

in development drifts twice per day, with each advance being a 12-foot length. If the ERCP will have to be relocated from time to time to remain in the vicinity of the development face, as contemplated in PFM #1, the ERCP would have to be relocated on a recurring basis.

(10) Repeated movement of the ERCP puts miners at risk for several reasons. An ERCP cannot simply be parked on the decline because of its size—it would block access between the development drift face and the escapeways. To allow for the decline to remain clear, a cutout into the rib must be made to park the ERCP, making the relocation more complex.

(11) Damage to the ERCP will put miners at risk as the refuge may not function as intended. Each time the ERCP is relocated, there is a potential that the ERCP will be damaged in some manner. Similarly, if a compressed air line and waterline need to be run and connected to each new location for the ERCP, there is a chance that the lines or the connections will be damaged. Potential damage to the ERCP and the external airline and waterlines increases each time they are moved, disconnected, rerouted, reconnected, and tested. The risk of damaging the lines and connectors is eliminated by relying on the ERCP's self-contained capabilities.

The ERCP can only provide a safety benefit to miners while the device is operational. To the extent an ERCP is unavailable while being relocated, that window of non-availability will increase while the air and water lines are being run, connected and tested for the new location. As such, complying with § 57.11052(d) with respect to the relocating of the ERCP will have a detrimental effect on miner safety.

(12) There are significant costs associated with each movement of an ERCP. The ERCP is roughly 15-feet long, and requires a cutout that is 30-feet deep. The development costs at Kensington are approximately \$1,500 per foot, meaning that each 30-foot cutout will cost \$45,000 to create. Installing air, water and shotcrete will add to the figure. Moving the unit will take 2 miners approximately 12 hours, at a labor cost of \$1,136. In total, the average cost to relocate a portable refuge one time is almost \$50,000. To the extent these costs can be controlled by alleviating redundant or unnecessary requirements, Coeur's submits this petition.

The petitioner asserts that the alternative method will at all times

provide the same measure of protection as the existing standard.

## LEGAL SERVICES CORPORATION

### Request for Letters of Intent To Apply for 2017 Technology Initiative Grant Funding

**AGENCY:** Legal Services Corporation.

**ACTION:** Notice.

**SUMMARY:** The Legal Services Corporation (LSC) issues this Notice describing the process for submission of Letters of Intent to Apply for 2017 funding from the LSC Technology Initiative Grant program. This notice and application information are posted at <http://tinyurl.com/TIGProcess2017>.

**DATES:** *Deadline:* Letters of Intent must be completed and submitted into the online system at <http://lscgrants.lsc.gov> no later than 11:59 p.m. EDT, Friday, March 13, 2017. The online system may experience technical difficulties due to heavy traffic on the day of the deadline. Applicants are strongly encouraged to complete LOI submissions as early as possible.

LSC will not accept applications submitted after the application deadline unless an extension of the deadline has been approved in advance (see Waiver Authority). Therefore, allow sufficient time for online submission.

LSC will provide confirmation via email upon receipt of the completed electronic submission of each Letter of Intent. Keep this email as verification that the program's LOI was submitted and received. If no confirmation email is received, inquire about the status of your LOI at [Techgrants@lsc.gov](mailto:Techgrants@lsc.gov).

**ADDRESSES:** Letters of Intent must be submitted electronically at <http://lscgrants.lsc.gov>.

**FOR FURTHER INFORMATION CONTACT:** For information on the status of a current TIG project, contact Eric Mathison, Program Analyst, 202-295-1535; [emathison@lsc.gov](mailto:emathison@lsc.gov).

For questions about projects in CT, IL, IN, ME, MA, MI, NH, NJ, NY, OH, PA, RI, WI, WV, VT, contact David Bonebrake, Program Counsel, 202-295-1547; [dbonebrake@lsc.gov](mailto:dbonebrake@lsc.gov).

For questions about projects in AK, AZ, CA, CO, GU, HI, ID, IA, KS, MP, MN, MT, NE, NV, NH, NM, ND, OK, OR, SD, TX, UT, WA, WY, contact Glenn

Rawdon, Senior Program Counsel, 202.295.1552; [grawdond@lsc.gov](mailto:grawdond@lsc.gov).

