(3) Relocate the time-lapsed photography systems in cooperation with NMFS after five launches if the system is not accurately capturing all three pinniped haulouts and total pinniped abundance during the launches;

(4) Review and log pinniped presence, abundance, behavior, and re-occupation time from the data obtained from the time-lapsed photography systems and report results to NMFS within 90 days of the first five launches under this system;

(5) Conduct one pre-launch aerial survey and one post-launch aerial survey for each launch. AAC will conduct a minimum of one aerial survey annually (in the event no launch occurs during a calendar year); and

(6) Conduct quarterly aerial surveys, ideally during mid-day coinciding with low tide, to obtain data on pinniped presence, abundance, and behavior within the action area to determine long-term trends in pinniped haulout use. Results of these quarterly surveys will be reported once as part of the annual report required under paragraph (e) of this section.

(c) Holders of LOAs must conduct additional monitoring as required under an LOA.

(d) Holders of an LOA must submit a report to the Alaska Region Administrator, NMFS, within 90 days after each launch. This report must contain the following information:

(1) Date(s) and time(s) of the launch;

(2) Location of the time-lapsed photography systems;

(3) Design of the monitoring program for the time-lapsed photography systems and a description of how data is stored and analyzed; and

(4) Results of the monitoring program for the time-lapsed photography

systems, including, but not necessarily limited to:

(i) Numbers of pinnipeds, by species and age class (if possible), present on the haulout prior to commencement of the launch;

(ii) Numbers of pinnipeds, by species and age class (if possible), that may have been harassed, including the number that entered the water as a result of launch noise;

(iii) The length of time pinnipeds remained off the haulout during post-launch monitoring;

(iv) Number of harbor seal pups that may have been injured or killed as a result of the launch; and

(v) Other behavioral modifications by pinnipeds that were likely the result of launch noise.

(e) An annual report must be submitted on March 1 of each year that will include results of the aerial quarterly trend counts of pinnipeds and comparison of the results using the time-lapsed photography systems on Ugak Island. Future aerial surveys may be reduced if the time-lapsed photography systems capture similar or better data than aerial surveys.

(f) A final report must be submitted at least 90 days prior to expiration of these regulations if new regulations are sought or 180 days after expiration of regulations. This report will:

(1) Summarize the activities undertaken and the results reported in all previous reports;

(2) Assess the impacts of launch activities on pinnipeds within the action area, including potential for pup injury and mortality;

(3) Assess the cumulative impacts on pinnipeds and other marine mammals from multiple rocket launches; and

(4) State the date(s), location(s), and findings of any research activities related to monitoring using time-lapsed photography systems on marine mammal populations.

§ 217.76 Letter of Authorization.

(a) To incidentally take marine mammals pursuant to these regulations, AAC must apply for and obtain an LOA.

(b) An LOA, unless suspended or revoked, may be effective for a period of time not to exceed the expiration date of these regulations.

(c) If an LOA expires prior to the expiration date of these regulations, AAC must apply for and obtain a renewal of the LOA.

(d) In the event of projected changes to the activity or to mitigation and monitoring measures required by an LOA, AAC must apply for and obtain a modification of the LOA as described in § 217.77.

(e) The LOA will set forth:

(1) The number of marine mammals, by species and age class, authorized to be taken;

(2) Permissible methods of incidental taking;

(3) Means of effecting the least practicable adverse impact (*i.e.*, mitigation) on the species of marine mammals authorized for taking, its habitat, and on the availability of the species for subsistence uses; and

(4) Requirements for monitoring and reporting.

(f) Issuance of an LOA shall be based on a determination that the level of taking will be consistent with the findings made for the total taking allowable under these regulations.

(g) Notice of issuance or denial of an LOA will be published in the **Federal Register** within 30 days of a determination.

§ 217.77 Renewal of a Letter of Authorization.

(a) An LOA issued under § 216.106 of this chapter and § 217.76 for the activity identified in § 217.70(a) will be renewed or modified upon request by the applicant, provided that:

(1) The proposed specified activity and mitigation, monitoring, and reporting measures, as well as the anticipated impacts, are the same as those described and analyzed for these regulations (excluding changes made pursuant to the adaptive management provision in § 217.77(c)(1)), and

(2) NMFS determines that the mitigation, monitoring, and reporting measures required by the previous LOA under these regulations were implemented.

(b) For an LOA modification or renewal requests by the applicant that include changes to the activity or the mitigation, monitoring, or reporting (excluding changes made pursuant to the adaptive management provision in § 217.77(c)(1)) that do not change the findings made for the regulations or result in no more than a minor change in the total estimated number of takes (or distribution by species or years), NMFS may publish a notice of proposed LOA in the **Federal Register**, including the associated analysis illustrating the change, and solicit public comment before issuing the LOA.

(c) An LOA issued under § 216.106 of this chapter and § 217.76 for the activity identified in § 217.70(a) may be modified by NMFS under the following circumstances:

(1) Adaptive Management—NMFS may modify (including augment) the existing mitigation, monitoring, or reporting measures (after consulting

with AAC regarding the practicability of the modifications) if doing so creates a reasonable likelihood of more effectively accomplishing the goals of the mitigation and monitoring set forth in the preamble for these regulations:

(i) Possible sources of data that could contribute to the decision to modify the mitigation, monitoring, or reporting measures in an LOA:

(A) Results from AAC's monitoring from the previous year(s);

(B) Results from other marine mammal and/or sound research or studies; and

(C) Any information that reveals marine mammals may have been taken in a manner, extent or number not authorized by these regulations or subsequent LOAs.

(ii) If, through adaptive management, the modifications to the mitigation, monitoring, or reporting measures are substantial, NMFS will publish a notice of proposed LOA in the **Federal Register** and solicit public comment.

(2) Emergencies—If NMFS determines that an emergency exists that poses a significant risk to the well-being of the species or stocks of marine mammals specified in §§ 217.70(b) and 217.72(a), an LOA may be modified without prior notice or opportunity for public comment. Notice would be published in the **Federal Register** within 30 days of the action.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No.: 161118999-7008-01]

RIN 0648-BG46

Fisheries of the Northeastern United States; Atlantic Sea Scallop Fishery; Framework Adjustment 28

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to approve and implement measures included in Framework Adjustment 28 to the Atlantic Sea Scallop Fishery Management Plan, which the New England Fishery Management Council adopted and submitted to NMFS for approval. The purpose of Framework 28

is to prevent overfishing, improve yield-per-recruit, and improve the overall management of the Atlantic sea scallop fishery. Framework 28 would: Set specifications for the scallop fishery for fishing year 2017; revise the way we allocate catch to the limited access general category individual fishing quota fleet to reflect spatial management of the scallop fishery; and implement a 50-bushel shell stock possession limit for limited access vessels inshore of the days-at-sea demarcation line north of 42°20' N. lat.

DATES: Comments must be received by February 7, 2017.

ADDRESSES: The Council has prepared a draft environmental assessment (EA) for this action that describes the proposed measures and other considered alternatives and analyzes of the impacts of the proposed measures and alternatives. The Council submitted a decision draft of the framework to NMFS that includes the draft EA, a description of the Council's preferred alternatives, the Council's rationale for selecting each alternative, and an Initial Regulatory Flexibility Analysis (IRFA). Copies of the decision draft of the framework, the draft EA, and the IRFA, are available upon request from Thomas A. Nies, Executive Director, New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950.

You may submit comments on this document, identified by NOAA-NMFS-2016-0155, by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov /#!docketDetail;D=NOAA-NMFS-2015-0155, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- **Mail:** John K. Bullard, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope, "Comments on Scallop Framework 28 Proposed Rule."

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying

information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Travis Ford, Fishery Policy Analyst, 978-281-9233.

SUPPLEMENTARY INFORMATION:

Background

The scallop fishery's management unit ranges from the shorelines of Maine through North Carolina to the outer boundary of the Exclusive Economic Zone. The Scallop Fishery Management Plan (FMP), established in 1982, includes a number of amendments and framework adjustments that have revised and refined the fishery's management. The Council sets scallop fishery specifications through specification or framework adjustments that occur annually or biennially. The Council adopted Framework 28 on November 17, 2016, and submitted the framework and draft EA to NMFS on December 21, 2016, for review and approval. This action includes catch, effort, and quota allocations and adjustments to the rotational area management program for fishing year 2017.

Framework 28 specifies measures for fishing year 2017, and includes default fishing year 2018 measures that will go into place should the next specifications-setting action be delayed beyond the start of fishing year 2018. NMFS will implement Framework 28, if approved, after the start of fishing year 2017; 2017 default allocation measures will go into place on March 1, 2017. The Council has reviewed the Framework 28 proposed rule regulations as drafted by NMFS and deemed them to be necessary and appropriate as specified in section 303(c) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Specification of Scallop Overfishing Limit (OFL), Acceptable Biological Catch (ABC), Annual Catch Limits (ACLs), Annual Catch Targets (ACTs), Annual Projected Landings (APLs) and Set-Asides for the 2017 Fishing Year and Default Specifications for Fishing Year 2018

The Council set the proposed OFL based on a fishing mortality rate (F) of

0.48, equivalent to the overfishing F threshold updated through the 2014 assessment. The Council's Scientific and Statistical Committee recommended a scallop fishery ABC for the 2017 and 2018 fishing years of 103 million lb (46,737 mt) and 95 million lb (43,142 mt), respectively, after accounting for discards and incidental mortality. The Council based the proposed ABC and the equivalent total ACL for each fishing year on an F of 0.38, which is the F associated with a 25-percent probability of exceeding the OFL. The Scientific and Statistical Committee will reevaluate an ABC for 2018 when the Council develops the next framework adjustment in 2017.

Table 1 outlines the proposed scallop fishery catch limits. After deducting the incidental target total allowable catch (TAC), the research set-aside (RSA), and the observer set-aside, the remaining ACL available to the fishery is allocated according to the following fleet proportions established in Amendment 11 to the FMP (72 FR 20090; April 14, 2008): 94.5 percent allocated to the limited access scallop fleet (i.e., the larger "trip boat" fleet); 5 percent allocated to the limited access general category (LAGC) individual fishing quota (IFQ) fleet (i.e., the smaller "day boat" fleet); and the remaining 0.5 percent allocated to limited access scallop vessels that also have LAGC IFQ permits. Amendment 15 to the FMP (76 FR 43746; July 21, 2011) specified that no buffers to account for management uncertainty are necessary in setting the LAGC ACLs, meaning that the LAGC ACL would equal the LAGC ACT. To help ensure that allocation of potential catch to the LAGC IFQ fleet is more consistent with allocations to the limited access fleet and the concept of spatial management, this action proposes to distinguish the ACL from APL in setting allocations (for DAS, trip allocations, and IFQs) for each fleet, as shown in Table 1. The purpose and basis for this change, affecting the LAGC IFQ fleets mainly, is described in more detail in "LAGC Measures" section below. For the limited access fleet, the management uncertainty buffer is based on the F associated with a 75-percent probability of remaining below the F associated with ABC/ACL, which, using the updated Fs applied to the ABC/ACL, now results in an F of 0.34.

TABLE 1—SCALLOP CATCH LIMITS (mt) FOR FISHING YEARS 2017 AND 2018 FOR THE LIMITED ACCESS AND LAGC IFQ FLEETS

Catch limits	2017 (mt)	2018 (mt)*
Overfishing Limit	75,485	69,678
Acceptable Biological Catch/ACL (discards removed)	46,737	43,142
Incidental Catch	23	23
Research Set-Aside (RSA)	567	567
Observer Set-Aside	467	431
ACL for fishery	45,680	42,121
Limited Access ACL	43,167	39,804
LAGC Total ACL	2,512	2,317
LAGC IFQ ACL (5% of ACL)	2,284	2,106
Limited Access with LAGC IFQ ACL (0.5% of ACL)	228	211
Limited Access ACT	38,623	35,614
APL	20,516	(*)
Limited Access Projected Landings (94.5% of APL)	19,388	(*)
Total IFQ Annual Allocation (5.5% of APL)	1,129	** 846
LAGC IFQ Annual Allocation (5% of APL)	1,026	** 769
Limited Access with LAGC IFQ Annual Allocation (0.5% of APL)	103	** 77

* The catch limits for the 2018 fishing year are subject to change through a future specifications action or framework adjustment. This includes the setting of an APL for 2018 that will be based on the 2017 annual scallop surveys.

** As a precautionary measure, the 2018 IFQ annual allocations are set at 75% of the 2017 IFQ Annual Allocations.

This action would deduct 1.25 million lb (567 mt) of scallops annually for 2017 and 2018 from the ABC and set it aside as the Scallop RSA to fund scallop research and to compensate participating vessels through the sale of scallops harvested under RSA projects. As of March 1, 2017, this set-aside would be available for harvest by RSA-funded projects in open areas. Framework 28 would allow RSA to be harvested from the Mid-Atlantic Access Area (MAAA) once this action is approved and implemented, but would prevent RSA harvesting from access areas under 2018 default measures. Of this 1.25 million lb (567 mt) allocation, NMFS has already allocated 63,204 lb (28.7 mt) to previously-funded multi-year projects as part of the 2016 RSA awards process. NMFS is reviewing proposals submitted for consideration of 2017 RSA awards and will be selecting projects for funding in the near future.

This action would also set aside 1 percent of the ABC for the industry-funded observer program to help defray the cost to scallop vessels that carry an observer. The observer set-asides for fishing years 2017 and 2018 are 467 mt and 431 mt, respectively. The Council may adjust the 2018 observer set-aside when it develops specific, non-default measures for 2018.

Open Area Days-at-Sea (DAS) Allocations

This action would implement vessel-specific DAS allocations for each of the three limited access scallop DAS permit categories (*i.e.*, full-time, part-time, and occasional) for 2017 and 2018 (Table 2). Proposed 2017 DAS allocations are

lower than those allocated to the LA fleet in 2016 (34.55 DAS for full-time, 13.82 DAS for part-time, and 2.88 DAS for occasional vessels). Framework 28 would set 2018 DAS allocations at 75 percent of fishing year 2017 DAS allocations as a precautionary measure. This is to avoid over-allocating DAS to the fleet in the event that the 2018 specifications action, if delayed past the start of the 2018 fishing year, estimates that DAS should be less than currently projected. The proposed allocations in Table 2 exclude any DAS deductions that are required if the limited access scallop fleet exceeded its 2016 sub-ACL. In addition, these DAS values take into account a 0.14–DAS reduction necessary to compensate for a measure implemented in Framework Adjustment 26 to the FMP (80 FR 22119; April 21, 2015) that allows vessels to transit to ports south of 39° N. lat. while not on DAS. The proposed DAS also include a 4.7 percent increase because the 2017 fishing year will be 13 months long to account for the change in the start of the fishing year (from March 1 to April 1) implemented through Amendment 19 to the Scallop FMP (81 FR 76516; November 3, 2016).

TABLE 2—SCALLOP OPEN AREA DAS ALLOCATIONS FOR 2017 AND 2018

Permit category	2017	2018 (Default)
Full-Time	30.41	21.75
Part-Time	12.16	8.69
Occasional	2.54	1.91

Because NMFS is likely to implement Framework 28, if approved, after March

1, 2017, full-time, part-time, and occasional vessels will receive 34.55, 13.82, and 2.88 DAS, respectively, on March 1, 2017, as default allocations. These allocations would be reduced as soon as we implement Framework 28, if approved.

Limited Access Allocations and Trip Possession Limits for Scallop Access Areas

For fishing year 2017 and the start of 2018, Framework 28 would keep the MAAA open as an access area and would also open the Nantucket Lightship Access Area (NLS) and Closed Area 2 Access Area (CA2). Closed Area 1 would remain closed. In addition, this action proposes to open the Elephant Trunk Closed Area and allow full-time vessels to choose to fish up to 18,000 lb (8,165 kg) of their 36,000-lb (16,330 kg) MAAA-allocation in this area. Because of the flexible trip option for the Elephant Trunk area, this action proposes to rename the area Elephant Trunk Flex Access Area (ETFA) for 2017. The Council approved this flexible trip option to reduce the fishing pressure on both the MAAA and the ETFA and to protect small scallops in the ETFA while still providing the option to fish in the area. There are sections of the ETFA where there is a mix of harvestable scallops and small scallops. Framework 28 also proposes a seasonal closure of the ETFA, from July 1 through September 30, to help reduce the discard mortality of small scallops during the warmest months of the year.

Table 3 proposes the limited access full-time allocations for all of the access areas, which could be taken in as many

trips as needed, so long as the vessels do not exceed the possession limit (also in Table 3) on each trip.

TABLE 3—PROPOSED SCALLOP ACCESS AREA FULL-TIME LIMITED ACCESS VESSEL POUNDAGE ALLOCATIONS AND TRIP POSSESSION LIMITS FOR 2016 AND 2017

Rotational access area	Possession limits	2017 allocation	2018 allocation (default)
CA2	18,000 lb (8,165 kg)	18,000 lb (8,165 kg)	
NLS	18,000 lb (8,165 kg).	
MAAA	18,000 lb (8,165 kg)	18,000 lb (8,165 kg)
ETFA	18,000 lb (8,165 kg)*	No flex option
Total	72,000 lb (32,660 kg)	18,000 lb (8,165 kg).

* ETFA allocation can be landed from either the ETFA or the MAAA.

For the 2017 fishing year only, a part-time limited access vessel would be allocated a total of 28,800 lb (13,064 kg) with a trip possession limit of 14,400 lb per trip (6,532 kg per trip). Of the 28,800-lb (13,064-kg) allocation, 14,400 lb (6,532 kg) would be allocated exclusively to the MAAA. The remaining 14,400 lb (6,532 kg) could be harvested and landed either from the MAAA or any one other available access area, (CA2, NLS, or ETFA). However, if a vessel chooses to harvest and land the remaining 14,400 lb (6,532 kg) from the ETFA and does not harvest up to the full allocation on a trip, it would only be allowed to land the remaining pounds either from the ETFA or the MAAA. For the 2018 fishing year, part-time limited access vessels would be allocated 14,400 lb (6,532 kg) in the MAAA only with a trip possession limit of 14,400 lb per trip (6,532 kg per trip).

For the 2017 fishing year only, an occasional limited access vessel would be allocated 6,000 lb (2,722 kg) with a trip possession limit of 6,000 lb per trip (2,722 kg per trip). Occasional vessels would be able to harvest 6,000 lb (2,722 kg) allocation from only one available access area (CA2, NLS, MAAA, or ETFA). For the 2018 fishing year, occasional limited access vessels would be allocated 6,000 lb (2,722 kg) in the MAAA only with a trip possession limit of 6,000 lb per trip (2,722 kg per trip).

Limited Access Vessels' One-for-One Area Access Allocation Exchanges

Framework 26 changed the way we allocate access area effort to the limited access fleet from trip allocations (2 trips with an 18,000-lb (8,165-kg) possession limit in an area) to landings allocations (36,000 lb (16,330 kg) of landings with an 18,000-lb (8,165-kg) possession limit in an area). However, Framework 26 did not address trip exchanges because it only opened a single access area. This action clarifies that the owner of a vessel issued a limited access scallop permit may exchange unharvested

scallop pounds allocated into one access area for another vessel's unharvested scallop pounds allocated into another Scallop Access Area. These exchanges may only be made for the amount of the current trip possession limit (18,000-lb (8,165-kg)). In addition, these exchanges would be made only between vessels with the same permit category: A full-time vessel may not exchange allocations with a part-time vessel, and vice versa.

In fishing year 2017, each limited access full-time vessel would be allocated 18,000 lb (8,165 kg) that may be landed from either the ETFA or the MAAA (flex allocation). Such flex allocation could be exchanged in full only for another access area allocation, but only the flex allocation could be landed from the ETFA. For example, if a Vessel A exchanges 18,000 lb (8,165 kg) of flex allocation for 18,000 lb (8,165 kg) of MAAA allocation with Vessel B, Vessel A would no longer be allowed to land allocation from the ETFA based on its MAAA allocation, but Vessel B could land up to 36,000 lb (16,330 kg) from the ETFA and/or the MAAA, combined.

Prohibition on Possessing Greater Than 50 Bushels of Shell Stock for Limited Access Vessels Inshore of the DAS Demarcation Line North of 42°20' N. Lat

This action proposes a 50-bushel shell stock possession limit inshore of the DAS demarcation line for limited access vessels fishing north of 42°20' N. lat. Framework Adjustment 14 to the Scallop FMP (66 FR 21639; April 26, 2001) implemented a 50-bushel possession limit for shell stock south of 42°20' N. lat. for limited access vessels inshore of the DAS demarcation line. This action would extend the restriction to all Federal waters for limited access vessels. This possession limit is intended to prevent limited access vessels from shucking scallops off the DAS clock. Vessels fishing exclusively north of 42°20' N. lat. were exempt from this possession limit to allow a limited

fishery to continue by some vessels that traditionally landed in-shell scallops in this area. Since Framework 14, there has been very little limited access effort north of 42°20' N. lat. However, in the spring of 2016, there was a sharp increase in limited access activity in this area. During this increase in activity there were reports of vessels possessing greater than 50 bushels of shell stock inside of the VMS demarcation line for the purpose of shucking scallops off the DAS clock. This is a conservation and management concern because DAS allocations are set using landings per unit effort (LPUE). The LPUE calculation assumes that vessels are shucking scallops on the DAS clock. Given the recent increase in limited access effort in this area, this action proposes to extend the 50-bushel possession limit for shell stock for limited access vessels to all Federal waters.

LAGC Measures

1. *LAGC IFQ Fleet Allocation Based on Spatial Management.* This action would change the way the LAGC IFQ allocations would be set from a direct percentage of the ACL to a percentage of the APL. The purpose of this change is to help ensure that the allocation of potential catch between the fleets is more consistent with the concept of spatial management by allocating catch to the LAGC IFQ fleet based on harvestable scallops instead of total biomass. Amendment 11 to the Scallop FMP (73 FR 20089; April 14, 2008) split the total scallop catch between the limited access and LAGC IFQ fleets (94.5 percent to the limited access fleet and 5.5 percent to the LAGC IFQ fleet). Using the current method of determining catch for each fleet, however, the LAGC IFQ fleet would effectively be allocated about 11.4 percent of total projected landings. The reason for this allocation is that, currently, ACLs in the scallop fishery are based on the overall biomass of

scallops, while projected landings are limited to the harvestable scallop biomass in areas that are open to the fishery in a given year (*i.e.*, harvestable scallops only in the open area and open access areas). Since Amendment 15 to the Scallop FMP (76 FR 43746; July 21, 2011), the LAGC IFQ allocation (sub-ACL) has been equal to 5.5 percent of the ACL (5 percent for LAGC IFQ vessels and 0.5 percent for LAGC IFQ vessels that also have a limited access scallop permit), while the limited access allocation has been based on projected landings for the fishing year, taking into account only the scallops available to the fishery. The allocation of 94.5 percent of the scallop ACL for the limited access fleet served as a threshold that, if exceeded, would trigger accountability measures for the limited access fleet. As a result of the difference in allocation, the allocation to the limited access fleet is spatially explicit, while the LAGC IFQ allocation is not. In recent years, due to increasing biomass in closed areas included in ACL calculations, projected landings (excluding biomass in closed areas) have been substantially less than ACL. Since the LAGC IFQ fleets' allocations are based on the stock-wide ACL, the fleets have been allocated an increasing percentage of projected landings (greater than 5.5 percent).

Allocating the LAGC IFQ fleets' catch based on projected catch also has less potential to cause harm to the scallop biomass where these vessels fish. LAGC IFQ fleets are constrained by the available access areas and open areas defined in the Scallop FMP because regulations confine the fleets generally to nearshore dredge exemption areas. In addition, because of the size of the vessels in the LAGC IFQ fleet, and the 600-lb (272.2-kg) trip limit, harvest is more concentrated in near-shore areas. With an allocation based on stockwide ACL (including closed areas), the vessels could catch more scallops in the areas where the vessels are confined to than the areas might be able to handle biologically. Allocation based on projected landings of scallops available through area rotation reduces this risk.

Choosing to allocate based on 5.5 percent of the projected catch would result in an approximate 45 percent cut in the allocation from the current method of allocation (*status quo*) for 2017 (2.49 million lb (1,129 mt) based on projected catch compared to 5.5 million lb (2,512 mt) based on stockwide ACL). The Council supported this measure, despite this large cut in the allocation, because the concept of spatial management for the LAGC IFQ fishery has support across both the

limited access and the LAGC IFQ fleets and because it reduces the risk of LAGC IFQ allocations resulting in higher realized F rates in certain areas than predicted in the model. The Council felt that the intent of Amendment 11 was to limit the LAGC IFQ fleet harvest to 5.5 percent of the actual landings, not 5.5 percent of the ACL.

2. ACL and IFQ allocation for LAGC vessels with IFQ permits. For LAGC vessels with IFQ permits, this action implements a 2,284-mt ACL for 2017 and a default ACL of 2,106 mt for 2018 (see Table 1). These sub-ACLs have no associated regulatory or management requirements, but provide a ceiling on overall landings by the LAGC IFQ fleets. The annual allocation to the LAGC IFQ-only fleet for fishing years 2017 and 2018 based on APL would be 1,026 mt and 769 mt, respectively (see Table 1). The 2017 allocation includes a 4.7-percent increase because the 2017 fishing year will be 13 months long to account for the change in the start of the fishing year (from March 1 to April 1) implemented through Amendment 19 to the Scallop FMP.

Because Framework 28 is likely to go into effect after the March 1 start of fishing year 2017, the default 2017 IFQ allocations will go into place automatically on March 1, 2017. This action implements IFQ allocations that are less than the default allocations. NMFS will send a letter to IFQ permit holders providing both default March 1, 2017, IFQ allocations and Framework 28 IFQ allocations so that vessel owners know what mid-year adjustments would occur should Framework 28 be approved.

3. ACL and IFQ allocation for Limited Access Scallop Vessels with IFQ Permits. For limited access scallop vessels with IFQ permits, this action implements a 228-mt ACL for 2017 and a default 211-mt ACL for 2018 (see Table 1). As explained above, this action would change the way the Council and NMFS calculate IFQ allocations by applying each vessel's IFQ contribution percentage to this fleet's percentage (*i.e.*, 0.5 percent) of the projected landings. The annual allocation to limited access vessels with IFQ permits for fishing years 2017 and 2018 would be 103 mt and 77 mt, respectively (see Table 1). The 2017 allocation includes a 4.7 percent increase because the 2017 fishing year will be 13 months long to account for the change in the start of the fishing year (from March 1 to April 1) implemented through Amendment 19 to the Scallop FMP.

4. LAGC IFQ Trip Allocations for Scallop Access Areas. Framework 28 would allocate LAGC IFQ vessels a

fleetwide number of trips in the NLS, MAAA, and ETFA for fishing year 2017 and default fishing year 2018 trips in the MAAA (see Table 4). The total number of trips for both areas combined (2,230) for fishing year 2017 is equivalent to the 5.5 percent of total catch from access areas. This action would not allocate any LAGC IFQ trips into CA2 because many of these vessels do not fish in that area due to its distance from shore. Because the IFQ vessels would not be able to access CA2, the Council proposes in Framework 28 to shift those trips that would have been allocated to CA2 to other access areas closer to shore, so that LAGC IFQ vessels would have the opportunity to utilize their access area trips. This action would allocate 558 trips that would have been allocated to CA2 into NLS (279 trips), MAAA (139), and ETFA (139).

TABLE 4—LAGC IFQ TRIP ALLOCATIONS FOR SCALLOP ACCESS AREAS

Access area	2017	2018 (default)
NLS	836
MAAA	697	558
ETFA	697
Total	2,230	558

5. Northern Gulf of Maine (NGOM) TAC. This action proposes a 95,000-lb (43,091 kg) annual NGOM TAC for fishing years 2017 and 2018. During the 2016 fishing year there was a 21,629-lb (9,811-kg) overage of the NGOM TAC. This triggers a pound-for-pound deduction in 2017 to account for the overage. Therefore, the 2017 NGOM TAC would be 73,371 lb (33,281 kg) to account for the overage.

6. Scallop Incidental Catch Target TAC. This action proposes a 50,000-lb (22,680-kg) scallop incidental catch target TAC for fishing years 2017 and 2018 to account for mortality from this component of the fishery, and to ensure that F targets are not exceeded. The Council and NMFS may adjust this target TAC in a future action if vessels catch more scallops under the incidental target TAC than predicted.

RSA Harvest Restrictions

This action proposes that vessels participating in RSA projects would be prohibited from harvesting RSA compensation from CA2, NLS, and ETFA during the 2017 fishing year to control F, reduce impacts on flatfish, and reduce impacts on high densities of scallops with growth potential. Further, this action proposes to prohibit the harvest of RSA compensation from the

NGOM to control the F in the area. During the 2017 fishing year, all RSA compensation fishing must take place in either the open area, excluding the NGOM, or the MAAA. In addition, Framework 28 would prohibit the harvest of RSA from any access areas under default 2018 measures. At the start of 2018, RSA compensation could only be harvested from open areas. The Council would re-evaluate this measure in the action that would set final 2018 specifications.

Regulatory Corrections Under Regional Administrator Authority

This proposed rule includes a revision to the regulatory text to address a typographical error in the regulations. NMFS proposes this change consistent with section 305(d) of the MSA which provides that the Secretary of Commerce may promulgate regulations necessary to ensure that amendments to an FMP are carried out in accordance with the FMP and the MSA. This revision corrects the error at § 648.14(i)(4)(i)(G).

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Steven Act, the NMFS Assistant Administrator has made a preliminary determination that this proposed rule is consistent with the FMP, other provisions of the Magnuson-Steven Act, and other applicable law. In making the final determination, NMFS will consider the data, views, and comments received during the public comment period.

This proposed rule does not contain policies with federalism implications under Executive Order 13132.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

An IRFA has been prepared, as required by section 603 of the Regulatory Flexibility Act (RFA). The IRFA describes the economic impact this proposed rule, if adopted, would have on small entities. The IRFA consists of Framework 28 analyses, the draft IRFA, and the preamble to this proposed rule.

Description of the Reasons Why Action by the Agency Is Being Considered and Statement of the Objectives of, and Legal Basis for, This Proposed Rule

This action proposes the management measures and specifications for the

Atlantic sea scallop fishery for 2017, with 2018 default measures. A description of the action, why it is being considered, and the legal basis for this action are contained in Framework 28 and the preamble of this proposed rule and are not repeated here.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Proposed Rule

This action contains no new collection-of-information, reporting, or recordkeeping requirements.

Federal Rules Which May Duplicate, Overlap or Conflict With This Proposed Rule

The proposed regulations do not create overlapping regulations with any state regulations or other federal laws.

Description and Estimate of Number of Small Entities to Which the Rule Would Apply

The proposed regulations would affect all vessels with limited access and LAGC scallop permits. Framework 28 provides extensive information on the number and size of vessels and small businesses that would be affected by the proposed regulations, by port and state (see **ADDRESSES**). Fishing year 2015 data were used for this analysis because these data are the most recent complete data set for a fishing year. There were 313 vessels that obtained full-time limited access permits in 2015, including 250 dredge, 52 small-dredge, and 11 scallop trawl permits. In the same year, there were also 34 part-time limited access permits in the sea scallop fishery. No vessels were issued occasional scallop permits. NMFS issued 217 LAGC IFQ permits in 2015, and 119 of these vessels actively fished for scallops that year. The remaining permits likely leased out scallop IFQ allocations with their permits in Confirmation of Permit History.

The RFA defines a small business in shellfish fishery as a firm that is independently owned and operated with receipts of less than \$11 million annually (see NMFS final rule revising the small business size standard for commercial fishing, 80 FR 81194, December 29, 2015). Individually-permitted vessels may hold permits for several fisheries, harvesting species of fish that are regulated by several

different fishery management plans, even beyond those impacted by the proposed action. Furthermore, multiple permitted vessels and/or permits may be owned by entities with various personal and business affiliations. For the purposes of this analysis, “ownership entities” are defined as those entities with common ownership as listed on the permit application. Only permits with identical ownership are categorized as an “ownership entity.” For example, if five permits have the same seven persons listed as co-owners on their permit applications, those seven persons would form one “ownership entity,” that holds those five permits. If two of those seven owners also co-own additional vessels, that ownership arrangement would be considered a separate “ownership entity” for the purpose of this analysis.

On June 1 of each year, ownership entities are identified based on a list of all permits for the most recent complete calendar year. The current ownership dataset is based on the calendar year 2015 permits and contains average gross sales associated with those permits for calendar years 2013 through 2015. Matching the potentially impacted 2015 fishing year permits described above (limited access and LAGC IFQ) to calendar year 2015 ownership data results in 154 distinct ownership entities for the limited access fleet and 87 distinct ownership entities for the LAGC IFQ fleet. Of these, and based on the Small Business Administration guidelines, 141 of the limited access distinct ownership entities and 84 of the LAGC IFQ entities are categorized as small. The remaining 13 of the limited access and 3 of the LAGC IFQ entities are categorized as large entities, all of which are shellfish businesses.

Description of Significant Alternatives to the Proposed Action Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact on Small Entities

Framework 28 has several specification alternatives with different open area DAS and access area allocations in addition to the “No Action” alternative (ALT1). Table 5 provides a description of these alternatives.

TABLE 5—FRAMEWORK 28 PROJECTIONS WITH ALTERNATIVE SPECIFICATIONS

Alternatives	Effort and catch limits
ALT1—No Action—Default measures set in Framework 27	34.55 open area DAS, 1 MAAA trip, LAGC IFQ allocation = 4.5 mill. lb.
ALT2—Basic Run—IFQ allocations = 5.5% of ACL	30 DAS, LAGC IFQ allocation = 5.5 mill. lb.

TABLE 5—FRAMEWORK 28 PROJECTIONS WITH ALTERNATIVE SPECIFICATIONS—Continued

Alternatives	Effort and catch limits
ALT3—Basic Run—IFQ Allocations = 5.5% of Projected landings (Same for Basic Run + ETFA at 30 DAS).	30 DAS, LAGC IFQ allocation = 2.6 mill. lb.
ALT4—Basic Run with Open area F = 0.4, IFQ Allocations = 5.5% of Projected landings (Same for Basic Run + ETFA at F = 0.4).	27.56 DAS, LAGC IFQ allocation = 2.5 mill. lb.
ALT5 (Preferred)—Basic Run with NLS extension + ETFA (F = 0.44), IFQ Allocations = 5.5% of projected landings.	29.20 DAS, LAGC IFQ allocation = 2.4 mill. lb.
ALT6—ETFA—IFQ Allocations = 5.5% of Projected landings	30 DAS, LAGC IFQ allocation = 2.6 mill. lb.
ALT7—ETFA—IFQ Allocations = 5.5% of ACL	30 DAS, LAGC IFQ allocation = 5.5 mill.
SQ—Status Quo scenario	34.55 open area DAS, 3 MAAA trips, LAGC IFQ allocation = 4.5 mill.lb.

The estimated revenues and net revenue for the limited access scallop vessels and small business entities under all alternatives to the proposed action are expected to be higher than the No Action alternative and status quo levels in the short-term as well as in the long-term. The differences in terms of revenue and net revenue per limited access vessel of these specification alternatives are not significantly different than that of the proposed action.

The economic impacts of the status quo (5.5 percent of the ACL) and allocation based on spatial management (5.5 percent of the projected landings) alternatives are different for the LAGC IFQ vessels. The status quo management alternative would provide considerably higher allocations to the LAGC IFQ fleets (*i.e.*, 4.1 million lb (1,860 mt) versus 2.3 million lb (1,043 mt) under the proposed action. Therefore, the status quo management alternative would have positive economic impacts on the LAGC IFQ vessels while the proposed action would have negative impacts in 2017 compared to status quo, as summarized above and analyzed in Section 5.4.4.1 of the Framework 28 document. However, the Council chose not to recommend the status quo because, under the status quo method of allocation, the share of IFQ fishery in total landings would be over 11.4 percent of the total landings, which would be inconsistent with the intent of Amendment 11.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping and reporting requirements.

Dated: January 6, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 648 is proposed to be amended as follows:

PART 648—FISHERIES OF THE NORTHEAST UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.14:

- a. Revise paragraphs (i)(1)(viii), (i)(2)(iii)(B), and (i)(2)(vi)(B);
- b. Add paragraph (i)(2)(vi)(C); and
- c. Revise paragraphs (i)(3)(v)(E) and (i)(4)(i)(G).

The revisions and additions read as follows:

§ 648.14 Prohibitions.

* * * * *

(i) * * *

(1) * * *

(viii) *Scallop research.* (A) Fail to comply with any of the provisions specified in § 648.56.

(B) Fish for scallops in, or possess or land scallops from, the NGOM on a scallop research set-aside compensation trip as described in § 648.56(d).

* * * * *

(2) * * *

(iii) * * *

(B) Fish for, possess, or land more than 50 bu (17.62 hL) of in-shell scallops inside the VMS Demarcation Line on or by a vessel, except as provided in the state waters exemption, as specified in § 648.54.

* * * * *

(vi) * * *

(B) Transit the Closed Area II Rotational Area or the Closed Area II Extension Rotational Area, as defined § 648.60(d) and (e), respectively, or the Elephant Trunk Flex Rotational Area, as defined in § 648.60(b), unless there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2.

(C) Fish for, possess, or land scallops in or from the Elephant Trunk Flex Access Area in excess of the vessel's total Elephant Trunk Flex Access Area specific allocation as specified in § 648.59(b)(3)(i)(B)(1)(ii) or the amount permitted to be landed from the

Elephant Trunk Flex Access Area as allowed under trip exchanges specified in § 648.59(b)(3)(ii)(A) and (B).

* * * * *

(3) * * *

(v) * * *

(E) Transit the Elephant Trunk Flex Rotational Area, Closed Area II Rotational Area, or the Closed Area II Extension Rotational Area, as defined § 648.60(b), (d), and (e), respectively, unless there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2.

* * * * *

(4) * * *

(i) * * *

(G) Fish for, possess, or land more than 40 lb (18.1 kg) of shucked scallops, or 5 bu (1.76 hL) of in-shell scallops shoreward of the VMS Demarcation Line, or 10 bu (3.52 hL) of in-shell scallops seaward of the VMS Demarcation Line, when the vessel is not declared into the IFQ scallop fishery, unless the vessel is fishing in compliance with all of the requirements of the State waters exemption program, specified at § 648.54.

* * * * *

■ 3. In § 648.52, revise paragraph (e) to read as follows:

§ 648.52 Possession and landing limits.

* * * * *

(e) Owners or operators of vessels issued limited access permits are prohibited from fishing for, possessing, or landing per trip more than 50 bu (17.6 hL) of in-shell scallops shoreward of the VMS Demarcation Line, unless when fishing under the state waters exemption specified under § 648.54.

* * * * *

■ 4. In § 648.53:

- a. Revise the section heading, paragraph (a)(3), and the heading of paragraph (a)(6);
- b. Add paragraph (a)(6)(iii); and
- c. Revise paragraphs (a)(8), (b)(3), the heading of paragraph (h), (h)(2) introductory text, and (h)(2)(i).

The additions and revisions read as follows:

§ 648.53 Overfishing limit (OFL), acceptable biological catch (ABC), annual catch limits (ACL), annual catch targets (ACT), annual projected landings (APL), DAS allocations, and individual fishing quotas (IFQ).

(a) * * *

(3) *Overall ABC/ACL and APL*—(i) *Overall ABC/ACL.* The overall ABC for sea scallop fishery shall be the catch level that has an associated F that has a 75-percent probability of remaining below the F associated with OFL. The overall ACL shall be equal to the ABC for the scallop fishery, minus discards (an estimate of both incidental and discard mortality). The ABC/ACL, after the discards and deductions specified in

paragraph (a)(4) of this section are removed, shall be divided as sub-ACLs between limited access vessels, limited access vessels that are fishing under a LAGC permit, and LAGC vessels as defined in paragraphs (a)(5) and (6) of this section, after the deductions outlined in paragraph (a)(4) of this section.

(ii) *APL.* The APL shall be equal to the combined projected landings by the limited access and LAGC IFQ fleets in both the open area and access areas, after set-asides (RSA and observer) and incidental landings are accounted for, for a given fishing year. Projected scallop landings are calculated by estimating the landings that will come from open and access area effort combined for both limited access and LAGC IFQ fleets. These projected

landings shall not exceed the overall ABC/ACL and ACT, as described in paragraph (a) of this section.

* * * * *

(6) *LAGC IFQ fleet sub-ACL, sub-ACT, and annual allocation* * * *

* * * * *

(iii) *LAGC IFQ fleet annual allocation.* The annual allocation for the LAGC IFQ fishery for vessels issued only a LAGC IFQ scallop permit shall be equal to 5 percent of the APL. The annual allocation for the LAGC IFQ fishery for vessels issued both a LAGC IFQ scallop permit and a limited access scallop permit shall be 0.5 percent of the APL.

* * * * *

(8) The following catch limits will be effective for the 2017 and 2018 fishing years:

SCALLOP FISHERY CATCH LIMITS

Catch limits	2017 (mt)	2018 (mt) ¹
Overfishing Limit	75,485	69,678
Acceptable Biological Catch/ACL (discards removed)	46,737	43,142
Incidental Catch	23	23
Research Set-Aside (RSA)	567	567
Observer Set-Aside	467	431
ACL for fishery	45,680	42,121
Limited Access ACL	43,167	39,804
LAGC Total ACL	2,512	2,317
LAGC IFQ ACL (5% of ACL)	2,284	2,106
Limited Access with LAGC IFQ ACL (0.5% of ACL)	228	211
Limited Access ACT	38,623	35,614
APL	20,516	(¹)
Limited Access Projected Landings (94.5% of APL)	19,388	(¹)
Total IFQ Annual Allocation (5.5% of APL)	1,129	² 846
LAGC IFQ Annual Allocation (5% of APL)	1,026	² 769
Limited Access with LAGC IFQ Annual Allocation (0.5% of APL)	103	² 77

¹ The catch limits for the 2018 fishing year are subject to change through a future specifications action or framework adjustment. This includes the setting of an APL for 2018 that will be based on the 2017 annual scallop surveys. The 2018 default allocations for the limited access component are defined for DAS in paragraph (b)(3) of this section and for access areas in § 648.59(b)(3)(i)(B).

² As a precautionary measure, the 2018 IFQ annual allocations are set at 75% of the 2017 IFQ Annual Allocations.

(b) * * *

(3) The DAS allocations for limited access scallop vessels for fishing years 2017 and 2018 are as follows:

SCALLOP OPEN AREA DAS ALLOCATIONS

Permit category	2017	2018 ¹
Full-Time	30.41	21.75
Part-Time	12.16	8.69
Occasional	2.54	1.91

¹ The DAS allocations for the 2018 fishing year are subject to change through a future specifications action or framework adjustment. The 2018 DAS allocations are set at 75% of the 2017 allocation as a precautionary measure.

* * * * *

(h) *Annual IFQs* * * *

* * * * *

(2) *Calculation of IFQ.* The LAGC IFQ fleet annual allocation as defined in paragraph (a)(6)(iii) of this section, shall be used to determine the IFQ of each vessel issued an IFQ scallop permit. Each fishing year, the Regional Administrator shall provide the owner of a vessel issued an IFQ scallop permit issued pursuant to § 648.4(a)(2)(ii) with the scallop IFQ for the vessel for the upcoming fishing year.

(i) *IFQ.* The IFQ for an IFQ scallop vessel shall be the vessel's contribution percentage as specified in paragraph (h)(2)(iii) of this section and determined using the steps specified in paragraphs (h)(2)(ii) of this section, multiplied by the LAGC IFQ fleet annual allocation as defined in paragraph (a)(6)(iii) of this section.

* * * * *

■ 5. In § 648.59:

■ a. Revise paragraphs (a)(2), (a)(3), (b)(3)(i)(B), and (b)(3)(ii), and (e);

■ b. Remove and reserve paragraph (g)(3)(iv); and

■ c. Revise paragraph (g)(3)(v).

The additions and revisions read as follows:

§ 648.59 Sea Scallop Rotational Area Management Program and Access Area Program requirements.

(a) * * *

(2) *Transiting a Closed Scallop Rotational Area.* No vessel possessing scallops may enter or be in the area(s) specified in this section when those areas are closed, as specified through the specifications or framework adjustment processes defined in § 648.55, unless the vessel is transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2, or there is a

compelling safety reason to be in such areas without such gear being stowed. A vessel may only transit the Elephant Trunk Flex Rotational Area, the Closed Area II Scallop Rotational Area, or the Closed Area II Extension Scallop Rotational Area, as defined § 648.60(b), (d) and (e), respectively, if there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2.

(3) *Transiting a Scallop Access Area.* Any sea scallop vessel that has not declared a trip into the Scallop Area Access Program may enter a Scallop Access Area, and possess scallops not

caught in the Scallop Access Areas, for transiting purposes only, provided the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2. Any scallop vessel that has declared a trip into the Scallop Area Access Program may not enter or be in another Scallop Access Area on the same trip except such vessel may transit another Scallop Access Area provided its gear is stowed and not available for immediate use as defined in § 648.2, or there is a compelling safety reason to be in such areas without such gear being stowed. A vessel may only transit the Elephant Trunk Flex Rotational Area,

Closed Area II Scallop Rotational Area, or the Closed Area II Extension Scallop Rotational Area, as defined in § 648.60(b), (d), and (e), respectively, if there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2.

(b) * * *

(3) * * *

(i) * * *

(B) The following access area allocations and possession limits for limited access vessels shall be effective for the 2017 and 2018 fishing years:

(1) *Full-time vessels*—(i)

Rotational access area	Possession limits	2017 Allocation	2018 Allocation (default)
Closed Area 2	18,000 lb (8,165 kg)	18,000 lb (8,165 kg)	18,000 lb (8,165 kg). No flex option.
Nantucket Lightship	18,000 lb (8,165 kg)	
Mid-Atlantic	18,000 lb (8,165 kg)	
Elephant Trunk Flex	¹ 18,000 lb (8,165 kg)	
Total	72,000 lb (32,660 kg)	18,000 lb (8,165 kg).

¹ Elephant Trunk Flex Access Area allocation can be landed from either the Elephant Trunk Flex Access Area or the Mid-Atlantic Access Area, as described in paragraph (B)(1)(ii) of this section.

(ii) *Elephant Trunk Flex Access Area allocations.* Subject to the seasonal restriction specified in § 648.60(b)(2), for the 2017 fishing year only, a full-time vessel may choose to land up to 18,000 lb (8,165 kg) of the Mid-Atlantic Rotational Access Area allocation from the Elephant Trunk Flex Access Area, which shall be known as an *Elephant Trunk Flex Access Area allocation*. For example, Vessel A could take a trip in to the Elephant Trunk Flex Access Area and land 18,000 lb (8,165 kg) from that area on one trip, leaving the vessel with 18,000 lb (8,165 kg) of the Mid-Atlantic Rotational Access Area allocation; or, alternatively, the vessel could take a trip in to the Elephant Trunk Flex Access Area and land 15,000 lb (6,804 kg), leaving the vessel with 21,000 lb (9,525 kg) of Mid-Atlantic Access Area allocation, and, 3,000 lb (1,361 kg) of flex allocation which could be landed from the Elephant Trunk Flex Access Area on another trip.

(iii) For the 2018 fishing year, full-time limited access vessels are allocated 18,000 lb (8,165 kg) in the Mid-Atlantic Access Area only with a trip possession limit of 18,000 lb (8,165 kg).

(2) *Part-time vessels.* (i) For the 2017 fishing year only, a part-time limited access vessel is allocated a total of 28,800 lb (13,064 kg) with a trip possession limit of 14,400 lb per trip (6,532 kg per trip). Of the 28,800-lb (13,064-kg) allocation, 14,400 lb (6,532 kg) are allocated exclusively to the Mid-Atlantic Access Area. The remaining

14,400 lb (6,532 kg) can be landed either from the Mid-Atlantic Access Area or any one other available access area, (Closed Area 2, Nantucket Lightship, or Elephant Trunk Flex Access Areas). However, if a vessel chooses to land the remaining 14,400 lb (6,532 kg) from the Elephant Trunk Flex Access Area and does not land up to the full allocation on a trip, it may only land the remaining pounds either from the Elephant Trunk Flex Access Areas or the Mid-Atlantic Access Area.

(ii) For the 2018 fishing year, part-time limited access vessels are allocated 14,400 lb (6,532 kg) in the Mid-Atlantic Access Area only with a trip possession limit of 14,400 lb per trip (6,532 kg per trip).

(3) *Occasional vessels.* (i) For the 2017 fishing year only, an occasional limited access vessel is allocated 6,000 lb (2,722 kg) with a trip possession limit at 6,000 lb per trip (2,722 kg per trip).

Occasional vessels may harvest 6,000 lb (2,722 kg) allocation from only one available access area (Closed Area 2, Nantucket Lightship, Mid-Atlantic, or Elephant Trunk Flex Access Areas).

(ii) For the 2018 fishing year, occasional limited access vessels are allocated 6,000 lb (2,722 kg) in the Mid-Atlantic Access Area only with a trip possession limit of 6,000 lb per trip (2,722 kg per trip).

(i) *Limited access vessels' one-for-one area access allocation exchanges.* (A) The owner of a vessel issued a limited access scallop permit may exchange

unharvested scallop pounds allocated into one access area for another vessel's unharvested scallop pounds allocated into another Scallop Access Area. These exchanges may only be made for the amount of the current trip possession limit, as specified in paragraph (b)(3)(i)(B) of this section. For example, if the access area trip possession limit for full-time vessels is 18,000 lb (8,165 kg), a full-time vessel may exchange no more or less than 18,000 lb (8,165 kg), from one access area for no more or less than 18,000 lb (8,165 kg) allocated to another vessel for another access area. In addition, these exchanges may be made only between vessels with the same permit category: A full-time vessel may not exchange allocations with a part-time vessel, and vice versa. Vessel owners must request these exchanges by submitting a completed Access Area Allocation Exchange Form at least 15 days before the date on which the applicant desires the exchange to be effective. Exchange forms are available from the Regional Administrator upon request. Each vessel owner involved in an exchange is required to submit a completed Access Area Allocation Form. The Regional Administrator shall review the records for each vessel to confirm that each vessel has enough unharvested allocation remaining in a given access area to exchange. The exchange is not effective until the vessel owner(s) receive a confirmation in writing from the Regional Administrator

that the allocation exchange has been made effective. A vessel owner may exchange equal allocations up to the current possession limit between two or more vessels under his/her ownership. A vessel owner holding a Confirmation of Permit History is not eligible to exchange allocations between another vessel and the vessel for which a Confirmation of Permit History has been issued.

(B) *Flex allocation exchanges.* In fishing year 2017, each limited access full-time vessel is allocated 18,000 lb (8,165 kg) that may be landed from either the Elephant Trunk Flex Access Area or the Mid-Atlantic Access Area (flex allocation). Such flex allocation may be exchanged in full only for another access area allocation, but only the flex allocation may be landed from the Elephant Trunk Flex Access Area. For example, if a Vessel A exchanges 18,000 lb (8,165 kg) of flex allocation for 18,000 lb (8,165 kg) of Mid-Atlantic Access Area allocation with Vessel B, Vessel A would no longer be allowed to land allocation from the Elephant Trunk Flex Access Area based on its Mid-Atlantic Access Area allocation, but Vessel B could land up to 36,000 lb (16,330 kg) from the Elephant Trunk Flex Access Area and/or the Mid-Atlantic Access Area, combined.

* * * * *

(e) *Sea Scallop Research Set-Aside Harvest in Scallop Access Areas.* Unless otherwise specified, RSA may be harvested in any access area that is open

in a given fishing year, as specified through a specifications action or framework adjustment and pursuant to § 648.56. The amount of scallops that can be harvested in each access area by vessels participating in approved RSA projects shall be determined through the RSA application review and approval process. The access areas open for RSA harvest for fishing years 2017 and 2018 are:

- (1) 2017: Mid-Atlantic Access Area
- (2) 2018: No access areas

* * * * *

(g) * * *

(3) * * *

(v) The following LAGC IFQ access area allocations will be effective for the 2017 and 2018 fishing years:

Scallop access area	2017	2018 ¹
Mid-Atlantic	697	558
Elephant Trunk Flex	697	0
Nantucket Lightship	836	0

¹ The LAGC IFQ access area trip allocations for the 2018 fishing year are subject to change through a future specifications action or framework adjustment.

* * * * *

■ 6. In § 648.60, revise paragraph (b) to read as follows:

§ 648.60 Sea scallop rotational areas.

* * * * *

(b) *Elephant Trunk Flex Rotational Area.* (1) The Elephant Trunk Flex Rotational Area is defined by straight lines connecting the following points in the order stated (copies of a chart

depicting this area are available from the Regional Administrator upon request).

Point	Latitude	Longitude
ETFA 1	38°50' N.	74°20' W.
ETFA 2	38°50' N.	73°40' W.
ETFA 3	38°40' N.	73°40' W.
ETFA 4	38°40' N.	73°50' W.
ETFA 5	38°30' N.	73°50' W.
ETFA 6	38°30' N.	74°20' W.
ETFA 1	38°50' N.	74°20' W.

(2) *Season.* A vessel issued a scallop permit may not fish for, possess, or land scallops in or from the area known as the Elephant Trunk Flex Rotational Area, defined in paragraph (b)(1) of this section, during the period of July 1 through September 30 of each year the Elephant Trunk Flex Rotational Area is open to scallop vessels, unless transiting pursuant to § 648.59(a).

* * * * *

■ 7. In § 648.62, revise paragraph (b)(1) to read as follows:

§ 648.62 Northern Gulf of Maine (NGOM) management program.

* * * * *

(b) * * *

(1) *NGOM annual hard TACs.* The annual hard TAC for the NGOM is 73,371 lb (33,281 kg) for the 2017 fishing year and 95,000 lb (43,091 kg) for the 2018 fishing year.

Notices

Federal Register

Vol. 82, No. 12

Thursday, January 19, 2017

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent To Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to BioWorks, Inc. of Victor, New York, an exclusive license to U.S. Patent No. 9,320,283, "TRICHODERMA ASPERELLUM TO REMEDIATE PHYTOPHTHORA RAMORUM-INFESTED SOIL", issued on April 26, 2016.

DATES: Comments must be received on or before February 21, 2017.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Rm. 4-1174, Beltsville, Maryland 20705-5131.

FOR FURTHER INFORMATION CONTACT: Mojdeh Bahar of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights in this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as BioWorks, Inc. of Victor, New York has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within thirty (30) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license

would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Mojdeh Bahar,

Assistant Administrator.

BILLING CODE 3410-03-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2016-0093]

Addition of Moldova to the List of Regions Affected by African Swine Fever

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we have added Moldova to the Animal and Plant Health Inspection Service (APHIS) list maintained on the APHIS Web site of regions considered affected with African swine fever (ASF). We are taking this action because of the confirmation of ASF in Moldova.

DATES: *Effective Date:* The addition of Moldova to the APHIS list of regions considered affected with ASF is effective retroactively to October 4, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Donald Link, Microbiologist/Import Risk Analyst, National Import Export Services, VS, 920 Main Campus Drive, Suite 200, Raleigh, NC 27606; (919) 855-7731; *Donald.B.Link@aphis.usda.gov*.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of specified animals and animal products to prevent the introduction into the United States of various animal diseases, including rinderpest, foot-and-mouth disease, bovine spongiform encephalopathy, swine vesicular disease, classical swine fever, and African swine fever (ASF). These are dangerous and destructive diseases of ruminants and swine.

Sections 94.8 and 94.17 of part 94 of the regulations contain requirements governing the importation into the United States of pork and pork products from regions of the world where ASF

exists or is reasonably believed to exist and imposes restrictions on the importation of pork and pork products into the United States from those regions. ASF is a highly contagious disease of wild and domestic swine that can spread rapidly in swine populations with extremely high rates of morbidity and mortality. A list of regions where ASF exists or is reasonably believed to exist is maintained on the Animal and Plant Health Inspection Service (APHIS) Web site at https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/ct_animal_disease_status.

APHIS receives notice of ASF outbreaks from veterinary officials of the exporting country, from the World Organization for Animal Health (OIE), or from other publically available sources the Administrator determines to be reliable. In a report dated October 4, 2016, the veterinary authorities of Moldova reported to the OIE confirmation of an ASF outbreak in the Donduseni District of Moldova.

Although Moldova does not currently export pork or pork products to the United States, APHIS has determined that it is necessary to impose restrictions on the importation of pork and pork products from Moldova into the United States. Therefore, in response to this outbreak, APHIS added Moldova to the list of regions where ASF exists or is reasonably believed to exist.

As a result, pork and pork products from Moldova are subject to APHIS import restrictions designed to mitigate the risk of ASF introduction into the United States. These restrictions are effective retroactively to October 4, 2016.

Authority: 7 U.S.C. 450, 7701-7772, 7781-7786, and 8301-8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 12th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0032]

Notice of Decision To Authorize the Importation of Fresh Star Apple Fruit From Vietnam Into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our decision to authorize the importation into the continental United States of fresh star apple fruit from Vietnam. Based on the findings of a pest risk analysis, which we made available to the public for review and comment through a previous notice, we have determined that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh star apple fruit from Vietnam.

DATES: Effective January 19, 2017.

FOR FURTHER INFORMATION CONTACT: Mr. Tony Román, Senior Regulatory Policy Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737–1231; (301) 851–2242.

SUPPLEMENTARY INFORMATION: Under the regulations in “Subpart-Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–76, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

Section 319.56–4 of the regulations contains a performance-based process for approving the importation of commodities that, based on the findings of a pest risk analysis (PRA), can be safely imported subject to one or more of the designated phytosanitary measures listed in paragraph (b) of that section. Under that process, APHIS publishes a notice in the **Federal Register** announcing the availability of the PRA that evaluates the risks associated with the importation of a particular fruit or vegetable. Following the close of the 60-day comment period, APHIS may begin issuing permits for importation of the fruit or vegetable subject to the identified designated

measures if: (1) No comments were received on the PRA; (2) the comments on the PRA revealed that no changes to the PRA were necessary; or (3) changes to the PRA were made in response to public comments, but the changes did not affect the overall conclusions of the analysis and the Administrator’s determination of risk.

In accordance with that process, we published a notice¹ in the **Federal Register** on July 19, 2016 (81 FR 46886, Docket No. APHIS–2016–0032), in which we announced the availability, for review and comment, of a PRA that evaluated the risks associated with the importation into the continental United States of fresh star apple fruit (*Chrysophyllum cainito*) from Vietnam. The PRA consisted of a risk assessment identifying pests of quarantine significance that could follow the pathway of importation of fresh star apple fruit from Vietnam into the continental United States and a risk management document identifying phytosanitary measures to be applied to that commodity to mitigate the pest risk.

We solicited comments on the notice for 60 days ending September 19, 2016. We received one comment by that date, from a manufacturing company.

One measure identified in the PRA is that all consignments of fresh star fruit from Vietnam imported into the continental United States will be required to be treated with irradiation prior to arrival in the United States. The commenter argued that the fresh star fruit should also be allowed to be treated after its arrival in the United States.

While it is true that the phytosanitary treatment regulations in 7 CFR 305.9(a)(1) state that, where certified irradiation facilities are available, an approved irradiation treatment may be conducted for any imported regulated article either prior to shipment to the United States or in the United States, this is a general statement of the types of treatment APHIS deems allowable. The particulars of any treatment are examined on an individual basis as part of a country’s market access request. In their request, the national plant protection organization (NPPO) of Vietnam specifically stipulated that fresh star fruit be subject to a pre-clearance program within Vietnam. In considering this request, APHIS determined that Vietnam possesses sufficient infrastructure to meet an in-country treatment requirement.

The PRA also indicates that the fruit must be individually wrapped in plastic prior to shipment to reduce the risk of post-treatment reinfestation. The commenter observed that the PRA does not specify why fruits will be required to be packaged in this manner rather than using insect-proof cartons as described in 7 CFR 305.9(f)(2)(i)(A). The commenter argued that the fresh star fruit should be packed in insect-proof cartons rather than individually wrapped in keeping with the regulations.

Individually wrapping fruit is an effective phytosanitary mitigation measure, which takes the place of insect-proof cartons. This measure was specifically proposed by the NPPO of Vietnam in its market access request. Its phytosanitary efficacy was considered as part of the PRA conducted by APHIS. We determined that such individual wrapping provides equal phytosanitary protection to insect-proofing cartons and pallets.

Therefore, in accordance with the regulations in § 319.56–4(c)(2)(ii), we are announcing our decision to authorize the importation into the continental United States of fresh star apple fruit from Vietnam subject to the following phytosanitary measures:

- The fresh star apple fruit must be imported as commercial consignments only;
- Each consignment of fresh star apple fruit must be accompanied by a phytosanitary certificate issued by the NPPO of Vietnam;
- Each consignment of fresh star apple fruit must be treated in accordance with 7 CFR part 305; and
- Each consignment of fresh star apple fruit is subject to inspection upon arrival at the port of entry to the United States.

These conditions will be listed in the Fruits and Vegetables Import Requirements database (available at <https://www.aphis.usda.gov/favir/>). In addition to these specific measures, fresh star apple fruit from Vietnam will be subject to the general requirements listed in § 319.56–3 that are applicable to the importation of all fruits and vegetables.

Authority: 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 12th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE**Farm Service Agency****Information Collection Request; Direct Loan Servicing—Regular****AGENCY:** Farm Service Agency, USDA.**ACTION:** Notice; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on an extension with a revision of a currently approved information collection that supports Direct Loan Servicing-Regular programs. The information is used to determine borrower compliance with loan agreements, assist the borrower in achieving business goals, and regular servicing of the loan account such as graduation, subordination, partial release, and use of proceeds.

DATES: We will consider comments that we receive by March 20, 2017.

ADDRESSES: We invite you to submit comments on this notice. In your comments, include date, volume, and page number, and the OMB control number and the title of the information collection of this issue of the **Federal Register**. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to: www.regulations.gov. Follow the online instructions for submitting comments.

- *Mail:* J. Lee Nault, Loan Specialist, USDA/FSA/FLP, STOP 0523, 1400 Independence Avenue SW., Washington, DC 20250-0503.

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Copies of the information collection may be requested by contacting J. Lee Nault at the above address.

FOR FURTHER INFORMATION CONTACT:

J. Lee Nault, (202) 720-6834.

SUPPLEMENTARY INFORMATION:

Title: (7 CFR part 765) Farm Loan Programs—Direct Loan Servicing—Regular.

OMB Number: 0560-0236.

Expiration Date: 05/31/2017.

Type of Request: Extension with a revision.

Abstract: FSA's Farm Loan Programs provide loans to family farmers to purchase real estate and equipment, and finance agricultural production. Direct Loan Servicing—Regular, as specified in 7 CFR part 765, provides the requirements related to routine servicing actions associated with direct loans. FSA is required to actively

supervise its borrowers and provide credit counseling, management advice and financial guidance. Additionally, FSA must document that credit is not available to the borrower from commercial credit sources in order to maintain eligibility for assistance. Information collections established in the regulation are necessary for FSA to monitor and account for loan security, including proceeds derived from the sale of security, and to process a borrower's request for subordination or partial release of security. Borrowers are required to provide financial information to determine graduation eligibility based on commercial lender standards provided to FSA.

FSA is requesting OMB approval on the estimated numbers, which are being provided currently in this request. The burden hours have been increased by 5,968 hours while the annual responses have reduced by 6,531.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per responses multiplied by the estimated total annual of responses.

Estimate of Average Time to Respond: Public reporting burden for collecting information under this notice is estimated to average 0.84752 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The average travel time, which is included in the total annual burden, is estimated to be 1 hour per respondent.

Type of Respondents: Business or other for profits and farms.

Estimated Number of Respondents: 54,524.

Estimated Average Number of Responses per Respondent: 1.78621.

Estimated Total Annual Responses: 97,391.

Estimated Average Time per Response: 0.84752.

Estimated Total Annual Burden on Respondents: 82,541 hours.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of burden of the collection of information including the validity of the methodology and assumptions used;

(3) Evaluate the quality, utility and clarity of the information technology; and

(4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses where provided, will be made a matter of public record. Comments will be summarized and included in the request for OMB approval.

Val Dolcini,*Administrator, Farm Service Agency.*

[FR Doc. 2017-01071 Filed 1-18-17; 8:45 am]

BILLING CODE 3410-05-P**DEPARTMENT OF AGRICULTURE****Farm Service Agency****Information Collection Request; Guaranteed Farm Loan Program****AGENCY:** Farm Service Agency, USDA.**ACTION:** Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on an extension with a revision of a currently approved information collection associated with the Guaranteed Farm Loan Program. The collected information is needed to make and service loans guaranteed by FSA to eligible farmers and ranchers by commercial lenders and nontraditional lenders. FSA is also requesting approval to merge the information collection for the EZ Guarantee Program and the Micro Lender Program (MLP) (0560-0288) into the Guaranteed Farm Loan Program.

DATES: We will consider comments that we receive by March 20, 2017.

ADDRESSES: We invite you to submit comments on this notice. In your comments, include date, volume, and page number of this issue of the **Federal Register**. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to: www.regulations.gov. Follow the online instructions for submitting comments.

- *Mail:* Trent Rogers, Senior Loan Specialist, USDA, FSA, Stop 0522, 1400 Independence Avenue SW., Washington, DC 20250.

You may also send comments to the Desk Officer for Agriculture, Office of

Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Copies of the information collection may be requested by contacting Trent Rogers at the above addresses.

FOR FURTHER INFORMATION CONTACT: Trent Rogers, Senior Loan Specialist, (202) 720-3889.

SUPPLEMENTARY INFORMATION:

Description of Information Collection

Title: Guaranteed Farm Loans.

OMB Number: 0560-0155.

Expiration Date of Approval: 05/31/2017.

Type of Request: Extension with a revision.

Abstract: This information collection is needed to effectively administer the FSA guaranteed farm loan programs. The information is collected by the FSA loan official in consultation with participating lenders. The basic objective of the guaranteed loan program is to provide credit to applicants who are unable to obtain credit from lending institutions without a guarantee. The reporting requirements imposed on the public by the regulations at 7 CFR part 762 and 763 are necessary to administer the guaranteed loan program in accordance with statutory requirements of the Consolidated Farm and Rural Development Act and are consistent with commonly performed lending practices. Collection of information after loans are made is necessary to protect the Government's financial interest.

The estimated total annual burden hours are amended due to the EZ Guarantee Program and the Micro Lender Program (MLP), which reduced the information collection requirements. Therefore, the burden hours are being provided currently in this request for OMB approval. The annual responses have been reduced by 23,764 while the burden hours reduced by 33,340 hours in the request.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per responses multiplied by the estimated total annual of responses.

Estimate of Average Time to Respond: Public reporting burden for collecting information under this notice is estimated to average 0.9989 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The average travel time, which is included in the total annual

burden, is estimated to be 1 hour per respondent.

Type of Respondents: Businesses or other for-profits and Farms.

Estimated Number of Respondents: 14,585.

Estimated Average Number of Responses Per Respondent: 15.308.

Estimated Total Annual Responses: 220,213.

Estimated Average Time per Response: 0.9989.

Estimated Total Annual Burden on Respondents: 220,213 hours.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of burden of the collection of information including the validity of the methodology and assumptions used;

(3) Evaluate the quality, utility and clarity of the information technology; and

(4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses where provided, will be made a matter of public record. Comments will be summarized and included in the request for OMB approval.

Val Dolcini,

Administrator, Farm Service Agency.

[FR Doc. 2017-01072 Filed 1-18-17; 8:45 am]

BILLING CODE 3410-05-P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS-2016-0049]

Codex Alimentarius Commission: Meeting of the Codex Committee on Food Additives

AGENCY: Office of the Deputy Under Secretary for Food Safety, USDA.

ACTION: Notice of public meeting and request.

SUMMARY: The Office of Food Safety, U.S. Department of Agriculture (USDA), and the Food and Drug Administration (FDA), U.S. Department of Health and

Human Services are sponsoring a public meeting on February 21, 2017, from 9:00 a.m. to 12:00 noon. The objective of the public meeting is to provide information and receive public comments on agenda items and draft United States (U.S.) positions discussed at the 49th Session of the Codex Committee on Food Additives (CCFA) of the Codex Alimentarius Commission (Codex), taking place in Macao SAR, China March 20-24, 2017. The USDA Office of Food Safety and FDA recognize the importance of providing interested parties the opportunity to obtain background information on the 49th Session of the CCFA and to address items on the agenda.

DATES: The public meeting is scheduled for Tuesday, February 21, 2017, from 9:00 a.m. to 12:00 p.m.

ADDRESSES: The public meeting will take place in Rooms 1A-001 and 1A-002, The Food and Drug Administration (FDA), Harvey Wiley Federal Building, 5001 Campus Drive, College Park, MD 20740.

Documents related to the 49th Session of the CCFA will be accessible via the Internet at the following address: <http://www.codexalimentarius.org/meetings-reports/en/>.

The U.S. Delegate to the 49th Session of the CCFA, Paul Honigfort, invites interested U.S. parties to submit their comments electronically to the following email address: ccfa@fda.hhs.gov.

Registration: Attendees may register by emailing ccfa@fda.hhs.gov by February 14, 2017. Early registration is encouraged because it will expedite entry into the building and its parking area. If you require parking, please include the vehicle make and tag number when you register. Because the meeting will be held in a Federal building, you should also bring photo identification and plan for adequate time to pass through security screening systems. Attendees that are not able to attend the meeting in-person but wish to participate may do so by phone. Those wishing to participate by phone should request the call-in number and conference code when they register for the meeting.

For further information about the 49th Session of the CCFA contact: Paul Honigfort, Ph.D., Consumer Safety Officer, Division of Food Contact Notifications, Office of Food Additive Safety, U.S. Food and Drug Administration 5001 Campus Drive, College Park, MD 20740, Telephone: (240) 402-1206, Fax: (301) 436-2965, email: Paul.Honigfort@fda.hhs.gov.

FOR FURTHER INFORMATION ABOUT THE PUBLIC MEETING CONTACT: Daniel E.

Folmer, Ph.D., Review Chemist, Division of Petition Review, Office of Food Additive Safety, CFSAN/FDA HFS-265, 5001 Campus Drive, College Park, MD 20740, Telephone: (240) 402-1269, Fax: (301) 436-2972, email: daniel.folmer@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:**Background**

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO).

Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure that fair practices are used in trade.

The CCFA establishes or endorses permitted maximum levels for individual food additives; prepares priority lists of food additives for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives (JECFA); assigns functional classes and International Numbering System (INS) numbers to individual food additives; recommends specifications of identity and purity for food additives for adoption by Codex; considers methods of analysis for the determination of additives in food; and considers and elaborates standards or codes for related subjects such as labeling of food additives when sold as such. The CCFA is hosted by China.

Issues To Be Discussed at the Public Meeting

The following items on the agenda for the 49th Session of the CCFA will be discussed during the public meeting:

- Matters Referred by the Codex Alimentarius Commission and other subsidiary bodies
- Matters of Interest arising from FAO/WHO and from the 82nd Meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA)
- Proposed draft Specifications for Identity and Purity of Food Additives arising from the 82nd JECFA Meeting
- Endorsement and/or Revision of Maximum Levels for Food Additives and Processing Aids in Codex Standards
- Alignment of the food additive provisions of commodity standards: Report of the EWG on Alignment
- General Standard for Food Additives (GSFA): Outstanding provisions from the 48th session of CCFA; provisions

for benzoates in FC 14.1.4; provisions in FC 5.0 and 5.1; provisions associated with Note 22; provisions in FC 01.1, 01.1.1, 01.1.3 and 01.1.4 (Report of the EWG on the GSFA)

- General Standard for Food Additives (GSFA): Use levels for adipic acid (INS 355) in various food categories (replies to CL 2016/9-FA)
- General Standard for Food Additives (GSFA): Proposals for new and/or revision of food additive provisions (replies to CL 2016/8-FA, point 4 (a), 4(b) & 4 (c))
- Discussion paper on the use of food additives in the production of wine
- Proposed draft revision to the International Numbering System (INS) for Food Additives (CAC/GL 36-1989)
- Proposals for additions and changes to the Priority List of Substances proposed for evaluation by JECFA (replies to CL 2016/13-FA)
- Discussion paper on the management of CCFA work
- Other Business and Future Work

Each issue listed will be fully described in documents distributed, or to be distributed, by the Codex Secretariat prior to the meeting. Members of the public may access these documents at <http://www.fao.org/fao-who-codexalimentarius/meetings-reports/detail/en/?meeting=CCFA&session=49>.

Public Meeting

At the February 21, 2017 public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to the U.S. Delegate for the 49th Session of the CCFA, Paul Honigfort, Ph.D. at the following address: ccfa@fda.hhs.gov. Written comments should state that they relate to activities of the 49th Session of the CCFA.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it online through the FSIS Web page located at: <http://www.fsis.usda.gov/wps/portal/fsis/topics/regulations/federal-register/federal-register-notices>.

FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of

information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free email subscription service for industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included. The Update is also available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: http://www.fsis.usda.gov/wps/portal/fsis/topics/international-affairs/us-codex-alimentarius/committees-and-task-forces/mailling-list/CT_Index.

Options range from recalls to export information to regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf, or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email:

Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW., Washington, DC 20250-9410.

Fax: (202) 690-7442.

Email: program.intake@usda.gov.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotope, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

Dated: January 12, 2016.

Mary Frances Lowe,

U.S. Manager for Codex Alimentarius.

BILLING CODE 3410-DM-P

DEPARTMENT OF AGRICULTURE

Forest Service

Coconino and Tonto National Forests; Arizona; Fossil Creek Wild and Scenic River Comprehensive River Management Plan and Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent to extend the scoping period for the Fossil Creek Wild and Scenic River Environmental Impact Statement and Comprehensive River Management Plan.

SUMMARY: The Coconino and Tonto national forests published a Notice of Intent in the **Federal Register** on November 29, 2016 for the Fossil Creek Wild and Scenic River Environmental Impact Statement and Comprehensive River Management Plan. This notice extends the comment period to January 27, 2017.

DATES: Comments concerning the scope of the analysis must be received by January 27, 2017. The draft environmental impact statement is expected in summer 2017, and the final environmental impact statement is expected in spring 2018.

ADDRESSES: Send written comments via email to comments-southwestern-coconino-redrock@fs.fed.us (include "Fossil Creek CRMP" in the subject line); via mail to Coconino National Forest, Attention: Fossil Creek CRMP, P.O. Box 20429, Sedona, AZ 86341; via facsimile to (928) 203-7539; or in person at the Red Rock Ranger District Office, 8375 State Route 179, Sedona, AZ 86351.

FOR FURTHER INFORMATION CONTACT:

Contact Marcos Roybal, Fossil Creek Project Coordinator, by email at maroybal@fs.fed.us or by phone at (928) 203-2915. For information about the project, including proposed alternatives and other project documents, visit <http://tinyurl.com/FossilCreekCRMP>. Hard copy documents may be requested from the phone number above.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1 (800) 877-8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

The purpose of the project is to prepare a CRMP for the Fossil Creek Wild and Scenic River to meet the requirements of Section 3(d)(1) of the WSRA. The CRMP is needed to provide for the protection or enhancement of Fossil Creek's water quality, free-flowing condition, and its ORVs, and to fulfill WSRA Section 3(b) requirements to establish river corridor boundaries and recreation and wild segment classifications.

Since the decommissioning of a historic hydropower dam in 2005, public use dramatically increased as visitors sought to explore the heavily publicized Arizona landscape. Recreational use during the high-use season (June–September), for example, increased from an estimated 20,000 visitors in 2006 to approximately 80,000 visitors by 2013, with thousands turned away daily at the entrance barricades due to overcrowding. River values that need protection from impacts of recreational use include water quality, recreation, geology, Western Apache traditional and contemporary cultural values, and biological values (especially the high diversity of fish and wildlife species). Impacts have resulted from uncontrolled dispersed camping, creation of unapproved camp sites, creation of unplanned trail systems, excessive littering, and human waste near the creek. Monitoring since 2011 indicates there are increasing impacts to upland vegetation that is habitat for wildlife species; damage to heritage sites; and unsafe conditions for visitors, Forest Service personnel and emergency responders. In April 2016, an interim management reservation system was successfully implemented to reduce the daily capacity of visitors during the high-use season; this interim management reservation system will remain in place until the CRMP's completion.

Proposed Action

The Coconino and Tonto National Forests propose to establish a CRMP to guide management of the designated 17-mile Fossil Creek Wild and Scenic River corridor and to protect or enhance the area's outstandingly remarkable values. Within a range of alternatives, the proposed action is designated to include the most flexibility to increase capacity and recreation infrastructure—maximizing recreation opportunities in the future—while providing protection for sensitive river and tribal values at the same time through both a management plan and site-specific actions. Project actions would address

recreation capacity, corridor access, recreation facilities, services, and public health and safety.

During all or part of the year, a reservation system would manage visitor use by limiting the number of people at one time (PAOT) in the river corridor. The initial PAOT in the river corridor would be set at the current 2016 reservation management level—approximately 154 vehicles and 780 PAOT, including administrative use. Over time, if appropriate, adaptive management would increase capacity to a permitted maximum of approximately 338 vehicles and 1,705 PAOT if infrastructure is built, management capacity allows, and visitor behavior promotes sustainable river value protection. The proposed action also includes the following potential elements:

- Existing recreation sites would be expanded, particularly at the Irving site.
- Additional trails would be developed to link recreation sites and provide a greater variety of opportunities for a different hiking levels.
- A portion of Forest Road 708 would become a motorized trail.
- A limited amount of camping would be allowed at designated sites.
- Opportunities for outfitters/guides and concessionaries would be provided.
- Limited or no waterplay would exist at some creek locations due to cultural or natural resource issues.
- Some system routes would be closed or decommissioned, and other restoration actions would occur.

The existing Coconino and Tonto Forest Plans would be programmatically amended under the 2012 Planning Rule to incorporate management direction for the Fossil Creek WSR corridor. The proposed amendments would add, replace, delete or revise (as needed) direction for the management of the Wild and Scenic River corridor.

Possible Alternatives

A range of alternatives to the proposed action, including a no action alternative and three additional action alternatives, are being considered. The no action alternative (Alternative A) represents no change (a CRMP would not be established) and serves as the baseline for comparison of the effects of the action alternatives. The four action alternatives, which are based on extensive public engagement that has occurred since 2010, include: Alternative B (Enhanced Protections), Alternative C (Non-motorized Experience), Alternative D (Motorized Use and Refugia), and Alternative E (Long-term Adaptive Management—

Proposed Action). More detailed descriptions of the proposed action and alternatives can be found online at <http://tinyurl.com/FossilCreekCRMP> or be requested through the contact information provided above.

Lead and Cooperating Agencies

Arizona Game and Fish Department has cooperating agency status in order to assist the Coconino and the Tonto National Forests in the preparation of the Fossil Creek Wild and Scenic River CRMP and EIS.

Responsible Official

Laura Jo West, the Forest Supervisor on the Coconino National Forest, is the responsible official.

Nature of Decision To Be Made

Given the purpose and need of the project, the Coconino Forest Supervisor will review the proposed action, other alternatives, and the effects analysis in the EIS in order to determine: (1) Which alternative, or combination of alternatives, should be implemented; (2) what actions will be taken to protect and enhance the river's water quality, free-flowing condition and its ORVs, as required by WSRA; (3) the location and extent of infrastructure development, restoration activities, and changes in permitted visitor capacity; (4) the design features, mitigation measures and monitoring requirements; and, (5) consistency with the forest plans in place at the time of the decision and the need for amendments.

Preliminary Issues

Since 2010, public involvement regarding management of the Fossil Creek Wild and Scenic River has informed key issues and the alternatives that have been developed. Three key issues have arisen: (1) Recreation opportunities and recreational impacts on natural and cultural resources; (2) the level of recreation development; and (3) public health and safety. These issues form the basis for the alternatives presented in this Notice.

Scoping Process

The Notice of Intent published on November 29, 2016 initiated the scoping process, which guides the development of the environmental impact statement. Several scoping meetings have been held, and interested parties should check the Fossil Creek CRMP Web page at <http://tinyurl.com/FossilCreekCRMP> for information about these meetings. This revised Notice of Intent extends the scoping period to January 27, 2017.

This project is subject to the objection process pursuant to 36 CFR 218 and is

not being authorized under the Healthy Forest Restoration Act (HFRA). As such, those who provide specific written comments during designated comment periods in accordance with 36 CFR 218.5 will be eligible to participate in the objection process. Issues raised in objections must be based on previously submitted timely, specific written comments regarding the proposed project unless new information arises after designated opportunities (36 CFR 218.7). Several previous scoping periods have occurred since 2010, and provide standing to object under 36 CFR 218 to those who commented during designated comment periods.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, but will not be eligible for objection per 36 CFR 218.5.

Dated: January 12, 2017.

Laura Jo West,

Coconino National Forest Supervisor.

BILLING CODE 3411-15-P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Connecticut Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a briefing meeting of the Connecticut Advisory Committee to the Commission will convene at 9:30 a.m. (EST) on Tuesday, February 7, 2017, in the Old Judiciary Room of the Capitol Building, 210 Capitol Avenue, Hartford, CT 06106.

DATES: Tuesday, February 7, 2017 (EST). at 9:30 a.m.—Briefing Meeting and Public Session

ADDRESSES: Old Judiciary Room of the Capitol Building, 210 Capitol Avenue, Hartford, CT 06106.

FOR FURTHER INFORMATION CONTACT: Barbara Delaviez at ero@usccr.gov, or 202-376-7533.

SUPPLEMENTARY INFORMATION: The purpose of the briefing meeting is to examine the issue of solitary confinement in Connecticut correctional facilities. The Committee will hear from elected officials, correction officials, advocates, former inmates, and family members of incarcerated prisoners. The public is invited to the meeting and encouraged to address the committee following the presentations.

If other persons who plan to attend the meeting require other accommodations, please contact Evelyn Bohor at ebohor@usccr.gov at the Eastern Regional Office at least ten (10) working days before the scheduled date of the meeting.

Time will be set aside at the end of the briefing so that members of the public may address the Committee after the formal presentations have been completed. Persons interested in the issue are also invited to submit written comments; the comments must be received in the regional office by Tuesday, March 7, 2017. Written comments may be mailed to the Eastern Regional Office, U.S. Commission on Civil Rights, 1331 Pennsylvania Avenue, Suite 1150, Washington, DC 20425, faxed to (202) 376-7548, or emailed to Evelyn Bohor at ebohor@usccr.gov. Persons who desire additional information may contact the Eastern Regional Office at (202) 376-7533.

Records and documents discussed during the meeting will be available for public viewing as they become available at <http://facadatabase.gov/committee/meetings.aspx?cid=239> and clicking on the "Meeting Details" and "Documents" links. Records generated from this meeting may also be inspected and reproduced at the Eastern Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this advisory committee are advised to go to the Commission's Web site, www.usccr.gov, or to contact the Eastern Regional Office at the above phone number, email or street address.

Tentative Agenda

Welcome and Introductions

David J. McGuire, Chair, Connecticut Advisory Committee

Opening Statement

David J. McGuire, Chair, Connecticut Advisory Committee

Briefing Meeting

Panel I—Elected Officials and
Correction Officials

Panel II—Professors, Advocates, and
former inmates and family members
of prisoners.

Dated: January 12, 2016.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Economic Development Administration

**Notice of Petitions by Firms for
Determination of Eligibility To Apply
for Trade Adjustment Assistance**

AGENCY: Economic Development
Administration, Department of
Commerce.

ACTION: Notice and Opportunity for
Public Comment.

Pursuant to Section 251 of the Trade
Act 1974, as amended (19 U.S.C. 2341

et seq.), the Economic Development
Administration (EDA) has received
petitions for certification of eligibility to
apply for Trade Adjustment Assistance
from the firms listed below.
Accordingly, EDA has initiated
investigations to determine whether
increased imports into the United States
of articles like or directly competitive
with those produced by each of these
firms contributed importantly to the
total or partial separation of the firm's
workers, or threat thereof, and to a
decrease in sales or production of each
petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE
[1/1/2017 through 1/12/2017]

Firm name	Firm address	Date accepted for investigation	/Product(s)
M. Lizen Manufacturing Company	2625 Federal Signal Drive, University Park, IL 60484.	1/11/2017	The firm manufactures precision metal stampings and springs.
Brad Foote Gear Works, Inc.	3250 South Central Avenue, Cicero, IL 60804.	1/12/2017	The firm manufactures precision-ma- chined metal gears.
Golden Hill Enterprises, d/b/a Golden Hill Studios.	4123 Golden Hill Road, Great Valley, NY 14741.	1/12/2017	The firm manufactures hand painted glassware.
Guidry's Catfish, Inc.	1093 Henderson Highway, Breau Bridge, LA 70517.	1/12/2017	The firm processes seafood.

Any party having a substantial
interest in these proceedings may
request a public hearing on the matter.
A written request for a hearing must be
submitted to the Trade Adjustment
Assistance for Firms Division, Room
71030, Economic Development
Administration, U.S. Department of
Commerce, Washington, DC 20230, no
later than ten (10) calendar days
following publication of this notice.

Please follow the requirements set
forth in EDA's regulations at 13 CFR
315.9 for procedures to request a public
hearing. The Catalog of Federal
Domestic Assistance official number
and title for the program under which
these petitions are submitted is 11.313,
Trade Adjustment Assistance for Firms.

Miriam Kearse,

Lead Program Analyst.

Foreign-Trade Zones Board

[B–65–2016]

**Foreign-Trade Zone (FTZ) 158—
Vicksburg/Jackson, Mississippi;
Authorization of Limited Production
Activity; MTD Consumer Group, Inc.
(Lawn and Garden Equipment);
Verona, Mississippi**

On September 13, 2016, MTD
Consumer Group, Inc., submitted a
notification of proposed production
activity to the Foreign-Trade Zones
(FTZ) Board for its facility within FTZ
158—Site 17, in Verona, Mississippi.
The notification was processed in
accordance with the regulations of the
FTZ Board (15 CFR part 400), including
notice in the **Federal Register** inviting
public comment (81 FR 68404, October
4, 2016). The FTZ Board has determined
that further review of part of the
proposed activity is warranted at this
time. The production activity described
in the notification is authorized on a
limited basis, subject to the FTZ Act and
the Board's regulations, including
Section 400.14, and further subject to a
restriction requiring that foreign-status
textile grass catcher bags be admitted in
domestic/duty-paid status (19 CFR
146.43).

Dated: January 11, 2017.

Andrew McGilvray,

Executive Secretary.

Foreign-Trade Zones Board

[B–63–2016]

**Foreign-Trade Zone (FTZ) 177—
Evansville, Indiana; Authorization of
Production Activity; Best Chairs, Inc.
d/b/a Best Home Furnishings
(Upholstered Furniture); Ferdinand,
Cannelton and Paoli, Indiana**

On September 14, 2016, Best Chairs,
Inc. d/b/a Best Home Furnishings
submitted a notification of proposed
production activity to the Foreign-Trade
Zones (FTZ) Board for its facility within
FTZ 177—Sites 5, 6, and 7, in
Ferdinand, Cannelton and Paoli,
Indiana.

The notification was processed in
accordance with the regulations of the
FTZ Board (15 CFR part 400), including
notice in the **Federal Register** inviting
public comment (81 FR 65626,
September 23, 2016). The FTZ Board
has determined that no further review of
the activity is warranted at this time.
The production activity described in the
notification is authorized, subject to the

FTZ Act and the Board's regulations, including Section 400.14, and subject to a restriction requiring that foreign status upholstery leather be admitted to the zone in privileged foreign status (19 CFR 146.41).

Dated: January 12, 2017.

Andrew McGilvray,
Executive Secretary.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2025]

Foreign-Trade Zone 168; Application Requesting Expansion/Reorganization; Dallas/Fort Worth, Texas Area

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Metroplex International Trade Development Corporation, grantee of Foreign-Trade Zone 168, submitted an application to the Board for authority to reorganize/expand FTZ 168 to include proposed Site 9 in Coppell, Texas and to remove 101 acres from existing Site 8 in Gainesville, Texas, adjacent to the Dallas/Fort Worth Customs and Border Protection port of entry (B-52-2013, docketed May 23, 2013);

Whereas, notice inviting public comment has been given in the **Federal Register** (78 FR 32238-32239, May 29, 2013) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners' report, and finds that the requirements of the FTZ Act and the Board's regulations would be satisfied with regard to the proposed removal of acreage at Site 8 and to the designation of a subzone for the use of Samsung Electronics America, Inc. (SEA) within proposed Site 9 (but not with regard to the approval of FTZ designation for the remaining portion(s) of proposed Site 9) upon submission by the applicant of documentary evidence of having reestablished its corporate existence and a definitive map(s) and acreage figure for the portion(s) of proposed Site 9 to be designated as the subzone for the use of SEA;

Now, therefore, the Board hereby orders:

The Board's Executive Secretary is authorized to finalize designation of a

subzone for the use of SEA and the requested removal of acreage from Site 8 upon the applicant's submission to the Executive Secretary of documentary evidence of the applicant's having reestablished its corporate existence and a definitive map(s) and acreage figure for the portion(s) of proposed Site 9 to be designated as the subzone for the use of SEA. This action is subject to the FTZ Act and the Board's regulations, including Section 400.13.

Signed at Washington, DC, this 12th day of January 2017.

Paul Piquado,

Assistant Secretary of Commerce for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

[FR Doc. 2017-01219 Filed 1-18-17; 8:45 am]

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-06-2017]

Foreign-Trade Zone (FTZ) 20—Norfolk, Virginia; Notification of Proposed Production Activity; STIHL Incorporated (Outdoor Power Products Manufacturing); Virginia Beach, Virginia

STIHL Incorporated (STIHL) submitted a notification of proposed production activity to the FTZ Board for its facilities in Virginia Beach, Virginia within FTZ Subzone 20E. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on December 23, 2016.

STIHL already has authority to produce outdoor power products within Subzone 20E. The current request would add an additional foreign status component to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status component described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt STIHL from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, STIHL would be able to choose the duty rates during customs entry procedures that apply to the blowers, trimmers, sprayers, cutters, cultivators and chain saws (duty rate free to 4.7%) for the foreign-status component noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign-status

production equipment. The additional component sourced from abroad is lithium ion batteries (duty rate 3.4%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is February 28, 2017.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230-0002, and in the "Reading Room" section of the Board's Web site, which is accessible via www.trade.gov/ftz.

For further information, contact Christopher Kemp at Christopher.Kemp@trade.gov or (202) 482-0862.

Dated: January 11, 2017.

Andrew McGilvray,
Executive Secretary.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-943; C-570-944]

Certain Oil Country Tubular Goods From the People's Republic of China: Notice of Court Decision Not in Harmony With Final Scope Ruling and Notice of Amended Final Scope Ruling Pursuant to Court Decision

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is notifying the public that the Court of International Trade's (CIT's or the Court's) final judgment in this case is not in harmony with the Department's final scope ruling. Therefore, the Department finds that neither the plain language of the scope nor an analysis of the scope language using the criteria outlined in the Department's regulations support a finding that seamless unfinished oil country tubular goods (OCTG) (*i.e.*, green tubes) manufactured in the People's Republic of China (the PRC), and subsequently finished in a third country, are covered by the scope of the antidumping and countervailing duty orders.

DATES: Effective December 3, 2016.

FOR FURTHER INFORMATION CONTACT: John Drury, AD/CVD Operations, Office VI, Enforcement and Compliance,

International Trade Administration,
U.S. Department of Commerce, 1401
Constitution Avenue NW., Washington,
DC 20230; telephone: (202) 482-0195.

SUPPLEMENTARY INFORMATION:

Background

On February 7, 2014, the Department issued the *Bell Supply Scope Ruling*,¹ in which it determined that green tubes that are finished in third countries are covered under the scope of the *Orders* based on an analysis of the factors under 19 CFR 351.225(k)(1).² Bell Supply Company, LLC (Bell Supply) challenged the Department's final ruling before the CIT. On July 9, 2015, the Court issued its opinion on the *Bell Supply Scope Ruling*, remanding the Department's determination back to the agency for further analysis,³ as discussed in further detail in the *Final Remand Results*.⁴ The Department issued a redetermination on remand, under protest, which continued to find that the merchandise in question was within the scope of the *Orders*.⁵ On April 27, 2016, the Court issued its opinion on the *First Remand Results*, again remanding the Department's determination for further analysis.⁶ Specifically, the Court found that the language of the *Orders* does not necessarily include OCTG finished in third countries, even if processed using green tubes sourced from the PRC.⁷ The Court stated that the evidence on which the Department relied to make its determination (*i.e.*, the petition and the injury analysis by the International Trade Commission) “does not support” the Department's conclusion that the merchandise in question is

within the scope.⁸ The Court further stated that “absent additional evidence from the descriptions of the merchandise found in the (k)(1) sources, Commerce was required to proceed to the next step of its interpretive analysis and evaluate the factors under 19 CFR 351.225(k)(2).”⁹ The Court also stated that, in the event that the Department was unable to find that the scope of the *Orders* covers the merchandise at issue under 19 CFR 351.225(k)(2), the Department was free to employ a circumvention analysis pursuant to 19 CFR 351.225(h) and section 781(b) of the Tariff Act of 1930, as amended (the Act).¹⁰

Accordingly, the Department issued the *Final Remand Results*. Consistent with the Court's instructions in *Bell Supply II*, the Department determined that neither the plain language of the scope nor an analysis of the scope language using the criteria outlined in 19 CFR 351.225(k)(1) supported a finding that green tubes manufactured in the PRC, and subsequently finished in a third country, are covered by the scope of the *Orders*.¹¹ Additionally, the Department determined that, because the factors under 19 CFR 351.225(k)(2) did not indicate whether OCTG finished in third countries fell within the *Orders*, green tubes from the PRC that are subsequently heat-treated in third countries are not within the scope of the *Orders*.¹² Finally, the Department also determined information on the record did not support a finding that merchandise produced by Citra Tubindo, a producer of finished OCTG in Indonesia who used unfinished green tubes produced in the PRC, circumvented the *Orders*.¹³

In *Bell Supply III*, the Court sustained the Department's *Final Remand Results* in its entirety.¹⁴

Timken Notice

In its decision in *Timken*,¹⁵ as clarified by *Diamond Sawblades*,¹⁶ the United States Court of Appeals for the Federal Circuit (CAFC) held that, pursuant to sections 516A(c) and (e) of the Act, the Department must publish a notice of a court decision that is not “in

harmony” with a Department determination and must suspend liquidation of entries pending a “conclusive” court decision. The CIT's November 23, 2016, judgment in *Bell Supply III*, sustaining the Department's decision in the *Final Remand Results* that unfinished green tubes further processed in third countries into finished OCTG are not covered by the scope of the *Orders* and that merchandise processed in Indonesia into finished OCTG by Citra Tubindo, using unfinished green tubes produced in the PRC, does not constitute circumvention of the *Orders*, constitutes a final decision of the court that is not in harmony with the *Bell Supply Scope Ruling*. This notice is published in fulfillment of the publication requirements of *Timken*. Accordingly, the Department will continue the suspension of liquidation of the oil country tubular goods at issue pending expiration of the period to appeal or, if appealed, pending a final and conclusive court decision.

Amended Final Scope Ruling

Because there is now a final court decision with respect to the *Bell Supply Scope Ruling*, the Department is amending its final scope ruling. The Department finds that the scope of the *Orders* does not cover the products addressed in the *Bell Supply Scope Ruling*. The Department will instruct U.S. Customs and Border Protection (CBP) that the cash deposit rate will be zero percent for the OCTG finished in Indonesia using unfinished green tubes manufactured in the PRC. In the event that the CIT's ruling is not appealed, or if appealed, upheld by the CAFC, the Department will instruct CBP to liquidate entries of the OCTG at issue without regard to antidumping and/or countervailing duties, and to lift suspension of liquidation of such entries.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(e)(1), 751(a)(1), and 777(i)(1) of the Act.

Dated: January 11, 2017.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE**International Trade Administration****United States Travel and Tourism Advisory Board: Meeting of the United States Travel and Tourism Advisory Board**

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an Open Meeting.

SUMMARY: The United States Travel and Tourism Advisory Board (Board) will hold an open meeting via teleconference on Wednesday, February 1, 2017. The Board was re-chartered in August 2015 and advises the Secretary of Commerce on matters relating to the U.S. travel and tourism industry. The purpose of the meeting is for Board members to deliberate a letter to the Secretary with an overview of the Board and its activities to date under the current charter term. The final agenda will be posted on the Department of Commerce Web site for the Board at <http://trade.gov/ttab>, at least one week in advance of the meeting.

DATES: Wednesday, February 1, 2017 3:00 p.m.–3:30 p.m. EST. The deadline for members of the public to register, including requests for auxiliary aids, or to submit written comments for dissemination prior to the meeting, is 5:00 p.m. EST on January 25, 2017.

ADDRESSES: The meeting will be held by conference call. The call-in number and passcode will be provided by email to registrants. Requests to register (including for auxiliary aids) and any written comments should be submitted to: U.S. Travel and Tourism Advisory Board, U.S. Department of Commerce, M–800, 1300 Pennsylvania Avenue NW., Washington, DC 20230, OACIO@trade.gov. Members of the public are encouraged to submit registration requests and written comments via email to ensure timely receipt.

FOR FURTHER INFORMATION CONTACT: Joe Holecko, the United States Travel and Tourism Advisory Board, M–800, 1300 Pennsylvania Avenue NW., Washington, DC 20230, telephone: 202–482–4783, email: OACIO@trade.gov.

SUPPLEMENTARY INFORMATION:

Background: The Board advises the Secretary of Commerce on matters relating to the U.S. travel and tourism industry.

Public Participation: The meeting will be open to the public and will be accessible to people with disabilities. All guests are required to register in advance by the deadline identified under the DATES caption. Requests for

auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted, but may not be possible to fill. Any member of the public may submit pertinent written comments concerning the Board's affairs at any time before or after the meeting. Comments may be submitted to Joe Holecko at the contact information indicated above. To be considered during the meeting, comments must be received no later than 5:00 p.m. EST on Wednesday, January 25, 2017, to ensure transmission to the Board prior to the meeting. Comments received after that date and time will be distributed to the members but may not be considered on the call. Copies of Board meeting minutes will be available within 90 days of the meeting.

Joe Holecko,

Executive Secretary, United States Travel and Tourism Advisory Board.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE**International Trade Administration****Proposed Information Collection; Comment Request; Information Collection for Self-Certification to the Swiss-U.S. Privacy Shield Framework**

AGENCY: International Trade Administration (ITA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before March 20, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument and instructions should be directed to David Ritchie, Department of Commerce, International Trade Administration, Room 20001, 1401 Constitution Avenue NW., Washington, DC, (or via the Internet at privacyshield@trade.gov, and tel. 202–482–1512).

SUPPLEMENTARY INFORMATION:**I. Abstract**

The United States and Switzerland share the goal of enhancing privacy protection for their citizens, but take different approaches to protecting personal data. Given those differences, the Department of Commerce (DOC) developed the Swiss-U.S. Privacy Shield Framework (Privacy Shield) in consultation with the Swiss Administration, as well as with industry and other stakeholders, to provide organizations in the United States with a reliable mechanism for personal data transfers to the United States from Switzerland while ensuring the protection of the data as required by Swiss law.

On January 12, 2017, the Swiss Administration deemed the Privacy Shield Framework adequate to enable data transfers under Swiss law. To provide organizations the time needed to review the Privacy Shield Principles and the commitment that they entail, the DOC will begin accepting self-certification submissions from organizations on April 12, 2017. More information on the Privacy Shield is available at: <https://www.privacyshield.gov/welcome>.

The DOC has issued the Privacy Shield Principles under its statutory authority to foster, promote, and develop international commerce (15 U.S.C. 1512). The International Administration (ITA) administers and supervises the Privacy Shield, including by maintaining and making publicly available an authoritative list of U.S. organizations that have self-certified to the DOC. U.S. organizations submit information to ITA to self-certify their compliance with Privacy Shield.

U.S. organizations considering self-certifying to the Privacy Shield should review the Privacy Shield Framework. In summary, in order to enter the Privacy Shield, an organization must (a) be subject to the investigatory and enforcement powers of the Federal Trade Commission (FTC), the Department of Transportation, or another statutory body that will effectively ensure compliance with the Principles; (b) publicly declare its commitment to comply with the Principles; (c) publicly disclose its privacy policies in line with the Principles; and (d) fully implement them.

Self-certification to the DOC is voluntary; however, an organization's failure to comply with the Principles after its self-certification is enforceable under Section 5 of the Federal Trade Commission Act prohibiting unfair and

deceptive acts in or affecting commerce (15 U.S.C. 45(a)) or other laws or regulations prohibiting such acts.

In order to rely on the Privacy Shield for transfers of personal data from Switzerland, an organization must self-certify its adherence to the Principles to the DOC, be placed by ITA on the Privacy Shield List, and remain on the Privacy Shield List. To self-certify for the Privacy Shield, an organization must provide to the DOC a self-certification submission that contains the information specified in the Privacy Shield Principles. The Privacy Shield self-certification form would be the means by which an organization would provide the relevant information to ITA.

ITA has committed to follow up with organizations that have been removed from the Privacy Shield List. ITA will send questionnaires to organizations that fail to complete the annual certification or who have withdrawn from the Privacy Shield to verify whether they will return, delete, or continue to apply the Principles to the personal information that they received while they participated in the Privacy Shield, and if personal information will be retained, verify who within the organization will serve as an ongoing point of contact for Privacy Shield-related questions.

In addition, ITA has committed to conduct compliance reviews on an ongoing basis, including through sending detailed questionnaires to participating organizations. In particular, such compliance reviews shall take place when: (a) The DOC has received specific non-frivolous complaints about an organization's compliance with the Principles, (b) an organization does not respond satisfactorily to inquiries by the DOC for information relating to the Privacy Shield, or (c) there is credible evidence that an organization does not comply with its commitments under the Privacy Shield.

The proposed information collection for the Swiss-U.S. Privacy Shield Framework is substantially similar to the previously approved information collection for the EU-U.S. Privacy Shield Framework (OMB Control Number: 0625-0276).

II. Method of Collection

The Privacy Shield self-certification is submitted electronically by organizations through the DOC's Privacy Shield Web site (<https://www.privacyshield.gov/>). It is anticipated that the Privacy Shield questionnaires and the corresponding responses provided by organizations would be conveyed electronically via

email or through the DOC's Privacy Shield Web site.

III. Data

OMB Control Number: None.

Form Number(s): None.

Type of Review: Regular submission.

Affected Public: primarily businesses or other for-profit organizations.

Estimated Number of Respondents: 2,700.

Estimated Time per Response: 38 minutes.

Estimated Total Annual Burden Hours: 2,215.

Estimated Total Annual Cost to Public: \$2,118,150.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF168

Whaling Provisions; Aboriginal Subsistence Whaling Quotas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; notification of quota for bowhead whales.

SUMMARY: NMFS notifies the public of the aboriginal subsistence whaling quota for bowhead whales that it has assigned to the Alaska Eskimo Whaling

Commission (AEWC), and of limitations on the use of the quota deriving from regulations of the International Whaling Commission (IWC). For 2017, the quota is 75 bowhead whales struck. This quota and other applicable limitations govern the harvest of bowhead whales by members of the AEWC.

DATES: Effective January 19, 2017.

ADDRESSES: Office for International Affairs and Seafood Inspection, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT:

Carolyn Doherty, (301) 427-8385.

SUPPLEMENTARY INFORMATION: Aboriginal subsistence whaling in the United States is governed by the Whaling Convention Act (WCA) (16 U.S.C. 916 *et seq.*). Under the WCA, IWC regulations shall generally become effective with respect to all persons and vessels subject to the jurisdiction of the United States, within 90 days of notification from the IWC Secretariat of an amendment to the IWC Schedule (16 U.S.C. 916k). Regulations that implement the WCA, found at 50 CFR 230.6, require the Secretary of Commerce (Secretary) to publish, at least annually, aboriginal subsistence whaling quotas and any other limitations on aboriginal subsistence whaling deriving from regulations of the IWC.

At the 64th Annual Meeting of the IWC, the Commission set catch limits for aboriginal subsistence use of bowhead whales from the Bering-Chukchi-Beaufort Seas stock. The bowhead catch limits were based on a joint request by the United States and the Russian Federation, accompanied by documentation concerning the needs of two Native groups: Alaska Eskimos and Chukotka Natives in the Russian Far East.

The IWC set a 6-year block catch limit of 336 bowhead whales landed. For each of the years 2013 through 2018, the number of bowhead whales struck may not exceed 67, except that any unused portion of a strike quota from any prior year may be carried forward. No more than 15 strikes may be added to the strike quota for any one year. At the end of the 2016 harvest, there were 15 unused strikes available for carry-forward, so the combined strike quota set by the IWC for 2017 is 82 (67 + 15).

An arrangement between the United States and the Russian Federation ensures that the total quota of bowhead whales landed and struck in 2017 will not exceed the limits set by the IWC. Under this arrangement, the Russian natives may use no more than seven

strikes, and the Alaska Eskimos may use no more than 75 strikes.

Through its cooperative agreement with the AEW, NOAA has assigned 75 strikes to the Alaska Eskimos. The AEW will in turn allocate these strikes among the 11 villages whose cultural and subsistence needs have been documented, and will ensure that its hunters use no more than 75 strikes.

Other Limitations

The IWC regulations, as well as the NOAA regulation at 50 CFR 230.4(c), forbid the taking of calves or any whale accompanied by a calf.

NOAA regulations (at 50 CFR 230.4) contain a number of other prohibitions relating to aboriginal subsistence whaling, some of which are summarized here:

- Only licensed whaling captains or crew under the control of those captains may engage in whaling.
- Captains and crew must follow the provisions of the relevant cooperative agreement between NOAA and a Native American whaling organization.
- The aboriginal hunters must have adequate crew, supplies, and equipment to engage in an efficient operation.
- Crew may not receive money for participating in the hunt.
- No person may sell or offer for sale whale products from whales taken in the hunt, except for authentic articles of Native American handicrafts.
- Captains may not continue to whale after the relevant quota is taken, after the season has been closed, or if their licenses have been suspended. They may not engage in whaling in a wasteful manner.

Dated: January 13, 2017.

John Henderschedt,

Director, Office for International Affairs and Seafood Inspection, National Marine Fisheries Service.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP15-499-001; CP15-499-000]

Texas Eastern Transmission, LP; Notice of Amendment to Application

Take notice that on December 30, 2016, Texas Eastern Transmission, LP (Texas Eastern), 5400 Westheimer Court, Houston, Texas 77056, filed an amendment to its application in Docket No. CP15-499-000, pursuant to section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations for its proposed South Texas Expansion Project (Project). Specifically, Texas Eastern requests, in addition to the authorizations requested in the previous application, authorization to (i) construct, install, own, operate, and maintain new gas release measurement equipment and associated enclosures at its existing Vidor and Mont Belvieu Compressor Stations in Orange and Chambers Counties, Texas, respectively, and at its proposed Petronila Compressor Station in Nueces County, Texas, new gas coolers at its existing

Blessing Compressor Station in Matagorda County, Texas, and a new tie-in to Pomelo Connector at Texas Eastern's proposed Petronila Compressor Station; (ii) acquire, by lease, 400,000 dekatherms per day (Dth/d) of capacity on Pomelo Connector, LLC's proposed pipeline; (iii) change the Project's targeted in-service date from May 1, 2017 to October 1, 2018; (iv) change the Project's capacity from 400,000 Dth/d to 396,000 Dth/d; and (v) remove from the Project's scope the meter and regulating station at the proposed Petronila Compressor Station. Texas Eastern further proposes to amend its incremental project recourse rate and to modify its Exhibit K, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may be viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Any questions concerning these applications may be directed to Berk Donaldson, General Manager, Rates & Certificates, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251-1642, by telephone at (713) 627-4488, or by fax at (713) 627-5947.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental analysis (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888

First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 5 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on February 2, 2017.

Dated: January 12, 2017.

Kimberly D. Bose,

Secretary.

City of West Memphis, Arkansas; Conway Corporation; Notice of Filing

Take notice that on January 12, 2016, Midcontinent Independent System Operator, Inc. submitted tariff filing per: Refund Report to be effective N/A, pursuant to the Federal Energy Regulatory Commission's (Commission) Order issued on October 4, 2016.¹

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call

(866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5:00 p.m. Eastern Time on February 2, 2017.

Dated: January 12, 2017.

Kimberly D. Bose,

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric rate filings:

Docket Number: ER17-405-000, ER17-406-000.

Applicants: American Electric Power Service Corporation, PJM Interconnection, L.L.C.

Description: Supplement to November 22 PJM Interconnection, L.L.C. rate filing.

Filed Date: 1/9/17.

Accession Number: 20170109-5351.

Comments Due: 5 p.m. ET 1/30/17.

Docket Number: ER17-779-000.

Applicants: California Independent System Operator Corporation.

Description: Compliance filing: 2017-01-11 Petition for Limited Waiver of RAAIM Advisory Period to be effective N/A.

Filed Date: 1/11/17.

Accession Number: 20170111-5148.

Comments Due: 5 p.m. ET 1/23/17.

Docket Number: ER17-781-000.

Applicants: NorthWestern Corporation.

Description: Notice of Cancellation of Multiple Inactive Service Agreements and Rate Schedules of NorthWestern Corporation.

Filed Date: 1/11/17.

Accession Number: 20170111-5169.

Comments Due: 5 p.m. ET 2/1/17.

Docket Number: ER17-782-000.

Applicants: New York Independent System Operator, Inc.

Description: Order No. 825 Compliance Filing of New York Independent System Operator, Inc.

Filed Date: 1/11/17.

Accession Number: 20170111-5173.

Comments Due: 5 p.m. ET 2/1/17.

Docket Number: ER17-783-000.

Applicants: Wabash Valley Power Association, Inc.

Description: § 205(d) Rate Filing: Revisions to Formuluary Rate Tariff to be effective 3/12/2017.

Filed Date: 1/12/17.

Accession Number: 20170112-5055.

Comments Due: 5 p.m. ET 2/2/17.

Docket Number: ER17-784-000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Queue Position AB2-010/AB2-011, Original Service Agreement No. 4601 to be effective 12/13/2016.

Filed Date: 1/12/17.

Accession Number: 20170112-5120.

Comments Due: 5 p.m. ET 2/2/17.

Docket Number: ER17-785-000.

Applicants: Southern California Edison Company.

Description: § 205(d) Rate Filing: Amended LGIA AltaGas Sonoran Energy Inc. to be effective 3/14/2017.

Filed Date: 1/12/17.

Accession Number: 20170112-5143.

Comments Due: 5 p.m. ET 2/2/17.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: January 12, 2017.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL17-34-000]

Alcoa Corporation; Notice of Petition for Declaratory Order

Take notice that on December 22, 2016, pursuant to section 385.207(a)(4) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a) (2016), and sections 366(b)(1), 366.3(d), and 366.4(b)(3) of Commission's regulations under the Public Utility Holding Company Act of

¹ City of West Memphis, Arkansas and Conway Corporation, 157 FERC ¶ 61,005 (2016).

2005 (PUHCA 2005), Alcoa Corporation (Petitioner) filed a petition for declaratory order requesting that the Commission grant their petition and declare them exempt from the Commission's regulations under PUHCA 2005, all as more fully explained in the petition.

Any person desiring to intervene or to protest in this proceeding must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5:00 p.m. Eastern time on February 2, 2017.

Dated: January 12, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2611-084]

Hydro Kennebec, LLC; Notice of Application To Extend Interim Species Protection Plan for Three Years and Soliciting Comments, Motions To Intervene and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. *Application Type:* Amendment of License.
- b. *Project No:* 2611-084.
- c. *Date Filed:* December 23, 2016.
- d. *Applicant:* Hydro Kennebec, LLC.
- e. *Name of Project:* Hydro Kennebec.
- f. *Location:* The project is located on the Kennebec River in Kennebec and Somerset counties, Maine.
- g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a-825r.
- h. *Applicant Contact:* Kelly Maloney, Hydro Kennebec LLC, 150 Main Street, Lewiston, ME 04340, (207) 755-5605.
- i. *FERC Contact:* Mr. Mark Pawlowski 202-502-6052, mark.pawlowski@ferc.gov.
- j. *Deadline for filing comments, motions to intervene, and protests:* February 13, 2017.

All documents may be filed electronically via the Internet. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at <http://www.ferc.gov/docs-filing/efiling.asp>. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and seven copies should be mailed to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments.

Please include the project number, P-2611-084, on any comments, motions, or protests filed.

k. *Description of Request:* Hydro Kennebec, LLC, licensee for the Hydro Kennebec Project, seeks Commission approval to extend the expiration date of its approved Interim Species Passage Plan (ISPP). The Commission approved the ISPP on February 28, 2013, with an expiration date of December 31, 2016. Hydro Kennebec, LLC wants to keep the plan in effect for three more years so that it expires on December 31, 2019

(the same date approved ISPPs expire for the Lockwood, Shawmut, and Weston Projects, which are also located on the Kennebec River).

l. *Locations of the Application:* A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS," "PROTESTS," or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource

agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: January 12, 2017.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2007-0268; FRL-9958-50-OW]

Revision to the PAG Manual: Protective Action Guide (PAG) for Drinking Water After a Radiological Incident

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: As part of its mission to protect human health and the environment, the Environmental Protection Agency publishes protective action guides (PAGs) to help federal, state, local and tribal emergency response officials make radiation protection decisions during emergencies. EPA, in coordination with a multi-agency working group within the Federal Radiological Preparedness Coordinating Committee, recently updated its guidance manual on this topic, titled "Protective Action Guides and Planning Guidance for Radiological Incidents" (referred to herein as the PAG Manual). On December 8, 2016, EPA announced availability of the updated 2016 PAG Manual in the **Federal Register**. In this document, EPA is announcing that it has amended Chapter 4 of the 2016 PAG Manual to incorporate guidance for radiation protection decisions concerning drinking water. The drinking water PAG is not binding and does not in any way affect regulatory requirements or enforcement of the Safe Drinking Water Act (SDWA), including maximum contaminant limits (MCLs) for radionuclides established by regulation under the SDWA. The drinking water PAG is guidance only and is intended for use by federal, state and local emergency management officials in the unlikely event of significant radiological contamination incidents, such as a disaster at a nuclear power plant, a

radiological dispersal device or an improvised nuclear device, and for a duration which may last for weeks to months but not longer than one year. The dose levels reflected in the drinking water PAG provide a level of protection against cancer risks for a short-term (weeks to months but not longer than a year), similar to that provided by EPA's MCLs for radionuclides (which are calculated based on 70 years of exposure). The revised drinking water PAG is available for use upon publication of this document in the **Federal Register**, at www.regulations.gov, under ID No. EPA-HQ-OAR-2007-0268.

FOR FURTHER INFORMATION CONTACT:

Samuel Hernandez, Standards and Risk Management Division, Office of Ground Water and Drinking Water, Mail Code 4607M, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: (202) 564-1735; email: hernandez.samuel@epa.gov.

SUPPLEMENTARY INFORMATION:

A. How can I get copies of the PAG Manual and supporting information?

Docket: EPA has established a docket for this action under Docket ID No. EPA-HQ-OAR-2007-0268. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air and Radiation Docket in the EPA Docket Center, (EPA/DC) EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC 20004. The Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Docket's Public Reading Room is (202) 566-1744 and the telephone number for the Air and Radiation Docket is (202) 566-1742. In accordance with normal EPA docket procedures, if copies of any docket materials are requested, a reasonable fee may be charged for photocopying.

Electronic access: The PAG Manual in electronic form suitable for printing, as well as related guidelines and further information, can be found on the PAGs' Web site at <http://www.epa.gov/radiation/protective-action-guides-pags>.

B. What authority does EPA have to provide Protective Action Guidance?

The historical and legal basis of EPA's role in the PAG Manual begins with the Reorganization Plan No. 3 of 1970, in which the Administrator of the EPA assumed all the functions of the Federal Radiation Council (FRC), including the charge to "... advise the President with respect to radiation matters,

directly or indirectly affecting health, including guidance for all federal agencies in the formulation of radiation standards and in the establishment and execution of programs of cooperation with [s]tates." (Reorg. Plan No. 3 of 1970, section 2(a) (7), 6(a) (2); § 274.h of the Atomic Energy Act of 1954, as amended (AEA), codified at 42 U.S.C. 2021(h)). Recognizing this role, the Federal Emergency Management Agency (FEMA) directed EPA, in its Radiological Emergency Planning and Preparedness Regulations, to "establish Protective Action Guides (PAGs) for all aspects of radiological emergency planning in coordination with appropriate federal agencies." (44 CFR 351.22(a)). FEMA also tasked EPA with preparing "guidance for state and local governments on implementing PAGs, including recommendations on protective actions which can be taken to mitigate the potential radiation dose to the population." (44 CFR 351.22(b)). All of this information was to "be presented in the Environmental Protection Agency (EPA) 'Manual of Protective Action Guides and Protective Actions for Nuclear Incidents.'" (44 CFR 351.22(b)).

Additionally, section 2021(h) charged the Administrator with performing "such other functions as the President may assign to him [or her] by Executive Order." Executive Order 12656 states that the Administrator shall "[d]evelop, for national security emergencies, guidance on acceptable emergency levels of nuclear radiation. . . ." (Executive Order No. 12656, section 1601(2)). EPA's role in PAGs development was recognized by the *National Response Framework, Nuclear/Radiological Incident Annex* of June 2008.

C. What is the PAG Manual: Protective action guides and planning guidance for radiological incidents?

The PAG Manual provides federal, state and local emergency management officials with guidance for responding to radiological emergencies. A protective action guide is the projected dose to an individual from a release of radioactive material at which a specific protective action to reduce or avoid that dose is recommended. Emergency management officials use PAGs for making decisions regarding actions to protect the public from exposure to radiation during an emergency. Such actions include, but are not limited to, evacuation, shelter-in-place, temporary relocation and food restrictions.

Development of the PAGs was based on the following essential principles, which also apply to the selection of any protective action during an incident:

- Prevent acute effects.
- Balance protection with other important factors and ensure that actions result in more benefit than harm.

- Reduce risk of chronic effects.

The PAG Manual is not a legally binding regulation or standard and does not supersede any environmental laws. This guidance does not address or impact site cleanups occurring under other statutory authorities such as the EPA's Superfund program, the Nuclear Regulatory Commission's (NRC) decommissioning program, or other federal or state cleanup programs. As indicated by the use of non-mandatory language such as "may," "should" and "can," the PAG Manual only provides recommendations and does not confer any legal rights or impose any legally binding requirements upon any member of the public, states or any other federal agency. Rather, the PAG Manual recommends projected radiation doses at which specific actions may be warranted in order to reduce or avoid that dose. The PAG Manual is designed to provide flexibility to be more or less restrictive as deemed appropriate by decision makers based on the unique characteristics of the incident and the local situation.

D. How did EPA respond to public comments on the proposed Draft Protective Action Guide for Drinking Water?

PAGs do not represent "acceptable" routine exposure in the way that regulatory standards such as maximum contaminant levels do. PAGs are guidance levels to support emergency decision making by response authorities to avoid unnecessary radiation exposure. Development and implementation of PAGs is always guided by three basic principles: Prevent acute effects, balance protection with other important factors and ensure that actions result in more benefit than harm, and reduce risk of chronic effects.

On June 10, 2016, EPA published a **Federal Register** document requesting public comments on the proposed drinking water PAG and the guidance for advance planning (81 FR 37589). EPA sought specific comments and feedback on the appropriateness of the drinking water PAG and possible implementation challenges associated with the two-tiered approach. In addition, EPA asked whether a single-tier drinking water PAG should be considered rather than using the tiered approach.

In response, EPA received over 60,000 comment letters from members of the public, state and local emergency

response and health organizations, environmental advocates, industry associations and other stakeholders. Most of the comment letters expressed concerns with the proposed guidance. Commenters wrote that the proposed guidance could weaken the regulatory requirements of the Safe Drinking Water Act. In addition, environmental advocacy organizations indicated that the drinking water PAG dose levels were too high and insufficient to be protective of human health, and asked EPA to withdraw the proposed guidance and, in its place, use the National Primary Drinking Water Regulations for Radionuclides as the basis for any emergency response measures regarding drinking water.

Commenters also asserted that the proposed drinking water PAG did not conform to the National Environmental Policy Act (NEPA) as well as other regulations dealing with cleanup and waste management of radioactive contaminants. Commenters expressed doubts regarding the duration that the drinking water PAG would be implemented after an incident, claiming that the drinking water PAG could be in place for timeframes exceeding one year.

In response to comments, EPA has amended the drinking water guidance to emphasize, with regards to the scope of the drinking water PAG recommendations, that they are only intended to apply to nationally significant radiological contamination incidents, such as a disaster at a nuclear power plant, a radiological dispersal device or an improvised nuclear device, and for a duration that may last for weeks to months but not longer than one year.

Some commenters expressed concerns that PAGs would weaken drinking water standards and regulations. Environmental regulations or standards are legal limits designed to minimize health effects from everyday exposure to low levels of radiation over long periods. The PAG levels are guidance for emergency situations; they do not supplant any standards or regulations, nor do they affect the stringency or enforcement of any standards or regulations. The PAG levels are intended to be used only in an emergency when radiation levels have already exceeded environmental standards. The PAG levels trigger public safety measures to minimize radiation exposures during an emergency.

To develop guidance on drinking water considerations, EPA based its assessment on assumptions limiting exposures to a one-year timeframe. EPA expects that the responsible party for

any drinking water system adversely impacted during a radiation incident will take action to return to compliance with Safe Drinking Water Act levels as soon as practicable.

The National Primary Drinking Water Regulations establish regulatory limits designed to minimize health effects from everyday exposure to low levels of radiation over long periods; those limits are not changing with this action. Emergency guides are temporary measures to minimize risk while enabling distribution of limited resources during an emergency response.

Estimated risk of excess cancer cases for lifetime exposure (70 years) to beta emitting radioactive contaminants in drinking water at 4 mrem/yr (the MCL) generally falls in a range of risks deemed acceptable by EPA. Estimated risks associated for a shorter (one-year) exposure to radioactivity in drinking water at the proposed PAG levels fall within a similar risk range.

The drinking water PAG meets NEPA policy goals because it is based on analyses, documentation and review procedures that are functionally equivalent to NEPA. "Activities for the development of federal radiation regulations and guidance in accordance with the Atomic Energy Act of 1954 are functionally equivalent to NEPA" (63 FR 58045, October 29, 1998).

Commenters questioned whether the EPA considered cumulative effects in developing the drinking water PAG. In developing the PAG Manual, EPA considered the potential for cumulative exposure from multiple exposure pathways including: plume inhalation, immersion, ground shine, drinking water ingestions and food, among others. However, EPA has determined that for implementation purposes, it is impractical to compartmentalize joint protective actions, since allocations of dose to different segments of the population based on individual exposure routes will depend on site-specific circumstances and are impossible to quantify. While the PAGs for the various pathways are separate, emergency management officials should consider all relevant exposure routes when making protective action decisions in an emergency. In addition, incident-specific factors like geographical location, ongoing weather, the isotopes released and population affected should be considered after a contamination event, and specific exposure routes should be identified to allow different types of protective actions to be aimed at the specific risks to be avoided.

Several commenters from state emergency management agencies and radiation control programs expressed support for EPA's proposal, stating that the guidance was well developed and technically sound; and that the incorporation of the drinking water PAG into the PAG Manual is a critical aspect of a coordinated emergency response after a radiation contamination incident.

Some commenters suggested that while they support the incorporation of the drinking water PAG, they believe the proposed PAG was too conservative and that EPA should consider establishing the PAG in the 2,000 to 10,000 mrem range.

EPA believes that the drinking water PAG should be consistent with and within the range of currently available guidance for other exposure pathways during the intermediate phase. Also, when possible, the drinking water PAG recommendations should be based on an additional level of protection to sensitive life-stages. For short-term incidents, as explained in the PAG Manual, it is appropriate to have a 500 mrem PAG level for drinking water for the general population and a lower-tier PAG level of 100 mrem for persons at sensitive life-stages, including pregnant women, nursing women, and children 15 years old and under. This approach of setting a two-tier level of protection incorporates suggestions submitted by commenters regarding the adequate consideration of children and sensitive subpopulations.

There is an abundance of caution built into the derivation of the drinking water PAG through a variety of assumptions, including conservative dose-response modeling; selection of the most sensitive life stages to derive the PAG for children through age 15 years; and, the assumption of no decay of isotopes over the calculated one-year exposure period, which may be appropriate in some situations. This action ensures that the protective measures it recommends are appropriate for all members of the public, including sensitive subpopulations.

E. What is the timeframe for implementation of this PAG Manual?

Emergency management and radiation protection organizations that use the PAGs in their emergency plans are encouraged to incorporate this updated guidance as soon as possible. This may entail training, as well as the update of plans and procedures. Outreach and technical training will be conducted by EPA, the Federal Radiological Monitoring and Assessment Center and interagency partners of the PAG Subcommittee. FEMA expects certain

organizations associated with nuclear power plant operations to use the PAG Manual in developing their emergency management plans. FEMA plans to begin using the new PAG Manual during their evaluation of offsite response organizations around nuclear power facilities 12 months after the publication of this document in the **Federal Register**.

For further information and related guidelines, see the EPA Web site: <http://www.epa.gov/radiation/protective-action-guides-pags>. Keywords include: drinking water, radiation, radiological incident, emergency and protective action guide.

Dated: January 10, 2017.

Joel Beauvais,

Deputy Assistant Administrator, Office of Water.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2014-0534; FRL-9958-62-OAR]

California State Nonroad Engine Pollution Control Standards; Commercial Harbor Craft Regulations; Notice of Decision

AGENCY: Environmental Protection Agency.

ACTION: Notice of decision.

SUMMARY: The Environmental Protection Agency ("EPA") is granting the California Air Resources Board ("CARB") its request for an authorization of its amendments to its Commercial Harbor Craft regulations ("CHC Amendments"). EPA is also confirming that certain CHC amendments are within the scope of a prior EPA authorization. CARB's CHC Amendments primarily subject diesel-fueled engines on crew and supply, barge and dredge vessels to the in-use engine emission requirements of the original CHC regulations; allow CARB or EPA Tier 2 or higher tier certified off-road ("nonroad") engines to be used as auxiliary or propulsion engines in both new and in-use CHC vessels; and clarify requirements and address certain issues that have arisen during CARB's implementation of the original CHC regulations. This decision is issued under the authority of the Clean Air Act ("CAA" or "Act").

DATES: Petitions for review must be filed by March 20, 2017.

ADDRESSES: EPA has established a docket for this action under Docket ID

EPA-HQ-OAR-2014-0534. All documents relied upon in making this decision, including those submitted to EPA by CARB, are contained in the public docket. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air and Radiation Docket in the EPA Headquarters Library, EPA West Building, Room 3334, located at 1301 Constitution Avenue NW., Washington, DC. The Public Reading Room is open to the public on all federal government working days from 8:30 a.m. to 4:30 p.m.; generally, it is open Monday through Friday, excluding holidays. The telephone number for the Reading Room is (202) 566-1744. The Air and Radiation Docket and Information Center's Web site is <http://www.epa.gov/oar/docket.html>. The electronic mail (email) address for the Air and Radiation Docket is: a-and-r-Docket@epa.gov, the telephone number is (202) 566-1742, and the fax number is (202) 566-9744. An electronic version of the public docket is available through the federal government's electronic public docket and comment system. You may access EPA dockets at <http://www.regulations.gov>. After opening the www.regulations.gov Web site, enter EPA-HQ-OAR-2014-0534 in the "Enter Keyword or ID" fill-in box to view documents in the record. Although a part of the official docket, the public docket does not include Confidential Business Information ("CBI") or other information whose disclosure is restricted by statute.

EPA's Office of Transportation and Air Quality ("OTAQ") maintains a Web page that contains general information on its review of California waiver requests. Included on that page are links to prior waiver **Federal Register** notices, some of which are cited in today's notice. The page can be accessed at <http://www.epa.gov/otaq/cafr.htm>.

SUPPLEMENTARY INFORMATION:

I. Background

EPA granted an authorization for California's initial set of CHC regulations on December 5, 2011.¹ California's initial CHC regulations

¹ 76 FR 77521 (December 5, 2011).

established emission standards, requirements related to the control of emissions, and enforcement provisions. The requirements are applicable to diesel propulsion and auxiliary engines on new and in-use commercial harbor craft, with some exceptions. Commercial harbor craft include a variety of different types of vessels, including ferries, excursion vessels, tugboats, towboats, and commercial and charter fishing boats. The initial CHC regulations established in-use emission limits for in-use ferries, excursion vessels, tugboats, and towboats equipped with federal Tier 0 and Tier 1 propulsion and auxiliary marine engines. Owners and operators of these vessels were required to upgrade the engines to meet emission limits equal to or cleaner than federal Tier 2 or Tier 3 marine engine certification standards, according to a compliance schedule that was also set forth in the regulations. The compliance schedule was based on the model year of the original engine ("in-use engine model year"), its hours of operation, and the vessel's home port location. The CHC regulations apply separately to new and in-use engines used on harbor craft.²

In a letter dated May 28, 2014, CARB submitted to EPA its request pursuant to section 209(e) of the CAA, regarding authorization of its amendments to California's CHC regulations to reduce emissions from diesel engines on commercial harbor craft ("CHC Amendments").³ The CARB Board approved the CHC Amendments on June 24, 2010 (by Resolution 10-26).⁴

The CHC Amendments set forth a variety of in-use requirements, including extending the applicability of the CHC regulations to in-use crew and supply, barge, and dredge vessels that are equipped with federal Tier 0 and Tier 1 propulsion and auxiliary marine engines that operate within the Regulated California Waters.⁵ The CHC

Amendments also eliminate certain exemptions for CHC engines that had been registered in CARB's portable equipment registration program ("PERP") or permitted by local air pollution districts, and now subject such engines to the CHC regulations. In addition, the CHC Amendments clarify and define "swing engines" as replacement engines that are maintained at dockside locations and require such engines to comply with the CHC regulation's in-use engine requirements. The original CHC regulations required replacement engines for in-use CHC vessels to be certified to current EPA model year engines standards. CARB found this requirement could present difficulties for in-use CHC vessels in certain situations. Therefore, the CHC Amendments allow an owner or operator to use a non-current-year certified replacement engine under certain circumstances. In addition, the CHC Amendments allow the use of existing engines in a fleet to replace an older engine otherwise subject to the in-use requirements (the existing engine becomes subject to the in-use compliance date that applied to the engine being replaced). The CHC Amendments also expand the compliance extension options to fleets of three or more vessels.

CARB's CHC Amendments also include requirements that are applicable to both new and in-use engines. The original CHC regulation provided that new or in-use diesel propulsion or auxiliary engines for in-use harbor craft could not be sold, offered for sale, leased, rented, or acquired unless the engines were certified to at least federal Tier 2 or Tier 3 marine emission standards for a new engine of the same power rating and displacement in effect at the time of the aforementioned actions. The amendments now provide compliance flexibility to CHC owners or operators with the option of using EPA or CARB Tier 2 or higher tier certified off-road engines provided the engine or vessel manufacturer has complied with the provisions of 40 CFR 1042.605, which establishes requirements for marinized land-based engines.

A. California's Authorization Request

California requested that EPA perform two types of review. First, CARB

use engine compliance was required. The compliance schedule was based on the in-use engine model year, hours of operation, and the vessel's home port location. The amendments establish compliance schedules applicable to crew and supply vessel engines and a separate set of compliance schedules applicable to both barge and dredge vessel engines that are based solely on the in-use engine model year and annual hours of operation.

requested an EPA determination that certain provisions of the CHC Amendments are within the scope of a prior authorization issued by EPA, or in the alternative, merit full authorization ("Within-the-Scope Amendments"). CARB includes as part of the Within-the-Scope Amendments: The provisions allowing use of EPA or CARB certified off-road CI engines to comply with the new and in-use requirements for propulsion and/or auxiliary engines; the amendments that subject CHC engines registered and permitted by local air pollution districts prior to January 1, 2009, CHC auxiliary engines registered to CARB's PERP prior to January 1, 2009, and CHC auxiliary engines not permanently affixed to the vessel and registered in PERP on or after January 1, 2009 to the CHC Regulation; and the amendments that clarify swing engines are replacement engines subject to the CHC regulation's in-use requirements, along with the exemptions for replacement engines in in-use CHC vessels, the allowance of the use of existing engines to replace an older engine subject to in-use requirements, and the expansion of the availability of compliance extensions for CHC vessel fleets.

Second, CARB requests full authorization for amendments that establish new requirements ("Full Authorization Amendments"). The Full Authorization Amendments pertain to the new provisions establishing in-use requirements applicable to crew and supply, barge, and dredge vessels. The amendments extend the applicability of the previous requirement that specified categories of CHC vessels (ferries, excursions vessels tugboats, towboats, push boats, and multipurpose harbor craft) to meet emission limits equal to or cleaner than federal Tier 2 or Tier 3 new marine engine emission standards, as applicable and in effect for the year that in-use engine compliance is required under the compliance schedule set forth within the regulation.

B. Clean Air Act Nonroad Engine and Vehicle Authorizations

Section 209(e)(1) of the Act permanently preempts any state, or political subdivision thereof, from adopting or attempting to enforce any standard or other requirement relating to the control of emissions for certain new nonroad engines or vehicles.⁶ For

² The regulations are codified at title 13, California Code of Regulations (CCR), section 2229.5 and title 17, CCR section 93118.5.

³ Letter and attached memo from Richard Corey, CARB to Gina McCarthy, EPA dated May 28, 2014 ("Waiver Support Document"), EPA-HQ-OAR-2014-0534-0002.

⁴ CARB Resolution 10-26, June 24, 2010, EPA-HQ-OAR-2014-0534-0008.

⁵ Regulated California Waters include all California inland waters, all California estuarine waters, and all waters within a zone 24 nautical miles seaward of the California coastline, except for specified areas along the Southern California coastline, Title 17 CCR 93118.5(d)(68). The original CHC regulations required owners or operators of in-use ferries, excursion vessels, and tugboats equipped with Tier 0 and Tier 1 propulsion and auxiliary marine engines to meet equal to or cleaner than federal Tier 2 or Tier 3 new marine engine certification standards in effect for the year that in-

⁶ States are expressly preempted from adopting or attempting to enforce any standard or other requirement relating to the control of emissions from new nonroad engines which are used in construction equipment or vehicles or used in farm equipment or vehicles and which are smaller than

all other nonroad engines, states generally are preempted from adopting and enforcing standards and other requirements relating to the control of emissions. Section 209(e)(2), however, requires the Administrator, after notice and opportunity for public hearing, to authorize California to adopt and enforce standards and other requirements relating to the control of emissions from such vehicles or engines if California determines that California standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. However, EPA shall not grant such authorization if it finds that (1) the determination of California is arbitrary and capricious; (2) California does not need such California standards to meet compelling and extraordinary conditions; or (3) California standards and accompanying enforcement procedures are not consistent with [CAA section 209].⁷

On July 20, 1994, EPA promulgated a rule interpreting the three criteria set forth in section 209(e)(2)(A) that EPA must consider before granting any California authorization request for nonroad engine or vehicle emission standards.⁸ EPA revised these regulations in 1997.⁹ As stated in the preamble to the 1994 rule, EPA historically has interpreted the consistency inquiry under the third criterion, outlined above and set forth in section 209(e)(2)(A)(iii), to require, at minimum, that California standards and

enforcement procedures be consistent with section 209(a), section 209(e)(1), and section 209(b)(1)(C) of the Act.¹⁰

In order to be consistent with section 209(a), California's nonroad standards and enforcement procedures must not apply to new motor vehicles or new motor vehicle engines. To be consistent with section 209(e)(1), California's nonroad standards and enforcement procedures must not attempt to regulate engine categories that are permanently preempted from state regulation. To determine consistency with section 209(b)(1)(C), EPA typically reviews nonroad authorization requests under the same "consistency" criteria that are applied to motor vehicle waiver requests under section 209(b)(1)(C). That provision provides that the Administrator shall not grant California a motor vehicle waiver if she finds that California "standards and accompanying enforcement procedures are not consistent with section 202(a)" of the Act. Previous decisions granting waivers and authorizations have noted that state standards and enforcement procedures will be found to be inconsistent with section 202(a) if (1) there is inadequate lead time to permit the development of the necessary technology, giving appropriate consideration to the cost of compliance within that time,¹¹ or (2) the federal and state testing procedures impose inconsistent certification requirements.¹²

In light of the similar language in sections 209(b) and 209(e)(2)(A), EPA has reviewed California's requests for authorization of nonroad vehicle or engine standards under section 209(e)(2)(A) using the same principles that it has historically applied in reviewing requests for waivers of preemption for new motor vehicle or new motor vehicle engine standards under section 209(b).¹³ These principles include, among other things, that EPA should limit its inquiry to the three specific authorization criteria identified in section 209(e)(2)(A),¹⁴ and that EPA should give substantial deference to the policy judgments California has made in adopting its regulations. In previous waiver decisions, EPA has stated that Congress intended EPA's review of

California's decision-making be narrow. EPA has rejected arguments that are not specified in the statute as grounds for denying a waiver:

The law makes it clear that the waiver requests cannot be denied unless the specific findings designated in the statute can properly be made. The issue of whether a proposed California requirement is likely to result in only marginal improvement in California air quality not commensurate with its costs or is otherwise an arguably unwise exercise of regulatory power is not legally pertinent to my decision under section 209, so long as the California requirement is consistent with section 202(a) and is more stringent than applicable Federal requirements in the sense that it may result in some further reduction in air pollution in California.¹⁵

This principle of narrow EPA review has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit.¹⁶ Thus, EPA's consideration of all the evidence submitted concerning an authorization decision is circumscribed by its relevance to those questions that may be considered under section 209(e)(2)(A).

B. Within-the-Scope Determinations

If California amends regulations that were previously authorized by EPA, California may ask EPA to determine that the amendments are within the scope of the earlier authorization. A within-the-scope determination for such amendments is permissible without a full authorization if three conditions are met. First, the amended regulations must not undermine California's previous determination that its standards, in the aggregate, are as protective of public health and welfare as applicable federal standards. Second, the amended regulations must not affect consistency with section 209 of the Act, following the same criteria discussed above in the context of full authorizations. Third, the amended regulations must not raise any "new issues" affecting EPA's prior authorizations.¹⁷

¹⁵ "Waiver of Application of Clean Air Act to California State Standards," 36 FR 17458 (Aug. 31, 1971). Note that the more stringent standard expressed here, in 1971, was superseded by the 1977 amendments to section 209, which established that California must determine that its standards are, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. In the 1990 amendments to section 209, Congress established section 209(e) and similar language in section 209(e)(1)(i) pertaining to California's nonroad emission standards which California must determine to be, in the aggregate, at least as protective of public health and welfare as applicable federal standards.

¹⁷ See "California State Motor Vehicle Pollution Control Standards; Amendments Within the Scope

175 horsepower. Such express preemption under section 209(e)(1) of the Act also applies to new locomotives or new engines used in locomotives. CAA § 209(e)(1), 42 U.S.C. 7543(e)(1)(A).

⁷ EPA's review of California regulations under section 209 is not a broad review of the reasonableness of the regulations or its compatibility with all other laws. Sections 209(b) and 209(e) of the Clean Air Act limit EPA's authority to deny California requests for waivers and authorizations to the three criteria listed therein. As a result, EPA has consistently refrained from denying California's requests for waivers and authorizations based on any other criteria. In instances where the U.S. Court of Appeals has reviewed EPA decisions declining to deny waiver requests based on criteria not found in section 209(b), the Court has upheld and agreed with EPA's determination. See *Motor and Equipment Manufacturers Ass'n v. Nichols*, 142 F.3d 449, 462–63, 466–67 (D.C. Cir. 1998); *Motor and Equipment Manufacturers Ass'n v. EPA*, 627 F.2d 1095, 1111, 1114–20 (D.C. Cir. 1979). See also 78 FR 58090, 58120 (September 20, 2013).

⁸ See "Air Pollution Control; Preemption of State Regulation for Nonroad Engine and Vehicle Standards," 59 FR 36969 (July 20, 1994).

¹³ See *Engine Manufacturers Association v. EPA*, 88 F.3d 1075, 1087 (D.C. Cir. 1996): "... EPA was within the bounds of permissible construction in analogizing § 209(e) on nonroad sources to § 209(a) on motor vehicles."

¹⁴ See EPA's Final 209(e) rulemaking at 59 FR 36969, 36983 (July 20, 1994).

C. Deference to California

In previous waiver and authorization decisions, EPA has recognized that the intent of Congress in creating a limited review based on the section 209(b)(1) criteria was to ensure that the federal government did not second-guess state policy choices. As the agency explained in one prior waiver decision:

It is worth noting . . . I would feel constrained to approve a California approach to the problem which I might also feel unable to adopt at the federal level in my own capacity as a regulator. The whole approach of the Clean Air Act is to force the development of new types of emission control technology where that is needed by compelling the industry to “catch up” to some degree with newly promulgated standards. Such an approach . . . may be attended with costs, in the shape of reduced product offering, or price or fuel economy penalties, and by risks that a wider number of vehicle classes may not be able to complete their development work in time. Since a balancing of these risks and costs against the potential benefits from reduced emissions is a central policy decision for any regulatory agency under the statutory scheme outlined above, I believe I am required to give very substantial deference to California’s judgments on this score.¹⁸

Similarly, EPA has stated that the text, structure, and history of the California waiver provision clearly indicate both a congressional intent and appropriate EPA practice of leaving the decision on “ambiguous and controversial matters of public policy” to California’s judgment.¹⁹ This interpretation is supported by relevant discussion in the House Committee Report for the 1977 amendments to the Clean Air Act.²⁰ Congress had the opportunity through the 1977 amendments to restrict the preexisting waiver provision, but elected instead to expand California’s flexibility to adopt a complete program of motor vehicle emission controls. The report explains that the amendment is intended to ratify and strengthen the preexisting California waiver provision and to affirm the underlying intent of that provision, that is, to afford California the broadest possible discretion in selecting the best means to protect the health of its citizens and the public welfare.²¹

D. Burden and Standard of Proof

As the U.S. Court of Appeals for the D.C. Circuit has made clear in *MEMA I*,

opponents of a waiver request by California bear the burden of showing that the statutory criteria for a denial of the request have been met:

[T]he language of the statute and its legislative history indicate that California’s regulations, and California’s determinations that they must comply with the statute, when presented to the Administrator are presumed to satisfy the waiver requirements and that the burden of proving otherwise is on whoever attacks them. California must present its regulations and findings at the hearing and thereafter the parties opposing the waiver request bear the burden of persuading the Administrator that the waiver request should be denied.²²

The same logic applies to authorization requests. The Administrator’s burden, on the other hand, is to make a reasonable evaluation of the information in the record in coming to the waiver decision. As the court in *MEMA I* stated: “here, too, if the Administrator ignores evidence demonstrating that the waiver should not be granted, or if he seeks to overcome that evidence with unsupported assumptions of his own, he runs the risk of having his waiver decision set aside as ‘arbitrary and capricious.’”²³ Therefore, the Administrator’s burden is to act “reasonably.”²⁴

With regard to the standard of proof, the court in *MEMA I* explained that the Administrator’s role in a section 209 proceeding is to:

[. . .] consider all evidence that passes the threshold test of materiality and . . . thereafter assess such material evidence against a standard of proof to determine whether the parties favoring a denial of the waiver have shown that the factual circumstances exist in which Congress intended a denial of the waiver.²⁵

With regard to the protectiveness finding, the court upheld the Administrator’s position that, to deny a waiver, there must be “clear and compelling evidence” to show that proposed enforcement procedures undermine the protectiveness of California’s standards.²⁶ The court noted that this standard of proof also accords with the congressional intent to provide California with the broadest possible discretion in setting regulations it finds protective of the public health and welfare.²⁷

With respect to the consistency finding, the court did not articulate a standard of proof applicable to all

proceedings, but found that the opponents of the waiver were unable to meet their burden of proof even if the standard were a mere preponderance of the evidence. EPA’s past waiver decisions have consistently made clear that: “[E]ven in the two areas concededly reserved for Federal judgment by this legislation—the existence of ‘compelling and extraordinary’ conditions and whether the standards are technologically feasible—Congress intended that the standards of EPA review of the State decision to be a narrow one.”²⁸

E. EPA’s Administrative Process in Consideration of California’s Commercial Harbor Craft Regulations

Upon review of CARB’s request, EPA offered an opportunity for a public hearing, and requested written comment on issues relevant to a full section 209(e) authorization analysis, by publication of a **Federal Register** notice on November 24, 2014.²⁹ Specifically, we requested comment on: (a) Whether CARB’s determination that its standards, in the aggregate, are at least as protective of public health and welfare as applicable federal standards is arbitrary and capricious, (b) whether California needs such standards to meet compelling and extraordinary conditions, and (c) whether California’s standards and accompanying enforcement procedures are consistent with section 209 of the Act. In addition, EPA requested comment on issues relevant to a within-the-scope analysis for any CARB amendments that may merit confirmation of being within the scope of EPA’s prior authorization of the CHC regulation.

EPA did not receive a request for hearing and therefore no hearing was held. EPA did not receive any written comments. EPA’s evaluation is based on the record, which includes CARB’s authorization request and accompanying documents.

II. Discussion

A. Within-the-Scope Analysis

We initially evaluate California’s Within-the-Scope Amendments by application of our traditional within-the-scope analysis, as CARB requested. If we determine that CARB’s request does not meet the requirements for a within-the-scope determination, we then evaluate the request based on a full authorization analysis. In determining whether amendments can be viewed as

of Previous Waiver of Federal Preemption,” 46 FR 36742 (July 15, 1981).

²⁹ 79 FR 69482 (November 24, 2014).

within the scope of previous authorizations, EPA looks at whether CARB's revisions have been limited to making minor technical amendments to previously waived regulations or modifying the regulations in order to provide manufacturers with additional compliance flexibilities without significantly reducing the overall stringency of the requirements.

EPA sought comment on a range of issues, including those applicable to a within-the-scope analysis as well as those applicable to a full authorization analysis. No party submitted a comment that California's Within-the-Scope Amendments require a full authorization analysis. Given the lack of comments on this issue, and EPA's assessment of the nature of the amendments, EPA will evaluate California's Within-the-Scope Amendments by application of our traditional within-the-scope analysis, as CARB requested.

EPA can confirm that amended regulations are within the scope of a previously granted waiver of preemption if three conditions are met. First, the amended regulations must not undermine California's determination that its standards, in the aggregate, are as protective of public health and welfare as applicable federal standards. Second, the amended regulations must not affect consistency with section 202(a) of the Act. Third, the amended regulations must not raise any "new issues" affecting EPA's prior authorizations.

B. Full Authorization Analysis

As noted above, CARB's authorization request also included the Full Authorization Amendments. EPA must grant an authorization of the Full Authorization Amendments unless the Administrator finds: (1) California's determination that its standards will be, in the aggregate, as protective of public health and welfare as applicable federal standards is arbitrary and capricious; (2) California does not need such California standards to meet compelling and extraordinary conditions; or (3) California's standards and accompanying enforcement procedures are not consistent with this section.

EPA's evaluation of the CHC Amendments, including the Within-the-Scope Amendments and Full Authorization Amendments, is set forth below. Because of the similarity of the within-the-scope criteria and the full authorization criteria, a discussion of both sets of the respective amendments take place within each authorization criterion. To the extent that the criteria are applied uniquely, or that additional

criteria apply under either the within-the-scope analysis or the full authorization analysis, such application is also addressed below.

C. California's Protectiveness Determination

Section 209(e)(2)(i) of the Act instructs that EPA cannot grant an authorization if the agency finds that CARB was arbitrary and capricious in its determination that its standards are, in the aggregate, at least as protective of public health and welfare as applicable federal standards. CARB's Board made a protectiveness determination in Resolution 10–26, finding that "the California emission standards and other requirements related to the control of emissions in the amended regulation are, in the aggregate, at least as protective of public health and welfare than applicable federal standards."³⁰ CARB asserts that EPA has no basis to find that the CARB Board's determination is arbitrary or capricious.³¹ CARB points out that because the California and federal emission standards and test procedures for off-road CI engines are essentially aligned, and because California and federal off-road CI emission standards are generally more stringent than the equivalent federal marine engine emission standards, that EPA has no basis to find that the option to use the off-road CI engines would cause the CHC Amendments to be less protective.³² With respect to in-use engines, CARB maintains there is no question that the option of using EPA or CARB Tier 2 or higher tier certified off-road CI engines to meet the CHC regulation's in-use requirements are more stringent than applicable federal regulations, given that EPA is not authorized to regulate in-use off-road engines.³³ In addition, CARB notes that the Within-the-Scope Amendments do not undermine the protectiveness determination made by EPA in granting the initially authorized CHC regulation. As explained above, CARB adopted the Within-the-Scope Amendments to accommodate implementation and compliance issues that have arisen under the original CHC regulations. Given that EPA has no authority to regulate in-use engines, CARB notes that it is indisputable that its in-use provisions are more stringent than non-

existent "applicable" federal requirements.

After evaluating the materials submitted by CARB, and since EPA has not adopted any standards or requirements for in-use CHC engines and based on the lack of any comments submitted to the record, I cannot find that California's Within-the-Scope Amendments undermine California's previous determination that its standards, in the aggregate, are at least as protective of public health and welfare as applicable federal standards. Thus I cannot deny CARB's within-the-scope request based on this criterion. Similarly, with regard to the Full Authorization Amendments I cannot make a finding that CARB's protectiveness determination is arbitrary and capricious and thus I cannot deny CARB's Full Authorization Amendments based on this criterion.

D. Need for California Standards To Meet Compelling and Extraordinary Conditions

Section 209(e)(2)(ii) of the Act instructs that EPA cannot grant an authorization if the agency finds that California "does not need such California standards to meet compelling and extraordinary conditions." EPA's inquiry under this second criterion (found both in paragraph 209(b)(1)(B) and 209(e)(2)(A)(ii)) has been to determine whether California needs its own mobile source pollution program (*i.e.* set of standards) for the relevant class or category of vehicles or engines (*e.g.*, on-highway mobile source or nonroad mobile source) to meet compelling and extraordinary conditions, and not whether the specific standards that are the subject of the authorization or waiver request are necessary to meet such conditions.³⁴

California has asserted its longstanding position that the State continues to need its own nonroad engine program to meet serious air pollution problems.³⁵ CARB notes that "California, and particularly the South Coast and San Joaquin Valley Air Basins, continue to experience some of the worst air quality in the nation and continue to be in non-attainment with national ambient air quality standards for PM_{2.5} and ozone. The unique geographical and climatic conditions, and the tremendous growth in on and off-road vehicle population and use that moved Congress to authorize California to establish separate on-road motor vehicle standards in 1967 and off-road

³¹ CARB Support Document at 7–8.

³² *Id.* at 11. In addition, EPA's existing regulations for new marine diesel engines also allow the use of certified off-road land-based engines in marine vessels.

³³ *Id.* at 12.

³⁴ See 74 FR 32744, 32761 (July 8, 2009); 49 FR 18887–18890 (May 3, 1984).

³⁵ See Waiver Support Document at p. 18.

engine standards in 1990 still exists today.³⁶

There has been no evidence submitted to indicate that California's compelling and extraordinary conditions do not continue to exist. California, including the South Coast and the San Joaquin Valley air basins, continues to experience some of the worst air quality in the nation and continues to be in non-attainment with national ambient air quality standards for fine particulate matter (PM_{2.5}) and ozone.³⁷ In addition, EPA is not aware of any other information that would suggest that California no longer needs its nonroad emission program.

Therefore, based on the record of this request and absence of comments or other information to the contrary, I cannot find that California does not continue to need such state standards, including the CHC regulations, to address the "compelling and extraordinary conditions" underlying the state's air pollution problems. I have determined that I cannot deny California authorization for its Full Authorization Amendments under section 209(e)(2)(A)(ii). As noted above, EPA's within-the-scope analysis (that is applicable to the Within-the-Scope Amendments) does not require an assessment of section 209(e)(2)(A)(ii).

E. Consistency With Section 209 of the Clean Air Act

Section 209(e)(2)(A)(iii) of the Act instructs that EPA cannot grant an authorization if California's standards and enforcement procedures are not consistent with "this section." As described above, EPA's section 209(e) rule states that the Administrator shall not grant authorization to California if she finds (among other tests) that the "California standards and accompanying enforcement procedures are not consistent with section 209." EPA has interpreted this requirement to mean that California standards and accompanying enforcement procedures (under both the full authorization and the within-the-scope analysis) must be consistent with at least sections 209(a),

209(e)(1), and 209(b)(1)(C), as EPA has interpreted this last subsection in the context of motor vehicle waivers. Thus, this can be viewed as a three-pronged test.

1. Consistency With Section 209(a) and 209(e)(1)

To be consistent with section 209(a) of the Clean Air Act, California's commercial harbor craft regulations must not apply to new motor vehicles or new motor vehicle engines. California's commercial harbor craft regulations apply to nonroad marine vessels and engines, not on-highway motor vehicles or engines. CARB states that the new vessel requirements regulate new diesel engines, and apply only to nonroad engines that are neither new motor vehicles nor new motor vehicle engines. No commenter presented otherwise; therefore, I cannot deny California's request on the basis that California's commercial harbor craft regulations are not consistent with section 209(a).

To be consistent with section 209(e)(1) of the Clean Air Act, California's commercial harbor craft regulations must not affect new farming or construction vehicles or engines that are below 175 horsepower, or new locomotives or their engines. CARB represents that commercial harbor craft engines are not used in locomotives and are not primarily used in farm and construction equipment vehicles. No commenter presented otherwise and EPA is otherwise not aware of any information to the contrary; therefore, I cannot deny California's request on the basis that California's commercial harbor craft requirements are not consistent with section 209(e)(1).

2. Consistency With Section 209(b)(1)(C)

The requirement that California's standards be consistent with section 209(b)(1)(C) of the Clean Air Act effectively requires consistency with section 202(a) of the Act. California standards are inconsistent with section 202(a) of the Act if there is inadequate lead-time to permit the development of technology necessary to meet those requirements, giving appropriate consideration to the cost of compliance within that time. California's accompanying enforcement procedures would also be inconsistent with section 202(a) if the federal and California test procedures were not consistent. The scope of EPA's review of whether California's action is consistent with section 202(a) is narrow. The determination is limited to whether those opposed to the authorization or waiver have met their burden of

establishing that California's standards are technologically infeasible, or that California's test procedures impose requirements inconsistent with the federal test procedure.³⁸

Congress has stated that the consistency requirement of section 202(a) relates to technological feasibility.³⁹ Section 202(a)(2) states, in part, that any regulation promulgated under its authority "shall take effect after such period as the Administrator finds necessary to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period." Section 202(a) thus requires the Administrator to first determine whether adequate technology already exists; or if it does not, whether there is adequate time to develop and apply the technology before the standards go into effect. The latter scenario also requires the Administrator to decide whether the cost of developing and applying the technology within that time is feasible. Previous EPA waivers are in accord with this position.⁴⁰

As described above, the Full Authorization Amendments require in-use Tier 0 and Tier 1 propulsion and auxiliary marine engines on crew and supply, barge, and dredge vessels to meet emission limits equal to or cleaner than federal Tier 2 or Tier 3 new marine engine certification standards in effect for the year that in-use engine compliance is required (based on the model year of the in-use engine and annual hours of operation). Vessel owners are provided the same compliance options that were available to owners of Tier 0 and Tier 1 marine engines in the initial CHC regulations: (1) Replacing an in-use engine with a new marine engine certified to applicable Tier 2 or Tier 3 marine standards, (2) demonstrating that the in-use marine engine already meets the most stringent Tier 2 or Tier 3 marine standards in effect for new engines of similar power rating and displacement, (e.g., utilizing engine rebuild kits or aftertreatment technologies), (3) demonstrating that an in-use marine engine has not and will not operate more than a specified number of hours per calendar year (300 hours for crew and supply vessel engines or 80 hours for barge and dredge vessel engines), or (4) using the flexibility provided through the exemptions and compliance extensions of the regulation. CARB

³⁸ *MEMA I*, 627, F.2d at 1126.

³⁹ H.R. Rep. No. 95-294, 95th Cong., 1st Sess. 301 (1977).

⁴⁰ See, e.g., 49 FR 1887, 1895 (May 3, 1984); 43 FR 32182, 32183 (July 25, 1978); 41 FR 44209, 44213 (October 7, 1976).

³⁶ *Id.* See 74 FR 32744, 32762-32763 (July 8, 2009); 79 FR 6584, 6588-6590 (February 4, 2014).

³⁷ 74 FR 32744, 32762-63 (July 8, 2009), 76 FR 77515, 77518 (December 13, 2011), 81 FR 95982 (December 29, 2016). EPA continually evaluates the air quality conditions in the United States, including California. California continues to experience some of the worst air quality in the country and continues to be in nonattainment with National Ambient Air Quality Standards for fine particulate matter and ozone, see "Notice of Availability of the Environmental Protection Agency's Preliminary Interstate Ozone Transport Modeling Data for the 2015 Ozone National Ambient Air Quality Standard (NAAQS)" at EPA-HQ-OAR-2016-0751.

notes “In granting California the authorization for the original CHC regulation, EPA stated that ‘no party objected to CARB’s demonstration that [compliance] technologies are in existence and are being used in actual operation,’ and also found no issue of incompatibility between California and federal test procedures.”⁴¹ CARB also notes that the CHC Amendments now provide owners or operators the additional compliance flexibility option of using CARB or EPA Tier 2 or higher tier certified off-road CI engines to meet the requirements for auxiliary or propulsion engines, so owners or operators may also elect to comply with the amended in-use requirements by replacing an in-use engine with a new off-road engine, or by demonstrating that an existing in-use engine meets CARB or EPA Tier 2 or Tier 3 off-road CI engines standards (e.g., through utilization of engine rebuild kits or aftertreatment technologies).

CARB maintains that the Within-the-Scope Amendments present no issue regarding technical feasibility or inconsistent test procedures as the amendments only maintain or relax the stringency of the original CHC regulation’s in-use requirements.

EPA did not receive any comments suggesting that California’s commercial harbor craft regulations are technologically infeasible.

Therefore, based on the record before us, I cannot find that the CHC Amendments are technologically infeasible or otherwise inconsistent with section 202(a). Therefore, I cannot deny CARB’s authorization request for the Full Authorization Amendments and likewise cannot deny the within-the-scope request for the Within-the-Scope Amendments based on the section 202(a) criterion.

F. New Issues

EPA has stated in the past that if California promulgates amendments that raise new issues affecting previously granted waivers or authorizations, we would not confirm that those amendments are within the scope of previous authorizations.⁴² I do not believe that the Within-the-Scope Amendments raise any new issues with respect to our prior granting of the authorization. Moreover, EPA did not receive any comments that CARB’s CHC Amendments raised new issues affecting the previously granted

authorization. Therefore, I cannot find that CARB’s Within-the-Scope Amendments raise new issues and consequently cannot deny CARB’s request based on this criterion.

