NUCLEAR REGULATORY COMMISSION

[NRC-2017-0016]

Guidance for Developing Principal Design Criteria for Non-Light Water Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; extension of comment period.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is providing additional information for a notice published in the **Federal Register** on February 3, 2017, issuing draft regulatory guide (DG), DG-1330, "Guidance for Developing Principal Design Criteria for Non-Light Water Reactors," for a 60-day public comment period. This action is necessary to inform the public that a paragraph was inadvertently omitted from the "NRC Rationale for Adaptions to GDC" section of General Design Criterion (GDC) 26, "Reactivity Control Systems," in Appendices A, B, and C of DG-1330, and provides the NRC's Agencywide Documents Access and Management System (ADAMS) accession numbers for the DG and the regulatory analysis for the DG. The NRC is also extending the public comment period for an additional 15 days to allow stakeholders time to review the change and provide comments.

DATES: The due date for comments requested in the FR notice published on February 3, 2017 (82 FR 9246), is extended. Comments should be submitted by April 20, 2017. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

II. Discussion

On October 27, 2016, the NRC received an application for a specific import license (IW034) from UniTech to import 10,000 metric tons of byproduct material in the form of radioactive-contaminated tools, metals, and other solid materials, along with incremental amounts of special nuclear material (less than fifteen grams per shipment). On October 27, 2016, the NRC also received an associated application for a specific export license (XW023) from UniTech to export 10,000 metric tons of byproduct material, along with incremental amounts of special nuclear material (less than fifteen grams per shipment). As further explained in the March 30, 2017, letter from David Skeen (ADAMS Accession No. ML17086A272), Deputy Director, Office of International Programs, NRC, to Glenn Roberts, Corporate Health Physicist, UniTech, the NRC has returned UniTech's application for a specific import license without action because the requested import activities are authorized under an NRC general import license.

Therefore, the only regulatory action pending before the NRC is UniTech's application for a specific export license (XW023) to export low-level radioactive waste to Canada. The NRC is reopening both the public comment period and the opportunity to file a request for a hearing or petition for leave to intervene on XW023 for an additional 30 days after publication of this notice in the **Federal Register** (FR). Any request for hearing or petition for leave to intervene

shall be served by the requestor or petitioner upon the applicant, the office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

A request for a hearing or petition for leave to intervene may be filed with the NRC electronically in accordance with NRC's E-Filing rule promulgated in August 2007 (72 FR 49139; August 28, 2007). Information about filing electronically is available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>. To ensure timely electronic filing, at least 5 days prior to the filing deadline, the petitioner/requestor should contact the Office of the Secretary by email at hearingdocket@nrc.gov, or by calling 301-415-1677, to request a digital ID certificate and allow for the creation of an electronic docket.

In addition to a request for hearing or petition for leave to intervene, written comments, in accordance with 10 CFR 110.81, should be submitted within thirty days after publication of this notice in the **Federal Register** to Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rulemaking and Adjudications.

Dated at Rockville, Maryland, this 30th day of March 2017.

For the Nuclear Regulatory Commission.

David L. Skeen,

Deputy Director, Office of International Programs.
