SUPPLEMENTARY INFORMATION:

Docket: Supporting documents, including the ICR that explains in detail the information collection activities and the related burden and cost estimates that are summarized in this document, are available in the docket for this ICR. The docket can be viewed online at <http://www.regulations.gov> or in person at the EPA Docket Center, West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

ICR status: This ICR is currently scheduled to expire on February 28, 2017. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 8(e) of the Toxic Substances Control Act (TSCA) requires that any person who manufactures, imports, processes or distributes in commerce a chemical substance or mixture and which obtains information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment must immediately inform EPA of such information. EPA routinely disseminates TSCA section 8(e) data it receives to other federal agencies to provide information about newly discovered chemical hazards and risks. This information collection refers to the reporting requirement described above.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this ICR are companies that manufacture, process, import or distribute in commerce a chemical substance or mixture, and that obtain information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment.

Respondent's obligation to respond: Mandatory (see 15 U.S.C. 2607(e)).

Estimated number of respondents: 65 (total).

Frequency of response: On occasion.

Total estimated burden: 21,412 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,650,068 (per year), includes \$0 annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is an increase of 2,894 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's revised estimates of the number of TSCA sec. 8(e) initial submissions. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

Director, Regulatory Support Division.
