**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether

the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Focus Groups as Used by the Food and Drug Administration (All FDA-Regulated Products) OMB Control Number 0910-0497**

FDA conducts focus group interviews on a variety of topics involving FDA-regulated products, including drugs, biologics, devices, food, tobacco, and veterinary medicine.

Focus groups provide an important role in gathering information because they allow for a more in-depth understanding of patients’ and consumers’ attitudes, beliefs, motivations, and feelings than do quantitative studies. Focus groups serve the narrowly defined need for direct and informal opinion on a specific topic and as a qualitative research tool have three major purposes:

- To obtain patient and consumer information that is useful for developing variables and measures for quantitative studies,
- to better understand patients’ and consumers’ attitudes and emotions in response to topics and concepts, and
- to further explore findings obtained from quantitative studies.

FDA will use focus group findings to test and refine their ideas, but will generally conduct further research before making important decisions such as adopting new policies and allocating or redirecting significant resources to support these policies.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN <sup>1</sup>

Activity	Number respondents	Annual frequency per response	Total annual responses	Hours per response	Total hours
Focus Group Interviews .....	8,800	1	8,800	1.75	15,400

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

#### Notice of Interest Rate on Overdue Debts

Section 30.18 of the Department of Health and Human Services' claims collection regulations (45 CFR part 30) provides that the Secretary shall charge an annual rate of interest, which is determined and fixed by the Secretary of the Treasury after considering private consumer rates of interest on the date that the Department of Health and Human Services becomes entitled to recovery. The rate cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the "Schedule of Certified Interest Rates with Range of

Maturities" unless the Secretary waives interest in whole or part, or a different rate is prescribed by statute, contract, or repayment agreement. The Secretary of the Treasury may revise this rate quarterly. The Department of Health and Human Services publishes this rate in the **Federal Register**.

The current rate of 10%, as fixed by the Secretary of the Treasury, is certified for the quarter ended March 31, 2017. This rate is based on the Interest Rates for Specific Legislation, "National Health Services Corps Scholarship Program (42 U.S.C. 254o(b)(1)(A))" and "National Research Service Award Program (42 U.S.C. 288(c)(4)(B))." This interest rate will be applied to overdue debt until the Department of Health and Human Services publishes a revision.

#### Opioid State Targeted Response Grants

Opioids were responsible for over 33,000 deaths in 2015; this alarming statistic is unacceptable. Through a sustained focus on people, patients, and partnerships, this crisis can be addressed across our nation.

Last month President Trump announced the President's Commission on Combating Drug Addiction and the Opioid Crisis. This Commission is tasked with studying the scope and effectiveness of the federal response to this crisis and providing recommendations to the President for improving it. As the Administration develops a comprehensive strategy to improve the federal response to combat opioids, the U.S. Department of Health and Human Services (HHS) must ensure the Opioid State Targeted Response grants are aligned accordingly and put to the best use possible. Given the urgency of the issue, we understand the need to release the funding for the first year of this program immediately. However, the intentions of HHS for the second year are to develop funding allocations and policies that are the most clinically sound, effective and efficient.

In the interest of ensuring that these resources are applied in the best manner possible, I will be seeking input from

the states/territories in the coming weeks and months. As funding from the first year is implemented and monitored, states/territories will be asked to identify best practices, lessons learned, and key strategies that can help HHS further target these funds in the subsequent year to best address this tragic issue.
