OMB Control Number: 0560-0265.

Type of Request: Extension with a revision of currently approved information collection.

Abstract: The information collection is necessary to effectively monitor critical producer data changes made in BP at the request of the producer to correct or update their information. The form AD-2047, Customer Data Worksheet Request for Business Partner Record Change, is used to collect the information from the producer to make changes to the information in BP. The necessity to monitor critical producer data changes in the BP database is a direct result of the OMB Circular A-123 Remediation/Corrective Action Plan for County Office Operations which requires effective internal controls to be in place for Federal programs. FSA team was established and reviewed and documented key controls related to all material producer accounts. FSA also included the analysis on a review of BP.

The number of respondents increased by 5,179 to account for additional customers because of new programs that have been implemented since the last OMB approval.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response multiplied by the estimated total annual of responses.

Estimated Average Time to Respond: Public reporting burden for collection of this information is estimated to average 0.17 hours per response.

Type of Respondents: FSA, NRCS, and RD customers currently residing in BP.

Estimated Number of Respondents: 56,926.

Estimated Number of Responses per Respondent: 1.

Estimated Annual Number of Responses: 56,926.

Estimated Average Time per Response: 0.17.

(2) Evaluate the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