For questions about projects in AL, AR, DC, FL, GA, KY, LA, MD, MS, MO, NC, PR, SC, TN, VI, VA, contact Jane Ribadeneyra, Program Analyst, 202.295.1554, [ribadeneyraj@lsc.gov](mailto:ribadeneyraj@lsc.gov).

If you have a general question, please email [techgrants@lsc.gov](mailto:techgrants@lsc.gov).

## SUPPLEMENTARY INFORMATION:

### I. Summary

The Legal Services Corporation (LSC) issues this Notice describing the criteria governing submission and processing of Letters of Intent to Apply for Technology Initiative Grants (TIG). Since LSC's TIG program was established in 2000, LSC has made over 670 grants totaling more than \$57 million. This grant program funds technology tools that help achieve LSC's goal of increasing the quantity and quality of legal services available to eligible persons. Projects funded under the TIG program develop, test, and replicate innovative technologies that can enable grant recipients and state justice communities to improve low-income persons' access to high-quality legal assistance through an integrated and well managed technology system.

### II. General Information

The Legal Services Corporation awards Technology Initiative Grant funds through an open, competitive, and impartial selection process. All prospective applicants for 2017 TIG funds must submit a Letter of Intent to Apply (LOI) prior to submitting a formal application. The format and contents of the LOI should conform to the requirements specified below in Section IV.

Through the LOI process, LSC selects those projects that have a reasonable chance of success in the competitive grant process based on LSC's analysis of the project description and other information provided in the LOI. LSC will solicit full proposals for the selected projects.

#### *LSC Requirements*

Technology Initiative Grant funds are subject to all LSC requirements, including the requirements of the Legal Services Corporation Act (LSC Act), any applicable appropriations acts and any other applicable laws, rules, regulations, policies, guidelines, instructions, and other directives of the Legal Services Corporation (LSC), including, but not limited to, the LSC Audit Guide for Recipients and Auditors, the Accounting Guide for LSC Recipients, the CSR Handbook, the 1981 LSC Property Manual (as amended) and the

Property Acquisition and Management Manual, with any amendments to the foregoing adopted before or during the period of the grant. Before submitting a Letter of Intent to Apply, applicants should be familiar with LSC's subgrant and transfer requirements at 45 CFR parts 1610 and 1627 (see <http://www.lsc.gov/about/laws-regulations/lsc-regulations-cfr-45-part-1600-et-seq>), particularly as they pertain to payments of LSC funds to other entities for programmatic activities.

For additional information and resources regarding TIG compliance, including transfers, subgrants, third-party contracting, conflicts of interest, grant modification procedures, and special TIG grant assurances, see LSC's TIG compliance Web page.

#### *Eligible Applicants*

Only current LSC basic field grant recipients awarded at least a one-year basic field grant term are eligible to apply for TIG.

LSC will not award a TIG to any applicant that is not in good standing on any existing TIG projects. Applicants must be up to date according to the milestone schedule on all existing TIG projects prior to submitting an LOI, or have requested and received an adjustment to the original milestone schedule. LSC will not award a TIG to any applicant that has not made satisfactory progress on prior TIGs. LSC recipients that have had a previous TIG terminated for failure to provide timely reports and submissions are not eligible to receive a TIG for three years after their earlier grant was terminated. This policy does not apply to applicants that worked with LSC to end a TIG early after an unsuccessful project implementation resulting from technology limitations, a failed proof of concept, or other reasons outside of the applicant's control.

#### *Funding Availability*

The amount of TIG funding available will depend on the 2017 fiscal year appropriation to the LSC from Congress, which had not been determined by January 26, 2017, the date this notice was issued. The federal government is currently operating under a Continuing Resolution (CR) that expires April 28, 2017. The Continuing Resolution maintains funding at FY 2017 levels, which for TIG is \$4 million, but with an across-the-board reduction of 0.19 percent, or \$7,600 for TIG. In 2016, 34 TIG projects received funding with a median funding amount of \$87,211. (See TIG's past awards Web page for more information on past grants). LSC recommends a minimum amount for

TIG funding requests of \$40,000, but projects with lower budgets will be considered. There is no maximum amount for TIG funding requests that are within the total appropriation for TIG.

