SUPPLEMENTARY INFORMATION: Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda
- Welcome and Announcements
- Comments from the Deputy Designated Federal Officer (DDFO) and Environmental Protection Agency and Tennessee Department of Environment and Conservation Liaisons
- Public Comment Period
- Discussion: Waste Disposal Capacity on the Oak Ridge Reservation
- Additions/Approval of Agenda
- Motions/Approval of January 11, 2017 Meeting Minutes
- Responses to Recommendations and Alternate DDFO Report
- Committee Reports
- Additions to Agenda and Open Discussion
- Adjoin

Public Participation: The EM SSAB, Oak Ridge, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Melyssa P. Noe at the address and phone number listed above. Written statements may be filed with the Board either before or after the meeting.

Minutes: Minutes will be available by writing or calling Melyssa P. Noe at the address and phone number listed above. Minutes will also be available at the following Web site: www.energy.gov/orssab.

Issued at Washington, DC, on February 1, 2017.

LaTanya R. Butler,
Deputy Committee Management Officer.

Federal Department of Energy

Federal Energy Regulatory Commission
[Docket No. RD17–1–000]

Commission Information Collection Activities (FERC–725R); Comment Request

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the information collection FERC–725R (Mandatory Reliability Standards: BAL Reliability Standards) which will be submitted to the Office of Management and Budget (OMB) for review of the information collection requirements.

DATES: Comments on the collection of information are due by April 10, 2017.

ADRESSES: You may submit comments (identified by Docket No. RD17–1–000) by the following methods:

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: http://www.ferc.gov/help/submission-guide.asp. For user assistance contact FERC Online Support by email at ferconline@ferc.gov, or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at http://www.ferc.gov/docs-filing/docs-filing.asp.

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at DataClearance@FERC.gov, by telephone at (202) 502–8663, and by fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:
Title: FERC–725R, Mandatory Reliability Standards: BAL Reliability Standards.
OMB Control No.: 1902–0268.

Type of Request: Three-year approval of FERC–725R information collection requirement, as modified.

Abstract: On November 10, 2016, the North American Electric Reliability Corporation (NERC) filed a petition for Commission approval of retirement, pursuant to section 215(d)(1) of the Federal Power Act (FPA) and Section 39.5 of the Commission’s regulations, of currently-effective Reliability Standard BAL–004–0 (Time Error Correction). NERC explains that since Reliability Standard BAL–004–0 became effective, improvements have been made to mandatory Reliability Standards (such as the development of Reliability Standards BAL–003–1.1 and BAL–001–2 and the Interconnection Reliability Operations and Coordination (IRO) Standards) that help ensure continued adherence to frequency approximating 60 Hertz over long-term averages and make Reliability Standard BAL–004–0 redundant.

Type of Respondents: Public utilities.

Estimate of Annual Burden: The Commission estimates the reduction (due to the retirement of Reliability Standard BAL–004–0) in the annual public reporting burden for the information collection as follows:

1 Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.
Regulatory Commission’s (Commission or FERC) regulations, Commission staff has prepared this final General Conformity Determination (GCD) for the Atlantic Sunrise Project (Project) proposed by Transcontinental Gas Pipeline Company, LLC (Transco). The FERC staff concludes that the Project would achieve conformity with the Pennsylvania State Implementation Plan in Lancaster County through the transfer of Emission Reduction Credits.

The Project would involve the construction and operation of about 199.4 miles of pipeline facilities and appurtenant aboveground facilities, including:

- 185.9 miles of new natural gas pipeline in Columbia, Lancaster, Lebanon, Luzerne, Northumberland, Schuylkill, Susquehanna, and Wyoming Counties, Pennsylvania (58.7 miles of 30-inch-diameter and 127.3 miles of 42-inch-diameter pipeline);
- 11.0 miles of new pipeline looping in Clinton and Lycoming Counties, Pennsylvania (2.5 miles of 36-inch-diameter and 8.5 miles of 42-inch-diameter pipeline);
- 2.5 miles of 30-inch-diameter pipeline replacements in Prince William County, Virginia;
- two new compressor stations in Columbia and Wyoming Counties, Pennsylvania (Compressor Stations 610 and 605);
- additional compression and related modifications to two existing compressor stations in Columbia and Lycoming Counties, Pennsylvania (Compressor Stations 517 and 520) and one in Howard County, Maryland (Compressor Station 190);
- other modifications would be taking place at Compressor Stations 145, 150, 155, 160, 170, 185, and 190 across Maryland, North Carolina, and Virginia;
- two new meter stations and three new regulator stations would be constructed and operated in Pennsylvania. There would also be modifications at an existing meter station, and the construction and operation of additional ancillary facilities would occur in Pennsylvania; and
- in North Carolina and South Carolina, supplemental odorization, odor detection, and/or odor masking/deodorization equipment would be installed at 56 meter stations, regulator stations, and ancillary facilities.

For additional information on the Project, the public can view the final environmental impact statement on our Web site at https://www.ferc.gov/industries/gas/enviro/eis/2016/12-30-16-FEIS.asp. The complete final General Conformity Determination, which also contains our responses to public comments on the draft General Conformity Determination, may be found on FERC’s elibrary system under the above referenced Docket number.

For further information, contact Eric Tomasi by telephone at 202–502–8097 or by email at Eric.Tomasi@ferc.gov.

Kimberly D. Bose,
Secretary.

2 The estimated number of respondents is based on the NERC compliance registry as of December 12, 2016. According to the NERC compliance registry, there are 99 U.S. balancing authorities (BA) and 11 reliability coordinators (RC).

3 The estimates for cost per response are derived using the following formula: Burden Hours per Response × $/hour = Cost per Response. The $64.29/hour figure for an engineer and the $37.75/hour figure for an engineer are based on the average salary plus benefits data from the Bureau of Labor Statistics. [https://www.bls.gov/oes/current/naics2_22.html], May 2015, Section 22, Utilities. In the burden table, engineering is abbreviated as “Eng.” and record keeping is abbreviated as “R.K.”.