III. Decision

After evaluating California’s CHC Amendments and CARB’s submissions for EPA review as described above, I am taking the following actions. First, I am granting an authorization for the Full Authorization Amendments. Second, I confirm that the Within-the-Scope Amendments are within the scope of EPA’s previous authorization.

This decision will affect not only persons in California, but also manufacturers and/or owners/operators nationwide who must comply with California’s requirements. In addition, because other states may adopt California’s standards for which a section 209(e)(2)(A) authorization has been granted if certain criteria are met, this decision would also affect those states and those persons in such states. See CAA section 209(e)(2)(B). For these reasons, EPA determines and finds that this is a final action of national applicability, and also a final action of nationwide scope or effect for purposes of section 307(b)(1) of the Act. Pursuant to section 307(b)(1) of the Act, judicial review of this final action may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by March 20, 2017. Judicial review of this final action may not be obtained in subsequent enforcement proceedings, pursuant to section 307(b)(2) of the Act.

IV. Statutory and Executive Order Reviews

As with past authorization and waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Further, the Congressional Review Act, 5 U.S.C. 801, *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule for purposes of 5 U.S.C. 804(3).

Dated: January 11, 2017.

Gina McCarthy,
Administrator.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2016–0745; FRL–9958–54–OECA]

Inquiry To Learn Whether Businesses Assert Business Confidentiality Claims Regarding Waste Import and Export

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for comment.

SUMMARY: The Environmental Protection Agency (EPA) receives from time to time Freedom of Information Act (FOIA) requests for documentation received or issued by EPA or data contained in EPA database systems pertaining to the export and import of Resource Conservation and Recovery Act (RCRA) hazardous waste from/to the United States, the export of cathode ray tubes (CRTs) and spent lead acid batteries (SLABs) from the United States, and the export and import of RCRA universal waste from/to the United States. These documents and data may identify or reference multiple parties, and describe transactions involving the movement of specified materials in which the parties propose to participate or have participated. The purpose of this notice is to inform “affected businesses” about the documents or data sought by these types of FOIA requests in order to provide the businesses with the opportunity to assert claims that any of the information sought that pertains to them is entitled to treatment as confidential business information (CBI), and to send comments to EPA supporting their claims for such treatment. Certain businesses, however, do not meet the definition of “affected business,” and are not covered by today’s notice. They consist of any business that actually submitted to EPA any document at issue pursuant to applicable RCRA regulatory requirements and did not assert a CBI claim as to information that pertains to that business in connection with the document at the time of its submission; they have waived their right to do so at a later time. Nevertheless, other businesses identified or referenced in the documents that were submitted to EPA by the submitting business may have a right to assert a CBI claim concerning information that pertains to

⁴¹ Waiver Support Document at 19 (citing EPA’s authorization at 76 FR 77521, 77527 (December 13, 2011)).

⁴² See, e.g., 78 FR 38970 (June 28, 2013), 75 FR 8056 (February 23, 2010), and 70 FR 22034 (April 28, 2005).

them and may do so in response to this notice.

DATES: Comments must be received on or before February 21, 2017. The period for submission of comments may be extended if, before the comments are due, you make a request for an extension of the comment period and it is approved by the EPA legal office. Except in extraordinary circumstances, the EPA legal office will not approve such an extension without the consent of any person whose request for release of the information under the FOIA is pending.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OECA-2016-0745, by one of the following methods:

- <http://www.regulations.gov>: Follow the on-line instructions for submitting comments.

- Email: kreisler.eva@epa.gov.

- Address: Eva Kreisler, International Compliance Assurance Division, Office of Federal Activities, Office of Enforcement and Compliance Assurance, Environmental Protection Agency, Mailcode: 2254A, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OECA-2016-0745. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or email. Instructions about how to submit comments claimed as CBI are given later in this notice.

The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through <http://www.regulations.gov>, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment. Please include your name and other contact information with any disk

or CD-ROM you submit by mail. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

Docket: All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at the HQ EPA Docket Center, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the docket for this notice is (202) 566-1752.

FOR FURTHER INFORMATION CONTACT: Eva Kreisler, International Compliance Assurance Division, Office of Federal Activities, Office of Enforcement and Compliance Assurance, Environmental Protection Agency, Mailcode: 2254A, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564-8186; email address: kreisler.eva@epa.gov.

SUPPLEMENTARY INFORMATION: Today's notice relates to any documents or data in the following areas: (1) Export of Resource Conservation and Recovery Act (RCRA) hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subparts E and H; (2) import of RCRA hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subparts F and H; (3) transit of RCRA hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subpart H, through the United States and foreign countries; (4) export of cathode ray tubes, during calendar year 2016 or before, under 40 CFR part 261, subpart E; (5) exports of non-crushed spent lead acid batteries with intact casings, during calendar year 2016 or before, under 40 CFR part 266 subpart G; (6) export and import of RCRA universal waste, during calendar year 2016 or before, under 40

CFR part 273, subparts B, C, D, and F; (7) submissions from transporters, during calendar year 2016 or before, under 40 CFR part 263, or from treatment, storage or disposal facilities under 40 CFR parts 264 and 265, related to exports or imports of hazardous waste which occurred during calendar year 2016 or before, including receiving facility notices under 40 CFR 264.12(a)(1) and 265.12(a)(1) and import consent documentation under 40 CFR 264.71(a)(3) and 265.71(a)(3).

I. General Information

EPA has previously published notices similar to this one in the **Federal Register**, the latest one being at 81 FR 7788, February 16, 2016, that address issues similar to those raised by today's notice. The Agency did not receive any comments on the previous notices. Since the publication of the February 16, 2016, **Federal Register** notice, the Agency has continued to receive FOIA requests for documents and data contained in EPA's database related to hazardous waste exports and imports.

II. Issues Covered by This Notice

Specifically, EPA receives FOIA requests from time to time for documentation or data related to hazardous waste exports and imports that may identify or reference multiple parties, and that describe transactions involving the movement of specified materials in which the parties propose to participate or have participated. This notice informs "affected businesses,"¹ which could include, among others, "transporters,"² and "consignees,"³ of the requests for information in EPA database systems and/or contained in one or more of the following documents: (1) Documents related to the export of Resource Conservation and Recovery Act (RCRA) hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subparts E and H, including but not limited to the "notification of intent to export,"⁴ "manifests,"⁵ "annual reports,"⁶ "EPA acknowledgements of consent,"⁷ "any subsequent communication withdrawing a prior consent or

¹ The term "affected business" is defined at 40 CFR 2.201(d), and is set forth in this notice, below.

² The term "transporter" is defined at 40 CFR 260.10.

³ The term "consignee" is defined, for different purposes, at 40 CFR 262.51 and 262.81(c).

⁴ The term "notification of intent to export" is described at 40 CFR 262.53.

⁵ The term "manifest" is defined at 40 CFR 260.10.

⁶ The term "annual reports" is described at 40 CFR 262.56.

⁷ The term "EPA acknowledgement of consent" is defined at 40 CFR 262.51.

objection,”⁸ “responses that neither consent nor object,” “exception reports,”⁹ “transit notifications,”¹⁰ and “renotifications”;¹¹ (2) documents related to the import of hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subparts F and H, including but not limited to notifications of intent to import hazardous waste into the U.S. from foreign countries; (3) documents related to the transit of hazardous waste, during calendar year 2016 or before, under 40 CFR part 262, subpart H, including notifications from U.S. exporters of intent to transit through foreign countries, or notifications from foreign countries of intent to transit through the U.S.; (4) documents related to the export of cathode ray tubes (CRTs), during calendar year 2016 or before, under 40 CFR part 261, subpart E, including but not limited to notifications of intent to export CRTs; (5) documents related to the export of non-crushed spent lead acid batteries (SLABs) with intact casings, during calendar year 2016 or before, under 40 CFR part 266 subpart G, including but not limited to notifications of intent to export SLABs; (6) submissions from transporters under 40 CFR part 263, or from treatment, storage or disposal facilities under 40 CFR parts 264 and 265, related to exports or imports of hazardous waste which occurred during calendar year 2016 or before, including receiving facility notices under 40 CFR 264.12(a)(1) and 265.12(a)(1) and import consent documentation under 40 CFR 264.71(a)(3) and 265.71(a)(3); and (7) documents related to the export and import of RCRA “universal waste”¹² under 40 CFR part 273, subparts B, C, D, and F.

Certain businesses, however, do not meet the definition of “affected business,” and are not covered by today’s notice. They consist of any business that actually submitted information responsive to a FOIA request, under the authority of 40 CFR parts 260 through 266 and 268, and did not assert a claim of business confidentiality covering any of that information at the time of submission. As set forth in the RCRA regulations at 40 CFR 260.2(b), “if no such [business

confidentiality] claim accompanies the information when it is received by EPA, it may be made available to the public without further notice to the person submitting it.” Thus, for purposes of this notice and as a general matter under 40 CFR 260.2(b), a business that submitted to EPA the documents at issue, pursuant to applicable regulatory requirements, and that failed to assert a claim as to information that pertains to it at the time of submission, cannot later make a business confidentiality claim.¹³ Nevertheless, other businesses identified or referenced in the same documents that were submitted to EPA by the submitting business may have a right to assert a CBI claim concerning information that pertains to them and may do so in response to this notice.

In addition, EPA may develop its own documents and organize into its database systems information that was originally contained in documents from submitting businesses relating to exports and imports of hazardous waste. If a submitting business fails to assert a CBI claim for the documents it submits to EPA at the time of submission, not only does it waive its right to claim CBI for those documents, but it also waives its right to claim CBI for information in EPA’s documents or databases that is based on or derived from the documents that were originally submitted by that business.¹⁴

In accordance with 40 CFR 2.204(c) and (e), this notice inquires whether any affected business asserts a claim that any of the requested information constitutes CBI, and affords such business an opportunity to comment to EPA on the issue. This notice also informs affected businesses that, if a claim is made, EPA would determine under 40 CFR part 2, subpart B, whether any of the requested information is entitled to business confidential treatment.

1. Affected Businesses

EPA’s FOIA regulations at 40 CFR 2.204(c)(1) require an EPA office that is responsible for responding to a FOIA request for the release of business information (“EPA office”) to determine which businesses, if any, are affected businesses. “Affected business” is

defined at 40 CFR 2.201(d) as: With reference to an item of business information, a business which has asserted (and not waived or withdrawn) a business confidentiality claim covering the information, or a business which could be expected to make such a claim if it were aware that disclosure of the information to the public was proposed.

2. The Purposes of This Notice

This notice encompasses two distinct steps in the process of communication with affected businesses prior to EPA’s making a final determination concerning the business confidentiality of the information at issue: the preliminary inquiry and the notice of opportunity to comment.

a. Inquiry To Learn Whether Affected Businesses (Other Than Those Businesses That Previously Asserted a CBI Claim) Assert Claims Covering Any of the Requested Information

Section 2.204(c)(2)(i) provides, in relevant part: If the examination conducted under paragraph (c)(1) of § 2.204 discloses the existence of any business which, although it has not asserted a claim, might be expected to assert a claim if it knew EPA proposed to disclose the information, the EPA office shall contact a responsible official of each such business to learn whether the business asserts a claim covering the information.

b. Notice of Opportunity To Submit Comments

Sections 2.204(d)(1)(i) and 2.204(e)(1) of Title 40 of the Code of Federal Regulations require that written notice be provided to businesses that have made claims of business confidentiality for any of the information at issue, stating that EPA is determining under 40 CFR part 2, subpart B, whether the information is entitled to business confidential treatment, and affording each business an opportunity to comment as to the reasons why it believes that the information deserves business confidential treatment.

3. The Use of Publication in the Federal Register

Section 2.204(e)(1) of Title 40 of the Code of Federal Regulations requires that this type of notice be furnished by certified mail (return receipt requested), by personal delivery, or by other means which allows verification of the fact and date of receipt. EPA, however, has determined that in the present circumstances the use of a **Federal Register** notice is a practical and efficient way to contact affected

⁸ The requirement to forward to the exporter “any subsequent communication withdrawing a prior consent or objection” is found at 42 U.S.C. 6938(e).

⁹ The term “exception reports” is described at 40 CFR 262.55.

¹⁰ The term “transit notifications” is described at 40 CFR 262.53(e).

¹¹ The term “renotifications” is described at 40 CFR 262.53(c).

¹² The term “universal waste” is defined at 40 CFR 273.9.

¹³ However, businesses having submitted information to EPA relating to the export and import of RCRA universal waste are not subject to 40 CFR 260.2(b) since they submitted information in accordance with 40 CFR part 273, and not parts 260 through 266 and 268, as set forth in 40 CFR 260.2(b). They are therefore affected businesses that could make a claim of CBI at the time of submission or in response to this notice.

¹⁴ With the exception, noted above, of the submission of information relating to the export and import of RCRA universal waste.

businesses and to furnish the notice of opportunity to submit comments. The Agency's decision to follow this course was made in recognition of the administrative difficulty and impracticality of directly contacting potentially thousands of individual businesses.

4. *Submission of Your Response in the English Language*

All responses to this notice must be in the English language.

5. *The Effect of Failure To Respond to This Notice*

In accordance with 40 CFR 2.204(e)(1) and 2.205(d)(1), EPA will construe your failure to furnish timely comments in response to this notice as a waiver of your business's claim(s) of business confidentiality for any information in the types of documents identified in this notice.

6. *What To Include in Your Comments*

If you believe that any of the information contained in the types of documents which are described in this notice and which are currently, or may become, subject to FOIA requests, is entitled to business confidential treatment, please specify which portions of the information you consider business confidential. Information not specifically identified as subject to a business confidentiality claim may be disclosed to the requestor without further notice to you.

For each item or class of information that you identify as being subject to your claim, please answer the following questions, giving as much detail as possible:

1. For what period of time do you request that the information be maintained as business confidential, *e.g.*, until a certain date, until the occurrence of a specified event, or permanently? If the occurrence of a specific event will eliminate the need for business confidentiality, please specify that event.

2. Information submitted to EPA becomes stale over time. Why should the information you claim as business confidential be protected for the time period specified in your answer to question no. 1?

3. What measures have you taken to protect the information claimed as business confidential? Have you disclosed the information to anyone other than a governmental body or someone who is bound by an agreement not to disclose the information further? If so, why should the information still be considered business confidential?

4. Is the information contained in any publicly available material such as the Internet, publicly available data bases, promotional publications, annual reports, or articles? Is there any means by which a member of the public could obtain access to the information? Is the information of a kind that you would customarily not release to the public?

5. Has any governmental body made a determination as to the business confidentiality of the information? If so, please attach a copy of the determination.

6. For each category of information claimed as business confidential, explain with specificity why and how release of the information is likely to cause substantial harm to your competitive position. Explain the specific nature of those harmful effects, why they should be viewed as substantial, and the causal relationship between disclosure and such harmful effects. How could your competitors make use of this information to your detriment?

7. Do you assert that the information is submitted on a voluntary or a mandatory basis? Please explain the reason for your assertion. If the business asserts that the information is voluntarily submitted information, please explain whether and why disclosure of the information would tend to lessen the availability to EPA of similar information in the future.

8. Any other issue you deem relevant. Please note that you bear the burden of substantiating your business confidentiality claim. Conclusory allegations will be given little or no weight in the determination. If you wish to claim any of the information in your response as business confidential, you must mark the response "BUSINESS CONFIDENTIAL" or with a similar designation, and must bracket all text so claimed. Information so designated will be disclosed by EPA only to the extent allowed by, and by means of, the procedures set forth in, 40 CFR part 2, subpart B. If you fail to claim the information as business confidential, it may be made available to the requestor without further notice to you.

III. **What should I consider as I prepare my comments for EPA?**

1. Submitting CBI. Do not submit this information to EPA through <http://www.regulations.gov> or email. Please submit this information by mail to the address identified in the **ADDRESSES** section of today's notice for inclusion in the non-public CBI docket. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that

you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. Information so marked will not be disclosed except in accordance with the procedures set forth in 40 CFR part 2, subpart B. In addition to the submission of one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket.

2. **Tips for Preparing Your Comments.** When submitting comments, remember to:

- Identify the notice by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Describe any assumptions and provide any technical information and/or data that you used.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Make sure to submit your comments by the comment period deadline identified.

Dated: January 4, 2017.

Robert Tomiak,

Director, Office of Federal Activities.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-OAR-2016-0596; FRL-9958-48-OAR]

RIN 2060-AT22

Response to December 9, 2013, Clean Air Act Section 176A Petition From Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania, Rhode Island and Vermont

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed action on petition.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to deny the Clean Air Act (CAA or Act) petition filed on December 9, 2013 (and amended on December 17, 2013), by the states of Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania, Rhode Island and Vermont. The petition requested that the EPA add the states of

Illinois, Indiana, Kentucky, Michigan, North Carolina, Ohio, Tennessee, West Virginia and Virginia to the Ozone Transport Region (OTR). As a result of this denial, the geographic scope or requirements of the OTR will remain unchanged.

DATES: *Comments.* Comments must be received on or before February 21, 2017.

Public Hearing. If anyone contacts us requesting to speak at a public hearing by January 30, 2017, we will hold a public hearing. Additional information about the hearing would be published in a subsequent **Federal Register** notice. For updates and additional information on a public hearing, please check the EPA's Web site for this notice at <https://www.epa.gov/implementation-2008-national-ambient-air-quality-standards-naaqs-ozone-state>.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2016-0596, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e., on the Web, Cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

II. Executive Summary of the EPA's Proposed Decision on the CAA Section 176A Petition

The EPA is proposing to deny a petition filed pursuant to CAA section 176A(a) that requests the states of Illinois, Indiana, Kentucky, Michigan, North Carolina, Ohio, Tennessee, West Virginia and Virginia¹ (the upwind states) be added to the OTR, which was established pursuant to section 184 of the CAA. The petitioning states of Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania, Rhode Island and Vermont (the petitioning states, downwind states, or petitioners) submitted a technical analysis intended to demonstrate that these nine upwind states significantly contribute to violations of the 2008 ozone national ambient air quality standard (NAAQS) in one or more of the current OTR states.

Section 176A(a) of the CAA provides the Administrator with the authority to develop interstate transport regions for particular pollutants where the Administrator determines that interstate transport of air pollutants from one or more states contributes significantly to violations of air quality standards in other states. The creation of such an interstate transport region requires the establishment of a transport commission with representatives from each state that make recommendations for the mitigation of the interstate pollution. Congress created one such transport region by statute in CAA section 184(a) in 1990 in order to address the interstate transport of ozone pollution, referred to as the OTR. The statute establishes certain minimum control requirements that apply to sources of emissions in each state in the OTR intended to address transported ozone pollution and provides the Ozone Transport Commission (OTC), comprised of representatives of each state in the OTR, with the authority to recommend

¹ The parts of northern Virginia included in the Washington, DC Consolidated Metropolitan Statistical Area are already in the OTR. The petition seeks to add the remainder of the state of Virginia to the OTR as well.

additional controls within the region. The downwind states' petition seeks to expand the OTR to include additional states and would thereby subject sources in those states to the requirements applicable in the OTR.

The CAA provides other provisions for addressing the interstate transport of ozone pollution besides sections 176A and 184. In particular, the Act includes a specific provision addressing how the EPA and the states are to mitigate the specific sources of emissions that contribute to interstate ozone pollution transport. Section 110(a)(2)(D)(i)(I) of the CAA, also referred to as the "good neighbor" provision, requires that states develop state implementation plans (SIPs) to prohibit emissions that will "contribute significantly to nonattainment in, or interfere with maintenance by, any other state" with respect to a NAAQS. Pursuant to this provision, states have the primary responsibility for reducing the interstate transport of pollutants, including ozone. Should the states fail to fulfill this responsibility, the EPA is obligated to develop federal implementation plans (FIPs) to ensure that appropriate emissions reductions are achieved and that the air quality standards downwind are attained and maintained. The CAA also contains a provision in section 126(b) that permits states and political subdivisions to petition the Administrator for a finding that any major source or group of stationary sources emits in violation of the prohibition in the good neighbor provision. In response to such a finding, the EPA may promulgate additional limits on such sources, and these limits must then be included in a state's good neighbor SIP pursuant to CAA section 110(a)(2)(D)(ii). This provision provides a means for the EPA to mediate disputes between the states regarding the compliance of specific sources with the requirements of the good neighbor provision. As described in detail later in this document, states and the EPA have historically used their authority under CAA sections 110(a)(2)(D)(i)(I) and section 126 to develop SIPs and FIPs that target specific sources of ozone precursor emissions to address interstate ozone transport across the U.S., including with respect to air quality concerns stemming from interstate transport of ozone within the OTR.

Pursuant to these and other CAA authorities, the EPA and states within and outside the OTR have taken significant actions independently and in collaboration for many years to address ozone pollution problems by reducing precursor emissions (*i.e.*, nitrogen

oxides (NO_x) and volatile organic compounds (VOC)) that contribute to the formation of ozone. The EPA and states have promulgated a number of rules that have already or are expected in the future to result in reductions in ozone concentrations that will help areas attain the 2008 ozone NAAQS. Several of these rules were developed specifically to address the interstate transport of ozone pollution. With respect to the 2008 ozone NAAQS, the EPA recently promulgated FIPs to address the requirements of CAA section 110(a)(2)(D)(i)(I) to specifically address interstate transport of ozone pollution in the eastern U.S. from power plants during the ozone season.² Other rules reduce ozone precursor emissions to address other ozone pollution challenges (*e.g.*, ozone attainment demonstrations) and impact the interstate transport of ozone pollution as a co-benefit. Further, several other state and federal air quality regulations reduce emissions of other air pollutants, such as rules targeted to reduce air toxics from industrial boilers, which often also result in the reduction of ozone precursors (*e.g.*, NO_x) and thereby reduce interstate ozone transport as a co-pollutant benefit.

Section 176A of the CAA provides the Administrator with discretion to determine whether to establish a new transport region or expand an existing transport region. The EPA has reviewed the request of the petitioners in light of the control requirements that apply to sources located in states now included in the OTR and that would apply to states if they were added and the other statutory authorities provided for addressing the interstate transport of ozone pollution. The EPA proposes to deny the CAA section 176A petition to add states to the OTR for the purpose of addressing the interstate ozone transport problem with respect to the 2008 ozone NAAQS. The EPA believes that, based on the reasons fully described in Section IV of this document, other CAA provisions (*e.g.*, CAA sections 110 or 126) provide a better alternative pathway for states and the EPA to develop a targeted remedy to address interstate ozone transport that focuses on the precursor pollutants and sources most effective at addressing the nature of the downwind air quality problems identified by the petitioning states. The states and the EPA have historically and effectively reduced ozone and the interstate transport of ozone pollution using these CAA authorities to

implement necessary emissions reductions. For purposes of addressing interstate transport of ozone with respect to the 2008 ozone NAAQS, the EPA believes that continuing its longstanding and effective utilization of the existing and expected control programs under the CAA's mandatory good neighbor provision embodied in CAA section 110(a)(2)(D)(i)(I) is a more effective means of addressing regional ozone pollution transport with respect to the 2008 ozone NAAQS for the areas within the OTR that must attain the NAAQS. Thus, the EPA believes that regulation pursuant to these other CAA authorities together with the implementation of existing EPA and state rules expected to further reduce precursor pollutant emissions that contribute to the interstate transport of ozone are the more effective means for addressing the interstate ozone transport problem with respect to the 2008 ozone NAAQS. Accordingly, the EPA is proposing to deny the CAA section 176A petition filed by the petitioning states. This proposed denial is specific to the 2008 ozone NAAQS, but the EPA notes that under different circumstances the OTR provisions have been an effective tool for air quality management, and could be similarly effective in the future. The EPA requests comment on the proposed denial of the petition based on the EPA's preferred approach to addressing interstate transport with respect to the 2008 ozone NAAQS pursuant to these other CAA authorities.

III. Background and Legal Authority

A. Ozone and Public Health

Ground-level ozone causes a variety of negative effects on human health, vegetation, and ecosystems. In humans, acute and chronic exposure to ozone is associated with premature mortality and a number of morbidity effects, such as asthma exacerbation. In ecosystems, ozone exposure causes visible foliar injury, decreases plant growth, and affects ecosystem community composition. Ground-level ozone is not emitted directly into the air, but is a secondary air pollutant created by chemical reactions between NO_x, carbon monoxide (CO), methane (CH₄), and non-methane VOCs in the presence of sunlight. Emissions from electric generating utilities (EGUs), industrial facilities, motor vehicles, gasoline vapors, and chemical solvents are some of the major anthropogenic sources of ozone precursors. The potential for ground-level ozone formation increases during periods with warmer temperatures and stagnant air masses;

² See 81 FR 74504, October 26, 2016, Cross-State Air Pollution Rule Update for the 2008 Ozone NAAQS.

therefore ozone levels are generally higher during the summer months.³ Ground-level ozone concentrations and temperature are highly correlated in the eastern U.S. with observed ozone increases of 2–3 parts per billion (ppb) per degree Celsius reported.⁴ Increased temperatures may also increase emissions of volatile man-made and biogenic organics and can indirectly increase anthropogenic NO_x emissions as well (e.g., through increased electricity generation to power air conditioning).

Precursor emissions can be transported downwind directly or, after transformation in the atmosphere, as ozone. Studies have established that ozone formation, atmospheric residence, and transport occurs on a regional scale (i.e., hundreds of miles) over much of the eastern U.S., with elevated concentrations occurring in rural as well as metropolitan areas. As a result of ozone transport, in any given location, ozone pollution levels are impacted by a combination of local emissions and emissions from upwind sources. The transport of ozone pollution across state borders compounds the difficulty for downwind states in meeting the health-and-welfare based NAAQS. Numerous observational studies have demonstrated the transport of ozone and its precursors and the impact of upwind emissions on high concentrations of ozone pollution.

While substantial progress has been made in reducing ozone in many urban areas, regional-scale ozone transport is still an important component of peak ozone concentrations during the summer ozone season. Model assessments have looked at impacts on peak ozone concentrations after potential emission reduction scenarios for NO_x and VOCs for NO_x-limited and VOC-limited areas. For example, one study⁵ concluded that NO_x emission reductions strategies would be effective in lowering ozone mixing ratios in urban areas and another study showed NO_x reductions would reduce peak ozone concentrations in non-attainment areas in the Mid-Atlantic (i.e., a 10

percent reduction in electric generating unit (EGU) and non-EGU NO_x emissions would result in approximately a 6 ppb reduction in peak ozone concentrations in Washington, DC).⁶

On March 12, 2008, the EPA promulgated a revision to the NAAQS, lowering both the primary and secondary standards to 75 ppb.⁷ On October 1, 2015, the EPA strengthened the ground-level ozone NAAQS, based on extensive scientific evidence about ozone's effects on public health and welfare.⁸ This document does not address any CAA requirements with respect to the 2015 ozone NAAQS.

B. Sections 176A and 184 of the CAA and the OTR Process

Subpart 1 of part D of title I of the CAA provides provisions governing general plan requirements for designated nonattainment areas. This subpart includes provisions providing for the development of transport regions to address the interstate transport of pollutants that contribute to NAAQS violations. In particular, section 176A(a) of the CAA provides that, on the EPA's own motion or by a petition from the Governor of any state, whenever the EPA has reason to believe that the interstate transport of air pollutants from one or more states contributes significantly to a violation of the NAAQS in one or more other states, the EPA may establish, by rule, a transport region for such pollutant that includes such states. The provision further provides that the EPA may add any state or portion of a state to any transport region whenever the Administrator has reason to believe that the interstate transport of air pollutants from such state significantly contributes to a violation of the standard in the transport region.

Section 176A(b) of the CAA provides that when the EPA establishes a transport region, the Administrator shall establish an associated transport commission, comprised of (at a minimum) the following: Governor or designee of each state, the EPA Administrator or designee, the Regional EPA Administrator and an air pollution control official appointed by the Governor of each state. The purpose of the transport commission is to assess the degree of interstate transport throughout the transport region and

assess control strategies to mitigate the interstate transport.

Subpart 2 of part D of title I of the CAA provides provisions governing additional plan requirements for designated ozone nonattainment areas. Consistent with CAA section 176A found in subpart 1, subpart 2 included specific provisions focused on the interstate transport of ozone. In particular, CAA section 184(a) established a single transport region for ozone—the OTR—comprised of the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont and the Consolidated Metropolitan Statistical Area that includes the District of Columbia and certain parts of northern Virginia.

Section 184(b) of the CAA established certain control requirements that each state in the OTR is required to implement within the state and which require certain controls on sources of NO_x and VOCs statewide. These include the following. Section 184(b)(1)(A) of the CAA requires OTR states to include in their SIPs enhanced vehicle inspection and maintenance (I/M) programs.⁹ Section 184(b)(2) of the CAA requires SIPs to subject major sources of VOCs in ozone transport regions to the same requirements that apply to major sources in designated ozone nonattainment areas classified as moderate, regardless of whether the source is located in a nonattainment area. Thus, the state must adopt rules to apply the nonattainment new source review (NSR) (pursuant to CAA section 173) and reasonably available control technology (RACT) (pursuant to CAA section 182(b)(2)) provisions for major VOC sources statewide. Section 184(b)(2) of the CAA further provides that, for purposes of implementing these requirements, a major stationary source shall be defined as any source that emits or has the potential to emit at least 50 tons per year of VOCs. Under CAA section 184(b)(2) states must also implement Stage II vapor recovery programs, incremental to Onboard Refueling Vapor Recovery achievements, or measures that achieve comparable emissions reductions for both attainment and nonattainment areas.¹⁰ These programs are required to be implemented statewide in any state

⁷ See National Ambient Air Quality Standards for Ozone, Final Rule, 73 FR 16436 (March 27, 2008).

⁸ See National Ambient Air Quality Standards for Ozone, Final Rule, 80 FR 65292 (October 26, 2015).

⁹ Enhanced vehicle inspection and maintenance programs are required in metropolitan statistical areas in the OTR with a 1990 Census population of 100,000 or more regardless of ozone attainment status.

¹⁰ See 72 FR 28772, May 16, 2012, Air Quality: Widespread Use for Onboard Refueling Vapor Recovery and Stage II Waiver.

included within the OTR, not just in areas designated as nonattainment.

Section 182(f) of the CAA requires states to apply the same requirements to major stationary sources of NO_x as are applied to major stationary sources of VOCs under subpart 2. Thus, the same NNSR and RACT requirements that apply to major stationary sources of VOC in the OTR also apply to major stationary sources of NO_x.¹¹ While NO_x emissions are necessary for the formation of ozone in the lower atmosphere, a local decrease in NO_x emissions can, in some cases, increase local ozone concentrations, creating potential “NO_x disbenefits.” Accordingly, CAA section 182(f) provides for an exemption of the NO_x requirements where the Administrator determines that such NO_x reductions would not contribute to the attainment of the NAAQS in a particular area. Areas granted a NO_x exemption under CAA section 182(f) may be exempt from certain requirements of the EPA’s motor vehicle I/M regulations and from certain federal requirements of general and transportation conformity.¹²

Additionally, under CAA section 184(c), the OTC may, based on a majority vote of the Governors on the Commission, recommend additional control measures not specified in the statute to be applied within all or part of the OTR if necessary to bring any areas in the OTR into attainment by the applicable attainment dates. If EPA approves such a recommendation, under CAA section 184(c)(5) the Administrator must declare each state’s implementation plan inadequate and it must order the states to include the approved control measures in their revised plans pursuant to CAA section 110(k)(5) for the state to meet the requirements of CAA section 110(a)(2)(D). If a CAA section 110(k)(5) finding is issued, states have 1 year to revise their SIPs to include the approved measures.

States included in the OTR by virtue of CAA section 184(b)(1) were required to submit SIPs to the EPA addressing these requirements within 2 years of the 1990 CAA Amendments, or by November 15, 1992. Section 184(b)(1) of the CAA further provides that if states are later added to the OTR pursuant to CAA section 176A(a)(1), such states

must submit SIPs addressing these requirements within 9 months after inclusion in the OTR.

C. Legal Standard for This Action

Section 176A(a)(1) of the CAA states that the Administrator *may* add a state to a transport region if the Administrator has reason to believe that emissions from the state significantly contribute to a violation of the NAAQS within the transport region. For the reasons discussed in this section, the use of the discretionary term “may” in CAA section 176A(a) means that the Administrator may exercise reasonable discretion in implementing the requirements of the CAA with respect to interstate pollution by determining whether or not to approve or deny a CAA section 176A petition.

The Administrator’s discretion pursuant to CAA section 176A(a) has been affirmed by the U.S. District Court for the District of Columbia Circuit (D.C. Circuit). In *Michigan v. EPA*, plaintiffs challenged whether the EPA may exercise its authority pursuant to CAA sections 110(k)(5) and 110(a)(2)(D) of the statute to address interstate transport without first forming a transport commission pursuant to CAA section 176A(b). 213 F.3d 663, 672 (2000). The D.C. Circuit held that the agency shall only establish a transport commission “if the agency exercises its discretion to create a transport region pursuant to section 176A(a).” *Id.* The court explained that “EPA can address interstate transport apart from convening a 176A/184 transport commission as subsection (a) provides that EPA ‘may’ establish a transport region” *Id.* Thus, the court held that the statute clearly provides that the discretion to create a transport region rests with the Administrator. So, too, does the discretion to add states to or remove states from a transport commission.

Several courts have held that the use of similarly non-mandatory language such as that found in CAA section 176A confers discretion on the agency to grant or deny a petition so long as it is supported by a “reasonable explanation.” For example, in *Massachusetts v. Environmental Protection Agency*, the Supreme Court was considering whether the EPA’s denial of a petition to regulate greenhouse gases under CAA section 202(a)(1) was reasonable. 549 U.S. 497 (2007). Section 202(a)(1) of the CAA states that the Administrator “shall by regulation prescribe (and from time to time revise) . . . standards applicable to the emission of any air pollutant from any class or classes of new motor

vehicles or new motor vehicle engines, which in his judgment cause, or contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare.” The EPA denied the petition, reasoning that the Act does not authorize the agency to issue mandatory regulations to address global climate change. *Id.* at 500. The Court concluded that the EPA has statutory authority to regulate emissions of greenhouse gases, and that the phrases “from time to time” and “in his judgment” conferred discretion on the Administrator to determine whether to promulgate an endangerment finding. Thus, “[u]nder the clear terms of the Clean Air Act, EPA can avoid taking further action . . . if it provides some reasonable explanation as to why it cannot or will not exercise its discretion.” *Id.* at 533. The Supreme Court confirmed that the review of an agency’s denial of a petition for rulemaking is very narrow: “Refusals to promulgate rules are . . . susceptible to judicial review, though such review is extremely limited and highly deferential.” *Id.* at 527–28 (quotations omitted). Further, the court explained that the EPA’s reason should conform to the authorizing statute, and that the agency could avoid taking further regulatory action if it provides some reasonable explanation as to why it cannot or will not exercise its discretion. *Id.* at 533 (citations omitted).

Consistent with *Massachusetts*, the D.C. Circuit has held that agencies have the discretion to determine how to best allocate resources in order to prioritize regulatory actions in a way that best achieve the objectives of the authorizing statute. In *Defenders of Wildlife v. Gutierrez*, the court rejected a challenge to the National Marine Fisheries Service’s (NMFS) denial of a petition for emergency rulemaking to impose speed restrictions to protect the right whale from boating traffic pursuant to section 553(e) of the Endangered Species Act, which requires agencies to “give an interested person the right to petition for the issuance, amendment, or repeal of a rule.” 532 F.3d 913 (D.C. Cir. 2008). The NMFS denied the petition on the grounds that imposing such restrictions would divert resources from, and delay development of, a more comprehensive strategy for protecting the whale population. *Id.* at 916. The court determined that NMFS’s explanation for the denial was a reasonable decision to focus its resources on a comprehensive strategy, which in light of the information before the NMFS at the time, was reasoned and adequately supported by the record. *Id.*

¹¹ See 57 FR 55622 (Nitrogen Oxides Supplement to the General Preamble, published November 25, 1992).

¹² As stated in the EPA’s I/M (November 5, 1992; 57 FR 52950) and conformity rules (60 FR 57179 for transportation rules and 58 FR 63214 for general rules), certain NO_x requirements in those rules do not apply where the EPA grants an area-wide exemption under CAA section 182(f).

Similarly, in *WildEarth Guardians v. EPA*, the court reviewed the EPA's denial of a petition to list coal mines for regulation under CAA section 111(b)(1)(A). 751 F.3d 651 (D.C. Cir. 2014). Section 110(b)(1)(A) of the CAA provides that, as a means of developing standards of performance for new stationary sources, the EPA shall, by a date certain publish "(and from time to time thereafter shall revise) a list of categories of stationary sources." (emphasis added) The provision provides that the Administrator "shall include a category of sources in such list if in his judgment it causes, or contributes significantly to, air pollution which may reasonably be anticipated to endanger public health and welfare." The EPA denied the petition, explaining that it must prioritize its actions in light of limited resources and ongoing budget uncertainties, and that denial of the petition was not a determination as to whether coal mines should be regulated as a source of air pollutants. 751 F.3d at 650. The EPA also noted as part of its denial that it might in the future initiate a rulemaking to do so. The D.C. Circuit held that the language in CAA section 111(b)(1)(A)—"from time to time" and "in his judgment"—means that the Administrator may exercise reasonable discretion in determining when to add new sources to the list of regulated pollutants, and that such language afforded agency officials discretion to prioritize sources that are the most significant threats to public health to ensure effective administration of the agency's regulatory agenda. *Id.* at 651.

In each of these cases previously discussed, the acting agency has been entitled to broad discretion to act on a pending petition so long as the agency provided a reasoned explanation. Notably, as each of these decisions focused on the case-specific circumstances relied upon by the acting agency to deny the pending petition, the courts did not speak to whether the agency might reach a different conclusion under different circumstances. Like the statutory provisions evaluated by the courts in these cases, the term "may" in CAA section 176A(a) means that the Administrator is permitted to exercise reasonable discretion in determining when to add new states to a transport region. While the Administrator must adequately explain the facts and policy concerns she relied on in acting on the petition and conform such reasons with the authorizing statute, review of such a decision is highly deferential. Thus, the agency is entitled to broad

discretion when determining whether to grant or deny such a petition.

D. The CAA Section 176A Petition and Related Correspondence

On December 9, 2013, the states of Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New York, Rhode Island and Vermont submitted a petition under CAA section 176A requesting that the EPA add to the OTR the states of Illinois, Indiana, Kentucky, Michigan, North Carolina, Ohio, Tennessee, West Virginia and the portion of Virginia currently not within the OTR. On December 17, 2013, the petition was amended to add the state of Pennsylvania as an additional state petitioner.

The petitioning states submitted a technical analysis which the petitioning states contend demonstrates that the nine named upwind states significantly contribute to violations of the 2008 ozone NAAQS in the OTR. The petitioning states acknowledge and include data used to support rulemakings promulgated by the EPA that addressed interstate transport with respect to both the 2008 ozone NAAQS and prior ozone NAAQS in order to further support their request. Moreover, the petitioners identified those areas that are designated nonattainment with respect to the 2008 ozone NAAQS within and outside the OTR and conducted a linear extrapolation to predict that certain areas will continue to be in nonattainment or will have difficulty maintaining attainment of the NAAQS after the EPA's 2008 ozone NAAQS final area designations in 2012. The petitioning states' 2018 modeling showed that, with on-the-way OTR measures, areas within the OTR and non-OTR would continue to have problems attaining the 2008 ozone NAAQS. Lastly, their 2020 modeling showed that with a 58 percent NO_x and 3 percent VOC emissions reduction over the eastern U.S., there would only be one area in New Jersey that could have trouble maintaining the NAAQS.

The petitioners further note that the OTR states have adopted and implemented numerous and increasingly stringent controls on sources of VOCs and NO_x that may not currently be required for sources in the upwind states. Petitioners contend that expansion of the OTR to include these upwind states will help the petitioning states attain the 2008 ozone NAAQS. The petitioning states include two case studies that identify the types of measures adopted throughout the current OTR including mobile source and stationary source control measures that have been enacted to minimize

emissions of NO_x and VOCs. The petitioners contend that the expansion of the OTR is warranted so that the downwind states and the upwind states can work together to address interstate ozone transport for the 2008 ozone NAAQS. Also, the petitioners assert that without immediate expansion of the OTR, attainment of the 2008 ozone NAAQS in many areas in the U.S. will remain elusive.

At the time the petition was submitted, the EPA's most recent effort to address the interstate transport of ozone pollution was subject to litigation in the D.C. Circuit. As discussed in more detail later in this document, the EPA issued the Cross-State Air Pollution Rule (CSAPR) pursuant to section 110(a)(2)(D)(i)(I) of the CAA in order to address interstate transport with respect to the 1997 ozone NAAQS as well as the 1997 and 2006 fine particulate matter (PM_{2.5}) NAAQS. 76 FR 48208 (August 8, 2011). On August 21, 2012, the D.C. Circuit issued a decision in *EME Homer City Generation, L.P. v. EPA*, 696 F.3d 7 (D.C. Cir. 2012), vacating CSAPR based on several holdings that would have limited the EPA's authority pursuant to section 110(a)(2)(D)(i)(I). The petitioners subsequently submitted the section 176A petition. Thereafter, on April 29, 2014, the Supreme Court issued a decision reversing the D.C. Circuit's decision and upholding the EPA's interpretation of its authority pursuant to CAA section 110. *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. 1584 (2014).

Since the petition was submitted, the EPA has received correspondence from both the upwind states and the petitioning states regarding the EPA's pending action on the petition. On February 14, 2014, the EPA received a letter from the environmental commissioners and directors representing the states of Illinois, Ohio, Indiana, Tennessee, Kentucky, Virginia, Michigan, West Virginia and North Carolina (in collaboration with LADCO) disagreeing with the basis for the petition and requesting that the EPA deny the petition. On May 29, 2015, the EPA received a letter from the Midwest Ozone Group urging that the EPA consider recent air quality, on-the-books measures between now and 2018 and other related information prior to any action on the petition. On July 7, 2015, the EPA received a letter from state representatives from the states of Ohio, Kentucky, Indiana, West Virginia, North Carolina and Michigan communicating the progress of the voluntary dialogue called the State Collaborative on Ozone Transport (SCOOT) that according to the letter, resulted in commitments, from

utilities in the upwind states to operate NO_x controls during the summer of 2015. The upwind states believed that the requests from some Northeast states to sign a memorandum of understanding to require additional emission control and reporting requirements from facilities and place such requirements into SIPs to be unnecessary and requested that the CAA section 176A petition be withdrawn by the petitioning states or denied by the EPA given the forecasted air quality improvements and declining ozone trends. On October 30, 2015, the EPA received a letter from environmental commissioners (or their designated representatives) from the petitioning states that provided an update on the SCOOT process and responded to the July 7, 2015, letter expressing a need for federally enforceable commitments from states to operate existing controls.

On April 6, 2016, the EPA received a letter from the petitioning states requesting immediate action to grant the CAA section 176A petition. The letter acknowledged the EPA's recent proposal to update the CSAPR to address interstate transport for the 2008 ozone NAAQS and urged the EPA to grant the petition because the proposed rulemaking would only partially address ozone transport problems in the eastern U.S. Further, the letter noted that granting the petition will also facilitate efforts to attain the 2015 ozone NAAQS, as well as future updates to the ozone NAAQS. On May 16, 2016, the EPA received a letter from the upwind states of Ohio, Kentucky, Indiana, West Virginia and Michigan requesting that the EPA deny the petition, claiming that the technical information used to support the petition was not comparable to current air quality and noting the EPA's proposed transport rule to address the 2008 ozone NAAQS. These communications can be found in the docket for this action.

IV. The EPA's Proposed Decision on the CAA Section 176A Petition

This section describes the basis for the EPA's proposed denial of this CAA section 176A petition. Section IV.A of this document describes the alternative authorities provided by the CAA for addressing the interstate transport of ozone pollution and the flexibilities those provisions provide. Section IV.B of this document describes EPA's historical use of these authorities to address the interstate transport of ozone pollution and the advantages of those rulemakings for addressing current ozone nonattainment problems. Section IV.C of this document describes other measures that have achieved, and will

continue to achieve, significant reductions in emissions of NO_x and VOCs resulting in lower levels of transported ozone pollution that impact downwind attainment and maintenance of the 2008 ozone NAAQS. Finally, Section IV.D of this document describes the EPA's rationale, based on these considerations, for proposing to deny this CAA section 176A petition.

As explained more fully later, the EPA believes an expansion of the OTR is unnecessary at this time and would not be the most efficient way to address the remaining interstate transport issues for the 2008 ozone NAAQS in states currently included in the OTR. Additional local and regional ozone precursor emissions reductions are expected in the coming years from already on-the-books rules (*see* Sections IV. B and C of this document for more details) and as described elsewhere in this document, the EPA has the authority through other CAA provisions (including CAA sections 110 and 126) to develop a more effective remedy to address the particular pollutants and sources for this air quality situation.

A. The CAA Good Neighbor Provisions

The CAA provision that states and the EPA have used most for addressing interstate transport is section 110(a)(2)(D)(i)(I), often referred to as the "good neighbor" or "interstate transport" provision, requires states to prohibit certain emissions from in-state sources if such emissions impact the air quality in downwind states. Specifically, in keeping with the CAA's structure of shared state and federal regulatory responsibility, CAA section 110(a)(2)(D)(i)(I) requires all states, within 3 years of promulgation of a new or revised NAAQS, to submit SIPs that contain adequate provisions prohibiting any source or other type of emissions activity within the state from emitting any air pollutant in amounts which will contribute significantly to nonattainment in, or interfere with maintenance by, any other state with respect to any NAAQS. Thus, each state is required to submit a SIP that demonstrates the state is adequately controlling sources of emissions that would impact downwind states' air quality relative to the NAAQS in violation of the good neighbor provision.

Once a state submits a good neighbor SIP, the EPA must evaluate the SIP to determine whether it meets the statutory criteria of the good neighbor provision, and then approve or disapprove, in whole or in part, the state's submission in accordance with CAA section 110(k)(3). In the event that a state does

not submit a required SIP addressing the good neighbor provision, the EPA publishes in the **Federal Register** a "finding of failure to submit" that a state has failed to make the required SIP submission. If the EPA disapproves a state's SIP submission or if the EPA issues a finding of failure to submit, then the action triggers the EPA's obligations under section 110(c) of the CAA, to promulgate a FIP within 2 years, unless the state corrects the deficiency, and the EPA approves the plan or plan revision before the EPA promulgates a FIP. Thus, in the event that a state does not address the good neighbor provision requirements in a SIP submission, the statute provides that the EPA must address the requirements in the state's stead.

Section 110(k)(5) of the CAA also provides a means for the EPA to reopen previously approved SIPs, including good neighbor SIPs, if the EPA determines that an approved SIP is substantially inadequate to attain or maintain the NAAQS, to adequately mitigate interstate pollutant transport, or to otherwise comply with requirements of the CAA. The EPA can use its authority under CAA section 110(k)(5) to call for re-submission of the SIP to correct the inadequacies under CAA 110(a)(2)(D)(i)(I), and if the state fails to make the required submission, the EPA can promulgate a FIP under CAA section 110(c) to address the inadequacies.

Finally, section 126 of the CAA provides states with an additional opportunity to bring to the EPA's attention specific instances where a source or a group of sources in a specific state may be emitting in excess of what the good neighbor provision would allow. Section 126(b) of the CAA provides that any state or political subdivision may petition the Administrator of the EPA to find that any major source or group of stationary sources in upwind states emits or would emit any air pollutant in violation of the prohibition of CAA section 110(a)(2)(D)(i).¹³ Petitions submitted pursuant to this section are referred to as CAA section 126 petitions. Section 126(c) of the CAA explains the impact of such a finding and establishes the conditions under which continued operation of a source subject to such a finding may be permitted. Specifically,

¹³ The text of CAA section 126 codified in the U.S. Code cross references CAA section 110(a)(2)(D)(ii) instead of CAA section 110(a)(2)(D)(i). The courts have confirmed that this is a scrivener's error and the correct cross reference is to CAA section 110(a)(2)(D)(i). *See Appalachian Power Co. v. EPA*, 249 F.3d 1032, 1040–44 (D.C. Cir. 2001).

CAA section 126(c) provides that it would be a violation of section 126 of the Act and of the applicable SIP: (1) For any major proposed new or modified source subject to a CAA section 126 finding to be constructed or operate in violation of the good neighbor prohibition of CAA section 110(a)(2)(D)(i); or (2) for any major existing source for which such a finding has been made to operate more than 3 months after the date of the finding. The statute, however, also gives the Administrator discretion to permit the continued operation of a source beyond 3 months if the source complies with emission limitations and compliance schedules provided by the EPA to bring about compliance with the requirements contained in CAA sections 110(a)(2)(D)(i) and 126 as expeditiously as practicable but no later than 3 years from the date of the finding. Where the EPA provides such limitations and compliance schedules, it promulgates these as a revision to the upwind state's good neighbor SIP, and CAA section 110(a)(2)(D)(ii) further requires that good neighbor SIPs ensure compliance with these limitations and compliance schedules.¹⁴

The flexibility provided by these statutory provisions is different from that provided by the requirements imposed upon states in the OTR. With limited exceptions described previously, states in the OTR must impose a uniform set of requirements on sources within each state. While the OTR states may impose additional requirements with the consent of the OTC and the EPA, the states generally must comply with the minimum requirements imposed by the statute. The good neighbor provision, by contrast, provides both the states and the EPA with the flexibility to develop a remedy targeted at a particular air quality problem, including the flexibility to tailor the remedy to address the particular precursor pollutants and sources that would most effectively address the downwind air quality problem. As described later, the EPA has previously promulgated four interstate transport rulemakings pursuant to these authorities in order to quantify the specific emission reductions required in certain eastern

states in order to comply with the requirements of CAA section 110(a)(2)(D)(i)(I) with respect to downwind nonattainment and maintenance concerns with respect to the NAAQS for ozone and PM_{2.5}. In Section IV.B. of this document, the EPA describes the importance of these transport rules as they relate to regional ozone pollution transport.

B. The EPA's Interstate Transport Rulemakings Under the Good Neighbor Provision

In order to address the regional transport of ozone pursuant to the CAA's good neighbor provision under section 110(a)(2)(D)(i)(I), the EPA has promulgated four regional interstate transport rules focusing on the reduction of NO_x emissions, as the primary meaningful precursor to address regional ozone, from certain sources located in states in the eastern half of the U.S.^{15 16} States and the EPA have implemented the emission reductions required by these rulemakings pursuant to the various authorities for implementing the good neighbor provision, including CAA sections 110(a)(1), 110(c), 110(k)(5) and 126.

In each of these rulemakings, the EPA identified those sources and pollutants that were most effective in addressing the particular air quality problem identified through the course of the EPA's analysis. This allowed the EPA to craft targeted remedies that provided efficient and effective means of addressing the particular air quality problem. In each of the regional transport rules, the EPA analysis has continued to demonstrate that NO_x is the ozone precursor that is most effective to reduce when addressing regional transport of ozone in the eastern U.S. The EPA has also focused each rule on those sources that can most cost-effectively reduce emissions of NO_x, such as EGUs and, in one rule, certain large non-EGUs. These rulemakings demonstrate that the EPA has used and is continuing to use its authority under CAA section 110(a)(2)(D)(i)(I) to target those sources and precursors that most efficiently address the particular interstate ozone transport problem. Accordingly, the EPA believes that it is unnecessary to

include additional states, and sources within those states, in OTR in order to address the current nonattainment situation for the 2008 ozone NAAQS in the petitioning states. Prior to the EPA's promulgation of some of those federal transport rules, the EPA worked with states and provided guidance to help states submit approvable good neighbor SIPs to address the CAA good neighbor provision. States have the first responsibility to address these CAA requirements pursuant to section 110(a)(1), and the EPA issued those transport rules only after states had the opportunity to address their CAA interstate transport obligation. While some states have state-developed and EPA-approved good neighbor SIPs, other states are covered by EPA-issued FIPs.

1. NO_x SIP Call

Through a 2-year effort (starting in 1995 and ending in 1997) known as the Ozone Transport Assessment Group (OTAG), the EPA worked in partnership with the 37 eastern-most states and the District of Columbia, industry representatives, and environmental groups to address the interstate transport of ozone pollution. OTAG identified and evaluated flexible and cost-effective strategies for reducing long-range transport of ozone and ozone precursors. Based on the OTAG process, the EPA engaged in a rulemaking to promulgate a final action commonly referred to as the NO_x SIP Call in order to address the requirements of the good neighbor provision (CAA section 110(a)(2)(D)(i)(I)) with respect to the 1979 1-hour ozone NAAQS and the 1997 8-hour ozone NAAQS. 63 FR 57356 (October 27, 1998). The rule required 22 eastern states and the District of Columbia to amend their SIPs and limit NO_x emissions that contribute to ozone nonattainment. The rule set a NO_x ozone season emission budget for each covered state, essentially a cap on all ozone season NO_x emissions in the state. Covered states were given the option to participate in a regional allowance trading program, known as the NO_x Budget Trading Program (NBP) in order to achieve most of the necessary emissions reductions.

Through the OTAG process, the states concluded that widespread NO_x reductions were necessary to enable areas to attain and maintain the ozone NAAQS.¹⁷ The OTAG's recommendations identified control

¹⁴ The EPA has received, but not yet acted upon, several CAA section 126 petitions from a number of the petitioning states regarding the contribution of specific EGUs to interstate ozone transport with respect to the 2008 and 2015 ozone NAAQS. Petitions have been submitted by Delaware, Maryland, and Connecticut. The list of EGUs identified in one or more of these petitions includes EGUs operating in Pennsylvania, West Virginia, Ohio, Kentucky, and Indiana.

¹⁵ For purposes of these rulemakings, the western U.S. (or the West) consists of the 11 western contiguous states of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

¹⁶ Two of these rulemakings also addressed the reduction of NO_x and SO₂ emissions for the purposes of addressing the interstate transport of particulate matter pollution pursuant to the good neighbor provision.

¹⁷ See 62 FR 60320, November 7, 1997, Notice of proposed rulemaking, Finding of Significant Contribution and Rulemaking for Certain States in the Ozone Transport Assessment Group Region for Purposes of Reducing Regional Transport of Ozone.

measures for states to achieve additional reductions in emissions of NO_x but did not identify such measures for VOC, beyond the EPA's promulgation of national VOC measures, at that time. The OTAG Regional and Urban Scale Modeling and Air Quality Analysis Work Groups reached the following relevant conclusions (with which the EPA agreed): Regional NO_x emissions reductions are effective in producing ozone benefits; the more NO_x emissions reduced, the greater the benefit to air quality; and VOC controls are effective in reducing ozone locally and are most advantageous to urban nonattainment areas. The EPA concluded in its rulemaking that, "a regional strategy focusing on NO_x reductions across a broad portion of the region will help mitigate the ozone problem in many areas of the East." 63 FR 57381. The EPA did not propose any new SIP requirements for VOC reductions for the purpose of reducing the interstate transport of ozone, however, the agency suggested that states may consider additional reductions in VOC emissions as they develop local attainment plans.

In order to quantify necessary NO_x emission reductions, the EPA developed statewide NO_x emissions budgets based on recommendations from OTAG on how to cost-effectively reduce emissions from utilities and other sources of NO_x. Thus, the EPA established NO_x emission budgets based on the conclusion that EGUs and large non-EGU point sources could cost-effectively achieve emissions reductions by the implementation of controls costing \$2,000 per ton of NO_x emissions reduced, including controls such as selective catalytic reduction (SCR) and selective non-catalytic reduction (SNCR) that could be required on a number of units in the OTAG region. Although the NO_x SIP Call did not specify which sources must reduce NO_x, consistent with OTAG's recommendations, the EPA encouraged states to consider controls on EGUs and large non-EGU point sources under an allowance trading program as a cost effective strategy for complying with the NO_x emissions budgets.

At the time the NO_x SIP Call was finalized, the EPA had already approved good neighbor SIPs for many states with respect to the 1-hour ozone standard. Accordingly, the EPA initiated a SIP call pursuant to CAA section 110(k)(5) requiring states covered by the rule to amend their SIPs in order to limit NO_x emissions that significantly contribute to ozone nonattainment in other states consistent with the budgets finalized in the rule.

In parallel with issuing the SIP call, the EPA reviewed petitions submitted pursuant to CAA section 126(b) by eight states requesting that the EPA find that stationary sources in upwind states contribute significantly to ozone nonattainment in the petitioning states. Because the section 126 petitions raised many of the same issues as those being addressed in NO_x SIP call, the EPA coordinated its response to the CAA section 126 petitions with the NO_x SIP Call rulemaking. The EPA issued findings that NO_x emissions in twelve states and the District of Columbia contribute significantly to nonattainment of the 1-hour ozone NAAQS in three downwind states, but the EPA determined that it was appropriate to postpone CAA section 126 findings pending the resolution of the NO_x SIP call process. 64 FR 28250 (May 25, 1999). Accordingly, the EPA issued a rule providing that the findings would automatically be deemed made with regard to sources from a given state should that state fail to submit a SIP revision as required by the NO_x SIP Call. The rulemaking further established the NBP as the remedy that would apply pursuant to CAA section 126(c) for any state subject to such a finding.

The D.C. Circuit subsequently issued two orders affecting implementation of the NO_x SIP Call: (1) An order remanding the 1997 8-hour ozone standard to the EPA, *American Trucking Ass'n v. EPA*, 175 F.3d 1027, *reh'g granted in part and denied in part*, 195 F.3d 4 (D.C. Cir.1999), *rev'd in part sub nom. Whitman v. American Trucking Ass'n*, 531 U.S. 457, 121 S.Ct. 903 (2001), and (2) an order staying the NO_x SIP Call deadline pending further litigation, *Michigan v. EPA*, No. 98–1497 (D.C. Cir. May 25, 1999) (order granting stay in part). In response to these court decisions, the EPA took two actions. First, the EPA indefinitely stayed the technical determinations of the prior section 126 action as they applied to the 8-hour ozone NAAQS, pending further developments in the litigation. 65 FR 2674, 2685 (January 18, 2000). Second, with respect to the 1-hour standard, the EPA made the requested findings of significant contributions, granting the relevant portions of the section 126 petitions. *Id.* at 2684–85. The EPA further imposed the NBP on affected sources as the remedy pursuant to section 126(c). *Id.* at 2686.

Ultimately, the NO_x SIP Call was largely upheld by the D.C. Circuit in *Michigan v. EPA*, 213 F.3d 663 (D.C. Cir. 2000), *cert. denied*, 532 U.S. 904

(2001).¹⁸ States chose to use the NBP to achieve the majority of the NO_x reductions required by the NO_x SIP Call. Subsequent rules have required additional reductions from certain sources regulated by the NO_x SIP Call, but the rules have not replaced the NO_x SIP Call reduction requirements and the rule remains in effect.

2. Clean Air Interstate Rule (CAIR)

The CAIR was published in May 2005 and addressed both the 1997 PM_{2.5} and the 1997 ozone standards under the good neighbor provision. 70 FR 25162 (May 12, 2005). CAIR required SIP revisions in 28 eastern states and the District of Columbia to ensure that certain emissions of sulfur dioxide (SO₂) and/or NO_x—important precursors of regionally transported PM_{2.5} (SO₂ and NO_x) and ozone (NO_x)—were prohibited.

The rule set statewide emission budgets for large EGUs that reduced emissions of annual SO₂ and annual NO_x (particulate matter precursors) and summertime NO_x (ozone precursor). As in the NO_x SIP Call, the EPA identified reductions in NO_x emissions as the most efficient and effective way to achieve the greatest reduction of interstate ozone pollution. *Id.* at 25185–8, 25195. The EPA also determined that emissions reductions from EGUs were the most cost-effective and efficient means of achieving necessary NO_x emissions reductions. 70 FR 25173. As in the NO_x SIP Call, affected states were given the option to participate in a regional allowance trading program to satisfy their SIP obligations.

When the EPA promulgated the final CAIR, the EPA also issued a national rule finding that certain states had failed to submit SIPs to address the requirements of CAA section 110(a)(2)(D)(i) with respect to the 1997 PM_{2.5} and the 1997 ozone NAAQS by the CAA deadline for those standards of July 2000. 70 FR 21147. The findings of failure to submit triggered a 2-year clock for the EPA to issue FIPs to address the good neighbor provision with respect to those standards, and the EPA subsequently promulgated FIPs to ensure that the emission reductions required by CAIR would be achieved on schedule. 71 FR 25328 (April 28, 2006). Upon review, the D.C. Circuit determined that CAIR was "fundamentally flawed," and the rule was remanded to the EPA to be replaced "from the ground up." *North Carolina v.*

¹⁸ The EPA's January 18, 2000, action on the CAA section 126 petitions was also challenged and upheld by the D.C. Circuit in *Appalachian Power Company v. EPA*, 249 F.3d 1032 (2001).

EPA, 531 F.3d 896, 929 (D.C. Cir. 2008), *modified on reh'g*, 550 F.3d 1176.

3. CSAPR

In response to the court's remand of CAIR, on July 6, 2011, the EPA promulgated CSAPR, which requires certain states to significantly improve air quality by reducing power plant emissions that contribute to ozone and/or fine particle pollution in other states. CSAPR requires sources in a total of 28 states to reduce annual SO₂ emissions, annual NO_x emissions and/or ozone season NO_x emissions to assist in attaining the 1997 ozone and PM_{2.5} and 2006 PM_{2.5} NAAQS. 76 FR 48208. The EPA found that each CSAPR state had failed to submit a complete SIP or the EPA disapproved a submitted SIP for the relevant NAAQS. To accomplish implementation aligned with the applicable NAAQS attainment deadlines, the EPA promulgated FIPs for each affected state which require affected sources to participate in the regional allowance trading program to achieve the necessary emission reductions. These states have the option of replacing each FIP with a SIP that could achieve the same emissions reductions in other ways.

CSAPR set emissions budgets for certain states according to the applicable NAAQS—annual NO_x and annual SO₂ budgets for PM_{2.5}, and ozone season NO_x budgets for ozone—to eliminate a state's significant contribution or interference with maintenance of a NAAQS in other states. With respect to the ozone NAAQS, the EPA determined that NO_x emissions had the most meaningful interstate impacts based on air quality modeling that examined upwind state emissions of all ozone precursors (including VOCs and NO_x). 75 FR 45230 (August 2, 2010) and 76 FR 48222. Moreover, the EPA noted that the other recent assessments of ozone, for example those conducted for the Regulatory Impact Analysis for the ozone standards in 2008, continue to show the importance of NO_x emissions on ozone transport. 75 FR 45236. Accordingly, the EPA quantified NO_x emissions budgets for each affected state by quantifying the emissions reductions achievable by applying cost-effective controls to EGUs. 76 FR 48256. The EPA determined that controls at other sources were generally not available at similar cost levels.

The timing of CSAPR's implementation was affected by a number of court actions. CSAPR was the subject to nearly four years of litigation in both the D.C. Circuit and the Supreme Court. CSAPR was generally

upheld by the courts, but for the remand of certain state budgets, and implementation of the trading programs began in 2015. See *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. 1584 (2014); *EME Homer City Generation, L.P. v. EPA*, 795 F.3d 118 (D.C. Cir. 2015).

4. The CSAPR Update To Address the 2008 Ozone NAAQS

On October 26, 2016, the EPA published an update to CSAPR intended to respond to the D.C. Circuit's remand of certain NO_x ozone season budgets from the original CSAPR and to address the good neighbor provision with respect to the 2008 ozone NAAQS. 81 FR 74504 (CSAPR Update). The CSAPR Update requires 22 states to reduce ozone season NO_x emissions that significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in certain downwind states. The EPA found that each CSAPR state had failed to submit a complete SIP or the EPA disapproved a submitted SIP for the 2008 ozone NAAQS. To accomplish implementation aligned with the applicable attainment deadline for the 2008 ozone NAAQS, the EPA promulgated FIPs for each of the 22 states covered by CSAPR Update which require affected sources to participate in the regional allowance trading program to achieve the necessary emission reductions beginning with the 2017 ozone season.

The CSAPR Update analysis found that emissions from eight of the nine states named in the section 176A petition, in addition to a number of other states, were linked to downwind projected nonattainment and/or maintenance receptors, in the eastern U.S., in 2017 with respect to the 2008 ozone NAAQS. 81 FR 74506, 74538–39. For one state named in the CAA section 176A petition, North Carolina, the EPA determined in the CSAPR Update that the state was not linked to any downwind receptors and, therefore, will not significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in any other state pursuant to the good neighbor provision. 81 FR 74506, 74537–38.

For those states linked to downwind air quality problems, the EPA evaluated timely and cost-effective emissions reductions achievable in each state in order to quantify the amount of emissions constituting each state's significant contribution to nonattainment and interference with maintenance of the standard pursuant to the good neighbor provision. The EPA

focused its analysis on: (1) Emissions reductions achievable by 2017 in order to assist downwind states with meeting the applicable attainment deadline for the 2008 ozone NAAQS (81 FR 74521), (2) reductions in only NO_x emissions, consistent with past ozone transport rules (81 FR 74514), and (3) achievable, cost effective NO_x emissions reductions from EGUs. The EPA, therefore, calculated emissions budgets for each affected state based on the cost-effective NO_x emissions reductions achievable from EGUs by the 2017 ozone season.

The EPA concluded that the emissions reductions achieved by implementation of the budgets constitute a portion of most affected states' significant contribution to nonattainment or interference with maintenance of the 2008 ozone NAAQS at these downwind receptors. 81 FR 74508, 74522.¹⁹ However, because downwind air quality problems were projected to remain after implementation of the quantified emissions reductions, the EPA could not determine that it had fully quantified the affected states' emissions reduction obligations pursuant to the good neighbor provision to the extent upwind states remain linked to the downwind receptors and further emission reductions from EGUs and non-EGUs could be available. In order to determine the level of NO_x control stringency necessary to quantify those emissions reductions that fully constitute each state's significant contribution to downwind nonattainment or interference with maintenance, the EPA explained in promulgating the final CSAPR Update that it must evaluate further emission reductions from EGU and non-EGU strategies that can be implemented on longer timeframes. The CSAPR Update represents a significant first step by the EPA to quantify states' emission reduction obligations under the good neighbor provision for the 2008 ozone NAAQS. Even though the CSAPR Update did not fully address upwind states' emission reduction obligation pursuant to the good neighbor provision, the implementation of the emissions budgets quantified in that rule will help to resolve a number of projected air quality problems in the Philadelphia, Pennsylvania, Jefferson County, Kentucky and Hamilton County, Ohio areas and will help make progress to reduce upwind

¹⁹For one state named in the CAA section 176A petition, Tennessee, the EPA determined that the emissions reductions required by the CSAPR Update would fully address the state's significant contribution to nonattainment and interference with maintenance of the 2008 ozone NAAQS in other states.

contributions to high ozone levels in Baltimore, Maryland, and the New York City area (including parts of Connecticut and New Jersey).

The EPA is continuing the work necessary to address its remaining obligation to promulgate FIPs fully addressing the good neighbor provision with respect to the 2008 ozone NAAQS for 21 states. The EPA intends to continue to collect information and undertake analyses to evaluate potential future emission reductions from non-EGUs and EGUs that may be necessary to fully quantify each state's interstate transport obligations for the 2008 ozone NAAQS in a future action.²⁰ The EPA expects to continue to fulfill its obligation to promulgate FIPs fully addressing interstate transport with respect to the 2008 ozone NAAQS consistent with the authority and flexibility provided by the good neighbor provision to tailor a remedy based on those sources and precursor pollutants (*i.e.*, NO_x) that can most effectively address the downwind air quality problems identified by the EPA's analysis.

C. Additional Rules That Reduce NO_x and VOC Emissions

In addition to the significant efforts to implement the good neighbor provision for the 2008 and prior ozone NAAQS described in Section IV.B of this document, there are numerous federal and state emission reduction rules that have already been adopted which have resulted or will result in the further reduction of ozone precursor emissions, including emissions from states named in the section 176A petition. Many of these rules directly require sources to achieve reductions of NO_x, VOC, or both, and others require actions that will indirectly result in such reductions. As a result of these emissions reductions, the interstate transport of ozone has been and will continue to be reduced over time.

The majority of man-made NO_x and VOC emissions that contribute to ozone formation in the U.S. comes from the following sectors: on-road and nonroad mobile sources, industrial processes

(including solvents), consumer and commercial products, and the electric power industry. In 2014, the most recent year for which the National Emissions Inventory (NEI) is available, on-road and nonroad mobile sources accounted for about 56 percent of annual NO_x emissions; and the electric power industry (EGUs) accounted for about 13 percent. With respect to VOCs, industrial processes (including solvents) accounted for about 48 percent of manmade VOC emissions; and mobile sources accounted for about 27 percent.^{21 22}

The EPA establishes emissions standards under various CAA authorities for numerous classes of automobile, truck, bus, motorcycle, earth mover, aircraft, and locomotive engines, and for the fuels used to power these engines. The pollutant reduction benefits from new engine standards increase each year as older and more-polluting vehicles and engines are replaced with newer, cleaner models. The benefits from fuel programs generally begin as soon as a new fuel is available. Further, the ongoing emission reductions from mobile source federal programs such as those listed previously will provide for substantial emissions reductions well into the future, and will complement state and local efforts to attain the 2008 ozone NAAQS.

There are several existing national rules that continue to achieve emission reductions through 2025 and beyond with more protective emission standards for on-road vehicles that include: Control of Air Pollution from Motor Vehicles: Tier 3 Motor Vehicle Emission and Fuel Standards;²³ Control of Air Pollution from New Motor Vehicles: Tier 2 Motor Vehicle Emissions Standards and Gasoline Sulfur Control Requirements;²⁴ Control of Air Pollution from New Motor Vehicles: Heavy-Duty Engine and Vehicle Standards and Highway Diesel Fuel Sulfur Control Requirements;²⁵ Model Year 2017 and Later Light-Duty Vehicle Greenhouse Gas Emissions and Corporate Average Fuel Economy Standards;²⁶ Model Year 2012–2016 Light-Duty Vehicle Greenhouse Gas Emission Standards and Corporate

Average Fuel Economy Standards;²⁷ Greenhouse Gas Emissions and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles—Phase 2;²⁸ Phase 1 Greenhouse Gas Emissions Standards and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles²⁹ and Control of Hazardous Air Pollutants from Mobile Sources.³⁰

Similarly, already adopted regulations for non-road engines and equipment that will achieve further reductions include: Control of Emissions of Air Pollution from Nonroad Diesel Engines and Fuel;³¹ Republication for Control of Emissions of Air Pollution from Locomotive Engines and Marine Compression-Ignition Engines Less Than 30 Liters per Cylinder;³² Control of Emissions from New Marine Compression-Ignition Engines at or Above 30 Liters per Cylinder;³³ the International Maritime Organization's Emission Control Area to Reduce Emissions from Ships in the U.S. Caribbean; Control of Air Pollution From Aircraft and Aircraft Engines;³⁴ Emission Standards and Test Procedures; Control of Emissions from Nonroad Large Spark-Ignition Engines, and Recreational Engines (Marine and Land-Based);³⁵ and Control of Emissions from Nonroad Spark-Ignition Engines and Equipment.³⁶

Similarly, a number of already-adopted stationary source rules will drive further regional reductions in ozone precursor emissions, including: boiler maximum achievable control technology standards under CAA section 112 and the Mercury and Air Toxics Standards. These rules target specific sources and have the co-benefit of reducing ozone precursors which also reduce interstate ozone pollution transport. For example, the measures to address Regional Haze best available retrofit technology determinations often include power plant pollution controls that can achieve NO_x reductions of at least 80 to 90 percent from a particular source.

Other existing rules that will achieve NO_x and VOC emissions reductions include: New Source Performance Standards (NSPS) for reciprocating internal combustion engines; NSPS for gas turbines; NSPS for process heaters;

²⁰ Moreover, in support of this effort, on December 28, 2016, the EPA shared updated preliminary modeling information providing air quality projections for areas in the contiguous U.S. for the 2015 ozone NAAQS, which the EPA anticipates will assist states with the development of SIPs. See, "Notice of Availability of the Environmental Protection Agency's Preliminary Interstate Ozone Transport Modeling Data for the 2015 Ozone National Ambient Air Quality Standard (NAAQS)" available at: <https://www.epa.gov/airmarkets/notice-data-availability-preliminary-interstate-ozone-transport-modeling-data-2015-ozone>.

²¹ The VOC percentages are for manmade VOCs only. Emissions from natural sources, such as trees, also comprise around 70 percent of total VOC emissions nationally, with a higher proportion during the ozone season and in areas with more vegetative cover.

Hospital/Medical/Infectious Waste Incinerators: New Source Performance Standards and Emission Guidelines: Final Rule Amendments; and NO_x Emission Standard for New Commercial Aircraft Engines. The EPA's regulations for commercial, industrial and solid waste incinerators set standards for NO_x and several air toxics for all commercial incinerators, as required under CAA section 129. Air toxics rules for industrial boilers will yield co-benefit NO_x reductions as a result of tune-ups and energy efficiency measures, especially from boilers that burn coal.

The EPA expects existing federal and state rules, and also those that may be promulgated in the future, will have the co-benefit of reducing ozone precursor emissions even if they do not directly address interstate transport of ozone pollution. These rules will result in reductions in ozone concentrations that will help areas attain the 2008 ozone NAAQS. For example, the Regional Haze Rule requires states to revise their regional haze SIPs³⁷ to assess whether additional measures are necessary for continued visibility progress. On December 14, 2016, the EPA signed a final rule that could influence state regional haze plans to include measures to further reduce NO_x in light of its role as a visibility impairing pollutant.³⁸ Further, to address interstate transport with respect to the 2015 ozone NAAQS, states are required to submit additional SIPs addressing the good neighbor provision by October 2018. Measures designed to address the interstate transport of ozone with respect to the 2015 standard will necessarily assist with addressing interstate transport with respect to the less-stringent 2008 standard. Lastly, in response to actions such as the 2012 PM_{2.5} SIP Requirements Rule and nonattainment designations under the 2010 primary SO₂ NAAQS, many states will be submitting SIPs that reduce pollution, some of which reduce ozone precursor emissions as a co-benefit.

As a result of the rules and programs listed previously, various other state programs and efforts, and wider economic trends, ozone levels across the nation and the OTR have been declining. Ozone levels across the nation are expected to further decline

over the next several years due to emissions controls already in place. The EPA's emissions projections in support of the 2015 ozone NAAQS modeling show declining emissions of NO_x and VOCs between 2017 and 2025. In the states comprising the OTR plus the nine upwind states named in the CAA section 176A petition, total NO_x emissions over the upcoming 7-year period (2017–2025) are expected to decline by almost 20 percent on average and VOC emissions are expected to decline by more than 10 percent on average over the same period.

D. Rationale for the Proposed Decision on the CAA 176A Petition

The EPA is proposing to deny the CAA section 176A petition because we believe that the statute provides other, more effective means of addressing the impact of interstate ozone transport on the states within the OTR with respect to the 2008 ozone NAAQS. As described in Section IV of this document, the statute provides several provisions that allow states and the EPA to address interstate ozone transport with a remedy better tailored to the nature of the air quality problem, focusing on those precursor emissions and sources that most directly impact downwind ozone nonattainment and maintenance problems and which can be controlled most cost-effectively. The EPA and states are actively using these provisions, as demonstrated by the numerous federal and state measures that have reduced, and will continue to reduce, the VOC and NO_x emissions that contribute to ozone formation and the interstate transport of ozone pollution. The EPA does not believe that it is necessary to add more states to the OTR at this time in order to effectively address transported pollution in the OTR relative to the 2008 ozone NAAQS.

While the Act contains several provisions, both mandatory and discretionary, to address interstate pollution transport, the EPA's decision whether to grant or deny a CAA section 176A petition to expand an existing transport region is discretionary. Section 176A of the CAA states that the Administrator *may* add any state or portion of a state to an existing transport region whenever the Administrator has reason to believe that the interstate transport of air pollutants from such state significantly contributes to a violation of the standard in the transport region. The EPA does not dispute that certain named upwind states in the petition might significantly contribute to violations of the 2008 ozone NAAQS in one or more downwind states. However, the EPA believes that it can

fully and more effectively address the upwind states' impacts on downwind ozone air quality through the good neighbor provision and the various statutory provisions that provide for its implementation. The EPA has already taken steps to address interstate transport with respect to the 2008 ozone NAAQS through the promulgation of the CSAPR Update, which reduces emissions in the 2017 ozone season and beyond. The EPA used the authority of CAA sections 110(a)(2)(D)(i)(I) and 110(c) to tailor a remedy focused on the precursor pollutant most likely to improve ozone levels (currently NO_x) and those sources that can most cost-effectively reduce emissions (*i.e.*, EGUs). The EPA further implemented the remedy through an allowance trading program that achieves necessary emission reductions while providing sources with the flexibility to implement the control strategies of their choice.

We believe that the continued use of the authority provided by the good neighbor provision to address the interstate transport of ozone pollution plus other regulations that are already in place will permit the states and EPA to achieve necessary additional reductions to address the 2008 ozone NAAQS without the need to implement the additional requirements that inclusion in the OTR would entail. As described in Section IV.A and B of this document, this approach to address the interstate transport of ozone is a proven, efficient, and cost-effective means of addressing downwind air quality concerns that the agency has employed and refined over nearly two decades. However, the EPA notes that the addition of states to the OTR pursuant to the section 176A authority—and the additional planning requirements that would entail—could be given consideration as an appropriate means to address the interstate transport requirements of the CAA should the agency depart from its current approach to addressing these requirements.

As described in this document, the CAA provides the agency with the authority to mitigate the specific sources that contribute to interstate pollution through the approval of SIPs or promulgation of FIPs to satisfy the requirements of the good neighbor provision, CAA section 110(a)(2)(D)(i)(I), and through the related petition process under section 126. This authority gives the EPA and states numerous potential policy approaches to address interstate pollution transport of ozone, and the EPA has consistently and repeatedly used its authority under CAA section 110(a)(2)(D)(i)(I) to approve state plans

³⁷ The EPA extended the due date to 2021, but is not changing dates for the implementation of further pollution reductions needed to address regional haze, which are required over the 2018–2028 time frame. See <https://www.epa.gov/visibility/final-rulemaking-amendments-regulatory-requirements-state-regional-haze-plans>.

³⁸ See https://www.epa.gov/sites/production/files/2016-12/documents/regional_haze_2060-as55_final_preamble_rule_final_12-14-16_disclaimer_0.pdf.

for reducing ozone transport or to promulgate its own federal implementation plan to specifically target the sources of ozone transport both within and outside the OTR. The NO_x SIP call, CAIR, CSAPR, CSAPR Update and numerous individual SIP approvals demonstrate that the EPA has a long history of using its section 110 authority to specifically address interstate pollution transport in a targeted way that is tailored to a specific NAAQS and set of pollution sources which are the primary contributors to interstate pollution transport. As described in Section IV.B of this document, using the authority of the good neighbor provision has allowed the EPA to focus its efforts on pollution sources that are responsible for the largest contributions to ozone transport and that can cost-effectively reduce emissions, and also enables the agency to focus on NO_x as the primary driver of long range ozone transport—an approach the courts have found to be a reasonable means of addressing interstate ozone transport. *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. at 1607 (affirming as “efficient and equitable” the EPA’s use of cost to apportion emission reduction responsibility pursuant to the good neighbor provision); *Michigan v. EPA*, 213 F.3d at 688 (“EPA reasonably concluded that long-range ozone transport can only be addressed adequately through NO_x reductions”).

As explained previously, it does not appear that adding states to an OTR under CAA section 176A will afford the states and EPA with the flexibility to focus on specific sources and ozone precursor emissions tailored to address the downwind state’s current air quality and needed remedy to achieve attainment of the 2008 NAAQS. The statute prescribes a specific set of controls for a variety of sources to control emissions of both VOCs and NO_x. CAA section 110(a)(2)(D)(i)(I) on the other hand permits the EPA and the regulated community the flexibility to focus controls on specific sources and pollutants that most efficiently address the air quality problem being targeted. The EPA determined in the CSAPR Update that regional NO_x emissions reductions from upwind states are the most effective means for providing ozone benefits to an area in the OTR currently violating the 2008 ozone NAAQS, and that NO_x reductions can be most efficiently achieved by focusing on those sources that can cost-effectively reduce emissions. Accordingly, the EPA does not believe that the requirements imposed upon

states added to the OTR would be the most effective means of addressing any remaining interstate transport concerns with respect to the 2008 ozone NAAQS.

The implementation of controls within the OTR, when combined with the numerous federal and state emission reduction programs that have already been adopted that have resulted in the reduction of ozone precursor emissions either directly or as a co-benefit of those regulations, have helped to significantly reduce ozone levels. These programs will continue to reduce ozone precursor emissions and ozone concentrations both within and outside of the OTR over many years to come. However, the EPA believes the most efficient way to address the current 2008 ozone NAAQS nonattainment and interstate transport problems is to continue to rely on the ability to flexibly target the necessary reductions through this combination of targeted programs such as the implementation of the CSAPR Update Rule, the further utilization of the CSAPR framework, development of local attainment plans, and consideration of additional emissions limitations resulting from action on CAA section 126 petitions.

As discussed in Section III.C. of this document, CAA section 176A provides that the Administrator may exercise reasonable discretion in administering the agency’s regulatory agenda by determining whether or not to approve or deny a section 176A petition, so long as the EPA’s action is supported by a reasonable interpretation within the context of the statute. The EPA has reviewed the request of the petitioners to add additional states to the OTR in light of required control strategies for ozone transport regions and the other statutory tools available to the agency and states to address the interstate transport of ozone pollution. The agency believes that continuing its longstanding and effective use of the existing and expected control programs under the CAA’s mandatory good neighbor provision embodied in section 110(a)(2)(D)(i)(I), including implementation of the CSAPR Update beginning in 2017 and technical work now underway to establish a full remedy for the 2008 NAAQS as well as to implement the good neighbor provision for the more stringent 2015 NAAQS, is a more effective approach for addressing regional interstate ozone transport problems relative to the 2008 ozone standard.

The EPA is proposing to deny the petitioning states’ request to add additional states to the OTR for the purpose of addressing interstate transport of the 2008 ozone NAAQS at

this time. The agency will instead continue to use other authorities available within the CAA in order to address the long range interstate transport of ozone pollution. This document is specific to the 2008 ozone NAAQS, but the EPA notes that under different circumstances the OTR provisions have been an effective tool for air quality management, and could be similarly effective in the future for addressing interstate transport of ozone pollution. Accordingly, nothing in this document should be read to limit states’ ability to file a different petition under 176A or to prejudice the outcome of such a petition if filed. The EPA requests comment on the proposed denial of the petition based on the EPA’s preferred approach to addressing interstate transport with respect to the 2008 ozone NAAQS pursuant to these other CAA authorities.³⁹

V. Judicial Review and Determinations Under Section 307(b)(1) of the CAA

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit if (i) the agency action consists of “nationally applicable regulations promulgated, or final action taken, by the Administrator,” or (ii) such action is locally or regionally applicable, if “such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination.” The EPA finds that any final action related to this document is “nationally applicable” and of “nationwide scope and effect” within the meaning of CAA section 307(b)(1). Through this document, the EPA interprets section 176A of the CAA, a provision which has nationwide applicability. In addition, this document is a response to a petition which would, if granted, extend

³⁹ The EPA’s proposal as to the pending section 176A petition is focused on the appropriate mechanism to address interstate transport issues relative to the 2008 ozone NAAQS rather than the scope of remaining air quality problems or the level of controls necessary to address any such problems. Comment on any determinations made in prior rulemaking actions to identify downwind air quality problems relative to the ozone NAAQS or to quantify upwind state emission reduction obligations relative to those air quality problems, including the EPA’s decision to focus on certain precursor emissions or sources, are not within the scope of this proposal. To the extent the EPA evaluates these issues in a future rulemaking to address remaining air quality problems relative to the 2008 ozone NAAQS, comments will be welcomed in the context of that rulemaking.

regulatory requirements to nine states in multiple different circuits, and if denied could impact the 13 states within the ozone transport region established in CAA section 184. This proposed action also discusses at length prior EPA action and analyses concerning the transport of pollutants between the different states under CAA section 110. For these reasons, the Administrator determines that, when finalized, this action is of nationwide scope and effect for purposes of section 307(b)(1). Thus, pursuant to CAA section 307(b) any petitions for review of any final action regarding this document would be filed in the Court of Appeals for the District of Columbia Circuit within 60 days from the date any final action is published in the **Federal Register**.

VI. Statutory Authority

42 U.S.C. 7401 *et seq.*

Dated: January 11, 2017.

Gina McCarthy,
Administrator.

[FR Doc. 2017-01097 Filed 1-18-17; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2017-0026; FRL-9958-34]

Statutory Requirements for Substantiation of Confidential Business Information (CBI) Claims Under the Toxic Substances Control Act (TSCA)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In June 2016, the Frank R. Lautenberg Chemical Safety for the 21st Century Act amended the Toxic Substances Control Act (TSCA). EPA is announcing an interpretation of TSCA section 14 concerning confidential business information (CBI) claims for information submitted to EPA. EPA interprets the revised TSCA section 14(c)(3) as requiring substantiation of non-exempt CBI claims at the time the information claimed as CBI is submitted to EPA.

FOR FURTHER INFORMATION CONTACT:

For general information contact: Colby Lintner, Regulatory Coordinator, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

For technical information contact: Scott M. Sherlock, Attorney Advisor, Environmental Assistance Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 564-8257; email address: sherlock.scott@epa.gov.

DATES: This action is effective on March 20, 2017.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This announcement is directed to the public in general. It may, however, be of particular interest to you if you manufacture (defined by statute to include import) and/or process chemicals covered by TSCA (15 U.S.C. 2601 *et seq.*). This may include businesses identified by the North American Industrial Classification System (NAICS) codes 325 and 32411. Because this action is directed to the general public and other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be interested in this action. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How can I get copies of this document and other related information?

1. *Docket.* EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPPT-2017-0026. All documents in the docket are listed in the docket index available at <http://www.regulations.gov>. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at <http://www.regulations.gov>, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave. NW., Washington, DC. The EPA/DC Public Reading Room hours of operation are 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number of the EPA/DC Public Reading Room is (202) 566-1744, and the telephone number for the OPPT Docket is (202) 566-0280. Docket visitors are required to show photographic identification,

pass through a metal detector, and sign the EPA visitor log. All visitor bags are processed through an X-ray machine and subject to search. Visitors will be provided an EPA/DC badge that must be visible at all times in the building and returned upon departure.

2. *Other related information.* For information about EPA's programs to evaluate new and existing chemicals and their potential risks and the amended TSCA, go to <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-lautenberg-chemical-safety-21st-century-act>.

II. What action is the Agency taking?

The amended TSCA provides new requirements relating to the assertion, substantiation and review of CBI claims. EPA is interpreting the revised TSCA section 14(c)(3) as requiring substantiation of all CBI claims at the time the information claimed as CBI is submitted to EPA, except for claims for information subject to TSCA section 14(c)(2).

This action facilitates the Agency's implementation of TSCA section 14(g) to review all CBI claims for chemical identity, with limited exceptions, as well as to review a representative sample of at least 25% of other non-exempt claims.

III. What is the Agency's authority for taking this action?

EPA has determined that TSCA section 14(c)(3), 15 U.S.C. 2613(c)(3), requires an affected business to substantiate all TSCA CBI claims, except for information subject to TSCA section 14(c)(2), at the time the affected business submits the claimed information to EPA.

TSCA section 14(c)(1)(a) requires an affected business to assert a claim for protection from disclosure concurrent with submission of the information in accordance with existing or future rules. TSCA section 14(c)(3) in turn requires an affected business submitting a claim to protect information from disclosure to substantiate the claim, also in accordance with existing or future rules. The language of TSCA section 14(c)(3) is as follows:

“(3) Substantiation requirements. Except as provided in paragraph (2), a person asserting a claim to protect information from disclosure under this section shall substantiate the claim, in accordance with such rules as the Administrator has promulgated or may promulgate pursuant to this section.”

EPA interprets TSCA section 14(c)(3) to require substantiation for all TSCA CBI claims, except for information

within TSCA section 14(c)(2). That is the clear import of the language, “a person asserting a claim to protect information from disclosure under this section shall substantiate the claim . . .” While the final clause requires that submissions be in accordance with EPA rules, EPA interprets this provision as addressing the form and manner of a submission, not as making the substantiation requirement conditional upon a future EPA rulemaking. In the future, EPA may promulgate regulations governing the form and manner of substantiating CBI claims for those submissions addressed by this action. Nonetheless, EPA considers the statutory substantiation requirement to be in place as of the effective date of this action.

EPA’s interpretation is supported by legislative history for the recent amendments to TSCA. Both the Senate and House intended to require substantiation of CBI claims. See S. Rpt. 114–67 (observing, on page 5, that “section 14 [of pre-amendment TSCA] and EPA’s implementation of it has been criticized for failing to require . . . up-front substantiation of confidentiality claims,” and, on page 22, stating that, under the Senate bill, “all new claims for protection of information not presumed to be protected from disclosure must be substantiated by the claimant”); H. Rpt. 114–176 at 29 (a confidentiality claim must “include . . . a justification for each claim of confidentiality”); Senate Environment and Public Works Committee summary: “Reforming the Toxic Substances Control Act” at 3 (http://www.epw.senate.gov/public/_cache/files/aa2ac4d1-15bb-4e71-9588-909d49bdcff2/tscareform-marketing-packet-5.19-final.pdf). (“The legislation promotes additional transparency by requiring up-front substantiation of claims to protect confidential commercial information. . . .”) EPA’s interpretation also is supported by TSCA section 14(i)(2), which provides that, “nothing in this chapter” prevents EPA from requiring substantiation before the effective date of rules that may be promulgated after June 22, 2016, the date on which the amendments to TSCA were enacted.

It might be maintained that TSCA section 14(c)(3) does not impose a substantiation requirement, but merely authorizes EPA to promulgate rules requiring substantiation. Alternatively, it might be maintained that the section does impose a substantiation requirement, but that the requirement must be effectuated through EPA rulemaking.

The first reading does not effectuate the legislative intent to require substantiation. In addition, the provision is not worded as a mere grant of authority. Numerous other provisions of TSCA—both of the pre-amended statute and of the Lautenberg amendments—demonstrate that Congress used more straightforward language when it intended simply to grant EPA rulemaking or other authority (e.g., TSCA section 14(f)(1) (“The Administrator may require any person . . . to reassert and substantiate or re-substantiate” an existing claim under certain circumstances); TSCA section 4(a)(2) (“The Administrator may, by rule, order, or consent agreement . . . require the development of new information”). Finally, TSCA section 14(c)(1) already authorizes EPA to promulgate rules governing the assertion of CBI claims. This paragraph provides authority for EPA to promulgate rules requiring substantiation, and EPA in fact promulgated a number of rules requiring substantiation under similarly worded authority in pre-amendment TSCA section 14(c)(1). See, e.g., 40 CFR 711.30(b)(1), requiring up-front substantiation for chemical identity claims for Chemical Data Reporting under part 711. To interpret TSCA section 14(c)(3) as merely providing authority to require substantiation, where that authority already exists in TSCA section 14(c)(1), would arguably give TSCA section 14(c)(3) no effect at all.

The second reading amounts to a revision of the legislative text. TSCA section 14(c)(3) does not require EPA to undertake rulemaking; it merely acknowledges that EPA “may” do so. Unless this “may” were read as “shall”, EPA would be under no obligation to promulgate the rules required to carry out the objective of requiring substantiation. Here again, numerous other provisions of TSCA demonstrate that Congress used clear language—and included deadlines—when it intended to require EPA to promulgate regulations (e.g., TSCA section 6(b)(1)(A) (“Not later than 1 year after June 22, 2016, the Administrator shall establish, by rule, a risk-based screening process. . . .”).

Having determined that TSCA section 14(c)(3) requires substantiation of all non-exempt TSCA CBI claims, EPA believes the provision is best interpreted as requiring substantiation *concurrent with the submission*. This is the natural reading of the requirement that “a person asserting a claim . . . shall substantiate the claim.” By analogy, TSCA section 14(c)(5)—another

requirement newly added by the Lautenberg amendments—provides that a claimant “shall certify that the statement required to assert a [confidentiality] claim . . . and any information required to substantiate a claim . . . are true and correct.” While this provision does not explicitly state that the certification must accompany the submission, it is reasonable to conclude that Congress intended that result. Moreover, a requirement to substantiate CBI claims at some unspecified time would not create any meaningful self-executing requirement, because there would be no point in time at which an affected business could be found not to have complied.

Reading the law as requiring substantiation concurrent with the CBI claim also comports with the legislative history. In addition to the history cited earlier in this document, the Senate Report, on p. 5, noted stakeholder concerns that, under pre-amendment TSCA, the lack of a requirement for up-front substantiation resulted in “an over-abundance of CBI claims, some of which may not be legitimate.” Interpreting TSCA section 14(c)(3) as requiring substantiation of a CBI claim concurrent with the claim’s submission best effectuates the expressed intent of Congress.

This interpretation is consistent with the requirement in TSCA section 14(g)(1) that EPA review most confidentiality claims for chemical identity and at least 25% of claims for other types of non-exempt information within 90 days after the receipt of the claim. An approach under which substantiations were submitted at some point after assertion of CBI claims would significantly reduce (and has already significantly reduced) the short period for such CBI reviews. To date, for each review, the Agency must contact each affected business, request the submission of a substantiation, and allow a period of time for the affected business to submit the substantiation. Since timely substantiation provides critical information for completing CBI reviews, it is reasonable to conclude that Congress intended for claims to be substantiated at the time the CBI claim is asserted.

When the amendments to TSCA became law on June 22, 2016, EPA published initial Questions and Answers (Q and A’s) in an effort to respond to the inquiries and requests concerning EPA’s views on the new law. EPA needed to issue guidance to the public as quickly as possible on a broad range of matters under the amendments, since the amendments became effective

upon signature. In the Q and A's on TSCA section 14, EPA stated that the Agency was using existing authorities to obtain CBI substantiations and that the Agency may revise CBI substantiation requirements for specific types of information submissions by subsequent rulemaking. Since the time the Q and A's were developed, EPA has heard the views of a number of stakeholders and has had the opportunity to more fully review the statute and legislative history and to evaluate the operational considerations associated with the interpretation of TSCA section 14(c)(3).

Operationally, given the large volume of CBI claims, including those that the Agency has already received and those that the Agency expects to receive in the future, it is administratively efficient to interpret the statute as requiring up-front substantiation, which necessarily saves the Agency the time and resources that would otherwise be spent in attempting to contact the affected business. Up-front substantiation will also significantly enhance EPA's ability to meet the review deadlines in TSCA section 14(g). Further, requiring substantiation concurrent with submission will mitigate any need for an affected business to request an extension to substantiate a CBI claim. Additionally, requiring the affected business to provide justification at the time of submission may help limit unwarranted claims of CBI. Based on this further review, for the reasons stated above, EPA has concluded that the provision is best read as creating a requirement to substantiate non-exempt TSCA CBI claims concurrent with their submission.

IV. Implementation

Existing EPA confidentiality rules at 40 CFR part 2, section 2.204(e), provide substantiation questions that the Agency may specifically request answers to, pursuant to the procedures in those regulations. While those specific questions are not dictated by the self-executing substantiation requirement in TSCA section 14(c)(3), EPA suggests that companies look to those questions for guidance as to how to fulfill the TSCA section 14(c)(3) substantiation requirement for information that is not currently subject to an existing regulatory up-front substantiation requirement. The answers to those questions typically form the basis of EPA final confidentiality determinations, and substantiations that do not address those questions might not provide sufficient information to uphold a determination, pursuant to TSCA section 14(g)(1), that information claimed as CBI is eligible for

confidential protection. For information that is currently subject to a regulatory up-front substantiation requirement (for example, chemical identity CBI claims in the Chemical Data Reporting rule, under 40 CFR 711.30), the terms of that requirement, including the substantiation questions required, will continue to govern the substantiation.

EPA has revised its Web pages on CBI to assist compliance with this interpretation of TSCA section 14. The Web pages list the substantiation questions from 40 CFR 2.204(e) and provide information on substantiation exemptions and on how the substantiations should be directed to the Agency.

Because EPA is providing this interpretation of TSCA section 14(c)(3) for the first time in this document, the Agency is setting different procedures for those who have submitted or will submit information claimed as CBI under TSCA before the effective date of this action, *i.e.*, March 20, 2017, and those who submit information claimed as CBI afterwards.

A. TSCA Submissions Filed on or After March 20, 2017

Those submissions containing information claimed as CBI filed on or after the effective-date of this action (*i.e.*, March 20, 2017) must provide a substantiation for all information claimed as confidential, other than information exempt from substantiation pursuant to TSCA section 14(c)(2). Any non-exempt CBI claim that is submitted without a substantiation will be considered deficient, and EPA will send a notice of deficiency to the affected business. The notice will inform the affected business that it must submit its substantiation within 30 calendar days in order to remedy its deficient CBI claim. The notice letter will also inform the affected business that if a timely substantiation has not been received by EPA within 30 days of receipt of the letter, then any CBI claims not substantiated will be considered withdrawn, and the information may be made public with no further notice to the affected business.

B. TSCA Submissions Filed Between June 22, 2016 and March 20, 2017

Those submissions containing information claimed as CBI filed between June 22, 2016 and March 20, 2017, must provide a substantiation for all information claimed as confidential, other than information exempt from substantiation pursuant to TSCA section 14(c)(2). The Agency is giving submitters until September 18, 2017 to provide substantiations and direct them

to the Agency. If a substantiation has already been provided to EPA with the submission or in response to a substantiation request, no additional substantiation need be filed for the same information. Be aware, however, that if some non-exempt information claimed as confidential in a particular submission has already been substantiated and some has not, the unsubstantiated information claimed as CBI in the submission must still be substantiated by September 18, 2017. The CBI claims, and the substantiations, may then be reviewed consistent with the provisions of TSCA, its implementing regulations and in accordance with the Agency procedures set forth in 40 CFR part 2. Once September 18, 2017 has passed, if no substantiation has been received for a claim, then EPA will provide the affected business 30 days' notice and a final opportunity to substantiate. The notice will inform the affected business that any CBI claims not substantiated at the end of the 30 days will be considered withdrawn, and the information may be made public with no further notice to the affected business.

EPA's electronic reporting systems for TSCA submissions have been modified to require substantiations for non-exempt CBI claims in submissions filed on or after March 20, 2017. Any new paper TSCA submissions that are directed to the Agency after that date must include substantiations for all non-exempt CBI claims at the time of submission.

For electronic submissions made using EPA's Central Data Exchange (CDX) during the period from June 22, 2016 to March 20, 2017 that were not substantiated, affected businesses must provide substantiation for CBI claims using the amendment processes for the particular submission type. Information on electronic reporting, including how to make amendments, can be found at <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/electronic-reporting-requirements-certain-information>.

For any paper TSCA submissions that were submitted to the Agency during the period from June 22, 2016 to March 20, 2017, the affected business must submit substantiations for any non-exempt CBI claims that have not yet been substantiated. Submit these substantiations to: TSCA Confidential Business Information Center (7407M), WJC East; Room 6428; Attn: TSCA CBI Substantiations. U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460-0001.

Courier Deliveries should be directed to:

U.S. EPA, Office of Pollution Prevention and Toxics, Confidential Business Information Center (CBIC), Attn: TSCA CBI Substantiations, 1201 Constitution Avenue NW., WJC East; Room 6428 Washington, DC 20004–3302, (202) 564–8930.

More information on how to substantiate CBI claims for paper submissions can be found at <https://www.epa.gov/tsca-cbi/>.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: January 13, 2017.

James J. Jones,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2013–0024; FRL–9958–64–OAR]

California State Nonroad Engine Pollution Control Standards; In-Use Diesel-Fueled Transport Refrigeration Units (TRUs) and TRU Generator Sets and Facilities Where TRUs Operate; Notice of Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of decision.

SUMMARY: The Environmental Protection Agency (“EPA”) is granting the California Air Resources Board (“CARB”) request for authorization of amendments to its Airborne Toxic Control Measure for In-Use Diesel-Fueled Transport Refrigeration Units (“TRU”) and TRU Generator Sets and Facilities Where TRUs Operate (together “2011 TRU Amendments”). EPA’s decision also confirms that certain of the 2011 TRU amendments are within the scope of prior EPA authorizations. The 2011 TRU Amendments primarily provide owners of TRU engines with certain flexibilities; clarify recordkeeping requirements for certain types of TRU engines; establish requirements for businesses that arrange, hire, contract, or dispatch the transport of goods in TRU-equipped trucks, trailers, or containers; and address other issues that arose during the initial implementation of the regulation. This decision is issued under the authority of the Clean Air Act (“CAA” or “Act”).

DATES: Petitions for review must be filed by March 20, 2017.

ADDRESSES: EPA has established a docket for this Notice of Decision under Docket ID EPA–HQ–OAR–2015–0224. All documents relied upon in making this decision, including those submitted to EPA by CARB, are contained in the public docket. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air and Radiation Docket in the EPA Headquarters Library, EPA West Building, Room 3334, located at 1301 Constitution Avenue NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m.; Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744. The Air and Radiation Docket and Information Center’s Web site is <http://www.epa.gov/oar/doCKET.html>. The email address for the Air and Radiation Docket is: a-and-r-Docket@epa.gov, the telephone number is (202) 566–1742, and the fax number is (202) 566–9744. An electronic version of the public docket is available through the federal government’s electronic public docket and comment system. You may access EPA dockets at <http://www.regulations.gov>. After opening the www.regulations.gov Web site, enter EPA–HQ–OAR–2015–0224 in the “Enter Keyword or ID” fill-in box to view documents in the record. Although a part of the official docket, the public docket does not include Confidential Business Information (“CBI”) or other information whose disclosure is restricted by statute.

EPA’s Office of Transportation and Air Quality (“OTAQ”) maintains a Web page that contains general information on its review of California waiver and authorization requests. Included on that page are links to prior waiver **Federal Register** notices, some of which are cited in today’s notice; the page can be accessed at <http://www.epa.gov/otaq/cafr.htm>.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

EPA granted an authorization for California’s initial set of TRU

regulations on January 9, 2009.¹ EPA also granted a within-the-scope authorization for amendments to the TRU regulations, adopted in 2010, on June 28, 2013.² The TRU regulations establish in-use performance standards for diesel-fueled TRUs and TRU generator sets which operate in California, and facilities where TRUs operate. The TRU regulations are contained in an Airborne Toxic Control Measure (“ATCM”) adopted by CARB to reduce the general public’s exposure to diesel particulate matter (“PM”), other toxic airborne contaminants and air pollutants generated by TRUs and reduce near source risk at facilities where TRUs congregate. TRUs are refrigeration systems powered by internal combustion engines which control the environment of temperature-sensitive products that are transported in semi-trailer vans, truck vans, “reefer” railcars or shipping containers. The engines in TRUs do not propel the vehicle, but are used strictly to power the refrigeration system. These TRU engines are nonroad engines and vary in horsepower (“hp”) generally from 7 hp to 36 hp.

By letter dated March 2, 2015, CARB submitted a request to EPA for authorization of amendments to its TRU regulations³ pursuant to section 209(e) of the CAA.⁴ The 2011 TRU Amendments were adopted by CARB on October 21, 2011, and became operative state law on October 15, 2012.⁵ The 2011 TRU Amendments provide owners of 2001 through 2003 model year (MY) TRU engines that complied with applicable Low-Emission TRU (“LETRU”) in-use performance standards by specified compliance deadlines a one- or two-year extension from the more stringent Ultra-Low Emission (“ULETRU”) in-use performance standards. The amendments also clarify manual recordkeeping requirements for electric standby-equipped TRUs and ultimately require automated electronic tracking system requirements for such TRUs and establish requirements for businesses that arrange, hire, contract, or dispatch the transport of goods in TRU-equipped trucks, trailers or containers. ⁵ *Id.*, Attachment 13.

detailed description of the 2011 Amendments is presented below in the context of which amendments CARB seeks within-the-scope conformation and those amendments for which CARB seeks a full authorization.

A. California's Authorization Request

California requested EPA perform two types of review. First, CARB requested an EPA determination that certain provisions of the 2011 amendments are within the scope of the prior authorizations, or in the alternative, merit full authorization ("Within-the-Scope Amendments"). The Within-the-Scope Amendments provide owners of 2003 and older MY TRUs an extension of the ULETRU compliance date if the TRUs complied with the LETRU standard by specified dates. Such TRU engines that are 2001 MY and older are given an extension to December 31, 2016 for the ULETRU deadline, 2002 MY TRUs are given a new deadline of December 31, 2017, and 2003 MY TRUs are given a new deadline of December 31, 2018. The Within-the-Scope Amendments also provide up to a one-year extension of the compliance dates if owners demonstrate that compliant technology is unavailable or is delayed due to financing, delivery, or installation and provides other flexibilities based upon certain requirements. In addition, the Within-the-Scope Amendments provide a host of new or clarified exemptions including: (1) Clarification that non-operational TRUs are generally exempt from compliance with the performance standards, but are still prohibited from being sold, rented or leased to a person that could reasonably be expected to operate such TRUs in California; (2) a limited exemption for TRU-equipped trucks and trailers used by mobile catering companies to feed emergency responders, such as firefighters (such engines are subject to registration and other requirements); (3) an exemption for non-compliant, non-operational TRUs on refrigerated railcars that travel through California based on CARB's Executive Officer approval under certain contingencies; and (4) an exemption for railway carriers from the owner/operator requirements for TRUs not owned by the railway carrier. Lastly, the Within-the-Scope Amendments clarify that the in-use performance standards and associated compliance deadlines are to be based on the year the TRU unit itself was manufactured (including the potential for a prior model year TRU engine to be installed in limited circumstances), instead of

basing the compliance deadline on the model year of the TRU engine.⁶

Second, CARB requested full authorization for amendments that revise standards or establish new requirements ("Full Authorization Amendments"). These provisions include amendments that require new replacement engines to meet more stringent requirements (based on the new replacement engine's model year or effective model year) than the original TRU engines. The Full Authorization Amendments also provide that to the extent TRUs now may be repowered with rebuilt engines such rebuilt engines must meet more stringent emission standards than the standards of the original engine, and provided the engines are rebuilt by engine rebuilders in compliance with federal and state engine rebuilding requirements for off-road compression ignition engines.⁷ CARB's TRU regulations allow TRU owners to utilize hybrid electric, hybrid cryogenic, and electric-standby ("E/S") equipped TRUs as an "Alternative technology" compliance option, which requires such TRUs to be operated in a manner that eliminates diesel engine operations at the facilities where the TRUs operate. The Full Authorization Amendments establish new recordkeeping requirements that will require the application of hardware to monitor the engine hour usage of the TRUs along with other automated monitoring, recordkeeping and reporting requirements. In addition, the TRU regulations now cover business entities that arrange, hire, contract for, or dispatch the transport of perishable goods in TRU-equipped trucks, trailers, shipping containers, or railcars. Lastly, the Full Authorization Amendments create new disclosure requirements for TRU original equipment manufacturers that are primarily designed to address engine emission labels on new replacement engines and new flexibility engines, as well as disclosure requirements for dealers and repair shops in order that the ARBER registration information is supplied to the end-user.

⁶ See CARB's Authorization Support Document. CARB's Within-the-Scope Amendments also include those provisions referenced at page 11 (allowance of California TRU dealers to acquire non-compliant TRUs under certain conditions), pages 13–14 (clarification on the prohibition of selling non-compliant TRUs), page 15 (allowance of the use of unique identification numbers instead of a CARB identification number), and page 16 (clarification of the registration requirements and consistency with current CARB Equipment Registration ("ARBER") system screens).

⁷ 40 CFR 89.130 and 1068.120 and Cal. Code Regs. Tit. 13., section 2423(l), respectively.

B. Clean Air Act Nonroad Engine and Vehicle Authorizations

Section 209(e)(1) of the Act permanently preempts any state, or political subdivision thereof, from adopting or attempting to enforce any standard or other requirement relating to the control of emissions for certain new nonroad engines or vehicles.⁸ For all other nonroad engines, states generally are preempted from adopting and enforcing standards and other requirements relating to the control of emissions. Section 209(e)(2), however, requires the Administrator, after notice and opportunity for public hearing, to authorize California to adopt and enforce standards and other requirements relating to the control of emissions from such vehicles or engines if California determines that California standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. However, EPA shall not grant such authorization if it finds that (1) the determination of California is arbitrary and capricious; (2) California does not need such California standards to meet compelling and extraordinary conditions; or (3) California standards and accompanying enforcement procedures are not consistent with [CAA section 209].⁹

On July 20, 1994, EPA promulgated a rule interpreting the three criteria set forth in section 209(e)(2)(A) that EPA must consider before granting any California authorization request for nonroad engine or vehicle emission standards.¹⁰ EPA revised these

⁸ States are expressly preempted from adopting or attempting to enforce any standard or other requirement relating to the control of emissions from new nonroad engines which are used in construction equipment or vehicles or used in farm equipment or vehicles and which are smaller than 175 horsepower. Such express preemption under section 209(e)(1) of the Act also applies to new locomotives or new engines used in locomotives. CAA § 209(e)(1), 42 U.S.C. 7543(e)(1)(A).

⁹ EPA's review of California regulations under section 209 is not a broad review of the reasonableness of the regulations or its compatibility with all other laws. Sections 209(b) and 209(e) of the Clean Air Act limit EPA's authority to deny California requests for waivers and authorizations to the three criteria listed therein. As a result, EPA has consistently refrained from denying California's requests for waivers and authorizations based on any other criteria. In instances where the U.S. Court of Appeals has reviewed EPA decisions declining to deny waiver requests based on criteria not found in section 209(b), the Court has upheld and agreed with EPA's determination. See *Motor and Equipment Manufacturers Ass'n v. Nichols*, 142 F.3d 449, 462–63, 466–67 (D.C. Cir. 1998), *Motor and Equipment Manufacturers Ass'n v. EPA*, 627 F.2d 1095, 1111, 1114–20 (D.C. Cir. 1979). See also 78 FR 58090, 58120 (September 20, 2013).

¹⁰ See "Air Pollution Control; Preemption of State Regulation for Nonroad Engine and Vehicle Standards," 59 FR 36969 (July 20, 1994).

regulations in 1997.¹¹ As stated in the preamble to the 1994 rule, EPA historically has interpreted the consistency inquiry under the third criterion, outlined above and set forth in section 209(e)(2)(A)(iii), to require, at minimum, that California standards and enforcement procedures be consistent with section 209(a), section 209(e)(1), and section 209(b)(1)(C) of the Act.¹²

In order to be consistent with section 209(a), California's nonroad standards and enforcement procedures must not apply to new motor vehicles or new motor vehicle engines. To be consistent with section 209(e)(1), California's nonroad standards and enforcement procedures must not attempt to regulate engine categories that are permanently preempted from state regulation. To determine consistency with section 209(b)(1)(C), EPA typically reviews nonroad authorization requests under the same "consistency" criteria that are applied to motor vehicle waiver requests under section 209(b)(1)(C). That provision provides that the Administrator shall not grant California a motor vehicle waiver she finds that California "standards and accompanying enforcement procedures are not consistent with section 202(a)" of the Act. Previous decisions granting waivers and authorizations have noted that state standards and enforcement procedures will be found to be inconsistent with section 202(a) if (1) there is inadequate lead time to permit the development of the necessary technology, giving appropriate consideration to the cost of compliance within that time,¹³ or (2) the federal and state testing procedures impose inconsistent certification requirements.¹⁴

In light of the similar language in sections 209(b) and 209(e)(2)(A), EPA has reviewed California's requests for authorization of nonroad vehicle or engine standards under section 209(e)(2)(A) using the same principles that it has historically applied in reviewing requests for waivers of preemption for new motor vehicle or new motor vehicle engine standards

under section 209(b).¹⁵ These principles include, among other things, that EPA should limit its inquiry to the three specific authorization criteria identified in section 209(e)(2)(A),¹⁶ and that EPA should give substantial deference to the policy judgments California has made in adopting its regulations. In previous waiver decisions, EPA has stated that Congress intended EPA's review of California's decision-making be narrow. EPA has rejected arguments that are not specified in the statute as grounds for denying a waiver:

The law makes it clear that the waiver requests cannot be denied unless the specific findings designated in the statute can properly be made. The issue of whether a proposed California requirement is likely to result in only marginal improvement in California air quality not commensurate with its costs or is otherwise an arguably unwise exercise of regulatory power is not legally pertinent to my decision under section 209, so long as the California requirement is consistent with section 202(a) and is more stringent than applicable Federal requirements in the sense that it may result in some further reduction in air pollution in California.¹⁷

This principle of narrow EPA review has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit.¹⁸ Thus, EPA's consideration of all the evidence submitted concerning an authorization decision is circumscribed by its relevance to those questions that may be considered under section 209(e)(2)(A).

C. Within-the-Scope Determinations

If California amends regulations that have been previously authorized by EPA, California may ask EPA to determine that the amendments are within the scope of the earlier authorization. A within-the-scope determination for such amendments is permissible without a full authorization

review if three conditions are met. First, the amended regulations must not undermine California's previous determination that its standards, in the aggregate, are as protective of public health and welfare as applicable federal standards. Second, the amended regulations must not affect consistency with section 209 of the Act, following the same criteria discussed above in the context of full authorizations. Third, the amended regulations must not raise any new issues affecting EPA's prior waiver or authorization decisions.¹⁹

D. Deference to California

In previous waiver decisions, EPA has recognized that the intent of Congress in creating a limited review based on the section 209(b)(1) criteria was to ensure that the federal government did not second-guess state policy choices. As the agency explained in one prior waiver decision:

It is worth noting * * * I would feel constrained to approve a California approach to the problem which I might also feel unable to adopt at the federal level in my own capacity as a regulator. The whole approach of the Clean Air Act is to force the development of new types of emission control technology where that is needed by compelling the industry to "catch up" to some degree with newly promulgated standards. Such an approach * * * may be attended with costs, in the shape of reduced product offering, or price or fuel economy penalties, and by risks that a wider number of vehicle classes may not be able to complete their development work in time. Since a balancing of these risks and costs against the potential benefits from reduced emissions is a central policy decision for any regulatory agency under the statutory scheme outlined above, I believe I am required to give very substantial deference to California's judgments on this score.²⁰

Similarly, EPA has stated that the text, structure, and history of the California waiver provision clearly indicate both a congressional intent and appropriate EPA practice of leaving the decision on "ambiguous and controversial matters of public policy" to California's judgment.²¹ This interpretation is supported by relevant discussion in the House Committee Report for the 1977 amendments to the Clean Air Act.²² Congress had the opportunity through the 1977 amendments to restrict the preexisting waiver provision, but elected instead to

¹¹ See "Control of Air Pollution: Emission Standards for New Nonroad Compression-Ignition Engines at or Above 37 Kilowatts; Preemption of State Regulation for Nonroad Engine and Vehicle Standards; Amendments to Rules," 62 FR 67733 (December 30, 1997). The applicable regulations are now found in 40 CFR part 1074, subpart B, section 1074.105.

¹² 59 FR 36969 (July 20, 1994). EPA has interpreted 209(b)(1)(C) in the context of section 209(b) motor vehicle waivers.

¹³ H. Rep. No. 728, 90th Cong., 1st Sess. 21 (1967).

¹⁴ S. Rep. No. 403, 90th Cong., 1st Sess. 32 (1967).

¹⁵ See *Engine Manufacturers Association v. EPA*, 88 F.3d 1075, 1087 (D.C. Cir. 1996): "... EPA was within the bounds of permissible construction in analogizing § 209(e) on nonroad sources to § 209(a) on motor vehicles."

¹⁶ See EPA's Final 209(e) rulemaking at 59 FR 36969, 36983 (July 20, 1994).

¹⁷ "Waiver of Application of Clean Air Act to California State Standards," 36 FR 17458 (Aug. 31, 1971). Note that the more stringent standard expressed here, in 1971, was superseded by the 1977 amendments to section 209, which established that California must determine that its standards are, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. In the 1990 amendments to section 209, Congress established section 209(e) and similar language in section 209(e)(1)(i) pertaining to California's nonroad emission standards which California must determine to be, in the aggregate, at least as protective of public health and welfare as applicable federal standards.

¹⁸ See, e.g., *Motor and Equip. Mfrs Assoc. v. EPA*, 627 F.2d 1095 (D.C. Cir. 1979) ("MEMA I").

¹⁹ See "California State Motor Vehicle Pollution Control Standards; Amendments Within the Scope of Previous Waiver of Federal Preemption," 46 FR 36742 (July 15, 1981).

²⁰ 40 FR 23102, 23103–23104 (May 28, 1975).

²¹ *Id.* at 23104; 58 FR 4166 (January 13, 1993).

²² MEMA I, 627 F.2d at 1110 (citing H.R. Rep. No. 294, 95th Cong., 1st Sess. 301–302 (1977)).

expand California's flexibility to adopt a complete program of motor vehicle emission controls. The report explains that the amendment is intended to ratify and strengthen the preexisting California waiver provision and to affirm the underlying intent of that provision, that is, to afford California the broadest possible discretion in selecting the best means to protect the health of its citizens and the public welfare.²³

E. Burden and Standard of Proof

As the U.S. Court of Appeals for the D.C. Circuit has made clear in *MEMA I*, opponents of a California waiver request bear the burden of showing that the statutory criteria for a denial of the request have been met:

[T]he language of the statute and its legislative history indicate that California's regulations, and California's determinations that they must comply with the statute, when presented to the Administrator are presumed to satisfy the waiver requirements and that the burden of proving otherwise is on whoever attacks them. California must present its regulations and findings at the hearing and thereafter the parties opposing the waiver request bear the burden of persuading the Administrator that the waiver request should be denied.²⁴

The Administrator's burden, on the other hand, is to make a reasonable evaluation of the information in the record in coming to the waiver decision. As the court in *MEMA I* stated: "here, too, if the Administrator ignores evidence demonstrating that the waiver should not be granted, or if he seeks to overcome that evidence with unsupported assumptions of his own, he runs the risk of having his waiver decision set aside as 'arbitrary and capricious.'" ²⁵ Therefore, the Administrator's burden is to act "reasonably." ²⁶

With regard to the standard of proof, the court in *MEMA I* explained that the Administrator's role in a section 209 proceeding is to:

[. . .] consider all evidence that passes the threshold test of materiality and * * * thereafter assess such material evidence against a standard of proof to determine whether the parties favoring a denial of the waiver have shown that the factual circumstances exist in which Congress intended a denial of the waiver.²⁷

In that decision, the court considered the standards of proof under section 209 for the two findings related to granting a waiver for an "accompanying

enforcement procedure." Those findings involve: (1) Whether the enforcement procedures impact California's prior protectiveness determination for the associated standards, and (2) whether the procedures are consistent with section 202(a). The principles set forth by the court, however, are similarly applicable to an EPA review of a request for a waiver of preemption for a standard. The court instructed that "the standard of proof must take account of the nature of the risk of error involved in any given decision, and it therefore varies with the finding involved. We need not decide how this standard operates in every waiver decision." ²⁸

With regard to the protectiveness finding, the court upheld the Administrator's position that, to deny a waiver, there must be "clear and compelling evidence" to show that proposed enforcement procedures undermine the protectiveness of California's standards.²⁹ The court noted that this standard of proof also accords with the congressional intent to provide California with the broadest possible discretion in setting regulations it finds protective of the public health and welfare.³⁰

With respect to the consistency finding, the court did not articulate a standard of proof applicable to all proceedings, but found that the opponents of the waiver were unable to meet their burden of proof even if the standard were a mere preponderance of the evidence. Although *MEMA I* did not explicitly consider what the standards of proof would be under section 209 concerning a waiver request for "standards," as compared to a waiver request for accompanying enforcement procedures, there is nothing in the opinion to suggest that the court's analysis would not apply with equal force to such determinations. EPA's past waiver decisions have consistently made clear that: "[E]ven in the two areas concededly reserved for Federal judgment by this legislation—the existence of 'compelling and extraordinary' conditions and whether the standards are technologically feasible—Congress intended that the standards of EPA review of the State decision to be a narrow one." ³¹

F. EPA's Administrative Process in Consideration of California's Request for Authorization of the 2011 TRU Amendments

The CAA directs EPA to offer an opportunity for public hearing on authorization requests from California. On November 17, 2015, EPA published a **Federal Register** notice announcing an opportunity for written comment and offering a public hearing on California's request for authorization of the 2011 TRU Amendments.³² The request for comments specifically included, but was not limited to, the following issues.

First, EPA requested comment on whether the 2011 amendments for which CARB requested a within-the-scope determination should be considered under a within-the-scope analysis. We specifically requested comment on whether the Within-the-Scope Amendments (1) undermine California's previous determination that its standards, in the aggregate, are at least as protective of public health and welfare as comparable federal standards, (2) affect the consistency of California's requirement with section 209 of the Act, or (3) raise any other new issue affecting EPA's previous authorization determinations.

Second, EPA requested comment on whether the Within-the-Scope Amendments would satisfy the criteria for full authorization if they do not meet the criteria for within-the-scope analysis.

Third, EPA sought comment on whether the Full Authorization Amendments, for which CARB requested full authorization, satisfy the full authorization criteria. We specifically requested comment on whether (1) California's protectiveness determination (*i.e.*, that California standards will be, in the aggregate, as protective of public health and welfare as applicable federal standards) is arbitrary and capricious, (2) California does not need such standards to meet compelling and extraordinary conditions, or (3) the California standards and accompanying enforcement procedures are not consistent with section 209 of the Act.

EPA received no request for a public hearing. Consequently, EPA did not hold a public hearing. EPA received one written comment and a response comment from CARB, discussed below.

II. Discussion

A. Within-The-Scope Analysis

We initially evaluate California's Within-the-Scope Amendments by

²³ *Id.*

²⁵ *Id.* at 1126.

²⁶ *Id.* at 1126.

²⁷ *Id.* at 1122.

²⁸ *Id.*

²⁹ *Id.*

³⁰ *Id.*

³¹ See, e.g., "California State Motor Vehicle Pollution Control Standards; Waiver of Federal Preemption," 40 FR 23102 (May 28, 1975), at 23103.

³² 80 FR 71791 (November 17, 2015).

application of our traditional within-the-scope analysis, as CARB requested. If we determine that CARB's request does not meet the requirements for a within-the-scope determination, we then evaluate the request based on a full authorization analysis. In determining whether amendments can be viewed as within the scope of previous waivers, EPA looks at whether CARB's revision has been limited to making minor technical amendments to previously waived regulations or modifying the regulations in order to provide manufacturers with additional compliance flexibilities without significantly reducing the overall stringency of the requirements. The Within-the-Scope Amendments at issue in this request provide for certain compliance extensions and certain exemptions from the TRU in-use performance standards. The Within-the-Scope Amendments also clarify pre-existing requirements.

EPA sought comment on a range of issues, including those applicable to a within-the-scope analysis as well as those applicable to a full authorization analysis. No party submitted a comment that California's Within-the-Scope Amendments require a full authorization analysis. Given the lack of comments on this issue, and EPA's assessment of the nature of the amendments, EPA will evaluate California's Within-the-Scope Amendments by application of our traditional within-the-scope analysis, as CARB requested.

EPA can confirm that amended regulations are within the scope of a previously granted waiver of preemption if three conditions are met. First, the amended regulations must not undermine California's determination that its standards, in the aggregate, are as protective of public health and welfare as applicable federal standards. Second, the amended regulations must not affect consistency with section 202(a) of the Act. Third, the amended regulations must not raise any "new issues" affecting EPA's prior authorizations.

B. Full Authorization Analysis

As noted above, CARB's authorization request also included the Full Authorization Amendments. EPA must grant an authorization of the Full Authorization Amendments unless the Administrator finds: (1) California's determination that its standards will be, in the aggregate, as protective of public health and welfare as applicable federal standards is arbitrary and capricious; (2) California does not need such California standards to meet compelling and

extraordinary conditions; or (3) California's standards and accompanying enforcement procedures are not consistent with this section.

EPA's evaluation of the 2011 TRU Amendments, including the Within-the-Scope Amendments and Full Authorization Amendments, is set forth below. Because of the similarity of the within-the-scope criteria and the full authorization criteria, a discussion of both sets of respective amendments take place within each authorization criterion. To the extent that the criteria are applied uniquely, or that additional criteria apply under either the within-the-scope analysis or the full authorization analysis, such application is also addressed below.

1. California's Protectiveness Determination

In its March 2, 2015 letter requesting a within-the-scope determination, CARB stated that in approving the amendments to the TRU ATCM, the Board approved Resolution 11-35.³³ The Board expressly declared ". . . that the Board hereby determines that pursuant to Title II, section 209(e)(2) of the federal Clean Air Act, as amended in 1990, that the emission standards and other requirements related to the control of emissions adopted as part of the amendments to the TRU ATCM are, in the aggregate, at least as protective of public health and welfare as applicable federal standards."³⁴ CARB noted that EPA cannot find CARB's determination to be arbitrary and capricious for the reason that EPA does not have comparable federal emission standards that regulate in-use TRUs and TRU engines.

After evaluating the materials submitted by CARB, and since EPA has not adopted any standards or requirements for in-use TRU systems or engines, and based on no comments submitted to the record, I cannot find that California's TRU amendments undermine California's previous determination that its standards, in the aggregate, are at least as protective of public health and welfare as applicable federal standards. Thus I cannot deny CARB's within-the-scope request based on this criterion. Similarly, with regard to the Full Authorization Amendments I cannot make a finding that CARB's protectiveness determination is arbitrary and capricious and thus I cannot deny CARB's Full Authorization Amendments based on this criterion.

³³ See Authorization Support Document at 18-19. See also EPA-HQ-OAR-2015-0224-0002, Attachment 6.

³⁴ *Id.*

2. Whether the Standards Are Necessary To Meet Compelling and Extraordinary Conditions

Section 209(e)(2)(A)(ii) instructs that EPA cannot grant an authorization if the Agency finds that California "does not need such California standards to meet compelling and extraordinary conditions" EPA's inquiry under this second criterion (found both in paragraphs 209(b)(1)(B) and 209(e)(2)(A)(ii)) has been to determine whether California needs its own mobile source pollution program (*i.e.* set of standards) for the relevant class or category of vehicles or engines to meet compelling and extraordinary conditions, and not whether the specific standards that are the subject of the authorization or waiver request are necessary to meet such conditions.³⁵

EPA does not examine the section 209(e)(2)(A)(ii) criterion in the context of within-the-scope requests since the original regulations (that received a previous authorization from EPA) have already been evaluated under this criterion. However, should CARB adopt amendments that require a full authorization assessment (*e.g.* the addition of more stringent emission standards, etc.) then EPA believes it is appropriate to reevaluate whether California continues to demonstrate the need for its own mobile source program. EPA's assessment of the Full Authorization Amendments under this criterion is set forth below.

California has asserted its longstanding position that the State continues to need its own nonroad engine program to meet serious air pollution problems.³⁶ The relevant inquiry under section 209(e)(2)(A)(ii) is whether California needs its own emission control program to meet compelling and extraordinary conditions, not whether any given standard is necessary to meet such conditions.³⁷

There has been no evidence submitted to indicate that California's compelling and extraordinary conditions do not continue to exist. California, including the South Coast and the San Joaquin Valley air basins, continues to experience some of the worst air quality in the nation and continues to be in non-attainment with national ambient

³⁵ See 74 FR 32744, 32761 (July 8, 2009); 49 FR 18887, 18889-18890 (May 3, 1984).

³⁶ See Authorization Support Document at 23, "In adopting Resolution 11-35, the Board confirmed CARB's longstanding position that California continues to need its own nonroad engine program to meet serious air pollution problems."

³⁷ *Id.*

air quality standards for fine particulate matter (PM_{2.5}) and ozone.³⁸

We received no contrary evidence or comments contesting California's longstanding determination that its TRU ATCM program is needed to address the state's compelling and extraordinary conditions, nor did we receive any suggestion that CARB's nonroad program is not still necessary. In addition, EPA is not aware of any other information that would suggest that California no longer needs its nonroad emission program. Therefore, based on the record of this request and absence of comments or other information to the contrary, I cannot find that California does not continue to need such state standards, including the 2011 TRU Amendments, to address the "compelling and extraordinary conditions" underlying the state's air pollution problems.

3. Consistency With Section 209 of the Clean Air Act

Section 209(e)(2)(A)(iii) of the Act instructs that EPA cannot grant an authorization if California's standards and enforcement procedures are not consistent with "this section." As described above, EPA's section 209(e) rule states that the Administrator shall not grant authorization to California if she finds (among other tests) that the "California standards and accompanying enforcement procedures are not consistent with section 209." EPA has interpreted the requirement to mean that California standards and accompanying enforcement procedures must be consistent with at least section 209(a), section 209(e)(1), and section 209(b)(1)(C), as EPA has interpreted this last subsection in the context of motor vehicle waivers.³⁹ Thus, this can be viewed as a three-pronged test.

a. Consistency With Section 209(a) and 209(e)(1)

Section 209(a) of the Clean Air Act prohibits states or any political subdivisions of states from setting emission standards for new motor vehicles or new motor vehicle engines. Section 209(a) is modified in turn by

section 209(b) which allows California to set such standards if other statutory requirements are met. To find a standard to be inconsistent with section 209(a) for purposes of section 209(e)(2)(A)(iii), EPA must find that the standard in question actually regulates new motor vehicles or new motor vehicle engines.

To be consistent with section 209(e)(1) of the Clean Air Act, California's standards or other requirements relating to the control of emissions must not relate to new engines which are used in farm or construction equipment or vehicles and which are smaller than 175 horsepower (hp), and new locomotives or new engines used in locomotives.

In its authorization request, CARB states that in granting an authorization for the initial TRU ATCM regulation, EPA found that the TRU ATCM was consistent with CAA sections 209(a) and 209(e)(1) because the ATCM did not apply to new motor vehicles and engines or to new engines under 175 hp used in farm and construction vehicles or equipment or to new locomotives or locomotive engines.⁴⁰ CARB notes that the 2011 TRU Amendments likewise do not apply to the above categories of preempted mobile sources and thus EPA cannot find that such amendments are inconsistent with section 209(a) and 209(e)(1). No commenter argued the contrary or otherwise asserted that the 2011 TRU Amendments are not consistent with section 209(a) and 209(e)(1) and EPA is otherwise not aware of such evidence.

Therefore, I cannot deny California's request on the basis that 2011 TRU Amendments are not consistent with section 209(a) and section 209(e)(1).

b. Consistency With Section 209(b)(1)(C)

The requirement that California's standards be consistent with section 209(b)(1)(C) of the Clean Air Act effectively requires consistency with section 202(a) of the Act. To determine this consistency, EPA has applied to California nonroad standards the same test it has used previously for California motor vehicle standards; namely, state standards are inconsistent with section 202(a) of the Act if there is inadequate lead-time to permit the development of technology necessary to meet those requirements, giving appropriate consideration to the cost of compliance within that timeframe. California's accompanying enforcement procedures would also be inconsistent with section 202(a) if federal and California test

procedures conflicted. The scope of EPA's review of whether California's action is consistent with section 202(a) is narrow. The determination is limited to whether those opposed to the authorization or waiver have met their burden of establishing that California's standards are technologically infeasible, or that California's test procedures impose requirements inconsistent with the federal test procedures.⁴¹

The legislative history of section 209 (including the "consistency with section 202(a)" requirement in 209(b)(1)(C)) indicates that this provision is intended to relate to technological feasibility.⁴² Section 202(a)(2) states, in relevant part, that any regulation promulgated under its authority "shall take effect after such period as the Administrator finds necessary to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period." Section 202(a) thus requires the Administrator to first determine whether adequate technology already exists; or if it does not, whether there is adequate time to develop and apply the technology before the standards go into effect. The latter scenario also requires the Administrator to decide whether the cost of developing and applying the technology within that time is feasible. Previous EPA waivers are in accord with this position.⁴³

With regard to the Within-the-Scope Amendments, CARB notes that the amendments are designed to provide owners with greater flexibility to comply with the existing TRU ATCM's in-use requirements. The amendments were not the result of non-existing technologies according to CARB, but rather that the Board determined that special considerations were necessary to accommodate TRU owners during implementation of the rule, including the availability of certain diesel emission control devices or the availability of cleaner Tier 4 standard engines in the later model years. With regard to the amendments that specify requirements for repowering TRUs with new replacement engines and the allowance for owners to repower TRUs with rebuilt engines, CARB notes that these amendments do not modify the pre-existing compliance dates that EPA previously authorized and EPA has previously addressed rebuilding

³⁸ 74 FR 32744, 32762–63 (July 8, 2009), 76 FR 77515, 77518 (December 13, 2011), 81 FR 95982 (December 29, 2016). EPA continually evaluates the air quality conditions in the United States, including California. California continues to experience some of the worst air quality in the country and continues to be in nonattainment with National Ambient Air Quality Standards for fine particulate matter and ozone, see "Notice of Availability of the Environmental Protection Agency's Preliminary Interstate Ozone Transport Modeling Data for the 2015 Ozone National Ambient Air Quality Standard (NAAQS)" at EPA-HQ-OAR–2016–0751.

³⁹ See 59 FR 36969 (July 20, 1994).

⁴⁰ See Authorization Support Document at page 19.

⁴¹ *MEMA I*, 627, F.2d at 1126.

⁴² H.R. Rep. No. 95–294, 95th Cong., 1st Sess. 301 (1977).

⁴³ See, e.g., 49 FR 1887, 1895 (May 3, 1984); 43 FR 32182, 32183 (July 25, 1978); 41 FR 44209, 44213 (October 7, 1976).

requirements.⁴⁴ CARB also notes that several of its Full Authorization Amendments help ensure that the TRU ATCM is effectively implemented and enforced, and therefore constitute “accompanying enforcement provisions” (“AEPs”).⁴⁵ CARB notes that the AEPs that pertain to new automated monitoring, recordkeeping and reporting requirements for E/S, hybrid-electric, and hybrid cryogenic TRUs present no issues regarding technical feasibility. CARB maintains that the technology needed to comply with the reporting requirements already exists and the GPS tracking systems are already being used and are capable of wirelessly transmitting reports and data.⁴⁶

EPA received comment acknowledging that the technology for data collection and record reporting currently exists, but that additional development will be necessary to ensure that the technology will provide the necessary information for reporting purposes while also providing the necessary security and safeguards to protect proprietary information of both the original equipment manufacturers (“OEMs”) and the equipment owner.⁴⁷ This commenter also requested further definition of “stationary location” as well as seeking an increase in the 5 minute requirement to 15 minutes.⁴⁸ CARB responds by noting that the commenter acknowledges that the technology needed to comply with the automated monitoring, recordkeeping and reporting requirements currently exists and that the commenter fails to specify and provide any evidence of the types of proprietary information that is at issue and how such potential information is included in what information must be reported to CARB. CARB also notes that the Alternative

Technology TRUs are subject to reporting requirements that include the address of each stationary location where such a TRU was operated longer than five minutes. CARB states that “Thermo King does not describe why or how the current 5-minute stationary requirement may be causing confusion and/or false stationary readings. Furthermore, Thermo King has presented no evidence to support its argument that the five-minute requirement will result in confusion or erroneous readings.”⁴⁹

As noted above, EPA’s determination is limited to whether those opposed to the authorization or waiver have met their burden of establishing that California’s standards are technologically infeasible. I agree that the Within-the-Scope Amendments are designed to relax (*i.e.* extend the compliance deadlines in limited circumstances and provide additional exemptions) and clarify existing TRU ATCM requirements and therefore provide additional flexibility to regulated parties. EPA also did not receive any comments arguing that the Within-the-Scope Amendments were technologically infeasible. With regard to the Full Authorization Amendments I find that CARB has presented sufficient information to demonstrate that the technology needed to meet the applicable requirements already exists. To the extent that comments were raised concerning Alternative Technology TRUs and associated reporting requirements, the commenter raising such concerns has failed to meet their burden of proof in demonstrating why such requirements are technologically infeasible. As such, the record does not support a finding that the 2011 TRU Amendments are inconsistent with Section 202(a).

4. New Issues

EPA has stated in the past that if California promulgates amendments that raise new issues affecting previously granted waivers or authorizations, we would not confirm that those amendments are within the scope of previous authorizations.⁵⁰ I do not believe that the Within-the-Scope Amendments that extend the compliance dates under certain circumstances, provide new or clarify existing exemptions from the TRU in-use performance standards, and provide clarifications to CARB’s existing TRU ATCM raise any new issues with respect

to our prior granting of the authorization. Moreover, EPA did not receive any comments that CARB’s TRU Amendments raised new issues affecting the previously granted authorization. Therefore, I cannot find that CARB’s Within-the-Scope Amendments raise new issues and consequently, cannot deny CARB’s request based on this criterion.

III. Decision

After evaluating CARB’s 2011 TRU Amendments described above, EPA is taking the following actions. First, I am granting an authorization for the Full Authorization Amendments. Second, I confirm that the Within-the-Scope Amendments are within the scope of the previous EPA authorizations.

This decision will affect persons not only in California, but also manufacturers and/or owners/operators nationwide who must comply with California’s requirements. In addition, because other states may adopt California’s standards for which a section 209(e)(2)(A) authorization has been granted if certain criteria are met, this decision would also affect those states and those persons in such states. See CAA section 209(e)(2)(B). For these reasons, EPA determines and finds that this is a final action of national applicability, and also a final action of nationwide scope or effect for purposes of section 307(b)(1) of the Act. Pursuant to section 307(b)(1) of the Act, judicial review of this final action may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by March 20, 2017. Judicial review of this final action may not be obtained in subsequent enforcement proceedings, pursuant to section 307(b)(2) of the Act.

IV. Statutory and Executive Order Reviews

As with past authorization and waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Further, the Congressional Review Act, 5 U.S.C. 801, *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule for purposes of 5 U.S.C. 804(3).

⁴⁴ See 74 FR 3030 (January 16, 2009), Authorization Support Document at 22.

⁴⁵ See Authorization Support Document at 25. Section 209(e)(2)(A)(iii) requires that both standards and accompanying enforcement procedures be consistent with section 202(a). AEPs are not mentioned elsewhere in section 209(e). AEPs are general procedures or other requirements designed to ensure that the levels of emission reductions sought by the standards are achieved, see *MEMA I* at 1113.

⁴⁶ See Authorization Support Document at 27.

⁴⁷ See comment submitted by Thermo King, EPA-HQ-OAR-2015-0224-0003.

⁴⁸ *Id.* Thermo King also raises a series of questions regarding the electronic tracking system requirements that CARB has addressed in its supplemental comments at EPA-HQ-OAR-2015-0224-0004 (“CARB Supplemental Comments”). EPA agrees with CARB that questions about whether the definition and requirements of the electronic tracking system apply to OEMs and “free access” are questions that do not fall under EPA’s review given the limited statutory criteria for authorization review.

⁴⁹ CARB Supplemental Comments at 7–8.

⁵⁰ See, e.g., 78 FR 38970 (June 28, 2013), 75 FR 8056 (February 23, 2010), and 70 FR 22034 (April 28, 2005).

Dated: January 11, 2017.

Gina McCarthy,
Administrator.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OGC-2017-0030; FRL-9958-55-OGC]

Proposed Settlement Agreement, Clean Air Act Petition for Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (“CAA”), notice is hereby given of a proposed settlement agreement to address a lawsuit filed by Sierra Club in the United States Court of Appeals for the District of Columbia Circuit: *Sierra Club v. EPA*, No. 16-1158 (D.C. Cir.). On May 27, 2016, Sierra Club filed a petition for judicial review of the final action taken by EPA under the CAA titled “Revisions to Ambient Monitoring Quality Assurance and Other Requirements” (“final action”) at 81 FR 17,248 (Mar. 28, 2016). The proposed settlement agreement would resolve Sierra Club’s lawsuit upon EPA’s issuance of two nonbinding guidance documents recommending public notification practices concerning the submission and approval of ambient air monitoring network plans.

DATES: Written comments on the proposed settlement agreement must be received by February 21, 2017.

ADDRESSES: Submit your comments, identified by Docket ID number EPA-HQ-OGC-2017-0030, online at www.regulations.gov. For comments submitted at www.regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from www.regulations.gov. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (“CBI”) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment

contents located outside of the primary submission (i.e. on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the “For Further Information Contact” section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Jonathan Skinner-Thompson, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone: (202) 564-0291; fax number (202) 564-5603; email address: skinner-thompson.jonathan@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Settlement Agreement

Sierra Club filed a petition for review of EPA’s final action titled “Revisions to Ambient Monitoring Quality Assurance and Other Requirements” (“final action”) at 81 FR 17,248 (Mar. 28, 2016). In the final action, EPA revised requirements pertaining to public inspection of proposed annual monitoring network plans under 40 CFR 58.10.

Under the terms of the proposed settlement agreement, Sierra Club would agree to dismiss its case with prejudice upon EPA’s issuance of two nonbinding guidance documents. The first guidance document would be issued to state and local monitoring agencies and would make public inspection recommendations concerning proposed monitoring plans. The second guidance document would be issued to EPA regional offices and would make recommendations for stakeholder notification of submitted monitoring plan approvals and disapprovals. The United States also would agree to make a payment in settlement of Sierra Club’s claim for fees and costs. Please review the settlement agreement for additional details, available in the public docket at EPA-HQ-OGC-2017-0030.

For a period of 30 days following the date of publication of this notice, the Agency will receive written comments relating to the proposed settlement agreement from persons who were not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed settlement agreement if the comments disclose facts or considerations that

indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to the agreement should be withdrawn or withheld, the terms of the agreement will be affirmed.

II. Additional information about commenting on the proposed settlement agreement.

A. How can I get a copy of the proposed settlement agreement?

The official public docket for this action under Docket ID No. EPA-HQ-OGC-2017-0030 contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

An electronic version of the public docket is available through www.regulations.gov. You may use the www.regulations.gov to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select “search”.

It is important to note that EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at www.regulations.gov without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA’s policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA’s electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the www.regulations.gov Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an "anonymous access" system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an "anonymous access" system. If you send an email comment directly to the Docket without going through www.regulations.gov, your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: January 11, 2017.

Lorie J. Schmidt,

Associate General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-R06-OW-2017-0017; FRL-9958-31-Region 6]

Proposed Reissuance of the NPDES General Permit for Facilities Related to Oil and Gas Extraction in the Territorial Seas of Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability for comment.

SUMMARY: The Director of the Water Division, Environmental Protection Agency (EPA) Region 6 today proposes to reissue the National Pollutant Discharge Elimination System (NPDES) general permit for the Territorial Seas of Texas (No. TXG260000) for discharges from existing and new dischargers and New Sources in the Offshore Subcategory of the Oil and Gas Extraction Point Source Category as authorized by section 402 of the Clean Water Act, 33 U.S.C. 1342. The permit will supersede the previous general permit (TXG260000) issued on February 8, 2012 and published in the **Federal Register** at 77 FR 8855. This permit renewal authorizes discharges from exploration, development, and production facilities located in and discharging to the territorial seas off Texas.

Comment: Submit your comments, identified by Docket ID No. EPA-R06-OW-2017-0017 to the *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

DATES: Comments must be received by March 6, 2017.

FOR FURTHER INFORMATION CONTACT: Ms. Evelyn Rosborough, Region 6, U.S. Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202-2733. Telephone: (214) 665-7515. Email: rosborough.evelyn@epa.gov.

A complete draft permit and a fact sheet more fully explaining the proposal may be obtained from Ms. Rosborough. In addition, the Agency's current administrative record on the proposal is available for examination at the Region's Dallas offices during normal working hours after providing Ms. Rosborough 24 hours advance notice. A copy of the proposed permit, fact sheet, and this **Federal Register** Notice may be found on the EPA Region 6 Web site at: <https://www3.epa.gov/region6/water/npdes/genpermit/index.htm>.

SUPPLEMENTARY INFORMATION: EPA intends to use the proposed reissued permit to regulate discharges from oil and gas extraction facilities located in the territorial seas off Texas. To obtain discharge authorization, operators of such facilities must submit a new Notice of Intent (NOI). To determine whether your (facility, company, business, organization, etc.) is regulated by this action, you should carefully examine the applicability criteria in Part I, Section A.2 of the permit. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section above. The proposed permit contains limitations conforming to EPA's Oil and Gas Extraction, Offshore Subcategory Effluent Limitation Guidelines at 40 CFR part 435 and additional requirements assuring that regulated discharges will not cause unreasonable degradation of the marine environment, as required by section 403(c) of the Clean Water Act. Limitations and conditions are also included to ensure compliance with State Water Quality Standards. Specific information on the derivation of those limitations and conditions is contained in the fact sheet. Specifically, the draft permit proposes to prohibit the discharge of drilling fluids, drill cuttings and produced sand. Produced water discharges are limited for oil and grease, 7-day chronic toxicity, and 48-hour acute toxicity. In addition to limits on oil and grease, the proposed permit includes a prohibition of the discharge of priority pollutants except in trace amounts in well treatment, completion, and workover fluids. A limit of "No Free Oil" is proposed for miscellaneous discharges, such as non-contact cooling water and

ballast water, and on deck drainage discharges. Discharges of seawater and freshwater which have been used to pressure test existing pipelines and piping, to which treatment chemicals have been added, are proposed to be subject to limitations on free oil, concentration of treatment chemicals, and acute toxicity. New facilities withdrawing cooling water greater than 2 million gallons per day (MGD) are required to have the best technology available for minimizing fish/shellfish impingement mortality and entrainment caused by cooling water intake structures. Pursuant to the electronic reporting rule published in the **Federal Register** (80 FR 64063), a new electronic reporting requirement is added to the proposed permit.

Other Legal Requirements

State certification under section 401 of the CWA; consistency with the Texas Coastal Management Program; and compliance with National Environmental Policy Act, Endangered Species Act, Magnuson-Stevens Fishery Conservation and Management Act, Historic Preservation Act, Paperwork Reduction Act, and Regulatory Flexibility Act requirements are discussed in the fact sheet to the proposed permit.

Dated: December 28, 2016.
William K. Honker,
Director, Water Division, EPA Region 6.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OW-2015-0828; FRL-9958-68-OW]

Final National Pollutant Discharge Elimination System (NPDES) General Permit for Stormwater Discharges From Construction Activities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final permit issuance.

SUMMARY: All ten EPA Regions today are issuing the 2017 National Pollutant Discharge Elimination System (NPDES) general permit for stormwater discharges from construction activities to waters of the United States, also referred to as the “2017 Construction General Permit (CGP).” The 2017 CGP replaces the existing general permit (the “2012 CGP”) covering stormwater discharges from construction activities that expires on February 16, 2017. EPA is issuing this permit for five (5) years, during which time the permit will make available coverage to eligible operators in all areas of the country where EPA is the NPDES permitting authority. This **Federal Register** notice describes the 2017 CGP in general and provides a summary of the significant changes from the 2012 CGP.

DATES: The 2017 CGP will become effective on February 16, 2017. This effective date will provide dischargers with the immediate opportunity to comply with Clean Water Act requirements in light of the expiration of the 2012 CGP at midnight on February 16, 2017. In accordance with 40 CFR part 23, specifically 23.2, this permit shall be considered issued for the purpose of judicial review on January 25, 2017. Under section 509(b) of the Clean Water Act, judicial review of this general permit can be requested by filing a petition for review in the United States Court of Appeals within 120 days after the permit is considered issued. Under section 509(b)(2) of the Clean Water Act, this permit may not be challenged later in civil or criminal proceedings to enforce this permit. In addition, this permit may not be challenged in any other agency proceedings. Deadlines for submittal of notices of intent are provided in Part 1.4.3 of the permit. The permit also provides additional dates for compliance with the terms of the permit.

FOR FURTHER INFORMATION CONTACT: For further information on the permit, contact the appropriate EPA Regional office listed in Section I.C of this notice, or Emily Halter, EPA Headquarters, Office of Water, Office of Wastewater Management at tel.: 202-564-3324 or email: halter.emily@epa.gov.

SUPPLEMENTARY INFORMATION: This section is organized as follows:

Table of Contents

- I. General Information
 - A. Does this action apply to me?
 - B. How can I get copies of these documents and other related information?
 - C. Who are the EPA regional contacts for this permit?
- II. Background of Permit
- III. Summary of the Final 2017 CGP
 - A. Technology-Based Effluent Limits
 - B. Water Quality-Based Effluent Limits (WQBELs)
 - C. Summary of Significant Permit Changes from the 2012 CGP
- IV. Implementation Assistance
- V. Analysis of Economic Impacts
- VI. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
- VII. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations
- VIII. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

I. General Information

A. Does this action apply to me?

1. Entities Covered by This Permit

This permit covers the following entities, as categorized in the North American Industry Classification System (NAICS):

TABLE 1—ENTITIES COVERED BY THIS PERMIT

Category	Examples of affected entities	North American Industry Classification System (NAICS) code
Industry	Construction site operators disturbing one (1) or more acres of land, or less than one (1) acre but part of a larger common plan of development or sale if the larger common plan will ultimately disturb one (1) acre or more, and performing the following activities:	
	Construction of Buildings	236
	Heavy and Civil Engineering Construction	237

EPA does not intend the preceding table to be exhaustive, but provides it as a guide for readers regarding the types of activities that EPA is now aware of that could potentially be affected by this action. Other types of entities not listed in the table could also be affected. To determine whether your site is covered by this action, you should carefully examine the definition of “construction activity” and “small construction activity” in existing EPA regulations at 40 CFR 122.26(b)(14)(x) and 122.26(b)(15), respectively. If you have questions regarding the applicability of this action to a particular entity, consult one of the persons listed for technical information in the preceding **FOR FURTHER INFORMATION CONTACT** section.

2. Construction Projects for Which Operators Are Eligible for Permit Coverage

Coverage under this permit is available to operators of eligible projects located in those areas where EPA is the permitting authority. A list of eligible areas is included in Appendix B of the permit. Eligibility for permit coverage is limited to operators of “new sites,” operators of “existing sites,” “new operators of permitted sites,” and operators of “emergency-related projects.” A “new site” is a site where construction activities commenced on or after February 16, 2017. An “existing site” is a site where construction activities commenced prior to February 16, 2017. A “new operator of a permitted site” is an operator that through transfer of ownership and/or operation replaces the operator of an already permitted construction site that is either a “new site” or an “existing site.” An “emergency-related project” is a project initiated in response to a public emergency (*e.g., mud slides, earthquake, extreme flooding conditions, disruption in essential public services*), for which the related work requires immediate authorization to avoid imminent endangerment to human health or the environment, or to reestablish public services.

3. Geographic Coverage

This permit makes coverage available to eligible operators for stormwater discharges from construction activities that occur in areas not covered by an approved state NPDES program. The areas of geographic coverage of this permit are listed in Appendix B, and include the states of New Hampshire, Massachusetts, New Mexico, and Idaho as well as most Indian country lands, and areas in selected states operated by a federal operator. Permit coverage is also available to eligible operators in

Puerto Rico, the District of Columbia, and the Pacific Island territories, among others.

B. How can I get copies of these documents and other related information?

1. *Docket.* EPA has established an official public docket for this action under Docket ID No. EPA-HQ-OW-2015-0828. The official public docket is the collection of materials that is available for public viewing at the Water Docket in the EPA Docket Center, (EPA/DC) WJC West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC 20460. Although all documents in the docket are listed in an index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Publicly available docket materials are available in hard copy at the EPA Docket Center Public Reading Room, open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744 and the telephone number for the Water Docket is (202) 566-2426.

2. *Electronic Access.* You may access this **Federal Register** notice electronically through the United States government on-line source for Federal regulations at <http://www.regulations.gov>.

Electronic versions of this permit and fact sheet are available on EPA’s NPDES Web site at <https://www.epa.gov/npdes/stormwater-discharges-construction-activities>.

An electronic version of the public docket is available through the EPA’s electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.regulations.gov> to view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. For additional information about EPA’s public docket, visit the EPA Docket Center homepage at <https://www.epa.gov/dockets>. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the Docket Facility identified in Section I.B.1.

C. Who are the EPA regional contacts for this permit?

For EPA Region 1, contact Suzanne Warner at tel.: (617) 918-1383 or email at warner.suzanne@epa.gov.

For EPA Region 2, contact Stephen Venezia at tel.: (212) 637-3856 or email at venezia.stephen@epa.gov, or for

Puerto Rico, contact Sergio Bosques at tel.: (787) 977-5838 or email at bosques.sergio@epa.gov.

For EPA Region 3, contact Carissa Moncavage at tel.: (215) 814-5798 or email at moncavage.carissa@epa.gov.

For EPA Region 4, contact Michael Mitchell at tel.: (404) 562-9303 or email at mitchell.michael@epa.gov.

For EPA Region 5, contact Brian Bell at tel.: (312) 886-0981 or email at bell.brianc@epa.gov.

For EPA Region 6, contact Suzanna Perea at tel.: (214) 665-7217 or email at perea.suzanna@epa.gov.

For EPA Region 7, contact Mark Matthews at tel.: (913) 551-7635 or email at matthews.mark@epa.gov.

For EPA Region 8, contact Amy Clark at tel.: (303) 312-7014 or email at clark.amy@epa.gov.

For EPA Region 9, contact Eugene Bromley at tel.: (415) 972-3510 or email at bromley.eugene@epa.gov.

For EPA Region 10, contact Margaret McCauley at tel.: (206) 553-1772 or email at mccauley.margaret@epa.gov.

II. Background of Permit

The Clean Water Act (“CWA”) establishes a comprehensive program “to restore and maintain the chemical, physical, and biological integrity of the Nation’s waters.” 33 U.S.C. 1251(a). The CWA also includes the objective of attaining “water quality which provides for the protection and propagation of fish, shellfish and wildlife and * * * recreation in and on the water.” 33 U.S.C. 1251(a)(2). To achieve these goals, the CWA requires EPA to control discharges of pollutants from point sources through the issuance of NPDES permits.

The Water Quality Act of 1987 (WQA) added section 402(p) to the CWA, which directed EPA to develop a phased approach to regulate stormwater discharges under the NPDES program. 33 U.S.C. 1342(p). EPA published a final regulation in the **Federal Register**, often called the “Phase I Rule,” on November 16, 1990, establishing permit application requirements for, among other things, “storm water discharges associated with industrial activity.” See 55 FR 47990. EPA defines the term “storm water discharge associated with industrial activity” in a comprehensive manner to cover a wide variety of facilities. See *id.* Construction activities, including activities that are part of a larger common plan of development or sale, that ultimately disturb at least five acres of land and have point source discharges to waters of the U.S. were included in the definition of “industrial activity” pursuant to 40 CFR 122.26(b)(14)(x). The second rule

implementing section 402(p), often called the “Phase II Rule,” was published in the **Federal Register** on December 8, 1999. It requires NPDES permits for discharges from construction sites disturbing at least one acre but less than five acres, including sites that are part of a larger common plan of development or sale that will ultimately disturb at least one acre but less than five acres, pursuant to 40 CFR 122.26(b)(15)(i). See 64 FR 68722. EPA is issuing this permit under the statutory and regulatory authority cited above.

NPDES permits for construction stormwater discharges are required under Section 402(a)(1) of the CWA to include conditions to meet technology-based effluent limits established under Section 301 and, where applicable, Section 306. Effluent Limitations Guidelines (ELGs) and New Source Performance Standards (NSPS) are technology-based effluent limitations that are based on the degree of control that can be achieved using various levels of pollutant control technology as defined in Subchapter III of the CWA.

Once a new national standard is established in accordance with these sections, NPDES permits must incorporate limits based on such technology-based standards. See CWA sections 301 and 306, 33 U.S.C. 1311 and 1316, and 40 CFR 122.44(a)(1). On December 1, 2009, EPA published final regulations establishing technology-based ELGs and NSPSs for the Construction & Development (C&D) point source category, which became effective on February 1, 2010. See 40 CFR part 450, and 74 FR 62996 (December 1, 2009). The Construction & Development Rule, or “C&D rule,” was amended on March 6, 2014 to satisfy EPA’s agreements pursuant to a settlement of litigation that challenged the 2009 rule. See 79 FR 12661. All NPDES construction stormwater NPDES permits issued by EPA or states after this date must incorporate the requirements in the C&D rule.

III. Summary of the Final 2017 CGP

The final 2017 CGP is substantially similar to the 2012 CGP. It includes effluent limitations (*i.e., requirements for erosion and sediment and pollutant prevention controls*) and requirements for self-inspections, corrective actions, staff training, development of a stormwater pollution prevention plan (SWPPP), and permit conditions applicable to construction sites in specific states, Indian country lands, and territories. Additionally, the appendices provide forms for the submittal of a Notice of Intent (NOI),

Notice of Termination (NOT), Low Erosivity Waiver (LEW), as well as step-by-step procedures for determining eligibility with respect to the protection of threatened and endangered species and historic properties, and for complying with the permit’s natural buffer requirements.

A. Technology-Based Effluent Limits

As stated above, all NPDES construction permits issued by EPA or states after March 6, 2014 must incorporate the requirements in the C&D rule, as amended. The non-numeric effluent limitations in the C&D rule are designed to prevent the mobilization and discharge of sediment and sediment-bound pollutants, such as metals and nutrients, and to prevent or minimize exposure of stormwater to construction materials, debris, and other sources of pollutants on construction sites. In addition, these non-numeric effluent limitations reduce the generation of dissolved pollutants. Soil on construction sites can contain a variety of pollutants such as nutrients, pesticides, herbicides, and metals. These pollutants may be present naturally in the soil, such as arsenic or selenium, or they may have been contributed by previous activities on the site, such as agriculture or industrial activities. These pollutants, once mobilized by stormwater, can detach from the soil particles and become dissolved pollutants. Once dissolved, these pollutants would not be removed by down-slope sediment controls. Source control through minimization of soil erosion is therefore the most effective way of controlling the discharge of these pollutants.

The non-numeric effluent limits in the C&D rule, upon which the technology-based requirements in the permit are based, include the following:

- **Erosion and Sediment Controls**—Permittees are required to design, install and maintain effective erosion controls and sediment controls to minimize the discharge of pollutants. At a minimum, such controls must be designed, installed and maintained to:

1. Control stormwater volume and velocity to minimize soil erosion in order to minimize pollutant discharges;
2. Control stormwater discharges, including both peak flowrates and total stormwater volume, to minimize channel and streambank erosion and scour in the immediate vicinity of discharge points;
3. Minimize the amount of soil exposed during construction activity;
4. Minimize the disturbance of steep slopes;

5. Minimize sediment discharges from the site. The design, installation and maintenance of erosion and sediment controls must address factors such as the amount, frequency, intensity and duration of precipitation, the nature of resulting stormwater discharge, and soil characteristics, including the range of soil particle sizes expected to be present on the site;

6. Provide and maintain natural buffers around waters of the United States, direct stormwater to vegetated areas and maximize stormwater infiltration to reduce pollutant discharges, unless infeasible;

7. Minimize soil compaction. Minimizing soil compaction is not required where the intended function of a specific area of the site dictates that it be compacted; and

8. Unless infeasible, preserve topsoil. Preserving topsoil is not required where the intended function of a specific area of the site dictates that the topsoil be disturbed or removed.

