### **II. Discussion**

On January 5, 2017, NRC received applications from Perma-Fix Northwest, Inc. (Perma-Fix) requesting amendment 05 to both a specific import license (IW022) and a specific export license (XW012) for import and export, respectively, of radioactive waste. (ADAMS Accession Nos. ML17005A377 and ML17005A373, respectively).<sup>1</sup> Notice of receipt of the applications were provided in **Federal Register** notices issued on March 6, 2017 and March 7, 2017 (82 FR 12640-12641 and 82 FR 12858, respectively).

On March 22, 2017, the NRC returned the import amendment application without further action [ADAMS Accession No. ML17082A001]. The reason for the return of the application is that the material proposed for import does not meet the definition of radioactive waste in 10 CFR 110.2, because Perma-Fix will not be importing any of the material for ultimate disposal in the U.S. As such, the requested import activities are authorized under an NRC general import license pursuant to 10 CFR 110.27.

Given the return without action of Perma-Fix's import amendment

<sup>1</sup>The NRC previously returned without action earlier-filed Perma-Fix applications to amend the same import and export licenses because the prior applications were unclear as to the material proposed to be imported and exported. [ADAMS Accession No. ML16291A466].

application, the only regulatory action pending before the NRC is Perma-Fix's application to amend its specific export license (XW012) for the export of low-level radioactive waste to Canada. The export license amendment is requested to change the point of contact; change the foreign supplier name; remove references to the waste classification as defined in 10 CFR 61.55 and references to Table A2 values of 49 CFR 173.435; and extend the date of expiration from September 30, 2017, to September 30, 2022.

The NRC is noticing the request to amend the license to export radioactive waste; opening the opportunity for public comment; and opening the opportunity to file a request for a hearing or petition for leave to intervene on XW012 for an additional 30 days after publication of this notice in the **Federal Register** (FR). Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

A request for a hearing or petition for leave to intervene may be filed with the NRC electronically in accordance with NRC's E-Filing rule promulgated in August 2007 (72 FR 49139; August 28, 2007). Information about filing electronically is available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>. To ensure timely electronic filing, at least 5 days prior to the filing deadline, the petitioner/requestor should contact the Office of the Secretary by email at [hearingdocket@nrc.gov](mailto:hearingdocket@nrc.gov), or by calling 301-415-1677, to request a digital ID certificate and allow for the creation of an electronic docket.

In addition to a request for hearing or petition for leave to intervene, written comments, in accordance with 10 CFR 110.81, should be submitted within thirty days after publication of this notice in the **Federal Register** to Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rulemaking and Adjudications.

The information concerning this application for an export license follows.

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-247 and 50-286; NRC-2017-0074]

### Entergy Nuclear Operations, Inc., Indian Point Nuclear Generating, Units No. 2 and 3

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice, Director's decision regarding petition.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) has issued a director's decision with regard to a petition dated June 30, 2016, filed by Mr. David A. Lochbaum of the Union of Concerned Scientists (the petitioner), requesting that the NRC take enforcement action against Entergy Nuclear Operations, Inc., the licensee for Indian Point Nuclear Generating, Units No. 2 and 3 (Indian Point 2 and 3). The petitioner's requests and the director's decision are included in the **SUPPLEMENTARY INFORMATION** section of this document.

**ADDRESSES:** Please refer to Docket ID NRC-2017-0074 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2017-0074. Address

questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: [Carol.Gallagher@nrc.gov](mailto:Carol.Gallagher@nrc.gov).

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a director's decision DD-17-01 (ADAMS Accession No. ML17065A030) on a petition filed by the petitioner on June 30, 2016 (ADAMS Accession No. ML16187A186). The petition was supplemented by letter dated January 10, 2017 (ADAMS Accession No. ML17011A012).

In response to degradation of reactor vessel baffle-former bolts (BFBs) identified at Indian Point 2 during its spring 2016 refueling outage, the petitioner requested the NRC to:

- (1) Issue an order requiring the licensee to inspect the reactor vessel BFBs and install the downflow to upflow modification at Indian Point 2 during its next refueling outage (*i.e.*, spring 2018).

- (2) Issue a demand for information requiring the licensee to submit an operability determination to the NRC regarding continued operation of Indian Point 3 until its reactor vessel BFBs can be inspected according to the Electric Power Research Institute Materials Reliability Program Topical Report MRP-227-A, "Materials Reliability Program: Pressurized Water Reactor Internals Inspection and Evaluation Guidelines" (ADAMS Package Accession No. ML120170453).

- (3) Issue a demand for Information requiring the licensee to submit an evaluation of the performance, role, and operating experience of the Indian Point metal impact monitoring system in detecting and responding to indications of loose parts (such as broken baffle bolt heads and locking tab bars) within the reactor coolant system.

As the basis for this request, the petitioner cited Licensee Event Report 2016-004-00, "Unanalyzed Condition due to Degraded Reactor Baffle-Former Bolts," submitted by the licensee on May 31, 2016 (ADAMS Accession No. ML16159A219), that describes an event where there was an unanalyzed condition due to degraded reactor vessel BFBs at Indian Point 2, which is reportable under § 50.73(a)(2)(ii)(B) of title 10 of the *Code of Federal Regulations* (10 CFR). The petitioner states that (1) an order is the proper means for ensuring that the bolts are inspected and that the downflow to upflow modification is installed during the next refueling outage at Indian Point 2, (2) Indian Point 3 is potentially operating with degraded BFBs and an operability determination is the mechanism established by the NRC to properly evaluate such situations, and (3) the metal impact monitoring system as described in the updated final safety analysis report has the potential to act as an alternate monitoring system to
