SUPPLEMENTARY INFORMATION: The Environmental Protection Agency has submitted an information collection request (ICR), "NSPS for VOC Emissions from Petroleum Refinery Wastewater Systems (40 CFR part 60, subpart QQQ) (Renewal)" (EPA ICR No. 1136.12, OMB Control No. 2060-0172), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through March 31, 2017. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The NSPS for Sewage Sludge Incineration (SSI) Units at Subpart LLLL fulfill the requirements of Sections 111 and 129 of the Clean Air Act (CAA), which require EPA to promulgate NSPS for solid waste incineration units. The information collection activities required by the NSPS include: Siting requirements, operator training and qualification requirements, testing, monitoring and reporting requirements, one-time and periodic reports, and the maintenance of records. These activities will enable the Designated Administrator to determine initial compliance with the emission limits for the regulated pollutants,

monitor compliance with operating parameters, and ensure that facilities conduct the proper planning and operator training.

Form Numbers: None.

Respondents/affected entities: Owners or operators of sewage sludge incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart LLLL)

Estimated number of respondents: 5 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 1,270 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$694,000 for both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden from the most-recently approved ICR. The increase primarily results from an increase in the number of sources, as this ICR is updated to reflect the total number of SSI units subject to Subpart LLLL based on EPA's 2016 SSI inventory. In addition, this ICR makes several corrections to the number of reports and reporting frequency to ensure consistency in calculating the respondent labor hours, Agency labor hours, and the total number of responses.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 60, subpart A, as well as

the specific requirements at 40 CFR part 60, subpart JJJJ. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/Affected Entities: Stationary spark ignition internal combustion engines.

Respondent's Obligation To Respond: Mandatory (40 CFR part 60, subpart JJJJ).

Estimated Number of Respondents: 18,570 (total).

Frequency of Response: Initially and annually.

Total Estimated Burden: 35,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total Estimated Cost: \$2,480,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden and labor costs as currently identified in the OMB Inventory of Approved Burdens. The change in burden occurred due to a program change. Beginning in 2015, this rule requires annual reporting for emergency stationary SI ICE that operate under the conditions at § 60.4243(d)(3)(i). This ICR includes burden estimates for the annual reporting requirements. In addition to the program change the burden in this ICR has increased due to an increase in the estimated number of respondents. The number of sources has increased since the last ICR to account for industry growth in the past three years.

There is an increase in the total capital/startup and O&M as currently identified in the OMB Inventory of Approved Burden. This increase has occurred due to an increase in the estimated number of respondents. The number of sources has increased since the last ICR to account for industry growth in the past three years.
