

has provided significant oversight of these confined field trials and has not detected any negative impacts on the environment, including threatened and endangered species. Permitted field trials are planned and in progress in a number of regions in Florida to determine the efficacy of expression of spinach defensins by CTV. The action proposed in the permit application under consideration is to commercialize the use of genetically engineered CTV as a biological means to manage citrus greening disease in Florida. The environmental impact statement (EIS) will evaluate the environmental impacts associated with this action throughout the State of Florida. Decisions on where the genetically engineered CTV would be deployed would be determined by Southern Gardens Citrus Nursery, LLC, in agreements with growers, and deployment would be monitored by APHIS. The genetically engineered CTV would be applied to citrus trees by grafting (*i.e.*, not by spraying the trees by ground or air).

Under the provisions of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321 *et seq.*), Federal agencies must examine the potential environmental impacts of proposed major Federal actions that may significantly affect the quality of the human environment before those actions can be taken. In accordance with NEPA, regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), U.S. Department of Agriculture regulations implementing NEPA (7 CFR part 1b), and APHIS' NEPA Implementing Procedures (7 CFR part 372), APHIS has considered how to properly examine the potential environmental impacts of issuing permits for the introduction of genetically engineered regulated articles into the United States.

In reviewing Southern Gardens Citrus Nursery, LLC's permit application, APHIS has determined that the commercial release of genetically engineered CTV does not involve genetically engineering citrus trees, and that use of the genetically engineered CTV will have no impact on the genetics of the trees. However, APHIS has decided to prepare an EIS to better understand the potential for environmental impacts associated with the issuance of a permit. The EIS will examine the broad and cumulative environmental impacts of the requested permit, including potential impacts of the proposed action on the human environment and alternative courses of action. This notice identifies potential issues and alternatives that we will

study in the EIS and requests public comment to further delineate the issues and the scope of the alternatives. The State of Florida will be a cooperating agency for the preparation of the EIS.

Alternatives

The Federal action being considered is whether to approve the permit request from Southern Gardens Citrus Nursery, LLC. This notice identifies reasonable alternatives and potential issues that may be studied in the EIS. We are requesting public comments to further delineate the range of alternatives and environmental impacts and issues to be evaluated in the EIS for the permit application.

The EIS will consider a range of reasonable alternatives. APHIS is currently considering two alternatives: (1) Take no action, *i.e.*, APHIS would not approve the permit request, or (2) approve the permit request from Southern Gardens Citrus Nursery, LLC.

Environmental Issues for Consideration

We have also identified the following potential environmental issues for consideration in the EIS. We are requesting that the public provide information on the following questions during the comment period on this notice:

- Are there any new or greater plant pest or environmental risks or apparent benefits associated with the strategy of using genetically engineered CTV instead of the currently available approaches to manage citrus greening disease? If so, please explain.
- The EIS will focus on the development and use of genetic engineering to offer a novel pest control program. Are there any environmental risks that APHIS should consider in detail for CTV expressing spinach defensin?
- What are the potential risks of nontarget impacts associated with this technology?

Comments that identify other issues or alternatives that should be considered for examination in the EIS would be especially helpful. All comments received during the scoping period will be carefully considered in developing the final scope of the EIS. Upon completion of the draft EIS, a notice announcing its availability and an opportunity to comment on it will be published in the **Federal Register**.

Title: Employment and Training Program Activity Report.

OMB Number: 0584–0339.

Expiration Date: June 30, 2014.

Type of Request: Extension without revision of a currently approved collection.

Abstract: 7 CFR 273.7(c)(9) requires State agencies to submit quarterly E&T Program Activity Reports containing monthly figures for participation in the program. FNS uses Form FNS–583, to collect participation data. The information collected on the FNS–583 report includes:

- On the first quarter report, the number of work registrants receiving

SNAP as of October 1 of the new fiscal year;

- On each quarterly report, by month, the number of new work registrants; the number of able-bodied adults without dependents (ABAWDs) applicants and recipients participating in qualifying components; the number of all other applicants and recipients (including ABAWDs involved in non-qualifying activities) participating in components; and the number of ABAWDs exempt under the State agency’s 15 percent exemption allowance;

- On the fourth quarter report, the total number of individuals who participated in each component, which is also sorted by ABAWD and non-ABAWD participants and the number of individuals who participated in the E&T Program during the fiscal year.

7 CFR 273.7(d)(1)(i)(D) provides that if a State agency will not expend all of the funds allocated to it for a fiscal year, FNS will reallocate unexpended funds to other State agencies during the fiscal year or the subsequent fiscal year as FNS considers appropriate and equitable. After FNS makes initial E&T allocations, State agencies may request more funds as needed. Typically FNS receives fourteen such requests per year.

The time it takes to prepare these requests is included in the burden. After receiving the State requests, FNS will reallocate unexpended funds as provided above. The following is the estimated burden for E&T reporting including the burden for State agencies to request additional funds.
