Docket No. 72-1050

ORDER

On January 30, 2017, the NRC provided notice in the **Federal Register** of Waste Control Specialists, LLC's (WCS) license application to construct and operate a consolidated interim waste storage facility.¹ The **Federal Register** notice set a deadline of March 31, 2017, for members of the public to file a request for a hearing and petition for leave to intervene on WCS's application

The Sierra Club, the Sustainable Energy and Economic Development (SEED) Coalition, and the Nuclear Information and Resource Service (NIRS) each requested a 120-day extension to file hearing requests.² The Sierra Club later withdrew its original request and re-filed a joint motion with WCS requesting a revised schedule that would extend the deadline for filing all hearing requests by 61 days, to May 31,

¹ Waste Control Specialists LLC's Consolidated Interim Spent Fuel Storage Facility Project, 82 FR 8773 (Jan. 30, 2017).

² *Sierra Club's Motion for Extension of Time to Intervene in Licensing Proceeding* (Mar. 2, 2017) (ADAMS accession no. B. Submitting Comments

Please include Docket ID NRC-2016-0129 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. The NRC will

post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS, and the NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized below.

1. *The title of the information collection:* 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.”
2. *OMB approval number:* 3150-0151.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion. Applications are submitted only when licensing action is sought.

6. *Who will be required or asked to respond:* Applicants for early site permits (ESPs), standard design approvals (SDAs) and certifications, manufacturing licenses (MLs), and licenses which combine construction permits (CPs) and conditional operating licenses (OLs), e.g. COLs, for commercial nuclear power reactors.

7. *The estimated number of annual responses:* 1,175 (1,150 reporting responses plus 25 recordkeepers).

8. *The estimated number of annual respondents:* 25.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 243,854 hours (22,414 hours reporting plus 23,440 hours recordkeeping).

10. *Abstract:* The licensing processes in part 52 of title 10 of the *Code of Federal Regulations* (10 CFR) provide for issuance of ESPs, SDAs, MLs, CPs, and COLs for commercial nuclear power reactors. The applicants submit updated reports, applications for renewals, exemption requests and maintain records of changes to the facility and

records of detailed design related information. These licensing procedures are options to the two-step licensing process in 10 CFR part 50, which provides for a CP and an OL. The part 52 licensing process places procedural requirements in part 52 and technical requirements in part 50. Part 52 reduces the overall paperwork burden borne by applicants for CPs and OLs because part 52 only requires a single application and provides options for referencing standardized designs. The information in 10 CFR part 52 is needed by the agency to assess the adequacy and suitability of an applicant’s site, plant design, construction, training and experience, plans and procedures for the protection of public health and safety.

III. Specific Requests for Comment

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 30th day of March, 2017.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
