMFS, the U.S. Fish and Wildlife Service (FWS), and the Alaska Department of Environmental Conservation (ADEC). Attendees at that meeting reviewed information on the known effects of rocket operations on the environment, and defined the expected impact area to be within a 6-mi radius of the launch pad area, inclusive of Ugak Island. A more recent EA was completed in April 2016 that addresses the potential environmental

impacts of the proposed action where the FAA would modify the AAC launch site operator license for the PSCA. The EA evaluates the potential environmental impacts of modifying the launch site operator license to include medium-lift launch capability at PSCA with the addition of new infrastructure necessary to support these types of launches, including the construction of a launch pad and associated facilities.

There are several marine mammals present in the waters offshore, however, the only marine mammals anticipated to be affected by the specified activities are pinnipeds hauled out on Ugak Island.

Dates and Duration

The specified activity may occur at any time during the 5-year period of validity of the proposed regulations. Dates and duration of individual rocket launches are inherently uncertain. Launch timing is not determined by AAC, but is driven by customer needs that include variables ranging from: (1) Availability of down range assets necessary to support launch, (2) orbital parameters, and (3) exigencies requiring rapid response to requests for replacement of lost assets, or to augment existing ones to support vital defense, humanitarian, or commercial needs. Launches can, and do, occur year round. Typical launches will be spread out in time; however, some of these launches may occur in clusters to meet a customer’s need.

Launch planning is a dynamic process, and launch delays, which can last from hours to more than a year, can and do occur. Launch delays occur due to variables ranging from technical issues to adverse weather. These factors have controlling influence over the numbers of vehicles by class that are actually launched in any given year from PSCA. Launches take place year round when all variables affecting launch decisions are in correct alignment.

AAC estimates the total number of vehicles that might be launched from PSCA over the course of the 5-year period covered by the requested rulemaking is 45, with an average of nine launches per year. However, in previous years, AAC did not launch the authorized number, but fewer or none in some years. Few launches are on contract at this time, so a specific distribution cannot be given. The first anticipated launch is estimated to occur in May 2017. Generally, the frequency will be separated by months or years; however, there may be limited instances of a rapid succession of launches in the course of hours, or days. Launches can, and do, occur year-round. The duration

of the possible disturbance will be at levels that may cause disturbances for only a few seconds tapering off to inaudible in a few minutes.

Specified Geographical Region

The PSCA facility occupies 3,717 acres of state-owned lands on the eastern side of Kodiak Island. Ugak Island lies approximately three to four mi to the south/southeast of the launch pads on Kodiak Island (see Figure 2 in AAC's application). Ugak Island is about two mi long by about one mi wide. The land slopes steeply upward from a spit on the island's northern most point, which has previously been (although not in consistently in recent years) used as a Steller sea lion (*Eumetopias jubatus*) haulout (see Figures 3 in AAC's application), to the southwest, culminating in cliffs that are approximately 1,000 feet (ft) in elevation. These cliffs run the entire length of the island's long axis. Eastward, the narrow Outer Continental Shelf (OCS) ends about 20 mi offshore, where it plunges precipitously to the North Pacific abyss. Near shore water depths to the immediate south and west of the island range to several hundred feet. Harbor seal haulouts are present mainly on Ugak Island's eastern shores, but also in smaller numbers at the northern end of the island (see Figure 3 in AAC's application).

Detailed Description of Activities

Orbital and suborbital launch vehicles (i.e., rockets, missiles) are launched from PSCA as part of the aerospace industry. A rocket launch operation takes years to plan and execute, as well as a large preparation effort weeks before the launch. In preparation for the launch, launch vehicles are checked, integrated, and erected. At this time, PSCA has two launch pads, designated as Launch Pad 1 (LP1) and Launch Pad 2 (LP2). LP1 is capable of launching small lift class vehicles and is 3.5 mi from the nearest point on Ugak Island. Small lift vehicles are generically categorized as being capable of carrying payloads of up to 4,400 pounds (lb). LP1 has a flame trench that directs exhaust (and much of the sound) horizontally eastward during liftoff, while LP2 is a flat pad. LP1 is larger and better suited for the larger vehicles within AAC's capabilities. The vehicles that produce the most sound are likely to be launched from LP1.

PSCA launch azimuths range from 110 degrees to 220 degrees. The eastern most launch azimuth of 110 degrees is within a few degrees of most orbital launches, and crosses the extreme eastern edge of Ugak Island where

several pinniped haulouts are found. Modeling done of Castor 120 space launches indicates the vehicle is passing through 45,000 ft altitude by the time it reaches the island about 70 seconds post launch (FAA 1996).

A typical launch vehicle is deployed by igniting the vehicle through a controlled means to send it on a very specific flight path. The ignition starts a burn on the ground that usually lasts less than several seconds after which the vehicle accelerates upward rapidly. During launch, burning fuel from the launch vehicle creates noise and light in the surrounding area. The components of a launch that may result in take are a source of noise and light on Kodiak Island created by the first stage vehicle motor, as the operation of launch vehicle engines produce sound pressures that may be high enough to cause a disturbance. Combustion noise and jet noise are the two main sources of sound pressures and are projected in all directions. The sound produced subsides to inaudible within a few minutes.

Another component of the AAC's launches includes security overflights. In the days preceding the launch, these occur approximately three times per day based on the long-term average. Flights associated with the launch will not approach occupied pinniped haulouts on Ugak Island by closer than 0.25 mi (0.4 kilometer (km)), and will maintain a vertical distance of 1,000 ft (305 meter (m)) from the haulouts when within 0.5 mi (0.8 km), unless indications of human presence or activity warrant closer inspection of the area to assure that national security interests are protected in accordance with law. Over the operational history of these flights, aircraft have been operated within the 0.25 mi limit on two occasions; both involved direct overflight of the Steller sea lion northwestern haulout spit, which was unoccupied each time the incursions occurred.

Description of the Sound Sources

This section contains a brief technical background on sound, the characteristics of certain sound types and the proposed sound sources relevant to AAC's specified activity.

Pulsed sound sources (e.g., sonic booms, explosions, gunshots, impact pile driving) produce signals that are brief (typically considered to be less than one second), broadband, atonal transients (ANSI 1986; Harris 1998; NIOSH 1998; ISO 2003; ANSI 2005) and occur either as isolated events or repeated in some succession. Pulsed sounds are all characterized by a relatively rapid rise from ambient

pressure to a maximal pressure value followed by a rapid decay period that may include a period of diminishing, oscillating maximal and minimal pressures, and generally have an increased capacity to induce physical injury as compared with sounds that lack these features.

Non-pulsed sounds can be tonal, narrowband, or broadband, brief or prolonged, and may be either continuous or non-continuous (ANSI 1995; NIOSH 1998). Some of these non-pulsed sounds can be transient signals of short duration but without the essential properties of pulses (e.g., rapid rise time). Examples of non-pulsed sounds include those produced by rocket launches and landings, vessels, aircraft, machinery operations such as drilling or dredging, and vibratory pile driving. The duration of such sounds, as received at a distance, can be greatly extended in a highly reverberant environment.

Sound travels in waves, the basic components of which are frequency, wavelength, velocity, and amplitude. Frequency is the number of pressure waves that pass by a reference point per unit of time and is measured in hertz (Hz) or cycles per second. Wavelength is the distance between two peaks of a sound wave; lower frequency sounds have longer wavelengths than higher frequency sounds and attenuate (decrease) more rapidly in shallower water. Amplitude is the height of the sound pressure wave or the 'loudness' of a sound and is typically measured using the decibel (dB) scale. A dB is the ratio between a measured pressure (with sound) and a reference pressure (sound at a constant pressure, established by scientific standards). It is a logarithmic unit that accounts for large variations in amplitude; therefore, relatively small changes in dB ratings correspond to large changes in sound pressure. When referring to sound pressure levels (SPLs; the sound force per unit area), sound is referenced in the context of underwater sound pressure to 1 microPascal (μPa). One pascal is the pressure resulting from a force of one newton exerted over an area of one square meter. The source level (SL) represents the sound level at a distance of 1 m from the source (referenced to 1 μPa). The received level is the sound level at the listener's position. Note that all underwater sound levels in this document are referenced to a pressure of 1 μPa and all airborne sound levels in this document are referenced to a pressure of 20 μPa .