- **Soil Stabilization Requirements**—Permittees are required to, at a minimum, initiate soil stabilization measures immediately whenever any clearing, grading, excavating or other earth disturbing activities have permanently ceased on any portion of the site, or temporarily ceased on any portion of the site and will not resume for a period exceeding 14 calendar days. In arid, semiarid, and drought-stricken areas where initiating vegetative stabilization measures immediately is infeasible, alternative stabilization measures must be employed as specified by the permitting authority. Stabilization must be completed within a period of time determined by the permitting authority. In limited circumstances, stabilization may not be required if the intended function of a specific area of the site necessitates that it remain disturbed.

- **Dewatering Requirements**—Permittees are required to minimize the discharge of pollutants from dewatering trenches and excavations. Discharges are prohibited unless managed by appropriate controls.

- **Pollution Prevention Measures**—Permittees are required to design, install, implement, and maintain effective pollution prevention measures to minimize the discharge of pollutants. At a minimum, such measures must be designed, installed, implemented and maintained to:

1. Minimize the discharge of pollutants from equipment and vehicle washing, wheel wash water, and other wash waters. Wash waters must be treated in a sediment basin or alternative control that provides

equivalent or better treatment prior to discharge;

2. Minimize the exposure of building materials, building products, construction wastes, trash, landscape materials, fertilizers, pesticides, herbicides, detergents, sanitary waste and other materials present on the site to precipitation and to stormwater. Minimization of exposure is not required in cases where the exposure to precipitation and to stormwater will not result in a discharge of pollutants, or where exposure of a specific material or product poses little risk of stormwater contamination (such as final products and materials intended for outdoor use); and

3. Minimize the discharge of pollutants from spills and leaks and implement chemical spill and leak prevention and response procedures.

• *Prohibited Discharges*—The following discharges from C&D sites are prohibited:

1. Wastewater from washout of concrete, unless managed by an appropriate control;

2. Wastewater from washout and cleanout of stucco, paint, form release oils, curing compounds and other construction materials;

3. Fuels, oils, or other pollutants used in vehicle and equipment operation and maintenance; and

4. Soaps or solvents used in vehicle and equipment washing.

• *Surface Outlets*—When discharging from basins and impoundments, permittees are required to utilize outlet structures that withdraw water from the surface, unless infeasible.

The fact sheet details how EPA has incorporated these requirements into the final 2017 CGP. The discussion in the fact sheet includes a summary of each provision and the agency's rationale for articulating the provision in this way.

B. Water Quality-Based Effluent Limits (WQBELs)

EPA's regulations at 40 CFR 122.44(d)(1) require permitting authorities to include additional or more stringent permit requirements when necessary to achieve water quality standards. The 2012 CGP contained several provisions to protect water quality and the 2017 CGP includes those same provisions. The permit includes a narrative WQBEL requiring that discharges be controlled as necessary to meet applicable water quality standards. Failure to control discharges in a manner that meets applicable water quality standards is a violation of the permit.

In addition to the narrative WQBEL, the permit contains related provisions that act together to further protect water quality. Many of these provisions were also included in the 2012 CGP. For example, the permit requires operators to implement stormwater control measures and to take corrective action in response to any exceedance of applicable water quality standards. To provide further protection, the permit also requires more stringent site inspection frequencies and stabilization deadlines for construction sites that discharge to sensitive waters, such as those waters that are impaired for sediment or nutrients, which are parameters typically associated with stormwater discharges from construction sites, or waters identified by a state, tribe, or EPA as requiring enhanced protection under antidegradation requirements. Additionally, EPA received CWA Section 401 certifications for the 2017 CGP. Some of these certifications include additional water quality-based conditions that are required by states, Indian country lands, and territories, that become legally binding permit limits and conditions in specific geographic areas where the permit is available.

A new water quality protection established in the 2017 CGP is a modified approach to site stabilization deadlines based on the concept of phasing construction disturbances, where sites that disturb more than five (5) acres total over the course of a construction project are required to stabilize within a more stringent timeframe if they do not limit disturbances to five (5) acres or less at any one time. This modified approach is summarized below and is discussed in more detail in the fact sheet.

C. Summary of Significant Permit Changes From the 2012 CGP

The 2017 CGP includes several new or modified requirements, which are summarized below and discussed in more detail in the fact sheet. The final 2017 CGP and the fact sheet can be found at <https://www.epa.gov/npdes/stormwater-discharges-construction-activities>.

1. *Streamlining of the permit*—EPA streamlined and simplified language throughout the 2017 CGP to present requirements in a generally more clear and readable manner. This structure should enhance the operators' understanding of and compliance with the permit's requirements. For example, EPA moved language that was not necessary in the permit into the relevant appendix or to the fact sheet. Although

the permit has been streamlined from prior permits, most of the requirements remain unchanged.

2. *Revisions consistent with the C&D ELG, as amended*—EPA made minor revisions to the technology-based effluent limits in the permit to incorporate the March 6, 2014 amendments to the Construction and Development Effluent Guidelines and Standards (the "C&D rule") at 40 CFR part 450 (see section III.A. of this notice on Technology-Based Effluent Limits). The 2012 CGP already incorporated the original C&D rule requirements and the 2017 CGP includes the necessary revisions to the language based on the rule amendments but does not add any new requirements. These revisions include clarifying the applicability of requirements to control erosion caused by discharges, providing additional details on areas where buffers are required, and clarifying requirements for soil stabilization, preservation of topsoil and pollution prevention measures.

3. *Authorized non-stormwater discharges*—Non-stormwater discharges of external building washdown waters containing hazardous substances, such as paint or caulk containing polychlorinated biphenyl (PCBs) are not authorized in the 2017 CGP. Non-stormwater discharges are required to comply with any applicable effluent limitation requirements in Parts 2 and 3 of the permit. Part 1.2.2.

4. *Notice of permit coverage*—Consistent with the 2012 CGP, operators must post a sign or other notice of permit coverage at a safe, publicly accessible location in close proximity to the construction site. In the 2017 CGP, this notice must also include information informing the public on how to contact EPA to obtain a copy of the SWPPP and how to contact EPA if stormwater pollution is observed in the discharge. EPA is requiring these additions to make the longstanding process of obtaining a SWPPP more readily known to the public and to improve transparency of the process to report possible violations. Part 1.5.

5. *Stockpiles and land clearing debris piles*—EPA changed the requirement for temporary stabilization for stockpiles or land clearing debris piles from "where practicable" to requiring cover or appropriate temporary stabilization for all inactive piles that will be unused for 14 or more days, consistent with the temporary stabilization deadlines in Part 2.2.14 of the 2017 CGP. EPA made this change to ensure pollutants are minimized from these piles, but is clarifying that the requirement only

applies where these piles are not actively being used. Part 2.2.5.

6. *Stabilization deadlines*—The 2017 CGP establishes a modified approach to the stabilization deadlines, which is based on the concept of phasing construction disturbances. Sites that disturb five (5) acres or less must complete stabilization within a 14-calendar day timeframe, which is the same timeframe that applied to sites in the 2012 CGP. For sites that disturb more than five (5) acres over the course of a construction project, operators can choose between completing stabilization within a 14-calendar day timeframe if they limit disturbances to five (5) acres or less at any one time, or within a 7-calendar day timeframe if they do not limit disturbances to five (5) acres or less at any one time. The intent of this approach is to provide an incentive to disturb less land at any given period of time by providing longer stabilization timeframes if the disturbance is kept below a threshold level. The deadline for sites discharging to sensitive waters remains unchanged (within 7 calendar days), and the exceptions for sites in arid, semi-arid, and drought-stricken areas and for operators affected by circumstances beyond their control also remain unchanged. Part 2.2.14.

7. *Construction and domestic waste*—The 2017 CGP requires operators to keep waste container lids closed when not in use and at the end of the business day for those containers that are actively used throughout the day, or, for waste containers that do not have lids, to provide cover or a similarly effective means to minimize the discharge of pollutants. EPA made this change to minimize the exposure of these waste materials to precipitation and stormwater, and to make the requirements for construction and domestic waste consistent with the cover requirements for most other types of materials and wastes in the CGP. Part 2.3.3.

8. *Discharge limitations for sites discharging to sensitive waters*—In order to ensure that discharges meet water quality standards, EPA added a requirement in the 2017 CGP to implement controls on sites discharging to polychlorinated biphenyl (PCB) impaired waters to minimize the exposure of building materials containing PCBs to precipitation and stormwater. This provision applies to the demolition of structures with at least 10,000 square feet of floor space built or renovated before January 1, 1980. EPA also added a requirement to document information about the demolition location and associated pollutants in the SWPPP. Part 3.2.

9. *Notice of Intent (NOI)*—In the 2017 CGP, EPA added three questions to the NOI form (Appendix J). These questions are:

- The type of construction site (select one or more of 9 options);
- A yes/no question asking if there is demolition of a structure with at least 10,000 square feet of floor space that was built or renovated before January 1, 1980; and
- A yes/no question asking whether the predevelopment land use was used for agriculture.

IV. Implementation Assistance

Following issuance of the 2017 CGP, EPA plans to provide further assistance to construction operators, state permitting authorities, and other interested parties on various aspects of this new permit. The following activities or documents are planned:

- *National Webcast*—EPA will host a webcast in February of 2017 that will provide an overview of the 2017 CGP and an opportunity for participants to ask questions. EPA anticipates offering more webcasts covering the same material or more specific aspects of the permit. The agency will announce details of all webcasts on the CGP Web site at <https://www.epa.gov/npdes/stormwater-discharges-construction-activities>.

- *Small Residential Lot SWPPP Template*—EPA will also be providing an updated template that small residential lot builders can use to develop a streamlined SWPPP that is consistent with the minimum requirements of the permit.

- *Inspection and Corrective Action Report Templates*—EPA will also be providing updated template forms that construction site operators can use to document inspections completed pursuant to the permit's requirements in Part 4 and in preparing corrective action reports pursuant to the permit's requirements in Part 5.

EPA will consider additional outreach to support the 2017 CGP based on the level of interest and demand.

V. Analysis of Economic Impacts

EPA expects the economic impact on entities that will likely seek coverage under this permit, including small businesses, to be minimal. A copy of EPA's economic analysis, titled "Cost Impact Analysis for the 2017 Construction General Permit (CGP)," is available in the docket for this permit. The economic impact analysis indicates that while there may be some incremental increase in the costs of complying with the 2017 CGP over the 2012 CGP, these costs will not have a

significant economic impact on a substantial number of small entities.

This analysis evaluates the cost implications of the key changes to the permit. Each change is examined in light of the 2012 CGP's requirements, where applicable. The objective of this examination is to show where or to what extent the 2017 CGP includes requirements that impose an incremental increase in costs on operators above and beyond costs that are already accounted for in the 2012 CGP, which incorporated the C&D rule and defines the baseline of costs to which operators are currently subject.

The C&D rule baseline costs estimate the cost of compliance for all construction activities required to obtain NPDES permit coverage to implement the stormwater controls required by the Effluent Limitations Guideline. While the C&D rule applies to permitted construction activities under the NPDES program nationwide, the 2017 CGP provides coverage to a sub-set of those activities in areas not covered by an approved state NPDES program, which accounts for approximately 5–6 percent of the construction stormwater permitted universe under the NPDES program.

Calculating the total cost of EPA's construction stormwater program under the 2017 CGP is challenging for several reasons. NPDES general permits, such as the CGP, are issued to no one operator in particular, with multiple operators obtaining coverage under the general permit after it is issued. Therefore, the 2017 CGP has an inherently unknown permitted universe at the time of permit issuance. EPA can estimate that approximately 25,000 operators will seek coverage under the 2017 CGP during its five-year life span, based on data from previous CGPs.

However, the total cost calculation is dependent on many other factors and assumptions that are difficult to estimate or extrapolate for the entire CGP permitted universe. Although many operators under the CGP share similar operations and discharge properties, the variables that would need to be accounted for in estimating the total cost of compliance vary widely across individual construction sites, for example, total area and duration that land is disturbed, slope, climate and precipitation patterns, soil type, topography, and previous land use. In addition, factors such as labor and material costs vary across the country. Given that EPA does not know and does not collect data on all of the specific operator characteristics necessary to make an accurate estimate, EPA is not able to estimate the total cost of

compliance with EPA's CGP at this time. EPA's practice instead is to calculate the incremental change in burden with each permit reissuance and, where applicable, provide estimates of some known costs that can be used to calculate the estimated total cost of a specific permit change.

Part 3.2 has a new requirement in the 2017 CGP for operators discharging to waters impaired for PCBs. Buildings and structures originating or remodeled between the years of 1950–1979 often contain PCBs in materials such as caulk and paint. Without proper controls, the demolition of such structures can cause PCBs to be released into the environment and discharged into waters of the U.S. during storm events. To address this concern, EPA has added a new provision that requires controls to be implemented to minimize exposure of PCB-containing building materials to precipitation and stormwater, and to ensure that such materials are disposed in compliance with applicable state, federal, and local laws. The requirement is limited to the demolition of buildings or structures with at least 10,000 square feet of floor space built or renovated before January 1, 1980 on sites that discharge to waters with known impairments for PCBs.

Over 4,500 water bodies are currently listed in the PCB-polluted category, making this the sixth-highest water pollution cause nationwide. This includes 81,610 miles of rivers and streams, 3,204,534 acres of lakes and ponds, and 400,094 square miles of bays and estuaries that are impaired for PCBs. EPA does not currently have data on the number of construction projects subject to EPA's CGP that involve demolition of a structure with at least 10,000 square feet of floor space built or renovated before January 1, 1980 on sites that discharge to waters impaired for PCBs. Therefore, at this time, EPA does not have an estimate for the number of operators that will be affected by this new requirement. However, EPA added a new question on the NOI form asking about the prevalence of demolition of a structure with at least 10,000 square feet of floor space that was built or renovated before January 1, 1980. When reissuing this permit, EPA will review the data submitted on the NOI forms as well as information on the implementation of this requirement, as necessary, to determine whether to revise the applicability of the requirement or associated cost impact analysis.

VI. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is a “significant regulatory action.” Accordingly, EPA submitted this action to the Office of Management and Budget (OMB) for review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011) and any changes made in response to OMB recommendations have been documented in the docket for this action.

VII. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that the 2017 CGP will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because the requirements in the permit apply equally to all construction projects that disturb one or more acres in areas where EPA is the permitting authority, and the erosion and sediment control provisions increase the level of environmental protection for all affected populations.

VIII. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

In compliance with Executive Order 13175, EPA consulted with tribal officials to gain an understanding of and, where necessary, address the tribal implications of the permit. In the course of this consultation, EPA conducted the following activities:

- August 5, 2015—EPA mailed notification letters to all Tribal leaders, initiating consultation and coordination on the draft 2017 CGP. The consultation period was from August 17, 2015 to October 13, 2015.

- August 11, 2015—EPA presented a brief overview of the 2012 CGP and information regarding the upcoming consultation to the National Tribal Caucus.

- August 12, 2015—EPA presented a brief overview of the 2012 CGP and information regarding the upcoming consultation to the National Tribal Water Council.

- September 22, 2015—EPA held a consultation teleconference call; 18 Tribes were represented. EPA responded to the general questions raised on the call.

- On October 14, 2015, EPA received one set of comments from a Tribe in the State of Washington. EPA evaluated and considered the comments during the finalization of the 2017 CGP; EPA responded to the formal comments submitted in writing during the comment period in the Agency's final action.

- EPA will provide email notification to Tribes of today's final 2017 CGP.

EPA also notes that as part of the finalization of 2017 CGP, it completed the Section 401 certification procedures with all applicable tribes where the 2017 CGP applies (see Appendix B).

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2016-0181; FRL-9958-63-OAR]

California State Nonroad Engine Pollution Control Standards; Evaporative Emission Standards and Test Procedures for Off-Highway Recreational Vehicles (OHRVs); Notice of Decision

AGENCY: Environmental Protection Agency.

ACTION: Notice of decision.

SUMMARY: The Environmental Protection Agency ("EPA") is granting the California Air Resources Board ("CARB") its request for an authorization of its amendments to its Off-Highway Recreational Vehicle regulation ("OHRV Amendments"). The OHRV Amendments establish new evaporative emission standards and test procedures for 2018 and subsequent model year OHRVs. The California OHRV category encompasses a wide variety of vehicles, including off-road motorcycles, all-terrain vehicles ("ATVs"), off-road sport and utility vehicles, sand cars, and golf carts. This decision is issued under the authority of the Clean Air Act ("CAA" or "Act").

DATES: Petitions for review must be filed by March 20, 2017.

ADDRESSES: EPA has established a docket for this action under Docket ID EPA-HQ-OAR-2016-0181. All documents relied upon in making this decision, including those submitted to EPA by CARB, are contained in the public docket. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air and Radiation Docket in the EPA Headquarters Library, EPA West Building, Room 3334, located at 1301 Constitution Avenue NW., Washington, DC. The Public Reading Room is open to the public on all federal government working days from 8:30 a.m. to 4:30 p.m.; generally, it is open Monday through Friday, excluding holidays. The telephone number for the Reading Room

is (202) 566-1744. The Air and Radiation Docket and Information Center's Web site is <http://www.epa.gov/oar/docket.html>. The electronic mail (email) address for the Air and Radiation Docket is: a-and-r-Docket@epa.gov, the telephone number is (202) 566-1742, and the fax number is (202) 566-9744. An electronic version of the public docket is available through the federal government's electronic public docket and comment system. You may access EPA dockets at <http://www.regulations.gov>. After opening the www.regulations.gov Web site, enter EPA-HQ-OAR-2016-0181 in the "Enter Keyword or ID" fill-in box to view documents in the record. Although a part of the official docket, the public docket does not include Confidential Business Information ("CBI") or other information whose disclosure is restricted by statute.

EPA's Office of Transportation and Air Quality ("OTAQ") maintains a Web page that contains general information on its review of California waiver and authorization requests. Included on that page are links to prior waiver **Federal Register** notices, some of which are cited in today's notice. The page can be accessed at <http://www.epa.gov/otaq/cafr.htm>.

FOR FURTHER INFORMATION CONTACT:

David Dickinson, Attorney-Advisor, Transportation Climate Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, (6405J), NW., Washington, DC 20460. Telephone: (202) 343-9256. Fax: (202) 343-2800. Email: Dickinson.David@epa.gov.

I. Background

CARB first adopted exhaust emission standards and test procedures applicable to OHRVs and the engines used in OHRVs in 1994, and EPA authorized California to enforce such standards and test procedures in 1996.¹ CARB subsequently adopted amendments to the OHRV regulation in 1996, 1999, 2003, and 2007, and EPA determined those amendments either fell within the scope of previously granted authorizations or met the criteria for a new authorization.²

In 2002, EPA adopted regulations that established both exhaust and evaporative emission standards for nonroad recreational vehicles and engines, including off-road motorcycles

and ATVs.³ EPA's evaporative emission standards applied to 2008 and subsequent model year nonroad recreational vehicles, and established a fuel tank permeation limit of 1.5 grams per square meter per day (g/m²/day) and a fuel hose permeation limit of 15 g/m²/day. Correspondingly, CARB's 2007 amendments to their OHRV regulation set forth, among other provisions, evaporative emission standards for new 2008 and subsequent model year OHRVs that are identical to the federal evaporative emission standards for 2008 and subsequent model year nonroad vehicles. In 2014, CARB adopted the OHRV Amendments that establish a new test procedure and evaporative emission standard of 1.0 gram per day (g/day) of total organic gas (TOG) for a 3-day diurnal period.⁴

A. CARB's Authorization Request

In a letter dated February 26, 2016, CARB submitted to EPA its request pursuant to section 209(e) of the CAA, regarding authorization of its OHRV Amendments.⁵ The CARB Board approved the OHRV Amendments on July 25, 2013 (by Resolution 13-33).⁶ The OHRV Amendments were approved by California's Office of Administrative Law (OAL) on December 17, 2014 and became operative state law on April 1, 2015.

The OHRV Amendments differ from preexisting OHRV requirements because they impose a 1.0 g/day evaporative emissions standard for the complete OHRV fuel system. Previously the OHRV regulation only required fuel tanks and fuel hoses to meet specific permeation standards. The OHRV Amendments comprehensively address all potential sources of evaporative emissions, including running losses (evaporative emissions generated during vehicle operation), hot soak (evaporative emission generated directly after vehicle operation), and diurnal losses (evaporative emissions generated during long term storage). The OHRV

³ 67 FR 68242 (November 8, 2002). The terms "off-road" and "nonroad" are used interchangeably, generally CARB uses the term off-road and EPA uses the term nonroad.

⁴ CARB's regulatory text enacted by the OHRV Amendments (which EPA is authorizing by this action), is set forth in California Code of Regulations, Title 13, sections 2416, 2417, 2418, 2419, 2419.1, 2419.2, 3419.3, and 2419.4. A full description of the OHRV Amendments is found in CARB's Authorization Request Support Document, 2014 Amendments to Evaporative Emissions Control Requirements for Off Highway Recreational Vehicles, dated February 26, 2016 ("Authorization Request Support Document") at EPA-HQ-OAR-2016-0181-0002.

⁵ Authorization Request Support Document.

⁶ CARB Resolution 13-33, July 25, 2013, EPA-HQ-OAR-2016-0181-0006.

¹ 61 FR 69093 (December 3, 1996).

² 65 FR 69673 (November 20, 2000) [1996 amendments]; 79 FR 6584 (February 14, 2014) [1999, 2003, and 2007 amendments].

Amendments establish diurnal and fuel system leakage standards and associated test procedures for new 2018 and subsequent model year OHRVs. In addition, the OHRV Amendments establish durability test procedures and other test procedure provisions for preconditioning evaporative emission control systems and components, running loss and hot soak preconditioning tests, and test procedures for the 72-hour and steady-state diurnal tests. Finally, the OHRV Amendments include many of CARB's general compliance provisions, including among other provisions: Annual certification of the evaporative emission control systems, the applicability of the in-use recall provisions that CARB previously adopted for OHRVs in 1994, and emissions warranty requirements.⁷

B. Clean Air Act Nonroad Engine and Vehicle Authorizations

Section 209(e)(1) of the Act permanently preempts any state, or political subdivision thereof, from adopting or attempting to enforce any standard or other requirement relating to the control of emissions for certain new nonroad engines or vehicles.⁸ For all other nonroad engines, states generally are preempted from adopting and enforcing standards and other requirements relating to the control of emissions. Section 209(e)(2), however, requires the Administrator, after notice and opportunity for public hearing, to authorize California to adopt and enforce standards and other requirements relating to the control of emissions from such vehicles or engines if California determines that California standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. However, EPA shall not grant such authorization if it finds that (1) the determination of California is arbitrary and capricious; (2) California does not need such California standards to meet compelling and extraordinary conditions; or (3) California standards and accompanying enforcement

procedures are not consistent with [CAA section 209].⁹

On July 20, 1994, EPA promulgated a rule interpreting the three criteria set forth in section 209(e)(2)(A) that EPA must consider before granting any California authorization request for nonroad engine or vehicle emission standards.¹⁰ EPA revised these regulations in 1997.¹¹ As stated in the preamble to the 1994 rule, EPA historically has interpreted the consistency inquiry under the third criterion, outlined above and set forth in section 209(e)(2)(A)(iii), to require, at minimum, that California standards and enforcement procedures be consistent with section 209(a), section 209(e)(1), and section 209(b)(1)(C) of the Act.¹²

In order to be consistent with section 209(a), California's nonroad standards and enforcement procedures must not apply to new motor vehicles or new motor vehicle engines. To be consistent with section 209(e)(1), California's nonroad standards and enforcement procedures must not attempt to regulate engine categories that are permanently preempted from state regulation. To determine consistency with section 209(b)(1)(C), EPA typically reviews nonroad authorization requests under the same "consistency" criteria that are applied to motor vehicle waiver requests under section 209(b)(1)(C). That provision provides that the Administrator shall not grant California a motor vehicle waiver if she finds that California "standards and accompanying enforcement procedures

are not consistent with section 202(a)" of the Act. Previous decisions granting waivers and authorizations have noted that state standards and enforcement procedures will be found to be inconsistent with section 202(a) if (1) there is inadequate lead time to permit the development of the necessary technology, giving appropriate consideration to the cost of compliance within that time,¹³ or (2) the federal and state testing procedures impose inconsistent certification requirements.¹⁴

In light of the similar language in sections 209(b) and 209(e)(2)(A), EPA has reviewed California's requests for authorization of nonroad vehicle or engine standards under section 209(e)(2)(A) using the same principles that it has historically applied in reviewing requests for waivers of preemption for new motor vehicle or new motor vehicle engine standards under section 209(b).¹⁵ These principles include, among other things, that EPA should limit its inquiry to the three specific authorization criteria identified in section 209(e)(2)(A),¹⁶ and that EPA should give substantial deference to the policy judgments California has made in adopting its regulations. In previous waiver decisions, EPA has stated that Congress intended EPA's review of California's decision-making be narrow. EPA has rejected arguments that are not specified in the statute as grounds for denying a waiver:

The law makes it clear that the waiver requests cannot be denied unless the specific findings designated in the statute can properly be made. The issue of whether a proposed California requirement is likely to result in only marginal improvement in California air quality not commensurate with its costs or is otherwise an arguably unwise exercise of regulatory power is not legally pertinent to my decision under section 209, so long as the California requirement is consistent with section 202(a) and is more stringent than applicable Federal requirements in the sense that it may result in some further reduction in air pollution in California.¹⁷

¹³ H. Rep. No. 728, 90th Cong., 1st Sess. 21 (1967).

¹⁴ S. Rep. No. 403, 90th Cong., 1st Sess. 32 (1967).

¹⁵ See *Engine Manufacturers Association v. EPA*, 88 F.3d 1075, 1087 (D.C. Cir. 1996): "... EPA was within the bounds of permissible construction in analogizing § 209(e) on nonroad sources to § 209(a) on motor vehicles."

¹⁶ See EPA's Final 209(e) rulemaking at 59 FR 36969, 36983 (July 20, 1994).

¹⁷ "Waiver of Application of Clean Air Act to California State Standards," 36 FR 17458 (Aug. 31, 1971). Note that the more stringent standard expressed here, in 1971, was superseded by the 1977 amendments to section 209, which established that California must determine that its standards are, in the aggregate, at least as protective of public

Continued

⁷ See Authorization Request Support Document at 8–10 for a complete list of provisions.

⁸ States are expressly preempted from adopting or attempting to enforce any standard or other requirement relating to the control of emissions from new nonroad engines which are used in construction equipment or vehicles or used in farm equipment or vehicles and which are smaller than 175 horsepower. Such express preemption under section 209(e)(1) of the Act also applies to new locomotives or new engines used in locomotives. CAA § 209(e)(1), 42 U.S.C. 7543(e)(1)(A).

⁹ EPA's review of California regulations under section 209 is not a broad review of the reasonableness of the regulations or its compatibility with all other laws. Sections 209(b) and 209(e) of the Clean Air Act limit EPA's authority to deny California requests for waivers and authorizations to the three criteria listed therein. As a result, EPA has consistently refrained from denying California's requests for waivers and authorizations based on any other criteria. In instances where the U.S. Court of Appeals has reviewed EPA decisions declining to deny waiver requests based on criteria not found in section 209(b), the Court has upheld and agreed with EPA's determination. See *Motor and Equipment Manufacturers Ass'n v. Nichols*, 142 F.3d 449, 462–63, 466–67 (D.C. Cir. 1998), *Motor and Equipment Manufacturers Ass'n v. EPA*, 627 F.2d 1095, 1111, 1114–20 (D.C. Cir. 1979). See also 78 FR 58090, 58120 (September 20, 2013).

¹⁰ See "Air Pollution Control; Preemption of State Regulation for Nonroad Engine and Vehicle Standards," 59 FR 36969 (July 20, 1994).

¹¹ See "Control of Air Pollution: Emission Standards for New Nonroad Compression-Ignition Engines at or Above 37 Kilowatts; Preemption of State Regulation for Nonroad Engine and Vehicle Standards; Amendments to Rules," 62 FR 67733 (December 30, 1997). The applicable regulations are now found in 40 CFR part 1074, subpart B, section 1074.105.

¹² 59 FR 36969 (July 20, 1994). EPA has interpreted 209(b)(1)(C) in the context of section 209(b) motor vehicle waivers.

This principle of narrow EPA review has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit.¹⁸ Thus, EPA's consideration of all the evidence submitted concerning an authorization decision is circumscribed by its relevance to those questions that may be considered under section 209(e)(2)(A).

C. Deference to California

In previous waiver and authorization decisions, EPA has recognized that the intent of Congress in creating a limited review based on the section 209(b)(1) criteria was to ensure that the federal government did not second-guess state policy choices. As the agency explained in one prior waiver decision:

It is worth noting . . . I would feel constrained to approve a California approach to the problem which I might also feel unable to adopt at the federal level in my own capacity as a regulator. The whole approach of the Clean Air Act is to force the development of new types of emission control technology where that is needed by compelling the industry to "catch up" to some degree with newly promulgated standards. Such an approach . . . may be attended with costs, in the shape of reduced product offering, or price or fuel economy penalties, and by risks that a wider number of vehicle classes may not be able to complete their development work in time. Since a balancing of these risks and costs against the potential benefits from reduced emissions is a central policy decision for any regulatory agency under the statutory scheme outlined above, I believe I am required to give very substantial deference to California's judgments on this score.¹⁹

Similarly, EPA has stated that the text, structure, and history of the California waiver provision clearly indicate both a congressional intent and appropriate EPA practice of leaving the decision on "ambiguous and controversial matters of public policy" to California's judgment.²⁰ This interpretation is supported by relevant discussion in the House Committee Report for the 1977 amendments to the Clean Air Act.²¹ Congress had the opportunity through the 1977 amendments to restrict the preexisting

waiver provision, but elected instead to expand California's flexibility to adopt a complete program of motor vehicle emission controls. The report explains that the amendment is intended to ratify and strengthen the preexisting California waiver provision and to affirm the underlying intent of that provision, that is, to afford California the broadest possible discretion in selecting the best means to protect the health of its citizens and the public welfare.²²

D. Burden and Standard of Proof

As the U.S. Court of Appeals for the D.C. Circuit has made clear in *MEMA I*, opponents of a waiver request by California bear the burden of showing that the statutory criteria for a denial of the request have been met:

[T]he language of the statute and its legislative history indicate that California's regulations, and California's determinations that they must comply with the statute, when presented to the Administrator are presumed to satisfy the waiver requirements and that the burden of proving otherwise is on whoever attacks them. California must present its regulations and findings at the hearing and thereafter the parties opposing the waiver request bear the burden of persuading the Administrator that the waiver request should be denied.²³

The same logic applies to authorization requests. The Administrator's burden, on the other hand, is to make a reasonable evaluation of the information in the record in coming to the waiver decision. As the court in *MEMA I* stated: "here, too, if the Administrator ignores evidence demonstrating that the waiver should not be granted, or if he seeks to overcome that evidence with unsupported assumptions of his own, he runs the risk of having his waiver decision set aside as 'arbitrary and capricious.'" ²⁴ Therefore, the Administrator's burden is to act "reasonably."²⁵

With regard to the standard of proof, the court in *MEMA I* explained that the Administrator's role in a section 209 proceeding is to:

[. . .] consider all evidence that passes the threshold test of materiality and . . . thereafter assess such material evidence against a standard of proof to determine whether the parties favoring a denial of the waiver have shown that the factual circumstances exist in which Congress intended a denial of the waiver.²⁶

With regard to the protectiveness finding, the court upheld the Administrator's position that, to deny a waiver, there must be "clear and compelling evidence" to show that proposed enforcement procedures undermine the protectiveness of California's standards.²⁷ The court noted that this standard of proof also accords with the congressional intent to provide California with the broadest possible discretion in setting regulations it finds protective of the public health and welfare.²⁸

With respect to the consistency finding, the court did not articulate a standard of proof applicable to all proceedings, but found that the opponents of the waiver were unable to meet their burden of proof even if the standard were a mere preponderance of the evidence. EPA's past waiver decisions have consistently made clear that: "[E]ven in the two areas concededly reserved for Federal judgment by this legislation—the existence of 'compelling and extraordinary' conditions and whether the standards are technologically feasible—Congress intended that the standards of EPA review of the State decision to be a narrow one."²⁹

E. EPA's Administrative Process in Consideration of California's Commercial Harbor Craft Regulations

Upon review of CARB's request, EPA offered an opportunity for a public hearing, and requested written comment on issues relevant to a section 209(e)(2)(A) authorization analysis, by publication of a **Federal Register** notice on August 9, 2016.³⁰ Specifically, we requested comment on: (a) Whether CARB's determination that its standards, in the aggregate, are at least as protective of public health and welfare as applicable federal standards is arbitrary and capricious, (b) whether California needs such standards to meet compelling and extraordinary conditions, and (c) whether California's standards and accompanying enforcement procedures are consistent with section 209 of the Act.

EPA did not receive a request for hearing and therefore no hearing was held. EPA did not receive any written comments. EPA's evaluation is based on the record, which includes CARB's authorization request and accompanying documents.

health and welfare as applicable Federal standards. In the 1990 amendments to section 209, Congress established section 209(e) and similar language in section 209(e)(1)(i) pertaining to California's nonroad emission standards which California must determine to be, in the aggregate, at least as protective of public health and welfare as applicable federal standards.

II. Discussion

A. California's Protectiveness Determination

Section 209(e)(2)(i) of the Act instructs that EPA cannot grant an authorization if the agency finds that CARB was arbitrary and capricious in its determination that its standards are, in the aggregate, at least as protective of public health and welfare as applicable federal standards. CARB's Board made a protectiveness determination in Resolution 13–33, declaring that “the Amendments approved for adoption herein will not cause California emission standards, in the aggregate, to be less protective of public health and welfare than applicable federal standards.”³¹ CARB asserts that EPA has no basis to find that the CARB Board's determination is arbitrary or capricious.³² CARB notes that EPA's existing evaporative emission standards for 2008 and subsequent model year nonroad recreational vehicles and engines solely consist of permeation evaporative emission standards applicable to fuel tanks and fuel hoses. Conversely, CARB notes that the OHRV Amendments provide for more comprehensive control of the evaporative emission system. CARB projects the OHRV Amendments will reduce OHRV evaporative emissions by over 70 percent as compared to current model-year vehicles, and are therefore clearly, in the aggregate, at least as protective of the public health and welfare as applicable federal standards.

After evaluating the materials submitted by CARB, and since EPA has not adopted any comparable standards or requirements for OHRVs, and based on the lack of any comments submitted to the record, I cannot find that CARB's protectiveness determination is arbitrary and capricious and thus I cannot deny CARB's authorization request based on this criterion.

B. Need for California Standards To Meet Compelling and Extraordinary Conditions

Section 209(e)(2)(A)(ii) of the Act instructs that EPA cannot grant an authorization if the agency finds that California “does not need such California standards to meet compelling and extraordinary conditions.” EPA's inquiry under this second criterion (found both in paragraph 209(b)(1)(B) and 209(e)(2)(A)(ii)) has been to determine whether California needs its own mobile source pollution program

(i.e. set of standards) for the relevant class or category of vehicles or engines (e.g., on-highway mobile source or nonroad mobile source) to meet compelling and extraordinary conditions, and not whether the specific standards that are the subject of the authorization or waiver request are necessary to meet such conditions.³³

California has asserted its longstanding position that the State continues to need its own nonroad engine program to meet serious air pollution problems.³⁴ CARB notes that “California, and particularly the South Coast and San Joaquin Valley Air Basins, continue to experience some of the worst air quality in the nation and continue to be in non-attainment with national ambient air quality standards for fine particulate matter (“PM_{2.5}”) and ozone. The unique geographical and climatic conditions, and the tremendous growth in on and off-road vehicle population and use that moved Congress to authorize California to establish separate on-road motor vehicle standards in 1967 and off-road engine standards in 1990 still exists today.”³⁵

There has been no evidence submitted to indicate that California's compelling and extraordinary conditions do not continue to exist. California, including the South Coast and the San Joaquin Valley air basins, continues to experience some of the worst air quality in the nation and continues to be in non-attainment with national ambient air quality standards for PM_{2.5} and ozone.³⁶ In addition, EPA is not aware of any other information that would suggest that California no longer needs its nonroad emission program.

Therefore, based on the record of this request and absence of comments or other information to the contrary, I cannot find that California does not continue to need such state standards, including the OHRV Amendments, to address the “compelling and extraordinary conditions” underlying

the state's air pollution problems. I have determined that I cannot deny California authorization for its OHRV Amendments based on the section 209(e)(2)(A)(ii) criterion.

C. Consistency With Section 209 of the Clean Air Act

Section 209(e)(2)(A)(iii) of the Act instructs that EPA cannot grant an authorization if California's standards and enforcement procedures are not consistent with “this section.” As described above, EPA's section 209(e) rule states that the Administrator shall not grant authorization to California if she finds (among other tests) that the “California standards and accompanying enforcement procedures are not consistent with section 209.” EPA has interpreted this requirement to mean that California standards and accompanying enforcement procedures must be consistent with at least sections 209(a), 209(e)(1), and 209(b)(1)(C), as EPA has interpreted this last subsection in the context of motor vehicle waivers. Thus, this can be viewed as a three-pronged test.

1. Consistency With Section 209(a) and 209(e)(1)

To be consistent with section 209(a) of the Clean Air Act, California's OHRV Amendments (and CARB's underlying OHRV regulation) must not apply to new motor vehicles or new motor vehicle engines. California's OHRV regulation applies to a wide variety of vehicles, including off-road motorcycles, ATVs, off-road sport and utility vehicles, sand cars, and golf carts. CARB states that the OHRV Amendments, much like the previously authorized OHRV regulation, do not apply to the categories of preempted mobile sources. No commenter presented otherwise, and EPA is not otherwise aware of any contrary evidence; therefore, EPA cannot deny California's request on the basis that California's OHRV regulation (including the OHRV Amendments) is not consistent with section 209(a).

To be consistent with section 209(e)(1) of the Clean Air Act, California's OHRV regulation must not affect new farming or construction vehicles or engines that are below 175 horsepower, or new locomotives or their engines. CARB presents that OHRV engines are not used in locomotives and are not primarily used in farm and construction equipment or vehicles. No commenter presented otherwise, and EPA is not otherwise aware of any contrary evidence; therefore, I cannot deny California's request on the basis that California's OHRV regulation

³¹ Authorization Request Support Document at 11.

³³ See 74 FR 32744, 32761 (July 8, 2009); 49 FR 18887–18890 (May 3, 1984).

³⁴ See *Authorization Request Support Document* at p. 12, referencing CARB Board Resolution 13–33.

³⁵ *Id.* See 74 FR 32744, 32762–32763 (July 8, 2009); 79 FR 6584, 6588–6590 (February 4, 2014).

³⁶ 74 FR 32744, 32762–63 (July 8, 2009), 76 FR 77515, 77518 (December 13, 2011), 81 FR 95982 (December 29, 2016). EPA continually evaluates the air quality conditions in the United States, including California. California continues to experience some of the worst air quality in the country and continues to be in nonattainment with National Ambient Air Quality Standards for fine particulate matter and ozone, see “Notice of Availability of the Environmental Protection Agency's Preliminary Interstate Ozone Transport Modeling Data for the 2015 Ozone National Ambient Air Quality Standard (NAAQS)” at EPA–HQ–OAR–2016–0751.

(including the OHRV Amendments) is not consistent with section 209(e)(1).

2. Consistency With Section 209(b)(1)(C)

The requirement that California's standards be consistent with section 209(b)(1)(C) of the Clean Air Act effectively requires consistency with section 202(a) of the Act. California standards are inconsistent with section 202(a) of the Act if there is inadequate lead-time to permit the development of technology necessary to meet those requirements, giving appropriate consideration to the cost of compliance within that time. California's accompanying enforcement procedures would also be inconsistent with section 202(a) if the federal and California test procedures were not consistent. The scope of EPA's review of whether California's action is consistent with section 202(a) is narrow. The determination is limited to whether those opposed to the authorization or waiver have met their burden of establishing that California's standards are technologically infeasible, or that California's test procedures impose requirements inconsistent with the federal test procedure.³⁷

Congress has stated that the consistency requirement of section 202(a) relates to technological feasibility.³⁸ Section 202(a)(2) states, in part, that any regulation promulgated under its authority "shall take effect after such period as the Administrator finds necessary to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period." Section 202(a) thus requires the Administrator to first determine whether adequate technology already exists; or if it does not, whether there is adequate time to develop and apply the technology before the standards go into effect. The latter scenario also requires the Administrator to decide whether the cost of developing and applying the technology within that time is feasible. Previous EPA waivers are in accord with this position.³⁹

CARB states that its Staff Report explains the technology needed to comply with the primary diurnal evaporative emission standards and that such technology clearly exists as it is being used by manufacturers of on-road mobile sources.⁴⁰ In addition, CARB

states that it received no comments indicating that the requirements to comply with the new evaporative emission standards was technically infeasible.⁴¹ As described in the Staff Report, CARB identified (but did not prescribe) technologies that have been successfully employed in the automotive sector and that are expected to be utilized in OHRVs. These technologies include: Low permeation materials to be utilized in fuel tanks and fuel lines, activated carbon canisters to control diurnal emissions by capturing hydrocarbons that would otherwise be vented when the fuel system heats up during engine operation or storage, pressure relief valves on the vent of the fuel tank, strategic placement or insulation of the fuel tank so the tank is not affected by large temperature increases, and improvements in connectors, carburetors and fuel injectors.⁴² CARB also identifies roll-over values presently used in on-road motorcycles to meet the fuel system leakage test and notes that the ATV fuel filler neck compatibility requirement presents no issue since the fuel pipe sealing specification is identical to on-road motor vehicles.⁴³

With regard to test procedure consistency, CARB states that the OHRV Amendments present no issue of incompatibility between California and federal test procedures since there are no analogous federal standards or associated test procedures applicable to 2018 and subsequent model year nonroad recreational vehicles and engines.⁴⁴

EPA did not receive any comments that suggests California's OHRV Amendments regulations are technologically infeasible. In addition, EPA believes that CARB has reasonably identified, within the lead time provided, the types of technologies that can be used to meet the OHRV Amendments. EPA is not otherwise aware of any evidence to suggest such technologies cannot be employed in the manner CARB has identified. In addition, EPA finds no basis to determine that CARB's test procedures are incompatible with federal test procedures given the lack of applicable federal evaporative emission standards and test procedures.

Therefore, based on the record before us, I cannot find that the OHRV Amendments are technologically

infeasible or otherwise inconsistent with section 202(a). Therefore, I cannot deny CARB's authorization based on the section 202(a) criterion.

III. Decision

After evaluating California's OHRV Amendments and CARB's submissions for EPA review as described above, I am granting an authorization for the OHRV Amendments.

This decision will affect not only persons in California, but also manufacturers and/or owners/operators nationwide who must comply with California's requirements. In addition, because other states may adopt California's standards for which a section 209(e)(2)(A) authorization has been granted if certain criteria are met, this decision would also affect those states and those persons in such states. See CAA section 209(e)(2)(B). For these reasons, EPA determines and finds that this is a final action of national applicability, and also a final action of nationwide scope or effect for purposes of section 307(b)(1) of the Act. Pursuant to section 307(b)(1) of the Act, judicial review of this final action may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by March 20, 2017. Judicial review of this final action may not be obtained in subsequent enforcement proceedings, pursuant to section 307(b)(2) of the Act.

IV. Statutory and Executive Order Reviews

As with past authorization and waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Further, the Congressional Review Act, 5 U.S.C. 801, *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule for purposes of 5 U.S.C. 804(3).

Dated: January 11, 2017.

Gina McCarthy,
Administrator.

ENVIRONMENTAL PROTECTION AGENCY**[EPA-HQ-OPPT-2017-0002; FRL-9958-33]****Risk Evaluation Scoping Efforts Under TSCA for Ten Chemical Substances; Notice of Public Meeting****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: EPA will hold a public meeting to receive input and information to assist the Agency in its efforts to establish the scope of risk evaluations under development for the ten chemical substances designated on December 19, 2016 for risk evaluations pursuant to the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act. In particular, EPA is providing the public an opportunity to identify information specifically related to the conditions of use for the ten chemical substances (*i.e.*, the circumstances under which a chemical substance is intended, known, or reasonably foreseen to be manufactured, processed, distributed in commerce, used, or disposed of). EPA plans to use this information as it develops the scoping documents for the TSCA risk evaluations of the ten chemical substances; these scoping documents must be issued within six months of the **Federal Register** notice that designated the chemical substances for a TSCA risk evaluation (*i.e.*, for these ten chemical substances, the scoping documents must be issued by June 19, 2017).

DATES: *Meeting Date.* The meeting will be held on February 14, 2017 from 9:00 a.m. to 3:00 p.m.

To request accommodation of a disability, please contact the meeting logistics person listed under **FOR FURTHER INFORMATION CONTACT**, preferably by February 3, 2017, to give EPA as much time as possible to process your request.

Meeting Registration. You may register online (preferred) or in person at the meeting. To register online, for the meeting, go to: <https://tscachemicaluse.eventbrite.com>. Advance registration for the meeting must be completed no later than February 10, 2017. On-site registration will be permitted, but seating and speaking priority will be given to those who pre-register by the deadline.

Comments. EPA will hear oral comments at the meeting, and will accept written comments and materials submitted to the dockets on or before March 1, 2017. For further information

about participation and submitting materials, see Unit IV. under **SUPPLEMENTARY INFORMATION**.

ADDRESSES: *Meeting.* The meeting will be held at the Ronald Reagan Building and International Trade Center, in the Polaris Room, located at 1300 Pennsylvania Avenue Northwest, Washington, DC 20004. The meeting will also be available by remote access for registered participants.

FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Sheila Canavan, Chemical Control Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 566-1978; email address: Canavan.sheila@epa.gov.

For meeting logistics or registration contact: Klara Zimmerman; telephone number: (301) 634-1722; email address: Klara_Zimmerman@abtassoc.com.

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information***A. Does this action apply to me?*

You may be potentially affected by this action if you manufacture (defined under TSCA to include import), process, distribute in commerce, use or dispose of any of the ten chemical substances identified for risk evaluation in the **Federal Register** notice published on December 19, 2016, entitled “Designation of Ten Chemical Substances for Initial Risk Evaluations Under the Toxic Substances Control Act” (81 FR 91927). This action may be of particular interest to entities that are regulated under TSCA (*e.g.*, entities identified under North American Industrial Classification System (NAICS) codes 325 and 324110, among others). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities and corresponding NAICS codes for entities that may be interested in or affected by this action.

B. How can I get copies of this document and other related information?

The docket for this meeting, identified by docket identification (ID) number EPA-HQ-OPPT-2017-0002, is available at <http://www.regulations.gov> or at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency Docket Center (EPA/DC), West William

Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OPPT Docket is (202) 566-0280. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

II. Background

EPA is required to conduct chemical risk evaluations under section 6(b) the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment. (15 U.S.C. 2605(b)(4)). Pursuant to TSCA section 6(b)(2)(A), EPA identified ten chemical substances for initial risk evaluations under TSCA in the **Federal Register** notice of December 19, 2016, entitled “Designation of Ten Chemical Substances for Initial Risk Evaluations Under the Toxic Substances Control Act” (81 FR 91927) (FRL-9956-47).

The first step in the risk evaluation process, as outlined in TSCA, is to issue a scoping document for each chemical substance within six months of its designation in the **Federal Register**. TSCA section 6(b)(4)(B) also directs EPA to establish, by a rulemaking promulgated within one year of enactment, a process for conducting risk evaluations, which includes the process for issuing scoping documents. The Agency expects to propose such a procedural rule shortly, which will be applicable to risk evaluations once finalized. However, TSCA directed EPA to concurrently ensure that risk evaluations were being conducted on ten chemical substances by December 19, 2016. As a result, EPA must publish scoping documents for these initial ten chemical substances by June 19, 2017, which is before the procedural rule is expected to be finalized. Accordingly, EPA’s scoping efforts for these ten substances will be based directly on the terms of TSCA section 6(b)(4)(D), and not the pending procedural rulemaking. Each completed scoping document will describe the scope of information about the chemical substance that the Agency expects to consider in the risk evaluation, including its conditions of use, hazards, and exposures, including to potentially exposed or susceptible subpopulations.

At the public meeting, EPA will provide an overview briefing to describe the information the Agency has

obtained thus far relating to the conditions of use for the ten chemical substances. To assist EPA in this scoping process, EPA is providing the public with an opportunity to identify information specifically related to the conditions of use (*i.e.*, the circumstances under which a chemical substance is intended, known, or reasonably foreseen to be manufactured, processed, distributed in commerce, used, or disposed of). EPA plans to use this information as it develops scoping documents for the TSCA risk evaluations for the ten chemical substances.

In view of the statutory deadline to complete these ten risk evaluations, it will be difficult, and may not be possible, for EPA to adjust the scope of the evaluations following release of the scoping document under TSCA section 6(b)(4)(D). In addition, EPA notes that the scoping document is a foundation for determining the scope of preemption arising after final risk evaluations (TSCA section 18(a)(1)(B)). Thus, EPA requests that members of the public provide any available information relating to the scope of the risk evaluations at the February meeting or to the docket by March 1, 2017. EPA will likely not be able to accommodate information as to scope received after that time.

III. Meeting

A. Remote Access

The meeting will be accessible remotely for registered participants. Registered participants will receive information on how to connect remotely to the meeting prior to its start.

B. Public Participation at the Meeting

Anyone may register to attend the meeting as observers and may also register to provide oral comments on the day of the meeting. A registered speaker is encouraged to focus on issues directly relevant to the meeting's subject matter. Each speaker is allowed no more than 5 minutes to provide oral comments. To accommodate as many registered speakers as possible, speakers may present oral comments only, without visual aids or written material.

C. Submitting Written Materials

Anyone may submit written materials to the dockets described in Unit IV.C.

IV. How can I request to participate in this meeting?

A. Registration

To attend the meeting in person or to receive remote access, you must register no later than February 10, 2017, using

one of the methods described under **ADDRESSES**. While on-site registration will be available, seating will be on a first-come, first-served basis, with priority given to early registrants, until room capacity is reached. The Agency anticipates that approximately 125 people will be able to attend the meeting in person. For registrants not able to attend in person, the meeting will also provide remote access capabilities; registered participants will be provided information on how to connect to the meeting prior to its start.

B. Required Registration Information

Members of the public may register to attend as observers or speak if planning to offer oral comments during the scheduled public comment period. To register for the meeting online, you must provide your full name, organization or affiliation, and contact information to the on-line signup or to the meeting registration contact person listed under **FOR FURTHER INFORMATION CONTACT**. Do not submit any information in your request that is considered Confidential Business Information (CBI). Requests to participate in the meeting, identified by docket ID No. EPA-HQ-OPPT-2017-0002, must be received on or before February 10, 2017.

C. Risk Evaluation Dockets for the Ten Chemical Substances

You may also elect to provide information to EPA's dockets for the ten chemical substances for which risk evaluations have begun. EPA has established separate dockets for each of the ten chemical substances for risk evaluation to facilitate receipt of information which may be useful to the Agency's risk evaluations. As noted above, EPA is asking the public for assistance in identifying information specifically related to the conditions of use (*i.e.*, intended, known or reasonably foreseen uses) that would assist the Agency in identifying potential exposure scenarios (pathways, routes and populations). EPA is requesting that any such information be submitted by March 1, 2017.

1,4-Dioxane. Docket ID No.: EPA-HQ-OPPT-2016-0723.

1-Bromopropane. Docket ID No.: EPA-HQ-OPPT-2016-0741.

Asbestos. Docket ID No.: EPA-HQ-OPPT-2016-0736.

Carbon Tetrachloride. Docket ID No.: EPA-HQ-OPPT-2016-0733.

Cyclic Aliphatic Bromide Cluster (Hexabromocyclododecane or HBCD). Docket ID No.: EPA-HQ-OPPT-2016-0735.

Methylene Chloride. Docket ID No.: EPA-HQ-OPPT-2016-0742.

N-Methylpyrrolidone (NMP). Docket ID No.: EPA-HQ-OPPT-2016-0743.

Pigment Violet 29 (Anthra[2,1,9-def:6,5,10-d'e']diisoquinoline-1,3,8,10(2H,9H)-tetrone). Docket ID No.: EPA-HQ-OPPT-2016-0725.

Trichloroethylene (TCE). Docket ID No.: EPA-HQ-OPPT-2016-0737.

Tetrachloroethylene (also known as Perchloroethylene). Docket ID No.: EPA-HQ-OPPT-2016-0732.

Information can be submitted by one of the following methods:

Online using the Federal eRulemaking Portal: <http://www.regulations.gov>.

Follow the online instructions for submitting information or comments. Once submitted, this information cannot be edited or withdrawn. EPA may publish any information received to its public docket. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written statement or information. The written information should include discussion of all points you wish to make. Learn more about CBI or multimedia submissions, and general guidance on making effective comments or providing useful information by visiting EPA's Web site at <https://www.epa.gov/dockets/commenting-epa-dockets>.

Mail: Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460-0001.

Hand Delivery: To make special arrangements for hand delivery or delivery of boxed information, please follow instructions at <http://www.epa.gov/dockets/contacts.html>.

Authority: 15 U.S.C. 2605.

Dated: January 12, 2017.

James J. Jones,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OW-2016-0686; FRL-9958-49-OW]

Request for Nominations for Peer Reviewers and for Public Comment on Peer Review Materials To Inform the Derivation of a Water Concentration Value for Lead in Drinking Water

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for nominations for peer reviewers and request for public comment.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the release of materials for public comment that relate to the expert external peer review of documents intended to support the EPA's Safe Drinking Water Act assessment of lead in drinking water. EPA invites the public to nominate scientific experts to be considered as peer reviewers for the contract-managed peer review. Nominations of peer review candidates will be accepted by EPA's contractor, Eastern Research Group, Inc. (ERG). EPA also requests public comment on the draft report entitled "Proposed Modeling Approaches for a Health Based Benchmark for Lead in Drinking Water" and the draft charge questions for the expert peer review panel. These materials will be reviewed by an expert peer review panel and public comments will be made available to the peer reviewers for consideration in their review.

DATES: The nominations for expert peer review candidates must be received by ERG on or before February 21, 2017. Comments on the draft lead modeling report and draft peer review panel charge questions must be received by EPA on or before March 6, 2017.

ADDRESSES: Any interested person or organization may nominate scientific experts to be considered as peer reviewers. Nominations should be submitted to ERG no later than February 21, 2017 by one of the following methods:

- *Email:* peerreview@erg.com (subject line: Lead in Drinking Water Peer Review)
- *Mail:* Eastern Research Group, Inc. (ERG), 110 Hartwell Avenue, Lexington, MA 02421, ATTN: Laurie Waite (must arrive by nomination deadline).

Nominations should include all nominee information outlined in section III of the **SUPPLEMENTARY INFORMATION** section of this document.

Submit your comments on the draft lead modeling report and draft charge, identified by Docket ID No. EPA-HQ-OW-2016-0686, to the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is

restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment content located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Questions concerning nominations of expert peer reviewers should be directed to Eastern Research Group, Inc. (ERG), 110 Hartwell Avenue, Lexington, MA 02421; by email at peerreview@erg.com (subject line: Lead in Drinking Water Peer Review); or by phone: (781) 674-7362 (ask for Laurie Waite).

For additional information concerning the draft lead modeling report and draft peer review charge questions, please contact Erik Helm at the U.S. Environmental Protection Agency, Office of Ground Water and Drinking Water, Standards and Risk Management Division, (Mail Code 4607M), 1200 Pennsylvania Avenue NW., Washington, DC 20460; by phone: 202-566-1049; or by email: helm.erik@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Information on EPA's Lead in Drinking Water Modeling

EPA's Office of Ground Water and Drinking Water is in the process of considering National Primary Drinking Water Regulations for Lead and Copper: Regulatory Revisions (LCR) to improve public health protection by making changes to rule requirements under the Safe Drinking Water Act (SDWA). EPA has engaged with stakeholder groups and the public to inform revisions to the LCR. As part of this work, the EPA's National Drinking Water Advisory Committee (NDWAC) Lead and Copper Rule Working Group was established to inform NDWAC advice to the Administrator on recommendations to strengthen public health protections of the Lead and Copper Rule. In December 2015, the NDWAC provided specific recommendations to the EPA Administrator for LCR revisions related to lead service line replacement, public education, corrosion control treatment, copper, tap sampling, and the establishment of a "household action level." The NDWAC recommended that

water systems be required to notify the consumer and the local public health agency if this level was exceeded, with the expectation that individuals and local health officials will use this information to take prompt actions at the household level to mitigate lead risks.

While EPA has not yet determined the specific role of a household action level in the revised LCR, the Agency has developed potential scientific modeling approaches to define the relationship between lead levels in drinking water and blood lead levels, particularly for sensitive life stages such as formula fed infants and children up to age seven. EPA is using the terminology "health based benchmark" to refer to this concept. EPA is conducting an expert peer review of alternative approaches to inform future consideration of a health based benchmark for the LCR revisions. The purpose of this review is to obtain feedback on various lead modeling methods that can be used to characterize the relationship between lead in drinking water and children's blood lead levels.

EPA has developed three approaches that model how lead in drinking water influences blood lead levels (BLLs) of children. All the approaches use the Integrated Exposure Uptake and Biokinetic (IEUBK) Model for Lead in Children. Approaches 1 and 2 assess the relationship between water lead concentration and potential BLLs at different points in the IEUBK predicted distribution of BLLs. Approach 3 uses EPA's Stochastic Human Exposure and Dose Simulation model for multimedia, multipathway chemicals (SHEDS-Multimedia), coupled with IEUBK, to determine the drinking water lead concentrations that would result in BLLs at particular percentiles of a simulated national distribution of BLLs for children at various ages.

II. How To Obtain the Draft Lead Modeling Report and the Draft Peer Review Charge Questions

EPA's draft lead modeling report entitled "Proposed Modeling Approaches for a Health Based Benchmark for Lead in Drinking Water" and the draft charge for the peer review panel are available electronically and can be accessed using the Public Docket at <http://www.regulations.gov> (Docket ID No. EPA-HQ-OW-2016-0686). All written comments must be submitted during the public comment period.

III. How To Submit Nominations for Peer Reviewers

Expertise sought: EPA is seeking candidates who are nationally and/or

internationally recognized scientific experts to serve as external peer reviewers for the draft report regarding approaches to modeling children's BLL associated with lead in drinking water. The review is not intended to provide EPA with advice on the public health implications of alternative BLLs. As such, EPA is seeking nominees who possess a strong background and demonstrated expertise in one or more of the following areas: (1) Physiologically Based Pharmacokinetic modeling, particularly with regard to lead; (2) environmental lead exposure analyses, particularly with regard probabilistic modeling.

Selection criteria: Selection criteria for individuals nominated to serve as external peer reviewers of the draft report include the following: (1) Demonstrated expertise through relevant peer reviewed publications; (2) professional accomplishments and recognition by professional societies; (3) demonstrated ability to work constructively and effectively in a committee setting; (4) absence of financial conflicts of interest; (5) no actual conflicts of interest or appearance of lack of impartiality; (6) willingness to commit adequate time for the thorough review of the draft report; and (7) availability to participate in-person in a one-day or two-day peer review meeting in the Washington, DC metro area, projected to occur in June 2017 (exact date will be published in the **Federal Register** at least 30 days prior to the external peer review meeting). Further logistical information regarding the external peer review meeting will be announced at a later date in the **Federal Register**.

Required nominee information: To receive full consideration, the following information should be submitted to ERG at peerreview@erg.com (the subject line should read: Lead in Drinking Water Peer Review): (1) Contact information for the person making the nomination; (2) contact information for the nominee; (3) the disciplinary and specific areas of expertise of the nominee; (4) the nominee's curriculum vitae; and (5) a biographical sketch of the nominee indicating current position, educational background, past and current research activities, recent service on other advisory committees, peer review panels, editorial boards or professional organizations, sources of recent grant and/or contract support and other comments on the relevance of the nominee's expertise to this peer review topic. Compensation for non-federal peer reviewers will be provided by ERG.

Selection process: EPA's contractor, ERG, will notify nominees of selection

or non-selection. ERG may also conduct an independent search for candidates to assemble a balanced group representing the expertise needed to fully evaluate EPA's draft report, entitled "Proposed Modeling Approaches for a Health Based Benchmark for Lead in Drinking Water." ERG will consider and screen all nominees against the criteria previously listed. Following the screening process, ERG will narrow the list of potential reviewers to approximately 10–16 candidates. Prior to selecting the final peer reviewers, a **Federal Register** document will be published (exact date to be determined) to solicit comments on the interim list of candidates. In that document, the public will be requested to provide relevant information or documentation on the nominees within 30 days of the announcement of the interim list of candidates. Once ERG has considered the public comments on the interim list of candidates, ERG will select the final list of peer reviewers, based on who, collectively, will best provide expertise spanning the disciplines previously listed and (to the extent feasible) best provide a balance of perspectives.

Dated: January 10, 2017.

Joel Beauvais,

Deputy Assistant Administrator, Office of Water.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9958–16–OLEM]

FY2017 Supplemental Funding for Brownfields Revolving Loan Fund (RLF) Grantees

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of the availability of funds.

SUMMARY: The Environmental Protection Agency (EPA) plans to make available approximately \$13 million to provide supplemental funds to Revolving Loan Fund (RLF) capitalization grants previously awarded competitively under section 104(k)(3) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Brownfields Cleanup Revolving Loan Fund pilots awarded under section 104(d)(1) of CERCLA that have not transitioned to section 104(k)(3) grants are not eligible to apply for these funds. EPA will consider awarding supplemental funding only to RLF grantees who have demonstrated an

ability to deliver programmatic results by making at least one loan or subgrant. The award of these funds is based on the criteria described at CERCLA 104(k)(4)(A)(ii).

The Agency is now accepting requests for supplemental funding from RLF grantees. Requests for funding must be submitted to the appropriate EPA Regional Brownfields Coordinator (listed below) by March 1, 2017. Funding requests for hazardous substances and/or petroleum funding will be accepted. Specific information on submitting a request for RLF supplemental funding is described below and additional information may be obtained by contacting the EPA Regional Brownfields Coordinator.

DATES: This action is effective January 19, 2017.

ADDRESSES: A request for supplemental funding must be in the form of a letter addressed to the appropriate Regional Brownfields Coordinator (see listing below) with a copy to Pankaj Arora, arora.pankaj@epa.gov.

FOR FURTHER INFORMATION CONTACT: Pankaj Arora, U.S. EPA, (202) 566–1388 or the appropriate Brownfields Regional Coordinator.

SUPPLEMENTARY INFORMATION:

Background

The Small Business Liability Relief and Brownfields Revitalization Act added section 104(k) to CERCLA to authorize federal financial assistance for brownfields revitalization, including grants for assessment, cleanup and job training. Section 104(k) includes a provision for EPA to, among other things, award grants to eligible entities to capitalize Revolving Loan Funds and to provide loans and subgrants for brownfields cleanup. Section 104(k)(4)(A)(ii) authorizes EPA to make additional grant funds available to RLF grantees for any year after the year for which the initial grant is made (noncompetitive RLF supplemental funding) taking into consideration:

(I) The number of sites and number of communities that are addressed by the revolving loan fund;

(II) the demand for funding by eligible entities that have not previously received a grant under this subsection;

(III) the demonstrated ability of the eligible entity to use the revolving loan fund to enhance remediation and provide funds on a continuing basis; and

(IV) such other similar factors as the [Agency] considers appropriate to carry out this subsection.

Eligibility

In order to be considered for supplemental funding, grantees must demonstrate that they have significantly depleted funds (both EPA grant funding and any available pre- or post-closeout program income) and that they have a clear plan for quickly utilizing requested additional funds. Grantees must demonstrate that they have made at least one loan or subgrant prior to applying for this supplemental funding and have significantly depleted existing available funds. For FY2017, EPA defines "significantly depleted funds" as \$400,000 or less remaining unliquidated obligations from all of the EPA RLF grant funding and available pre- or post-closeout program income from all the open or closed EPA RLF grants. Additionally, the RLF recipient must have demonstrated a need for supplemental funding based on, among other factors, the number of sites that will be addressed; demonstrated the

ability to make loans and subgrants for cleanups that can be started and completed expeditiously (*i.e.*, "shovel-ready" projects) and will lead to redevelopment; demonstrated the existence of additional leveraged funds to complete the project in a timely manner and move quickly from cleanup to redevelopment, including the use of tax incentives such as new market tax credits, direct funding or other resources to advance the project to completion; demonstrated the ability to administer and revolve the capitalization funding in the RLF grant; demonstrated an ability to use the RLF grant to address funding gaps for cleanup; and demonstrated that they have provided a community benefit from past and potential loan(s) and/or subgrant(s). Special consideration may be given to those communities affected by plant closures or other economic disruptions; can demonstrate projects that have a clear prospect of aiding the

in-sourcing of manufacturing capacity and keeping and/or adding jobs, or otherwise creating jobs, in the affected area; or will benefit a community that has been identified as part of EPA's Cross Agency Strategy on Working to Make a Visible Difference in Communities. EPA encourages innovative approaches to maximizing revolving and leveraging with other funds, including use of grants funds as a loan loss guarantee, combining with other government or private sector lending resources. Applicants for supplemental funding must contact the appropriate Regional Brownfields Coordinator below to obtain information on the format for supplemental funding applications for their region. When requesting supplemental funding, applicants must specify whether they are seeking funding for sites contaminated by hazardous substances or petroleum. Applicants may request both types of funding.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

[WT Docket No. 17-17; DA 17-33]

Acumen Communications

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document commences a hearing to determine whether Acumen

Communications (Acumen) is qualified to be and to remain a Federal Communications Commission (Commission) licensee, and as a consequence thereof, whether any or all of its licenses should be revoked, and whether any or all of the applications to which Acumen is a party should be denied. As discussed more fully below, based on the totality of the evidence, there are substantial and material questions of fact as to whether Acumen

repeatedly made misrepresentations to and lacked candor with the Commission in its submission of fifty applications in connection with various Wireless Radio Service authorizations.

DATES: Each party to the proceeding (except for the Chief, Enforcement Bureau), in person or by counsel, shall file with the Commission, by January 30, 2017, a written appearance stating that the party will appear on the date fixed for hearing and present evidence on the issues specified herein.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Pamela Kane, Special Counsel, Enforcement Bureau, (202) 418-2393.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order to Show Cause, Hearing Designation Order and Notice of Opportunity for Hearing (Order) in WT Docket No. 17-17, DA 17-33, adopted on January 9, 2017, and released on January 10, 2017. The full text of the Order is available for inspection and copying during regular business hours in the FCC Reference Center, 445 12th Street SW., Room CY-A257, Portals II, Washington, DC 20554. This document is available in alternative formats (computer diskette, large print, audio record, and Braille). Persons with disabilities who need documents in these formats may contact the FCC by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

Synopsis

1. In this Order, the Commission commences a hearing proceeding before a Commission Administrative Law Judge to determine whether the pending applications of Acumen Communications should be granted, and whether Acumen's licenses should be revoked. Acumen represented to the Commission in fifty (50) license applications that no party directly or indirectly controlling Acumen has ever been convicted of a felony by any state or federal court. The information before us indicates that Hector Manuel Mosquera, a party directly or indirectly controlling Acumen, was convicted of a felony by a state court in California. The evidence further indicates that Mr. Mosquera signed Acumen's applications in which Acumen answered "N" to the felony question.

2. Accordingly, *it is ordered*, pursuant to sections 309(e), 312(a)(1), 312(a)(2), 312(a)(4), and 312(c) of the Act, 47 U.S.C. 309(e), 312(a)(1), 312(a)(2), 312(a)(4), and 312(c), that Acumen Communications shall show cause why

the authorizations for which it is the licensee set forth in Attachment A should not be revoked, and that the above-captioned applications filed by Acumen Communications are designated for hearing in a consolidated proceeding before an FCC

Administrative Law Judge, at a time and place to be specified in a subsequent Order, upon the following issues:

(a) To determine whether Hector Manuel Mosquera directly or indirectly controls Acumen.

(b) To determine whether Acumen engaged in misrepresentation and/or lack of candor in its applications with the Commission.

(c) To determine whether Acumen failed to amend its pending applications, in willful and/or repeated violation of section 1.65 of the Commission's rules.

(d) To determine, in light of the evidence adduced pursuant to the foregoing issues, whether Acumen is qualified to be and remain a Commission licensee.

(e) To determine, in light of the foregoing issues, whether the authorizations for which Acumen is the licensee should be revoked.

(f) To determine, in light of the foregoing issues, whether the captioned applications filed by or on behalf of Acumen should be granted.

3. *It is further ordered that*, in addition to the resolution of the foregoing issues, it shall be determined, pursuant to section 503(b)(1) of the Act, 47 U.S.C. 503(b)(1), whether an *order of forfeiture* should be issued against Acumen in an amount not to exceed the statutory limit for the willful and/or repeated violation of each rule section above for which the statute of limitations in section 503(b)(6) of the Act, 47 U.S.C. 503(b)(6), has not lapsed.

4. *It is further ordered that*, pursuant to section 312(c) of the Act and sections 1.91(c) and 1.221 of the rules, 47 U.S.C. 312(c) and 47 CFR 1.91(c) and 1.221, to avail itself of the opportunity to be heard and to present evidence at a hearing in this proceeding, Acumen, in person or by an attorney, *shall file* with the Commission, within 20 calendar days of the release of this Order, a written appearance stating that it will appear at the hearing and present evidence on the issues specified above.

5. *It is further ordered that*, pursuant to section 1.91 of the rules, 47 CFR 1.91, if Acumen fails to file a timely appearance, its right to a hearing shall be deemed to be waived. In the event the right to a hearing is waived, the Chief Administrative Law Judge (or presiding officer if one has been designated) shall, at the earliest

practicable date, issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. In addition, pursuant to section 1.221 of the Commission's rules, 47 CFR 1.221, if any applicant to any of the captioned applications fails to file a timely written appearance, the captioned application shall be dismissed with prejudice for failure to prosecute.

6. *It is further ordered* that the Chief, Enforcement Bureau, shall be made a party to this proceeding without the need to file a written appearance.

7. *It is further ordered* that pursuant to section 312(d) of the Act, 47 U.S.C. 312(d), and section 1.91(d) of the Commission's rules, 47 CFR 1.91(d), the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Enforcement Bureau as to the issues at 15(a)-(e), above, and that, pursuant to section 309(e) of the Act, 47 U.S.C. 309(e), and section 1.254 of the Commission's rules, 47 CFR 1.254, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon Acumen as to the issue at 15(f), above.

8. *It is further ordered* that Mobile Relay Associates shall be made a party to this hearing in its capacity as a petitioner to one or more of the captioned applications.

9. *It is further ordered* that a copy of this document, or a summary thereof, shall be published in the **Federal Register**.

Federal Communications Commission.

Scot Stone,

Deputy Chief, Mobility Division.

BILLING CODE 6715-01-P

FEDERAL HOUSING FINANCE AGENCY

[No. 2017-N-02]

Notice of Annual Adjustment of the Cap on Average Total Assets That Defines Community Financial Institutions

AGENCY: Federal Housing Finance Agency.

ACTION: Notice.

SUMMARY: The Federal Housing Finance Agency (FHFA) has adjusted the cap on average total assets that is used in determining whether a Federal Home Loan Bank (Bank) member qualifies as a "community financial institution" (CFI) to \$1,148,000,000, based on the annual percentage increase in the Consumer Price Index for all urban consumers (CPI-U), as published by the Department of Labor (DOL). These changes took effect on January 1, 2017.

FOR FURTHER INFORMATION CONTACT:

Kaitlin Hildner, Division of Federal Home Loan Bank Regulation, (202) 649-3329, Kaitlin.Hildner@fhfa.gov; or Eric M. Raudenbush, Associate General Counsel, (202) 649-3084, Eric.Raudenbush@fhfa.gov, (not toll-free numbers), Federal Housing Finance Agency, Constitution Center, 400 Seventh Street SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION:

I. Statutory and Regulatory Background

The Federal Home Loan Bank Act (Bank Act) confers upon insured depository institutions that meet the statutory definition of a CFI certain advantages over non-CFI insured depository institutions in qualifying for Bank membership, and in the purposes for which they may receive long-term advances and the collateral they may pledge to secure advances.¹ Section 2(10)(A) of the Bank Act and § 1263.1 of FHFA's regulations define a CFI as any Bank member the deposits of which are insured by the Federal Deposit Insurance Corporation and that has average total assets below the statutory

cap.² The Bank Act was amended in 2008 to set the statutory cap at \$1 billion and to require FHFA to adjust the cap annually to reflect the percentage increase in the CPI-U, as published by the DOL.³ For 2016, FHFA set the CFI asset cap at \$1,128,000,000, which reflected a 0.5 percent increase over 2015, based upon the increase in the CPI-U between 2014 and 2015.⁴

II. The CFI Asset Cap for 2017

As of January 1, 2017, FHFA has increased the CFI asset cap to \$1,148,000,000, which reflects a 1.7 percent increase in the unadjusted CPI-U from November 2015 to November 2016. Consistent with the practice of other Federal agencies, FHFA bases the annual adjustment to the CFI asset cap on the percentage increase in the CPI-U from November of the year prior to the preceding calendar year to November of the preceding calendar year, because the November figures represent the most recent available data as of January 1st of the current calendar year. The new CFI asset cap was obtained by applying the percentage increase in the CPI-U to the unrounded amount for the preceding year and rounding to the nearest million, as has been FHFA's practice for all previous adjustments.

In calculating the CFI asset cap, FHFA uses CPI-U data that have not been seasonally adjusted (*i.e.*, the data have not been adjusted to remove the estimated effect of price changes that normally occur at the same time and in about the same magnitude every year). The DOL encourages use of unadjusted CPI-U data in applying "escalation" provisions such as that governing the CFI asset cap, because the factors that are used to seasonally adjust the data are amended annually, and seasonally adjusted data that are published earlier are subject to revision for up to five years following their original release. Unadjusted data are not routinely subject to revision, and previously published unadjusted data are only corrected when significant calculation errors are discovered.

Dated: January 11, 2017.

Fred Graham,

Deputy Director, Division of Federal Home Loan Bank Regulation, Federal Housing Finance Agency.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of the agreements are available through the Commission's Web site (www.fmc.gov) or by contacting the Office of Agreements at (202)-523-5793 or tradeanalysis@fmc.gov.

Agreement No.: 012181-001.

Title: HLAG/HSDG Latin America Slot Exchange Agreement.

Parties: Hapag-Lloyd AG and Hamburg Sud.

Filing Party: Wayne R. Rohde, Esquire; Cozen O'Connor; 1200 19th Street NW., Washington, DC 20036.

Synopsis: The amendment increases the amount of space to be exchanged, provides for limited, defined flexibility in the amount of space to be exchanged going forward, and eliminates restrictions on the movement of cargo to/from certain locations.

Agreement No.: 012454.

Title: MOL/NMCC/WLS/SCC Space Charter Agreement.

Parties: Mitsui O.S.K. Lines, Ltd., Nissan Motor Car Carrier Co., Ltd., and World Logistics Service (U.S.A.), Inc. (collectively "MOL"); and Siem Car Carriers A/S.

Filing Party: Eric C. Jeffrey, Esq.; Nixon Peabody; 799 9th Street NW., Suite 500, Washington, DC 20001.

Synopsis: The agreement authorizes the parties to charter space to one another on an as needed, as available, basis for the carriage of vehicles and other Ro-Ro cargo in the trades between the United States and all foreign countries.

By Order of the Federal Maritime Commission.

Dated: January 13, 2017.

Rachel E. Dickon,

Assistant Secretary.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company

¹ See 12 U.S.C. 1424(a), 1430(a).

Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 14, 2017.

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480-0291:

1. *Hazen Bancorporation, Inc.*, Hazen, North Dakota; to increase its ownership of North Star Holding Company, Inc., Jamestown, North Dakota, as a result of a stock redemption of North Star Holding Company, and thereby indirectly control Unison Bank, Jamestown, North Dakota.

2. *McIntosh County Bank Holding Company, Inc.*, Ashley, North Dakota; to increase its ownership of North Star Holding Company, Inc., Jamestown, North Dakota, as a result of a stock redemption of North Star Holding Company, and thereby indirectly acquire control Unison Bank, Jamestown, North Dakota.

Board of Governors of the Federal Reserve System, January 13, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[Notice-ID-2016-03; Docket 2016-0002; Sequence No. 29]

Privacy Act of 1974; Notice of a New System of Records

AGENCY: General Services Administration (GSA).

ACTION: Notice of a new system of records.

SUMMARY: GSA proposes to establish a new system of records subject to the Privacy Act of 1974. The proposed system is a single sign-on platform to facilitate access to government services.

DATES: The system of records notice is effective upon its publication in today's **Federal Register**, with the exception of the routine uses which are effective February 21, 2017. Comments on the routine uses or other aspects of the system of records notice must be submitted by February 21, 2017.

ADDRESSES: Submit comments identified by "Notice-ID-2016-03, Notice of New System of Records" by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching for Notice-ID-2016-03, Notice of New System of Records. Select the link "Comment Now" that corresponds with "Notice-ID-2016-03, Notice of New System of Records." Follow the instructions provided on the screen. Please include your name, company name (if any), and "Notice-ID-2016-03, Notice of New System of Records" on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/Notice-ID-2016-03, Notice of New System of Records.

FOR FURTHER INFORMATION CONTACT: Call the GSA Chief Privacy Officer at telephone 202-322-8246; or email gsa.privacyact@gsa.gov.

SUPPLEMENTARY INFORMATION: GSA proposes to establish a new system of records subject to the Privacy Act of 1974, 5 U.S.C. 552a. The proposed system is a single sign-on platform to facilitate access to government services. The previously published notice, at 81 FR 57912, on August 24, 2016, is being replaced. The system is a single, secure platform through which members of the public can log-in and access services from participating federal agencies (partner agencies). All federal agencies are eligible to participate, and those that do will be listed on the *Login.gov*

information page. The platform will use information given by the user to identity proof them including email address, password, name, date of birth, address, phone number, and social security number.

Identity proofing is the process of verifying that a person is who they say they are. Personally Identifiable Information (PII) must be collected from a *Login.gov* user to identity proof that user and then authenticate that user's identity at a Level of Assurance (LOA) required by a partner agency to grant access to its information, applications, programs, or records (for the purpose of this notice, "services"). *Login.gov* authenticates a user by validating that person is the owner of an account through a valid username, password, and the completion of the multi-factor authentication step, for example by providing the one-time password they receive by phone.

Login.gov operates at two levels of assurance: Level of Assurance 1 (LOA1) and Level of Assurance 3 (LOA3). A user will only be asked for information based on the LOA required by the partner agency to access a given service. For example, in order to access a service that requires LOA1, the user will only be asked to provide an email address, password and phone number, because that information suffices for LOA1. To access a service that requires LOA3, the user will be asked to provide the above information as well as full name, date of birth, home address and Social Security Number. These two sets of PII comprise the user's LOA1 or LOA3 "account information," respectively.

Login.gov will collect and maintain a user's LOA1 account information, and if required, LOA3 account information. *Login.gov* will verify a user's identity at LOA3 by providing the user's LOA3 account information to a third party identity proofing service. Third party identity proofing services used by *Login.gov* may employ a variety of verification techniques, including, but not limited to, verifying a user's financial information or information from a user's government-issued identification.

The identity proofing process between *Login.gov* and a third party identity proofing service takes place within *Login.gov* after the user provides the information required by that third party identity proofing service. However, *Login.gov* does not retain a user's response(s) to any question(s) posed by a third party identity proofing service during the proofing process.

Once a user is proofed at LOA1, that user's account information will be assigned a meaningless, but unique,

number (MBUN) to identify the user in *Login.gov*. The user's MBUN (and the minimum set of user account information needed to allow access to the partner agency's service) will be provided to the partner agency only after the user gives permission to send that information.

The information in *Login.gov* is contributed voluntarily by the user and cannot be accessed, used, or disclosed by GSA without consent of the user, except as provided in this notice. A partner agency may add its own unique identifier to the user's *Login.gov* account information for the purpose of identifying the user on subsequent attempts to access that agency's services.

Login.gov follows National Institute of Standards and Technology (NIST) Special Publication 800-63-2, "Electronic Authentication Guideline" and will employ third party identity proofing services, proofing using government data sources, including government-issued identification.

Richard Speidel,

Chief Privacy Officer, Office of the Deputy Chief Information Officer, General Services Administration.

SYSTEM NAME AND NUMBER:

Login.gov, GSA/TTS-1.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

The system is owned and maintained by GSA, housed in secure datacenters in continental United States. Contact the System Manager listed below for additional information.

SYSTEM MANAGER:

Joel Minton, Director, *Login.gov*, General Services Administration, 1800 F Street NW., Washington, DC 20405. <https://www.Login.gov>.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

E-Government Act of 2002 (Pub. L. 107-347, 44 U.S.C. 3501 note), 6 U.S.C. 1523 (b)(1)(A)-(E), and 40 U.S.C. 501.

PURPOSE(S) OF THE SYSTEM:

The purpose of the system is to provide a single, secure platform through which members of the public can log-in and access services from partner agencies, and to increase user security by facilitating identity proofing and authentication as necessary in order to access specific government services.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Anyone with an email account and access to a phone is able to create an

account at any time. Individuals in this system of records are members of the public seeking electronic access to a service from a participating Federal agency (partner agency), including anyone attempting to authenticate and/or identity proof for the purpose of obtaining a credential to electronically access a partner agency's services. All federal agencies are eligible to participate, and those that do will be listed on the *Login.gov* information page.

CATEGORIES OF RECORDS IN THE SYSTEM:

The information collected by *Login.gov* is necessary to perform identity proofing at the partner agency's required level of assurance (LOA). A user's account information is only retained as necessary to manage the user's credential. The only information a user must provide to identity proof at LOA1 is an email address, password and phone number. For LOA3 identity proofing, the above information is collected, as well as the user's name, address, birth date, Social Security number.

If a third party identity proofing service is unable to proof the user based on the user's LOA3 account information, *Login.gov* may request additional information from the user. However, any additional questions from the third party identity proofing service and the user's responses will not be retained by *Login.gov* after the user logs off.

Each third party identity proofing service will send information back to *Login.gov* about its attempt to identity proof the user including: Transaction ID; pass/fail indicator; date/time of transaction; and codes associated with the transaction data.

Each partner agency whose services the user accesses via *Login.gov* may add its own unique identifier to that user's account information.

RECORD SOURCE CATEGORIES:

The sources for information in the system are the individual *Login.gov* users. Each third party identity proofing service will provide transaction details about its attempt to identity proof a user and each partner agency whose services the user accesses via *Login.gov* may provide its own unique identifier to that user's account information.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information

contained in this system may be disclosed to authorized entities, as is determined to be relevant and necessary, outside GSA as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

a. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when: (a) GSA or any component thereof, or (b) any employee of GSA in his/her official capacity, or (c) any employee of GSA in his/her individual capacity where DOJ or GSA has agreed to represent the employee, or (d) the United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and GSA determines that the records are both relevant and necessary to the litigation.

b. To NIST-compliant third party identity proofing services, as necessary to identity proof an individual for access to a service at the required level of assurance.

c. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

d. To a Member of Congress or his or her staff in response to a request made on behalf of and at the request of the individual who is the subject of the record.

e. To the Office of Management and Budget (OMB) and the Government Accountability Office (GAO) in accordance with their responsibilities for evaluation or oversight of Federal programs.

f. To an expert, consultant, or contractor of GSA in the performance of a Federal duty to which the information is relevant.

g. To the National Archives and Records Administration (NARA) for records management purposes.

h. To appropriate agencies, entities, and persons when (1) GSA suspects or has confirmed that there has been a breach of the system of records; (2) GSA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, GSA (including its information systems, programs and operations), the Federal Government, or national security; and (3) the disclosure made to such

agencies, entities, and persons is reasonably necessary to assist in connection with GSA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

i. To another Federal agency or Federal entity, when GSA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

All records are stored electronically in a database. User account information is encrypted in transit and at rest.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

The user's email address and phone number, which are part of LOA1 account information, can be retrieved using *Login.gov* developed software with system access. When the user provides their password or recovery code, the system retrieves that user's LOA1 account information (email, password, and phone number) or LOA3 account information (full name, date of birth, home address and Social Security Number) using a search of the email addresses in the system. However, each user's LOA3 account information is encrypted such that neither the system nor system operators can retrieve it without the user providing their password or recovery code.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

System records will be retained and disposed of in accordance with NARA's General Records Schedule (GRS) Transmittal 26, section 3.2 "System access records" covering user profiles, log-in files, password files, audit trail files and extracts, system usage files, and cost-back files used to assess charges for system use. The guidance instructs, "Destroy 6 years after password is altered or user account is terminated, but longer retention is authorized if required for business use."

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records in the system are protected from unauthorized access and misuse through various administrative, technical and physical security

measures. Technical security measures within GSA include restrictions on computer access to authorized individuals, required use of strong passwords that are frequently changed and regular review of security procedures and best practices to enhance security. Access to the *Login.gov* database is maintained behind an industry-standard firewall and information in the database is encrypted. As noted above, neither the system nor the system operators can retrieve the user's LOA3 account information without the user supplying a password or recovery code.

RECORD ACCESS PROCEDURES:

Individuals or users wishing to access their own records may do so by providing their email address, password, and a multi-factor authentication token (e.g. a one-time password or code sent to the user's phone) to *Login.gov*, or by contacting the system administrator at the above address.

CONTESTING RECORD PROCEDURES:

Users can modify, or amend, any of their user account information by accessing it in their account. Users that want access to partner agency records, or to contest the contents of those records, need to make a request with that agency.

NOTIFICATION PROCEDURE:

Users create their account information and, thereafter, access it by providing their email address, password, and a multi-factor authentication token (e.g. a one-time password or code sent to the user's phone). Inquiries can be made via the Web site at <https://Login.gov/> or at the above address under 'System Manager and Address'.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

This notice replaces the previously published notice at 81 FR 57912, on August 24, 2016.

[FR Doc. 2017-01174 Filed 1-18-17; 8:45 am]

BILLING CODE 6820-34-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-17-0739; Docket No. CDC-2016-0114]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuous information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comments on the CDC Chronic Disease Management Information System (CDMIS). The Management Information System is a central repository for the work plans of state oral health programs. This includes their goals, objectives, performance milestones, indicators, oral health program performance activities and budget information.

DATES: Written comments must be received on or before March 20, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2016-0114 by any of the following methods:

- *Federal eRulemaking Portal:* *Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *Regulations.gov*, including any personal information provided. For access to the docket to read background documents or comments received, go to *Regulations.gov*.

Please note: All public comments should be submitted through the Federal eRulemaking portal (*Regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of

the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology

and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

CDC Oral Health Management Information System (OMB Control Number 0920-0739, expires 5/31/2017)—Revision—Division of Oral Health (DOH), National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The CDC Division of Oral Health (DOH) works with state health departments to improve the oral health of the nation. Targeted efforts include building and/or maintaining effective public health capacity for the implementation, evaluation, and dissemination of evidence-based practices in oral disease prevention and advancement of oral health. Through a cooperative agreement program (Program Announcement DP13-1307), DOH has provided funding to 21 states over a five-year period, in which 3 are basic level awardees and 18 are enhanced level. The current cooperative agreement went into effect in September 2013 and builds on previously funded collaborations involving DOH and state programs.

DOH is currently approved to collect annual progress and activity reports from state-based oral health programs. Historically, an electronic reporting system has been in place since 2007 and was enhanced in 2008 to capture information about grantees' success stories. This system, formerly known as the Management Overview for Logistics, Analysis, and Reporting (MOLAR)

system was retired in 2013-14. The new cooperative agreement, DP13-1307, was transitioned to the enhanced CDMIS platform in Fiscal Year (FY) 2013 to align with the CDC Funding Opportunity Announcement (FOA) redesign required for all domestic, non-research FOAs. The redesign emphasized evaluation, performance measurement, and outcomes. The information collected in CDMIS improved CDC's ability to disseminate information about successful public health approaches that can be replicated or adapted for use in other states.

The initial data for DP13-1307 was entered into CDMIS when the cooperative agreement began. Subsequently, only annual progress reports are required for basic and enhanced level awardees. This has resulted in no changes in how the information is collected as well as a reduction in the burden of information required by awardees. The estimated burden for system maintenance and annual reporting is three hours for basic level awardees and nine hours for enhanced level.

The revised method provides a more accurate depiction of burden per respondent in comparison to the method presented in previous OMB requests for approval, which were based on a long-term average burden per response. Even though reports will be submitted to CDC annually, states may enter updates into the MIS at any time. CDC uses all information collected to monitor awardee activities and to provide any technical assistance or follow-up support that may be needed.

OMB approval is requested for three years. Participation in the progress reporting system is a condition of the award for all funded state oral health programs.

All information will be collected electronically and there are no costs to respondents other than their time. The total estimated annualized burden hours are 171.

ESTIMATED ANNUALIZED BURDEN OF HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Program Awardees Basic Level	Annual Progress Report	3	1	3	9
Program Awardees Enhanced Level	Annual Progress Report	18	1	9	162
Total	171

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Designation of a Class of Employees for Addition to the Special Exposure Cohort

AGENCY: National Institute for
Occupational Safety and Health
(NIOSH), Centers for Disease Control
and Prevention, Department of Health
and Human Services (HHS).

ACTION: Notice.

SUMMARY: HHS gives notice of a
decision to designate a class of
employees from the Pantex Plant in
Amarillo, Texas, as an addition to the
Special Exposure Cohort (SEC) under
the Energy Employees Occupational
Illness Compensation Program Act of
2000.

FOR FURTHER INFORMATION CONTACT:

Stuart L. Hinnefeld, Director, Division
of Compensation Analysis and Support,
NIOSH, 1090 Tusculum Avenue,
MS C-46, Cincinnati, OH 45226-1938,
Telephone 1-877-222-7570.
Information requests can also be
submitted by email to DCAS@CDC.GOV.

SUPPLEMENTARY INFORMATION:

Authority: 42 U.S.C. 7384q(b). 42 U.S.C.
7384l(14)(C).

On January 4, 2017, as provided for
under 42 U.S.C. 7384l(14)(C), the
Secretary of HHS designated the
following class of employees as an
addition to the SEC:

All employees of the Department of
Energy, its predecessor agencies, and their
contractors and subcontractors who worked
at the Pantex Plant in Amarillo, Texas,
during the period from January 1, 1951,
through December 31, 1957, for a number of
work days aggregating at least 250 work days,
occurring either solely under this
employment or in combination with work
days within the parameters established for
one or more other classes of employees in the
Special Exposure Cohort.

This designation will become
effective on February 3, 2017, unless
Congress provides otherwise prior to the
effective date. After this effective date,
HHS will publish a notice in the
Federal Register reporting the addition
of this class to the SEC or the result of
any provision by Congress regarding the

decision by HHS to add the class to the
SEC.

Frank Hearl

*Chief of Staff, National Institute for
Occupational Safety and Health.*

BILLING CODE 4163-19-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Center for Health Statistics (NCHS) Confidentiality Pledge Revision Notice

AGENCY: Centers for Disease Control and
Prevention (CDC), Department of Health
and Human Services (HHS).

ACTION: General notice—notice of
revision of confidentiality pledges
under the Confidential Information
Protection and Statistical Efficiency Act.

SUMMARY: Under 44 U.S.C. 3506(e) and
44 U.S.C. 3501, CDC's National Center
for Health Statistics (NCHS) is
announcing revisions to the
confidentiality pledge(s) it provides to
its respondents under the Confidential
Information Protection and Statistical
Efficiency Act (44 U.S.C. 3501)
(CIPSEA). These revisions are required
by the passage and implementation of
provisions of the Federal Cybersecurity
Enhancement Act of 2015 (H.R. 2029,
Division N, Title II, Subtitle B, Sec.
223), which permit and require the
Secretary of the Department of
Homeland Security (DHS) to provide
Federal civilian agencies' information
technology systems with cybersecurity
protection for their Internet traffic. More
details on this announcement are
presented in the **SUPPLEMENTARY
INFORMATION** section below.

DATES: These revisions become effective
January 19, 2017.

ADDRESSES: Questions about this notice
should be addressed to the Information
Collection Review Office, Centers for
Disease Control and Prevention, 1600
Clifton Road NE., MS-D74, Atlanta,
Georgia 30329.

FOR FURTHER INFORMATION CONTACT:

Leroy A. Richardson by telephone at
404-639-7570 (this is not a toll-free
number); by email omb@cdc.gov, or by
mail Information Collection Review
Office, Centers for Disease Control and
Prevention, 1600 Clifton Road NE., MS-
D74, Atlanta, Georgia 30329. Because of
delays in the receipt of regular mail
related to security screening,
respondents are encouraged to use
electronic communications.

SUPPLEMENTARY INFORMATION: Federal
statistics provide key information that
the Nation uses to measure its
performance and make informed
choices about budgets, employment,
health, investments, taxes, and a host of
other significant topics. The
overwhelming majority of Federal
surveys are conducted on a voluntary
basis. Respondents, ranging from
businesses to households to institutions,
may choose whether or not to provide
the requested information. Many of the
most valuable Federal statistics come
from surveys that ask for highly
sensitive information such as
proprietary business data from
companies or particularly personal
information or practices from
individuals. The CDC's National Center
for Health Statistics (NCHS) protects all
data collected under its authority under
the confidentiality provisions of section
308(d) of the Public Health Service Act
(42 U.S.C. 242m). Strong and trusted
confidentiality and exclusively
statistical use pledges under the
Confidential Information Protection and
Statistical Efficiency Act (CIPSEA) and
similar statistical confidentiality
pledges are effective and necessary in
honoring the trust that businesses,
individuals, and institutions, by their
responses, place in statistical agencies.

Under CIPSEA and similar statistical
confidentiality protection statutes, many
Federal statistical agencies make
statutory pledges that the information
respondents provide will be seen only
by statistical agency personnel or their
sworn agents, and will be used only for
statistical purposes. CIPSEA and similar
statutes protect the confidentiality of
information that agencies collect solely
for statistical purposes and under a
pledge of confidentiality. These acts
protect such statistical information from
administrative, law enforcement,
taxation, regulatory, or any other non-
statistical use and immunize the
information submitted to statistical
agencies from legal process. Moreover,
many of these statutes carry criminal
penalties of a Class E felony (fines up to
\$250,000, or up to five years in prison,
or both) for conviction of a knowing and
willful unauthorized disclosure of
covered information.

As part of the Consolidated
Appropriations Act for Fiscal Year 2016
signed on December 17, 2015, the
Congress included the Federal
Cybersecurity Enhancement Act of 2015
(H.R. 2029, Division N, Title II, Subtitle
B, Sec. 223). This Act, among other
provisions, permits and requires the
Secretary of the Department of
Homeland Security (DHS) to provide
Federal civilian agencies' information

technology systems with cybersecurity protection for their Internet traffic. The technology currently used to provide this protection against cyber malware is known as Einstein 3A; it electronically searches Internet traffic in and out of Federal civilian agencies in real time for malware signatures.

When such a signature is found, the Internet packets that contain the malware signature are shunted aside for further inspection by DHS personnel. Because it is possible that such packets entering or leaving a statistical agency's information technology system may contain a small portion of confidential statistical data, statistical agencies can no longer promise their respondents that their responses will be seen only by statistical agency personnel or their sworn agents. However, they can promise, in accordance with provisions of the Federal Cybersecurity Enhancement Act of 2015, that such monitoring can be used only to protect information and information systems from cybersecurity risks, thereby, in effect, providing stronger protection to the integrity of the respondents' submissions.

Consequently, with the passage of the Federal Cybersecurity Enhancement Act of 2015, the Federal statistical community has an opportunity to welcome the further protection of its confidential data offered by DHS' Einstein 3A cybersecurity protection program. The DHS cybersecurity program's objective is to protect Federal civilian information systems from malicious malware attacks. The Federal

statistical system's objective is to ensure that the DHS Secretary performs those essential duties in a manner that honors the Government's statutory promises to the public to protect their confidential data. Given that the Department of Homeland Security is not a Federal statistical agency, both DHS and the Federal statistical system have been successfully engaged in finding a way to balance both objectives and achieve these mutually reinforcing objectives.

However, many current CIPSEA and similar statistical confidentiality pledges promise that respondents' data will be seen only by statistical agency personnel or their sworn agents. Since it is possible that DHS personnel could see some portion of those confidential data in the course of examining the suspicious Internet packets identified by Einstein 3A sensors, statistical agencies need to revise their confidentiality pledges to reflect this process change.

Therefore, NCHS is providing this notice to alert the public to these confidentiality pledge revisions in an efficient and coordinated fashion. Below is a table listing NCHS's current Paperwork Reduction Act (PRA) OMB Control numbers and information collection titles and their associated revised confidentiality pledge(s) for the Information Collections whose confidentiality pledges will change to reflect the statutory implementation of DHS' Einstein 3A monitoring for cybersecurity protection purposes.

The following NCHS statistical confidentiality pledge will now apply to the Information Collections whose

Paperwork Reduction Act Office of Management and Budget numbers and titles are listed below.

We take your privacy very seriously. All information that relates to or describes identifiable characteristics of individuals, a practice, or an establishment will be used only for statistical purposes. NCHS staff, contractors, and agents will not disclose or release responses in identifiable form without the consent of the individual or establishment in accordance with section 308(d) of the Public Health Service Act (42 U.S.C. 242m) and the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA, Title 5 of Public Law 107–347). In accordance with CIPSEA, every NCHS employee, contractor, and agent has taken an oath and is subject to a jail term of up to five years, a fine of up to \$250,000, or both if he or she willfully discloses ANY identifiable information about you. In addition, NCHS complies with the Federal Cybersecurity Enhancement Act of 2015. This law requires the federal government to protect federal computer networks by using computer security programs to identify cybersecurity risks like hacking, internet attacks, and other security weaknesses. If information sent through government networks triggers a cyber threat indicator, the information may be intercepted and reviewed for cyber threats by computer network experts working for, or on behalf of the government.

NCHS'S CURRENT OMB CONTROL NUMBERS

OMB control No.	Title of information collection
0920–0119	National Ambulatory Medical Care Survey Supplement on Culturally and Linguistically Appropriate Services (NAMCS CLAS).
0920–0212	National Hospital Care Survey.
0920–0213	NCHS: National Vital Statistics Report Forms.
0920–0214	National Health Interview Survey.
0920–0215	Application Form and Related Forms for the Operation of the National Death Index.
0920–0217	NCHS Application for Vital Statistics Training Form.
0920–0222	NCHS Questionnaire Design Research Laboratory.
0920–0234	National Ambulatory Medical Care Survey (NAMCS).
0920–0278	National Hospital Ambulatory Medical Care Survey.
0920–0314	National Survey of Family Growth.
0920–0729	Customer Surveys Generic Clearance for the National Center for Health Statistics.
0920–0943	Data Collection for the Residential Care Community and Adult Day Services Center Components of the National Study of Long-term Care Providers.
0920–0950	National Health and Nutrition Examination Survey.
0920–1015	The National Ambulatory Medical Care Survey (NAMCS) National Electronic Health Record Survey (NEHRS).
0920–1030	Developmental Studies to Improve the National Health Care Surveys.
0920–1063	NAMCS Supplement of Primary Care Policies (NSPCP) for Managing Patients with High Blood Pressure, High Cholesterol, or Diabetes.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Designation of a Class of Employees for Addition to the Special Exposure Cohort

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention, Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HHS gives notice of a decision to designate a class of employees from Area IV of the Santa Susana Field Laboratory in Ventura County, California, as an addition to the Special Exposure Cohort (SEC) under the Energy Employees Occupational Illness Compensation Program Act of 2000.

FOR FURTHER INFORMATION CONTACT: Stuart L. Hinnefeld, Director, Division of Compensation Analysis and Support, NIOSH, 1090 Tusculum Avenue, MS C-46, Cincinnati, OH 45226-1938, Telephone 1-877-222-7570. Information requests can also be submitted by email to DCAS@CDC.GOV.

SUPPLEMENTARY INFORMATION:

Authority: 42 U.S.C. 7384q(b). 42 U.S.C. 7384l(14)(C).

On January 6, 2017, as provided for under 42 U.S.C. 7384l(14)(C), the Secretary of HHS designated the following class of employees as an addition to the SEC:

All employees of the Department of Energy, its predecessor agencies, and their contractors and subcontractors who worked in any area at Area IV of the Santa Susana Field Laboratory in Ventura County, California, from January 1, 1965, through December 31, 1988, for a number of work days aggregating at least 250 work days, occurring either solely under this employment or in combination with work days within the parameters established for one or more other classes of employees included in the Special Exposure Cohort.

This designation will become effective on February 5, 2017, unless Congress provides otherwise prior to the effective date. After this effective date, HHS will publish a notice in the **Federal Register** reporting the addition of this class to the SEC or the result of

any provision by Congress regarding the decision by HHS to add the class to the SEC.

Frank Hearl,
*Chief of Staff, National Institute for
 Occupational Safety and Health.*

BILLING CODE 4163-19-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10142]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by February 21, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR, Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Bid Pricing Tool (BPT) for Medicare Advantage (MA) Plans and Prescription Drug Plans (PDP); *Use:* We require that Medicare Advantage organizations and Prescription Drug Plans complete the BPT as part of the annual bidding process. During this process, organizations prepare their proposed actuarial bid pricing for the upcoming contract year and submit them to us for review and approval. The purpose of the BPT is to collect the actuarial pricing information for each plan. The BPT calculates the plan's bid, enrollee premiums, and payment rates. We publish beneficiary premium information using a variety of formats (www.medicare.gov, the Medicare & You handbook, Summary of Benefits marketing information) for the purpose of beneficiary education and

enrollment. *Form Number:* CMS–10142 (OMB control number: 0938–0944); *Frequency:* Yearly; *Affected Public:* Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 555; *Total Annual Responses:* 4,995; *Total Annual Hours:* 149,850. (For policy questions regarding this collection contact Rachel Shevland at 410–786–3026.)

Dated: January 13, 2017.

William N. Parham, III,
Director, Paperwork Reduction Staff, Office
of Strategic Operations and Regulatory
Affairs.

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare &
Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by March 20, 2017.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and

recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number _____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT:
Reports Clearance Office at (410) 786–
1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10120 1932(a) State Plan Amendment Template, State Plan Requirements and Supporting Regulations

CMS–10501 Healthcare Fraud Prevention Partnership (HFPP): Data Sharing and Information Exchange

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of

information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* 1932(a) State Plan Amendment Template, State Plan Requirements and Supporting Regulations; *Use:* Section 1932(a)(1)(A) of the Social Security Act (the Act) grants states the authority to enroll Medicaid beneficiaries on a mandatory basis into managed care entities and primary care case managers. Under this authority, a state can amend its Medicaid state plan to require certain categories of Medicaid beneficiaries to enroll in managed care entities without being out of compliance with section 1902 of the Act on state-wideness (42 CFR 431.50), freedom of choice (42 CFR 431.51) or comparability (42 CFR 440.230). The template may be used by states to modify their state plans if they choose to implement the provisions of section 1932(a)(1)(A); *Form Number:* CMS–10120 (OMB control number: 0938–0933); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 12; *Total Annual Hours:* 70. (For policy questions regarding this collection contact Debbie Anderson at 410–786–5545.)

2. *Type of Information Collection Request:* Revision of a currently approved information collection; *Title of Information Collection:* Healthcare Fraud Prevention Partnership (HFPP): Data Sharing and Information Exchange; *Use:* Section 1128C(a)(2) of the Social Security Act (42 U.S.C. 1320a–7c(a)(2)) authorizes the Secretary and the Attorney General to consult, and arrange for the sharing of data with, representatives of health plans for purposes of establishing a Fraud and Abuse Control Program as specified in Section 1128(C)(a)(1) of the Social Security Act. The result of this authority has been the establishment of the Healthcare Fraud Prevention Partnership (HFPP). The HFPP was officially established by a Charter in the fall of 2012 and signed by HHS Secretary Sibelius and US Attorney General Holder. Data sharing within the HFPP primarily focuses on conducting studies for the purpose of combatting fraud, waste, and abuse. These studies are intended to target specific

vulnerabilities within the payment systems in both the public and private healthcare sectors. The HFPP and its committees design and develop studies in coordination with the TTP. The core function of the TTP is to manage and execute the HFPP studies within the HFPP. Specifically, the TTP collects and consolidates partner (both public and private) study-related data in order to share information among the HFPP pertaining to analytical tools and techniques; study analysis; successful anti-fraud practices, trends and vulnerabilities; and reports that maintain the confidentiality of its source data.

Please note that on December 16, 2016 (81 FR 91175), a notice published in the **Federal Register** for the HFPP. However, the incorrect abstract published with the notice. In addition, it was identified under the incorrect CMS number. We are republishing this notice with the correct abstract and form number. In addition, the 60-day notice and comment will commence with the publication of this new notice. *Form Number*: CMS-10501 (OMB control number: 0938-1251); *Frequency*: Occasionally; *Affected Public*: Private sector (Business or other for-profits); *Number of Respondents*: 20; *Total Annual Responses*: 20; *Total Annual Hours*: 360. (For policy questions regarding this collection contact Marnie Dorsey at 410-786-5942.)

Dated: January 13, 2017.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS-3339-N]

Medicare Program; Meeting of the Medicare Evidence Development and Coverage Advisory Committee—March 22, 2017

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces that a public meeting of the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) (“Committee”) will be held on Wednesday, March 22, 2017. This meeting will specifically focus on

obtaining the MEDCAC’s recommendations regarding what health outcomes in studies for heart failure treatment technologies should be of interest to CMS. This meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)).

DATES:

Meeting Date: The public meeting will be held on Wednesday, March 22, 2017 from 7:30 a.m. until 4:30 p.m., Eastern Daylight Time (EDT).

Deadline for Submission of Written Comments: Written comments must be received at the address specified in the **ADDRESSES** section of this notice by 5:00 p.m., Eastern Standard Time (EST), Tuesday, February 21, 2017. Once submitted, all comments are final.

Deadlines for Speaker Registration and Presentation Materials: The deadline to register to be a speaker and to submit PowerPoint presentation materials and writings that will be used in support of an oral presentation is 5:00 p.m., EST on Tuesday, February 21, 2017. Speakers may register by phone or via email by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Presentation materials must be received at the address specified in the **ADDRESSES** section of this notice.

Deadline for All Other Attendees Registration: Individuals may register online at <http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3> or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by 5:00 p.m. EDT, Wednesday, March 15, 2017.

We will be broadcasting the meeting live via Webcast at <http://www.cms.gov/live/>.

Deadline for Submitting a Request for Special Accommodations: Persons attending the meeting who are hearing or visually impaired, or have a condition that requires special assistance or accommodations, are asked to contact the Executive Secretary as specified in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than 5:00 p.m., EST Friday, March 3, 2017.

ADDRESSES:

Meeting Location: The meeting will be held in the main auditorium of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244.

Submission of Presentations and Comments: Presentation materials and written comments that will be presented at the meeting must be submitted via email to MedCACpresentations@

cms.hhs.gov or by regular mail to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the date specified in the **DATES** section of this notice.

FOR FURTHER INFORMATION CONTACT:

Maria Ellis, Executive Secretary for MEDCAC, Centers for Medicare & Medicaid Services, Center for Clinical Standards and Quality, Coverage and Analysis Group, S3-02-01, 7500 Security Boulevard, Baltimore, MD 21244 or contact Ms. Ellis by phone (410-786-0309) or via email at Maria.Ellis@cms.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

MEDCAC, formerly known as the Medicare Coverage Advisory Committee (MCAC), is advisory in nature, with all final coverage decisions resting with CMS. MEDCAC is used to supplement CMS’ internal expertise. Accordingly, the advice rendered by the MEDCAC is most useful when it results from a process of full scientific inquiry and thoughtful discussion, in an open forum, with careful framing of recommendations and clear identification of the basis of those recommendations. MEDCAC members are valued for their background, education, and expertise in a wide variety of scientific, clinical, and other related fields. (For more information on MCAC, see the MEDCAC Charter (<http://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/Downloads/medcaccharter.pdf>) and the CMS Guidance Document, *Factors CMS Considers in Referring Topics to the MEDCAC* (<http://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=10>)).

II. Meeting Topic and Format

This notice announces the Wednesday, March 22, 2017, public meeting of the Committee. During this meeting, the Committee will discuss recommendations regarding what health outcomes in studies for heart failure treatment technologies should be of interest to CMS. Background information about this topic, including panel materials, is available at <http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=BAAAAAAAAAAAA&>. We will no longer be providing paper copies of the handouts for the meeting. Electronic copies of all the meeting materials will be on the CMS Web site no later than 2 business days before the meeting. We encourage the participation of organizations with expertise in what

health outcomes in studies for heart failure treatment technologies should be of interest to CMS. This meeting is open to the public. The Committee will hear oral presentations from the public for approximately 45 minutes. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, we may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by February 27, 2017. Your comments should focus on issues specific to the list of topics that we have proposed to the Committee. The list of research topics to be discussed at the meeting will be available on the following Web site prior to the meeting: <http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=AAAAAAAAAAAA&>. We require that you declare at the meeting whether you have any financial involvement with manufacturers (or their competitors) of any items or services being discussed. Speakers presenting at the MEDCAC meeting should include a full disclosure slide as their second slide in their presentation for financial interests (for example, type of financial association—consultant, research support, advisory board, and an indication of level, such as minor association <\$10,000 or major association >\$10,000) as well as intellectual conflicts of interest (for example, involvement in a federal or nonfederal advisory committee that has discussed the issue) that may pertain in any way to the subject of this meeting. If you are representing an organization, we require that you also disclose conflict of interest information for that organization. If you do not have a PowerPoint presentation, you will need to present the full disclosure information requested previously at the beginning of your statement to the Committee.

The Committee will deliberate openly on the topics under consideration. Interested persons may observe the deliberations, but the Committee will not hear further comments during this time except at the request of the chairperson. The Committee will also allow a 15-minute unscheduled open public session for any attendee to address issues specific to the topics under consideration. At the conclusion of the day, the members will vote and the Committee will make its recommendation(s) to CMS.

III. Registration Instructions

CMS' Coverage and Analysis Group is coordinating meeting registration. While there is no registration fee, individuals must register to attend. You may register online at <http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3> or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the deadline listed in the **DATES** section of this notice. Please provide your full name (as it appears on your state-issued driver's license), address, organization, telephone number(s), fax number, and email address. You will receive a registration confirmation with instructions for your arrival at the CMS complex or you will be notified that the seating capacity has been reached.

IV. Security, Building, and Parking Guidelines

This meeting will be held in a federal government building; therefore, federal security measures are applicable. The Real ID Act, enacted in 2005, establishes minimum standards for the issuance of state-issued driver's licenses and identification (ID) cards. It prohibits Federal agencies from accepting an official driver's license or ID card from a state unless the Department of Homeland Security determines that the state meets these standards. Beginning October 2015, photo IDs (such as a valid driver's license) issued by a state or territory not in compliance with the Real ID Act will not be accepted as identification to enter Federal buildings. Visitors from these states/territories will need to provide alternative proof of identification (such as a valid passport) to gain entrance into CMS buildings. The current list of states from which a Federal agency may accept driver's licenses for an official purpose is found at <http://www.dhs.gov/real-id-enforcement-brief>. We recommend that confirmed registrants arrive reasonably early, but no earlier than 45 minutes prior to the start of the meeting, to allow additional time to clear security. Security measures include the following:

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel.
- Inspection of vehicle's interior and exterior (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Inspection, via metal detector or other applicable means, of all persons

entering the building. We note that all items brought into CMS, whether personal or for the purpose of presentation or to support a presentation, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for presentation or to support a presentation.

Note: Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting. The public may not enter the building earlier than 45 minutes prior to the convening of the meeting.

All visitors must be escorted in areas other than the lower and first floor levels in the Central Building.

V. Collection of Information

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Authority: 5 U.S.C. App. 2, section 10(a).

Dated: January 10, 2017.

Kate Goodrich,

Director, Center for Clinical Standards and Quality, Centers for Medicare & Medicaid Services.

[FR Doc. 2017-01043 Filed 1-18-17; 8:45 am]

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2008-D-0394]

Regulation of Intentionally Altered Genomic DNA in Animals; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry (GFI) #187 entitled "Regulation of Intentionally Altered Genomic DNA in Animals." This draft guidance revises GFI #187 entitled "Regulation of Genetically Engineered Animals Containing Heritable Recombinant DNA Constructs" (current GFI #187). Current GFI #187 clarifies FDA's requirements

and recommendations for producers and developers of genetically engineered (GE) animals and their products. It describes how the new animal drug provisions of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) apply with respect to GE animals. This draft revision of current GFI #187 expands the scope of the guidance to include animals intentionally altered through use of genome editing techniques. The draft revised GFI #187 now applies to “those animals whose genomes have been intentionally altered using modern molecular technologies.” The Agency is seeking comment on the draft revised GFI #187, including the nomenclature that best describes these animals and on any existing empirical evidence indicating that certain types of genome editing may pose minimal risk.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by April 19, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of

Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2008-D-0394 for “Regulation of Intentionally Altered Genomic DNA in Animals.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets

Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Policy and Regulations Staff (HFV-6), Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Laura R. Epstein, Center for Veterinary Medicine (HFV-1), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 301-796-8558, laura.epstein@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability, for public comment, of draft revised GFI #187 entitled “Regulation of Intentionally Altered Genomic DNA in Animals.” This draft guidance revises current GFI #187 entitled “Regulation of Genetically Engineered Animals Containing Heritable recombinant DNA Constructs” to expand the scope of the guidance to address animals intentionally altered through use of genome editing techniques. FDA is also requesting comment on nomenclature and on whether certain types of genome editing may pose minimal risk. Before finalizing the draft revised guidance, the agency intends to modify its regulatory approach if it receives evidence demonstrating low risk.

In the *National Strategy for Modernizing the Regulatory System for Biotechnology Products* (the *Strategy*; released by the White House Office of Science and Technology Policy on September 16, 2016),¹ FDA noted its intent to clarify its policy on the regulation of products derived from genome editing techniques, including, as appropriate, identifying and/or updating relevant existing guidance documents. FDA also stated, as an example, its intent to update GFI #187, “Regulation of Genetically Engineered Animals Containing Heritable Recombinant DNA Constructs,” to clarify how developers of animals produced using emerging technologies (e.g., genome editing) may meet applicable statutory and regulatory requirements. FDA is issuing this draft revised guidance for public comment consistent with this commitment in the *Strategy* document. Under the Coordinated Framework for the

¹ https://www.whitehouse.gov/sites/default/files/microsites/ostp/biotech_national_strategy_final.pdf.

Regulation of Biotechnology, we intend to work cooperatively with other relevant agencies that may also be considering their policies or approaches related to genome editing applications within their jurisdictions. As we finalize the draft revised guidance, we will be consistent with the principles for the regulation of biotechnology products articulated in the 2017 Update to the Coordinated Framework (https://www.whitehouse.gov/sites/default/files/microsites/ostp/2017_coordinated_framework_update.pdf) and the goals and objectives of the July 2015 EOP memorandum (https://www.whitehouse.gov/sites/default/files/microsites/ostp/modernizing_the_reg_system_for_biotech_products_memo_final.pdf).

A. Key Draft Revisions

Draft revised GFI #187 is intended to clarify that, unless otherwise excluded,² the altered genomic DNA in an animal (referred to in this document as “animals with intentionally altered genomic DNA”) that is intended to affect the structure or function of the body of the animal or, in some cases, to diagnose, cure, mitigate, treat, or prevent disease in the animal, meets the drug definition in section 201(g) of the FD&C Act. For the purposes of draft revised GFI #187, “altered genomic DNA” refers to the portion of an animal’s genome that has been intentionally altered. Such intentional alterations may be made, for example, through the use of “nucleases” or “genome editing technologies,” including engineered nuclease/nucleotide complexes such as zinc finger nucleases (ZFN), transcription activator-like effector nucleases (TALENs), and the clustered regulatory interspersed short palindromic repeats (CRISPR) associated systems.

Similar to current GFI #187, draft revised GFI #187 is intended to clarify FDA’s requirements and recommendations for producers and developers of animals with intentionally altered genomic DNA. Current GFI #187 and draft revised GFI #187 describe how the new animal drug provisions of the FD&C Act apply with respect to the

intentionally altered genomic DNA of such animals.

Animals may have intentional genomic alterations that are heritable or non-heritable (e.g., those alterations intended to be used as gene therapy). Although much of draft revised GFI #187 is relevant to non-heritable intentional genomic alterations, and FDA intends to regulate non-heritable intentional genomic alterations in much the same way as described in this draft revised guidance, this draft revised guidance primarily addresses animals whose genomes have been intentionally altered for heritable purposes.

B. Additional Issues for Consideration and Comment

FDA requests comment on draft revised GFI #187. In particular, we request comments on two major categories of questions.

1. In the first, we seek the public’s input on how to refer to these animals. In the past, FDA has used the term “genetically engineered” to refer to animals containing recombinant DNA constructs intended to alter the structure or function of the body of the animal. For this draft revised guidance, we have used the phrase “animals whose genomes have been altered intentionally.” Other terms that could be used include “genome edited animals,” “intentionally altered animals,” or expanding the term “genetically engineered” to include the deliberate modification of the characteristics of an organism by manipulating its genetic material. The public is encouraged to suggest other phrases that are accurate and inclusive.

2. The second set of questions for which we seek public input is on whether there is any existing empirical evidence demonstrating that certain types of genome editing may pose minimal risk, with particular emphasis on the following:

a. Are there categories of animals whose genomes have been intentionally altered for which specific empirical evidence indicates that there are no significant target animal, user safety, food safety, or environmental risks? If so, what is that evidence?

b. Are there categories of animals whose genomes have been intentionally altered for which empirical evidence exists to demonstrate that genome editing is durable on a genotypic and phenotypic level and would continue to be durable over the lifetime of a particular product? If so, what is that evidence?

c. Is there empirical evidence to demonstrate that there are degrees of introduced changes (e.g., insertions or

deletions of any size or single nucleotide substitutions) that are likely to pose less risk than other changes? If so, what is that evidence?

d. Is there empirical evidence that indicates that the degree of taxonomic relationship between the introduced gene and the recipient animal influences the health of that recipient animal or the extent to which the trait is expressed? If so, what is that evidence?

We noted in current GFI #187 that we might issue a separate guidance on the regulation of GE animals bearing non-heritable alterations. Draft revised GFI #187 removes references to this and other guidance documents that we intend to develop in the future. This was not done to indicate that we no longer intend to issue such guidance documents. In light of changing priorities over time, we may issue other guidance documents before developing those identified in current GFI #187, and therefore decided we should not indicate in the text of the revised guidance any additional guidance documents that we may develop in the future.

Current GFI #187 states, “FDA is discussing with other agencies the best approach for oversight of GE insects. Future guidance may be developed to address them.” Draft revised GFI #187 eliminates this language. As indicated in the *Strategy*, FDA, EPA, and USDA intend to “continue to examine their regulatory structures with the goal of clarifying how the U.S. Federal Government will regulate genetically engineered insects in an integrated and coordinated fashion to cover the full range of potential products.” FDA is continuing to work with EPA and USDA, and will address this issue through action(s) separate from this draft revision to current GFI #187. Elsewhere in this issue of the **Federal Register**, we have published a notice announcing the availability of a draft guidance for industry on regulation of mosquito-related products.

II. Significance of Guidance

This level 1 draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on Regulation of Intentionally Altered Genomic DNA in Animals. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

² In Draft Guidance for Industry #236, “Regulation of Mosquito-Related Products,” FDA has proposed to clarify that the phrase “articles (other than food) intended to affect the structure or any function of the body of man or other animals” does not include articles intended to prevent, destroy, repel, or mitigate mosquitoes for population control purposes. Instead, such products are pesticides regulated by the Environmental Protection Agency (EPA) (<http://www.fda.gov/downloads/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/UCM533600.pdf>).

III. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information have been approved under OMB Control Nos. 0910–0032, 0910–0045, 0910–0117, and 0910–0284.

IV. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm> or <http://www.regulations.gov>.

[Docket No. FDA–2016–N–4389]

Genome Editing in New Plant Varieties Used for Foods; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification; establishment of docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the establishment of a docket to receive comments on the use of genome editing techniques to produce new plant varieties that are used for human or animal food. We invite comment on specific questions contained in this document related to foods derived from such genome edited plant varieties. FDA is taking this action to help inform our thinking about foods derived from new plant varieties produced using genome editing techniques.

DATES: Submit either electronic or written comments by April 19, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2016–N–4389 for “Genome Editing in New Plant Varieties Used For Foods; Request for Comments.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments

received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:

Regarding human food issues: Jason Dietz, Center for Food Safety and Applied Nutrition (HFS-205), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-2282. *Regarding animal food issues:* Kathleen Jones, Center for Veterinary Medicine (HFV-220), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240-402-5938.

SUPPLEMENTARY INFORMATION:

I. Background

Use of Genome Editing Techniques To Produce New Plant Varieties Used for Human or Animal Food

Recently, new technologies have emerged that are intended to alter the genomes of various organisms, including plants. FDA is aware that these technologies make it easier for plant developers to produce new plant varieties with targeted genetic modifications. Using deoxyribonucleic acid (DNA) sequence information from a plant, plant breeders can make targeted changes to a plant's DNA sequence to alter expression of traits in the plant. These new methods include processes using targeted nucleases (clustered regulatory interspersed short palindromic repeat associated nucleases, zinc-finger nucleases, meganucleases, and transcription activator-like effector nucleases or targeted oligonucleotides (oligonucleotide-directed mutagenesis) intended to modify a plant's DNA sequence by insertion, deletion, or substitution of nucleotides at a specific site in a plant's genome. The process of producing these targeted DNA sequence alterations is often referred to as "genome editing."

In the *National Strategy for Modernizing the Regulatory System for Biotechnology Products* (the *Strategy*; released by the White House Office of Science and Technology Policy on September 16, 2016),¹ FDA noted its intent to clarify its policy for the regulation of products derived from genome editing techniques, including, as appropriate, identifying and/or updating relevant existing guidance documents. Consistent with this

commitment in the *Strategy* document, FDA is opening this docket to inform its thinking on foods derived from plants produced using genome editing techniques. FDA also looks forward to receiving the results from the study being conducted by the National Academies of Sciences, Engineering, and Medicine entitled "*Future Biotechnology Products and Opportunities to Enhance Capabilities of the Biotechnology Regulatory System*" commissioned under the Update to the Coordinated Framework for Regulation of Biotechnology, available at <http://nas-sites.org/biotech/>. As we consider this issue, we intend for our actions to be guided by the principles for the regulation of biotechnology products articulated in the 2017 Update to the Coordinated Framework (https://www.whitehouse.gov/sites/default/files/microsites/ostp/2017_coordinated_framework_update.pdf) and the goals and objectives of the July 2015 EOP memorandum (https://www.whitehouse.gov/sites/default/files/microsites/ostp/modernizing_the_reg_system_for_biotech_products_memo_final.pdf).

Producers of foods from plant varieties developed using genome editing techniques, like all food producers, have an obligation under the Federal Food, Drug, and Cosmetic Act (the FD&C Act) to ensure that the foods they offer consumers are safe and in compliance with applicable legal requirements (57 FR 22984 at 22985), available at <http://www.fda.gov/Food/GuidanceRegulation/GuidanceDocumentsRegulatoryInformation/Biotechnology/ucm096095.htm>. The FD&C Act gives FDA broad authority to initiate legal action against a food that is adulterated or misbranded within the meaning of the statute (id.). In 1992, FDA issued a statement of policy (57 FR 22984) that discussed scientific issues and provided guidance relevant to the safety assessment of foods derived from new plant varieties derived by traditional methods, tissue culture methods, and recombinant DNA methods (57 FR 22984 at 22991). The guidance provided in the 1992 policy has helped to ensure that developers of new plant varieties make market entry decisions consistent with the FD&C Act. FDA also explained that we have long regarded it to be a prudent practice for producers of foods using new technologies to work cooperatively with us to ensure that the new products are safe and comply with applicable legal requirements (57 FR 22984 at 22991). Over the past 20 years, developers have

routinely consulted FDA about the safety and legality of foods from new genetically engineered plant varieties prior to marketing. These consultations have relied on the objective characteristics of foods to consider their safety and legality prior to marketing. This process has worked well and has helped developers ensure that all safety and other legal issues are satisfactorily addressed prior to market entry of foods derived from these new varieties. FDA intends to continue offering consultations for developers of new plant varieties, including those produced using genome editing, in order to help developers ensure that applicable safety and legal questions are resolved prior to market. In addition to the information we anticipate gathering from developers in the course of consultations, we recognize that developers, researchers, and other stakeholders may have valuable factual information and data about foods derived from new plant varieties produced using genome editing, which can help inform FDA's thinking for these specific products. Therefore, we invite comment in this notice.

II. Additional Issues for Consideration and Invitation for Comment: Genome Editing in Plants

To help inform our thinking on foods derived from new plant varieties produced using genome editing, we invite comment on the following questions:

1. In what ways are the food safety risks associated with human and animal foods from genome edited plants the same as or different from those associated with other plant development methods (e.g., hybridization, chemical or radiation-induced mutagenesis and non-targeted genetic modifications using in vitro recombinant DNA technologies)? Please provide data and/or information to support your view.

- To what extent is the scientific knowledge of and experience with current new plant varieties (such as those developed with in vitro recombinant DNA technologies that have gone through the voluntary consultation process) relevant to the safety assessment and regulatory status of food from new plant varieties produced using genome editing? Is there additional scientific knowledge that would be relevant specifically to the safety assessment and regulatory status of new plant varieties produced using genome editing? Please provide data and/or information to support your view.

¹ https://www.whitehouse.gov/sites/default/files/microsites/ostp/biotech_national_strategy_final.pdf.

2. Are there categories of genome edited plant varieties for which there are scientific bases to conclude that foods from such categories are unlikely to present food safety risks different from or greater than those for traditional plant breeding? Similarly, are there categories of genome edited plant varieties for which the regulatory status of the food derived from such plant varieties can be said to be no different from that of traditionally-bred plants? If there are such categories, is there a basis upon which to determine that there would be no reason to include them in any voluntary premarket consultation process? If so, please describe the characteristics of such categories (including, for example, information about the types of phenotypes and modifications (insertions, deletions or substitutions) achieved through genome editing) and provide data and/or information for why plant varieties in these categories are unlikely to present food safety risks or regulatory status questions. Regulatory status questions may include, for example, whether food from the new plant variety contains an unapproved food or color additive such that premarket review and approval is required (see sections 409 and 721 of the FD&C Act). As another example, if food from the new plant variety has a different nutritional profile from food from traditionally-bred plants, then certain labeling may be required to disclose a material change in the food.

a. If such categories exist, how do plant developers ensure the safety of foods from new plant varieties in these categories? For example, how are safety assessments of foods from these varieties accomplished, and what data and information are or should be considered in such assessments?

b. If certain categories of genome edited plants do not raise questions of safety or regulatory status, should there nevertheless be a mechanism separate from the voluntary premarket consultation process through which plant developers may voluntarily notify FDA about their intent to market a food derived from a genome edited new plant variety that falls within these categories? If so, what process should plant developers use to notify FDA? What kind of information should be included in such a notification to FDA?

c. Given that genome editing techniques can give rise to a broad range of plant modifications, from simple gene deletions to totally novel genes, and that some such modifications can be achieved through traditional breeding, please discuss the basis upon which to determine that there would or would not be a reason to include, in any

voluntary premarket consultation process, foods from genome edited crops with modifications that could have been achieved through traditional breeding.

3. Are there categories of genome edited plant varieties for which there are scientific bases to conclude that foods from these categories are more likely than traditionally-bred plants to present food safety risks? If so, please describe the characteristics of these categories (including, for example, information about the types of phenotypes and modifications (insertions, deletions or substitutions) achieved through genome editing) and provide data and/or information to support why plant varieties in these categories are more likely to present food safety risks than traditionally-bred plants.

4. What steps can we take to help small firms, including those who may be considering using genome editing to produce new plant varieties for use in human or animal food, to engage with FDA about any questions related to food safety or the regulatory status of foods from their new plant varieties? Please provide supporting data and other information to support your comments and responses to this question.

Dated: January 11, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2017-N-0084]

Agency Information Collection Activities; Proposed Collection; Comment Request; Adverse Event Program for Medical Devices (Medical Product Safety Network)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for

public comment in response to the notice. This notice solicits comments on the Adverse Event Program for Medical Devices (Medical Product Safety Network (MedSun)).

DATES: Submit either electronic or written comments on the collection of information by March 20, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2017-N-0084 for "Adverse Event Program for Medical Devices (Medical Product Safety Network (MedSun))." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at

<http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Adverse Event Program for Medical Devices (Medical Product Safety Network (MedSun))—OMB Control Number 0910–0471—Extension

Under section 519 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360i) authorizes FDA to require (1) manufacturers to report medical device-related deaths, serious injuries, and malfunctions; and (2) user facilities to report device-related deaths directly to manufacturers and FDA and serious injuries to the manufacturer. Section 213 of the Food

and Drug Administration Modernization Act of 1997 (Pub. L. 105–115) amended section 519(b) of the FD&C Act relating to mandatory reporting by user facilities of deaths, serious injuries, and serious illnesses associated with the use of medical devices. This amendment legislated the replacement of universal user facility reporting by a system that is limited to a “subset of user facilities that constitutes a representative profile of user reports” for device-related deaths and serious injuries. This amendment is reflected in section 519(b)(5)(A) of the FD&C Act. This legislation provides FDA with the opportunity to design and implement a national surveillance network, composed of well-trained clinical facilities, to provide high-quality data on medical devices in clinical use. This system is called MedSun.

FDA is seeking OMB clearance to continue to use electronic data collection to obtain the information on Form FDA 3500A (approved under OMB control number 0910–0291) related to medical devices and tissue products from the user facilities participating in MedSun, to obtain a demographic profile of the facilities, and for additional questions which will permit FDA to better understand the cause of reported adverse events. Participation in the program is voluntary and includes approximately 250 facilities.

In addition to collecting data on the electronic adverse event report form, MedSun collects additional information from participating sites about reported problems emerging from the MedSun hospitals. This data collection is also voluntary and is collected on the same Web site as the report information.

The burden estimate is based on the number of facilities participating in MedSun (250). FDA estimates an average of 15 reports per site annually. This estimate is based on MedSun working to promote reporting in general from the sites, as well as promoting reporting from specific parts of the hospitals, such as the pediatric intensive care units, the electrophysiology laboratories, and the hospital laboratories.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Adverse event reporting	250	15	3,750	0.75 (45 minutes)	2,813

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: January 13, 2017.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2017-01187 Filed 1-18-17; 8:45 am]

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2016-D-1307]

Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers; Draft Guidance for Industry and Review Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry and review staff entitled “Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers.” This draft guidance provides answers to common questions regarding the communication of health care economic information (HCEI) about approved prescription drugs by medical product manufacturers, packers, distributors, and their representatives (firms) to payors, formulary committees, or other similar entities with knowledge and expertise in the area of health care economic analysis (collectively referred to as payors). This draft guidance also provides answers to common questions about firms’ communications regarding investigational drugs and devices (investigational products) to payors before FDA approval or clearance of such products. The Agency is issuing this draft guidance to explain FDA’s current thinking on frequently asked questions regarding such communications in order to provide clarity for firms and payors.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by April 19, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2016-D-1307 for “Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS

CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002; the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002; the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to this draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Elaine Hu Cunningham, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3203, Silver Spring, MD 20993-0002, 301-

796–1200; Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911; Paul Gadiock, Center for Devices and Radiological Health, 10903 New Hampshire Ave., Bldg. 66, Rm. 5448, Silver Spring, MD 20993–0002, 301–796–5736; or Kristin Davis, Office of the Commissioner, 10903 New Hampshire Ave., Bldg. 32, Rm. 4252, Silver Spring, MD 20993–0002, 301–796–0418.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry and review staff entitled “Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers.” This draft guidance provides answers to common questions regarding firms’ communications of HCEI about their approved prescription drugs to payors. This draft guidance also addresses common questions relating to firms’ dissemination of information about investigational products to payors before FDA approval or clearance of such products. For purposes of this draft guidance, the term “payors” collectively refers to payors, formulary committees, or other similar entities with knowledge and expertise in the area of health care economic analysis that are responsible for making drug selection, formulary management, and/or coverage and reimbursement decisions on a population basis regarding drugs and/or devices for health care organizations, which may include entities such as integrated health care delivery networks, hospitals, and hospital systems.

FDA is aware that payors seek a range of information on effectiveness, safety, and cost-effectiveness of approved drugs, including information from firms, to help support their drug selection, formulary management, and/or coverage and reimbursement decisions on a population basis. This information may differ from and may be in addition to the information FDA reviews in order to make drug approval decisions. Because coverage and reimbursement decisions by payors impact a large number of patients, FDA believes it is essential that HCEI provided by firms to payors about their approved drugs be truthful and non-misleading.

With respect to HCEI regarding approved drugs, section 502(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352(a)), as amended by section 114 of the Food and Drug

Administration Modernization Act of 1997 (Pub. L. 105–115) and section 3037 of the 21st Century Cures Act (Pub. L. 114–255), includes a provision regarding communication of HCEI about such drugs to payors. Section 502(a) indicates that HCEI provided to payors carrying out their responsibilities for the selection of drugs for coverage or reimbursement shall not be considered to be false or misleading if the HCEI relates to an FDA-approved indication for the drug, is based on competent and reliable scientific evidence, and includes, where applicable, a conspicuous and prominent statement describing any material differences between the health care economic information and the FDA-approved labeling for the drug. Section III.A of this draft guidance provides FDA’s current thinking on key concepts in section 502(a) and recommendations for how firms can communicate HCEI about approved drugs to payors in accordance with this section to help ensure that payors have information needed to make informed drug selection, formulary management, and/or coverage and reimbursement decisions and to help ensure that the information is not false or misleading. Section III.A also discusses how FDA’s requirements for submission of promotional materials apply to HCEI about approved drugs disseminated by firms to payors. If a firm disseminates HCEI about an approved drug in accordance with this draft guidance, when finalized, FDA does not intend to consider such information false or misleading. In addition, FDA does not intend to use HCEI about approved drugs disseminated consistent with this draft guidance, when finalized, as providing evidence of a new intended use.

FDA also recognizes that due in part to their need, in some situations, to plan for and make coverage and reimbursement decisions far in advance of the effective date of such decisions, payors are also interested in receiving information from drug and device firms about medical products that are not yet approved or cleared by FDA for any use (referred to in this draft guidance as investigational products). Section III.B discusses FDA’s thinking with respect to communication by firms to payors of information about investigational products. As with HCEI about approved prescription drugs, it is essential that information provided by firms about their investigational products be truthful and non-misleading. Therefore, section III.B also lays out a series of recommendations to help achieve these goals.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of a draft guidance for industry entitled “Medical Product Communications That Are Consistent With the Food and Drug Administration-Required Labeling—Questions and Answers.” The guidance provides information for medical product firms about how FDA evaluates their medical product communications, including their promotional materials, that present information that is not contained in the FDA-required labeling for the product but that may be consistent with the FDA-required labeling for the product.

In addition, FDA is announcing in this issue of the **Federal Register** that it is reopening the comment period for the notice of public hearing that appeared in the **Federal Register** of September 1, 2016, concerning manufacturer communications regarding unapproved uses of approved or cleared medical products. The comment period will be reopened for 90 days, until *January 19, 2017*. As announced in the notice of public hearing, FDA is engaged in a comprehensive review of its regulations and policies governing communications by firms about unapproved uses of approved or cleared medical products, and the comments it receives will inform FDA’s policy development in this area.

FDA will consider the feedback it receives in all three of these dockets as the Agency continues to review its policies on firm communications about medical products, and interested persons may wish to review the documents FDA has issued in all three dockets before submitting comments to any of the relevant dockets.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). This draft guidance, when finalized, will represent the current thinking of FDA on certain commonly asked questions regarding firms’ communications with payors. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests

or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Title: Drug Manufacturer Communications of Health Care Economic Information to Payors Under FD&C Act Section 502(a); Drug and Device Manufacturer Communications With Payors Regarding Investigational Products.

Description of Respondents: For information that should be included when HCEI is disseminated to payors, respondents to this collection of information are firms that manufacture prescription human drug products, including biological products; for information that should be included with communications with payors about investigational products, respondents to this collection of information are firms that manufacture prescription human drug products, including biological products, and medical devices.

Burden Estimate: This draft guidance includes recommendations regarding

information that firms should include in HCEI for prescription drugs if they choose to disseminate such materials (“HCEI materials”) to payors, in accordance with section 502(a). Specifically, FDA recommends that various aspects of study design and methodology of an economic analysis (*i.e.*, type of analysis, modeling technique, patient population, perspective/viewpoint, treatment comparator, time horizon, outcome measures, cost estimates, and assumptions); factors that limit generalizability of an economic analysis; limitations to an economic analysis; and sensitivity analyses, if applicable, be included in HCEI materials disseminated to payors to allow for informed decision-making and to help ensure that the HCEI is not false or misleading.

Furthermore, FDA recommends that firms include other information when disseminating HCEI materials, as applicable, to provide a balanced and complete presentation. Such information includes a statement of the FDA-approved indication of the drug and a copy of the most current FDA-approved labeling. Under section 502(a), firms must also include a conspicuous and prominent statement to describe any material differences between the HCEI and the FDA-approved labeling. HCEI materials should also disclose whether certain studies or data sources were omitted from an economic analysis and how such selective inclusion of studies or data sources may alter the conclusions presented in the analysis. Moreover, FDA recommends that HCEI materials disclose important risk information associated with the approved use of the drug, and pursuant to section 502(a), must disclose any additional risk information related to assumptions that vary from the approved labeling. Finally, HCEI materials should disclose potential financial or affiliation biases to the extent reasonably known by firms at the time of dissemination.

If firms choose to make communications to payors about investigational products, FDA

recommends that firms include a clear statement with their communications that the product is under investigation and that the safety or effectiveness of the product has not been established. In addition, FDA recommends providing information related to the stage of product development (*e.g.*, the phase of clinical trial in which a product is being studied and how it relates to the overall product development plan). Moreover, FDA recommends that firms provide followup information to payors if previously communicated information becomes outdated as a result of significant changes or as a result of new information regarding the product or its review status.

Based on the post-marketing submissions of promotional materials using Form FDA 2253 received in calendar year (CY) 2015 for prescription drugs, FDA estimates that approximately 400 firms will disseminate 4,000 distinct HCEI materials annually. FDA estimates that it will take firms approximately 20 hours to compile and draft the information that this draft guidance recommends should be included if they choose to disseminate HCEI materials to payors.

Based on the number of prescription drugs and devices approved/cleared in CY 2015, FDA estimates that approximately 520 firms will prepare 1,040 distinct communications of information to payors about their investigational products annually. FDA estimates that it will take firms approximately 0.5 hours to compile and draft the information that this draft guidance recommends should be provided with communications to payors about investigational products. In addition, FDA estimates that approximately half of the firms will spend approximately 2 hours to compile and provide 520 distinct communications of followup information regarding previously communicated information to payors about their investigational products annually.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Type of information	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Recommended information to be included when firms choose to disseminate HCEI materials to payors about prescription drugs under section 502(a).	400	10	4,000	20	80,000
Recommended information to be included when firms choose to disseminate pre-approval communications about investigational drugs or devices to payors.	520	2	1,040	0.5 (30 minutes)	520

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹—Continued

Type of information	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Follow up information to payors regarding previously communicated information about investigational drugs and devices.	260	2	520	2	1,040
Total	81,560

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

This draft guidance also refers to previously approved collections of information found in FDA regulations. The collections of information in 21 CFR 314.81(b)(3)(i) (Form FDA 2253) have been approved under OMB control number 0910–0001.

III. Other Issues for Consideration

Although section 502(a) is specific to approved drugs and section III.A of this draft guidance addresses firms' communications of HCEI to payors only about approved drugs, FDA is interested in whether similar principles to those outlined in that section should apply to firms' communications of HCEI to payors about approved/cleared devices or whether different principles should be considered. FDA is specifically interested in identifying principles that, if applied to communications of HCEI about approved/cleared devices, could help ensure that such information is truthful and non-misleading and aids payors in making informed selection and/or coverage and reimbursement decisions about these products. FDA is interested in comments from interested parties on any of the topics addressed in this draft guidance and specifically requests comments from interested parties on the extent to which the principles provided in section III.A could be applicable to communications of HCEI about approved/cleared devices. To the extent that interested parties believe that different considerations should apply to medical devices or that guidance is needed on additional issues with respect to medical device firms' communications of HCEI about approved/cleared medical devices to payors, FDA is interested in input on those topics as well.

FDA is also seeking comments from interested parties regarding communications of HCEI about animal drugs. Although FDA recognizes that the audience for HCEI about animal drugs may be different from that identified in section III.A as a result of differences in how payment decisions are made for animal drugs, FDA is interested in learning the extent to

which the principles provided in section III.A could be applicable to communications of HCEI about animal drugs with appropriate audiences for such information. To the extent that commenters believe that different considerations should apply to animal drugs or that guidance is needed on additional issues with respect to animal drug firms' communications of HCEI about approved new animal drugs to appropriate audiences, FDA is interested in input on those topics as well.

IV. Electronic Access

Persons with access to the Internet may obtain the draft guidance at <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>, or <https://www.regulations.gov>.

Dated: January 6, 2017.

Jeremy Sharp,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–N–0595]

Advice About Eating Fish, From the Environmental Protection Agency and Food and Drug Administration; Revised Fish Advice; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: In June 2014, the Food and Drug Administration (FDA) and the U.S. Environmental Protection Agency (EPA) (the Agencies) jointly released a draft

update to a March 2004 document entitled “What You Need to Know About Mercury in Fish and Shellfish.” FDA and EPA are now announcing revised fish advice that contains advice and supplemental questions and answers for those who want to understand the advice in greater detail.

FOR FURTHER INFORMATION CONTACT:

FDA: William R. Jones, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740–3835, 240–402–1422, William.Jones@fda.hhs.gov; **EPA:** Lisa Larimer, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., MS 4305T, Washington, DC 20460, 202–566–1017, Larimer.Lisa@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 11, 2014 (79 FR 33559), FDA, in coordination with EPA, announced the availability of the draft updated fish advice, entitled “Fish: What Pregnant Women and Parents Should Know” (the notice), and made the draft updated advice available for public comment. The draft fish advice was intended to update advice previously published by EPA and FDA in March 2004 (Ref. 1), to make it consistent with the 2010 Dietary Guidelines for Americans and to modify the wording and organization of the 2004 advice to enhance the likelihood that it would be followed by the target audience. The 2004 advice on fish consumption itself was preceded by earlier recommendations published by FDA in September 1994 and revised in May 1995 (http://www.fda.gov/ohrms/dockets/ac/02/briefing/3872_advisory%207.pdf), followed by separate, but simultaneously issued, FDA and EPA fish consumption advice in 2001. FDA's 2001 advice addressed commercial fish; EPA's 2001 advice addressed locally caught fish. The 2014 notice announcing the availability of the draft updated fish advice stated that the comment period would be open until 30 days after the last transcript became available from either the FDA Risk

Communication Advisory Committee (RCAC) meeting to be held on the draft advice or any other public meeting that the Agencies chose to hold on the draft advice (79 FR 33559). The notice also stated that the date for closure of public comment would be published in a future notice in the **Federal Register** (id.).

The RCAC meeting was held on November 3 and 4, 2014, and the transcript of the meeting became available on December 2, 2014. The meeting addressed the draft updated fish advice in great detail and included presentations by the Agencies on both the substance and the presentation of the draft updated fish advice, and included presentations by invited experts in risk communications. The meeting also provided members of the public with an opportunity to express their views to the RCAC and to officials of the Agencies who were in attendance. FDA and EPA concluded that the thoroughness of this public meeting, in addition to the public comments received and still to be received, removed the need for additional public meetings, and announced in the **Federal Register** that the comment period for the draft updated advice would be closed on March 26, 2015 (80 FR 9732). The transcript from the RCAC meeting is available electronically at <http://www.fda.gov/downloads/AdvisoryCommittees/CommitteesMeetingMaterials/RiskCommunicationAdvisoryCommittee/UCM425352.pdf> and <http://www.fda.gov/downloads/AdvisoryCommittees/CommitteesMeetingMaterials>. A summary table of joint responses from FDA and EPA to the comments we received on the draft updated fish advice is available in the docket (Ref. 2). The comments themselves are also available in the Docket.

In August 2016, an external peer review of FDA-EPA's method for categorizing species of fish into consumption categories was conducted at the request of FDA and EPA. Information on the external peer review and FDA's and EPA's responses to the peer review are available at <http://www.fda.gov/fishadvice> (and also on FDA's Completed Peer Reviews page at <http://www.fda.gov/ScienceResearch/SpecialTopics/PeerReviewofScientificInformationandAssessments/ucm079120.htm>) (Refs. 3 and 4). Fish and shellfish (referred to collectively in this notice as "fish") provide protein, are low in saturated fat, are rich in many micronutrients, and provide certain omega-3 fatty acids (Ref. 5). However, as a result of natural processes and human activity, fish also contain mercury in the

form of methylmercury. Methylmercury can adversely affect the central nervous system, particularly the developing brain of the fetus. After a careful review and consideration of the RCAC transcript, the comments received on the draft updated fish advice (Ref. 2), and the peer review, EPA and FDA are issuing revised fish advice.

The 2004 advice was issued to help individuals in the target population limit their exposure to mercury while still obtaining the health benefits of fish consumption. The 2004 advice recommended avoiding four types of commercially available fish that have the highest average mercury concentrations: Tilefish, shark, swordfish, and king mackerel. The advice further recommended that women in the target population eat up to—but not exceed—12 ounces per week of most other types of commercially available fish. It recommended limiting consumption of one species, white (albacore) tuna, to no more than 6 ounces per week. For local fish caught by family and friends, the advice recommended following locally posted fish advisories regarding safe catch. Where no such advice exists, it recommends limiting consumption of locally caught fish to 6 ounces per week and eating no other fish that week.

While the 2004 advice encourages fish consumption as part of a healthy diet, it does not encourage consumption of a minimum amount of fish. In June 2014, FDA and EPA issued the draft updated advice to encourage women who are pregnant or breastfeeding to consume 8 to 12 ounces of a variety of fish per week to maximize the potential benefits that fish could provide. The Agencies also proposed to modify the wording and organization of the 2004 advice in order to enhance the likelihood that it will be followed by the target audience.

II. What is in the revised fish advice?

The revised fish advice is designed to encourage women who are pregnant and breastfeeding to consume 8 to 12 ounces of a variety of fish per week, and it includes further modified wording and organization to further enhance the likelihood that it will be followed by the target audience. The revised fish advice includes a chart and supplemental questions and answers. The chart provides recommendations for how often the target audience (pregnant women, women who might become pregnant, breastfeeding women, and young children) should eat more than 60 different fish, based on mercury concentrations.

FDA and EPA used sampling data from FDA and, to a limited extent, from

the U.S. National Marine Fisheries Service as the source for mercury amounts in fish (Ref. 6), with support from other sources (Refs. 7 through 12). The revised fish advice makes the following recommendations for the target audience:

- *Eat 2 to 3 servings a week of a variety of fish.* The revised fish advice translates the consumption target of 8 to 12 ounces of a variety of fish per week into 2 to 3 servings a week of a variety of fish, with a typical adult serving as 4 ounces. The chart in the revised fish advice shows which fish the target audience can eat 2 to 3 servings a week.

- *Eat 1 serving a week of some fish.* Since 2004, the advice has recommended limiting albacore ("white") tuna to 1 serving a week (or 6 ounces per week). The revised fish advice adds 18 fish with similar mercury concentrations to the list of fish to eat 1 serving a week.

- *Avoid certain fish with the highest mercury concentrations.* Since 1994, the advice has recommended limiting or avoiding shark and swordfish. In 2001, tilefish and king mackerel were added to this list of recommended fish to avoid. This revised fish advice adds marlin, orange roughy, and bigeye tuna, which have similar mercury concentrations. The revised fish advice recommends avoiding tilefish only from the Gulf of Mexico, consistent with the draft updated fish advice. Data on tilefish from the Atlantic Ocean indicate that these fish have much lower levels of mercury on average (Ref. 6).

- *Check for advisories for fish caught by family and friends and where no advisory exists, limit eating those fish to one serving a week and do not eat other fish that week.* The revised fish advice retains the recommendations included in the 2004 advice for fish caught by family and friends. There are waters where there may have been little or no monitoring and, therefore, the extent of potential mercury contamination is unknown. Fish caught for recreation or subsistence can contain higher levels of mercury than commercially available species.

III. How does the revised fish advice differ from the draft updated fish advice?

The revised fish advice presents the recommended consumption for more than 60 fish in a color-coded chart. The fish are presented in categories of "Best Choices," those which the target audience can eat 2 to 3 servings a week; "Good Choices," which the target audience can eat 1 serving a week; and "Choices to Avoid." See Ref. 13 for a description of how FDA and EPA

decided which fish went in each category. The draft updated fish advice recommended eating 8 to 12 ounces of a variety of fish per week and choosing fish lower in mercury, but it only mentioned 7 of those fish (salmon, shrimp, pollock, tuna (light canned), tilapia, catfish, and cod). The revised fish advice also retains the recommendation to eat a variety of fish. The revised fish advice adds 18 fish that the target audience can eat 1 serving a week (see “Good Choices” category in the revised fish advice). The draft updated fish advice included only white (albacore tuna) as a fish to limit to 6 ounces per week. Another change between the draft updated advice and the revised fish advice is that the revised fish advice adds marlin, orange roughy, and bigeye tuna to the list of fish that the target audience should avoid eating (see “Choices to Avoid” category in the revised fish advice). These fish were added because they have comparable mercury levels to fish included in the draft updated advice as fish that should be avoided (*i.e.*, shark, swordfish, tilefish from the Gulf of Mexico, and king mackerel).

The Agencies reorganized the questions and answers (Qs and As) into topic areas, simplified the responses, and added new questions as a result of comments received during the comment period. The chart includes a link to two fish advice Web sites (<http://www.fda.gov/fishadvice>) and <http://www.epa.gov/fishadvice>), images to show serving size, and is designed to make it clear and easy to read for display at point of sale, doctors’ offices and elsewhere. The Web site contains the advice and the Qs and As. Educational and outreach materials will be added to the Web site as they are developed.

IV. What comments were received and how does the revised fish advice reflect them?

FDA and EPA received over 200 comments from States, industry, academia, various organizations, and concerned individuals. The comments covered a range of topics from the scientific basis of the advice to communication. There was a wide range of opinions expressed in the comments, not all of which were relevant to the advice. The majority of the comments pertained to the clarity and effectiveness of how the advice was presented. In response to comments, the Agencies revised the presentation of the advice, as discussed in part III of this document. Other comments suggested a more restrictive set of consumption recommendations or disagreed with

setting consumption thresholds for specific species of fish or for any but the species highest in mercury. After reviewing the comments, FDA and EPA adopted an approach in which fish species are separated into three categories based on average measured mercury content (“Best Choices,” “Good Choices,” and “Choices to Avoid”). An evaluation of available information led the Agencies to recommend eating 2 to 3 servings a week for some fish and 1 serving a week for others. The advice to eat 2 to 3 servings of a variety of fish a week is consistent with the recommendation in the 2015–2020 Dietary Guidelines for Americans that women who are pregnant or breastfeeding consume at least 8 and up to 12 ounces of a variety of fish lower in mercury per week. Consuming 8 to 12 ounces of fish per week while pregnant or breastfeeding would be a significant dietary change for most women. In a survey of over 1,200 pregnant women conducted by FDA in 2005, median fish consumption was 1.8 ounces per week (Ref. 14).

The approach in the revised fish advice differs from that taken in the draft updated fish advice not only in that it categorizes more than 60 fish types, but also in its analytical basis. In categorizing the fish species for recommended consumption, the revised fish advice compares the reference dose (RfD) developed by EPA (Ref. 15) to the predicted exposure from the consumption of different fish species. Because the RfD is a rate of exposure that a person can experience over a lifetime without appreciable risk of harm and includes a 10-fold uncertainty factor to allow for variability among individuals and groups, this was a highly protective approach for determining which fish belong in each category. Specifically, the RfD for mercury is protective of neurodevelopmental effects from a critical window of development for a fetus during pregnancy. We believe the new approach is more protective of public health. This new approach is also consistent with a number of the comments received, and the external peer review conducted.

V. What did the peer reviewers say and how did FDA and EPA respond?

Overall, the reviewers agreed upon the necessity of mercury fish advice for pregnant women, those trying to get pregnant, and children, to encourage fish consumption while helping to avoid mercury. The reviewers were generally supportive of the technical information and methodology used to support the scientific basis for the fish

consumption recommendations. The reviewers made suggestions to improve clarity, transparency, and presentation, and to enhance the scientific underpinnings of the fish advice. The reviewers suggested supplementing FDA’s data on mercury levels in seafood with other published sources to support the fish categorization for species with small sample sizes and/or large variability in mercury levels. The reviewers also provided various suggestions of where additional details could be added to aid the reader and support the conclusions. FDA and EPA implemented many of the reviewers’ recommendations. A report of the FDA–EPA response to the peer review is available at <http://www.fda.gov/fishadvice> (and also on FDA’s Completed Peer Reviews page at <http://www.fda.gov/ScienceResearch/SpecialTopics/PeerReviewofScientificInformationandAssessments/ucm079120.htm>) (Ref. 4).

VI. How can I access the documents?

The revised fish advice and supplemental questions and answers are available electronically at <http://www.fda.gov/fishadvice> and <http://www.epa.gov/fishadvice>.

VII. References

The following references are on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 and are available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; they are also available electronically at <http://www.regulations.gov>. BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–4482]

Regulation of Mosquito-Related Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry (GFI) #236 entitled "Regulation of Mosquito-Related Products." This draft guidance provides information regarding regulatory oversight of mosquito-related products, defined as those articles for use in or on mosquitoes. We are clarifying circumstances under which such products are regulated by FDA as new animal drugs under the Federal Food, Drug, and Cosmetic Act (the FD&C Act) and other circumstances under which such products are regulated by the Environmental Protection Agency (EPA) as pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by February 21, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any

confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA–2016–D–4482 for "Regulation of Mosquito-Related Products." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can

provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Policy and Regulations Staff (HFV-6), Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Laura R. Epstein, Center for Veterinary Medicine (HFV-1), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 301-796-8558, Laura.Epstein@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry (GFI) #236 entitled “Regulation of Mosquito-Related Products.” This draft guidance provides information for industry and other stakeholders regarding regulatory oversight of mosquito-related products, defined as those articles for use in or on mosquitoes. Given the public health implications of mosquito control, FDA is providing this draft guidance to clarify the regulatory oversight of mosquito-related products, including but not limited to those produced through biotechnology. This guidance is important in light of the public health urgency of countering the spread of mosquito-borne disease, such as that caused by the Zika virus. Vector control is a critical element of the effort to combat the spread of mosquito-borne disease. Novel mosquito control technologies have gained greater

attention as an element of this effort; however, there has been some confusion with respect to FDA’s and EPA’s respective jurisdiction over such mosquito-related products. We are clarifying circumstances under which such products are regulated by FDA as new animal drugs under the FD&C Act and other circumstances under which such products are regulated by the EPA as pesticides under FIFRA. FDA is clarifying that the phrase “articles (other than food) intended to affect the structure or any function of the body of man or other animals” in the FD&C Act’s drug definition (21 U.S.C. 321(g)(1)(C)) does not include articles intended to function as pesticides by preventing, destroying, repelling, or mitigating mosquitoes for population control purposes. FDA believes that this interpretation is consistent with congressional intent and provides a rational approach for dividing responsibilities between FDA and EPA in regulating mosquito-related products.

II. Significance of Guidance

This level 1 draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on Regulation of Mosquito-Related Products. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm> or <https://www.regulations.gov>.

Dated: January 11, 2017.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2016-D-2285]

Medical Product Communications That Are Consistent With the Food and Drug Administration-Required Labeling—Questions and Answers; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers.” This draft guidance provides information for manufacturers, packers, and distributors and their representatives (collectively “firms”) of drugs and medical devices for humans, including those that are licensed as biological products, and animal drugs (collectively “medical products”), about how FDA evaluates their medical product communications, including their promotional materials, that present information that is not contained in the FDA-required labeling for the product but that may be consistent with the FDA-required labeling for the product. The Agency is issuing this draft guidance to explain FDA’s current thinking on commonly asked questions regarding such communications in order to provide clarity for firms.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by April 19, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a

third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. - If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2016-D-2285 for "Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers; Draft Guidance for Industry; Availability." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your

name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillendale Building, 4th Floor, Silver Spring, MD 20993-0002; Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002; Division of Small Manufacturers, International and Consumer Assistance, Office of Communication, Education and Radiation Programs, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4613, Silver Spring, MD 20993-0002; or to Communications Staff (HFV-12), Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Kristin Davis, Office of Policy, Office of the Commissioner, 10903 New Hampshire Ave., Bldg. 32, Rm. 4252, Silver Spring, MD 20993-0002, 301-796-0418; or Catherine Gray, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3203, Silver Spring, MD 20993-0002, 301-796-1200; or Stephen Ripley, Center for

Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911; or Angela Krueger, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1666, Silver Spring, MD 20993-0002, 301-796-6380; or Thomas Moskal, Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl. (HFV-1), Rockville, MD 20855, 240-402-6251.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers." This draft guidance provides information for firms about how FDA evaluates their medical product communications, including their promotional materials, that present information that is not contained in the FDA-required labeling¹ for the product but that may be consistent with the FDA-required labeling for the product.

FDA determines whether a medical product is safe and effective for use under the conditions prescribed, recommended, or suggested in the proposed labeling submitted to FDA with the product's marketing application or submission (and for devices, also during the classification process). In making this determination, FDA evaluates whether the conditions of use in the proposed labeling are supported by the required levels and types of evidence of safety and effectiveness and whether the benefits of using the product under those specific conditions of use outweigh the risks of the product. After FDA approves or clears a medical product, the FDA-required labeling sets forth the conditions of use under which the product has been shown to meet the relevant standard for marketing, and it provides directions and information on how to use the product safely and effectively under those conditions.

Medical product firms have expressed interest in communicating, including in promotional materials, data and

¹ As used in the draft guidance, the term FDA-required labeling includes the labeling reviewed and approved by FDA as part of the medical product marketing application review process. For products not subject to premarket approval, but instead subject to premarket notification requirements or exempt from premarket review, the term also includes the labeling relied on to provide adequate directions for use and other information required to appear on the label or in labeling.

information that are not contained in their products' FDA-required labeling but concern the approved/cleared uses of the products. We are aware that firms have questions about how FDA determines when such communications are consistent with the FDA-required labeling, and how they are viewed by FDA.