#### *Collaborations*

The TIG program encourages applicants to reach out to and include in TIG projects others interested in access to justice—the courts, bar associations, pro bono projects, libraries, and social service agencies. Partnerships can enhance the reach, effectiveness, and sustainability of many projects.

#### *Grant Categories*

LSC will accept projects in two application categories:

- (1) Innovations and Improvements
- (2) Replication and Adaptation

#### *Grant Category 1: Innovations and Improvements*

The Innovations and Improvements Category is designated for projects that: (1) Implement new or innovative approaches for using technology in legal services delivery; or (2) enhance the effectiveness and efficiency of existing technologies so that they may be better used to increase the quality and quantity of services to clients.

Although there is no funding limit or matching requirement for applications in this category, additional weight is given to projects with strong support from partners. Proposals for initiatives with broad applicability and/or that would have impact throughout the legal services community are strongly encouraged.

#### *Grant Category 2: Replication and Adaptation*

The Replication and Adaptation category is for proposals that seek to replicate, adapt, or provide added value to the work of prior technology projects. This includes, but is not limited to, the implementation and improvement of tested methodologies and technologies from previous TIG projects. Applicants may also replicate technology projects funded outside of the TIG program, including sectors outside the legal aid community, such as social services organizations, the broader non-profit community, and the private sector.

Project proposals in the Replication and Adaptation category may include, but are not limited to:

#### *A: Replication of Previous TIG Projects*

LSC requires that any original software developed with TIG funding be available to other legal services

programs at little or no cost. Applicants should look to previous successful TIG projects and determine how they could be replicated at a reduced cost from the original project, and/or how they could be expanded and/or enhanced. Projects where original software or content has already been created lend themselves to replication, and LSC encourages programs to look to these projects to see how they could benefit the delivery systems in their state.

#### *B: Automated Form Replication*

LawHelp Interactive (LHI) LHI is an automated document server powered by HotDocs Server and made available to any LSC funded program at no charge. LHI is deployed across the country with thousands of active HotDocs templates and A2J Author modules hosted on the LawHelp Interactive National HotDocs Server at <https://lawhelpinteractive.org>. Despite differences from state to state in the content and format, many of these forms can be edited for use in other jurisdictions with less effort, hence at a lower cost, than developing the form from scratch.

Even if a form differs from one state to another, the information needed to populate a form will, for the most part, be similar. (What are the names of the plaintiff, the defendant, the children, etc.?). This means the interviews are more easily replicated than form templates. All of these form templates and interviews are available to be modified as needed. Applicants should identify which forms and templates are to be adapted, and then estimate the cost to do this and compare that to the cost of developing them from scratch.

LHI has the capacity to support Spanish, Vietnamese, Mandarin and Korean language interviews. In addition, LHI has been integrated with other systems to allow the flow of information between LHI and court e-filing systems and legal aid case management systems. The "Connect" feature enables pro bono programs from across a state to use LHI interviews and forms to assign pre-screened pro bono cases and their documents to panel attorneys. For additional information, including examples, best practices, models and training materials, see the LawHelp Interactive Resource Center at <http://www.probono.net/dasupport> (you may need to request a free membership to access this Web site).

#### *C: Replication of Technology Projects in Other Sectors*

In addition to replicating other TIG funded technology projects, LSC encourages replication of proven technologies from non-LSC funded legal

aid organizations as well as sectors outside the legal aid community. Ideas for replication may be found through resources and organizations such as the Legal Services National Technology Assistance Project (LSNTAP), the American Bar Association, international legal aid providers such as the Legal Services Society of British Columbia and HiIL's Innovating Justice project, IdealWare (see the article on Unleashing Innovation), NTEN, and TechSoup.