Root mean square (rms) is the quadratic mean sound pressure over the duration of an impulse, and is calculated by squaring all of the sound

amplitudes, averaging the squares, and then taking the square root of the average (Urick 1983). Rms accounts for both positive and negative values; squaring the pressures makes all values positive so that they may be accounted for in the summation of pressure levels (Hastings and Popper 2005). This measurement is often used in the context of discussing behavioral effects, in part because behavioral effects, which often result from auditory cues, may be better expressed through averaged units than by peak pressures.

Sound exposure level (SEL; represented as dB re 1 $\mu\text{Pa}^2\text{-s}$) represents the total energy contained within a pulse, and considers both intensity and duration of exposure. For a single pulse, the numerical value of the SEL measurement is usually 5–15 dB lower than the rms sound pressure in dB re 1 μPa , with the comparative difference between measurements of rms and SEL measurements often tending to decrease with increasing range (Greene 1997; McCauley *et al.*, 1998). Peak sound pressure is the maximum instantaneous sound pressure measurable in the water at a specified distance from the source, and is represented in the same units as the rms sound pressure. Another common metric is peak-to-peak sound pressure (p-p), which is the algebraic difference between the peak positive and peak negative sound pressures. Peak-to-peak pressure is typically approximately 6 dB higher than peak pressure (Southall *et al.*, 2007).

Proposed Sound Sources for AAC

We now describe specific airborne acoustic sources for AAC. Sounds levels are different for each type of vehicle and further discussed below. Orbital and suborbital vehicles may be launched from several locations on site; however, no launch pads are closer to the haulouts on Ugak Island than LP1, from which the largest and, therefore, loudest vehicles will be launched. A description of each class of space launch and smaller launch vehicles are provided in the application and summarized here.

Peacekeeper Derivatives—Castor 120, Athena, Minotaur IV and V, and Taurus I

The Castor 120 was the base vehicle analyzed in the EA conducted by the FAA (US FAA 1996) in support of the

decision to issue a launch license to AAC. The Castor 120 uses solid fuel and produces about 371,000 lbs of thrust. The motor mass is about 116,000 lbs and the motor is 347 inches (in) long and 93 in wide. Modeling shows the rocket is about eight mi above the earth's surface when it overflies Ugak Island, and that the sonic boom reaches earth between 21 to 35 mi down range, which is past the OCS and over the North Pacific abyss (US FAA 1996). Sound pressure from the Castor 120 at the spit on Ugak Island's northern most point was measured to be 101.4 dBA (dBA can be defined as dB with A-weighting designed to match the average frequency response of human hearing and enables comparison of the intensity of noise with different frequency characteristics) SEL. None of the vehicles expected to be flown from PSCA over the five-year period covered by this proposed rule is known to be louder than the Castor 120.

Minuteman Derivative—Minotaur I

The Minotaur I is a small lift solid propellant space launch vehicle, the first stage of which is a modified Minuteman II. The first stage motor has a diameter of 4.5 ft. This launch vehicle has not yet been flown from PSCA. Sound pressure monitoring of two Minotaur I launches was accomplished at Vandenberg Air Force Base, California (VAFB). The data were collected 1.4 mi away from the launch point and show sound pressure levels of 104.9 to 107.0 dBA (SEL) at that distance. Sound energy at sea level decreases with the square of the distance, and given that the spit on Ugak Island's northern most point is two mi further (*i.e.*, spit is 3.5 mi from the launch point), the anticipated sound pressure levels from a Minotaur I at the spit on Ugak Island's northern most point would be less than that of the Castor 120.

Trident Derivatives—C-4 Trident I

The C-4 is a solid fueled vehicle and its first stage has a diameter of 6.1 ft, which is about 1.5 ft less than the Castor 120. Because it is significantly smaller in diameter than the Castor 120 and uses a similar fuel, it is anticipated that sound pressure levels at the spit on Ugak Island's northern most point

would be less than those of the Castor 120.

Polaris Derivatives—A-3 STARS

The Strategic Target System (STARS) utilizes the first stage of the Polaris A-3, which is solid fueled and measures 4.5 ft in diameter. Several STARS systems have been flown from PSCA. Recorded sound pressure levels at Ugak Island have ranged from 90.2 to 91.4 dBA (SEL).

Smaller Vehicles and Tactical Rocket Systems

A number of smaller missile systems, such as tactical or target vehicles, have the possibility of being flown from PSCA. Representative smaller systems range from about a foot in diameter up to about four foot in diameter. Sound pressures from these smaller systems are not available, but will be substantially less than those from the space launch and ballistic vehicles described and pose little potential for disturbance to marine mammals.

Even smaller systems ranging down in size to several inches in diameter will conceivably be flown as well. Small sounding and research rockets (defined as less than 5,000 lbs in weight) will be excluded from this request, including its mitigations and reporting, as the rockets' small shape and energy are too small to transmit an appreciable sound pressure on Ugak Island, and are expected to be well below the threshold for an active response.

Summary of Launch Vehicles

Table 1 provides motor diameters and representative sound pressures for various launch vehicles, some of which have been launched previously from PSCA. The listed vehicles include various ballistic launch vehicles and the small lift Castor 120 space launch vehicle, as well as smaller target/interceptor systems and tactical rocket systems. All PSCA sound measurements reported in Table 1 were taken at a distance of 3.5 mi from the launch pad at the nearest point of Ugak Island. It is important to note that the Castor 120 (previously launched from PSCA) is the loudest launch vehicle motor expected to be launched from PSCA over the 5-year period covered by the proposed regulations.

Notes:¹ Motor sound pressures from solid fueled motors, roughly, correlate to motor diameter.² Estimated.

Spent first stage rocket motors impact the ocean from 11 to more than 300 mi down range, depending on launch vehicle. Sonic booms reach the earth's surface beyond the OCS (US FAA 1996). Both falling first stage rocket motors and sonic booms are too far from land to take pinnipeds and are not expected to affect whales.

Description of Marine Mammals in the Area of the Specified Activity

Sections 4 and 5 of AAC's application and the monitoring reports contain

detailed information on the abundance, status, and distribution of the species on Ugak Island from surveys that they have conducted over the last decade. This information is summarized below and may be viewed in detail at <http://www.nmfs.noaa.gov/pr/permits/incidental/research.htm>. Additional information is available in the NMFS SARs for Alaska at <http://www.nmfs.noaa.gov/pr/sars/region.htm>.

Marine mammals under NMFS' jurisdiction that occur in the vicinity of

PSCA include the harbor seal, Steller sea lion, gray whale (*Eschrichtius robustus*), humpback whale (*Megaptera novaeangliae*) (Table 2). All are protected under the MMPA and the Steller sea lion and humpback whale are listed as threatened or endangered under the Endangered Species Act (ESA). Sea otters (*Enhydra lutris*) also occur in the area, but are managed by FWS; therefore, sea otters are not discussed further in this application.

TABLE 2—SUMMARY OF MMPA SPECIES

Common name	Scientific name	Status	Occurrence	Seasonality	Daily counts
Harbor seal	<i>Phoca vitulina</i>	MMPA	Common	Year-round, Trends toward Summer	32–1,500
Steller sea lion	<i>Eumetopias jubatus</i>	Endangered	Rare	Trends toward Summer	0–19
Gray whale	<i>Eschrichtius robustus</i> ..	MMPA	Seasonal	Spring and fall	0–32
Humpback whale	<i>Megaptera novaeangliae</i> .	Endangered	Seasonal	Summer and fall	0–4

Airborne noise is generally reflected at the sea surface outside of a 26 degrees cone extending downward from the ascending rocket (Richardson *et al.*, 1995); therefore, little sound energy passes into the sea across the air-water boundary. Submerged animals would have to be directly underneath the rocket to hear it, and given the hypersonic velocity of launch vehicles in the atmosphere, the duration of sounds reaching any cetacean would be discountable. In addition, all spent rocket motors will fall into the open ocean over deep water. Given the very

short time a cetacean is at the surface, direct impact from spent motors can be discounted as can any noise related impacts. Based on these reasons, NMFS does not anticipate take of cetaceans incidental to the specified activity; hence, they will not be discussed further.

