II. Further Information

NUREG–1556, Volume 13, Revision 2 provides program-specific guidance to assist applicants and licensees in preparing applications for materials licenses for commercial radiopharmacies. In particular, it describes the types of information needed to complete NRC Form 313, “Application for Materials License.” It also provides the NRC with criteria for evaluating a license application. The purpose of this notice is to provide the public with an opportunity to review and provide comments on draft NUREG–1556, Volume 13, Revision 2, “Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Commercial Radiopharmacy Licenses.” These comments will be considered in the final version or subsequent revisions.

This draft NUREG–1556, Volume 13, Revision 2 does not include any revisions associated with the proposed rule “Medical Use of Byproduct Material-Medical Event Definitions, Training and Experience, and Clarifying Amendments.” That proposed rule would amend the following requirements in parts 30, 32, and 35 of title 10 of the *Code of Federal Regulations* related to commercial nuclear pharmacies:

- Removal of the requirement for the board certified nuclear pharmacist to have an attestation statement in addition to the board certificate;
- measuring molybdenum contamination and reporting of failed technetium generators;
- labeling requirements for radioactive drugs; and
- clarifying other revisions to the regulations.

This draft NUREG–1556, Volume 13, Revision 2 does not include any guidance for the proposed rule revisions because that rule is not final at this time.

The proposed rule, “Medical Use of Byproduct Material-Medical Event Definitions, Training and Experience, and Clarifying Amendments,” and proposed changes to NUREG–1556 commercial radiopharmacy licenses

associated with the proposed rule were published for public comment in the **Federal Register** (79 FR 42409 and 79 FR 42224) on July 21, 2014. Comments received on those changes in the proposed rule and guidance are being considered by the NRC staff separately. If the proposed rule becomes final, the proposed revisions to NUREG–1556, Volume 13 addressing the implementation of the proposed rule will be incorporated into NUREG–1556, Volume 13, Revision 2 before its final publication.

Dated at Rockville, Maryland, this 13th day of January, 2017.

For the U.S. Nuclear Regulatory Commission.

Pamela J. Henderson,

Deputy Director, Division of Material Safety, State, Tribal and Rulemaking Programs, Office of Nuclear Material Safety and Safeguards.
