**SUPPLEMENTARY INFORMATION:****I. Abstract**

This request is for a new information collection.

The National Marine Fisheries Service (NMFS) proposes to collect information about fishing expenses and catch distribution (the share of fish that is sold, retained for home consumption, directed to customary exchange, etc.) for the Mariana Archipelago small boat-based reef fish, bottomfish, and pelagics fisheries with which to conduct economic analyses that will improve fishery management in those fisheries; satisfy NMFS' legal mandates under Executive Order 12866, the Magnuson-Stevens Fishery Conservation and Management Act (U.S.C. 1801 *et seq.*), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act; and quantify achievement of the performances measures in the NMFS Strategic Operating Plans. Respondents will include small boat fishers in Mariana Archipelago (Guam and the Commonwealth of the Northern Mariana Islands) and their participation in the economic data collection will be voluntary. These data will be used to assess how fishermen will be impacted by and respond to regulations likely to be considered by fishery managers.

**II. Method of Collection**

Survey forms in paper will be self-completed by respondents or by interviewers.

**DEPARTMENT OF COMMERCE****National Oceanic and Atmospheric Administration****Release of the Draft National Charting Plan**

**AGENCY:** Office of Coast Survey, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Request for comments.

**SUMMARY:** The NOAA Office of Coast Survey has released a draft National Charting Plan. The plan describes the current set of NOAA nautical chart products and their distribution, as well as some of the steps Coast Survey is taking to improve NOAA charts, including changes to chart formats, scales, data compilation, and symbology. The purpose of the plan is to solicit feedback from nautical chart users regarding proposed changes to NOAA's paper and electronic chart products. Coast Survey invites written comments on this plan that is available from <https://nauticalcharts.noaa.gov/staff/news/2017/nationalchartingplan.html>.

**DATES:** Comments are due by midnight, June 1, 2017.

**ADDRESSES:** Submit comments on the National Charting Plan through NOAA's

Nautical Discrepancy Report System at <http://ocsddata.ncd.noaa.gov/idrs/discrepancy.aspx>, or via mail to National Ocean Service, NOAA (NCS2), ATTN National Charting Plan, 1315 East-West Highway, Silver Spring MD 20910-3282.

**SUPPLEMENTARY INFORMATION:** The first complete nautical chart published by the Coast Survey of New York Harbor was in 1844. The format, information, and intended uses of this first chart were quite similar to the raster charts that NOAA continues to make today. Although NOAA still produces "traditional" raster nautical charts, a sea change in chart production methods and the art of navigation began in the mid-1990s when Global Positioning System (GPS) technology and electronic navigational charts (ENCs) became available to the public.

Since the introduction of ENCs thirty years ago, the size of commercial vessels has increased more than four-fold and modern navigational systems have become more sophisticated. There are over 15 million recreational boats in the U.S. and recreational boaters have joined professional mariners in using electronic chart displays to ply the nation's waters. Users of all types are expecting improved ease of access to more precise, higher resolution charts that deliver the most up to date information possible.

Coast Survey has developed a number of strategies to meet this growing demand for greater performance in our products and services. These changes allow us to be more responsive to changing public needs for navigation data. In this context, Coast Survey has developed a national charting plan to outline the next steps for further improvement over the next generation. The national charting plan is responsive to years of formal and informal feedback on our products from the public and our partners. We are committed to ensuring that our products evolve with the changing needs of our many stakeholders. Comments received from nautical chart users about the National Charting Plan will help us fulfil this commitment.

**Authority:** 33 U.S.C. Chapter 17, Coast and Geodetic Survey Act of 1947.

The Hydrographic Services Review  
Panel (HSRP) is a Federal Advisory  
Committee established to advise the  
Under Secretary of Commerce for  
Oceans and Atmosphere, the NOAA  
Administrator, on matters related to the  
responsibilities and authorities set forth  
in section 303 of the Hydrographic  
Services Improvement Act of 1998, as  
amended, and such other appropriate  
matters that the Under Secretary refers  
to the Panel for review and advice. The  
charter and other information are  
located online at: [http://

stakeholders on issues relevant to  
NOAA's navigation services, focusing  
on the Pacific Northwest including the  
states of Washington and Oregon as well  
as national issues. Navigation services  
include the data, products, and services  
provided by the NOAA programs and  
activities that undertake geodetic  
observations, gravity modeling,  
shoreline mapping, bathymetric  
mapping, hydrographic surveying,  
nautical charting, tide and water level  
observations, current observations, and  
marine modeling. This suite of NOAA  
products and services support safe and  
efficient navigation, resilient coasts and  
communities, and the nationwide  
positioning information infrastructure to  
support America's commerce. The Panel  
will hear from state and federal  
agencies, non-federal organizations and

**SUPPLEMENTARY INFORMATION:** The  
purpose of the Proposed Action is to  
provide facilities that are fully  
supportive of the Intelligence  
Community's function and to continue  
to integrate the East Campus with the  
NSA Main Campus. The need for the  
action is to meet mission requirements,  
both internally at the NSA and within  
the Intelligence Community. The EIS  
considered four options for emergency  
power generation; two options for  
building heating systems; four options  
for locations of parking facilities;  
acquisition of additional space at two  
existing, offsite leased locations; and the  
No Action Alternative.
