SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing a revision to an existing guide in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

Revision 3 of RG 1.54 was issued with a temporary identification of Draft Regulatory Guide, DG–1331. The purpose of issuing this RG is to endorse, with certain clarifications and exceptions, the use of American Society for Testing and Materials (ASTM International) Standard D 5144–08 (2016), “Standard Guide for Use of Protective Coating Standards in Nuclear Power Plants,” and multiple sub-tier ASTM International standards. The ASTM International Standard D 5144–08 (2016) was issued to provide a common basis on which protective coatings for the surfaces of nuclear power generating facilities may be qualified and selected through reproducible evaluation tests. This revision also expands the scope to include internal coatings and linings on components within the scope of license renewal. In addition, the NRC made some clarifications and format changes that did not change the intent of the guidance.

ASTM International standards. ASTM International, standard D 5144–08 (2016) was issued in 2008 to provide a common basis on which protective coatings for the surfaces of nuclear power generating facilities may be qualified and selected through reproducible evaluation tests. This revision also expands the scope of this RG to address aging management of internal coatings and linings on components within the scope of license renewal under part 54 of title 10 of the *Code of Federal Regulations* (10 CFR).

Copies of the ASTM International standards identified in revision 3 of RG 1.54 are available for purchase from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19428–2959; telephone: 610–832–9585. Purchase information is also available through the ASTM Web site at <http://www.astm.org>.

II. Additional Information

The NRC published a notice of the availability of DG–1331 in the **Federal Register** on September 13, 2016, (81 FR 62935) for a 60-day public comment period. The public comment period closed on November 14, 2016. Public comments on DG–1331 and the NRC’s responses to the public comments are available in ADAMS under Accession No. ML17031A299.

III. Congressional Review Act

This regulatory guide is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting and Issue Finality

Revision 3 of RG 1.54 endorses, with certain clarifications and exceptions, the use of ASTM International Standard D 5144–08 (2016), “Standard Guide for Use of Protective Coating Standards in Nuclear Power Plants,” and multiple sub-tier ASTM International standards. The ASTM International Standard D 5144–08 (2016) was issued to provide a common basis on which protective coatings for the surfaces of nuclear power generating facilities may be qualified and selected through reproducible evaluation tests. This revision also expands the scope to include internal coatings and linings on components within the scope of license renewal. In addition, the NRC made some clarifications and format changes that did not change the intent of the guidance.

RG 1.54 Revision 3 may be applied to current applications for operating licenses, combined licenses, early site permits, and certified design rules docketed by the NRC as of the date of issuance of the final RG, as well as future applications submitted after the issuance of the RG. Such action would not constitute backfitting as defined in section 50.109(a)(1) of title 10 of the *Code of Federal Regulations* (10 CFR), or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52. Neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52, with certain exclusions discussed below, were intended to apply to every NRC action that substantially changes the expectations of current and future applicants.

The exceptions to this general principle are applicable whenever a combined license applicant references a 10 CFR part 52 license (e.g., an early site permit) or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. The NRC does not, at this time, intend to impose the positions represented in Revision 3 of RG 1.54 on combined license applicants in a manner that is inconsistent with any issue finality provisions. If, in the future, the NRC seeks to impose a position in Revision 3 of RG 1.54 in a manner that does not provide issue finality as described in the applicable issue finality provision, then the NRC must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

Dated at Rockville, Maryland, this 19th day of April 2017.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

AGENCY: Securities and Exchange Commission (“Commission”).

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (“Act”) for an exemption from section 15(a) of the Act and rule 18f-2 under the Act. The requested exemption would permit an investment adviser to hire and replace certain sub-advisers without shareholder approval.

APPLICANTS: Homestead Funds, Inc. (the “Corporation”), a Maryland corporation registered under the Act as an open-end management investment company with multiple series, and RE Advisers Corporation, a Virginia corporation registered as an investment adviser under the Investment Advisers Act of 1940 (the “Initial Manager,” and, collectively with the Corporation, the “Applicants”).

FILING DATES: The application was filed on June 21, 2016, and amended on November 1, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission’s Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on May 15, 2017, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission’s Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. Applicants, 4301 Wilson Boulevard, Arlington, VA 22203.