Steller Sea Lions

After discussions with AAC and NOAA's Alaska Regional Office (AKR), it was determined there would be no take of Steller sea lions for the proposed activities. In the most recent National

Marine Mammal Laboratory (NMML) survey (NOAA's Alaska Fisheries Science Center) of a location within the action area (July 2015) and of Ugak Island, no sea lions were observed (Fritz *et al.*, 2015). Personal communication between AKR and L. Fritz (Research Fishery Biologist, NMML's Alaska Ecosystem Program) (September 28, 2016) indicate that sea lions have rarely been seen on Ugak Island in recent times. Under those surveys, sea lions were last seen at Ugak Island during the summer of 1994, when one sea lion was observed, and in December 1994, when

20 sea lions were documented (L. Fritz pers. comm. 2016). Sea lions were last seen in large numbers during the 1985–1986 surveys when more than 300 sea lions were observed. It was concluded that the habitat on Ugak Island is not highly suitable for sea lions (L. Fritz pers. comm. 2016).

In addition, AAC has been conducting regular aerial marine mammal surveys since 2006 as a requirement of their previous regulations and LOAs and has also documented Steller sea lion presence as rare. During their previous regulations (2011–2016), 17 aerial surveys were flown. During those surveys, Steller sea lions were only seen in one year with 19 observed in September 2011 at East Ugak Rock away from the Ugak spit haulout. This was the last sighting of Steller sea lions by AAC. Prior to 2011, sea lions were seen in small numbers on occasion during the 2006–2008 surveys. In 2006, 6 out of 14 surveys found sea lions, ranging from one to eight animals. In 2007, 1 out of 8 surveys revealed two sea lions. In 2008, 8 out of 8 surveys found one to five sea lions. AAC also noted that the Ugak spit haulout looks smaller than it has in the past (AAC 2016). The spit is under the influence of longshore currents and its geomorphology shifts over time (AAC 2016). This may now make it unsuitable as a haulout and it may have thus been abandoned by sea lions.

It was determined that take will not occur for Steller sea lions based on the

historic and recent survey data available. Sea lions are likely absent from the area (except a rare visitor) and the likelihood of an animal being present during the nine times a year a launch may be planned is highly unlikely. Therefore, Steller sea lions are not discussed further in these proposed regulations.

The only marine mammals anticipated to be affected by the specified activities and proposed as take for Level B harassment are harbor seals hauled out on Ugak Island and therefore they are the only marine mammal discussed further in these proposed regulations.

Harbor Seals

Harbor seals range from Baja California north along the west coasts of Washington, Oregon, California, British Columbia, and Southeast Alaska; west through the Gulf of Alaska, Prince William Sound, and the Aleutian Islands; and north in the Bering Sea to Cape Newenham and the Pribilof Islands. The current statewide abundance estimate for Alaskan harbor seals is 205,090 (Boveng *et al.* in press as cited in Muto *et al.*, 2015), based on aerial survey data collected during 1998–2011. In 2010, harbor seals in Alaska were partitioned into 12 separate stocks based largely on genetic structure (Allen and Angliss 2010). Harbor seals have declined dramatically in some parts of their range over the past few decades, while in other parts their

numbers have increased or remained stable over similar time periods.

Seals on Ugak Island are considered part of the South Kodiak stock (Table 3)—ranging from Middle Cape on the west coast of Kodiak Island southwest to Chirikof Island and east along the south coast of Kodiak Island to Spruce Island, including the Trinity Islands, Tugidak Island, Sitkinak Island, Sundstrom Island, Aiaktalik Island, Geese Islands, Two Headed Island, Sitkalidak Island, Ugak Island, and Long Island (Muto *et al.*, 2015). A significant portion of the harbor seal population within the South Kodiak stock is located at and around Tugidak Island off the southwest coast of Kodiak Island. Sharp declines in the number of seals present on Tugidak were observed between 1976 and 1998. The highest rate of decline was 21 percent per year between 1976 and 1979 (Pitcher 1990 as cited by Muto *et al.*, 2015). While the number of seals on Tugidak has stabilized and shown some evidence of increase since the decline, the population in 2000 remained reduced by 80 percent compared to the levels in the 1970s (Jemison *et al.*, 2006 as cited by Muto *et al.*, 2015). The current (2007–2011) estimate of the South Kodiak population trend is –461 seals per year, with a probability that the stock is decreasing of 0.72 (Muto *et al.*, 2015). Only the South Kodiak stock is considered in this application because other stocks occur outside the geographic area under consideration.

TABLE 3—HARBOR SEAL STATUS INFORMATION

Species	Stock	ES/MMPA status; Strategic (Y/N) ¹	Stock abundance (N _{min} , most recent abundance survey) ²	PBR ³	Annual M/SI ⁴	Relative occurrence/season of occurrence
Harbor seal	South Kodiak (Alaska).	—; N	19,199 (17,479; 2011)	314	128	Harbor seals are year-round inhabitants of Ugak Island, Alaska.

¹ Endangered Species Act (ESA) status: Endangered (E), Threatened (T)/MMPA status: Depleted (D). A dash (—) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR (see footnote 3) or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA is automatically designated under the MMPA as depleted and as a strategic stock.

² N_{min} is the minimum estimate of stock abundance. The most recent abundance survey that is reflected in the abundance estimate is presented; there may be more recent surveys that have not yet been incorporated into the estimate.

³ Potential biological removal, defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population size (OSP).

⁴ These values, found in NMFS' SARs, represent annual levels of human-caused mortality plus serious injury from all sources combined (e.g., commercial fisheries, subsistence hunting, ship strike). Annual M/SI often cannot be determined precisely and is in some cases presented as a minimum value. All values presented here are from the final 2015 Harbor Seal, Alaska SAR. (http://www.nmfs.noaa.gov/pr/sars/pdf/stocks/alaska/2015/ak2015_sehr.pdf).

Harbor seals are the most abundant marine mammal species found within the action area and present year-round. Based on AAC aerial survey counts from launch monitoring reports conducted since January 2006, approximately 97 percent of all harbor seals are found on

the eastern shore of Ugak Island, approximately 5 mi from LP1. The eastern shore is backed by high steep cliffs that reach up to 1,000 ft above sea level. These cliffs form a visual and acoustic barrier to rocket operations, and limit effects on the species.

Additionally, sound pressure recordings that showed surf and wind-generated sound pressures at sea level were generally in the greater than >70 dBA (SEL) range on the best weather and surf days (Cuccarese *et al.*, 1999; 2000); while sound pressures at sea level can

exceed 100 dBA (SEL) during inclement weather. Ugak's eastern shore is windward to prevailing winds and surf noise is routinely high. The remaining three percent of the harbor seals identified during surveys are found at the northern shore of Ugak Island. Harbor seals located on the northern

shore are not as protected from launch noise, and therefore may be harassed (Level B) incidentally to AAC's rocket launch activities. However, harbor seal abundance on the northern shore is limited due to the lack of suitable habitat (*i.e.*, few beaches). During 30 aerial surveys conducted by AAC during

six rocket launches from 2006–2008, no seals were observed on North Ugak Island on 19 occasions. During surveys when seals were present, the average abundance was 25 seals with a single day count of 125 individuals (Figure 1 below).

Figure 1. Harbor Seal Count Frequency at the Northwest Spit¹. ¹Frequency of harbor seal counts at the northwest spit during 30 aerial surveys conducted during pre- and post-launch aerial surveys, Kodiak Island, 2006–2008. Unpublished data collected by ABR, Inc. in association with R&M Consultants, Inc. Note: no seals were seen at the northwest spit during 19 of 30 surveys.

Because access to Ugak Island harbor seal haulouts is difficult, little is known of how seals use these habitats. Harbor seals generally breed and molt where they haulout, so it is assumed that both of these activities take place on Ugak Island. This assumption is supported by the fact that young seals have routinely been seen there during aerial surveys. These haulouts are the only haulouts used by harbor seals within the 6-mi radius area designated as being affected by launch operations.

Harbor seals haul out on rocks, reefs, beaches, and drifting glacial ice (Allen and Angliss 2014). They are non-migratory; their local movements are associated with tides, weather, season, food availability, and reproduction, as well as sex and age class (Allen and Angliss 2014; Boveng *et al.*, 2012;

Lowry *et al.*, 2001; Swain *et al.*, 1996). Pupping in Alaska generally takes place in May and June; while molting generally occurs from June to October.