### III. Area of Interest—Projects That Respond to LSC's Statewide Web Site Evaluation

Through support from the Ford Foundation, LSC worked closely over the last year with a user-centered research and design agency to assess the quality and usability of statewide legal aid Web sites across the country. By February 8, 2017, LSC will share individual assessment results with each Web site and provide sites and stakeholders access to a toolkit and set of how-to guides for implementing the findings and recommendations from the evaluation.

This area of interest focuses on projects that build on the key insights from the assessment to improve statewide Web site(s). Projects may address enhancements to an individual statewide Web site and/or to one of the national legal aid Web site templates (LawHelp or DLaw-OpenAdvocate). Proposals should demonstrate how the proposed project responds to one or more of the nine focus areas identified through the assessment: 1. Plain Language; 2. Language Access; 3. Content Presentation; 4. Accessibility; 5. User Support; 6. Mobile Friendly; 7. Community Engagement; 8. Ease of Navigation; and 9. Visual Design & Iconography. In addition, proposals should highlight how the project will enhance the quality of user experience on the statewide Web site and how the improvements to the site will be measured. LSC welcomes both new Web site innovations and replications of successful initiatives under this area of interest.

### IV. Specific Letter of Intent To Apply Requirements

#### One Project per Letter of Intent

Applicants may submit multiple LOIs, but a separate LOI should be submitted for each project for which funding is sought.

#### Letter Requirements and Format

Letters of Intent must be submitted using the online system at <http://lscgrants.lsc.gov>. Additional

instructions and information can be found on the TIG Web site. This system will walk you through the process of creating a simple two-page LOI. The LOI should concisely provide the following information about the proposed project:

1. *Category*—select the appropriate category from the drop down list.
2. *Description of Project (maximum 2500 characters)*—Briefly describe the basic elements of the project, including the specific technology(ies) the project will develop or implement; how they will be developed, how they will operate, the function they will serve within the legal services delivery system, their expected impact, and other similar factors. (Only the impact should be highlighted here; more details about the system's benefits should be provided below.)

3. *Major Benefits (maximum 2500 characters)*—Describe the specific ways in which the project will increase or improve services to clients and/or enhance the effectiveness and efficiency of legal aid organization operations. To the extent feasible, discuss both the qualitative and quantitative aspects of these benefits.

4. *Estimated Costs (maximum 1500 characters)*—This should include the amount of funding you are seeking from the TIG program, followed by the estimated total project cost, summarizing the anticipated costs of the major components of the project. List anticipated contributions, both in-kind and monetary, from all partners involved in the project.

5. *Major Partners (maximum 1500 characters)*—Identify organizations that are expected to be important partners. Specify the role(s) each partner will play.

6. *Innovation/Replication (maximum 1500 characters)*—Identify how and why the proposed project is new and innovative and/or is a replication or adaptation of a previous technology project. Identify how and why the proposed project can significantly benefit and/or be replicated by other legal services providers and/or the legal services community at large.

#### Selection Process

LSC will initially review all Letters of Intent to Apply to determine whether they conform to the required format and clearly present all of the required elements listed and described above. Failure to meet these requirements may result in rejection of the Letter of Intent.

LSC will review each Letter of Intent to identify those projects likely to improve access to justice, or to improve the efficiency, effectiveness, and quality of legal services provided by grantees.

The Letters of Intent will also be reviewed to determine the extent to which the project proposed is clearly described and well thought out, offers major benefits to our targeted client community, is cost-effective, involves all of the parties needed to make it successful and sustainable, and is either innovative or a cost-effective replication of prior successful projects. LSC will invite those applicants that satisfy these criteria to submit full applications.

#### Next Steps for Successful Applicants

LSC will notify successful applicants by April 21, 2017. Successful applicants will have until 11:59 p.m. EDT, Monday, June 5, 2017, to complete and submit full applications in the online application system.

#### Waiver Authority

LSC, upon its own initiative or when requested, may waive provisions in this Notice at its sole discretion. Waivers may be granted only for requirements that are discretionary and not mandated by statute or regulation. Any request for a waiver must set forth the reason for the request and be included in the application. LSC will not consider a request to extend the deadline for a Letter of Intent to Apply unless the extension request is received by LSC prior to the deadline.

Dated: January 30, 2017.