The draft guidance describes FDA's thinking on these topics. As explained in the draft guidance, a firm's communication of information that is not contained in the product's FDA-required labeling, but that is determined to be consistent with the FDA-required labeling, is not alone considered evidence of a new intended use. However, even if a communication is consistent with the FDA-required labeling, the representations or suggestions made about the product would misbrand the product and could subject firms to enforcement action if the representations or suggestions are false or misleading. Accordingly, the draft guidance both describes FDA's thinking on the types of information that are consistent with the FDA-required labeling and provides general recommendations for how this information can be conveyed in a truthful and non-misleading way. The draft guidance also provides some examples to illustrate these concepts. The recommendations provided in the draft guidance to help ensure that communications are not false or misleading are specific to communications that are consistent with the FDA-required labeling; communication of information that is not consistent with the FDA-required labeling is outside the scope of these recommendations.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of a draft guidance for industry entitled "Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers." This draft guidance provides answers to common questions regarding firms' communications of health care economic information about their approved prescription drugs to payers and similar entities. This draft guidance also addresses common questions relating to firms' dissemination of information about investigational products to payers before FDA approval or clearance of such products.

In addition, FDA is announcing in this issue of the **Federal Register** that it is reopening the comment period for the notice of public hearing that appeared in the **Federal Register** of September 1, 2016, concerning manufacturer

communications regarding unapproved uses of approved or cleared medical products. The comment period will be reopened for 90 days, until April 19, 2017. As announced in the notice of public hearing, FDA is engaged in a comprehensive review of its regulations and policies governing communications by firms about unapproved uses of approved or cleared medical products, and the comments it receives will inform FDA's policy development in this area.

FDA will consider the feedback it receives in all three of these dockets as the Agency continues to review its policies on firm communications about medical products, and interested persons may wish to review the documents FDA has issued in all three dockets before submitting comments to any of the relevant dockets.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on certain commonly asked questions regarding firms' communications for their medical products that may be consistent with the FDA-required labeling. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's

estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Title: Recommended Content of Medical Product Communications That Are Consistent With the FDA-Required Labeling.

Description of Respondents:

Respondents to the proposed collection of information are manufacturers, packers, and distributors and their representatives (firms) of human drugs and devices, including those licensed as biological products, and animal drugs.

Burden Estimate: The draft guidance includes Third-Party Disclosure recommendations regarding information that firms should include in communications that contain information not found in the FDA-required labeling for their medical products but that are consistent with the FDA-required labeling (as explained in the draft guidance) if they choose to publically disseminate such materials.

Specifically, FDA recommends that various aspects of study design and methodology for studies relied on in such communications be disclosed to provide material contextual information (e.g., type of study, study objectives, product dosage/use regimens, control(s) used, patient population studied), and that material limitations related to the study design, methodology, and results also be disclosed in a clear and prominent manner to help ensure that the communications are not false or misleading.

Furthermore, FDA recommends that firms accurately characterize and contextualize the relevant information about the product, including by disclosing unfavorable or inconsistent findings. FDA also recommends that firms disclose material contextual information from the FDA-required labeling in these communications, such as data and information from studies in the FDA-required labeling that are relevant to the data or information presented in the communication (e.g., if a communication provides post-market information about the types and rates of occurrence of adverse events that have been observed in practice, the communication should also include information from the FDA-required labeling about the types and rates of occurrence of adverse reactions

observed in clinical trials to provide context).

According to FDA data, approximately 162,000 FDA-regulated promotional materials are prepared by approximately 500 firms annually. Of these materials, we estimate approximately 5 percent contain unique presentations of information consistent with FDA-required labeling, as that term is described in the draft guidance, submitted by approximately 64 percent

(or 324) of the firms. Anticipating the number of these FDA-regulated promotional materials will soon increase to 6 percent, we estimate the 324 firms will prepare and disseminate annually 9,720 FDA-regulated promotional materials that contain unique presentations of information that is consistent with FDA-required labeling, as that term is described in the draft guidance, and that therefore are recommended to include the proposed

third party disclosures. Based on our experience reviewing FDA-regulated promotional materials for medical products, we estimate it will take respondents approximately 4 hours per unique presentation to prepare and incorporate the disclosures recommended in the draft guidance, if they choose to disseminate this information.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN ¹

Type of information	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Recommended information to be included when firms choose to disseminate communications that are consistent with the FDA-required labeling	324	30	9,720	4	38,880

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>, <http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm>, or <https://www.regulations.gov>.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; Ryan White HIV/ AIDS Program: Allocation and Expenditure Forms

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public

comment on proposed data collection projects, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR must be received no later than March 20, 2017.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N-39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Ryan White HIV/AIDS Program: Allocation and Expenditure Forms.

OMB No. 0915-0318—Revision.

Abstract: HRSA's HIV/AIDS Bureau (HAB) administers the Ryan White HIV/AIDS Program authorized under Title XXVI of the Public Health Service Act as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009. The Ryan White HIV/AIDS Program Allocation and Expenditure Reports (A&E Reports), in conjunction with the Consolidated List of Contractors (CLC), enables HRSA to monitor and track the use of grant funds for compliance with

program and grants policies and requirements under the statute. By regulation, recipients are required to submit financial reports annually to HRSA and the A&E Reports and the CLC are HAB's mechanism to implement that requirement. Recipients funded under Parts A, B, C, and D of the Ryan White HIV/AIDS Program (codified under Title XXVI of the Public Health Service Act) are required to report financial data to HRSA at the beginning (Allocations Report) and at the end of their grant cycle (Expenditures Report). Recipients funded under Parts A and B are required to report information about their service provider contracts in the CLC.

The forms will continue to require recipients to report on how funds are allocated and spent on core medical and non-core services for persons living with HIV, and on various program components, such as administration, planning and evaluation, and quality management. The A & E Reports are identical in the types of information they collect. However, the first report tracks the allocation of the award at the beginning of the grant cycle and the second report tracks actual expenditures (including carryover dollars) at the end of the grant cycle. The CLC form identifies a recipient's contracts with service providers for the current grant year, the contract amount, and the types of services being provided.

Need and Proposed Use of the Information: Accurate allocation, expenditure, and service contract records of the recipients receiving Ryan White HIV/AIDS Program funding are critical to the implementation of the law and thus are necessary for HRSA to fulfill its responsibilities. The primary

purposes of these forms are to provide information on the number of grant dollars spent on various services and program components and oversee compliance with the intent of Congressional appropriations in a timely manner. In addition to meeting the goal of accountability to the Congress, clients, and the general public, information collected on these reports is critical for HRSA, state and local grantees, and individual providers

to evaluate the effectiveness of these programs.

Likely Respondents: Ryan White HIV/AIDS Program recipients.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Part A Allocations Report	52	1	52	4	208
Part A Expenditures Report	52	1	52	4	208
Part A CLC	52	1	52	2	104
Part B Allocations Report	54	1	54	6	324
Part B Expenditures Report	54	1	54	6	324
Part B CLC	54	1	54	2	108
Part C Allocations Report	346	1	346	4	1,384
Part C Expenditures Report	346	1	346	4	1,384
Part D Allocations Report	116	1	116	4	464
Part D Expenditures Report	116	1	116	4	464
Total			1,294		4,972

Note: Recipients are required to fill out an allocation report, expenditure report, and CLC for each Ryan White HIV/AIDS Program award received.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Evaluation of the Maternal and Child Health Bureau's Autism CARES Act Initiative

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than February 21, 2017.

ADDRESSES: Submit your comments, including the ICR Title, to the desk officer for HRSA, either by email to OIRA_submission@omb.eop.gov or by fax to 202-395-5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at paperwork@hrsa.gov or call (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference, in compliance with Section 3506(c)(2)(A), the Paperwork Reduction Act of 1995.

Information Collection Request Title: Evaluation of the Maternal and Child Health Bureau's Autism CARES Act Initiative OMB No. 0915-0335, Revision.

Abstract: In response to the growing need for research and resources devoted to autism spectrum disorder (ASD) and other developmental disabilities (DDs), the U.S. Congress passed the Combating Autism Act in 2006 (Pub. L. 109-416); it was reauthorized by the Combating Autism Reauthorization Act of 2011 (Pub. L. 112-32) and the Autism CARES (Collaboration, Accountability, Research, Education, and Support) Act of 2014 (Pub. L. 113-157). Through Autism CARES, HRSA is tasked with increasing awareness of ASD and other DDs, reducing barriers to screening and diagnosis, promoting evidence-based interventions, and training health care professionals in the use of valid and reliable diagnostic tools. To address these goals, HRSA awards grants to various programs through the Maternal and Child Health Bureau (MCHB).

Need and Proposed Use of the Information: The purpose of this information collection is to describe the accomplishments of MCHB's grant programs in implementing the provisions of the Autism CARES Act. This ICR is a revision to an existing package; this study is the third

evaluation of MCHB's Autism CARES activities and employs similar data collection methodologies to the prior studies. Grantee interviews remain the primary form of data collection, but the research team has made minor adjustments to the data collection processes. Changes include adjusting the interview protocols to improve flow and clarify questions, and planning for more than one respondent to attend interviews in instances where the principal investigator requests support.

Likely Respondents: Grantees funded by HRSA under the Autism CARES Act. The grantees are from these MCHB

programs: Leadership Education in Neurodevelopmental Disabilities (LEND) Training Program; Developmental-Behavioral Pediatrics (DBP) Training Program; State Implementation Program; State Innovation in Care Integration Program; Research Network Program; Research Program; Interdisciplinary Technical Assistance Center (ITAC); and the State Public Health Autism Center (SPHARC) Resource Center.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information

requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN

Grant program/form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
LEND Interview Protocol	53	2	106	1	106
DBP Interview Protocol	10	2	20	1	20
State Implementation Program Interview Protocol	9	2	18	1	18
State Innovation in Care Integration State Grantees	4	1	4	1	4
Research Network Interview Protocol	5	2	10	1	10
Research Program R40 Interview Protocol	10	1	10	1.5	15

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Heritable Disorders in Newborns and Children

AGENCY: Health Resources and Service Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, notice is hereby given about a meeting of the Advisory Committee on Heritable Disorders in Newborns and Children (ACHDNC). This meeting will be open to the public but advance registration is required. Information regarding the ACHDNC can be found at <http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/>.

DATE: The meeting will be held on February 9, 2017, from 9:00 a.m. to 5:00 p.m. EST.

ADDRESSES: This meeting will be a webinar. The public can join the meeting by registering in advance. The registration link is available at <http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/>. The registration deadline is February 6, 2017, 11:59 p.m. Eastern Time.

FOR FURTHER INFORMATION CONTACT:

Anyone requesting information regarding the ACHDNC should contact Alaina Harris, Maternal and Child Health Bureau (MCHB), HRSA, Room 18W66, 5600 Fishers Lane, Rockville, Maryland 20857; email: aharris@hrsa.gov.

SUPPLEMENTARY INFORMATION: ACHDNC, as authorized by the Public Health Service Act (PHS), Title XI, § 1111 (42 U.S.C. 300b-10), was established to advise the Secretary of HHS about the development of newborn screening activities, technologies, policies, guidelines, and programs for effectively reducing morbidity and mortality in newborns and children having, or at risk for, heritable disorders. In addition, ACHDNC recommendations regarding additional conditions/inherited

disorders for screening that have been adopted by the Secretary are included in the Recommended Uniform Screening Panel and constitute part of the comprehensive guidelines supported by HRSA. Pursuant to section 2713 of the PHS, codified at 42 U.S.C. 300gg-13, non-grandfathered health plans are required to cover screenings included in the HRSA-supported comprehensive guidelines without charging a co-payment, co-insurance, or deductible for plan years (*i.e.*, policy years) beginning on or after the date that is 1 year from the Secretary's adoption of the condition for screening.

ACHDNC will hear presentations and discussions on topics related to newborn screening activities, technologies, policies, guidelines, and programs for effectively reducing morbidity and mortality in newborns and children having, or at risk for, heritable disorders. ACHDNC will also hear updates from the Laboratory Standards and Procedures workgroup, Follow-up and Treatment workgroup, and Education and Training workgroup. Agenda items are subject to changes as priorities indicate. ACHDNC will not be voting on a proposed addition of a condition to the Recommended Uniform Screening Panel. The detailed meeting

agenda, and any changes to the start and end times, will be available 2 days prior to the meeting on the ACHDNC Web site: <http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/>.

Members of the public may submit written and/or present oral comments at the meeting. All comments are part of the official ACHDNC record. Advance registration is required to submit written comments and/or present oral comments. Written comments must be submitted by February 6, 2017, 11:59 p.m. EST to be included in the February meeting briefing book. Written comments should identify the individual's name, address, email, telephone number, professional or business affiliation, type of expertise (i.e., parent, researcher, clinician, public health, etc.), and the topic/subject matter of comments.

Individuals who wish to provide oral comments must register by February 6, 2017, 11:59 p.m. EST. To ensure that all individuals who have registered to make oral comments can be accommodated, time may be allocated per speaker. Individuals who are associated with groups or have similar interests may be requested to combine their comments and present them through a single representative. No audiovisual presentations are permitted. For additional information or questions on public comments, please contact Alaina Harris, MCHB, HRSA; email: aharris@hrsa.gov.

Individuals who need special assistance, such as sign language interpretation or other reasonable accommodations, should notify Alaina Harris at aharris@hrsa.gov at least 10 days prior to the meeting.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection

Activities: Proposed Collection: Public Comment Request; Ryan White HIV/AIDS Program Part F Dental Services Report

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR should be received no later than March 20, 2017.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference, in pursuant to Section 3506(c)(2)(A), the Paperwork Reduction Act of 1995.

Information Collection Request Title: Ryan White HIV/AIDS Program Part F Dental Services Report.

OMB No. 0915-0151—Extension

Abstract: The Dental Reimbursement Program (DRP) and the Community Based Dental Partnership Program (CBDPP) under Part F of the Ryan White HIV/AIDS Program (RWHAP) offer funding to accredited dental education programs. This funding supports the education and training of oral health providers in HIV oral health care and the provision of oral health services for people eligible for the RWHAP and living with HIV. Institutions eligible for the RWHAP are accredited schools of dentistry and other accredited dental education programs, such as dental hygiene programs or those sponsored by a school of dentistry, a hospital, or a public or private institution that offers postdoctoral training in the specialties of dentistry, advanced education in general dentistry, or a dental general practice residency. Schools and programs use the Dental Services Report to apply for funding of non-reimbursed costs incurred in providing oral health care to patients living with HIV and to report annual program data. Awards are authorized under section 2692(b) of the Public Health Service Act (42 U.S.C.

300ff-111(b)). The Dental Services Report collects data for DRP on patient demographics, oral health services, funding, and training. It also requires applicants to provide narrative descriptions of their services and facilities, as well as their links and collaboration with community-based providers of oral health services.

Need and Proposed Use of the Information: The primary purpose of collecting this information annually is to verify applicant eligibility and determine reimbursement amounts for DRP applicants, as well as to document the program accomplishments of CBDPP grant recipients. This information also allows HRSA to learn about (1) the extent of the involvement of dental schools and programs in treating patients with HIV, (2) the number and characteristics of clients who receive RWHAP-supported oral health services, (3) the types and frequency of the provision of these services, (4) the non-reimbursed costs of oral health care provided to patients living with HIV, and (5) the scope of grant recipients' community-based collaborations and training of providers. Information collected in the Dental Services Report is critical for HRSA, state and local grantees, and individual providers to help assess the status of existing HIV-related health service delivery systems.

Likely Respondents: Accredited schools of dentistry and other accredited dental education programs, such as dental hygiene programs or those sponsored by a school of dentistry, a hospital, or a public or private institution that offers postdoctoral training in the specialties of dentistry, advanced education in general dentistry, or a dental general practice residency.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Dental Services Report	DRP	56	1	56	45	2,520
	CBDPP	12	1	12	35	420
Total	68	68	2,940

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

[FR Doc. 2017-01218 Filed 1-18-17; 8:45 am]

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[Document Identifier: 0937-0198-60D]

Agency Information Collection Activities; Proposed Collection; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, announces plans

to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). The ICR is for extending the use of the approved information collection assigned OMB control number 0937-0198, which expires on May 31, 2017. Prior to submitting the ICR to OMB, OS seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on the ICR must be received on or before March 20, 2017.

ADDRESSES: Submit your comments to *Information.CollectionClearance@hhs.gov* or by calling (202) 690-5683 or email *Sherrette.funn@hhs.gov*.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the document identifier 0937-0198-60D for reference.

Proposed Project: Public Health Service Polices on Research Misconduct (42 CFR part 93)—OMB No 0937-0198-Extension—Office of Resource Integrity.

Abstract: This is a request to extend the currently approved collection, OMB No 0937-0198, which involves two forms: PHS-6349 and PHS-6315. The purpose of the Institutional Assurance and Annual Report on Possible Research Misconduct form (PHS-6349) is to provide data on the amount of research misconduct activity occurring in

institutions conducting PHS-supported research, as well as providing an annual assurance that those institutions have established and will follow administrative policies and procedures for responding to allegations of research misconduct that comply with the Public Health Service (PHS) Regulations on Research Misconduct (42 CFR part 93). The purpose of the Assurance of Compliance by Sub-Award Recipients form (PHS-6315) is to establish a similar assurance of compliance with 42 CFR part 93 for sub-awardee institutions, as well as provide data on the amount of research misconduct activity occurring in those sub-awardee institutions. Research misconduct is defined as receipt of an allegation of research misconduct and/or the conduct of an inquiry and/or investigation into such allegations. These data enable the ORI to monitor institutional compliance with the PHS regulation.

Summary of the information collection: Lastly, the forms will be used to respond to congressional requests for information to prevent misuse of Federal funds and to protect the public interest.

Need and Proposed Use of the Information: Public Health Service Polices on Research Misconduct (42 CFR part 93)—OMB No 0937-0198-Extension—Office of Research Integrity.

ESTIMATED ANNUALIZED BURDEN TABLE

Forms (if necessary)	Type of respondent	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
PHS-6349	Awardee Institutions	5435	1	10/60	906
PHS-6315	Sub-award Institution's	200	1	5/60	17
Total	923

OS specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the

use of automated collection techniques or other forms of information

technology to minimize the information collection burden.

Terry S. Clark,

Asst. Information Collection Clearance Officer.

[FR Doc. 2017-01106 Filed 1-18-17; 8:45 am]

BILLING CODE 4150-31-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier 4040-0018; 60-day Notice]

Agency Information Collection Request. 60-Day Public Comment Request, Grants.gov

AGENCY: Office of the Secretary, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, *Grants.gov* (EGOV), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to

minimize the information collection burden.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, email your request, including your address, phone number, OMB number, to *Ed.Calimag@hhs.gov*, or call the Reports Clearance Office on (202) 690-7569. Send written comments and recommendations for the proposed information collections within 60 days of this notice directly to the *Grants.gov*.

Proposed Project

SF-428 Tangible Personal Property Report

Reinstatement without change and 3 Year Extension and assignment as a Common Form.

Office: Grants.gov

Abstract: Reporting on the status of Federally owned property, including disposition, is necessitated in 2 CFR part 215, the "Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations", and the "Uniform Administrative Requirements for Grants and Agreements with State and Local

Governments", Additionally, Public Law 106-107, the Federal Financial Assistance Management Improvement Act requires that agencies "simplify Federal financial assistance application and reporting requirements." 31 U.S.C. 6101, Section 3.

Agencies are currently using a variety of forms to account for both Federally owned and grantee owned equipment and property. During the public consultation process mandated by Public Law 106-107, grant recipients requested a standard form to help them submit appropriate property information when required. The Public Law 106-107 Post Awards Subgroup developed a new standard form, the Tangible Personal Property Report, for submission of the required data. The form consists of the cover sheet (SF-428), three attachments to be used as required: Annual Report, SF-428-A; Final Report, SF-428-B; Disposition Request/Report, SF-428-C and a Supplemental Sheet, SF-428S to provide detailed individual item information when required. We are requesting a three-year clearance of this collection and that it be designated as a Common Form.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
SF-428 Tangible Personal Property Report	2000	1	1	2000
Total	2000	2000

Terry S. Clark,

Asst Information Collection Clearance Officer.

BILLING CODE 4151-AE-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[OMHA-1602-N]

Medicare Program; Administrative Law Judge Hearing Program for Medicare Claim and Entitlement Appeals; Quarterly Listing of Program Issuances—October Through December 2016

AGENCY: Office of Medicare Hearings and Appeals (OMHA), HHS.

ACTION: Notice.

SUMMARY: This quarterly notice lists the OMHA Case Processing Manual (OCPM) manual instructions that were published

from October through December, 2016. This manual standardizes the day-to-day procedures for carrying out adjudicative functions, in accordance with applicable statutes, regulations and OMHA directives, and gives OMHA staff direction for processing appeals at the OMHA level of adjudication.

FOR FURTHER INFORMATION CONTACT:

Amanda Axteen, by telephone at (571) 777-2705, or by email at *amanda.axteen@hhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Medicare Hearings and Appeals (OMHA), a staff division within the Office of the Secretary of the U.S. Department of Health and Human Services (HHS), administers the nationwide Administrative Law Judge hearing program for Medicare claim, organization and coverage determination, and entitlement appeals under sections 1869, 1155,

1876(c)(5)(B), 1852(g)(5), and 1860D-4(h) of the Social Security Act (the Act). OMHA ensures that Medicare beneficiaries and the providers and suppliers that furnish items or services to Medicare beneficiaries, as well as Medicare Advantage Organizations (MAOs), Medicaid State Agencies, and applicable plans have a fair and impartial forum to address disagreements with Medicare coverage and payment determinations made by Medicare contractors, MAOs, or Part D Plan Sponsors (PDPs), and determinations related to Medicare eligibility and entitlement, Part B late enrollment penalty, and income-related monthly adjustment amounts (IRMAA) made by the Social Security Administration (SSA).

The Medicare claim, organization and coverage determination appeals processes consist of four levels of administrative review, and a fifth level of review with the Federal district

courts after administrative remedies under HHS regulations have been exhausted. The first two levels of review are administered by the Centers for Medicare & Medicaid Services (CMS) and conducted by Medicare contractors for claim appeals, by MAOs and an independent review entity for Part C organization determination appeals, or by PDPs and an independent review entity for Part D coverage determination appeals. The third level of review is administered by OMHA and conducted by Administrative Law Judges. The fourth level of review is administered by the HHS Departmental Appeals Board (DAB) and conducted by the Medicare Appeals Council. In addition, OMHA and the DAB administer the second and third levels of appeal, respectively, for Medicare eligibility, entitlement, Part B late enrollment penalty, and IRMAA reconsiderations made by SSA; a fourth level of review with the Federal district courts is available after administrative remedies within SSA and HHS have been exhausted.

Sections 1869, 1155, 1876(c)(5)(B), 1852(g)(5), and 1860D-4(h) of the Act are implemented through the regulations at 42 CFR part 405 subparts I and J; part 417, subpart Q; part 422, subpart M; part 423, subparts M and U; and part 478, subpart B. As noted above, OMHA administers the nationwide Administrative Law Judge hearing program in accordance with these statutes and applicable regulations. As part of that effort, OMHA is establishing a manual, the OMHA Case Processing Manual (OCPM). Through the OCPM, the OMHA Chief Administrative Law Judge establishes the day-to-day procedures for carrying out adjudicative functions, in accordance with applicable statutes, regulations and OMHA directives. The OCPM provides direction for processing appeals at the OMHA level of adjudication for Medicare Part A and B claims; Part C organization determinations; Part D coverage determinations; and SSA eligibility and entitlement, Part B late enrollment penalty, and IRMAA determinations.

Section 1871(c) of the Act requires that we publish a list of all Medicare manual instructions, interpretive rules, statements of policy, and guidelines of general applicability not issued as regulations at least every 3 months in the **Federal Register**.

II. Format for the Quarterly Issuance Notices

This quarterly notice provides the specific updates to the OCPM that have occurred in the 3-month period. A hyperlink to the available chapters on

the OMHA Web site is provided below. The OMHA Web site contains the most current, up-to-date chapters and revisions to chapters, and will be available earlier than we publish our quarterly notice. We believe the OMHA Web site list provides more timely access to the current OCPM chapters for those involved in the Medicare claim, organization and coverage determination and entitlement appeals processes. We also believe the Web site offers the public a more convenient tool for real time access to current OCPM provisions. In addition, OMHA has a listserv to which the public can subscribe to receive immediate notification of any updates to the OMHA Web site. This listserv avoids the need to check the OMHA Web site, as update notifications are sent to subscribers as they occur. If accessing the OMHA Web site proves to be difficult, the contact person listed above can provide the information.

III. How To Use the Notice

This notice lists the OCPM chapters and subjects published during the quarter covered by the notice so the reader may determine whether any are of particular interest. We expect this notice to be used in concert with future published notices. The OCPM can be accessed at http://www.hhs.gov/omha/OMHA_Case_Processing_Manual/index.html.

IV. OCPM Releases for October Through December 2016

The OCPM is used by OMHA adjudicators and staff to administer the OMHA program. It offers day-to-day operating instructions, policies, and procedures based on statutes and regulations, and OMHA directives.

The following is a list and description of new or revised OCPM provisions and the subject matter. For future quarterly notices, we will list only the specific updates to the list of manual provisions that have occurred in the covered 3-month period. This information is available on our Web site at http://www.hhs.gov/omha/OMHA_Case_Processing_Manual/index.html.

OCPM Division I: General Matters

Chapter 6, CMS and CMS Contractor Roles. We corrected a misdirected link to the CMS Medicare Administrative Contractors Web site (<https://www.cms.gov/medicare/medicare-contracting/medicare-administrative-contractors/medicareadministrative-contractors.html>) in the table in Section I-6-1 of this chapter.

OCPM Division II: Part A/B Claim Determinations

Chapter 3, Procedural Screening. The table in Section II-3-4 A of this chapter was updated to include the minimum amounts in controversy (AICs) required for an Administrative Law Judge hearing for calendar years through 2017.

OCPM Division III: Part C Organization Determinations

Chapter 3, Procedural Screening. The table in Section III-3-4 A of this chapter was updated to include the minimum AICs required for an Administrative Law Judge hearing for calendar years through 2017.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Office of Refugee Resettlement; Statement of Organization, Functions, and Delegations of Authority

AGENCY: Administration for Children and Families, HHS.

ACTION: Notice.

SUMMARY: Statement of Organizations, Functions, and Delegations of Authority. The Administration for Children and Families (ACF) has reorganized the Office of Refugee Resettlement (ORR). Based on internal evaluation and feedback from external stakeholders related to making ORR programs more efficient, responsive, and better organized to meet ORR's statutory obligations, this reorganization aims to increase efficiencies and better align organizational structures with programmatic requirements and to increase the effectiveness of all ORR programs. To accomplish those goals, this reorganization realigns ORR's four current programmatic divisions to create two dedicated program offices, the Refugee Programs and the Unaccompanied Children Programs. Within the Unaccompanied Children Programs, it renames the Division of Children's Services to the Division of Unaccompanied Children Operations and creates two new divisions, the Division of Planning and Logistics, and the Division of Unaccompanied Children's Health. It also renames the Division of Policy to the Division of Policy and Procedures and changes the

Budget Team to the Division of Strategic Planning, Budget, and Analysis.

FOR FURTHER INFORMATION CONTACT:

Robert Carey, Office of Refugee Resettlement, 330 C Street SW., Washington, DC 20201, (202) 401–4556.

This notice amends Part K of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (HHS), Administration for Children and Families (ACF), as follows: Chapter KR, Office of Refugee Resettlement, as last amended by 80 FR 33269–33270, June 11, 2015.

I. Under Chapter KR, Office of Refugee Resettlement, delete KR.10 Organization in its entirety and replace with the following:

KR.10 Organization. The Office of Refugee Resettlement (ORR) is headed by a Director who reports directly to the Assistant Secretary for Children and Families. The Office is organized as follows:

Office of the Director (KRA)
Division of Policy and Procedures (KRA1)
Division of Strategic Planning, Budget and Analysis (KRA2)
Refugee Programs (KRB)
Division of Refugee Assistance (KRB1)
Division of Refugee Services (KRB2)
Division of Refugee Health (KRB3)
Unaccompanied Children Programs (KRC)
Division of Unaccompanied Children Operations (KRC1)
Division of Planning and Logistics (KRC2)
Division of Health for Unaccompanied Children (KRC3)

II. Under Chapter KR, Office of Refugee Resettlement, delete KR.20 Functions in its entirety and replace with the following:

KR.20 Function. A. The Office of the Director reports directly to the Assistant Secretary for Children and Families and is responsible for carrying ORR's mission and providing guidance and general supervision to the components of ORR. The Office provides direction in the development of program policy and budget and in the formulation of salaries and expense budgets. Staff also provide administrative and personnel support services.

The Office of the Director coordinates with the lead refugee and entrant program offices of other Federal departments; provides leadership in representing refugee and entrant programs, policies and administration to a variety of governmental entities and other public and private interests; and, acts as the coordinator of the total refugee and entrant resettlement effort

for ACF and the Department. The Office oversees the care and custody of unaccompanied alien children, grants specific consent for those who wish to invoke the jurisdiction of a state court for a dependency order to seek Special Immigrant Juvenile (SIJ) status, and makes determinations of eligibility for the Unaccompanied Refugee Minors (URM) Program. The Office of the Director develops guidance, legislative proposals, and routine interpretations of policy. The Office of the Director also provides management and administrative services for the office, including the coordination of human resources activities. Within the Office of the Director, the Chief of Staff assists and advises the Director in implementing strategic initiatives and management priorities, and oversees communications for the office, including responses to media requests, congressional inquiries, and stakeholder engagement.

The Division of Policy and Procedures assesses and evaluates ORR programs and their legal authorities and proactively recommends policy development, legislative proposals, and operational and management actions to comply with statutory parameters as they relate to each of the program areas. The Division advises the ORR Director, deputies, division directors, and staff on a wide range of significant and sensitive policy-related matters and strategies for attaining ORR policy objectives including reviewing proposed legislation and assisting with responding to Congressional inquiries. The Division identifies major emerging legislative and policy issues, assesses impacts, develops policy options and strategies, and implements policy initiatives, including the drafting of policies, guidance and regulations. The Division consults with the ORR operating divisions in the creation and clearance of procedures, consistent with established regulations, policies and guidance, and implements training on policies and procedures for ORR staff. The Division of Policy and Procedures develops clearance and informational memoranda, briefing materials and summary statements for ORR, ACF, and department leadership on complex and sensitive ORR matters. The Division collaborates with the ORR operating divisions and regional staff to clarify and enhance existing policies and guidance, particularly in areas where the work of two or more divisions overlap. The Division of Policy and Procedures serves as the ORR point of contact for other ACF and HHS offices related to legal and evaluation issues,

such as OGC, OLAB, GAO, and OIG. The Division represents ORR on interagency working groups and collaborates with both government and private sector leaders on ORR policy-related issues and developments.

The Division of Strategic Planning, Budget and Analysis leads ORR in the development, tracking, and implementation of strategic goals and performs budget, data analysis, and compliance functions for the office. The Division prepares annual budget estimates and related materials and performs allocation and tracking of funds for all programs. The Division performs analysis on the changing needs of the populations served by ORR programs, provides leadership to identify data needs and sources, and formulates data and reporting requirements. The Division also leads the office in the development of strategic goals and objectives and ensures that policies and operational and management activities are designed to achieve ORR, ACF and department goals. The Division develops and maintains standard monitoring procedures for the office and ensures the regular monitoring of ORR grant funds.

B. The Refugee Programs are responsible for carrying out programs that provide assistance to refugees, asylees, Cuban and Haitian entrants, and certain Amerasians and victims of severe forms of trafficking in persons. The Refugee Programs oversee the movement of children into the Unaccompanied Refugee Minor (URM) program. The Refugee Programs consist of the Division of Refugee Assistance, the Division of Refugee Services, and the Division of Refugee Health. The Refugee Programs collect and maintain data related to the populations served. The Deputy Director reports directly to the Director of ORR.

The Division of Refugee Assistance represents ORR in coordinating services and capacity for refugees in a manner that helps refugees become employed and economically self-sufficient soon after their arrival in the United States. The Division monitors and provides technical assistance to the State-administered domestic assistance programs and Wilson/Fish projects. The Division works closely with each State in designing a resettlement program specific to the needs of incoming populations. The Division develops guidance and procedures for their implementation; manages special initiatives to increase refugee self-sufficiency such as through State funded discretionary grants or pilot programs. The Division also assists

public and private agencies on data reporting and the resolution of reporting problems. The Division develops and supports the flow of information on refugee profiles and community resources in support of effective placement at the State and local level. The Division works closely with the Department of State to ensure effective and seamless orientation from overseas to local resettlement community. The Division manages the effective allocation of formula social services and targeted assistance in support of newly arriving populations. The Division tracks all State costs related to refugee assistance.

The Division of Refugee Services manages effective refugee resettlement through the programmatic implementation of grants, contracts and special initiatives, such as the Match Grant Program. The Division oversees and monitors most ORR discretionary grants; recommends grantee allocation; coordinates with the grants management office to review the financial expenditures under discretionary grant programs; provides data in support of apportionment requests; and, provides technical assistance on discretionary grants operations. The Division coordinates and provides liaison with the Department and other Federal agencies on discretionary grant operational issues and other activities as specified by the Director or required by Congressional mandate. The Division responds to unanticipated refugee and entrant arrivals or significant increases in arrivals to communities where adequate or appropriate services do not exist through supplemental initiatives. The Division works to promote economic independence among refugees through social services, educational services, and intensive case management and community development initiatives.

The Division of Refugee Health provides direction for assuring that refugees are provided medical assistance and mental health services through the State-administered programs and alternative programs. The Division ensures the quality of medical screening and initial medical treatment of refugees through its administration of grant programs, technical assistance, and interagency agreements in support of comprehensive medical and mental health services. The Division also supports mental health services to victims of torture. The Division works closely with State Refugee Health Coordinators in the planning and provision of medical and mental health services to meet the individual needs of incoming populations. The Division

tracks all state costs related to refugee medical assistance and screening.

C. The Unaccompanied Children Programs are directly responsible for providing services to unaccompanied children who are referred to ORR for care pending immigration status, or identified as victims of trafficking. The Unaccompanied Children Programs consists of the Division of Unaccompanied Children Operations, the Division of Planning and Logistics, and the Division of Unaccompanied Children's Health. Unaccompanied Children Programs staff ensures that services are administered in a manner that supports child welfare standards of care and services and complete regular monitoring of service provision. The Deputy Director reports directly to the Director of ORR.

The Division of Operations implements intake and placement decisions for all unaccompanied alien children. The Division supports specialized care through grants and contracts, and also conducts monitoring and inspections of facilities and placement locations in which unaccompanied children reside. The Division also maintains statistical information and data on each child and any actions concerning the child while the child is under ORR's care. The Division ensures consideration of the child's best interest in care and custody decisions. The Division coordinates all decisions related to sponsor reunification, background checks, home assessments, follow-up services, medical assessment and treatment, and repatriation. The Division administers the pro bono legal services and child advocate program and compiles a State-by-State list of professionals or entities qualified to provide the children with a guardian and attorney representational services. The Division also supports grants for services provided to children after their release from ORR care.

The Division of Planning and Logistics oversees the development of a comprehensive annual plan to ensure that Unaccompanied Children Programs are able to accommodate the number of referrals of children to ORR care. The Division prepares plans for anticipated shelter capacity and staffing needs. The Division leads coordination with other federal agencies and management of grants and contracts. If ORR requires temporary shelters to care for unaccompanied children, the Division leads the operational and logistical support for those shelters.

The Division of Health for Unaccompanied Children oversees the provision of health and medical services to unaccompanied children in ORR

care. The Division reviews and approves orders for complex medical procedures and reviews test results for certain medical ailments. The Division also ensures reporting of public health information to the appropriate public health authorities.

III. Continuation of Policy. Except as inconsistent with this reorganization, all statements of policy and interpretations with respect to organizational components affected by this notice within ACF, heretofore issued and in effect on this date of this reorganization are continued in full force and effect.

IV. Delegation of Authority. Pending further delegation, directives or orders by the Director of ORR, all delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegations, provided they are consistent with this reorganization.

V. Funds, Personnel, and Equipment. Transfer of organizations and functions affected by this reorganization shall be accompanied in each instance by direct and support funds, positions, personnel, records, equipment, supplies, and other resources.

This realignment is effective January 19, 2017.

Date: December 30, 2016.

Sylvia M. Burwell,

Secretary.

BILLING CODE 4184-34-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Protecting Our Infants Act Report to Congress

AGENCY: Substance Abuse and Mental Health Services Administration (SAMHSA), Department of Health and Human Services (HHS).

ACTION: Request for information.

SUMMARY: Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment, in the Department of Health and Human Services (HHS) announces the opening of a docket to obtain public comment on a report to Congress in response to the Projecting Our Infants Act of 2015 (POIA) (Pub. L. 114-91). The POIA mandated HHS to: Conduct a review of planning and coordination activities related to prenatal opioid exposure and neonatal abstinence

syndrome; develop recommendations for the identification, prevention, and treatment of prenatal opioid exposure and neonatal abstinence syndrome; and develop a strategy to address gaps, overlap, and duplication among Federal programs and Federal coordination efforts to address neonatal abstinence syndrome. The POIA further mandates that public comment be sought regarding the proposed strategy and incorporated as appropriate.

DATES: *Comment Close Date:* To be assured consideration, comments on the must be received at one of the addresses provided below, no later than February 21, 2017 at 5:00 p.m. EST.

ADDRESSES: You may submit comments identified by Docket No. [SAMHSA-2016-0004] by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Electronically:* You may submit electronic comments to: POIAcomments@samhsa.hhs.gov.

- *By regular mail:* You may mail written comments to the following address ONLY: Substance Abuse and Mental Health Services Administration, Center for Substance Abuse Treatment, 5600 Fishers Lane, Room 13E49, Rockville, MD 20852 Attn: Docket No. [SAMHSA-2016-0004]. Please allow sufficient time for mailed comments to be received before the close of the comment period.

- *By express or overnight mail:* You may send written comments to the following address ONLY: Substance Abuse and Mental Health Services Administration, Attention: Melinda Campopiano, 5600 Fishers Lane, 13E49, Rockville, MD 20852 Attn: Docket No. [SAMHSA-2016-0004].

- *By hand or courier:* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following address prior to the close of the comment period: For delivery in Rockville, MD: Substance Abuse and Mental Health Services Administration, Attention: Melinda Campopiano, 5600 Fishers Lane, 13E49, Rockville, MD 20852. To deliver your comments to the Rockville address, call telephone number (240) 276-2701 in advance to schedule your delivery with one of our staff members.

Instructions: To avoid duplication, please submit only one copy of your comments by only one method. All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to <http://www.regulations.gov>, including any

personal information provided. For access to the report or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Melinda Campopiano, MD, Chief Medical Officer, Center for Substance Abuse Treatment, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, 13E49, Rockville, MD 20852. Email: POIAcomments@samhsa.hhs.gov. Phone: (240)276-2701.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. Comments received by the deadline will be available for public inspection at the Substance Abuse and Mental Health Service Administration, 5600 Fishers Lane, 13E49, Rockville, MD 20852, Monday through Friday of each week from 8:30 a.m. to 4:00 p.m. To schedule an appointment to view public comments, call (240) 276-2701.

Background: The POIA mandated HHS to: (1) Conduct a review of planning and coordination activities related to prenatal opioid exposure and neonatal abstinence syndrome (Section 2(a) of the Act); (2) develop recommendations for the identification, prevention, and treatment of prenatal opioid exposure and neonatal abstinence syndrome (Section 3 of the Act); and (3) develop a strategy to address gaps, overlap, and duplication among Federal programs and Federal coordination efforts to address neonatal abstinence syndrome (Section 2(b) of the Act). The POIA is available at: <https://www.congress.gov/bill/114th-congress/senate-bill/799>.

In response to this Act, this report provides background information on prenatal opioid exposure and neonatal abstinence syndrome (Part 1), summarizes HHS activities related to prenatal opioid exposure and neonatal abstinence syndrome (Part 2), presents clinical and programmatic evidence and recommendations for preventing and treating neonatal abstinence syndrome (Part 3), and presents a strategy to address the identified gaps, challenges, and recommendations (Part 4).

Public comment is sought for “Part 4: Strategy to Protect Our Infants” (Section 2(b) of the Act) and comments will be incorporated into the strategy as appropriate. The final strategy will be posted on an HHS Web site by May 25, 2017.

Supporting and Related Material in the Docket: The information provided includes:

(1) The Report

Summer King,
Statistician.

BILLING CODE 9111-23-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1668]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Title 44, Part 65 of the Code of Federal Regulations (44 CFR part 65). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and

Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean

that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

(Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: December 21, 2016.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency****[Docket ID: FEMA-2017-0004; OMB No. 1660-0046]****Agency Information Collection Activities: Proposed Collection; Comment Request; Emergency Management Institute (EMI) Independent Study Course Enrollment Application and Test Answer Sheet****AGENCY:** Federal Emergency Management Agency, DHS.**ACTION:** Notice.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning enrollment for

students and score assessments for FEMA's Independent Study Program.

DATES: Comments must be submitted on or before March 20, 2017.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at www.regulations.gov under Docket ID FEMA-2017-0004. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., 8NE, Washington, DC 20472-3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Mark Magers, Instructional Systems Specialist, FEMA, PNP—Emergency Management Institute, at 301-447-1038.

You may contact the Information Management Division for copies of the proposed collection of information at email address: FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: FEMA's Emergency Management Institute (EMI) provides a wide variety of training to emergency management personnel throughout the country. The EMI Independent Study (IS) Program is part of the FEMA training program authorized under section 611(f) of the Robert T. Stafford Disaster Relief and Emergency Act, Public Law 93-288 as amended. These courses are offered online by EMI. The IS Program provides valuable training to Federal, State, local and Tribal emergency management personnel and the general citizenry of the United States without having to attend a resident course at EMI, or at a State-sponsored course. The IS program also includes a course on the National Incident Management System (NIMS). NIMS is our nation's incident management system. Homeland Security Presidential Directive 5, "Management of Domestic Incidents," requires the adoption of NIMS by all Federal departments and agencies. This directive also requires that Federal preparedness assistance funding for States, Territories, local jurisdictions

and Tribal entities be dependent on being NIMS compliant.

Collection of Information

Title: Emergency Management Institute (EMI) Independent Study Course Enrollment Application and Test Answer Sheet.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660-0046.

FEMA Forms: FEMA Form 064-0-9, Emergency Management Institute (EMI) Independent Study Course Enrollment Application.

Abstract: The IS program office collects data from FEMA Form 064-0-9 to create and update student records and provide students with credit for training completion. The system also allows FEMA to track completions and failures of course exams. The data on the electronic form will be encrypted and sent to the server to be parsed into the Independent Study database.

Affected Public: Individuals and households, business or other for-profit, not for profit institutions, Farms, Federal government, State, local or Tribal government.

Number of Respondents: 689,980.

Number of Responses: 2,069,940.

Estimated Total Annual Burden

Hours: 1,034,970 hours.

Estimated Cost: The estimated annual cost to respondents for the hour burden is \$25,211,869. There are no annual costs to respondents' operations and maintenance costs for technical services. There are no annual start-up or capital costs. The cost to the Federal Government is \$260,893.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Dated: January 13, 2017.

Richard W. Mattison,

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111-72-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1663]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before April 19, 2017.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

You may submit comments, identified by Docket No. FEMA-B-1663, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been

engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at http://floodsrp.org/pdfs/srp_fact_sheet.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection

at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1662]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood

Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or

pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1667]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before April 19, 2017.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for

inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

You may submit comments, identified by Docket No. FEMA-B-1667, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are

provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at http://floodsrp.org/pdfs/srp_fact_sheet.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison. (Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: December 21, 2016.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Internal Agency Docket No. FEMA–4285–DR; Docket ID FEMA–2016–0001]

North Carolina; Amendment No. 16 to Notice of a Major Disaster Declaration**AGENCY:** Federal Emergency Management Agency, DHS.**ACTION:** Notice.**SUMMARY:** This notice amends the notice of a major disaster declaration for the State of North Carolina (FEMA–4285–DR), dated October 10, 2016, and related determinations.**DATES:** Effective December 23, 2016.**FOR FURTHER INFORMATION CONTACT:** Dean Webster, Office of Response and Recovery, Federal Emergency

Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: The notice of a major disaster declaration for the State of North Carolina is hereby amended to include the following area among those areas determined to have been adversely affected by the event declared a major disaster by the President in his declaration of October 10, 2016.

Warren County for Public Assistance, including direct federal assistance. The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance

(Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,
Administrator, Federal Emergency
Management Agency.

[FR Doc. 2017–01095 Filed 1–18–17; 8:45 am]

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1665]

Changes in Flood Hazard Determinations**AGENCY:** Federal Emergency Management Agency, DHS.**ACTION:** Notice.**SUMMARY:** This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone

designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each

community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1666]

Proposed Flood Hazard Determinations**AGENCY:** Federal Emergency Management Agency, DHS.**ACTION:** Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before January 19, 2017.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for

inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

You may submit comments, identified by Docket No. FEMA-B-1666, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at http://floodsrp.org/pdfs/srp_fact_sheet.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS-2016-0096]

Homeland Security Science and Technology Advisory Committee

AGENCY: Science and Technology Directorate, DHS.

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting.

SUMMARY: The Homeland Security Science and Technology Advisory Committee (HSSTAC) will meet on February 16-17, 2017 in Washington, DC. The meeting will be an open session with both in-person and webinar participation.

DATES: The HSSTAC will meet in-person Thursday, February 16, 2017, from 1:30 p.m.-5:30 p.m. and Friday, February 17, 2017, from 9:00 a.m.-12:00 p.m.

Due to security requirements, screening pre-registration is required for this event. Please see the "REGISTRATION" section below.

The meeting may close early if the committee has completed its business.

ADDRESSES: Homeland Security, 1120 Vermont Ave. NW., 8th Floor, Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Michel Kareis, HSSTAC Designated Federal Official, S&T IAO STOP 0205, Department of Homeland Security, 245 Murray Lane, Washington, DC 20528-0205, 202-254-8778, (Office), 202-254-6176 (Fax) Michel.Kareis@hq.dhs.gov (Email).

SUPPLEMENTARY INFORMATION:

I. Background

Notice of this meeting is given under the Federal Advisory Committee Act (FACA), 5 U.S.C. appendix (Pub. L. 92-463). The committee addresses areas of interest and importance to the Under Secretary for Science and Technology (S&T), such as new developments in systems engineering, cyber-security, knowledge management and how best to leverage related technologies funded by other Federal agencies and by the private sector. It also advises the Under Secretary on policies, management processes, and organizational constructs as needed.

II. Registration

To pre-register for the virtual meeting (webinar) please send an email to: hsstac@hq.dhs.gov. The email should include the name(s), title, organization/affiliation, email address, and telephone number of those interested in attending. For information on services for individuals with disabilities or to request special assistance at the meeting, please contact Michel Kareis as soon as possible.

If you plan to attend the meeting in-person you must RSVP by February 15, 2017. To register, email hsstac@hq.dhs.gov with the following subject line: RSVP to HSSTAC Meeting. The email should include the name(s), title, organization/affiliation, email address, and telephone number of those interested in attending.

III. Public Comment

At the end of each open session, there will be a period for oral statements. Please note that the oral statement period may end before the time indicated, following the last call for oral statements. To register as a speaker, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

To facilitate public participation, we invite public comment on the issues to be considered by the committee as listed in the "Agenda" below. Written comments must be received by February 6, 2017. Please include the docket number (DHS-2016-0084) and submit via one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.
- **Email:** hsstac@hq.dhs.gov. Include the docket number in the subject line of the message.
- **Fax:** 202-254-6176.
- **Mail:** Michel Kareis, HSSTAC Executive Director, S&T IAO STOP 0205, Department of Homeland Security, 245 Murray Lane, Washington, DC 20528-0205.

Instructions: All submissions received must include the words "Department of Homeland Security" and the docket number. Comments received will be posted without alteration at <http://www.regulations.gov>.

Docket: For access to the docket to read the background documents or comments received by the HSSTAC, go to <http://www.regulations.gov> and enter the docket number into the search function: DHS-2016-0096.

Agenda: Day 1: This session will begin with updates from the subcommittees under HSSTAC. The Commercialization Subcommittee will present draft recommendations to the committee for discussion. The Social Media Working Group Subcommittee will present the results from the vote to accept the Best Practices document and the status of the new Federal Advisory Committee designation. The Internet of Things Smart Cities will present the final recommendations. And lastly, an update on the creation of a subcommittee on Quadrennial Homeland Security Review (QHSR) and

an update on tasking under the subcommittee will be provided. This session will be followed by questions from the public. There will be discussions on the Internet of Things draft guidance document for their Next Generation First Responder (NGFR) program and the HSSTAC FY17 planning updates followed by public comments to close out the day. *Day 2:* The morning session will begin with a meeting overview followed by sessions on Technology Scouting, Technology Transfer and Commercialization.

The sessions will focus discussion on the technology development lifecycle to include best practice recommendations on how to create situational awareness of new or emerging trends, technologies, capabilities and research; develop processes to efficiently use networks and partnerships to identify, locate, and evaluate existing or developing technologies, and identify methods that can be used to engage the commercial marketplace to support the development and ultimately the acquisition by homeland security stakeholders of new technologies while prioritizing the need to leverage limited resources and maximize impact. The day will end with questions and comments from the public.

Dated: January 12, 2017.

Michel Kareis,

Executive Director, Homeland Security Science and Technology Advisory Committee.

BILLING CODE 4410-10-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615-0029]

Agency Information Collection Activities: Application for Waiver of Grounds of Inadmissibility, Form I-601; Revision of a Currently Approved Collection.

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection notice was previously published in the **Federal**

Register on October 17, 2016, at 81 FR 71522, allowing for a 60-day public comment period. USCIS did receive 1 comment in connection with the 60-day notice.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until February 21, 2017. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB USCIS Desk Officer via email at oira_submission@omb.eop.gov. Comments may also be submitted via fax at (202) 395-5806. (This is not a toll-free number.) All submissions received must include the agency name and the OMB Control Number [1615-0029].

You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make. For additional information please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529-2140, Telephone number (202) 272-8377. (This is not a toll-free number; comments are not accepted via telephone message.) Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at <http://www.uscis.gov>, or call the USCIS National Customer Service Center at (800) 375-5283; TTY (800) 767-1833.

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS-2007-0042 in the search box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Waiver of Grounds of Inadmissibility.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I-601, USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* *Primary:* Individuals or households. Form I-601 is necessary for USCIS to determine whether the applicant is eligible for a waiver of inadmissibility under section 212 of the Act. Furthermore, this information collection is used by individuals who are seeking for Temporary Protected Status (TPS).

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I-601 is 20,194; the estimated hour burden per paper responses is 1.75 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 35,340 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$7,497,023.

Dated: January 12, 2017.

Samantha Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0045]

Agency Information Collection Activities: Petition by Entrepreneur To Remove Conditions on Permanent Resident Status, Form I–829; Revision of a Currently Approved Collection

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day Notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection notice was previously published in the **Federal Register** on October 4, 2016, at 81 FR 68445, allowing for a 60-day public comment period. USCIS received 2 comments in connection with the 60-day notice.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until February 21, 2017. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB USCIS Desk Officer via email at oir_submission@omb.eop.gov. Comments may also be submitted via fax at (202) 395–5806. (This is not a toll-free number.) All submissions received must include the agency name and the OMB Control Number [1615–0045].

You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make. For additional information please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529–2140, Telephone number (202) 272–8377 (This is not a toll-free number; comments are not accepted via

telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at <http://www.uscis.gov>, or call the USCIS National Customer Service Center at (800) 375–5283; TTY (800) 767–1833.

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS–2006–0009 in the search box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection:

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition by Entrepreneur to Remove Conditions on Permanent Resident Status.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–829; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* *Primary:* Individuals or households. Alien entrepreneurs admitted to the United States under section 203(b)(5) of the Immigration and Nationality Act (INA) are required to petition for removal of the conditional residence status imposed on them and

their accompanying spouse and children, within a 90-day period before the second anniversary of their conditional residence under section 216A of the INA.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–829 is 3,859 and the estimated hour burden per response is 3 hours. 3,859 respondents for biometrics processing at an estimated 1 hour and 10 minutes (1.17 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 16,092 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$487,199.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5967–N–01]

HUD Approval of Requests for Transfers of Multifamily Housing Project-Based Rental Assistance, HUD-Held or Insured Debt, and Income-Based Use Restrictions

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This notice establishes the terms and conditions by which HUD will approve a request for the transfer of project-based rental assistance, debt held or insured by the Secretary, and statutorily required income-based use restrictions from one multifamily housing project to another (or between several such projects). The Department of Housing and Urban Development Appropriations Act, 2016 gives the Secretary the authority to approve transfer requests for fiscal years (FY) 2016 and 2017, provided that the Secretary publish a notice in the **Federal Register** establishing the terms and conditions for HUD approval of

such transfers no later than 30 days before such notice takes effect. In FY 2016, HUD continued to utilize the FY 2015 published criteria, which covered authority enacted for both FY 2015 and FY 2016. For FY 2017, HUD continues to utilize, without revision, the published FY 2015 criteria. HUD believes that criteria established and published in FY 2015, and cross-referenced in this notice, will continue to assist project owners to determine whether a transfer is feasible given the specific circumstances of their multifamily projects.

DATES: *Effective Date:* February 21, 2017.

FOR FURTHER INFORMATION CONTACT: Katherine Nzive, Director, Program Administration Office, Office of Asset Management and Portfolio Oversight of Multifamily Housing, Office of Housing, Department of Housing and Urban Development, 451 7th Street SW., Room 6110, Washington, DC 20410; telephone number 202-402-3440 (this is not a toll-free number). Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION: Beginning with section 318 of the Department of Housing and Urban Development Appropriations Act, 2006 (Pub. L. 109-115, 119 Stat. 2396, approved November 30, 2005), HUD appropriations acts have contained a general provision authorizing the Secretary to approve requests from project owners for the transfer of certain rental assistance, debt, and income-based use restrictions between HUD-assisted projects. For fiscal year 2017, this transfer authority is provided under section 212 of the Consolidated Appropriations Act, 216 (Pub. L. 114-113, 129 Stat. 2889, approved December 18, 2015 (Section 212). Section 212(a) states that “[n]otwithstanding any other provision of law . . . the Secretary of Housing and Urban Development may authorize the transfer of some or all project-based assistance, debt held or insured by the Secretary and statutorily required low-income and very low-income use restrictions if any, associated with one or more multifamily housing project or projects to another multifamily housing project or projects.” Section 212(b) also allows for phased transfers of project-based assistance to accommodate the financing and other requirements related to rehabilitating or constructing the project or projects to which the assistance is transferred.

HUD approval of transfers is subject to the conditions enumerated in the

appropriations act for the applicable fiscal year. These statutory terms and conditions have, in general, been consistent from one appropriations act to the next. The statutory criteria for FY 2017 is enumerated in section 212(c), which provides as follows:

(c) The transfer authorized in subsection (a) is subject to the following conditions:

(1) NUMBER AND BEDROOM SIZE OF UNITS.—

(A) For occupied units in the transferring project: the number of low-income and very low-income units and the configuration (i.e. bedroom size) provided by the transferring project shall be no less than when transferred to the receiving project or projects and the net dollar amount of Federal assistance provided to the transferring project shall remain the same in the receiving project or projects.

(B) For unoccupied units in the transferring project: the Secretary may authorize a reduction in the number of dwelling units in the receiving project or projects to allow for a reconfiguration of bedroom sizes to meet current market demands, as determined by the Secretary and provided there is no increase in the project-based assistance budget authority.

(2) The transferring project shall, as determined by the Secretary, be either physically obsolete or economically nonviable.

(3) The receiving project or projects shall meet or exceed applicable physical standards established by the Secretary.

(4) The owner or mortgagor of the transferring project shall notify and consult with the tenants residing in the transferring project and provide a certification of approval by all appropriate local governmental officials.

(5) The tenants of the transferring project who remain eligible for assistance to be provided by the receiving project or projects shall not be required to vacate their units in the transferring project or projects until new units in the receiving project are available for occupancy.

(6) The Secretary determines that this transfer is in the best interest of the tenants.

(7) If either the transferring project or the receiving project or projects meets the condition specified in subsection (d)(2)(A),¹ any lien on the receiving project resulting from additional financing obtained by the owner shall be subordinate to any FHA-insured mortgage lien transferred to, or placed on, such project by the Secretary, except that the Secretary may waive this requirement upon determination that such a waiver is necessary to facilitate the financing of acquisition, construction, and/or rehabilitation of the receiving project or projects.

(8) If the transferring project meets the requirements of subsection (d)(2),² the owner or mortgagor of the receiving project or

¹ Subsection (d)(2)(A) pertains to housing that is subject to a mortgage insured under the National Housing Act (12 U.S.C. 1701 *et seq.*).

² Subsection (d)(2) defines the term “multifamily housing project.”

projects shall execute and record either a continuation of the existing use agreement or a new use agreement for the project where, in either case, any use restrictions in such agreement are of no lesser duration than the existing use restrictions.

(9) The transfer does not increase the cost (as defined in section 502 of the Congressional Budget Act of 1974, as amended) of any FHA-insured mortgage, except to the extent that appropriations are provided in advance for the amount of any such increased cost.

Section 212 (e)(1) requires that HUD publish by notice in the **Federal Register** the terms and conditions for HUD approval of transfers, no later than 30 days before such notice takes effect. This notice is being issued in accordance with the publication requirements of section 212(e)(1). In this **Federal Register** notice, HUD advises that the criteria for approval of transfers are unchanged from those in effect for fiscal years 2015 and 2016 and published in the **Federal Register** on March 31, 2015, at 80 FR 16963.³ For the convenience of the reader, the criteria can also be found in Microsoft Word format on HUD’s webpage at: http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/mfh/memos_letters.

This notice will become effective February 21, 2017. HUD will begin accepting requests for transfers pursuant to this notice on or after the effective date. For questions regarding the submission or status of a transfer request, interested parties should contact their local HUD Multifamily Regional Center or Satellite Office. The list of HUD Multifamily Regional Centers and Satellite Offices is available at: http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/mfh/hsgmfbus/aboutbuspcps.

Dated: January 12, 2017.

Edward L. Golding,

Principal Deputy Assistant Secretary for Housing.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5981-D-02]

Redelegation of Authority to the Deputy Assistant Secretaries in the Office of Community Planning and Development

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

³ See <https://www.gpo.gov/fdsys/pkg/FR-2015-03-31/pdf/2015-06776.pdf>.

ACTION: Notice of Redlegation of Authority to Deputy Assistant Secretaries in Community Planning and Development.

SUMMARY: Section 7(d) of the Department of Housing and Urban Development Act, as amended, provides authority to the Secretary to delegate functions, powers, and duties as the Secretary deems necessary. By separate notice published in today's **Federal Register**, the Secretary of HUD delegates concurrent authority to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development. In this notice, the Assistant Secretary of Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Deputy Assistant Secretaries and other specified HUD officials all powers and authorities necessary to carry out Office of Community Planning and Development (CPD) programs, except for those powers and authorities specifically excluded.

DATES: *Effective Date:* January 10, 2017.

FOR FURTHER INFORMATION CONTACT: Cliff Taffet, General Deputy Assistant Secretary, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Room 7100, Washington, DC 20410-7000; telephone number 202-708-2690. This is not a toll-free number. For those needing assistance, this number may be accessed via TTY by calling the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Published elsewhere today in the **Federal Register** is a revised consolidated delegation of authority from the Secretary to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development. This notice updates and revises redelegations of authority to Deputy Assistant Secretaries within the Office of Community Planning and Development. This notice supersedes all previous redelegations of authority by the Assistant Secretary for Community Planning and Development to CPD Deputy Assistant Secretaries and other specified HUD officials in CPD,

including a redelegation published on June 29, 2012 at 77 FR 38853. Also published elsewhere in today's **Federal Register** is a redelegation of authority from the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development to Directors and Deputy Directors of CPD in HUD Field Offices.

Section A. General Redlegation of Authority

1. Deputy Assistant Secretary for Grant Programs

Except those authorities specifically excluded, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Deputy Assistant Secretary for Grant Programs all powers and authorities necessary to carry out the following Community Planning and Development programs and matters:

a. Comprehensive Housing Affordability Strategies (CHAS), Title I of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12701 *et seq.*); consolidated plans, 24 CFR part 91.

b. The HOME Investment Partnerships Act, Title II of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12721 *et seq.*); 24 CFR part 92.

c. Housing Trust Fund (HTF), Section 1338 of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, added by Section 1131 of Public Law 110-289, 122 Stat. 2654 (codified at 12 U.S.C. 4568).

d. Tax Credit Assistance Program (TCAP) as authorized under the HOME Investments Partnership Program heading of Division A, Title XII of American Recovery and Reinvestment Act of 2009, Public Law 111-5, 123 Stat. 115, 220-21.

e. Title I of the Housing and Community Development Act of 1974, Public Law 93-383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*); 24 CFR part 570 including:

(1) Community Development Block Grant (CDBG) program;

(2) Section 108 Loan Guarantee program;

(3) Economic development grants pursuant to Section 108(q);

(4) Urban Development Action Grants

(5) Neighborhood Stabilization Programs Under Housing and Economic Recovery Act of 2008, Public Law 110-289, 122 Stat. 2850; Title XII of Division A of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, 123 Stat. 115; and Section 1497 of the Wall Street Reform and Consumer Protection Act of 2010, Public Law 111-203, 124 Stat. 1376 (codified as amended at 42 U.S.C. 5301 note);

(6) CDBG Disaster Recovery Grants as provided for in annual and supplemental HUD appropriations acts; and

(7) Appalachian Regional Commission grants pursuant to section 214 of the Appalachian Regional Development Act of 1965, Public Law 89-4, 79 Stat. 5 (codified as amended at 40 U.S.C. 14507) and consistent with the CDBG program authorized under Title I of the Housing and Community Development Act of 1974, Public Law 93-383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*).

f. Overall Departmental responsibility for policies, standards, procedures, and advisory materials for compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91-646, 84 Stat. 1894 (1971) (codified as amended at 42 U.S.C. 4601 *et seq.*); 49 CFR part 24 (except for the authority to exercise the Federal Agency waiver authority provided under 49 CFR 24.7).

g. Environment, overall Departmental responsibility for compliance with the National Environmental Policy Act of 1969 (NEPA), Public Law 91-190, 83 Stat. 852 (1970) (codified as amended at 42 U.S.C. 4321-4347), and the related laws and authorities cited in 24 CFR 50.4 and 58.5. The Director of the Office of Environment and Energy, within the Office of the Deputy Assistant Secretary for Grant Programs, is designated to serve as the Departmental Environmental Clearance Officer (DECO). The DECO serves as the Departmental lead in all federal initiatives that address NEPA and other federal environmental laws and authorities cited in 24 CFR 50.4 and 58.5 and as the Departmental signatory for environmental compliance MOUs with other federal agencies addressing compliance at the regional and national level.

h. Slum Clearance and Urban Renewal Program Under Title I of the Housing Act of 1949, Public Law 81-171, 63 Stat. 413 and any program that is superseded or inactive by, or inactive by reason of, Title I of the Housing and Community Development Act of 1974,

Public Law 93–383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5316).

i. Rental Rehabilitation Program, United States Housing Act of 1937 § 17, Public Law 98–181, 97 Stat. 1196 (repealed 1990); 24 CFR part 511.

j. Section 312 Rehabilitation Loan Program, Housing Act of 1964 § 312, Public Law 88–560, 78 Stat. 769 (repealed 1990); 24 CFR part 510.

k. Homeownership Zone Initiative (HOZ) grants as provided for in section 205 of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1997, Public Law 104–204, 110 Stat. 2874 (1996) and funded with recaptured Nehemiah grants authorized under Title VI of the Housing and Community Development Act of 1987, Pub. L. 100–242, 101 Stat. 1815 (1988) (codified at 12 U.S.C. 17151 note).

l. HOPE for Homeownership of Single-family Housing Program (HOPE 3), Title IV, Subtitle C of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101–625, 104 Stat. 4079 (1990) (codified at 42 U.S.C. 12891).

m. New Communities Program, Section 413 of the Housing and Urban Development Act of 1968, Public Law 90–448, 82 Stat. 476 (repealed 1983), Section 726 of the Housing and Urban Development Act of 1970, Public Law 91–609 (repealed 1983), 84 Stat. 1784, Section 474 of the Housing and Urban-Rural Recovery Act of 1983, Public Law 98–181, 97 Stat. 1237 (codified at 12 U.S.C. 1701g–5b), and any other functions, powers and duties which may affect the liquidation of the New Communities program.

n. Technical assistance and capacity building awards authorized under any program or matter listed in Section A.1 and as provided for in annual and supplemental HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3093 (2009)). Further, in the absence of the Deputy Assistant Secretary for Grant Programs, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Office of Block Grant Assistance all powers and authorities of the Assistant Secretary necessary to carry out programs and matters listed in of Section A.1. paragraphs e. and h. Further, in the absence of the Deputy Assistant Secretary for Grant Programs, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for

Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Office of Affordable Housing Programs all powers and authorities of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development necessary to carry out programs and matters listed in Section A.1. paragraphs b, c, d, f, g, and k.

2. Deputy Assistant Secretary for Special Needs

Except those authorities specifically excluded, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Deputy Assistant Secretary for Special Needs all powers and authorities necessary to carry out the following Community Planning and Development programs and matters:

a. Title IV of the McKinney-Vento Homeless Assistance Act, Public Law 100–77, 101 Stat. 482 (1987) (codified as amended at 42 U.S.C. 11301 *et seq.*), including the following: Emergency Shelter Grants/Emergency Solutions Grants Program, 24 CFR part 576; Supportive Housing program, 24 CFR part 583; Shelter Plus Care program, 24 CFR part 582; Moderate Rehabilitation for Single Room Occupancy program, 24 CFR part 882, subpart H; Continuum of Care program, 24 CFR part 578; Rural Housing Stability Assistance program.

b. Base Closure, Base Closure Community Redevelopment and Homeless Assistance Act of 1994, Public Law 103–421, 108 Stat. 4352 (codified as amended at 10 U.S.C. 2687 note); 24 CFR part 586.

c. Homelessness Prevention and Rapid Re-Housing Program (HPRP), as authorized under the Homelessness Prevention Fund heading of Division A, Title XII of the American Recovery and Reinvestment Act of 2009, Public Law 111–5, 123 Stat. 115.

d. Title V of the McKinney-Vento Homeless Assistance Act, Public Law 100–77, 101 Stat. 482 (1987) (codified as amended 42 U.S.C. 11411 *et seq.*), 24 CFR part 581.

e. Veterans Homelessness Prevention Demonstration Program, as provided for in annual HUD appropriations act(s) (e.g., Omnibus Appropriations Act, 2009, Pub. L. 111–8, 123 Stat. 524 (2009)).

f. AIDS Housing Opportunity Act, Title VIII, Subtitle D of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101–625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12901–12912); 24 CFR part 574.

Further, in the absence of the Deputy Assistant Secretary for Special Needs, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Office of Special Needs Programs all powers and authorities of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development necessary to carry out programs and matters listed in Section A.2. paragraphs a., b., c., d., and e. Further, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Community Assistance Division the authority to sign notices of available properties and subsequent letters regarding the properties under Title V of the McKinney-Vento Homeless Assistance Act (codified as amended 42 U.S.C. 11411 *et seq.*). Further, in the absence of the Deputy Assistant Secretary for Special Needs, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Office of HIV/AIDS Housing all powers and authorities of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development necessary to carry out programs and matters listed in Section A.2. paragraph f.

3. Deputy Assistant Secretary for Economic Development

Except those authorities specifically excluded, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy

Assistant Secretary for Community Planning and Development redelegate to the Deputy Assistant Secretary for Economic Development all powers and authorities necessary to carry out the following Community Planning and Development programs and matters:

a. The Loan Guarantee Recovery Program under Section 4 of the Church Arson Prevention Act of 1996, Public Law 104–155, 110 Stat. 1392; 24 CFR part 573.

b. Neighborhood Initiatives grants specifically designated in annual HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3034 (2009)).

c. Rural Innovation Fund grants as provided for in annual HUD appropriations act(s) (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3084 (2009)).

d. Rural Housing and Economic Development grants specifically designated originally in the Fiscal Year 1998 HUD Appropriations Act, Public Law 105–65, 111 Stat. 1344 1997, and subsequent annual HUD appropriations acts.

e. Self-Help Homeownership Opportunity Program (SHOP) under section 11 of the Housing Opportunity Program Extension Act of 1996, Public Law 104–120, 110 Stat. 834 (codified as amended at 42 U.S.C. 12805 note).

f. Pilot Program to Rehabilitate and Modify Homes of Disabled and Low-Income Veterans, as authorized under section 1079 of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015, Public Law 113–291, 128 Stat. 3292, 3521–3524 (2014).

Further, in the absence of the Deputy Assistant Secretary for Economic Development, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Director of the Rural Housing and Economic Development Division all powers and authorities of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development necessary to carry out programs and matters listed in Section A.3.

4. Deputy Assistant Secretary for Operations

Except those authorities specifically excluded, the Assistant Secretary for

Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Deputy Assistant Secretary for Operations and the Director of Technical Assistance and Management all powers and authorities of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development necessary to carry out the following Community Planning and Development programs and matters:

a. Technical Assistance and Capacity Building awards authorized under any program or matter delegated to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development (e.g., section 107 of the Housing and Community Development Act of 1987, as amended and Section 4 Capacity Building for Community Development and Affordable Housing Grants program as authorized by Section 4 of the HUD Demonstration Act of 1993 (Pub. L. 103–120, 107 Stat. 1148, 42 U.S.C. 9816 note), as amended, and as provided for in annual and supplemental HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3093 (2009)).

b. All programs consolidated in the Revolving Fund (Liquidating Programs) established pursuant to Title II of the Independent Offices Appropriations Act, Public Law 98–45, 97 Stat. 223 (1983) (codified at 12 U.S.C. 1701g–5), including all authority of the Assistant Secretary with respect to functions, administration and management of the Revolving Fund (Liquidating Programs). Only the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development are the responsible officials for allotments in the Revolving Fund (Liquidating Programs).

c. Economic Development Initiative grants, as provided for in annual HUD appropriations acts (e.g., Consolidated Appropriations Resolution, Fiscal Year 2003, Pub. L. 108–7, 117 Stat. 11 (2003)).

d. Grants for urban Empowerment Zones (EZ) as provided for in annual HUD appropriations acts (e.g., Consolidated Appropriations Resolution, Fiscal Year 2003, Pub. L. 108–7, 117 Stat. 11 (2003)).

e. Neighborhood Initiatives grants specifically designated in annual HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3034 (2009)).

f. Rural Innovation Fund grants as provided for in annual HUD appropriations act(s) (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3084 (2009)).

g. The Renewal Communities (RC) Initiative as authorized under title 26, subtitle A, chapter 1, subchapter X of the Internal Revenue Code, as amended, 26 U.S.C. 1400E *et seq.*; 24 CFR part 599.

h. The urban Empowerment Zones (EZ), as authorized under title 26, subtitle A, chapter 1, subchapter U of the Internal Revenue Code (codified as amended at 26 U.S.C. 1391 *et seq.*); 24 CFR parts 597 and 598.

Section B. General Authority Excepted

The authority redelegated under Section A does not include:

1. The authority to issue or waive regulations covered by section 7(q) of the Department of Housing and Urban Development Act;

2. The authority to exercise the Federal Agency waiver authority provided under 49 CFR 24.7;

3. The authority to enter regulations or directives into Departmental clearance; or

4. Any authority not delegated to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development under the Consolidated Delegation of Authority for Community Planning and Development. The Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, or the General Deputy Assistant Secretary for Community Planning and Development may revoke at any time this redelegation with respect to the programs and matters listed in Section A.

Section C. Authority To Further Redelegate

The authority redelegated in Section A may be further redelegated to employees of the Department.

Section D. Redelegations Superseded

This notice supersedes all prior redelegations of authority to Deputy Assistant Secretaries of Community Planning and Development, including the redelegation of authority published on June 29, 2012 at 77 FR 38853.

Section E. Actions Ratified

The Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development hereby ratify all actions previously taken by the Deputy Assistant Secretaries for Community Planning and Development, with respect to the programs and matters listed in Section A.

Authority: Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: January 10, 2017.

Harriet Tregoning,

Principal Deputy Assistant Secretary for Community Planning and Development.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5630-N-09]

Rental Assistance Demonstration: Revised Program Notice

AGENCY: Office of the Assistant Secretary for Public and Indian Housing and Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: On July 26, 2012, HUD announced through notice in the **Federal Register** the implementation of the statutorily authorized Rental Assistance Demonstration (RAD), which provides the opportunity to test the conversion of public housing and other HUD-assisted properties to long-term, project-based Section 8 rental assistance. The July 26, 2012, **Federal Register** notice also announced the availability of the program notice (PIH 2012-32), providing program instruction on HUD's Web site. On July 2, 2013, HUD issued a revised program notice (PIH 2012-32, REV-1). On April 26, 2015, HUD issued a further revised program notice (PIH 2012-32, REV-2). This **Federal Register** notice announces further revisions to RAD and solicits public comment on changed eligibility and selection criteria. It also announces

the posting of a further revised program notice (Revised Program Notice, PIH 2012-32/H 2017-03, REV-3). As provided by the RAD Statute, this notice addresses the requirement that the demonstration may proceed after publication of notice of its terms in the **Federal Register**. This notice summarizes the key changes made to PIH 2012-32/H 2017-03, REV-3. This notice also meets the RAD statutory requirement to publish at least 10 days before they may take effect, waivers and alternative requirements authorized by the statute, which does not prevent the demonstration, as modified, from proceeding immediately.

DATES: *Comment Due Date:* February 21, 2017.

Effective Dates: The Revised Program Notice, PIH 2012-32/H 2017-03, REV-3, other than those items listed as subject to notice and comment or new statutory or regulatory waivers or alternative requirements specified in this notice, is effective January 19, 2017.

The new statutory and regulatory waivers and alternative requirements are effective January 30, 2017.

The items listed as subject to notice and comment will be effective upon February 21, 2017. If HUD receives adverse comment that leads to reconsideration, HUD will notify the public in a new notice immediately upon the expiration of the comment period.

ADDRESSES: Interested persons are invited to submit comments electronically to rad@hud.gov no later than the comment due date.

FOR FURTHER INFORMATION CONTACT: To assure a timely response, please direct requests for further information electronically to the email address rad@hud.gov. Written requests may also be directed to the following address: Office of Public and Indian Housing—RAD Program; Department of Housing and Urban Development; 451 7th Street SW., Room 2000; Washington, DC 20410.

SUPPLEMENTARY INFORMATION:**I. Background**

RAD, authorized by the Consolidated and Further Continuing Appropriations Act, 2012 (Pub. L. 122-55, signed November 18, 2011) (2012 Appropriations Act), allows for the conversion of assistance under the public housing, Rent Supplement (Rent Supp), Rental Assistance (RAP), Moderate Rehabilitation (Mod Rehab), and Mod Rehab Single Room Occupancy (SRO) programs (collectively, “covered programs”) to long-term, renewable assistance under

Section 8.¹ The most recent version of the RAD program notice is PIH 2012-32, REV-2, located at https://portal.hud.gov/hudportal/documents/huddoc?id=PIHNotice_2012-32_062015.pdf.

II. Key Changes Made to RAD

The following highlights key changes to the RAD program that are included in the Revised Program Notice:

First Component (Public Housing Conversions)

1. Creating a new way in which public housing agencies (PHAs) can increase their RAD rents by relinquishing existing balances of replacement housing factor (RHF) funds or demolition and disposition transition funding (DDTF) (see section 1.5.A).

2. Eliminating the cap on the number of project-based voucher (PBV) units at a project (see section 1.6.A.2).

3. Improving the quality of information that must be provided to residents of properties undergoing conversion and requiring that PHAs submit responses to resident comments in connection with meetings held following the issuance of the Commitment to enter into a Housing Assistance Payments Contract (CHAP) (see section 1.8).

4. Extending the prohibition on re-screening to current public housing households that will reside in non-RAD PBV or non-RAD project-based rental assistance (PBRA) units placed in a project that contain RAD PBV or RAD PBRA units so as to facilitate the right to return to the assisted property (see sections 1.6.C.1 and 1.7.B.1).

5. Correcting the phase-in of rents for residents who may experience a rent increase as a result of conversion, in order to ensure a more even distribution across years (see sections 1.6.B.3 and 1.7.B.3).

6. Clarifying that a PHA is permitted to receive cash acquisition proceeds in excess of any seller take-back financing and that such proceeds must be used for Affordable Housing Purposes, a newly defined term (see section 1.4.7).

7. Establishing flexibility for requirements related to the Capital Needs Assessments, permitting certain

¹ The RAD statutory requirements were amended by the Consolidated Appropriations Act, 2014 (Pub. L. 113-76, signed January 17, 2014) (2014 Appropriations Act), the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113-235, signed December 16, 2014) (2015 Appropriations Act), and the Consolidated Appropriations Act, 2016 (Pub. L. 114-113, signed December 18, 2015) (2016 Appropriations Act). The statutory provisions of the 2012 Appropriations Act pertaining to RAD, as amended, are referred to as the RAD Statute in this notice.

exemptions when the assisted units are a small percentage of the total project (see section 1.4.A.1).

8. Requiring title reports to be submitted with the Financing Plan to avoid delays in closing (see section 1.15, Attachment 1A).

9. Modifying the maximum allowable developer fee, by excluding from the formula for larger transactions any acquisition payments made to the PHA, developer fee, and reserves (see section 1.14).

10. Establishing greater flexibility to underwrite to new loan products that have emerged in the market (see section 1.15, Attachment 2A).

11. Providing greater detail on the acceptable forms in which a public or non-profit entity can demonstrate ownership or control (see section 1.4.A.11).

12. Providing guidance on owners' responsibilities to treat lead-based paint hazards in the context of a RAD conversion (see section 1.4.A.15).

13. Encouraging PHAs and their partners to grant current workers whose employment positions may be eliminated during conversion the right of first refusal for new employment openings for which they are qualified (see section 1.4.A.16).

Second Component (Mod Rehab, Mod Rehab SRO, Rent Supp, RAP Conversions)

1. Eliminating the cap on the number of PBV units at a project (see section 2.5.C).

2. Permitting Mod Rehab conversions to PBRA to convert at comparable market rents, up to 110 percent of fair market rent (FMR) (see sections 2.6.C and D).

3. For Mod Rehab SRO conversions, authorizing the use of the efficiency FMR for SRO units, rather than 75 percent of the efficiency FMR, which is the existing SRO standard (see section 2.7).

4. Allowing all conversions to PBRA to achieve rents between 110 percent and 120 percent of FMR (up to the statutory maximum), if justified by comparable market rents and only in certain circumstances where preservation criteria have been met (see sections 3.6.C and D).

5. For conversions to PBRA, permitting the use of Small Area FMR (SAFMR) in the calculation of contract rent cap, with HUD approval (see sections 2.5 and 2.6).

III. Changes Subject to Notice and Comment

The Revised Program Notice makes changes to some of the selection and

eligibility criteria for conversions of public housing under the First Component. Pursuant to the RAD Statute, these changes must be made available for public comment before they are effective. Please submit all comments to rad@hud.gov. As indicated above, the following changes will be effective on February 21, 2017. If HUD receives adverse comment that leads to reconsideration, HUD will notify the public in a new notice immediately upon the expiration of the comment period.

The changes subject to notice and comment are:

1. Consolidating the selection priority categories for new applications into two buckets: (1) High investment applications and (2) all other applications (see section 1.11.C).

2. Allowing PHAs to submit a simple letter of interest, rather than an application, when a waiting list has formed. A letter of interest would serve to reserve a project or portfolio's position on the waiting list subject to future submission of a RAD Application (see section 1.9).

3. Making eligible an entire contiguous HOPE VI project that was developed in phases as long as the earliest phase is greater than ten years old (see section 1.3.H).

IV. New Waivers and Alternative Requirements

The RAD Statute provides that waivers and alternative requirements authorized under the First Component must be published by notice in the **Federal Register** no later than 10 days before the effective date of such notice. Under the Second Component of RAD, HUD is authorized to waive or alter the provisions of subparagraphs (C) and (D) of section 8(o)(13) of the United States Housing Act of 1937 (42 U.S.C. 1437f) (the 1937 Act).

HUD has previously published its waivers and alternative requirements for RAD, on July 26, 2012 (77 FR 43850), July 2, 2013 (78 FR 39759), and June 26, 2015 (80 FR 36830). This notice only includes waivers and alternative requirements not previously published or that have changed from previous publications. Although waivers or alternative requirements under the Second Component are not subject to a **Federal Register** publication requirement, the new Second Component waivers and alternative requirements are included in this notice as a matter of convenience.

The new waivers and alternative requirements are:

1. *Cap on PBV Units in a Project.*
Provisions affected: Section 8(o)(13)(D)

of the Act, and 24 CFR 983.56, 983.257(b), 983.262(a) and (d).
Alternative requirements: None. The previously imposed alternative requirements are waived, effectively eliminating any cap on the number of PBV units in a project undergoing conversion.

2. *Eligibility and Targeting of Tenants for Initial Occupancy.*
Provisions affected: 24 CFR 982.201 and 880.603(b).
Alternative requirements: Pursuant to the RAD Statute, at conversion, current households cannot be excluded from occupancy at the Covered Project based on any rescreening, income eligibility, or income targeting. Therefore, current households admitted into the PBV program following conversion of assistance at the property were not subject to the application of eligibility criteria for conditions that occurred prior to conversion of assistance but were subject to ongoing eligibility requirement for actions occurring after conversion. Once the grandfathered household moves out, the unit must be leased to an eligible family. MTW agencies may not alter this requirement. Further, so as to facilitate the right to return to the assisted property, this provision shall apply to current public housing residents of the Converting Project that will reside in non-RAD PBV units or non-RAD PBRA units placed in a project that contain RAD PBV units or RAD PBRA units. Such families and such contract units will otherwise be subject to all requirements of the applicable program, specifically 24 CFR 983 for non-RAD PBV units and the PBRA requirements governing the applicable contract for non-RAD PBRA units. Accordingly, HUD is waiving 24 CFR 982.201 and 880.603(b) for current public housing residents of the Converting Project that will reside in non-RAD PBV units or non-RAD PBRA units placed in a project that contain RAD PBV units or RAD PBRA units.

3. *Total Tenant Payment (TTP).*
Provisions affected: Section 3(a)(1) of the Act and 24 CFR 983.3 and 880.201.
Alternative requirements: If a resident's monthly rent increases by more than the greater of 10 percent or \$25 purely as a result of conversion, the rent increase will be phased in over 3 years or 5 years. Eligibility for the phase-in is to be determined at the Initial Certification which occurs at the time the household is converted to PBRA. A phase-in must not be applied after the household's Initial Certification. To implement the phase-in, HUD is specifying alternative requirements for section 3(a)(1) of the Act, as well as 24 CFR 880.201 (definition of "total tenant payment")

(TTP)) to the extent necessary to allow for the phase-in of tenant rent increases. A PHA must create a policy setting the length of the phase-in period at three years, five years, or a combination depending on circumstances. For example, a PHA may create a policy that uses a three-year phase-in for smaller increases in rent and a five-year phase-in for larger increases in rent. This policy must be in place at conversion and may not be modified after conversion.

The method described below explains the set percentage-based phase-in a Project Owner must follow according to the phase-in period established. For purposes of this section “Calculated Multifamily TTP” refers to the TTP calculated in accordance with regulations at 24 CFR 5.628 (not capped at Gross Rent) and the “most recently paid TTP” refers to the TTP recorded on the family’s most recent HUD Form 50059. If a family in a project converting from Public Housing to PBRA was paying a flat rent immediately prior to conversion, the PHA should use the flat rent amount to calculate the phase-in amount for Year 1, as illustrated below.

Three-Year Phase-in:

- Year 1: Any recertification (interim or annual) performed prior to the second annual recertification after conversion—33 percent of difference between most recently paid TTP or flat rent and the Calculated Multifamily TTP

- Year 2: Year 2 Annual Recertification (AR) and any Interim Recertification (IR) in prior to Year 3 AR—50 percent of difference between most recently paid TTP and Calculated Multifamily TTP

- Year 3: Year 3 AR and all subsequent recertifications—Year 3 AR and any IR in Year 3: Full Calculated Multifamily TTP²

Five-Year Phase-in

- Year 1: Any recertification (interim or annual) performed prior to the second annual recertification after conversion—20 percent of difference between most recently paid TTP or flat rent and the Calculated Multifamily TTP

- Year 2: Year 2 AR and any IR prior to Year 3 AR—25 percent of difference between most recently paid TTP and Calculated Multifamily TTP

- Year 3: Year 3 AR and any IR prior to Year 4 AR—33 percent of difference between most recently paid TTP and Calculated Multifamily TTP

- Year 4: Year 4 AR and any IR prior to Year 5 AR—50 percent of difference between most recently paid TTP and Calculated Multifamily TTP

- Year 5 AR and all subsequent recertifications—Full Calculated Multifamily TTP

Please Note: In either the three-year phase-in or the five-year phase-in, once Calculated Multifamily TTP is equal to or less than the previous TTP, the phase-in ends and tenants will pay full Calculated Multifamily TTP from that point forward.

4. *Mod Rehab SRO FMRs. Provision affected:* 24 CFR 888.113(f)(2).

Alternative requirements: The applicable FMR used for SRO units for initial and re-determined rents will be the zero bedroom (efficiency) FMR. Accordingly, HUD is waiving 24 CFR 888.113(f)(2) for Mod Rehab SRO units.

5. *Small Area FMRs for PBRA.*

Provision affected: 24 CFR 888.113(h). *Alternative requirements:* Projects converting assistance to PBRA under the Second Component may use a Small Area FMR for initial contract rent setting and when adjusting contract rents. Accordingly, HUD is waiving 24 CFR 888.113(h) for those projects.

V. Revised Program Notice Availability

The Revised Program Notice (PIH 2012–32/H 2017–03, REV–3) can be found on RAD’s Web site, www.hud.gov/RAD.

VI. Environmental Review

A Finding of No Significant Impact with respect to the environment was made in connection with HUD notice PIH 2012–32 issued on March 8, 2012, and in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Finding remains applicable to the Revised Program Notice and is available for public inspection during regular business hours in the Regulations Division, Office of General Counsel; Department of Housing and Urban Development; 451 7th Street SW., Room 10276; Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, please schedule an appointment to review the finding by calling the Regulations Division at 202–402–3055 (this is not a toll-free

number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800–877–8339.

Dated: January 12, 2017.

Nani A. Coloretti,
Deputy Secretary.

[FR Doc. 2017–01246 Filed 1–18–17; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5995–N–3]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION:

In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to

² For example, where a resident’s most recently paid TTP is \$100, but the Calculated PBV TTP is \$200 and remains \$200 for the period of the resident’s occupancy, (i.e. no changes in income) the resident would continue to pay the same rent and utilities for which it was responsible prior to conversion. At the first recertification following conversion, the resident’s contribution would increase by 33% of \$100 to \$133. At the second AR, the resident’s contribution would increase by 50% of the \$66 differential to the standard TTP, increasing to \$166. At the third AR, the resident’s contribution would increase to \$200 and the resident would continue to pay the Calculated PBV TTP for the duration of their tenancy.

HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 12-07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301)-443-2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 or send an email to title5@hud.gov for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the

landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (e.g., acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following address(es): GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040 Washington, DC 20405, (202)- 501-0084; Navy: Ms. Nikki Hunt, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374, (202)-685-9426; (These are not toll-free numbers).

Dated: January 12, 2017.

Brian P. Fitzmaurice,

Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5981-D-03]

Redelegation of Authority to Directors and Deputy Directors of Community Planning and Development in Field Offices

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice of redelegation of authority to field offices.

SUMMARY: Section 7(d) of the Department of Housing and Urban Development Act, as amended, provides authority to the Secretary to delegate functions, powers, and duties as the Secretary deems necessary. By separate notice published in today's **Federal Register**, the Secretary of HUD delegates concurrent authority to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development. In this notice, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to the Directors and Deputy Directors of Community Planning and Development in HUD Field Offices all powers and authorities necessary to carry out Office of Community Planning and Development programs, except those powers and authorities specifically excluded.

DATES: *Effective Date:* January 10, 2017.

FOR FURTHER INFORMATION CONTACT: Cliff Taffet, General Deputy Assistant Secretary, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Room 7100, Washington, DC 20410-7000; telephone number 202-708-2690. This is not a toll-free number. For those needing assistance, this number may be accessed via TTY by calling the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION: Published elsewhere in today's **Federal Register** is a revised consolidated delegation of authority from the Secretary of HUD to the Assistant Secretary for Community

Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development. This notice updates and revises redelegations of authority from the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development to CPD Directors and Deputy Directors in HUD Field Offices. This notice supersedes all previous redelegations of authority to CPD Directors and Deputy Directors in HUD Field Offices, including a redelegation published on June 29, 2012 at 77 FR 38851. Also published elsewhere in today's **Federal Register** is a redelegation of authority from the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development to the Deputy Assistant Secretaries in Community Planning and Development.

Section A. General Redelegation of Authority

Except those authorities specifically excluded, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegates to the Directors and Deputy Directors of Community Planning and Development in HUD Field Offices all powers and authorities of the Assistant Secretary necessary to carry out the following Community Planning and Development programs and matters:

1. Community Development Block Grants (CDBG), Section 108 Loan Guarantees, Neighborhood Stabilization Programs (NSP), CDBG Disaster Recovery Grants, and other programs covered by Title I of the Housing and Community Development Act of 1974, Public Law 93-383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*); 24 CFR part 570. *Authority not redelegated:*

- a. Terminate, reduce, or limit the availability of grant payments pursuant to section 111(a), 42 U.S.C. 5311.
- b. Adjust entitlement and state grants pursuant to section 104(e), 42 U.S.C. 5304.
- c. Determine basic grant amounts for metropolitan cities, urban counties, and

States pursuant to section 106, 42 U.S.C. 5306.

d. Reallocate funds pursuant to section 106(c) or (d), 42 U.S.C. 5306.

e. Determine the qualifications of localities for special consideration. This includes, but is not limited to, the determination of qualifications of counties as urban counties pursuant to section 102(a)(6), 42 U.S.C. 5302, the determination of what constitutes a city pursuant to section 102(a)(5), 42 U.S.C. 5302, and the determination of levels of physical and economic distress of cities and urban counties for eligibility for urban development action grants pursuant to section 119(b), 42 U.S.C. 5318.

f. Approve and disapprove applications, or amendments to applications, filed for loan guarantee or grant assistance, issue commitments or grant awards, execute grant agreements, or issue guarantees pursuant to section 108, 42 U.S.C. 5308.

2. Comprehensive Housing Affordability Strategies (CHAS), Title I of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12701 *et seq.*); consolidated plans, 24 CFR part 91.

3. Emergency Shelter Grants/ Emergency Solutions Grants program, Title IV, Subtitle B of the McKinney-Vento Homeless Assistance Act, Public Law 100-77, 101 Stat. 482 (1987) (codified as amended at 42 U.S.C. 11371 *et seq.*); 24 CFR part 576. *Authority not redelegated:*

- a. Determine allocation amounts.
- b. Approve built-in waivers or exceptions authorized under Title IV of the McKinney-Vento Homeless Assistance Act and applicable implementing regulations.

4. The HOME Investment Partnerships Act, Title II of the Cranston-Gonzalez National Affordable Housing Act (NAHA), Public Law 101-625, 104 Stat. 4094 (1990) (codified as amended at 42 U.S.C. 12721 *et seq.*); 24 CFR part 92. *Authority not redelegated:*

- a. Determine allocation and reallocation amounts pursuant to section 217 of NAHA.
- b. Revoke a jurisdiction's designation as a participating jurisdiction pursuant to section 216 of NAHA.
- c. Effect remedies for noncompliance pursuant to section 223 of NAHA.
- d. Approve a change in the number of units designated as HOME-assisted units during the period of affordability pursuant to 24 CFR 92.205(d).
- e. Make a determination that a consortium does not have sufficient authority and administrative capability

to administer the HOME Program pursuant to 24 CFR 92.101(a)(3).

5. Housing Trust Fund (HTF), Section 1338 of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, added by Section 1131 of Public Law 110-289, 122 Stat. 2654 (codified at 12 U.S.C. 4568). *Authority not redelegated:*

- a. Determine allocations, adjustments, and reallocation amounts.

6. Homelessness Prevention and Rapid Re-Housing Program (HPRP) as authorized under the Homelessness Prevention Fund heading of Division A, Title XII of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, 123 Stat. 115.

7. AIDS Housing Opportunity Act, Title VIII, Subtitle D of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12901-12912); 24 CFR part 574. *Authority not redelegated:*

- a. Determine allocations, adjustments, and reallocation amounts.

b. Revoke a jurisdiction's designation as an eligible state or eligible metropolitan statistical area for a formula allocation or as an eligible applicant for a nonformula allocation.

c. Suspend or terminate current awards in whole or in part, withhold further awards, and effect other legally available remedies pursuant to 24 CFR 200.338-200.342.

8. Title IV Subtitles C-F of the McKinney-Vento Homeless Assistance Act, Public Law 100-77, 101 Stat. 482 (1987) (codified as amended at 42 U.S.C. 11381 *et seq.*), including the following: Supportive Housing Program, 24 CFR part 583, Shelter Plus Care program, 24 CFR part 582, Moderate Rehabilitation for Single Room Occupancy program, 24 CFR part 882, subpart H, Continuum of Care program, 24 CFR part 578, and Rural Housing Stability Assistance program. *Authority not redelegated:*

- a. Make funding decisions.
- b. Approve built-in waivers or exceptions authorized under Title IV of the McKinney-Vento Homeless Assistance Act and applicable implementing regulations.

9. Economic Development Initiative grants, as provided for in annual HUD appropriations acts (e.g., Consolidated Appropriations Resolution, Fiscal Year 2003, Pub. L. 108-7, 117 Stat. 11 (2003)).

10. Neighborhood Initiatives grants specifically designated in annual HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111-117, 123 Stat. 3034 (2009)).

11. Rural Innovation Fund grants as provided for in annual HUD

appropriations act(s) (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3084 (2009)).

12. The urban Empowerment Zones (EZ), as authorized under title 26, subtitle A, chapter 1, subchapter U of the Internal Revenue Code (codified as amended at 26 U.S.C. 1391 *et seq.*); 24 CFR parts 597 and 598. *Authority not redelegated:*

a. Approve or amend strategic plans or other state and local commitments, including boundary changes.

b. Revoke a designation, including issuing a warning letter pursuant to 24 CFR parts 597 and 598.

13. Responsibility for compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91–646, 84 Stat. 1894 (1971) (codified as amended at 42 U.S.C. 4601 *et seq.*); 49 CFR part 24 for programs covered by Section A of this redelegation. *Authority not redelegated:*

a. Exercise the Federal Agency waiver authority provided under 49 CFR 24.7.

14. Technical Assistance and Capacity Building awards authorized under any program or matter delegated under Section A (e.g., section 107 of the Housing and Community Development Act of 1987, Pub. L. 100–242, 101 Stat. 1815 (1988)) and as provided for in annual and supplemental HUD appropriations acts (e.g., Consolidated Appropriations Act 2010, Pub. L. 111–117, 123 Stat. 3093 (2009)).

15. Certain Community Planning and Development programs that are no longer authorized for funding (or future funding is not anticipated) but administration of the programs must continue until all Department responsibilities are discharged and finally terminated. These programs, as of June 2011, include the following:

a. Any program superseded by, or inactive by reason of, Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5316).

b. Grants for urban Empowerment Zones (EZ) as provided for in annual HUD appropriations acts (e.g., Consolidated Appropriations Resolution, Fiscal Year 2003, Pub. L. 108–7, 117 Stat. 11 (2003)).

c. HOPE for Homeownership of Single-family Housing Program (HOPE 3), Title IV, Subtitle C of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101–625, 104 Stat. 4079 (1990) (codified at 42 U.S.C. 12891).

d. New Communities Program, Section 413 of the Housing and Urban Development Act of 1968, Public Law 90–448, 82 Stat. 476 (repealed 1983), Section 726 of the Housing and Urban

Development Act of 1970, Public Law 91–609 (repealed 1983), 84 Stat. 1784, Section 474 of the Housing and Urban-Rural Recovery Act of 1983, Public Law 98–181, 97 Stat. 1237 (codified at 12 U.S.C. 1701g–5b), and any other functions, powers and duties which may affect the liquidation of the New Communities program.

e. Rural Housing and Economic Development grants specifically designated originally in the Fiscal Year 1998 HUD Appropriations Act, Public Law 105–65, 111 Stat. 1344 (1997), and subsequent annual HUD appropriations acts.

f. Renewal Communities (RC), as authorized under Title 26, Subtitle A, Chapter 1, Subchapter X of the Internal Revenue Code (codified as amended at 26 U.S.C. 1400E *et seq.*); 24 CFR part 599.

g. All programs consolidated in the Revolving Fund (Liquidating Programs) established pursuant to Title II of the Independent Offices Appropriations Act, Public Law 98–45, 97 Stat. 223 (1983) (codified as amended at 12 U.S.C. 1701g–5) including all authority of the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development with respect to the functions, administration and management of the Revolving Fund (Liquidating Programs). Only the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development are the responsible official for allotments in the Revolving Fund (Liquidating Programs).

Section B. Limited Denial of Participation

Subject to the excepted authority in Section C, the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development redelegate to Directors and Deputy Directors of CPD in HUD Field Offices the authority to order a limited denial of participation sanction pursuant to HUD regulations at 2 CFR part 2424, with respect to the programs and matters listed in Section A; provided that the General Counsel, or such other official as may be designated by the General Counsel, must: (1) Concur in any proposed sanction under

2 CFR part 2424 before it is issued, and (2) concur in any proposed settlement of a sanction under 2 CFR part 2424.

Section C. General Authority Excepted

The authority redelegated under Section A does not include:

1. The authority to issue or waive regulations covered by section 7(q) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(q));
2. The authority to sue and be sued;
3. The authority to effect remedies for noncompliance requiring notice and an opportunity for an administrative hearing;
4. The authority for allotments in the Revolving Fund (Liquidating Programs) under paragraph g of Section A; or
5. Any authority not delegated to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development under the Consolidated Delegation of Authority for Community Planning and Development. The Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development may revoke at any time this redelegation with respect to the programs and matters listed in Section A and orders of limited denial of participation issued in accordance with Section B.

Section D. Authority To Further Redelegate

The authority redelegated in Sections A and B may not be further redelegated.

Section E. Redelegations Superseded

This notice supersedes all prior redelegations of authority to Directors and Deputy Directors of Community Planning and Development in HUD Field Offices, including the redelegation of authority published on June 29, 2012 at 77 FR 38851.

Section F. Actions Ratified

The Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary for Community Planning and Development hereby ratify all actions previously taken by the Directors and Deputy Directors of CPD in HUD Field Offices with respect to the programs and matters listed in Section A and orders of limited denial of

participation issued in accordance with Section B.

Authority: Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: January 10, 2017.

Harriet Tregoning,

Principal Deputy Assistant, Secretary for Community Planning and Development.

[FR Doc. 2017-01238 Filed 1-18-17; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5981-D-01]

Consolidated Delegations of Authority for the Office of Community Planning and Development

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of delegations of authority.

SUMMARY: This notice updates, clarifies, and consolidates delegations of authority from the Secretary of Housing and Urban Development to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development and the General Deputy Assistant Secretary for Community Planning and Development.

DATES: *Effective Date:* January 10, 2017.

FOR FURTHER INFORMATION CONTACT: Cliff Taffet, General Deputy Assistant Secretary, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Room 7100, Washington, DC 20410-7000; telephone number 202-708-2690. This is not a toll-free number. For those needing assistance, this number may be accessed via TTY by calling the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION: This notice updates, clarifies, and consolidates into one notice the authority delegated by the Secretary of Housing and Urban Development to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development and the General Deputy Assistant Secretary for Community Planning and Development. This notice supersedes all previous delegations to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development and the General Deputy Assistant Secretary for Community Planning and Development,

including the delegation published on April 20, 2015, at 80 FR 21747.

Section A. Authority Delegated

Only the Assistant Secretary for Community Planning and Development is delegated the authority to issue a final regulation or a Notice of Funding Availability (NOFA). The authority delegated herein to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development, and the General Deputy Assistant Secretary includes the authority to waive regulations and statutes, but for the Principal Deputy Assistant Secretary and the General Deputy Assistant Secretary the authority to waive statutes is limited in Section B below. Except as provided in Section B, the Secretary of HUD delegates to the Assistant Secretary for Community Planning and Development, the Principal Deputy Assistant Secretary for Community Planning and Development and the General Deputy Assistant Secretary for Community Planning and Development the authority of the Secretary with respect to the programs and matters listed below:

1. The AIDS Housing Opportunity Act, Title VIII, Subtitle D of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12901-12912); 24 CFR part 574.
2. The Base Closure Community Redevelopment and Homeless Assistance Act of 1994, Public Law 103-421, 108 Stat. 4346 (codified as amended at 10 U.S.C. 2687 note); 24 CFR part 586.
3. Capacity Building for Community Development and Affordability Housing grants, Section 4 of the HUD Demonstration Act of 1993, Public Law 103-120, 107 Stat. 1148 (codified as amended at 42 U.S.C. 9816 note).
4. Comprehensive Housing Affordability Strategies (CHAS), Title I of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12701 *et seq.*); 24 CFR part 91.
5. Economic Development Initiative grants, as provided for in annual HUD appropriations acts (e.g., the Consolidated Appropriations Resolution, Fiscal Year 2003, Public Law 108-7, 117 Stat. (2003)).
6. Urban Empowerment Zones (EZ), as authorized under Title 26, subtitle A, chapter 1, subchapter U of the Internal Revenue Code (codified as amended at

26 U.S.C. 1391 *et seq.*); 24 CFR parts 597 and 598.

7. The HOME Investment Partnerships Act, Title II of the Cranston-Gonzalez, National Affordable Housing Act, Public Law 101-625, 104 Stat. 4079 (1990) (codified as amended at 42 U.S.C. 12721 *et seq.*); 24 CFR part 92.

8. The Loan Guarantee Recovery Fund under Section 4 of the Church Arson Prevention Act of 1996, Public Law 104-155, 110 Stat. 1392; 24 CFR part 573.

9. Neighborhood Initiatives grants specifically designed in annual HUD appropriations acts (e.g., the Consolidated Appropriations Act 2010, Pub. L. 111-117, 123 Stat. 3034 (2009)).

10. The Homelessness Prevention and Rapid Re-Housing Program (HPRP), as authorized under the Homelessness Prevention Fund heading of Division A, Title XII of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, 123 Stat. 115.

11. The Housing Trust Fund (HTF), Section 1338 of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, added by Section 1131 of Public Law 110-289, 112 Stat. 2654 (codified at 12 U.S.C. 4568); 24 CFR part 93.

12. Rural Innovation Fund grants as provided for in annual HUD appropriations acts (e.g., the Consolidated Appropriations Act 2010, Pub. L. 111-117, 123 Stat. 3084 (2009)).

13. The Tax Credit Assistance Program (TCAP), as authorized under the HOME Investments Partnerships Program heading of Division A, Title XII of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, 123 Stat. 115, 220-21.

14. The Self-Help Homeownership Opportunity Program (SHOP) under section 11 of the Housing Opportunity Program Extension Act of 1996, Public Law 104-120, 110 Stat. 834 (codified as amended at 42 U.S.C. 12805 note).

15. Technical Assistance and Capacity Building awards authorized under any program or matter delegated under Section A (e.g., Section 107 of the Housing and Community Development Act 1987, Pub. L. 100-242, 100 Stat. 1815 (1988)); and as provided for in annual and supplemental HUD appropriations acts (e.g., the Consolidated Appropriations Act 2010, Pub. L. 111-117, 123 Stat. 3093 (2009)).

16. Title I of the Housing and Community Development Act of 1974, Public Law 93-383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*); 24 CFR part 570, including the following:

a. The Community Development Block Grant (CDBG) program;

b. The Section 108 Loan Guarantee program;

c. Economic development grants pursuant to Section 108(q);

d. Neighborhood Stabilization programs under the Housing and Economic Recovery Act of 2008, Public Law 110–289, 122 Stat. 2850; Title XII of Division A of the American Recovery and Reinvestment Act of 2009, Public Law 111–5, 123 Stat. 115; and Section 1497 of the Wall Street Reform and Consumer Protection Act of 2010, Public Law 111–203, 124 Stat. 1376 (codified as amended at 42 U.S.C. 5301 note);

e. CDBG Disaster Recovery Grants as provided for in annual and supplemental HUD appropriations acts; and

f. Appalachian Regional Commission grants pursuant to Section 214 of the Appalachian Regional Development Act of 1965, Public Law 89–4, 79 Stat. 5 (codified as amended at 40 U.S.C. 14507) and consistent with the CDBG program authorized under Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*).

17. Title IV of the McKinney-Vento Homeless Assistance Act, Public Law 100–77, 101 Stat. 482 (1987) (codified as amended at 42 U.S.C. 5301 *et seq.*), including the following:

a. The Emergency Shelter Grants/ Emergency Solutions Grants program, 24 CFR 576;

b. The Supportive Housing Program, 24 CFR part 583;

c. The Shelter Plus Care Program, 24 CFR part 582;

d. The Moderate Rehabilitation for Single Room Occupancy program 24 CFR part 882, subpart H;

e. The Continuum of Care program, 24 CFR part 578; and

f. The Rural Housing Stability Assistance program.

18. Title V of the McKinney-Vento Homeless Assistance Act, Public Law 100–77, 101 Stat. 482 (1987) (codified as amended at 42 U.S.C. 1411 *et seq.*), 24 CFR part 581.

19. The Veterans Homelessness Prevention Demonstration program as provided for in annual HUD appropriations acts (e.g., Omnibus Appropriations Act, 2009, Pub. L. 111–8, 123 Stat. 524 (2009)).

20. Overall departmental responsibility for rulemaking, policies, standards, procedures, and advisory materials for compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of

1970, Public Law 91–646, 84 Stat. 1894 (1971) (codified as amended at 42 U.S.C. 4601 *et seq.*); 49 CFR part 24. (For departmental programs, only the Assistant Secretary for Community Planning and Development is delegated the authority to exercise the federal waiver authority provided under 49 CFR 24.7).

21. Overall departmental responsibility for compliance with the National Environmental Policy Act of 1969, Public Law 91–190, 83 Stat. 852 (1970) (codified as amended at 42 U.S.C. 4321–4347), and the related laws and authorities cited in 24 CFR 50.4 and 58.5, including (with regard to the Assistant Secretary for Community Planning and Development) the authority to issue and to waive, or approve exceptions or establish criteria for exceptions from provisions of 24 CFR parts 50, 51, 55, and 58. The Assistant Secretary for Community Planning and Development's designee serves as the Departmental lead in all federal initiatives that address NEPA and other federal environmental laws and authorities cited in 24 CFR 50.4 and 58.5 and as the Departmental signatory for environmental compliance MOUs with other federal agencies addressing compliance at the regional and national level.

22. Certain Office of Community Planning and Development Programs that are no longer authorized for funding (or future funding is not anticipated), but whose administration must continue until all departmental responsibilities are discharged and finally terminated. These programs include the following:

a. The Slum Clearance and Urban Renewal program under Title I of the Housing Act of 1949, Public Law 81–171, 63 Stat. 413 and any program which is superseded by, or inactive by reason of Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5316);

b. Area-wide grants, inequities grants, disaster grants and the authority to concur in final approval actions regarding innovative grants under Section 107 of Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633 (repealed 1981);

c. Urban Development Action grants under Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633. (codified as amended at 42 U.S.C. 5318);

d. The Rental Rehabilitation Program, United States Housing Act of 1937, § 17, Public Law 98–181, 97 Stat. 1196;

e. The Section 312 Rehabilitation Loan Program, Housing Act of 1964, § 312 Public Law 88–560, 78 Stat. 769 (repealed 1990); 24 CFR part 510;

f. The Urban Homesteading Program, Housing and Community Development Act of 1974 § 810, Public Law 93–383, 88 Stat. 633 (repealed 1990);

g. Enterprise Zone Program under Title VII of the Housing and Community Development Act of 1987, Public Law 100–242, 100 Stat. 1815 (1988) (codified as amended at 42 U.S.C. 11501 *et seq.*);

h. Grant for Urban Empowerment Zones (EZ) as provided for in annual HUD appropriations acts (e.g., Consolidated Appropriations resolution, Fiscal Year 2003, Pub. L. 108–7, 117 Stat. 11 (2003));

i. HUD's Homeownership Zone initiative (HOZ) grants as provided for in Section 205 of the Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1997, Public Law 104–204, 110 Stat. 2874 (1996) and funded with recaptured Nehemiah grants authorized under Title VI of the Housing and Community Development Act of 1987, Public Law 100–242, 101 Stat. 1815 (1988) (codified at 12 U.S.C. 1715l note);

j. The Innovative Homeless Initiatives Demonstration program under the HUD Demonstration Act of 1993, Public Law 103–120, 107 Stat. 1144;

k. The HOPE for Homeownership of Single-family Housing (HOPE 3) program, Title IV, Subtitle C of the Cranston-Gonzalez National Affordable Housing Act, Public Law 101–625, 104 Stat. 4079 (1990) (codified at 42 U.S.C. 12891);

l. New Communities Program, Section 413 of the Housing and Urban Development Act of 1968, Public Law 90–448, 82 Stat. 476 (repealed 1983), Section 726 of the Housing and Urban-Rural Recovery Act of 1983, Public Law 91–609 (repealed 1983), 84 Stat. 1784, Section 474 of the Housing and Urban-Rural Act of 1983, Public Law 98–181, 97 Stat. 1237 (codified at 12 U.S.C. 1710g–5b), and any other functions, powers, and duties that may affect the liquidation of the New Communities program;

m. Rural Housing and Economic Development grants specifically designed originally in the Fiscal Year 1998 HUD Appropriations Act, Public Law 105–65, 111 Stat. 1344 and subsequent annual HUD appropriations acts;

n. Renewal Communities (RC), as authorized under Title 26, subtitle A, chapter 1, subchapter X of the Internal Revenue Code (codified as amended at

26 U.S.C. 1400E *et seq.*); 24 CFR part 599;

o. All programs consolidated in the Revolving Fund (Liquidating Programs) established pursuant to Title II of the Independent Offices Appropriations Act, Public Law 98–45, 97 Stat. 223 (1983) (codified as amended at 12 U.S.C. 1701g-5), including all authority of the Secretary with respect to functions, administration, and management of the Revolving Fund (Liquidating Programs).

23. Suspensions, and/or limited denial of participations under 2 CFR part 2424 with the concurrence of the General Counsel, or such other official as may be designed by the General Counsel.

24. Pilot Program to Rehabilitate and Modify Homes of Disabled and Low-Income Veterans, as authorized under section 1079 of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015, Public Law 113–291, 128 Stat. 3292, 3521–3524 (2014).

Section B. Authority Excepted

There is excepted from the authority delegated under Section A:

1. The power to sue and be sued;
2. Under Title I of the Housing and Community Development Act of 1974, Public Law 93–383, 88 Stat. 633 (codified as amended at 42 U.S.C. 5301 *et seq.*);

a. The power to administer the Indian Community Development Block Grant program, for which the authority has been delegated to the Assistant Secretary for Public and Indian Housing;

b. The power to administer section 107 programs delegated to the Assistant Secretary for Policy Development and Research;

c. The power to issue obligations for purchase by the Secretary of the Treasury under section 108(g) of the Housing and Community Development Act (42 U.S.C. 5308); and

d. The power and authority of the Secretary with respect to nondiscrimination under section 109 may be exercised only with the advice of the Assistant Secretary for Fair Housing Equal Opportunity.

3. For programs noted in Section A.22 of this delegation that are no longer authorized for funding;

a. The power to establish interest rates; and

b. The power to issue notes or obligations for purchase by the Secretary of the Treasury.

4. The authority delegated under Section A to the Principal Deputy Assistant Secretary and General Deputy Assistant Secretary does not include the

authority to waive the following statutes:

a. The authority under annual and supplemental HUD appropriations acts providing Community Development Block Grant funding for disaster recovery (*e.g.*, Pub. L. 113–2) to waive, or specify alternative requirements for, statutory requirements;

b. The authority under section 215(a)(6) of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 12745) to waive qualifying rents; and

c. The authority under section 858(b) of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 12907) to waive requirements for short-term supported housing and services.

Section C. Authority To Redelegate

The Assistant Secretary, the Principal Deputy Assistant Secretary and the General Deputy Assistant Secretary for Community Planning and Development are authorized to redelegate to employees of the Department any authority delegated under Section A. Redelegated authority to CPD Directors, Deputy Assistant Secretaries or other CPD program officials does not supersede the authority of the Assistant Secretary as designee of the Secretary.

Section D. Delegations Superseded

This notice supersedes all prior delegations of authority from the Secretary to the Assistant Secretary for Community Planning and Development, including the delegation published on April 20, 2015, at 80 FR 21747.

Authority: Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: January 10, 2017.

Julián Castro,
Secretary.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5907–C–52]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Correction.

SUMMARY: HUD is republishing this notice to include all information that was inadvertently not included in the notice published on December 23, 2016 at 81 FR 94405.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for “off-site use only” recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 12–07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions

for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 or send an email to title5@hud.gov for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (e.g., acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following address(es): *Agriculture*: Ms. Debra Kerr, Department of Agriculture, OPFM, Property Management Division, Agriculture South Building, 300 7th Street SW., Washington, DC 20024, (202) 720-8873; *Air Force*: Mr. Robert E. Moriarty, P.E., AFCEC/CI, 2261 Hughes Avenue, Ste. 155, JBSA Lackland TX 78236-9853, (315) 225-7384; *GSA*: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040 Washington, DC 20405, (202) 501-0084; *Navy*: Ms. Nikki Hunt, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374;

(202) 685-9426 (These are not toll-free numbers).

Dated: January 10, 2017.

Brian P. Fitzmaurice,

*Director, Division of Community Assistance,
Office of Special Needs Assistance Programs.*

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5858-N-04]

Announcement of the Housing Counseling Federal Advisory Committee Notice of Public Meeting

AGENCY: Office of the Assistant
Secretary for Housing—Federal Housing
Commissioner, Department of Housing
and Urban Development (HUD).
ACTION: Notice of Housing Counseling
Federal Advisory Committee (HCFAC)
public meeting.

SUMMARY: This gives notice of a Housing
Counseling Federal Advisory Committee
(HCFAC) meeting on Wednesday,
February 8, 2017, via conference phone,
and the proposed agenda. The meeting
is open to the public and is accessible
to individuals with disabilities.
DATES: The meeting will be held on
Wednesday, February 8, 2017 from
12:00 p.m. to 2:00 p.m. Eastern Daylight
Time (EDT) via conference phone.

FOR FURTHER INFORMATION CONTACT:
Marjorie George, Housing Program
Technical Specialist, Office of Housing
Counseling, U.S. Department of Housing
and Urban Development, 200 Jefferson
Avenue, Suite 300, Memphis, TN 38103;
telephone number (901) 544-4228 (this
is not a toll-free number). Persons who
have difficulty hearing or speaking may
access this number via TTY by calling
the toll-free Federal Relay Service at
(800) 877-8339. Individuals may also
email HCFACCommittee@hud.gov.

SUPPLEMENTARY INFORMATION: HUD is
convening the meeting of the HCFAC on
Wednesday, February 8, 2017 from
12:00 p.m. to 2:00 p.m. The meeting will
be held via conference phone. This
meeting notice is provided in
accordance with the Federal Advisory
Committee Act, 5. U.S.C. App. 10(a)(2).

Agenda—Housing Counseling Federal Advisory Committee Meeting— February 8, 2017

I. Approval of November 1, 2016
Meeting Minutes

II. Confirmation of HCFAC Objectives
III. Presentations by Creative Marketing
Resource
IV. Review of Quality Housing
Counseling
V. Planning for Future HCFAC Meetings
VI. Next Steps
VII. Adjourn

With advance registration, the public
is invited to attend this meeting via
teleconference. To register for this
meeting please access the below link:
[http://www.hud.gov/emarc/
index.cfm?fuseaction=emar.register
Event&eventId=2974&update=N](http://www.hud.gov/emarc/index.cfm?fuseaction=emar.registerEvent&eventId=2974&update=N).

The toll-free call-in number will be
provided once registration is confirmed.
Persons with hearing impairments may
also follow the discussion by first
calling the Federal Relay Service (FRS):
(800) 977-8339 and providing the FRS
operator with the conference call toll-
free number, which will be provided
upon registration.

Records and documents discussed
during the meeting, as well as other
information about the work of this
Committee, will be available for public
viewing as they become available at:
[http://www.facadatabase.gov/
committee/committee.aspx?cid=
2492&aid=77](http://www.facadatabase.gov/committee/committee.aspx?cid=2492&aid=77) by clicking on the
“Committee Meetings” link.

Dated: January 11, 2017.

Edward L. Golding,

*Principal Deputy Assistant Secretary, Office
of Housing/Federal Housing Administration.*

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS-R2-ES-2016-N199;
FXES11140200000F2-178--FF02ENEH00]

Notice of Intent To Prepare a Draft Environmental Impact Statement for a Proposed Habitat Conservation Plan for the Endangered American Burying Beetle for American Electric Power in Oklahoma, Arkansas, and Texas

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of intent; announcement
of meetings; request for comments.

SUMMARY: We, the U.S. Fish and
Wildlife Service (Service), are notifying
the public that we intend to prepare a
draft environmental impact statement
(EIS) to evaluate the impacts of
alternatives relating to the proposed
issuance of an Endangered Species Act
(ESA) Incidental Take Permit (ITP) in
response to the American Electric Power

Habitat Conservation Plan (HCP). The ITP is needed to cover incidental take of the endangered American burying beetle (ABB) from activities associated with construction, operation, and/or maintenance of electric transmission and distribution lines or other associated infrastructure. American Electric Power (AEP) intends to apply for an ITP under the ESA and agrees to develop and implement the proposed HCP. We also are announcing the initiation of a public scoping process to engage Federal, Tribal, State, and local governments and the public in the identification of issues and concerns, potential impacts, and possible alternatives to the proposed action.

DATES: In order to be included in the analysis, all comments must be received or postmarked by February 21, 2017. See **SUPPLEMENTARY INFORMATION** regarding meeting dates.

ADDRESSES: Please provide comments in writing, by one of the following methods:

Email: OKES_HCP_EIS@fws.gov;
Facsimile: 918-581-7467, Attn: OKES HCP EIS; or

U.S. mail: Field Supervisor,
Oklahoma Ecological Services Field Office, U.S. Fish and Wildlife Service,
9014 E. 21st St., Tulsa, OK 74129.

Please specify that your information request or comments concern the AEP draft EIS/HCP (TE01909C).

See **SUPPLEMENTARY INFORMATION** regarding meeting locations.

FOR FURTHER INFORMATION CONTACT:

Jonna Polk, by U.S. mail at the U.S. Fish and Wildlife Service, Oklahoma Ecological Services Field Office, 9014 E. 21st St., Tulsa, OK 74129, or by phone at 918-581-7458. If you use a telecommunications device for the deaf (TDD), please call the Federal Information Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION: We publish this notice in compliance with the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), and its implementing regulations (40 CFR 1501.7, 1506.6, and 1508.22), and section 10(c) of the Endangered Species Act of 1973 (the Act), as amended (16 U.S.C. 1539(c)). We intend to gather the information necessary to determine impacts and alternatives to support a decision regarding the potential issuance of an incidental take permit to AEP, and the implementation of the supporting draft habitat conservation plan (HCP).

Meeting Information

We will conduct four public scoping meetings within the 62-county proposed

covered area, which includes the ABB range: Tulsa, OK; McAlester, OK; Fort Smith, AR; and Texarkana, TX. Exact meeting locations and times will be announced in local newspapers and on Service Web sites at least 2 weeks prior to each event (Oklahoma Ecological Services Office Web site, <http://www.fws.gov/southwest/es/Oklahoma/>; Arkansas Ecological Services Office Web site, <https://www.fws.gov/arkansas-es/>; and Arlington, Texas, Ecological Services Office Web site, <https://www.fws.gov/southwest/es/ArlingtonTexas/>). The scoping meetings will provide the public with an opportunity to ask questions and discuss issues with Service staff regarding the EIS and provide written comments.

Persons needing reasonable accommodations in order to attend and participate in a public meeting should contact us at the address listed in **ADDRESSES** no later than 1 week before the relevant public meeting. Information regarding this proposed action is available in alternative formats upon request.

We will accept written comments at each meeting. You may also submit written comments to the Field Supervisor at the email or U.S. mail addresses in **ADDRESSES**.

Background

Section 9 of the ESA prohibits “take” of fish and wildlife species listed as endangered or threatened (16 U.S.C. 1531–1544). Under section 3 of the ESA, the term “take” means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct (16 U.S.C. 1532(19)). The term “harm” is further defined by regulation as an act that actually kills or injures wildlife. Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering (50 CFR 17.3). The term “harass” is also further defined in the regulations as an intentional or negligent act or omission that creates the likelihood of injury to wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns, which include, but are not limited to, breeding, feeding, or sheltering (50 CFR 17.3).

Under section 10(a)(1)(B) of the Act, the Secretary of the Interior may authorize the taking of federally listed species if such taking occurs incidental to otherwise legal activities and where a conservation plan has been developed under section 10(a)(2)(A) that describes:

(1) The impact that will likely result from such taking; (2) the steps an applicant will take to minimize and mitigate that take to the maximum extent practicable and the funding that will be available to implement such steps; (3) the alternative actions to such taking that an applicant considered and the reasons why such alternatives are not being utilized; and (4) other measures that the Service may require as being necessary or appropriate for the purposes of the plan. Issuance criteria under section 10(a)(2)(B) for an incidental take permit require the Service to find that: (1) The taking will be incidental to otherwise lawful activities; (2) an applicant will, to the maximum extent practicable, minimize and mitigate the impacts of such taking; (3) an applicant has ensured that adequate funding for the plan will be provided; (4) the taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and (5) the measures, if any, we require as necessary or appropriate for the purposes of the plan will be met. Regulations governing permits for endangered and threatened species are at 50 CFR 17.22 and 17.32, respectively.

Public Scoping

A primary purpose of the scoping process is to receive suggestions and information on the scope of issues and alternatives to consider when drafting the EIS, and to identify significant issues and reasonable alternatives related to the Service’s proposed action (issuance of the ITP under the AEP HCP). In order to ensure that we identify a range of issues and alternatives related to the proposed action, we invite comments and suggestions from all interested parties. We will conduct a review of this project according to the requirements of NEPA and its regulations, other relevant Federal laws, regulations, policies, and guidance, and our procedures for compliance with applicable regulations.

Once the draft EIS and draft HCP are completed, we will offer further opportunities for public comment on the content of these documents through additional public meetings and a 90-day public comment period.

Alternatives

No-Action Alternative

Under the no-action alternative, AEP would comply with the Act by avoiding impacts to (take of) the ABB where practicable. If take cannot be avoided and there is Federal involvement in the project (for example, a Federal permit, such as a Corps of Engineers section 404

Clean Water Act permit, authorization, or funding exists), AEP may receive take coverage through a biological opinion issued by the Service to the Federal action agency. If there is no Federal involvement in the project, AEP can apply for an incidental take permit from the Service. This approach is more time consuming and less efficient, because permits would need to be considered and processed one project at a time, which could result in an isolated, independent mitigation approach.

Proposed Alternative

The proposed action is issuance of an incidental take permit for the covered species during construction, operation, and/or maintenance of electric transmission and distribution lines or other associated infrastructure. The proposed HCP, which must meet the requirements in section 10(a)(2)(A) of the Act, would be developed in coordination with the Service and implemented by AEP. This alternative will allow for a comprehensive mitigation approach for authorized impacts and result in a more efficient and timely permit processing effort for the Service and AEP. Actions covered under the requested incidental take permit may include possible take of covered species associated with activities including, but not limited to, construction, operation, and/or maintenance of electric transmission and distribution lines or other associated infrastructure. The proposed permit submitted by American Energy Power provides coverage for a period of 30 years.

Sixty-two counties are in the proposed permit area, including Adair, Atoka, Bryan, Carter, Cherokee, Choctaw, Cleveland, Coal, Craig, Creek, Delaware, Garvin, Haskell, Hughes, Johnston, Kay, Latimer, Le Flore, Lincoln, Logan, Love, Marshall, Mayes, McClain, McCurtain, McIntosh, Murray, Muskogee, Noble, Nowata, Okfuskee, Oklahoma, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pittsburg, Pontotoc, Pottawatomie, Pushmataha, Rogers, Seminole, Sequoyah, Tulsa, Wagoner, and Washington Counties in Oklahoma; Clark, Crawford, Franklin, Hempstead, Johnson, Little River, Logan, Miller, Sebastian, Scott, and Yell Counties in Arkansas; and Bowie, Fannin, Lamar, and Red River Counties in Texas. The species covered under the requested incidental take permit is the ABB. We will be evaluating whether the covered activities will impact other species and whether they should be included on the permit or if management practices can be implemented that are sufficient to

avoid take. These species and their legal status include:

- American alligator (*Alligator mississippiensis*)—Threatened (Similarity of Appearance)
- Arkansas fatmucket (*Lampsilis powellii*)—Threatened
- Arkansas River shiner (*Notropis girardi*)—Threatened, Arkansas R. Basin population, with Critical Habitat
- Gray bat (*Myotis grisescens*)—Endangered
- Harperella (*Ptilimnium nodosum*)—Endangered
- Indiana bat (*Myotis sodalis*)—Endangered
- Least tern (*Sterna antillarum* [now recognized as a subspecies *athalassos*])—Endangered, interior population
- Leopard darter (*Percina pantherina*)—Threatened with Critical Habitat
- Neosho madtom (*Noturus placidus*)—Threatened
- Neosho mucket (*Lampsilis rafinesqueana*)—Endangered with Critical Habitat
- Northern long-eared bat (*Myotis septentrionalis*)—Threatened
- Ouachita Rock pocketbook (*Arkansia wheeleri*)—Endangered
- Ozark big-eared bat (*Corynorhinus townsendii ingens*)—Endangered
- Ozark cavefish (*Amblyopsis rosae*)—Threatened
- Pink mucket (*Lampsilis abrupta*)—Endangered
- Piping plover (*Charadrius melodus*)—Threatened; except Great Lakes watershed population
- Rabbitsfoot (*Quadrula cylindrica cylindrica*)—Threatened with Critical Habitat
- Red-cockaded woodpecker (*Picoides borealis*)—Endangered
- Scaleshell mussel (*Leptodea leptodon*)—Endangered
- Spectaclecase (*Cumberlandia monodonta*)—Endangered
- Whooping crane (*Grus americana*)—Endangered; except in the experimental population area
- Winged mapleleaf (*Quadrula fragosa*)—Endangered; except where listed as experimental populations

We do not anticipate that covered activities will result in take of all these species, but we seek comments to help inform our evaluation.

We also will evaluate whether covered activities are likely to impact the bald eagle (*Haliaeetus leucocephalus*) and golden eagle (*Aquila chrysaetos*), protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*).

Other Alternatives

We seek information regarding other reasonable alternatives during this scoping period and will evaluate the impacts associated with such alternatives in the draft EIS.

Public Availability of Comments

Written comments we receive become part of the public record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that the entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as supporting documentation we use in preparing the EIS, will be available for public inspection, by appointment, during normal business hours at the Service's Oklahoma Ecological Services Field Office in Tulsa, Oklahoma, (see **ADDRESSES**, above).

Benjamin N. Tuggle,

Regional Director, Southwest Region, U.S. Fish and Wildlife Service.

**[FWS-R8-ES-2016-N187;
FXES111608M0000]**

Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of application and proposed incidental harassment authorization; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application from the California Department of Fish and Wildlife, Central Region, for authorization to take small numbers of marine mammals by harassment incidental to construction activities as part of a tidal marsh restoration project within the Minhoto-Hester Marsh in Elkhorn Slough, Monterey County, California. In accordance with provisions of the Marine Mammal Protection Act of 1972,

as amended, we request comments on our proposed authorization for the applicant to take incidentally, by harassment, small numbers of southern sea otters (*Enhydra lutris nereis*) over the course of approximately 11 months beginning between January 2017 and June 2017. We anticipate no take by injury or death and include none in this proposed authorization, which would be for take by harassment only.

DATES: Comments and information must be received by February 21, 2017.

ADDRESSES: *Comment submission:* You may submit comments by any one of the following methods:

1. *U.S. mail or hand-delivery:* Steve Henry, Field Supervisor, Ventura Fish and Wildlife Office, 2493 Portola Road, Suite B, Ventura, CA 93003.

2. *Fax:* 805-644-3958, attention to Steve Henry, Field Supervisor.

3. *Electronic mail (email):* R8_SSO-IHA_Comment@fws.gov. Please include your name and U.S. mail address in your message.

Document availability: Electronic copies of the incidental harassment authorization request, the Marine Mammal Monitoring Plan, and other supporting materials, such as the list of references used in this notice, may be obtained by writing to the address specified above, telephoning the contact listed in **FOR FURTHER INFORMATION CONTACT**, or visiting the Internet at <http://www.fws.gov/ventura/endangered/species/info/ssoiha.html>. Documents cited in this notice may also be viewed, by appointment, during regular business hours, at the aforementioned U.S. mail address.

FOR FURTHER INFORMATION CONTACT: Lilian Carswell, Southern Sea Otter Recovery & Marine Conservation Coordinator, (805) 612-2793, or by email at Lilian_Carswell@fws.gov.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1371 (a)(5)(A) and (D)), authorize the Secretary of the Interior to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region, provided that we make certain findings and either issue regulations or, if the taking is limited to harassment, provide a notice of a proposed authorization to the public for review and comment.

We may grant authorization to incidentally take marine mammals if we

find that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses. As part of the authorization process, we prescribe permissible methods of taking and other means of effecting the least practicable impact on the species or stock and its habitat, and requirements pertaining to the monitoring and reporting of such takings.

The term “take,” as defined by the MMPA, means to harass, hunt, capture, or kill, or to attempt to harass, hunt, capture, or kill, any marine mammal. Harassment, as defined by the MMPA, means “any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [the MMPA calls this Level A harassment], or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [the MMPA calls this Level B harassment].”

The terms “negligible impact,” “small numbers,” and “unmitigable adverse impact” are defined in title 50 of the Code of Federal Regulations at 50 CFR 18.27, the Service’s regulations governing take of small numbers of marine mammals incidental to specified activities. “Negligible impact” is defined as “an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” The term “small numbers” is also defined in the regulations as “a portion of a marine mammal species or stock whose taking would have a negligible impact on that species or stock.” However, we do not rely on that definition here, as it conflates the terms “small numbers” and “negligible impact,” which we recognize as two separate and distinct requirements. Instead, in our small numbers determination, we evaluate whether the number of marine mammals likely to be taken is small relative to the size of the overall population. “Unmitigable adverse impact” is defined as “an impact resulting from the specified activity (1) that is likely to reduce the availability of the species to a level insufficient for a harvest to meet subsistence needs by (i) causing the marine mammals to abandon or avoid hunting areas, (ii) directly displacing subsistence users, or (iii) placing physical barriers between the marine

mammals and the subsistence hunters; and (2) that cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met.” The subsistence provision applies to northern sea otters (*Enhydra lutris kenyoni*) in Alaska but not to southern sea otters.

Summary of Request

On May 23, 2016, we received an application from the California Department of Fish and Wildlife, Central Region (CDFW), for authorization to take southern sea otters incidental to construction activities associated with a 47-acre tidal marsh restoration project within the Minhoto-Hester Marsh in Elkhorn Slough, Monterey County, California. The project would reduce tidal prism in Elkhorn Slough, reducing the potential for ongoing tidal scour and associated marsh loss. It would also improve marsh sustainability with sea level rise, as the restored marsh would be higher in the tidal frame and further from the drowning threshold, and marsh vegetation in the restored areas would accrete organic material that would help the restored marsh plain rise with sea level. The full Elkhorn Slough Tidal Marsh Restoration Project includes the anticipated restoration of 147 acres, but future phases are not part of this application because they would not likely occur for several years. If any future phase of the project would result in harassment of southern sea otters, another IHA would have to be requested and received prior to its implementation.

A detailed description of the proposed project is contained in the incidental harassment authorization request submitted to us by CDFW (ESA/ESNERR 2016). CDFW submitted revised versions of the application on July 26, 2016, August 24, 2016, August 29, 2016, and September 6, 2016. A final version, submitted on September 15, 2016, was determined to be adequate and complete. Work would begin between January 2017 and June 2017 and require approximately 11 months to complete. This period includes buffers for adverse weather and other conditions when work is not possible. Construction activities are expected to produce noise and visual disturbance that have the potential to result in behavioral harassment of southern sea otters. We are proposing to authorize take, by Level B harassment only, of southern sea otters as a result of the specified activity.

Description of the Activity

The proposed project would restore approximately 47 acres of tidal marsh within the Minhoto-Hester Marsh area and additional tidal marsh, upland ecotone, and native grassland in a buffer area, intended to absorb upland sediment and contaminants, between the remnant marsh and agricultural fields. Approximately 170,000 cubic yards of fill would be required to raise the marsh plain an average height of 2.4 feet, or 1.9 feet after 1 year of soil consolidation. The entire remnant marsh plain would be raised to an elevation that would allow emergent wetland vegetation to reestablish naturally and persist.

The buffer area would be graded to increase marsh area and to create a gently sloping ecotone band along the edge of the restored marsh. Excavation would widen the existing marsh by up to 150 feet and create a band of gentle slope on the hillside, fostering creation of a wider ecotone habitat. A 35-acre portion of the buffer area would be restored to native-dominated perennial grassland. A weed-resistant border of rhizomatous perennial plants would be planted between the grassland and ecotone. The remaining 6-acre portion of the buffer area would be used as a stockpile location for future restoration phases and would be revegetated with annual barley until future phases were complete, at which time it would be restored to native-dominated perennial grassland.

Remnant historic channels onsite would generally be left in place or filled and re-excavated in the same place. Smaller channels would be filled as needed for marsh access. As much of the existing tidal channel network would be maintained as feasible, and the post-project channel alignments would be similar to those under existing conditions. The density of channels (length of channel per acre of marsh) after restoration would be comparable to the density in natural reference marshes.

Low levees (less than 0.5 feet above the marsh plain) composed of fill material would be constructed along the larger channels to simulate natural channel levees. The project would re-create natural levee features along the sides of the main channel into the Minhoto-Hester area. Fill would be placed as close to the edge of the channel as possible to simulate the form and function of a natural channel bank. Borrow ditches that date from the times of historical wetland reclamation in these areas would be blocked or filled completely if fill is available after

raising the marsh plain. Blocking borrow ditches would route more flow through the natural channels and slightly increase hydraulic resistance, which may achieve benefits from reducing tidal prism and associated scour in the Elkhorn Slough system.

Construction sequencing would begin with water management and/or turbidity control measures constructed around the work areas prior to placing material on the marsh. Work areas on the remnant marsh plain would for the most part be isolated from the tides and dewatered to allow construction to occur in non-tidal conditions. Water control structures such as temporary berms would be utilized to isolate the fill placement area during the construction period. Existing berms would be used where possible. It is likely that the mouth of the restoration area could be closed with an earthen dam or an inflatable dam; however, a sheet pile wall at the mouth of the restoration area could be installed using vibratory hammering if the earthen and inflatable dam options proved to be infeasible. Tidal channels into work areas would be blocked. The isolated work areas would be drained using a combination of gravity and pumps. Water levels within the blocked areas would be managed to keep them mostly free of water (with some ponded areas remaining) to allow fill placement at all stages of the tides. Blocking of tidal channels would occur at low tide. Upon completion of sediment placement, the berms would be lowered to the target marsh elevation, reintroducing tidal inundation. Any blocked tidal channels would be re-excavated. After fill placement on the marsh, any temporary features, such as water management berms, sheet piles, and culverts, would be removed.

All material needed for the current phase of the project is onsite. Additional material may be delivered to the restoration areas by trucks if it becomes available. Construction crews and equipment would access the existing stockpile area and Minhoto Marsh from Dolan Road via existing roadways that were used for delivery of the existing sediment stockpile, located alongside existing agricultural fields. The Hester Marsh staging area may be accessed from Via Tanques Road.

Construction equipment would include haul trucks, heavy earthmoving equipment (such as bulldozers, backhoes, and loaders), and excavators to transport dry material out onto the marsh. A conveyor system could be used to transport material from a stockpile out to the marsh in lieu of bulldozers. In such cases, timber

matting would be temporarily placed on the marsh to provide a stable footing for the conveyors. A mobile radial stacker at the end of the conveyor belt would be rotated to spread the material.

a. Timing of Activity

Construction is anticipated to require approximately 11 months. The 11-month window would include 132 days of construction activity and (if needed) 4 days of vibratory pile driving, totaling 136 days of project activity. The 11-month window includes the time required for ecotone and grassland restoration work. Most work on the marsh plane would likely be completed within 6 to 8 months. The length of the construction period is based on the assumption that construction contractors would work between the hours of 5:00 a.m. to 6:00 p.m., Monday through Friday. However, some construction activity could also be required during these times on Saturdays. The proposed IHA would be valid for 1 year from the date of issuance, with project activities beginning between January 2017 and June 2017.

b. Geographic Location of Activity

The proposed project is located in the Elkhorn Slough estuary, a network of intertidal marshes, mudflats, and subtidal channels 90 miles south of San Francisco and 20 miles north of Monterey (see Figure 1–1 of ESA/ESNERR 2016). The Minhoto-Hester Marsh, where the proposed restoration work would occur, is a low-lying area within Elkhorn Slough consisting of subsided pickleweed (*Salicornia pacifica*) marsh, intertidal mudflats, tidal channels, and remnant levees. The project area is on land owned and managed by CDFW as part of the Elkhorn Slough National Estuarine Research Reserve (ESNERR) (see Figure 1–2 of ESA/ESNERR 2016). One Marine Protected Area (MPA), a State Marine Reserve, partially overlaps with the project area. Two additional MPAs are located within 1 mile of the project area. The Minhoto-Hester Marsh has multiple cross-levees and both natural and dredged channels, with a major dredged channel (exceeding 100 feet in width in some locations) that runs north to south through the remnant marsh.

Description of Marine Mammals in the Area of the Activity

Southern sea otters and Pacific harbor seals (*Phoca vitulina richardii*) are present in or near the project site. Pacific harbor seals are under the jurisdiction of the National Marine Fisheries Service (NMFS) and are

considered under a separate proposed IHA notice. Therefore, we do not address them further here. The only marine mammal species under the jurisdiction of the Service that occurs in the proposed project area is the southern sea otter.

Southern sea otters are listed as threatened under the Endangered Species Act of 1973, as amended (ESA) (42 FR 2965; January 14, 1977), and, because of their threatened status, are considered “depleted” under the MMPA. The State of California also recognizes the sea otter as a fully protected mammal (Fish and Game Code section 4700) and as a protected marine mammal (Fish and Game Code section 4500). All members of the sea otter population in California are descendants of a small group that survived the fur trade and persisted near Big Sur, California. Historically ranging from at least as far north as Oregon (Valentine et al. 2008) to Punta Abrejos, Baja California, Mexico, in the south, sea otters currently occur in only two areas of California. The mainland population ranges from San Mateo County to Santa Barbara County, and a translocated population exists at San Nicolas Island, Ventura County. The most recent (2016) California-wide index of abundance is 3,272 individuals (www.werc.usgs.gov/seaottercount). Additional general information on status and trends of the southern sea otter may be found in the stock assessment report, available at <http://www.fws.gov/ventura/endangered/species/info/sso.html>.

Sea otters occur in Elkhorn Slough year round. As many as 150 sea otters (mostly male) raft together in the harbor at the mouth of Elkhorn Slough, and more than 50 females and pups, and a few territorial males, utilize protected tidal creeks and adjacent waters further up the slough (Scoles et al. 2012). Sea otters occur in the harbor, in tidal channels, and where eelgrass (*Zostera marina*) is present. Seal Bend, which is located approximately 0.8 river miles west of the proposed project area, is an important area for sea otter activity due to the large patch of eelgrass present there. When not disturbed, sea otters also frequently come ashore to rest, interact, and groom (Scoles et al. 2012).

Sea otters use areas within the project footprint minimally (ESA/ESNERR 2016; USGS, Monterey Bay Aquarium, and ESNERR unpublished data). A maximum of two sea otters at any one time were observed within the project footprint during pre-project monitoring conducted in 2013 (Beck 2014). These animals were observed resting in water in area M3 of Minhoto Marsh (see

Figure 4–2 of ESA/ESNERR 2016) when tidal heights were approximately 4 feet or higher. The maximum length of time a sea otter was observed in M3 during any monitoring session was 1.5 hours (Beck 2014).

Up to 50 southern sea otters may be present in the area in and around Minhoto Marsh, Parsons Slough, Yampah Marsh, and the portion of Elkhorn Slough Channel that could be exposed to construction-related noise or disturbance (ESA/ESNERR 2016). Three main sea otter resting locations occur in these areas: One in the Parsons Slough Complex near the Avila Property and two near Yampah Island, southwest of the Union Pacific Railroad Bridge (see Figure 4–3 of ESA/ESNERR 2016; note that one marker is used to represent the two Yampah Island resting areas, which are located immediately to the west and east of its location on the map). Each of these areas consists of a territorial male and females with or without pups. Up to 35 sea otters were observed within the Parsons Slough Complex and Yampah Marsh during monitoring for an earlier project (ESNERR 2011). The closest area of concentrated sea otter activity to the project footprint is in Yampah Marsh, approximately 800 feet to the northeast (ESA/ESNERR 2016). The Yampah Marsh area is used heavily by females with and without pups for resting, hauling out, grooming, and (for females with pups) nursing (ESA 2016; USGS, Monterey Bay Aquarium, and ESNERR unpublished data).

Potential Impacts of the Proposed Action on Sea Otters

In this section we provide a qualitative discussion of the potential impacts of the proposed project. The “Estimated Take by Incidental Harassment” section later in this document includes a quantitative analysis of the number of individuals that may be taken by Level B harassment as a result of this activity. Sea otters that have been observed to use Minhoto Marsh would be prevented from accessing the area and would be displaced to other areas of Elkhorn Slough for the duration of the project. Sea otters using the marsh areas adjacent to the project site for resting and foraging would be exposed to construction noise and activity, which could deter them from using these areas and displace them to adjacent areas of Elkhorn Slough. If sheet pile (rather than an earthen dam or inflatable dam) is required to isolate the construction area from tidal waters, vibratory hammering would increase ambient noise levels at the site for 4 days. Noise generated by vibratory pile driving

could cause sea otters that forage or rest in the portion of the main channel adjacent to the restoration area to relocate temporarily to nearby areas. Behavioral changes resulting from disturbance could include startle responses, the interruption of resting behaviors (while in water or hauled out on pickleweed), and changes in foraging patterns. Impacts of the proposed project are limited to behavioral disturbance that may reach the threshold of Level B harassment. These impacts could result from airborne noise and visual disturbance caused by the presence of construction equipment and workers over a period of 11 months and (if sheet pile installation is required) from underwater noise caused by vibratory pile driving over a 4-day period.

Relatively little is known regarding the effects of noise on sea otters, but they have not been reported to be particularly sensitive to noise disturbance, especially in comparison to other marine mammals (Riedman 1983, 1984). Many marine mammals depend on acoustic cues for vital biological functions, such as orientation, communication, locating prey, and avoiding predators. However, sea otters are not known to use acoustic information to orient or to locate prey, nor are they known to communicate underwater. Ghaul and Reichmuth (2014) obtained aerial and underwater audiograms for a captive adult male sea otter and evaluated his hearing in the presence of noise. In air, the sea otter’s hearing was similar to that of a sea lion (*Zalophus californianus*) but less sensitive to high-frequency (greater than 22 kHz) and low-frequency (less than 2 kHz) sounds than terrestrial mustelids. Underwater, the sea otter’s hearing was less sensitive than that of sea lions and other pinnipeds, particularly at frequencies below 1 kHz. Critical ratios were more than 10 dB above those measured in pinnipeds, suggesting that sea otters have a relatively poor capacity to detect acoustic signals in noise.

Observed responses of wild sea otters to disturbance are highly variable, probably reflecting the level of noise and activity to which they have been exposed and become acclimated over time and the particular location and social or behavioral state of that individual (G. Bentall pers. comm. 2010). Sea otters appeared to be relatively undisturbed by pile driving activities in Elkhorn Slough during the construction of the Parsons Slough Sill (adjacent to the Minoto-Hester Marsh), with many showing no response to pile driving and generally reacting more strongly to passing vessels associated

with construction than to the sounds of machinery (ESNERR 2011). Sea otters in Elkhorn Slough are likely acclimated to loud noises, as they occupy an area near an active railroad track, which produces in-air sound levels comparable to those produced by the vibratory driving of H piles (ESNERR 2011). Approximately 15–20 trains pass through Elkhorn Slough each day within 400 feet of the easternmost portion of the project area (Vinnedge Environmental Consulting 2010). A vehicle dismantling and recycling yard is located approximately 300 feet from the project area.

The proposed construction activity may generate airborne noise above ambient levels or create a visual disturbance (during typical construction hours/workdays) for a period of 11 months. However, only work in the northern and eastern portions of Minhoto Marsh would be expected to disturb sea otters due to their proximity to the adjacent areas used by sea otters. Work in these portions of the marsh would likely be accomplished within approximately 6 months (132 construction days). Airborne noise produced by heavy earth-moving equipment such as backhoes and front-end loaders may produce sound levels of 80–90 dB re 20 μ Pa at 50 feet (Federal Highway Administration 2015). Vibratory driving of steel sheet piles, which may occur during 4 of the 136 total days of construction, is expected to produce maximum airborne sound levels of 97 dBA re 20 μ Pa at 33 feet and 90 dBA re 20 μ Pa at 98 feet (where dBA refers to dB with A-weighting designed to match the average frequency response of human hearing, which enables comparison of the intensity of noises with different frequency characteristics) (ESNERR 2011). Vibratory driving of sheet piles would generate underwater noise to which sea otters in the vicinity would be exposed while diving or performing other behaviors that cause immersion of the ears. However, because of acoustic shadowing due to the winding configuration of Elkhorn Slough, underwater sound transmission would be relatively limited. The likely extent of transmission of sound exceeding 120 dB re 1 μ Pa is pictured in Figure 6–4 of ESA/ESNERR (2016).

NMFS employs acoustic exposure criteria to define Level A harassment (injury) and Level B harassment (disturbance) resulting from sound for the marine mammal species under its jurisdiction. For underwater non-impulsive noise (which includes vibratory pile driving and removal), NMFS uses 219 dB re 1 μ Pa (cumulative 24-hour sound exposure level) as the threshold for Level A harassment of

otariid pinnipeds (*e.g.*, sea lions) (NMFS 2016) and 120 dB re 1 μ Pa (received level) as the threshold for Level B harassment. For airborne noise, NMFS uses 100 dB re 20 μ Pa (received level) as a guideline, but not formal threshold, for the onset of Level B harassment for pinnipeds other than harbor seals (79 FR 13991; March 12, 2014). NMFS does not have a guideline for the onset of Level A harassment of pinnipeds by airborne noise (A. Scholik-Schlomer, Office of Protected Resources, Marine Mammal and Sea Turtle Conservation Division, pers. comm. 2014). However, Southall et al. (2007) propose an injury criterion for sea lions exposed to airborne noise of 172.5 dB re 20 μ Pa.

In the absence of sufficient data on which to base noise exposure thresholds specific to sea otters, but in light of experimental evidence suggesting that the hearing sensitivities of sea lions and sea otters are generally comparable (although, as noted above, sea otter hearing appears to be less sensitive than sea lion hearing underwater), we use the thresholds, guidelines, and criteria applicable to sea lions as proxies. With regard to underwater noise, we use the thresholds adopted by NMFS for sea lions to evaluate whether noise exposure levels would constitute Level A or Level B harassment of sea otters. With regard to airborne noise, we use the guideline that NMFS uses for pinnipeds other than harbor seals to evaluate whether anticipated exposure levels resulting from this project would constitute Level B harassment of sea otters and the injury criterion proposed in Southall et al. (2007) for sea lions to evaluate whether the anticipated airborne noise exposures would constitute Level A harassment. Specifically, we use 219 dB re 1 μ Pa as the threshold for Level A harassment underwater and 120 dB re 1 μ Pa (for non-impulse sources) as the threshold for Level B harassment underwater. Similarly, we adopt for sea otters the 100 dB re 20 μ Pa guideline that NMFS uses for in-air Level B harassment of pinnipeds other than harbor seals. We use the Southall et al. (2007) criterion of 172.5 dB re 20 μ Pa for sea lions to approximate the airborne noise levels that may cause injury to sea otters. Given that sea otters are not known to use sound to communicate underwater, to orient, or to locate prey, and given sea otters' decreased sensitivity to underwater noise relative to that of sea lions, we acknowledge that these thresholds are likely highly conservative. As additional behavioral or other data on sea otter responses to sound become available, we may

determine that one or more of these thresholds are not applicable to sea otters.

Potential Effects of the Proposed Action on Sea Otter Habitat

Habitat within the project footprint would be inaccessible to sea otters for the duration of construction. However, these impacts would be minimal, as past surveys documented a maximum of two sea otters using this area. Construction activity would result in a slight increased risk of accidental water contamination from equipment refueling, fluid leakage, or maintenance activities within or near water bodies. Leaks or spills of petroleum hydrocarbon products found in construction equipment could have adverse effects on sea otters by contaminating their fur (interfering with thermoregulation) and through ingestion during grooming. Vibratory pile driving (if required by the project) would not be expected to alter the availability of prey species to sea otters in the waters or marshlands adjacent to the project site because these species are largely sessile benthic invertebrates. The proposed action would permanently alter habitat within the footprint of the construction area, but the restoration of salt marsh would benefit sea otters over the longer term by providing additional high-quality habitat within Elkhorn Slough for hauling out and foraging.

Potential Impacts on Subsistence Needs

The subsistence provision of the MMPA does not apply.

Mitigation Measures

CDFW has proposed the following measures to prevent Level A harassment (injury) and to reduce the extent of potential effects from Level B harassment (disturbance) to marine mammals.

1. A Service- and NMFS-approved biologist would conduct mandatory biological resources awareness training for construction personnel. The awareness training would be provided to all construction personnel to brief them on the need to avoid effects on marine mammals. If new construction personnel are added to the project, the contractor would ensure that the personnel receive the mandatory training before starting work.

2. A biological monitor approved by the Service and NMFS would monitor for marine mammal disturbance. Monitoring would occur at all times when work is occurring: (a) In water, (b) north of a line starting at 36°48'38.91 N. 121°45'08.03 W. and ending 36°48'38.91 N. 121°45'27.11 W., or (c) within 100

feet of tidal waters. When work is occurring in other areas, monitoring would be implemented for at least the first 3 days of construction. Monitoring would continue until there are 3 successive days of no observed disturbance, at which point monitoring would be suspended. Monitoring would resume when there is a significant change in activities or location of activities within the project area or if there is a gap in construction activities of more than 1 week. In these cases, monitoring would again be implemented for at least the first 3 days of construction and would not be suspended until there are 3 successive days of no observed disturbance. The biological monitor would have the authority to stop project activities if marine mammals approach or enter the exclusion zone. Biological monitoring would begin 0.5-hour before work begins and will continue until 0.5-hour after work is completed each day. Work would commence only with approval of the biological monitor to ensure that no marine mammals are present in the exclusion zone.

3. To reduce the risk of potentially startling marine mammals with a sudden intensive sound, the construction contractor would begin construction activities gradually each day by moving around the project area and starting tractors one at a time.

4. Biological monitors would have authority to stop construction at any time for the safety of any marine mammals.

5. In-water construction work would occur only during daylight hours when visual monitoring of marine mammals can be implemented. No in-water work would be conducted at night.

6. If sheet piles are used to isolate construction activities from tidal action, all piles would be installed using a vibratory pile driver, and an exclusion zone would be implemented. Because the area within which underwater sound pressure levels are expected to reach or exceed 190 dB re 1 μ Pa is less than a foot, the radius of the exclusion zone would be set at a minimum of 49 feet to prevent the injury of marine mammals from machinery. Pile extraction or driving would not commence (or re-commence following a shutdown) until marine mammals are not sighted within the exclusion zone for a 15-minute period. If a marine mammal enters the exclusion zone during sheet pile work, work would stop until the animal leaves the exclusion zone.

7. If marine mammals are present within the work area, they would be allowed to leave on their own volition.

If they are not leaving the work area on their own, coordination with NMFS or the Service (as appropriate) would occur to ensure a government official be present should an animal require flushing from within the footprint of the construction area.

8. Fuel storage and all fueling and equipment maintenance activities would be conducted at least 100 feet from subtidal and intertidal habitat.

Monitoring and Reporting

CDFW would follow a detailed monitoring plan developed in consultation with the Service and NMFS. A Service- and NMFS-approved biological monitor would monitor for marine mammal disturbance. Monitoring would occur as described in Mitigation Measure #2 above. Throughout construction activities that require a monitor, the biological monitor would maintain a log that documents numbers of marine mammals present before, during, and at the conclusion of daily activities. The monitor would record basic weather conditions and marine mammal behavior. A final report would be submitted to the Service and NMFS within 90 days of the conclusion of monitoring efforts. The report would detail the monitoring protocol, summarize the data recorded during monitoring, and contain an estimate of the number of marine mammals, by species, that may have been harassed.

Estimated Take by Incidental Harassment

Based on the proposed construction methodology and mitigation, including use of an exclusion zone, no Level A harassment of southern sea otters is anticipated as a result of the proposed project. Anticipated received noise levels would remain well below the thresholds established for Level A harassment. Behavioral harassment (Level B) could result from visual disturbance and in-air noise of 100 dB re 20 μ Pa or greater for a period of 132 days and (if pile driving is required by the project) visual disturbance, in-air noise of 100 dB re 20 μ Pa or greater, and underwater continuous noise of 120 dB re 1 μ Pa or greater for a period of 4 days.

In order to quantify take that may occur incidental to the specified activity, we determine the area that may be subject to project-related disturbance, estimate the number of sea otters likely to be present in that area, and multiply the number of sea otters by the number of days they could be disturbed during the project. Because airborne noise attenuates rapidly, and because of the distance of the project site from areas of

concentrated sea otter activity (the closest such area, Yampah Marsh, is approximately 800 feet away), it is likely that few sea otters will be exposed to noise levels exceeding the 100 dB re 20 μ Pa threshold. The area potentially subject to visual disturbance from construction activity is larger than and inclusive of the area potentially exposed to airborne sound exceeding the threshold for Level B harassment. Accordingly, we do not evaluate the number of sea otters exposed to airborne noise separately from the number of sea otters exposed to visual disturbance.

Vibratory pile driving (if required) would generate visual disturbance and in-air and underwater noise for a period of 4 days. The portion of Elkhorn Slough Channel that could be exposed to underwater noise of 120 dB re 1 μ Pa or greater during pile driving is pictured in Figure 6–4 of ESA/ESNERR (2016). An estimated 15 sea otters may use this portion of the channel for foraging or traveling from one location to another. The area that could potentially be affected by visual disturbance and in-air noise of 100 dB re 20 μ Pa or greater during pile driving includes Minhoto Marsh, Parsons Slough, and Yampah Marsh, which are utilized by an average of 35 sea otters (ESA/ESNERR 2016). Up to 50 sea otters may be present on land or in water and potentially affected by vibratory pile driving for 4 days, resulting in an estimated 200 instances of take.

After sheet piles are installed (or if an earthen dam or an inflatable dam is used instead), the project site would be isolated from aquatic areas, and sea otters would no longer be able to access the work area. At that time, sea otters outside of the work area would be subject to reduced levels of disturbance. An average of 10 sea otters per day (a subset of the 50 that may be affected by vibratory pile driving) could be affected by visual disturbance and in-air noise of 100 dB re 20 μ Pa or greater during the subsequent 132 days of construction work in the northern and eastern portions of the Minhoto Marsh, resulting in approximately 1,320 takes.

Findings

We propose the following findings regarding this action:

Negligible Impact

We find that any incidental take by harassment that is reasonably likely to result from the proposed project would not adversely affect the southern sea otter by means of effects on rates of recruitment or survival, and would, therefore, have no more than a negligible impact on the species or stock

(all southern sea otters are considered to belong to a single stock). In making this finding, we considered the best available scientific information, including: (1) The biological and behavioral characteristics of the species; (2) information on distribution and abundance of sea otters within the area of the proposed activity; (3) the potential sources of disturbance during the proposed activity; and (4) the potential response of sea otters to disturbance.

The estimated 200 potential takes (affecting up to 50 sea otters per day) during a total of 4 days of vibratory pile driving, if required by the project, and 1,320 potential takes (affecting up to 10 sea otters per day over a period of 132 days) during subsequent construction activity are expected to result in negligible impact for the following reasons: Received noise levels would remain well below the thresholds established for Level A harassment; sea otters do not appear to be particularly sensitive to noise (and often do not react visibly to it); and any behavioral reactions to noise or visual disturbance are expected to be temporary and of short duration. In particular, the estimate of the number of sea otters that could be harassed by exposure to project-related underwater sound based on the 120 dB threshold may overstate impacts because this threshold is sometimes at or even below the ambient noise level in certain locations. Additionally, disturbance resulting from project activities would affect only a small portion of the sea otter habitat available to and used by sea otters in Elkhorn Slough.

The mitigation measures outlined above are intended to minimize the number of sea otters that could be disturbed by the proposed activity. Any impacts to individuals are expected to be limited to Level B harassment of short duration. Responses of sea otters to disturbance would most likely be common behaviors such as diving and/or swimming away from the source of the disturbance. No take by injury or death is anticipated. Because any Level B harassment that occurs would be of short duration, and because no take by injury or death is anticipated, we find that the anticipated harassment caused by the proposed activities is not expected to adversely affect the species or stock through effects on annual rates of recruitment or survival.

Our finding of negligible impact applies to incidental take associated with the proposed activity as mitigated through this authorization process. This authorization establishes monitoring and reporting requirements to evaluate

the potential impacts of the authorized activities, as well as mitigation measures designed to minimize interactions with, and impacts to, sea otters.