Potential Effects of the Specified Activity on Marine Mammals

Marine mammals produce sounds in various contexts and use sound for various biological functions including, but not limited to (1) social interactions; (2) foraging; (3) orientation; and (4) predator detection. Interference with producing or receiving these sounds may result in adverse impacts. Audible distance, or received levels (RLs) will depend on the nature of the sound source, ambient noise conditions, and the sensitivity of the receptor to the sound (Richardson *et al.*, 1995). Type and significance of marine mammal reactions to noise are likely to be

dependent on a variety of factors including, but not limited to, the behavioral state (*e.g.*, resting, socializing, etc.) of the animal at the time it receives the stimulus, frequency of the sound, distance from the source, and the level of the sound relative to ambient conditions (Southall *et al.*, 2007). In general, marine mammal impacts from loud noise can be characterized as auditory and non-auditory. The generic thresholds described below (Table 4) are used to estimate when harassment may occur (*i.e.*, when an animal is exposed to levels equal to or exceeding the relevant criterion) in specific contexts. However, useful contextual information that may inform our assessment of effects is typically lacking and we consider these thresholds as step functions.

TABLE 4—CURRENT ACOUSTIC EXPOSURE CRITERIA FOR PINNIPEDS

Criterion	Definition	Threshold
Level B harassment (underwater) ...	Behavioral disruption	120 dB (non-impulse, continuous source, <i>i.e.</i> , combustion effects of launch vehicles) (rms).
Level B harassment (airborne)	Behavioral disruption	90 dB (harbor seals).

While low-frequency cetaceans and pinnipeds have been observed to respond behaviorally to low- and mid-frequency sounds (*e.g.*, Frankel, 2005), there is little evidence of behavioral responses in these species to high-frequency sound exposure (*e.g.*, Jacobs and Terhune 2002; Kastelein *et al.*, 2006). If a marine mammal does perceive a signal from an AAC acoustic source, it is likely that the response would be, at most, behavioral in nature.

As discussed above, launch operations are a major source of acoustic stimuli on Kodiak Island and can reach pinniped haulouts on Ugak Island. The activities proposed for taking of marine mammals under these regulations have the potential to cause harassment through acoustic stimuli. The PSCA launch activities create two types of noise: continuous (but short-duration) noise, due mostly to combustion effects of launch vehicles; and impulsive noise, due to sonic boom effects. Generally, noise is generated from four sources during launches: (1) Combustion noise from launch vehicle chambers; (2) jet noise generated by the interaction of the exhaust jet and the atmosphere; (3) combustion noise from the post-burning of combustion products; and (4) sonic booms. Launch noise levels are highly dependent on the type of first-stage booster and the fuel used to propel the vehicle. Therefore, there is a great similarity in launch noise production within each class size of launch vehicles. For the proposed activity, sonic booms will reach the earth's surface beyond the OCS (US FAA 1996) and are not anticipated to impact marine mammals and are therefore not discussed further.

Noise from rocket launches may cause the pinnipeds to lift their heads, move towards the water, or enter the water. It is unlikely there would be significant visual disturbance as space vehicles would be too far away to cause significant stimuli. Modeling done of Castor 120 space launches indicates the vehicle is passing through 45,000 ft altitude by the time it reaches Ugak Island about 70 seconds following launch (US FAA 1996). Therefore, we have determined that the possibility of marine mammal harassment from visual stimuli associated with the proposed activities is so low as to be considered

discountable and it is therefore not considered further.

Disturbance of pinnipeds caused by AAC's rocket launches would be expected to last for only short periods of time, separated by significant amounts of time in which no disturbance occurs. Because such disturbance is sporadic, rather than chronic, and of low intensity, individual marine mammals are unlikely to incur any detrimental impacts to vital rates or ability to forage and, thus, loss of fitness. Correspondingly, even local populations, are extremely unlikely to accrue any significantly detrimental impacts, much less the overall stocks of animals. To comply with their previous regulations, AAC attempted to collect video footage of pinnipeds during launches; however, weather, technical, and accessibility issues prevented video from being obtained. Therefore, no immediate responses of pinnipeds to AAC launch noise have been documented. AAC will attempt another method of documenting pinniped response to launch noise by using time-lapsed photography methods. Time lapse photography has already been implemented by NOAA for other pinnipeds (Steller sea lions) in harsh conditions of the western Aleutians of the U.S. with great success.

The infrequent (approximately nine times per year) and brief (approximately one minute as heard from Ugak Island) nature of these sounds that would result from a rocket launch is not expected to alter the population dynamics of harbor seals which utilize Ugak Island as a haulout site. Current harbor seal numbers on Ugak Island total around 1,500 (R&M 2009), which is an increase of about 1,100 since the 1990s (ENRI 1995–1998); therefore, population dynamics of harbor seals have also not been negatively impacted from past launches originating from PSCA.

Harbor seal pups could be present at times during AAC's rocket launches, but harbor seal pups are extremely precocious, swimming and diving immediately after birth and throughout the lactation period, unlike most other phocids which normally enter the sea only after weaning (Lawson and Renouf 1985; Cottrell *et al.*, 2002; Burns *et al.*, 2005). In summary, they found that the most critical bonding time is within

minutes after birth. As such, it is unlikely that infrequent disturbance resulting from AAC's rocket launches would interrupt the brief mother-pup bonding period within which disturbance could result in separation. NMFS recognizes the critical bonding time needed between a harbor seal mother and her pup to ensure pup survival and maximize pup health. Harbor seals pups are weaned from their mother within approximately four weeks; however, the most critical bonding time is immediately (minutes) after birth. Lawson and Renouf (1987) conducted an in-depth study to investigate harbor seal mother/pup bonds in response to natural and anthropogenic disturbance. In summary, they found that a mutual bond is developed within five minutes of birth, and both the mother and pup play a role in maintaining contact with each other. The study showed a bilateral bond, both on land and in the water, and that mothers would often wait for or return to a pup if it did not follow her. Pups would follow or not move away from their mother as she approached. Most notably, mothers demonstrated overt attention to their pups while in the water and during times of disturbance on the nursery. Increased involvement by the mothers in keeping the pairs together during disturbances became obvious as they would wait for, or return to, their young if the pups fell behind.

Given that pups are precocious at birth, bonds between mothers and pups are known to form within minutes of birth, and other characteristics of mother/pup bonding described above, NMFS has preliminarily determined that Level A harassment or mortality is unlikely to occur and can therefore be discounted.

Finally, PSCA has conducted up to three security overflights per day in the days preceding a launch. Several studies of both harbor seals and Steller sea lions cited in Richardson *et al.* (2005), suggest that these animals respond significantly less to overflights of both planes and helicopters that occur above 305 m (0.2 mi). NMFS does not anticipate harassment from overflights to occur as they generally would remain at least 0.25 mi from a haulout; however, if pilot or crew notice overt responses from

pinnipeds (e.g., flushing) to aircraft, this would be noted and reported to NMFS in the flight report. Observations made of any animals displaced by a security overflight are reported to the environmental monitoring team for inclusion in their report of monitoring results.

The following information provides background on marine mammal responses to launch noise that has been gathered under previous LOAs and Incidental Harassment Authorizations for similar rocket launch activities, including at VAFB in California, and been used to inform our analysis for AAC's proposed rocket launch activities.

Marine Mammal Response to Launch Noise at VAFB

Seals may leave a haulout site and enter the water due to the noise created by launch vehicles during launch operations. The percentage of seals leaving a haulout increases with noise level up to approximately 100 dB ASEL (A-weighted SEL), after which almost all seals leave, although data have shown that some percentage of seals have remained on shore during launches. Time-lapse video photography during four launch events at VAFB revealed that the seals that reacted to the launch noise, but did not leave the haulout were all adults. Because adult seals reacted less strongly than younger seals, this suggests that adults had possibly experienced other launch disturbances and had habituated to them.

The louder the launch noise, the longer it took for seals to begin returning to the haulout site and for the numbers to return to pre-launch levels. Seals may begin to return to the haulout site within 2–55 min of the launch disturbance, and the haulout site usually returned to pre-launch levels within 45–120 min. In two past Athena IKONOS launches with ASELs of 107.3 and 107.8 dB at the closest haulout site, seals began to haulout again approximately 16–55 min post-launch (Thorson *et al.*, 1999a; 1999b). In contrast, noise levels from an Atlas launch and several Titan II launches had ASELs ranging from 86.7 to 95.7 dB at the closest haulout, and seals began to return to the haulout site within 2–8 min post-launch (Thorson and Francine 1997; Thorson *et al.*, 2000).

Auditory Brainstem Response Tests at VAFB

To justify that the potential for permanent threshold shift (PTS) is unlikely, Auditory Brainstem Response (ABR) testing on 21 seals during rocket launches at VAFB was conducted.

