SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to

reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The warning signs/barriers required by paragraph 1926.701(c)(2) reduce exposure of non-essential workers to the hazards of post-tensioning operations, principally a failed rope or wire striking a worker and causing serious injury. The requirements for lockout and tag ejection systems and other hazardous equipment (*e.g.*, compressors, mixers, screens or pumps used for concrete and masonry construction) specified by paragraphs 1926.702(a)(2), (j)(1), and (j)(2) warn equipment operators not to activate their equipment if another worker enters the equipment to perform a task (*e.g.*, cleaning, inspecting, maintaining, repairing), thereby preventing injury or death.

Construction contractors and workers use the drawings, plans, and designs required by paragraph 1926.703(a)(2) to provide specific instructions on how to construct, erect, brace, maintain, and remove shores and formwork if they pour concrete at the job site. Paragraph 1926.705(b) requires employers to mark the rated capacity of jacks and lifting units. This requirement prevents overloading and subsequent collapse of jacks and lifting units, as well as their loads, thereby sparing exposed workers from serious injury or death.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements specified in the Concrete and Masonry Construction Standard. The Agency is requesting to retain its current burden hours of 12,771 burden hours.

Type of Review: Extension of a currently approved collection.