Small Numbers

For small numbers take analysis, the statute and legislative history do not expressly require a specific type of numbers analysis, leaving the determination of “small” to the agency’s discretion. The sea otter population in California consists of approximately 3,272 animals. The number of sea otters that could potentially be taken by harassment in association with the proposed project, approximately 50 animals, is 1.5 percent of the population size. We find that the number of sea otters utilizing the affected area is small relative to the size of the population.

Impact on Subsistence

The subsistence provision of the MMPA does not apply to southern sea otters.

Endangered Species Act

The proposed activity will occur within the range of the southern sea otter, which is listed as threatened under the ESA. CDFW has requested a Pre-Construction Notification (PCN) under U.S. Army Corps of Engineers’ (Corps’) Nationwide Permit (NWP) 27 (USACE 2012). The Corps has initiated interagency consultation under section 7 of the ESA with the Service’s Ventura Fish and Wildlife Office. We will also complete intra-Service section 7 consultation on our proposed issuance of the IHA.

National Environmental Policy Act (NEPA)

The types of impacts associated with aquatic habitat restoration, establishment, and enhancement activities are described in NWP 27. The analyses in the NWP and the coordination undertaken prior to its issuance fulfill the requirements of NEPA (42 U.S.C. 4321 *et seq.*). The Service will review the Decision Document for NWP 27 and decide either to adopt it or to prepare its own NEPA document before making a determination on the issuance of an IHA. Our analysis will be completed prior to issuance or denial of the IHA and will be available at <http://www.fws.gov/ventura/endangered/species/info/sso.html>.

Government-To-Government Relations With Native American Tribal Governments

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations with Native American Tribal Governments” (59 FR 22951), Executive Order 13175, Secretarial Order 3206, Department of the Interior Secretarial Order 3317 of December 1, 2011 (Tribal Consultation and Policy), the Department of the Interior’s manual at 512 DM 2, and the Native American Policy of the Service, January 20, 2016, we readily acknowledge our responsibility to communicate meaningfully with federally recognized Tribes on a Government-to-Government basis. We have evaluated possible effects on federally recognized Indian Tribes and have determined that there are no effects.

Proposed Authorization

The Service proposes to issue CDFW an IHA for the nonlethal, incidental, unintentional take by level B harassment of small numbers of southern sea otters while the applicant is completing the Minhoto-Hester Marsh Restoration Project in Elkhorn Slough, Monterey County, California. The 1-year authorization would begin on the date of issuance, with an anticipated project start date between January 2017 and June 2017. Authorization for incidental take beyond the 1-year period would require a request for renewal.

The final IHA would incorporate the mitigation, monitoring, and reporting requirements discussed in this proposal. The applicant would be responsible for following those requirements. This authorization would not allow the intentional taking of sea otters, nor take by injury or death.

If the level of activity exceeded that described by the applicant, or the level or nature of take exceeded those projected here, the Service would reevaluate its findings. The Secretary may modify, suspend, or revoke an authorization if the findings are not accurate or the mitigation, monitoring, and reporting requirements described in this notice are not being met.

Request for Public Comments

The Service requests that interested persons submit comments and information concerning this proposed IHA. For information on the references cited in this notice, see **ADDRESSES**.

Consistent with section 101(a)(5)(D)(iii) of the MMPA, we are opening the comment period on this proposed authorization for 30 days (see

DATES). We intend any final action resulting from this proposal to be as accurate and as effective as possible. Therefore, we request comments or suggestions on this proposed authorization.

We particularly seek comments concerning:

- Whether the proposed authorization, including the proposed activities, will have a negligible impact on the species or stock of the southern sea otter.
- Whether there are any additional provisions we may wish to consider for ensuring the conservation of the southern sea otter.

You may submit your comments and materials concerning this proposed authorization by one of the methods listed in **ADDRESSES**. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: We issue this notice under the authority of the MMPA (16 U.S.C. 1371 *et seq.*).

Dated: January 6, 2017.

Paul Souza,

Regional Director, Pacific Southwest Region.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[17X.LLAKF02000. L16100000. DR0000. LXSS094L0000]

BLM Director's Response to the Alaska Governor's Appeal of the BLM Alaska State Director's Governor's Consistency Review Determination for the Eastern Interior Proposed Resource Management Plan and Final Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice contains the Director of the Bureau of Land Management's (BLM) response to the Alaska Governor's appeal of the BLM Alaska State Director's response to the State of Alaska's Governor's consistency review letter for the Eastern Interior

Proposed Resource Management Plan (PRMP) and Final Environmental Impact Statement (FEIS). The BLM Director determined not to accept the recommendations of the Alaska Governor's consistency review letter.

FOR FURTHER INFORMATION CONTACT:

Leah Baker, Division Chief for Decision Support, Planning and NEPA, at 202-912-7282. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact the above individual during normal business hours. FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On July 29, 2016, the BLM released the PRMP and FEIS for the Eastern Interior Resource Management Plan in Alaska. In accordance with the regulations at 43 CFR 1610.3-2(e), the BLM submitted the PRMP and FEIS for a 60-day Governor's Consistency Review. On September 28, 2016, the Governor of Alaska submitted a Governor's Consistency Review letter to the BLM Alaska State Director asserting inconsistencies between the PRMP and State land use plans, programs, and policies.

After careful consideration of the concerns raised in the Governor's Consistency Review letter, the State Director decided not to adopt the recommendations made by the Governor. On October 12, 2016, the State Director sent a written response to the Governor describing the reasons for which the State Director believes that the PRMP is consistent with State land use plans, policies, and programs.

On November 8, 2016, the Governor appealed the BLM Alaska State Director's decision to not accept his recommendations to the BLM Director. In the Governor's appeal letter, the State of Alaska requested the BLM Director to reconsider the issues and recommendations raised in the Governor's Consistency Review letter. The BLM Director issued a final response to the Governor that declined to accept the recommendations of the Governor and affirmed the BLM State Director's decision. Pursuant to 43 CFR 1610.3-2(e), the basis for the BLM Director's determination on the Governor's appeal is published verbatim below.

"This letter addresses your appeal of the response provided by the Bureau of Land Management (BLM) Alaska State Director regarding your consistency review of the Eastern Interior Proposed Resource Management Plan and Final

Environmental Impact Statement (referred to hereafter as the PRMP or plan). The Governor's consistency review is an important part of the BLM land use planning process, and we appreciate the significant time and attention that you and your staff have committed to this effort.

The BLM developed the Eastern Interior PRMP with extensive local involvement. As a result of more than 15 months of public comment periods, we received 590 comments, including those from the State of Alaska, Chalkyitsik Village Council, Gwichyaa Zhee Gwich'in Tribal Government, miners from the Fortymile area, and industry groups. Of the total comments, 171 submissions were from rural Alaska residents who qualify as Federal subsistence users. All of these stakeholder groups provided important information about their current and anticipated future uses of the lands in the planning area.

I believe that this effort has led to the creation of a strong resource management plan that properly balances responsible development with the protection and conservation of subsistence use, important habitats for fish and wildlife, and other special values in the planning area. For example, the plan recommends opening more than one million acres of currently-withdrawn lands to mineral location, entry, and leasing, while also providing protection of priority habitats for caribou, Dall sheep, and other wildlife critical for subsistence use.

The applicable regulations at 43 CFR 1610.3-2(e) provide you with the opportunity to appeal the State Director's decision to not accept the recommendations you made in your consistency review letter. These regulations also guide my review of your appeal. In reviewing your appeal, I must first consider whether you have identified inconsistencies with State or local plans, policies, or programs. If such inconsistencies are identified, I then must consider whether your recommendations both address the inconsistencies and provide for a reasonable balance between the national interest and the State's interest.

In your consistency review letter, you identified three key issues that the Alaska State Director determined to be outside the scope of the Governor's consistency review: The PRMP is inconsistent with Federal statutes implementing the goals of the Alaska Statehood Act that protect the State's resource management responsibilities; the PRMP is inconsistent with previous BLM plans and the BLM's multiple use mandate; and the PRMP frustrates the

State and Federal governments' obligations under the Statehood Act and the Alaska Land Transfer Acceleration Act.

Your letter also stated that the PRMP is inconsistent with State land use plans, programs, and policies, which the State Director responded to in greater depth. While you raised multiple issues in both your consistency review and appeal letters, your overarching recommendation to address these issues was to revoke all Alaska Native Claims Settlement Act (ANCSA) 17(d)(1) withdrawals. Further, in your consistency review letter, you requested that recommendations for new mineral withdrawals be removed.

As described in this letter and supported by the State Director's response to your consistency letter, there is a strong national interest in protecting subsistence use and conserving important habitats for fish and wildlife. I find that the recommendations in your letter do not meet the standard for granting your appeal. I agree with the State Director that the issues dismissed in the response to your consistency review do not identify inconsistencies with State resource related plans, policies, or programs. Nevertheless, I have fully considered these issues as well as your responses to the State Director's findings. Below is my review of the issues and recommendations presented in your appeal letter.

1. The plan does not respect the congressional mandate in the Alaska National Interest Lands Conservation Act (ANILCA) to make multiple use lands not already designated as conservation system units available for intensive use, and instead applies layers of protective measures to buffer conservation system units within the planning area (e.g., the Fortymile Wild and Scenic River).

Upon review, I have determined that the PRMP is consistent with the provisions of ANILCA. As you are aware, ANILCA § 101(d) states that the designation and disposition of the public lands pursuant to this Act represent a proper balance between the reservation of national conservation system units and those public lands necessary and appropriate for more intensive use and designation, further stating that Congress believes the need for future legislation designating new conservation system units, new national conservation areas, or new national recreation areas, to be "obviated." The PRMP does not recommend designating any new conservation system units, national conservation areas, or national recreation areas, but rather recommends

revoking ANCSA 17(d)(1) withdrawals on a total of approximately 1.7 million acres in order to open these lands to mineral location entry and leasing, including 1.1 million acres of the Fortymile Subunit. While the PRMP does recommend new withdrawals under the Federal Land Policy and Management Act (FLPMA), this action is not precluded by ANILCA. Specifically, ANILCA (§ 1326(a)) outlines a process for withdrawing lands in Alaska, which indicates that Congress did envision the possibility of future withdrawals. Such withdrawals are consistent with ANILCA and Secretarial withdrawal authorities. The PRMP recommends only temporarily retaining the ANCSA 17(d)(1) withdrawals until new withdrawals under FLPMA can be enacted in these areas.

2. The plan relies on outdated ANCSA 17(d)(1) withdrawals to support restrictions on access, use, and resource development instead of recognizing that existing Federal and State environmental laws and regulations already protect resource values.

The BLM recognizes that Federal and State laws and regulations provide for the protection of resource values. FLPMA and its implementing regulations are included among these Federal laws. FLPMA mandates that the BLM manage on the basis of multiple use and sustained yield, and makes clear that the term "multiple use" does not mean that every use is appropriate for every acre of public land. Rather, the Secretary can "make the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use . . ." (FLPMA § 103(c)).

In your appeal letter, you reference Article 8, Section 2 of the Alaska State Constitution, which states, "[t]he legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit to the people." You also highlight similarities between State statutes and FLPMA, both of which provide for the balance of resource development and conservation. While section 102 of FLPMA expresses Congressional policy that public lands be managed in a manner which recognizes the Nation's need for domestic sources of minerals, that same section also references protection of the quality of scientific, scenic, historical, ecological, environmental, air and atmospheric, water resource, and archeological values, and FLPMA section 103(c)

expressly includes similar values in its definition of multiple use (including values such as "recreation . . . wildlife and fish, and natural scenic, scientific, and historical values").

The BLM also recognizes that all of the ANCSA 17(d)(1) withdrawals should not remain in place. As previously mentioned, the PRMP recommends revoking ANCSA 17(d)(1) withdrawals on approximately 1.7 million acres to open these lands for mineral entry. The PRMP recommends retaining certain portions of these withdrawals, but only until recommended withdrawals under FLPMA can be put in place. The PRMP also recommends eventual revocation of all ANCSA 17(d)(1) withdrawals to clean up the land record and remove duplicate withdrawals.

Your appeal states that the plan provides no explanation as to why existing laws and regulations provide insufficient protection for resource values. However, I find that the effects of the proposed alternative, including the rationale for these actions, are adequately analyzed and disclosed in the PRMP/FEIS. I concur with the determination in the PRMP that additional protections, such as FLPMA withdrawals to protect water quality and river values, are warranted.

3. The plan frustrates the State's ability to prioritize land selections and interferes with the State's ability to develop a resource-based economy.

While I have fully considered your concerns, I concur with the State Director's response that these statements do not identify inconsistencies with State plans, policies, or programs. In your appeal, you state that the PRMP impedes the State's ability to prioritize land selections. Based on analysis completed by BLM Alaska in June 2016, only an estimated 197,100 acres of the State's top three priorities of top-filed lands are encumbered solely by 17(d)(1) withdrawals on a statewide basis. Affected lands within the planning area would be even less. The State is currently over-selected on their land entitlement by 242 percent.

Further, in regards to the assertion that retaining 17(d)(1) withdrawals interferes with the State's ability to explore, locate, and define the mineral resource on large tracts of lands identified for selection, all State and Native-selected lands are segregated from mineral entry. Should 17(d)(1) withdrawals be revoked, the lands are not open to the staking of mining claims until the selections are relinquished, including State selections. Once a 17(d)(1) withdrawal is revoked and the State's top-filing attaches to a selection, the State's selection itself segregates the

land and makes it unavailable for mining claims, until such time as the selection is requested by the State and tentatively approved. For the reasons described throughout this letter, I do not think the plan will interfere with the State's ability to develop a resource-based economy, but that the PRMP will promote future opportunities for mineral exploration and development, where appropriate.

4. The plan does not provide sustainable opportunities for mineral exploration or development consistent with State area plans, including areas in the White Mountain National Recreation Area (NRA) that have high potential for rare earth elements.

In your consistency review and appeal letters, you assert that the PRMP preempts mineral exploration and development, and by doing so, the PRMP is inconsistent with State plans, policies, and programs. However, I concur with the State Director's finding that the PRMP is consistent with the State's plans, policies, and programs, including the State's policy to make mineral resources available for development. As noted in the State Director's response, the PRMP recommends revoking ANCSA 17(d)(1) withdrawals on 1.7 million acres to open lands to mineral location, entry, and leasing, including 1.1 million acres in the Fortymile Subunit, 4,000 acres in the White Mountains Subunit, 547,000 acres in the Draanjik (Upper Black River) Subunit adjacent to State and State-selected land, and 30,000 acres in the Steese Subunit adjacent to State land. These recommendations are consistent with making mineral resources available for mineral development.

Moreover, revoking the ANCSA 17(d)(1) withdrawals would not allow for new mining claims in the White Mountains NRA, as that area would remain withdrawn from the mining law by ANILCA. As noted in the response to comments on FEIS pp. 1520–1521, the PRMP recommends maintaining the ANILCA withdrawals for the Steese NCA and White Mountains NRA. It also recommends to the Secretary that the ANCSA 17(d)(1) withdrawals (Public Land Orders 5180 and 5179) be revoked as applied to these areas since they are duplicative of the ANILCA withdrawals and thus not necessary. Additionally, Public Land Order 5180 does not close the national conservation area to location of metalliferous mining claims (such as gold), so its protective effect is limited. Removing the 17(d)(1) withdrawals would clean up the public land record by removing duplicative

withdrawals, but it would not result in opening the lands to the mining law.

Your overarching recommendation is to revoke all ANCSA 17(d)(1) withdrawals, unconditionally. However, based on the foregoing, I find that the recommendations provided in your appeal letter do not meet the standard identified above for granting an appeal in accordance with 43 CFR 1610.3–2(e). Therefore, I affirm the Alaska State Director's response to your finding of inconsistency and respectfully deny your appeal. The reasons outlined above for my decision on your appeal will also be published in the **Federal Register** pursuant to the applicable BLM regulations.

Further, please note that the BLM gave due consideration to the State's concerns raised in the protest letter dated August 29, 2016. For a detailed response to these issues, many of which were raised in your consistency review letter, I refer you to the Director's Protest Resolution Report.

The BLM and the State of Alaska have a long history of working cooperatively on the development of resource management plans. I appreciate the resources and input that you and your staff have put into the process of developing the PRMP for the Eastern Interior planning area. As mentioned, I believe this plan balances responsible development with the protection and conservation of subsistence use, important habitats for fish and wildlife, and other special values. I look forward to our continued coordination as our teams work together to implement this plan."

Authority: 43 CFR 1610.3–2(e).

Kristin Bail,

Assistant Director, Resources and Planning.

Notice of Realty Action: Application for Conveyance of Federally Owned Mineral Interests in Maricopa County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) is processing an application under section 209 of the

Federal Land Policy and Management Act of 1976 (FLPMA) to convey the federally owned mineral interests in a 799.57-acre parcel of land, located in Maricopa County, Arizona, to the surface owner, REO Funding Solution IV, LLC. Publication of this notice temporarily segregates the federally owned mineral interests in the land covered by the application from all forms of appropriation under the public land laws, including the mining laws, for up to 2 years while the BLM processes the application.

DATES: Interested persons may submit written comments to the BLM at the address listed below on or before March 6, 2017.

ADDRESSES: Bureau of Land Management, Phoenix District Office, 21605 North 7th Avenue, Phoenix, AZ 85027. Detailed information concerning this action is available for review at this address.

FOR FURTHER INFORMATION CONTACT:

Benedict Parsons, Realty Specialist, at the address above, or by telephone at 623–580–5637, or email at bparsons@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact the above individual during business hours. The Service is available 24 hours a day, 7 days a week, to leave a message or question for the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The BLM is processing an application under section 209 of the Federal Land Policy and Management Act (FLPMA), 43 U.S.C. 1719(b), to convey the federally owned mineral interests that aggregate 799.57 acres, situated in Maricopa County, Arizona. The location of the federally owned mineral interest proposed for conveyance is intended to be identical in location as the privately owned surface interest of the applicant, and is described as follows.

AZA–036156

Gila and Salt River Meridian, Maricopa County, Arizona
T. 6 N., R 4 E.,

Parcel No. 1

A parcel of land situated in the southwest quarter of section 12, being more particularly described as follows:

COMMENCING at the southwest section corner of said section 12, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of said section 12;

THENCE South 89°14'17" East, along the south section line of said southwest ¼ of section 12, a distance of 330.55 feet to the point of beginning;

THENCE North 0°12'34" West, leaving said south section line, a distance of 1330.92 feet; THENCE South 88°54'41" East, a distance of 1198.47 feet;

THENCE South 0°08'53" East, a distance of 1324.06 feet to a point on said south section line of the southwest ¼;

THENCE North 89°14'17" West, along said south section line of the southwest ¼, a distance of 1196.92 feet to the point of beginning, containing 36.49 acres of land.

Parcel No. 2

A parcel of land situated in the south half of section 12, being more particularly described as follows:

COMMENCING at the southwest section corner of said section 12, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of said section 12;

THENCE South 89°14'17" East, along the south section line of said southwest ¼ of section 12, a distance of 1527.47 feet to the point beginning;

THENCE North 0°08'53" West, leaving said south section line, a distance of 1324.06 feet;

THENCE South 88°54'41" East, a distance of 1208.47 feet;

THENCE South 0°05'10" East, a distance of 1316.56 feet to a point on the south section line of the southeast ¼ of said Section 12;

THENCE North 89°36'43" West, along said south section line of the southeast ¼, a distance of 90.00 feet to the south ¼ section corner of said Section 12;

THENCE North 89°14'17" West, along the south section line of the southwest ¼ of said section 12, a distance of 1116.90 feet to the point of beginning, containing 36.60 acres of land.

Parcel No. 3

A parcel of land situated in the southeast ¼ of section 12, being more particularly described as follows:

COMMENCING at the south ¼ section corner of said section 12, which bears North 89°36'43" West, a distance of 2633.94 feet from the southeast section corner of said section 12;

THENCE South 89°36'43" East, along the south section line of the southeast ¼ of said section 12, a distance of 90.00 feet to the point of beginning;

THENCE North 00°05'10" West, leaving said south section line, a distance of 1316.56 feet;

THENCE South 88°54'51" East, a distance of 1232.04 feet to a point on the north and south center line of the southeast ¼ of said Section 12;

THENCE South 0°07'39" West, along said north and south center line of the southeast ¼ of said Section 12, a distance of 1301.46 feet to a point on said south section line of the southeast ¼;

THENCE North 89°36'43" West, along said south section line, a distance of 1226.97 feet to the point of beginning.

Excluding that portion within the Gift Lode Mining Claim, M.S. 4503, conveyed in U.S. Patent No. 1220768 dated June 23, 1961, and recorded in the records of Maricopa County, Arizona, at Docket 3753, Page 360, containing 35.35 acres of land.

Parcel No. 4

A parcel of land situated in the southwest ¼ of section 12, being more particularly described as follows:

COMMENCING at the southwest section corner of said section 12, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of said section 12;

THENCE South 89°14'17" East, along the south line of said southwest ¼ of section 12, a distance of 330.55 feet;

THENCE North 00°12'34" West, leaving said south section line, a distance of 1330.92 feet to the point of beginning;

THENCE North 00°12'34" West, a distance of 1330.92 feet to a point on the east and west center line of Section 12;

THENCE South 88°27'04" East, along said east and west center line, a distance of 1200.14 feet;

THENCE South 00°08'53" East, leaving said North line, a distance of 1321.24 feet;

THENCE North 88°54'41" West, a distance of 1198.47 feet to the point of beginning, containing 36.50 acres of land.

Parcel No. 5

A parcel of land situated in the south ½ of section 12, being more particularly described as follows:

COMMENCING at the southwest section corner of said section 12, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of said Section 12;

THENCE South 89°14'17" East, along the south section line of said southwest ¼ of section 12, a distance of 1527.47 feet;

THENCE North 0°08'53" West, leaving said south section line, a distance of 1324.06 feet to the point of beginning;

THENCE North 00°08'53" West, a distance of 1321.24 feet to a point on the east and west center line of said Section 12;

THENCE South 88°27'04" East, along said east and west center line, a distance of 1120.10 feet to the center ¼ section corner of section 12;

THENCE South 88°27'04" East, along the east and west center line of said Section 12, a distance of 90.04 feet;

THENCE South 00°05'10" East, a distance of 1311.49 feet;

THENCE North 88°54'41" West, a distance of 1208.47 feet to the point of beginning;

Excluding that portion within the Gift Lode Mining Claim, M.S. 4503, conveyed in U.S. Patent No. 1220768 dated June 23, 1961, and recorded in the records of Maricopa County, Arizona, at Docket 3753, Page 360, containing 35.46 acres of land.

Parcel No. 6

A parcel of land situated in the southeast ¼ of section 12, being more particularly described as follows:

COMMENCING at the south ¼ section corner of said section 12, which bears North 89°36'43" West, a distance of 2633.94 feet from the southeast section corner of said section 12;

THENCE South 89°36'43" East, along the south section line of the southeast ¼ of said section 12, a distance of 90.00 feet;

THENCE North 00°05'10" West, leaving said south section line, a distance of 1316.56 feet to the point of beginning;

THENCE North 00°05'10" West, a distance of 1311.49 feet to a point on the east and west center line of said Section 12;

THENCE South 88°27'04" East, along the said east and west center line, a distance of 1237.13 feet to a point on the north and south center line of the southeast ¼ of Section 12;

THENCE South 00°07'39" West, along said north and south center line, a distance of 1301.46 feet;

THENCE North 88°54'41" West, leaving said north and south center line, a distance of 1232.04 feet to the point of beginning;

Excluding that portion within the Gift Lode Mining Claim, M.S. 4503, conveyed by U.S. Patent No. 1220768 dated June 23, 1961, and recorded in the records of Maricopa County, Arizona, at Docket 3753, Page 360, containing 20.42 acres of land.

Parcel No. 7

A parcel of land situated in the northeast ¼ of section 12, being more particularly described as follows:

COMMENCING at the north ¼ section corner of said Section 12, which bears North 89°57'16" West, a distance of 2655.53 feet from the northeast section corner of said Section 12;

THENCE South 00°05'11" East, along the north and south center line of said section 12, a distance of 1150.23 feet to the point of beginning;

THENCE South 88°27'04" East, leaving said north and south center line, a distance of 1101.27 feet;

THENCE South 00°02'17" East, a distance of 1451.57 feet, to a point on the east and west center line of said section 12;

THENCE North 88°27'04" West, along said east and west center line, a distance of 1100.04 feet to the center ¼ section corner of said section 12;

THENCE North 00°05'11" West, along the north and south center line of said section 12, a distance of 1451.60 feet to the point of beginning;

Excluding that portion within the Gift Lode Mining Claim, M.S. 4503, conveyed by U.S. Patent No. 1220768 dated June 23, 1961, and recorded in the records of Maricopa County, Arizona, at Docket 3753, Page 360, containing 35.47 acres of land.

Parcel No. 8

A parcel of land situated in the northeast ¼ of section 12, being more particularly described as follows:

BEGINNING at the north ¼ section corner of said Section 12, which bears North 89°57'16" West, a distance of 2655.53 feet from the northeast section corner of said Section 12, being the point of beginning;

THENCE South 89°57'16" East, along the north section line of the northeast ¼ of said section 12, a distance of 1615.53 feet;

THENCE South 00°02'17" East, leaving said north section line, a distance of 1522.73 feet;

THENCE North 88°27'04" West, a distance of 513.91 feet to a point on the east line of Parcel No. 7, hereinbefore described;

THENCE North 00°02'17" West, a distance of 330.13 feet to the northeast corner of said Parcel No. 7;

THENCE North 88°27'04" West, a distance of 1101.27 feet to a point on the north and south center line of said Section 12;

THENCE North 00°05'11" West, along said north and south center line of said Section 12, a distance of 1150.23 feet to the point of beginning, containing 47.32 acres of land.

Parcel No. 9

A parcel of land situated in the northeast ¼ of section 12, being more particularly described as follows:

COMMENCING at the north ¼ section corner of said Section 12, which bears North 89°57'16" West, a distance of 2655.53 feet from the northeast section corner of said section 12;

THENCE South 89°57'16" East, along the north section line of said northeast ¼, a distance of 1615.53 feet to the point of beginning;

THENCE South 89°57'16" East, continuing along said north section line, a distance of 1040.00 feet to the northeast section corner of said Section 12;

THENCE South 00°02'17" East, along the east section line of said section 12, a distance of 1550.02 feet;

THENCE North 88°27'04" West, leaving said east section line, a distance of 1040.40 feet;

THENCE North 00°02'17" West, a distance of 1522.73 feet to the point of beginning, containing 36.68 acres of land.

Parcel Nos. 10 and 11

Sec. 1, NE¼SE¼ and SE¼SE¼, containing 80.00 acres of land (government record area).

Parcel No. 12

A parcel of land situated in the southeast ¼ of section 11, being more particularly described as follows:

BEGINNING at the southeast section corner of section 11, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of Section 12, being the point of beginning;

THENCE South 89°59'10" West, along the south section line of the southeast ¼ of said section 11, a distance of 620.83 feet;

THENCE North 00°11'08" West, leaving said south section line, a distance of 314.67 feet;

THENCE North 90°00'00" East, a distance of 620.58 feet, to the east section line of said section 11;

THENCE South 00°13'36" East, along the east section line of said section 11, a distance of 315.48 feet to the point of beginning, containing 4.48 acres of land.

Parcel No. 13

A parcel of land situated in the southeast ¼ of section 11, being more particularly described as follows:

COMMENCING at the southeast section corner of said section 11, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of Section 12;

THENCE South 89°59'10" West, along the south section line of the southeast ¼ of said section 11, a distance of 1310.93 feet;

THENCE North 00°11'13" West, a distance of 315.69 feet to the point of beginning;

THENCE North 00°11'13" West, a distance of 502.94 feet;

THENCE North 89°44'33" East, a distance of 454.34 feet;

THENCE South 00°11'13" East, a distance of 504.98 feet, to a point on the north line of Parcel No. 15, hereinafter described;

THENCE North 90°00'00" West, a distance of 454.34 feet to the point of beginning, containing 5.53 acres of land.

Parcel No. 14

A parcel of land situated in the southeast ¼ of section 11, being more particularly described as follows:

COMMENCING at the southeast section corner of said section 11, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of Section 12;

THENCE South 89°59'10" West, along the south section line of the southeast ¼ of said section 11, a distance of 1310.93 feet;

THENCE North 00°11'13" West, a distance of 315.69 feet;

THENCE South 90°00'00" East, a distance of 454.34 feet to the point of beginning;

THENCE North 00°11'13" West, a distance of 504.98 feet;

THENCE North 89°44'33" East, a distance of 345.66 feet;

THENCE North 00°11'08" West, a distance of 549.02 feet;

THENCE North 89°48'47" East, a distance of 9.99 feet;

THENCE 182.67 feet along an arc of a curve to the right having a radius distance of 135.00 feet, having a central angle of 77°31'39" and the long chord of which measures South 51°25'14" East, a distance of 169.05 feet;

THENCE South 12°39'24" East, a distance of 164.66 feet;

THENCE North 89°44'33" East, a distance of 332.78 feet, to the east section line of section 11;

THENCE South 00°13'44" East, along the east section line of said section 11, a distance of 262.91 feet;

THENCE South 00°13'36" East, a distance of 527.01 feet;

THENCE North 90°00'00" West, a distance of 620.56 feet, to the northeast corner of Parcel No. 15, hereinafter described;

THENCE North 00°11'08" West, a distance of 0.85 feet, to the northwest corner of Parcel No. 12, hereinbefore described;

THENCE North 90°00'00" West, a distance of 235.76 feet to the point of beginning;

EXCEPT that portion located within the NE¼SE¼ of said Section 11, containing 13.53 acres of land.

Parcel No. 15

A parcel of land situated in the southeast ¼ of section 11, being more particularly described as follows:

COMMENCING at the southeast section corner of said Section 11, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of Section 12;

THENCE South 89°59'10" West, along the south section line of the southeast ¼ of said section 11, a distance of 620.83 feet to the point of beginning;

THENCE South 89°59'10" West, along the south section line of the southeast ¼ of said section 11, a distance of 690.10 feet;

THENCE North 00°11'13" West, a distance of 315.69 feet;

THENCE North 90°00'00" East, a distance of 690.10 feet;

THENCE South 00°11'08" East, a distance of 315.52 feet to the point of beginning, containing 5.00 acres of land.

Parcel No. 16

A parcel of land situated in the southwest ¼ of section 12, being more particularly described as follows:

BEGINNING at the southwest section corner of said section 12, which bears North 89°14'17" West, a distance of 2644.37 feet from the south ¼ section corner of said Section 12, being the point of beginning;

THENCE South 89°14'17" East, along the south line of the southwest ¼ of Section 12, a distance of 330.55 feet;

THENCE North 00°13'36" West, leaving said south line, a distance of 838.92 feet;

THENCE North 88°27'04" West, a distance of 330.91 feet, to the west section line of said section 12;

THENCE South 00°13'36" East, along the west section line of said Section 12, a distance of 842.49 feet to the point of beginning, containing 6.38 acres of land.

The areas described for Parcels Nos. 1 through 16 aggregate 435.21 acres.

AZA-036488

Parcel No. 1

Gila and Salt River Meridian, Maricopa County, Arizona

T. 6 N., R. 4 E.,

Sec. 1, east 1210.00 feet of the NE¼SW¼, east 1210.00 feet of the SE¼NW¼, and the east 1210.00 feet of Lot 3.

EXCEPT those portions lying within the following described lands:

EXCEPTION PARCEL NO. 1

BEGINNING at the north ¼ section corner of said section 1, which bears South 89°38'30" West, a distance of 2652.21 feet from the northwest ¼ section corner of said Section 1, being the point of beginning;

THENCE South 00°10'19" West, a distance of 1980.03 feet;

THENCE North 89°38'30" West, a distance of 400.00 feet;

THENCE North 00°10'19" East, a distance of 1360.76 feet;

THENCE North 89°38'30" West, a distance of 810.00 feet;

THENCE North 00°10'19" East, a distance of 619.28 feet to a point on the north line of the northwest ¼ of said section 1;

THENCE South 89°38'29" East, along said north line, a distance of 1210.00 feet to the point of beginning;

EXCEPTION PARCEL NO. 2

COMMENCING at the north ¼ section corner of said section 1, from which the northwest section corner of said section 1 bears North 89°42'22" West, a distance of 2652.21 feet;

THENCE North 89°42'22" West, a distance of 1210.00 feet to the point of intersection with the west line of the east 1210.00 feet of the west ½ of Section 1;

THENCE South 00°06'00" West along said west line, a distance of 2502.98 feet to the point of beginning;

THENCE South 89°07'50" East, a distance of 805.67 feet;

THENCE South 15°34'27" West, a distance of 1473.72 feet to the point of intersection with the east and west center line of the southwest ¼ of said Section 1;

THENCE North 88°24'21" West, along said east and west center line, a distance of 415.55 feet to the point of intersection with the aforementioned west line of the east 1210.00 feet of the west ½ of Section 1;

THENCE North 00°06'00" East along said west line, a distance of 1420.32 feet to the point of beginning.

Containing 59.80 acres of land.

Parcel No. 2

Sec. 1, lots 1 and 2, S½NE¼, NE¼NW¼SE¼, S½NW¼SE¼, N½SW¼SE¼, SW¼SW¼SE¼, and N½SE¼SW¼SE¼.

Containing 224.56 acres of land.

Parcel No. 3

Sec. 12, E½SE¼.

Containing 80.00 acres of land.

The areas described for Parcels Nos. 1 through 3 aggregate 364.36 acres.

Section 209(b) of the FLPMA authorizes the conveyance of the federally owned mineral interests in land to the surface owner when the surface interest is not federally owned, upon payment of administrative costs. The objective is to allow consolidation of the surface and mineral interests when either one of the following conditions exist: (1) There are no known mineral values in the land; or (2) Where continued Federal ownership of the mineral interests interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than mineral development.

The applicant has deposited, a sum of funding sufficient to cover administrative costs, but not limited to, the cost for the mineral potential report.

Subject to valid existing rights, on January 19, 2017 the federally owned mineral interests in the land described above are hereby segregated from all forms of appropriation under the public lands laws, including the mining laws, while the application is being processed to determine if either one of the two specified conditions exists and, if so, to otherwise comply with the procedural requirements of 43 CFR part 2720. The segregative effect shall terminate upon: (1) Issuance of a patent or other document of conveyance as to such mineral interests; (2) Final rejection of the application; or (3) January 22, 2019, whichever occurs first.

Please submit all comments in writing to Benedict Parsons at the address listed

above. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made available to the public at any time. While you can ask in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 2720.1–1.

Leon Thomas,

Phoenix District Manager.

BILLING CODE 4310–32–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[MNES–058247]

Notice of Application for Withdrawal and Notification of Public Meeting; Minnesota

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Forest Service (USFS) has filed an application with the Bureau of Land Management (BLM) requesting that the Secretary of the Interior withdraw, for a 20-year term, approximately 234,328 acres of National Forest System lands within the Rainy River Watershed on the Superior National Forest from disposition under the United States mineral and geothermal leasing laws, subject to valid existing rights. Publication of this notice temporarily segregates the lands for up to 2 years from the United States mineral and geothermal leasing laws while the withdrawal application is being processed.

DATES: Comments regarding this withdrawal proposal must be received by April 19, 2017. The BLM and the USFS will hold a public meeting in connection with the proposed withdrawal on March 16, 2017, from 5 p.m. to 7:30 p.m. Central Time (CT) at the Duluth Entertainment and Convention Center, 350 Harbor Drive, Duluth, MN 55802. During this 90-day comment period, the BLM and USFS will hold additional meetings in other areas of the State, notices of which will be provided in local newspapers or on agency Web sites. The USFS' 90-day scoping period associated with preparing an environmental impact statement (EIS) was announced on January 13, 2017 in the **Federal**

Register. The EIS will analyze the impacts of the proposed withdrawal and an amendment to the Superior National Forest Land and Resource Management Plan. Additional opportunities for public comment will be provided during the preparation of that EIS.

ADDRESSES: Comments regarding this withdrawal proposal should be sent to the Deputy State Director of Geospatial Services, Bureau of Land Management, Eastern States Office, 20 M Street SE., Suite 950, Washington, DC 20003; or by facsimile at 202–912–7710. Comments sent by email will not be accepted. The March 16, 2017, BLM and USFS public meeting location is the Duluth Entertainment and Convention Center, 350 Harbor Drive, Duluth, MN 55802.

FOR FURTHER INFORMATION CONTACT:

Dominica VanKoten, BLM Eastern States Office, 202–912–7756 during regular business hours, 8 a.m. to 4:30 p.m. Monday through Friday, except holidays. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact the above individual. The Service is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The applicant is the USFS. The application requests the Secretary of the Interior to withdraw National Forest System lands in the Superior National Forest from disposition under the United States mineral and geothermal leasing laws for a period of 20 years to protect and preserve the natural resources and waters located within the Rainy River Watershed that flow into the Boundary Waters Canoe Area Wilderness (BWCAW) and the Boundary Waters Canoe Area Wilderness Mining Protection Area (MPA) in northeastern Minnesota. The lands will remain open to other forms of use and disposition as may be allowed by law on National Forest System lands, including the disposition of mineral materials.

All the National Forest System Lands identified in the townships below and any lands acquired by the Federal government within the exterior boundaries described below are included in the withdrawal application. This area excludes the BWCAW and the Boundary Waters Canoe Area Wilderness MPA, as depicted on the map entitled Appendix B: Superior National Forest, dated December 5, 2016. This map is available from the BLM Eastern States Office at the address listed above, and from the USFS Superior National Forest office, 8901

Grand Ave. Pl, Duluth, Minnesota, 55808.

Tps. 59 to 61 N., Rs. 8 W.

Tps. 58 to 61 N., Rs. 9 W.

Tps. 57 to 62 N., Rs. 10 W.

Tps. 57 to 63 N., Rs. 11 W.

Tp. 59 N., R. 12 W.

Tps. 61 to 63 N., Rs. 12 W.

Tps. 61 to 63 N., Rs. 13 W.

Tp. 63 N., R. 15 W.

Tp. 63 N., R. 16 W.

Tps. 65 to 67 N., Rs. 16 W.

Tp. 64 N., R. 17 W.

The areas described contain approximately 234,328 acres of National Forest System lands in Cook, Lake, and Saint Louis Counties, Minnesota, located adjacent to the BWCAW and the MPA.

Non-Federal lands within the area proposed for withdrawal total approximately 190,321 acres in Cook, Lake and Saint Louis Counties. As non-Federal lands, these parcels would not be affected by the temporary segregation or proposed withdrawal unless they are subsequently acquired by the Federal Government. The temporary segregation and proposed withdrawal are subject to valid existing rights, which would be unaffected by these actions.

As stated in the application, the purpose of the requested withdrawal is to protect and preserve the natural resources and waters within the Rainy River Watershed that flow into the BWCAW and the MPA from the effects of mining and mineral exploration. Congress designated the BWCAW and established the MPA to protect and preserve the ecological richness of the lakes, waterways, and forested wilderness along the Canadian border. The protection of the Rainy River Watershed would extend the preservation of the BWCAW and MPA as well as Voyageurs National Park and Canada's Quetico Provincial Park, which are all interconnected through the unique hydrology of this region.

The application further states that the use of a right-of-way, interagency agreement, or cooperative agreement would not adequately constrain mineral and geothermal leasing to provide adequate protection throughout this pristine natural area.

According to the application, no alternative sites are feasible because the lands subject to the withdrawal application are the lands for which protection is sought from the impacts of exploration and development under the United States mineral and geothermal

leasing laws. No water will be needed to fulfill the purpose of the requested withdrawal.

The USFS will serve as the lead agency for the EIS analyzing the impacts of the proposed withdrawal. The USFS will designate the BLM as a cooperating agency. The BLM will independently evaluate and review the draft and final EISs and any other documents needed for the Secretary of the Interior to make a decision on the proposed withdrawal.

Records related to the application may be examined by contacting the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above.

For a period until April 19, 2017, all persons who wish to submit comments, suggestions, or objections in connection with the withdrawal application may present their views in writing to the BLM Deputy State Director of Geospatial Services at the BLM Eastern States Office address noted in the **ADDRESSES** section above. Comments, including the names and street addresses of respondents, will be available for public review at that address during regular business hours.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice is hereby given that a public meeting in connection with the application for withdrawal will be held at Duluth Entertainment and Convention Center, 350 Harbor Drive, Duluth, Minnesota 55802 on March 16, 2017, from 5 p.m. to 7:30 p.m. CT. The USFS will publish a notice of the time and place in a local newspaper at least 30 days before the scheduled date of the meeting. During this 90-day comment period, the BLM and USFS will hold additional meetings in other areas of the State, notices of which will be provided in local newspapers or on agency Web sites.

For a period until January 21, 2017, subject to valid existing rights, the National Forest System lands described in this notice will be temporarily segregated from the United States mineral and geothermal leasing laws, unless the application is denied or canceled or the withdrawal is approved prior to that date. All other activities currently consistent with the Superior National Forest Land and Resource Management Plan could continue, including public recreation, mineral

materials disposition and other activities compatible with preservation of the character of the area, subject to USFS discretionary approval, during the segregation period.

The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

Karen E. Mouritsen,

State Director, Eastern States Office.

BILLING CODE 3411-15-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLNM004000 L91450000.EJ000
16X.LVDIG16ZGK00]

Notice of Application for a Recordable Disclaimer of Interest: Dimmit County, Texas

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) received an application for a Recordable Disclaimer of Interest (Disclaimer of Interest) from Gringita, Ltd. pursuant to the Federal Land Policy and Management Act of 1976 (FLPMA), as amended, and the regulations in 43 CFR subpart 1864, for certain mineral estate in Dimmit County, Texas. This notice is intended to inform the public of the pending application, give notice of BLM's intention to grant the requested Disclaimer of Interest, and provide a public comment period for the proposed Disclaimer of Interest.

DATES: Comments on this action should be received by April 19, 2017.

ADDRESSES: Written comments must be sent to the Deputy State Director, Lands and Resources, BLM, New Mexico State Office, P.O. Box 27115, Santa Fe, NM 87502-0115.

FOR FURTHER INFORMATION CONTACT: John Ledbetter, Realty Specialist, BLM Oklahoma Field Office, (405) 579-7172. Additional information pertaining to this application can be reviewed in case file TXNM114510 located in the Oklahoma Field Office, 201 Stephenson Parkway, Room 1200, Norman, Oklahoma 73072-2037. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact the above individual during normal business hours. The Service is available 24 hours a day, 7 days a week, to leave a message or question with the

above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The purpose of this Disclaimer is to remove a cloud on the title of a mineral interest in Dimmit County, Texas.

In 1938, the Banking Commissioner of Texas, as receiver for the Commonwealth Bank and Trust Company (in liquidation), reported to have conveyed a one-half, non-participating royalty interest in the property described below to the Reconstruction Finance Corporation (RFC), an independent agency of the United States Government. However, the real property records of Dimmit County, and the records of the United States, do not indicate that the Commonwealth Bank and Trust Company ever obtained this one-half, non-participating royalty interest in the property prior to the 1938 Banking Commissioner's action. The BLM therefore believes that the United States does not own this interest in the property described below. However, the conveyance from the Banking Commissioner of Texas to the RFC creates a cloud on the title. Therefore, pursuant to Section 315 of FLPMA, the BLM proposes to disclaim any claim by the United States to this one-half, non-participating royalty interest in the property described below.

The lands are described as:

Dimmit County, Texas

Parcel One

393.5 acres, being 50.94 acres, H.R. Trammel Survey No. 487½, Abstract No. 1508 and 342.56 acres, James P. Trezevant Survey No. 487, Abstract No. 708.

Parcel Two

621.26 acres, M. Devereaux Survey No. 488, Abstract No. 52.

The area described contains 1,014.76 acres, more or less.

This proposed Disclaimer of Interest does not address any surface interest that may still be vested with the United States of America.

The public is hereby notified that comments may be submitted to the Deputy State Director, Lands and Resources at the address shown above within the comment period identified in the notice. Any adverse comments will be evaluated by the State Director who may modify or vacate this action and issue a final determination.

In the absence of any valid objection, this notice will become the final determination of the Department of the Interior and a Disclaimer of Interest may be issued 90 days from publication of this notice.

All persons who wish to present comments, suggestions, or objections in connection with the proposed Disclaimer of Interest may do so by writing to the Deputy State Director at the above address. Comments, including names and street addresses of commenters, will be available for public review at the BLM New Mexico State Office (see address above), during regular business hours, Monday through Friday, except Federal holidays. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 1864.2(a).

Melanie Barnes,

Acting Deputy State Director, Lands and Resources.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–NERO–22407;
PPNEHART00.PPMPSPD1Y.YM0000]

Harriet Tubman National Historical Park

AGENCY: National Park Service, Interior.

ACTION: Notice of establishment.

SUMMARY: As authorized by the National Defense Authorization Act for Fiscal Year 2015, the National Park Service announces that the Secretary of the Interior (Secretary) has established, in the State of New York, Harriet Tubman National Historical Park as a unit of the National Park System.

FOR FURTHER INFORMATION CONTACT: Rose Fennell, Deputy Regional Director, National Park Service, Northeast Regional Office at (617) 223–5137.

SUPPLEMENTARY INFORMATION: Section 3036 of the National Defense Authorization Act for Fiscal Year 2015, Public Law 113–291 includes a specific provision relating to establishment of this unit of the National Park System. To establish the national historical park, the Secretary must determine that a sufficient quantity of land, or interests in land, has been acquired to constitute a manageable park unit and must publish notice of the establishment of

the historical park in the **Federal Register** no later than 30 days after the Secretary makes a determination.

The National Park Service acquired by Bargain and Sale Deed the fee simple interests in the 0.5 acres at 47–49 Parker Street in Auburn, New York, on December 30, 2016. This property contains the historic Thompson Memorial AME Zion Church and the adjacent, two-story rectory.

On January 10, 2017, the Secretary of the Interior signed a Decision Memorandum determining that a sufficient quantity of land, or interests in land, had been acquired to constitute a manageable park unit. With the signing of this Decision Memorandum by the Secretary, the site to be known as the “Harriet Tubman National Historical Park” was established as a unit of the National Park System, effective January 10, 2017, and is subject to all laws, regulations, and policies pertaining to such units.

Dated: January 10, 2017.

Michael T. Reynolds,

Acting Director.

Notice of the 2017 Meeting Schedule for Gettysburg National Military Park Advisory Commission

AGENCY: National Park Service, Interior.

ACTION: Meeting notice.

SUMMARY: The National Park Service is hereby giving notice of the 2017 meeting schedule for the Gettysburg National Military Park Advisory Commission.

DATES: The Gettysburg National Military Park Advisory Commission will host two meetings, one on Thursday, April 13, 2017, and one on Thursday, September 14, 2017. Both scheduled meetings will begin at 7:00 p.m. and end at 9:00 p.m. (Eastern). Efforts have been made locally to ensure that the interested public is aware of the meeting dates.

ADDRESSES: Both meetings will be held at the Gettysburg National Military Park Museum and Visitor Center in the Ford Education Center, 1195 Baltimore Pike, Suite 100, Gettysburg, Pennsylvania 17325.

FOR FURTHER INFORMATION CONTACT: Ed Clark, Superintendent and Designated Federal Official, Gettysburg National

Military Park, 1195 Baltimore Pike, Suite 100, Gettysburg, Pennsylvania 17325, at (717) 334-1124 or via email ed_w_clark@nps.gov.

SUPPLEMENTARY INFORMATION: The Gettysburg National Military Park Advisory Commission was established by Public Law 101-377. The scheduled meetings will be open to the public. Each scheduled meeting will include presentations on the Gettysburg National Military Park Operational Update, and subcommittee reports. The April 13, 2017, meeting will also include the nomination of new officers. Any member of the public may file with the Commission a written statement with issues or concerns. The statement should be addressed to Gettysburg National Military Park Advisory Commission, 1195 Baltimore Pike, Gettysburg, Pennsylvania 17325 or email Supt_Gettysburg@nps.gov.

Before including your address, telephone number, email address, or other personal identifying information in your comments—you should be aware that your entire comment—including your personal identifying information may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public view, we cannot guarantee that we will be able to do so.

Alma Rippis,
Chief, Office of Policy.

Notice of an Open Public Meeting for the Lake Clark National Park Subsistence Resource Commission

AGENCY: National Park Service, Interior.
ACTION: Meeting notice.

SUMMARY: The National Park Service (NPS) is hereby giving notice that the Lake Clark National Park Subsistence Resource Commission (SRC) will hold a public meeting to develop and continue work on NPS subsistence program recommendations, and other related regulatory proposals and resource management issues.

DATES: The Lake Clark National Park SRC will meet from 1:00 p.m. to 4:00 p.m. or until business is completed on Wednesday, February 15, 2017, at the Pedro Bay Community Building, 2516

Mountain Circle, Pedro Bay, AK 99647. There will be a community luncheon prior to the meeting at 12:00 p.m. Teleconference participants must call the National Park Service office at (907) 644-3648, prior to the meeting to receive teleconference passcode information. For more detailed information regarding this meeting, or if you are interested in applying for SRC membership, contact Megan Richotte, Designated Federal Official and Acting Superintendent, at (907) 644-3639, or via email at megan_richotte@nps.gov, or Liza Rupp, Subsistence Manager, at (907) 644-3648, or via email at elizabeth_rupp@nps.gov or Clarence Summers, Subsistence Manager, at (907) 644-3603 or via email at clarence_summers@nps.gov.

ADDRESSES: The SRC will meet in the Pedro Bay Community Building, 2516 Mountain Circle, Pedro Bay, AK 99647.

SUPPLEMENTARY INFORMATION: The NPS is holding the meeting pursuant to the Federal Advisory Committee Act (5 U.S.C. Appendix 1-16). The NPS SRC program is authorized until Section 808 of the Alaska National Interest Lands Conservation Act, (16 U.S.C. 3118), title VII. SRC meetings are open to the public and will have time allocated for public testimony. The public is welcome to present written or oral comments to the SRC. SRC meetings will be recorded and meeting minutes will be available upon request from the Superintendent for public inspection approximately six weeks after the meeting. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Proposed Meeting Agenda: The agenda may change to accommodate SRC business. The proposed meeting agenda for each meeting includes the following:

1. Call to Order—Confirm Quorum
2. Welcome and Introduction
3. Review and Adoption of Agenda
4. Approval of Minutes
5. Superintendent's Welcome and Review of the SRC Purpose
6. SRC Membership Status
7. SRC Chair and Members' Reports
8. Superintendent's Report
9. Old Business
10. New Business
11. Federal Subsistence Board Update

12. Alaska Boards of Fish and Game Update
13. National Park Service Reports
 - a. Ranger Update
 - b. Resource Manager's Report
 - c. Subsistence Manager's Report
14. Public and Other Agency Comments
15. Work Session
16. Set Tentative Date and Location for Next SRC Meeting
17. Adjourn Meeting

The SRC meeting location and date may change based on inclement weather or exceptional circumstances. If the meeting date and location are changed, the Superintendent will issue a press release and use local newspapers and radio stations to announce the rescheduled meeting.

Alma Rippis,
Chief, Office of Policy.

Notice of March 13, 2017, Meeting for Cape Cod National Seashore Advisory Commission

AGENCY: National Park Service, Interior.
ACTION: Meeting notice.

SUMMARY: The National Park Service is hereby giving notice of the 306th meeting of the Cape Cod National Seashore Advisory Commission.

DATES: The public meeting of the Cape Cod National Seashore Advisory Commission will be held on Monday, March 13, 2017, at 1:00 p.m. (EASTERN).

ADDRESSES: The Commission members will meet in the conference room at park headquarters, 99 Marconi Site Road, Wellfleet, Massachusetts 02667.

FOR FURTHER INFORMATION CONTACT: Further information concerning the meeting may be obtained from George E. Price, Jr., Superintendent, Cape Cod National Seashore, 99 Marconi Site, Wellfleet, Massachusetts 02667, at (508) 771-2144 or via email at george_price@nps.gov.

SUPPLEMENTARY INFORMATION: The 306th meeting of the Cape Cod National Seashore Advisory Commission will take place on Monday, March 13, 2017, at 1:00 p.m., in the conference room at Headquarters, 99 Marconi Station Road, in Wellfleet, Massachusetts to discuss the following:

1. Adoption of Agenda
2. Approval of Minutes of Previous Meeting
(December 12, 2016)
3. Reports of Officers
4. Reports of Subcommittees
 - Update of Pilgrim Nuclear Plant Emergency Planning Subcommittee Nickerson Fellowship
5. Superintendent's Report
 - Storm Damage/Erosion Update
 - Shorebird Management Plan/Environmental Assessment—Update
 - Kite surfing Update
 - Seashore Projects
 - Nauset Spit Update
 - Improved Properties/Town Bylaws
 - Herring River Wetland Restoration
 - Highlands Center Update
 - Ocean Stewardship Topics—Shoreline Change
 - Climate Friendly Parks
 - National Park Service Centennial
6. Old Business
 - Update on Horton's Campground
 - Private Commercial Properties Related to their Certificates of Suspension from Condemnation
 - Live Lightly Campaign progress report
7. New Business
8. Date and Agenda for Next Meeting
9. Public Comment
10. Adjournment

The Commission was reestablished pursuant to Public Law 87–126, as amended by Public Law 105–280. The purpose of the Commission is to consult with the Secretary of the Interior, or her designee, with respect to matters relating to the development of Cape Cod National Seashore, and with respect to carrying out the provisions of sections 4 and 5 of the Act establishing the Seashore.

The meeting is open to the public. It is expected that 15 persons will be able to attend the meeting in addition to Commission members. Interested persons may make oral/written presentations to the Commission during the business meeting or file written statements. Such requests should be made to the park superintendent prior to the meeting. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we

cannot guarantee that we will be able to do so.

Notice of the 2017 Meeting Schedule for Cedar Creek and Belle Grove National Historical Park Advisory Commission

AGENCY: National Park Service, Interior.

ACTION: Meeting notice.

SUMMARY: The National Park Service (NPS) is hereby giving notice of the 2017 meeting schedule of the Cedar Creek and Belle Grove National Historical Park Advisory Commission.

DATES: March 16, 2017.

ADDRESSES: Strasburg Town Hall, 174 East King Street, Strasburg, VA 22657.

DATES: June 15, 2017.

ADDRESSES: Warren County Government Center, 220 North Commerce Avenue, Front Royal, VA 22630.

DATES: September 21, 2017.

ADDRESSES: Middletown Town Hall Council Chambers, 7875 Church Street, Middletown, VA 22645.

DATES: December 21, 2017.

ADDRESSES: Strasburg Town Hall Council Chambers, 174 East King Street, Strasburg, VA 22657.

FOR FURTHER INFORMATION CONTACT:

Further information concerning the meetings may be obtained from Karen Beck-Herzog, Site Manager, Cedar Creek and Belle Grove National Historical Park, P.O. Box 700, Middletown, Virginia 22645, telephone (540) 868–9176, or visit the park Web site: <http://www.nps.gov/cebe/parkngmt/park-advisory-commission.htm>.

SUPPLEMENTARY INFORMATION: The NPS is holding the meetings pursuant to the Federal Advisory Committee Act (5 U.S.C. Appendix 1–16). The Commission was designated by Congress to provide advice to the Secretary of the Interior on the preparation and implementation of the park's general management plan and to advise on land protection (16 U.S.C. 410iii–7). Individuals who are interested in the park, the implementation of the plan, or the business of the Commission are

encouraged to attend the meetings. Interested members of the public may present, either orally or through written comments, information for the Commission to consider during the public meeting. Attendees and those wishing to provide comment are strongly encouraged to preregister through the contact information provided. Scheduling of public comments during the Commission meeting will be determined by the chairperson of the Commission.

Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public view, we cannot guarantee that we will be able to do so.

Agenda: All meetings are open to the public and begin at 9:00 a.m. (EASTERN). Topics to be discussed include: Visitor services and interpretation—including directional and interpretive signage and visitor facilities, land protection planning, historic preservation, and natural resource protection.

Commission meetings will consist of the following:

1. General Introductions
2. Review and Approval of Commission Meeting Notes
3. Reports and Discussions
4. Old Business
5. New Business
6. Closing Remarks

BILLING CODE 4310–MR–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–890 (Remand)]

Certain Sleep-Disordered Breathing Treatment Systems and Components Thereof; Commission Determination to Review In-Part a Final Initial Determination on Remand, and on Remand To Affirm With Modification; Vacatur of Suspended Remedial Orders; and Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review in-part the presiding Administrative Law Judge’s (“ALJ”) final initial determination on remand (“RID”) for the limited purpose of modifying pages 20–21 and 24 of the RID. The Commission has also determined to vacate the issued remedial orders, which are currently suspended.

FOR FURTHER INFORMATION CONTACT: Panyin A. Hughes, Office of the General

Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–3042. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (<https://www.usitc.gov>). The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on August 23, 2013, based on a complaint filed by ResMed Corporation of San Diego, California; ResMed Incorporated of San Diego, California; and ResMed Limited of New South Wales, Australia (collectively, “ResMed”). 78 FR 52564 (Aug. 23, 2013). The complaint alleged violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain sleep-disordered breathing treatment systems and components thereof that infringe one or more of claims 32–37, 53, 79, 80, and 88 of U.S. Patent No. 7,997,267 (“the ‘267 patent’”); claims 1–7 of U.S. Patent No. 7,614,398 (“the ‘398 patent’”); claim 1 of U.S. Patent No. 7,938,116 (“the ‘116 patent’”); claims 30, 37, and 38 of U.S. Patent No. 7,341,060 (the ‘060 patent’); claims 1, 3, 5, 11, 28, 30, 31, and 56 of U.S. Patent No. 8,312,883 (“the ‘883 patent’”); claims 1, 3, 6, 7, 9, 29, 32, 35, 40, 42, 45, 50, 51, 56, 59, 89, 92, 94, and 96 of U.S. Patent No. 7,178,527 (the ‘527 patent’); claims 19–24, 26, 29–36, and 39–41 of U.S. Patent No. 7,950,392 (the ‘392 patent’); and claims 13, 15, 16, 26–28, 51, 52, and 55 of U.S. Patent No. 7,926,487 (“the ‘487 patent’”). The following patents are collectively referred to as the mask patents: the ‘527 patent; the ‘392 patent; the ‘267 patent; the ‘060 patent; and the ‘883 patent. The notice of investigation named the following respondents: BMC Medical Co., Ltd. of Beijing, China; 3B Medical, Inc. of Lake Wales, Florida; and 3B Products, L.L.C., of Lake Wales, Florida (collectively “BMC”). The Office of

Unfair Import Investigations (“OUI”) participated in the investigation.

On January 9, 2014, the ALJ issued an initial determination (“ID”) granting a motion by ResMed to amend the complaint and notice of investigation to substitute U.S. Patent No. RE 44,453 (“the ‘453 patent’”) for the ‘398 patent and to terminate the investigation as to the ‘398 patent. *See* Order No. 7 (Jan. 9, 2014). The Commission determined not to review the ID. *See* Commission Notice of Non-Review (Feb. 10, 2014); 79 FR 9000–01 (Feb. 14, 2014).

On February 24, 2014, the ALJ issued an ID granting a motion by ResMed to withdraw its allegations with respect to the ‘116 patent. *See* Order No. 11 (Feb. 24, 2014). The Commission determined not to review the ID. *See* Commission Notice of Non-Review (March 11, 2014). On March 18, 2014, the ALJ granted a motion by ResMed to terminate the investigation as to claims 26–28 of the ‘487 Patent. *See* Order No. 20 (Mar 18, 2012). The Commission determined not to review the ID. *See* Commission Notice of Non-Review (Apr. 29, 2014).

On August 21, 2014, the ALJ issued a final ID, finding a violation of section 337 by BMC with respect to certain asserted claims of the ‘392, ‘267, ‘060, ‘883, ‘527, and ‘453 patents. The ALJ found no violation of section 337 with respect to the asserted claims of the ‘487 patent.

On September 3, 2014, the parties filed petitions for review of the ID. On September 11, 2014, the parties filed responses to the petitions for review.

On October 16, 2014, the Commission determined to review the final ID in part. 79 FR 63163–65 (Oct. 22, 2014). On review, the Commission determined to affirm the ALJ’s finding of violation of section 337. The Commission, however, found the ‘453 patent invalid for anticipation. Having found a violation of section 337, the Commission determined that the appropriate form of relief was (1) a limited exclusion order prohibiting the unlicensed entry of sleep-disordered breathing treatment systems and components thereof that infringe one or more of claims 1, 9, 32, 89, and 92 of the ‘527 patent; claims 19, 21, 29, 32, and 36 of the ‘392 patent; claims 32, 33, 34, and 53 of the ‘267 patent; claims 30, 37, and 38 of the ‘060 patent; and claims 1, 3, 5, 11, 28, 30, 31, and 56 of the ‘883 patent that are manufactured by, or on behalf of, or are imported by or on behalf of BMC Medical Co., Ltd., 3B Medical, Inc., or 3B Products L.L.C. or any of their affiliated companies, parents, subsidiaries, agents, or other related business entities, or their successors or assigns, except for service

and replacement parts for customers that purchased their covered products prior to the date the exclusion order becomes final; and (2) cease and desist orders prohibiting domestic respondents BMC Medical Co., Ltd., 3B Medical, Inc. from conducting any of the following activities in the United States: Importing, selling, marketing, advertising, distributing, transferring (except for exportation), and soliciting U.S. agents or distributors for, sleep-disordered breathing treatment systems and components thereof covered by claims 1, 9, 32, 89, and 92 of the '527 patent; claims 19, 21, 29, 32, and 36 of the '392 patent; claims 32, 33, 34, and 53 of the '267 patent; claims 30, 37, and 38 of the '060 patent; and claims 1, 3, 5, 11, 28, 30, 31, and 56 of the '883 patent.

On February 18, 2015, ResMed filed a notice of appeal in the U.S. Court of Appeals for the Federal Circuit, seeking review of the Commission's determination as to the '453 patent (Appeal No. 2015-1360). On April 14, 2015, BMC filed a notice of appeal in the Federal Circuit, seeking review of the Commission's domestic industry determination as well as the Commission's finding that prior art does not render the asserted claims of the '267 patent invalid for obviousness (Appeal No. 2015-1576). The Court consolidated the two appeals on April 23, 2015.

On March 16, 2016, the parties jointly moved to dismiss ResMed's appeal as to the '453 patent. On March 17, 2016, the Commission moved to remand BMC's appeal in light of intervening domestic industry precedent in *Lelo Inc. v. International Trade Commission*, 789 F.3d 879 (Fed. Cir. 2015). On March 29, 2016, the Court granted the motion to dismiss ResMed's appeal. On April 22, 2016, the Court granted the Commission's remand motion.

On May 12, 2016, the Commission issued a notice suspending the remedial orders in place during the pendency of the remand proceedings. 81 FR 31254-55 (May 18, 2016). The Commission also issued an order asking the parties to comment on further proceedings. On June 8, 2016, the parties submitted initial comments. The parties filed responses on July 15, 2016. On August 16, 2016, the Commission issued an order remanding the investigation to the ALJ to: (1) Apply the Federal Circuit's intervening domestic industry precedent in *Lelo* to the existing record (as to the mask patents, the only patents remaining); and (2) issue an RID on remand as to violation.

On November 10, 2016, the ALJ issued the RID finding that ResMed

failed to establish the existence of a domestic industry that practices the mask patents. RID at 1. No petitions for review were received.

Having examined the record of this investigation, the Commission has determined to review in-part the RID for the limited purpose of modifying pages 20-21 and 24 of the RID. The Commission does not adopt the RID's statements that "the amount a complainant spends to purchase components manufactured in the United States is immaterial to the economic prong analysis" (RID at 20-21) or that evidence of payments to domestic suppliers is "*per se* insufficient to include in the quantitative analysis." RID at 24. The Commission has determined to otherwise not review the RID. The Commission has determined to vacate the suspended remedial orders. The investigation is terminated.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: January 12, 2017.

Lisa R. Barton,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA-392]

Bulk Manufacturer of Controlled Substances Application: Noramco, Inc.

ACTION: Notice of application.

DATES: Registered bulk manufacturers of the affected basic classes, and applicants therefore, may file written comments on or objections to the issuance of the proposed registration in accordance with 21 CFR 1301.33(a) on or before March 20, 2017.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/DRW, 8701 Morrisette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: The Attorney General has delegated her authority under the Controlled Substances Act to the Administrator of the Drug Enforcement Administration (DEA), 28 CFR 0.100(b). Authority to

exercise all necessary functions with respect to the promulgation and implementation of 21 CFR part 1301, incident to the registration of manufacturers, distributors, dispensers, importers, and exporters of controlled substances (other than final orders in connection with suspension, denial, or revocation of registration) has been redelegated to the Assistant Administrator of the DEA Diversion Control Division ("Assistant Administrator") pursuant to section 7 of 28 CFR part 0, appendix to subpart R.

In accordance with 21 CFR 1301.33(a), this is notice that on July 12, 2016, Noramco, Inc., 500 Swedes Landing Road, Wilmington, Delaware 19801-4417 applied to be registered as a bulk manufacturer of the following basic classes of controlled substances:

Controlled substance	Drug code	Schedule
Marihuana	7360	I
Codeine-N-oxide	9053	I
Dihydromorphine	9145	I
Hydromorphanol	9301	I
Morphine-N-oxide	9307	I
Amphetamine	1100	II
Methylphenidate	1724	II
Phenylacetone	8501	II
Codeine	9050	II
Dihydrocodeine	9120	II
Oxycodone	9143	II
Hydromorphone	9150	II
Hydrocodone	9193	II
Morphine	9300	II
Oripavine	9330	II
Thebaine	9333	II
Opium extracts	9610	II
Opium fluid extract ...	9620	II
Opium tincture	9630	II
Opium, powdered	9639	II
Opium, granulated	9640	II
Oxymorphone	9652	II
Noroxymorphone	9668	II
Tapentadol	9780	II

The company plans to manufacture the above-listed controlled substances in bulk for distribution to its customers. In reference to drug code 7360, the company plans to manufacture a synthetic version of cannabidiol in bulk for sale to its customers, who are final dosage form manufacturers. No other activity for this drug code is authorized for this registration.

Dated: January 11, 2017.

Louis J. Milione,

Assistant Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Notice of Lodging Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States, et al. v. Greer Industries, Inc., et al.*, Case No. 1:17-cv-00004-IMK, was lodged with the United States District Court for the Northern District of West Virginia on January 9, 2017.

This proposed Consent Decree concerns a complaint filed by the United States and the State of West Virginia against Greer Industries, Inc., Deckers Creek Limestone Company, and Pikewood, Inc., pursuant to 33 U.S.C. Sections 1319(b) and (d) of the Clean Water Act and W. Va. Code Section 22-11-22, to obtain injunctive relief from and impose civil penalties against the Defendants for violating the Clean Water Act by discharging pollutants without a permit into waters of the United States and waters of the State of West Virginia. The proposed Consent Decree resolves these allegations by requiring the Defendants to restore the impacted areas and/or perform mitigation and to pay a civil penalty.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this Notice. Please address comments to Austin Saylor, Trial Attorney, United States Department of Justice, Environment and Natural Resources Division, Environmental Defense Section, Post Office Box 7611, Washington, DC 20044, and refer to *United States, et al. v. Greer Industries, Inc., et al.*, DJ # 90-5-1-19059.

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the Northern District of West Virginia, 1125 Chapline Street, Suite 1000, Wheeling, West Virginia 26003. In addition, the proposed Consent Decree may be examined electronically at <http://www.justice.gov/enrd/consent-decrees>.

Cherie L. Rogers,

Assistant Section Chief, Environmental Defense Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-91,755]

Kraft Heinz Foods Company, a Subsidiary of the Kraft Heinz Company, Including On-Site Leased Workers From Kelly Services, U.S. Securities, West Side Hammer Electric, and Goodwill Keystone Area, Allentown, Pennsylvania; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended ("Act"), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on May 23, 2016, applicable to workers of Kraft Heinz Foods Company, a subsidiary of The Kraft Heinz Company, including on-site leased workers from Kelly Services, Allentown, Pennsylvania (TA-W-91,755). The Department's notice of determination was published in the **Federal Register** on June 28, 2016 (81 FR 41999).

At the request of the Pennsylvania Department's Workforce Partnership & Operations, the Department reviewed the certification for workers of the subject firm. The workers firm is engaged in activities related to the production of Tassimo Coffee Pods, K-cups, and condiments.

The company reports that workers leased from U.S. Securities, West Side Hammer Electric, and Goodwill Keystone Area were employed on-site at the Allentown, Pennsylvania location of Kraft Heinz Company. The Department has determined that these workers were sufficiently under the operational control of the subject firm to be considered leased workers.

The intent of the Department's certification is to include all workers of the subject firm who were adversely affected by a shift in production of Tassimo Coffee Pods, K-cups, and condiments to a foreign country.

Based on these findings, the Department is amending this certification to include workers leased from U.S. Securities, West Side Hammer Electric, and Goodwill Keystone Area working on-site at the Allentown, Pennsylvania location of the subject firm.

The amended notice applicable to TA-W-91,755 is hereby issued as follows:

All workers from Kraft Heinz Foods Company, a subsidiary of The Kraft Heinz

Company, including on-site leased workers from Kelly Services, U.S. Securities, West Side Hammer Electric, and Goodwill Keystone Area, Allentown, Pennsylvania who became totally or partially separated from employment on or after April 28, 2015 through May 23, 2018 and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 12th day of December, 2016.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-92,084]

Northern Industrial Erectors, Inc., Grand Rapids, Minnesota; Notice of Affirmative Determination Regarding Application for Reconsideration

By application dated October 3, 2016, State Workforce Official requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for worker adjustment assistance applicable to workers and former workers of Northern Industrial Erectors, Inc., Grand Rapids, Minnesota. The determination was issued on September 9, 2016.

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The initial investigation resulted in a negative determination based on the findings that there was no increase in imports by the workers' firm or its customers, nor was there a foreign shift or acquisition by the workers' or its customers. In addition, neither the workers' firm nor its customers reported imports of steel erection services like or directly competitive with steel erection services provided by the workers' firm. Furthermore, the workers' firm was not

a Downstream Producer or a Supplier to a firm in which the workers' firm's services supplied was related to the article the basis of the certification.

The request for reconsideration asserts that the workers' firm should be considered a Downstream Producer.

The Department of Labor has carefully reviewed the request for reconsideration and the existing record, and has determined that the Department will conduct further investigation to determine if the workers meet the eligibility requirements of the Trade Act of 1974.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the U.S. Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 1st day of November 2016.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-91,121; TA-W-91,121A; TA-W-91,121B; TA-W-91,121C]

REC Silicon LLC, a Wholly Owned Subsidiary of Renewable Energy Corporation ASA, Including Workers Whose Wages Were Reported Under REC Solar Grade Silicon LLC, Including On-Site Leased Workers From Express Employment Professionals, Moses Lake, Washington; REC Silicon ASA, a Wholly Owned Subsidiary of REC Solar Grade Silicon LLC, Including Workers Whose Wages Were Reported Under REC Advanced Silicon Materials, Silver Bow, Montana; Nemo IT Solutions, Working On-Site at REC Silicon LLC, a Wholly Owned Subsidiary of Renewable Energy Corporation ASA, Moses Lake, Washington; Spherion Staffing LLC, Working On-Site at REC Silicon ASA, a Wholly Owned Subsidiary of REC Solar Grade Silicon LLC, Silver Bow, Montana; Notice of Revised Determination on Reconsideration

On May 16, 2016, the Department of Labor issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of REC Silicon LLC, a

wholly owned subsidiary of Renewable Energy Corporation ASA, Moses Lake, Washington (TA-W-91,121), and REC Silicon ASA, a wholly owned subsidiary of REC Solar Grade Silicon LLC, Silver Bow, Montana (TA-W-91,121A) (herein referred to as "REC Silicon"). The firm is engaged in activities related to the production of Silane Gas and Polysilicon. The worker group was previously certified eligible to apply for Trade Adjustment Assistance under petition number TA-W-82,458 and TA-W-82,458A which expired on March 22, 2015. The subject worker group includes on-site leased workers from Express Employment Professionals (TA-W-91,121), Nemo IT Solutions (TA-W-91,121B), and Spherion Staffing, LLC (TA-W-91,121C). Nemo IT Solutions and Spherion Staffing, LLC were not included in the certification for TA-W-82,458. The subject worker group also includes workers whose wages were reported under REC Solar Grade Silicon (TA-W-91,121) and REC Advanced Silicon Materials (TA-W-91,121A).

To support the request for reconsideration, the petitioner supplied additional information regarding the firms' previous certification to supplement that which was gathered during the initial investigation.

Based on the new information supplied by the firm and provided by the petitioner during the reconsideration investigation, the Department of Labor determines that a shift in production of silane gas and polysilicon has contributed importantly to the worker separations at the subject firm.

Conclusion

After careful review of the additional facts obtained on reconsideration, I determine that workers of REC Silicon LLC, a wholly owned subsidiary of Renewable Energy Corporation ASA, including workers whose wages were reported under REC Solar Grade Silicon LLC, including on-site leased workers from Express Employment Professionals, Moses Lake, Washington (TA-W-91,121), REC Silicon ASA, a wholly owned subsidiary of REC Solar Grade Silicon LLC, including workers whose wages were reported under REC Advanced Silicon Materials, Silver Bow, Montana (TA-W-91,121A), NEMO IT Solutions, working on-site at REC Silicon LLC, a wholly owned subsidiary of Renewable Energy Corporation ASA, Moses Lake, Washington (TA-W-91,121B), and Spherion Staffing LLC, working on-site at REC Silicon ASA, a wholly owned subsidiary of REC Solar Grade Silicon LLC, Silver Bow, Montana

(TA-W-91,121C) who were engaged in employment related to production of saline gas and polysilicon, meet the worker group certification criteria under Section 222(a) of the Act, 19 U.S.C. 2272(a). In accordance with Section 223 of the Act, 19 U.S.C. 2273, I make the following certification:

All workers of REC Silicon LLC, a wholly owned subsidiary of Renewable Energy Corporation ASA, including workers whose wages were reported under REC Solar Grade Silicon LLC, including on-site leased workers from Express Employment Professionals, Moses Lake, Washington (TA-W-91,121), REC Silicon ASA, a wholly owned subsidiary of REC Solar Grade Silicon LLC, including workers whose wages were reported under REC Advanced Silicon Materials, Silver Bow, Montana (TA-W-91,121A), who became totally or partially separated from employment on or after March 23, 2015, through two years from the date of this certification, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended; AND,

All workers of NEMO IT Solutions, working on-site at REC Silicon LLC, a wholly owned subsidiary of Renewable Energy Corporation ASA, Moses Lake, Washington (TA-W-91,121B) and Spherion Staffing LLC, working on-site at REC Silicon ASA, a wholly owned subsidiary of REC Solar Grade Silicon LLC, Silver Bow, Montana (TA-W-91,121C) who became totally or partially separated from employment on or after November 4, 2014, through two years from the date of this certification, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 18th day of October 2016.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR**Employment and Training
Administration**

[TA-W-86,089; TA-W-86,089A]

Huntington Alloys Corporation, Special Metals Division, a Subsidiary of Special Metals Corporation, Including On-Site Leased Workers From Kelly Services, Huntington, West Virginia; Huntington Alloys Corporation, Special Metals Division, a Subsidiary of Special Metals Corporation, Burnaugh, Kentucky; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended ("Act"), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 19, 2016, applicable to workers of Huntington Alloys Corporation, Special Metals Division, a subsidiary of Special Metals Corporation, including on-site leased workers from Kelly Services, Huntington, West Virginia (TA-W-86,089). The Department's notice of determination was published in the **Federal Register** on February 25, 2016 (81 FR 9510).

At the request of a state workforce office, the Department reviewed the certification for workers of the subject firm. The workers are engaged in activities related to the production of nickel based alloys in a variety of forms including but not limited to ingot, billet, bar, wire rod, tube, plate, and sheet products.

The company reports that workers from Huntington Alloys Corporation, Special Metals Division, a subsidiary of Special Metals Corporation, Burnaugh, Kentucky are engaged in activities related to the production of nickel based alloys in a variety of forms including but not limited to ingot, billet, bar, wire rod, tube, plate, and sheet products.

The intent of the Department's certification is to include all workers of the subject firm who were adversely affected by increased imports of nickel based alloys in a variety of forms including but not limited to ingot, billet, bar, wire rod, tube, plate, and sheet products.

Based on these findings, the Department is amending this certification to include workers from Huntington Alloys Corporation, Special Metals Division, a subsidiary of Special Metals Corporation, Burnaugh, Kentucky.

The amended notice applicable to TA-W-86,089 and TA-W-86,089A is hereby issued as follows:

All workers of Huntington Alloys Corporation, Special Metals Division, a subsidiary of Special Metals Corporation, including on-site leased workers from Kelly Services, Huntington, West Virginia (TA-W-86,089) and Huntington Alloys Corporation, Special Metals Division, a subsidiary of Special Metals Corporation, Burnaugh, Kentucky (TA-W-86,089A) who became totally or partially separated from employment on or after June 10, 2014, through January 19, 2018, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 15th day of December, 2016.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR**Employment and Training
Administration****Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers by (TA-W) number issued during the period of *December 19, 2016 through December 30, 2016*.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Under Section 222(a)(2)(A), the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) the sales or production, or both, of such firm have decreased absolutely; and

(3) One of the following must be satisfied:

(A) Imports of articles or services like or directly competitive with articles produced or services supplied by such firm have increased;

(B) imports of articles like or directly competitive with articles into which one or more component parts produced by such firm are directly incorporated, have increased;

(C) imports of articles directly incorporating one or more component parts produced outside the United States that are like or directly competitive with imports of articles incorporating one or more component parts produced by such firm have increased;

(D) imports of articles like or directly competitive with articles which are produced directly using services supplied by such firm, have increased; and

(4) the increase in imports contributed importantly to such workers' separation or threat of separation and to the decline in the sales or production of such firm; or

II. Section 222(a)(2)(B) all of the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) One of the following must be satisfied:

(A) There has been a shift by the workers' firm to a foreign country in the production of articles or supply of services like or directly competitive with those produced/supplied by the workers' firm;

(B) there has been an acquisition from a foreign country by the workers' firm of articles/services that are like or directly competitive with those produced/supplied by the workers' firm; and

(3) the shift/acquisition contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected secondary workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(b) of the Act must be met.

(1) A significant number or proportion of the workers in the workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) the workers' firm is a Supplier or Downstream Producer to a firm that employed a group of workers who received a certification of eligibility under Section 222(a) of the Act, and such supply or production is related to the article or service that was the basis for such certification; and

(3) either—

(A) the workers' firm is a supplier and the component parts it supplied to the firm described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) a loss of business by the workers' firm with the firm described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected workers in firms identified by the International Trade Commission and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(e) of the Act must be met.

(1) the workers' firm is publicly identified by name by the International Trade Commission as a member of a

domestic industry in an investigation resulting in—

(A) an affirmative determination of serious injury or threat thereof under section 202(b)(1);

(B) an affirmative determination of market disruption or threat thereof under section 421(b)(1); or

(C) an affirmative final determination of material injury or threat thereof under section 705(b)(1)(A) or 735(b)(1)(A) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)(A) and 1673d(b)(1)(A));

(2) the petition is filed during the 1-year period beginning on the date on which—

(A) a summary of the report submitted to the President by the International Trade Commission under section 202(f)(1) with respect to the affirmative determination described in paragraph (1)(A) is published in the **Federal Register** under section 202(f)(3); or

(B) notice of an affirmative determination described in

subparagraph (1) is published in the **Federal Register**; and

(3) the workers have become totally or partially separated from the workers' firm within—

(A) the 1-year period described in paragraph (2); or

(B) notwithstanding section 223(b)(1), the 1-year period preceding the 1-year period described in paragraph (2).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

TA-W No.	Subject firm	Location	Impact date

Negative Determinations for Worker Adjustment Assistance

In the following cases, the investigation revealed that the eligibility

criteria for worker adjustment assistance have not been met for the reasons specified.

The investigation revealed that the criterion under paragraph (a)(1), or

(b)(1) (employment decline or threat of separation) of section 222 has not been met.

TA-W No.	Subject firm	Location	Impact date
91,666	Haymarket Media, Inc., Production Department	New York, NY.	
92,250	IBEX Global	Indiana, PA.	

The investigation revealed that the criteria under paragraphs (a)(2)(A)(i)

(decline in sales or production, or both) and (a)(2)(B) (shift in production or

services to a foreign country) of section 222 have not been met.

TA-W No.	Subject firm	Location	Impact date
92,335	Titanium Wire Corporation, ATI Specialty Alloys and Components Division, Allegheny Technologies, etc.	Frackville, PA.	

The investigation revealed that the criteria under paragraphs (a)(2)(A)

(increased imports) and (a)(2)(B) (shift in production or services to a foreign

country) of section 222 have not been met.

Determinations Terminating Investigations of Petitions for Worker Adjustment Assistance

After notice of the petitions was published in the **Federal Register** and

on the Department's Web site, as required by Section 221 of the Act (19 U.S.C. 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued because the petitioner has requested that the petition be withdrawn.

TA-W No.	Subject firm	Location	Impact date
92,142	Erickson Inc., Division of Accounting, Payroll, and Expense Reporting, NW Staffing, etc.	Portland, OR.	

I hereby certify that the aforementioned determinations were issued during the period of December 19, 2016 through December 30, 2016. These determinations are available on the Department's Web site https://www.doleta.gov/tradeact/taa/taa_search_form.cfm under the searchable listing determinations or by calling the Office of Trade Adjustment Assistance toll free at 888-365-6822.

Signed at Washington, DC, this 3rd day of January 2017.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

DEPARTMENT OF EDUCATION

Office of Career, Technical, and Adult Education; Rehabilitation Services Administration; Agency Information Collection Activities; Comment Request; Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), Employment and Training Administration (ETA) and the Department of Education (ED) (jointly referred to as "the Departments") are soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, "Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting." This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.*

DATES: Consideration will be given to all written comments received by March 20, 2017.

ADDRESSES: Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting Docket ID number ETA-2017-0001 or via postal mail, commercial delivery, or hand delivery. A copy of the ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden

may be obtained free of charge from <http://www.regulations.gov> or by contacting Karen Staha by telephone at 202-693-2917 (this is not a toll-free number) or by email at Staha.Karen@dol.gov. Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at 1-877-889-5627 (TTY/TDD). Fax: 202-693-2766.

Mail and hand delivery/courier: Send written comments to Karen Staha, Office of Policy Development and Research, Room N5641, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Due to security-related concerns, there may be a significant delay in the receipt of submissions by United States Mail. You must take this into consideration when preparing to meet the deadline for submitting comments.

Comments submitted in response to this comment request will become a matter of public record and will be summarized and included in the request for Office of Management and Budget (OMB) approval of the final ICR. In addition, comments regardless of the delivery method, will be posted without change on the <http://www.regulations.gov> Web site; consequently, the Departments recommend commenters not include personal information such as a Social Security Number, personal address, telephone number, email address, or confidential business information that they do not want made public. It is the responsibility of the commenter to determine what to include in the public record.

FOR FURTHER INFORMATION: Contact Karen Staha by telephone at 202-693-2917 (this is not a toll-free number) or by email at Staha.Karen@dol.gov.

Authority: 44 U.S.C. 3506(c)(2)(A).

SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The data collections in this ICR fulfill requirements in WIOA sec.116(d)(1) for

the development of report templates for the State Performance Report for WIOA core programs, the Local Area Performance Report, and the Eligible Training Provider (ETP) Report. The Departments propose to amend the information collection by adding new information collection requirements for WIOA Statewide performance reporting. In particular, the Departments propose to add: (1) Data elements related to training program information to the ETP Performance Report, and (2) a new information collection requirement, *i.e.*, an Annual Statewide Performance Report Narrative. This additional information would be helpful in the implementation and evaluation of the workforce development covered programs, and may include descriptions of such items as promising program practices, employer metrics, sector strategies, state evaluations, and rapid response activities. Also, a few adjustments made to the WIOA Annual Statewide Performance Report and Local Area Performance Report Template specifications that will align report specifications and the resulting values with the intent and requirements outlined in WIOA, and final rule. For example, the numerator specification of the Measurable Skill Gains Indicator was revised to ensure only a single gain per reporting period could be counted for each individual.

Section 116 of WIOA (29 U.S.C. 3141) requires States and Local Areas that operate the six core programs of the public workforce development system to comply with common performance accountability requirements for those programs, which are: The Adult, Dislocated Worker, and Youth programs (authorized under WIOA title I, administered by DOL); the Employment Service program authorized under the Wagner-Peyser Act, as amended by WIOA title III (administered by DOL); the Adult Education and Family Literacy Act (AEFLA) program (authorized under WIOA title II, administered by ED); and the Vocational Rehabilitation (VR) program authorized under title I of the Rehabilitation Act of 1973, as amended by WIOA title IV (administered by ED). As such, States and Local Areas that operate core programs must submit common performance data to demonstrate that specified performance levels are achieved. States and Local Areas report the common performance data through the "Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting" ICR (OMB Control No. 1205-0526).

In addition, and in accordance with WIOA sec. 122(b)(2), training providers

that are eligible to receive funds from Adult and Dislocated Worker programs authorized under title I of WIOA (also known as “eligible training providers” or ETPs) must report data on outcomes achieved under those programs to the State(s) in which they are listed on the State ETP list. States then report the information submitted by ETPs to DOL. The information collection requirements applicable to ETPs are also contained in the “Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting” ICR.

Section 116(d)(1) of WIOA mandates that the Secretaries of Labor and Education develop a template for performance reports to be used by States, Local Boards, and ETPs for reporting on outcomes achieved by participants in the six core programs. Corresponding regulations for these data collection requirements, including which primary performance indicators apply for each core program, have been issued jointly by the Departments. See 81 FR 55792 (Aug. 19, 2016). The WIOA regulations became effective on October 18, 2016. These joint performance regulations can be found at: (1) 20 CFR part 677 (which covers the Adult and Dislocated Worker programs (20 CFR part 680), the Youth program (20 CFR part 681), and the Wagner-Peyser Act Employment Service program (20 CFR part 652)); (2) 34 CFR part 463, subpart I (which covers the AEFLA program); and (3) 34 CFR part 361, subpart E (which covers the VR program).

The data collection instruments covered in this ICR are necessary to meet the requirements of sec. 116 of WIOA. These information collection instruments were developed jointly by the Departments, and include: (1) The Joint Participant Individual Record Layout (PIRL), which provides a standardized set of data elements, definitions, and reporting instructions for use by States and local entities administering WIOA core programs; (2) the Statewide Performance Report Template, to be used for the reporting of data by State entities that administer WIOA core programs; (3) the Local Area Performance Report Template, to be used for the reporting of data by local entities that administer WIOA core programs; (4) the ETP Performance Report specifications and definitions, to be used for the reporting of data by eligible providers of training services under WIOA title I Adult and Dislocated Worker programs; and (5) the Annual Statewide Performance Report Narrative, a new information collection requirement to be used for providing information on the status and progress

of workforce development program performance.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. In order to help ensure appropriate consideration, comments should mention Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting, OMB control number 1205–0526.

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL–ETA.

Type of Review: Revision.

Title of Collection: Workforce Innovation and Opportunity Act (WIOA) Common Performance Reporting.

Forms: WIOA Statewide and Local Performance Report Template, ETA 9169; WIOA PIRL, ETA 9170; ETP Definitions, ETA 9171.

OMB Control Number: 1205–0526.

Affected Public: State, Local, and Tribal Governments; Private Sector—businesses or other for-profits and not-for-profit institutions.

Estimated Number of Respondents: 19,113,825.

Frequency: Annual for each form.

Total Estimated Annual Responses: 38,216,056.

Estimated Average Time per Response: Varies.

Estimated Total Annual Burden Hours: 9,863,065 hours.

Total Estimated Annual Other Cost Burden: \$30,957,760.

Portia Wu,

Assistant Secretary for Employment and Training, Department of Labor.

Johan Uvin,

Acting Assistant Secretary for the Office of Career, Technical, and Adult Education, Department of Education.

Sue Swenson,

Deputy Assistant Secretary for Special Education and Rehabilitative Services, delegated the authority to perform the functions and duties of the Assistant Secretary for Special Education and Rehabilitative Services.

Employment and Training Administration

Investigations Regarding Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221 (a) of the Trade Act of 1974 (“the Act”) and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, no later than January 30, 2017.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 30, 2017.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of

Labor, Room N-5428, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC, this 3rd day of January 2017.

Hope D. Kinglock,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

[Secretary's Order 1-2017]

Order of Succession to the Secretary of Labor in Periods of Vacancy, Continuity of Executive Direction, Repositioning and Devolution of Departmental Governance, and Emergency Planning Under Circumstances of Extreme Disruption

1. *Purpose.* To provide for succession to act as, or on behalf of, the Secretary of Labor in case of death or resignation of the Secretary, or if the Secretary is otherwise unable to perform the functions and duties of the office, including in case of absence or sickness; to provide lines of succession for executive continuity within the Department and its Agencies during vacancies arising in a period of national emergency or in the course of business; to provide for the repositioning and devolution of Departmental governance under circumstances of extreme disruption; and to identify the first assistant to those officers of the Department whose appointment to office is required to be made by the President, including those whose appointment is subject to the advice and consent of the Senate.

2. *Authority and Directives.*

A. This Order is issued pursuant to Executive Order 13755 (replacing Executive Order (E.O.) 13245, December 18, 2001); the Federal Vacancies Reform Act of 1998 (the FVRA) (codified generally at 5 U.S.C. 3345, et seq.); 29 U.S.C. 551 et seq.; Reorganization Plan No. 6 of 1950; Reorganization Plan No. 1 of 1958; Reorganization Plan No. 1 of 1973; Federal Civil Defense Act of 1950 as amended; Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq., as amended; 5 USC 301; 31 U.S.C. 1531 and 1533; Executive Order 12656, as amended; and Executive Order 12148, as amended.

National Security Presidential Directive 51/Homeland Security Presidential Directive 20 (NSPD-51/HSPD-20) *National Continuity Policy* (May 2007); National Continuity Policy Implementation Plan (NCPIP) (Aug 2007); Federal Continuity Directive 1 (FCD-1) *Federal Executive Branch National Continuity Program and Requirements* (October 2012); Office of Personnel Management, *Handbook on Pay and Leave Benefits for Federal Employees Affected by Severe Weather Conditions or Other Emergency Situations* (June 2008).

B. Secretary's Order 4-2008 (August 4, 2008) is hereby superseded and canceled, and all agency delegations in conflict with this Order and/or its Attachment are hereby superseded.

3. *Background.* Pursuant to the 1998 Federal Vacancies Reform Act, the most

recent order of succession of officers to act as Secretary of Labor in periods of vacancy was set forth in Secretary's Order 4-2008 (August 4, 2008), which was issued under the authority of E. O. 13245 (December 18, 2001). On December 23, 2016, E.O. 13755 revoked E.O. 13245 and provided a new order of succession to the position of Secretary of Labor.

The Department's plan for continuity of operations in the event of a need for relocation involves movement of Emergency Response Group to a Continuity Site. The Department's plan for devolution was established by Secretarial Memorandum dated December 20, 2006, wherein the Secretary selected Dallas, Texas as the National Office, Department of Labor devolution site (the "Devolution Site").

4. *Order of Governance.* In accordance with E.O. 13755 and the FVRA, in case of absence due to death, resignation, or if the official is otherwise unable to perform the functions and duties of the office, the functions and duties of the officers of the Department of Labor and their respective responsibilities for operational management will be performed in an acting capacity or on behalf thereof by the incumbents of the positions designated in the following orders:

A. Succession to the Secretary of Labor

Sequence for identifying the Acting Secretary of Labor, who shall have all of

the authorities and responsibilities of the Secretary:

- (1) Deputy Secretary of Labor;
- (2) Solicitor of Labor;
- (3) Assistant Secretary for Administration and Management [Not subject to Senate Confirmation, Pub. L. 112–166];
- (4) Assistant Secretary for Policy;
- (5) Assistant Secretary for Congressional and Intergovernmental Affairs;
- (6) Assistant Secretary for Employment and Training;
- (7) Assistant Secretary for Employee Benefits Security;
- (8) Assistant Secretary for Occupational Safety and Health;
- (9) Assistant Secretary for Mine Safety and Health;
- (10) Assistant Secretary for Public Affairs [Not subject to Senate confirmation, Pub. L. 112–166];
- (11) Chief Financial Officer
- (12) Administrator, Wage and Hour Division
- (13) Assistant Secretary for Veterans' Employment and Training;
- (14) Assistant Secretary for Disability Employment Policy;
- (15) First assistants, as defined in the FVRA, to the officials in the order listed in (2), and (4)–(9);
- (16) Regional Solicitor—Dallas; and
- (17) Regional Administrator for the Office of the Assistant Secretary for Administration and Management—Region VI/Dallas—(who, upon becoming Delegated Secretarial Designee (DSD) by order of operation of this Succession Order, the Secretary hereby authorizes and pre-approves for an immediate, noncompetitive appointment to the Senior Executive Service (SES) under a limited-term appointment using a DOL SES allocation).

Provided that, no individual who is serving in an acting capacity in any of the above positions shall serve as Acting Secretary pursuant to this Order.

B. Identifying the Delegated Secretarial Designee on Behalf of the Secretary of Labor

In the event and for such time(s) that none of the incumbents in the succession sequence set forth in Paragraph 4.A., above, are available to serve as Acting Secretary, the Delegated Secretarial Designee (DSD) shall fulfill, on an interim basis, the operational management of the Department except the Secretary's "functions and duties." The "functions and duties" of the Secretary are those non-delegable responsibilities (a) established by law (statute or regulation); and (b) required to be performed by, and only by, the

Secretary. Except as determined otherwise by the President, whoever from time to time is highest in the following sequence and is available to serve shall be the Delegated Secretarial Designee:

- (1) The following:
 - (a) Director, Office of Federal Contract Compliance Programs;
 - (b) Director of the Women's Bureau; and
 - (c) Director, Office of Labor Management Standards;
- (2) Specified DOL officials as follows:
 - (a) Regional Administrator for ETA located in Dallas;
 - (b) OSHA Regional Administrator—Dallas.

Provided that, no individual who is serving in an acting capacity in any of the above positions shall serve as the Delegated Secretarial Designee pursuant to this Order.

C. To All Other PAS Positions and Heads of Other Principal Organizational Units

(1) There are offices and agencies within the Department of Labor headed by officers whose appointment to office is required to be made by the President, by and with the advice and consent of the Senate (PAS). In the event of a vacancy in any of these PAS positions, the FVRA provides that, except in certain narrow circumstances, the "first assistant [to the PAS position] shall perform the functions and duties of the [PAS position] temporarily in an acting capacity" (subject to certain time limitations), unless and until the President makes an alternative designation under the FVRA. The functions and duties of the PAS officers of the Department and the operational management of the respective agency will be performed by the incumbent first assistant to the PAS position, as designated in the Secretarial Memorandum to Department of Labor Executive Staff (see, "Memorandum," attached to this Order).

(2) In the event that (a) there is a vacancy in the position of the first assistant, or (b) the first assistant position is occupied by a person who is statutorily barred from serving as an acting officer, the operational management of the agency headed by the PAS shall be performed by the person whose designation closest follows that of the first assistant, unless and until the President makes an alternative designation under the FVRA. However, the "functions and duties" of the PAS may not be performed by any person other than the person serving in an acting capacity (or, in the absence of an acting officer, by the Secretary

pursuant to the FVRA). The "functions and duties" are those non-delegable responsibilities (a) established by law (statute or regulation); and (b) required to be performed by, and only by, the PAS.

(3) The Memorandum described in Paragraph 4.C. (1) above shall include succession to the heads of other Departmental organizational units that report to the Secretary.

(4) Nothing in this Order or the Memorandum shall: (1) Be construed to override the provisions in the FVRA with respect to the Inspector General or the Chief Financial Officer (5 U.S.C. 3348(e)); or (2) limit the Secretary's authority to reassign functions or duties of officers unless otherwise precluded by law or regulation.

(5) The Memorandum shall be published in the **Federal Register** and codified in the Department of Labor Manual Series. It is also subject to periodic revision by the Secretary, as necessary, and is effective upon signature unless otherwise specified.

5. Emergency Governance of the Department of Labor and Devolution of Authorities and Responsibilities

A. Secretary (or Acting Secretary) of Labor. Unless otherwise directed by the President (or designee), upon the occurrence of a national emergency entailing a wholesale disruption of the operations, structure, and leadership of the Department of Labor, the Secretary or Acting Secretary (as designated by the President or as provided in the order of succession set forth in Paragraph 4.A. above) shall activate the governing Continuity Plans and determine whether the National Office of the Department of Labor will remain in the then existing location, be repositioned organizationally to the Continuity Site, or be repositioned at the Devolution Site.

B. Except as otherwise directed by the President (or designee), if (1) a catastrophic event occurs in the Washington, DC metropolitan area; (2) the incumbents identified in Paragraph 4.A. are unavailable or unlikely to be available promptly for succession; and (3) the incumbent(s) higher-situated to fill the role of Delegated Secretarial Designee (DSD) as provided in Paragraph 4.B. are unavailable or unlikely to be available promptly to assume the position of DSD, then consistent with the guidelines and operational plans of the Department and upon a review of the circumstances and Executive branch guidance, the incumbent in the next highest DSD-eligible position shall activate the governing Continuity Plans described in Paragraph 5.A. and, based upon those

plans, determine whether the National Office of the Department of Labor will remain in the then existing location, be repositioned organizationally to the Continuity Site, or be repositioned in Dallas, Texas. If emergency circumstances exist that make identification of the DSD untenable, then the Regional Solicitor located in Dallas shall assume the duties and responsibilities described above in this Paragraph 5.B. unless and until the Secretary, Acting Secretary or a higher-situated official listed in Paragraph 4.B. above is identified and is available to serve.

6. General and Specific Delegations of Authority and Assignment of Responsibilities

A. Acting Secretary: Upon designation in accordance with the conditions and sequence set forth in Section 4.A. of this Order, the Acting Secretary shall have all of the authorities of the Secretary of Labor, whether statutorily-conferred or delegated by the President. The Acting Secretary shall provide for the full operational management of the Department of Labor, including, for example, the activation or modification of pre-existing Continuity Plans for the repositioning and reconstitution of the Department of Labor in the event of a national emergency.

B. Delegated Secretarial Designee: Upon designation in accordance with the conditions and sequence set forth above and subject to direction by the President or designee, the Secretary, or the Acting Secretary, the DSD shall fulfill interim operational management functions for the Department of Labor, performing all of the duties and responsibilities of the Secretary of Labor (except the "functions and duties" as defined in Paragraph 4.B. above) including, for example, the activation or modification of pre-existing Continuity Plans for the repositioning and reconstitution of the Department of Labor in the event of a national emergency.

C. Assistant Secretary for Administration and Management: Upon conditions requiring implementation of this plan and any subsequent vacancies, ASAM shall be in charge of ensuring compliance with the FVRA. Further, as the DOL Continuity Coordinator, ASAM shall develop and provide on at least an annual basis a "duties and responsibilities" briefing to the designated Secretarial successors and DSDs and other key positions on their respective responsibilities, and on applicable relocation and reconstitution provisions, and shall establish (within 180 days from the date of this Order) and regularly thereafter update, in

consultation with DOL Agency Heads, governing Continuity Plans for the repositioning and reconstitution of the Department of Labor upon the occurrence of national emergency scenarios entailing a wholesale disruption of the operations, structure, and leadership of the Department of Labor. The governing Continuity Plans for the Department as approved by the ASAM shall reflect:

(1) The standards under a variety of scenarios for activation of the Continuity Plans;

(2) the determination of each agency head that the succession plans, delegations of authority and assignments of responsibility, emergency agency directives, standard operating procedures, and position descriptions needed to fulfill its mission, if devolved to or reconstituted in Dallas, are established, approved by the ASAM, and presented to the Dallas Regional Administrator (OASAM) for contingency activation by Secretary, Acting Secretary, or the Delegated Secretarial Designee; and

(3) plans prepared by the DOL component Agencies, to include OASAM, Dallas Regional Administrator (OASAM) for devolving essential operations for the component Agency and for reconstituting the Department or component Agency in the event of activation of the DOL Continuity Plans.

D. The Chief Human Capital Officer shall develop and approve (within 180 days from the date of this Order) and regularly thereafter update, a plan, consistent with applicable law, for managing, positioning and compensating DOL human resources in the event of a continuity of operations event, and shall assist with, and review the adequacy of, preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies. The Chief Human Capital Officer shall also assure that the position descriptions of all DSD-eligible incumbents reflect their potential DSD service.

E. The Chief Acquisition Officer shall develop and approve (within 180 days from the date of this Order) and regularly thereafter update, appropriate plans for assuring that all stages of the Department's central contracting needs can be met with regional resources and that emergency powers, to the extent permitted by law, are ready for activation upon the occurrence of a national emergency or major disruption, and shall assist with and review the adequacy of preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies.

F. The Chief Information Officer shall develop and approve (within 180 days from the date of this Order) and regularly thereafter update, appropriate plans for assuring that all of the Department's information technology systems have sufficient redundancies to support the timely relocation of the Department's Essential Functions and the reconstitution of the all the Department's organizations and functions, and shall assist with and review the adequacy of preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies.

G. The Assistant Secretary for Administration and Management shall develop and approve (within 180 days from the date of this Order) and regularly thereafter update, plans, consistent with applicable law, for the establishment of budget formulation for a relocated or reconstituted Department and for securing apportionment flexibilities that will permit functions to be transferred and redistributed among DOL agencies and their respective appropriation accounts, and shall assist with and review the adequacy of preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies.

H. The Chief Financial Officer shall develop and approve (within 180 days from the date of this Order) and regularly thereafter update, plans consistent with applicable law, for the establishment of budget execution capabilities for a relocated or reconstituted Department and shall assist with and review the adequacy of preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies.

I. The Chief Property Officer shall assist with and review the adequacy of preparations by Agency Heads for repositioning and reconstituting the operations of their respective agencies.

J. The Solicitor of Labor is delegated authority and assigned responsibility for providing legal advice and assistance to all officers of the Department relating to the administration and implementation of this Order and, if such an event arises, for a relocated or reconstituted Department. The bringing of legal proceedings, the representation of the Secretary and other officials of the Department, and the determination of whether such proceedings or representations are appropriate in a given case, are delegated exclusively.

In addition, the Solicitor of Labor shall assume responsibilities from the Assistant Secretary for Policy for performing the role of Departmental liaison with the Office of the Federal

Register in the event of devolution of departmental operations to Dallas.

K. *Agency Heads* shall assure completion (within 180 days from the date of this Order, and on a regular basis thereafter) of the planning, support, and consultation required by authorized officers in connection with all aspects of the administration of this Order, including:

(1) Establishing appropriate succession plans, delegations of authority and assignments of responsibility, emergency agency directives, vital record identification and protection, standard operating procedures, and position descriptions to assure for the continuity of agency operations relocated to the Continuity Site or the Devolution Site, as appropriate;

(2) Engaging in specific transitional planning with the ASAM, including provisions for appropriate transfer of staff and programs as appropriate, in order to create devolution plans for DOL Agencies whose Offices do not currently have staff and space available at the Devolution Site; and

(3) In consultation with the Office of the Solicitor, identifying, compiling, and reporting to the ASAM regarding those emergency authorities and responsibilities that may not be suspended, or are activated, during national emergencies of any type.

L. All employees, including contractors, of the Department shall be responsible for knowing their individual responsibilities in any continuity situation, for contacting DOL as soon as possible after a major incident consistent with applicable guidance and for being available to work during emergencies to the extent deemed necessary and appropriate and consistent with OPM guidance. All employees shall also comply with such further directions as may be published from time to time in the Department's internal regulations or otherwise distributed relating to their duties and responsibilities during emergency circumstances.

7. *Reservations of Authority*

A. Except to the extent stated in this Order, this Secretary's Order does not affect the authorities and responsibilities of the Inspector General under the Inspector General Act of 1978, as amended, or Secretary's Order 04–2006 (February 21, 2006).

B. This Order does not affect any authorities and responsibilities of the Chief Financial Officer under the Chief Financial Officers Act of 1990, any other Federal law or regulation, or any Office of Management and Budget, Government Accountability Office, or

U.S. Department of the Treasury policies and publications governing the fiscal responsibilities of Federal departments and agencies.

8. *Effective Date.* This Order is effective immediately.

Thomas E. Perez,
Secretary of Labor.

Attachment

MEMORANDUM FOR DEPARTMENT OF LABOR EXECUTIVE STAFF

FROM: THOMAS E. PEREZ

SUBJECT: To Provide for the Order of Succession for Executive Continuity

This memorandum is issued pursuant to Secretary's Order 1–2017 and the authorities cited therein, in order to provide lines of succession in periods of vacancy in case of absence, sickness, resignation, or death of agency heads and during periods of national emergency declared by the President and to provide for ongoing operational management of agency programs and personnel. This memorandum addresses succession in the Department for (1) appointments made by the President, by and with the advice and consent of the Senate (PAS), (2) appointments made by the President not subject to the Senate's advice and consent role (PA), and (3) appointments made by the Secretary.

Succession for PAS Agency Head Appointments

Functions and duties and ongoing operational management responsibilities of the officers of the Department whose appointment to office is required to be made by the President, by and with the advice and consent of the Senate (PAS), will be performed in an acting capacity by the below designated "first assistants," unless and until the President makes an alternative designation under the Federal Vacancies Reform Act of 1998 (FVRA). Functions and duties are those non-delegable responsibilities established by law (statute or regulation) and required to be performed by, and only by, the PAS.

In the event that the first assistant does not serve or is barred from serving, unless and until the President makes an alternative designation under the FVRA, the person whose designation closest follows that of the first assistant shall perform the operational management of the agency. However, the functions and duties of the PAS may not be performed by any person other than the person serving in an acting capacity, in accord with FVRA (or, in the absence of an acting officer, by the Secretary pursuant to the FVRA).

Succession for Other Agency Head Appointments

In addition, certain DOL offices are not covered by the FVRA because they are not subject to Senate confirmation. Nevertheless, they are included in this Memorandum in order to consolidate the presentation of the Department's program for establishing orderly internal succession in the event of vacancies. These agencies are: Office of the Assistant Secretary for Administration and Management, Office of the Assistant Secretary for Public Affairs, Office of Federal Contract Compliance Programs, Women's Bureau, Office of Labor-Management Standards, Office of Workers' Compensation Programs, Bureau of International Labor Affairs.

This memorandum supersedes all prior inconsistent agency delegations. Agency Heads shall assure that agency delegations, position descriptions, and other pertinent documents are maintained consistently with the designations provided below. Any modifications to the Order of Succession specified in this memorandum are solely reserved to the Secretary. This memorandum shall be published in the **Federal Register** and codified in the Department of Labor Manual Series. This memorandum is subject to periodic revision by the Secretary, as necessary, and is effective on the date indicated above.

DESIGNATION OF DOL AGENCY FIRST ASSISTANT¹ AND ORDER OF SUCCESSION

A. Presidential Appointments: Positions Under the Secretary of Labor

Deputy Secretary of Labor:

Designation to be made by Presidential direction, as provided in 5 U.S.C. 3345.

Solicitor of Labor:

Deputy Solicitor
Deputy Solicitor (Regional Enforcement)
Deputy Solicitor (National Operations)

Assistant Secretary for Administration and Management [not subject² to FVRA³]

¹ The first assistants or equivalent position are designated in *italic font* in the list that follows as the position designated immediately below the agency head position title. Unless otherwise indicated, the listed first assistants are those individuals holding non-career appointments. From time-to-time, DOL may create a "Principal Deputy" position and designate someone to fill that role. If any such position is filled and approved by OPM, that position would go immediately below the Agency Head position.

² P.L. 112–166, Presidential Appointment and Streamlining Act of 2011.

³ Federal Vacancies Reform Act of 1998, 5 U.S.C. 3345–3349d.

BILLING CODE 4510-XX-P

**OCCUPATIONAL SAFETY AND
HEALTH REVIEW COMMISSION**

**Senior Executive Service Performance
Review Board Membership**

AGENCY: Occupational Safety and Health
Review Commission.

ACTION: Annual Notice.

SUMMARY: Notice is given of the
appointment of members to the
Performance Review Board (PRB) of the
Occupational Safety and Health Review
Commission.

DATE: Membership is effective on
January 19, 2017.

FOR FURTHER INFORMATION CONTACT:

Linda M. Beard, Human Resources
Specialist, U.S. Occupational Safety and
Health Review Commission, 1120 20th
Street NW., Washington, DC 20036,
(202) 606-5393.

SUPPLEMENTARY INFORMATION: The
Review Commission, as required by 5
U.S.C. 4314(c)(1) through (5), has
established a Senior Executive Service
PRB. The PRB reviews and evaluates the
initial appraisal of a senior executive's
performance by the supervisor, and makes
recommendations to the Chairman of the
Review Commission regarding performance
ratings, performance awards, and pay-for-
performance adjustments. Members of the
PRB serve for a period of 24 months. In
the case of an appraisal of a career
appointee, more than half of the members
shall consist of career appointees, pursuant
to 5 U.S.C. 4314(c)(5). The names and titles
of the PRB members are as follows:

• Nancy P. Bray, Director, Spaceport
Integration and Services, National
Aeronautics and Space Administration;

• Christine M. Condon, Principal
Director, Deputy Chief Information
Officer for Resources and Analysis,
Office of the Secretary of Defense, DOD;

• Monica R. Shephard, Vice Director,
Joint Force Development, DOD; and

• Rebecca A. Fenneman, Director,
Office of Consumer Affairs and Dispute
Resolution Services, Federal Maritime
Commission.

Dated: January 11, 2017.

Cynthia L. Attwood,

Chairman.

**NATIONAL AERONAUTICS AND
SPACE ADMINISTRATION**

[(Notice (17-001)]

**Notice of Intent To Grant a Partially
Exclusive License**

AGENCY: National Aeronautics and
Space Administration.

ACTION: Notice of intent To grant
partially exclusive license.

SUMMARY: NASA hereby gives notice of
its intent to grant a partially exclusive
patent license in the United States to
practice the inventions described and
claimed in U.S. Patent Number
7,075,295 B2 titled "Magnetic Field
Response Sensor for Conductive
Media," NASA Case Number LAR-
16571-1; U.S. Patent Number 7,589,525
B2 titled "Magnetic Field Response
Sensor for Conductive Media," NASA
Case Number LAR-16571-2; U.S. Patent
No. 7,759,932 B2 titled "Magnetic Field
Response for Conductive Media," NASA
Case Number LAR-16571-3; U.S. Patent
No. 7,086,593 B2 titled "Magnetic Field
Response Measurement Acquisition
System," NASA Case Number LAR-
16908-1; U.S. Patent No. 7,047,807 B2
titled "Flexible Framework for
Capacitive Sensing," NASA Case No.
LAR-16974-1; U.S. Patent No.
7,506,541 B2 titled "System and Method
for Wirelessly Determining Fluid
Volume," NASA Case No. LAR-17116-
1; U.S. Patent No. 7,255,004 B2 titled
"Wireless Fluid Level Measuring
System," NASA Case Number LAR-
17155-1; U.S. Patent No. 7,159,774 B2
titled "Magnetic Field Response
Measurement Acquisition System,"
NASA Case No. LAR-17280-1; U.S.
Patent No. 8,430,327 B2 titled "Wireless
Sensing System Using Open-Circuit,
Electrically-Conductive Spiral-Trace
Sensor," NASA Case No. LAR-17294-1;

⁴ See footnote 2.

⁵ See footnote 2.

⁶ 29 U.S.C. 14 creates first assistant to the Director
of the Women's Bureau.

U.S. Patent No. 7,711,509 B2 titled "Method of Calibrating a Fluid-Level Measurement System," NASA Case No. LAR-17480-1; and U.S. Patent Application No. 14/520,863 titled "Antenna for Far Field Transceiving," NASA Case No. LAR-18400-1, to Smart BioHealth, LLC, having its principal place of business in Minnesota City, MN. The fields of use may be limited to portable devices (excluding devices composed of threads, fabrics, textiles, and/or paper) for Human Performance (HP) measurement of body density (limited to body fat, muscle density, and bone density); body mechanics (limited to motion analysis, posture, and balance); physiological responses to physical activity, and energy usage (limited to lactic acid, blood glucose, blood oxygen, hydration, and electrolyte balance).

DATES: The prospective partially exclusive license may be granted unless, within fifteen (15) days from the date of this published notice, NASA receives written objections including evidence and argument that establish that the grant of the license would not be consistent with the requirements regarding the licensing of federally owned inventions as set forth in the Bayh-Dole Act and implementing regulations. Competing applications completed and received by NASA within fifteen (15) days of the date of this published notice will also be treated as objections to the grant of the contemplated partially exclusive license. Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act.

ADDRESSES: Objections relating to the prospective license may be submitted to Patent Counsel, Office of Chief Counsel, NASA Langley Research Center, MS 30, Hampton, Virginia 23681. Phone (757) 864-3221. Facsimile (757) 864-9190.

FOR FURTHER INFORMATION CONTACT: Robin W. Edwards, Patent Counsel, Office of Chief Counsel, NASA Langley Research Center, MS 30, Hampton, Virginia 23681. Phone (757) 864-3221. Facsimile (757) 864-9190.

SUPPLEMENTARY INFORMATION: This notice is issued in accordance with 35 U.S.C. 209(e) and 37 CFR 404.7(a)(i). This notice of intent to grant a partially exclusive patent license is issued in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i). The patent rights in these inventions have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space

Administration. The prospective exclusive license will comply with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Information about other NASA inventions available for licensing can be found online at <http://technology.nasa.gov>.

Mark P. Dvorscak,
Agency Counsel for Intellectual Property.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-2017-024]

Advisory Committee on the Presidential Library-Foundation Partnerships

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of Federal Advisory Committee Meeting Change.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. appendix 2), the National Archives and Records Administration announces an upcoming Advisory Committee on Presidential Library-Foundation Partnerships meeting.

DATES: The meeting will be Thursday, February 23, 2017, from 9:00 a.m. to 12:00 noon.

Location: National Archives and Records Administration (NARA); 700 Pennsylvania Avenue NW., Room 105; Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Denise LeBeck, by telephone at 301-837-3250, or by email at denise.lebeck@nara.gov.

SUPPLEMENTARY INFORMATION: The original notice about this meeting stated it was scheduled for February 29, 2017, at 10:00 a.m. (see 81 FR 94426, December 23, 2016). However, that was an incorrect date. This notice changes the meeting date to February 23, 2017, to reflect the actual meeting date.

The meeting's purpose is to discuss the Presidential Library program and topics related to public-private partnerships between Presidential Libraries and Presidential Foundations. The meeting is open to the public. Meeting attendees may enter from the Pennsylvania Avenue entrance, and must show photo identification to enter. No visitor parking is available at the Archives building; however, there are

commercial parking lots and metered curb parking nearby.

Patrice Little Murray,
Committee Management Officer.

BILLING CODE 7515-01-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-2017-023]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when agencies no longer need them for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives of the United States and to destroy, after a specified period, records lacking administrative, legal, research, or other value. NARA publishes notice in the **Federal Register** for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: NARA must receive requests for copies in writing by February 21, 2017. Once NARA finishes appraising the records, we will send you a copy of the schedule you requested. We usually prepare appraisal memoranda that contain additional information concerning the records covered by a proposed schedule. You may also request these. If you do, we will also provide them once we have completed the appraisal. You have 30 days after we send to you these requested documents in which to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting Records Appraisal and Agency Assistance (ACRA) using one of the following means:

Mail: NARA (ACRA); 8601 Adelphi Road; College Park, MD 20740-6001.
Email: request.schedule@nara.gov.

FAX: 301-837-3698.

You must cite the control number, which appears in parentheses after the name of the agency that submitted the schedule, and a mailing address. If you would like an appraisal report, please include that in your request.

FOR FURTHER INFORMATION CONTACT:

Margaret Hawkins, Director, by mail at Records Appraisal and Agency Assistance (ACRA); National Archives and Records Administration; 8601 Adelphi Road; College Park, MD 20740-6001, by phone at 301-837-1799, or by email at request.schedule@nara.gov.

SUPPLEMENTARY INFORMATION: Each year, Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing records retention periods and submit these schedules for NARA's approval. These schedules provide for timely transfer into the National Archives of historically valuable records and authorize the agency to dispose of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless otherwise specified. An item in a schedule is media neutral when an agency may apply the disposition instructions to records regardless of the medium in which it creates or maintains the records. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is expressly limited to a specific medium. (See 36 CFR 1225.12(e).)

Agencies may not destroy Federal records without Archivist of the United States' approval. The Archivist approves destruction only after thoroughly considering the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value.

In addition to identifying the Federal agencies and any subdivisions requesting disposition authority, this notice lists the organizational unit(s) accumulating the records (or notes that the schedule has agency-wide applicability when schedules cover

records that may be accumulated throughout an agency); provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction); and includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it also includes information about the records. You may request additional information about the disposition process at the addresses above.

Schedules Pending

1. Department of the Army, Agency-wide (DAA-AU-2016-0045, 1 item, 1 temporary item). Master files of an electronic information system used to track parts and asset shortages in support of depot-level maintenance operations.

2. Department of Defense, Defense Logistics Agency (DAA-0361-2017-0001, 1 item, 1 temporary item). Records relating to personally owned property abandoned at Department of Defense activities.

3. Department of Defense, Defense Logistics Agency (DAA-0361-2017-0002, 1 item, 1 temporary item). Master files of an electronic information system used to report food inspections at installations.

4. Department of Energy, Naval Nuclear Propulsion Program (DAA-0434-2015-0008, 11 items, 10 temporary items). Records relating to finance and procurement including accounting, purchasing, contract administration, asset valuation, and preparation and maintenance of the budget and payroll and related material. Proposed for permanent retention are records relating to first prime contracts.

5. Department of Health and Human Services, National Institutes of Health (DAA-0443-2016-0002, 4 items, 4 temporary items). Administrative technology transfer records including agreements, application files, letters, and progress and sales reports.

6. Department of Justice, Agency-wide (DAA-0060-2016-0006, 4 items, 4 temporary items). Records related to the coordination of agency rulemaking actions.

7. Department of Justice, Agency-wide (DAA-0060-2017-0004, 1 item, 1 temporary item). Records documenting office and program level annual work plans.

8. Department of the Navy, Agency-wide (DAA-NU-2015-0006, 36 items, 33 temporary items). Records relating to

medicine and dentistry including routine correspondence, tissue exam results, diving and hyperbaric medical treatment, dental reports, training, obesity case files and associated records. Proposed for permanent retention are records relating to policy and planning, individual health care files, and reports of medical research.

9. Department of the Navy, Agency-wide (DAA-NU-2015-0008, 35 items, 28 temporary items). Records relating to ordnance management including routine correspondence, deperming and degaussing, ordnance equipment, device calibration, occupational vision tests, and related matters. Proposed for permanent retention are records relating to policy and planning, ordnance technical instructions, logistics programs, ordnance design, technical reports and manuals, harbor defense, and special weapons records.

10. Commodity Futures Trading Commission, Agency-wide (DAA-0180-2017-0001, 1 item, 1 temporary item). Registered entity applications, and related amendments and supplements.

11. Peace Corps, Office of Global Operations (DAA-0490-2016-0004, 1 item, 1 temporary item). Records of the Office of Staging and Pre-Departure, related to facilitating the orientation and departure of volunteers to overseas posts.

Laurence Brewer,

Chief Records Officer for the U.S. Government.

Advisory Committee on the Presidential Library-Foundation Partnerships

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of Federal Advisory Committee meeting change.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. appendix 2), the National Archives and Records Administration announces an upcoming Advisory Committee on Presidential Library-Foundation Partnerships meeting.

DATES: The meeting will be Thursday, February 23, 2017, from 9:00 a.m. to 12:00 noon.

Location: National Archives and Records Administration (NARA); 700

Pennsylvania Avenue NW., Room 105; Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT:

Denise LeBeck, by telephone at 301-837-3250, or by email at denise.lebeck@nara.gov.

SUPPLEMENTARY INFORMATION: The original notice about this meeting stated it was scheduled for February 29, 2017, at 10:00 a.m. (see 81 FR 94426, December 23, 2016). However, that was an incorrect date. This notice changes the meeting date to February 23, 2017, to reflect the actual meeting date.

The meeting's purpose is to discuss the Presidential Library program and topics related to public-private partnerships between Presidential Libraries and Presidential Foundations. The meeting is open to the public. Meeting attendees may enter from the Pennsylvania Avenue entrance, and must show photo identification to enter. No visitor parking is available at the Archives building; however, there are commercial parking lots and metered curb parking nearby.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-59; NRC-2017-0007]

Texas A&M University

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Facility Operating License No. R-23, held by the Texas A&M University (TAMU or the licensee) for the Aerojet General Nucleonics Model 201-Modified (AGN-201M) reactor facility located in the Zachry Engineering Center on the TAMU College Station Campus, Brazos County, Texas. The amendment would delete from the technical specifications (TSs) the Zachry Engineering Center location that constituted the reactor facility for the AGN-201M reactor and associated components. The reactor, associated components, and its special nuclear material (SNM) have been removed from the Zachry Engineering Center and temporarily stored at the Texas Engineering Experiment Station, in

Brazos County, Texas, where TAMU operates another reactor. The license amendment would also delete the license conditions requiring a physical security plan (PSP) and TSs requiring procedures that implement the security plan and audits of the PSP and its implementing procedures as the SNM possession limit in the license is below the quantity of material that requires a security plan.

If approved, removal of the Zachry Engineering Center from the TSs would allow the unrestricted use of the rooms where the AGN-201M reactor, its associated components and its byproduct and SNM were formerly located. The NRC is issuing an environmental assessment (EA) and finding of no significant impact (FONSI) associated with the proposed license amendment.

DATES: The EA and FONSI are available as of January 19, 2017.

ADDRESSES: Please refer to Docket ID NRC-2017-0007 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2017-0007. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering the issuance of a license amendment to Facility Operating License No. R-23, held by TAMU, which would delete (1) part of TS 5.3, removing the Reactor Room, Control Room and Accelerator Room in the Zachry Engineering Center as a storage location for the AGN-201M reactor and associated components and allowing the unrestricted use of the Zachry Engineering Center that was the former location of the AGN-201M reactor; (2) license conditions 2.C.(3) and 2.D, removing the requirement that the licensee maintain a PSP; and (3) TS 6.4.3.c and parts of TS 6.6.f, removing requirements for procedures that implement the PSP and audits of the PSP and implementing procedures. The facility is located in the Zachry Engineering Center on the TAMU campus, Brazos County, Texas.

The licensee submitted its license amendment request by letter dated November 21, 2016 (ADAMS Accession No. ML16326A447), as supplemented by letters dated December 16 and 20, 2016 (ADAMS Accession Nos. ML16352A000, ML16351A502, and ML17011A079); and January 9 and 11, 2017 (ADAMS Accession Nos. ML17010A057 and ML17012A069). The NRC staff prepared an EA to document its environmental findings related to the proposed license amendment in accordance with section 51.21 of title 10 of the *Code of Federal Regulations* (10 CFR). Based on the results of the environmental review conducted for this EA, the NRC staff did not identify any significant environmental impacts associated with the proposed action and is, therefore, issuing a FONSI in accordance with 10 CFR 51.32.

II. Environmental Assessment

Facility Locations and Previous Actions

The Zachry Engineering Center, located on the TAMU College Station Campus, in Brazos County, Texas housed the AGN-201M reactor as well as offices and laboratories in which radiological materials were used in support of reactor operations. The AGN-201M has a power rating of 5 watts, thermal and uses a polyethylene and uranium dioxide plate type fuel with a uranium-235 enrichment of less than 20%. The reactor core is cooled by natural convection and therefore, the reactor does not have an external cooling loop. Texas A&M University purchased the AGN reactor in 1957 and moved it to the Zachry Engineering Center in 1972. The AGN-201M reactor was located on the ground floor in the

southwest portion of the building and has not been operated since 2014.

TAMU operates a second reactor at the Nuclear Science Center, within the Texas Engineering Experiment Station, also located on the TAMU College Station Campus, in Brazos County, Texas.

The NRC staff approved the SNM transfer and relocation of the AGN-201M reactor and associated components in license amendments dated August 31, 2016 (ADAMS Accession No. ML16109A153), and November 11, 2015 (ADAMS Accession No. ML15315A027), respectively. TAMU completed the transfer of SNM in the form of AGN-201M reactor fuel, control rods, and a plutonium beryllium start up source to the TAMU System, Nuclear Science Center Reactor Facility License No. R-83 and the remaining AGN-201M reactor components containing byproduct material and trace quantities of SNM were relocated to the Texas Engineering Experiment Station on October 15, 2016.

TAMU requested that the NRC amend the AGN-201M license to allow the unrestricted use of the Zachry Engineering Center, proposed changes to conditions and TSs in the license, and provided radiation survey results to support its amendment application.

Description of the Proposed Action

The proposed action would delete the Reactor Room, Control Room and Accelerator Room in the Zachry Engineering Center as a location for the storage of the AGN-201 reactor and associated components, allowing the unrestricted use of the Zachry Engineering Center that was the former location of the AGN-201M reactor. The proposed action would also delete license conditions that require a PSP, and delete TS 6.6.f. and 6.4.3.c, which require PSP implementing procedures and audits of the PSP and its implementing procedures because SNM for the AGN-201M has been transferred to another NRC license and, hence, the license no longer authorizes possession of a quantity of SNM that requires a PSP under the regulations in 10 CFR 73.67. In order to remove the Zachry Engineering Center rooms constituting the reactor facility from the TSs and allow unrestricted use of those locations in accordance with 10 CFR 20.1402, residual radioactivity that is distinguishable from background radiation at the reactor facility may not exceed 25 mrem (0.25 mSv) per year total effective dose equivalent (TEDE) to a member of the public and the residual radioactivity must be reduced to levels

that are as low as reasonably achievable (ALARA).

The Need for the Proposed Action

The proposed action is needed (1) to remove from Facility Operating License No. R-23 and release the rooms that constitute the AGN-201M reactor facility at the Zachry Engineering Center, which would enable the rooms to be used for other purposes without radiological restrictions, and (2) to delete license conditions requiring the licensee to maintain a PSP and delete associated PSP procedural and audit requirements in the TSs.

Environmental Impacts of the Proposed Action

The NRC staff has completed its environmental review of the proposed action and concludes that the proposed action will not present any undue risk to public health and safety. After removal of the AGN-201M reactor, associated components, and SNM, and their relocation to the Texas Engineering Experiment Station, TAMU conducted clean-up activities at the Zachry Engineering Center. TAMU developed a final status survey plan (ADAMS Accession No. ML16316A002), completed the final status survey of the Zachry Engineering Center rooms where the AGN-201M reactor, associated components, and SNM were previously located (ADAMS Accession No. ML17010A057) and found that the facility met the requirements for unrestricted use in 10 CFR part 20, subpart E. An NRC staff confirmatory survey was conducted during the week of November 14, 2016 (ADAMS Accession No. ML16355A083).

The NRC staff is preparing a safety evaluation in connection with its review of the proposed action. Based on the clean-up activities carried out by the licensee, the NRC staff's review of TAMU's final status survey report and the results of the NRC staff confirmatory survey, the NRC staff has concluded, pursuant to 10 CFR 20.1402, that residual radioactivity at the site does not exceed 25 mrem (0.25 mSv) TEDE. In addition, since no residual radioactivity distinguishable from background was found at the site, ALARA has been met. Therefore, the Zachry Engineering Center rooms which constituted the reactor facility (as designated in TS 5.3) are suitable to be released for unrestricted use and can be removed from the TSs. TAMU also requests that the NRC delete license conditions requiring a PSP and associated PSP TSs because physical possession of the SNM for the AGN-201M reactor has been transferred to,

and is being stored under, another NRC license and therefore a PSP is not required for the AGN-201M under 10 CFR 73.67. Further details of the NRC's safety review will be provided in the safety evaluation related to the license amendment that, if issued by the NRC, would authorize the proposed action.

The proposed action does not authorize any effluent or material releases, does not change any release criteria set forth in the present regulations, and the results of the NRC confirmatory survey confirmed that any residual radioactivity at the Zachry Engineering Center facility comply with criteria for unrestricted release of a site set forth in 10 CFR 20.1402. No changes would occur in the types of any effluents that may be released offsite, and there would be no significant increase in the amount of any effluent released offsite. Thus there would be no significant increase in occupational or public radiation exposure. In addition, because all of the SNM has been removed from the Zachry Engineering Center, deletion of license conditions requiring a PSP and deletion of associated TSs is appropriate. Therefore, the proposed action would result in no significant radiological environmental impacts.

With regard to potential non-radiological impacts, the proposed action does not authorize or involve any reactor facility construction activities and would not result in visual resource impacts, increases in noise or air emissions, or have any foreseeable impacts to historic properties, water resources, and aquatic or terrestrial resources. Similarly, the proposed action would result in no socioeconomic or environmental justice impacts. Therefore, there would be no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC staff concludes that there would be no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered the denial of the proposed action (*i.e.*, the "no-action" alternative). Denial of the license amendment request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the "no action" alternative would be similar.

Alternative Use of Resources

The proposed action would not involve the use of any different

resources than those previously considered in the document "Texas A&M University—Facility Operating License No. R-23," dated August 26, 1957 (ADAMS Accession No. ML16085A206).

Agencies and Persons Consulted

The NRC staff did not enter into consultation with any other Federal agency or with the State of Texas regarding the environmental impact of the proposed action. However, on December 22, 2016, the NRC notified the Texas State official, Mrs. DeAnn Walker, Director, Office of the Governor Office of Budget and Policy, of the proposed action. The State official had no comments.

III. Finding of No Significant Impact

The NRC is considering the issuance of a license amendment to Facility Operating License No. R-23, held by TAMU, which would delete (1) part of TS 5.3, removing the Reactor Room, Control Room and Accelerator Room in the Zachry Engineering Center as a storage location for the AGN-201M reactor and associated components and allowing the unrestricted use of the Zachry Engineering Center that was the former location of the AGN-201M reactor; (2) license conditions 2.C.(3) and 2.D, removing the requirement that the licensee maintain a PSP; and (3) TS 6.4.3.c and parts of TS 6.6.f, removing requirements for procedures that implement the PSP and audits of the PSP and implementing procedures. The facility is located in the Zachry Engineering Center on the TAMU campus, Brazos County, Texas.

On the basis of the EA included in Section II of this notice and incorporated by reference, the NRC staff finds that the proposed action will not have a significant effect on the quality of the human environment. The NRC staff's evaluation considered information provided in the licensee's application, as supplemented, and the NRC staff's review of related environmental documents. Section II above identifies the documents related to the proposed action and includes information on the availability of these documents. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Dated at Rockville, Maryland, this 13th day of January 2017.

For the Nuclear Regulatory Commission.

Mirela Gavrilas,

Deputy Director, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

Postal Regulatory Commission

[Docket No. T2017-1; Order No. 3751]

Income Tax Review

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning the calculation of the assumed Federal income tax on competitive products income for Fiscal Year 2016. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* February 3, 2017.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Notice of Commission Action
- II. Ordering Paragraphs

I. Introduction

In accordance with 39 U.S.C. 3634 and 39 CFR 3060.40 *et seq.*, the Postal Service filed its calculation of the assumed Federal income tax on competitive products income for fiscal year (FY) 2016.¹ The calculation details the FY 2016 competitive product revenue and expenses, the net competitive products income before tax, and the assumed Federal income tax on that income.

II. Notice of Commission Action

In accordance with 39 CFR 3060.42, the Commission establishes Docket No. T2017-1 to review the calculation of the

¹ Notice of the United States Postal Service of Submission of the Calculation of the FY 2016 Assumed Federal Income Tax on Competitive Products, January 12, 2017.

assumed Federal income tax and supporting documentation.

The Commission invites comments on whether the Postal Service's filing in this docket is consistent with the policies of 39 U.S.C. 3634 and 39 CFR 3060.40 *et seq.* Comments are due no later than February 3, 2017. The Postal Service's filing can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Jennaca D. Upperman to serve as Public Representative in this docket.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. T2017-1 to consider the calculation of the assumed Federal income tax on competitive products for FY 2016.

2. Pursuant to 39 U.S.C. 505, Jennaca D. Upperman is appointed to serve as an officer of the Commission to represent the interests of the general public in this proceeding (Public Representative).

3. Comments are due no later than February 3, 2017.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,
Secretary.

BILLING CODE 7710-FW-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79778; File No. SR-PEARL-2016-01]

Self-Regulatory Organizations; MIAx PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 510 To Extend the Penny Pilot Program

January 12, 2017.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that, on December 30, 2016, MIAx PEARL, LLC ("MIAx PEARL" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Rule 510, Interpretations and Policies .01 to extend the pilot program for the quoting and trading of certain options in pennies (the "Penny Pilot Program").

The text of the proposed rule change is available on the Exchange's Web site at <http://www.miaxoptions.com/content/miax-pearl>, at MIAX PEARL's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

MIAX PEARL plans to commence operations as a national securities exchange registered under Section 6 of the Act³ on February 6, 2017.⁴ The Exchange will be a participant in an industry-wide pilot program that provides for the quoting and trading of certain option classes in penny increments (the "Penny Pilot Program" or "Program"). The Penny Pilot Program allows the quoting and trading of certain option classes in minimum increments of \$0.01 for all series in such option classes with a price of less than \$3.00; and in minimum increments of \$0.05 for all series in such option classes with a price of \$3.00 or higher. Options overlying the PowerShares QQQTM ("QQQ"), SPDR[®] S&P 500[®] ETF ("SPY"), and iShares[®] Russell 2000 ETF ("IWM"), however, are quoted and

traded in minimum increments of \$0.01 for all series regardless of the price. The Penny Pilot Program was initiated at the then existing option exchanges in January 2007⁵ and currently includes more than 300 of the most active option classes. The Penny Pilot Program is set to expire on December 31, 2016.⁶ The purpose of the proposed rule change is to implement the Penny Pilot Program in its current format through June 30, 2017, to match the most recent extension date of all the other option exchanges.⁷

In addition to the extension of the Penny Pilot Program through June 30, 2017, the Exchange proposes to extend one other date in the Rule. Currently, Interpretations and Policies .01 states that the Exchange will replace any Penny Pilot issues that have been delisted with the next most actively traded multiply listed option classes that are not yet included in the Penny Pilot Program, and that the replacement issues will be selected based on trading activity in the previous six months. Such option classes will be added to the Penny Pilot Program on the second trading day following December 31, 2016.⁸ The Exchange intends to continue this practice for the duration of the Penny Pilot Program and is proposing to amend the Rule to reflect that such option classes will be added to the Penny Pilot Program on the second trading day following January 1, 2017.⁹

⁵ See Securities Exchange Act Release Nos. 55154 (January 23, 2007), 72 FR 4743 (February 1, 2007) (SR-CBOE-2006-92); 55161 (January 24, 2007), 72 FR 4754 (February 1, 2007) (SR-ISE-2006-62); 54886 (December 6, 2006), 71 FR 74979 (December 13, 2006) (SR-Phlx-2006-74); 54590 (October 12, 2006), 71 FR 61525 (October 18, 2006) (SR-NYSEArca-2006-73); and 54741 (November 9, 2006), 71 FR 67176 (November 20, 2006) (SR-Amex-2006-106).

⁶ See Exchange Rule 510, Interpretations and Policies .01.

⁷ See Securities Exchange Act Release Nos. 79425 (November 29, 2016), 81 FR 87633 (December 5, 2016) (SR-Phlx-2016-115); 79429 (November 30, 2016), 81 FR 87991 (December 6, 2016) (SR-BOX-2016-55); 79432 (November 30, 2016), 81 FR 87990 (December 6, 2016) (SR-MIAX-2016-45); 79523 (December 9, 2016), 81 FR 90895 (December 15, 2016) (SR-BatsBZX-2016-84); 79526 (December 12, 2016), 81 FR 91235 (December 16, 2016) (SR-BatsEDGX-2016-71); 79442 (December 1, 2016), 81 FR 88293 (December 7, 2016) (SR-CBOE-2016-083); 79441 (December 1, 2016), 81 FR 88282 (December 7, 2016) (SR-C2-2016-023); 79420 (November 29, 2016), 81 FR 87639 (December 5, 2016) (SR-BX-2016-062); and 79525 (December 12, 2016), 81 FR 91230 (December 16, 2016) (SR-NYSEMKT-2016-111).

⁸ The Exchange notes that the current rule text reflected December 31, 2016, whereas the date additional series would have been added during the prior pilot period was July 31, 2016.

⁹ The month immediately preceding a replacement class's addition to the Pilot Program (*i.e.*, December) is not used for purposes of the six-

The purpose of this provision is to reflect the new date on which replacement issues may be added to the Penny Pilot Program. The Exchange notes that this filing is based upon and, in all material respects, substantially similar to a recent filing of Miami International Securities Exchange, Inc. ("MIAX Options") regarding the extension of the Penny Pilot Program.¹⁰

2. Statutory Basis

MIAX PEARL believes that its proposed rule change is consistent with Section 6(b) of the Act¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act¹² in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

In particular, the proposed rule change, which extends the Penny Pilot Program for six months, allows the Exchange to participate in a program that has been viewed as beneficial to traders, investors and public customers and viewed as successful by the other options exchanges participating in it.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that, by extending the expiration of the Pilot Program, the proposed rule change will enable the Exchange to participate in the Pilot Program and provide additional data for further analysis of the Penny Pilot Program and allow for a determination of how the Program should be structured in the future. In doing so, the proposed rule change will also serve to promote regulatory clarity and consistency, thereby reducing burdens on the marketplace, facilitating investor protection, and fostering a competitive environment.

month analysis. For example, a replacement added on the second trading day following January 1, 2017, will be identified based on trading activity from June 1, 2016, through November 30, 2016.

¹⁰ See Securities Exchange Act Release No. 79432 (November 30, 2016), 81 FR 87990 (December 6, 2016) (SR-MIAX-2016-45).

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

³ 15 U.S.C. 78f.

⁴ See Securities Exchange Act Release No. 79543 (December 13, 2016), 81 FR 92901 (December 20, 2016) (File No. 10-227) (order approving application of MIAX PEARL, LLC for registration as a national securities exchange.)

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act¹³ and Rule 19b-4(f)(6)¹⁴ thereunder.

A proposed rule change filed under Rule 19b-4(f)(6)¹⁵ normally does not become operative prior to 30 days after the date of the filing.¹⁶ However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because doing so will allow the Pilot Program to continue without interruption in a manner that is consistent with the Commission's prior approval of the extension and expansion of the Pilot Program and will allow the Exchange and the Commission additional time to analyze the impact of the Pilot Program. Accordingly, the Commission designates the proposed rule change as operative upon filing with the Commission.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may

temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) of the Act¹⁹ to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-PEARL-2016-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.
- All submissions should refer to File Number SR-PEARL-2016-01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549-1090, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from

submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-PEARL-2016-01 and should be submitted on or before February 9, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

Eduardo A. Aleman,
Assistant Secretary.

[FR Doc. 2017-01150 Filed 1-18-17; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79784; File No. SR-NASDAQ-2016-135]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, Relating to Continued Listing Requirements for Exchange-Traded Products

January 12, 2017.

I. Introduction

On September 30, 2016, The NASDAQ Stock Market LLC ("Exchange" or "Nasdaq") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change related to continued listing requirements and delisting procedures for exchange-traded products listed pursuant to the Nasdaq Rule 5700 Series. The proposed rule change was published for comment in the **Federal Register** on October 17, 2016.³ On November 25, 2016, the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.⁴ On January 9, 2017, the Exchange filed Amendment No. 1 to the proposed rule change. On January 11, 2017, the Exchange filed Amendment No. 2 to the proposed rule change, which amended and replaced the original proposal as modified by

¹³ 15 U.S.C. 78s(b)(3)(A).

Amendment No. 1.⁵ The Commission received no comment letters on the proposed rule change. The Commission is publishing this notice to solicit comments on Amendment No. 2 from interested persons, and is approving the proposed rule change, as modified by Amendment No. 2, on an accelerated basis.

II. Description of the Proposed Rule Change, as Modified by Amendment No. 2

The Exchange proposes to amend the Rule 5700 Series to specify continued listing requirements for products listed under those rules, which include products listed pursuant to Rule 19b-4(e) under the Act (“generically-listed products”) and products listed pursuant to proposed rule changes filed with the Commission (“non-generically-listed products”).⁶

The Exchange also proposes to amend the Rule 5700 Series to specify issuer notification requirements related to failures to comply with continued listing requirements. Specifically, the Exchange proposes to add Rule 5701(d) to require an issuer with securities listed under the Rule 5700 Series to promptly notify the Exchange of any non-compliance with the requirements of the Rule 5700 Series. In addition,

with respect to non-generically-listed products, the Exchange proposes to require an issuer to notify the Exchange of its failure to comply with any continued listing requirements that were specified in the proposals to list those products. As proposed, the Exchange would initiate delisting proceedings for a product listed under the Rule 5700 Series if any of its continued listing requirements (including those set forth in a Nasdaq Rule and those set forth in an applicable proposed rule change) are not continuously maintained.⁷

The Exchange also proposes to amend Rule 5810 to specify the delisting procedures for products listed under the Rule 5700 Series. Under proposed Rule 5810(c)(2)(A), unless the issuer is currently under review by an Adjudicatory Body for a Staff Delisting Determination, the Listing Qualifications Department may accept and review a plan to regain compliance when an issuer fails to meet a continued listing requirement contained in the Rule 5700 Series. The issuer would be required to submit its compliance plan within 45 calendar days of the Exchange staff’s notification of deficiencies, and certain issuers would be required to pay a compliance plan review fee.

Finally, the Exchange proposes to make conforming and technical changes throughout the Rule 5700 Series to maintain consistency in its rules. For example, the Exchange proposes to consistently use the language “initiate delisting proceedings under the Rule 5800 Series” when describing the delisting process for a product that fails to meet continued listing requirements;⁸ consistently state in the Portfolio Depository Receipts and Index Fund Shares rules that, if the index that underlies a series of Portfolio Depository Receipts or Index Fund Shares is maintained by a broker-dealer or fund advisor, the index shall be calculated by a third party who is not a broker-dealer or fund advisor;⁹ and

consistently reflect that delisting “following the initial 12-month period following commencement of trading on Nasdaq” only applies to the record/beneficial holder, number of shares issued and outstanding, and the market value of shares issued and outstanding requirements.¹⁰

The Exchange proposes to implement the rule changes by August 1, 2017.

III. Discussion and Commission Findings

The Commission finds that the proposed rule change, as modified by Amendment No. 2, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.¹¹ In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,¹² which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Commission does not believe that the proposal raises unique or novel regulatory issues. As the Commission previously stated, the development, implementation, and enforcement of standards governing the initial and continued listing of securities on an exchange are activities of critical importance to financial markets and the investing public. Once a security has been approved for initial listing, continued listing criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange’s standards for market depth and liquidity so that fair and orderly markets can be maintained.

Currently, certain rules within the Rule 5700 Series impose specific listing requirements on an initial basis, without

⁵ In Amendment No. 2, the Exchange: (i) Amended proposed Rule 5701(d) to require a Company with securities listed under the Rule 5700 Series to provide the Exchange with prompt notification if the Company (rather than an Executive Officer of the Company) becomes aware of its non-compliance with the requirements of the Rule 5700 Series; (ii) further amended rules within the Rule 5700 Series to reflect that certain listing requirements (including certain statements or representations in rule filings for the listing and trading of specific products) apply on an initial and ongoing basis; (iii) further amended rules within the Rule 5700 Series to consistently state that the Exchange will initiate delisting proceedings if continued listing requirements are not maintained; (iv) amended the Rule 5700 Series to provide that the Exchange would initiate delisting proceedings due to an interruption to the dissemination of index, reference asset, or intraday indicative values (as applicable to the product) only if the interruption persists past the trading day in which it occurred; (v) specified an implementation date for the proposed changes; and (vi) made non-substantive and conforming changes throughout the Rule 5700 Series in order to provide consistency throughout these rules, update rule numbering, and update cross-references. Amendment No. 2 is available at <https://www.sec.gov/comments/sr-nasdaq-2016-135/nasdaq2016135-1481751-130537.pdf>.

⁶ See *infra* notes 13–15 and accompanying text. The Exchange also proposes to amend certain listing requirements within the Rule 5700 Series. Specifically, the Exchange proposes to amend the requirement to delist a product if, following the initial 12-month period following commencement of trading on Nasdaq, there are fewer than 50 record or beneficial holders of the listed product for 30 or more consecutive trading days, by deleting the threshold of “30 or more consecutive trading days.” See, e.g., proposed changes to Rule 5705(a)(9)(B)(c).

⁷ Unlike failures to comply with other continued listing requirements, if there is an interruption to the dissemination of the reference asset, index, or intraday indicative values for a listed product, the Exchange would initiate delisting proceedings under the Rule 5800 Series only if the interruption persists past the trading day in which it occurred. See, e.g., proposed changes to Rules 5705(a)(9)(B)(i)(d)–(e) and 5705(b)(9)(B)(i)(d)–(e).

⁸ See, e.g., proposed changes to Rules 5705(a)(9)(B)(i) and 5705(b)(9)(B)(i).

⁹ See proposed changes to Rules 5705(a)(4)(B)(i), 5705(a)(5)(A)(i), 5705(b)(4)(B)(i), and 5705(b)(5)(A)(i); see also Rule 5705(a)(3)(B)(i) (currently stating that, for certain Portfolio Depository Receipts, “[i]f the index is maintained by a broker-dealer or fund advisor . . . the index shall be calculated by a third party who is not a broker-dealer or fund advisor”) and 5705(b)(3)(B)(i)

(currently stating that, for certain Index Fund Shares, “[i]f the index is maintained by a broker-dealer or fund advisor . . . the index shall be calculated by a third party who is not a broker-dealer or fund advisor”).

¹⁰ See, e.g., proposed changes to Rule 5711(d)(vi)(B); see also, e.g., Rule 5711(h)(iv)(B)(1) (currently applying the 12-month threshold only to the record/beneficial holder, number of units issued and outstanding, and market value of units issued and outstanding requirements for Partnership Units).

¹¹ In approving this proposed rule change, the Commission has considered the proposed rule’s impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹² 15 U.S.C. 78f(b)(5).

imposing ongoing listing requirements that are intended to achieve the same goals as these initial listing requirements.¹³ To fill this gap, the proposal would specify that certain listing requirements within the Rule 5700 Series apply both on an initial and ongoing basis, rather than only at a single point in time (*i.e.*, at the time of initial listing).¹⁴ Also, with respect to non-generically listed products, the Exchange proposes to amend the Rule 5700 Series to provide that any of the statements or representations in a proposed rule change regarding: (i) The description of the index, holdings, or reference asset (as applicable to a specific product); (ii) limitations on index composition, holdings, or reference assets (as applicable to a specific product); (iii) dissemination and availability of index, reference asset, or intraday indicative values (as applicable to a specific product); or (iv) the applicability of Exchange rules and surveillance procedures, constitute continued listing requirements.¹⁵

Because the proposal specifies continued listing requirements for products listed pursuant to the Rule 5700 Series, the Commission believes the proposal is designed to achieve on a continuing basis the goals of the

listing requirements, including ensuring that the Exchange lists products that are not susceptible to manipulation and maintaining fair and orderly markets for the listed products. In particular, the Commission believes that the proposal is designed to ensure that stocks with a substantial market capitalization and trading volume account for a substantial portion of the weight of an index or portfolio underlying a listed product;¹⁶ provide transparency regarding the components of an index or portfolio underlying a listed product;¹⁷ ensure that there is adequate liquidity in the listed product itself;¹⁸ and provide timely and fair disclosure of useful information that may be necessary to price the listed product.¹⁹ Moreover, the Commission believes that the proposal to require an issuer to notify the Exchange of its failures to comply with continued listing requirements would supplement the Exchange's own surveillance of the listed products.²⁰

¹⁶ For example, as proposed, the requirements under Rule 5705(a)(3)(A), including minimum market value and minimum monthly trading volume requirements for components of the index or portfolio underlying Portfolio Depository Receipts, would apply both on an initial and ongoing basis. Also, for non-generically listed products, the proposal would provide that statements or representations made in the proposed rule changes relating the description of the portfolio, among other things, constitute continued listing requirements. *See, e.g.*, proposed Rule 5705(a)(9)(B)(i)(b).

¹⁷ For example, as proposed, the requirements under Rule 5705(a)(3)(A), including the requirement that components of the index or portfolio underlying Portfolio Depository Receipts be exchange-listed and NMS stocks, would apply both on an initial and ongoing basis.

¹⁸ For example, the Exchange proposes to amend Rule 5715(b)(2) to explicitly state that listing requirements for Selected Equity-Linked Debt Securities ("SEEDS") apply both on an initial and ongoing basis, including, for example, the minimum public distribution and the minimum market value of an issue of SEEDS.

The Commission also believes that the proposal to delete the threshold of "30 or more consecutive trading days" in the requirements for the number of beneficial or record holders is consistent with the goal of ensuring that there is adequate liquidity in the listed product on an ongoing basis. As proposed, the Exchange would initiate delisting proceedings for a product if it fails to comply with the minimum number of beneficial holders requirement, even if the non-compliance does not continue for 30 consecutive trading days. *See supra* note 6.

¹⁹ For example, the proposed changes to Rule 5705(a)(3)(B)–(C) would make explicit that the requirements related to the dissemination of the value of the index underlying Portfolio Depository Receipts and the Intraday Indicative Value for Portfolio Depository Receipts apply on an initial and ongoing basis.

²⁰ The Commission notes that this concept of issuer notification is not novel. For example, in connection with its proposal to adopt generic listing standards for Managed Fund Shares, the Exchange stated that, prior to listing pursuant to the generic listing standards, an issuer would be required to represent to the Exchange that it will advise the

As noted above, the proposal specifies the delisting procedures for products listed pursuant to the Rule 5700 Series. The Commission believes that the proposed amendments to Rule 5810 provide transparency regarding the process that the Exchange will follow if a listed product fails to meet its continued listing requirements. The Commission also notes that the process surrounding compliance plans already exists in Rule 5810. As a result, the proposed delisting procedures are not novel.

Finally, the Commission believes that the conforming and technical proposed changes do not raise novel issues, are designed to further the goals of the listing standards, and provide clarity and consistency in the Exchange's rules.

For the reasons discussed above, the Commission finds that the proposed rule change, as modified by Amendment No. 2, is consistent with the Act.

IV. Accelerated Approval of Amendment No. 2

As noted above, in Amendment No. 2, the Exchange: (i) Amended proposed Rule 5701(d) to require a Company with securities listed under the Rule 5700 Series to provide the Exchange with prompt notification if the Company (rather than an Executive Officer of the Company) becomes aware of its non-compliance with the requirements of the Rule 5700 Series; (ii) further amended rules within the Rule 5700 Series to reflect that certain listing requirements (including certain statements or representations in rule filings for the listing and trading of specific products) apply on an initial and ongoing basis; (iii) further amended rules within the Rule 5700 Series to consistently state that the Exchange will initiate delisting proceedings if continued listing requirements are not maintained; (iv) amended rules within the Rule 5700 Series to provide that the Exchange will initiate delisting proceedings due to an interruption to the dissemination of index, reference asset, or intraday indicative values (as applicable to the product) only if the interruption persists past the trading day in which it occurred; (v) specified an implementation date for the proposed changes; and (vi) made conforming and non-substantive changes throughout the

Exchange of any failure by a series of Managed Fund Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. *See* Securities Exchange Act Release No. 78918 (September 23, 2016), 81 FR 67033, 67036 (September 29, 2016) (SR–NASDAQ–2016–104).

¹³ Moreover, certain of the listing requirements do not explicitly state that they apply on an ongoing, as well as initial, basis. In these cases, the proposal would make explicit that the requirements apply both on an initial and ongoing basis. *See, e.g.*, proposed changes to Rule 5705(a)(3)(B)–(C) (making explicit that, for Portfolio Depository Receipts, requirements related to index methodology and index value dissemination, as well as intraday indicative value dissemination, apply on an initial and ongoing basis); proposed changes to Rule 5710(e) (making explicit that, for Linked Securities, requirements related to tangible net worth and earnings apply on an initial and ongoing basis); proposed changes to Rule 5711(c), Commentary .03 (making explicit that, for Trust Certificates, requirements related to the qualifications of a trustee and changes to a trustee apply on an initial and ongoing basis).

¹⁴ For example, current Rule 5705(a)(3)(A)(i) sets forth requirements for component stocks of an index or portfolio underlying a series of generically-listed Portfolio Depository Receipts, which apply upon initial listing. These requirements include, for example, minimum market value, minimum monthly trading volume, and concentration limits for the component stocks. The proposal would specify that these requirements apply both on an initial and continued basis.

¹⁵ *See, e.g.*, proposed Rule 5705(a)(9)(B)(i)(b). The Commission notes that it has approved proposed rule changes for the listing and trading of exchange-traded products that included similar representations. *See, e.g.*, Securities Exchange Act Release No. 77548 (April 6, 2016), 81 FR 21626 (April 12, 2016) (SR–NASDAQ–2015–161). The Commission also notes that similar types of requirements exist in the Rule 5700 Series. *See, e.g.*, Rule 5705(a)(3) (setting forth, among other things, index composition requirements and intraday indicative value dissemination requirements for certain generally-listed Portfolio Depository Receipts).

Rule 5700 Series. The Commission believes that Amendment No. 2 furthers the goals of the proposed rule change and does not raise novel regulatory issues. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,²¹ to approve the proposed rule change, as modified by Amendment No. 2, on an accelerated basis.

V. Solicitation of Comments on Amendment No. 2

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 2 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2016-135 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-NASDAQ-2016-135. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal

identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2016-135 and should be submitted on or before February 9, 2017.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²² that the proposed rule change (SR-NASDAQ-2016-135), as modified by Amendment No. 2, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²³

Brent J. Fields,

Secretary.

[Release No. 34-79782; File No. SR-Phlx-2017-01]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Cabinet Trading Pilot Program

January 12, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 4, 2017, NASDAQ PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the pilot program in Phlx Rule 1059, Accommodation Transactions, to allow cabinet trading to take place below \$1 per option contract under specified circumstances (the "pilot program").

The text of the proposed rule change is set forth below. Proposed new

language is underlined; proposed deletions are in brackets.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the pilot program in Commentary .02 of Exchange Rule 1059, Accommodation Transactions, which sets forth specific procedures for engaging in cabinet trades, to allow the Commission adequate time to consider permanently allowing transactions to take place on the Exchange in open outcry at a price of at least \$0 but less than \$1 per option

²² 15 U.S.C. 78s(b)(2).

²³ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

²¹ 15 U.S.C. 78s(b)(2).

contract.³ Prior to the pilot program, Rule 1059 required that all orders placed in the cabinet were assigned priority based upon the sequence in which such orders were received by the specialist. All closing bids and offers would be submitted to the specialist in writing, and the specialist effected all closing cabinet transactions by matching such orders placed with him. Bids or offers on orders to open for the accounts of customer, firm, specialists and Registered Options Traders (“ROTs”) could be made at \$1 per option contract, but such orders could not be placed in and must yield to all orders in the cabinet. Specialists effected all cabinet transactions by matching closing purchase or sale orders which were placed in the cabinet or, provided there was no matching closing purchase or sale order in the cabinet, by matching a closing purchase or sale order in the cabinet with an opening purchase or sale order.⁴ All cabinet transactions were reported to the Exchange following the close of each business day.⁵ Any (i) member, (ii) member organization, or (iii) other person who was a non-member broker or dealer and who directly or indirectly controlled, was controlled by, or was under common control with, a member or member organization (any such other person being referred to as an affiliated person) could effect any transaction as principal in the over-the-counter market in any class of option contracts listed on the Exchange for a premium not in excess of \$1.00 per contract.

On December 30, 2010, the Exchange filed an immediately effective proposal that established the pilot program being extended by this filing. The pilot program allowed transactions to take place in open outcry at a price of at least \$0 but less than \$1 per option contract until June 1, 2011.⁶ These lower priced transactions are traded pursuant to the same procedures applicable to \$1 cabinet trades, except that pursuant to the pilot program (i) bids and offers for opening transactions are only permitted to accommodate closing transactions in

order to limit use of the procedure to liquidations of existing positions, and (ii) the procedures are also made available for trading in options participating in the Penny Pilot Program.⁷ On May 20, 2011, the Exchange filed an immediately effective proposal that extended the pilot program until December 1, 2011 to consider whether to seek permanent approval of the temporary procedure.⁸ On November 16, 2011, the Exchange filed an immediately effective proposal that extended the pilot program until June 1, 2012.⁹ On May 29, 2012, the Exchange filed an immediately effective proposal that extended the pilot program until December 1, 2012.¹⁰ On November 1, 2012, the Exchange filed an immediately effective proposal that extended the pilot program until June 1, 2013.¹¹ On May 8, 2013, the Exchange filed an immediately effective proposal that extended the pilot program until January 5, 2014.¹² On December 4, 2013, the Exchange filed an immediately effective proposal that extended the pilot program until January 5, 2015.¹³ On January 2, 2015, the Exchange filed an immediately effective proposal that extended the pilot program until January 5, 2016.¹⁴ On December 9, 2015, the Exchange filed an immediately effective proposal that extended the pilot program until January 5, 2017.¹⁵ The Exchange now proposes an extension of the pilot program to allow additional time to consider its effects

⁷ Prior to the pilot, the \$1 cabinet trading procedures were limited to options classes traded in \$0.05 or \$0.10 standard increments. The \$1 cabinet trading procedures were not available in Penny Pilot Program classes because in those classes, an option series could trade in a standard increment as low as \$0.01 per share (or \$1.00 per option contract with a 100 share multiplier). The pilot allows trading below \$0.01 per share (or \$1.00 per option contract with a 100 share multiplier) in all classes, including those classes participating in the Penny Pilot Program.

¹¹ See Securities Exchange Act Release No. 68201 (November 9, 2012), 77 FR 68871 (November 16, 2012) (SR-Phlx-2012-131).

¹² See Securities Exchange Act Release No. 69583 (May 15, 2013), 78 FR 30380 (May 22, 2013) (SR-Phlx-2013-53).

¹³ See Securities Exchange Act Release No. 71096 (December 17, 2013), 78 FR 77538 (December 23, 2013) (SR-Phlx-2013-120).

¹⁴ See Securities Exchange Act Release No. 74012 (January 7, 2015), 80 FR 1688 (January 13, 2015) (SR-Phlx-2015-03).

¹⁵ See Securities Exchange Act Release No. 76671 (December 16, 2015), 80 FR 79642 (December 22, 2015) (SR-Phlx-2015-103).

while the pilot program continues uninterrupted.