VAFB launches create sonic booms over pinniped haulouts, therefore, noise from these launches are much louder than what would be audible at haulouts on Ugak Island (sonic booms are not audible from Ugak Island). To determine if harbor seals experience changes in their hearing sensitivity as a result of launch noise at VAFB, ABR testing was conducted on harbor seals for four Titan IV launches, one Taurus launch, and two Delta IV launches by the USAF in accordance with issued scientific research permits. Following standard ABR testing protocol, the ABR was measured from one ear of each seal using sterile, sub-dermal, stainless steel electrodes. A conventional electrode array was used, and low-level white noise was presented to the non-tested ear to reduce any electrical potentials generated by the non-tested ear. A computer was used to produce the click and an 8 kilohertz (kHz) tone burst stimuli, through standard audiometric headphones. Over 1,000 ABR waveforms were collected and averaged per trial. Initially the stimuli were presented at SPLs loud enough to obtain a clean reliable waveform, and then decreased in 10 dB steps until the response was no longer reliably observed. Once response was no longer reliably observed, the stimuli were then increased in 10 dB steps to the original SPL. By obtaining two ABR waveforms at each SPL, it was possible to quantify the variability in the measurements.

Good replicable responses were measured from most of the seals, with waveforms following the expected pattern of an increase in latency and decrease in amplitude of the peaks, as the stimulus level was lowered. One seal had substantial decreased acuity to the 8 kHz tone-burst stimuli prior to the launch. The cause of this hearing loss was unknown, but was most likely congenital or from infection. Another seal had a great deal of variability in waveform latencies in response to identical stimuli. This animal moved repeatedly during testing, which may have reduced the sensitivity of the ABR testing on this animal for both the click and 8 kHz tone burst stimuli. Two of the seals were released after pre-launch testing but prior to the launch of the Titan IV B–34, as the launch was delayed for many days, and five days is the maximum duration permitted to hold the seals for testing.

Detailed analysis of the changes in waveform latency and waveform replication of the ABR measurements for the 14 seals showed no detectable changes in the seals' hearing sensitivity as a result of exposure to the launch noise. The delayed start (1.75 to 3.5 hrs

after the launches) for ABR testing allows for the possibility that the seals may have recovered from a temporary threshold shift (TTS) before testing began. However, it can be said with confidence that the post-launch tested animals did not have permanent hearing changes due to exposure to the launch noise from the Titan IV, Taurus, or Delta IV SLVs. These results are consistent with previous NMFS conclusions for such activities in its prior rulemakings (63 FR 39055, July 21, 1998; 69 FR 5720, February 6, 2004; 74 FR 6236, February 6, 2009). Given the distance from the pad area to Ugak Island and the measured sound levels from the Castor 120 (101.4 dB), for the loudest space vehicle used at the PSCA, pinniped auditory injury is not anticipated. Therefore, PTS is not a concern for pinnipeds exposed to launch noise from the PSCA as noise levels at this location are below those experienced during the VAFB launches, and sonic booms are not audible on Ugak Island.

Summary of Marine Mammal Impacts from Launches

NMFS does not anticipate a significant impact on any of the species or stocks of marine mammals from launches from PSCA. The effects of the activities are expected to be limited to short-term startle responses and localized behavioral changes. In general, if the received level of the noise stimulus exceeds both the background (ambient) noise level and the auditory threshold of the animals, and especially if the stimulus is novel to them, there may be a behavioral response. The probability and degree of response will also depend on the season, the group composition of the pinnipeds, and the type of activity in which they are engaged. Minor and brief responses, such as short-duration startle or alert reactions, are not likely to constitute disruption of behavioral patterns, such as migration, nursing, breeding, feeding, or sheltering and would not cause injury or mortality to marine mammals. On the other hand, startle and alert reactions accompanied by large-scale movements, such as stampedes into the water of hundreds of animals, may rise to the degree of Level A harassment because they could result in injury of individuals. In addition, such large-scale movements by dense aggregations of marine mammals or at pupping sites could potentially lead to takes by injury or death. However, there is no potential for large-scale movements leading to serious injury or mortality near for the harbor seals at the northern end of Ugak Island because, historically, the number of harbor seals hauled out near the site

is less than 30 individuals, and these animals do not stampede, but flush into the water. Based on similar observational data (at VAFB) and for the largest launch vehicle, the Castor 120 (approximately 101.4 dBA), NMFS anticipates that if seals are disturbed there may be a startle response and flush into the water. Harbor seals would likely return to haulout sites on Ugak Island within 2 to 55 minutes of the launch disturbance. No PTS is anticipated, and the likelihood of TTS is low. In addition, because aircraft will fly at altitudes greater than 305 m (1,000 ft) around pinniped haulouts and rookeries, animals are not anticipated to react to security overflights.

The potential effects to marine mammals described in this section of the document do not take into consideration the proposed monitoring and mitigation measures described later in this document (see the "Proposed Mitigation" and "Proposed Monitoring and Reporting" sections) which, as noted, should affect the least adverse impact practicable on affected marine mammal species and stocks.

Anticipated Effects on Marine Mammal Habitat

Solid fuel rocket boosters would fall into the ocean away from any known or potential haulouts. All sonic booms that reach the earth's surface would be expected to occur over open ocean beyond the OCS. Airborne launch sounds would mostly reflect or refract from the water surface and, except for sounds within a cone of approximately 26 degrees directly below the launch vehicle, would not penetrate into the water column. The sounds that would penetrate would not persist in the water for more than a few seconds. Overall, rocket launch activities from PSCA would not be expected to cause any impacts to habitats used by marine mammals, including pinniped haulouts, or to their food sources.

Proposed Mitigation

In order to issue an incidental take authorization (ITA) under section 101(a)(5)(A) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of affecting the least adverse impact practicable on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses.

To minimize impacts on pinnipeds at haulout sites, the AAC has proposed, as part of their specified activities, the

following mitigation measures: (1) Security overflights immediately associated with the launch would not approach occupied pinniped haulouts on Ugak Island by closer than 0.25 mi (0.4 km), and would maintain a vertical distance of 1,000 ft (305 m) from the haulouts when within 0.5 mi (0.8 km), unless indications of human presence or activity warrant closer inspection of the area to assure that national security interests are protected in accordance with law; (2) if launch monitoring or quarterly aerial surveys indicate that the distribution, size, or productivity of the potentially affected pinniped populations has been affected due to the specified activity, the launch procedures and the monitoring methods would be reviewed, in cooperation with NMFS, and, if necessary, appropriate changes may be made through modifications to a given LOA, prior to conducting the next launch of the same vehicle under that LOA; (3) AAC will purchase and install time-lapsed photography systems in order to survey each of the three pinniped haulout locations around Ugak Island to confirm the abundance of pinnipeds at the haulouts and allow for the more complete surveying efforts. The number of camera systems, equipment capabilities, placement of the systems to be used, and the daily photo frequency will be determined through a cooperative effort between AAC, NMFS, and field experts; (4) AAC will conduct a correlation study in coordination with NMFS. The purpose of the study is to evaluate the effectiveness of the time-lapsed photography systems (specifically, the accuracy of the photography systems compared with aerial count surveys). The results of this study will determine the need to continue aerial surveys. The study will be conducted through a minimum of five launches; and (5) All Castor 120 equivalent launches will be conducted at LP1 which is equipped with a concrete and water-filled flame trench. The purpose of the flame trench is to direct smoke away from the launch pad and to absorb light and noise at their respective peaks (*i.e.* lift-off) to reduce the noise created during each launch.

NMFS has carefully evaluated AAC's proposed mitigation measures and considered a range of other measures in the context of ensuring that NMFS prescribes the means of affecting the least adverse impact practicable on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one another: (1) The manner

and the degree to which the successful implementation of the measure is expected to minimize adverse impacts to marine mammals; (2) the proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and (3) the practicability of the measure for applicant implementation, including consideration of personnel safety, and practicality of implementation. The proposed mitigation measures take scientific studies (Richardson *et al.*, 2005) of overflight effects on pinnipeds into consideration. Lastly, the adaptive nature of the proposed mitigation measures allow for adjustments to be made if launch monitoring or quarterly aerial surveys indicate that impacts to the distribution, size, or productivity of pinniped populations are occurring.

