

Annual Burden Hours

The annual burden hours for the Declaration of Reporting Status is [0.25 hours × 480 respondents × 1 response per respondent], which equals 120 hours.

Total Capital/Startup Burden Cost

The Department assumes that each respondent already has computer hardware and access to the internet for basic business needs. Therefore, there are no annualized capital or start-up costs incurred by chemical facilities of interest or high-risk chemical facilities for this information collection.

Total Recordkeeping Burden

There is no recordkeeping burden for this instrument is *de minimus* as estimated by the Department for similar instruments under the CSAT Information Collection (IC No. 1670–0007).

Total Annual Burden Cost

The Department maintains the assumption found in the other instruments within this Information Collection that SSOs are responsible for submitting information to the Department. Thus, the Department assumes that an SSO will submit the Declaration of Reporting Status.

Therefore, to estimate the total annual burden, the Department multiplied the annual burden of 120 hours by the average hourly wage rate of SSOs of \$67.72 per hour. Therefore, the total annual burden cost for the Declaration of Reporting Status instrument is \$8,126.40 [120 total annual burden hours × \$67.72 per hour], which equals \$8,126.40].

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).