The Exchange believes that allowing a price of at least \$0 but less than \$1 will continue to better accommodate the closing of options positions in series that are worthless or not actively traded, particularly due to recent market conditions which have resulted in a significant number of series being out-of-the-money. For example, a market participant might have a long position in a call series with a strike price of \$100 and the underlying stock might now be trading at \$30. In such an instance, there might not otherwise be a market for that person to close-out its position even at the \$1 cabinet price (e.g., the series might be quoted no bid).

The Exchange hereby seeks to extend the pilot period for such \$1 cabinet trading until January 5, 2018. The Exchange seeks this extension to allow the procedures to continue without interruption.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,¹⁶ in general, and with Section 6(b)(5) of the Act,¹⁷ in particular, in that the proposal is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Specifically, the Exchange believes that allowing for liquidations at a price less than \$1 per option contract pursuant to the pilot program will better facilitate the closing of options positions that are worthless or not actively trading, especially in Penny Pilot issues where cabinet trades are not otherwise permitted. The Exchange believes the extension is of sufficient length to allow the Commission to assess the impact of the Exchange's authority to allow transactions to take place in open outcry at a price of at least \$0 but less than \$1 per option in accordance with its attendant obligations and conditions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in

¹⁶ 15 U.S.C. 78f.

¹⁷ 15 U.S.C. 78f(b)(5).

³ Cabinet or accommodation trading of option contracts is intended to accommodate persons wishing to effect closing transactions in those series of options dealt in on the Exchange for which there is no auction market.

⁴ Specialists and ROTs are not subject to the requirements of Rule 1014 in respect of orders placed pursuant to this Rule. Also, the provisions of Rule 1033(b) and (c), Rule 1034 and Rule 1038 do not apply to orders placed in the cabinet. Cabinet transactions are not reported on the ticker.

⁵ See Exchange Rule 1059.

⁶ Phlx Rule 1059, Commentary .02; See Securities Exchange Act Release No. 63626 (December 30, 2010), 76 FR 812 (January 6, 2011) (SR-Phlx-2010-185).

any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The proposal does not raise any issues of intra-market competition because it applies to all options participants in the same manner.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁸ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁹

A proposed rule change filed under Rule 19b-4(f)(6)²⁰ normally does not become operative for 30 days after the date of filing. However, Rule 19b-4(f)(6)(iii)²¹ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested a waiver of the 30-day operative delay so that the pilot program may continue without interruption. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the pilot to continue uninterrupted, thereby avoiding any potential investor confusion that could result from a temporary interruption in the pilot and allowing members to continue to benefit from the program. Therefore, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.²²

¹⁸ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

²⁰ 17 CFR 240.19b-4(f)(6).

²¹ 17 CFR 240.19b-4(f)(6)(iii).

²² For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-Phlx-2017-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-Phlx-2017-01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments

efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Phlx-2017-01 and should be submitted on or before February 9, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²³

Eduardo A. Aleman,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79781; File No. SR-CHX-2016-20]

Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change in Connection With the Proposed Transaction Involving CHX Holdings, Inc. and North America Casin Holdings, Inc.

January 12, 2017.

I. Introduction

On December 2, 2016, the Chicago Stock Exchange, Inc. ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change in connection with the proposed transaction ("Transaction") involving CHX Holdings, Inc. ("CHX Holdings") and North America Casin Holdings, Inc. ("N.A. Casin Holdings"). The proposed rule change was published for comment in the **Federal Register** on December 12, 2016.³ The Commission received five comment letters on the proposed rule change⁴ and two letters from the

Hill, dated December 23, 2016 ("Hill Letter"); John Ciccarelli, dated January 2, 2017 ("Ciccarelli Letter"); Anonymous, dated January 3, 2017 ("Anonymous Letter"); and David E. Kaplan, Executive Director, Global Investigative Journalism Network, dated January 4, 2017 ("GIJN Letter"). All

Continued

Exchange in response to certain comments.⁵ This order institutes proceedings under Section 19(b)(2)(B) of the Exchange Act⁶ to determine whether to approve or disapprove the proposed rule change.

II. Summary of the Proposal

The Exchange is a wholly-owned subsidiary of CHX Holdings. According to the Exchange, CHX Holdings is currently beneficially owned by 193 firms or individuals, including Exchange Participants or affiliates of Exchange Participants.⁷ Under the terms of the Transaction, CHX Holdings would become a wholly-owned subsidiary of N.A. Casin Holdings. According to the Exchange, current CHX Holdings stockholders would receive the right to receive cash in exchange for their shares under the terms of the Transaction.⁸ The Exchange states that consummation of the Transaction is subject to the satisfaction of certain conditions precedent, which include approval of the proposed rule change by the Commission.⁹

Upon the closing of the Transaction, the Exchange represents that all of the outstanding and issued shares of N.A. Casin Holdings would be held by the following firms and individuals (the “upstream owners”) in the following percentages:

- *Non-U.S. Upstream Owners:*
 - N.A. Casin Group, Inc. (“N.A. Casin Group”), a corporation incorporated under the laws of the State of Delaware and wholly-owned by Chongqing Casin Enterprise Group (“Chongqing Casin”)—20%
 - Chongqing Jintian Industrial Co., Ltd., a corporation incorporated under the laws of the People’s Republic of China—15%
 - Chongqing Longshang Decoration Co., Ltd., a corporation incorporated under the laws of the People’s Republic of China—14.5%
- *U.S. Upstream Owners:*
 - Castle YAC Enterprises, LLC (“Castle YAC”), a limited liability company

organized under the laws of the State of New York, the sole member of which is Jay Lu,¹⁰ a U.S. citizen and Vice President of N.A. Casin Group—19%

- Raptor Holdco LLC (“Raptor”), a limited liability company organized under the laws of the State of Delaware—11.75%
- Saliba Ventures Holdings, LLC (“Saliba”), a limited liability company organized under the laws of the State of Illinois—11.75%
- Xian Tong Enterprises, Inc., a corporation incorporated under the laws of the State of New York—6.94%
- Equity incentive shares to five members of the CHX Holdings management team, all U.S. citizens—0.88%
- Cheevers & Co., Inc., a corporation incorporated under the laws of the State of Illinois—0.18%¹¹

Following the closing of the Transaction, CHX would remain registered as a national securities exchange under Section 6 of the Act¹² and a self-regulatory organization (“SRO”) as defined in Section 3(a)(26) of the Act.¹³ According to the Exchange, CHX rules would remain in full force and effect as of the date of the proposed rule filing, would continue to govern the activities of CHX up to and after the closing of the Transaction, and CHX would continue to discharge its SRO responsibilities pursuant to CHX’s registration under Section 6 of the Act.¹⁴ In addition, the Exchange states that following the closing, CHX’s affiliated routing broker, CHXBD, would remain a Delaware limited liability corporation of which CHX Holdings would remain the sole member.

In order to facilitate the Transaction, the Exchange is proposing to amend its certificate of incorporation and bylaws,¹⁵ the certificate of incorporation and bylaws of CHX Holdings,¹⁶ and its rules.¹⁷ CHX has also filed the following documents in connection with the Transaction: (i) The certificate of incorporation and bylaws of N.A. Casin Holdings;¹⁸ (ii) text of a proposed resolution of the CHX Holdings Board of Directors to waive certain ownership

and voting limitations to permit the Transaction;¹⁹ (iii) the proposed N.A. Casin Holdings Stockholders Agreement,²⁰ which includes transfer-of-share provisions for the upstream owners that provide a right of first offer, a right to acquire interest upon change of control, and a right to purchase new securities; (iv) proposed put agreements between Saliba, N.A. Casin Group, and N.A. Casin Holdings,²¹ and Raptor, N.A. Casin Group, and N.A. Casin Holdings,²² respectively, which would grant Saliba and Raptor the right to compel N.A. Casin Holdings to purchase or arrange for an unspecified third-party to purchase a specified amount of Saliba’s or Raptors’s equity interest in N.A. Casin Holdings, respectively.

The Exchange proposes several substantive and technical amendments to its corporate governance documents, rules, and the governing documents of CHX Holdings. The amendments include revised provisions addressing, among other items, board and committee composition and procedures, procedures regarding stockholder meetings, consent to U.S. and Commission jurisdiction, and Commission access to corporate books and records.

The proposed amendments also would revise provisions in the certificate of incorporation of CHX Holdings relating to ownership and voting limitations. Additionally, the proposed certificate of incorporation of N.A. Casin Holdings would contain identical ownership concentration and voting limitations and other provisions substantially similar to those contained in the CHX Holdings documents, which would apply directly to the upstream owners.²³ These provisions specify that no person, either alone or with its Related Persons,²⁴ shall be permitted at

¹³ 15 U.S.C. 78c(a)(26).

¹⁴ See Notice, *supra* note 3 at 89545–46.

¹⁵ See Exhibits 5C and 5D.

¹⁶ See Exhibits 5A and 5B.

¹⁷ See Exhibit 5E.

¹⁸ See Exhibits 5F and 5G.

¹⁹ See Exhibit 5H. See *infra* note 23.

²⁰ See Exhibit 5I.

²¹ See Exhibit 5J.

²² See Exhibit 5K.

²³ The current CHX Holdings Certificate contains ownership concentration and voting concentration limitations that are similar to those being proposed by the Exchange. In order to effect the Transaction, the CHX Holdings Board of Directors has waived the applicability of those limitations so that CHX Holdings can become a wholly owned subsidiary of N.A. Casin Holdings. See Exhibit 5H.

²⁴ As set forth in the proposed certificates of incorporation of N.A. Casin Holdings and CHX Holdings, the term “Related Persons” shall mean: “(1) with respect to any Person, any executive officer (as such term is defined in Rule 3b–7 under the Securities Exchange Act of 1934 (“Exchange Act”)) director, general partner, manager or managing member, as applicable, and all “affiliates” and “associates” of such Person (as those terms are defined in Rule 12b–2 under the Exchange Act), and other Person(s) whose beneficial ownership of shares of stock of the Corporation with the power to vote on any matter

any time to own beneficially shares of stock of CHX Holdings or N.A. Casin Holdings representing in the aggregate more than 40% of the then outstanding votes entitled to be cast on any matter unless specific procedures are followed prior to acquiring shares in excess of the ownership limitation.²⁵ Furthermore, as proposed, no Exchange Participant, either alone or with its Related Persons, shall be permitted at any time to own beneficially shares of stock of CHX Holdings or N.A. Casin Holdings representing in the aggregate more than 20% of the then outstanding votes entitled to be cast on any matter.²⁶ In addition, no person that is subject to any statutory disqualification as defined in Section 3(a)(39) of the Exchange Act shall be permitted at any time to own beneficially, either alone or with its Related Persons, shares of stock of CHX Holdings or N.A. Casin Holdings representing in the aggregate more than 20% of the then outstanding votes entitled to be cast on any matter.²⁷ CHX also proposes cure provisions that would require CHX Holdings or N.A. Casin Holdings, as applicable, to call shares held in excess of these ownership limitations and to not register any shares transferred in violation of these ownership limitations.²⁸

Additionally, both the certificates of incorporation of CHX Holdings and N.A. Casin Holdings would preclude any stockholder, either alone or with its Related Persons, from voting more than 20% of the then outstanding shares entitled to be cast on any matter unless specific procedures are followed prior to voting in excess of the limitation.²⁹ Similarly, no person, either alone or with its Related Persons, would be permitted to enter into an agreement,

would be aggregated with such first Person's beneficial ownership of such stock or deemed to be beneficially owned by such first Person pursuant to Rules 13d-3 and 13d-5 under the Exchange Act; and (2) in the case of any Person constituting a member (as that term is defined in Section 3(a)(3)(A) of the Exchange Act) of CHX (defined in the Rules of the Chicago Stock Exchange, Inc. ("CHX Rules"), as such rules may be amended from time to time, as a "Participant") for so long as CHX remains a registered national securities exchange, such Person and any broker or dealer with which such Person is associated; and (3) any other Person(s) with which such Person has any agreement, an arrangement or understanding (whether or not in writing) to act together for the purpose of acquiring, voting, holding or disposing of shares of the stock of the Corporation; and (4) in the case of a Person that is a natural person, any relative or spouse of such Person, or any relative of such spouse, who has the same home as such Person or who is a director or officer of the Corporation or any of its parents or subsidiaries."

²⁸ See *id.*

²⁹ See *id.*

plan, or other arrangement that would result in an aggregate of more than 20% of the then outstanding votes entitled to be cast on a matter to not be voted unless specific procedures are followed prior to entering into such an agreement, plan, or arrangement in violation.³⁰ The certificates of incorporation would require that CHX Holdings or N.A. Casin Holdings, as applicable, disregard any votes cast in excess of the voting limitations.³¹

III. Summary of the Comments

The Commission received four comments regarding the proposed rule change.³² The Commission also received one comment letter stating that, contrary to what the Ciccarelli Letter stated, the Ciccarelli Letter was not submitted by or on behalf of the Global Investigative Journalism Network.³³ The Exchange submitted a letter responding to the comments generally and a letter responding to the Ciccarelli Letter.³⁴

In general, three of the commenters express concern over the proposed upstream ownership of CHX.³⁵ One commenter questions whether the Chinese government may influence Chongqing Casin, stating that Chongqing Casin is involved in a number of Chinese market sectors that require close ties to the state, particularly in state-sensitive environmental protection areas, that its financial assets were originally state-controlled, and that its chairman sits on an industry council overseen directly by the mayor of the Chongqing Municipality.³⁶ The commenter states that, in particular, Chinese ownership or involvement presents risks as Chinese government-sponsored cyber-attacks have been conducted to devalue foreign businesses and steal intellectual property and proprietary data.³⁷ This commenter asserts that the United States government has been unable to adequately address transparency concerns with regard to the operations of Chinese businesses.³⁸ In its first response to comments, CHX affirms that no prospective investor controls, or is controlled by, or is under common control with, a governmental entity or

any political subdivision thereof, including the Chinese government.³⁹

Another commenter argues that due to jurisdiction limitations and transparency concerns, the Commission cannot exercise proper regulatory oversight under the current proposal.⁴⁰ In response, CHX states that it believes that its rules are consistent with the requirements of the Exchange Act, and that the CHX rules and Exchange Act contain various provisions that would facilitate the ability of U.S. regulators, including the Commission, to monitor, compel and enforce compliance by each of the upstream owners, particularly in that upstream owners would be required to adhere to the ownership and voting limitations; submit to U.S. regulatory jurisdiction and maintain agents in the U.S. for the service of process; maintain open books and records related to their ownership of CHX and keep such books and records in the U.S.; and refrain from interfering with, and give due consideration to, the SRO function of CHX.⁴¹ CHX also asserts that, pursuant to the Exchange Act, the Exchange is subject to direct and rigorous oversight by the Commission, which includes, among other things, frequent examinations of various aspects of CHX operations by Commission staff, including security and trading protocols, as well as Commission approval of certain regulatory, operational, and strategic initiatives prior to implementation by CHX.⁴²

This commenter also questions the identity of the proposed upstream owners and the validity of CHX's representation that there are no Related Persons among the proposed upstream owners other than Castle YAC and N.A. Casin Group.⁴³ The commenter asserts that contrary to CHX's representations in the Notice, several of the proposed upstream owners may be affiliated.⁴⁴ In addition, the commenter argues that Chongqing Casin has virtual control over Raptor and Saliba due to the put agreements.⁴⁵ The commenter therefore concludes that after the proposed transaction, approximately 99% of the voting stock in CHX would be controlled by Chinese entities or affiliated shell nominees.⁴⁶ In response, CHX asserts that 50.5% of CHX will be indirectly owned by U.S. citizens, and

⁴⁴ See *id.* at 2-3.

⁴⁵ See *id.* at 3.

⁴⁶ See *id.* at 2.

that it has not misrepresented any facts regarding the Transaction.⁴⁷ CHX reaffirms the representations that it made in the Notice that the only Related Persons among the prospective owners are Castle YAC and N.A. Casin Group, there are no other Related Persons among the prospective owners, and that none of the prospective owners directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, a governmental entity or subdivision thereof.⁴⁸ CHX notes that each of these representations is supported by an opinion of counsel provided to the Commission by outside counsel for CHX.⁴⁹ CHX asserts that, as described in the Notice, Xian Tong Enterprises, Inc. and Castle YAC are controlled by U.S. citizens, *Quiling Luo and Jay Lu, respectively*.⁵⁰ CHX also states that under the terms of the Saliba and Raptor put agreements, N.A. Casin Holdings could not compel Saliba or Raptor to exercise their put options, and that in the event that either the Saliba or Raptor put agreement is exercised, the CHX rules would require the resulting ownership structure to comport with the ownership and voting limitations.⁵¹ In addition, CHX states that it “provided [the Committee for Foreign Investment in the United States (“CFIUS”)] with detailed information regarding the [p]rospective [o]wners, which recently concluded its investigation into the [p]roposed Transaction and found no unresolved national security concerns.”⁵²

This commenter also asserts that there are few or no controls in place at the upstream corporate ownership level that would prevent the upstream owners from transferring their voting power in CHX to what the commenter opines could be more opaque owners, including those that involve the Chinese government.⁵³ In response, CHX represents that no prospective owner and its Related Persons would maintain an equity interest in N.A. Casin Holdings in excess of the 40% ownership limitation, and that no prospective owner and its Related Persons would be permitted to exercise voting power in excess of the 20% voting limitation.⁵⁴ CHX also responds that the proposed governance documents for N.A. Casin Holdings and

CHX Holdings provide robust enforcement mechanisms for the ownership and voting limitations, and that the CHX board’s composition would be required to meet certain independence requirements.⁵⁵ As described above, CHX notes that the CHX rules and Exchange Act contain various provisions that would facilitate the ability of U.S. regulators, including the Commission, to monitor, compel and enforce compliance by each of the upstream owners.⁵⁶ CHX states that in the event that a prospective owner does not comply with the ownership or voting limitations, the proposed governance documents enable the relevant holding companies to cure non-compliance.⁵⁷

Two commenters assert that the proposed acquisition may present financial security risks to investors and the U.S. marketplace.⁵⁸ One of these commenters raises concerns that a bad actor with access to a national stock exchange’s data could use information available through brokerage records and the Consolidated Audit Trail to engage in spear phishing, blackmail attempts, and other similar attacks.⁵⁹ In its response, CHX states that CFIUS investigated the Transaction and “CFIUS determined that there were no unresolved national security concerns with respect to the [p]roposed Transaction. . . .”⁶⁰

Finally, three commenters express concern regarding the length of the comment period and the timing of the filing over the holiday season.⁶¹ Two of the commenters request that the Commission extend the comment period.⁶² In response, CHX states that it has been in regular contact with the Commission’s staff since the merger agreement was executed, and that the timing of the filing was not intended to circumvent thorough Commission review of the proposed rule change.⁶³

IV. Proceedings To Determine Whether To Approve or Disapprove SR–CHX–2016–20 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act⁶⁴ to determine whether the proposed rule change should be approved or disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as stated below, the Commission seeks and encourages interested persons to provide comments on the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Exchange Act,⁶⁵ the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the proposed rule change’s consistency with Section 6(b)(1) of the Exchange Act, which requires that a national securities exchange is so organized and has the capacity to be able to carry out the purposes of the Exchange Act and to comply, and to enforce compliance by its members and persons associated with its members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the exchange. In addition, the Commission is instituting proceedings to allow for additional analysis of the proposed rule change’s consistency with Section 6(b)(5) of the Exchange Act, which requires, among other things, that the rules of a national securities exchange are designed to protect investors and the public interest.

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the issues identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposal is consistent with Sections 6(b)(1), 6(b)(5), or any other provision of the Exchange Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of

views, data, and arguments, the Commission will consider, pursuant to Rule 19b-4, any request for an opportunity to make an oral presentation.⁶⁶

Interested persons are invited to submit written data, views, and arguments regarding whether the proposal should be approved or disapproved by February 21, 2017. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by March 6, 2017. The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, in addition to any other comments they may wish to submit about the proposed rule change.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CHX-2016-20 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Numbers SR-CHX-2016-20. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE.,

Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of these filings also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CHX-2016-20 and should be submitted on or before February 21, 2017. Rebuttal comments should be submitted by March 6, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶⁷

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79783; File No. SR-CBOE-2016-080]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To Amend CBOE Rule 6.53C

January 12, 2017.

On November 17, 2016, Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend CBOE Rule 6.53C to allow complex orders in Hybrid 3.0 classes consisting of series in the group authorized for trading on the Hybrid 3.0 Platform and series in the group authorized for trading on the Hybrid Trading System to be executed electronically. The proposed rule change was published for comment in the **Federal Register** on December 2, 2016.³ On December 30, 2016, CBOE filed Amendment No. 1 to the proposal. The Commission has received no

comments regarding the proposed rule change.

Section 19(b)(2) of the Act⁴ provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is January 16, 2017.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on the proposed rule change, as modified by Amendment No. 1. Accordingly, pursuant to Section 19(b)(2)(A)(ii)(I) of the Act,⁵ the Commission designates March 2, 2017, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File Number SR-CBOE-2016-080), as modified by Amendment No. 1.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79779; File No. 4-678]

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d-2; Notice of Filing of Proposed Amended Plan for the Allocation of Regulatory Responsibilities Among the Financial Industry Regulatory Authority, Inc., Miami International Securities Exchange, LLC, and MIAX PEARL, LLC

January 12, 2017.

Pursuant to Section 17(d) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 17d-2 thereunder,² notice is hereby given that on January 12, 2017, Miami International Securities Exchange, LLC (“MIAX”), MIAX PEARL, LLC (“MIAX PEARL”), and the Financial Industry Regulatory Authority, Inc. (“FINRA”) (together, the “Parties”) filed with the Securities and Exchange Commission (“Commission” or “SEC”) an amended plan for the allocation of regulatory responsibilities, dated January 11, 2017 (“17d-2 Plan” or the “Plan”). The Commission is publishing this notice to solicit comments on the 17d-2 Plan from interested persons.

I. Introduction

Section 19(g)(1) of the Act,³ among other things, requires every self-regulatory organization (“SRO”) registered as either a national securities exchange or national securities association to examine for, and enforce compliance by, its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO’s own rules, unless the SRO is relieved of this responsibility pursuant to Section 17(d) or Section 19(g)(2) of the Act.⁴ Without this relief, the statutory obligation of each individual SRO could result in a pattern of multiple examinations of broker-dealers that maintain memberships in more than one SRO (“common members”). Such regulatory duplication would add unnecessary expenses for common members and their SROs.

Section 17(d)(1) of the Act⁵ was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication.⁶ With respect to

a common member, Section 17(d)(1) authorizes the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes, rules, and regulations, or to perform other specified regulatory functions.

To implement Section 17(d)(1), the Commission adopted two rules: Rule 17d-1 and Rule 17d-2 under the Act.⁷ Rule 17d-1 authorizes the Commission to name a single SRO as the designated examining authority (“DEA”) to examine common members for compliance with the financial responsibility requirements imposed by the Act, or by Commission or SRO rules.⁸ When an SRO has been named as a common member’s DEA, all other SROs to which the common member belongs are relieved of the responsibility to examine the firm for compliance with the applicable financial responsibility rules. On its face, Rule 17d-1 deals only with an SRO’s obligations to enforce member compliance with financial responsibility requirements. Rule 17d-1 does not relieve an SRO from its obligation to examine a common member for compliance with its own rules and provisions of the federal securities laws governing matters other than financial responsibility, including sales practices and trading activities and practices.

To address regulatory duplication in these and other areas, the Commission adopted Rule 17d-2 under the Act.⁹ Rule 17d-2 permits SROs to propose joint plans for the allocation of regulatory responsibilities with respect to their common members. Under paragraph (c) of Rule 17d-2, the Commission may declare such a plan effective if, after providing for appropriate notice and comment, it determines that the plan is necessary or appropriate in the public interest and for the protection of investors; to foster cooperation and coordination among the SROs; to remove impediments to, and foster the development of, a national market system and a national clearance and settlement system; and is in conformity with the factors set forth in Section 17(d) of the Act. Commission approval of a plan filed pursuant to Rule 17d-2 relieves an SRO of those

regulatory responsibilities allocated by the plan to another SRO.

II. The Plan

On November 19, 2014, the Commission declared effective the Plan entered into between FINRA and MIAX for allocating regulatory responsibility pursuant to Rule 17d-2.¹⁰ The Plan is intended to reduce regulatory duplication for firms that are common members of both MIAX and FINRA. The plan reduces regulatory duplication for firms that are members of MIAX and FINRA by allocating regulatory responsibility with respect to certain applicable laws, rules, and regulations. Included in the Plan is an exhibit that lists every MIAX rule for which FINRA bears responsibility under the Plan for overseeing and enforcing with respect to MIAX members that are also members of FINRA and the associated persons therewith.

III. Proposed Amendment to Plan

On January 12, 2017, the parties submitted a proposed amendment to the Plan. The primary purpose of the amendment is to add MIAX PEARL as a Participant to the Plan. The text of the proposed amended 17d-2 plan is as follows (additions are *italicized*; deletions are [bracketed]):

Agreement [Between] Among Financial Industry Regulatory Authority, Inc., [and] Miami International Securities Exchange, LLC and MIAX PEARL, LLC Pursuant to Rule 17d-2 Under the Securities Exchange Act of 1934

This Agreement, by and [between] among the Financial Industry Regulatory Authority, Inc. (“FINRA”), [and] Miami International Securities Exchange, LLC (“MIAX”) and MIAX PEARL, LLC (“MIAX PEARL”), is made this [13th] 11th day of [October] January, 201[4] 7 (the “Agreement”), pursuant to Section 17(d) of the Securities Exchange Act of 1934 (the “Exchange Act”) and Rule 17d-2 thereunder, which permits agreements between self-regulatory organizations to allocate regulatory responsibility to eliminate regulatory duplication. FINRA, [and] MIAX and MIAX PEARL may be referred to individually as a “party” and together as the “parties.”

This Agreement amends and restates the agreement entered into between FINRA and MIAX on October 13, 2014, entitled “Agreement between Financial Industry Regulatory Authority, Inc. and Miami International Securities

Exchange, LLC Pursuant to Rule 17d-2 under the Securities Exchange Act of 1934,” and any subsequent amendments thereafter.

Whereas, [FINRA and MIAx] the parties desire to reduce duplication in the examination of their [Dual] Common Members (as defined herein) and in the filing and processing of certain registration and membership records; and

Whereas, [FINRA and MIAx] the parties desire to execute an agreement covering such subjects pursuant to the provisions of Rule 17d-2 under the Exchange Act and to file such agreement with the Securities and Exchange Commission (the “SEC” or “Commission”) for its approval.

Now, therefore, in consideration of the mutual covenants contained hereinafter, [FINRA and MIAx] the parties hereby agree as follows:

1. *Definitions.* Unless otherwise defined in this Agreement or the context otherwise requires, the terms used in this Agreement shall have the same meaning as they have under the Exchange Act and the rules and regulations thereunder. As used in this Agreement, the following terms shall have the following meanings:

(a) “MIAx Rules,” “MIAx PEARL Rules” or “FINRA Rules” shall mean: (i) The rules of MIAx or MIAx PEARL, respectively, or (ii) the rules of FINRA, respectively, as the rules of an exchange or association are defined in Exchange Act Section 3(a)(27).

(b) “Common Rules” shall mean MIAx Rules and MIAx PEARL Rules that are substantially similar to the applicable FINRA Rules and certain provisions of the Exchange Act and SEC rules set forth on *Exhibit 1* in that examination for compliance with such provisions and rules would not require FINRA to develop one or more new examination standards, modules, procedures, or criteria in order to analyze the application of the provision or rule, or a [Dual] Common Member’s activity, conduct, or output in relation to such provision or rule. *Common Rules shall not include any provisions regarding (i) notice, reporting or any other filings made directly to or from MIAx or MIAx PEARL, (ii) compliance with other referenced MIAx or MIAx PEARL Rules that are not Common Rules, (iii) exercise of discretion including, but not limited to exercise of exemptive authority, by MIAx or MIAx PEARL, (iv) prior written approval of MIAx or MIAx PEARL and (v) payment of fees or fines to MIAx or MIAx PEARL.*

(c) “[Dual] Common Members” shall mean [those MIAx] members [that are

also members of FINRA and the associated persons therewith] of FINRA and at least one of MIAx or MIAx PEARL.

(d) “Effective Date” shall be the date this Agreement is approved by the Commission.

(e) “Enforcement Responsibilities” shall mean the conduct of appropriate proceedings, in accordance with FINRA’s Code of Procedure (the Rule 9000 Series) and other applicable FINRA procedural rules, to determine whether violations of Common Rules have occurred, and if such violations are deemed to have occurred, the imposition of appropriate sanctions as specified under FINRA’s Code of Procedure and sanctions guidelines.

(f) “Regulatory Responsibilities” shall mean the examination responsibilities and Enforcement Responsibilities relating to compliance by the [Dual] Common Members with the Common Rules and the provisions of the Exchange Act and the rules and regulations thereunder, and other applicable laws, rules and regulations, each as set forth on *Exhibit 1* attached hereto.

2. *Regulatory and Enforcement Responsibilities.* FINRA shall assume Regulatory Responsibilities and Enforcement Responsibilities for [Dual] Common Members. Attached as *Exhibit 1* to this Agreement and made part hereof, MIAx and MIAx PEARL furnished FINRA with a current list of Common Rules and certified to FINRA that such rules that are MIAx Rules and MIAx PEARL Rules are substantially similar to the corresponding FINRA Rules (the “Certification”). FINRA hereby agrees that the rules listed in the Certification are Common Rules as defined in this Agreement. Each year following the Effective Date of this Agreement, or more frequently if required by changes in [either the rules of MIAx or FINRA] the rules of the parties, MIAx and MIAx PEARL shall submit an updated list of Common Rules to FINRA for review which shall add MIAx Rules or MIAx PEARL Rules not included in the current list of Common Rules that qualify as Common Rules as defined in this Agreement; delete MIAx Rules or MIAx PEARL Rules included in the current list of Common Rules that no longer qualify as Common Rules as defined in this Agreement; and confirm that the remaining rules on the current list of Common Rules continue to be MIAx Rules or MIAx PEARL Rules that qualify as Common Rules as defined in this Agreement. Within 30 days of receipt of such updated list, FINRA shall confirm in writing whether the rules listed in

any updated list are Common Rules as defined in this Agreement. Notwithstanding anything herein to the contrary, it is explicitly understood that the term “Regulatory Responsibilities” does not include, and MIAx and MIAx PEARL shall retain full responsibility for (unless otherwise addressed by separate agreement or rule) (collectively, the “Retained Responsibilities”) the following:

(a) Surveillance, examination, investigation and enforcement with respect to trading activities or practices involving MIAx’s and MIAx PEARL’s own marketplace;

(b) registration pursuant to [its] their applicable rules of associated persons (i.e., registration rules that are not Common Rules);

(c) discharge of [its] their duties and obligations as a Designated Examining Authority pursuant to Rule 17d-1 under the Exchange Act; and

(d) any MIAx Rules and MIAx PEARL Rules that are not Common Rules as provided in paragraph 6.

3. *[Dual] Common Members.* Prior to the Effective Date, MIAx and MIAx PEARL shall furnish FINRA with a current list of [Dual] Common Members, which shall be updated no less frequently than once each quarter.

4. *No Charge.* There shall be no charge to MIAx and MIAx PEARL by FINRA for performing the Regulatory Responsibilities and Enforcement Responsibilities under this Agreement except as hereinafter provided. FINRA shall provide MIAx and MIAx PEARL with ninety (90) days advance written notice in the event FINRA decides to impose any charges to MIAx and MIAx PEARL for performing the Regulatory Responsibilities under this Agreement. If FINRA determines to impose a charge, MIAx and MIAx PEARL shall have the right at the time of the imposition of such charge to terminate this Agreement; provided, however, that FINRA’s Regulatory Responsibilities under this Agreement shall continue until the Commission approves the termination of this Agreement.

5. *Applicability of Certain Laws, Rules, Regulations or Orders.* Notwithstanding any provision hereof, this Agreement shall be subject to any statute, or any rule or order of the SEC. To the extent such statute, rule or order is inconsistent with one or more provisions of this Agreement, the statute, rule or order shall supersede the provision(s) hereof to the extent necessary to be properly effectuated and the provision(s) hereof in that respect shall be null and void.

6. *Notification of Violations.* In the event that FINRA becomes aware of

apparent violations of any MIAx Rules or MIAx PEARL Rules, which are not listed as Common Rules, discovered pursuant to the performance of the Regulatory Responsibilities assumed hereunder, FINRA shall notify MIAx and MIAx PEARL of those apparent violations for such response as MIAx and MIAx PEARL deem[s] appropriate. In the event that MIAx or MIAx PEARL becomes aware of apparent violations of any Common Rules, discovered pursuant to the performance of the Retained Responsibilities, MIAx and MIAx PEARL shall notify FINRA of those apparent violations and such matters shall be handled by FINRA as provided in this Agreement. Apparent violations of Common Rules shall be processed by, and enforcement proceedings in respect thereto shall be conducted by FINRA as provided hereinbefore; provided, however, that in the event a [Dual] Common Member is the subject of an investigation relating to a transaction on MIAx or MIAx PEARL, MIAx and MIAx PEARL may in [its] their discretion assume concurrent jurisdiction and responsibility. Each party agrees to make available promptly all files, records and witnesses necessary to assist the other in its investigation or proceedings.

7. Continued Assistance.

(a) FINRA shall make available to MIAx and MIAx PEARL all information obtained by FINRA in the performance by it of the Regulatory Responsibilities hereunder with respect to the [Dual] Common Members subject to this Agreement. In particular, and not in limitation of the foregoing, FINRA shall furnish MIAx and MIAx PEARL any information it obtains about [Dual] Common Members which reflects adversely on their financial condition. MIAx and MIAx PEARL shall make available to FINRA any information coming to its attention that reflects adversely on the financial condition of [Dual] Common Members or indicates possible violations of applicable laws, rules or regulations by such firms.

(b) The parties agree that documents or information shared shall be held in confidence, and used only for the purposes of carrying out their respective regulatory obligations. [Neither] No party shall assert regulatory or other privileges as against [the] any other with respect to documents or information that is required to be shared pursuant to this Agreement.

(c) The sharing of documents or information [between] among the parties pursuant to this Agreement shall not be deemed a waiver as against third parties of regulatory or other privileges

relating to the discovery of documents or information.

8. *Statutory Disqualifications.* When FINRA becomes aware of a statutory disqualification as defined in the Exchange Act with respect to a [Dual] Common Member, FINRA shall determine pursuant to Sections 15A(g) and/or Section 6(c) of the Exchange Act the acceptability or continued applicability of the person to whom such disqualification applies and keep MIAx and MIAx PEARL advised of its actions in this regard for such subsequent proceedings as MIAx and MIAx PEARL may initiate.

9. *Customer Complaints.* MIAx and MIAx PEARL shall forward to FINRA copies of all customer complaints involving [Dual] Common Members received by MIAx and MIAx PEARL relating to FINRA's Regulatory Responsibilities under this Agreement. It shall be FINRA's responsibility to review and take appropriate action in respect to such complaints.

10. *Advertising.* FINRA shall assume responsibility to review the advertising of [Dual] Common Members subject to the Agreement, provided that such material is filed with FINRA in accordance with FINRA's filing procedures and is accompanied with any applicable filing fees set forth in FINRA Rules.

11. *No Restrictions on Regulatory Action.* Nothing contained in this Agreement shall restrict or in any way encumber the right of [either] any party to conduct its own independent or concurrent investigation, examination or enforcement proceeding of or against [Dual] Common Members, as [either] any party, in its sole discretion, shall deem appropriate or necessary.

12. *Termination.* This Agreement may be terminated by [MIAx or FINRA] any party at any time upon the approval of the Commission after one (1) year's written notice to the other [party] parties (or such shorter time as agreed by the parties), except as provided in paragraph 4.

13. *Arbitration.* In the event of a dispute [between] among the parties as to the operation of this Agreement, [MIAx and FINRA] the parties hereby agree that any such dispute shall be settled by arbitration in Washington, DC in accordance with the rules of the American Arbitration Association then in effect, or such other procedures as the parties may mutually agree upon. Judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction. Each party acknowledges that the timely and complete performance of its obligations pursuant to this Agreement is critical to

the business and operations of the other [party] parties. In the event of a dispute [between] among the parties, the parties shall continue to perform their respective obligations under this Agreement in good faith during the resolution of such dispute unless and until this Agreement is terminated in accordance with its provisions. Nothing in this Section 13 shall interfere with a party's right to terminate this Agreement as set forth herein.

14. *Separate Agreement.* This Agreement is wholly separate from the following agreement: (1) The multiparty Agreement made pursuant to Rule 17d-2 of the Exchange Act among BATS Exchange, Inc., BOX Options Exchange, LLC, Chicago Board Options Exchange, Incorporated, C2 Options Exchange, Incorporated, the International Securities Exchange, LLC, FINRA, MIAx, [the New York Stock Exchange LLC,] NYSE MKT LLC, the NYSE Arca, Inc., The NASDAQ Stock Market LLC, NASDAQ OMX BX, Inc., NASDAQ OMX PHLX LLC, ISE Gemini, LLC, EDGX Exchange, Inc. and [Topaz Exchange, LLC] ISE Mercury, LLC involving the allocation of regulatory responsibilities with respect to common members for compliance with common rules relating to the conduct by broker-dealers of accounts for listed options or index warrants entered as approved by the SEC on [July 26, 2013] February 16, 2016, and as may be amended from time to time; and (2) the multiparty Agreement made pursuant to Rule 17d-2 of the Exchange Act among NYSE MKT LLC, BATS Exchange, Inc., EDGX Exchange, Inc., BOX Options Exchange LLC, NASDAQ OMX BX, Inc., C2 Options Exchange, Incorporated, Chicago Board Options Exchange, Incorporated, International Securities Exchange LLC, ISE Gemini, LLC, ISE Mercury, LLC, FINRA, NYSE Arca, Inc., The NASDAQ Stock Market LLC, NASDAQ OMX PHLX, Inc., and MIAx[, and Topaz Exchange, LLC] involving the allocation of regulatory responsibilities with respect to SRO market surveillance of common members activities with regard to certain common rules relating to listed options approved by the SEC on [July 26, 2013] February 16, 2016, and as may be amended from time to time.

15. *Notification of Members.* [MIAx and FINRA] The parties shall notify [Dual] Common Members of this Agreement after the Effective Date by means of a uniform joint notice.

16. *Amendment.* This Agreement may be amended in writing provided that the changes are approved by [both parties] each party. All such amendments must be filed with and approved by the

Commission before they become effective.

17. *Limitation of Liability.* [Neither FINRA nor MIA] *None of the parties* nor any of their respective directors, governors, officers or employees shall be liable to [the] *any* other party to this Agreement for any liability, loss or damage resulting from or claimed to have resulted from any delays, inaccuracies, errors or omissions with respect to the provision of Regulatory Responsibilities as provided hereby or for the failure to provide any such responsibility, except with respect to such liability, loss or damages as shall have been suffered by [one or the other of FINRA or MIA] *any party* and caused by the willful misconduct of [the other] *another* party or their respective directors, governors, officers or employees. No warranties, express or implied, are made by [FINRA or MIA] *any party hereto* with respect to any of the responsibilities to be performed by [each of] them hereunder.

18. *Relief from Responsibility.* Pursuant to Sections 17(d)(1)(A) and 19(g) of the Exchange Act and Rule 17d-2 thereunder, FINRA, [and] MIA and MIA PEARL join in requesting the

Commission, upon its approval of this Agreement or any part thereof, to relieve MIA and MIA PEARL of any and all responsibilities with respect to matters allocated to FINRA pursuant to this Agreement; provided, however, that this Agreement shall not be effective until the Effective Date.

19. *Severability.* Any term or provision of this Agreement that is invalid or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Agreement or affecting the validity or enforceability of any of the terms or provisions of this Agreement in any other jurisdiction.

20. *Counterparts.* This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, and such counterparts together shall constitute one and the same instrument. *In witness whereof*, each party has executed or caused this Agreement to be executed on its behalf by a duly authorized officer as of the date first written above.

In addition, FINRA shall only have Regulatory Responsibilities to the extent the category of persons subject to MIA registration is the same as FINRA.]

III. Date of Effectiveness of the Proposed Plan and Timing for Commission Action

Pursuant to Section 17(d)(1) of the Act¹¹ and Rule 17d-2 thereunder,¹² February 3, 2017 declare the plan submitted by MIAx, MIAx PEARL, and FINRA, File No. 4-678, to be effective if the Commission finds that the plan is necessary or appropriate in the public interest and for the protection of investors, to foster cooperation and coordination among self-regulatory organizations, or to remove impediments to and foster the development of the national market system and a national system for the clearance and settlement of securities transactions and in conformity with the factors set forth in Section 17(d) of the Act.

IV. Solicitation of Comments

In order to assist the Commission in determining whether to approve the proposed 17d-2 Plan and to relieve MIAx and MIAx PEARL of the responsibilities which would be assigned to FINRA, interested persons are invited to submit written data, views, and arguments concerning the foregoing. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/other.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number 4-678 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, Station Place, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number 4-678. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/other.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the

public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the plan also will be available for inspection and copying at the principal offices of MIAx, MIAx PEARL, and FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number 4-678 and should be submitted on or before February 3, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79775; File No. SR-BatsBZX-2017-01]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees for Use of the Exchange's Equity Options Platform

January 12, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 3, 2017, Bats BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is

publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members⁵ and non-members of the Exchange pursuant to BZX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at www.batstrading.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule for its equity options platform ("BZX Options") to: (i) Add definitions of terms "OCC Customer Volume" or "OCV" and "Options Step-Up Add TCv" to the Definitions section; and (ii) modify the criteria for tiers under footnotes 1 through 13 to reflect the new definition of OCV. The Exchange also proposes to (i) increase the rebate provided in the Customer⁶ Cross-Asset Add Tier under footnote 1; (ii) add a new Step-Up Tier under footnote 1; (iii) eliminate and replace the existing Step-Up Tier under footnote 3 with a new Step-Up Tier; (iv) add Tier 3 under footnote 7; (v) add Tier 2 and a Step-Up Tier under footnote 12; and (v) add a new footnote 14 entitled,

⁵ The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

⁶ As defined in the Exchange's fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

¹² 17 CFR 240.17d-2.

¹³ 17 CFR 200.30-3(a)(34).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(ii).

⁴ 17 CFR 240.19b-4(f)(2).

“Customer Penny Pilot Take Volume Tier.”

New Defined Terms

OCC Customer Volume or OCV. The Exchange proposes to add the definition of “OCC Customer Volume” or “OCV” to the definition section of its fee schedule. OCC Customer Volume or OCV will be defined as the total equity and Exchange Traded Fund (“ETF”) options volume that clears in the Customer range at the Options Clearing Corporation (“OCC”) for the month for which the fees apply, excluding volume on any day that the Exchange experiences an Exchange System Disruption⁷ and on any day with a scheduled early market close.

Options Step-Up Add OCV. The Exchange proposes to replace the definition of “Options Step-Up Add TCV”⁸ with the definition of “Options Step-Up Add OCV” to reflect the new tier qualifications resulting from the change in calculation from Total Consolidated Volume (“TCV”)⁹ to OCV. Similar to the definition of Options Step-Up Add TCV, Options Step-Up Add OCV will be defined as, “ADAV¹⁰ as a percentage of OCV in the relevant baseline month subtracted from current ADAV as a percentage of OCV”. The only difference between the two definitions is replacing the term TCV with OCV.

Tier Qualifications Change

The Exchange proposes to replace current tier qualifications which refer to TCV with a reference to OCV in the tiers under footnotes 1 through 13. Because OCV generally makes up a smaller range than the prior TCV, the Exchange also proposes to amend the percentage of OCV necessary to achieve the tier so that it is substantially identical to the previously required percentage of TCV. Doing so will keep each tier’s criteria relatively unchanged from its current requirements. The rates for each tier are unchanged. Changes to each tier are described below.

Customer Penny Pilot Add Tiers under footnote 1. Customer orders that yield fee code PY¹¹ are given a standard rebate of \$0.25 per contract. Footnote 1 of the fee schedule sets forth eight tiers,

each providing enhanced rebates, ranging from \$0.40 to \$0.53 per contract, to a Member’s order that yields fee code PY upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV¹² equal to or greater than 0.05% of average TCV. As amended, a Member must have an ADV equal to or greater than 0.05% of average OCV.¹³

- Tier 2 currently requires that a Member has an ADV equal to or greater than 0.30% of average TCV. As amended, a Member must have an ADV equal to or greater than 0.40% of average OCV.

- Tier 3 currently requires that a Member has an ADV equal to or greater than 1.00% of average TCV. As amended, a Member must have an ADV equal to or greater than 1.30% of average OCV.

- Tier 4 currently requires that a Member has an ADAV in Customer orders equal to or greater than 1.00% of average TCV. As amended, a Member must have an ADAV in Customer orders equal to or greater than 1.30% of average OCV.

- Tier 5 currently requires that a Member has an: (i) ADAV in Customer orders equal to or greater than 0.60% of average TCV; (ii) ADAV in Market Maker¹⁴ orders equal to or greater than 0.25% of average TCV; and (iii) ADAV in orders on the Exchange equities platform (“BZX Equities”) equal to or greater than 0.30% of average TCV. As amended, a Member must have an: (i) ADAV in Customer orders equal to or greater than 0.80% of average OCV; (ii) ADAV in Market Maker orders equal to or greater than 0.35% of average OCV; and (iii) ADAV in orders on BZX Equities equal to or greater than 0.30% of average TCV.

- Tier 6 currently requires that a Member has an ADAV in Customer orders equal to or greater than 1.30% of average TCV. As amended, a Member must have an ADAV in Customer orders equal to or greater than 1.70% of average OCV.

- The Customer Step-Up Volume Tier currently requires that a Member has an Options Step-Up Add TCV in Customer orders from September 2015 baseline equal to or greater than 0.40%. As amended, a Member must have an Options Step-Up Add OCV in Customer orders from September 2015 baseline equal to or greater than 0.45%.

- The Customer Cross-Asset Add Tier currently requires that a Member has an: (i) ADV equal to or greater than 0.80% of average TCV; and (ii) ADAV on BZX Equities equal to or greater than 0.50% of average TCV. As amended, a Member must have an: (i) ADAV in Customer orders equal to or greater than 0.50% of average OCV; and (ii) ADAV on BZX Equities greater than or equal to 0.50% of average TCV. As a result of the change from requiring a Member to meet a certain threshold of ADV to a certain threshold of ADAV, the Exchange proposes to increase the rebate provided by this tier from \$0.50 to \$0.52 per contract. The Exchange believes an increased rebate more appropriately corresponds with the tier’s more stringent criteria.

Firm,¹⁵ Broker Dealer,¹⁶ and Joint Back Office¹⁷ Penny Pilot Add Volume Tiers under footnote 2. Firm, Broker Dealer and Joint Back Office orders that yield fee code PF¹⁸ are given a standard rebate of \$0.36 per contract. Footnote 2 of the fee schedule sets forth two tiers, each providing enhanced rebates of \$0.43 and \$0.46 per contract to a Member’s order that yields fee codes PF upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an: (i) ADAV in Away Market Maker,¹⁹ Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.80% of average TCV; and (ii) ADV greater than or equal to 1.50% of average TCV. As amended, a Member must have an: (i) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 1.05% of average OCV; and (ii) ADV greater than or equal to 1.95% of average OCV.

- Tier 2 currently requires that a Member has an: (i) ADV greater than or equal to 0.40% of average TCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office greater than or equal to 0.30% of average TCV. As amended, a Member must have an: (i) ADV greater than or equal to 0.50% of average OCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office greater than or equal to 0.40% of average OCV.

¹⁵ *Id.*

¹⁶ *Id.*

¹⁷ *Id.*

¹⁸ Fee code PF is appended to a Member’s Firm, Broker Deal and Joint Back Office orders which add liquidity in Penny Pilot options. As defined in the Exchange’s fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

¹⁹ *Id.*

⁷ An “Exchange System Disruption” means “any day that the Exchange’s system experiences a disruption that lasts for more than 60 minutes during Regular Trading Hours.” *Id.*

⁸ *Id.*

⁹ As defined in the Exchange’s fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

¹⁰ *Id.*

¹¹ Fee code PY is appended to a Member’s Customer orders which add liquidity in Penny Pilot options. *Id.*

¹² *Id.*

¹³ The Exchange proposes to retain the 0.05% requirement as adjusting that number to reflect replacing TCV with OCV will result in a de minimis change in the percentage.

¹⁴ *Id.*

Non-Customer Penny Pilot Take Volume Tiers under footnote 3. Non-Customer orders that yield fee code PP²⁰ are charged a standard fee of \$0.50 per contract. Footnote 3 of the fee schedule sets forth three tiers, each providing reduced fees ranging from \$0.44 to \$0.47 per contract to a Member's order that yields fee codes PP upon satisfying monthly volume criteria.²¹

- Tier 1 currently requires that a Member has an: (i) ADAV in Customer orders greater than or equal to 0.60% of average TCV; (ii) ADAV in Market Maker orders greater than or equal to 0.25% of average TCV and (iii) ADAV on BZX Equities greater than or equal to 0.30% of average TCV. As amended, a Member must have an: (i) ADAV in Customer orders greater than or equal to 0.80% of average OCV; (ii) ADAV in Market Maker orders greater than or equal to 0.35% of average OCV; and (iii) ADAV on BZX Equities greater than or equal to 0.30% of average TCV.

- Tier 2 currently requires that a Member has an ADAV in Customer orders greater than or equal to 1.00% of average TCV. As amended, a Member must have an ADAV in Customer orders greater than or equal to 1.30% of average OCV.

- Tier 3 currently requires that a Member has an ADAV in Customer orders greater than or equal to 1.30% of average TCV. As amended, a Member must have an ADAV in Customer orders greater than or equal to 1.70% of average OCV.

National Best Bid or Best Offer ("NBBO") Setter Tiers under footnote 4. Footnote 4 of the fee schedule sets forth five tiers, each providing enhanced rebates, ranging from \$0.02 to \$0.05 per contract, to a Member's orders that establish a new NBBO and yield fee codes PF, PM²² or PN²³ upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As

amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an ADV greater than or equal to 1.00% of average TCV. As amended, a Member must have an ADV greater than or equal to 1.30% of average OCV.

- Tier 3 currently requires that a Member has an: (i) ADV greater than or equal to 0.40% of average TCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.30% of average TCV. As amended, a Member must have an: (i) ADV greater than or equal to 0.50% of average OCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.40% of average OCV.

- Tier 4 currently requires that a Member has an ADAV in Market Maker²⁴ orders greater than or equal to 0.40% of average TCV. As amended a Member must have an ADAV in Market Maker orders greater than or equal to 0.50% of average OCV.

- Tier 5 currently requires that a Member has an ADAV in Non-Customer orders greater than or equal to 2.30% of average TCV. As amended a Member must have an ADAV in Non-Customer orders greater than or equal to 3.00% of average OCV.

Quoting Incentive Program ("QIP") Tiers under footnote 5. Footnote 5 sets forth four tiers each providing additional rebates ranging from \$0.02 to \$0.05 per contract for an order appended with fee code PM or NM²⁵ that adds liquidity to the BZX Options order book in options classes in which a Member is a Market Maker registered on BZX Options pursuant to Exchange Rule 22.2. A Market Maker must be registered with BZX Options in an average of 20% or more of the associated options series in a class in order to qualify for QIP rebates for that class.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an ADV greater than or equal to 1.00% of average TCV. As amended, a Member must have an ADV

greater than or equal to 1.30% of average OCV.

- Tier 3 currently requires that a Member has an ADV greater than or equal to 2.50% of average TCV. As amended, a Member must have an ADV greater than or equal to 3.25% of average OCV.

- Tier 4 currently requires that a Member has an ADV [sic] in Market Maker orders greater than or equal to 0.40% of average TCV. As amended, a Member must have an ADV [sic] in Market Maker orders greater than or equal to 0.50% of average OCV.

Market Maker Penny Pilot Add Volume Tiers under footnote 6. Footnote 6 of the fee schedule sets forth two tiers, each providing enhanced rebates of \$0.40 and \$0.42 per contract to a Member's order that yields fee code PM upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an: (i) ADAV in Market Maker and/or Away Market Maker orders greater than or equal to 1.00% of average TCV; and (ii) ADV greater than or equal to 2.00% of average TCV. As amended, a Member must have an: (i) ADAV in Market Maker and/or Away Market Maker orders greater than or equal to 1.30% of average OCV; and (ii) ADV greater than or equal to 2.60% of average OCV.

Market Maker Non-Penny Pilot Add Volume Tiers under footnote 7. Footnote 7 of the fee schedule sets forth two tiers, each providing enhanced rebates of \$0.45 and \$0.52 per contract to a Member's order that yields fee code NM upon satisfying monthly volume criteria.²⁶

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an ADV greater than or equal to 1.00% of average TCV. As amended, a Member must have an ADV greater than or equal to 1.30% of average OCV.

Firm, Broker Dealer, and Joint Back Office Non-Penny Pilot Add Volume Tiers under footnote 8. Firm, Broker Dealer and Joint Back Office orders that

²⁰ Fee code PP is appended to a Member's Non-Customer orders which remove liquidity in Penny Pilot options. *Id.*

²¹ Footnote 3 also includes an additional Step-Up Tier under which Members orders that yield fee code PP receive an additional \$0.01 discount upon satisfying certain criteria. As described in more detail below, the Exchange proposes to delete this tier with a new Step-Up Tier as part of this filing.

²² Fee code PM is appended to a Member's Market Maker orders which add liquidity in Penny Pilot options and provides a standard rebate of \$0.35 per contract. *Id.*

²³ Fee code PN is appended to a Member's Away Market Maker orders which add liquidity in Penny Pilot options and provides a standard rebate of \$0.30 per contract. As defined in the Exchange's fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

²⁴ *Id.*

²⁵ Fee code NM is appended to a Member's Market Maker orders which add liquidity in Non-Penny Pilot options. As defined in the Exchange's fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

²⁶ As described in more detail below, the Exchange also proposes to adopt a third tier under footnote 7 as part of this filing.

yield fee code NF²⁷ are given a standard rebate of \$0.30 per contract. Footnote 8 of the fee schedule sets forth three tiers, each providing enhanced rebates ranging from \$0.45 to \$0.69 per contract to a Member's order that yields fee codes NF upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.15% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.20% of average OCV.

- Tier 2 currently requires that a Member has an ADV greater than or equal to 0.25% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.35% of average OCV.

- Tier 3 currently requires that a Member has an: (i) ADV greater than or equal to 1.75% of average TCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer, and Joint Back Office orders greater than or equal to 1.25% of average TCV. As amended, a Member must have an: (i) ADV greater than or equal to 2.30% of average OCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer, and Joint Back Office orders greater than or equal to 1.65% of average OCV.

Professional Penny Pilot Add Volume Tiers under footnote 9. Professional orders that yield fee code PA²⁸ are given a standard rebate of \$0.25 per contract. Footnote 9 of the fee schedule sets forth four tiers, each providing enhanced rebates ranging from \$0.42 to \$0.48 per contract to a Member's order that yields fee codes PA upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADAV in Customer and Professional orders greater than or equal to 0.10% of average TCV. As amended, a Member must have an ADAV in Customer and Professional orders greater than or equal to 0.15% of average OCV.

- Tier 2 currently requires that a Member has an ADAV in Customer and Professional orders greater than or equal to 0.20% of average TCV. As amended, a Member must have an ADAV in Customer and Professional orders greater than or equal to 0.25% of average OCV.

- Tier 3 currently requires that a Member has an ADAV in Customer and Professional orders greater than or equal to 0.30% of average TCV. As amended,

a Member must have an ADAV in Customer and Professional orders greater than or equal to 0.40% of average OCV.

- Tier 4 currently requires that a Member has an ADAV in Customer and Professional orders greater than or equal to 0.50% of average TCV. As amended a Member must have an ADAV in Customer and Professional orders greater than or equal to 0.65% of average OCV.

Away Market Maker Penny Pilot Add Volume Tiers under footnote 10. Away Market Maker orders that yield fee code PN are given a standard rebate of \$0.30 per contract. Footnote 10 of the fee schedule sets forth three tiers, each providing enhanced rebates ranging from \$0.40 to \$0.46 per contract to a Member's order that yields fee code PN upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an: (i) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.80% of average TCV; and (ii) ADV greater than or equal to 1.50% of average TCV. As amended, a Member must have an: (i) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 1.05% of average OCV; and (ii) ADV greater than or equal to 1.95% of average OCV.

- Tier 3 currently requires that a Member has an: (i) ADV greater than or equal to 0.40% of average TCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.30% of average TCV. As amended, a Member must have an: (i) ADV greater than or equal to 0.50% of average OCV; and (ii) ADAV in Away Market Maker, Firm, Broker Dealer and Joint Back Office orders greater than or equal to 0.40% of average OCV.

Away Market Maker Non-Penny Pilot Add Volume Tiers under footnote 11. Away Market Maker orders that yield fee code NN²⁹ are given a standard rebate of \$0.30 per contract. Footnote 11 of the fee schedule sets forth two tiers, each providing enhanced rebates of \$0.40 and \$0.52 per contract to a Member's order that yields fee code NN

upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an ADV greater than or equal to 0.30% of average TCV. As amended, a Member must have an ADV greater than or equal to 0.40% of average OCV.

- Tier 2 currently requires that a Member has an ADV greater than or equal to 1.00% of average TCV. As amended, a Member must have an ADV greater than or equal to 1.30% of average OCV.

Customer Non-Penny Pilot Add Volume Tier under footnote 12. Customer orders that yield fee code NY³⁰ are given a standard rebate of \$0.85 per contract. Footnote 12 of the fee schedule sets forth one tier, providing an enhanced rebate of \$1.00 per contract to a Member's order that yields fee code NY upon satisfying monthly volume criteria.³¹

- Tier 1 currently requires that a Member has an ADAV in Customer orders greater than or equal to 0.70% of average TCV. As amended a Member must have an ADAV in Customer orders greater than or equal to 0.90% of average OCV.

Non-Customer Non-Penny Pilot Take Volume Tiers, under footnote 13. Non-Customer orders that yield fee code NP³² are charged a standard fee of \$1.07 per contract. Footnote 13 of the fee schedule sets forth three tiers, each providing reduced fees ranging from \$1.01 to \$1.02 per contract to a Member's order that yields fee code NP upon satisfying monthly volume criteria.

- Tier 1 currently requires that a Member has an: (i) ADAV in Customer orders greater than or equal to 0.60% of average TCV; (ii) ADAV in Market Maker orders greater than or equal to 0.25% of average TCV; and (iii) ADAV on BZX Equities greater than or equal to 0.30% of average TCV. As amended, a Member must have an: (i) ADAV in Customer orders greater than or equal to 0.80% of average OCV; (ii) ADAV in Market Maker orders greater than or equal to 0.35% of average OCV; and (iii) ADAV on BZX Equities greater than or equal to 0.30% of average TCV.

- Tier 2 currently requires that a Member has an ADAV in Customer

³⁰ Fee code NY is appended to a Member's Customer orders which add liquidity in Non-Penny Pilot options. As defined in the Exchange's fee schedule available at http://www.bats.com/us/options/membership/fee_schedule/bzx/.

³¹ As described in more detail below, the Exchange proposes to implement a second and third tier under footnote 12 as part of this filing.

³² Fee code NP is appended to a Member's Non-Customer orders which remove liquidity in Non-Penny Pilot options. *Id.*

²⁷ Fee code NF is appended to a Member's Firm, Broker Dealer and Joint Back Office orders which add liquidity in Non-Penny Pilot options. *Id.*

²⁸ Fee code PA is appended to a Member's Professional orders which add liquidity in Penny Pilot options. *Id.*

²⁹ Fee code NN is appended to a Member's Away Market Maker orders which add liquidity in Non-Penny Pilot options. *Id.*

orders greater than or equal to 1.00% of average TCV. As amended a Member must have an ADAV in Customer orders greater than or equal to 1.30% of average OCV.

- Tier 3 currently requires that a Member has an ADAV in Customer orders greater than or equal to 1.30% of average TCV. As amended, a Member must have an ADAV in Customer orders greater than or equal to 1.70% of average OCV.

Addition of the Step-Up Tier, Under Footnote 1

As described above, the Exchange currently offers eight Customer Penny Pilot Add Volume Tiers under footnote 1 which provide enhanced rebates ranging from \$0.40 to \$0.53 per contract for orders which yield fee code PY and meet the required criteria. The Exchange now proposes to add a Step-Up Tier which would provide an additional rebate of \$0.02 to orders appended with fee code PY, including those orders that satisfy the required criteria under the tiers listed under footnote 1. To qualify for the additional rebate, a Member must have an Options Step-Up Add OCV in Customer orders from October 2016 baseline equal to or greater than 0.45%.

Elimination and Replacement of the Step-Up Tier Under Footnote 3

As described above, the Exchange currently offers three Non-Customer Penny Pilot Take Volume Tiers under footnote 3 which provide reduced fees of \$0.44 and \$0.47 per contract for orders which yield fee code PP and meet the required criteria. Additionally, footnote 3 provides a Step-Up Tier under which Members may receive an additional discount of \$0.01 per contract for orders appended with fee code PP, including those orders that satisfy the required criteria under the tiers listed under footnote 3. To receive the additional \$0.01 per contract discount, the Member must have an Options Step-Up Add TCV in Customer orders from September 2016 baseline greater than or equal to 0.30%. The Exchange now proposes to delete and replace this Step-Up Tier under footnote 3 with a new Step-Up Tier which would provide a reduced fee of \$0.47 per contract for orders which yield fee code PP and where the Member has an Options Step-Up Add OCV in Customer orders from October 2016 baseline greater than or equal to 0.45%.

Addition of Tier 3 Under Footnote 7

As described above, the Exchange currently offers two Market Maker Non-Penny Pilot Add Volume Tiers under

footnote 7 which provide enhanced rebates of \$0.45 and \$0.52 per contract for orders which yield fee code NM and meet the required criteria. The Exchange now proposes to add Tier 3 under which a Member would receive an enhanced rebate of \$0.65 per contract where that Member has an: (i) ADAV in Market Maker orders in Non-Penny Pilot Securities greater than or equal to 0.20% of average OCV; and (ii) ADAV in Non-Customer orders greater than or equal to 3.00% of average OCV. The Exchange also notes that changes are required to the Standard Rates table of the fee schedule applicable to fee code NM in connection with this change.

Addition of Tier 2 and the Customer Step-Up Tier Under Footnote 12

As described above, the Exchange currently offers one Customer Non-Penny Pilot Add Volume Tier under footnote 12 which provides an enhanced rebate of \$1.00 per contract for orders which yield fee code NY and meet the required criteria. The Exchange now proposes to add two new tiers under footnote 12. First, proposed Tier 2 would provide an enhanced rebate of \$1.05 per contract where that Member has an ADAV in Customer orders greater than or equal to 2.10% of average OCV. Second, the proposed Step-Up Tier will provide an enhanced rebate of \$1.00 per contract where that Member has an Options Step-Up Add OCV in Customer orders from October 2016 baseline greater than or equal to 0.45%. The Exchange also notes that changes are required to the Standard Rates table of the fee schedule applicable to fee code NY in connection with these changes.

Addition of Footnote 14, the Customer Penny Pilot Take Volume Tier

The Exchange proposes to add new footnote 14 entitled, "Customer Penny Pilot Take Volume Tier". Under the proposed Cross-Asset Tier, a Member's orders that yield fee code PC³³ would be charged a reduced fee of \$0.48 per contract where that Member has an: (i) ADAV in Customer orders greater than or equal to 0.50% of average OCV; and (ii) ADAV on BZX Equities greater than or equal to 0.50% of average TCV. The Exchange also notes that changes are required to the Standard Rates table of the fee schedule applicable to fee code PC in connection with this change. In addition, the Exchange proposes to append footnote 14 to fee code PC

within in the Fee Codes and Associated Fees table.

Implementation Date

The Exchange proposes to implement this amendment to its fee schedule on January 3, 2017.³⁴

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,³⁵ in general, and furthers the objectives of Section 6(b)(4),³⁶ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The Exchange believes that the proposed fee changes are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the rates remain competitive with those charged by other venues and, therefore, are reasonable and equitably allocated to Members.

New Defined Terms

The Exchange believes adopting a definition of OCV, utilizing OCV in lieu of TCV, and changing the definition of Options Step-Up Add TCV to Options Step-Up Add OCV are reasonable, fair and equitable, and non-discriminatory because the Exchange also proposed to modify the tier's related criteria in order to maintain substantially identical requirements to qualify for the tier without changing the rate provided for by the tiers. In addition, the amount of OCV historically tends to remain reasonably consistent from month to month, as opposed to TCV which is less consistent. OCV is also more consistent than options volume that clears in the Market Maker or Firm range at the OCC, as Market Maker and Firm volume may vary drastically from month to month based on market events, as opposed to Customer options volume which remains relatively consistent. Therefore, the Exchange believes utilizing OCV would result in consistent tier criteria as OCV is a relatively static monthly number which would enable market participants to better predict whether they may achieve a tier criteria each month and qualify for that tier's preferred pricing.

³⁴ The Exchange notes that the date of the fee schedule was updated to January 3, 2017 in SR-BatsBZX-2016-90 (filed on December 27, 2016).

³⁵ 15 U.S.C. 78f.

³⁶ 15 U.S.C. 78f(b)(4).

³³ Fee code PC is appended to a Member's Customer orders which remove liquidity in Penny Pilot options and is charged a standard fee of \$0.49 per contract. *Id.*

The Exchange also believes that the use of OCV provides a calculation that is identical to that which was implemented in December 2016 on the EDGX Options fee schedule.³⁷ Additionally, the OCV calculation is reasonably identical to and is not a significant departure from tier qualifications conventions offered by other exchanges.³⁸ The Exchange believes that the proposed definition of OCV and the proposed revision of the definition of Options Step-Up Add TCV to Options Step-Up Add OCV are reasonable, fair and equitable, and non-discriminatory, and will provide additional transparency and simplicity to Members regarding the calculations used to determine volume levels for purposes of the proposed tiered pricing model.

Volume-Based Tier Modifications

The Exchange believes that the proposed modifications to the tiered pricing structure are reasonable, fair and equitable, and non-discriminatory. The Exchange operates in a highly competitive market in which market participants may readily send order flow to many competing venues if they deem fees at the Exchange to be excessive. The proposed fee structure remains intended to attract order flow to the Exchange by offering market participants a competitive pricing structure. The Exchange believes it is reasonable to offer and incrementally modify incentives intended to help to contribute to the growth of the Exchange.

Volume-based rebates such as that proposed herein have been widely adopted by exchanges, including the Exchange, and are equitable because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to: (i) The value to an exchange's market quality; (ii) associated higher levels of market activity, such as higher levels of liquidity provisions and/or growth patterns; and (iii) introduction of higher volumes of orders into the price and volume discovery processes.

The proposed modifications and additions proposed herein are also intended to incentivize additional Members to send orders to the Exchange in an effort to qualify for the enhanced rebate made available by the tiers. The Exchange believes the proposed change to each tier's criteria is consistent with the Act.

Proposed Revisions and New Tiers under Footnotes 1, 3, 7, and 12. The Exchange believes the proposed tiers under footnotes 1, 3, 7, and 12 are reasonable, fair and equitable, and non-discriminatory. The proposed tiers are intended to attract order flow to the Exchange by offering market participants a competitive pricing structure. The Exchange believes it is reasonable to offer incrementally modified incentives intended to help to contribute to the growth of the Exchange. First, the Exchange believes the revisions to the Customer Cross-Asset Add Tier under footnote 1 are equitable and reasonable because further incentivize Members to reach certain thresholds on both BZX Options and BZX Equities. Such pricing programs thereby reward a Member's growth pattern on the Exchange and such increased volume increases potential revenue to the Exchange, and will allow the Exchange to continue to provide and potentially expand the incentive programs operated by the Exchange. To the extent a Member participates on the BZX Options but not on BZX Equities, the Exchange does believe that the proposal is still reasonable, equitably allocated and non-discriminatory with respect to such Member based on the overall benefit to the Exchange resulting from the success of BZX Equities.

Additionally, the Exchange believes the elimination and replacement of the Step-Up tier under footnote 3 is reasonable, fair, and equitable because the current tier was not providing the desired result of incentivizing Members to increase their participation over time. Therefore, eliminating the current Step-Up Tier under footnote 3 will have a negligible effect on order flow and

market behavior. The Exchange believes the proposed new Step-Up Tier under footnote 3 should incentivize Members to increase their participation in Customer and Non-Customer orders. Likewise, the proposed tiers under footnotes 1, 7 and 12 are also designed to incentivize Members to increase their participation on the Exchange. The Exchange believes it is reasonable to continue to modify the volume based incentives to help to contribute to the growth of the Exchange. The Exchange also believes the proposed change is not unfairly discriminatory because it will apply equally to all participants.

Addition of Footnote 14, Customer Penny Pilot Take Volume Tier. The Exchange believes that the proposal to add a Cross-Asset Tier is a reasonable, fair and equitable, and not unfairly discriminatory allocation of fees and rebates for similar reasons stated above with regard to the revisions of the Customer Cross-Asset Add Tier under footnote 1. Specifically, the Exchange believes the proposed tier will provide Members with an additional incentive to reach certain thresholds on both BZX Equities and BZX Options. The increased liquidity from this proposal also benefits all investors by deepening the BZX Equities and BZX Options liquidity pools, offering additional flexibility for all investors to enjoy cost savings, supporting the quality of price discovery, promoting market transparency and improving investor protection. Such pricing programs thereby reward a Member's growth pattern on the Exchange and such increased volume increases potential revenue to the Exchange, and will allow the Exchange to continue to provide and potentially expand the incentive programs operated by the Exchange. To the extent a Member participates on the Exchange but not on BZX Equities, the Exchange does believe that the proposal is still reasonable, equitably allocated and non-discriminatory with respect to such Member based on the overall benefit to the Exchange resulting from the success of BZX Options. As noted above, such success allows the Exchange to continue to provide and potentially expand its existing incentive programs to the benefit of all participants on the Exchange, whether they participate on BZX Options or not. The proposed pricing program is also fair and equitable in that membership in BZX Options is available to all market participants which would provide them with access to the benefits on BZX Options provided by the proposed changes, as described above, even where a member of BZX Options is not

³⁷ See Securities Exchange Act Release No. 239239 [sic] (December 7, 2016), 81 FR 90009 (December 13, 2016) (SR-BatsEDGX-2016-68).

³⁸ See the NYSE MKT LLC ("NYSE MKT") fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/amex-options/NYSE_Amex_Options_Fee_Schedule.pdf (setting forth tiers that provide preferred pricing to options market makers who meet certain criteria, including achieving a specific "Monthly Volume as a % of Industry Customer Equity and Exchange Traded Fund ("ETF") Option Volume"); NYSE Arca, Inc. ("NYSE ARCA") options fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/arca-options/NYSE_Arca_Options_Fee_Schedule.pdf (setting forth a Market Maker Incentive tier that provides preferred pricing to market makers who meet certain criteria, including achieving a specific percentage of "Total Industry Customer equity and ETF option ADV"); Nasdaq Stock Market LLC ("Nasdaq") options fee schedule available at <http://www.nasdaqtrader.com/Micro.aspx?id=optionsPricing> (setting forth tiers that provide preferred pricing to market makers who meet certain criteria, including achieving a specific percentage of "total industry customer equity and ETF option ADV contracts per month"); and Nasdaq BX LLC ("BX") options fee schedule available at <http://www.nasdaqtrader.com/Micro.aspx?id=BXOptionsPricing> (setting forth tiers that provide preferred pricing to market makers who meet certain criteria, including achieving a specific percentage of "total industry customer equity and ETF option ADV contracts per month").

necessarily eligible for the proposed increased rebates on the Exchange. Further, the proposed changes will result in Members receiving either the same or an increased rebate than they would currently receive. The Exchange also believes that the proposed tiered pricing structure is consistent with pricing previously offered by the Exchange as well as other options exchanges and does not represent a significant departure from such pricing structures.³⁹

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe its proposed amendment to its fee schedule would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed changes represents a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. The Exchange believes that its proposal to amend the qualification criteria and to incorporate OCV as proposed would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because the Exchange also proposed to modify the tier's related criteria in order to maintain substantially identical requirements to qualify for each tier. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed changes to the volume discount and rebate structure will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. The Exchange believes that its proposal would not burden intramarket competition because the proposed rate changes would continue to apply uniformly to all Members. As stated above, the Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee structures to be unreasonable or excessive. The Exchange does not believe the proposed tiers would burden intramarket competition as they would apply to all Members uniformly.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁴⁰ and paragraph (f) of Rule 19b-4 thereunder.⁴¹ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BatsBZX-2017-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-BatsBZX-2017-01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsBZX-2017-01 and should be submitted on or before February 9, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴²

Eduardo A. Aleman,

Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice: 9825]

60-Day Notice of Proposed Information Collection: Passport Demand Forecasting Survey

ACTION: Notice of request for public comment.

SUMMARY: The Department of State is seeking Office of Management and Budget (OMB) approval for the information collection described below. In accordance with the Paperwork Reduction Act of 1995, we are requesting comments on this collection from all interested individuals and organizations. The purpose of this notice is to allow 60 days for public comment preceding submission of the collection to OMB.

DATES: The Department will accept comments from the public up to March 20, 2017.

ADDRESSES: You may submit comments by any of the following methods:

- **Web:** Persons with access to the Internet may comment on this notice by going to www.Regulations.gov. You can search for the document by entering "Docket Number: DOS-2016-0079" in the Search field. Then click the "Comment Now" button and complete the comment form.

- *Fax:* (202) 485-6496 Attn: Desk Officer for Department of State.

You must include the DS form number (if applicable), information collection title, and the OMB control number in any correspondence.

FOR FURTHER INFORMATION CONTACT:

Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to the Office of Passport Services, who may be reached at *passportstudy@state.gov*.

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Passport Demand Forecasting Survey.
- *OMB Control Number:* 1405-0177.
- *Type of Request:* Extension of a Currently Approved Collection.
- *Originating Office:* Bureau of Consular Affairs, Office of Passport Services.
- *Form Number:* SV2012-0006.
- *Respondents:* A national representative sample of U.S. citizens, nationals, and any other categories of individuals that are entitled to a U.S. passport product.
- *Estimated Number of Respondents:* 48,000 survey respondents annually.
- *Estimated Number of Responses:* 48,000 survey respondents annually.
- *Average Time Per Response:* 10 minutes.
- *Total Estimated Burden Time:* 8,000 hours.
- *Frequency:* Monthly.
- *Obligation to Respond:* Voluntary.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.
- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public

record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The Secretary of State is authorized to issue U.S. passports under 22 U.S.C. 211a. The Department of State, Passport Services administers the U.S. passport issuance program and operates passport agencies and application adjudication centers throughout the United States. As part of the Intelligence Reform and Terrorism Prevention Act of 2004, the Western Hemisphere Travel Initiative required the Secretary of Homeland Security and the Secretary of State to implement a plan to require all U.S. citizen and non-citizen nationals to present a passport and/or other sufficient documentation when entering the U.S. from abroad. This resulted in an increase in demand for U.S. passports.

The Passport Demand Forecasting Survey requests information from the general public about the demand for U.S. passports, anticipated travel, and the demographic profile of the respondent. This voluntary survey is conducted on a monthly basis using responses from a randomly selected but nationally representative sample of U.S. nationals ages 18 and older. The information obtained from the survey is used to monitor and project the demand for U.S. passport books and U.S. passport cards. The Passport Demand Forecasting Survey aids the Department of State, Passport Services in making decisions about staffing, resource allocation, and budget planning.

Methodology

The Passport Demand Forecasting Study uses monthly surveys that will gather data from a national representative sample of U.S. nationals. Survey delivery methodologies can include mail, internet/web, telephone, and mix-mode surveys to ensure the CA/PPT reaches the appropriate audience and leverages the best research method to obtain valid responses. The survey data will cover an estimated 48,000 respondents annually.

Brenda S. Sprague,

Deputy Assistant Secretary, for Passport Services, Department of State.

- *Fax:* 202-736-9111.

You must include the DS form number (if applicable), information collection title, and the OMB control number in any correspondence.

FOR FURTHER INFORMATION CONTACT:

Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to Derek A. Rivers, Bureau of Consular Affairs, Overseas Citizens Services (CA/OCS/PMO), U.S. Department of State, SA-17, 10th Floor, Washington, DC 20522-1707, who may be reached at *mailto:RiversDA@state.gov*.

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Evacuee Manifest and Promissory Note.
- *OMB Control Number:* 1405-0211.
- *Type of Request:* Extension of a Currently Approved Collection.
- *Originating Office:* Bureau of Consular Affairs, Overseas Citizens Services (CA/OCS).
- *Form Number:* DS-5528.

- *Respondents*: U.S. citizens, U.S. non-citizen nationals, lawful permanent residents, and third country nationals applying for emergency loan assistance during an evacuation.

- *Estimated Number of Respondents*: 525.

- *Estimated Number of Responses*: 525.

- *Average Time per Response*: 20 minutes.

- *Total Estimated Burden Time*: 175 annual hours.

- *Frequency*: On Occasion.

- *Obligation to Respond*: Required to Obtain Benefit.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.

- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The purpose of the DS-5528 is to document the evacuation of persons from abroad when their lives are endangered by war, civil unrest, or natural disaster; document issuance of a crisis evacuation loan; obtain a Privacy Act Waiver to share information about the welfare of a U.S. citizen or U.S. lawful permanent resident consistent with the Privacy Act of 1974; and, to facilitate debt collection.

Methodology

An electronic version of the Evacuee Manifest and Promissory Note was created, allowing applicants to type their information into the form, print it, and present it to a consular officer at the evacuation point. Continued software development will provide the capability to electronically submit signed loan applications for adjudication. The final stage of software development will not only allow the applicant to enter his/her information and submit the form, but will also make the information available

for all stages of financial processing including the Department of State's debt collection process. Due to the potential for serious conditions during crisis events that often affect electronic and internet infrastructure systems, the electronic form will not replace the paper form. Rather, the paper form will still be maintained and used in the event that applicants are unable to submit forms electronically.

Michelle Bernier-Toth,

Managing Director, Bureau of Consular Affairs, Overseas Citizens Services, Department of State.

BILLING CODE 4710-06-P

DEPARTMENT OF STATE

[Public Notice 9858]

Additional Designation of Syrian Entity Pursuant to E.O. 13382

ACTION: Designation of the Organization for Technological Industries (OTI) Pursuant to E.O. 13382.

SUMMARY: Pursuant to the authority in section 1(ii) of E.O. 13382, "Blocking Property of Weapons of Mass Destruction Proliferators and Their Supporters", the Under Secretary of State for Arms Control and International Security, in consultation with the Secretary of the Treasury and the Attorney General, has determined that the Syrian entity Organization for Technological Industries (OTI) has engaged, or attempted to engage, in activities or transactions that have materially contributed to, or pose a risk of materially contributing to, the proliferation of weapons of mass destruction or their means of delivery (including missiles capable of delivering such weapons), including any efforts to manufacture, acquire, possess, develop, transport, transfer or use such items, by any person or foreign country of proliferation concern.

DATES: *Effective Dates:* The designation of and additional identifying information for the entity identified in this notice pursuant to E.O. 13382 is effective upon publication of this notice.

FOR FURTHER INFORMATION CONTACT: Director, Office of Counterproliferation Initiatives, Bureau of International Security and Nonproliferation, Department of State, Washington, DC 20520, tel.: 202-647-5193.

Background

On June 28, 2005, the President, invoking the authority, *inter alia*, of the International Emergency Economic

Powers Act (50 U.S.C. 1701-1706) ("IEEPA"), issued E.O. 13382 (70 FR 38567, July 1, 2005) (the "Order"), effective at 12:01 a.m. eastern daylight time on June 30, 2005. In the Order the President took additional steps with respect to the national emergency described and declared in E.O. 12938 of November 14, 1994, regarding the proliferation of weapons of mass destruction and the means of delivering them.

Section 1 of the Order blocks, with certain exceptions, all property and interests in property that are in the United States, or that hereafter come within the United States or that are or hereafter come within the possession or control of United States persons, of: (1) The persons listed in the Annex to the Order; (2) any foreign person determined by the Secretary of State, in consultation with the Secretary of the Treasury, the Attorney General, and other relevant agencies, to have engaged, or attempted to engage, in activities or transactions that have materially contributed to, or pose a risk of materially contributing to, the proliferation of weapons of mass destruction or their means of delivery (including missiles capable of delivering such weapons), including any efforts to manufacture, acquire, possess, develop, transport, transfer or use such items, by any person or foreign country of proliferation concern; (3) any person determined by the Secretary of the Treasury, in consultation with the Secretary of State, the Attorney General, and other relevant agencies, to have provided, or attempted to provide, financial, material, technological or other support for, or goods or services in support of, any activity or transaction described in clause (2) above or any person whose property and interests in property are blocked pursuant to the Order; and (4) any person determined by the Secretary of the Treasury, in consultation with the Secretary of State, the Attorney General, and other relevant agencies, to be owned or controlled by, or acting or purporting to act for or on behalf of, directly or indirectly, any person whose property and interests in property are blocked pursuant to the Order.

Information on the additional designee is as follows:

(U) Organization for Technological Industries

(U) Name: Organization for Technological Industries

(U) AKA: The Organization for Technical Industries

(U) Address: Sham Algadida OTip Box Damascus-11037, Syrian Arab Republic

Dated: January 12, 2017.

Thomas M. Countryman,

Acting Under Secretary for Arms Control and International Security, Department of State.

BILLING CODE 4710-27-P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 290 (Sub-No. 387X)]

Chesapeake Western Railway— Discontinuance of Service Exemption—in Rockingham and Shenandoah Counties, VA.

AGENCY: Surface Transportation Board.

ACTION: Correction to notice of exemption.

On June 27, 2016, Chesapeake Western Railway (CW) filed a verified notice of exemption under 49 CFR 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 15.1-mile rail line between milepost CW 84.4 at Mt. Jackson, Va., and milepost CW 99.5 at Broadway, Va., in Rockingham and Shenandoah Counties, Va. (the Line). On July 15, 2016, notice of the exemption was served and published in the **Federal Register** (81 FR 46,152).

On September 23, 2016, CW filed a letter stating that the starting point of the Line at milepost CW 84.4 was inadvertently incorrect and should have been CW 84.0. As a result, CW states that the total length of the Line is approximately 15.5 miles as opposed to 15.1 miles. This notice corrects the description of the milepost and total length of the Line. All other information in the July 15, 2016 notice is correct.

Board decisions and notices are available on our Web site at “WWW.STB.GOV.”

Decided: January 12, 2017.

By the Board, Rachel D. Campbell,
Director, Office of Proceedings.

Rena Laws-Byrum,
Clearance Clerk.

[FR Doc. 2017-01165 Filed 1-18-17; 8:45 am]

BILLING CODE 4915-01-P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36088]

SMS Rail Lines of New York, LLC— Acquisition and Operation Exemption—Rail Line of WCC, LLC, in Hudson Falls, NY

SMS Rail Lines of New York, LLC (SMS), a Class III rail carrier, has filed a verified notice of exemption under 49

CFR 1150.41 to acquire by lease from WCC, LLC, and operate approximately 3.5 miles of rail line in Hudson Falls, Washington County, NY (the Line). According to SMS, there are no milepost designations on the Line.

SMS certifies that its projected annual revenues as a result of this transaction will not result in the creation of a Class II or Class I rail carrier and will not exceed \$5 million.

SMS further certifies that the transaction does not include a provision or agreement that may limit future interchange commitments.

The transaction may be consummated on February 4, 2017, the effective date of the exemption (30 days after the exemption was filed).

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Petitions for stay must be filed no later than January 27, 2017 (at least 7 days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36088, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, one copy of each pleading must be served on Robert A. Klein, 629 B Swedesford Rd., Malvern, PA 19355.

According to SMS, this action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available on our Web site at WWW.STB.GOV.

Decided: January 12, 2017.

By the Board, Rachel D. Campbell,
Director, Office of Proceedings.

Rena Laws-Byrum,
Clearance Clerk.

BILLING CODE 4915-01-P

SUSQUEHANNA RIVER BASIN COMMISSION

Projects Approved for Consumptive Uses of Water

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists the projects approved by rule by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: December 1–30, 2016.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110-1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel, telephone: (717) 238-0423, ext. 1312; fax: (717) 238-2436; email: joyler@srbc.net. Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22(f) for the time period specified above:

Approvals By Rule Issued Under 18 CFR 806.22(f)

1. Chesapeake Appalachia, LLC, Pad ID: WGC, ABR-201205014.R1, Albany Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 2, 2016.

2. Chesapeake Appalachia, LLC, Pad ID: Iceman, ABR-201205016.R1, Wilmot Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 2, 2016.

3. SWEPI LP, Pad ID: Cotton Hanlon 595, ABR-201612001, Sullivan Township, Tioga County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 2, 2016.

4. Anadarko E&P Onshore, LLC, Pad ID: COP Tract 356 Pad E, ABR-201112029.R1, Cummings Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 5, 2016.

5. Anadarko E&P Onshore, LLC, Pad ID: Larrys Creek F&G Pad E, ABR-201112030.R1, Cummings Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 5, 2016.

6. SWN Production Company, LLC, Pad ID: TONYA WEST, ABR-201201026.R1, New Milford Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: December 5, 2016.

7. SWN Production Company, LLC, Pad ID: WATTS, ABR-201202028.R1, New Milford Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: December 6, 2016.

8. Cabot Oil & Gas Corporation, Pad ID: Kielard P1, ABR-201112002.R1, Lathrop Township, Susquehanna County, Pa.; Consumptive Use of Up to 3.5750 mgd; Approval Date: December 12, 2016.

9. Cabot Oil & Gas Corporation, Pad ID: CareyR P1, ABR-201112023.R1, Harford Township, Susquehanna

County, Pa.; Consumptive Use of Up to 3.5750 mgd; Approval Date: December 12, 2016.

10. Chesapeake Appalachia, LLC, Pad ID: Maris, ABR–201205010.R1, Auburn Township, Susquehanna County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 12, 2016.

11. Carrizo (Marcellus), LLC, Pad ID: Trecoke North Pad, ABR–201201023.R1, Silver Lake Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.1000 mgd; Approval Date: December 16, 2016.

12. Carrizo (Marcellus), LLC, Pad ID: Trecoke South Pad, ABR–201201024.R1, Silver Lake Township, Susquehanna County, Pa.; Consumptive Use of Up to 2.1000 mgd; Approval Date: December 16, 2016.

13. Talisman Energy USA Inc., Pad ID: Hemlock Valley, ABR–201201035.R1, Pike Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 16, 2016.

Authority: Pub. L. 91–575, 84 Stat. 1509 *et seq.*, 18 CFR parts 806, 807, and 808.

Dated: January 13, 2017.

Stephanie L. Richardson,
Secretary to the Commission.

BILLING CODE 7040–01–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2017–0002]

Controlled Substances and Alcohol Use and Testing: J.B. Hunt Transport, Inc., Schneider National Carriers, Inc., Werner Enterprises, Inc., Knight Transportation, Inc., Dupre Logistics, Inc. and Maveric Transportation, LLC Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from J.B. Hunt Transport, Inc. (J.B. Hunt), Schneider National Carriers, Inc. (Schneider), Werner Enterprises, Inc. (Werner), Knight Transportation, Inc. (Knight), Dupre Logistics, Inc. (Dupree), and Maveric Transportation, LLC (Maverick) (the Applicants) to allow hair analysis in lieu of urine testing for pre-employment controlled substances testing of commercial driver's license (CDL) holders. The Applicants currently conduct pre-employment urine testing

that satisfies the Department of Transportation's (the Department) requirements under 49 CFR part 40 and hair analysis, separate from the Department's controlled substances and alcohol testing program. The Applicants' believe their data “. . . demonstrates that hair analysis is a more reliable and comprehensive basis for ensuring detection of controlled substance use” and the exemption would enable these fleets to discontinue pre-employment urine testing. FMCSA requests public comment on the exemption application.

DATES: Comments must be received on or before February 21, 2017.

ADDRESSES: You may submit comments identified by Federal Docket Management System Number FMCSA–2017–0002 by any of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. See the *Public Participation and Request for Comments* section below for further information.
- **Mail:** Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- **Hand Delivery or Courier:** West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.
- **Fax:** 1–202–493–2251.

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received, without change, to www.regulations.gov, including any personal information included in a comment. Please see the *Privacy Act* heading below.

Docket: For access to the docket to read background documents or comments, go to www.regulations.gov at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: For information concerning this notice, contact Mr. Thomas Yager, Chief,

FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: (614) 942–6477. Email: MCPDSD@dot.gov. If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2017–0002), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to www.regulations.gov and put the docket number, “FMCSA–2017–0002” in the “Keyword” box, and click “Search.” When the new screen appears, click on “Comment Now!” button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party, and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may grant or not grant this application based on your comments.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also

provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

Background—Regulatory Requirements

Currently, 49 CFR 382.105, concerning FMCSA's controlled substances and alcohol testing regulations, requires that each employer ensure all alcohol or controlled substances testing conducted on CDL holders complies with the procedures under 49 CFR part 40. All parties who conduct controlled substances and alcohol tests required by the Department must follow the Part 40 requirements on how to conduct the test and what procedures to use. Currently, Part 40 only allows urine testing for controlled substances. Congress, through the Omnibus Transportation Employee Testing Act (OTETA) of 1991 (Pub. L. 102-143, Title V, 105 Stat. 952). OTETA requires the Department to follow the HHS Mandatory Guidelines for scientific testing issues. While DOT has discretion concerning many aspects of the regulations governing testing in the transportation industries' regulated programs, we must follow the HHS Mandatory Guidelines for the laboratory standards and procedures the Department will use for regulated testing.

Section 382.301 provides requirements concerning pre-employment testing of commercial driver's license (CDL) holders for controlled substances, while 49 CFR part 383 prescribes requirements for individuals who must obtain a CDL. With limited exceptions, an employer must conduct pre-employment testing for controlled substances prior to the first time a driver performs "safety-sensitive functions," as defined in 49 CFR 382.107. Employers must not allow a driver whom the employer intends to

hire or use to perform safety-sensitive functions unless the employer has received a controlled substances test result from the medical review officer (MRO) or consortium/third-party administrator (C/TPA), as those terms are defined in 49 CFR 40.3, indicating a verified negative test result for that driver.

Application for Exemption

The Applicants have requested an exemption from 49 CFR 382.105 and 382.301 with specific authorization for release of and obtaining hair test results to comply with 49 CFR 391.23, *Investigations and inquiries*. Under the exemption, the carriers would conduct pre-employment tests using hair analysis only, rather than hair analysis in addition to urine testing, and individuals with negative test results would be permitted to perform safety-sensitive functions for the employer. Individuals testing positive would not be allowed to perform safety-sensitive functions until the driver completes the return-to-duty process under Subpart O of 49 CFR part 40. In addition, the Applicants would share the positive hair testing results with prospective employers in response to safety-performance inquiries required by 49 CFR 391.23.

The carriers that would be covered by the exemption already use hair analysis as a method for pre-employment controlled substances testing of drivers on a voluntary basis. However, they also conduct urine testing for drugs because it is the only screening method accepted under the Department's regulations. The Applicant's view their use of multiple screening methods as an unnecessary and redundant financial burden. Also, the Applicants consider urine testing to be less effective in pre-employment screening for drugs than hair analysis.

A copy of the exemption application and all supporting documents submitted by the Applicant is available for review in the docket referenced at the beginning of this notice.

Request for Comments

In accordance with 49 U.S.C. 31315(b)(4) and 31136(e), FMCSA requests public comment on the application for an exemption from 49 CFR 382.105 and 382.301.

The Agency will consider all comments received by close of business on February 21, 2017. Comments will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. The Agency will consider to the extent practicable comments received in the

public docket after the closing date of the comment period.

Issued on: January 13, 2017.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2016-0450]

Parts and Accessories Necessary for Safe Operation; Application for an Exemption From Hino Motors Manufacturing U.S.A., Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) requests public comment on an application for exemption from Hino Motors Manufacturing U.S.A., Inc. (Hino) to allow an Automated Emergency Braking (AEB) system and a Lane Departure Warning (LDW) system camera to be mounted lower in the windshield than is currently permitted. Mounting the camera in this location does not meet the prohibition on obstructions to the driver's field of view requirements for windshields in the Federal Motor Carrier Safety Regulations (FMCSR) which requires devices meeting the definition of "vehicle safety technology" to be mounted not more than 4 inches below the upper edge of the area swept by the windshield wipers, or not more than 7 inches above the lower edge of the area swept by the windshield wipers, and outside the driver's sight lines to the road and highway signs and signals. Because the camera will be mounted outside of the driver's normal sight lines to all mirrors, Hino believes that they will maintain a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

DATES: Comments must be received on or before February 21, 2017.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA-2016-0450 using any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the instructions for submitting comments on the Federal electronic docket site.

- *Fax:* 1-202-493-2251.

• *Mail:* Docket Management Facility, U.S. Department of Transportation, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

• *Hand Delivery:* Ground Floor, Room W12-140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t., Monday-Friday, except Federal holidays.

Instructions: All submissions must include the Agency name and docket number for this notice. For detailed instructions on submitting comments and additional information on the exemption process, see the "Public Participation" heading below. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the "Privacy Act" heading for further information.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> or to Room W12-140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Public participation: The <http://www.regulations.gov> Web site is generally available 24 hours each day, 365 days each year. You may find electronic submission and retrieval help and guidelines under the "help" section of the <http://www.regulations.gov> Web site as well as the DOT's <http://docketsinfo.dot.gov> Web site. If you would like notification that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgment page that appears after submitting comments online.

FOR FURTHER INFORMATION CONTACT: Mrs. Amina Fisher, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, MC-PSV, (202) 366-2782, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

SUPPLEMENTARY INFORMATION:

Background

Section 4007 of the Transportation Equity Act for the 21st Century (TEA-21) [Pub. L. 105-178, June 9, 1998, 112 Stat. 401] amended 49 U.S.C. 31315 and 31136(e) to provide authority to grant exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs). On August 20, 2004, FMCSA published a final rule (69 FR 51589) implementing section 4007. Under this rule, FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public with an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments and determines whether granting the exemption would likely achieve a level of safety equivalent to or greater than the level that would be achieved by the current regulation (49 CFR 381.305).

The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)). If the Agency denies the request, it must state the reason for doing so. If the decision is to grant the exemption, the notice must specify the person or class of persons receiving the exemption and the regulatory provision or provisions from which an exemption is granted. The notice must specify the effective period of the exemption (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.315(c) and 49 CFR 381.300(b)).

Hino's Application for Exemption

Hino has applied for an exemption from 49 CFR 393.60(e) to allow an Automated Emergency Braking (AEB) system and a Lane Departure Warning (LDW) system camera to be mounted lower in the windshield than is currently permitted. A copy of the application is included in the docket referenced at the beginning of this notice.

Section 393.60(e)(1)(i) of the FMCSRs prohibits the obstruction of the driver's field of view by devices mounted at the top of the windshield. Antennas and similar devices must not be mounted more than 152 mm (6 inches) below the upper edge of the windshield, and outside the driver's sight lines to the road and highway signs and signals. Section 393.60(e)(1)(i) does not apply to vehicle safety technologies, as defined in § 390.5 as including "a fleet-related incident management system,

performance or behavior management system, speed management system, lane departure warning system, forward collision warning or mitigation system, active cruise control system, and transponder." Section 393.60(e)(1)(ii) requires devices with vehicle safety technologies to be mounted (1) not more than 100 mm (4 inches) below the upper edge of the area swept by the windshield wipers, or (2) not more than 175 mm (7 inches) above the lower edge of the area swept by the windshield wipers, and outside the driver's sight lines to the road and highway signs and signals.

In its application, Hino states:

Hino is making this request so that it becomes possible to introduce an Automated Emergency Braking (AEB) system and a Lane Departure Warning (LDW) system as optional equipment on some Hino commercial motor vehicles. This system, like many other similar systems which FMCSA has granted exemptions for, requires that a camera be mounted to the upper center area of the windshield in an area where the windshield is swept by the windshield wipers to provide a clear view to the lane markings on the road.

In the Hino installation, the camera housing supplied by Meritor Wabco is approximately 4.67 inches wide by 4.30 inches tall. We propose to mount the camera such that it is in the approximate center of the windshield and such that the bottom edge of the camera is approximately 7 inches below the upper edge of the windshield, outside of the driver's and passenger's normal sight lines to all mirrors, highway signs, signals and view of the road ahead. This location will allow for the optimal functionality of the advanced safety systems supported by the camera.

Hino has created a CAD layout of a typical Hino conventional type truck to verify that we do not significantly obstruct the FMVSS 104 specified zones A, B or C for passenger cars of 1730 or more mm overall width [Figure 1 of application]. In fact, we obstruct 0.0% of zone C, 0.1% of zone B and 1.4% of zone A.

Hino has installed one prototype camera housing in a Hino conventional type model 258LP (low profile) test vehicle with the lowest cab height we offer to assess, through a jury evaluation, the impact of the camera on driver and passenger visibility [Figure 2 of application].

All drivers and passengers agreed that there was no noticeable obstruction to the normal sight lines to the road ahead, highway signs, signals or any mirrors. Also, one driver noted that the camera did not interfere with the normal range of motion of the sun visor and that the sun visor lower edge extended lower than the camera housing [Figure 3 of application].

The exemption would apply to all CMV operators driving Hino vehicles with the AEB/LDW system camera installed. Hino believes that mounting the system as described will maintain a

level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

Request for Comments

In accordance with 49 U.S.C. 31315 and 31136(e), FMCSA requests public comment from all interested persons on Hino's application for an exemption from 49 CFR 393.60. All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Issued on: January 13, 2017.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket FTA-2017-0001]

Notice of Establishment of Emergency Relief Docket for Calendar Year 2017

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice.

SUMMARY: By this notice, the Federal Transit Administration (FTA) is establishing an Emergency Relief Docket for calendar year 2017 so grantees and subgrantees affected by national or regional emergencies may request temporary relief from FTA administrative and statutory requirements.

FOR FURTHER INFORMATION CONTACT:

Bonnie L. Graves, Attorney-Advisor, Office of Chief Counsel, Federal Transit Administration, 90 Seventh Street, Ste. 15-300, San Francisco, CA 94103; phone: (202) 366-0944, fax: (415) 734-9489, or email, *Bonnie.Graves@dot.gov*.

SUPPLEMENTARY INFORMATION: Pursuant to title 49 CFR part 601, subpart D, FTA is establishing the Emergency Relief Docket for calendar year 2017. Subsequent to an emergency or major disaster, the docket may be opened at

the request of a grantee or subgrantee, or on the FTA Administrator's own initiative.

In the event a grantee or subgrantee believes the Emergency Relief Docket should be opened and it has not been opened, that grantee or subgrantee may submit a petition to www.regulations.gov for posting in the docket (FTA-2017-0001). Alternatively, a grantee or subgrantee may submit a petition in duplicate to the FTA Administrator, via U.S. mail or hand delivery, to: Federal Transit Administration, 1200 New Jersey Ave. SE., Washington, DC 20590; via telephone, at: (202) 366-4011; via fax, at (202) 366-3472; via email, to *Bonnie.Graves@dot.gov*; or via U.S. mail or hand delivery to the DOT Docket Management Facility, 1200 New Jersey Ave. SE., Room W12-140, Washington, DC 20590, requesting opening of the Docket for that emergency and including the information set forth below.

All petitions for relief from a provision of chapter 53 of title 49, U.S.C. or FTA administrative requirements must be posted in the docket in order to receive consideration by FTA. The docket is publicly available and can be accessed 24 hours a day, seven days a week, via the Internet at www.regulations.gov. Any grantee or subgrantee submitting petitions for relief or comments to the docket must include the agency name (Federal Transit Administration) and docket number FTA-2017-0001. Grantees and subgrantees making submissions to FTA or to the docket by mail or hand delivery should submit two copies. Grantees and subgrantees are strongly encouraged to contact their FTA regional office and notify FTA of the intent to submit a petition to the docket.

In the event a grantee or subgrantee needs to request immediate relief and does not have access to electronic means to request that relief, the grantee or subgrantee may contact any FTA regional office or FTA headquarters and request that FTA staff submit the petition on its behalf.

Federal public transportation law at 49 U.S.C. 5324(d) provides that a grant awarded under Section 5324 or under 49 U.S.C. 5307 or 49 U.S.C. 5311 that is made to address an emergency shall be subject to the terms and conditions the Secretary determines are necessary. This language allows FTA to waive statutory, as well as administrative, requirements. Therefore, grantees affected by an emergency or major disaster may request waivers of provisions of chapter 53 of title 49, U.S.C. when a grantee or subgrantee demonstrates the

requirement(s) will limit a grantee's or subgrantee's ability to respond to an emergency. Grantees must follow the procedures set forth below when requesting a waiver of statutory or administrative requirements.

A petition for relief shall:

(a) Identify the grantee or subgrantee and its geographic location;

(b) Identify the section of chapter 53 of title 49, U.S.C., or the FTA policy statement, circular, guidance document and/or rule from which the grantee or subgrantee seeks relief;

(c) Specifically address how a requirement in chapter 53 of title 49 U.S.C., or an FTA requirement in a policy statement, circular, agency guidance or rule will limit a grantee's or subgrantee's ability to respond to an emergency or disaster; and

(d) Specify if the petition for relief is one-time or ongoing, and if ongoing identify the time period for which the relief is requested. The time period may not exceed three months; however, additional time may be requested through a second petition for relief.

A petition for relief from administrative requirements will be conditionally granted for a period of three (3) business days from the date it is submitted to the Emergency Relief Docket. FTA will review the petition after the expiration of the three business days and review any comments submitted thereto. FTA may contact the grantee or subgrantee that submitted the request for relief, or any party that submits comments to the docket, to obtain more information prior to making a decision. FTA shall then post a decision to the Emergency Relief Docket. FTA's decision will be based on whether the petition meets the criteria for use of these emergency procedures, the substance of the request, and the comments submitted regarding the petition. If FTA does not respond to the request for relief to the docket within three business days, the grantee or subgrantee may assume its petition is granted for a period not to exceed three months until and unless FTA states otherwise.

A petition for relief from statutory requirements will not be conditionally granted and requires a written decision from the FTA Administrator.

Pursuant to 49 CFR 604.2(f) of FTA's Charter Rule, grantees and subgrantees may assist with evacuations or other movement of people that might otherwise be considered charter transportation when that transportation is in response to an emergency declared by the President, governor, or mayor, or in an emergency requiring immediate action prior to a formal declaration,

even if a formal declaration of an emergency is not eventually made by the President, governor or mayor. Therefore, a request for relief is not necessary in order to provide this service. However, if the emergency lasts more than 45 calendar days, the grantee or subgrantee shall follow the procedures set out in this notice.

FTA reserves the right to reopen any docket and reconsider any decision made pursuant to these emergency procedures based upon its own initiative, based upon information or comments received subsequent to the three business day comment period, or at the request of a grantee or subgrantee upon denial of a request for relief. FTA shall notify the grantee or subgrantee if it plans to reconsider a decision. FTA decision letters, either granting or denying a petition, shall be posted in the Emergency Relief Docket and shall reference the document number of the petition to which it relates.

Carolyn Flowers,
Acting Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

FTA Fiscal Year 2017 Apportionments, Allocations, Program Information and Interim Guidance

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice.

SUMMARY: This notice provides interim guidance for programs in FY 2017, announces the apportionments and allocations for programs authorized and funded by the Further Continuing and Security Assistance Appropriations Act, 2017 (Pub. L. 114-254) and provides contract authority, and describes future plans for several competitive programs. The notice also includes locations of FY 2017 apportionment tables and unobligated (or carryover) funds allocated under the competitive programs from prior years.

FOR FURTHER INFORMATION CONTACT: For general information about this notice contact Kimberly Sledge, Director, Office of Transit Programs, at (202) 366-2053. Please contact the appropriate FTA Regional Office for any specific requests for information or technical assistance. FTA Regional Office contact information is available on FTA's Web site: www.transit.dot.gov.

An FTA headquarters contact for each major program area is included in the

discussion of that program in the text of this notice. FTA recommends that stakeholders subscribe on FTA's Web site www.transit.dot.gov to receive email notifications when new information is available.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Overview

 - G. Grant Management

I. Overview

This document contains important information and interim guidance about

existing FTA program statutes (49 U.S.C. 5301, *et. seq.*) and changes resulting from the Fixing America's Surface Transportation (FAST) Act (Pub. L. 114-94), signed by President Obama on December 4, 2015 and effective on October 1, 2015.

In addition, this document provides notice of funding availability through April 28, 2017 by the Further Continuing and Security Assistance Appropriations Act, 2017 (Pub. L. 114-254) contract authority for FTA formula and competitive programs pursuant to the Further Continuing and Security Assistance Appropriations Act, 2017 (Pub. L. 114-254) ("Continuing Appropriations Act").

For each FTA program, FTA has provided information on the FY 2017 authorized funding levels, the basis for apportionment or allocation of funds, requirements specific to the program, the period of availability of funds, and other program information. A separate section provides information on pre-award authority as well as other requirements and guidance applicable to FTA programs and grant administration. Finally, the notice includes referred to tables on FTA's Web site that show \$5,323,087,320 in new contract authority apportioned through April 28, 2017 and approximately \$1.04 billion in unobligated or carryover contract authority that is available in FY 2017 from prior years.

Information in this document includes references to the existing FTA program guidance and circulars. Some information may have been superseded by new provisions in the FAST Act, but these guidance documents and circulars remain a resource for program management in most areas. FTA intends to revise the guidance and circulars, as appropriate, with an opportunity for public comment where necessary.

II. FY 2017 Funding for FTA Programs

A. Funding Based on the Further Continuing and Security Assistance Appropriations Act, 2017

The Further Continuing and Security Assistance Appropriations Act, 2017 (Pub. L. 114-254) makes new funding available for FY 2017 available through April 28, 2017. At approximately seven twelfths of the FY 2016 level.

Current funding availability for each program is identified in section IV of this notice and in Table 1 located on FTA's FY 2017 Apportionment Web page: www.transit.dot.gov/funding/apportionments.

B. Oversight Takedown

The FAST Act modified section 5338(f) to provide for the following oversight takedowns of FTA programs: 0.5 percent of Metropolitan and Statewide Planning funds, 0.75 percent of Urbanized Area Formula funds, 1 percent of Fixed Guideway Capital Investment funds, 0.5 percent of Formula Grants for the Enhanced Mobility of Seniors and Individuals with Disabilities, 0.5 percent of Formula Grants for Rural Areas, 1 percent of State of Good Repair Formula funds, 0.75 percent for Grants for Buses and Bus Facilities, and 1 percent of Capital and Preventive Maintenance Projects for Washington Metropolitan Area Transit Authority funds. The funds are used to provide necessary oversight activities, such as oversight of the construction of any major capital project receiving Federal transit assistance; to conduct State Safety Oversight, drug and alcohol, civil rights, procurement systems, management, planning certification, and financial reviews and audits, as well as evaluations and analyses of grantee-specific problems and issues; and to generally provide technical assistance and correct deficiencies identified in compliance reviews and audits.

C. FY 2017 Formula Apportionments: Data and Methodology

1. Apportionment Tables

FTA is publishing apportionment tables on its Web site for each program that reflects the funding level in the continuing resolution appropriations less oversight take-downs, as applicable. Tables displaying the funds available to eligible states, tribes, and urbanized areas have been posted to <http://www.transit.dot.gov/funding/apportionments>. This Web site contains a page listing the apportionment and allocation tables for FY 2017 as well as links to prior year formula apportionment notices and tables and the National Transit Database (NTD) and Census data used to calculate the FY 2017 apportionments.

2. National Transit Database and Census Data Used in the FY 2017 Apportionments

Consistent with past practices, the calculations for sections 5307, 5311, including 5311(j) (Tribal Transit), 5329, 5337, and 5339 programs rely on the most-recent transit service data reported to the (NTD), which for FY 2017 is the 2015 report year. In some cases where an apportionment is based on the age of the system, the age is calculated as of September 30, 2016, the last day before

FY 2017 began. Any recipient or beneficiary of either section 5307 or Rural Areas Formula Program program funds is required to report to the NTD. Additionally, a number of transit operators report to the FTA's NTD on a voluntary basis. For the 2015 report year, the NTD includes data from 866 reporters in urbanized areas, 836 of which reported operating transit service. The NTD also includes data from 1,551 providers of rural transit service, which includes 134 Indian Tribes providing transit service.

The 2010 Census data is used to determine population and population density for sections 5303, 5305, 5307 and 5339 as well as rural population and rural land area for Rural Areas Formula Program. The formulas for sections 5307, 5311, and 5311(j) include tiers where funding is allocated on the basis of the number of persons living in poverty, and the section 5310 formula program allocates funding on the basis of the population of older adults and people with disabilities. The Census Bureau no longer publishes decennial census data on persons living in poverty and persons with disabilities. As a result, since FY 2013, FTA used the data for these populations available via the Census' American Community Survey (ACS). The NTD and census data that FTA used to calculate the apportionments associated with this notice can be found on FTA's Web site: www.transit.dot.gov/funding/apportionments.

The FY 2017 apportionments use data on low-income persons, persons with disabilities, and older adults from the 2010–2014 ACS five-year data set, which was published in December 2015. This data represent the most recent five-year ACS estimates that are available as of October 1st for the year being apportioned. As was the case in prior years, data on low-income persons comes from ACS Table B17024, "Age by Ratio of Income to Poverty in the Last Twelve Months," and data on people with disabilities under 65 years old comes from ACS Table S1810, "Disability Characteristics." Data on older adults (over 65 years old) comes from ACS Table B01001, "Sex by Age."

III. FY 2017 Program Highlights and Changes

A. Focus Areas

1. Tribal Transportation Self-Governance Program (Title 23 Federal-Aid Highways Program)

Section 207 of title 23, United States Code establishes a Tribal Transportation Self-Governance Program (Self-Governance Program). The Self-

Governance Program establishes specific criteria for determining eligibility for a tribe to participate in the program. DOT will implement this program in consultation with tribal representatives and other interested stakeholders. A Negotiated Proposed Rulemaking to implement this program is under development.

2. Public Transportation Innovation

FTA's research mission is to advance public transportation innovation by leading multi-dimensional research, development, demonstration, deployment, and technical assistance projects for the transit industry that improves riders' experiences and enhances public transit's effectiveness, efficiency, quality, and safety. FTA's Office of Research, Demonstration, and Innovation sought industry input on a five year research strategic plan. The result was an affirmation of FTA's research strategic goals to improve safety, enhance mobility, promote asset management, and expand asset innovation. These goals directly address and support the six primary purposes of U.S. DOT's transportation research and development program as defined in Section 6503 of the FAST Act as follows:

- Improving mobility of people and goods;
- Reducing congestion;
- Promoting safety;
- Improving the durability and extending the life of transportation infrastructure;
- Preserving the environment; and
- Preserving the existing transportation system.

Going forward, FTA will continue to prioritize research investments based upon these goals. FTA expects to publish its Research Strategic Plan in FY 2017.

3. Shared Mobility

Shared Mobility continues to remain a key focus area within FTA's Public Transportation Innovation program. The definition of personal mobility is changing due to social and cultural trends combined with the powerful tools in handheld smartphones and related transportation technology innovations. New mobility concepts and solutions like bike-sharing, car-sharing, car-hailing, and innovative demand-response bus services are now possible and more convenient because of these developments. This gives travelers new, flexible and personally tailored transportation options. Many of these services are emerging in proximity to high-capacity transit corridors with land uses and activities that create the market

for new services. Supported by smart policies, the interaction between public transportation and these emerging services can create improved travel choices.

To support personal mobility innovation, (FTA) recently allocated \$8 million for 11 projects through the innovative Mobility on Demand (MOD) Sandbox Demonstration program using FTA research funds (Public Transportation Innovation/Public Transportation Innovation). The projects carried out by transit agencies will test new ideas in personal mobility and integrated multimodal transportation networks. From that MOD program solicitation process, and from dialogue with other stakeholders, FTA has identified questions about funding eligibility under Federal public transportation law for FTA grant programs, like the Urbanized Area and Rural formula programs, as well as compliance with federal requirements, such as the Americans with Disabilities Act (ADA), related to mobility on demand generally and, particularly, to electronic hailing of vehicles such as taxis or other transportation network company (TNC) vehicles.

FTA has prepared answers to Frequently Asked Questions (FAQs) to

address the eligibility and Federal requirement questions. This information is posted on the FTA Web site at <https://www.transit.dot.gov/shared-mobility>. FTA will use information from the MOD Sandbox projects and related efforts, such as the recently launched online dialogue, to continue the discussion with agency stakeholders and to address questions regarding innovative practices and shared-ride, on-demand mobility services as they emerge. FTA encourages your participation in this online discussion. Stakeholders can also send comments and questions to TransitInnovations@dot.gov.

4. Bus Testing Facility (49 U.S.C. 5318)

On August 1, 2016, FTA issued its final rule to implement minimum performance standards, a scoring system, and a pass/fail threshold for new model transit buses procured with FTA financial assistance authorized under 49 U.S.C. Chapter 53. Consistent with 49 U.S.C. 5318(e), FTA recipients are prohibited from using FTA financial assistance to procure new bus models, that were not previously tested, that have not met the minimum performance standards established by this rule. The standards and scoring system address the following categories: Structural

integrity, safety, maintainability, reliability, fuel economy, emissions, noise, and performance. Buses must meet a minimum performance standard in each of these categories in order to receive an overall passing score and be eligible for purchase using FTA financial assistance. Buses can achieve higher scores with higher performance in each category, and the final rule establishes a numerical scoring system based on a 100-point scale so that buyers can more effectively compare vehicles.

The final rule was effective on October 31, 2016. FTA's Web site has additional information, resources, and a link to sign up for email notices about the Bus Testing Program at: www.transit.dot.gov/research-innovation/bus-testing.

5. FY 2017 Competitive Programs Funding and Schedule

FTA will issue Notices of Funding Opportunities (NOFO) in FY 2017 for the programs listed in the following chart. Additional information about each competitive program is in section III of this notice.

FY 2017 competitive programs	Statute 49 U.S.C.	2017 Authorized funding level (in millions)	Timeline for notification of awards
Passenger Ferry Grant Program	5307	\$30.0	Summer 2017.
Rides to Wellness Demonstration and Innovative Coordinated Access and Mobility Grants.	FAST Section 3006(b)	3.0	Summer 2017.
Tribal Transit	5311(c)(1)(A)	5.0	Spring 2017.
Grants for Buses and Bus Facilities Competitive Program	5339	228.0	Summer 2017.
Low or No Emission Grants Competitive Program	5339	55.0	Spring 2017.
Pilot Program to D Planning	MAP-21 Section 2005(b) ...	10.0	Fall 2017.

IV. FY 2017 Program-Specific Information

A. Metropolitan Planning Program (49 U.S.C. 5303 and 5305(d))

Section 5305(d) authorizes Federal funding to support a cooperative, continuous, and comprehensive planning program for transportation investment decision-making at the metropolitan area level. The specific requirements of metropolitan transportation planning are set forth in 49 U.S.C. 5303 and further explained in 23 CFR part 450, as incorporated by reference in 49 CFR part 613, Planning Assistance and Standards. State Departments of Transportation (DOTs) are direct recipients of funds allocated by FTA, which are then sub-allocated to Metropolitan Planning Organizations (MPOs), for planning activities that

support the economic vitality of the metropolitan area.

The MPO process must establish a performance-based approach in which the MPO will develop specific performance targets that address transportation system performance measures (to be issued by U.S. DOT), where applicable, to use in tracking progress towards attaining critical outcomes. These performance targets will be established by MPOs in coordination with States and transit providers. MPOs will provide a system performance report that evaluates the progress of the MPO in meeting the performance targets in comparison with the system performance identified in prior reports. This funding must support work elements and activities resulting in balanced and comprehensive intermodal transportation planning for the movement of people and goods in

the metropolitan area. Comprehensive transportation planning is not limited to transit planning or surface transportation planning, but also encompasses the relationships among land use and all transportation modes, without regard to the programmatic source of Federal assistance. Eligible work elements or activities include, but are not limited to studies relating to management, mobility management, planning, operations, capital requirements, economic feasibility, performance-based planning; evaluation of previously funded projects; peer reviews and exchanges of technical data, information, assistance, and related activities in support of planning and environmental analysis among MPOs and other transportation planners; work elements and related activities preliminary to and in

preparation for constructing, acquiring, or improving the operation of facilities and equipment; development of coordinated public transit human services transportation plans. An exhaustive list of eligible work activities is provided in FTA Circular 8100.1C, Program Guidance for Metropolitan Planning and State Planning and Research Program Grants, dated September 1, 2008.

For more information or questions on the Metropolitan Planning program, please contact Victor Austin at (202) 366-2996 or victor.austin@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$110,347,597 in FY 2017 to provide financial assistance for metropolitan planning needs under section 5305. Under the Further Continuing Appropriations Act, \$62,042,888 is available through April 28, 2017.

2. FY 2017 Funding Availability

In FY 2017, \$62,042,888 is available for the period October 1, 2016 through April 28, 2017 to the Metropolitan Planning Program (section 5305(d)) to support metropolitan transportation planning activities set forth in section 5303. The total amount apportioned for the Metropolitan Planning Program to States for use by MPOs in urbanized areas (UZAs) is \$61,732,673 as shown in the table below, after the deduction for oversight (authorized by section 5338).

METROPOLITAN PLANNING PROGRAM— FY 2017

Total Appropriation available through April 28, 2017	\$62,042,888 (310,214)
Oversight Deductions	
Total Apportioned	61,732,673

3. Basis for Formula Apportionment

Of the amounts authorized in section 5305, 82.72 percent is made available to the Metropolitan Planning Program. Eighty percent of the funds are apportioned on a statutory basis to the States based on the most recent decennial Census for each State's UZA population. The remaining 20 percent is provided to the States based on an FTA administrative formula to address planning needs in larger, more complex UZAs. The amount published for each State includes the supplemental allocation.

4. Requirements

The State allocates Metropolitan Planning funds to MPOs in UZAs or portions thereof to provide funds for planning projects included in a one or

two-year program of planning work activities (the Unified Planning Work Program, or UPWP) that includes multimodal systems planning activities spanning both highway and transit planning topics. Each State has either reaffirmed or developed, in consultation with its MPOs, an allocation formula among MPOs within the State, based on the 2010 Census. The allocation formula among MPOs in each State may be changed annually, but any change requires approval by the FTA Regional Office before grant approval. Program guidance for the Metropolitan Planning Program is found in FTA Circular 8100.1C, *Program Guidance for Metropolitan Planning and State Planning and Research Program Grants*, dated September 1, 2008.

5. Period of Availability

The Metropolitan Planning program funds apportioned in this notice are available for obligation during FY 2017 plus three additional fiscal years. Accordingly, funds apportioned in FY 2017 must be obligated in grants by September 30, 2020. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2020, will revert to FTA for reapportionment under the Metropolitan Planning Program.

6. Other Program Information

The planning programs provide funding and procedural requirements to metropolitan areas and States for multimodal transportation planning that is cooperative, continuous, and comprehensive, resulting in long-range plans and short-range programs of projects that reflect transportation investment priorities. The planning programs are jointly administered by FTA and the Federal Highway Administration (FHWA), which provides additional funding. The FAST Act sections 5303 and 5304 as noted below:

- New emphasis is placed on intercity transportation, including intercity buses and intermodal facilities that support intercity transportation, and commuter vanpool providers.
- The selection and role of the transit representation on MPO policy boards in large urbanized areas is clarified. MPOs in urbanized areas designated as transportation management areas must include officials of agencies that administer or operate major modes of transportation, as well as representatives of public transit operators, on MPO policy boards. The representative of public transit shall be selected according to the bylaws or enabling legislation of the MPO, and the

representative of public transit may also serve as a representative of a local municipality on the MPO board. For additional information please reference the Final Rule on Statewide and Nonmetropolitan Transportation Planning and Metropolitan Transportation Planning (81 FR, 3404, May 27, 2016).

- The scope of the planning process adds two new planning factors, in addition to the eight pre-existing factors established under prior law. The two new factors are: (1) Improve the resiliency and reliability of the transportation system, and reduce the vulnerability of the existing transportation infrastructure to natural disasters, and (2) enhance travel and tourism.

- MPOs and State DOTs should provide public ports, intercity bus operators and employer-based commuting programs with a reasonable opportunity to comment on transportation plans.

- Plans must place greater emphasis on the congestion management process. MPOs that serve transportation management areas must develop a congestion management plan with input from employers, private and public transit providers, transportation management associations, and organizations that provide low-income individuals transportation access to jobs and job related services.

- The long-range statewide transportation plan and metropolitan transportation plan must include a description of the performance measures and performance targets. State DOTs and MPOs are also required to provide a system performance report evaluating the condition and performance of the transportation system.

In the Final Rule on Statewide and Nonmetropolitan Transportation Planning and Metropolitan Transportation Planning, FHWA and FTA make the statewide, metropolitan, and nonmetropolitan transportation planning regulations consistent with current statutory requirements. The final rule establishes the following: (1) A new mandate for States and MPOs to take a performance-based approach to planning and programming; (2) a new emphasis on the nonmetropolitan transportation planning process, by requiring States to have a higher level of involvement with nonmetropolitan local officials and providing a process for the creation of RTPOs; (3) implementation of the afore mentioned statutory requirement for a structural change to the membership of the larger MPOs; (4) a new framework for voluntary scenario

planning; (5) a new authority for the integration of the planning and environmental review processes; and (6) a process for programmatic mitigation plans.

Among the most significant charges is the new mandate for a performance-based planning process: MPOs and State DOTs must establish performance targets that address forthcoming U.S. DOT-issued national performance measures that are based on the goals outlined in the legislation—safety, infrastructure condition, congestion reduction, system reliability, economic vitality, environmental sustainability, reduced project delivery delays, transit safety, and transit asset management. MPOs also must coordinate their performance targets, to the maximum extent practicable, with performance targets set by FTA grantees under the new performance measure requirements for safety and state of good repair. Transportation Improvement Programs (TIPs) must include a description of the anticipated progress toward achieving the performance targets resulting from implementation of the TIP. By October 1, 2017, DOT will provide Congress with a report evaluating the effectiveness of performance-based planning and assessing the technical capacity of MPOs in smaller areas to undertake performance-based planning. After May 27, 2018, a State’s and MPO’s long-range plans, STIPs, and TIPs must reflect performance targets and plans according to the provisions of the final rule.

B. State Planning and Research Program (49 U.S.C. 5304 and 5305(e))

This program provides financial assistance to States for statewide transportation planning and other technical assistance activities, including supplementing the technical assistance program provided through the Metropolitan Planning program. The specific requirements of Statewide transportation planning are set forth in 49 U.S.C. 5304 and further explained in 23 CFR part 450 as referenced in 49 CFR part 613, Planning Assistance and Standards. State DOTs are required to reference performance measures and performance targets within the Statewide Planning process. This funding must support work elements and activities resulting in balanced and comprehensive intermodal transportation planning for the movement of people and goods. Comprehensive transportation planning is not limited to transit planning or surface transportation planning, but also encompasses the relationships among land use and all transportation modes,

without regard to the programmatic source of Federal assistance.
For more information or questions on the State Planning and Research program, please contact Victor Austin at (202) 366–2996 or victor.austin@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$23,051,336 in FY 2017, to provide financial assistance for statewide planning and other technical assistance activities under section 5305. Under the Continuing Appropriations Act of 2017, \$12,960,603 is available through April 28, 2017. As specified in law, this represents the 17.28 percent of the amounts available for section 5305 that are allocated to the Statewide Planning and Research program.

2. FY 2017 Funding Availability

In FY 2017, \$12,960,603 is available for the period October 1, 2016 through April 28, 2017 to the State Planning and Research Program (section 5305(e)). The total amount apportioned for the State Planning and Research Program (SPRP) is \$12,895,800 as shown in the table below, after the deduction for oversight (authorized by section 5338).

STATEWIDE PLANNING PROGRAM—FY 2017	
Total Appropriation Available through April 28, 2017	\$12,960,603
Oversight Deductions	(64,803)
Total Apportioned	12,895,800

States’ apportionments for this program are displayed in Table 2.

3. Basis for Formula Apportionment

Of the amount authorized for section 5305, 17.28 percent is allocated to the State Planning and Research program. FTA apportions funds to States by a statutory formula that is based on the most recent decennial Census data available, and the State’s UZA population as compared to the UZA population of all States.

4. Requirements

Funds are provided to States for Statewide transportation planning programs. These funds may be used for a variety of purposes such as planning, technical studies and assistance, performance-based planning, demonstrations, and management training. In addition, a State may authorize a portion of these funds to be used to supplement Metropolitan Planning funds allocated by the State to its UZAs, as the State deems appropriate. Program guidance for the

State Planning and Research program is found in FTA Circular 8100.1C, *Program Guidance for Metropolitan Planning and State Planning and Research Program Grants*, dated September 1, 2008.

5. Period of Availability

The State Planning and Research program funds apportioned in this notice are available for obligation during FY 2017 plus three additional fiscal years. Accordingly, funds apportioned in FY 2017 must be obligated in grants by September 30, 2020. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2020 will revert to FTA for reappportionment under the State Planning and Research program.

C. Urbanized Area Formula Program (49 U.S.C. 5307)

The Urbanized Area Formula Program provides financial assistance to designated recipients in urbanized areas (UZAs) for capital investments in public transportation systems, planning, job access and reverse commute projects, and, in some cases, operating assistance. FTA apportions funds for this program through a statutory formula. Of the amount authorized for Section 5307 each year, \$30 million is set aside for the competitive Passenger Ferry Grant Program (Ferry program), as authorized under 49 U.S.C., 5307(h). The Ferry program offers financial assistance to public ferry systems in urbanized areas for capital projects. Projects are selected annually through a funding competition. Additionally 0.5 percent will be apportioned to eligible States for State Safety Oversight (SSO) Program grants, and 0.75 percent will be set aside for program oversight. Further information on the 0.5 percent apportionment to States for the State Safety Oversight Program is provided in section IV.M. of this notice.

For more information or questions on the *Urbanized Area Formula Program*, contact Tara Clark at (202) 366–2623 or tara.clark@dot.gov. For more information on the *Ferry Program*, contact Vanessa Williams at (202) 366–4818 or vanessa.williams@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$4,629,683,814 in FY 2017 to provide financial assistance for urbanized areas under section 5307. Under the Continuing Appropriations Act of 2017, \$2,604,058,475 is available through April 28, 2017.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017, only \$2,604,058,475 is available for the Urbanized Area Formula program for the period of October 1, 2016 through April 28, 2017. The total amount apportioned to urbanized areas is \$2,817,580,866, which includes the addition of amounts apportioned to UZAs pursuant to the Section 5340 Growing States and High Density States Formula factors. This amount excludes the set-aside for the Ferry program, apportionments under the State Safety Oversight Program, and oversight (authorized by section 5338), as shown in the table below:

**URBANIZED AREA FORMULA
PROGRAM—FY 2017**

Total Appropriation available thru April 28, 2017	^a \$2,604,058,475
Oversight Deduction	(19,530,439)
Ferry Competitive Program	(17,211,583)
State Safety Oversight Program	(13,020,292)
Section 5340 High Density States	151,441,543
Section 5340 Growing States	111,800,668
Total Apportioned	2,817,538,371

^aIncludes 1.5 percent set-aside for Small Transit Intensive Cities Formula.

Table 3 displays the amounts apportioned under the Urbanized Area Formula Program.

3. Basis for Formula Apportionment

FTA apportions Urbanized Area Formula Program funds based on statutory formulas. Congress established four separate formulas to apportion portions of the available funding: The Section 5307 Urbanized Area Formula Program formula, the Small Transit Intensive Cities (STIC) formula, the Growing States and High Density States formula, and a formula based on low-income population.

Consistent with prior apportionment notices, Table 3 shows a total section 5307 apportionment for each UZA, which includes amounts apportioned under each of these formulas. Detailed information about the formulas is provided in Table 4. For technical assistance purposes, the UZAs that receive STIC funds are listed in Table 6. FTA will provide breakouts of the funding allocated to each UZA under these formulas upon request to the FTA Regional Office.

FTA has calculated dollar unit values for the formula factors used in the Urbanized Area Formula Program apportionment calculations. These values represent the amount of money

each unit of a factor is worth in this year's apportionment. The unit values change each year, based on all of the data used to calculate the apportionments, as well as the amount appropriated by Congress for the apportionment. The dollar unit values for FY 2017 are displayed in Table 5. To replicate the basic formula component of a UZA's apportionment, multiply the dollar unit value by the appropriate formula factor (*i.e.*, the population, population x population density), and when applicable, data from the NTD (*i.e.*, route miles, vehicle revenue miles, passenger miles, and operating cost).

a. Section 5307—Urbanized Area Formula

For UZAs between 50,000 and 199,999 in population, the Urbanized Area Formula is based on population and population density. For UZAs with populations of 200,000 or more, the formula is based on a combination of bus revenue vehicle miles, bus passenger miles, bus operating costs, fixed guideway vehicle revenue miles, and fixed guideway route miles, as well as population and population density. The Urbanized Area Formula is defined in 49 U.S.C. 5336. Consistent with section 5336(b), FTA has included 27 percent of the fixed guideway directional route miles and vehicle revenue miles from eligible urbanized area transit systems, but which were attributable to rural areas outside of the urbanized areas from which the system receives funds.

b. Small Transit Intensive Cities Formula

Under the STIC formula, FTA apportions 1.5% of the funds made available for section 5307 to UZAs that are under 200,000 in population and have public transportation service that operates at a level equal to or above the industry average for UZAs with a population of at least 200,000, but not more than 999,999. STIC funds are apportioned on the basis of six performance categories: Passenger miles traveled per vehicle revenue mile, passenger miles traveled per vehicle revenue hour, vehicle revenue miles per capita, vehicle revenue hours per capita, passenger miles traveled per capita, and passengers per capita. In FY 2019, the STIC set aside will increase from 1.5% to 2%.

The data used to determine a UZA's eligibility under the STIC formula and to calculate the STIC apportionments was obtained from the NTD for the 2015 reporting year. Because performance data change with each year's NTD reports, the UZAs eligible for STIC

funds and the amount each receives may vary each year. UZAs that received funding through the STIC formula for FY 2017 are listed in Table 6.

c. Section 5340—Growing States and High Density States Formula

FTA also apportions funds to qualifying UZAs and States according to the section 5340 Growing States and High Density States formula, as shown in Table 3. More information on this program and its formula is found in section IV.P. of this notice.

d. Low-Income Population

Of the amount authorized and appropriated for the Urbanized Area Formula Program in each year, 3.07 percent is apportioned on the basis of low income population. As specified in statute, FTA apportions 75 percent of the available funds to UZAs with a population of 200,000 or more. Funds are apportioned based on the ratio of the number of low income individuals in each UZA to the total number of low income individuals in all urbanized areas of that size. FTA apportions the remainder of the funds (25 percent) to UZAs with populations of less than 200,000, according to an equivalent formula. The low income populations used for this calculation were based on the American Community Survey (ACS) data set for 2010–2014. This information is updated by the Census Bureau annually.

4. Requirements

The maximum Federal share for the Urbanized Area Formula Program, including the Ferry Program, is 80 percent, or 85 percent for the net project cost of acquiring vehicles (including clean-fuel or alternative fuel) for the purpose of complying with or maintaining compliance with the Clean Air Act (CAA) or the Americans with Disabilities Act (ADA) of 1990. The maximum Federal share is 90 percent of the net project cost for acquiring vehicle-related equipment or facilities (including clean-fuel or alternative-fuel vehicle-related equipment or facilities) for the purpose of complying with or maintaining compliance with the CAA or ADA.

Program guidance for the Urbanized Area Formula Program is found in FTA Circular 9030.1E, Urbanized Area Formula Program: Program Guidance and Application Instructions, dated January 16, 2014, and is supplemented by additional information and changes provided in this notice and that may be posted to the Urbanized Area Formula Grants program Web page. FTA is in the process of updating the program circular

to incorporate changes resulting from FAST Act amendments to 49 U.S.C. 5307.

5. Period of Availability

Funds made available under the Urbanized Area Formula Program are available for obligation during the year of apportionment plus five additional years. Accordingly, funds apportioned in FY 2017 must be obligated by September 30, 2022. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2022 will revert to FTA for reapportionment under the Urbanized Area Formula Program.

Funds allocated under the Ferry program follow the same period of availability as section 5307. Accordingly, funds allocated in FY 2017 must be obligated by September 30, 2022. Any of the funds allocated in FY 2017 that remain unobligated at the close of business on September 30, 2022 will revert to FTA for reallocation under the Ferry program.

6. Other Program Information

a. Special Rule for Operating Assistance in Large Urbanized Areas

The special rule at 49 U.S.C. 5307(a)(2) makes recipients in urbanized areas with populations of 200,000 or above that operate 100 or fewer buses in fixed route service or general public demand response service during peak hours, excluding ADA complementary paratransit service, eligible for operating assistance subject to a maximum amount per system as explained below:

i. Public transportation systems that operate a minimum of 76 buses and a maximum of 100 buses in fixed route service or general public demand response, excluding ADA complementary paratransit service, during peak service hours may receive operating assistance in an amount not to exceed 50 percent of the share of the apportionment that is attributable to such systems within the urbanized area, as measured by vehicle revenue hours.

ii. Public transportation systems that operate 75 or fewer buses in fixed route service or demand response, excluding ADA complementary paratransit service, during peak service hours may receive operating assistance in an amount not to exceed 75 percent of the share of the apportionment that is attributable to such systems within the urbanized area, as measured by vehicle revenue hours.

iii. A list of eligible recipients and their maximum operating assistance amounts for FY 2017 is shown in Table

3–A. FTA identified the systems eligible to use this provision and their maximum amounts for FY 2017 using data from the NTD for reporting year 2015. Operating assistance requires a 50 percent local match.

In accordance with section 5307(a)(2), FTA has calculated a fixed annual cap on operating assistance for each eligible agency that provides service in a large UZA. The cap is determined by dividing the UZA's apportionment by the total number of vehicle revenue hours reported from all public transportation operators and from all transit modes in the UZA, and then by multiplying this quotient by the number of bus vehicle revenue hours operated in the UZA by the eligible system. The result is the proportional share of the apportionment that is attributable to the qualifying system, as measured by vehicle revenue hours. This cap is calculated based on the FY 2017 apportionment for an eligible provider's UZA. Eligible systems operating in more than one UZA over 200,000 in population will receive separate operating caps from each UZA in which the system operates. The FY 2017 Apportionment Table 3A includes all eligible general public demand response operators. Systems that operate more than 100 buses in general public demand response service, and which do not operate any fixed-route service are not eligible for operating assistance under this provision. Systems that only operate ADA complimentary paratransit are not eligible for operating assistance under this provision.

Systems that operate more than 100 buses in fixed route service are not eligible for operating assistance under this provision. Systems that operate 100 or fewer fixed route buses are eligible, regardless of the number of demand response vehicles they operate.

In determining the amount of operating assistance available for specific systems in urbanized areas under the Special Rule, public transportation systems may execute a written agreement with one or more other public transportation systems within the urbanized area to allocate funds by a method other than by measuring vehicle revenue hours. Systems within the urbanized area may combine their individual operating assistance caps and allocate the combined funds using a method that is agreed upon by all of the systems. The operating assistance cap for the urbanized area does not change as a result of any agreement between two or more systems. The method used to allocate the funds must be documented in a written agreement, signed by the

participating parties, and transmitted to FTA as part of the split letter.

b. Eligibility of Substitute Transit Service as a Capital Project

The cost of operating substitute service (*i.e.* a bus bridge) is an eligible capital project expense when incidental to a scheduled capital maintenance, rehabilitation, or construction project on an existing system. Eligible substitute service must be temporary, scheduled, and the costs defined in the grant agreement for the capital project. Substitute service costs are not an eligible capital project expense in conjunction with emergency maintenance, operating incidents, or other contingency operations, including emergency operations associated with an emergency or a disaster.

c. Prohibition on Funding for Art and Non-Functional Landscaping

While formerly eligible for Urbanized Area Formula Program funds as a "Transit Enhancement" (the precursor to Associated Transit Improvement), at 49 U.S.C. 5323 (h) now prohibits the use of FTA funds for the "incremental costs of incorporating art or non-functional landscaping into facilities, including the costs of an artist on the design team." This prohibition applies to the creation, production, or installation of artworks, defined as objects intended for a primarily aesthetic purpose, or the involvement of artists in the development of a capital project. However, FTA does not interpret the law to exclude or generally prohibit the functional and aesthetic design of transit stations or related facilities, including designs intended to minimize adverse visual effects on the surrounding community. Transit facilities and surrounding landscape designs should incorporate aesthetic considerations, including but not limited to decisions regarding the use of light, shape, color, materials, the use of space, and the historic setting to achieve a functional and welcoming public transit facility.

FTA will not require grantees to assess the often indeterminate incremental costs associated with functional design elements, including, but not limited to, the use of different types or colors of paint or tile, wayfinding elements intended to direct passengers or staff, or different or alternate construction materials in the design of a transit facility.

Recipients may continue to use local funds for art in association with transit capital projects, but such expenditures may not be counted towards the local

share of a project cost, and should not be included in the grant award.

With regard to landscaping, FTA recognizes that landscaping is a functional element of many transit facilities. For example, landscaping can be used to aid in the absorption or drainage of rainwater, prevention of erosion, support of structures on a steep grade, minimization of noise impacts, protection of habitat, provision of shade in hot climates, channeling of pedestrian or vehicle traffic, definition of useable or unsafe spaces, and many other purposes. In interpreting the term "functional landscaping" under this provision of law, FTA draws a similar distinction, as with art, between functionally appropriate landscape design and landscape elements installed primarily for visual or aesthetic appeal.

For additional information see the Art and Non-Functional Landscaping frequently asked questions posted on the Urbanized Area Formula Grants Web page.

d. Employee Training Expenses

Costs associated with employee training may be eligible for Urbanized Area Formula Program funding as operating expenses, as preventive maintenance expenses, or as provided for under the following provisions. A recipient may fund training expenses as an operating expense under Section 5307, where allowed, at a 50 percent Federal share.

i. Under Section 5314(b), up to 0.5 percent of the program a recipient's section 5307, 5337, and 5339 funds may be used for human resources and workforce development activities at an 80 percent Federal cost share, including the cost of administering a training program. Eligible activities include:

- Various public transportation training programs;
- Outreach programs for targeted groups to increase public transportation employment for veterans, women, individuals with disabilities, and minorities;
- Development of training partnerships with key stakeholders including community colleges, workforce development boards, and other industry groups;
- Development of apprenticeships, on-the-job-training, and instructional training for public transportation; maintenance and operations occupations;
- Improve safety, security, and emergency preparedness in local public transportation system through improved safety culture and workforce communication with first responders and the riding public. And other

activities approved by FTA that address human resource needs as they apply to public transportation activities.

ii. Under Section 5314(c), up to 0.5 percent of Section 5307, 5337, and 5339 funds are available to a state or public transportation authority recipient in a fiscal year to use for tuition and direct educational expenses at the National Transit Institute for education and training of state and local transportation employees, at a federal share not to exceed 80 percent. States may also use these funds for training State and local transportation agency employees through grants and contracts with public and private agencies, and other institutions and individuals with prior FTA approval.

D. Fixed Guideway Capital Investment Grant Program (49 U.S.C. 5309)

The Capital Investment Grant (CIG) Program includes four types of eligible projects—New Starts projects, Small Starts projects, Core Capacity Improvement projects, and Programs of Inter-related Projects. Funding is provided for construction of: (1) New fixed guideway systems or extensions to existing fixed guideway systems such as rapid rail (heavy rail), commuter rail, light rail, trolleybus (using overhead catenary), cable car, passenger ferries, and bus rapid transit operating on an exclusive transit lane for the majority of the corridor length that also includes features that emulate the services provided by rail fixed guideway including defined stations, traffic signal priority for public transit vehicles, and short headway bi-directional service for a substantial part of weekdays and weekends; (2) corridor-based bus rapid transit service that does not operate on an exclusive transit lane but includes features that emulate the services provided by rail fixed guideway including defined stations, traffic signal priority for public transit vehicles, and short headway bi-directional services for a substantial part of weekdays; (3) projects that expand the capacity by at least 10 percent in an existing fixed guideway corridor that is at capacity today or will be in five years; and (4) programs of two or more interrelated projects as described above that have logical connectivity with one another and will all begin construction in a reasonable timeframe.

For more information about the Capital Investment Grant program contact Elizabeth Day, Office of Capital Project Development, at (202) 366-5159 or elizabeth.day@dot.gov. For information about published allocations contact Eric Hu, Office of Transit

Programs, at (202) 366-0870 or eric.hu@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$2,301,785,760 in FY 2017, to provide financial assistance under section 5309. Under the Continuing Appropriations Act of 2017, \$1,241,314,889 is available through April 28, 2017.

2. FY 2017 Funding Availability

In FY 2017, \$1,241,314,889 is available for the period October 1, 2016 through April 28, 2017 to the Fixed Guideway Capital Investment Grant Program. The total amount available for projects is \$1,228,901,740 as shown in the table below, after the deduction for oversight (authorized by section 5338).

CAPITAL INVESTMENT GRANTS (NEW STARTS)—FY 2017

Total Appropriation Available through April 28, 2017	\$1,241,314,889
Oversight Deduction	(12,413,149)
Total Apportioned	1,228,901,740

3. Basis for Allocation

Funds are allocated on a competitive basis and subject to program evaluation.

4. Requirements

Projects become candidates for funding under the Capital Investment Grant Program by successfully completing steps in the process defined in section 5309 and obtaining a satisfactory rating under the statutorily-defined criteria. For New Starts and Core Capacity Improvement projects, the steps in the process include project development, engineering, and construction. For Small Starts projects, the steps in the process include project development and construction. For programs of interrelated projects, the steps in the process depend on the combination of project types included. New Starts and Core Capacity Improvement projects receive construction funds from the program through a full funding grant agreement (FFGA) that defines the scope of the project and specifies the total multi-year Federal commitment to the project. Small Starts projects receive construction funds through a single year grant or a Small Starts grant agreement (SSGA) that defines the scope of the project and specifies the Federal commitment to the project.

5. Period of Availability

Funds for the Fixed Guideway Capital Investment Grant Program remain

available for obligation for four years, which includes the fiscal year in which the funds are allocated to projects plus three additional years.

E. Enhanced Mobility of Seniors and Individuals With Disabilities Program (49 U.S.C. 5310)

The Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program provides formula funding to states for the purpose of meeting the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meet these needs. The program aims to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options.

The Pilot Program for Innovative Coordinated Access and Mobility Program (Pilot Program) open to Section 5310 recipients—was established by Section 3006(b) of the *FAST Act*. The purpose of the program is to assist in financing innovative projects for the transportation disadvantaged that improve the coordination of transportation services and non-emergency medical transportation (NEMT) services, including, for example, the deployment of coordination technology, and projects that create or increase access to community One-Call/One-Click Centers.

For more information or questions on the Enhanced Mobility of Seniors and Individuals with Disabilities program, please contact Kelly Tyler at (202) 366-3120 or Kelly.Tyler@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$268,208,388 in FY 2017 to provide formula funding to states for the purpose of meeting the transportation needs of older adults and people with disabilities. The law also authorizes \$3 million for the competitive Pilot Program. Under the Further Continuing and Security Assistance Appropriations Act, 2017, \$150,859,185 is available through April 28, 2017 for the formula program.

2. FY 2017 Funding Availability

The total available funding for projects under the Section 5310 formula program for FY 2017 is \$150,104,889 after the oversight deduction as shown in the table below.

SECTION 5310 FORMULA PROGRAM— FY 2017

Total Appropriation Available through April 28, 2017)	\$150,859,185
Oversight Deductions (oversight 0.5%)	(754,296)
Total Apportioned	150,104,889
Competitive Pilot Program	1,147,439

3. Basis for Formula Apportionment

Sixty percent of the funds are apportioned among designated recipients for urbanized areas with a population of 200,000 or more individuals. Twenty percent of the funds are apportioned among the States for urbanized areas with a population of at least 50,000 but less than 200,000. Twenty percent of the funds are apportioned among the States for rural areas, defined as areas with a population less than 50,000. Census Data on Older Adults and People with Disabilities is used for the Section 5310 Enhanced Mobility of Older Adults and People with Disabilities Apportionments. FY 2017

Apportionments Table 8 displays the amounts apportioned under the Enhanced Mobility of Seniors and Individuals with Disabilities Program.

Under the section 5310 formula, funds are allocated using Census data on older adults (*i.e.*, persons 65 and older) and people with disabilities. However, beginning in 2010, the Census Bureau stopped collecting this demographic information as part of its decennial census. Data on seniors and people with disabilities is now only available from the American Community Survey (ACS), which is conducted and published on a rolling basis. FTA's FY 2017 section 5310 apportionments incorporate ACS data published in December, 2015. Data on seniors comes from the ACS 2010–2014 five-year data set, Table B01001, “Sex by Age. Data on persons with disabilities comes from the ACS 2010–2014 five-year data set, Table S.1810, “Disability Characteristics.”

4. Requirements

At least 55 percent of program funds must be used on capital projects such as buses and vans; wheelchair lifts, ramps, and securement devices or transit-related information technology systems including scheduling/routing/one-call systems. Mobility management programs are also defined as capital projects for purposes of this provision. The acquisition of transportation services under a contract, lease, or other arrangement is also eligible; both the capital and operating costs associated

with contracted service are eligible capital expenses for purposes of this provision. The capital eligibility of acquisition of services is limited to the section 5310 program. The remaining 45 percent of a recipient's 5310 funds can be used for capital or operating.

a. Eligible Recipients

Eligible recipients include States for rural and small urban areas and designated recipients chosen by the Governor of the State for large urban areas; or a State or local governmental entity that operates a public transportation service. For urbanized areas less than 200,000 in population and in the rural areas, the State is the designated recipient for section 5310. Current section 5310 designations remain in effect until changed by the Governor of a State by officially notifying the appropriate FTA Regional Administrator of re-designation. A State or local governmental entity that operates a public transportation service may be a direct recipient for Section 5310 funds.

In urbanized areas over 200,000 in population, the recipient charged with administering the section 5310 Program must be officially designated in accordance with the planning process, by the Governor of a State, responsible local officials, and publicly owned operators of public transportation prior to grant award (See the definition of designated recipient, 49 U.S.C. 5302(4)). Designated recipients are responsible for administering the program. Eligible subrecipients include private nonprofit agencies, public bodies approved by the state to coordinate services for seniors and people with disabilities, or public bodies which certify to the Governor that no nonprofit organizations or associations are readily available in an area to provide the service.

b. Local Match

Capital assistance is provided at 80 percent Federal share; 20 percent local share. Operating assistance requires a 50 percent local match. Funds provided under other Federal programs (other than those of the DOT, with the exception of the Federal Lands Transportation Program may be used for local match for funds provided under section 5310, and revenue from service contracts may be used as local match.

c. Planning and Consultation

The coordinated planning provision requires that all projects be included in the local coordinated human service-public transportation plan. The plan must be developed and adopted with representation from seniors, individuals

with disabilities, representatives of public, private, nonprofit transportation and human services providers, and other members of the public.

d. State and Project Management Plans

States, designated recipients, and State or local governmental entities that operate a public transportation service that are responsible for implementing the section 5310 program are required to document their approach to managing the program. The Management Plans serve as the basis for FTA management reviews of the program, and provide public information on the administration of the programs.

e. Program of Projects (POP)

Designated recipients are required to develop a Program of Projects (POP) with the grant application and submit it to the FTA Regional Office. The POP should be developed with respect to the coordinated plan, long range plan, and the transportation improvement plan. For additional guidance in developing the required POP, see Chapter IV of the FTA Circular 9070.1G, *Enhanced Mobility of Seniors and Individuals with Disabilities Program Guidance and Application Instructions*, dated July 7, 2014.

5. Period of Availability

For Enhanced Mobility of Seniors and Individuals with Disabilities Program funds apportioned under this notice, the period of availability is three years, which includes the year of apportionment plus two additional years. Accordingly, funds apportioned in FY 2017 must be obligated in grants by September 30, 2019. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2019 will revert to FTA for reapportionment among the States and urbanized areas.

6. Other Program Information

A State may transfer apportioned funds between small urbanized areas and rural areas if it can certify that the needs are being met in the area to which the funds were originally apportioned. The State can transfer the funds (rural and small urbanized area) to any area within the state if a statewide program for section 5310 is established. Section 5310 funds may not be transferred to other FTA programs. Section 5310 funds apportioned to large urbanized areas may not be transferred to other areas. Section 5310 program recipients may partner with meal delivery programs such as the OAA-funded meal programs (to find local programs, visit: www.Eldercare.gov) and the USDA

Summer Food Service Program <http://www.fns.usda.gov/sfsp/summer-food-service-program-sfsp>. Transit service providers receiving 5310 funds may coordinate and assist in providing meal delivery services on a regular basis as long as this does not conflict with the provision of transit services.

Program Guidance is found in FTA Circular 9070.1G, *Enhanced Mobility of Seniors and Individuals with Disabilities Program Guidance and Application Instructions*, dated July 7, 2014. Section 3006(b) of the FAST Act creates a new competitive pilot program for innovative coordinated access and mobility that is discussed in section III of this notice. The Federal share is 80% for capital projects. Local Match can come from other Federal (non-DOT) funds.

F. Formula Grants for Rural Areas Program (49 U.S.C. 5311)

The Rural Areas program provides formula funding to States and Indian tribes for the purpose of supporting public transportation in areas with a population of less than 50,000. Funding may be used for capital, operating, planning, job access and reverse commute projects, and State administration expenses. Eligible sub-recipients include State and local governmental authorities, Indian Tribes, private non-profit organizations, and private operators of public transportation services, including intercity bus companies. Indian Tribes are also eligible direct recipients under Rural Areas Formula Program, both for funds apportioned to the States and for projects apportioned or selected to be funded with funds set aside for a separate Tribal Transit Program. *For more information about the Formula Grants for Rural Areas program, please contact Élan Flippin at (202) 366-3800 or Elan.flippin@dot.gov.*

1. Authorized Amounts

Federal transit law authorizes \$632,355,120 in FY 2017 to provide financial assistance for rural areas under Rural Areas Formula Program.

2. FY 2017 Funding Availability

Under the Further Continuing Security Assistance Appropriations Act, 2017, \$317,012,628 is available through April 28, 2017 to the Rural Area Programs which includes \$44,378,969 for Growing States. The total amount apportioned to the program is \$359,613,193 as shown in the table below, after the deduction for oversight (authorized by section 5338).

FORMULA GRANTS FOR RURAL AREAS PROGRAM—FY 2017

Total Appropriation Available Through April 28, 2017	\$317,012,628
Oversight Deductions	(1,778,404)
Section 5340 Growing States	44,421,465
Total Apportioned	359,655,689

3. Basis for Formula Apportionment

FTA apportions Rural Areas Formula Program funds to the states by a statutory formula using the latest available U.S. decennial census data. The majority of Rural Formula Program funds (83.15 percent) are apportioned based on land area and population factors. In this first tier, no state may receive more than 5 percent of the amount apportioned on the basis of land area. The remaining Rural Formula Program funds (16.85 percent) are apportioned based on land area, vehicle revenue miles, and low-income individual factors. In this second tier, no state may receive more than 5 percent of the amount apportioned on the basis of land area, or more than 5 percent of the amounts apportioned for vehicle revenue miles. In addition to funds made available under section 5311, FTA adds amounts apportioned based on rural population according to the growing states formula factors of 49 U.S.C. 5340 to the amounts apportioned to the states under the section 5311 formula. Before FTA apportions section 5311 funds to the states, FTA subtracts funding from the total available amounts for the Appalachian Development Transportation Assistance Program, the Tribal Transit Program, the Rural Transportation Assistance Program (RTAP), and FTA oversight activities.

Data from the National Transit Database (NTD) 2015 Report Year was used for this apportionment, including data from directly-reporting Indian tribes. Data from public transportation systems that reported as urbanized area systems, but that was not attributable to an urbanized area, was also included. The Rural Areas Formula Program program includes three takedowns: The Appalachian Development Public Transportation Assistance Program; the Rural Transit Assistance Program (RTAP); and the Tribal Transit Program. These separate programs are described in the sections that follow.

4. Requirements

The Rural Areas Formula Program provides funding for capital, operating, planning, job access and reverse commute projects, and administration expenses for public transit service in

rural areas under 50,000 in population. The planning activities undertaken with Rural Areas Formula Program funds are in addition to those awarded to the State under section 5305 and must be used specifically for the needs of rural areas.

a. Intercity Bus Transportation

Each State must spend no less than 15 percent of its annual Rural Areas Formula Program apportionment for the development and support of intercity bus transportation, unless it can certify, after consultation with affected intercity bus service providers, that the intercity bus service needs of the State are adequately met. FTA encourages consultation with other stakeholders, such as communities affected by loss of intercity service. The cost of an unsubsidized portion of privately provided intercity bus service that connects feeder service, including all operating and capital costs of such service whether or not offset by revenue from such service may be used as in-kind local match for the intercity bus projects. FTA is updating the Rural Areas Formula Program program circular to include this change.

b. State Administration

States may elect to use up to 10 percent of their apportionment at 100 percent Federal share to administer the Rural Areas Formula Program program and provide technical assistance to subrecipients. Technical assistance includes project planning, program and management development, public transportation coordination activities, and research the State considers appropriate to promote effective delivery of public transportation to rural areas.

c. Other Requirements

The Federal share for capital assistance is 80 percent and for operating assistance is 50 percent, except that States eligible for the sliding scale match under FHWA programs may use that match ratio for Rural Areas Formula Program capital projects and 62.5 percent of the sliding scale capital match ratio for operating projects. No longer exists

Each State prepares an annual program of projects, which must provide for fair and equitable distribution of funds within the States, including Indian reservations, and must provide for maximum feasible coordination with transportation services assisted by other Federal sources.

Additional program guidance for the Rural Areas Formula Program is found in FTA Circular 9040.1G, *Formula*

Grants for Rural Areas: Program Guidance and Application Instructions, dated November 24, 2014, and is supplemented by additional information that may be posted to FTA's Web page.

5. Period of Availability

Rural Areas Formula Program funds remain available to states for obligation for three Federal fiscal years, beginning with the year of apportionment plus two additional years. The Rural Areas Formula Program funds apportioned in this notice are available for obligation during FY 2017 plus two additional years. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2019 will revert to FTA for reapportionment under the Rural Areas program.

6. Other Program Information

Revenue from the sale of advertising and concessions may be used as local match.

G. Rural Transportation Assistance Program (49 U.S.C. 5311(b)(3))

This program provides funding to assist in the design and implementation of training and technical assistance projects, research, and other support services tailored to meet the needs of transit operators in rural areas. *For more information about Rural Transportation Assistance Program (RTAP), please contact Elan Flippin at (202) 366-3800 or Elan.flippin@dot.gov.*

1. Authorized Amounts

There is a two percent takedown from the funds made available for RTAP. Of the remaining amount, 15 percent is reserved for the National RTAP program. The remainder is available for allocation to the States.

Federal Transit Law authorizes \$12,647,102 in FY 2017 to provide technical assistance.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$7,113,616 is available through April 28, 2017 to the RTAP Program. The total amount apportioned for RTAP is \$6,046,574 as shown in the table below, after the deduction for National RTAP.

RURAL TRANSPORTATION ASSISTANCE PROGRAM—FY 2017

Total Appropriation Available through April 28, 2017	\$7,113,616
National RTAP (15%)	(1,067,042)
Total Apportioned	6,046,574

3. Basis for Formula Apportionment

FTA allocates funds to the States by an administrative formula. First, FTA allocates \$65,000 to each State (\$10,000 to territories), and then allocates the balance based on rural population in the 2010 census.

4. Requirements

Eligible expenses include the design and implementation of training and technical assistance projects, research, and other support services tailored to meet the needs of transit operators in rural areas.

States may use the funds to undertake research, training, technical assistance, and other support services to meet the needs of transit operators in rural areas. These funds are to be used in conjunction with a State's administration of the Rural Areas Formula Program, but also may support the rural components of the section 5310 program.

5. Period of Availability

The RTAP funds apportioned in this notice are available for obligation in FY 2017 plus two additional years, consistent with that established for the Rural Areas Formula Program Rural Program.

6. Other Program Information

The National RTAP project is administered by cooperative agreement and re-competed at five-year intervals. In July of 2014, FTA awarded a cooperative agreement to the Neponset Valley Transportation Management Association to administer the National RTAP Program. The National RTAP projects are guided by a project review board that consists of managers of rural transit systems and State DOT RTAP programs. National RTAP resources also support the biennial Transportation Research Board National Conference on Rural Public and Intercity Bus Transportation and other research and technical assistance projects of a national scope.

H. Appalachian Development Public Transportation Assistance Program (49 U.S.C. 5311(c)(2))

This program is a take-down under the Rural Areas Formula Program to provide additional funding to support public transportation in the Appalachian region. There are sixteen eligible States that receive an allocation under this provision. The State allocations are shown in the Rural Areas Formula program table posted on FTA's Web site on the FY 2017 Apportionments page. For more information about the Appalachian

Development Public Transportation Assistance Program, please contact *Élan Flippin* at (202) 366–3800 or *Elan.flippin@dot.gov*.

1. Authorized Amounts

Federal transit law authorizes \$20 million in each of FY 2016 through FY 2020 as a take-down under the Rural Areas Formula Program to support public transportation in the Appalachian region.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$11,474,389 is available through April 28, 2017.

APPALACHIAN DEVELOPMENT PUBLIC TRANSPORTATION ASSISTANCE PROGRAM FUNDS FY 2017

Total Appropriation Available through April 28, 2017	\$11,474,389
Total Apportioned	11,474,389

3. Basis for Formula Apportionment

FTA apportions the funds using percentages established under section 9.5(b) of the Appalachian Regional Commission Code (subtitle IV of title 40). Allocations are based in general on each State's remaining estimated need to complete eligible sections of the Appalachian Development Highway System as determined from the latest percentages of available cost estimates for completion of the System. Such cost estimates are produced at approximate five year intervals. Allocations contain upper and lower limits in amounts determined by the Commission and are made in accordance with legislative instructions.

4. Requirements

Funds apportioned under this program can be used for purposes consistent with the Rural Areas Formula Program to support public transportation in the Appalachian region. Funds can be applied for in the State's annual Rural Areas Formula Program grant.

Appalachian program funds that cannot be used for operating may be used for a highway project under certain circumstances. States should contact their regional office if they intend to request a transfer. Additional information about the requirements for this section can be found in Chapter VII of FTA Circular 9040.1G, *Formula Grants for Rural Areas: Program Guidance and Application Instructions*, dated November 24, 2014.

5. Period of Availability

Appalachian Program funds are available for three years, which includes the year of apportionment plus two additional years, consistent with that established for the Rural Areas Formula Program.