Based on our evaluation of the applicant's proposed measures, as well as other measures considered by NMFS or recommended by the public in the prior rulemaking, NMFS has preliminarily determined that the proposed mitigation measures provide the means of affecting the least adverse impacts practicable on marine mammals species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Proposed Monitoring and Reporting

In order to issue an ITA for an activity, Section 101(a)(5)(A) of the MMPA states that NMFS must set forth "requirements pertaining to the monitoring and reporting of such taking." The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for ITAs must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present. AAC proposes the following for monitoring and reporting: (1) Deploy time-lapsed photography systems designed to monitor pinniped abundance and detect pinniped responses to rocket launches conducted under these regulations. AAC will monitor the effectiveness of these systems, comparing the results to aerial surveys from at least five launches; (2) Ensure the time-lapsed photography systems will be in place and operating in locations that allow for visual monitoring of all three pinniped haulouts during launches; (3) Relocate the time-lapsed photography systems in cooperation with NMFS after five launches if the system is not accurately capturing all three pinniped haulouts and total pinniped abundance during

the launches; (4) Review and log pinniped presence, abundance, behavior, and re-occupation time from the data obtained from the time-lapsed photography systems and report results to NMFS within 90 days of the first five launches under this system; (5) Conduct one pre-launch aerial survey and one post-launch aerial survey for each launch similar to previous years. AAC will conduct a minimum of one aerial survey annually (in the event no launch occurs during a calendar year); and (6) Conduct quarterly aerial surveys, ideally during mid-day coinciding with low tide, to obtain data on pinniped presence, abundance, and behavior within the action area to determine long-term trends in pinniped haulout use. Results of these quarterly surveys will be reported once as part of the year-end summary report. Data collected would include number of seals per haulout, by age class when possible, and if any disturbance behavior is noted from aircraft presence.

Estimated Take by Incidental Harassment

The following text describes the potential range of takes possible of harbor seals on PSCA during launches. AAC estimates that up to 45 launches may occur from PSCA over the course of the 5-year period covered by the proposed rulemaking. Annually, AAC requests nine launches to be authorized. AAC estimates that no more than one launch would occur over a 4-week period, and it is likely the frequency of launches would be less than this estimate.

Harbor seals of all age classes hauled out on the northern shores of Ugak Island may become alert or flush into the water in response to rocket to launches from PSCA. The total number of harbor seals present on Ugak Island ranges up to a maximum of approximately 1,500 seals in the last ten years, and 1,150 seals in the last five years. However, approximately 97 percent of harbor seals are found at the eastern shore haulout where they are sheltered from launch effects by the 1,000 ft cliffs that stand between this haulout and PSCA. Only about three percent of harbor seals use the northern haulout across from PSCA because of the lack of suitable beaches. When present, the majority of counts at the northern haulout were of less than 25 individuals (Figure 1). An exceptional one-time high count of about 125 seals occurred within the last 10 years. The mean number of harbor seals present at the northern haulout is 10 seals with a standard deviation of 25 seals. Therefore, a representative harbor seal

population at the northern haulout of 35 seals (the mean plus one standard deviation) is used for the following take estimate.

Assuming that all 35 harbor seals at the northern haulout are expected to be present and taken by Level B Harassment during a launch, and that all 9 launches are of the Castor 120 (loudest space vehicle), a maximum of 315 harbor seals annually could be taken by Level B harassment with 1,575 harbor seals taken over the 5-year effective period of the regulations. Depending on the type of rocket being launched, the time of day, time of the year, weather conditions, tide and swell conditions, the number of seals that may be taken will range between 0 and 35 per launch. Launches may occur at any time of the year, so any age classes and gender may be taken.

SELs from the loudest launch may reach approximately 101.4 dBA at the traditional Steller sea lion haulout (approximately 3.5 mi from the launch site) which is similar distance to the northern beaches where harbor seal haulout (approximately 4 mi from the launch site). Based on this recorded level and the fact that audible launch noise would be very short in duration, harbor seals are not expected to incur PTS, and the chance of TTS is low to unlikely. No injury or mortality of harbor seals is anticipated, nor would any be authorized. Therefore, NMFS proposes to authorize harbor seal take, by Level B harassment only, incidental to launches from PSCA.

As discussed above, security overflights associated with a launch would not closely approach or circle any pinniped. Therefore, incidental take from this activity is not anticipated. Should the pilot or crew on the plane observe pinnipeds reacting to their presence, the plane would increase altitude and note the number of animals reacting to the plane. These data would be included in AAC's marine mammal reports.

Previous Monitoring

The primary monitoring method has involved conducting aerial surveys along set transect lines to observe and count harbor seals and Steller sea lions. Marine mammals other than harbor seals and Steller sea lions, although observed and recorded, were not specifically targeted by the launch-related aerial surveys. Marine mammal abundance and distribution were recorded during aerial surveys flown in a single-engine fixed-wing airplane with floats. The aerial survey route was designed for harbor seals and Steller sea lions and was flown using a Global

Positioning System (GPS) for navigation. All surveys were intended to be flown within two hours of the daytime low tide and during mid-day, when haulout attendance peaks for harbor seals.

The aerial survey schedule during the formal monitoring period consisted of daily surveys one day prior to the launch, immediately following the launch (on the launch day), and each day of the three days following the launch date, weather conditions permitting (NMFS 2008). Two additional surveys were often conducted prior to the formal monitoring period at AAC's discretion. The two additional surveys were conducted to balance the pre-launch sample size with the three post-launch surveys to allow calculation of the variance in pre-launch counts for subsequent statistical analysis. The aerial surveys were flown 1,000 ft above sea level at 80–90 nautical mph and the flight line was kept ≥ 0.25 mi from known haulouts. Digital photographs of groups of pinnipeds (generally greater than 10 pinnipeds) were taken with a Nikon D70 camera (equipped with a 70 to 300 millimeter zoom lens) or a Canon Powershot S5 camera with image stabilized zoom. Images were reviewed on a personal computer and counts of pinnipeds were summarized from sets of overlapping images. All counts greater than 15 pinnipeds were made from digital images taken from the aircraft, unless the images were blurred or underexposed, in which cases the visual estimates were used.

Foul weather, daylight considerations, launch timing, and timing of tidal flux have all contributed to the difficulty in collecting the data. Foul weather precludes aerial surveys primarily due to visibility, excessive turbulence, and other dangerous conditions. In addition, rockets can often be launched during periods of weather that are not conducive to operation of small aircraft.

Total counts on Ugak Island (both the northern and eastern haulouts combined) have increased steadily and remained stable since the 1990s from several hundred (ENRI 1995–1998) up to a peak of about 1,500 in the last 10 years (R&M 2008). The number of harbor seals tallied at Ugak Island during the July 2008 FTX–03 surveys reached a record for monitoring surveys at 1,534 seals (R&M 2008). Table 5 presents daily counts, by species, of the marine mammals that have been observed during launch-related environmental monitoring activities from 2006–2008. Seal numbers in Table 5 are highest during August and September because they were conducted during the annual molt, when maximal

numbers of harbor seals tend to haulout
(Calambokidis *et al.*, 1987).

Notes:

1. Steller sea lions pup mid-May to mid-July and breed late-May to late-July at rookeries. Molt is late July to early December (Hoover 1988). Haulouts are used for resting. Ugak Island is a haulout not a rookery. The Ugak Haulout has been used in the past between July and October.

2. Harbor seals pup from mid-May to late-June (Jemison and Kelly 2001) and molt from June to October. Both periods contain peaks in haulout attendance.

3. Five individuals observed by aerial survey, eight captured on unmanned video.

During the most effective period of the recent regulations (2011–2016), there were 17 quarterly surveys flown (Table 6). An average of 644 harbor seals was observed with a range of 32 to 1133 seals and standard deviation of 307 seals. From the first quarter of the calendar year through the fourth, the average number of seals was as follows: 441, 698, 608, and 810, respectively (AAC 2016).

5. R&M et al. 2008. Environmental Monitoring Report FTX–03 Launch. Report for Alaska Aerospace Development Corporation. Anchorage, Alaska. 29pp + Appendices.

6. Visual count; launch coincided with execution of LOA that requires photographic documentation of seal numbers.

7. Counts from photographs.

8. Data are not representative of launch period. Sole pre-launch survey was done two days prior to launch (weather precluded surveys on launch day), and first post launch survey was done two days after launch due to adverse weather conditions.

