

owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 29, 2017.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *First Busey Corporation*, Champaign, Illinois; to acquire 100 percent of First Community Financial Partners, Inc., Joliet, Illinois, and thereby indirectly acquire First Community Financial Bank, Plainfield, Illinois.

B. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166-2034. Comments can also be sent electronically to

Comments.applications@stls.frb.org:

1. *Miles Bancshares, Inc.*, Advance, Missouri; to acquire up to 5.31 percent of the voting shares of UBT Bancshares, Inc., Marysville, Kansas, and thereby indirectly acquire United Bank & Trust, Marysville, Kansas.

Board of Governors of the Federal Reserve System, March 1, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

[FR Doc. 2017-04314 Filed 3-6-17; 8:45 am]

BILLING CODE 6210-01-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors

that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than March 20, 2017.

Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480-0291:

1. *Alerus Financial Employee Stock Ownership Plan*, Grand Forks, North Dakota; to acquire additional shares of Alerus Financial Corporation, Grand Forks, North Dakota, and indirectly acquire additional shares of Alerus Financial, National Association, Grand Forks, North Dakota.

Board of Governors of the Federal Reserve System, March 2, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

[FR Doc. 2017-04449 Filed 3-6-17; 8:45 am]

BILLING CODE 6210-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket Number CDC-2017-0015, NIOSH-295]

Health Risks to Workers Associated With Occupational Exposures to Peracetic Acid; Request for Information

AGENCY: National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Request for information.

SUMMARY: The National Institute for Occupational Safety and Health of the Centers for Disease Control and Prevention intends to evaluate the scientific and technical data on occupational exposures to peracetic acid (CAS #79-21-0, also known as peroxyacetic acid and PAA). NIOSH is requesting information on the following: (1) Workplace exposure data for peracetic acid, (2) possible health effects observed in workers exposed to peracetic acid, (3) workplaces and

products in which peracetic acid may be found, (4) description of work tasks and scenarios with a potential for exposure to peracetic acid, (5) reports and findings from in vitro and in vivo toxicity studies with peracetic acid, (6) data applicable to the quantitative risk assessment of health effects associated with acute, subchronic and chronic workplace exposures to peracetic acid, (7) sampling and analytical methods for peracetic acid, and (8) control measures, including engineering controls, work practices, and personal protective equipment (PPE), that are being used in workplaces where there is potential for exposure to peracetic acid.

DATES: Electronic or written comments must be received by June 5, 2017.

ADDRESSES: You may submit comments, identified by CDC-2017-0015 and docket number NIOSH-295, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Mail:* National Institute for Occupational Safety and Health, NIOSH Docket Office, 1090 Tusculum Avenue, MS C-34, Cincinnati, Ohio 45226-1998.

Instructions: All information received in response to this notice must include the agency name and docket number [CDC-2017-0015; NIOSH-295]. All relevant comments received will be posted without change to www.regulations.gov, including any personal information provided. For access to the docket to read background documents or comments received, go to www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: G. Scott Dotson, NIOSH, Education and Information Division, Robert A. Taft Laboratories, 1090 Tusculum Avenue, Cincinnati, OH 45226, (513) 533-8540 (not a toll free number).

SUPPLEMENTARY INFORMATION: Peracetic acid is a peroxide-based molecule used extensively as an antimicrobial agent in many commercial applications. It is routinely used as a sterilant during the cleaning of endoscopes and other medical devices, as a disinfectant in food processing, as a bleaching agent, and in the synthesis of other chemicals [NAS 2010; Pechacek et al. 2015]. The chemical and physical properties of peracetic acid make the molecule highly reactive, unstable, and volatile. Peracetic acid has a pungent, vinegar-like odor [NAS 2010].

Peracetic acid is formed from a sulfuric acid-catalyzed chemical reaction between acetic acid and hydrogen peroxide [NAS 2010]. Peracetic acid solutions typically consist of a mixture of peracetic acid,

acetic acid, and hydrogen peroxide in various concentrations. NAS [2010] reported that technical or commercial peracetic acid products contain peracetic acid, acetic acid, and hydrogen peroxide in solution. Concentrations of peracetic acid in these products vary, but do not exceed 40%. Peracetic acid products containing more than 15% peracetic acid demonstrate excessive reactivity, instability, and some degree of explosiveness [Pechacek et al. 2015].

Acute exposure to peracetic acid is irritating to the eyes, respiratory tract, and skin. Peracetic acid is a strong sensory irritant considered to be more potent than acetic acid or hydrogen peroxide [NAS 2010]. Cristofari-Margquand et al. [2007] indicated that healthcare workers experienced asthma associated with workplace exposures to peracetic acid. No data on human

lethality due to exposure to peracetic acid were identified. Lethal exposures in animals caused hemorrhage, edema, and pulmonary consolidation [NAS 2010].

NIOSH does not have a recommended exposure limit (REL) for peracetic acid. The Occupational Safety and Health Administration (OSHA) has not established a permissible exposure limit (PEL). The California Division of Occupational Safety and Health (CalOSHA) has not established a PEL for peracetic acid. The American Conference of Governmental Industrial Hygienists (ACGIH®) has established a threshold limit value (TLV®)—short term exposure limit (STEL) of 1.24 mg/m³ (0.4 ppm) to protect workers against irritation of eyes, skin, and the upper respiratory tract [ACGIH® 2016]. The National Advisory Committee for Acute Exposure Guideline Levels for

Hazardous Substances (NAC/AEGL Committee) has established AEGL values for peracetic acid [NAS 2010]. AEGL values are threshold exposure limits for the general public and are applicable to emergency exposure periods ranging from 10 minutes to 8 hours [NAS 2001]. AEGL-1 represents an airborne concentration above which exposures could cause notable discomfort, irritation, or certain asymptomatic non-sensory effects. AEGL-2 represents an airborne concentration above which exposures could cause irreversible or other serious, long lasting adverse effects or an impaired ability to escape. AEGL-3 represents an airborne concentration above which exposures could cause life-threatening effects or death. Table 1 summarizes the AEGL values for peracetic acid.