I. Formula Grants for Public Transportation on Indian Reservations Program (49 U.S.C. 5311(j))

The Public Transportation on Indian Reservations Program, or Tribal Transit Program (TTP), totals \$35 million, of which \$30 million is for a formula program and \$5 million is for a competitive grant program. It is funded as a takedown from funds made available for the section Rural Areas Formula Program. Formula factors include vehicle revenue miles and the number of low-income individuals residing on tribal lands (defined as American Indian Areas, Alaska Native Areas, and Hawaiian Home Lands). Eligible direct recipients are Federally recognized Indian tribes and Alaskan Native Villages providing public transportation in rural areas. The TTP funds are allocated for grants to eligible recipients for any purpose eligible under Rural Areas Formula Program, which includes capital, operating, planning, and job access and reverse commute projects. *For more information about the Tribal Transit Program contact Elan Flippin, Office of Transit Programs at (202) 366–3800 or elan.flippin@dot.gov.*

1. Authorized Amounts

Federal transit law authorizes \$35 million in FY 2017 (\$30 million for formula and \$5 million for the competitive program).

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$15,080,181 is available for the formula program and \$5 million for the competitive program through April 28, 2017 as shown below.

FORMULA GRANTS FOR PUBLIC TRANSPORTATION ON INDIAN RESERVATIONS PROGRAM FY 2017

Total Appropriation (formula)	\$15,080,181
Total Apportioned (competitive)	5,000,000
Total Apportioned	20,080,181

3. Basis for Formula Apportionment

Funding is allocated by formula and distributed to eligible Indian tribes providing public transportation on tribal

lands. The formula apportionment shown in Table 10 is based on a statutory formula which includes three tiers. Tiers 1 and 2 are based on data reported to NTD by Indian tribes; Tier 3 is based on 2010–2014 American Community Survey data. The three tiers for the formula are: Tier 1—50 percent based on vehicle revenue miles reported to the NTD; Tier 2—25 percent provided in equal shares to Indian tribes reporting at least 200,000 vehicle revenue miles to the NTD; Tier 3—25 percent based on Indian tribes providing public transportation on tribal lands (American Indian Areas, Alaska Native Areas, and Hawaiian Home Lands) on which more than 1,000 low income individuals reside. If more than one eligible tribe provides public transportation services on tribal lands in a single Tribal Statistical Area, and the tribes cannot determine how to allocate Tier 3 funds, FTA will allocate the funds based on the relative portion of transit (as defined by unlinked passenger trips) operated by each tribe, as reported to the National Transit Database.

4. Requirements

Formula funds apportioned under this program can be used for purposes consistent with Rural Areas Formula Program to support public transportation on Indian Reservations in rural areas. Funds allocated under the competitive program must be used consistent with the tribe's proposal and the allocation notice published in the **Federal Register**, which is used to announce the selected projects. Eligible recipients under both the competitive and formula program include federally-recognized Indian tribes or Alaska native villages, groups, or communities as identified by the U.S. Department of the Interior Bureau of Indian Affairs (BIA). A tribe must have the legal, financial and technical capabilities to receive and administer Federal funds.

Section 5335 requires NTD reporting for all recipients or beneficiaries all section 5311 funds. This reporting requirement continues to apply to the Tribal Transit Program. Tribes that provide public transportation in rural areas are reminded to report annually so they are included in the TTP formula apportionments. To be considered in the FY 2017 formula apportionments, tribes should have submitted their reports to the NTD no later than April 30, 2016; voluntary reporting to the NTD is also encouraged. Additionally, to be considered for the FY 2018 formula apportionment funds, tribes need to submit their reports to the NTD no later than April 30, 2017. Tribes needing assistance with reporting to the NTD

should contact the NTD Helpline at 1-888-252-0936 or NTDHelp@dot.gov.

5. Period of Availability

Funding for the TTP is available for three years, which includes the year of apportionment plus two additional years, consistent with that established for the Rural Areas Formula Program. Any FY 2017 formula funds that remain unobligated at the close of business on September 30, 2019 will revert to FTA for reapportionment under the TTP.

6. Other Program Information

Section 207 of title 23, United States Code establishes a Tribal Transportation Self-Governance Program (Self Governance Program). The Self Governance Program will establish specific criteria for determining eligibility for a tribe to participate in the program. A Negotiated Rulemaking to implement this program in consultation with tribal representatives and other interested stakeholders is under development.

The funds set aside for the TTP are not meant to replace or reduce funds that Indian tribes receive from States through the Rural Areas Formula Program but are to be used to enhance public transportation on Indian reservations and transit serving tribal communities. Funds allocated to Indian tribes by the States may be included in the State's Rural Areas Formula Program application or maybe awarded by FTA in a grant directly to the Indian tribe. FTA encourages Indian tribes intending to apply to FTA as direct recipients to contact the appropriate FTA Regional Office at the earliest opportunity.

TTP grantees must comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal requirements in carrying out the project supported by the FTA grant. To assist tribes with understanding these requirements, FTA regularly conducts Tribal Transit Technical Assistance Workshops. FTA has also expanded its technical assistance to tribes receiving funds under this program. In FY 2015, FTA implemented the Tribal Transit Technical Assistance Assessments initiative. Through these assessments, FTA collaborates with tribal transit leaders to review processes and identify areas in need of improvement and then assist with solutions to address these needs—all in a supportive and mutually beneficial manner. These assessments include discussions of compliance areas pursuant to the Master Agreement, a site visit, promising practices reviews, and technical assistance from FTA and its contractors. FTA will post information

about upcoming workshops to its Web site and will disseminate information about the reviews through its Regional offices. FTA has regional tribal transit liaisons in each of the FTA Regional Offices that are available to assist tribes with applying for and managing FTA grants. Tribes are encouraged to work directly with their regional tribal transit liaison.

J. Public Transportation Innovation (49 U.S.C. 5312)

Public Transportation Innovation is FTA's research program. Within this section, are several different activities that comprise three distinct programs: (a) A Research, Development, Demonstration, Deployment, & Evaluation program (49 U.S.C. 5312(b-e)); (b) a Low or No Emission Vehicle Component Assessment Program (LoNo-CAP) (49 U.S.C. 5312(h)); and (c) a Transit Cooperative Research Program (49 U.S.C. 5312(i)). *For more information about the Public Transportation Innovation program, contact Edwin Rodriguez, Office of Research, Demonstration and Innovation at (202) 366-0671 or edwin.rodriguez@dot.gov.*

1. Authorized Amounts

Federal transit law authorizes \$48 million for FY 2017 for the Public Transportation Innovation program.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$16,064,145 is available through April 28, 2017 shown in the table below.

PUBLIC TRANSPORTATION INNOVATION APPORTIONED THRU APRIL 28, 2017

Research, Development, Demonstration, Deployment, & Evaluation	\$11,474,389
Low or No Emission Vehicle Component Testing	1,721,158
Transit Cooperative Research Program (TCRP) ...	2,868,597
Total Apportioned	16,064,145

3. Basis for Formula Apportionment

Public Transportation Innovation funds are allocated according to the authorized purposes and amounts described above, and then remaining amounts are subject to competitive allocations where not specifically authorized. For FY 2017, FTA intends to fund projects and activities consistent with its Research Strategic Plan and in support of three major areas: Asset Innovation and Management, Mobility,

and Safety. Projects may be selected through Notices of Funding Opportunity (NOFO) or Requests for Proposals (RFPs), or sole-sourced. Potential recipients can register to receive notification of funding availability under this program on Grants.gov.

FTA awards an annual cooperative agreement to the National Academies of Science to administer the TCRP. For the LoNo-CAP, proposals were due November 28, 2016 and FTA expects to announce the selected testing facility or facilities in January 2017.

4. Requirements

Eligible expenses include activities involving (a) Research, Innovation, Development, Demonstration, Deployment, Evaluation; (b) Low or No Emission Vehicle Component Testing; and (c) Transit Cooperative Research.

The Government share of the cost of a project carried out under FTA's Research, Development, Deployment, and Demonstration program shall not exceed 80 percent; the remaining 20 percent of the costs can be met with in-kind resources. In some cases, FTA may require a higher non-Federal share if FTA determines a recipient would obtain a clear and direct financial benefit from the project, or if the non-Federal share is an evaluation factor under a competitive selection process.

However, for the LoNo-CAP, the Government share is 50 percent; the remaining 50 percent of the costs will be paid by amounts recovered through the fees established by the testing facilities. There is no match requirement for the TCRP.

Application instructions and program management guidelines are set forth in FTA Circular C 6100.1E, Technology Development and Deployment, "Research, Technical Assistance and Training Program: Application Instructions and Program Management Guidelines" dated May 11, 2015.

All research recipients are required to work with FTA to develop approved Statements of Work. FTA will be updating the Circular for the Research Program during FY 2017.

5. Period of Availability

FTA establishes the period in which the funds must be obligated to the project. If the funds are not obligated within that period of time, they revert to FTA for reallocation under the program.

6. Other Program Information

FTA publishes an annual Research Report on projects, evaluations, and benefits of its research portfolio. The FY2015 Report is posted on FTA's Web

site, with the FY2016 report expected in February 2017. Section 6019(b) of the FAST Act establishes new requirements for annual modal research plans in 49 U.S.C. 6501. The FY 2016 plans are posted on DOT's Web site.

For the new LoNo-CAP (5312(h)), FTA solicited proposals for the LoNo-CAP in the Fall of 2016, with selection(s) expected in January 2017. Per the statute, FTA only considered proposals from "institutions of higher education" as defined in section 1002 of title 20, U.S.C., the Higher Education Act of 1965. Eligible institution(s) of higher education must have capacity to carry out transportation-related advanced component testing and evaluation, with laboratories capable of testing and evaluation, and direct access to or a partnership with a testing facility capable of emulating real-world circumstances in order to test low or no emission components.

LoNo-CAP differs from the Bus Testing Program (Section 5318) in that LoNo-CAP testing is voluntary; it will only test components, and it will not assign passing or failing scores. The LoNo component testing performed under LoNo-CAP complements the Section 5318 Bus Testing Program, under which FTA will continue to test complete buses as a condition of eligibility for FTA grant funding. Eligible activities under LoNo-CAP include testing and assessing voluntarily submitted Lo-No components for transit buses, publishing the results of these LoNo component assessments, and preparing an annual report to Congress summarizing the results of the component assessments. *For more information on the LoNo-CAP, please contact Marcel Belanger at marcel.belanger@dot.gov or visit: <https://www.transit.dot.gov/research-innovation/lonocap>.*

TCRP is a cooperative effort of three organizations: FTA; the National Academies, acting through the Transportation Research Board (TRB); and the Transit Development Corporation, Inc. (TDC), a nonprofit educational and research organization established by the American Public Transportation Association (APTA). FTA funds the TCRP through a cooperative agreement and it is governed by an independent board—the TCRP Oversight and Project Selection (TOPS) Committee. The TOPS Committee sets priorities to decide what research studies will be undertaken and annually selects projects. The FY 2017 selected projects can be found at <http://www.trb.org/TCRP>. *For more*

information about TCRP, please contact Faith Hall at faith.hall@dot.gov.

Pursuant to the Small Business Innovation Development Act, a portion of the 5312 funds must be set aside for the Department's SBIR program to address high priority research that will demonstrate innovative, economic, accurate, and durable technologies, devices, applications, or solutions to significantly improve current transit-related service including transit vehicle operation, safety, infrastructure and environmental sustainability, mobility, rider experience, or broadband communication. Information on current and past SBIR projects can be found on the DOT SBIR Web site.

K. Technical Assistance and Workforce Development (49 U.S.C. 5314)

The Technical Assistance and Workforce Development program, 49 U.S.C. 5314, provides assistance to: (1) Carry out technical assistance activities that enable more effective and efficient delivery of transportation services, foster compliance with Federal laws, and improve public transportation service; (2) develop standards and best practices for the transit industry; and (3) address public transportation workforce needs through research, outreach, training and the implementation of a frontline workforce grant program, and conduct training and educational programs in support of the public transportation industry.

For more information or questions about the Technical Assistance and Workforce Development programs, please contact Edwin Rodriguez, Office of Research, Demonstration, and Innovation at (202) 366-0671 or Edwin.rodriguez@dot.gov.

1. Authorized Amounts

The Technical Assistance and Workforce Development Program is at \$14 million in FY 2017. Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$5,163,475 is authorized through April 28, 2017 as shown in the table below.

2. FY 2017 Funding Availability

TECHNICAL ASSISTANCE AND WORKFORCE DEVELOPMENT FUNDS AVAILABLE THRU APRIL 28, 2017

Technical Assistance, Standards Development & Human Resource Training National Transit Institute	\$2,294,878 2,868,597
Total Appropriated	5,163,475

3. Basis for Formula Apportionment

Under the Technical Assistance and Workforce Development Program, \$2,868,597 is available for the NTI. The remaining \$2,294,878 will be allocated in support of FTA and USDOT strategic goals for technical assistance, standards development, and workforce development. Projects may be selected through sole source, Notices of Funding Opportunity (NOFO) or Requests for Proposals (RFPs). Potential recipients can register to receive notification of funding availability under this program on Grants.gov. Once selected, FTA enters into cooperative agreements, grants, contracts, or other agreements to award funds and manage the projects carried out under this section.

4. Requirements

Eligible expenses include activities involving: (a) Technical assistance; (b) standards development; and (c) human resources and training, including workforce development programs and activities. Eligible technical assistance activities may include activities to support: (a) Compliance with the ADA; (b) compliance with coordinating planning and human services transportation; (c) meeting the transportation needs of elderly individuals; (d) increasing transit ridership in coordination with MPOs and other entities, particularly around transit-oriented development; (e) addressing transportation equity with regard to the effect that transportation planning, investment, and operations have for low-income and minority individuals; (f) facilitating best practices to promote bus driver safety; (g) compliance with Buy America requirements and pre- and post-award audits; (h) assisting with the development and deployment of low and no emission vehicles or components for vehicles; (i) and other technical assistance activities that are necessary to advance the interests of public transportation.

Eligible standards development activities include the development of voluntary and consensus-based standards and best practices by the industry including those needed for safety, fare collection, intelligent transportation systems, accessibility, procurement, security, asset management, operations, maintenance, vehicle propulsion, communications, and vehicle electronics.

Eligible human resources and training activities include (a) employment training programs; (b) outreach programs to increase employment for veterans, females, individuals with

disabilities, and minorities in public transportation; (c) research on public transportation personnel and training needs; (d) training and assistance for veteran and minority business opportunities; and (e) consensus-based national training standards and certifications in partnership with industry stakeholders. FTA funding directly allocated for these eligible purposes must be done through a competitive frontline workforce development program as required by section 5314. Should FTA allocate funds for these purposes, it will advertise the available funding in a Notice of Funding Opportunity (NOFO) on *Grants.gov* and on its Web site. In the meantime, recipients of funds under sections 5307, 5337, and 5339 may use 0.5 percent of their available funds to pay for workforce development activities (up to an 80 percent Federal share). There is a separate eligibility to use 0.5 percent of available funds under the sections above for training at the National Transit Institute.

The Government's share of the cost of a project carried out using a grant under this section shall not exceed 80 percent. However, for the human resources and training, including the Innovative Public Transportation Frontline Workforce Development Program, the Government's share cannot exceed 50 percent. The Federal share for other types of awards will be stated in the agreement. In some cases, FTA may require a higher non-Federal share if FTA determines a recipient would obtain a clear and direct financial benefit from the project, or if the non-Federal share is an evaluation factor under a competitive selection process.

The non-Government share of the cost of a project carried out under these sections (Technical Assistance and Standards and Technical Assistance and Training) may be derived from in-kind contributions as defined in the most current version of FTA Circular 5010, "Award Management Guidelines" found on FTA's Circular Web page at <http://www.fta.dot.gov/circulars>). Application instructions and program management guidelines are set forth in FTA Circular 6100.1E, "Research, Technical Assistance and Training Programs: Application Instructions and Program Management Guidelines" dated May 11, 2015.

All research recipients are required to work with FTA to develop approved statements of work. There is no match requirement for the National Transit Institute.

5. Period of Availability

FTA establishes the period in which the funds must be obligated to the project. If the funds are not obligated within that period of time, they revert to FTA for reallocation under the program.

6. Other Program Information

FTA publishes an annual report to Congress on the technical assistance and standards activities that receive assistance under this section. Additionally, FTA must report annually on the Frontline Workforce Development Program. These reports can be found on FTA's Web site.

L. Public Transportation Emergency Relief Program (49 U.S.C. 5324)

FTA's Emergency Relief (ER) Program is authorized to provide funding for public transportation expenses incurred as a result of an emergency or major disaster. No funding was provided in the Further Continuing and Security Assistance Appropriations Act, 2017 for this program.

In the event funds are appropriated to this program to assist in responding to a publicly declared emergency or disaster, eligible expenses will include emergency operating expenses, such as evacuations, rescue operations, and expenses incurred to protect assets in advance of a disaster, as well as capital projects to protect, repair, reconstruct, or replace equipment and facilities of a public transportation system that the Secretary determines is in danger of suffering serious damage or has suffered serious damage as a result of an emergency. Additionally, transit agencies in the affected areas may request relief from certain FTA administrative and regulatory requirements for costs incurred in support of evacuations, rescue efforts, and the efficient shut down and resumption of transit services during and after the storm. Requests for relief from these requirements may be submitted to FTA's Emergency Relief Docket at <https://www.regulations.gov/>. The docket number for calendar year 2017 is FTA-2017-0001.

FTA also encourages transit agencies in affected areas to become familiar with FTA's Emergency Relief Program Manual, available at transit.dot.gov/emergencyrelief. Should funding be made available by Congress through FTA's Emergency Relief Program, or at FEMA's direction, FTA will work with agencies to assess the impacts of the storm, including emergency operations and any potential damages to transit rolling stock or facilities.

While Congress has not provided funding for this program in FY 2017, so far recipients of FTA funding affected by a declared emergency or disaster are authorized to use funds apportioned under sections 5307 and 5311 for emergency purposes under the provisions of FTA's Emergency Relief Program. Recipients are advised that formula funds disbursed to a grantee for emergency purposes will not be replaced or restored in the event that funding is subsequently made available through FTA under the ER Program or by the Federal Emergency Management Agency (FEMA).

In the event of a disaster affecting a public transportation system, the affected recipient should contact its FTA Regional Office as soon as practicable to determine whether Emergency Relief Program funds are available, and to notify FTA that it plans to seek reimbursement for emergency operations and/or repairs that have already taken place or are in process. If Emergency Relief funds are unavailable the recipient may seek reimbursement from FEMA. Properly documented costs for which the grantee has not received reimbursement from FEMA may later be reimbursed by grants made either from Emergency Relief Program funding (if appropriated) or from sections 5307 and 5311 program funding, once the eligible recipient formally applies to FTA for reimbursement and FTA determines that the expenses are eligible for emergency relief.

More information on the Emergency Relief Program and FTA's response to Hurricane Sandy is available on the FTA Web site at <https://www.transit.dot.gov/funding/grant-programs/emergency-relief-program/emergency-relief-program>.

For more information or questions on this program, please contact Adam Schildge at 202-366-0778 or www.adam.schildge@dot.gov.

M. Public Transportation Safety Program (49 U.S.C. 5329)

The State Safety Oversight Formula Program provides funding to support States with rail fixed guideway public transportation systems (rail transit systems) to develop and carry out State Safety Oversight (SSO) Programs consistent with the requirements of 49 U.S.C. 5329.

For more information or questions on the Public Transportation Safety program, please contact Maria Wright at (202) 366-5922 or maria1.wright@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$23,148,419 in FY 2017 to provide funding to support States in developing and carrying out the SSO Program.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$13,020,292 is available through April 28, 2017 for the period October 1, 2016 through April 28, 2017 for the State Safety Oversight (SSO) program as shown in the table below.

**PUBLIC TRANSPORTATION SAFETY
PROGRAM FUNDS APPORTIONED
THRU APRIL 28, 2017**

Total Appropriation	\$13,020,292
Total Apportioned	13,020,292

3. Basis for Formula Apportionment

FTA will continue to allocate funds to the States by an administrative formula, which is detailed in the **Federal Register** notice apportioning SSO Formula Grant Program FY 2013 and FY 2014 funds (Mar. 10, 2014). Grant funds for the SSO program are apportioned to eligible States using a three-tier formula based on statutory requirements, which apportion sixty percent (60%) of available funds based rail transit system passenger miles (PMT), vehicle revenue miles (VRM), and directional route miles (DRM), twenty percent (20%) of available funds equally to each eligible State, and twenty percent (20%) based on the number of rail transit systems in each state.

4. Requirements

FTA requires each applicant to demonstrate in its grant application that its proposed grant activities will develop, lead to, or carry out a State Safety Oversight program that meets the requirements under 49 U.S.C. 5329(e). Grant funds may be used for program operational and administrative expenses, including employee training activities. Please see the **Federal Register** notice which apportioned SSO Formula Grant Program FY 2013 and FY 2014 funds (79 FR 13380, Mar. 10, 2014) for more information.

5. Period of Availability

SSO Formula Grant Program funds are available for the year of apportionment plus two additional years. Any FY 2017 funds that remain unobligated at the close of business on September 30, 2019 will revert to FTA for reapportionment under the SSO Formula Grant Program.

6. Other Program Information

Section 5329 authorizes FTA to temporarily assume oversight of a rail transit safety system, under certain circumstances. FTA also has the authority to issue restrictions and prohibitions to address unsafe conditions or practices. On August 11, 2016, FTA published a final rule to set procedures for FTA's administration of the Public Transportation Safety Program. The final rule provides procedures whereby FTA may: (1) Require a recipient to use Chapter 53 funds to correct safety violations identified by the Administrator or a State Safety Oversight Agency before such funds are used for any other purpose, or (2) withhold up to than 25 percent of funds apportioned under 49 U.S.C. 5307 from a recipient when the Administrator has evidence that the recipient has engaged in a pattern or practice of serious safety violations, or has otherwise refused to comply with the Public Transportation Safety Program, or any regulation or directive issued under those laws for which the Administrator exercises enforcement authority for safety.

N. State of Good Repair Program (49 U.S.C. 5337)

The State of Good Repair Program provides financial assistance to designated recipients in Urbanized Areas (UZAs) with fixed guideway and high intensity motorbus systems for capital investments that maintain, rehabilitate, and replace aging transit assets and bring fixed guideway and high intensity motorbus systems into a state of good repair. FTA apportions funds for this program through a statutory formula using data reported to the National Transit Database (NTD).

For more information or questions on the State of Good Repair program, please contact Eric Hu at (202) 366-0870 or erichu@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$2,549,670,000 in FY 2017 for the State of Good Repair Program.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$1,438,314,657 is available through April 28, 2017. The total amount apportioned is \$1,423,931,511 after the deduction for oversight as shown in the table below, after the deduction for oversight (authorized by section 5338).

**STATE OF GOOD REPAIR PROGRAM
FUNDS APPORTIONED FY 2017**

Total Appropriation Available through April 28, 2017	\$1,438,314,657
Oversight Deductions	(14,383,147)
Total Apportioned	1,423,931,511

3. Basis for Formula Apportionment

FTA apportions State of Good Repair Program funds according to a statutory formula. Funds are apportioned to urbanized areas with high intensity fixed guideway and high intensity motorbus systems that have been in operation for at least seven years. This means that only segments of high intensity fixed guideway and high intensity motorbus systems that entered into revenue service on or before September 30, 2009 are included in the formula, as identified in the NTD. Funds apportioned to urbanized areas with high intensity fixed guideway and motorbus systems are determined by two equal elements: (1) The proportion of the amount an urbanized area would have received in FY 2011 to the total amount apportioned to all urbanized areas in the FY 2011 Fixed Guideway Modernization program using the fixed guideway definition defined in prior law; and (2) the proportion of vehicle revenue miles of an urbanized area to the total vehicle revenue miles of all urbanized areas and the proportion of directional route miles of an urbanized area to the total directional miles of all urbanized areas. 97.15 percent of the total appropriation is apportioned to the fixed guideway tier, the remaining 2.85 percent is apportioned to the high-intensity motorbus tier.

4. Requirements

In addition to the program guidance found in the FTA Circular 5300.1, "State of Good Repair Grants Program: Guidance and application Instructions" all recipients will need to comply with the rule issued under section 5326 for the Transit Asset Management plan (TAM).

5. Period of Availability

The State of Good Repair Program funds apportioned in this notice are available for obligation during FY 2017 plus three additional years. Accordingly, funds apportioned in FY 2017 must be obligated in grants by September 30, 2020. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2020 will revert to FTA for reappointment under the State of Good Repair Program.

6. Other Program Information

In July 2016, FTA published a Final Rule for Transit Asset Management (81 FR 48890, July 26, 2016). Grantees must have a TAM plan in place by October 1, 2018. Beginning in FY 2019 all projects funded under the State of Good Repair Program must appear in the investment prioritization of the grantees TAM plan.

O. Grants for Buses and Bus Facilities Program (49 U.S.C. 5339)

The Grants for Buses and Bus Facilities Program provides financial assistance to states and designated recipients for capital investments in public transportation systems to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Funding is provided through formula allocations and competitive grants. A sub-program, the Low- or No-Emission Vehicle Program, provides competitive grants for bus and bus facility projects that support low and zero-emission vehicles.

For more information or questions on the Grants for Buses and Bus Facilities Program, please contact Vanessa Williams at (202) 366-4818 or vanessa.williams@dot.gov. For information or questions regarding the competitive Low or No Emissions Grant Program, contact Tara Clark at (202) 366-2623 or tara.clark@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$719,960,000 in FY 2017, to provide financial assistance for the Grants for Buses and Bus Facilities Program.

2. Funding Availability

Under the Continuing Appropriations Act of 2017, \$399,193,992 is available through April 28, 2017. After the 0.75 percent take-down for oversight, \$396,200,037 is available after the deduction for oversight, as shown in the table below.

GRANTS FOR BUSES AND BUS FACILITIES—FY 2017

Total Appropriation (Formula) Oversight Deduction	\$245,437,180 (1,840,779)
Total Apportioned (Formula)	243,596,401
Total Appropriation (Low No Competition) Oversight Deduction	31,554,570 (236,659)
Total to be Allocated (Competition)	31,317,910

GRANTS FOR BUSES AND BUS FACILITIES—FY 2017—Continued

Total Appropriation (Bus Competition)	122,202,243
Oversight Deduction	(916,517)
Total to be Allocated (Competition)	121,285,726

3. Basis for Formula Apportionment

Buses and Bus Facilities Program formula funds are apportioned to States, territories, and designated recipients based on a statutory formula. Under the National Distribution, each State is allocated \$1.0 million and each territory is allocated \$286,860 for use anywhere in the State or territory for each of fiscal years 2016 through 2020. The remainder of the available funding is then apportioned to UZAs based on population, vehicle revenue miles, and passenger miles using the same apportionment formula and allocation process as the Urbanized Area Formula Program. Funds for UZAs under 200,000 in population are apportioned to the State for allocation to eligible recipients within such areas of the State at the Governor's discretion. Funds for UZAs with populations of 200,000 or more are apportioned directly to one or more designated recipient(s) within each UZA for allocation to eligible projects and recipients within the UZA.

FTA allocates funds under the competitive section 5339(b) and 5339(c) programs on an annual basis based on a notice of funding opportunity, which contains detailed guidance on applicant eligibility, project eligibility, evaluation criteria, and application requirements.

4. Requirements

Eligible recipients for section 5339(a) formula grants include: (1) Designated recipients that allocate funds to fixed route bus operators, and (2) States local governmental entities that operate fixed route bus service. Eligible subrecipients to include public agencies or private nonprofit organizations engaged in public transportation, including those providing services open to a segment of the general public, as defined by age, disability, or low income. The definition of eligible recipients applies to funding apportioned in previous fiscal years that remain available for obligation. The requirements of the Urbanized Area Formula Program apply to recipients of section 5339 funds within an urbanized area. The requirements of Rural Areas Formula Program apply to recipients of section 5339 funds within rural areas.

Under prior law, only designated recipients were eligible direct recipients of section 5339(a) funds. Given that

State and local government entities that operate fixed route service are now eligible direct recipients of section 5339(a) funds. FTA does not require designated recipients to maintain program management plans (PMPs) if they do not manage any sub-awards of section 5339 funds.

For additional program requirements, refer to FTA Circular 5100, "Bus and Bus Facilities Formula Program: Guidance and Application Instructions."

5. Period of Availability

The Bus and Bus Facilities Program formula funds apportioned in this notice are available for obligation during FY 2017 plus three additional years. Accordingly, funds apportioned in FY 2017 must be obligated in grants by September 30, 2020. Any FY 2017 apportioned funds that remain unobligated at the close of business on September 30, 2020 will revert to FTA for reapportionment under the Bus and Bus Facilities Formula Program. Competitive program funds authorized under sections 5339(b) and 5339(c) follow the same period of availability.

6. Other Program Information

Although it does not provide additional funding, as authorized under section 5339(a)(9), FTA has established a pilot program to allow designated recipients in urbanized areas between 200,000 and 1 million in population to elect to pool their Bus and Bus Facilities Program formula allocations with other designated recipients within their respective states. The purpose of this provision is to allow for the transfer of formula funding within a State in a manner that supports the transit asset management plans of the participating designated recipients. A State that intends to participate in this pilot program beginning in FY 2018 must submit a request to establish a State Pool to its FTA Regional Office by August 31, 2017. The request must identify the urbanized areas that will participate in the pool for FY 2018, and must include a letter from each participating designated recipient, and from any affected eligible recipients of section 5339(a) funds within the urbanized area, indicating their intention to participate in this pooling provision for FY 2017. An urbanized area that participates in a State Pool must contribute its entire section 5339(a) apportionment for the fiscal years in which it participates in the pool. A designated recipient for a multistate area may participate in only one State Pool. A State that does not establish a State Pool in FY 2018 may

choose to begin participating in this provision in a future fiscal year, but should be aware that the benefits of pooling program funds will be diminished over a shorter duration. For FY 2018, the request must specify the proposed distribution of the pooled funding and must provide a detailed explanation of how this distribution will support the transit asset management plans of each participating designated recipient, including any eligible recipients to which the designated recipient will allocate funding. Upon approval, FTA will make the requested amounts of program funding available to the urbanized areas as directed in the request. A State that elects to participate in this pilot program will be required to develop an allocation plan for the period of fiscal years 2018 through 2020 that ensures that a designated recipient participating in the State's pool receives under the program an amount of funds that equals the amount of funds that would have otherwise been available to the designated recipient for that period pursuant to the formulas provided. The amounts in the State Pool will be apportioned separately from funds apportioned to the State under the Governor's Apportionment for urbanized areas under 200,000 in population, and will be made available directly by FTA to the participating urbanized areas, as directed in the approved allocation plan. An allocation plan may be revised for future fiscal years, provided that it remains compliant with the requirement to ensure equity over the period the pool is in effect. Approved requests to establish a State Pool for the specified UZAs will remain in effect until cancelled at the request of the State or one or more designated recipients. If a State or designated recipient elects to end its participation in this pooling provision in any future fiscal year, FTA will adjust the formula allocations so that the total amount that each affected urbanized area has received over the fiscal years in which it participated, plus the following apportionment, equals the amount it would have received over this period had it not participated in the State pool. Adjustments will be made using the formula apportionment factors used for each of the affected fiscal years. After the pools are determined, FTA will publish a supplementary table showing the participating UZAs, the State total, and the amounts for each UZA for FY 2017. In future years, the States must provide the amounts determined by August 31 (in an updated allocation

plan), so that FTA can publish the breakdowns and make the funds available in the Apportionment Notice.

P. Growing States and High Density States Formula Factors (49 U.S.C. 5340)

Federal transit law authorizes the use of formula factors to distribute additional funds to the section 5307 and Rural Areas Formula Program programs for growing states and high density states. FTA will continue to publish single urbanized and rural apportionments that show the total amount for section 5307 and 5311 programs that includes section 5340 apportionments for these programs.

For more information or questions on this program, please contact Tara Clark at (202) 366-2623 or tara.clark@dot.gov.

1. Authorized Amounts

Federal transit law authorizes \$544,433,788 for apportionment in FY 2017 for the Growing States and High Density States Formula factors.

2. FY 2017 Funding Availability

Under the Further Continuing and Security Assistance Appropriations Act, 2017 \$307,663,675 is available through April 28, 2017.

Growing states and high density states formula factors available thru April 28, 2017	2017
Growing States	\$156,222,132
High Density States	151,441,543
Total Apportioned	307,663,675

3. Basis for Formula Apportionment

Under the Growing States portion of the section 5340 formula, FTA projects each State's 2025 population by comparing each State's apportionment year population (as determined by the Census Bureau) to the State's 2010 Census population and extrapolating to 2025 based on each State's rate of population growth between 2010 and the apportionment year. Each State receives a share of Growing States funds on the basis of its projected 2025 population relative to the nationwide projected 2025 population.

Once each State's share is calculated, funds attributable to that State are divided into an urbanized area allocation and a non-urbanized area allocation on the basis of the percentage of each State's 2010 Census population that resides in urbanized and non-urbanized areas. Urbanized Areas receive portions of their State's urbanized area allocation on the basis of the 2010 Census population in that urbanized area relative to the total 2010 Census population in all urbanized

areas in the State. These amounts are added to the Urbanized Area's section 5307 apportionment.

The States' rural area allocation is added to the allocation that each State receives under the Rural Areas Formula Program Formula Grants for Rural Areas program.

The High Density States portion of the section 5340 formula are allocated to urbanized areas in States with a population density equal to or greater than 370 persons per square mile. Based on this threshold and 2010 Census data, the States that qualify are Maryland, Delaware, Massachusetts, Connecticut, Rhode Island, New York and New Jersey. The amount of funds provided to each of these seven States is allocated on the basis of the population density of the individual State relative to the population density of all seven States. Once funds are allocated to each State, funds are then allocated to urbanized areas within the States on the basis of an individual urbanized area's population relative to the population of all urbanized areas in that State.

Q. Washington Metropolitan Area Transit Authority Grants

Section 601 of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA) authorized an aggregate amount of \$150,000,000 to be available in increments over 10 fiscal years beginning in fiscal year 2009 to assist Washington Metropolitan Transit Authority (WMATA) in implementing Capital Improvement Program and preventive maintenance projects.

For more information or questions on the Washington Metropolitan Area Transit Authority Grants program, please contact Eric Hu at (202) 366-0870 or eric.hu@dot.gov or Corey Walker at (202) 219-3562 or corey.walker@dot.gov.

1. Authorized Amounts

Section 601 of PRIIA authorizes \$150,000,000 in FY 2017.

2. FY 2017 Funding Availability

Under the Continuing Appropriations Act of 2017, \$86,057,917 is available through April 28, 2017. The total amount available is \$85,197,338 after the deduction for oversight as shown in the table below.

**WASHINGTON METROPOLITAN AREA
TRANSIT AUTHORITY GRANTS
FUNDS—FY 2017**

Total Appropriation Available through April 28, 2017	\$86,057,917
Oversight Deduction	(860,579)

WASHINGTON METROPOLITAN AREA
TRANSIT AUTHORITY GRANTS
FUNDS—FY 2017—Continued

Total Apportioned	85,197,338
-------------------------	------------

3. Basis for Formula Apportionment

The funding is authorized under Section 601, Authorization for Capital and Preventive Maintenance Projects for Washington Metropolitan Area Transit Authority, of the Passenger Rail Investment and Improvement Act of 2008, (Pub. L. 110–432) Division B, Title VI.

4. Requirements

Grants may be provided for capital and preventive maintenance expenditures for WMATA after it has been determined that WMATA has placed the highest priority on investments that will improve the safety of the system, including but not limited to fixing the track signal system, replacing 1000 series railcars, installing guarded turnouts, buying equipment for wayside worker protection, and installing rollback protection on cars that are not equipped with the safety feature. FTA will communicate further program requirements directly to WMATA. The maximum Federal share for each project shall be for 50 percent of the net project cost of the project, and matching funds shall be provided in cash from sources other than Federal funds or revenues from the operation of public transportation systems.

5. Period of Availability

Funds appropriated for WMATA under Section 601 PRIIA shall remain available until expended.

R. Paul S. Sarbanes Transit in Parks Program

The Paul S. Sarbanes Transit in Parks Program (Transit in Parks) at former 49 U.S.C. 5320, has provided grants for alternative transportation in and around America's national parks and Federal lands since 2006. FTA is establishing a deadline of September 30, 2017 to obligate funds allocated to recipients under the Transit in Parks program. Any competitive allocations that remain unobligated after September 30, 2017 will revert back to FTA.

Alternative transportation projects formerly eligible under Transit in Parks are now eligible under the Federal Highway Administration's Federal Lands Transportation Program and the Federal Lands Access Program.

V. FTA Policy and Procedures for FY 2017 Grants

A. Automatic Pre-Award Authority To Incur Project Costs

1. Caution to New Grantees

While FTA provides pre-award authority to incur expenses before grant award for formula programs, it recommends that first-time grant recipients NOT utilize this automatic pre-award authority without verifying with the appropriate FTA Regional Office that all pre-requisite requirements have been met. As a new grantee, it is easy to misunderstand pre-award authority conditions and be unaware of all of the applicable FTA requirements that must be met in order to be reimbursed for project expenditures incurred in advance of grant award. FTA programs have specific statutory requirements that are often different from those for other Federal grant programs with which new grantees may be familiar. If funds are expended for an ineligible project or activity, or for an eligible activity but at an inappropriate time (*e.g.*, prior to NEPA completion), FTA will be unable to reimburse the project sponsor and, in certain cases, the entire project may be rendered ineligible for FTA assistance.

2. Policy

FTA provides pre-award authority to incur expenses before grant award for certain program areas described below. This pre-award authority allows grantees to incur certain project costs before grant approval and retain the eligibility of those costs for subsequent reimbursement after grant approval. The grantee assumes all risk and is responsible for ensuring that all conditions are met to retain eligibility. This pre-award spending authority permits an eligible grantee to incur costs on an eligible transit capital, operating, planning, or administrative project without prejudice to possible future Federal participation in the cost of the project. In this notice, FTA provides pre-award authority through the authorization period of the FAST Act (October 1, 2015 through September 30, 2020) for capital assistance under all formula programs, so long as the conditions described below are met. FTA provides pre-award authority for planning and operating assistance under the formula programs without regard to the period of the authorization. All pre-award authority is subject to conditions and triggers stated below:

a. Operating, Planning, or Administrative Assistance

FTA does not impose additional conditions on pre-award authority for operating, planning, or administrative assistance under the formula grant programs. Grantees may be reimbursed for expenses incurred before grant award so long as funds have been expended in accordance with all Federal requirements, would have been allowable if incurred after the date of award, and the grantee is otherwise eligible to receive the funding. In addition to cross-cutting Federal grant requirements, program specific requirements must be met. For example, a planning project must have been included in a Unified Planning Work Program (UPWP); a section 5310 project must have been included in a coordinated public transit-human services transportation plan (coordinated plan) and selected by the designated recipient before incurring expenses; expenditures on State Administration expenses under State Administered programs must be consistent with the State Management Plan (as defined in FTA Circular 9040.1G, Chapter 6). Designated recipients for section 5310 have pre-award authority for the ten percent of the apportionment they may use for program administration.

b. Transit Capital Projects

For transit capital projects, the date that costs may be incurred varies depending on the type of activity and its potential to have a significant impact on the human and natural environment as described under conditions in section 3 below. Before an applicant may incur costs when pre-award authority has not been granted, it must first obtain a written Letter of No Prejudice (LONP) from FTA. To obtain an LONP, a grantee must submit a written request accompanied by adequate information and justification to the appropriate FTA regional office, as described in section 4 below.

c. Public Transportation Innovation, Technical Assistance and Workforce Development

Unless provided for in an announcement of project selections, pre-award authority does not apply to Public Transportation Innovation Public Transportation Innovation projects or section 5314 Technical Assistance and Workforce Development. Before an applicant may incur costs for activities under these programs, it must first obtain a written Letter of No Prejudice (LONP) from FTA. To obtain an LONP,

a grantee must submit a written request accompanied by adequate information and justification to the appropriate FTA headquarters office. Information about LONP procedures may be obtained from the appropriate headquarters office.

3. Conditions

The conditions under which pre-award authority may be utilized are specified below:

a. Pre-award authority is not a legal or implied commitment that the subject project will be approved for FTA assistance or that FTA will obligate Federal funds. Furthermore, it is not a legal or implied commitment that all items undertaken by the applicant will be eligible for inclusion in the project.

b. All FTA statutory, procedural, and contractual requirements must be met.

c. No action will be taken by the grantee that prejudices the legal and administrative findings that the Federal Transit Administration must make in order to approve a project.

d. Local funds expended by the grantee after the date of the pre-award authority will be eligible for credit toward local match or reimbursement if FTA later makes a grant or grant amendment for the project. Local funds expended by the grantee before the date of the pre-award authority will not be eligible for credit toward local match or reimbursement. Furthermore, the expenditure of local funds or the undertaking of certain activities that would compromise FTA's ability to comply with Federal environmental laws (e.g., project implementation activities such as land acquisition, demolition, or construction before the date of pre-award authority) may render the project ineligible for FTA funding.

e. The Federal amount of any future FTA assistance awarded to the grantee for the project will be determined on the basis of the overall scope of activities and the prevailing statutory provisions with respect to the Federal/local match ratio at the time the funds are obligated.

f. For funds to which the pre-award authority applies, the authority expires with the lapsing of the fiscal year funds.

g. When a grant for the project is subsequently awarded, the grant and the Federal Financial Report in TrAMS must indicate the use of pre-award authority.

h. Environmental Requirements.

All Federal environmental grant requirements must be met at the appropriate time for the project to remain eligible for Federal funding. Designated recipients may incur costs for design and environmental review activities for all projects from the date of the authorization of formula funds or

the date of the announcement of the competitive allocations of funds for the project. For projects that qualify for a categorical exclusion pursuant to 23 CFR 771.118(c), designated recipients may start activities and incur costs for property acquisition, demolition, construction, and acquisition of vehicles, equipment, or construction materials from the date of the authorization of formula funds or the date of the announcement of the competitive allocation of funds for the project. FTA recommends that a grant applicant considering a categorical exclusion pursuant to 23 CFR 771.118(c) contact FTA's Regional Office for assistance in determining the appropriate environmental review process and level of documentation necessary before incurring costs for property acquisition, demolition, construction, and acquisition of vehicles, equipment, or construction materials. If FTA subsequently finds that a project does not qualify for this CE, it will be ineligible for FTA assistance. In particular, FTA encourages grant applicants to contact FTA's Regional Office before exercising pre-award authority for projects to which it believes a CE at 23 CFR 771.118(c)(8), (9), (10), (12), or (13) applies.

For all other projects that do not qualify for a categorical exclusion under 23 CFR 771.118(c), grant applicants may take action and incur costs for property acquisition, demolition, construction, and acquisition of vehicles, equipment, or construction materials from the date that FTA completes the environmental review process required by NEPA and its implementing regulations, 23 U.S.C. 139, and other environmental laws by its issuance of a section 771.118(d) categorical exclusion determination, a Finding of No Significant Impact (FONSI), or a Record of Decision (ROD).

i. Planning and other requirements.

Formula funds must be authorized or appropriated and earmarked project allocations published or announced before pre-award authority can be considered.

The requirement that a project be included in a locally-adopted Metropolitan Transportation Plan, the metropolitan transportation improvement program and federally-approved statewide transportation improvement program (23 CFR part 450) must be satisfied before the grantee may advance the project beyond planning and preliminary design with non-federal funds under pre-award authority. If the project is located within an EPA-designated non-attainment or maintenance area for air quality, the

conformity requirements of the Clean Air Act, 40 CFR part 93, must also be met before the project may be advanced into implementation-related activities under pre-award authority triggered by the completion of the NEPA process.

For a planning project to have pre-award authority, the planning project must be included in a MPO-approved Unified Planning Work Program (UPWP) that has been coordinated with the State.

j. Federal procurement procedures, as well as the whole range of applicable Federal requirements (e.g., Buy America, Davis-Bacon Act, and Disadvantaged Business Enterprise) must be followed for projects in which Federal funding will be sought in the future. Failure to follow any such requirements could make the project ineligible for Federal funding. In short, this increased administrative flexibility requires a grantee to make certain that no Federal requirements are circumvented through the use of pre-award authority.

k. All program specific requirements must be met. For example, projects under section 5310 must comply with specific program requirements, including coordinated planning. Before incurring costs, grantees are strongly encouraged to consult with the appropriate FTA Regional office regarding the eligibility of the project for future FTA funds and for questions on environmental requirements, or any other Federal requirements that must be met.

4. Pre-Award Authority for the Fixed Guideway Capital Investment Grant Program (New and Small Starts Projects and Core Capacity Projects)

Projects proposed for section 5309 Capital Investment Grant (CIG) program funds are required to follow a multi-step, multi-year process defined in law. For New Starts and Core Capacity projects, this process includes three phases: Project development (PD), engineering, and construction. For Small Starts projects, this process includes two phases: PD and construction. After receiving a letter from the project sponsor requesting entry into the PD phase, FTA must respond in writing within 45 days whether the information was sufficient for entry. If FTA's correspondence indicates the information was sufficient and the New Starts, Small Starts or Core Capacity project enters PD, FTA extends pre-award authority to the project sponsor to incur costs for PD activities. PD activities include the work necessary to complete the environmental review process and as much engineering and

design activities as the project sponsor believes are necessary to support the environmental review process. Upon completion of the environmental review process with a ROD, FONSI, or CE determination by FTA for a New Starts, Small Starts, or Core Capacity Improvement project, FTA extends pre-award authority to project sponsors to incur costs for as much engineering and design as needed to develop a reasonable cost estimate and financial plan for the project, utility relocation, and real property acquisition and associated relocations for any property acquisitions not already accomplished as a separate project for hardship or protective purposes or right-of-way under 49 U.S.C. 5323(q).

For Small Starts projects, upon completion of the environmental review process and confirmation from FTA that the overall project rating is at least a Medium, FTA extends pre-award authority for vehicle purchases. Upon receipt of a letter notifying a New Starts or Core Capacity project sponsor of the project's approval into the engineering phase, FTA extends pre-award authority for vehicle purchases as well as any remaining engineering and design, demolition, and procurement of long lead items for which market conditions play a significant role in the acquisition price. The long lead items include, but are not limited to, procurement of rails, ties, and other specialized equipment, and commodities.

Please contact the FTA Regional Office for a determination of activities not listed here, but which meet the intent described above. FTA provides this pre-award authority in recognition of the long-lead time and complexity involved with purchasing vehicles as well as their relationship to the "critical path" project schedule. FTA cautions grantees that do not currently operate the type of vehicle proposed in the project about exercising this pre-award authority. FTA encourages these sponsors to wait until later in the process when project plans are more fully developed. FTA reminds project sponsors that the procurement of vehicles must comply with all Federal requirements including, but not limited to, competitive procurement practices, the Americans with Disabilities Act, Disadvantaged Business Enterprise program requirements and Buy America. FTA encourages project sponsors to discuss the procurement of vehicles with FTA in regards to Federal requirements before exercising pre-award authority. Because there is not a formal engineering phase for Small Starts projects, FTA does not extend pre-award authority for demolition and

procurement of long lead items. Instead, this work must await receipt of a construction grant award or an expedited grant agreement.

a. Real Property Acquisition

As noticed above, FTA extends pre-award authority for the acquisition of real property and real property rights for fixed Guideway Capital Investment Grant projects (New or Small Starts or Core Capacity) upon completion of the environmental review process for that project. The environmental review process is completed when FTA signs an environmental Record of Decision (ROD) or Finding of No Significant Impact (FONSI), or makes a Categorical Exclusion (CE) determination. With the limitations and caveats described below, real estate acquisition may commence, at the project sponsor's risk. For FTA-assisted projects, any acquisition of real property or real property rights must be conducted in accordance with the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act (URA) and its implementing regulations, 49 CFR part 24. This pre-award authority is strictly limited to costs incurred: (i) To acquire real property and real property rights in accordance with the URA regulation; and (ii) to provide relocation assistance in accordance with the URA regulation. This pre-award authority is limited to the acquisition of real property and real property rights that are explicitly identified in the final environmental impact statement (FEIS), environmental assessment (EA), or CE document, as needed for the selected alternative that is the subject of the FTA-signed ROD or FONSI, or CE determination. This pre-award authority regarding property acquisition that is granted at the completion of the environmental review process does not cover site preparation, demolition, or any other activity that is not strictly necessary to comply with the URA, with one exception—namely when a building that has been acquired, has been emptied of its occupants, and awaits demolition poses a potential fire safety hazard or other hazard to the community in which it is located, or is susceptible to reoccupation by vagrants. Demolition of the building is also covered by this pre-award authority upon FTA's written agreement that the adverse condition exists. Pre-award authority for property acquisition is also provided when FTA makes a CE determination for a protective buy or hardship acquisition in accordance with 23 CFR 771.117(d)(12). Pre-award authority for property acquisition is also provided when FTA completes the environmental review process for the

acquisition of right-of-way as a separate project in accordance with 49 U.S.C. 5323(q). When a tiered environmental review in accordance with 23 CFR 771.111(g) is used, pre-award authority is NOT provided upon completion of the first tier environmental document except when the Tier-1 ROD or FONSI signed by FTA explicitly provides such pre-award authority for a particular identified acquisition. Project sponsors should use pre-award authority for real property acquisition relocation assistance with a clear understanding that it does not constitute a funding commitment by FTA. FTA provides pre-award authority upon completion of the environmental review process for real property acquisition and relocation assistance to maximize the time available to project sponsors to move people out of their homes and places of business, in accordance with the requirements of the URA, but also with maximum sensitivity to the circumstances of the people so affected.

b. Reimbursement of Costs Incurred Under Pre-Award Authority

Although FTA provides pre-award authority for property acquisition, long lead items, and vehicle purchases upon completion of the environmental review process, FTA will not make a grant to reimburse the sponsor for real estate activities, vehicle purchases or purchases of long lead items conducted under pre-award authority until the project receives its construction grant. This is to ensure that Federal funds are not risked on a project whose advancement into construction is not yet assured.

c. National Environmental Policy Act (NEPA) Activities

NEPA requires that major projects proposed for FTA funding assistance be subjected to a public and interagency review of the need for the project, its environmental and community impacts, and alternatives to avoid and reduce adverse impacts. Projects of more limited scope also need a level of environmental review, either to support an FTA finding of no significant impact (FONSI) or to demonstrate that the action is categorically excluded (*i.e.*, CE) from the more rigorous level of NEPA review. FTA's regulation titled "Environmental Impact and Related Procedures," at 23 CFR part 771 states that the costs incurred by a grant applicant for the preparation of environmental documents requested by FTA are eligible for FTA financial assistance (23 CFR 771.105(e)). Accordingly, FTA extends pre-award authority for costs incurred to comply

with NEPA regulations and to conduct NEPA-related activities, effective as of the earlier of the following two dates: (1) The date of the Federal approval of the relevant STIP or STIP amendment that includes the project or any phase of the project, or that includes a project grouping under 23 CFR 450.216(j) that includes the project; or (2) the date that FTA approves the project into the project development phase of the CIG program. The grant applicant must notify the FTA Regional Office to initiate the Federal environmental review process in accordance with the "Dear Colleague" letter from the FTA Administrator dated February 24, 2011. NEPA-related activities include, but are not limited to, public involvement activities, historic preservation reviews, section 4(f) evaluations, wetlands evaluations, endangered species consultations, and biological assessments. This pre-award authority is strictly limited to costs incurred to conduct the NEPA process and associated engineering, and to prepare environmental, historic preservation and related documents. When a New Starts, Small Starts, or Core Capacity project is granted pre-award authority for the environmental review process, the reimbursement for NEPA activities conducted under pre-award authority may be sought at any time through section 5307 (Urbanized Area Formula Program) or the flexible highway programs (STP and CMAQ). Reimbursement from the section 5309 CIG program for NEPA activities conducted under pre-award authority is provided only for expenses incurred after entry into the project development phase and only once a construction grant agreement is signed. As with any pre-award authority, FTA reimbursement for costs incurred is not guaranteed.

d. Other New and Small Starts and Core Capacity Project Activities Requiring Letter of No Prejudice (LONP)

Except as discussed in paragraphs i through iii above, a CIG project sponsor must obtain a written LONP from FTA before incurring costs for any activity not covered by pre-award authority. To obtain an LONP, an applicant must submit a written request accompanied by adequate information and justification to the appropriate FTA Regional Office, as described in B below.

B. Letter of No Prejudice (LONP) Policy

1. Policy

LONP authority allows an applicant to incur costs on a project utilizing non-

Federal resources, with the understanding that the costs incurred subsequent to the issuance of the LONP may be reimbursable as eligible expenses or eligible for credit toward the local match should FTA approve the project at a later date. LONPs are applicable to projects and project activities not covered by automatic pre-award authority. The majority of LONPs will be for section 5309 Capital Investment Grant program projects (New or Small Starts or Core Capacity) undertaking activities not covered under automatic pre-award authority. LONPs may be issued for formula and competitive funds beyond the life of the current authorization or FTA's extension of automatic pre-award authority; however, the LONP is limited to a five-year period, unless otherwise authorized in the LONP. Receipt of Federal funding under any program is not implied or guaranteed by an LONP.

2. Conditions and Federal Requirements

The conditions and requirements for pre-award authority specified in section V.4.ii and V.4.iii above apply to all LONPs. Because project implementation activities may not be initiated before completion of the environmental review process, FTA will not issue an LONP for such activities until the environmental review process has been completed with a ROD, FONSI, or CE determination.

3. Request for LONP

Before incurring costs for project activities not covered by automatic pre-award authority, the project sponsor must first submit a written request for an LONP, accompanied by adequate information and justification, to the appropriate regional office and obtain written approval from FTA. FTA approval of an LONP is determined on a case-by-case basis. Federal funding under the Fixed Guideway Capital Investment Grant program for a New Starts, Small Starts, or Core Capacity project is not implied or guaranteed by an LONP. Specifically, when requesting an LONP, the applicant shall provide the following items:

- a. Description of the activities to be covered by the LONP.
- b. Justification for advancing the identified activities. The justification should include an accurate assessment of the consequences to the project scope, schedule, and budget should the LONP not be approved.
- c. Allocated level of risk and contingency for the activity requested.

C. FY 2017 Annual List of Certifications and Assurances

The FY 2017 Certifications and Assurances and Master Agreement are currently available in TrAMS and must be used for all grants and cooperative agreements awarded in FY 2017. All recipients with active projects are required to sign the FY 2017 Certifications and Assurances within 90 days of publication. The FY 2017 Certifications and Assurances publication date of December 20, 2016.

D. Civil Rights Requirements

1. Equal Employment Opportunity (EEO)

The FTA Office of Civil Rights released an updated EEO Circular, FTA Circular 4704.1A, effective October 31, 2016. The Circular provides guidance to FTA grant recipients to carry out EEO requirements and prepare EEO Program Plans. The updated FTA EEO Circular is posted at <https://www.transit.dot.gov/regulations-and-guidance/civil-rights-ada/eo-circular>. Based on feedback received since publication of the Circular, FTA would like to provide clarification regarding the Circular.

First, State DOTs are subject to the same threshold requirements for FTA EEO Program submissions, located in Circular Section 1.4, Applicability, as other recipients. A State DOT must only submit a transit-related EEO Program if: (1) It employs 100 or more transit-related employees; and (2) requests or receives capital or operating assistance in excess of \$1 million in the previous Federal fiscal year, or requests or receives planning assistance in excess of \$250,000 in the previous Federal fiscal year. In accordance with a One DOT approach and pursuant to the forthcoming Memorandum of Understanding (MOU) with the Federal Highway Administration (FHWA), State DOTs must submit a single EEO Program to FHWA and FTA which will be jointly reviewed, monitored, and approved in accordance with FHWA and FTA regulations every four years. As part of the implementation of the MOU, FTA will be collecting all State DOT EEO Programs every four years via TrAMS. Therefore, a State DOT that does not meet the threshold requirements outlined in Circular Section 1.4 must still submit the FHWA-required EEO Program every four years to FTA, but will not be required to submit a transit-related EEO Program.

Second, we wish to clarify the threshold requirements for preparing and maintaining an abbreviated EEO Program, which is discussed in Circular Section 1.4. In the paragraph discussing

the requirements for agencies employing between 50–99 transit-related employees, FTA inadvertently did not include the monetary threshold that has been in place since at least 1988. Thus, an agency is required to prepare and maintain an abbreviated EEO Program only if: (1) It has between 50–99 transit-related employees; and (2) it requests or receives capital or operating assistance in excess of \$1 million in the previous Federal fiscal year, or requests or receives planning assistance in excess of \$250,000 in the previous Federal fiscal year. The inadvertent absence of the monetary threshold would require more agencies to prepare and maintain EEO Programs. Thus, reinstating the threshold reduces the burden on transit agencies and maintains the status quo.

Third, only direct recipients who cross the EEO Program threshold requirements in Circular Section 1.4, and State DOTs are required to prepare and/or submit an EEO Program to FTA. All subrecipients and contractors who cross the EEO Program threshold must submit EEO Programs to the entity from which they receive funds, generally the transit agency or the State DOT, as appropriate. This will allow State DOTs and transit agencies to determine and document that subrecipients and contractors comply with EEO statutes and regulations, in accordance with their monitoring responsibilities. FTA applicants, recipients, subrecipients, and contractors that do not meet the EEO Program threshold are not required to submit an EEO Program to FTA or to the entity from which they receive funds.

FTA will amend the pages of the Circular affected by the above clarifications and will post the updated Circular on FTA's Web site.

2. Title VI of the Civil Rights Act of 1964

The U.S. DOT's Title VI implementing regulations are found in 49 CFR part 21. FTA's Title VI Circular (4702.1B) provides guidance for carrying out the regulatory requirements. Recipients in urbanized areas of 200,000 or more in population and with 50 or more fixed-route vehicles in peak service must conduct a service or fare equity analysis for all service changes that meet the recipient's definition of "major service change" prior to implementing the service change. A service equity analysis is also required for all New Start, Small Start, or other new fixed guideway capital projects, and must be completed six months prior to implementing revenue service. Recipients also must conduct a fare equity analysis for all fare increases or

decreases prior to implementing a fare change. Recipients that do not meet the abovementioned threshold of 200,000 or more in population and 50 fixed route vehicles in peak service (*i.e.*, small transit providers) are not required to conduct a service or fare equity analysis but should review their policies and practices to ensure their service and fare changes do not result in disparate impacts on the basis of race, color, or national origin.

FTA would also like to stress the importance of public participation. Recipients must facilitate effective public engagement throughout all stages of the consultation, planning, and the decision-making process. Particular emphasis should be given to affected, and potentially affected, communities. FTA recommends that recipients anticipating service and fare changes review FTA Circular 4703.1, Environmental Justice Policy Guidance, Chapter III, Achieving Meaningful Public Engagement with Environmental Justice Populations, available at <https://www.transit.dot.gov/regulations-and-guidance/fta-circulars/environmental-justice-policy-guidance-federal-transit> for ideas on how to engage affected populations. Should you have any questions, please contact your Regional Civil Rights Officer.

E. Consolidated Planning Grants

FTA and FHWA planning funds under both the Metropolitan Planning and State Planning and Research Programs can be consolidated into a single consolidated planning grant, awarded by either FTA or FHWA. The CPG eliminates the need to monitor individual fund sources, if several have been used, and ensures that the oldest funds will always be used first.

Under the CPG, States can report metropolitan planning program expenditures (to comply with the Single Audit Act) for both FTA and FHWA under the Catalogue of Federal Domestic Assistance number for FTA's Metropolitan Planning Program (20.505). Additionally, for States with an FHWA Metropolitan Planning (PL) fund-matching ratio greater than 80 percent, the State can waive the 20 percent local share requirement, with FTA's concurrence, to allow FTA funds used for metropolitan planning in a CPG to be granted at the higher FHWA rate. For some States, this Federal match rate can exceed 90 percent.

States interested in transferring planning funds between FTA and FHWA should contact the FTA Regional Office or FHWA Division Office for more detailed procedures. Current guidelines are included in Federal

Highway Administration Memorandum dated July 12, 2007, "Information: Final Transfers to Other Agencies that Administer Title 23 Programs." For further information on CPGs, contact Ann Souvandra, Office of Budget and Policy, FTA, at (202)366-0649.

F. Grant Application Procedures

All applications for FTA funds should be submitted to the appropriate FTA Regional Office. All applications are filed electronically. FTA continues to award and manage grants and cooperative agreements using the Transit Award Management System (TrAMS) which re-opened for financial activity on November 1, 2016. Information on accessing and using TrAMS, including a list of FTA points of contact for the system, can be found on FTA's Web site at <http://www.transit.dot.gov/TrAMS>.

FTA regional staff is responsible for working with grantees to review and process grant applications. In order for an application to be considered complete and for FTA to assign a Federal Award Identification Number (FAIN), enabling submission in TrAMS, and submission to the Department of Labor (when applicable), the following requirements must be met:

1. Recipient has registered in the System for Award Management (SAM) and its registration is current. If your agency is not registered or needs to ensure it is current, visit the SAM Web site at (<https://www.sam.gov>).

2. Recipient's contact information, including Dun and Bradstreet Data Universal Numbering System (DUNS), is correct and up-to-date. If requested by phone (1-866-705-5711), DUNS is provided immediately. If your organization does not have a DUNS, you will need to go to the Dun & Bradstreet Web site at <http://fedgov.dnb.com/webform> to obtain the number.

3. Recipient has properly submitted its annual certifications and assurances.

4. Recipient's Civil Rights submissions are current.

5. Documentation is on file to support recipient's status as either a designated recipient (for the program and area) or a direct recipient.

6. Funding is available, including any flexible funds included in the budget, and split letters or suballocation letters on file (where applicable) to support amount being applied for in grant application.

7. The project is listed in a currently approved Transportation Improvement Program (TIP); Statewide Transportation Improvement Program (STIP), or Unified Planning Work Program (UPWP).

8. All eligibility issues are resolved.
9. Required environmental findings are made.

10. The application contains a well-defined scope of work including at least one project with accompanying project narratives, budget scope and activity line item information, Federal and non-Federal funding amounts, and milestones.

11. Major Capital Projects as defined by 49 CFR part 633 "Project Management Oversight" must document FTA has reviewed the project management plan and provided approval.

12. Milestone information is complete, or FTA determines that milestone information can be finalized before the grant is ready for award. FTA will also review status of other open grants' reports to confirm financial and milestone information is current on other open grants and projects.

Before FTA can award grants for competitive projects and activities, notification must be provided to the House and Senate authorizing and appropriations committees.

Other important issues that impact FTA grant processing activities are discussed below.

a. System for Award Management (SAM) Registration and Dun and Bradstreet Universal Numbering System (DUNS) Number

Each applicant or recipient of Federal Funds is required to: (1) Be registered in SAM before submitting its application; (2) provide a valid DUNS number in its application; and (3) continue to maintain an active SAM registration with current information at all times during which it has an active award or an application or plan under consideration by the Federal Transit Administration (FTA). FTA will not make an award to an applicant until the applicant has complied with all applicable DUNS and SAM requirements and, if an applicant has not fully complied with the requirements by the time the FTA is ready to make a Federal award, FTA may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

The System for Award Management (SAM) <https://www.sam.gov/portal/SAM/> is the Official U.S. Government system that consolidated the capabilities of many systems. There is no fee to register or use this site. Entities may register and update their information at no cost directly from the above site. SAM registration (formerly CCR

registration) needs to be renewed at least annually.

b. Award Budgets—Scope Codes and Activity Line Items (ALI) Codes; Financial Purpose Codes

FTA uses the Scope and Activity Line Item (ALI) Codes in the award budgets to track disbursements, monitor program trends, report to Congress, and to respond to requests from the Inspector General and the Government Accountability Office (GAO), as well as to manage grants. The accuracy of the data is dependent on the careful and correct use of codes.

c. Designated and Direct Recipients Documentation

For its formula programs, FTA primarily apportions funds to the designated recipient in the large UZAs (areas over 200,000), or for areas under 200,000 (small UZAs and rural areas), it apportions the funds to the Governor, or its designee (e.g., State DOT). Depending on the program and as described in the individual program sections found in Section IV of this notice, further suballocation of funds may be permitted to eligible recipients who can then apply directly to FTA for the funding (direct recipients), so long as the required documentation is on file. For the programs in which FTA can make grants to eligible direct recipients, other than the designated recipient(s), recipients are reminded that documentation must be on file to support the: (1) Status of the recipient either as a designated recipient or direct recipient; and (2) the allocation of funds to the direct recipient.

Documentation to support existing designated recipients for the UZA must also be on file at the time of the first application in FY 2017. Further, split letters and/or suballocation letters (Governor's Apportionment letters), must also be on file to support grant applications from direct recipients. Once suballocation letters for FY 2017 funding are finalized they should also be uploaded into TrAMS.

The Direct Recipient is required to upload to TrAMS a copy of the Designated Recipient letter indicating their allocation of funding [for the appropriate fund program] when the applicant transmits their application for initial review. The letter must be signed by the Designated Recipient, or as applicable in accordance with their planning requirements. If there are two Designated Recipients, both entities must sign the Letter. The Letter must: (1) Indicate the allocations to the respective Direct Recipients listed in the letter; (2) incorporate language above

the signatories to reflect this agreement; and (3) make clear that the Direct Recipient will assume any/all responsibility associated with the award for the funds. When drafting the letter, Designated Recipients may use the template language below:

"As identified in this Letter, the Designated Recipient(s) authorize the reassignment/reallocation of [enter fund source; e.g. Section 5307 funds] to the Direct Recipient(s) named herein. The undersigned agree to the amounts allocated/reassigned to each direct Recipient. Each Direct Recipient is responsible for its application to the Federal Transit Administration to receive such funds and assumes the responsibilities associated with any award for these funds."

2. Payments

Once a grant has been awarded and executed, requests for payment can be processed. To process payments, FTA uses ECHO-Web, an Internet accessible system that provides grantees the capability to submit payment requests on-line, as well as receive user-IDs and passwords via email. New applicants should contact the appropriate FTA Regional Office to obtain and submit the registration package necessary for set-up under ECHO-Web.

3. Oversight

FTA is responsible for conducting oversight activities to help ensure that grants recipients use FTA Federal financial assistance in a manner consistent with their intended purpose and in compliance with regulatory and statutory requirements. FTA conducts periodic oversight reviews to assess grantee compliance with applicable Federal requirements. Each Urbanized Area Formula Program recipient is reviewed every three years, (also known as FTA's Triennial Review); and States and state-wide public transportation agencies are reviewed periodically to assess the management practices and program implementation of FTA state-wide programs (e.g., Planning, Rural Areas, Enhanced Mobility of Seniors and Individuals with Disabilities Programs). Other more detailed reviews are scheduled based on an annual grantee oversight assessment. Important objectives of FTA's oversight program include, but are not limited to: Determining grantee compliance with Federal requirements; identifying technical assistance needs, and delivering technical assistance to meet those needs; spotting emerging issues with grantees in a forward-looking fashion; recognizing when there is a need for more in-depth reviews in the

areas of procurement, financial management, and civil rights; and identifying grantees with recurring or systemic issues.

4. Technical Assistance

As noted throughout the notice, FTA continues to rely on several of the existing program circulars for general program guidance. FTA is continuing to update the program circulars, with an opportunity for notice and comment (where warranted), to reflect amendments to chapter 53 of title 49, U.S.C. made by the FAST Act. In the meantime, if you have any questions, please do not hesitate to contact FTA. FTA headquarters and regional staff will be pleased to answer your questions and provide any technical assistance you may need to apply for FTA program funds and manage the grants you receive. At its discretion, FTA may also use program oversight consultants to provide technical assistance to grantees on a case by case basis. This notice and the program guidance circulars previously identified in this document may be accessed via the FTA Web site at www.fta.dot.gov

G. Grant Management

1. Grant Reporting

Recipients of FTA funds are reminded that all FTA grantees are required to report on their grants and it is critical to ensure reports demonstrate that reasonable progress is being made on the project. At a minimum, all awards require a Federal Financial Report (FFR) and a Milestone Progress Report (MPR) on an annual basis, with some reports required quarterly depending on the recipient and the type of projects funded under the grant. The requirements for these reports and other reporting requirements can be found in the latest version of FTA Circular 5010. FTA staff, auditors, and contractors rely on the information provided in the FFR and MPR to review and report on the status of both financial and project-level activities contained in the grant. It is critical that recipients provide accurate and complete information in these reports and submit them by the required due date. Failure to report and/or demonstrate reasonable progress on projects can result in suspension or premature close-out of a grant.

2. Inactive Grants and Grant Closeout

In FY 2017, FTA will continue to focus on identifying and working with recipients to close inactive grants. If appropriate, FTA will take action to close out and deobligate funds from these grants if reasonable progress is not

made. The efficient use of funds will further FTA's fulfillment of its mission to provide efficient and effective public transportation systems for the nation. As inactive grants continue to be an audit finding within the DOT, FTA must take action to ensure its grants do not impact the DOT from receiving a "clean audit" opinion on its annual financial statements.

In October 2016, FTA identified a list of grants that were awarded on or prior to September 30, 2013 and have had no funds disbursed since September 30, 2015 or have never had a disbursement. FTA Regional Offices will be contacting grant recipients with grants that meet this criteria to notify them that FTA intends to close the grant and deobligate any remaining funds unless the grantee can provide information that demonstrates that the projects funded by the grant remain active and the grantee has a realistic schedule to expedite completion of the projects funded in the grant.

Matthew Welbes,
Executive Director.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

FY 2017 Competitive Funding Opportunity: Public Transportation on Indian Reservations Program; Tribal Transit Program

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice of Funding Opportunity (NOFO).

SUMMARY: The Federal Transit Administration (FTA) announces the availability of approximately \$5 million in funding provided by the Public Transportation on Indian Reservations Program (Tribal Transit Program), as authorized by Federal Transit law 49 U.S.C. 5311(c)(1)(A), as amended by the Fixing America's Surface Transportation (FAST) Act, Public Law 114-94 (December 4, 2015), contingent on full appropriations. This notice is a national solicitation for project proposals and includes the selection criteria and program eligibility information for FY 2017 projects. FTA may fund the program for more or less than the full year appropriation when made available, and may include other funding toward project proposals received in response to this Notice of Funding Opportunity (NOFO).

This announcement is available on the FTA Web site at:

www.transit.dot.gov/funding/grants/grant-programs/public-transportation-indian-reservations-program-tribal-transit-fy-2017. Additionally, a synopsis of the funding opportunity, FTA-2017-002-TPM, will be posted in the FIND module of the government-wide electronic grants Web site at <http://www.grants.gov>. The program can be located in the Catalog of Federal Domestic Assistance (CFDA) under 20.509.

DATES: Complete proposals for the Tribal Transit Program announced in this Notice must be submitted by 11:59 p.m. EDT on March 20, 2017. All proposals must be submitted electronically through the **GRANTS.GOV APPLY** function. Any applicant intending to apply should initiate the process of registering on the **GRANTS.GOV** site immediately to ensure completion of registration before the submission deadline. Instructions for applying can be found on FTA's Web site at www.transit.dot.gov/funding/grants/notices and in the "FIND" module of **GRANTS.GOV**. Mail and fax submissions will not be accepted.

FOR FURTHER INFORMATION CONTACT:

Contact the appropriate FTA Regional Office at www.transit.dot.gov/about/regional-offices/regional-offices for proposal-specific information and issues. For general program information, contact Élan Flippin, Office of Program Management, (202) 366-3800, email: elan.flippin@dot.gov. A TDD is available at 1-800-877-8339 (TDD/FIRS).

Table of Contents

A. Program Description
B. Federal Award Information
C. Eligibility Information
D. Application and Submission Information
E. Application Review
F. Federal Award Administration
G. Federal Awarding Agency Contacts
Appendix A: Registering in SAM and Grants.gov

A. Program Description

The Tribal Transit Program (TTP) was established by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) as a competitive program from FY 2006 & FY 2012. The Moving Ahead for Progress in the 21st Century (MAP-21) Act modified the program to include a \$25 million formula component and a \$5 million competitive program, totaling \$30 million. The FAST Act increased the Tribal Transit Formula Program to \$30 million and continued the \$5 million competitive program found at

49 U.S.C. 5311(c)(1). The program authorizes grants “under such terms and conditions as may be established by the Secretary” to Indian tribes for any purpose eligible under FTA’s Formula Grants for Rural Areas Program, 49 U.S.C. 5311. Tribes may apply for this funding directly.

The primary purpose of these competitively selected grants is to support planning, capital, and, in limited circumstances, operating assistance for tribal public transit services. Funds distributed to Indian tribes under the TTP should NOT replace or reduce funds that Indian tribes receive from States through FTA’s Formula Grants for Rural Areas Program. Specific project eligibility under this competitive allocation is described in Section C below.

B. Federal Award Information

Five million dollars is authorized for the Tribal Transit competitive allocation in FY 2017 subject to enactment of funds to projects selected pursuant to the process described in the following sections. Federal awards under this competitive program will be in the form of grants. Additionally, there is a cap on planning grant awards at \$25,000, and FTA has the discretion to cap capital and operating awards as well.

C. Eligibility Information

1. Eligible Applicants

Eligible applicants include federally recognized Indian tribes or Alaska Native villages, groups, or communities as identified by the U.S. Department of Interior (DOI) Bureau of Indian Affairs (BIA). As evidence of Federal recognition, an Indian tribe may submit a copy of the most up-to-date **Federal Register** Notice published by BIA: Entities Recognized and Eligible to Receive Service from the United States Bureau of Indian Affairs (81 FR 5019, January 29, 2016). To be an eligible recipient, an Indian tribe must have the requisite legal, financial and technical capabilities to receive and administer Federal funds under this program. Additionally, applicants must be located and provide service in a rural area with a population of 50,000 or less. A service area can include some portions of urban areas, as long as the tribal transit service begins in and serves rural areas. Any applicant must be registered in the System for Award Management (SAM) database and maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by FTA.

2. Cost Sharing or Matching

There is a 90 percent federal share for projects selected under the TTP competitive program, unless the Indian tribe can demonstrate a financial hardship in its application. FTA is interested in the Indian tribe’s financial commitment to the proposed project, thus the proposal should include a description of the Indian tribe’s financial commitment. Tribes may use any eligible local match under Chapter 53.

3. Eligible Projects

Eligible projects include public transportation planning and capital expenses. Operating projects are eligible in limited circumstances as, in FY 2017, FTA will only consider operating assistance requests from tribes without existing transit service, or those tribes who received a TTP formula allocation of less than \$20,000.

Public transportation includes regular, continuing shared-ride surface transportation services open to the public or open to a segment of the public defined by age, disability, or low income. Projects exclusive to an urbanized area, as defined by the Census Bureau, are not eligible. FTA will award grants to eligible Indian tribes located in rural areas. Applicants may submit one proposal for each project or one proposal containing multiple projects. Specific types of projects include: Capital projects for start-ups, replacement or expansion needs; operating assistance for start-ups; and planning projects up to \$25,000. Indian tribes applying for capital replacement or expansion needs must demonstrate a sustainable source of operating funds for existing or expanded services.

D. Application and Submission Information

1. Address To Request Application Package

A complete proposal submission will consist of at least two files: (1) The SF 424 Mandatory form (downloaded from [GRANTS.GOV](http://www.GRANTS.GOV)); and (2) the Tribal Transit supplemental form found on the FTA Web site at www.transit.dot.gov/funding/grants/tribal-transit-2017-supplemental-form. The Tribal Transit supplemental form provides guidance and a consistent format for applicants to respond to the criteria outlined in this NOFO.

2. Content and Form of Application Submission

(i) Proposal Submission

A complete proposal submission will consist of at least two files: (1) The SF 424 Mandatory form (downloaded from [GRANTS.GOV](http://www.GRANTS.GOV)); and (2) the Tribal Transit supplemental form found on the FTA Web site at www.transit.dot.gov/funding/grants/tribal-transit-2017-supplemental-form. The applicant must place the supplemental form in the attachments section of the SF-424 Mandatory form. Applicants must use the supplemental form designated for TTP and attach the form to their submission in [GRANTS.GOV](http://www.GRANTS.GOV) to complete the application process. A proposal submission may contain additional supporting documentation as attachments. Within 24 to 48 hours after submitting an electronic application, the applicant should receive three email messages from [GRANTS.GOV](http://www.GRANTS.GOV): (1) Confirmation of successful transmission to [GRANTS.GOV](http://www.GRANTS.GOV); (2) confirmation of successful validation by [GRANTS.GOV](http://www.GRANTS.GOV); and (3) confirmation of successful validation by FTA. If the applicant does not receive confirmations of successful validation or instead receives a notice of failed validation or incomplete materials, the applicant must address the reason for the failed validation or incomplete materials, as described in the notice, and resubmit the proposal before the submission deadline. If making a resubmission for any reason, the applicant must include all original attachments regardless of which attachments were updated and check the box on the supplemental form indicating this is a resubmission. Complete instructions on the application process can be found at <https://www.transit.dot.gov/funding/grants/notices>.

Important: FTA urges applicants to submit their project proposals at least 72 hours prior to the due date to allow time to receive the validation message and to correct any problems that may have caused a rejection notification. FTA will not accept submissions after the stated submission deadline. [GRANTS.GOV](http://www.GRANTS.GOV) scheduled maintenance and outage times are announced on the [GRANTS.GOV](http://www.GRANTS.GOV) Web site <http://www.GRANTS.GOV>. The deadline will not be extended due to scheduled maintenance or outages.

Applicants are encouraged to begin the process of registration on the [GRANTS.GOV](http://www.GRANTS.GOV) site well in advance of the submission deadline. Registration is a multi-step process which may take several weeks to complete before an application can be submitted. Registered

proposers may still be required to take steps to keep their registration up to date before submissions can be made successfully: (1) Registration in the SAM is renewed annually; and (2) persons making submissions on behalf of the Authorized Organization Representative (AOR) must be authorized in *GRANTS.GOV* by the AOR to make submissions. Instructions on the *GRANTS.GOV* registration process are provided in the Appendix.

Applicants may submit one proposal for each project or one proposal containing multiple projects. Applicants submitting multiple projects in one proposal must be sure to clearly define each project by completing a supplemental form for each project. Additional supplemental forms must be added within the proposal by clicking the "add project" button in Section II of the supplemental form.

Information such as applicant name, Federal amount requested, description of areas served, and other information may be requested in varying degrees of detail on both the SF 424 form and supplemental form. Applicants must fill in all fields unless stated otherwise on the forms. Applicants should use both the "Check Package for Errors" and the "Validate Form" validation buttons on both forms to check all required fields on the forms, and ensure that the Federal and local amounts specified are consistent.

(ii) Application Content

The SF424 Mandatory Form and the Supplemental Form will prompt applicants for the required information, including:

- a. Name of federally recognized tribe and, if appropriate, the specific tribal agency submitting the application.
- b. Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS) number if available. (Note: If selected, applicant will be required to provide DUNS number prior to grant award).
- c. Contact information including: Contact name, title, address, fax and phone number, email address if available.
- d. Description of existing public transportation services including areas currently served by the tribe, if any.
- e. Name of person(s) authorized to apply on applicant's behalf must accompany the proposal (attach a signed transmittal letter).
- f. Complete Project Description: Indicate the category for which funding is requested (*i.e.*, project type: Capital, operating or planning), and then indicate the project purpose (*i.e.*, start-up, expansion or replacement). Describe the proposed project and what

it will accomplish (*e.g.*, number and type of vehicles, routes, service area, schedules, type of services, fixed route or demand responsive, safety aspects), route miles (if fixed route), ridership numbers expected (actual if an existing system, estimated if a new system), major origins and destinations, population served, and whether the tribe provides the service directly, contracts for services, and note vehicle maintenance plans.

g. Project Timeline:

Include significant milestones such as date of contract for purchase of vehicle(s), actual or expected delivery date of vehicles; facility project phases (*e.g.* NEPA compliance, design, construction); or dates for completion of planning studies. If applying for operational funding for new services, indicate the period of time funds are used to operate the system (*e.g.* one year). This section should also include any needed timelines for tribal council project approvals, if applicable.

h. Budget:

Provide a detailed budget for each proposed purpose noting the Federal amount requested and any additional funds that will be used. An Indian tribe may use up to fifteen percent of a grant award for capital projects for specific project-related planning and administration, and the indirect costs rate may not exceed ten percent (if necessary add as an attachment) of the total amount requested/awarded. Indian tribes must also provide their annual operating budget as an attachment or under the *Financial Commitment and Operating Capacity* of the supplemental form.

i. Technical, Legal, Financial Capacity: Applicants must be able to demonstrate adequate technical, legal and financial capacity to be considered for funding. Every proposal MUST describe this capacity to implement the proposed project.

1. Technical Capacity: Provide examples of management of other Federal projects, including previously funded FTA projects and/or similar types of projects for which funding is being requested. Describe the resources available to implement the proposed transit project.

2. Legal Capacity: Provide documentation or other evidence to demonstrate status as a federally recognized Indian tribe. Further, demonstrate evidence of an authorized representative with authority bind the applicant and execute legal agreements with FTA. If applying for capital or operating funds, identify whether appropriate Federal or State operating authority exists.

3. Financial Capacity: Provide documentation or other evidence demonstrating current adequate financial systems to receive and manage a Federal grant. Fully describe: (1) All financial systems and controls; (2) other sources of funds currently managed; and (3) the long-term financial capacity to maintain the proposed or existing transit services.

3. Unique Entity Identifier and System for Award Management (SAM)

Each applicant is required to: (1) Be registered in SAM before submitting an application; (2) provide a valid unique entity identifier in its application; and (3) continue to maintain an active SAM registration with current information at all times during which the applicant has an active Federal award or an application or plan under consideration by FTA. These requirements do not apply if the applicant: (1) Is an individual; (2) is excepted from the requirements under 2 CFR 25.110(b) or (c); or (3) has an exception approved by FTA under 2 CFR 25.110(d). FTA may not make an Award until the applicant has complied with all applicable unique entity identifier and SAM requirements. If an applicant has not fully complied with the requirements by the time FTA is ready to make an Award, FTA may determine that the applicant is not qualified to receive an Award and use that determination as a basis for making a Federal award to another applicant. SAM registration takes approximately three to five business days, but FTA recommends allowing ample time, up to several weeks, for completion of all steps.

Step 1: Obtain DUNS Number

Same day. If requested by phone (1-866-705-5711) DUNS is provided immediately. If your organization does not have one, you will need to go to the Dun & Bradstreet Web site at <http://fedgov.dnb.com/webform> to obtain the number.

Step 2: Register With SAM

Three to five business days or up to two weeks. If you already have a Taxpayer Identification Number (TIN), your SAM registration will take three to five business days to process. If you are applying for an Employer Identification Number (EIN) please allow up to two weeks. Ensure that your organization is registered with the System for Award Management (SAM) at <https://www.sam.gov>. If your organization is not, an authorizing official of your organization must register.

Step 3: Establish an Account in *Grants.gov*—Username & Password

Same day. Complete your Authorized Organization Representative (AOR) profile on *Grants.gov* and create your username and password. You will need to use your organization's DUNS Number to complete this step. <https://apply07.grants.gov/apply/OrcRegister>.

Step 4: *Grants.gov*—AOR Authorization

* Same day. The E-Business Point of Contact (E-Biz POC) at your organization must login to *Grants.gov* to confirm an Authorized Organization Representative (AOR). Please note that there can be more than one AOR for your organization. In some cases the E-Biz POC is also the AOR for an organization. *Time depends on responsiveness of your E-Biz POC.

Step 5: Track AOR Status

At any time, you can track your AOR status by logging in with your username and password. Login as an Applicant (enter your username & password you obtained in Step 3) using the following link: [applicant_profile.jsp](#).

4. Submission Dates and Times

Project proposals must be submitted electronically through *GRANTS.GOV* by March 20, 2017. Mail and fax submissions will not be accepted. Proposals submitted after the deadline will not be considered under any circumstance. Applications are time and date stamped by the Discretionary Grants System (DGS) upon successful submission.

5. Funding Restrictions

Funds must be used only for the specific purposes requested in the application. Funds under this NOFO cannot be used to reimburse projects for otherwise eligible expenses incurred prior to FTA award.

6. Other Submission Requirements

FTA requires that all project proposals be submitted electronically through <http://www.GRANTS.GOV> by 11:59 p.m. EDT on March 20, 2017. Mail and fax submissions will not be accepted.

E. Application Review

1. Selection Criteria

FTA will use the following primary selection criteria when evaluating competing capital and operating assistance projects eligible under this program. Applications will be evaluated based on the quality and extent to which the following evaluation criteria are addressed.

i. Planning and Local/Regional Prioritization

Applications will be evaluated based on the degree to which the applicant: (1) Describes how the proposed project was developed; (2) demonstrates that a sound basis for the project exists; and (3) demonstrates that the applicant is ready to implement the project if funded. Information may vary depending upon how the planning process for the project was conducted and what is being requested. Planning and local/regional prioritization should:

a. Describe the planning document and/or the planning process conducted to identify the proposed project;

b. Provide a detailed project description including the proposed service, vehicle and facility needs, and other pertinent characteristics of the proposed or existing service implementation;

c. Identify existing transportation services in and near the proposed service area, and document in detail whether the proposed project will provide opportunities to coordinate service with existing transit services, including human service agencies, intercity bus services, or other public transit providers;

d. Discuss the level of support by the community and/or tribal government for the proposed project;

e. Describe how the mobility and client-access needs of tribal human service agencies were considered in the planning process;

f. Describe what opportunities for public participation were provided in the planning process and how the proposed transit service or existing service has been coordinated with transportation provided for the clients of human service agencies, with intercity bus transportation in the area, or with any other rural public transit providers;

g. Describe how the proposed service complements rather than duplicates any currently available services;

h. Describe the implementation schedule for the proposed project, including time period, staffing, and procurement; and

i. Describe any other planning or coordination efforts not mentioned above.

ii. Project Readiness: Applications will be evaluated on the degree to which the applicant describes readiness to implement the project. The project readiness factor involves assessing whether:

a. Project is a Categorical Exclusion (CE) or the required environmental work has been initiated or completed for

construction projects requiring an Environmental Assessment (EA) or Environmental Impact Statement (EIS) under, among others, the National Environmental Policy Act of 1969, as Amended;

b. Project implementation plans are complete, including initial design of facilities Projects;

c. Project funds can be obligated and the project can be implemented quickly, if selected; and

d. Applicant demonstrates the ability to carry out the proposed project successfully.

iii. Demonstration of Need

Applications will be evaluated based on the degree to which the applicant identifies the need for transit for resources. In addition to project-specific criteria, FTA will consider the project's impact on service delivery and whether the project represents a one-time or periodic need that cannot reasonably be funded from the FTA program formula allocations or State and/or local resources. FTA will evaluate how the proposal demonstrates the transit needs of the Indian tribe as well as how the proposed transit improvements or the new service will address identified transit needs. Proposals should include information such as destinations and services not currently accessible by transit, needs for access to jobs or health care, safety enhancements or special needs of elders, individuals with disabilities, behavioral health care needs of youth, income-based community needs, or other mobility needs. If an applicant received a planning grant in previous fiscal years, it should indicate the status of the planning study and how the proposed project relates to that study.

Applicants applying for capital expansion or replacement projects should also address the following factors in their proposal. If the proposal is for capital funding associated with an expansion or expanded service, the applicant should describe how current or growing demand for the service necessitates the expansion (and therefore, more capital) and/or the degree to how the project is addressing a current capacity constraint. Capital replacement projects should include information about the age, condition, and performance of the asset to be replaced by the proposed project and/or how the replacement may be necessary to maintain the transit system in a state of good repair.

iv. Demonstration of Benefits

Applications will be evaluated based on the degree to which the applicant

identifies expected or, in the case of existing service, achieved/project benefits. FTA is particularly interested in how these investments will improve the quality of life for the tribe and surrounding communities in which it is located. Applicants should describe how the transportation service or capital investment will provide greater access to employment opportunities, educational centers, healthcare, or other needs that profoundly impact the quality of life for the community, as described in the program purpose above. Possible examples include increased or sustained ridership and daily trips, improved service, elimination of gaps in service, improved operations and coordination, increased reliability, health care, education, and economic benefits to the community. Benefits can be demonstrated by identifying the population of tribal members and non-tribal members in the proposed project service area and estimating the number of daily one-way trips the proposed transit service will provide or the actual number of individual riders served. Applicants are encouraged to consider qualitative and quantitative benefits to the Indian tribe and to the surrounding communities that are meaningful to them.

Based on the information provided under the demonstration of benefits, FTA will rate proposals based on the quality and extent to which they discuss the following four factors:

- a. The project's ability to improve transit efficiency or increase ridership;
- b. Whether the project will improve or maintain mobility, or eliminate gaps in service for the Indian tribe;
- c. Whether the project will improve or maintain access to important destinations and services;
- d. Any other qualitative benefits, such as greater access to jobs, education and health care.

v. Financial Commitment and Operating Capacity

Applications must identify the source of local match (ten percent is required for all operating and capital projects), and any other funding sources used by the Indian tribe to support proposed transit services, including human service transportation funding, FHWA's Tribal Transportation Program funding, or other FTA programs. If requesting that FTA waive the local match based on financial hardship, the applicant must submit budgets and sources of other revenue to demonstrate hardship. FTA will review this information and notify tribes at the time of award if the waiver is approved. If applicable, the applicant also should describe how

prior year TTP funds were spent to date to support the service. Additionally, Indian tribes applying for operating of new services should provide a sustainable funding plan that demonstrates how it intends to maintain operations.

In evaluating proposals, FTA will consider any other resources the Indian tribe will contribute to the project, including in-kind contributions, commitments of support from local businesses, donations of land or equipment, and human resources. The proposal should describe to what extent the new project or funding for existing service leverages other funding. Based upon the information provided, the proposals will be rated on the extent to which the proposal demonstrates that:

- a. TTP Funding does not replace existing funding;
- b. The Indian tribe will provide non-financial support to the project;
- c. The Indian tribe is able to demonstrate a sustainable funding plan; and
- d. Project funds are used in coordination with other services for efficient utilization of funds.

vi. Evaluation Criteria for Planning Proposals

For planning grants, the proposal must describe the need for and a general scope of the proposed study. Applications will be evaluated based on the degree to which the applicant addresses the following:

1. The tribes' long-term commitment to transit; and
2. The method used to implement the proposed study and/or further tribal transit.

2. Review and Selection Process

A technical evaluation committee will review proposals under the project evaluation criteria. Members of the technical evaluation committee and other involved FTA staff reserve the right to screen, rate the applications, and seek clarification about any statement in an application. After consideration of the findings of the technical evaluation committee, the FTA Administrator will determine the final selection and amount of funding for each project. Geographic diversity and the applicant's receipt and management of other Federal transit funds may be considered in FTA's award decisions. FTA expects to announce the selected projects and notify successful applicants in the spring of 2017.

F. Federal Award Administration

1. Federal Award Notice

Subsequent to an announcement by the FTA Administrator of the final project selections posted on the FTA Web site, FTA will publish a list of the selected projects, including Federal dollar amounts and recipients in the **Federal Register**. Project recipients should contact their FTA Regional Offices and tribal liaison for information about setting up grants in FTA's Transit Award Management System (TrAMS).

2. Award Administration

Successful proposals will be awarded through TrAMS as Grant Agreements. The appropriate FTA Regional Office and tribal liaison will manage project agreements.

3. Administrative and National Policy Requirements

Except as otherwise provided in this NOFO, TTP grants are subject to the requirements of 49 U.S.C. 5311(c)(1) as described in the latest FTA Circular 9040.1G for the Formula Grants for Rural Areas Program.

4. Reporting

The post award reporting requirements include submission of the Federal Financial Report (FFR) and Milestone Progress Report in TrAMS, and National Transit Database (NTD) reporting as appropriate (see FTA Circular 9040.1G). Reports to TrAMS and NTD are due annually.

G. Federal Awarding Agency Contacts

For further information concerning this notice, please contact Élan Flippin, Office of Program Management, (202) 366-3800, email: elan.flippin@dot.gov. A TDD is available at 1-800-877-8339 (TDD/FIRS).

H. Other Information

This program is not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs." FTA will consider applications for funding only from eligible recipients for eligible projects listed in Section C-2. Due to funding limitations, applicants that are selected for funding may receive less than the amount requested.

Additionally, to assist tribes with understanding requirements under the TTP, FTA has conducted Tribal Transit Technical Assistance Workshops, and will continue those efforts in FY2017. FTA also has expanded its technical assistance to tribes receiving funds under this program. Additionally, through the Tribal Transit Technical

Assistance Assessments Initiative, FTA collaborates with Tribal Transit Leaders to review processes and identify areas in need of improvement and then assists to offer solutions to address these needs—all in a supportive and mutually beneficial manner that results in technical assistance. FTA has completed thirty assessments to date, and expects to do fifteen assessments in FY17. These assessments include discussions of compliance areas pursuant to the Master Agreement, a site visit, promising practices reviews, and technical assistance from FTA and its contractors. These workshops and assessments have received exemplary feedback from Tribal Transit Leaders and provided FTA with invaluable opportunities to learn more about Tribal Transit Leaders' perspectives so to better honor the sovereignty of tribal nations.

FTA will post information about upcoming workshops to its Web site and will disseminate information about the assessments through its regional offices. Contact information for FTA's regional offices can be found on FTA's Web site at www.transit.dot.gov/about/regional-offices. Applicants may also receive technical assistance by contacting their FTA regional Tribal Liaison. A list of Tribal Liaisons is available on FTA's Web site at www.transit.dot.gov/funding/grants/grant-programs/public-transportation-indian-reservations-program-tribal-transit.

Carolyn Flowers,
Acting Administrator.

Appendix A

Registering in SAM and Grants.Gov

Registration in Brief

Registration takes approximately three to five business days, please allow four weeks for completion of all steps.

In order to apply for a grant, you and/or your organization must first complete the registration process in *Grants.gov*. The registration process for an Organization or an Individual can take between three to five business days or as long as four weeks if all steps are not completed in a timely manner. So please register in *Grants.gov* early.

The *Grants.gov* registration process ensures that applicants for Federal Funds have the basic prerequisites to apply for and to receive federal funds. Applicants for FTA competitive funds must:

- Have a valid DUNS number
- Have a current registration in SAM (formerly CCR)
- Register and apply in *Grants.gov*

The required registration steps are described in greater detail on *Grants.gov* Web site. The following is a link to a helpful checklist and explanations published by *Grants.gov* to assist applicants: Organization Registration Checklist. If you have not recently applied for federal funds, we

recommend that you initiate your search, registration, and application process with *Grants.gov*. Visiting the *Grants.gov* site will inform you of how to apply for grant opportunities, as well as assist you in linking to the other required registrations, *i.e.*, Dun & Bradstreet to obtain a DUNS Number, and System for Award Management (SAM).

Summary of steps (these steps are available in *Grants.gov* during registration):

Step 1: Obtain DUNS Number

Same day. If requested by phone (1-866-705-5711) DUNS is provided immediately. If your organization does not have one, you will need to go to the Dun & Bradstreet Web site at <http://fedgov.dnb.com/webform> to obtain the number.

Step 2: Register With SAM

Three to five business days or up to two weeks. If you already have a Taxpayer Identification Number (TIN), your SAM registration will take three to five business days to process. If you are applying for an Employer Identification Number (EIN) please allow up to two weeks. Ensure that your organization is registered with the System for Award Management (SAM) at <https://www.sam.gov>. If your organization is not, an authorizing official of your organization must register.

Step 3: Establish an Account in *Grants.gov*—Username & Password

Same day. Complete your Authorized Organization Representative (AOR) profile on *Grants.gov* and create your username and password. You will need to use your organization's DUNS Number to complete this step. <https://apply07.grants.gov/apply/OrcRegister>.

Step 4: *Grants.gov*—AOR Authorization

* Same day. The E-Business Point of Contact (E-Biz POC) at your organization must login to *Grants.gov* to confirm you as an Authorized Organization Representative (AOR). Please note that there can be more than one AOR for your organization. In some cases the E-Biz POC is also the AOR for an organization. *Time depends on responsiveness of your E-Biz POC.

* Please Note: *Grants.gov* gives you the option of registering as an "individual" or as an "organization." If you register in *Grants.gov* as an as an "Individual," your "Organization" will not be allowed to use the *Grants.gov* username and password. To apply for grants as an Organization you must register as an Organization and use that specific username and password issued during the "organization" registration process.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2017-0004]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel MIRA MAR; Invitation for Public Comments

AGENCY: Maritime Administration

ACTION: Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before February 21, 2017.

ADDRESSES: Comments should refer to docket number MARAD-2017-0004. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-9309, Email Bianca.carr@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel MIRA MAR is:

—Intended Commercial Use of Vessel:

Vessel will be used for captained charters and sailing instruction with a heavy emphasis on recreational boating safety knowledge and skills, and for the promotion of the National ON-Water Standards (NOWS) program and the American National Standards (ANS) adoption by individuals and organizations.

—*Geographic Region:* "Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia"

The complete application is given in DOT docket MARAD-2017- 0004 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to www.regulations.gov, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.dot.gov/privacy. In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

By Order of the Maritime Administrator.

Dated: January 10, 2017.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

- *Fax:* 1-202-493-2251.

- *Mail or Hand Delivery:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Linden Houston, Office of Deepwater Ports and Offshore Activities, Maritime Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; Telephone: (202) 366-4839 or Email: Linden.Houston@dot.gov. Copies of this collection can also be obtained from that office.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2133-0524.

Title: Application for Conveyance of Port Facility Property.

Form Numbers: MA-1047.

Type of Review: Renewal of a currently approved information collection.

Background: Public Law 103-160, which is included in 40 U.S.C. 554 authorizes the Department of Transportation to convey to public entities surplus Federal property needed for the development or operation of a port facility. The information collection will allow MARAD to approve the conveyance of property and administer the port facility conveyance program.

Respondents: Eligible state and local public entities.

Number of Respondents: 13.

Frequency: Annually.

Total Annual Burden: 572.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) whether the proposed collection of information is necessary for the Department’s performance; (b) the accuracy of the estimated burden; (c) ways for the Department to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB’s clearance of this information collection.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION**Maritime Administration****[Docket No. MARAD-2017-0009]****Requested Administrative Waiver of the Coastwise Trade Laws: Vessel GRAVITY; Invitation for Public Comments****AGENCY:** Maritime Administration, Department of Transportation.**ACTION:** Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before February 21, 2017.

ADDRESSES: Comments should refer to docket number MARAD-2017-0009. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-9309, Email Bianca.carr@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel GRAVITY is:

—*Intended Commercial Use of Vessel:* “Private Vessel Charters”

—*Geographic Region:* “Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, California, Oregon, Washington, and Alaska (excluding waters in Southeastern Alaska and waters north of a line between Gore Point to Cape Suckling [including the North Gulf Coast and Prince William Sound])”

The complete application is given in DOT docket MARAD-2017-0009 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD’s regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter’s interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD’s regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to www.regulations.gov, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.dot.gov/privacy. In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

By Order of the Maritime Administrator.

Dated: January 10, 2017.

BILLING CODE 4910-81-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Revenue Procedure 98-32

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Revenue Procedure 98-32, Electronic Federal Tax Payment System (EFTPS) Programs for Reporting Agents.

DATES: Written comments should be received on or before March 20, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to LaNita Van Dyke at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or through the internet at Lanita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Electronic Federal Tax Payment System (EFTPS) Programs for Reporting Agents.

OMB Number: 1545-1601.

Revenue Procedure Number: Revenue Procedure 98-32.

Abstract: This revenue procedure provides information about the Electronic Federal Tax Payment System (EFTPS) programs for Batch Filers and Bulk Filers (Filers). EFTPS is an electronic remittance processing system for making federal tax deposits (FTDs) and federal tax payments (FTP). The Batch Filer and Bulk Filer programs are used by Filers for electronically submitting enrollments, FTDs, and FTPs on behalf of multiple taxpayers.

Current Actions: There are no changes being made to this revenue procedure at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 229,237.

Estimated Average Time per Respondent: 1 hr, 5 min.

Estimated Total Annual Burden Hours: 246,877.

The following paragraph applies to all the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: January 10, 2017.

Tuawana Pinkston,

IRS Reports Clearance Officer.

BILLING CODE 4830-01-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 8874-A

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this

opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13(44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8874–A, Notice of Qualified Equity Investment for New Markets Credit.

DATES: Written comments should be received on or before March 20, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to LaNita Van Dyke at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224, or through the internet at LaNita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Notice of Qualified Equity Investment for New Markets Credit.

OMB Number: 1545–2065.

Form Number: 8874–A

Abstract: New modernized e-file return for partnerships. Internal Revenue Code Sections 6109 and 6103.w code section 45N. 45N was added by section 405 of the Tax Relief and Health Care Act of 2006. The new form provides a means for the qualified mining company to compute and claim the credit.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individual or households, Business or other for-profit.

Estimated Number of Respondents: 500.

Estimated Time per Respondent: 5 hours and 26 minutes.

Estimated Total Annual Burden Hours: 2,715.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the

request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning, (TD 7533, Disc Rules on Procedure and Administration; Rules on Export Trade Corporations), and (TD 7896, Income From Trade Shows).

DATES: Written comments should be received on or before March 20, 2017 to be assured of consideration.

ADDRESSES: Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulations should be directed to LaNita Van Dyke, at Internal Revenue Service, Room 6526, 1111

Constitution Avenue NW., Washington, DC 20224, or through the internet at LaNita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Disc Rules on Procedure and Administration; Rules on Export Trade Corporations; and, Income From Trade Shows.

OMB Number: 1545–0807.

Regulation Project Numbers: TD 7533 and TD 7896. Abstract: Regulation section 1.6071–1(b) requires that when a taxpayer files a late return for a short period, proof of unusual circumstances for late filing must be given to the District Director. Sections 6072(b), (c), (d), and (e) of the Internal Revenue Code deal with the filing dates of certain corporate returns. Regulation section 1.6072–2 provides additional information concerning these filing dates.

Current Actions: There is no change to these existing regulations.

Type of Review: Extension of a currently approved collection.

Affected Public: Individual or households, business or other for-profit organizations, not-for-profit institutions, farms, and state, local or tribal governments.

Estimated Number of Respondents: 12,417.

Estimated Time Per Respondent: 15 minutes.

Estimated Total Annual Burden Hours: 3,104.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. BILLING CODE 4830-01-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0567]

Information Collection Activity: (Presidential Memorial Certificate Form)

AGENCY: National Cemetery Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The National Cemetery Administration (NCA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each revised collection allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before March 20, 2017.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at www.Regulations.gov or to Willie Lewis, National Cemetery Administration (43D), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420; or email: willie.lewis@va.gov. Please refer to "OMB Control No. 2900-0567" in any correspondence. During the comment period, comments may be viewed online through the FDMS.

FOR FURTHER INFORMATION CONTACT: Willie Lewis at (202) 461-4242 or FAX (202) 501-2240.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104-13; 44 U.S.C. 3501-21), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor.

This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, NCA invites comments on:

(1) Whether the proposed collection of information is necessary for the proper performance of NCA's functions, including whether the information will have practical utility; (2) the accuracy of NCA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Presidential Memorial Certificate Form VA form 40-0247.

OMB Control Number: 2900-0567.

Type of Review: Revision of a currently approved collection.

Abstract: The National Cemetery Administration (NCA) made updates to its current VA Form 40-0247. The original VA Form 40-0247 is for requests for initial copies of a Presidential Memorial Certificates (PMC's). The updates to the form would include the following changes with no additional respondent burden:

- Format changes
- SSN or Military Service Number from Discharge Documents
- Mailing address, email address, telephone and fax number updates
- Wording changed to allow the public to also use the form for first time requests

Upon appropriate approval, the NCA Web site will display the updated version of the VA Form 40-0247 for public use.

Affected Public: Individuals or Households.

Estimated Annual Burden: 7,200 hours.

Estimated Average Burden per Respondent: 3 minutes each.

Frequency of Response: One-time.

Estimated Number of Respondents: 125,000.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Department Clearance Officer, Office of Privacy and Records Management, Department of Veterans Affairs.

BILLING CODE 8320-01-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0613]

Agency Information Collection Activity: (Record Keeping at Flight Schools)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments on information needed to determine a claimant's entitlement to education benefits.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before March 20, 2017.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at www.Regulations.gov or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 or email to nancy.kessinger@va.gov. Please refer to "OMB Control No. 2900-0613" in any correspondence. During the comment period, comments may be viewed online through the FDMS.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 632-8924 or FAX (202) 632-8925.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104-13; 44 U.S.C. 3501-21), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of

information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Record Keeping at Flight Schools.

OMB Control Number: 2900–0613.

Type of Review: Extension of a currently approved collection.

Abstract: 2900–0613 is for information reports provided by educational institutions. VA will use data collected to determine if courses offered by flights schools should be approved and to verify the accuracy of VA educational payments made to students training at flight schools.

Affected Public: Businesses or other for-profits, not-for-profit institutions.

Estimated Annual Burden: 572 hours.

Estimated Average Burden per Respondent: 20 minutes.

Frequency of Response: Annual.

Estimated Number of Respondents: 1717.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Agency Clearance Officer, Office of Privacy and Records Management, Department of Veterans Affairs.

Department of Agriculture

Food Safety and Inspection Service

9 CFR Parts 301, 304, 316, et al.

Revision of the Nutrition Facts Labels for Meat and Poultry Products and
Updating Certain Reference Amounts Customarily Consumed; Proposed
Rule

DEPARTMENT OF AGRICULTURE**Food Safety and Inspection Service****9 CFR Parts 301, 304, 316, 317, 318, 319, 320, 327, 362, 381, 412 and 413****[Docket No. FSIS–2014–0024]****RIN 0583–AD56****Revision of the Nutrition Facts Labels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed****AGENCY:** Food Safety and Inspection Service, USDA.**ACTION:** Proposed rule.

SUMMARY: Consistent with the recent changes that the Food and Drug Administration (FDA) finalized, the Food Safety and Inspection Service (FSIS) is proposing to amend the nutrition labeling requirements for meat (including fish of the order Siluriformes) and poultry products to better reflect the most recent scientific research and dietary recommendations and to improve the presentation of nutrition information to assist consumers in maintaining healthy dietary practices. FSIS is proposing to update the list of nutrients that are required or permitted to be declared; provide updated Daily Reference Values (DRVs) and Reference Daily Intake (RDI) values that are based on current dietary recommendations from consensus reports; and amend the labeling requirements for foods represented or purported to be specifically for children under the age of 4 years and pregnant women and lactating women and establish nutrient reference values specifically for these population subgroups. FSIS is also proposing to revise the format and appearance of the Nutrition Facts label; amend the definition of a single-serving container; require dual-column labeling for certain containers; and update and modify several reference amounts customarily consumed (RACCs or reference amounts). Finally, FSIS is proposing to consolidate the nutrition labeling regulations for meat and poultry products into a new Code of Federal Regulations (CFR) part.

DATES: Comments must be received by March 20, 2017.**ADDRESSES:** FSIS invites interested persons to submit comments on this proposed rule. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This Web site provides the ability to type short comments directly into the

comment field on this Web page or attach a file for lengthier comments. Go to <http://www.regulations.gov>. Follow the on-line instructions at that site for submitting comments.

- *Mail, including CD-ROMs, etc.:*

Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, Patriots Plaza 3, 1400 Independence Avenue SW., Mailstop 3782, Room 8–163B, Washington, DC 20250–3700.

- *Hand- or Courier-Delivered*

Submittals: Deliver to Patriots Plaza 3, 355 E Street SW., Room 8–163B, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2014–0024. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to <http://www.regulations.gov>.

Docket: For access to background documents or comments received, go to the FSIS Docket Room at Patriots Plaza 3, 355 E Street SW., Room 8–164, Washington, DC 20250–3700 between 8:00 a.m. and 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jeff Canavan, Deputy Director, Labeling and Program Delivery Staff, Office of Policy and Program Development, Food Safety and Inspection Service, U.S. Department of Agriculture, Stop Code 3784, Patriots Plaza 3, 8–161A, 1400 Independence Avenue SW., Washington, DC 20250–3700; Telephone (301) 504–0879; Fax (202) 245–4792.

SUPPLEMENTARY INFORMATION:**Executive Summary**

The Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*) direct the Secretary of Agriculture to maintain meat and poultry product inspection programs designed to assure consumers that meat and poultry products distributed to them (including imports) are safe, wholesome, not adulterated, and properly marked, labeled, and packaged. The FMIA and PPIA (“the Acts”) also provide that the labels of meat and poultry products must be approved by the Secretary of Agriculture, who has delegated this authority to FSIS, before these products can enter commerce. The Acts prohibit the sale or offer for sale by any person, firm, or corporation of any article in commerce under any name or other marking or labeling that is false or misleading or in any container of a

misleading form or size (21 U.S.C. 607(d); 21 U.S.C. 457(c)). The Acts also prohibit the distribution in-commerce of meat or poultry products that are adulterated or misbranded. The FMIA and PPIA give FSIS broad authority to promulgate such rules and regulations as are necessary to carry out the provisions of the Acts (21 U.S.C. 621 and 463(b)).

To prevent meat and poultry products from being misbranded, the meat and poultry product inspection regulations require that the labels of meat and poultry products include specific information, and that such information be displayed as prescribed in the regulations (9 CFR part 317 and part 381). The nutrition labeling requirements for meat and meat food products are in 9 CFR 317.300–317.400, and the nutrition labeling requirements for poultry products are in 9 CFR 381.400–381.500. The nutrition labeling regulations for meat and poultry products include requirements regarding: Location of nutrition information; labeling with number of servings; nutrition label content; reference amounts customarily consumed per eating occasion; and nutrient content claims.

On March 3, 2014, the Food and Drug Administration (FDA) published two proposed rules, “Food Labeling: Revision of the Nutrition and Supplement Facts Labels” (the “FDA Nutrition Labeling Proposed Rule”)(79 FR 11880) and “Food Labeling: Serving Sizes of Foods That Can Reasonably Be Consumed at One-Eating Occasion; Dual-Column Labeling; Updating, Modifying, and Establishing Certain Reference Amounts Customarily Consumed; Serving Size for Breath Mints; and Technical Amendments” (the “FDA Serving Size Proposed Rule”)(79 FR 11989). FDA proposed these rules to update the Nutrition Facts label to reflect newer nutrition and public health research and recent dietary recommendations from expert groups and to improve the presentation of nutrition information to help consumers make more informed choices and maintain healthy dietary practices. On July 27, 2015, FDA published a supplemental notice of proposed rulemaking “Food Labeling: Revision of the Nutrition and Supplement Facts Labels; Supplemental Notice of Proposed Rulemaking” (the “FDA Nutrition Labeling Supplemental Proposed Rule”)(80 FR 44303) to revise certain provisions of the FDA Nutrition Labeling Proposed Rule. On May 27, 2016, FDA published two final rules, “Food Labeling: Revision of the Nutrition and Supplement Facts Labels”

(the “FDA Nutrition Labeling Final Rule”)(81 FR 33742) and “Food Labeling: Serving Sizes of Foods That Can Reasonably Be Consumed at One-Eating Occasion; Dual-Column Labeling; Updating, Modifying, and Establishing Certain Reference Amounts Customarily Consumed; Serving Size for Breath Mints; and Technical Amendments” (the “FDA Serving Size Final Rule”)(81 FR 34000).

FSIS has reviewed FDA’s analysis, and to ensure that there is consistency in how nutrition information is presented across the food supply, FSIS is proposing to amend the nutrition labeling regulations for meat and poultry products to parallel, to the extent possible, FDA’s final regulations. This approach will clarify information for consumers and improve efficiency in the marketplace.

FSIS is proposing to consolidate the nutrition labeling regulations that

currently are presented separately for meat and for poultry products (in 9 CFR 317.300–317.400 and 381.400–381.500, respectively) into a single part, 9 CFR part 413. Consistent with FDA’s final regulations, FSIS is also proposing to update the list of nutrients that are required or permitted to be declared and to provide updated DRVs and RDIs that are based on current dietary recommendations from consensus reports. For example, FSIS is proposing to remove the requirement to declare “Calories from Fat;” require the declaration of “Added Sugars,” vitamin D, and potassium; permit the voluntary declaration of vitamins A and C; and update the reference value for the declaration of percent Daily Value (DV) for sodium from the current value of 2,400 mg (milligrams) to 2,300 mg. FSIS is also proposing to amend the requirements for foods represented or

purported to be specifically for children under the age of 4 years and pregnant women and lactating women and establish nutrient reference values specifically for these population subgroups.

FSIS is also proposing to revise the format and appearance of the Nutrition Facts label. Some of the proposed changes include increasing the type size for “Calories,” “servings per container,” and the “Serving size” declarations, and bolding the number of calories and the “Serving size” declaration to highlight this information.

FSIS is also proposing to amend the definition of a single-serving container; require dual-column labeling for certain containers; and update and modify several RACCs. These proposed changes will provide consumers information to assist them in maintaining healthy dietary practices.

Summary of Costs and Benefits

Quantitative costs for the proposed rule include relabeling, recordkeeping, and reformulation. Quantitative benefits

are a measure of expected health improvements experienced from increased label-use by overweight and hypertensive adults. The summary of cost and benefits in Table 1 are

annualized at a 3 percent discount rate over 20 years with a compliance period of 24 months for large manufacturers and 36 months for small.

TABLE 1—SUMMARY OF COSTS AND BENEFITS

	Costs	Benefits	Net benefits
Annualized (3% Discount Rate, 20 Years)	\$10,802,809	\$36,894,007	\$26,091,198
Annualized (7% Discount Rate, 20 Years)	14,603,562	22,541,264	7,937,702

- XI. Proposed Regulatory Amendments

I. Background

The Nutrition Labeling and Education Act (NLEA) of 1990 required the nutrition labeling of most foods regulated by the FDA. Because FSIS is committed to providing consumers with the most informative labeling system possible, FSIS published regulations establishing comparable nutrition labeling requirements for meat and poultry products on January 6, 1993 (58 FR 632). These regulations required nutrition labels on the packages of all multi-ingredient and heat-processed meat and poultry products, unless an exemption applied. The required nutrition labeling provisions were referred to as “the mandatory nutrition labeling program.” The Agency’s 1993 regulations also established guidelines for voluntary nutrition labeling of single-ingredient, raw meat and poultry products, including single-ingredient, raw ground or chopped products.

FSIS published technical amendments to the 1993 final rule (August 18, 1993, 58 FR 43787; September 10, 1993, 58 FR 47624; and March 16, 1994, 59 FR 12157), a final rule on the placement of nutrition labeling on meat and poultry products (August 8, 1994), a final rule with additional technical amendments to the nutrition labeling regulations (September 1, 1994; 59 FR 45189), and a final rule to provide codified language for provisions that previously cross-referenced FDA’s nutrition labeling regulations on January 3, 1995 (60 FR 174). FSIS also published a final rule to require nutrition labeling of the major cuts of single-ingredient raw meat and poultry products and ground or chopped meat and poultry products on December 29, 2010 (75 FR 82164).

Currently, FSIS requires nutrition labels on the packages of all multi-ingredient and heat-processed meat and poultry products, and all ground or chopped products, unless an exemption applies (9 CFR 317.300; 317.301; 381.400; 381.401). FSIS also requires that nutrition information be provided on the label or at the point-of-purchase for the major cuts of single-ingredient, raw meat and poultry products identified in 9 CFR 317.344 and 381.444 that are not ground or chopped, except for certain exemptions. The following exemptions in 9 CFR 317.400 and 381.500 from the nutrition labeling requirements apply to the major cuts of

single-ingredient, raw meat and poultry products and ground or chopped meat and poultry products:

- Products intended for further processing, provided that the labels for these products bear no nutrition claims or nutrition information;
- Products that are not for sale to consumers, provided that the labels for these products bear no nutrition claims or nutrition information;
- Products in small packages that are individually wrapped packages of less than ½ ounce net weight, provided that the labels for these products bear no nutrition claims or nutrition information;
- Products that are custom slaughtered or prepared; and
- Products intended for export.

FSIS also provides the following additional exemptions in 9 CFR 317.400 and 381.500 for ground or chopped products:

- Ground or chopped products that qualify for the small business exemption in 9 CFR 317.400(a)(1) or 381.500(a)(1);
- Products that are ground or chopped at an individual customer’s request and that are prepared and served at retail, provided that the labels or labeling of these products bears no nutrition claims or nutrition information;
- Ground or chopped products in packages that have a total surface area for labeling of less than 12 square inches, provided that the product’s labeling includes no nutrition claims or nutrition information and provided that an address or telephone number that a consumer can use to obtain the required information is included on the label; and
- Ground products produced by small businesses that use statements of percent fat and percent lean on the label or in labeling of ground products, provided they include no other nutrition claims or nutrition information on the product labels or labeling.

Generally, ready-to-eat products that are packaged and portioned at a retail store or similar retail-type establishment and multi-ingredient products (e.g., sausage) processed at a retail store or similar retail-type establishment are exempt from nutrition labeling, provided that this exemption does not apply to ready-to-eat or multi-ingredient ground or chopped products described in 9 CFR 317.301 or 381.401. Restaurant menus also do not generally fall within the scope of FSIS’s current nutrition labeling regulations (9 CFR 317.400 and 381.500). However, FDA requires that restaurants and similar retail food establishments that are part of a chain

with 20 or more locations doing business under the same name and offering for sale substantially the same menu items disclose certain nutrition information for standard menu items (see “Food Labeling; Nutrition Labeling of Standard Menu Items in Restaurants and Similar Retail Food Establishments”; December 1, 2014; 79 FR 71155). FDA also requires that operators who own or operate 20 or more vending machines disclose calorie information for food sold from vending machines, subject to certain exemptions (see “Food Labeling; Calorie Labeling of Articles of Food in Vending Machines”; December 1, 2014; 79 FR 71259).

FSIS does not require nutrition information for single-ingredient, raw meat and poultry products that are not major cuts and that are not ground or chopped. But, if nutrition information is provided for these products, it must be provided in accordance with the nutrition labeling requirements for the major cuts (9 CFR 317.300 and 381.400).

II. The Proposed Rule

Nutrition labeling continues to be an integral part of USDA’s efforts to educate consumers about nutrition and diet. Since 1980, USDA and the Department of Health and Human Services (HHS) have jointly published the Dietary Guidelines for Americans (DGA) every five years. The 2015–2020 DGA provides advice on food choices that promote overall health, reduce the risk of chronic disease, and help individuals attain and maintain a healthy weight.¹ The nutrition labeling information that FSIS is proposing to require in this rule would assist consumers in maintaining healthy dietary practices. The information should also help consumers follow the advice in the 2015–2020 DGA.

For example, the 2015–2020 DGA concluded that some Americans do not consume enough vitamin D or potassium, and inadequate intake of these nutrients presents public health concerns (pages 60). Vitamin D is important for bone health, and potassium helps to reduce the effects of excess sodium on blood pressure. This proposed rule would require vitamin D and potassium to be declared on nutrition labels, to assist consumers in maintaining healthy dietary practices. Moreover, consistent with the 2015–2020 DGA, the information should help consumers follow the 2015–2020 DGA’s

¹ U.S. Department of Agriculture and U.S. Department of Health and Human Services, 2015–2020 Dietary Guidelines for Americans, 8th edition, Washington, DC: U.S. Government Printing Office, December 2015. Available at <http://www.health.gov/dietaryguidelines/2015.asp>.

advice to select foods that provide more of these nutrients (page 60). Additionally, the 2015–2020 DGA does not consider low intake of vitamins A and C to be a major public health concern (page 60). Currently, vitamins A and C must be declared on the Nutrition Facts label, but this proposed rule would make their declaration voluntary.

This proposed rule also proposes changes to the Daily Values for certain nutrients, consistent with the more recent scientific evidence from the 2015–2020 DGA. For example, FSIS is proposing to amend the current DV for sodium of 2,400 to 2,300 mg, which is consistent with the scientific evidence reflected in the 2015–2020 DGA's recommendation to limit intake of sodium to less than 2,300 mg per day and is the upper limit for individuals ages 14 years and older set by the Institute of Medicine. (page 15). Revising DVs to reflect the most current science on nutrient requirements will help consumers choose a better overall diet.

The 2015–2020 DGA also supports listing added sugars on nutrition labels. It affirms that poor diet and physical inactivity are primary factors contributing to overweight, obesity, and chronic illness (pages 2–3). Calories from added sugars, solid fats (including saturated and *trans* fats), and refined grains replace nutrient-dense foods and make it difficult to consume sufficient nutrients while controlling caloric intake (page 14). FSIS is proposing to require that added sugars be listed on nutrition labels to assist consumers in selecting a more nutrient-dense diet while controlling the total number of calories consumed (see section II.E.3 for discussion of the rationale for the proposed changes).

Section 403(q)(1)(A) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 343(q)(1)(A)) defines serving size as an amount customarily consumed and which is expressed in a common household measure that is appropriate to the food. FSIS, consistent with FDA, is proposing to update, modify, and establish certain RACCs and require that packages which contain more than 150 percent and less than 200 percent of a given RACC be labeled as containing one serving, regardless of the RACC of the product. Certain packages that contain at least 200 percent and up to and including 300 percent of a given RACC would be required to include dual column labels that provide nutrition information per serving or per package, as applicable. These changes will ensure that serving sizes are based on current consumption data and will provide consumers with information on

the Nutrition Facts label related to the serving size that will assist them in maintaining healthy dietary practices.

Finally, FSIS is proposing several updates to the design of the current Nutrition Facts labels, including making the caloric content and serving size declarations more prominent. These and other changes aim to address current public health problems such as obesity, chronic disease, and nutrient deficiency by emphasizing important nutritional information and providing additional information to consumers.

A. Consolidating the Nutrition Labeling Requirements Into 9 CFR Part 413

Currently, the nutrition labeling regulations for meat and poultry products are presented separately (in 9 CFR 317.300–317.400 and 381.400–381.500, respectively). FSIS believes that the public would be better served by consolidating these regulations in one part of title 9. Rather than searching through two separate parts of title 9—CFR parts 317 and 381—to find the nutrition labeling regulations, interested parties would only have to read part 413. Therefore, FSIS is proposing to consolidate the nutrition labeling regulations for meat and poultry products into a single part, 9 CFR part 413.

B. Calories

FSIS requires the total number of calories per serving of a meat or poultry product to be declared on the Nutrition Facts label (9 CFR 317.309(c)(1); 9 CFR 381.409(c)(1); and proposed 9 CFR 413.309(c)(1)). FSIS is not proposing to change this requirement but is proposing changes to the requirements related to “Calories from fat” and “Calories for saturated fat.”

1. Calories from Fat

FSIS currently requires that “Calories from Fat” be declared on Nutrition Facts labels (9 CFR 317.309(c)(1)(ii); 9 CFR 381.409(c)(1)(ii)). FSIS is proposing to no longer require, and to not allow voluntarily, the declaration of “Calories from fat” on the Nutrition Facts label.

Section 403(q)(2)(B) of the FD&C Act (21 U.S.C. 343(q)(2)(B)) grants the Secretary of HHS (and by delegation, FDA) discretion to remove information relating to a nutrient required to be declared on food labels by regulation if the Secretary determines that it is not necessary to assist consumers in maintaining healthy dietary practices. FDA considered a number of factors related to the declaration of “Calories from Fat,” including dietary recommendations and consensus reports that emphasize intake of total

calories and the type of fat consumed, as well as comments from their 2005 and 2007 Advanced Notices of Proposed Rulemaking (ANPRMS) (April 4, 2005, 70 FR 17008; November 2, 2007, 72 FR 62149) that supported eliminating the declaration of “Calories from fat” in order to place greater emphasis on total calories. FDA determined that the declaration of “Calories from fat” is not necessary to assist consumers in maintaining healthy dietary practices (81 FR 33780). Under FDA's Nutrition Labeling Final Rule, FDA no longer requires, and does not allow voluntarily, the declaration of “Calories from fat” on the Nutrition Facts label (81 FR 33780). FSIS has reviewed FDA's analysis and has tentatively concluded that the declaration of “Calories from fat” is not necessary to assist consumers in maintaining healthy dietary practices. FSIS agrees with FDA that “the amount of fat being consumed can still be obtained from the total fat declaration elsewhere on the Nutrition Facts label, and consumers can still use the percent DV for total fat to put fat content in the context of a total daily diet, compare products, and plan diets” (79 FR 11891; 81 FR 33780).

2. Calories From Saturated Fat

Under current FSIS regulations, the declaration of “Calories from saturated fat” on the Nutrition Facts label is voluntary (9 CFR 317.309(c)(1)(iii); 9 CFR 381.409(c)(1)(iii)); will be consolidated in proposed 9 CFR 413.309(c)(1)(ii)). FSIS continues to believe that “Calories from saturated fat” can be declared voluntarily. The amount of saturated fat can be obtained from the total saturated fat declaration on the Nutrition Facts label, and consumers can use the percent DV for saturated fat to put saturated fat content in the context of a total daily diet, compare products, and plan diets (79 FR 11892; 81 FR 33781). Therefore, FSIS does not believe it is necessary to require the mandatory declaration of “Calories from saturated fat” on the Nutrition Facts label. But with the revisions to the Nutrition Facts label, FSIS is proposing to require that “Calories from saturated fat” be indented when declared under the statement of calories (proposed 9 CFR 413.309(c)(1)(ii)).

3. Two Thousand Calories as the Reference Caloric Intake Level

FSIS regulations (9 CFR 317.309(c)(9) and 381.409(c)(9)) set a percent DRV for fat, saturated fatty acids, cholesterol, total carbohydrate, fiber, sodium, potassium, and protein, based on a reference caloric intake of 2,000

calories. Just as FDA did not make any changes to the reference calorie intake, FSIS is not proposing any changes to the reference caloric intake currently used to set the DRV's under 9 CFR 317.309(c)(9) and 381.409(c)(9) (which will both be consolidated in proposed 9 CFR 413.309(c)(9)).

FDA considered a number of factors related to the reference calorie intake of 2,000 calories, including the relevant recommendations from the IOM macronutrient report² that provided estimated energy requirements, the IOM Labeling Report,³ and the comments regarding the 2,000 calorie reference intake level received in response to FDA's 2007 ANPRM (79 FR 11892). FDA decided not to propose changes to the reference calorie intake level (81 FR 33782). "The IOM Labeling Committee concluded that retaining the current 2,000 reference calorie intake level would be the best approach as it would provide continuity and would not encourage higher calorie intake and overconsumption of energy" (79 FR 11892). FSIS agrees with FDA and the recommendation of the IOM Labeling Committee.

4. Percent Daily Value (DV) Declaration for Calories

FSIS's current regulations do not establish a DRV for calories and do not require a percent DV declaration for calories. FDA reviewed recommendations in current consensus reports, including the IOM macronutrient report,⁴ and comments received in response to their 2005 and 2007 ANPRMs (79 FR 11892, 11893). FDA decided not to require a percent DV for total calories because of a lack of an appropriate quantitative intake recommendation or other data or information on which FDA could rely to establish a DRV for calories (81 FR 33782). FSIS agrees with FDA's conclusion.

C. Fat

1. Total Fat

a. Definition and Mandatory Declaration

FSIS is not proposing any changes to its definition of "total fat" under 9 CFR 317.309(c)(2) and 381.409(c)(2) (which will both be consolidated in proposed 9 CFR 413.309(c)(2)). FSIS is proposing to define "fatty acids" in 9 CFR 413.309(c)(2) as aliphatic carboxylic acids consisting of a chain of alkyl groups and characterized by a terminal carboxyl group to harmonize with FDA's Nutrition Labeling Final Rule and clarify what FSIS considers to be a fatty acid. FSIS is not proposing to change the requirement for mandatory declaration for total fat on the Nutrition Facts label.

b. DRV

FSIS's regulations 9 CFR 317.309(c)(9) and 381.409(c)(9), which would be consolidated in proposed 9 CFR 413.309(c)(9), set 65 grams as the DRV for total fat based on a reference calorie intake of 2,000 calories (*i.e.*, 30 percent of a 2,000 calorie diet). In FDA's Nutrition Labeling Final Rule, FDA increased the DRV for total fat to 78 grams, or 35 percent of a 2,000 calorie diet. The upper level of the IOM Acceptable Macronutrient Distribution Range (AMDR)⁵ for total fat for adults is 35 percent and serves as an appropriate basis on which to set the DRV for total fat (81 FR 33784). FDA reviewed new information and evidence that corroborated the position that the types of fats consumed are more important in influencing the risk of heart disease than is the total amount of fat (81 FR 33784). FDA stated that keeping the DRV for total fat at 30 percent of calories could be misinterpreted as advising consumers to limit their intake of total fat to 30 percent or less, and that it is conceivable that consumers could view foods that are good sources of mono and polyunsaturated fats negatively because their percent DV declaration for total fat is high (81 FR 33784). FSIS agrees with FDA's analysis, and is proposing to increase the DRV for total fat from 30 percent of calories to 35 percent of calories for a DRV of 78 grams.

2. Saturated Fat

a. Definition

FSIS regulations currently define "Saturated fat" as the sum of all fatty

acids, including stearic acid, containing no double bonds (*see* 9 CFR 317.309(c)(2)(i); 381.409(c)(2)(i); and 21 CFR 101.9(c)(2)(i)). However, in FSIS's 1993 Nutrition Labeling of Meat and Poultry Products final rule, based on requests from the red meat industry and the scientific knowledge in 1993 that stearic acid did not have the same serum cholesterol-raising effects of the other three saturated fatty acids, myristic, palmitic, and lauric acids, FSIS provided for the voluntary declaration of stearic acid as a subcomponent of saturated fat (58 FR 641). FDA had no similar request for the voluntary listing of stearic acid and did not provide for such listing.

In FDA's Nutrition Labeling Proposed Rule, FDA considered voluntary declaration of stearic acid on the Nutrition Facts label, as recommended by a few comments to their 2007 ANPRM (79 FR 11894). The effects of stearic acid on Low-density lipoprotein (LDL) cholesterol levels appear to vary depending on the macronutrient component that is replaced by stearic acid (79 FR 11894). FDA found that moderate evidence indicates that when stearic acid substitutes for other saturated fatty acids or *trans* fat, plasma LDL cholesterol levels decrease, whereas when it replaces monounsaturated or polyunsaturated fatty acids, LDL cholesterol levels increase (79 FR 11894). Considering such scientific data, the *Report of the Dietary Guidelines Advisory Committee on the Dietary Guidelines for Americans*, 2010 (2010 DGAC),⁶ concluded that the potential effects of changes in dietary intake of stearic acid on the risk of CVD remain unclear (79 FR 11894). In FDA's Nutrition Labeling Proposed Rule, FDA tentatively concluded that the individual declaration of stearic acid is not necessary to assist consumers in maintaining healthy dietary practices, and proposed to not permit the declaration on the Nutrition Facts label (79 FR 11894). FDA addressed the evidence for a role of stearic acid in human health (*e.g.*, changes in plasma LDL cholesterol levels), which is not well-established, and the fact that there is no quantitative intake recommendation available for stearic acid (*Id.*) In FDA's final rule, FDA did not exclude stearic acid from the calculation of the percent DV for

² Institute of Medicine (IOM) of the National Academies. "Dietary Reference Intakes for Energy, Carbohydrate, Fiber, Fat, Fatty Acids, Cholesterol, Protein, and Amino Acids (Macronutrients), Chapter 5: Energy", Washington, DC: National Academies Press; 2002.

³ The amount of vitamin D may, but is not required to, be expressed in international units (IU), in addition to the mandatory declaration in mcg. Any declaration of the amount of vitamin D in IU must appear in parentheses after the declaration of the amount of vitamin D in mcg.

⁴ 1 mg α -tocopherol (label claim) = 1 mg α -tocopherol = 1 mg RRR- α -tocopherol = 2 mg *all rac*- α -tocopherol.

⁵ "The AMDR for a macronutrient is based on the amount of the macronutrient that is associated with a reduced risk of chronic disease while providing adequate intakes of essential nutrients" (79 FR 11886).

⁶ U.S. Department of Agriculture and U.S. Department of Health and Human Services. (2010) "Report of the Dietary Guidelines Advisory Committee on the *Dietary Guidelines for Americans*, 2010", Washington, DC: U.S. Government Printing Office. Retrieved from <http://www.cnpp.usda.gov/dietary-guidelines-2010>.

saturated fat because the scientific evidence supporting the current dietary recommendations for saturated fat does not differentiate among the individual saturated fatty acids (81 FR 33786).

Based on this updated scientific information and the fact that few if any companies have included stearic acid as a voluntary nutrient in the current Nutrition Facts label, FSIS is proposing to remove the voluntary declaration of stearic acid below saturated fat.

Also, consistent with FDA's final rule, FSIS is not proposing to exclude acetic, propionic, and butyric acids from the definition of saturated fat.

b. Mandatory Declaration

FSIS requires the mandatory declaration of the number of grams of saturated fat per serving (9 CFR 317.309(c)(2)(i) and 381.409(c)(2)(i) will be consolidated in proposed 9 CFR 413.309(c)(2)(i)). FSIS is not proposing to change this requirement because FSIS is unaware of any evidence that supports that this information is no longer needed to assist consumers in maintaining healthy dietary practices.

c. Dietary Reference Value (DRV)

FSIS's regulations 9 CFR 317.309(c)(9) and 381.409(c)(9), which will be consolidated in proposed 9 CFR 413.309(c)(9), set 20 grams as the DRV for saturated fat based on a reference calorie intake of 2,000 calories. FSIS is not proposing to change the DRV for saturated fat.

FDA reviewed the IOM Labeling Committee recommendation,⁷ the comments in response to their 2007 ANPRM, and current consensus reports relating to the DRV for saturated fat, and stated that "the existing scientific evidence does not support a change to the current 20 g DRV" for saturated fat (79 FR 11895–11896). FDA determined "the existing DRV of 20 grams is consistent with the scientific evidence supporting a maximum intake level that covers the general U.S. population." (81 FR 33786). FSIS has reviewed FDA's analysis and has tentatively concluded not to change the DRV for saturated fat.

3. Trans Fat

On July 11, 2003, FDA published a final rule requiring manufacturers to declare *trans* fatty acids, or *trans* fat, on the Nutrition Facts label of conventional foods and some dietary supplements (68 FR 41461). At that time, FSIS published information on its Web site stating that FSIS was planning rulemaking on *trans*

fat label declarations to consider provisions in the meat and poultry regulations that are consistent with FDA's rules.⁸ In the interim, FSIS has not objected to the voluntary declaration of *trans* fat in Nutrition Facts labels on food products under its jurisdiction if the declaration is made in accordance with FDA regulations published in the **Federal Register** on July 11, 2003, that amended 21 CFR part 101. There are no FDA or FSIS provisions for claims regarding *trans* fatty acids. Thus, any labeling that includes a statement regarding *trans* fatty acids that is outside of and in addition to the Nutrition Facts label declaration would need to be submitted to FSIS (the Labeling and Program Delivery Staff (LPDS)) for evaluation. To date, FSIS has not permitted any claims regarding *trans* fatty acids.

Based on FSIS's label review, FSIS believes that the majority of meat and poultry product Nutrition Facts labels voluntarily declare *trans* fat. However, because FSIS is now proposing major modifications to the Nutrition Facts label, FSIS believes it is time to address the need for *trans* fat labeling on meat and poultry products. According to FDA's Nutrition Labeling Proposed Rule, *trans* fat continues to be a nutrient with public health significance because of its role in chronic disease (79 FR 11896). FDA is unaware of evidence to support a determination that information relating to *trans* fat on the Nutrition Facts label is not necessary to assist consumers in maintaining healthy dietary practices (79 FR 11896). FDA tentatively concluded that information on the amount of *trans* fat in food products allows consumers to reduce their intake of *trans* fat and thus reduce the risk of coronary heart disease (CHD) (79 FR 11896). However, in 2013, FDA published a tentative determination that partially hydrogenated oils (PHOs), the source of industrially produced *trans* fat, may not be generally recognized as safe (GRAS) (78 FR 67169; November 8, 2013). FDA requested comment on whether mandatory labeling of *trans* fat would still be necessary if this determination is finalized (79 FR 11896). Per 21 CFR 101.9(c)(2)(ii), if a food contains less than 0.5 g of *trans* fat per serving, the content, when declared, is to be expressed as zero. On June 17, 2015, FDA published a final determination that there is no longer a consensus among qualified experts that PHOs, which are the primary dietary source of industrially-produced *trans*

fatty acid are GRAS for any use in human food and therefore are food additives subject to section 409 of the FD&C Act (80 FR 34650). FDA has set a compliance period of three years for companies to either reformulate products without PHOs or petition FDA to permit specific uses of PHOs. Following the compliance period, no PHOs can be added to human food unless they are otherwise approved by FDA. In FDA's Nutrition Labeling Final Rule, FDA did not make any changes to the requirement for mandatory declaration of *trans* fat on the Nutrition Facts label in 21 CFR 101.9(c)(2)(ii), stating "it is premature to consider removing *trans* fat from the Nutrition Facts label at this time." (81 FR 33786–88).

Although FDA's final determination that PHOs are not GRAS for use in any human food may eliminate the source of industrially produced *trans* fat, FSIS recognizes that there are *trans* fats caused by the way that some animals, such as cattle, sheep and goats, digest their food (the ruminating process). Consistent with FDA's Nutrition Labeling Final Rule (81 FR 33786–33787), FSIS is proposing to require the declaration of *trans* fat in the Nutrition Facts label (proposed 9 CFR 413.309(c)(2)(ii)). The mandatory declaration of *trans* fat will assist consumers in making informed choices and maintaining healthy dietary practices.

4. Polyunsaturated Fat

a. Voluntary Declaration

FSIS permits the voluntary declaration of the number of grams of polyunsaturated fat per serving (defined as *cis*, *cis*-methylene interrupted polyunsaturated fatty acids) on the Nutrition Facts label (9 CFR 317.309(c)(2)(ii) and 381.409(c)(2)(ii), which will be consolidated in proposed 9 CFR 413.309(c)(2)(iii)). FDA considered current consensus reports and comments received in response to their 2007 ANPRM when deciding to propose to continue to permit the voluntary declaration of polyunsaturated fat on the Nutrition Facts label (79 FR 11897; 81 FR 33788). FDA recognized that, although polyunsaturated fat is related to public health as a replacement for saturated fat, there is no dose-response relationship between polyunsaturated fat and risk of CHD, independent of saturated fat, and therefore continued to permit the voluntary declaration of polyunsaturated fat (81 FR 33788–89). FSIS has reviewed FDA's analysis and agrees with its conclusion and therefore,

⁷ Institute of Medicine (IOM) of the National Academies, "Dietary Reference Intakes: Guiding Principles for Nutrition Labeling and Fortification", Washington, DC: National Academies Press; 2003.

⁸ <http://www.fsis.usda.gov/wps/portal/fsis/topics/regulatory-compliance/labeling/labeling-policies/trans-fat-declarations>.

is not proposing to make any changes to the voluntary declaration of polyunsaturated fat. Polyunsaturated fat has public health significance because replacing saturated fatty acids with polyunsaturated and monounsaturated fatty acids reduces blood LDL cholesterol levels and in turn the risk of cardiovascular disease (CVD).⁹ Polyunsaturated fat is a macronutrient, not an essential vitamin or mineral, does not have a quantitative intake recommendation, but does have public health significance. Therefore, FSIS believes it is appropriate to continue to permit the voluntary declaration of polyunsaturated fat consistent with FDA's final rule.

b. DRV

FSIS's regulations do not provide a DRV for polyunsaturated fat. FDA did not propose a DRV for polyunsaturated fat, tentatively concluding "that there is no appropriate quantitative intake recommendation to form a basis for setting a DRV for polyunsaturated fat" (79 FR 11898). FDA did not change its position in the final rule (81 FR 33789). Consistent with FDA's final rule, FSIS is not proposing to provide a DRV for polyunsaturated fat.

c. Declaration of Individual Polyunsaturated Fatty Acids

FSIS's regulations do not permit the declaration of individual polyunsaturated fatty acids on the Nutrition Facts label. Consistent with FDA's final rule, FSIS is not proposing to provide for the individual declaration of either *n*-3 or *n*-6 polyunsaturated fatty acids or the declaration of eicosapentaenoic acid (EPA) or docosahexaenoic acid (DHA) on the Nutrition Facts label (81 FR 33789).

5. Monounsaturated Fat

a. Voluntary Declaration

FSIS's regulations currently allow the voluntary declaration of monounsaturated fat (defined as *cis*-monounsaturated fatty acids (*e.g.*, oleic acid)) on the Nutrition Facts label (9 CFR 317.309(c)(2)(iii) and 381.409(c)(2)(iii), which would be consolidated in proposed 9 CFR 413.309(c)(2)(iv)). Consistent with FDA's final rule, FSIS is not proposing to change the voluntary declaration of monounsaturated fat (81 FR 33788).

b. DRV

FSIS's regulations do not provide a DRV for monounsaturated fat. FDA did not provide a DRV for monounsaturated fat for the same reasons it did not set a DRV for polyunsaturated fat (81 FR 33789). Consistent with FDA's final rule, FSIS is not proposing to set a DRV for monounsaturated fat.

D. Cholesterol

1. Mandatory Declaration

FSIS's regulations require the amount of cholesterol be declared on the Nutrition Facts label (9 CFR 317.309(c)(3) and 381.409(c)(3), which would be consolidated in proposed 9 CFR 413.309(c)(3)). Consistent with FDA's final rule, FSIS is not proposing changes to the requirement for mandatory declaration of cholesterol.

2. DRV

FSIS sets 300 mg as the DRV for cholesterol based on the reference calorie intake of 2,000 calories (9 CFR 317.309(c)(9) and 381.409(c)(9), which would be consolidated in proposed 9 CFR 413.309(c)(9)). FSIS is not proposing to change the DRV for cholesterol.

E. Carbohydrate

1. Total Carbohydrate

a. Calculation of Total Carbohydrate

FSIS requires the number of grams of total carbohydrate per serving be listed on the Nutrition Facts label (9 CFR 317.309(c)(6) and 381.409(c)(6), which would be consolidated in proposed 9 CFR 413.309(c)(6)). Total carbohydrate content must be calculated by subtracting the sum of the crude protein, total fat, moisture, and ash from the total weight of the product (9 CFR 317.309(c)(6) and 381.409(c)(6), which would be consolidated in proposed 9 CFR 413.309(c)(6)).

FDA considered a citizen petition requesting that dietary fiber be excluded from the calculation of total carbohydrate, comments received on its 2007 ANPRM, and scientific evidence and declined to change the current method for calculating total carbohydrate (79 FR 11899–11900; 81 FR 33794–33795). Just as FDA is not making any change, FSIS has reviewed FDA's analysis and has decided not to propose to change the current method for calculating total carbohydrate.

b. Classification of Carbohydrates Based on a Chemical Definition or Physiological Effect

FSIS is not proposing to change its requirements for the classification or

declaration of carbohydrates (9 CFR 317.309(c)(6) and 381.409(c)(6), which would be consolidated in proposed 9 CFR 413.309(c)(6)). FSIS agrees with FDA that a chemical definition for total carbohydrate is still consistent with the classification and declaration of fat on the Nutrition Facts label (79 FR 11901; 81 FR 33795). It would be difficult to apply a definition for total carbohydrates based on physiological effects because the different components of carbohydrates have different physiological effects.

c. Separate Declaration of Additional Individual Types of Carbohydrates

FSIS is not proposing to require the separate declaration of additional types of individual carbohydrates (*e.g.*, starch) because, as FDA also concluded, the comments to the 2007 ANPRM did not support the declaration of additional types of carbohydrates, such as starch (81 FR 33795).

d. Mandatory Declaration

FSIS requires the number of grams of total carbohydrate per serving be listed on the Nutrition Facts label (9 CFR 317.309(c)(6) and 381.409(c)(6), which would be consolidated in proposed 9 CFR 413.309(c)(6)), and has tentatively concluded, that the mandatory declaration of total carbohydrates continues to be necessary to assist consumers in making informed choices. Therefore, consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing to change the requirement for mandatory declaration of total carbohydrate.

e. DRV

FSIS sets 300 grams as the DRV for total carbohydrate based on 60 percent of a 2,000 calorie diet ((0.60 × 2,000 calories)/4 calories per gram of carbohydrate = 300 grams) (9 CFR 317.309(c)(9) and 381.409(c)(9), which would be consolidated in proposed 9 CFR 413.309(c)(9)). The percentage of calories from total carbohydrate, total fat, and protein must add up to 100 percent on the Nutrition Facts label. Because, as discussed in part (II)(C)(1), FSIS is proposing to increase the DRV for total fat from 30 to 35 percent of calories consistent with FDA's final rule, either the DRV for total carbohydrate or protein must be decreased. As discussed in FDA's Nutrition Labeling Final Rule, decreasing the DRV for protein from 10 percent of calories to 5 percent of calories to account for the increase in the DRV for total fat would result in a DRV of 5 grams of protein, which falls below the RDA for protein for children

⁹ U.S. Department of Agriculture and U.S. Department of Health and Human Services. (2010) "Report of the Dietary Guidelines Advisory Committee on the *Dietary Guidelines for Americans, 2010*", 4. Washington, DC: U.S. Government Printing Office. Retrieved from <http://www.cnpp.usda.gov/dietary-guidelines-2010>.

and adults 9 years and older (81 FR 33784). Therefore, consistent with FDA's final rule, FSIS is proposing to decrease the DRV for total carbohydrate from 60 percent of calories to 55 percent of calories for a DRV of 275 grams to account for the increase in the DRV for total fat.

f. Calculation of Calories From Carbohydrate

FSIS requires that calories from total carbohydrate be calculated using the general factor of 4 calories per gram total carbohydrate less the amount of insoluble dietary fiber (9 CFR 317.309(c)(1)(i)(C) and 381.409(c)(1)(i)(C)). Consistent with FDA's final rule, FSIS is proposing a new definition for dietary fiber (see section II.E.5) that only allows for the declaration of dietary fibers that FDA has determined to have a physiological effect that is beneficial to human health. The new definition of dietary fiber includes: (1) Non-digestible soluble and insoluble carbohydrates (with 3 or more monomeric units) and lignin that are intrinsic and intact in plants; and (2) isolated or synthetic non-digestible carbohydrates (with 3 or more monomeric units) determined by FDA to have physiological effects that are beneficial to human health. For the purpose of calculating calories from carbohydrate, all soluble and insoluble non-digestible carbohydrates should be excluded from the calculation, not just those known to meet the definition of dietary fiber. Therefore, FSIS is proposing that all soluble and insoluble non-digestible carbohydrates be excluded from the calculation for calories from total carbohydrate (proposed 9 CFR 413.309(c)(1)(i)(C)).

2. Sugars

a. Mandatory Declaration

FSIS requires a statement of the number of grams of sugars per serving on the Nutrition Facts label, except for products that contain less than 1 gram of sugars per serving if no claims are made about sweeteners, sugars, or sugar alcohol content (9 CFR 317.309(c)(6)(ii) and 381.409(c)(6)(ii)); would be consolidated in proposed 9 CFR 413.309(c)(6)(ii). FSIS defines sugars as the sum of all free mono- and disaccharides (such as glucose, fructose, lactose, and sucrose) (9 CFR 317.309(c)(6)(ii) and 381.409(c)(6)(ii)). Consistent with FDA's final rule, FSIS has tentatively concluded that the mandatory declaration of sugars continues to be necessary to assist consumers in making informed choices and maintaining healthy dietary

practices. But, FSIS is proposing to replace the declaration of "Sugars" with the term "Total Sugars," which is also consistent with FDA's final rule. The rationale for this proposed change is discussed in part K(5).

b. DRV

FSIS's regulations do not provide a DRV for sugars. FDA did not propose a DRV for sugars because there are no upper limits or set dietary reference values on which a DRV for sugars could be based (79 FR 11902). Consistent with FDA's final rule, FSIS is not proposing to set a DRV for sugars.

3. Added Sugars

a. Declaration

FSIS's regulations do not define "added sugars" nor permit its declaration on the Nutrition Facts label. FDA is requiring the declaration of added sugars on the Nutrition Facts label and considered, in its review, new data and information from U.S. consensus reports and scientific evidence supporting recommendations related to the consumption of added sugars, a citizen petition, and public comments (79 FR 11902–11906; 81 FR 33799–33851) and FDA's consumer study on added sugars¹⁰ (80 FR 44306). FSIS has reviewed FDA's analysis and is also proposing to require the declaration of added sugars on the Nutrition Facts label to provide consumers with the information they need to make more informed choices and meet the dietary recommendation to reduce caloric intake from added sugars. FSIS is proposing changes consistent with FDA's final rule. FSIS is proposing to require the mandatory declaration of added sugars as an indented line item underneath the declaration of "Total Sugars" on the Nutrition Facts label. FSIS is also proposing that the phrase "Not a significant source of added sugars" be placed at the bottom of the table of nutrient values if a statement of the added sugars content is not required and, as a result, is not provided. FSIS is also proposing that a statement of added sugars content would not be required for products that contain less than 1 gram of added sugars in a serving if no claims are made about sweeteners, sugars, or sugar alcohol content (proposed 9 CFR 413.309(c)(6)(iii)). FSIS is also proposing to permit alternative statements for added sugars similar to the current alternative statements for

total carbohydrate, dietary fiber, soluble fiber, insoluble fiber, sugars, and sugar alcohol, when a serving contains less than 1 gram of the nutrient. Proposed 9 CFR 413.309(c)(6)(iii) would provide for the alternative statements "Contains less than 1 gram" or "less than 1 gram," or, if the serving contains less than 0.5 g of added sugars, the content can be expressed as zero.

b. Proposed Definition

FSIS regulations do not currently define the term "added sugars." Because FSIS is proposing to require the mandatory declaration of added sugars on the Nutrition Facts label, FSIS is also proposing to define the term "added sugars." Proposed 9 CFR 413.309(c)(6)(iii) defines "added sugars" as sugars that are either added during the processing of foods or are packaged as such and include sugars (free, mono- and disaccharides), sugars from syrups, honey, and fruit juice concentrates (see proposed 9 CFR 413.309(c)(6)(iii) for specific requirements for fruit juice concentrates) (see proposed 9 CFR 413.309(c)(6)(iii) for the complete "added sugars" definition). Examples of "added sugars" added to meat and poultry products include: Table sugar, brown sugar, corn sweetener, corn syrup, dextrose, fructose, apple juice concentrate glucose, Glucono-Delta-Lactone (GDL), high-fructose corn syrup, invert sugar, lactose, maltose, malt sugar, maple syrup, molasses, raw sugar, turbinado, sugar, trehalose, and sucrose. Sugar alcohols would not be considered added sugars.

c. Daily Value

FDA established a DRV for added sugars of 10 percent of total energy intake based on new information in the "Scientific Report of the 2015 Dietary Guidelines Advisory Committee" (the "2015 DGAC report"¹¹) regarding added sugars (80 FR 44308; 81 FR 33842). Consistent with FDA's final rule, FSIS is proposing a DRV for added sugars of 50 g for children and adults 4 years of age and older, including pregnant women and lactating women, and that the percent DV for added sugars be declared on the Nutrition Facts label. As discussed in FDA's supplemental proposed rule, the 2015 DGAC report recommended reducing the intake of added sugars, including an added sugars declaration and a percent DV for added sugars declaration in the Nutrition Facts label, and recommended that Americans keep added sugars intake below 10 percent of total energy intake (80 FR

¹⁰ U.S. Food and Drug Administration. Memorandum to the File—"Experimental study on consumer responses to Nutrition Facts labels with declaration of amount of added sugars (OMB No. 0910-0764)," 2015.

¹¹ <http://www.health.gov/dietaryguidelines/2015-scientific-report/>.

44308). FSIS's proposed DRV of 50 g for added sugars was determined by taking 10 percent of the 2,000 reference calorie intake for adults and children 4 years of age and older ($10 \times 2,000 = 200$ calories) and then dividing by 4 calories/gram, which provides a 50 g reference amount for added sugars as the DRV.

d. Compliance

FSIS is not aware of an analytical method that is capable of distinguishing between added and intrinsically occurring sugars in a food product, nor did FDA identify such a method (9 FR 11906). Therefore, to verify compliance with the proposed mandatory declaration of added sugars, FSIS is proposing in 9 CFR 413.309(h)(8)(iv) that establishments make and keep certain records to verify the amount of added sugars in the product (see compliance section II.N. below for more details about this requirement). For example, FSIS is proposing that a manufacturer must make and keep written records of the amount of sugars added to the product during the processing of the product and, if packaged as a separate ingredient, as packaged (whether as part of a package containing one or more ingredients or packaged as a single ingredient).

FSIS is aware that sugars in some foods may undergo chemical changes as a result of non-enzymatic browning (*i.e.*, Maillard reactions and caramelization) or fermentation during food processing. Some sugars are metabolized or otherwise transformed and converted into compounds that are no longer recognizable or detectable as sugars through conventional analytical methods.¹² As FDA concluded, FSIS expects that the amount of added sugars transformed during non-enzymatic browning reactions in most products is insignificant relative to the initial levels of sugars (81 FR 33830–33831). Unlike browning reactions, fermentation is a process that typically involves the action of desirable microorganisms (*e.g.*, yeasts and lactic acid bacteria) and enzymes that convert organic compounds, especially sugars and other carbohydrates, into simpler compounds such as carbon dioxide, lactic acid, and ethyl alcohol.^{13 14} Fermented sausages

are one example of a fermented meat product and include certain types of pepperoni, salami, Lebanon bologna, mettwurst, and certain types of chorizo. Fermentation can affect the flavor, color, and microbiological safety of meat products. Both natural and controlled meat fermentation involve lactic acid bacteria. This type of bacteria converts naturally occurring glycogen and added sugars into lactic acid. This conversion reduces the amount of sugar in a meat product.¹⁵ However, FSIS expects that the majority of manufacturers would be able to use the amount of sugars added as an ingredient as a reasonable approximation of the amount of added sugars in a serving of their product. When the amount of added sugars is reduced through non-enzymatic browning or fermentation, FSIS is proposing in 9 CFR 413.309(h)(8)(v) to require: (1) Records of scientific data and information that demonstrate the amount of added sugars in the food after non-enzymatic browning or fermentation and a narrative explaining why the data and information are sufficient to demonstrate the amount of added sugars declared in the finished food, provided the data and information used is specific to the type of food manufactured; or (2) records of the amount of sugars added to the food before and during the processing of the food, and if packaged as a separate ingredient, as packaged (whether as part of a package containing one or more ingredients or packaged as a single ingredient) and in no event shall the amount of added sugars declared exceed the amount of total sugars on the label.

In some food products, non-enzymatic browning or fermentation could result in a significant reduction in the amount of added sugars, leaving manufacturers with no way to reasonably approximate the amount of added sugars in a serving of the finished food. Similar to FDA, FSIS is proposing that manufacturers may submit a request to FSIS's LPDS to use an alternative means of compliance. The request must provide scientific data or other information for why the amount of added sugars in a serving of the product is likely to have a significant reduction in added sugars compared to the amount added prior to non-enzymatic browning or fermentation.

4. Sugar Alcohols

For nutrition labeling purposes, consistent with FDA, FSIS defines sugar alcohols "as the sum of saccharide derivatives in which a hydroxyl group

replaces a ketone or aldehyde group and whose use in the food is listed by FDA (*e.g.*, mannitol or xylitol) or is generally recognized as safe (*e.g.*, sorbitol)" (9 CFR 317.309(c)(6)(iii) and 381.409(c)(6)(iii), which would be consolidated in proposed 9 CFR 413.309(c)(6)(iv)). Consistent with FDA, FSIS permits the voluntary declaration of sugar alcohols on the Nutrition Facts label (9 CFR 317.309(c)(6)(iii) and 381.409(c)(6)(iii)). FSIS is not proposing to change the voluntary declaration of sugar alcohols on the Nutrition Facts label, just as FDA did not.

a. DRV

Consistent with FDA, FSIS does not provide a DRV for sugar alcohols and is not proposing a DRV for sugar alcohols because there is no quantitative reference intake recommendation for sugar alcohols from current consensus reports on which to base a DRV.

b. Caloric Value

Caloric content for total carbohydrate less the amount of insoluble dietary fiber is calculated using a factor of 4 calories per gram (9 CFR 317.309(c)(1)(i)(C) and 381.409(c)(1)(i)(C)). FSIS has reviewed the Life Sciences Research Office reports^{16 17} that recommended the following caloric values for sugar alcohols: isomalt (2.0 kcal/g); lactitol (2.0 kcal/g), xylitol (2.4 kcal/g); maltitol (2.1 kcal/g); sorbitol (2.6 kcal/g); hydrogenated starch hydrolysates (3.0 kcal/g); and mannitol (1.6 kcal/g). FSIS has tentatively concluded that the values recommended by the Life Sciences Research Office are closer to the energy contribution of sugar alcohols than the current factors. FSIS also reviewed FDA's analysis for determining a caloric value for erythritol and agrees with the analysis (81 FR 33852). Therefore, consistent with FDA's final rule (81 FR 33852), FSIS is proposing to amend its regulations to establish the following general factors for caloric values for sugar alcohols: isomalt (2.0 kcal/g); lactitol (2.0 kcal/g), xylitol (2.4 kcal/g); maltitol (2.1 kcal/g); sorbitol (2.6 kcal/g); hydrogenated starch hydrolysates (3.0 kcal/g); mannitol (1.6 kcal/g); and erythritol (0 kcal/g). Proposed 9 CFR 413.309(c)(1)(i)(F) will establish these values, and proposed 9 CFR 413.309(c)(1)(i)(C) will clarify that the

factor of 4 kcal/g does not apply to sugar alcohols.

5. Fiber

a. Dietary Fiber

i. Definition

FSIS's regulations do not define "dietary fiber." After considering IOM recommendations, comments received on FDA's 2007 ANPRM, and international guidelines (*e.g.*, The Codex Alimentarius Commission's definition of dietary fiber), FDA adopted a definition of dietary fiber that is equivalent to the IOM's definition of "total fiber" and emphasizes the beneficial physiological effects in humans (81 FR 33853). FSIS has reviewed FDA's analysis and is proposing to include a definition for dietary fiber in 9 CFR 413.309(c)(6)(i) that is consistent with FDA's definition. FSIS is proposing the following definition for dietary fiber: (1) Non-digestible soluble and insoluble carbohydrates (with 3 or more monomeric units) and lignin that are intrinsic and intact in plants; and (2) isolated or synthetic non-digestible carbohydrates (with 3 or more monomeric units) determined by FDA to have physiological effects that are beneficial to human health.