9. Survey occurred at high tide when haulouts were flooded.

Analyses and Preliminary Determinations

Negligible Impact Analysis

NMFS has defined “negligible impact” in 50 CFR 216.103 as “. . . an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.*, population-level effects). An estimate of the number of Level B harassment takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be “taken” through behavioral harassment, we consider other factors, such as the likely nature of any responses (*e.g.*, intensity, duration), the context of any responses (*e.g.*, critical reproductive time or location, migration), as well as the number and nature of estimated Level A

harassment takes, the number of estimated mortalities, and effects on habitat. In making a negligible impact determination, NMFS considers (and should explicitly address whenever possible) the following:

(1) The number of anticipated injuries, serious injuries, or mortalities;

(2) The number, nature, and intensity, and duration of Level B harassment (all relatively limited);

(3) The context in which the takes occur (*i.e.*, impacts to areas of significance, impacts to local populations, and cumulative impacts when taking into account successive/ contemporaneous actions when added to baseline data);

(4) The status of stock or species of marine mammals (*i.e.*, depleted, not depleted, decreasing, increasing, stable, impact relative to the size of the population);

(5) Impacts on habitat affecting rates of recruitment/survival; and

(6) The effectiveness of monitoring and mitigation measures.

For reasons stated previously in this document, the specified activities are

not likely to cause long-term behavioral disturbance, abandonment of the haulout area, serious injury, or mortality because:

(1) The possibility of injury, serious injury, or mortality may reasonably be considered discountable;

(2) The effects of the activities are expected to be limited to short-term startle responses and localized behavioral changes;

(3) The considerable evidence, based on over 10 years of monitoring data, suggesting no long-term changes in the use by harbor seal haulouts in the project area as a result of launch operations. Launches will not occur more than a maximum of nine times per year over the next five years. In past years, AAC has conducted zero to two launches on an annual basis. NMFS has analyzed the specified activity to include disturbance events of up to nine launches per year as AAC anticipate the capability to carry out more efficient mission turn-around time over the duration of the proposed regulations;

(4) Based on aerial survey data, the harbor seal population on Ugak Island has increased and is stable. As discussed previously, the population of harbor seals on Ugak Island has increased steadily from several hundred in the 1990s (ENRI 1995–1998) to a peak of about 1,500 in 2008 (R&M 2007a, 2007b, 2008, 2009). Therefore, NMFS does not believe there would be any long-term impact on the health of the population. Given harbor seals are considered a species that is easily disturbed, their resilience to launch effects suggest impacts from launches are short-term and negligible;

(5) Solid fuel rocket boosters would fall into the ocean away from any known or potential haulouts. All sonic booms that reach the earth's surface would be expected to occur over open ocean beyond the OCS. Airborne launch sounds would mostly reflect or refract from the water surface and, except for sounds within a cone of approximately 26 degrees directly below the launch vehicle, would not penetrate into the water column. The sounds that would penetrate would not persist in the water for more than a few seconds. Overall, rocket launch activities from PSCA would not be expected to cause any impacts to habitats used by marine mammals, including pinniped haulouts, or to their food sources or would impact their survival, and;

(6) Mitigation measures to reduce noise from launches once in the air are virtually impossible; however, the noise generated on the launch pad during ignition moves through a deep trench (called a flame trench or flame bucket) that diverts the noise/exhaust toward the northwest (away from Ugak Island).

In addition, improved monitoring would better enable AAC and NMFS to determine if impacts from rocket launches are having short-term and long-term impacts on the present day pinniped populations on Ugak Island. The time-lapse photography system would be able to detect impacts (takes) from launch exposure, including the number of pinnipeds flushing at the haulout sites, while quarterly aerial surveys would aid in determining long-term trends of pinniped abundance. The proposed monitoring measures contained within this notice are specifically designed to, among other things, determine if Level B Harassment is occurring due to rocket launches from AAC.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures,

NMFS preliminarily finds that space vehicle and missile launches at the PSCA will have a negligible impact on the affected marine mammal species or stock.

Small Numbers Analysis

The numbers of proposed authorized takes would be considered small relative to the relevant stocks or populations, eight percent for harbor seals. But, it is important to note that the number of expected takes does not necessarily represent of the number of individual animals expected to be taken. Our small numbers analysis accounts for this fact. Multiple exposures to Level B harassment can accrue to the same individuals over the course of an activity that occurs multiple times in the same area (such as AAC's proposed activity). This is especially likely in the case of species that have limited ranges and that have site fidelity to a location within the project area, as is the case with harbor seals.

As described above, harbor seals are non-migratory, rarely traveling more than 50 km from their haulout sites. Thus, while the estimated abundance of the South Kodiak stock of harbor seals is 19,199 (Muto *et al.*, 2015), a substantially smaller number of individual harbor seals is expected to occur within the project area. We expect that, because of harbor seals' site fidelity to locations at Ugak Island, and because of their limited ranges, the same individuals are likely to be taken repeatedly over the course of the proposed activities. Therefore, the number of exposures to Level B harassment over the course of proposed authorization (the total number of takes described in the Estimated Take by Incidental Harassment section) is expected to accrue to a much smaller number of individuals. The maximum number of harbor seals expected to be taken by Level B harassment over the 5-year regulations is 1,575. As we believe the same individuals are likely to be taken repeatedly over the course of the proposed activities, we use the estimate of 1,575 individual animals taken for the purposes of estimating the percentage of the stock abundance likely to be taken.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, we preliminarily find that small numbers of marine mammals will be taken relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

Several communities on Kodiak Island use harbor seals (and Steller sea lions) for subsistence uses. The communities closest to Ugak Island are Old Harbor and Kodiak City; each is over 35 miles from Ugak Island. The Alaska Native Harbor Seal Commission quantified the Kodiak area subsistence take of harbor seals (and Steller sea lions) in a report issued in 2011. Within the last ten years, 2011, 2008, 2007, and 2006 were surveyed. On average, during the years surveyed in the last 10 years, Kodiak city took 35.3 harbor seals and Old Harbor took 35.2 harbor seals annually. Specific locations of take are not mentioned in this document.

Based on the distance from each community and the opportunities closer to each community, either a small fraction of the averages provided, or no take can be estimated from each community. It is possible that some fraction of the average number of harbor seals taken listed above were taken from Ugak Island specifically, but there is no documentation to support that conclusion.

There is no expectation that harbor seals will abandon sealing grounds, based on AAC's launches or the launches at other launch sites (*e.g.*, VAFB). In addition, no permanent barriers will be placed between the subsistence hunter and pinnipeds on Ugak Island. There are temporary closures of Ugak Island for a portion of a 24-hour day during each launch.

AAC will consult (as they have for previous regulations) with the Alaska Native Harbor Seal Commission as well as the Kodiak communities before the issuance of any final regulations to ensure project activities do not impact relevant subsistence uses of marine mammals implicated by this action.

Endangered Species Act

There is one marine mammal species under NMFS' jurisdiction that is listed as endangered under the ESA with confirmed or possible occurrence in the action area, the Steller sea lion. NMFS and AAC consulted internally with AKR under the ESA on its proposed issuance of AAC's 2017 MMPA regulations and subsequent LOAs. It was determined that no effect would occur from the proposed activities; therefore, ESA consultation, formal or informal is not required.

National Environmental Policy Act

In 1996, the FAA prepared an EA, and subsequently issued FONSI, for AAC's proposal to construct and operate a

launch site at Narrow Cape on Kodiak Island, Alaska. Since 1998, AAC has provided monitoring reports related to noise and marine mammal impacts associated with ongoing rocket launches from PSCA. After reviewing the new information contained in the monitoring reports, and considering the MMC's comments that impacts to harbor seals should be more comprehensively addressed, NMFS decided that a more current environmental analysis was necessary. In 2005, NMFS prepared an EA and associated FONSI on the Promulgation of Regulations Authorizing Take of Marine Mammals Incidental to Rocket Launches at Pacific Spaceport Complex Alaska, Kodiak Island, Alaska, and the Issuance of Subsequent Letters of Authorization. NMFS found that the promulgation of a 5-year rulemaking in 2006 and issuance of subsequent LOAs would not significantly impact the quality of the human environment and therefore issued a FONSI. Accordingly, preparation of an Environmental Impact Statement or Supplemental Environmental Impact Statement for this action was not necessary. A more recent EA and FONSI was completed in April 2016 that addresses the potential environmental impacts of the proposed action where the FAA would modify the AAC launch site operator license for the PSCA. The EA evaluates the potential environmental impacts of modifying the launch site operator license to include medium-lift launch capability at PSCA with the addition of new infrastructure necessary to support these types of launches, including the construction of a launch pad and associated facilities. NMFS has determined that the proposed action was fully analyzed in the previous NEPA documents, particularly the 2016 EA, and NMFS will adopt the 2016 EA as necessary for the final issuance of the regulations and subsequent LOA(s).