TABLE 1—AEGL VALUES FOR PERACETIC ACID *

	10 minute	30 minute	60 minute	4 hour	8 hour
AEGL-1	0.52 mg/m ³ (0.17 ppm)	0.52 mg/m ³ (0.17 ppm).			
AEGL-2	1.6 mg/m ³ (0.5 ppm)	1.6 mg/m ³ (0.5 ppm).			
AEGL-3	60 mg/m ³ (19 ppm)	30 mg/m ³ (9.6 ppm)	15 mg/m ³ (4.8 ppm)	6.3 mg/m ³ (2 ppm)	4.1 mg/m ³ (1.3 ppm).

* NAS [2010].

In May 2015, NIOSH published a notice in the **Federal Register** [80 FR 24930] announcing the availability of and a request for comments for the draft immediately dangerous to life or health (IDLH) values and support technical documents, entitled *Immediately Dangerous to Life or Health (IDLH) Value Profiles*, for 14 chemicals including peracetic acid. The proposed IDLH value for peracetic acid was 1.7 mg/m³ (0.55 ppm) [draft NIOSH 2015]. The proposed recommendation was based on sensory irritation in human volunteers reported in Fraser and Thorbinson [1986]. Due to subsequent requests from the public, a supplemental notice was published in the **Federal Register** [81 FR 53147] announcing that NIOSH was seeking further comments on the draft IDLH Value Profile for peracetic acid. The public comments indicated that (1) the proposed IDLH value was overprotective, (2) the data available for peracetic acid are of low quality, and (3) issues exist with the sampling and analysis of air samples for peracetic acid in the workplace. Based on these comments, NIOSH is re-evaluating the proposed IDLH value for peracetic acid.

Research efforts are needed to characterize the acute and chronic health effects of occupational exposures to peracetic acid. These efforts include: (1) Epidemiological and field studies

designed to assess workplace exposures to peracetic acid, (2) in vivo and in vitro studies designed to characterize the acute, sub-chronic, and chronic effects of peracetic acid, (3) quantitative risk assessment(s) intended to characterize the increased risks associated with workplace exposures to peracetic acid, (4) evaluation of workplace controls, including engineering controls, administrative controls, and PPE, (5) development of analytical methods to accurately collect and analyze air samples of peracetic acid under various conditions (e.g., task-based monitoring, full-shift monitoring, real-time monitoring).

Background: The purpose of the RFI is to seek information relevant to assessing the risk of occupational exposures to peracetic acid.

Information Needs: Additional data and information are needed to assist NIOSH in characterizing and assessing the health risk of occupational exposures to peracetic acid. Information is needed on: (1) Workplace exposure data for peracetic acid, (2) possible health effects observed in workers exposed to peracetic acid, (3) workplaces and products in which peracetic acid may be found, (4) description of work tasks and scenarios with a potential for exposure to peracetic acid, (5) reports and findings from in vitro and in vivo toxicity studies

with peracetic acid, (6) data applicable to the quantitative risk assessment of health effects associated with acute, subchronic and chronic workplace exposures to peracetic acid, (7) sampling and analytical methods for peracetic acid, and (8) control measures, including engineering controls, work practices, and personal protective equipment (PPE), that are being used in workplaces where there is potential for exposure to peracetic acid.

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Initial Review

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces a meeting for the initial review of applications in response to Funding Opportunity Announcement (FOA) DP15–0020301SUPP17, Supplement to Enhance Laboratory and Statistical Support of the Population Registry of Diabetes in Youth.

TIME AND DATE: 11:00 a.m.–2:00 p.m., EDT, March 29, 2017 (Closed).

PLACE: Teleconference.

STATUS: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92–463.

MATTERS FOR DISCUSSION: The meeting will include the initial review, discussion, and evaluation of applications received in response to “Supplement to Enhance Laboratory and Statistical Support of the Population Registry of Diabetes in Youth”, FOA DP15–0020301SUPP17.

CONTACT PERSON FOR MORE INFORMATION: Jaya Raman Ph.D., Scientific Review

Officer, CDC, 4770 Buford Highway, Mailstop F80, Atlanta, Georgia 30341, Telephone: (770) 488–6511, kva5@cdc.gov delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

National Institutes of Health

National Center for Complementary and Integrative Health; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Center for Complementary and Integrative Health Special Emphasis Panel; NIH Health Care Systems Research Collaboratory—Coordinating Center (U24).

Date: April 6, 2017.

Time: 12:00 p.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, 6707 Democracy Boulevard, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Viatcheslav A. Soldatenkov, Ph.D., Scientific Review Officer, Office of Scientific Review, Division of Extramural Activities, NCCIH/NIH, 6707 Democracy Blvd., Suite 401, Bethesda, MD 20892, 301–451–3849, sOLDATENKOVV@mail.nih.gov.

National Institute of Allergy and Infectious Diseases; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel; NIH Support for Conferences and Scientific Meetings (Parent R13).

Date: March 20–22, 2017.

Time: 8:30 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

Contact Person: J. Bruce Sundstrom, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room 3G11A, National Institutes of Health/ NIAID, 5601 Fishers Lane, MSC 9823, Bethesda, MD 20892–9823, 240–669–5045, sundstromj@niaid.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the urgent need to meet timing limitations imposed by the intramural research review cycle.