FSIS is proposing to include isolated or synthetic non-digestible carbohydrates that have been determined by FDA to have a physiological effect that is beneficial to human health in the proposed definition of dietary fiber in 9 CFR 413.309(c)(6)(i). For example, β -glucan soluble fiber and psyllium husk that are added to foods meet the proposed definition of dietary fiber and would be listed in 9 CFR 413.309(c)(6)(i). FSIS would consider amending 9 CFR 413.309(c)(6)(i) to list any additional isolated or synthetic non-digestible carbohydrates that FDA determines have a physiological effect that is beneficial to human health.

ii. Mandatory Declaration

FSIS requires that a statement of the number of grams of total dietary fiber per serving be declared on the Nutrition Facts label, except when a serving contains less than 1 gram of total dietary fiber (9 CFR 317.309(c)(6)(i) and 381.409(c)(6)(i), which would be consolidated in proposed 9 CFR 413.309(c)(6)(i)). FSIS is not proposing to change the requirement for mandatory declaration of dietary fiber, just as FDA did not.

iii. Analytical Methods

The amount of dietary fiber may be calculated by subtracting the amount of non-digestible carbohydrates added during processing that do not meet the proposed definition of dietary fiber from the value obtained using AOAC 2009.01, AOAC 2011.25, or an equivalent AOAC method of analysis as given in the "Official Methods of Analysis of the AOAC International" 19th Edition. Because an AOAC method would not accurately quantify the dietary fiber that meets the proposed definition if the product contains both non-digestible carbohydrates that meet the definition and those that do not, consistent with FDA's final rule, FSIS is proposing to require that manufacturers maintain written records to verify the amount of added non-digestible carbohydrates that do not meet the proposed definition of dietary fiber. (See Compliance section II.N. below.)

iv. DRV

Currently, 25 g is the DRV for total dietary fiber based on the reference calorie intake of 2,000 calories (9 CFR 317.309(c)(9) and 381.409(c)(9)). FSIS is proposing to amend its regulations to establish 28 g as the DRV for total dietary fiber (proposed 9 CFR 413.309(c)(9)). FSIS is proposing to use 28 g as the DRV for total dietary fiber because: (1) the IOM set an adequate intake level (AI) of 14 g/1,000 kcal for total fiber primarily based on the intake level that was associated with the greatest reduction in the risk of CHD;¹⁸ and (2) FDA now uses 14 g/1,000 kcal as the basis for a DRV for dietary fiber and setting a DRV of 28 g for dietary fiber using a reference calorie intake of 2,000 calories (81 FR 33865–33866).

b. Soluble and Insoluble Fiber

Soluble fibers (*e.g.*, pectin) dissolve in water and are digested by the bacteria in the large intestine. Insoluble fibers (*e.g.*, cellulose) do not dissolve in water and are not digested by the bacteria in the large intestine. FSIS regulations do not define the terms soluble and insoluble fiber, but provide for the voluntary declaration of soluble and insoluble fiber (9 CFR 317.309(c)(6)(i) and 381.409(c)(6)(i)), which would be consolidated in proposed 9 CFR 413.309(c)(6)(i)). Consistent with FDA, FSIS is proposing that when soluble fiber or insoluble fiber is declared, the soluble fiber and insoluble fiber must

meet the definition of "dietary fiber" in proposed 9 CFR 413.309(c)(6)(i) because they are components of dietary fiber.

i. Analytical Methods

AOAC 2011.25 or an equivalent AOAC method may be used to calculate soluble and insoluble fiber that meet the proposed definition of dietary fiber and can be declared on the Nutrition Facts label. AOAC 2011.25 can measure low molecular weight non-digestible carbohydrates, as well as separately measure soluble and insoluble non-digestible carbohydrates.¹⁹ Consistent with FDA, if a product contains a mixture of non-digestible carbohydrates that do not meet the proposed dietary fiber definition, and the label of the product declares soluble or insoluble fiber content, FSIS is proposing to require establishments to make and keep records to verify the amount of non-digestible carbohydrate(s) that does not meet the proposed definition of dietary fiber present in the food. (See discussion in compliance section II.N. below.)

ii. DRV

FDA did not find a basis on which to derive DRVs for soluble or insoluble fiber. Consistent with FDA's final rule, FSIS is not proposing DRVs for soluble fiber or insoluble fiber.

iii. Caloric value

FSIS regulations provide that the caloric content of a product may be calculated by, among other methods, using general factors of 4, 4, and 9 calories per gram for protein, total carbohydrate less the amount of insoluble dietary fiber, and total fat, respectively (9 CFR 317.309(c)(1)(i)(C) and 381.409(c)(1)(i)(C)). Soluble fiber, which is included in total carbohydrate, is assigned a general factor of 4 kcal/g. FDA established a general factor of 2 kcal/g as the caloric value of soluble non-digestible carbohydrates (81 FR 33867). Insoluble non-digestible carbohydrates are not included in the caloric calculation (81 FR 33867). FDA required that calories from carbohydrate be calculated using a general factor of 4 kcal/g of total carbohydrate less the amount of non-digestible carbohydrates, which includes soluble (2 kcal/g) and insoluble non-digestible carbohydrates (0 kcal/g) that do and do not meet the definition of dietary fiber (81 FR 33867). The calorie contribution of soluble non-digestible carbohydrate would be added

¹⁸ Institute of Medicine (IOM) of the National Academies. "Dietary Reference Intakes for Energy, Carbohydrate, Fiber, Fat, Fatty Acids, Cholesterol, Protein, and Amino Acids (Macronutrients), Chapter 7: Dietary, Functional, and Total Fiber", Washington, DC: National Academies Press; 2002.

¹⁹ McCleary, B.V., DeVries, J.W., Rader, J.L., et al. "Determination of Total Dietary Fiber (CODEX definition) by Enzymatic-Gravimetric Method and Liquid Chromatography: Collaborative Study". *Journal of AOAC International*. 2010;93:221–233.

to that sum to determine the total carbohydrate calorie contribution (Id.). Therefore, in order to harmonize with FDA's regulations, FSIS is proposing the same changes to the caloric value for soluble non-digestible carbohydrates and the calculation of calories from carbohydrate.

6. Other Carbohydrate

FSIS's regulations define "Other carbohydrate" as the difference between total carbohydrate and the sum of dietary fiber, sugars, and sugar alcohol, except that if sugar alcohol is not declared (even if present), "Other carbohydrate" is defined as the difference between total carbohydrate and the sum of dietary fiber and sugars (9 CFR 317.309(c)(6)(iv) and 381.409(c)(6)(iv)). A statement of the number of grams of "Other carbohydrate" per serving may be voluntarily declared on the Nutrition Facts label (9 CFR 317.309(c)(6)(iv) and 381.409(c)(6)(iv)).

FDA concluded that "Other carbohydrate" should no longer be permitted on the Nutrition Facts label because of its lack of public health significance and a quantitative intake recommendation for "Other carbohydrate" is not available from relevant consensus reports (81 FR 33867–33868). FDA removed the provision that allows for its voluntary declaration in the regulations (81 FR 33867–33868). FSIS has reviewed FDA's analysis and is proposing to no longer permit the voluntary declaration of "Other carbohydrate" on the Nutrition Facts label for the reasons above.

F. Protein

FSIS's regulations require that a statement of the number of grams of protein per serving be declared on the Nutrition Facts label (9 CFR 317.309(c)(7) and 381.409(c)(7)), which would be consolidated in proposed 9 CFR 413.309(c)(7)). The DRV for protein is 50 g and represents 10 percent of the 2,000 reference calories intake level. Consistent with FDA, FSIS is not proposing to change the mandatory declaration of protein or the DRV for protein.

1. Analytical Methods

Under FSIS's regulations (9 CFR 317.309(c)(7) and 381.409(c)(7)), protein may be calculated on the basis of the factor of 6.25 times the nitrogen content of the food as determined by appropriate methods of analysis in accordance with 9 CFR 317.309(h) or 9 CFR 381.409(h), except when the procedure for a specific food requires another factor. According to 9 CFR

317.309(h)(2) and 381.409(h)(2), FSIS determines compliance by appropriate methods and procedures used by the Department for each nutrient in accordance with the *Chemistry Laboratory Guidebook*, or, if no USDA method is available and appropriate for the nutrient, by appropriate methods for the nutrient in accordance with the 1990 edition of the *Official Methods of Analysis of the AOAC International*, formerly Association of Official Analytical Chemists, 15th ed., to determine compliance with the nutrition labeling regulations. FSIS is proposing to update the version of the *Official Methods of Analysis of the AOAC International* referenced in the regulations because more analytical methods for nutrients have been published in later versions. The 20th edition is the most recent edition of the published AOAC methods, so FSIS is proposing in 9 CFR 413.309(h) that the 20th edition be used if no USDA method is available. If a newer version of the *Official Methods of Analysis of the AOAC International* is published before a final rule is published for this rulemaking, FSIS will consider using the most recent version of the official AOAC methods in the final rule.

G. Sodium

FSIS's regulations require the declaration of the number of milligrams of sodium per serving on the Nutrition Facts label (9 CFR 317.309(c)(4) and 381.409(c)(4)), which would be consolidated in proposed 9 CFR 413.309(c)(4)). Consistent with FDA, FSIS is not proposing to change the requirement that sodium be declared.

FSIS's regulations set a DRV of 2,400 mg of sodium based on a reference caloric intake of 2,000 calories (9 CFR 317.309(c)(9) and 381.409(c)(9)). FDA considered the following options for updating the DRV for sodium: "(1) A DRV of 2,300 mg which reflects the Upper Intake Level (UL)²⁰ for individuals aged 14 years and older; (2) An RDI of 1,500 mg which reflects the AI for individuals 9 to 50 years of age; and (3) Alternative approaches such as retaining a DRV of 2,400 mg, using a tiered approach or setting a DRV of 1,900 mg based on the UL for children 4 to 9 years of age" (79 FR 11915). In FDA's Nutrition Labeling Proposed Rule, FDA tentatively concluded that

²⁰ "The UL is the highest average daily intake level likely to pose no risk of adverse health effects for nearly all people in a particular group. The UL is not intended to be a recommended level of intake. The UL is used to assess the risk of adverse health effects from excessive nutrient intake. As intake above the UL increases, so does the potential for risk of adverse health effects" (79 FR 11885).

2,300 mg is the most appropriate DV for sodium to "assist consumers in maintaining healthy dietary practices and in understanding the relative significance of the sodium content within the context of a total daily diet" (79 FR 11917). FDA did not change its view in the final rule that 2,300 mg/day is an appropriate DRV for sodium (81 FR 33874–33880). FSIS has reviewed FDA's analysis, and consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to set a DRV of 2,300 mg for sodium (proposed 9 CFR 413.309(c)(9)).

H. Fluoride

FSIS's regulations do not permit the declaration of fluoride on the Nutrition Facts label. FDA amended its regulations to provide for the voluntary declaration of fluoride because fluoride's positive health effects are well established (e.g., reduces the risk of dental caries), but an appropriate quantitative intake recommendation is not available for setting a DRV (81 FR 33880–33884) (proposed 9 CFR 413.309(c)(5)). FSIS has reviewed FDA's analysis and consistent with FDA, FSIS is proposing to (i) permit the voluntary declaration of fluoride on the Nutrition Facts label; (ii) require the mandatory declaration of fluoride when a claim about fluoride is made on the label or in labeling of the product; and (iii) require that when fluoride content is declared, it must be expressed as zero when a serving contains less than 0.1 mg of fluoride, to the nearest 0.1 mg increment when a serving contains less than or equal to 0.8 mg of fluoride, and the nearest 0.2 mg when a serving contains more than 0.8 mg of fluoride, consistent with how FSIS and FDA have approached incremental values for other nutrients that are present in products in small amounts. FSIS is not proposing a DRV for fluoride because an appropriate quantitative intake recommendation is not available for setting a DRV.

I. Essential Vitamins and Minerals

1. Updates to Declaration of Vitamins and Minerals and Reference Daily Intakes

FSIS currently requires the declaration of vitamin A, vitamin C, calcium, and iron on the Nutrition Facts label (9 CFR 317.309(c)(8)(ii) and 381.409(c)(8)(ii)). Vitamin D, vitamin E, vitamin B₆, vitamin B₁₂, thiamin, riboflavin, niacin, folate, biotin, pantothenic acid, phosphorus, iodine, magnesium, zinc, copper, and potassium may all be declared voluntarily on the Nutrition Facts label (9 CFR 317.309(c)(8)(iv)),

381.409(c)(8)(iv), 317.309(c)(9), and 381.409(c)(9)). FSIS has also permitted the voluntary declaration of nutrients for which FSIS has not codified RDIs, but that are codified in Title 21 of FDA's regulations.²¹ These nutrients are vitamin K, selenium, manganese, chromium, molybdenum, and chloride.

FDA amended its regulations to: (i) Require the declaration of vitamin D, calcium, iron, and potassium on the Nutrition Facts label; (ii) allow the voluntary declaration of vitamin A and C; (iii) retain the voluntary declaration of vitamin E, vitamin K, vitamin B₆, vitamin B₁₂, thiamin, riboflavin, niacin, folate, biotin, pantothenic acid, phosphorus, iodine, magnesium, zinc, selenium, copper, manganese, chromium, molybdenum, and chloride; and (iv) allow the voluntary declaration of choline (81 FR 33884–33897). FDA made these changes based on its

analysis of data and consideration of such factors as public health significance, quantitative intake recommendations, and the role of a nutrient in chronic disease risk (81 FR 33884–33897). Consistent with FDA and proposed 9 CFR 413.309(c)(8)(ii), the vitamins and minerals would be updated in proposed 9 CFR 413.363(b)(4) to replace “vitamin A, vitamin C, calcium, and iron” with “vitamin D, calcium, iron, and potassium.”

FDA also revised the existing RDIs for vitamins and minerals after considering the Dietary Reference Intakes (DRIs)²² set by the IOM that reflect current nutrient requirements (81 FR 33897–33901). Percent DVs for vitamins and minerals that are required or permitted on the Nutrition Facts label are based on RDIs (9 CFR 317.309(c)(8)(iv) and 381.409(c)(8)(iv)).

FSIS is proposing to adopt FDA's list of nutrients as mandatory or voluntary components of nutrition labeling, the definition of those nutrients, and the increments for declaring nutrients, in the interest of harmonizing with FDA (proposed 9 CFR 413.309(c)(8)(iv)). Consistent with FDA's final rule, FSIS is also proposing to update the RDIs for calcium, copper, folate, iodine, iron, magnesium, niacin, phosphorus, riboflavin, thiamin, zinc, and vitamins A, B₆, B₁₂, C, D, and E and to establish RDIs for vitamin K, selenium, manganese, chromium, molybdenum, chloride, and choline (proposed 9 CFR 413.309(c)(8)(iv)) (see Table 2). A more extensive discussion of FDA's list of nutrients and RDIs can be found in the preamble of FDA's Nutrition Labeling Proposed and Final Rules (79 FR 11918–11931; 81 FR 33897–33901).

TABLE 2—CURRENT AND PROPOSED RDIs FOR NUTRITION LABELING

[Based on a 2,000 calorie intake for adults and children 4 or more years of age]

Nutrient	Current RDIs	Proposed RDIs
Vitamins:		
Biotin3 milligram	30 micrograms.
Choline	N/A	550 milligrams.
Folate ⁶4 milligram	400 micrograms DFE. ¹
Niacin	20 milligrams	16 milligrams NE. ²
Pantothenic acid	10 milligrams	5 milligrams.
Riboflavin	1.7 milligrams	1.3 milligrams.
Thiamin	1.5 milligrams	1.2 milligrams.
Vitamin A	5,000 International Units	900 micrograms RAE. ³
Vitamin B ₆	2.0 milligrams	1.7 milligrams.
Vitamin B ₁₂	6 micrograms	2.4 micrograms.
Vitamin C	60 milligrams	90 milligrams.
Vitamin D	400 International Units	20 micrograms. ⁴
Vitamin E	30 International Units	15 milligrams. ⁵
Vitamin K	N/A	120 micrograms.
Minerals:		
Calcium	1.0 gram	1,300 milligrams.
Chloride	N/A	2,300 milligrams.
Chromium	N/A	35 micrograms.
Copper	2.0 milligrams	0.9 milligrams.
Iodine	150 micrograms	150 micrograms.
Iron	18 milligrams	18 milligrams.
Magnesium	400 milligrams	420 milligrams.
Manganese	N/A	2.3 milligrams.
Molybdenum	N/A	45 micrograms.
Phosphorus	1.0 gram	1,250 milligrams.
Potassium ⁷	3,500 milligrams	4,700 milligrams.
Selenium	N/A	55 micrograms.
Zinc	15 milligrams	11 milligrams.

¹ DFE = Dietary Folate Equivalents; 1 DFE = 1 mcg naturally-occurring folate = 0.6 mcg of folic acid.

² NE = Niacin equivalents, 1 mg NE = 1 mg niacin = 60 mg of tryptophan.

³ RAE = Retinol activity equivalents; 1 microgram RAE = 1 microgram retinol, 2 micrograms supplemental β -carotene, 12 micrograms β -carotene, or 24 micrograms α -carotene, or 24 micrograms β -cryptoxanthin.

⁴ The amount of vitamin D may, but is not required to, be expressed in international units (IU), in addition to the mandatory declaration in mcg. Any declaration of the amount of vitamin D in IU must appear in parentheses after the declaration of the amount of vitamin D in mcg.

⁵ 1 mg α -tocopherol (label claim) = 1 mg α -tocopherol = 1 mg RRR- α -tocopherol = 2 mg *all rac*- α -tocopherol.

⁶ “Folate” and “Folic Acid” must be used for purposes of declaration in the labeling of conventional foods and dietary supplements. The declaration for folate must be in mcg DFE (when expressed as a quantitative amount by weight in a conventional food or a dietary supplement), and percent DV based on folate in mcg DFE. Folate may be expressed as a percent DV in conventional foods. When folic acid is added or when a claim is made about the nutrient, folic acid must be declared in parentheses, as mcg of folic acid.

⁷ These minerals currently have a DRV and we are proposing to establish an RDI.

²¹ <http://www.fsis.usda.gov/wps/portal/ffsis/topics/regulatory-compliance/labeling/labeling-policies/trans-fat-declarations/trans-fat-declaration>.

²² A set of reference values that include the Estimated Average Requirement, RDA, Adequate

Intake, and Tolerable Upper Intake Level. See 79 FR 11885–6 for more background on DRIs.

2. Terms for Vitamins and Minerals

FSIS currently allows the term “Folacin” to be added in parenthesis immediately following the term “Folate” on the Nutrition Facts label (9 CFR 317.309(c)(8)(v) and 381.409(c)(8)(v)). FSIS is proposing to remove the synonym “folacin” from 9 CFR 317.309(c)(8)(v) and 381.409(c)(8)(v) and require that the term “folate” be used on meat and poultry products that contain folate, folic acid, or a mixture of folate and folic acid (proposed 9 CFR 413.309(c)(8)(vii)). The declaration must be folate in mcg DFE (when expressed as a quantitative amount by weight) and the percent Daily Value based on folate in mcg DFE, or may be expressed as folate and the percent DV based on folate in mcg DFE. Because of the proposed changes to the units of measure for folate that take into account the differences between folate and folic acid, FSIS is proposing that when folic acid is added or when a claim is made about the nutrient, folic acid must be declared in parentheses as mcg of folic acid after the folate declaration. FSIS’s proposed changes are consistent with FDA’s Nutrition Labeling Final Rule (81 FR 33909–33912).

J. Labeling of Foods for Infants, Young Children, and Pregnant or Lactating Women

The general labeling requirements for foods in 9 CFR 317.309(c) and 381.409(c) apply to foods for infants, young children, and pregnant women and lactating women with certain exceptions. For example, meat and poultry products represented or purported to be specifically for infants and children less than 4 years of age are not permitted to include declarations of percent DV for the following nutrients: Total fat, saturated fat, cholesterol, sodium, potassium, total carbohydrate, and dietary fiber (9 CFR 317.400(c)(2)(i) and 381.500(c)(2)(i)). There are additional exceptions to labeling for meat and poultry products represented or purported to be specifically for infants and children less than 2 years of age. For example, these foods are also not permitted to declare calories from fat, calories from saturated fat, saturated fat, stearic acid, polyunsaturated fat, monounsaturated fat and cholesterol on the Nutrition Facts label (9 CFR 317.400(c)(1) and 381.500(c)(1)).

FSIS regulations do not include DRVs or RDIs for nutrients, generally, for infants, children under 4 years of age, or pregnant women and lactating women. However, there are requirements for a DRV for protein for children 4 or more

years of age, and an RDI for protein for each of the following subpopulations: (1) Children less than 4 years of age; (2) infants; (3) pregnant women; and (4) lactating women (9 CFR 317.309(c)(7)(iii) and 381.409(c)(7)(iii)).

FDA changed its requirements for the labeling of foods, other than infant formula, represented or purported to be specifically for infants, children under 4 years of age, and pregnant women and lactating women after considering current consensus reports, changes to the Nutrition Facts label, and comments to its 2007 ANPRM (81 FR 33916–33932). FSIS has reviewed FDA’s analysis and is proposing to make consistent changes to its requirements for the labeling of meat and poultry products represented or purported to be specifically for infants, children under 4 years of age, and pregnant women and lactating women (proposed 9 CFR 413.309(c)).

1. Age Range for Infants and Young Children

FSIS regulations currently use the age ranges “less than 2 years of age” and “less than 4 years of age” to establish labeling requirements for meat and poultry products represented or purported to be specifically for infants and young children (9 CFR 317.400(c) and 381.500(c)). FDA amended its regulations so that the age categories were changed to infants through 12 months and young children 1 through 3 years (13 through 48 months) which would be consistent with the age ranges used in the IOM’s DRIs for infants and children (81 FR 33916–33917). FDA’s new DVs are also based on these age-specific DRIs (81 FR 33916–33917).

Consistent with FDA’s final rule, FSIS is proposing to replace the current category of infants and children less than 4 years in 9 CFR 317.400(c)(1); 381.500(c)(1); 317.309(c)(7)–(8); 381.409(c)(7)–(8); 317.309(d)(1); 381.409(d)(1); 317.313(b)(3); 381.413(b)(3); 317.313(q)(3); and 381.413(q)(3) with infants through 12 months and children 1 through 3 years of age (proposed 9 CFR 413.400(c)(1); 413.309(c)(7)–(9); 413.309(d)(1); 413.313(b)(3); and 413.313(q)(3)).

2. Mandatory Declaration of Calories and Other Nutrients

Currently, meat and poultry products represented or purported to be specifically for infants and children less than 4 years must declare certain nutrients, including calories, calories from fat, total fat, saturated fat, cholesterol, sodium, total carbohydrate, sugars, dietary fiber, and protein (9 CFR 317.400(c)(2) and 381.500(c)(2)). For

meat and poultry products represented or purported to be for infants and children less than 2 years, the declaration of certain nutrients, which include calories from fat, saturated fat, and cholesterol, is not required or permitted (9 CFR 317.400(c)(1) and 381.500(c)(1)).

a. Declaration of Saturated Fat and Cholesterol

Because FSIS is proposing new categories of infants through 12 months and children 1 through 3 years of age, FSIS is considering whether there is a need to require or permit the declaration of calories from fat, saturated fat, and cholesterol in the labeling for foods represented or purported to be specifically for these subpopulations. As discussed in section II.B.1. above, FSIS is proposing to no longer require and not permit the declaration of calories from fat on the Nutrition Facts label (proposed 9 CFR 413.309(c)(1)(ii)). Therefore, if these proposed changes are finalized, the exception in 9 CFR 317.400(c)(1) and 381.500(c)(1) for calories from fat will no longer be needed, and the reference to calories from fat will be removed. FSIS’s regulations currently do not require or permit the labeling of any fat, with the exception of total fat, or fatty acids on meat and poultry products represented or purported to be specifically for children less than 2 years of age.

FDA considered a recent consensus report suggesting that: Fat intake in infants less than 12 months of age should not be restricted. Fat is still an important source of calories for infants and young children. Evidence suggests a diet with saturated fat of less than 10 percent of calories and cholesterol intake less than 300 mg/d can safely and effectively reduce the levels of total and LDL cholesterol in healthy children, and that the 2010 DGA recommended that Americans 2 years of age and older consume less saturated fatty acids and less than 300 mg/d of cholesterol (79 FR 11934). FDA requires, except for the declaration of calories from fat, the mandatory declaration of statutorily required nutrients under section 403(q) of the FD&C Act that include saturated fat and cholesterol on the label of foods represented or purported to be specifically for infants through 12 months and children 1 through 3 years of age (81 FR 33917–33918). Therefore, consistent with FDA’s final rule, FSIS is proposing to require the declaration of saturated fat and cholesterol on the label of meat and poultry products purported to be for infants through 12 months and children 1 through 3 years of age (proposed 9 CFR 413.400(c)(1)).

Currently, meat and poultry products consumed by pregnant women and lactating women must declare certain nutrients, including calories, calories from fat, total fat, saturated fat, cholesterol, sodium, total carbohydrate, sugars, dietary fiber, and protein. As discussed in FDA's Nutrition Labeling Proposed Rule, women of reproductive age consume the same foods as the general population and, in general, continue consuming similar foods during pregnancy and lactation (79 FR 11934). FDA requires, except for the declaration of calories from fat, the mandatory declaration of statutorily required nutrients under section 403(q) of the FD&C Act (81 FR 33917–33918).

Accordingly, FSIS is proposing to require the mandatory declaration of calories and the amount of total fat, saturated fat, cholesterol, sodium, total carbohydrate, dietary fiber, sugars, and protein on foods represented or purported to be specifically for infants through 12 months of age, children 1 through 3 years of age, and pregnant women and lactating women and to permit the declaration of calories from saturated fat such that these nutrients would be subject to the same requirements applicable to meat and poultry products for the general population (proposed 9 CFR 413.309(c)).

b. Percent DV Declaration

Currently, the percent DV declaration is not permitted on the Nutrition Facts label for meat and poultry products represented or purported to be specifically for infants and children less than 4 years of age (which includes infants and children less than 2 years of age) for total fat, saturated fat, cholesterol, sodium, potassium, total carbohydrate, and dietary fiber (9 CFR 317.400(c)(2)(i) and 381.500(c)(2)(i)). Percent DV is required for protein and vitamins and other minerals and, as discussed in sections II.F and II.I, provides information in a manner that enables consumers to understand the relative significance of nutrition information in the context of a total daily diet. FDA concluded that it is appropriate to require declarations of percent DV for those nutrients for which FDA is establishing a DRV or RDI for infants through 12 months, for children 1 through 3 years of age, and for pregnant women and lactating women (81 FR 33918–33919). Accordingly, FSIS is proposing in 9 CFR 413.400(c)(2)(i) to require declarations of percent DV for those nutrients for which FSIS is establishing a DRV or RDI for infants through 12 months, for children 1 through 3 years of age, and for pregnant women and lactating women consistent

with FDA's Nutrition Labeling Final Rule.

c. Mandatory Declaration of Added Sugars

As discussed in section II.E.3, FSIS is proposing to require the mandatory declaration of added sugars on the Nutrition Facts label. The 2010 DGA provides recommendations for consumption of added sugars for the U.S. population 2 years of age and older but not for infants and children under age 2. It is expected, however, that the role of added sugars are not markedly different between children 1 and 2 years of age (79 FR 11936). Similarly, the IOM has established DRI ranges for 1-through-3-year-olds because growth velocity is most similar during this age range (79 FR 11936; 81 FR 33916). FDA has concluded that mandatory declaration of added sugars is needed for foods for infants through 12 months, just as it is for the general population, to provide consumers with information to construct a healthy dietary pattern that meets the dietary recommendations for added sugars (81 FR 33921).

Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing the mandatory declaration of added sugars on the Nutrition Facts label of meat and poultry products represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, and pregnant women and lactating women.

d. Mandatory Declaration of Trans Fat

As discussed in section II.C.3, FSIS is proposing to require the mandatory declaration of *trans* fat on the Nutrition Facts label. The mandatory declaration of *trans* fat is needed for foods for infants through 12 months, children 1 through 3 years of age, and pregnant women and lactating women, just as it is needed for the general population to assist in maintaining healthy dietary practices. For example, the relationship between the consumption of *trans* fat and risk of CHD is well established^{23 24} and cardiovascular disease is also known to begin in childhood.^{25 26}

²⁴ Institute of Medicine (IOM) of the National Academies. "Dietary Reference Intakes for Energy, Carbohydrate, Fiber, Fat, Fatty Acids, Cholesterol, Protein, and Amino Acids (Macronutrients), Chapter 8: Dietary Fats: Total Fat and Fatty Acids", Washington, DC: National Academies Press; 2002.

²⁵ U.S. Department of Health and Human Services, National Institutes of Health, and National, Heart Lung and Blood Institute. (October, 2012) "Integrated Guidelines for Cardiovascular

Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to require the declaration of trans fat on the Nutrition Facts label of meat and poultry products represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, and pregnant women and lactating women.

3. Voluntary Declaration of Nutrients Other Than Essential Vitamins and Minerals

Currently, meat and poultry products represented or purported to be specifically for infants and children less than 2 years of age are not permitted to declare calories from fat, calories from saturated fat, and the amount of polyunsaturated fat and monounsaturated fat (9 CFR 317.400(c)(1) and 381.500(c)(1)), whereas soluble fiber, insoluble fiber, and sugar alcohols can be voluntarily declared. Polyunsaturated fat, monounsaturated fat, soluble fiber, insoluble fiber, and sugar alcohols can be voluntarily declared on the label of meat and poultry products represented or purported to be specifically for children 2 through 4 years of age and pregnant women and lactating women (9 CFR 317.400(c)(2) and 381.500(c)(2)). FSIS is proposing the following changes to voluntary declaration of certain nutrients.

a. Voluntary Declaration of Calories From Saturated Fat, and the Amount of Polyunsaturated and Monounsaturated Fat

For infants through 12 months, there are no specific recommendations provided about calories from saturated, polyunsaturated, or monounsaturated fat. However, as discussed in FDA's Nutrition Labeling Proposed Rule, there is some evidence to suggest that reduction of total and LDL cholesterol levels can occur with reducing saturated fat intake to less than 10 percent of calories, beginning in infancy and sustained throughout childhood into adolescence (79 FR 11935). Because consensus reports provide no discussion or recommendation about providing nutrient guidelines for fatty acids to children under the age of 2 years, and there is no evidence to suggest that infants through 12 months of age would

Health and Risk Reduction In Children and Adolescents: The Report of the Expert Panel"; NIH Publication No. 12–7486A. Retrieved from http://www.nhlbi.nih.gov/guidelines/cvd_ped/index.htm.

²⁶ American Academy of Pediatrics. "Chapter 32: Hyperlipidemia and Prevention of Cardiovascular Disease". In: *Pediatric Nutrition Handbook* 6th Ed. Kleinman, R.E., ed. American Academy of Pediatrics; 2009; p.723.

be different than children 1 through 3 years of age, FDA explained that there is no basis to continue to prohibit the declaration of calories from saturated fat or polyunsaturated and monounsaturated fats on foods represented or purported to be specifically for infants and children less than 2 years of age (81 FR 33919–33920).

Also, as discussed in FDA's Nutrition Labeling Proposed Rule, quantitative intake recommendations are not available from relevant U.S. consensus reports for monounsaturated and polyunsaturated fats for children 1 through 3 years of age or pregnant women and lactating women. There is well-established evidence to indicate that replacing saturated fatty acids with polyunsaturated and monounsaturated fatty acids reduces blood LDL cholesterol levels and, therefore, the risk of CVD; and that monounsaturated and polyunsaturated fats have public health significance when they replace saturated fat (79 FR 11936). FDA finalized its proposed requirements and permits the declaration of calories from saturated fat, polyunsaturated and monounsaturated fat on foods represented or purported to be specifically for infants through 12 months and children 1 through 3 years of age (81 FR 33919–33920).

Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to revise 9 CFR 317.400(c)(1) and 381.500(c)(1) (which would be consolidated in proposed 9 CFR 413.400(c)(1)) to remove the exceptions for the declaration of calories from saturated fat and the amount of polyunsaturated fat and monounsaturated fat on meat and poultry products represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant or lactating women. If finalized, these declarations for the new age categories, infants through 12 months and children 1 through 3 years of age, would be the same as the proposed voluntary declarations for foods for the general population.

b. Voluntary Declaration of Soluble Fiber, Insoluble Fiber, and Sugar Alcohols

As discussed in section II.E, FSIS is proposing to allow the declaration of soluble fiber and insoluble fiber that meet the definition of "dietary fiber" on the Nutrition Facts label for the general population. FDA has concluded that there is no evidence to suggest that the role of these nutrients would be different among infants through 12

months, children 1 through 3 years of age, or pregnant women and lactating women compared to the general population (81 FR 33920).

FSIS has reviewed FDA's analysis and is not proposing any changes to the provisions for the voluntary declaration of soluble fiber, insoluble fiber, and sugar alcohols on the label of meat and poultry products represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant women and lactating women, consistent with FDA's Nutrition Labeling Final Rule (81 FR 33920).

c. Voluntary Declaration of Fluoride

FSIS regulations currently do not provide for the declaration of fluoride on the Nutrition Facts label of any meat or poultry product. For the reasons discussed in section II.H, FSIS is proposing to permit voluntary declaration of fluoride on the labeling of meat and poultry products for the general population. As discussed in FDA's Nutrition Labeling Proposed Rule and Final Rule (in which FDA did not change its tentative conclusions from the proposed rule), because fluoride provides protection against dental caries by strengthening the tooth enamel before and after teeth appear, and because excessive fluoride intake can cause dental fluorosis in young children, the declaration of fluoride on foods represented or purported to be specifically for children 1 through 3 years of age and for pregnant women and lactating women can assist in maintaining healthy dietary practices (79 FR 11936; 81 FR 33921). Further, while evidence on dental caries is lacking for infants through 12 months of age, there is no reason to expect the role of fluoride in the protection against dental caries to be different from other age groups (*Id.*). Therefore, consistent with FDA's Nutrition Labeling Final Rule on the voluntary declaration of fluoride for these subpopulations, FSIS is proposing to permit the voluntary declaration of fluoride on meat and poultry products represented or purported to be specifically for infants through 12 months of age, children 1 through 3 years of age, and pregnant women and lactating women (proposed 9 CFR 413.309(c)(5)).

4. Declaration of Essential Vitamins and Minerals

FSIS requires the declarations of vitamin A, vitamin C, calcium, and iron on the Nutrition Facts label, and there are no specific exceptions to this requirement for meat and poultry products represented or purported to be

specifically for infants and children less than 2 years and children less than 4 years of age, and pregnant women and lactating women (9 CFR 317.309(c)(8) and 381.409(c)(8)). FSIS is proposing to replace the current categories "infants and children less than 2 years of age and children less than 4 years of age" with "infants through 12 months and children 1 through 3 years of age."

Since the needs of essential vitamin and minerals are increased for both pregnant women and lactating women, FDA applied its conclusions about nutrient inadequacy during pregnancy to lactating women and made the requirements related to essential vitamins and minerals in labeling of foods for pregnant women and lactating women the same (81 FR 33921–33922). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to remove the current provision in 9 CFR 317.309(c)(8)(i) and 381.409(c)(8)(i) that requires separate declaration of percent DVs based on both RDI values for pregnant women and for lactating women in the labeling of foods represented or purported to be for use by both pregnant women and lactating women (proposed 9 CFR 413.309(c)(8)(i)).

a. Mandatory Declaration of Calcium and Iron

FSIS is not proposing any changes to the mandatory declaration of calcium on foods for the general population (see section II.I.1.). As discussed in FDA's Nutrition Labeling Proposed Rule, the AI for calcium for infants through 12 months of age is based on average calcium consumption of this nutrient rather than on chronic disease risk, health related-condition, or physiological endpoints (79 FR 11937). For children 1 through 3 years of age and pregnant women and lactating women, the Recommended Dietary Allowances (RDAs)²⁷ for calcium are based, in part, on bone health (79 FR 11937).

FDA's analysis of the Centers for Disease Control and Prevention (CDC) National Health and Nutrition Examination Survey (NHANES) 2003–2006 data estimated that infants ages 7 to 12 months have usual calcium intakes above the AI and estimated that about 12 percent of children 1 through 3 years of age had usual intakes of calcium below the Estimated Average

²⁷ "The RDA is an estimate of the average intake level that meets the nutrient requirements of nearly all (97 to 98 percent) healthy individuals in a particular life stage and gender group" (79 FR 11885).

Requirement (EAR),²⁸ based on intakes from conventional foods only (79 FR 11937). FDA has found that promoting the development of eating patterns that are associated with adequate calcium intake later in life is important given that calcium intakes are inadequate for the majority of the population. Intakes of calcium, which is necessary for growth and bone development, are inadequate among children. Also, similar to the general population, approximately 20 percent of pregnant women consumed less than the EAR for calcium from conventional foods as well as from conventional foods and supplements (79 FR 11937).

FDA concluded that calcium is a nutrient of public health significance for children 1 through 3 years of age and pregnant women and lactating women and infants through 12 months and requires the mandatory declaration of calcium on foods purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant and lactating women (81 FR 33922). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing to change the mandatory declaration of calcium for meat and poultry products purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant or lactating women.

FSIS is not proposing any changes to the mandatory declaration of iron on foods for the general population (see section II.I.1.). As discussed in FDA's Nutrition Labeling Proposed Rule, although the EAR and RDA are based on daily iron requirements and not directly on chronic disease risk, iron deficiency is associated with delayed normal infant motor function (*i.e.*, normal activity and movement) and mental function (*i.e.*, normal thinking and processing skills) (79 FR 11937). FDA's analysis of NHANES 2003–2006 data estimated that about 18 percent of infants ages 7 to 12 months have usual iron intakes below the EAR, based on intakes from conventional foods only and 4 percent of infants ages 7 to 12 months have usual iron intakes below the EAR based on intakes from conventional foods and supplements (79 FR 11937; 81 FR 33922).

As discussed in FDA's Nutrition Labeling Proposed Rule, about 1 percent of children 1 through 3 years of age have usual iron intakes below the EAR, based on intakes from conventional foods

only, and 0.4 percent of children have usual iron intakes below the EAR based on intakes from conventional foods and supplements (79 FR 11937). The IOM set the EAR by modeling components of iron requirements. The prevalence of iron deficiency in children ages 1 to 2 years has been reported to be 14.4 percent, and the prevalence of iron deficiency anemia in children younger than 5 years has been reported to be 14.9 percent. FDA requires the mandatory declaration of iron in the labeling of foods for infants through 12 months and children 1 through 3 years of age (81 FR 33922).

As discussed in FDA's Nutrition Labeling Proposed Rule, inadequate iron intakes during pregnancy are of public health significance because of the adverse effects for both the mother and the fetus (such as maternal anemia, premature delivery, low birth weight, and increased perinatal infant mortality) (79 FR 11938). FDA analyzed NHANES 2003–2006 data and estimated that 5 percent of pregnant women 14 to 50 years of age had usual iron intakes below the EAR based on intakes from conventional foods and supplements. The EAR for iron for pregnant women was based on estimates of iron stores needed during the first trimester (79 FR 11938). FDA's analysis of NHANES 2003–2006 data also indicated that, among pregnant women aged 12 to 49 years, 25 percent were iron deficient, and 13 percent had iron deficiency anemia (79 FR 11938). FDA considered iron deficiency based on two out of three cutoffs of iron deficiency variables (transferrin saturation, serum ferritin, and erythrocyte protoporphyrin) (79 FR 11938).

FDA found that calcium and iron have quantitative intake recommendations and have public health significance for infants through 12 months, children 1 through 3 years of age, and pregnant women and lactating women. FDA did not receive comments to its proposed rule to change its tentative conclusion that the declaration of calcium and iron is necessary to assist consumers in maintaining healthy dietary practices (81 FR 33922). FSIS has reviewed FDA's analysis and is proposing to require the mandatory declaration of calcium and iron on foods represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant women and lactating women without providing any exceptions for these subpopulations

from the requirement for declaration of calcium and iron applicable to foods for the general population (proposed 9 CFR 413.309(c)(8)(ii)).

b. Mandatory Declaration of Vitamin D and Potassium

FSIS is proposing to require the declaration of vitamin D on meat and poultry products for the general population (see section II.I.1.). FDA identified vitamin D as a nutrient of public health significance in children 1 through 3 years of age and pregnant women based on the high prevalence of inadequate intakes of vitamin D and its important role in bone development and health (81 FR 33922–33923). FDA also identified vitamin D as a nutrient of public health significance for infants through 12 months of age based on its importance for growth and development during infancy (81 FR 33922–33923).

FSIS is proposing to require the declaration of potassium on foods for the general population (see proposed 9 CFR 413.309(c)(8)(ii) and section II.I.1.). As discussed in FDA's Nutrition Labeling Proposed Rule, the AI for infants is based on average potassium intake from breast milk and complementary foods (79 FR 11938). The AI for the other life-stage and gender groups is set at a level to maintain blood pressure, reduce the adverse effects of sodium chloride intake on blood pressure, and reduce the risk of recurrent kidney stones (79 FR 11938).

FSIS has reviewed FDA's analysis of potassium intake from NHANES 2003–2006 for infants 7 to 12 months of age; potassium intake for children 1 through 3 years of age; and the importance of potassium in the risk reduction of chronic diseases for children 2 years of age and older (79 FR 11938). Because of the benefits of adequate potassium intake in lowering blood pressure and data indicating low likelihood of potassium adequacy, FSIS agrees with FDA that it is important to establish healthy dietary practices for later life (79 FR 11938). FDA tentatively concluded in the Nutrition Labeling Proposed Rule that there is no basis to conclude that the public health significance of potassium among infants through 12 months of age would be different than the science-based evidence for children 1 through 3 years of age, and that potassium is of public health significance to infants through 12 months, children 1 through 3 years of age and pregnant women and lactating women (79 FR 11938). FDA did not change its tentative conclusion in the final rule (81 FR 33922–33923).

²⁸ “The EAR is the average daily nutrient intake level that is estimated to meet the requirements of half of the healthy individuals in a particular life stage and gender group. EARs are used for assessing the statistical probability of adequacy of nutrient intakes of groups of people” (79 FR 11885).

Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to require the labeling of vitamin D and potassium on foods represented or purported to be specifically for infants through 12 months of age, children 1 through 3 years of age, and pregnant women and lactating women based on the quantitative intake recommendations for vitamin D and potassium and the public health significance of these nutrients. Consequently, FSIS is not providing for any exceptions for these subpopulations from the general requirement in proposed 9 CFR 413.309(c)(8)(ii) to declare vitamin D and potassium.

c. Voluntary Declaration of Vitamin A and Vitamin C

FSIS is proposing to no longer require the declaration of vitamin A and vitamin C on foods for the general population (see section II.I.1.). As discussed in FDA's Nutrition Labeling Proposed Rule, none of the DRIs (AIs or RDAs) for vitamin A were based on chronic disease risk, a health related-condition, or health-related physiological endpoints (79 FR 11939).

FDA looked at vitamin A intake from NHANES 2003–2006 for children and pregnant women and found a very low prevalence of inadequate intakes of vitamins A and C or inadequate status among children 1 through 3 years of age or pregnant women and also the lack of evidence to indicate that this would be different for infants or lactating women (79 FR 11939). FDA concluded that vitamin A and vitamin C are not of public health significance among infants through 12 months of age, children 1 through 3 years of age, and pregnant women and lactating women and that this supports the voluntary declaration of vitamins A and C in the labeling of foods for young children (81 FR 33923–33924). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to permit, but not to require, that the declaration of vitamin A and vitamin C on foods represented and purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant women and lactating women. Similar to other voluntary nutrients, the declaration of vitamins A and C would be required when claims are made about them on the label or labeling (proposed 9 CFR 413.309(c)(8)(ii)).

d. Voluntary Declaration of Other Vitamins and Minerals

As discussed in section II.I.3., for the general population, FSIS is proposing to permit the voluntary declaration of vitamin E, vitamin K, vitamin B₆,

vitamin B₁₂, thiamin, riboflavin, niacin, folate, biotin, pantothenic acid, phosphorus, iodine, magnesium, zinc, selenium, copper, manganese, chromium, molybdenum, chloride, and choline (proposed 9 CFR 413.309(c)(8)(ii)). As discussed in FDA's Nutrition Labeling Proposed Rule, vitamins and minerals other than iron, calcium, vitamin D, and potassium for infants either have DRIs that are not based on chronic disease risk, health-related conditions, or health-related physiological endpoints or are not shown to have public health significance because of the prevalence of a clinically relevant nutrient deficiency (79 FR 11939). FDA determined, in the final rule that, for infants through 12 months, children 1 through 3 years of age, and pregnant women and lactating women, the essential vitamins and minerals, other than iron, calcium, vitamin D and potassium, do not have public health significance, and there is no basis for the declaration of these nutrients to be different from that proposed for the general population (81 FR 33924). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to allow the voluntary declaration of vitamin E, vitamin K, vitamin B₆, vitamin B₁₂, thiamin, riboflavin, niacin, folate, biotin, pantothenic acid, phosphorus, iodine, magnesium, zinc, selenium, copper, manganese, chromium, molybdenum, chloride, and choline on foods represented or purported to be specifically for infants through 12 months, children 1 through 3 years of age, or pregnant women and lactating women, unless the labeling makes a claim about them, in which case the nutrients would have to be declared (proposed 9 CFR 413.309(c)(8)(ii)).

5. DRVs and Reference Daily Intakes (RDIs) for Infants Through 12 Months of Age

FSIS regulations do not include DRVs or RDIs for nutrients for infants through 12 months of age, except an RDI for protein of 14 g for infants. Consistent with FDA, FSIS is considering establishing DRVs and RDIs for nutrients for infants through 12 months of age and revisions to the current RDI for protein.

a. Calories

FSIS's regulations do not provide, and FDA has not established, a reference calorie intake level for infants and children less than 2 years of age. As discussed in FDA's Nutrition Labeling Proposed Rule, there is no quantitative intake recommendation for calories for

infants, and FDA is not aware of other scientific data and information on which it could rely to establish that level (79 FR 11939). FDA did not establish a reference calorie intake for infants through 12 months of age in the final rule (81 FR 33925). Therefore, consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing to establish a reference calorie intake level for infants through 12 months (81 FR 33925).

b. Total Fat

As discussed in FDA's Nutrition Labeling Proposed Rule, the IOM set an AI of 30 g/d for fat for infants through 12 months of age based on the average intake of human milk and complementary foods. There was no AI available in 1993, and the current AI provides a basis to determine an appropriate DRV for total fat for this subpopulation that can assist consumers in maintaining healthy dietary practices among this subpopulation (79 FR 11939). FDA established a DRV of 30 g for fat for infants through 12 months in its final rule (81 FR 33925). Therefore, consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to include a DRV of 30 g for fat for infants through 12 months of age (proposed 9 CFR 413.309(c)(9)).

c. Saturated Fat, Trans Fat, Cholesterol, Dietary Fiber, and Sugars

As discussed in FDA's Nutrition Labeling Proposed Rule, there are no quantitative intake recommendations from U.S. consensus reports available for saturated fat, *trans* fat, cholesterol, dietary fiber, and sugars for infants (79 FR 11939). FDA was not aware of other reliable scientific data and information on which to establish DRVs for these nutrients for infants through 12 months of age (79 FR 11939). FDA did not establish DRVs for infants through 12 months of age for these nutrients in its final rule (81 FR 33925). Accordingly, FSIS is not proposing to establish DRVs for these nutrients for infants through 12 months of age, consistent with FDA's Nutrition Labeling Final Rule because appropriate scientific data is not available.

d. Polyunsaturated Fat, Monounsaturated Fat, Insoluble Fiber, Soluble Fiber, Added Sugars, and Sugar Alcohols

As discussed in FDA's Nutrition Labeling Proposed Rule, quantitative intake recommendations from U.S. consensus reports are not available for polyunsaturated fat, monounsaturated fat, insoluble fiber, soluble fiber, added sugars, or sugar alcohols for infants (79

FR 11940). FDA was not aware of other reliable scientific data and information on which to establish DRV for these nutrients for this subpopulation (79 FR 11940). FDA did not establish DRV for infants through 12 months of age for these nutrients in its final rule (81 FR 33925). Accordingly, consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing to establish DRV for these nutrients for infants through 12 months of age because appropriate scientific data are not available.

e. Total Carbohydrate

As discussed in FDA's Nutrition Labeling Proposed Rule, the IOM set an AI of 95 g/d for carbohydrate for infants through 12 months of age based on the average intake of human milk and complementary foods. There was no AI available in 1993, and the current AI provides a basis on which FDA could determine an appropriate DRV for total carbohydrate for this subpopulation that can assist consumers in maintaining healthy dietary practices among this subpopulation (79 FR 11940). FDA established a DRV of 95 g for total carbohydrate for infants through 12 months of age in its final rule (81 FR 33925). Therefore, consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to establish a DRV of 95 g for total carbohydrate for infants through 12 months of age (proposed 9 CFR 413.309(c)(9)).

f. Protein

As discussed in FDA's Nutrition Labeling Proposed Rule, the DV for protein for infants is an RDI, rather than a DRV. Before 1993, FDA established the RDIs for protein for all age groups based on the 1989 RDA. In 1993, FDA changed the RDI for protein for the general population to a DRV (58 FR 2206 at 2216). FDA retained the RDI for infants based on the highest 1968 RDA value (14 g/d for infants) to be consistent with a population-coverage approach, but it found no reason to change the approach of using the RDI for infants through 12 months. FDA determined that it would be appropriate to revise the RDI to rely on current quantitative intake recommendations. In 2002, the IOM established an RDA for infants through 12 months of 1.2 g/kg/d based on nitrogen balance studies and using a reference body weight of 9 kg consistent with current growth charts for infants. Protein intakes are well above the current and proposed RDI, and mean protein intake for infants 6 to 11 months of age was well above the RDA of 11 g/d (79 FR 11940). FDA established an RDI of 11 grams for protein for infants through 12 months of

age in its final rule (81 FR 33925). Accordingly, consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to establish an RDI of 11 g for protein for infants through 12 months of age (proposed 9 CFR 413.309(c)(8)(iv)).

g. Sodium

FSIS is proposing to establish a DRV for sodium based on the IOM's UL for the general population (section II.G.). However, as discussed in FDA's Nutrition Labeling Proposed Rule, the IOM did not set a UL for sodium for infants through 12 months of age because there was insufficient data on adverse effects of chronic overconsumption in this age group (79 FR 11940). In addition, FDA was not aware of other reliable scientific data and information on which to establish a DRV for sodium for this subpopulation (79 FR 11940). FDA did not establish a DRV for sodium for infants through 12 months of age in its final rule (81 FR 33926). Therefore, consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing a DRV for sodium for infants through 12 months of age because of the lack of appropriate scientific data.

h. Fluoride

As discussed in section II.H, although the IOM set an AI for fluoride, the AIs for infants through 12 months and children 1 through 3 years are close to the Environmental Protection Agency benchmarks for total fluoride intake. FDA did not propose a DRV for fluoride for use in the labeling of foods for the general population because of a concern about excess intakes associated with dental fluorosis (79 FR 11918). FDA did not establish a DRV for fluoride for infants through 12 months in its final rule (81 FR 33926). The use of such a DRV to calculate percent DV may have the unintended effect of consumers selecting foods with higher fluoride amounts, which are not necessary or advised (79 FR 11940). Accordingly, consistent with FDA's Nutrition Labeling Final Rule, FSIS is not proposing to establish a DRV for fluoride for infants through 12 months of age.

i. Vitamins and Minerals

FSIS regulations do not include DRV for nutrients, generally, for infants, children under 4 years of age, or pregnant women and lactating women. However, there are requirements for a DRV for protein for children 4 or more years of age and an RDI for protein for (1) children less than 4 years of age; (2) infants; (3) pregnant women; and (4)

lactating women (9 CFR 317.309(c)(7)(iii) and 381.409(c)(7)(iii)).

FDA reviewed current quantitative intake recommendations for vitamins and minerals for infants and considered comments received in response to its 2007 ANPRM to determine appropriate RDIs for vitamins and minerals for infants through 12 months of age (79 FR 11940). FSIS agrees with FDA that it is important to establish RDIs for infants through 12 months of age because infants in this age range transition from a diet of mostly breast milk and infant formula to infant cereal and baby foods; that labeling foods for this subpopulation with percent DV declarations can assist parents in making nutritious food choices; that the DRIs (AIs and RDAs) provide a basis on which to determine RDIs for vitamins and minerals for this subpopulation; that it is appropriate to use RDAs and, in the absence of RDAs, AIs to determine appropriate micronutrient RDIs for infants; that both RDAs and AIs are sufficient for setting RDIs because they both represent intake levels that are expected to meet or exceed the nutrient needs of the majority of infants; that the IOM established DRIs based on scientific knowledge that update and supersede previous RDA recommendations; and that DRIs are available for infants through 12 months of age (79 FR 11940).

FDA established RDIs for vitamin A, vitamin C, vitamin D, vitamin E, vitamin K, vitamin B₁₂, folate, choline, riboflavin, niacin, vitamin B₆, calcium, iron, thiamin, biotin, pantothenic acid, phosphorous, iodine, magnesium, zinc, selenium, copper, manganese, chromium, molybdenum, chloride, and potassium for infants through 12 months of age in its final rule (81 FR 33926–33927). Accordingly, consistent with FDA's Nutrition Labeling Final Rule (81 FR 33926–33927), FSIS is proposing to include a listing of RDIs for these same nutrients for infants through 12 months of age (proposed 9 CFR 413.309(c)(8)(iv)).

6. DRV and RDI for Children 1 Through 3 Years of Age

FSIS regulations do not include DRV or RDI for nutrients for children 1 through 3 years of age, except an RDI for protein of 16 g for children less than 4 years of age. As discussed in FDA's Nutrition Labeling Proposed Rule, FDA reviewed scientific evidence and current recommendations, as well as comments in response to FDA's 2007 ANPRM, to consider establishing DRV and RDI for nutrients for this subpopulation and to consider revisions

to the current RDI for protein (79 FR 11940).

a. Calories

FSIS regulations currently do not provide a reference calorie intake level for nutrition labeling for children ages 1 through 3 years. FDA established a reference calorie intake level for children 1 through 3 years of age and set DRV's using quantitative intake recommendations that are based on calories (e.g., total fat, saturated fat, and dietary fiber). Current recommendations from the IOM, American Heart Association (AHA), American Academy of Pediatrics (AAP), and the 2015–2020 DGA for caloric intake range from 800 to 900 calories/d for children 1 year old, approximately 1,000 calories/d for children 2 years of age, and from 1,000 to 1,200 calories/d for children 3 years of age. FDA considered that an average of the range of these caloric intake recommendations (800 to 1,200 calories/d), i.e., 1,000 calories/d, provides a reasonable reference calorie intake level (79 FR 11941). FDA established a reference calorie intake of 1,000 calories/day for children aged 1 through 3 years in its final rule (81 FR 33927). FSIS has reviewed FDA's analysis and is proposing to provide a reference calorie intake level of 1,000 calories/day for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)) consistent with FDA's Nutrition Labeling Final Rule.

b. Total Fat

Currently, FSIS regulations do not provide a DRV for total fat for children ages 1 through 3 years. As discussed in FDA's Nutrition Labeling Proposed Rule, FDA agreed with a comment to its 2007 ANPRM that 35 percent of calories from fat for children 1 through 3 years of age, the midpoint of the IOM AMDR of 30 to 40 percent, serves as an appropriate basis on which to set the DRV for total fat. The approach to calculating the DRV for total fat is consistent with FDA's approach to setting the DRV for total fat for the general population. Thirty-five percent is consistent with AHA and AAP recommendations that 30 to 40 percent of calories consumed by children 12 through 24 months of age, and 30 to 35 percent of calories consumed by children 24 through 48 months of age, should come from fat (79 FR 11941). In FDA's Nutrition Labeling Proposed Rule, FDA tentatively concluded that 35 percent of total calories from fat (i.e., 39 g using the finalized reference calorie intake level of 1,000 calories/d) is an appropriate DRV for total fat for children 1 through 3 years of age (*Id.*).

FDA established a DRV of 39 grams for total fat in its final rule (81 FR 33927–33928). FSIS has reviewed FDA's analysis and is proposing to establish a DRV of 39 g for fat for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)) consistent with FDA's Nutrition Labeling Final Rule.

c. Saturated Fat, Trans Fat, and Cholesterol

FSIS has not established DRV's for saturated fat, *trans* fat, or cholesterol for children 1 through 3 years of age. As discussed in FDA's Nutrition Labeling Proposed Rule, FDA considered a comment to its 2007 ANPRM that suggested using the midpoint of 10 to 15 percent of calories for saturated fat, 2 percent of calories for *trans* fat based on estimates of mean *trans* fat intake for the U.S. population 3 years of age and older, and less than or equal to 300 mg/d for cholesterol based on the 2005 DGA recommendation. CVD is known to begin in childhood, and the 2010 DGA recommended that Americans 2 years of age and older consume less than 10 percent of calories from saturated fat and less than 300 mg/d of cholesterol (79 FR 11941). FDA tentatively concluded that it is appropriate to set a DRV of 10 g for saturated fat, based on 10 percent of total calories from saturated fat and using the proposed reference calorie intake level of 1,000 calories/d which equals 11 g, rounded down to 10 g, and a DRV of 300 mg for cholesterol for children 1 through 3 years of age (79 FR 11941). FDA established a DRV of 10 g for saturated fat and a DRV of 300 mg for cholesterol for children 1 through 3 years of age in its final rule (81 FR 33928). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to establish a DRV of 10 g for saturated fat and a DRV of 300 mg for cholesterol for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)).

FSIS is not proposing to establish a DRV for *trans* fat because the IOM and 2015–2020 DGA do not provide any specific appropriate levels of intake and FDA did not establish a DRV for *trans* fat (81 FR 33928).

d. Polyunsaturated Fat, Monounsaturated Fat, Sugars, Added Sugars, Insoluble Fiber, Soluble Fiber, and Sugar Alcohols

FSIS has not established DRV's for polyunsaturated fat, monounsaturated fat, sugars, added sugars, insoluble fiber, soluble fiber, or sugar alcohol for children 1 through 3 years of age. As discussed in FDA's Nutrition Labeling Proposed Rule, FDA stated that there was no reliable data or information

available to establish DRV's for polyunsaturated fat, monounsaturated fat, sugars, insoluble fiber, soluble fiber, and sugar alcohols, and tentatively concluded that there was no basis for setting DRV's for these nutrients (79 FR 11941). FDA established a DRV reference point for the added sugars declaration at 10 percent of calories in its final rule, after considering the scientific evidence in the 2015 DGAC report (81 FR 33842). FDA set a DRV for children 1 through 3 years of age of 25 g of added sugars (1,000 calorie reference amount $\times .10 = 100$ calories and $100 \text{ calories} \div 4 \text{ calories/gram} = 25 \text{ grams}$) (81 FR 33928–33929). FSIS has reviewed FDA's analysis and is proposing a DRV for added sugars of 25 g for children 1 through 3 years of age and that the percent DV for added sugars be declared on the Nutrition Facts label consistent with FDA's final rule. FSIS is not proposing DRV's for polyunsaturated fat, including *n-3* or *n-6* polyunsaturated fatty acids, monounsaturated fat, sugars, soluble fiber, insoluble fiber, or sugar alcohols for children 1 through 3 years of age consistent with the FDA Nutrition Labeling Final Rule.

e. Total Carbohydrate

FSIS has not established a DRV for total carbohydrate for children 1 through 3 years of age. As discussed in section II.E.1, consistent with FDA, FSIS is proposing a DRV for total carbohydrate for the general population based on the percentage of calories in a 2,000 calorie diet remaining after the sum of the DRV for fat (30 percent) plus the DRV for protein (10 percent) have been subtracted consistent with FDA's Nutrition Labeling Final Rule. As discussed in FDA's proposed rule, FDA considered this method to be appropriate for setting a DRV for total carbohydrate for children 1 through 3 years of age because it falls within the IOM AMDR recommendation of 45 to 65 percent of calories from carbohydrates for children 1 through 3 years of age (79 FR 11941). FDA tentatively concluded that an appropriate DRV for total carbohydrate is 60 percent of calories (i.e., 150 g using the proposed reference calorie intake level of 1,000 calories/d) (*Id.*) FDA did not receive comments on its tentative conclusion and finalized this requirement as proposed (81 FR 33929). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to set a DRV of 150 g for total carbohydrate for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)).

f. Dietary Fiber

FSIS has not established a DRV for dietary fiber for children 1 through 3 years of age. As discussed in FDA's Nutrition Labeling Proposed Rule, FDA tentatively concluded that the AI of 14 g/1,000 calories for dietary fiber for children 1 through 3 years of age should be used to set a DRV for dietary fiber to be consistent with how other proposed DRVs are being set; for example, proposing a reference calorie intake level of 1,000 calories/d for this subpopulation (79 FR 11941–11942). FDA established a DRV of 14 g for dietary fiber in its final rule (81 FR 33929). Consistent with FDA's Nutrition Labeling Final Rule, FSIS is proposing to establish a DRV of 14 g for dietary fiber for children 1 through 3 years of age (9 CFR 413.309(c)(9)).

g. Protein

The current RDI for protein for children less than 4 years of age was based on the 1989 RDA for protein of 16 g/d (9 CFR 317.309(c)(7)(iii) and 381.409(c)(7)(iii)).

As discussed in FDA's Nutrition Labeling Proposed Rule, FDA considered current recommendations and acknowledged that protein intakes are well above the current RDI; the mean protein intake for children 12 to 23 months of age was 44 g/d; the protein AMDR for children 1 through 3 years of age is 5 to 20 percent of calories; and the proposed reference calorie intake level and the approaches used for the proposed DRVs for fat and carbohydrate are based on percent of calories (79 FR 11942). FDA tentatively concluded that the DV for protein for children 1 through 3 years of age should be a DRV, rather than an RDI (using the RDA), and that a DRV for protein should be based on 5 percent of 1,000 calories or 50 calories, which equals 12.5 g or, when rounded up, is 13 g (*Id.*) FDA established a DRV for protein of 13 g for children 1 through 3 years of age in its final rule (81 FR 33929). FSIS agrees with FDA's conclusion and is proposing to establish a DRV for protein of 13 g for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)) consistent with FDA's Nutrition Labeling Final Rule.

h. Sodium

For the general population, FSIS is proposing to establish a DRV based on the UL for sodium (section II.G.). There is no current DRV for sodium for children 1 through 3 years of age.

As discussed in FDA's Nutrition Labeling Proposed Rule, FDA agreed with comments to its 2007 ANPRM that

1,500 mg is an appropriate DRV for sodium for children 1 through 3 years of age (79 FR 11942). FDA did not receive comments on this proposed requirement and finalized this requirement (81 FR 33929). Consistent with FSIS's proposed approach for the general population and FDA's Nutrition Labeling Final Rule, FSIS is proposing to establish a DRV of 1,500 mg for sodium for children 1 through 3 years of age (proposed 9 CFR 413.309(c)(9)).

i. Fluoride

FSIS has not established a DV for fluoride for children 1 through 3 years of age. As discussed in section II.H, FSIS is not establishing a DRV for fluoride for the general population. FSIS agrees with FDA that a DRV for fluoride is not warranted for children 1 through 3 years of age and is not proposing to establish a DRV for fluoride for children 1 through 3 years of age (79 FR 11942; 81 FR 33929).

j. Vitamins and Minerals

FSIS regulations do not currently include a table listing the RDIs for children less than 4 years of age. The preamble to FDA's 1993 DRV/RDI final rule provides a table listing RDIs for children less than 4 years of age (58 FR 2206 at 2213), which is also provided in FDA's Food Labeling Guide. FDA reviewed current quantitative intake recommendations for vitamins and minerals for infants and considered comments received in response to their 2007 ANPRM to determine appropriate RDIs for vitamins and minerals for children 1 through 3 years of age.

As discussed in FDA's Nutrition Labeling Proposed Rule, the IOM's quantitative intake recommendations (AIs and RDAs) provide a basis on which to determine RDIs for vitamins and minerals for this subpopulation. The IOM determined that available evidence was sufficient to establish appropriate RDAs and AIs for vitamins and minerals for this subpopulation; that it is appropriate to use RDAs and, in the absence of RDAs, AIs to determine appropriate micronutrient RDIs for children 1 through 3 years of age; that the RDA, when available, is the best estimate of an intake level that will meet the nutrient goals of practically all consumers who would use the Nutrition Facts label; that AIs have less certainty than RDAs, but they represent goals for nutrient intake for individuals and provide the best estimate based on current science for use in setting RDIs for such nutrients; that promoting the development of eating patterns associated with adequate potassium intake later in life is important because

chronic conditions such as elevated blood pressure, bone demineralization, and kidney stones likely result from inadequate potassium intakes over an extended period of time, including childhood; and that the AI for potassium is 3,000 mg/d and is considered an appropriate basis for establishing a RDI for potassium for children 1 through 3 years of age (79 FR 11942). FDA established RDIs for vitamin A, vitamin C, vitamin D, vitamin E, vitamin K, vitamin B₁₂, folate, choline, riboflavin, niacin, vitamin B₆, calcium, iron, thiamin, biotin, pantothenic acid, phosphorus, iodine, magnesium, zinc, selenium, copper, manganese, chromium, molybdenum, chloride, and potassium for children 1 through 3 years of age in its final rule (81 FR 33929–33930).

Therefore, consistent with FDA's Nutrition Labeling Final Rule (81 FR 33927), using the RDAs and AIs, FSIS is proposing to establish RDIs as set forth in proposed 9 CFR 413.309(c)(8)(iv) for these same nutrients for children 1 through 3 years of age.

7. DRVs and RDIs for Pregnant Women and Lactating Women

a. Calories

The reference calorie intake of 2,000 used for the general population applies to pregnant women and lactating women (9 CFR 317.309(c)(9) and 381.409(c)(9)). As discussed in FDA's Nutrition Labeling Proposed Rule, the calorie needs for pregnant women and lactating women are similar to the general population, and few products are purported for pregnant women and lactating women (79 FR 11943). FDA explained that the calorie needs for pregnant and lactating women are similar to the general population (*Id.*) FDA established a 2,000 reference calorie intake level for the DRV for pregnant women and lactating women in its final rule (81 FR 33931). Consistent with FDA's final rule, FSIS is proposing to use the 2,000 reference calorie intake level for setting DRVs for pregnant women and lactating women (proposed 9 CFR 413.309(c)(9)).

b. Total Fat, Saturated Fat, Cholesterol, Total Carbohydrate, Sodium, Added Sugars, and Dietary Fiber

FSIS regulations do not provide DRVs for total fat, saturated fat, cholesterol, total carbohydrate, sodium, and dietary fiber for pregnant women and lactating women. As discussed in FDA's Nutrition Labeling Proposed Rule, quantitative intake recommendations for total fat, saturated fat, cholesterol, total carbohydrate, sodium, and dietary fiber

for pregnant women and lactating women are generally similar to the general population (79 FR 11943). FDA tentatively concluded that the DRV for total fat, saturated fat, cholesterol, total carbohydrate, sodium, and dietary fiber for pregnant women and lactating women should remain the same as for the general population (*Id.*). FDA established DRVs for pregnant women and lactating women using the same DRVs for these nutrients as used for the general population (81 FR 33931). FDA also requires a DRV of 50 g of added sugars for adults and children 4 years of age and older, including pregnant women and lactating women (81 FR 33931). Consistent with FDA's final rule, FSIS is proposing to establish DRVs for pregnant women and lactating women using the proposed DRVs for the general population for total fat, saturated fat, cholesterol, total carbohydrate, sodium, added sugars and dietary fiber (proposed 9 CFR 413.309(c)(9)).

c. Trans Fat, Polyunsaturated Fat, Monounsaturated Fat, Soluble Fiber, Insoluble Fiber, Sugars, and Sugar Alcohols

There are no DRVs for *trans* fat, polyunsaturated fat, monounsaturated fat, soluble fiber, insoluble fiber, sugars, or sugar alcohol for pregnant women and lactating women. As discussed in sections II.C. and II.E., FSIS is not proposing DRVs for these nutrients for the general population because of a lack of quantitative intake recommendations. Similarly, quantitative intake recommendations are lacking for these nutrients for pregnant women and lactating women. Therefore, FSIS is not proposing to establish DRVs for *trans* fat, polyunsaturated and monounsaturated fat, soluble fiber, insoluble fiber, sugars, or sugar alcohols for pregnant women and lactating women consistent with FDA's Nutrition Labeling Final Rule (81 FR 33931).

d. Protein

FSIS has established RDIs of 60 g protein for pregnant women and 65 g protein for lactating women (9 CFR 317.309(c)(7)(iii) and 381.409(c)(7)(iii)). As discussed in FDA's Nutrition Labeling Proposed Rule, the IOM established 71 g/d protein as the RDA for pregnant women and lactating women based on the needs for maternal and fetal development and human milk production (79 FR 11943). FDA tentatively concluded that the DV for protein for pregnant women and lactating women should remain an RDI (using the RDA) instead of a DRV because the DRV approach used to

calculate protein for the general population based on 10 percent of 2,000 calories, which equals 50 g of protein/d, falls short of the recommended protein needs of pregnant women and lactating women of 71 g/d (*Id.*). FDA did not receive comments on its tentative conclusion and established an RDI of 71 g for protein for pregnant women and lactating women in its final rule (81 FR 33931). Consistent with FDA's final rule, FSIS is proposing to establish an RDI of 71 g for protein for pregnant women and lactating women (proposed 413.309(c)(7)(iii)).

e. Fluoride

There is no DRV for fluoride for the general population or for pregnant women and lactating women. While an AI has been established for fluoride, FSIS is not proposing to establish a DRV for fluoride for the general population for the reasons discussed in section II.H. Similarly, because the AI for fluoride for pregnant women and lactating women is not different from the general population, as discussed in FDA's Nutrition Labeling Proposed Rule (79 FR 11943), FSIS is not proposing a DRV for fluoride for pregnant women and lactating women.

f. Vitamins and Minerals

While not included in FSIS regulations, the preamble to the FDA 1993 DRV/RDI final rule provides a table listing RDIs for pregnant women and lactating women (58 FR 2206 at 2213), which is also provided in FDA's Food Labeling Guide (79 FR 11943). As discussed in FDA's Nutrition Labeling Proposed Rule, FDA reviewed current quantitative intake recommendations for vitamins and minerals for pregnant women and lactating women and concluded that it is appropriate to establish RDIs for pregnant women and lactating women for vitamins and minerals that have DRIs, using population-coverage RDAs and AIs, instead of population-weighted EARs (79 FR 11943). In addition, FDA established a single set of RDIs intended for both pregnant women and lactating women because nutrient needs during pregnancy and lactation are similar and because using one set of RDIs would address practical concerns related to limited space on food labels (81 FR 33932).

Therefore, FSIS is proposing to establish RDIs as set forth in proposed 9 CFR 413.309(c)(8)(iv) for vitamin A, vitamin C, vitamin D, vitamin E, vitamin K, vitamin B₁₂, folate, choline, riboflavin, niacin, vitamin B₆, calcium, iron, thiamin, biotin, pantothenic acid, phosphorous, iodine, magnesium, zinc,

selenium, copper, manganese, chromium, molybdenum, chloride, and potassium for pregnant women and lactating women consistent with FDA's Nutrition Labeling Final Rule.

K. Format

FSIS requires that nutrition information for meat and poultry products be presented in a specific format on the labels of those products (see 9 CFR 317.309(d)(1)–(f) and 381.409(d)(1)–(f)). Since 1995 when FSIS last published a final rule effecting the nutrition labeling format regulations (60 FR 174; January 3, 1995), more research has been done on trends in health conditions and how best to present information to consumers. FDA, in its changes to the Nutrition Facts label format, took into consideration “graphic design principles such as alignment, consistency, repetition, and contrast,” emphasizing “key nutrients and key information” through highlighting and “removing or modifying parts of the label to assist consumers in maintaining healthy dietary practices” (79 FR 11948; 81 FR 33936). FSIS has reviewed FDA's rationale for the changes to the Nutrition Facts label format (*see* 79 FR 11948–11955; 81 FR 33936–33959) and agrees with its approach. FSIS believes it is necessary to propose changes to the Nutrition Facts label format for meat and poultry products that will parallel, to the extent possible, FDA's new regulations. This approach will help prevent consumer confusion and non-uniformity in the marketplace. Therefore, FSIS is proposing the following changes to the Nutrition Facts label format.

1. Increasing the Prominence of Calories and Serving Size

Consistent with FDA's final rule (81 FR 33937–33940), FSIS is proposing (i) to increase the type size for “Calories” and the numeric value for “Calories,” and (ii) to require that the numeric value for calories be highlighted in bold or extra bold type (proposed 9 CFR 413.309(d)). These changes will emphasize the importance of calories on the label and draw more consumer attention to the calories declaration.

2. Changing the Order of the “Serving Size” and “Servings per Container” Declarations and Increasing the Prominence of “Servings per Container”

FSIS currently requires that information on serving size, which includes a statement of the serving size and the number of servings per container, follow the heading “Nutrition Facts” (9 CFR 317.309(d)(3) and

381.409(d)(3)). Consistent with FDA's Nutrition Labeling Final Rule (*see* 81 FR 33940–33943), FSIS is proposing to (i) reverse the order of the declarations of “Servings Per Container” and “Serving Size;” (ii) require that no capital letters are used for serving size information, except for the first letter in “Serving size;” (iii) require that “servings per container” (with the blank filled in with the actual number of servings) be in type size no smaller than 10 point (except for the tabular and linear displays for small packages) (proposed 9 CFR 413.309(d)(3)(i)); and (iv) require that the serving size information be highlighted in bold or extra bold type and be in a type size no smaller than 10 point (except for the linear display for small packages) (proposed 9 CFR 413.309(d)(3)(i)). FSIS has tentatively concluded that these proposed changes will help consumers better locate, identify, and understand the information in the Nutrition Facts label and assist consumers in making informed purchase decisions and maintaining health dietary practices.

3. Right-Justifying the Quantitative Amounts Declared in the “Serving size” Statement

Currently, the label statement for “Serving size” expressed in common household measures (*e.g.*, cup, tablespoon, piece or slice) and gram amounts is stated immediately adjacent to the “Serving Size” declaration as seen in 9 CFR 317.309(d)(12) and 381.409(d)(12). FSIS is proposing to require that the “Serving size” declaration be left-justified and the corresponding numerical value as determined in proposed 9 CFR 413.309(b)(9) be right-justified (proposed 9 CFR 413.309(d)(3)(i)). FSIS agrees with FDA that the proposed change will create more white space on the Nutrition Facts label that “would result in a less cluttered appearance, heightened focus and emphasis, and improved readability” and will improve ease of use for consumers (79 FR 11950).

4. Presentation of Percent DVs

FSIS currently requires that the column heading “% Daily Value” and a list of nutrient names and amounts as described in 9 CFR 317.309(d)(7) and 381.409(d)(7) be to the left of and below this column heading in the Nutrition Facts label (9 CFR 317.309(d)(6) and (7) and 381.409(d)(6) and (7)). On all dual column labels, including those (1) for two or more forms of the same food (proposed 9 CFR 413.309(e)(5)); (2) displaying nutrition information per container and per unit, in addition to nutrition information per serving

(proposed 9 CFR 413.309(e)(6)(i); (3) using the tabular display (proposed 9 CFR 413.309(e)(6)(ii)); and (4) that provide the aggregate display (proposed 9 CFR 413.309(d)(13)(ii)), FSIS is proposing to use thin vertical lines to separate the information in the “% Daily Value” column from the information in the column containing the quantitative weights. Further, FSIS is proposing to use the same style of thin vertical lines to separate each of the dual columns and aggregate display columns from each other. FSIS has tentatively concluded that the use of these vertical lines will help differentiate the columns and make the information easier to read for consumers. In addition, FSIS is proposing that protein would no longer be listed with the vitamins and minerals at the bottom of these labels as currently required.

5. Placement of “Added Sugars”

As discussed in section I.E.3 of this proposed rule, FSIS is proposing to require the declaration of added sugars as an indented line item underneath the declaration of “Total Sugars” on the Nutrition Facts label. “Added Sugars” would be the only mandatory nutrient required to be listed in a double indentation format on the Nutrition Facts label.

FDA conducted a consumer study that, among other things, looked at how consumers would use the new information regarding added sugars, but did not evaluate the impact of listing a percent DV for added sugars on the Nutrition Facts label (80 FR 44306). The study was a controlled, randomized, web-based experiment where participants viewed three different Nutrition Facts label formats and responded to questions regarding their ability to accurately recognize and compare nutrients on the Nutrition Facts label and their judgments about the foods’ overall healthfulness and relative nutrient levels (80 FR 44306). The study found that when both total and added sugars declarations appeared on the label, the majority of study participants correctly reported the added sugars amount and accurately identified which products had less added sugars (80 FR 44306). The study also found that where an added sugars declaration was indented below a “Total Sugars” declaration the study participants’ understanding that added sugars are part of the total amount of sugars in the product improved (80 FR 44306). Therefore, consistent with FDA’s final rule, FSIS is proposing to use the term “Total Sugars” instead of “Sugars” on the label. A summary of

FDA’s Added Sugars Experiment is available at 80 FR 44306 and a full description is available in the FDA Nutrition Labeling Supplemental Proposed Rule docket.²⁹

FDA’s Nutrition Labeling Final Rule also addressed commenters’ concerns regarding potential consumer confusion when including an “Added Sugars” declaration under “Total Sugars” on the Nutrition Facts label. Based on the recommendations of two independent FDA experts, as well as literature suggesting linking terms are useful for increasing comprehension, FDA added the word “Includes” in front of “Added Sugars” (81 FR 33827.) FDA also minimized the line between “Total Sugars” and “Added Sugars” to help denote that “Added Sugars” are a subcomponent of “Total Sugars.” Consistent with FDA, FSIS is proposing to add the word “Includes” in front of “Added Sugars” such that the added sugars declaration reads “Includes X g Added Sugars.” FSIS is also proposing to minimize the hairline between “Total Sugars” and “Added Sugars.”

6. Declaration of Absolute Amounts of Vitamins and Minerals

FSIS currently requires that the quantitative amount by weight of mandatory and voluntary nutrients be declared on the Nutrition Facts label, except for vitamins and minerals (other than sodium and potassium) which must be declared only as percent DVs (9 CFR 317.309(c)(8) and 381.309(c)(8)). Consistent with FDA’s Nutrition Labeling Final Rule (81 FR 33946–33949), FSIS is not proposing to require the declaration of the absolute amounts of all mandatory and voluntary vitamins and minerals as well as the percent DV declaration on the Nutrition Facts label. FSIS is, however, proposing to clarify in proposed 9 CFR 413.309(c)(8) that the declaration of voluntarily declared vitamins and minerals listed in proposed 9 CFR 413.309(c)(8)(iv) may include the quantitative amount by weight and percent of the RDI. FSIS is also proposing that if vitamins or minerals are added or there is a claim made about them, the manufacturer must include a declaration of the nutrient as a percent DV, or alternatively, as a quantitative amount by weight and percent DV (proposed 9 CFR 413.309(c)(8)(ii)).

²⁹ U.S. Food and Drug Administration. Memorandum to the File—“Experimental study on consumer responses to Nutrition Facts labels with declaration of amount of added sugars (OMB No. 0910–0764),” 2015.

7. The Footnote

FSIS currently requires that a footnote, preceded by an asterisk, be placed beneath the list of vitamins and minerals and be separated from that list by a hairline on the Nutrition Facts label (9 CFR 317.309(d)(9) and 381.409(d)(9)). The footnote must state “Percent Daily Values are based on a 2,000 calorie diet. Your daily values may be higher or lower depending on your calorie needs” followed by a table that lists the DRVs for total fat, saturated fat, cholesterol, sodium, total carbohydrate, and dietary fiber based on 2,000 and 2,500 calorie diets. (9 CFR 317.309(d)(9)(i) and 381.409(d)(9)(i)). Caloric conversion information on a per-gram basis for fat, carbohydrate, and protein may be presented beneath the information required in paragraph 9 CFR 317.309(d)(9) and 381.409(d)(9) separated by a hairline (9 CFR 317.309(d)(10) and 381.409(d)(10)).

Comments to FDA’s 2007 ANPRM cited to research that the comments said showed that consumers do not understand what information is being conveyed in the footnote (79 FR 11953). In 2014, FDA conducted a controlled, randomized, web-based experiment that compared consumer reactions to seven footnote formats, which included five modified footnotes, in addition to the current footnote and no footnote at all, for explaining percent DVs and how to use them (the “Footnote Experiment”).³⁰ In FDA’s Nutrition Labeling Final Rule, FDA finalized a revised footnote requirement (81 FR 33952). FDA removed the requirement for the footnote table listing the DRVs for total fat, saturated fat, cholesterol, sodium, total carbohydrate, and dietary fiber for 2,000 and 2,500 calorie diets that is specified in 21 CFR 101.9(d)(9)(i) and added the following footnote text: “*The %Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.” *Id.* The footnote text is similar to one of the options tested in the Footnote Experiment, except that the sentences in the footnote are reversed (80 FR 44309). The study participants perceived the language in this footnote to be more useful than the current footnote; and FDA switched the order of the sentences in the footnote so the explanation of the %DV clearly follows

the asterisk that leads to the footnote in the %DV column (80 FR 44309).

FDA stated that the new footnote “which explains the term “% Daily Value” and provides a reference calorie level will assist consumers in better understanding the information of the Nutrition Facts label and in maintaining healthy dietary practices” (81 FR 33952). FDA did not change the caloric conversion information in the footnote specified in 21 CFR 101.9(d)(10). FDA stated, in its Nutrition Labeling Proposed Rule, that “increasing the type size, bolding key elements of the footnote (space permitting), and adding a bar clearly separating it from the micronutrient information directly above will assist consumers in using the information” (79 FR 11953). FDA did not finalize this proposed requirement.

Under the Nutrition Labeling Final Rule, FDA now allows the footnote to be omitted from products that qualify for a simplified format (21 CFR 101.9(f)), provided that the following abbreviated statement is used “%DV = %Daily Value” in a type size no smaller than 6 point on these package labels when Daily Value is not spelled out in the column heading (81 FR 33952). FDA is also not requiring the footnote on small or intermediate-sized packages (21 CFR 101.9(j)(13)(ii)(A)(1) and (2)), but manufacturers may voluntarily include the abbreviated footnote on these packages. The abbreviated statement would allow for more space on the label and informs consumers what %DV means. In addition, FDA is providing an exemption from the footnote requirement for foods that can use the terms “calorie free,” “free of calories,” “without calories,” “trivial source of calories,” “negligible source of calories,” or “dietarily insignificant source of calories” on the label or in the labeling of foods, as defined in 21 CFR 101.60(b) (81 FR 33952). FDA is also allowing the voluntary use of the first part of the footnote statement, “*The %Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet” on these products (81 FR 33952). FDA stated that such products would have little to no impact on the average daily 2,000 calorie intake, which the footnote addresses (80 FR 44309).

Consistent with FDA’s Nutrition Labeling Final Rule (81 FR 33949–33954), FSIS is proposing to remove the requirement for the footnote table listing the DRVs for total fat, saturated fat, cholesterol, sodium, total carbohydrate, and dietary fiber for 2,000 and 2,500 calorie diets (proposed 9 CFR 413.309(d)(9)(i)). FSIS is also proposing the following footnote text: “The

%Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.” Consistent with FDA, FSIS is not proposing changes to the caloric conversion information in the footnote currently specified in 9 CFR 317.309(d)(10) and 381.409(d)(10) (which would be consolidated in proposed 9 CFR 413.309(d)(10)). FSIS is proposing that the footnote may be omitted from products that qualify for a simplified format (proposed 9 CFR 413.309(f)), provided that the following abbreviated statement is used “%DV = %Daily Value,” when the package labels do not spell out Daily Value in the column heading. FSIS is also proposing that the footnote may be omitted from small or intermediate-sized packages (proposed 9 CFR 413.309(g)). FSIS is also proposing an exemption from the footnote requirement for foods that can use the terms “calorie free,” “free of calories,” “no calories,” “zero calories,” “without calories,” “trivial source of calories,” “negligible source of calories,” or “dietarily insignificant source of calories” on the label or in the labeling of foods as defined in proposed 9 CFR 413.360(b). FSIS is also proposing to allow the voluntary use of the first part of the footnote statements, “*The %Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet,” on these products.

8. Addition of a Horizontal Line Beneath the Nutrition Facts Heading

FSIS requires that the “Nutrition Facts” heading on the Nutrition Facts label be set in a type size larger than all other print size in the nutrition label (9 CFR 317.309(d)(2) and 381.409(d)(2)). FDA amended its regulations to require a hairline rule be inserted directly beneath the “Nutrition Facts” heading on all label formats, except for the linear display for small packages, to direct the reader’s eye to the serving size information, place emphasis on the information about servings, and break the information into smaller chunks to make it easier to process (79 FR 11954; 81 FR 33954). Consistent with FDA’s final rule, FSIS is proposing to require that a hairline rule be inserted immediately below the “Nutrition Facts” heading on all nutrition label formats except for the linear display for small packages (proposed 9 CFR 413.309(d)(1)(iii)).

³⁰ U.S. Food and Drug Administration. Memorandum to the File—“Experimental study on consumer responses to Nutrition Facts labels with various footnote formats (OMB No. 0910–0764),” 2015.

L. Single-Serving Containers/Units and Dual-Column Labeling

1. Single-Serving Containers/Units

FSIS's current regulations require that a product that is packaged and sold individually and that contains less than 200 percent of the applicable RACC be considered a single-serving container, and that the entire content of the product be labeled as one serving, except that for products that have RACCs of 100g or 100mL or larger, manufacturers may decide whether a package containing more than 150 percent but less than 200 percent of the RACC be labeled as 1 or 2 servings (9 CFR 317.309(b)(8) and 381.409(b)(8)). FSIS's current regulations also require that for products that have RACCs of 100g or 100mL or larger and are individual units within a multi-serving package, manufacturers may decide whether an individual unit that contains more than 150 percent but less than 200 percent of the RACC be labeled as 1 or 2 servings (9 CFR 317.309(b)(4)(v) and 381.409(b)(4)(v)).

Based on a review of recent research, FDA has determined that many consumers do not correctly calculate nutrient amounts in food products by multiplying the nutrient amount by the number of servings per container (79 FR 11998–11999). FDA also found that the exemption from the requirement to label a product with a large RACC as a single-serving container is no longer warranted because “there is a low correlation between the RACCs (whether the reference amount is more than or less than 100 g or mL) and the consumption variation for all products containing less than 200 percent of the RACC, regardless of whether the RACC is ‘large’ (*i.e.*, greater than 100 g or 100 mL) or not” (79 FR 12001). Under pre-existing FDA regulations, if a package or discrete unit of food with a “large” RACC contained more than 150 percent but less than 200 percent of the RACC, the manufacturer was permitted to decide whether to declare the package or individual unit as 1 or 2 servings (81 FR 34004–34008). The FDA Serving Size Final Rule, however, removed this exemption and, for products subject to FDA requirements, requires that all packages of food containing less than 200 percent of the RACC be labeled as a single serving (see 21 CFR 101.9(b)(6)), and that discrete units containing at least 67 percent of the RACC but less than 200 percent of the RACC be labeled as a single serving (see 21 CFR 101.9(b)(2)(i)(C)). FDA also removed the provision that products packaged and sold individually and containing 200 percent or more of the applicable RACC

may be labeled as a single serving if the entire contents of the container can reasonably be consumed at a single eating occasion (81 FR 34004–34008).

FSIS has reviewed FDA's research and analysis and tentatively agrees with FDA's conclusions. Therefore, FSIS is proposing to revise the requirements for single-serving labeling so that a product packaged and sold individually that contains less than 200 percent of the applicable RACC must be considered a single serving, and that a discrete unit containing at least 150 percent but less than 200 percent of the RACC must be labeled as one serving regardless of whether the RACC exceeds 100 g or mL (proposed 9 CFR 413.309(b)(8)).

2. Dual-Column Labeling

FSIS currently permits manufacturers to voluntarily provide an additional column of nutrition information (*i.e.*, dual column labeling) in the following situations:

- Per 100 g, 100 mL, or 1 oz of the product as packaged or purchased (9 CFR 317.309(b)(13)(i) and 381.409(b)(13)(i));
- Per one unit if the serving size of a product in discrete units in a multi-serving container is more than one unit (9 CFR 317.309(b)(13)(ii) and 381.409(b)(13)(ii));
- For the product alone if the product is commonly combined with other ingredients or is cooked or otherwise prepared before eating, and directions for such combination or preparations are provided (*e.g.*, a cream soup mix may be labeled with one set of DVs for the dry mix (per serving), and another set for the serving of the final soup when prepared (*e.g.*, per serving of cream soup mix and 1 cup of vitamin D fortified whole milk) (9 CFR 317.309(b)(15) and 381.409(b)(15));
- For two or more forms of the same product (*e.g.*, both “raw” and “cooked”) as provided in 9 CFR 317.309(b)(3) and (e) and 381.409(b)(3) and (e); and
- For two or more groups for which RDIs are established (*e.g.*, both infants and children less than 4 years of age) as provided in 9 CFR 317.309(c)(8)(i) and (e) and 381.409(c)(8)(i) and (e).

Research has shown that package and portion sizes have a considerable impact on the amount of food consumed, and that the size of the package or unit of food can set a consumption norm for consumers; that consumers do not correctly calculate nutrient amounts in food products by multiplying the nutrient amount by the number of servings per container; and that dual-column labeling with the nutrition information given per serving and per package may help certain consumers

recognize nutrient amounts per package in certain types of packaged food (79 FR 11998–11999). Therefore, consistent with FDA's Serving Size Final Rule, FSIS is proposing mandatory dual-column labeling on certain packages of meat and poultry products.

FSIS is proposing that meat and poultry products in packages or units that contain at least 200 percent and up to and including 300 percent of the applicable RACC be required to have two columns in the Nutrition Facts label. One column would list the quantitative amounts and percent DVs for the entire package or unit, and the other column would list the quantitative amounts and percent DVs for a serving, based on the amount most closely approximating the RACC, that is less than the entire package or unit (proposed 9 CFR 413.309(b)(4)(iv) and 9 CFR 413.309(b)(16)). FSIS is proposing an upper limit of 300 percent for dual-column labeling based on FDA's analysis that showed that “providing an upper limit at 300 percent of the RACC would ensure that dual-column labeling captures 90 percent of the consumption habits for about 91 percent of food products and limit the possibility that dual-column labeling will be required for package sizes that are not likely to be consumed in a single eating occasion” (81 FR 34015–34016). Providing nutrition information for these products in dual columns will make it easier for consumers, regardless of whether they consume the entire container or unit in a single eating occasion, consume part of the entire container or unit in a single eating occasion, or share the container or unit, to identify the amount of nutrients consumed without having to perform mathematical calculations.

FSIS is proposing that meat and poultry products in packages that meet the requirements to use a tabular display for small packages or to use a linear format be exempt from the dual-column labeling requirements (proposed 9 CFR 413.309(b)(16)(i)(A)). FSIS is also proposing that products that require further preparation and provide two columns of nutrition information (*e.g.*, one column “as purchased” and one column “as prepared”) would be exempt from the dual-column labeling requirements in proposed 9 CFR 413.309(b)(16). If products that already provide two columns of nutrition information for “as purchased” and “as prepared” forms of the product were required to have dual-column labeling with nutrition information per serving size and per the entire container, the products would have at least three columns of nutrition information, or

manufacturers would decide to no longer provide the voluntary information for the prepared form of the product. FSIS is also proposing that products that are commonly consumed in combination with another food and provide an additional column of nutrition information under proposed 9 CFR 413.309(e) be exempt from the dual-column labeling requirements in proposed 9 CFR 413.309(b)(16). Similar to the products that require further preparation, nutrition information based on the entire container of an uncombined food (e.g., the dry mix alone for a cream soup mix) (for a food that is commonly combined with another food) may be less meaningful to consumers than information on a serving of the combined food (e.g., per serving of cream soup mix and 1 cup of vitamin D fortified whole milk) because these types of products are commonly consumed in combination with another food. FSIS is also proposing that products that provide an additional column of nutrition information for two or more groups for which RDIs are established (e.g., both infants through 12 months and children 1 through 3 years of age) and random weight products be exempt from the dual-column labeling requirements (proposed 9 CFR 413.309(b)(16)(i)(C)). Information provided for subpopulations will be more useful to distinct populations for certain products than information per container or unit.

FSIS is proposing that the Nutrition Facts label for a meat or poultry product that is packaged and sold individually that contains more than 150 percent and less than 200 percent of the applicable reference amount, may voluntarily provide, to the left of the column that provides nutrition information per container (*i.e.*, per serving), an additional column that lists the quantitative amounts and percent Daily Values per common household measure that most closely approximates the reference amount (proposed 9 CFR 317.309(b)(8)).

3. Use of Nutrient Content Claims and Health Claims on Products With Dual-Column Labeling per Serving and per Container

RACCs set forth in 9 CFR 317.312(b)–(e) and 381.412(b)–(e) are currently used to determine whether a product meets the criteria for a nutrient content claim (9 CFR 317.313(p) and 381.413(p)). Consistent with the FDA Serving Size Final Rule, if nutrition information is presented on a per serving basis and on a per container or unit basis (*i.e.*, the proposed dual-column labeling requirements or if a dual-column is

provided voluntarily) on the Nutrition Facts Label, FSIS is proposing to require that the nutrient content claim be followed by a statement that sets forth the basis on which the claim is made (proposed 9 CFR 413.309(b)(16)(ii)). The statement must express the amount of the nutrient in a serving (e.g., “good source of calcium” “a serving of oz of this product contains mg of calcium” or for a health claim “A serving of ounces of this product conforms to such a diet”). However, if the serving size declared on the product label differs from the RACC, and the amount of the nutrient contained in the labeled serving does not meet the maximum or minimum amount criterion in the definition for the descriptor for that nutrient, FSIS is proposing that the claim must be followed by the criteria for the claim as required by proposed 9 CFR 413.313(p). This criteria statement would help clarify that the nutrient content claim or health claim is based on the RACC and not the amount in the entire container. FSIS is also proposing that this criteria statement would not be required for products when the nutrient that is the subject of the claim meets the criteria based on the entire container amount or the unit amount, as applicable (proposed 9 CFR 413.309(b)(16)(ii)).

4. Additional Changes to Serving Size Regulations

FSIS currently allows by policy the use of an ounce unit in the serving size, e.g., 4oz (112g), instead of a household unit, e.g., 1 piece (112g), when the size of the product naturally varies in weight and is not uniform in size (e.g., poultry parts, such as chicken breasts and chicken wings, and non-formed meat cuts, such as pork chops). Consistent with 21 CFR 101.9(b)(2)(i)(G), proposed 9 CFR 413.309(b)(4)(vii) would permit the use of an ounce unit in the serving size for products that naturally vary in size (e.g., poultry parts or non-formed cuts of meat).

Current FSIS regulations require the serving size to declare the as-packaged amount in accordance with 9 CFR 317.309(b)(3) and 381.409(b)(3). Consistent with 21 CFR 101.9(b)(7)(v), proposed 9 CFR 413.309(b)(9)(5) would permit the serving size to include the finished product amount as part of the serving size when water or other ingredients with insignificant amounts of nutrients are instructed to be added during preparation. For example, when the consumer is directed to add a specific amount of water to prepare a condensed soup, the serving size may state “ $\frac{1}{2}$ cup (120g) concentrated soup

(makes 1 cup prepared)” instead of “ $\frac{1}{2}$ cup (120g).”

Currently, FSIS requires the serving size for a product marketed for two different purposes, e.g., gravy or a soup, to be based on the larger serving size, e.g., soup (1 cup RACC) instead of gravy ($\frac{1}{4}$ cup RACC) (9 CFR 317.312 and 381.412). Consistent with 21 CFR 101.9(b)(11), proposed 9 CFR 413.309(b)(13)(iii) would require the Nutrition Facts label to include the nutrient information for both marketed serving sizes when the amount served for each differs in quantity by twofold or greater based on the RACC in accordance with proposed 9 CFR 413.313(b) (e.g., the Nutrition Facts label would provide nutrient data for both soup (1 cup) and gravy ($\frac{1}{4}$ cup) because the soup serving size is greater than twofold over the serving size for gravy).

M. Reference Amounts Customarily Consumed

1. Factors Considered To Determine the Existing RACCs To Update

The current RACCs for meat and poultry products are listed in 9 CFR 317.312 and 381.412, respectively. The RACCs represent the amount of food customarily consumed per eating occasion and are listed by product categories. The RACCs and product categories are used as the basis for determining serving sizes for specific products. The current RACCs were primarily derived from the 1977–1978 (<http://www.ars.usda.gov/Services/docs.htm?docid=16184>) and the 1987–1988 (<http://www.ars.usda.gov/Services/docs.htm?docid=16185>) Nationwide Food Consumption Surveys conducted by USDA. Since the current RACCs were established, there is new consumption data that shows that the amount of foods Americans customarily consume has changed, and there are new food products in the marketplace. Therefore, FSIS analyzed more up-to-date consumption data to determine whether the RACCs and product categories for meat and poultry products needed to be updated or revised.

FSIS analyzed the recent consumption data from the NHANES 2003–2008 surveys using Statistical Analysis Systems (SAS)³¹ and Survey Data Analysis (SUDAAN)³² procedures to determine the amount of food being consumed by individuals. FSIS

³¹ SAS version 9.2 Cary, NC, 2011 <http://www.sas.com/technologies/analytics/statistics/stat/index.html>.

³² SUDAAN version 10.1 Research Triangle Park, NC, 2011 http://www.rti.org/page.cfm/Survey_Statistics.

considered the following factors in determining whether to revise the 1993 RACCs and product categories: (1) Whether there was an adequate sample size from the NHANES 2003–2008 consumption data for the product category; (2) whether the median intake estimate from the NHANES 2003–2008 consumption data for the product significantly differs (*i.e.*, at least a 25 percent difference) from the 1993 RACC; (3) whether the intake distribution was skewed (based on comparing the median intake estimate with the mean intake estimate from the NHANES 2003–2008 consumption data); (4) the “reasonable consumption amount” from the Food and Nutrient Database for Dietary Studies (FNDDS)³³; (5) the difference between the median intake estimates, converted to common household measures as applicable, and the 1993 RACC for the product; (6) the median intake estimates for comparable products; and (7) the RACCs for comparable FDA-regulated products. More detailed information about how the factors were applied to change or not change the RACCs for a specific food product are contained in a rationale chart available on the FSIS Web site.³⁴ FDA used similar methodology for updating the RACCs for foods regulated by FDA. The following sections describe the proposed changes to the RACC tables in FSIS’s regulations.

2. Changes to Table 1: Reference Amounts Customarily Consumed per Eating Occasion: Food Labeling for Infants and Children 1 Through 3 Years of Age

FSIS is proposing to combine the tables containing the RACCs for infant and toddler foods that exist in 9 CFR 317.312 for meat products and 9 CFR 381.412 for poultry products into a new table for meat and poultry products in proposed 9 CFR 413.312 for infants and children 1 through 3 years of age. FSIS is also proposing to add a third column titled “label statement” to the RACC table to provide examples of how the “label statement” may appear in the Nutrition Facts label as a formatted serving size and to parallel the FDA proposed RACC table 1 (21 CFR 101.12(b)). The titles of the combined

product categories would stay the same, except the combined product category for meat sticks and poultry sticks would be titled “Plain meats, plain poultry, meat sticks, poultry sticks, ready to serve.”

FSIS is also proposing to change the RACC from 60 g to 110 g for the product category “Dinners, ready-to-serve, strained type.” The 2003–2008 median intake estimates for dinner, ready-to-serve, strained type poultry was 101.8 g, and dinner, ready-to-serve, strained type, meat was 88.9 g. FDA, which regulates products containing less than 2% cooked meat or poultry, and less than 3% raw meat, increased the RACC for the comparable product category, “Dinner, desserts, fruits, vegetables, or soups, ready-to-serve, strained type” from 60 g to 110 g. The 2003–2008 median intake estimates for these two product categories was 104 g and 103 g, respectively. The products in these FDA regulated product categories are comparable to the FSIS regulated product category, “Dinner, ready-to-serve, strained type, poultry” and “Dinner, ready-to-serve, strained type meat”, because all of the products have similar type usage and product characteristics as strained baby foods. In addition, the current RACC for “Dinner, soups, ready-to-serve junior type” is 110 g, and the same RACC for both strained type and junior baby foods would help consumers compare nutrition information.

FSIS is also proposing to update the footnotes to proposed RACC Table 1 as follows: Footnote 1 would be updated to include new data sources, footnote 2 would be updated to include “brown and serve” as a type of “almost ready-to-serve” product and to include “(*e.g.*, ready to serve)” after “prepared for consumption,” and footnote 4 would be added to explain the purpose and use of the third column titled “label statement” in RACC Table 1.

3. Changes to Table 2: Reference Amounts Customarily Consumed per Eating Occasion: General Food Supply

FSIS is proposing to combine the tables containing the RACCs for the general food supply that currently exist in 9 CFR 317.312 for meat products and 9 CFR 381.412 for poultry products into a new table for meat and poultry products in proposed 9 CFR 413.312. FSIS is proposing to include a third column titled “label statement” in the new RACC table for meat and poultry products. The “label statement” column, which provides similar examples to what FDA provides in FDA RACC table 2 (21 CFR 101.12(b)), provides examples of how serving size

statements may appear in the Nutrition Facts label as a formatted serving size. For example, the RACC for a raw poultry cut is 114 grams but the formatted serving size in the Nutrition Facts label would be based on instructions in proposed 9 CFR 413.309(b), for example, 4oz (112g).

FSIS is also proposing to change some of the RACCs and product categories, establish new product categories for the general food supply, and update the footnotes to RACC table 2 as follows.

In the product category “Egg mixtures (western style omelet, soufflé, egg foo young),” FSIS is proposing to combine the meat and poultry categories for egg mixtures into one product category. The new name for the product category would be “Egg mixtures with meat or poultry; *e.g.*, western style omelet, soufflé, egg foo young.” Egg mixtures with meat and egg mixtures with poultry are comparable products with similar dietary usage and product characteristics. The same RACC will help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for luncheon meat into one product category as follows, “Luncheon products, luncheon meat, bologna, poultry bologna, Canadian style bacon, poultry Canadian style bacon, meat or poultry pattie crumbles, blood pudding, meat or poultry luncheon loaf, old fashioned loaf, berlinger, bangers, minced luncheon roll, thuringer, liver sausage, mortadella, uncured sausage (franks), ham and cheese loaf, P&P loaf, scrapple souse, head cheese, pizza loaf, olive loaf, pate, deviled ham, sandwich spread, teawurst, cervelat, Lebanon bologna, potted meat or poultry food product, taco fillings, pie fillings.” Luncheon meat and luncheon products made with poultry are comparable products with similar dietary usage and product characteristics. The same RACC will help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for entrees without sauce into one product category as follows, “Entrees without sauce; *e.g.*, cuts of meat or poultry including marinated, tenderized, injected cuts of meat or poultry, patties, corn dogs, croquettes, fritters, cured ham, dry cured ham, dry cured cappicola, cured poultry ham products, corned beef, pastrami, country ham, pork shoulder picnic, meatballs, pureed adult foods.” Entrees without sauce made with meat or poultry are comparable products with similar dietary usage and product characteristics. The same RACC will

³³ The reasonable consumption amount is a default consumption amount of food that researchers have defined and is used in NHANES when survey participants cannot recall the amount of food that was consumed at one eating occasion. Agricultural Research Service, Food Surveys Research Group, “U.S. Department of Agriculture, Food and Nutrient Database for Dietary Studies, 4.1” Beltsville, MD, 2010.

³⁴ <http://www.fsis.usda.gov/wps/portal/ffsis/topics/regulations/federal-register/proposed-rules>.

help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for mixed dishes not measurable with a cup into one product category as follows, “Mixed dishes NOT measurable with a cup; *e.g.*, burrito, egg roll, enchilada, pizza, pizza roll, quiche, all types of sandwiches with meat or poultry, cracker and meat/poultry lunch type packages, gyro, Stromboli, burger on a bun, poultry burger on a bun, frank on a bun, poultry frank on a bun, calzone, taco, stuffed pockets, foldovers, stuffed vegetables with meat or poultry, shish kabobs, empanada, chicken cordon bleu.” Mixed dishes not measurable with a cup made with meat or poultry are comparable products with similar dietary usage and product characteristics. The same RACC will help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for mixed dishes measurable with a cup into one product category as follows, “Mixed dishes measurable with a cup; *e.g.*, casserole, macaroni and cheese with meat or poultry, pot pie, spaghetti with sauce, poultry spaghetti with sauce, meat or poultry chili, meat or poultry chili with beans, hash, creamed chipped beef, creamed dried poultry, ravioli in sauce, stroganoff, Brunswick stew, goulash, poultry a la king, meat or poultry stew, ragout, meat or poultry lasagna, meat or poultry filled pasta.” Mixed dishes measurable with a cup made with meat or poultry are comparable products with similar dietary usage and product characteristics. The same RACC (1 cup) will help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for “Salads-all other” into one product category as follows, “Salads—all other meat salads, all other poultry salads; *e.g.*, chicken salad, ham salad, turkey salad.” Salads made with meat and salads made with poultry are comparable products with similar dietary usage and product characteristics. The same RACC (100g) will help consumers compare nutrition information between these products.

FSIS is proposing to combine the meat and poultry categories for “Soups-all varieties” into one category as follows, “Soups with meat or poultry-all varieties.” Soups made with meat and soups made with poultry are comparable products with similar dietary usage and product characteristics. The same RACC (245g) will help consumers compare nutrition information between these products.

FSIS is proposing to create a new product category “Appetizers, hors d’oeuvres, Mini mixed dishes with meat or poultry; *e.g.*, mini bagel pizzas, mini egg rolls, dumplings, mini pizza rolls, mini quesadilla, mini quiche” with a RACC of 85 g ready-to-serve (plus 35 g for products with sauce toppings). Recently, several mini or snack-size versions of several products in the “Mixed dishes, not measurable with a cup” product category have become available, such as mini pizza rolls, mini egg rolls, mini quiche, and mini sandwiches. Also, since 1993, other miniature products (smaller individual piece products) that are often used as appetizers and hors d’oeuvres have become available in the market place. To accommodate appetizer type products, the USDA’s Guide to Federal Food Labeling Requirements for Meat and Poultry Products (2007)³⁵ includes a RACC of 85 g for “Appetizers (*e.g.*, meat (or poultry), hors d’oeuvres, mini eggrolls, mini pizza rolls, bagel pizza).” Miniature products with or without meat have similar dietary usage and product characteristics and are often used interchangeably by consumers. If the product is marketed for use with a sauce, FSIS is proposing to use 35 g for the amount of the sauce. This amount is calculated proportionally based on adding 55 g of sauce or gravy for a RACC of 140 g for the product category, “Mixed dishes not measurable with cup,” under the general category “Mixed Dishes.”

FSIS is proposing to create a new category “Appetizers, hors d’oeuvres—Dips with meat or poultry; *e.g.*, chicken dip, chicken and cheese dip, meat dip” with a RACC of 2 tbsp. ready-to-serve. Recently, dip products with amenable amounts of meat or poultry, for example, cheesy chicken dip and chicken dip, meant to be served with chips such as corn chips, have been introduced into the market place. The “All dips (*e.g.*, bean dips, dairy-based dips, salsa)” product category in FDA’s regulations is comparable to the proposed FSIS “Dip with Meat or Poultry” product category, because dips with meat or poultry have similar dietary usage and product characteristics as dips regulated by FDA. Therefore, FSIS is proposing to establish a RACC of 2 tablespoons for the proposed “Dip with Meat or Poultry” product category. Establishing

the same RACC for products with similar dietary usage, similar amounts customarily consumed, and product characteristics whether they are regulated by FDA or FSIS will help consumers compare nutrition information between these products.

FSIS is proposing to create a new product category “Candies with meat or poultry; *e.g.*, chocolate with bacon, chocolate dipped bacon, chocolate with salami” with a RACC of 30 g ready-to-serve. Recently, candies with amenable amounts of meat or poultry, for example, chocolate bars with bacon, chocolate dipped bacon, and chocolate bars with salami, have been introduced into the market place. Such products have been marketed as “Candies” based on information available from the Mintel Global New Products Database³⁶ for products that are currently available in the market, and they are comparable to products in the “All Other Candies” product category, which is regulated by FDA. FDA’s Serving Size Final Rule updated the RACC from 40 g to 30 g for the “All Other Candies” product category. Because the products in both FDA’s and FSIS’s candy product categories have similar usage and product characteristics, the same RACC (30g) for FDA’s “All Other Candies” product category and FSIS’s “Candies with meat or poultry; *e.g.*, chocolate with bacon, chocolate dipped bacon, chocolate with salami” product category will help consumers compare nutrition information between these products.

FSIS is proposing to combine the separate canned meat and poultry categories into one product category as follows, “Canned Meats (*e.g.*, canned beef, canned pork) and Canned Poultry (*e.g.*, canned chicken, canned turkey).” FSIS is also proposing to increase the RACC from 55 g to 85 g. There was an inadequate sample size for a reliable 2003–2008 intake estimate (82.1 g) for “Canned Meats,” and the 2003–2008 median intake estimate (89.5 g) for “Canned Poultry” did not show a significant change from the 1993 RACC. But, FDA updated the 1993 RACC for the “Fish, shellfish, and game meat, canned” product category from 55 g to 85 g. FDA’s “Fish, shellfish, and game meat, canned” product category is comparable to FSIS’s “Canned Meats (*e.g.*, canned beef, canned pork) and Canned Poultry” category. The same RACC for products with similar dietary usage and product characteristics whether regulated by FDA or FSIS will

³⁵ http://www.fsis.usda.gov/shared/PDF/Labeling_Requirements_Guide.pdf. 85 g for Appetizers is a suggested RACC provided in Guidance by USDA (see question 68 at <http://www.fsis.usda.gov/wps/portal/fsis/topics/regulatory-compliance/labeling/labeling-policies/fq-generic-labeling>).

³⁶ Mintel Global New Products Database (GNPD). Mintel Group Ltd. 333 West Wacker Drive, Suite 1100, Chicago, IL 60606. Internet: <http://www.gnps.com/sinatra/gnpsd/frontpage/> (accessed September 23, 2014).

help consumers compare nutrition information between these products. Therefore, FSIS is proposing that the RACC for “Canned Meats (*e.g.*, canned beef, canned pork) and Canned Poultry (*e.g.*, canned chicken, canned turkey)” be 85 g.

FSIS is proposing to include pork back fat into the category for “Bacon” with the category name of “Bacon; *e.g.*, bacon, beef breakfast strips, pork breakfast strips, pork rinds, pork back fat” because its use is most similar to that of bacon and pork rinds. FSIS is proposing the RACC for pork back fat to be 15 g ready-to-eat and 54 g ready-to-cook to reflect the previously established RACCs for bacon and pork rinds. The categories for bacon and poultry bacon products were not combined into one category because of their differing ready-to-cook RACCs. In addition, FSIS is proposing to modify the category name for poultry bacon to “poultry bacon, poultry breakfast strips” to clarify that these are different products as indicated by the differing ready-to-cook amounts from the 1993 regulation.

FSIS is proposing the following category names for the combined meat and poultry product categories that have the same RACC values and did not meet any of the factors for updating the RACCs: “Salad and potato toppers; *e.g.*, bacon bits, poultry bacon bits,” “Dried meat or poultry products; *e.g.*, jerky, dried beef or poultry, Parma ham, meat or poultry sausage products with a moisture/protein ratio of less than 2:1; *e.g.*, pepperoni,” “Snacks, *e.g.*, meat or poultry snack food sticks,” “Linked meat or poultry products, Vienna sausage, frankfurters, poultry franks, pork sausage, imitation frankfurters, bratwurst, kielbasa, Polish sausage, poultry Polish sausage, summer sausage, mettwurst, smoked country sausage, smoked sausage, poultry smoked sausage, smoked pickled meat or poultry meat, pickled pigs feet,” “Salads—pasta or potato, potato salad with bacon, potato salad with poultry, macaroni and meat or poultry salad,” “Major main entrée type sauce; *e.g.*, spaghetti sauce with meat or poultry, spaghetti sauce with meatballs, spaghetti sauce with poultry meatballs,” “Minor main entrée type sauce; *e.g.*, pizza sauce with meat or poultry, gravy,” and “Seasoning mixes dry, bases, extracts, dried broths and stock/juice, freeze dry trail mix products with meat or poultry: As reconstituted: Amount to make one Reference Amount of the final dish; *e.g.*, Gravy, Major main entrée type sauce, Soup, Entrée measurable with a cup.”

FSIS is proposing to update the footnotes to proposed 9 CFR 413.312 Table 2 as follows: Footnote 1 will be updated to include new data sources and to clarify that the RACC values presented in the table are for the “edible portion” of the food, and Footnote 6 will be added to explain the purpose and use of the “label statement” column.

N. Compliance

Currently, 9 CFR 317.309(h) and 381.409(h) provide information about how FSIS determines compliance with its nutrition labeling requirements, including the methods of analysis used, reasonable excesses and deficiencies of nutrients, acceptable levels of variance from declared values, and records requirements. FSIS is proposing to consolidate 9 CFR 317.309(h) and 381.409(h) into a single section (proposed 9 CFR 413.309(h)). The following discusses the additional revisions that FSIS will be proposing in 9 CFR 413.309(h), as compared to current 9 CFR 317.309(h) and 381.409(h).

1. Level of Variance Allowed for the Label Declaration of Specific Nutrients

Proposed 9 CFR 413.309(h)(5) establishes that a meat or poultry product with a label declaration of calories, sugars, added sugars (when the only source of sugars in the food is added sugars), total fat, saturated fat, cholesterol, or sodium shall be deemed to be misbranded under sections 1(n) of the FMIA (21 U.S.C. 601(n)(1)) or 4(h) of the PPIA (21 U.S.C. 453(h)) if the nutrient content of the composite is greater than 20 percent in excess of the value for that nutrient declared on the label. However, no regulatory action will be based on such a determination if the excess is less than the inherent nutrient variation in a product or the variability generally recognized for the analytical method used in that product at the level involved. FSIS is not proposing to change the level of variance allowed for the label declaration of nutrients.

2. Methods Used To Determine Compliance

Under proposed 9 CFR 413.309(h)(2), a sample for nutrient analysis must consist of at least six consumer units, each from a production lot, or alternatively, chosen randomly to be representative of a production lot. In each case, the units may be individually analyzed, and the results averaged, or the units may be combined, and the composite analyzed. FSIS will consider the results—whether the average or the

single result from the composite—to be the nutrient content of the composite. All analyses must be performed, if possible, by the appropriate methods and procedures used by the U.S. Department of Agriculture (USDA) for each nutrient in accordance with the “Chemistry Laboratory Guidebook.” If no USDA method is available, the appropriate methods for the nutrient in accordance with the 2016 edition of the “Official Methods of Analysis” of the AOAC International, 20th ed., must be used, unless a particular method of analysis is specified in 9 CFR 413.309(c). If no USDA, AOAC, or specified method is available or appropriate, any other reliable and appropriate analytical procedures may be used, as determined by FSIS. The current edition (20th ed.) of the “Official Methods of Analysis” includes many updates to the 15th edition.

When FSIS issued 9 CFR 317.309(h) and 381.409(h) on compliance with nutrition labeling requirements, the most current version of the AOAC methods was its 15th edition, and, therefore, FSIS identified the 15th edition in its regulation. Newer and better methods of analysis have since been validated and recognized as “official” methods in the current 20th edition. Accordingly, FSIS is proposing, in 9 CFR 413.309(h)(2), to use the 20th edition and incorporate it by reference in 9 CFR (h)(9)(i). The “Official Methods of Analysis of AOAC International” is a comprehensive collection of chemical and microbiological methods of analysis. The Official Methods of Analysis have undergone rigorous scientific review and validation to determine the performance characteristics for the intended analytical application and fitness for purpose. Each method includes specific instructions for performing the chemical analysis of a substance in a particular matrix. If a newer edition of the Official Methods of Analysis is published before issuance of a final rule, FSIS intends to finalize this rule with the newer edition, as appropriate, provided there are no substantive changes in the newer edition requiring additional comment.

FSIS does not currently sample or conduct routine nutrient analyses of products for regulatory purposes because FSIS has not, in the past, found gross non-compliance with the nutrition labeling requirements (*i.e.*, large variations in the nutrient content of the samples compared to the declared nutrition information provided on product labels). FSIS, for a limited period of time, is conducting surveillance sampling for nutrient content of raw ground beef samples

collected for pathogen analysis, such as Shiga toxin-producing *Escherichia coli* (STEC) and *Salmonella*, to ascertain compliance with the recent nutrition labeling requirements for raw ground product packages. FSIS randomly analyzes samples of raw ground beef products in consumer-ready packaging bearing a Nutrition Facts label that have already been collected for pathogen analysis at Federally-inspected establishments. In addition, when Office of Investigation, Enforcement and Audit (OIEA) Investigators collect samples of raw ground beef in consumer-ready packaging bearing a Nutrition Facts label at retail for pathogen analysis, the FSIS laboratory also randomly selects some of these samples for nutrient content analysis. The nutrient content results are non-regulatory and are for surveillance purposes only at this time. If there is a discrepancy between the laboratory results and the Nutrition Facts label, LPDS directly contacts the establishment or the OIEA-Compliance and Investigation Division Regional Director with the results of the nutrient content testing.

FSIS will explore its regulatory options, including seeking criminal penalties or rescinding label approvals, if it discovers a violation of the nutrition labeling requirements. In addition, FSIS will consider when additional surveillance sampling for nutrient content should be conducted for various products, as well as when regulatory verification testing should occur.

3. Records Requirements

Currently, FSIS regulations require that establishment management maintain records to support the validity of nutrient declarations contained on meat and poultry product labels (9 CFR 317.309(h)(8) and 381.409(h)(8)). Such records are required to be made available to the inspector or any duly authorized representative of FSIS upon request (9 CFR 317.309(h)(8) and 381.409(h)(8)). These records are generally required to be retained for 2 years (9 CFR 320.3 and 381.177). FSIS is proposing to consolidate the requirements in 9 CFR 317.309(h)(8) and 381.409(h)(8) into proposed 9 CFR 413.309(h)(8).

As discussed in sections II.E.5.a. (dietary fiber), II.E.5.b. (soluble and insoluble fiber), II.E.3. (added sugars), II.J.2. (vitamin E), and II.J.3. (folate), there are no suitable analytical procedures for measuring the following nutrients under the circumstances described: (1) Dietary fiber (when non-digestible carbohydrates that do and do not meet the proposed definition of dietary fiber are both contained in a

food product); (2) soluble fiber (when a mixture of soluble fiber and non-digestible carbohydrates that do not meet the definition of dietary fiber is present in a food); (3) insoluble fiber (when a mixture of insoluble fiber and non-digestible carbohydrates that do not meet the definition of dietary fiber is present in a food); (4) added sugars (when a food product contains both naturally occurring sugars and added sugars); (5) vitamin E (when a food product contains both RRR- α -tocopherol and all rac- α -tocopherol); and (6) folate (when a food product contains both folate and folic acid).

Because there are no reliable or appropriate analytical procedures available for FSIS to ensure that the declared nutrient amount for certain nutrients is truthful, accurate, and in compliance with all applicable labeling requirements, FSIS is proposing to require specific recordkeeping for certain nutrients. FSIS is proposing to require that manufacturers make and keep written records to verify the declaration of: (1) The amount of added non-digestible carbohydrates that do not meet the proposed definition of dietary fiber when the dietary fiber present in a food is a mixture of dietary fiber and non-digestible carbohydrates that do not meet the definition of dietary fiber (proposed 9 CFR 413.309(h)(8)(i)); (2) the amount of added non-digestible carbohydrates that do not meet the proposed definition of dietary fiber when the food contains a mixture of soluble fiber and non-digestible carbohydrates that do not meet the definition of dietary fiber (proposed 9 CFR 413.309(h)(8)(ii)); (3) the amount of added insoluble non-digestible carbohydrates that do not meet the proposed definition of dietary fiber when the food contains a mixture of insoluble fiber and non-digestible carbohydrates that do not meet the definition of dietary fiber (proposed 9 CFR 413.309(h)(8)(iii)); (4) the amount of added sugars added to the food during the processing of the food, and if packaged as a separate ingredient, as packaged (whether as part of a package containing one or more ingredients or packaged as a single-ingredient), when both naturally occurring and added sugars are present in a food (proposed 9 CFR 413.309(h)(8)(iv)); (5) (a) scientific data and information that demonstrate the amount of added sugars in the food after non-enzymatic browning or fermentation and a narrative explaining why the data and information are sufficient to demonstrate the amount of added sugars declared in the finished food, provided the data and information

used is specific to the type of food manufactured; or (b) records of the amount of sugars added to the food before and during the processing of the food, and if packaged as a separate ingredient, as packaged (whether as part of a package containing one or more ingredients or packaged as a single ingredient) and in no event shall the amount of added sugars declared exceed the amount of total sugars on the label (proposed 9 CFR 413.309(h)(8)(v)); (6) the amount of all rac- α -tocopherol added to the food and RRR- α -tocopherol in the finished food when a mixture of both forms of vitamin E is present in a food (proposed 9 CFR 413.309(h)(8)(vi)); and (7) the amount of synthetic folate or folic acid added to the food and the amount of naturally-occurring folate in the finished food, when a mixture of folate and folic acid is present in a food (proposed 9 CFR 413.309(h)(8)(vii)).

Most manufacturers should already have the types of records needed to validate the declared amount of each nutrient. They are in the best position to know which records will contain the information necessary for FSIS to determine compliance. These records may include analyses of databases, recipes or formulations, or batch records. FSIS recognizes that the nutrient profile of processed foods that have dietary fiber, soluble fiber, insoluble fiber, added sugars, vitamin E, or folate/folic acid can vary depending on the recipe or formulation, the suppliers of ingredients, and other factors. Although the nutrient levels in foods may change if a manufacturer changes ingredient suppliers or recipes, manufacturers still need to ensure that the records they maintain substantiate the nutrient composition of the specific food. Therefore, manufacturers must be able to distinguish among the same or similar products they have in the marketplace that may contain differing amounts of a declared nutrient. The records required under proposed 9 CFR 413.309(h)(8) must be available for review and copying while the product is available for purchase in the marketplace. There is a wide range of shelf lives among food products. The current retention period for nutrition labeling records under 9 CFR 320.3 and 381.177—a period not to exceed two years after December 31 of the year in which the transaction to which the record relates has occurred—will be sufficient to enforce the nutrient declarations on the nutrition labels.

4. Inclusion of Potassium as a Mineral

Potassium is currently the only vitamin or mineral specified as a Class I and Class II nutrient in 9 CFR

317.309(h)(4)(i–ii) and 381.409(h)(4)(i–ii). Potassium is a mineral for which an RDI is being proposed (proposed 9 CFR 413.309(c)(8)(iv)), and the absolute amount would be required to be declared along with a percent DV on the Nutrition Facts label. FSIS has tentatively concluded that there is no need to separately list potassium under the description of Class I and Class II nutrients because it is encompassed within the minerals category. Therefore, FSIS is proposing to omit a specific reference to potassium in proposed 9 CFR 413.309(h)(4) and (h)(6). Any listing of potassium on the Nutrition Facts label will have to meet the specific compliance requirements for minerals under 9 CFR 413.309(h)(4) and (h)(6).

5. Requirements for Other Carbohydrate, Soluble and Insoluble Fiber, Added Sugars, and Sugar Alcohols

The labeling requirements for Class I and Class II nutrients are provided in proposed 9 CFR 413.309(h)(4). For the reasons discussed in section II.E.6., FSIS is proposing to omit the provision for voluntary declaration of “Other carbohydrate” in proposed 9 CFR 413.309(c)(6) that is in 9 CFR 317.309(c)(6)(iv) and 381.409(c)(6)(iv). Therefore, FSIS is proposing to omit the compliance requirements related to “Other carbohydrate” in proposed 9 CFR 413.309(h)(4) and (h)(6) that are in 9 CFR 317.309(h)(4) and (h)(6) and 381.409(h)(4) and (h)(6).

Dietary fiber is included as both a Class I and Class II nutrient because food products may contain only non-digestible carbohydrates that meet the definition of dietary fiber and that may be naturally occurring or that may be added to fortified or fabricated foods. The same is true for soluble and insoluble fiber, yet these nutrients are not currently listed as Class I or Class II nutrients (see 9 CFR 317.309(h)(4) and 381.409(h)(4)). Therefore, FSIS is proposing to include dietary fiber in 9 CFR 413.309(h)(4) as both a Class I and Class II nutrient.

Currently, 9 CFR 317.309(h)(5) and 381.409(h)(5) (consolidated in proposed 9 CFR 413.309(h)(5)) specify that a food with a label declaration of calories, sugars, total fat, saturated fat, cholesterol, or sodium is deemed to be misbranded under section 1(n) of the FMIA (21 U.S.C. 601(n)(1)) or 4(h) of the PPIA (21 U.S.C. 453(h)) if the nutrient content of the composite is greater than 20 percent in excess of the value for that nutrient declared on the label. The nutrients listed in this section can have a negative impact on health in the general U.S. population if consumed in excess, and there are current dietary

recommendations to reduce the consumption of these nutrients. Therefore, FSIS is ensuring in proposed 9 CFR 413.309(h)(5) that foods do not contain excessive amounts of these nutrients of which the consumer is unaware.

Current dietary recommendations acknowledge that Americans consume excess amounts of added sugars and encourage reducing intake of calories from added sugars. A FSIS has an interest in ensuring that foods do not contain excessive amounts of added sugars that are not declared on the label (see section II.E.3) and is proposing to include added sugars in 9 CFR 413.309(h)(5). In some food products, all of the sugars are added. In such cases, an analytical method could be used to determine the amount of added sugars, and the permitted analytical variability would be applicable. Accordingly, FSIS is proposing to include “added sugars (when the only source of sugars in the food is added sugars)” among the list of nutrients in proposed 9 CFR 413.309(h)(5).

Reasonable excesses or deficiencies in relation to certain declared nutrients are acceptable within current good manufacturing practice. FSIS is proposing to allow reasonable excesses over the labeled amount of soluble and insoluble fiber and sugar alcohols when they are acceptable within current good manufacturing practice, and reasonable deficiencies under labeled amounts of added sugars when they are acceptable within current good manufacturing practice (proposed 9 CFR 413.309(h)(6)). FSIS expects that when a food product only contains added sugars, when all of the dietary fiber (both soluble and insoluble) is added non-digestible carbohydrates that meet the definition of dietary fiber, when all of the vitamin E is all *rac*- α -tocopherol, and when only folic acid is present in a food, the declared amount must be at least equal to the amount of the nutrient added to the food.

In summary, FSIS is proposing the following changes related to compliance in 9 CFR 413.309(h) as compared to current 9 CFR 317.309(h) and 381.409(h): (1) Cite the 20th edition of the Official Methods of Analysis of the AOAC International and incorporate it as the reference for the appropriate methods used to determine compliance with amounts of nutrients declared on the Nutrition Facts label (proposed 9 CFR 413.309(h)(2) and (h)(9)(i)); (2) establish general recordkeeping requirements when records are necessary to verify information related to dietary fiber, soluble and insoluble fiber, added sugars, folate, and vitamin

E provided on the label (proposed 9 CFR 413.309(h)(8)); (3) omit a specific reference to potassium in proposed 9 CFR 413.309(h)(4)(i–ii) and (h)(6) such that any listing of potassium on the Nutrition Facts label would meet the specific compliance requirements for minerals under proposed 9 CFR 413.309(h)(4) and (h)(6); (4) include dietary fiber, under proposed 9 CFR 413.309(h)(4); (5) include added sugars within proposed 9 CFR 413.309(h)(5) such that the label declaration of added sugars will be deemed misbranded under sections 1(n) of the FMIA (21 U.S.C. 601(n)(1)) or 4(h) of the PPIA (21 U.S.C. 453(h)) if the nutrient content of the composite is greater than 20 percent in excess of the added sugars declared on the label, and within proposed 9 CFR 413.309(h)(6) such that reasonable deficiencies of added sugars would be permitted; (6) include soluble and insoluble fiber and sugar alcohols within proposed 9 CFR 413.309(h)(6) such that reasonable excesses of these nutrients would be permitted; and (7) consistent with the tentative conclusion in section II.E.6., omit references to “Other carbohydrate” in proposed 9 CFR 413.309(h).

O. Technical Amendments

FSIS is proposing to update the name of Food Labeling Division in proposed 9 CFR 413.312 and 413.369 to the Labeling and Program Delivery Staff, Office of Policy and Program Development. FSIS is also proposing to update the docket room address in proposed 9 CFR 413.309.

Proposed 9 CFR 413.400(a)(1)(ii) is updated to remove compliance criteria that expired in July 1997.

FSIS is proposing to update the cross-references to parts 317 and 381 in sections 301.2, 304.2, 316.8, 316.11, 316.13, 317.16, 318.10, 319.1, 319.10, 320.1, 327.15, 362.2, 381.172, 381.2, and 412.2.

III. Executive Order 12866 and Executive Order 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rule has been designated an “economically significant regulatory

action” under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget.

Need for the Rule

The USDA began requiring nutrition and serving size information on food labels in the early 1990’s (58 FR 632). The requirements were intended to provide producers with a credible way of communicating nutrient related information to consumers and ensure consumers had access to the necessary information for maintaining a healthy diet. Today, nearly 80 percent of U.S. adults report using nutrition labels at

least some of the time.³⁷ Table 1—Use of Nutritional Facts Label by Average Daily Caloric, Sodium and Sugar Intake from Food at Home. However, over the past 20 years American caloric and nutritional consumption and recommendations³⁸ for daily nutrition requirements have changed and no longer match the current nutrition labeling requirements. This gradual reversion to underlying information asymmetries raises concerns over the usefulness of the information provided on nutritional facts and serving size labels. In addition, consumer groups have raised concerns over the required formats. According to national

consumer surveys,³⁹ a sizeable number of consumers effectively lack access to the provided information because of their inability to simply read or quickly comprehend nutritional labels, leading to inadequate information distribution. The proposed rule seeks to correct the market failures caused by asymmetric and inadequate information by ensuring that nutritional and serving size requirements for FSIS products is consistent with FDA’s requirements and are based on current diets and nutritional needs as well as addressing those issues that inhibit consumers from using this information.

TABLE 1—USE OF NUTRITIONAL FACTS LABEL BY AVERAGE DAILY CALORIC, SODIUM AND SUGAR INTAKE FROM FOOD AT HOME

Nutritional facts label use	Portion of the population ¹	Caloric intake ² (kcal)	Sodium intake ² (mg)	Sugar intake ² (mg)
Always or Most of the Time	102,281,465 (43%)	1,439	2,327	85
Sometimes	83,877,978 (36%)	1,462	2,325	89
Rarely	33,653,297 (14%)	1,554	2,429	103
Never	15,807,324 (7%)	1,741	2,517	122

¹ Population includes all individuals 16 years of age and older.

² Intake values are limited to food consumed at home.

Source: NHANES. 2013. “Questionnaires, Datasets, and Related Documentation” Centers for Disease Control and Prevention. Accessed on 5/6/2014. Government labeling requirements provide producers with a credible way to communicate product attributes that are not obvious to consumers, *e.g.*, calorie count or amount of fiber per serving. In this manner, labeling requirements allow producers to compete based on nutritional quality. In turn, consumers use nutritional fact and serving size labels to select products with desired qualities and tie individual decisions to overall health impacts.⁴⁰ More than 185 million adults reported referencing the Nutrition Facts label at least some of the time.⁴¹ Further still, recent research conducted by the

Economic Research Service indicated that use of nutritional and health information is on the rise.⁴² The 2008 Health and Diet Survey conducted by the FDA provides further insight into food label use.⁴³ When consumers were asked “when you buy a product for the first time, how often do you read (ingredient and nutrition) information,” 54 percent reported often, and 23 percent reported sometimes. Ninety percent of label users reported using food labels to see how high or low the food is in calories and macro- and micro-nutrients like sodium, fat, or vitamins either often or sometimes (66

percent often, 24 percent sometimes). Lastly, 49 percent of survey respondents affirmed that during the previous two weeks, they had based a decision to buy or use a food product based on the nutrition label. Clearly, many consumers demand and use nutritional information on food labels. However, the changes in consumers’ diets and basing the nutrition facts and serving size labels on outdated recommendations does not clearly and conspicuously reveal the essential information to consumers.

As is shown on Graph 1, from 1971–2010, mean energy intake increased by 240 kcal/day⁴⁴ although recent reports suggest overweight and obesity has leveled-off nationally and even declined in certain groups.⁴⁵ During this period, an emphasis on health aspects such as “low in sodium” or “low in fat” led consumers to disregard other pertinent health information, e.g., calorie count, sugars and serving size, leading to overconsumption.⁴⁶ Between 1970 and 2005, sugars and sweeteners available for consumption increased by 19 percent. This increase in supply enabled

an increase in consumption such that by 2004, the daily sugar intake for men and women averaged 25.4 tsp (406 kcal) and 18.3 tsp (292 kcal) respectively.⁴⁷ From 2007–2010, children and adults consumed more than double the amount of recommended added sugars, with lower income individuals consuming more added sugars than higher income individuals.⁴⁸ For perspective, the 2015–2020 Dietary Guidelines for Americans recommends less than 10 percent of calories per day from added sugars combined, yet added sugars alone contributed an average of 16

percent of the total calories in American diets. The increase in caloric density worsened the negative health impacts associated with overconsumption. Updating nutrition facts and serving size labels so as to take into consideration current consumption patterns, dietary recommendations, and scientific evidence will help producers credibly communicate hard to distinguish product attributes as well as aid current and future label-users overcome the issues presented above.

Of those U.S. adults who rarely or never use Nutrition Facts labels, over 31 million of them are overweight or obese; conditions linked to increased incidence of coronary heart disease, stroke, type 2 diabetes, cancer, and high blood pressure. For perspective, overweight and obese individuals spend

10 and 43 percent more money on health care as compared to normal weight individuals, respectively.⁴⁹ Overall annual medical expenditure caused by overweight or obesity has been estimated to account for between 5 and 7 percent of national medical expenditures⁵⁰ and is projected to

increase to 17 percent by 2030.⁵¹ With regard to health care providers, obesity accounts for 8.5 percent of Medicare spending, 12 percent of Medicaid spending, and 13 percent of private payer spending.⁵²

A daily energy surplus of 50–100 kcals will lead to overweight and

obesity.⁵³ Thus, the 92–279 kcal difference in kcals consumed at home between those who rarely or never read labels as compared to those who at least sometimes read labels is understood to be significant, Table 1—Use of Nutritional Facts Label by Average Daily Caloric, Sodium and Sugar Intake from Food at Home. When asked why they did not use nutritional labels, approximately 10 percent of overweight respondents exclusively had issues related to readability and comprehensibility: The print is too small, they would not know what to look for, or they do not have enough time. Addressing these design limitations would provide consumers with information that will convey relevant nutrition information.

These modest reductions are known to lead to significant benefits in the form of weight loss, health improvements, and reduced medical expenditures.⁵⁴ These issues can be addressed by altering the design and content of nutritional and serving size labels, *e.g.*, reducing the variance between food labels by more closely aligning FSIS's requirements with FDA's, providing a calorie count for the entire package and/or utilizing a dual column layout when appropriate, along with increasing and bolding the font size for the most salient information.

In total, the USDA and FDA regulate roughly 50,000⁵⁵ and 740,000⁵⁶ labels. The proposed rule reduces the amount of inconsistent information across FSIS and FDA products by more closely aligning nutrition labeling requirements with FDA's final changes, which ensures that food nutrition information is consistent across food products. This proposed rule allows nutrition labeling to more accurately reflect current

dietary guidelines and is more easily understood by consumers. As will be detailed in the following sections, the magnitude of the sum of public health benefits brought about by even a small change in consumer behavior because of the information provided by the label warrants the proposed rule.

Baseline

FSIS estimates that there are roughly 50,000 different retail nutrition labels for meat or poultry products, roughly 25 percent of which are private labels (store brand). The Agency estimates that FSIS products are produced by 3,307 establishments, of which, 3,125 are considered either small or very small establishments. The number of labels and establishments is based on Information Resources, Incorporated (IRI) scanner data⁵⁷ and the Small Business Administration's (SBA's) business size classifications.

There are almost 50 million adults who rarely or never use the Nutrition Facts label. Of this population, nearly 32 million are overweight, are obese, or have hypertension, Table 11 and 12. FSIS estimated this proposed rule would impact a portion of these consumers by increasing the usability of nutrition labeling which will, in turn, improve their health and welfare.

Expected Costs of the Proposed Rule

Quantitative costs for the proposed rule include relabeling, recordkeeping, and reformulation costs. FSIS anticipates allowing a 24-month compliance period with a 36-month compliance for small businesses,⁵⁸ consistent with FDA's final rules (81 FR 33742 and 81 FR 34000). On December 1, 2014, FSIS issued a final rule that established January 1, 2018, as the uniform compliance date for new meat

and poultry product labeling regulations that are issued between January 1, 2015 and December 31, 2016 (79 FR 71007). However, according to the uniform compliance date final rule, if any food labeling regulation involves special circumstances that justify a compliance date other than the uniform compliance date, FSIS will determine an appropriate compliance date and will publish that compliance date in the rulemaking (79 FR 71008). FSIS is proposing not to use the uniform compliance date for a final rule resulting from this proposed rule because, depending on when the final rule is published, the use of the uniform compliance date may result in a compliance period of less than 24 months.

The combined expected annualized costs equal \$10.8 million annualized at a 3 percent rate over 20 years. The one-time costs, staggered over the first three years, are \$165,540,072. In addition, consumers will incur costs associated with learning how to use new labels, which is a form of qualitative costs. What follows are details for each of the quantitative costs.

Relabeling Costs

To estimate the costs associated with relabeling products under USDA jurisdiction, this analysis utilized the 2014 FDA Labeling Cost Model⁵⁹ and Information Resources, Inc. (IRI) scanner data. The cost of relabeling depends on the number of labels required to change, whether or not the change can be coordinated with another label update, and the type of label change (extensive, major or minor). To determine the number of FSIS regulated labels in the retail market, we relied on IRI scanner data. Overall, there are 56,905 labels in the retail market under FSIS jurisdiction (14,056 private and 42,849 branded), though some are exempt from nutrition labeling per 9 CFR 317.400 and 381.500. To find the number of labels that are exempt, we utilized data from IRI and the National Meat Case Study. Data from IRI estimates 30.64 percent (3,619 private and 13,806 branded labels) of meat and poultry products are fresh in the retail market, thus possibly eligible for a labeling exemption. Of these products, approximately 39 percent do not have

⁵⁸ Small Businesses are based on the Small Business Administration (SBA) size standards. The SBA defines a small business in NAICS code 311611—Animal (except Poultry) Slaughter and NAICS code 311612—Meat Processed from Carcasses as having less than 1,000 employees. A business in NAICS code 311615—Poultry Processing has a small business standard of less than 1,250 employees and NAICS code Seafood Product Preparation and Packaging has a less than 750-employee standard.

nutrition labeling.⁶⁰ Therefore, we estimate there are 50,110 FSIS labels

with nutrition labeling; 12,645 private (14,056 – (3,619 × 39%)) and 37,465

branded (42,849 – (13,806 × 39%)). See Table 2 below for details.

TABLE 2—TOTAL NUMBER OF FSIS UPCs WITH NUTRITION FACTS LABELS

Type of label	Total FSIS labels	Number of UPCs exempt from NFL	Total FSIS UPCs with NFL
Branded	42,849	5,384	37,465
Private	14,056	1,411	12,645
Total	56,905	6,795	50,110

Using SBA's small business definition of small business and IRI scanner data, FSIS estimates 53.6 percent of UPCs are from small businesses and 46.4 percent of UPCs are from large. The 26,859 UPCs (53.6 percent of 50,110) from small manufacturers have 36 months to comply with the proposed regulations and the 23,251 (46.4 percent of 50,110) from large manufacturers will have 24 months to comply. In total, there are 6,778 private labels (12,645 × 53.6%) and 20,081 branded labels (37,465 × 53.6%) for small businesses, and 5,867 private labels (12,645 × 46.4%) and 17,384 branded labels (37,465 × 46.4%) for large businesses. The Small Business Administration (SBA) defines a small business in NAICS code 311611—Animal (except Poultry) Slaughter and NAICS code 311612—Meat Processed from Carcasses as having less than 1,000 employees.⁶¹ A business in NAICS code 311615—Poultry Processing has a small business standard of less than 1,250 employees and NAICS code Seafood Product Preparation and Packaging has a less than 750-employee standard.⁶²

To adjust for inflation in the 2014 FDA Labeling Cost Model, we updated the wage rates using the most current (2015) wages and applied a benefits and overhead factor of two to estimate the total cost per type of label change. The cost estimates in 2015 U.S. Dollars (USD) are \$572 per label (with a range of \$141 to \$1,620) for minor coordinated changes and \$3,887 per label (with a

range of \$1,842 to \$7,741) for minor uncoordinated changes (FDA Labeling Cost Model, 2014). The cost estimates in 2015 USD are \$1,152 per label (with a range of \$296 and \$3,204) for major coordinated changes and \$9,401 per label (with a range of \$5,125 to \$17,400) for major uncoordinated changes. The cost estimate in 2015 USD is \$13,858 per label (with a range of \$7,038 and \$25,399) for both coordinated and uncoordinated extensive changes.

Based on FDA's Labeling Cost Model, the majority of the label changes required by the proposed rule are considered minor. Minor changes are categorized as alterations that do not require the entire label to be redesigned, e.g., changing a single color or updating the ingredient list. In contrast, a major change requires completely redesigning a label, e.g., changing multiple colors or modifying the front of the package. An extensive change is a major format change requiring a modification to the product packaging to accommodate labeling information. An example of an extensive change is increasing the package surface area.

Over 24 percent of the labels will undergo a major change; 22.8 percent (11,432/50,110) for the dual column and 1.6 percent (805/50,110) for removing a front of package (FOP) health or nutrient claim in response to changes in the DVs, RACCs, or the definition of dietary fiber, Table 3. The estimate of products requiring a dual column label was

determined using IRI scanner data and identifying packaged products containing between 200 to 300 percent of the RACC. From this group, packaged products that required further processing before consuming or that are traditionally eaten in combination with other products, such as raw meat, poultry, and condiments, were excluded as they are exempted from the dual column labeling requirements. Alterations of health and nutrient claims were dependent on updates in Daily Values, RACCs, or the definition of dietary fiber.

Extensive changes are changes for products that may increase their package size to continue to make a health or nutrient content claim in response to the change in definition of a single-serving container. The proposed rule requires products that have RACCs of 100 g or larger and are packaged such that they contain more than 150 percent but less than 200 percent of the RACC to be defined as a single-serving container. Using IRI scanner data, we identified the UPCs with RACCs over 100 g that contain more than 150 percent but less than 200 percent of the RACC and that make a health or nutrient content claim. Based on these criteria, we estimate 13 UPCs may have an extensive change due to increasing the package size to continue to make a health or nutrient content claim. See Table 3 below for details.

TABLE 3—NUMBER OF LABEL CHANGES BY TYPE OF LABEL CHANGES

Type of change	Description of change	Number of UPCs
Major	Dual Column Label	11,432
	FOP claim and RACC, Daily Value, or fiber change	805
Extensive	Over 100 g RACC and FOP claim	13
Minor	Total Minor Change	37,860

TABLE 3—NUMBER OF LABEL CHANGES BY TYPE OF LABEL CHANGES—Continued

Type of change	Description of change	Number of UPCs
Total Number of NFL under USDA Jurisdiction	50,110

As shown in Table 4—Label Changes That Can Be Coordinated with a Planned Change, private (store brand) labels change less frequently than branded labels. Allowing a producer to coordinate a required label change with a planned change saves costs associated with recordkeeping, labor, and materials. As such, under a 24 month compliance period for large businesses, changes to all branded labels will be

coordinated with another planned label change. However, for private (store brand) labels only 26 percent will be coordinated with another change, and 74 percent will be uncoordinated. Allowing small businesses 36 months to comply, all branded products can coordinate a change and 57 percent of private labels can coordinate the label changes, Table 4—Label Changes That Can Be Coordinated with a Planned

Change. As a result, the mid-point annualized cost at a 3 percent discount rate over 20 years for updating all of the labels under USDA jurisdiction is estimated to equal \$4,484,734, with an average per label one-time cost of \$1,371, Table 5. The total one-time cost, staggered over the total 36-month compliance period, is \$68,723,156 with a range of \$26,933,776 to \$159,581,369.

TABLE 4—LABEL CHANGES THAT CAN BE COORDINATED WITH A PLANNED CHANGE

Compliance period (months)	Branded (percent)	Private label (percent)	Weighted average ¹ (percent)
12	11	5	10
18	37	15	32
24	100	26	82
30	100	40	85
36	100	57	89
42	100	100	100

¹ Based on IRI data analysis, 25% of FSIS labels are private and 75% are branded.

Per label Annualized Cost (3% DR, 20 Year)	35	89	208
Per label Annualized Cost (7% DR, 20 Year)	47	121	281

Recordkeeping Cost

This proposed rule requires that under certain circumstances manufacturers must maintain additional records to verify the amount of added

sugars, dietary fiber, soluble fiber, insoluble fiber, vitamin E, and folate/folic acid in products. Thus, if adopted, manufacturers will be required to maintain records sufficient to verify the label declaration for these nutrients.

Examples of appropriate retained records include nutrient database analyses, nutrient database calculation based on recipes or formulations, batch records, or any other information a

manufacturer retains which verify the nutrient content in the final product.

We assume that manufacturers currently have records for added sugars, dietary fiber, soluble fiber, insoluble fiber, vitamin E, and folate/folic acid. However, the proposed changes will require manufacturers to maintain these records and verify as needed. Thus, the recordkeeping cost is the initial time burden for meat and poultry product manufacturers to maintain these records to verify the amount of such nutrients in a food and to make such records available to appropriate regulatory officials upon request. From IRI scanner data, we estimate there are roughly

3,307 manufacturers making products regulated by FSIS. The declaration of Vitamin E and folate/folic acid is not mandatory unless accompanied with a nutrient claim. However, consistent with FDA's Final RIA, FSIS estimates each manufacturer would incur six hours of recordkeeping burden, one hour for each nutrient, resulting in 19,842 recordkeeping hours for the industry as a whole. This estimate is likely an overestimate as not all manufacturers will need to keep records for added sugars, dietary fiber, soluble fiber, vitamin E, and folate/folic acid. According to the Bureau of Labor

Statistics, Occupational Employment and Wages, the median hourly wage of an operations manager is \$46.99⁶³ with a range of \$31.13 to 73.21 at the 25th and 75th percentile. In addition to the base wage, FSIS increased this cost by 100 percent to account for benefits and overhead. Consequently, FSIS assumed a mid-point total hourly compensation rate of \$93.98 (\$46.99 × 2) with a range of \$62.26 (31.13 × 2) to \$146.42 (73.21 × 2). The total recordkeeping costs, discounted over 20 years using a 3 percent discount rate are an estimated \$121,690 with a range of \$80,617 to \$189,592.

TABLE 6—ESTIMATED RECORDKEEPING BURDEN

Type of declaration	Total annual recordkeeping burden hours	Cost (in 2015 USD)		
		Lower	Mid	Upper
Added Sugars	3,307	\$205,894	\$310,792	\$484,211
Dietary Fiber	3,307	205,894	310,792	484,211
Soluble Fiber	3,307	205,894	310,792	484,211
Insoluble Fiber	3,307	205,894	310,792	484,211
Vitamin E	3,307	205,894	310,792	484,211

Total	19,842	1,235,363	1,864,751	2,905,266
Annualized 3%, 20 years		80,617	121,690	189,592
Annualized 7%, 20 years		108,981	164,504	256,296
Median hourly wage for operations manager				93.98
25 percentile wage estimate				62.26
75 percentile wage estimate				146.42

Reformulation Costs

The proposed rule could motivate food manufacturers to reformulate their products. Food manufacturers may reformulate their products due to the increased visibility of added sugars or to maintain a health or nutrient content claim driven by a change in the Daily Values or RACC and changes in the definition of dietary fiber. We estimate reformulation costs associated with each group in the sections below. Note that we do not anticipate reformulation costs for mandating *trans* fat labeling because *trans* fat in meat and poultry products are usually naturally occurring.

Consistent with FDA, the Agency estimated costs using the 2014 FDA Reformulation Cost Model.⁶⁴ The model accounts for variations in food product complexity, company size, compliance period, reformulation types and activities. Consistent with FDA, the Agency estimated the cost of reformulation for a minor nonfunctional ingredient at all complexity levels, (low,

medium and high) at all company size levels, (small, medium and large). As defined by the reformulation model, small businesses have less than \$1 million in annual sales, medium businesses have between \$1–500 million in annual sales, and large businesses have over \$500 million in sales. The reformulation model estimates all private label brands are medium businesses and branded products are small, medium or large, depending on the type of product or brand.

The compliance period used in our estimate is 24 months for all businesses, as an estimate for a 36-month compliance period for a small business is not available in the model. The model only estimates the cost for small businesses at the 12 or 24-month compliance period and at the 12, 24 or 36 month for large businesses. Therefore, the reformulation cost estimates is an overestimate.

To adjust for inflation in the 2014 Reformulation model, we adjusted the wage rates using the most current (2015) Consumer Price Index for All Urban Consumers and applied a benefits and overhead factor of two to estimate the total cost per formula. The cost per formula ranges from \$4,723 to \$361,371 for a high complexity product, \$2,898 to \$361,371 for a medium complexity product, and \$2,264 to \$338,918 for a low complexity product. The cost varies by the size of company, with large and medium businesses having higher costs per formula than small businesses.

Number of Product Reformulations for Added Sugars Declaration

The proposed rule emphasizes the amount of sugar in a product by requiring a label to declare both the amount of “Total Sugar” and “Added Sugars” with a Daily Reference Value (DRV) for added sugars of 10 percent of calories.⁶⁵ Manufacturers may decide to reformulate products in light of these

⁶³ Bureau of Labor Statistics, Occupational Employment and Wages, May 2015. Mean hourly wage for 11–1021 General and Operations Managers. Accessed May 26, 2016. available at: [http://www.bls.gov/oes/current/oes111021.htm#\(1\)](http://www.bls.gov/oes/current/oes111021.htm#(1)).

⁶⁵ 50 grams for children and adults 4 years of age and older and 25 grams for children 1 through 3 years of age.

new requirements. This model uses IRI data to identify those USDA regulated products that exceed the proposed DRV for added sugars. Based on this proposed provision, FSIS regulates roughly 12,080 products where sugar contributes to more than 10 percent of the calories. Reformulation costs are based on the formula counts, not individual product labels. Many of these

products have the same formula. For example, while there is one original Slim Jim formula, there is a plethora of products, e.g., in different sizes. Therefore, the FDA's Reformulation Cost Model was used to determine the number of formulas from the number of products. We found 10,518 formulas associated with these 12,080 products with high sugar content.

FSIS does not estimate that manufacturers would reformulate all 10,518 products because reformulation is voluntary and can be quite expensive. We assume 7.5 to 9 percent (8.25%) of all formulas with high sugar content will reformulate, which is consistent with FDA's assumptions.⁶⁶ Table 7 below summarizes the total formulas that may reformulate for added sugars.

TABLE 7—TOTAL FORMULAS THAT MAY REFORMULATE FOR ADDED SUGARS DECLARATION

Complexity formulas	Branded (small)	Branded (medium)	Branded (large)	Private (medium)	Total formulas
High	93	205	87	213	598
Medium	83	86	21	51	241
Low	7	8	2	12	29

Number of Product Reformulations to Maintain Health and Nutrient Content Claims

The proposed rule would disqualify some products from bearing a health or nutrient claim as a result of changes in the RACC categories, changes in Daily Values for certain vitamins and minerals, and modifications to the definition of fiber to exclude certain isolated and synthetic fibers from the definition. As a result, manufacturers of these products would either have to remove the claim from the product's label or reformulate in order to continue to make the claim.⁶⁷

To determine the reformulation cost related to RACC changes, the Agency

used IRI scanner data and identified 62 products with new or changing RACC categories with a health or nutrient claim (e.g., "good source of . . .," "low cholesterol," etc.). To determine the reformulation cost of Daily Value (DV) changes, we used IRI scanner data and identified 12 products with claims for the proposed vitamins and mineral DV changes (e.g., "good source of Vitamin C"). For the fiber claims, we refined the IRI scanner data and identified 731 products containing a synthetic or isolated fiber with a fiber claim. As noted above, reformulation costs are by formula counts, not by individual labels. We used FDA's Reformulation Cost Model to determine the number of formulas from the number of products.

This work identified 53 formulas for RACC changes, 11 formulas for DV changes, and 654 formulas for new fiber definition. FSIS assumed that manufacturers will elect to reformulate 50 percent of their products and to remove the claim from the other 50 percent. Therefore, 365 formulas will incur reformulation costs: 30 formulas for RACC, 6 formulas for Daily Value and 329 formulas for fiber. The estimates may vary due to rounding in the business size and complexity categories. See Table 8 below for summary of the formulas that may reformulate due to the new fiber definition, or for changes in the Daily Values or RACC.

TABLE 8—TOTAL FORMULAS THAT MAY REFORMULATE FOR NEW FIBER DEFINITION, DV, OR RACC

Complexity formulas	Branded (small)	Branded (medium)	Branded (large)	Private (medium)	Total formulas
High	56	127	59	103	345
Medium	4	6	4	6	20

Total Reformulation Cost for Sugars Declaration and To Maintain Health and Nutrient Content Claims

The mean one-time cost for reformulation is \$77,294,020, with an

average per formula one-time cost of \$77,009. The annualized cost at a 3 percent discount rate over 20 years for reformulation is \$6,196,385, with a range of \$2,908,387 to \$10,019,460.

One-time reformulation costs are \$94,952,165 with a range of \$44,567,540 to \$153,536,199. See Table 9 below for a summary of the estimated reformulation cost in 2015 dollars.

TABLE 9—ALTERNATIVE 2—REFORMULATION COST

	Lower	Mid	Upper
High Complexity Formulas	\$36,295,355	\$77,294,020	\$124,785,011

⁶⁶ Regulatory Impact Analysis for Final Rules on "Food labeling: Revision of the Nutrition and Supplement Facts Labels". Docket No. FDA-2012-N-1210 and "Food Labeling: Serving Sizes of Foods that can Reasonably be consumed at One Eating Occasion: Dual-Column Labeling: Updating, Modifying, and Establishing Certain Reference Amounts Customarily Consumed; Serving Size for Breath Mints; and Technical Amendments" Docket No. FDA-2004-N-0258., page 70, available at:

<http://www.fda.gov/downloads/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/UCM506797.pdf>.

⁶⁷ To illustrate, consider these examples:

1. Reformulate due to DV change—A Beef Tomato Sauce with 12 mgs of vitamin C makes a "High in Vitamin C" claim since it meets the claim requirement of 20 percent or more of the Vitamin C RDI per RACC. By increasing the Vitamin C RDI

from 60 mg to 90 mg, the product can no longer make the claim.

2. Reformulate due to New Fiber definition—A product with mostly synthetic fiber is making an "excellent source of fiber" fiber since certain synthetic and isolated fibers are included in the fiber definition. By removing some synthetic fibers from the fiber definition, the product can no longer make the claim.

TABLE 9—ALTERNATIVE 2—REFORMULATION COST—Continued

	Lower	Mid	Upper
Med Complexity Formulas	7,488,995	15,983,483	25,998,357
Low Complexity Formulas	783,190	1,674,662	2,752,831
Total Cost	44,567,540	94,952,165	153,536,199
Annualized Cost (3% DR, 20 Year)	2,908,387	6,196,385	10,019,460
Annualized Cost (7% DR, 20 Year)	3,931,645	8,376,460	13,544,608
Average Per formula one time cost	36,146	77,009	124,522
Per formula Annualized Cost (3% DR, 20 Year)	2,359	5,025	8,126
Per formula Annualized Cost (7% DR, 20 Year)	3,189	6,794	10,985

Quantitative Benefits of the Proposed Rule

By ensuring that recommendations are based on current dietary guidelines and making the most salient information prominent, the proposed rule will benefit the nearly 186 million Americans who frequently or sometimes use nutritional facts and serving size labels. However, this Preliminary Regulatory Impact Analysis (PRIA) limits the quantitative benefits to the medical costs savings for overweight or hypertensive adults who report not using or rarely using Nutrition Facts labels that are expected to experience health benefits with increased label use and modified diet. The annual present value of benefits at a 3 percent discount rate over 20 years is estimated at \$36,894,007. A detailed description of this analysis follows.

As noted in the Need for Rule section above, a significant portion of U.S. citizens are overweight, obese, or hypertensive. Such conditions afflict individuals and society with poorer health and higher medical expenditures. It is well established that improved nutrition reduces overweight, obesity, and hypertension rates, which in turn reduces medical expenses.⁶⁸ Based on the NHANES analysis, using and understanding the Nutrition Facts label is linked to healthier diets. If finalized, this proposed rule will improve nutritional labels by updating and simplifying the information found on them. The frequency of label usage will increase as improved, and simpler to understand information will be

available to the consumer, which will, in turn, promote consumption of healthier diets, e.g., lower caloric or sodium consumption.

In this analysis, quantified benefits are a measure of expected health improvements resulting from increased label-use, causing diet modification for some overweight and hypertensive adults. The benefits analysis can be broken down into a series of steps. The first step is determining the baseline caloric and sodium intake for consumers by label-use. The second step is estimating the number of consumers who could potentially change their behavior from increased label-use because of this rule. The third step is estimating the change in diet from increased label-use. The final step is measuring the medical cost savings benefit using the Dall et al. (2009), Nutrition Impact Model, which links the health benefits and medical cost savings from reductions in caloric and sodium intake. A description of each step in the benefits analysis is given in this section.

Benefits Analysis: Baseline Caloric and Sodium Intake for Consumers by Label-Use

The first step in this analysis is to determine the baseline relationship between caloric and sodium intake with label-use. To determine this relationship, FSIS used NHANES data to correlate use of nutritional and serving size labels with caloric and sodium intake. NHANES is a continuous CDC survey with data released in two-year segments. This analysis included data from the 2009–2010 survey. NHANES collects detailed information through questionnaires, dietary recall, and a physical exam. In the Flexible Consumer Behavior Survey (FCBS) section of NHANES, respondents provided information on how frequently they used nutritional and serving size information found on food labels. Also, respondents who reported rarely or never using labels provided reasons for not doing so.

In the dietary recall component, respondents report everything they ate or drank, and where the food was obtained, for two days (two 24 hour periods). Food obtained from a store or catalog was identified as food at home (FAH). This analysis excluded calories consumed away from home, as these foods typically do not include a Nutrition Facts label. Weights were applied to the dataset to account for the survey design (including oversampling of certain groups), survey non-response, and post stratification so that the population totals represent the U.S. Census civilian non-institutionalized adult population.