Classification

Pursuant to the procedures established to implement section 6 of Executive Order 12866, the Office of Management and Budget has determined that this proposed rule is not significant.

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA), the Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. A description of this rule and its purpose are found in the preamble to this

proposed rule, and are not repeated here. The provisions of the rule will apply directly only to AAC. AAC is a public corporation of the State of Alaska involved in space vehicles and guided missiles, and it employs approximately 45 people. SBA's regulations implementing the RFA have no "small" size standards for public administration entities that administer and oversee government programs and activities that are not performed by private establishments. Accordingly, no small entity will be affected by this proposed rule.

The AAC may use a small number of contractors to provide services related to the proposed reporting requirements. However, none of the authorizations or requirements imposed by this action will result in any of AAC's contractors expending any resources in order to be in compliance with these proposed regulations. Thus, the rule would have no effect, directly or indirectly, on these small entities.

Because AAC is the only entity that would be directly affected by this proposed regulation and because the effects of this regulation would impose no costs on any of the contractors—whether they are large or small entities—there will be no significant economic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis is necessary, and none has been prepared.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a currently valid OMB control number. This proposed rule contains a collection-of-information requirement subject to the provisions of the PRA. This collection has been approved previously by OMB under section 3504(b) of the PRA issued under OMB control number 0648–0151, which includes applications for LOAs and reports.

List of Subjects in 50 CFR Part 217

Exports, Fish, Imports, Indians, Labeling, Marine mammals, Penalties, Reporting and record-keeping requirements, Seafood, Transportation.

Dated: January 9, 2017.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR part 217 is proposed to be amended as follows:

PART 217—REGULATIONS GOVERNING THE TAKE OF MARINE MAMMALS INCIDENTAL TO SPECIFIED ACTIVITIES

■ 1. The authority citation for part 217 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*, unless otherwise noted.

■ 2. Add subpart H to part 217 to read as follows:

Subpart H—Taking of Marine Mammals Incidental to Space Vehicle and Missile Launches at Pacific Spaceport Complex Alaska (PSCA), Alaska by Alaska Aerospace Corporation (AAC).

Sec.

217.70 Specified activity and specified geographical region.

217.71 [Reserved]

217.72 Permissible methods of taking.

217.73 Prohibitions.

217.74 Mitigation.

217.75 Requirements for monitoring and reporting.

217.76 Letter of Authorization.

217.77 Renewal of a Letter of Authorization.

217.78 Modifications to a Letter of Authorization.

Subpart H—Taking of Marine Mammals Incidental to Space Vehicle and Missile Launches at Pacific Spaceport Complex Alaska (PSCA), Kodiak Island, Alaska by Alaska Aerospace Corporation (AAC).

§ 217.70 Specified activity and specified geographical region.

(a) Regulations in this subpart apply only to the AAC at the PSCA on Kodiak Island, Alaska, and those persons it authorizes to conduct activities on its behalf for the taking of marine mammals that occurs in the area outlined in paragraph (b) of this section and incidental to conducting up to nine space vehicle launches each year from PSCA, for a total of 45 launches over the 5-year period of these regulations.

(b) The incidental take of marine mammals under the activity identified in paragraph (a) of this section is limited to 315 harbor seals (*Phoca vitulina richardii*) of all ages annually (total of 1,575 seals over the 5-year period of these regulations).

§ 217.71 [Reserved]**§ 217.72 Permissible methods of taking.**

Under a Letter of Authorization (LOA) issued pursuant to § 216.106 of this chapter and § 217.70, the holder of the LOA (herein after AAC) and its contractors may incidentally, but not intentionally, take harbor seals by Level B harassment in the course of conducting space vehicle and missile launch activities within the area described in § 217.70(a), provided all terms, conditions, and requirements of these regulations and such Letter of Authorization are complied with.

§ 217.73 Prohibitions.

Notwithstanding takings contemplated in § 217.70(b) and authorized by an LOA issued under § 216.106 of this chapter and § 217.76, no person in connection with the activities described in § 217.70 may:

- (a) Take any marine mammal not specified in § 217.70(b);
- (b) Take any marine mammal specified in § 217.70(b) other than by incidental, unintentional Level B harassment;
- (c) Take a marine mammal specified in § 217.70(b) if NMFS determines such taking results in more than a negligible impact on the species or stocks of such marine mammal; or
- (d) Violate, or fail to comply with, the terms, conditions, and requirements of this subpart or an LOA issued under § 216.106 of this chapter and § 217.76.

§ 217.74 Mitigation.

(a) When conducting operations identified in § 217.70(a), the mitigation measures contained in the LOA issued under § 216.106 of this chapter and § 217.76 must be implemented. The activity identified in § 217.70(a) must be conducted in a manner that minimizes, to the greatest extent practicable, adverse impacts on marine mammals and their habitats. These mitigation measures include (but are not limited to):

- (1) Security overflights associated with a launch will not approach occupied pinniped haulouts on Ugak Island by closer than 0.25 miles (mi) (0.4 kilometer (km)), and will maintain a vertical distance of 1,000 feet (ft) (305 meter (m)) from the haulouts when within 0.5 mi (0.8 km), unless indications of human presence or activity warrant closer inspection of the area to assure that national security interests are protected in accordance with law;
- (2) If launch monitoring detects pinniped injury or death, or if long-term trend counts from quarterly aerial

surveys indicate that the distribution, size, or productivity of the potentially affected pinniped populations has been affected due to the specified activity, the launch procedures and the monitoring methods will be reviewed, in cooperation with NMFS, and, if necessary, appropriate changes may be made through modifications to a given LOA, prior to conducting the next launch of the same vehicle under that LOA;

(3) AAC will purchase and install time-lapsed photography systems in order to survey each of the three pinniped haulout locations around Ugak Island to confirm the abundance of pinnipeds at the haulouts and allow for the more complete surveying efforts. The number of camera systems, equipment capabilities, placement of the systems to be used, and the daily photo frequency will be determined through a cooperative effort between AAC, NMFS, and field experts;

(4) AAC will conduct a correlation study in coordination with NMFS. The purpose of the study is to evaluate the effectiveness of the time-lapsed photography systems (specifically, the accuracy of the photography systems compared with aerial count surveys). The results of this study will determine the need to continue aerial surveys. The study will be conducted through a minimum of five launches;

(5) All Castor 120 equivalent launches will be conducted at LP1 which is equipped with a concrete and water-filled flame trench. The purpose of the flame trench is to direct smoke away from the launch pad and to absorb light and noise at their, respective peaks (*i.e.* lift-off) to reduce the noise created during each launch; and

(6) Additional mitigation measures as contained in an LOA.

(b) [Reserved]

§ 217.75 Requirements for monitoring and reporting.

(a) Holders of LOAs issued pursuant to § 216.106 of this chapter and § 217.76 for activities described in § 217.70(a) are required to cooperate with NMFS, and any other Federal, State, or local agency with authority to monitor the impacts of the activity on marine mammals. Unless specified otherwise in the LOA, the holder of the LOA must notify the Administrator, Alaska Region, NMFS, by letter, email or telephone, at least two weeks prior to each launch. If the authorized activity identified in § 217.70(a) is thought to have resulted in the mortality or injury of any marine mammals or take of marine mammals not identified in § 217.70(b), then the holder of the LOA must notify the

Director, Office of Protected Resources, NMFS, or designee, by telephone (301-427-8401), within 48 hours of the injury or death.

(b) Holders of LOAs must designate qualified, on-site individuals approved in advance by NMFS, as specified in the LOA, to:

(1) Deploy for AAC, time-lapsed photography systems designed to monitor pinniped abundance and detect pinniped responses to rocket launches conducted under these regulations. AAC will monitor the effectiveness of these systems, comparing the results to aerial surveys from at least five launches;

(2) Ensure the time-lapsed photography systems will be in place and operating in locations that allow for visual monitoring of all three pinniped haulouts during launches.
