SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as the specific requirements at 40 CFR part 63, subpart JJJ. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Thermoplastic resin production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart JJJ).
Estimated number of respondents: 31 (total).

Frequency of response: Initially, occasionally, semiannually, and quarterly.

Total estimated burden: 177,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$9,350,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated burden,

labor costs, and capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. The change in the burden and cost estimates occurred because the previously-approved ICR only covered the burden and costs associated with the 2014 amendment. This ICR combines the burden from both the 2014 amendment and the pre-2014 requirements of the rule.

Director, Collection Strategies Division.

This is a proposed extension of the ICR, which is currently approved through March 31, 2017. Abstract: The NSPS for Sewage Sludge Incineration (SSI) Units at Subpart LLLL fulfill the requirements of Sections 111 and 129 of the Clean Air Act (CAA), which require EPA to promulgate NSPS for solid waste incineration units. The information collection activities required by the NSPS include: Siting requirements, operator training and qualification requirements, testing, monitoring and reporting requirements, one-time and periodic reports, and the maintenance of records. These activities will enable the Designated Administrator to determine initial compliance with the emission limits for the regulated pollutants,

monitor compliance with operating parameters, and ensure that facilities conduct the proper planning and operator training.

Form Numbers: None.

Respondents/affected entities: Owners or operators of sewage sludge incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart LLLL)

Estimated number of respondents: 5 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 1,270 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$694,000 for both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden from the most-recently approved ICR. The increase primarily results from an increase in the number of sources, as this ICR is updated to reflect the total number of SSI units subject to Subpart LLLL based on EPA's 2016 SSI inventory. In addition, this ICR makes several corrections to the number of reports and reporting frequency to ensure consistency in calculating the respondent labor hours, Agency labor hours, and the total number of responses.

Director, Collection Strategies Division.
