Title: Importation of Fresh Citrus Fruit from Uruguay into the United States.

OMB Control Number: 0579-0401.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States. The regulations in “Subpart—Fruits and Vegetables” (Title 7, Code of Federal Regulations (CFR) 319.56, referred to as the regulations), prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are new to or not widely distributed with the United States. APHIS’ fruits and vegetables regulations allow, under certain conditions, the importation into the United States of commercial consignments of fresh citrus fruit from Uruguay

Need and Use of the Information: APHIS uses the following information activities to verify that citrus fruit from Uruguay is grown in production areas that are registered and monitored by the North American Plant Protection Organization (NPPPO) and to verify consignments have been produced with a systems approach: Bilateral Workplan, Production Site Registration, Phytosanitary Certificate, Labeling Boxes, Monitoring and Inspection, Investigation and Appropriate Remedial Action, Recordkeeping, Registration of Packinghouses, Certified Facility, and Monitoring. Failure to collect the information would cause millions of dollars in losses and cripple APHIS’ ability to ensure that fresh citrus from Uruguay is not carrying plant pests.

Description of Respondents: Business or other for-profit and Federal Government.

Number of Respondents: 16.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 1,351.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the

Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: National Survey of Children's Health.

OMB Control Number: 0607-0990.

Form Number(s):

English survey forms include:

NSCH-S1 (English Screener),

NSCH-T1 (English Topical for 0- to 5-year-old children),

NSCH-T2 (English Topical for 6- to 11-year-old children),

NSCH-T3 (English Topical for 12- to 17-year-old children).

Spanish survey forms include:

NSCH-S-S1 (Spanish Screener),

NSCH-S-T1 (Spanish Topical for 0- to 5-year-old children),

NSCH-S-T2 (Spanish Topical for 6- to 11-year-old children), and

NSCH-S-T3 (Spanish Topical for 12- to 17-year-old children).

Type of Request: Regular submission.

Number of Respondents: 58,345 for the Screener and 23,460 for the Topical.

Average Hours per Response: 0.083 for the screener and 0.5 for the topical.

Burden Hours: 16,573.

Needs and Uses: The National Survey of Children's Health (NSCH) enables the Maternal and Child Health Bureau (MCHB) of the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) to produce national and state-based estimates on the health and well-being of children, their families, and their communities as well as estimates of the prevalence and impact of children with special health care needs.

Data will be collected using one of two modes. The first mode is a web instrument (Centurion) survey that contains the screener and topical instruments. The web instrument first will take the respondent through the screener questions. If the household screens into the study, the respondent will be taken directly into one of the three age-based topical sets of questions. The second mode is a mailout/mailback of a self-administered paper-and-pencil interviewing (PAPI) screener instrument followed by a separate mailout/mailback of a PAPI age-based topical instrument.

The National Survey of Children's Health (NSCH) is a large-scale (sample size is 156,054 addresses) national survey. The survey will consist of one experiment to test the efficacy of an infographic in the initial package as well as two key, non-experimental design elements. It is anticipated that the infographic will provide respondents with a visually pleasant overview of the survey, including survey design, key estimates from past

iterations, and information on how the data can benefit their community, will encourage response. Higher response can reduce follow-up costs and nonresponse bias. The first additional non-experimental design element is a \$2 screener cash incentive mailed to 90% of sampled addresses; the remaining 10% (the control) will receive no incentive to monitor the effectiveness of the cash incentive. This incentive is designed to increase response and reduce nonresponse bias. The incentive amount was chosen following an incentive test in the 2016 NSCH. From this test, we concluded that the \$2 incentive significantly increased response over no incentive, particularly among low-response groups, and was more cost effective than the \$5 incentive. The second additional non-experimental design element is a modification to data collection procedures based on the block group-level paper-only response probability to identify households (30% of the sample) that would be more likely to respond by paper and send them a paper questionnaire from the initial mailing.

Affected Public: Parents, researchers, policymakers, and family advocates.

Frequency: This 2017 collection is the second administration of the NSCH. It is expected that this will become an annual or biennial survey, with a new sample drawn for each administration.

Respondent's Obligation: Voluntary.
